The 2008–2009 University Catalog

Although this catalog was prepared on the basis of the best information available at the time of publication, all information, including statements of tuition and fees, course offerings, and admission and graduation requirements, is subject to change without notice or obligation.

The catalog is produced by the Office of University Relations, in cooperation with university administration.

Equal Opportunity/Affirmative Action

George Mason University is an equal opportunity/affirmative action institution. See the General Policies chapter in this catalog for a full statement of the university’s equal opportunity/affirmative action policies.
Table of Contents

Programs of Study ....................................... 1
   Organized by Degree Type ........................... 1
   Organized by Unit ................................. 4

About George Mason .................................. 9
   Vision for the New Century ........................ 9
   Faculty and Students ................................ 9
   Distributed University .............................. 9
   Mason, the Man .................................... 11
   University History .................................. 11
   University’s Mission ................................ 12
   Accreditation ...................................... 12
   University Foundation ............................ 12

Admission ................................................... 13
   Undergraduate Admission Policies ............. 13
   Graduate Admission Policies .................... 15
   Admission of International Students .......... 17
   Nondegree Enrollment .............................. 19
   Academic Testing .................................. 21

Tuition, Expenses, and Financial Aid .......... 23
   Tuition and Fees .................................. 23
   Expenses .......................................... 26
   Financial Aid ...................................... 26

Academic Policies ......................................... 29
   Policies and Procedures Affecting All Students ... 29
   Official Communication with Students ............ 29
   Undergraduate Policies ............................ 38
   Graduate Policies .................................. 42

General Policies ......................................... 49
   Equal Opportunity and Nondiscrimination Policy 49
   Conduct Within the University Community ...... 50
   Student Health Services .......................... 50
   Drug and Alcohol Policy .......................... 50
   Responsible Use of Computing Policy .......... 52
   Parking Policy ..................................... 55
   Other Policies ..................................... 56
   Other Regulations ................................... 56

University Academic Programs and Resources .................................. 59
   University Libraries ................................ 59
   University Ombudsman ............................. 61
   University Scholars Community ................. 61
   University Courses ................................ 61
   International Programs and Resources .......... 62

Office of Continuing Professional Education (OCPE) .................................. 63
   New Professional Studies, MA/MS ............... 64
   Reserve Officer Training Corps ................. 64
   Oak Ridge Associated Universities (ORAU) .... 66
   Center for Global Studies ....................... 66
   Center for Real Estate Entrepreneurship ...... 66

Krasnow Institute for Advanced Study ......... 67

University General Education ................. 69

Institute for Conflict Analysis and Resolution .................................. 73

College of Education and Human Development .................................. 81

**Key text for the codes and symbols, for the Programs of Study list:**

**Program Codes**
Program codes and symbols have been added to the descriptive information found in college chapters.
- Degree program or certificate program: Solid square symbol, degree-major code.
- Concentration component: Solid triangle symbol, concentration code in parentheses.

**Pending program approval notations:**
SCHEV: State Council of Higher Education for Virginia
About George Mason University

Vision for the New Century

George Mason University will be the university needed by a region and a world driven by new social, economic, and technological realities.

We are in the right place: The nation’s capital region is the epicenter of the world’s political web, its information and communications network, and its new economy.

We are ready: In an age that demands originality and imagination, Mason is among the nation’s most innovative universities.

Mason will

• Be a magnet for outstanding faculty who will devise new ways to approach problems, invent new ways to teach, and develop new knowledge for the benefit of the region and nation.

• Attract inventive, industrious students of all ages and cultures, and produce citizens who are intellectually and technologically literate—people who will lead by the force of their ideas.

• Transform into knowledge and wisdom the vast amounts of information now accessible through new technologies.

• Build strong alliances that bring the know-how of business and the community into the university, and take the knowledge of the university into the workplace and the larger society.

• Be a center of inquiry, knowledge, and professional expertise in fields with vital implications for human needs and opportunities in the future.

• Remain innovative, resourceful, and responsive, while drawing on the intellectual and cultural heritage of the classical university.

Alan G. Merten
President, George Mason University

Faculty and Students

The university’s more than 1,000 full-time instructional and research faculty members are experts in a broad range of fields. They have published widely, contributed to major research findings, and consulted with government and business officials. Faculty members have received grants and awards from the Guggenheim Foundation, the Templeton Foundation, the National Science Foundation, the National Endowment for the Arts, and the National Endowment for the Humanities, and have won Fulbright Scholar grants and Mellon Fellowships.

Of particular interest to undergraduates are the Robinson Professors, outstanding scholars in the liberal arts and sciences who have come to Mason from prestigious positions elsewhere. They are concerned with broad and fundamental intellectual issues and are dedicated to undergraduate teaching. The Schedule of Classes printed every semester provides details about courses taught by Robinson Professors.

The majority of the university’s more than 30,000 students are from Virginia; however, all 50 states and Washington, D.C., as well as 130 countries, are represented in the student body. In the Princeton Review's most recent survey of more than 110,000 students at 357 top colleges, Mason ranks second in the nation in diversity.

While full-time undergraduates, 18 to 24 years in age, make up the largest student group, part-time graduate and undergraduate students account for nearly half of the student population. Mason welcomes qualified students with a wide range of interests and backgrounds.

Distributed University

Mason is a distributed university, with three campuses in Fairfax, Arlington, and Prince William counties, an international campus in the United Arab Emirates, and satellite sites in Loudoun, Herndon, Reston, and Front Royal. Each Mason campus has a distinctive academic focus that plays a critical role in the economy of its surrounding region. At each campus, students and faculty have access to all the university’s resources, while the duplication of programs and support services is minimized through the use of technology.

Fairfax Campus

Situated on 677 acres of wooded land, the Fairfax Campus offers a wealth of opportunities beyond the numerous academic programs and continues to be the principal center for undergraduate residence and life. The resident student population is expected to grow to more than 9,000 during the next five years as new residential units are constructed.
The George W. Johnson Center, the first building of its kind in the country, fosters university-wide learning by integrating students’ curricular and extracurricular activities and strengthening relationships among university communities.

The Center for the Arts and the Patriot Center offer numerous opportunities to experience the arts, as well as sports and other entertainment. Professional artistic events presented on campus include music and dance from around the world; Theater of the First Amendment, Mason’s professional equity theater company that celebrates free speech; and regional, national, and international visual art exhibitions. Free tickets are available to these events for full-time Mason students.

The Aquatics and Fitness Center provides state-of-the-art exercise equipment, as well as competitive and recreational swimming to the university community and outside teams.

**Arlington Campus**

Located near the heart of the Washington, D.C., metropolitan area, the Arlington Campus enjoys an alliance with approximately 200 high-technology firms. Mason’s commitment to form relationships with area businesses provides students with direct access to employment experience and career opportunities.

The newest building on this campus marks the beginning of a three-phase plan to develop the 5.2-acre site. Once complete, the Arlington Campus will include 750,000 square feet of space and many new facilities to accommodate its projected 8,000 undergraduate, graduate, and professional students.

The Arlington Campus offers courses that focus on economics, public policy, and public administration, and is home to the university’s School of Law and the Institute for Conflict Analysis and Resolution. The Volgenau School of Information Technology and Engineering offers special certification courses in information technology through its TechAdvance Program. While most of the programs offered on the Arlington Campus are on the graduate and professional levels, some undergraduate courses are available.

The Arlington Campus is the location of the Mercatus Center, the James M. Buchanan Center for Political Economy, and the Institute for Humane Studies, an independent entity affiliated with the university. These groups work together on projects of mutual interest.

**Prince William Campus**

The Prince William Campus is located on 124 acres in Manassas, near the intersection of I-66 and the Prince William Parkway. The campus serves all of Northern Virginia and offers convenient access to the university for citizens of Prince William, Fauquier, and western Fairfax counties; the cities of Manassas and Manassas Park; and adjoining areas to the west and south. The campus comprises four buildings: a research facility, two academic buildings, and a recreation and fitness center.

Through mutually beneficial partnerships with local government and area businesses, the campus has positioned itself to tap into the unique assets of the surrounding community while providing access to university resources and programs for students and citizens.

A major focus of the campus is research and academic programs in the life sciences, including biodefense and infectious diseases, cancer proteomics, genomics, and bioinformatics. Construction is expected to begin in 2009 on the university’s Biomedical Research Laboratory, a regional biocontainment facility funded in part by the National Institute of Allergy and Infectious Diseases. The laboratory will house research on emerging infectious diseases, as well as those caused by biological threat agents.

Programs in nursing, teacher education, administration of justice, business, information technology, health and fitness, recreation, exercise science, health promotion, parks and outdoor recreation, sport management, therapeutic recreation, tourism and events management, and athletic training also are offered on the campus. Professional certificate programs are available through the Office of Continuing Professional Education.

Campus resources that are available to all university students, faculty, and staff include a full-service library, a large drop-in computer lab, an information center, university police, a university bookstore, dining services, student lounge space, an intercampus shuttle bus between the Fairfax and Prince William Campuses, and a full complement of student and academic services. In addition, there are numerous opportunities to get involved in campus life through a variety of cocurricular and extracurricular activities.

Many campus facilities and services are available to serve both university and community needs. The 300-seat Verizon Auditorium boasts innovative audiovisual technologies suitable for presentations, meetings, and ceremonies, along with lobby space for receptions and displays.

The 110,000-square-foot Freedom Aquatic and Fitness Center offers state-of-the-art exercise equipment, group fitness programs, a full gymnasium with elevated track, and recreational and instructional swimming in a 50-meter competition pool. It is also home to Mason’s human performance lab, classrooms, and other meeting space.

The Mason Enterprise Center is part of the university’s network of enterprise centers that has played a major role in enhancing commerce and developing new programs in support of small businesses throughout Virginia. The center brings this experience and diversity of services to support growing businesses and entrepreneurs in the Manassas and Prince William County areas. It also offers a telework center for low-cost telecommuting in a professional office environment.

Prince William County, the City of Manassas, and Mason, along with the private sector, have joined together to create the region’s first state-of-the-art performing arts center, which will be completed in fall 2009. The Hylton Performing Arts Center will educate, entertain, and enrich the community by providing world-class venues and resources for community arts groups; business, civic, and service organizations in the region; Prince William County and Manassas school students and teachers; Mason students and faculty; and outstanding professional performances by artists from around the world that appeal to a broad audience.

**Ras Al Khaimah Campus**

Recognizing the need for higher education in various fields for the people of the Middle East, Mason, with the support of the government of Ras Al Khaimah (RAK), established a campus in Ras Al Khaimah, United Arab Emirates, to serve and promote higher education in the region.
The RAK Campus offers students bachelor’s degree programs in biology, business administration, electronics and communications engineering, economics, geography, tourism and events management, communication, and applied computer science. In addition, an English language program is offered to help students acquire the reading, writing, speaking, and listening skills they will need for success in their academic studies.

Mason at RAK is in temporary quarters while the permanent campus is under construction. Once construction is complete, the campus will shift to a picturesque site on the Emirates Highway at the Umm Al Quwain-RAK border. The RAK Campus will boast state-of-the-art facilities, including well-equipped labs and a library. Also planned for the site are a recreation and fitness center, sports facilities, a cafeteria, a student lounge, and a full complement of student and academic services.

Mason in Loudoun

Mason’s new Loudoun County operation—Mason in Loudoun—aims to connect students and businesses in one of the nation’s fastest-growing areas to one of the commonwealth’s premier universities. The goal of Mason in Loudoun is to provide courses that will introduce the Loudoun-area workforce and residents to study in a number of exciting areas, while offering current students a local option toward completion of degree program requirements.

Mason in Loudoun offers course work in nursing, health science, education, information technology, and management, along with undergraduate general education courses. Full programs are available in several fields. The operation will rapidly expand its range of courses as student demand and opportunities suggest. Students enrolled in Loudoun will enjoy the same rights, privileges, and access as those on Mason’s Fairfax, Arlington, and Prince William Campuses.

Satellite Sites

The Office of Continuing Professional Education’s Herndon Training Center, located off the Dulles Toll Road and Route 28, provides a wide range of yearly open-enrollment seminars and workshops in its meeting facilities. The Center for Innovative Technology (CIT) classrooms are fully electronic and include a groupware platform. The School of Management’s Executive MBA Program and the Volgenau School of Information Technology and Engineering’s TechAdvance Program are located here.

Each spring the university offers a Smithsonian Mason Semester at the National Zoo’s Conservation and Research Center in Front Royal, Virginia. Students live on site at one of the premier conservation facilities in the world and get to learn from prominent research scientists, educators, and conservation practitioners in a unique learning community.

As a result of his influence, the first 10 amendments, which we know as the Bill of Rights, were added to the U.S. Constitution. The universal significance of this action made the American Revolution much more than a war for independence from Great Britain; it enshrined in our most important public document the principle that a government must always respect the rights of the people.

George Mason, a slave owner, did not recognize that those rights extended to slaves. Nevertheless, his words were later used to demonstrate that slavery could not exist in a country that proclaimed its belief in human rights. While we as a country have not always adhered to George Mason’s great ideas, they remain the measure of the best in our national life.

University History

The university’s growing reputation as an innovative educational leader is rooted in Virginia’s strong educational tradition. By emphasizing high technology, public policy, and the fine and performing arts, Mason has created a curriculum and mission to meet the needs of Northern Virginia’s extraordinary cosmopolitan constituency.

The idea for George Mason University was born in 1949 when the Northern Virginia University Center, essentially an adult-education extension of the University of Virginia at Charlottesville, opened under the direction of John Norville Gibson Finley. In 1955 and again in 1956, the Board of Visitors of the University of Virginia and Virginia legislature authorized the establishment of a two-year branch college to serve Northern Virginia.

The university’s formal history began in 1957 as University College, the Northern Virginia branch of the University of Virginia, offering courses in engineering and the liberal arts. It opened in a renovated elementary school in the Bailey’s Crossroads area with an enrollment of 17 students.

Eager to support the fledgling institution, the Town (now City) of Fairfax purchased 150 acres in 1958 and donated the land to the University of Virginia for a permanent branch campus. The following year, the University of Virginia Board of Visitors selected the name George Mason College. Construction of the campus’ first four buildings was completed in 1964. In September of that year, 356 students began their studies in the new classrooms.

In March 1966, the General Assembly authorized the expansion of George Mason College into a four-year, degree-granting institution and gave it the long-range mandate to expand into a major regional university. The first senior class received degrees in June 1968. Graduate programs began in September 1970, with the first master’s degrees conferred in June 1971. The George Mason College Board of Control, supported by citizens of the cities of Alexandria and Falls Church, and Arlington and Fairfax counties, acquired an additional 422 acres. By the end of 1970, the college’s Fairfax Campus reached 572 acres; it is now 677 acres.

In 1972, the Board of Visitors of the University of Virginia recommended that the college separate from its parent institution. On April 7 of that year, the governor signed the General Assembly legislation that established George Mason University as an independent member of Virginia’s system of colleges and universities.

George Mason, the Man

When George Mason (1725–92) wrote the Virginia Declaration of Rights in 1776, he gave America the noble concept that the rights of the individual must be protected against the power of government. By placing in Virginia’s first constitution a list of rights that could never be taken away from citizens, George Mason sought to ensure a society in which government could not become all-powerful.
Since 1972, the university’s development has been marked by rapid growth and innovative planning. In 29 years, enrollment has risen from 4,166 to more than 30,000 students in 2007. In 1979, Mason was given the authority to grant doctoral degrees and began offering programs at this level. In the same year, the university acquired what became George Mason University School of Law, located on the Arlington Campus.

In 1984, the first Robinson Professors, a group of outstanding scholars committed to undergraduate teaching and interdisciplinary scholarship, joined the faculty as the result of a generous bequest from the estate of Clarence J. Robinson. Drawing prominent scholars from all fields, Mason’s outstanding faculty includes Pulitzer Prize winners; Nobel laureates; Institute of Electrical and Electronics Engineers Centennial Medalists; and recipients of numerous Fulbright, National Science Foundation, and National Endowment of the Arts grants and awards, among others. More than 30 endowed chairs at the university have also brought many artists and scholars to campus.

In 1985, Mason partnered with area businesses to develop an engineering program geared toward the emerging information technology field and started what is now the Volgenau School of Information Technology and Engineering. With the Volgenau School, Mason was the first institution in the country to offer a doctoral degree in information technology.

The establishment in 1990 of the Institute of the Arts, which became the College of Visual and Performing Arts in 2000, solidified the university’s commitment to make the arts an integral part of students’ lives. The Center for the Arts and the arts complex, which includes art galleries, studio and rehearsal space, and performing venues such as Harris Theater and TheaterSpace, are all components of the college.

On the Fairfax Campus, the innovative George W. Johnson Center was dedicated in April 1996. By combining student life resources with educational support facilities such as an interactive library, Mason created the learning workspace of the future. Educational administrators from around the world have toured the center.

The university’s facilities continue to grow. Innovation Hall on the Fairfax Campus was completed in 2003 and holds state-of-the-art electronic classrooms and a television studio. In 2006, the university opened its first facility dedicated to research. Research I contains an observatory and laboratories for a number of campus research centers. Plans for Research II are already under way.

The university has achieved national distinction in many areas. Its reputation continues to grow as Mason provides educational, cultural, and economic resources not only for the people of Virginia, but also the nation and the world.

### University’s Mission

The mission statement of the Board of Visitors was adopted in 1991. It reads as follows:

“George Mason University will be an institution of international academic reputation providing superior education for students to develop critical, analytical, and imaginative thinking and to make well-founded ethical decisions. It will respond to the call for interdisciplinary research and teaching, not simply by adding programs but by rethinking the traditional structure of the academy.

“The university will prepare students to address the complex issues facing them in society and to discover meaning in their own lives. It will encourage diversity in its student body and will meet the needs of students by providing them with interdisciplinary and innovative undergraduate, graduate, and professional courses. The university will energetically seek ways to interact with and serve the needs of the student body.

“The university will nurture and support a faculty that is diverse, innovative, excellent in teaching, active in pure and applied research, and responsive to the needs of students and the community. The faculty will embody the university’s interactive approach to change both in the academy and in the world.

“The university will be a resource of the Commonwealth of Virginia, serving both private and public sectors. It will be an intellectual and cultural nexus between Northern Virginia, the nation, and the world.”

### Accreditation

Mason is accredited by the Commission on Colleges of the Southern Association of Colleges and Schools to award bachelor’s, master’s, and doctoral degrees. The university is a member of the Council of Graduate Schools in the United States.

### University Foundation

Established in 1966, the George Mason University Foundation works to advance the aims and purposes of the university. It is a 501(c)(3) nonprofit foundation organized and operated exclusively for the benefit of the university.

The foundation assists Mason in generating private support and manages, invests, and administers private gifts, including endowment and real property. The foundation is governed by a volunteer Board of Trustees that is led by a chair. The vice president of university development and alumni affairs serves as the foundation president.
Admission

Undergraduate Admission Policies

Admission is competitive because the number of qualified candidates exceeds the number of new students who can be accommodated. Each candidate who presents sufficient admission qualifications is reviewed in the context of other qualified applicants. An offer of admission is valid only for the semester for which the student applied. Programs with limited space or special requirements may need a second review process for admission.

Applying for Admission

Application for undergraduate admission should be made to the Office of Admissions. Applications are available at admissions.gmu.edu/applynow. A nonrefundable and nontransferable fee must accompany the application.

Application Deadlines for Freshmen and Transfer Students

The application deadline for fall admission is January 15 for freshman applicants and April 1 for transfer applicants. The application deadline for the spring semester is October 15. Mason encourages early applications from prospective freshmen who wish to be considered for academic scholarships. The university reserves the right to close applications before published deadlines if conditions so warrant. Admission is contingent on satisfactory completion of in-progress course work and graduation from high school.

Early Admission

High school juniors who have completed high school graduation requirements except for senior English and government courses may, with the approval of their high school guidance counselor or principal, apply for admission and thereby enter the university one year early. Applicants should present exceptional grades, Scholastic Assessment Test (SAT) or American College Test (ACT) scores, and a high school course of study demonstrating rigorous academic preparation for university-level work. Candidates for this program must arrange an interview with the dean or director of admissions.

Admissions Committee

The Admissions Committee reviews undergraduate admission decisions and appeals. In addition, the Admissions Committee or the Office of Admissions may make other stipulations or recommendations regarding admission of an individual.

Freshman Requirements

The following factors are considered when reviewing freshman applications for admission:

- Cumulative high school grade point average (GPA) for course work completed in grades 9 through 12
- Level of difficulty of course work elected throughout the high school years, particularly in English, mathematics, laboratory science, social science, and foreign language
- Scores from SAT I or ACT (see exceptions under Score Optional Consideration below)
- All non-native English speakers are required to submit scores from the Test of English as a Foreign Language (TOEFL) or the International English Language Testing System (IELTS) exam.
- Essay(s)
- List of extracurricular activities
- Teacher and guidance counselor recommendations

Fall semester applicants whose applications are complete by the application deadline are notified of decisions by April 1. All other applicants are notified on a space-available basis.

The following table specifies the minimum units of college preparatory work required for admission, as well as the minimum units recommended. The recommended units reflect the typical high school program of students who have succeeded in competing for admission in recent years.

In the following chart, column (1) refers to students applying for a bachelor of arts, excluding those in column (3); bachelor of fine arts; bachelor of music program; or with an undeclared major. Column (2) refers to students applying to a bachelor of science degree program, excluding those in column (3). Column (3) refers to applicants who intend to major in prebusiness, chemistry, computer science, engineer-
ing, geology, mathematics, or physics. Note that one unit equals one academic year of study.

**Selected from biology, chemistry, physics, or other advanced lab science

### Freshman Score Optional Consideration

Score optional review provides an opportunity for applicants to be considered for admission without submitting or in disregard of standardized test scores. Admission to Mason remains a highly competitive process, and score optional candidates will be considered on their own merits. Qualifying for score optional review does not guarantee admission to Mason. Qualifications required for score optional consideration can be found at admissions.gmu.edu/scoreoptional.

### Acceptance of Freshman Admission Offer

Mason complies with the national freshman candidate reply date of May 1. Students confirm by completing the enrollment confirmation form in the admission packet and submitting it to the university with an enrollment deposit. The deposit is nonrefundable after May 1.

### Transfer Requirements

Application for admission as a transfer student is competitive. Transfer applicants must submit official transcripts from each Collegiate institution attended. Transfer applicants with fewer than 30 transferable credits must also submit a copy of their secondary school record and test scores. All non-native English speakers are also required to submit a TOEFL or IELTS score or acceptable grades (C or better) in at least two English composition or literature classes taken at another U.S. university or college.

Students on active social or academic probation, suspension, or dismissal are not eligible for transfer admission. Transfer applicants who have been out of school for a semester or longer, excluding summers and school-designated breaks, must provide the Admissions Office with a statement describing activities during this period. A résumé may be submitted in lieu of a statement.

### Transfer Credit

A student transferring into Mason receives a formal evaluation of transfer credit after admission and receipt of enrollment confirmation by the Office of Admissions. The student is responsible for seeing that the Office of Admissions receives official final transcripts of all course work taken elsewhere.

In general, credits are accepted from regionally accredited institutions, provided that a grade of C or better has been earned in the course and the course content is equal to that offered at Mason. Note that only credits, not grades, are transferred; grades for transferred courses will not become a part of a student’s GPA at Mason. Transfer credit is not granted for study in unaccredited institutions.

Forty-five credits of upper-level course work must be completed in residence at Mason to qualify for graduation. While lower-level courses taken at previously attended institutions may meet the content requirement of some upper-level courses, they do not reduce the 45-credit requirement.

Students enrolled on a campus of the Virginia Community College System (VCCS) may access credit equivalency and articulation information at admissions.gmu.edu/TransferGuide. Students accepted into a degree program at Mason are usually not expected to pursue simultaneous course work elsewhere. For more information, go to the Credit to Be Earned at Other Institutions section in the Academic Policies chapter of this catalog.

### Application for a Second Bachelor's Degree

Application for a second bachelor’s degree after conferral of a first degree from any accredited institution must be conducted through the Office of Admissions. After admission, the student will work with the academic program to develop an approved contract or course of study of at least 30 credits beyond the first degree, taken after admission to the second degree to meet university residency requirements. While this contract will detail college level and major requirements to be met, these students do not have to meet Mason’s additional general education requirements.

### Enrollment after Previous Attendance

Students in good academic standing who have missed two or more consecutive semesters of enrollment (excluding summer term) at Mason and do not meet any of the excluded categories listed below may re-enter by completing a re-enrollment form available through the Registrar’s Office or at registrar.gmu.edu/forms/index.html. For graduate students and some undergraduate programs, academic department approval is also required.

### Readmission after Previous Attendance

Students who have missed two or more consecutive semesters of enrollment (excluding summer term) at Mason must apply for readmission through the Office of Admissions if any of the following conditions are true:

- The student is an undergraduate returning after any absence during which he or she studied at another institution, without prior written permission of his or her school or college. Such students must reapply as transfer students.
- The student is international with F-1 or J-1 immigration status.
- The student was suspended or dismissed from any college or university for nonacademic reasons.
- The student was academically dismissed from Mason.
- The student was ever convicted of a felony.
Right to Withdraw Offer
Mason reserves the right to withdraw offers of admission if applicants fail to satisfy all requirements or it is determined that admission was obtained through the use of incomplete, falsified, altered, or embellished information. In the case of withdrawal of admission from a matriculated student, credit earned at Mason may be withheld.

Graduate Admission Policies

Admission to graduate programs is competitive. Selection criteria differ by program and are established by departmental faculty. Applicants are evaluated on the strength of their academic background, results of standardized exams (if required by the program), work experience, and any additional evidence of potential success in the program. Each year, departmental faculty members determine the number of admission offers they may extend by the university resources available for their program.

Admission Standards
To be considered for degree status, the general university graduate admission requirements are as follows:

• An earned baccalaureate degree from a regionally accredited institution of higher education or international equivalent must be verified from official transcripts. (For details, see Admission of International Students section.)
• A 3.00 GPA on a 4.00 scale or better in baccalaureate study. The GPA requirement may be higher for some graduate programs. For students with postbaccalaureate credits, a separate GPA is calculated for each institution. Note: The difficulty of the baccalaureate degree and work experience may be considered in assessing the requirements for admission.

Provisional Admission
A degree-seeking graduate applicant with a baccalaureate degree who has not met all admission requirements may, at the discretion of the college or department, be offered provisional admission if sufficient evidence is presented to suggest the applicant has the ability to pursue graduate work. As a first priority when starting the graduate program, a provisionally admitted student must satisfy the conditions of admission. Once the student has satisfied the conditions specified in the offer of admission and submitted all admission credentials, the provisional qualifier will be removed from the student’s record. Written confirmation indicating the removal will be sent to the student from the college, school, or institute dean or director.

If the student does not meet the conditions within the first 12 credits (or a more restricted time frame specified by the department in the offer of provisional admission), the student will be terminated from the program. All applicants admitted provisionally are in degree-seeking status, and course work taken appears as part of their graduate-level transcript. Students in provisional status may not take courses in the consortium or elsewhere or transfer graduate course work into their program until the provisions of admission have been met.

Graduate Application Requirements
For full consideration for graduate admission, applicants must submit the following:

• Completed Application for Graduate Study
• Nonrefundable application fee
• Application for Virginia In-State Tuition Rates, if claiming entitlement to these rates
• Two official transcripts from all institutions attended for each program applied to unless the programs are in the same college or school
• Goals statement
• Letters of recommendation as required by the program
• Official exam scores, such as GRE or GMAT, reported directly from the appropriate testing service, as required by the program
• Other materials specified by the program, including departmental forms, portfolio, or interview

International applicants should read the Admission of International Students section for more information. Specific departmental admission requirements for degree-seeking students are listed in this catalog under the relevant discipline.

Application Processing Centers
The graduate admissions process is decentralized at Mason. Applicants should send their applications and support documents directly to the Graduate Admissions Application Processing Center assigned to their program. Specific mailing instructions are listed in the Application for Graduate Study, as well as below. Once a graduate application is complete and ready to be evaluated for admission, the graduate application file is sent to the academic department for review by the Faculty Admissions Committee. An applicant is notified by mail of the admission decision.

Below is a list of the Graduate Admissions Application Processing Centers with contact information. Graduate admission questions may be directed to the specific center assigned to an applicant’s program by school, college, or institute.

Graduate Admission Exams

Although some graduate programs do not require standardized tests, almost all use test scores as an additional measurement of an applicant’s qualifications. For departmental admissions test requirements, consult the table at admissions.gmu.edu/grad.

Information and registration bulletins for all national graduate admissions exams are available at the university Admissions Office.

The GRE may be taken in two forms: the general exam and subject exam. Some departments require official scores for both types of exams. Students may schedule the computer-based GRE general exam by calling 800-473-2255. Students may register for the GRE subject exam online at www.gre.org. To have GRE scores sent to Mason, please use school code 5827.

The GMAT is required of all applicants seeking admission to any SOM degree program and may be taken in lieu of the GRE for the MS in information systems. Students may schedule the computer-based GMAT online at www.mba.com. The various programs at Mason all have separate GMAT codes. For the appropriate code for your program of interest, go to www.mba.com.

The GMAT is also permitted for some programs in the Volgenau School for the master’s in information systems or the master’s in e-commerce programs. Be sure to send your score to Mason by using the correct program code.

The Miller Analogies Test (MAT) is a test of 100 analogies and may be a substitute for the GRE in some graduate programs. To have official MAT scores sent to Mason, use Mason’s MAT code 1768. For information about scheduling the MAT, call 800-622-3231 or go to www.tpcweb.com.

The Praxis I is required by the College of Education and Human Development for graduate applicants to initial teacher licensure programs. Students may schedule the Praxis I by calling 800-853-6773. Passing scores on both Praxis I and Praxis II exams are required for program completion.

The TOEFL is required of all applicants whose native language is not English and who have not received a degree from a university in the United States, Canada, United Kingdom, Australia, or New Zealand. To have TOEFL scores sent to Mason, use school code 5827.

The IELTS may be substituted for the TOEFL. Please see this chapter for additional information on English language testing requirements. Further information can be found at www.toefl.org and www.ielts.org.

Foreign Language Requirements

Certain graduate programs require students who have not already completed 12 undergraduate credits in a foreign language to satisfy a foreign language requirement, which may be accomplished by taking the appropriate courses or demonstrating the equivalent proficiency by passing an exam. Contact the academic program for information on demonstrating language proficiency. Exams are administered by the Department of Modern and Classical Languages.

Admission of Graduate Degree Holders

Those holding one or more graduate degrees may earn an additional graduate degree in another discipline. For admission to a second graduate degree program, students should

submit an application, transcripts, and other documents as required by the second degree program. Course credits used to satisfy the degree requirements for the first graduate degree may not be used to satisfy the degree requirements for the second graduate degree. In programs with overlapping or similar requirements, students will be advised in the subsequent degree program regarding appropriate course substitutions for subjects already covered.

Offer of Admission
The written offer of admission specifies the effective date of admission, category of admission offered, and name of the faculty advisor assigned to the applicant. This offer is good only for the semester for which the applicant applies. The offer must be accepted by returning an Intent to Enroll form and a deposit, if required by the school or college. Those whose offer of admission has lapsed must submit a new application and fee to be reconsidered for admission at a later date. Students may simultaneously apply for more than one graduate program, but if they are admitted to more than one program, they may accept only one offer and pursue only one degree program at a time.

Right to Withdraw Offer
Mason reserves the right to withdraw offers of admission if applicants fail to satisfy all requirements or it is determined that admission was obtained through the use of incomplete, falsified, altered, or embellished information. In the case of withdrawal of admission from a matriculated student, credit earned at Mason may be withheld.

Reactivation of Deferred Applications
Applicants are notified when action on an application has been deferred pending completion of courses that are prerequisite to graduate study in a chosen field. Applicants are encouraged to notify their program’s Graduate Admissions Processing Center in writing as soon as prerequisites have been met. Applicants are responsible for furnishing official transcripts confirming that prerequisite courses have been satisfactorily completed. An admission decision cannot be made until these grades are received.

Change in Field of Graduate Study
Admission for graduate study is admission to a specific program. Therefore, a student is not free to change graduate programs at will. Students seeking to change from one field of study to another must submit a new application, application fee, as well as official transcripts and proof of degree from prior institutions. Previous acceptance into one graduate program does not guarantee acceptance into another.

Graduate Study during Summer Term
Applicants planning to begin graduate work in a summer term must complete a standard application for graduate admission and be formally admitted before registering for classes. Note that not all graduate programs admit for summer term; however, students accepted for fall are considered admitted students, and some graduate programs may allow students to take courses during the preceding summer.

Records Maintenance and Disposal
All admission documents, including academic records sent from other institutions, become part of the official university file and cannot be returned nor duplicated for any purpose. Students should maintain copies of official credentials for other personal use.

Admission credentials are retained for only 12 months. They are subsequently destroyed if applicants do not register for courses within the period for which the offer of admission is valid; have been denied admission; do not respond to requests for additional information; or fail to submit complete applications, including all official transcripts and test results.

Admission of International Students

General Requirements
Application for admission by international students holding or seeking F-1 or J-1 visas should be made directly to the Office of Admissions. Deadlines for the fall semester are before January 1 for undergraduates and February 15 for graduates. For the spring semester, the deadline for all applicants is October 1. These deadlines ensure adequate time to process applications and prepare immigration documents. All international applications must be accompanied by a nonrefundable application fee. Items that must be submitted with the application form are official transcripts and degree certificates (in original language and, if applicable, certified English translation); evidence of English proficiency (via official score reports from the TOEFL or IELTS exam); the International Student Information Form; financial-support documents; copy of passport identification page; and for those present in the United States, copies of immigration documents verifying current nonimmigrant status. Please visit admissions.gmu.edu for full details on items required and deadlines.

Applications from international students are reviewed with all other applications. Admission to the university is competitive; therefore, while minimum standards ensure that an application will be considered, they do not guarantee admission. The number of applicants, qualifications of the applicant pool, and the amount of available space determine the number of admission offers that Mason can make. In addition to overall admission requirements, some schools and colleges have individual requirements for acceptance into the major. For more information, see school or college admission requirements.

Applicants who are accepted to a program will receive a written offer of admission. Most students come to the United States on an F-1 visa, but students who are sponsored by the U.S. government, their home government, or another organization may be required to enter the United States on a J-1 Exchange Visitor’s Visa. To be issued an immigration document (Form I-20 for F-1 status or Form DS2019 for J-1 status), students must prove they have sufficient financial support to cover their expenses while at Mason. If the documentation submitted is satisfactory, the university will issue Form I-20 for F-1 status or Form DS2019 for J-1 status and mail it to the address indicated on the International Student Information Form.

International students outside the United States must take the immigration document to the U.S. embassy or consulate nearest their place of residence and apply for an F-1 or J-1 student visa. The basic requirements for obtaining a student
Admission

visa are a letter of admission, evidence of financial support, an immigration document issued by the school they wish to attend, a valid passport, and proof of strong ties to the home country. For more information about the visa application process, check with the nearest U.S. embassy or consulate, or go to the Department of State’s web site: www.state.gov.

Students in a nonimmigrant visa category other than F-1 or J-1 may submit the International Student Information Form and copies of immigration documents indicating their immigration status. They do not need to submit financial-support documents unless they plan to change to a student visa. For more information pertaining to immigration status, contact the Office of International Programs and Services (OIPS) at 703-993-2970. Additional information is available on the OIPS web site: oips.gmu.edu.

Freshman and Transfer Requirements

A transfer student is one who has completed course work at a college or university after graduating from high school. In addition to the requirements defined for all applicants, international students must meet the following standards:

• Freshman applicants must submit certified official copies of all secondary or high school transcripts in the original language along with an English translation, if applicable. Results of any exit certificates or university entrance exams also must be submitted.

• All freshman applicants are required to submit satisfactory scores on the SAT I or ACT.

• Applicants must demonstrate English proficiency. Applicants whose native language is not English are required to submit TOEFL or IELTS results. To be considered for admission, applicants must have scored at least 230 on the computer-based TOEFL, 88 on the Internet-based TOEFL, 570 on the paper-based TOEFL and 4.5 on the TOEFL essay, or must have received a score of 6.5 or higher on the IELTS. Official test scores must be sent directly from the Educational Testing Service or IELTS. For more information, contact OIPS.

• All transcripts from colleges or universities outside the United States must be translated into English and evaluated by a recognized U.S. evaluation service free of charge for all international transcripts. Because of volume, more time may be needed to process applications requiring a Mason evaluation. For expedited service, applicants can submit their documents to a recognized U.S. evaluation service at their own expense. A list of recognized evaluation services is available in the Mason’s Admissions Office or at www.naces.org.

• Graduate students’ documents should show the award of either a bachelor’s degree or equivalent, or a graduate degree.

Special Conditions for International Applicants

In addition to the academic requirements listed above, international students must meet the following conditions:

• Federal regulations prohibit students on visitor visas (B-1 and B-2) from enrolling in school. Students who entered the United States on a visitor visa should not plan to study. For more information, contact OIPS.

• Federal regulations prohibit F-2 spouses of F-1 students from engaging in full-time study, and F-2 children may engage in full-time study only from kindergarten through 12th grade. F-2 dependents may engage in study that is avocational or recreational in nature. F-2 dependents seeking to pursue full-time or degree study in the United States must change their status to F-1. For more information, contact OIPS.

• Students enrolled at the university on F-1 or J-1 nonimmigrant status must maintain full-time enrollment each semester (12 credits for undergraduate, usually 9 credits for graduate), excluding summer term. Because of this requirement, F-1 or J-1 international students do not qualify for part-time programs nor can they begin their program in the summer.

• Prospective students who seek to enter the United States on F-1 or J-1 immigration status, or seek to transfer to Mason if already in the United States must complete the International Student Information Form, which can be downloaded from admissions.gmu.edu. The form and financial support documents must be submitted to the admissions office along with the application.

• For those students already in the United States, copies of immigration documents verifying current nonimmigrant status must be submitted with the application form.

• To be issued an immigration document, sufficient evidence of financial support, including an original bank statement, scholarship letter, sponsor’s salary statement, or graduate assistantship offer letter, must be provided to cover the first
year of study. Students must also demonstrate the source of financial support for all subsequent years of the program. The International Student Information Form gives an estimate of annual expenses, including tuition, living expenses, and health insurance. Students may not submit statements of stocks, bonds, or company assets. Financial support statements must show available cash and not be older than six months.

- All new students at the university must submit an Immunization Form Card signed by a health professional. The form, available at [www.gmu.edu/student/hcs/form.pdf](http://www.gmu.edu/student/hcs/form.pdf), verifies that immunizations are current. The immunizations required are measles/mumps/rubella and tetanus/diphtheria. Hepatitis B (series of three) and meningococcal vaccines are also encouraged. A tuberculosis screening is required of students from high-risk countries as determined by the Centers for Disease Control and Prevention.

- Financial sponsors who wish to be billed directly must provide a U.S. billing address. Mason does not bill third parties overseas. It is the student’s responsibility to make sure tuition and fees are paid on time.

Health Insurance
University policy requires all students on F-1 or J-1 visa immigration status to have health insurance. The plan must
- Include coverage for health care expenses of at least $50,000 per accident or illness.
- Have an annual deductible amount that does not exceed $500. (The deductible amount is the sum that must be paid by the person enrolled in the health care plan before the insurance company will start to pay any of the bills.)
- Be valid through August 15 of the following year.
- Cover the cost of medical evacuation ($10,000) and repatriation ($7,500).
- Have coverage provided by a company licensed to do business in the United States and has an U.S. claims office and telephone number. (Foreign state government plans that do not meet this requirement will not be accepted.)
- Provide coverage within a radius of 50 miles in the Fairfax area for outpatient and inpatient medical care. (A policy that provides coverage in the Fairfax area on an emergency-care-only basis does not meet this requirement.)
- Provide coverage within a radius of 50 miles in the Fairfax area for outpatient and inpatient medical care, including suicide attempts, as well as substance and alcohol abuse treatment.
- Be paid in full and cannot be cancelled for the remaining academic year. (Monthly payment plans do not qualify, and students need to show proof that insurance is paid in full.)
- Cover pre-existing conditions within six months of the student being insured.
- Include maternity and pregnancy care.

Federal law requires all students on a J-1 visa and their dependents to have health insurance that includes coverage for medical evacuation and repatriation. Medical evacuation coverage pays for returning seriously ill students to their home country, and repatriation coverage pays for returning students’ remains to their home country.

Mason offers health care insurance that meets the requirements for students on J-1 and F-1 visas. When international students register for classes, the cost of this coverage is automatically billed to their accounts by the Office of Student Accounts and is due with the tuition payment. Failure to pay or obtain an exemption may result in cancellation of class registration. Late fees up to $250 may be assessed if charges are not paid by the date established by the Cash Office.

International students are required to purchase insurance for the entire year; however, if a student graduates or terminates attendance before the end of the insurance year, the student may receive a prorated refund by submitting a written request along with proof of return to the home country.

Exemptions from Health Insurance
Exemptions from health insurance requirements for international students are granted by the university’s Student Health Insurance Office. Conditions under which exemptions may be granted include
- Students with the following sponsored foreign government plans are automatically eligible for exemptions: Kuwait, Saudi Arabia, Hariri Foundation, Oman, Qatar, United Arab Emirates, Egypt, and Malaysia (MSD or MARA plans only). Students must inform the insurance office accordingly.
- Students with evidence of an alternative insurance policy that meets the requirements for coverage may be eligible for an exemption. It is the student’s responsibility to apply for an exemption. During the student’s first semester at Mason, an exemption must be obtained from the Student Health Insurance Office no later than one week after the last day to add classes. A late waiver fee of $50 will be assessed if the application is received after that established deadline. No waivers will be processed after the end of the month of that established deadline.

A continuing student is required to establish eligibility for an exemption no later than one week after the last day to add classes of each fall semester. More information is available online at [www.gmu.edu/student/hcs/ins](http://www.gmu.edu/student/hcs/ins).

Nondegree Enrollment

Nondegree Status
Nondegree status enables students who have no immediate degree objective or may need to satisfy prerequisites for admission to a degree program to enroll in courses for which they are qualified without seeking formal admission to a degree program. Enrollment in specific courses is based on eligibility criteria and availability of space in courses; in high-demand fields, enrollment may be restricted or prohibited.

All nondegree applicants must complete a nondegree online application for admission and supply official transcripts from all postsecondary institutions they have attended. High school guest matriculant applicants must submit an official high school transcript, as well as SAT or ACT scores. Secondary school reports and a written recommendation from their guidance counselor are also preferred.
Nondegree applications and their established deadlines are available online at admissions.gmu.edu.

Standards for Admission
Admission to Mason as a nondegree student is competitive and also based on space availability. Nondegree admission is not automatically granted, and nondegree admission does not guarantee enrollment in any specific course or any future degree programs. Nondegree applicants must meet the standards for admission that would apply to the equivalent degree-seeking status.

Graduate Nondegree
Applicants seeking to take graduate-level courses or graduate prerequisite courses must meet graduate admission standards. These students will be considered graduate level even if they are taking undergraduate courses. Individual units and majors may have additional requirements for nondegree graduate status (see below). A student cannot graduate or receive a degree while in nondegree status. All master’s programs require at least 18 credits to be completed in degree status at Mason to be considered for graduation, and some graduate programs allow a maximum of 6 credits to be transferred from nondegree status. It is strongly recommended that students who plan to seek a degree from Mason apply for degree status admission as soon as possible.

Nondegree students are expected to meet the same academic standards as degree-seeking students. See Academic Termination in the Graduate Policies section of the Academic Policies chapter in this catalog.

Undergraduate Nondegree
Applicants who do not have a bachelor’s degree but have graduated from high school or received a GED and have earned a minimum of 24 semester hours of transferable credit may apply for nondegree admission. Transcripts from all colleges attended are required. High school transcripts and SAT or ACT scores may be requested.

Applicants with a bachelor’s degree seeking to take undergraduate courses toward a second bachelor’s degree or for personal development must meet the standards for admission for a bachelor’s degree. These students will be considered undergraduate students and are not eligible to take graduate courses or receive graduate academic advising. Students who later seek to enroll in graduate courses or wish to receive graduate academic advising must submit a new nondegree graduate application and be reconsidered for admission.

Nondegree Studies students are allowed to register for a maximum of 10 credits per semester. A maximum of 18 undergraduate credits may be applied to an undergraduate degree program upon approval of the undergraduate program’s dean.

All undergraduate nondegree students are subject to the academic standing regulations and sanctions described in the Requirements for Retention section in the Academic Policies chapter of this catalog.

High School Guest Matriculants
High school juniors or seniors who are currently enrolled in good standing in high school but have not yet graduated from high school and do not have a GED may be considered for admission as high school guest matriculants. These applicants will be evaluated based on their academic performance in high school. Recent SAT I or ACT test scores and recommendations from guidance counselors and teachers may also be requested. Only students who have excelled in high school and demonstrate the preparation and maturity indicative of the potential to succeed in Mason’s competitive course work will be admitted. Mason cannot guarantee that courses will fulfill high school graduation requirements or that courses taken while in High School Guest Matriculant status will transfer to other institutions.

Academic Advising, Action
Upon initial enrollment, nondegree students are assigned to one of the colleges, schools, or institutes at Mason according to their original course selection and level (graduate or undergraduate). Once assigned, the academic unit is responsible for advising and handling requests that require a dean’s permission.

Grades earned through Nondegree Studies remain a part of the student’s permanent nondegree record and are recorded on the standard university nondegree transcript. They will not appear on the degree transcript unless the student is accepted to a degree program and permission is given by the dean to apply the nondegree credit to the degree program.

Senior Citizens
Under terms of the Senior Citizen Higher Education Act of 1974, eligible Virginia residents 60 years of age or older, with a taxable income not exceeding $15,000, are entitled to enroll in courses offered for academic credit, on a space-available basis, without paying tuition and enrollment fees. Senior citizens who meet the income eligibility requirement and have completed a minimum of 75 percent of degree requirements may enroll in a degree program during normal registration periods without paying tuition and enrollment fees. The admissions application fee cannot be waived.

Citizens who wish to take advantage of this act must complete the online nondegree or degree application found at admissions.gmu.edu. Upon approval of their admissions application, senior citizens can request a waiver of tuition and enrollment fees by completing the Senior Citizen Tuition Waiver Form, available from the registrar’s office or online at registrar.gmu.edu/forms/index.html. To facilitate processing, senior citizens should provide their Mason student identification number on the waiver form.

In addition, the act allows senior citizens to audit courses (no academic credit is received) and enroll in up to three noncredit courses per semester without paying tuition and enrollment fees, regardless of the taxable income level. Students seeking to audit a class must notify the Registrar’s Office when registering for classes. Students seeking to enroll in noncredit courses should contact the Office of Continuing Professional Education at 703-993-2109. Fees for course materials may apply to senior citizen enrollees, and tuition may be charged for courses designed exclusively for senior citizen groups. Senior citizens must adhere to all registration policies and follow normal procedures to add and drop courses within the deadline dates outlined in each semester’s academic calendar.
Graduate Nondegree Status

The Volgenau School of Information Technology and Engineering

Admission for nondegree graduate study is suitable for those who do not want to pursue a degree but are interested in taking graduate courses from the Volgenau School of Information Technology and Engineering. The Volgenau School nondegree graduate application forms are available on the web at admissions.gmu.edu. The following application materials should be submitted for consideration:

- The Volgenau School online nondegree application
- Official transcripts indicating confirmation of bachelor’s degree
- Nonrefundable application fee

Approval for nondegree status does not guarantee admission to a degree program at a later date. Up to 12 credits taken in nondegree status may be transferred to a Volgenau School degree or certificate program, subject to the general rules for transfer of graduate credit. Students who do not register for the term for which they are accepted may have their enrollment postponed for one semester upon written request to the Admissions Office. More information about the Volgenau School programs and course offerings may be obtained from the Volgenau School departmental offices or the Volgenau School Graduate Admissions Office, Science and Technology II, Room 133, 703-993-1512.

College of Science (COS)

Nondegree status is available for professionals who are interested in taking a limited number of courses without committing to a degree or certificate program. Up to 12 credits taken in nondegree status may be transferred to one of the COS academic programs at a later date. Approval for nondegree status does not guarantee admission into an academic program. For admission into nondegree status, the student should have a 3.00 GPA or higher and a BS degree in mathematics, computer science, engineering, natural science, or a related field. Exceptions are reviewed on an individual basis.

The following application materials should be submitted for consideration:

- COS nondegree application
- Official transcripts
- A nonrefundable application fee
- Résumé

The COS nondegree application can be downloaded from cos.gmu.edu.

School of Public Policy (SPP)

Students are welcome to apply for nondegree study in SPP for fall and spring terms only. To apply, students should complete the nondegree application online at admissions.gmu.edu/applynow. In addition to completing the online application, students are required to submit official transcripts from all institutions attended. Nonnative English speakers must present a minimum TOEFL score of 230 on the computer-based exam or 575 on the paper version. For more information, call the SPP Admissions Office at 703-993-8099.

Summer Term

Phone: 703-993-2300
Fax: 703-993-8871
Web: summer.gmu.edu

Summer enrollment is open to eligible undergraduate, graduate, and nondegree students. Summer term offers day and evening classes in four five- to eight-week sessions. Academic departments take advantage of the summer term’s unique opportunities to schedule innovative, as well as traditional, courses. Many undergraduate and graduate students use summer term to continue their academic progress. Continuing Mason students can register for summer online. Students who are new to Mason need to apply for admission at admissions.gmu.edu/applynow.

Academic Testing

Advanced Placement and Credit by Exam

Academic departments frequently revise information regarding credit by exam. The most current information can be found at admissions.gmu.edu.

Mason Departmental Exams

Proficiency exams are offered in a number of courses usually taken during the first two years. Credit is recorded for grades of C or above, but it does not affect the student’s GPA. Students may not earn credit by exam for courses in which they are currently enrolled beyond the time allotted to add courses in that semester or in courses already audited or failed at the university. Transfer students may not earn by exam any part of the 30 credits that must be completed at Mason to earn a degree.

English 101 Proficiency Exam

Students who pass the English 101 Proficiency Exam will receive 3 credits for English 101. The three-hour essay is based on a choice of topics. The exam is scheduled periodically during the semester. For more information, go to the English Department’s proficiency exam web site at composition.gmu.edu/students/exemption.php.

English 302 Advanced Composition Exam

Students seeking exemption from English 302 may submit a written portfolio to the English Department. To qualify, the written portfolio must demonstrate proficiency equal to that of students who have successfully completed English 302. The prerequisite for taking the English 302 advanced composition exam is completion of 45 credits, completion of English 101 or 100, and completion of the literature requirement for the major. The English Department will accept a portfolio between September 1 and April 8. Additional information regarding the English 302 exam can be found at composition.gmu.edu/students/exemption.php.

Foreign Language Placement

The College Board SAT II test in a foreign language is used for placement in Chinese, French, German, classical Greek, Italian, Latin, Russian, and Spanish. Freshman applicants who wish to receive the appropriate foreign language placement should take this exam during their senior year in high school.

Students who wish to receive the appropriate foreign language placement should take this exam during their senior year in high school.
school. Students who have not taken the SAT II in a foreign language may take it in the foreign language lab once they are on campus. The SAT II exam is mandatory for anyone who has studied one of these languages for at least two years, has no previous college credit in the language, and seeks to continue study of the same language at Mason. Transfer students receiving credit for college-level foreign language study completed at other colleges usually do not need a placement test, but they must consult the Department of Modern and Classical Languages to determine correct placement.

It is the student’s responsibility to take a placement exam and obtain results before enrolling in a foreign language course. The placement exam is given in conjunction with orientation. The schedule can be found online at mcl.gmu.edu/resources/placement_testing.html. Specific information on interpreting test scores can be obtained from the Department of Modern and Classical Languages.

Students may not enroll for credit in a course at a level lower than the one in which they are placed. Students and instructors should attempt to identify and resolve cases of inappropriate placement during the first days of each course. For students whose degree program contains a foreign language requirement, the placement determines the maximum number of credits, if any, that will be needed to fulfill the requirement.

A foreign language placement is not required of international students who present evidence of having studied for four or more years in an educational institution where the primary language of instruction was other than English. These students will be considered to have fulfilled the foreign language requirement, but they are not eligible for credit below the 300 level.

If through transfer credit, a placement test score, or Mason course work a student meets the prerequisite for a lower-division foreign language course that is not offered during a particular semester, the dean usually grants permission to continue the foreign language sequence by allowing the student to take courses at another college or university.

**Math Placement Exam**

The Math Placement Exam is a computer-based test to help assess a student’s proficiency. Entering students are required to complete the exam successfully during orientation unless they have received AP credit or transfer credit. The web address for the math placement test schedule is cos.gmu.edu/academics/undergraduate/math_placement_testing.
Tuition and Fees

General Guidelines

- Students are responsible for maintaining current addresses via Patriot Web (patriotweb.gmu.edu), and for activating and checking their George Mason University e-mail accounts to receive official university communications.

- By registering for classes, students accept responsibility for the semester charges. Students are responsible for dropping, by the dates listed in the Schedule of Classes, all classes (including waitlisted classes) they do not plan to complete. Students must follow the drop and withdrawal procedures published in each term’s Schedule of Classes. Full or partial tuition liability may apply.

- Refer to the Payment Schedule and the Academic Calendar in each term’s Schedule of Classes for payment due dates and tuition penalties for dropping classes after the start of the semester.

- Failure to receive a reminder bill confirming charges does not waive the requirement for payment when due. Balances may be verified and paid via Patriot Web (patriotweb.gmu.edu).

- Payments are due in the Cash Office, Student Union Building I, Room 104, on or before 4:30 p.m. on due dates, regardless of postmark if mailed. Check, Visa and MasterCard payments made on Patriot Web must be completed by 10:30 p.m. to be considered in that day’s business.

- Students who have not completed the financial aid process must be prepared to pay for their courses by the tuition due date or a late payment fee will be charged. The amount of financial aid accepted and processed will be reflected in your balance. If the amount of aid awarded is less than the charges, the difference must be paid by the tuition due date. Federal Loan borrowers must submit a completed promissory note at least four weeks before the payment due date to the Financial Aid Office (South Chesapeake Module) for these funds to be considered in your balance. Federal work-study awards cannot be deducted from your balance. Financial aid recipients must also notify their financial aid counselor if they drop courses below the minimum required credits for their financial aid award.

- Out-of-state students with pending domicile requests are responsible for payment at the out-of-state rate. Students who are later determined to be in-state can request reimbursement for the difference in tuition rates.

- Payments not received by the due date will be assessed a late payment fee, which is 10 percent of the balance due up to $125.

- Students who add their first class on the first day of the semester or after are assessed a $125.00 late registration fee. The fee does not apply to students already registered prior to the start of classes who make schedule adjustments. Waitlisted classes are not considered class registration.

- Financial Good Standing: No Holds on Record – Financial good standing and a university record clear of holds are required for students to receive academic services. Services, including but not limited to transcript issuance, diploma release, and class registration (add, drop, withdrawal etc.) will not be provided to students with a financial balance due or a hold of any kind on their record. Holds are based on outstanding obligations and may be financial. Examples include unpaid telephone charges, fines owed from traffic/parking violations, incomplete immunization records, fines owed to the Mason or Consortium libraries, and other administrative holds.

- Non-returning students are responsible for dropping courses for the semester and ensuring they do not have an outstanding balance on their account. Any documentation or intent made to the Admissions Office that you are not returning does not withdraw you from the registered courses. Please drop courses and check your account status via Patriot Web.

- Students enrolling in Mason off-campus courses are assessed tuition and fees at the same rates as those for on-campus courses.

- A few Mason degree programs include academic credits that students must earn at other academic institutions.
Students enrolling for such credits assume all financial responsibility directly with the other institutions.

2008–09 Semester Tuition Charges (subject to change)
Approved tuition rates are available June 1. For more information, call Student Accounts at 703-993-2484, or go to studentaccounts.gmu.edu. Also, students are charged tuition rates according to their academic level; graduate rates vary.

Related Fees
These are applicable to all students and are subject to change:
- Application Fee, Undergraduate $50
- Application Fee, Graduate $70
- Lab Fee $25
- AVT Arts Bus fee $50
- AVT, SOM Course Fee (per credit) $15
- VSITE, CVPA, SCS Course Fee (per credit) $10

Orientation/Undergraduate
- New Student Fee $160 (nonrefundable)
- Graduate New Student Fee $60 (nonrefundable)
- International Student Health Insurance Fee $1366

Note: The new student fees are mandatory, non-refundable. Late registration fees are nonrefundable and will not be removed, regardless of enrollment status.

Payment Information
Payment Deadline
Payment is due the first day of classes. See the payment schedule in the Schedule of Classes. Payments received at the Cash Office by 4:30 p.m. Monday to Friday will be considered in that day’s business. Check, Visa, and MasterCard payments made on Patriot Web must be completed by 10:30 p.m. to be considered in that day’s business. To confirm receipt of payment and balance due on account, go to patriotweb.gmu.edu. Allow ample time for processing payments.

Methods of Payment
Cash: At window only, Cash Office, SUB I, Room 104.
Check: Payable to George Mason University, with student ID number written on front. Third-party checks are not accepted. Checks must be payable in U.S. dollars.
MasterCard or Visa payments are accepted online through Patriot Web. Credit card payments can also be submitted by fax, using the fax payment authorization form. The form is available at studentaccounts.gmu.edu and the fax number is 703-993-2492.

Delivery Methods
Web: Patriot Web, patriotweb.gmu.edu online checks, MasterCard, or Visa
Window: Cash Office, SUB I, Room 104, Monday through Friday 9 a.m. to 4:30 p.m.
Drop Box: Outside Cash Office, SUB I, Room 104
U.S. Mail: George Mason University, Cash Office, 4400 University Drive, MS 2E1, Fairfax, VA 22030-4444.
Postmarks are not considered proof-of-payment date.

Semester Payment Plan
The Mason semester payment plan is available for students who need to budget a minimum of $500 and wish to make two payments. Payments for Study Abroad, Global Education, and International Student Health Insurance cannot be deferred. A payment contract, available on the Student Accounts web site, must be submitted to the Cash Office with a down payment of one-half of the contract amount plus fee. The contract fee is $25 and non-refundable. Failure to pay the outstanding balance will result in a financial hold, a late fee up to $125, and normal university collection activity. Failure to pay may prevent students from being eligible to use this contract in future semesters. Please refer to studentaccounts.gmu.edu for up-to-date payment plan options.

Third-Party Billing Authorizations
Students using a third-party billing authorization will be charged a $25 processing fee. Students must provide the third-party authorization or government training voucher to the Student Accounts Office, North Chesapeake Module, Room 11, or fax to 703-993-2460 before the payment due date. Students are ultimately responsible for any defaults in payments by the sponsoring agency. Call 703-993-2484 for a copy of third-party billing requirements, or check the web at studentaccounts.gmu.edu.

Penalties
A late registration fee of $125 is automatically assessed to students who add their first class for the semester on the first day of classes or after. It does not apply to students already enrolled prior to the start of classes who make schedule adjustments. Late registration fees are nonrefundable and will not be removed, regardless of enrollment status.

Failure to make any payment on or before the due date results in a late payment fee which is 10 percent of the balance due up to $125.
Registrations will not be canceled for nonpayment. Students must drop classes they do not plan to complete by the payment due date to avoid the late payment fee on those classes.

Returned Checks
A $25 returned check fee will be charged for each unpaid check returned by the bank. If the returned check results in an unpaid account, an additional late fee up to $125 may be charged and financial suspension will result.

Financial Good Standing; No Holds on Record
Financial good standing and a university record clear of holds are required for students to receive academic services. Services, including but not limited to transcript issuance, diploma release, and class registration (add, drop, withdrawal etc.) will
not be provided to students with a financial balance due or a hold of any kind on their record. Holds are based on outstanding obligations and may be financial. Examples include unpaid telephone charges, fines owed for traffic/parking violations, incomplete immunization records, fines owed to the Mason or Consortium libraries, and other administrative holds.

**Collections**

Failure to meet financial obligations to the university may result in the delinquent account being placed with a collection agency, the withholding of money from tax returns, and other collection procedures. Students are responsible for costs incurred by the university to collect delinquent accounts.

**Dropped Courses**

Students are required to pay full or partial tuition for courses they drop after the last day to drop with full tuition refund, including drops to change from one section of a course to another section. For more information, see the tuition liability dates in the Academic Calendar in the Schedule of Classes. In cases where tuition liability is less than the payments on the student’s account, a refund of the overpayment may be requested. A refund request form is available via the Student Accounts web site and Student Accounts Office. The university will mail check refunds payable to the student; credit card refunds are credited back to the card that was used for the original payment.

**Special Registration**

Students not enrolled in a credit-bearing course, but whose academic department certifies that they are pursuing an activity related to George Mason matriculation, can retain active status by having the Registrar’s Office process a registration for the Special Registration course(ZREG 200). A $45 fee is charged for this course, and students must pay this fee before the Registrar’s Office will process the registration. Written approval of the student’s advisor or instructor and the academic department chair is required. This special registration allows students to retain their library and computer privileges, receive a student ID, and buy a parking decal. Students must have active status to apply for or receive a degree, take an exam, or participate in cooperative education. Students pursing a master’s or doctoral degree must maintain continuous enrollment. For more information, see the “Graduate Policies” section in the Academic Policies chapter.

**International Student Health Insurance**

Health insurance is required for all F-1 and J-1 visa holders, and nonpayment may result in class cancellation. The health insurance fee is deducted from all payments received by the university before funds are applied to tuition or other charges. For more information, see the Admission of International Students section in the Admissions chapter.

**Music Instruction**

Private music instruction is arranged through the Department of Music on a fee-paying basis. A half-hour lesson (1 credit) is $164.50; an hour lesson (2 or 3 credits) is $329. Note that this fee is subject to change.

**In-State Tuition**

To be eligible for in-state tuition, a student must have been domiciled in Virginia for at least one full year before the semester for which in-state tuition is sought, or qualify through statutory exception. A person establishes domicile by demonstrating physical presence and the intention to remain indefinitely in accordance with Virginia domicile guidelines. Copies of the guidelines and other applicable state laws are available from the Office of the Registrar or at registrar.gmu.edu/domicile.

**Domicile Change**

Domicile classification is determined at the time of a student’s admission. To be considered for in-state status when applying to the university, students must file an application for in-state rates.

New and currently enrolled students classified as out-of-state who believe they qualify for in-state tuition after being admitted must file a domicile appeal form with the Office of the Registrar no later than the first day of classes for the semester in which in-state rates are sought. Appeal forms are available from the Office of the Registrar and at registrar.gmu.edu/domicile.

Students whose appeals are denied have the right to seek further review of their status by the Office of the Registrar or the Third Level Domicile Appeals Committee. These requests must be filed in a timely manner as stated in denial letters. Forms are available from the Registrar’s Office and the web site. In addition, students should be aware that university procedures for appealing domicile decisions have been established pursuant to state law and are subject to change. Out-of-state students with an appeal pending at the time of tuition billing are responsible for payment at that rate. Students subsequently determined to be in-state may request reimbursement of overpayment from the Office of Student Accounts. Also, any student who fraudulently or knowingly provides false information in an attempt to evade payment of out-of-state tuition will be charged out-of-state tuition for each term or semester attended, and may be subject to dismissal from the institution.

For more information regarding in-state eligibility, contact Domicile Administration in the Registrar’s Office in North Chesapeake Module, Room 8, phone: 703-993-2464, e-mail: domicile@gmu.edu.

**Tuition Surcharge: 125 Percent of Degree**

Undergraduate students who have established Virginia domicile and eligibility for in-state tuition will be subject to a surcharge if they exceed 125 percent of the credits required to complete a degree. The surcharge will be determined by the State Council for Higher Education in Virginia.

The following courses and credit hours shall be excluded in calculating the 125 percent credit threshold: remedial courses; transfer credits from another college or university that do not meet degree requirements for general education courses or the student’s chosen program of study; advanced placement or international baccalaureate credits that were obtained while in high school or another secondary school program; and dual enrollment, college-level credits obtained by the student prior to receiving a high school diploma.
Expenses

Housing
Office of Housing and Residence Life
Ground floor of Potomac Heights
Phone: 703-993-2720
Web: housing.gmu.edu

The university offers a variety of housing options to meet the diverse needs of students living on campus. Upper-class students may choose from traditional-style residence halls, suites, apartments, and townhouses. The university requires freshmen living on campus to live in Presidents Park or University Commons, which have traditional-style residence hall rooms that accommodate four, three, or two students. The estimated housing costs for the 2008–09 academic year are approximately $3,410 to $7,410 per year. Housing rates are subject to change; actual rates will be available early in the spring 2008 semester on the Office of Housing and Residence Life web site. All students in housing must provide a prepayment, which is applied to the spring semester rent. Housing assignments, including single rooms, are made on a priority and space-available basis.

Students living on campus are required to sign an academic (two-semester) year contract. Releases from the contract are granted only in cases of unforeseen hardship and carry a financial penalty. For more information, contact the Office of Housing and Residence Life, which is located on the ground floor of Potomac Heights in the wing closest to the Aquatic and Fitness Center.

Dining Services
SUB II, Room 2014
Phone: 703-993-2870
Web: www.gmu.edu/univ_ctr/services/dining
Meal Plan Office
SUB II, Lower Level, Room 1013
Phone: 703-993-2870
Web: www.gmu.edu/univserv/allunivcard

Dining Services offers a variety of food options for students living on campus or commuting to any of the three Mason campuses. The Dining Services locations on the Fairfax Campus include a brand new resident dining facility, Southside Dining, which will open in fall 2008 and offer alfresco dining and a first floor take-out window; Damon’s, Damon’s Express, Jazzman’s, and Chik-fil-A in SUB I; and several options including a food court featuring national names such as Charlie Chiang’s Ya-Ya’s, Burger King, and Taco Bell Express in the Johnson Center. Dining Services units are also located on the Arlington and Prince William Campuses.

For the 2008–09 academic year, meal plans for students living on campus range from approximately $2,470 to $3,450 per year (rates are subject to change). A variety of meal-plan options are available for resident students, off-campus students, faculty, and staff.

Dining Plan Changes
Meal Plan Office
SUB II, Lower Level, Room 1013
Phone: 703-993-2870

Increases in meal plans may be made at any time; however, the last day to decrease mandatory meal plans coincides with the last day to add classes. Seniors with 90 credits or students living in the townhouses, apartments, Liberty Square, or Potomac Heights are not required to have a meal plan. Changes must be made at the Meal Plan Office, located on the lower level in SUB II, 703-993-2870.

Parking Services
Sandy Creek Parking Office
Phone: 703-993-2710
Web: www.gmu.edu/univserv/parking

Students who park their vehicles on university property must register them with Parking Services and pay a fee for a parking permit. Permits are available on an annual, semester, or summer basis. For permit sales, fine payments, special requests, or problems, go to the Sandy Creek Parking Office. Hours are 8:30 a.m. to 5 p.m. on Monday, Wednesday, Thursday, and Friday, and 8:30 a.m. to 7 p.m. on Tuesday. For more information, read the Parking Policy section in the General Policies chapter of this catalog, or go to www.gmu.edu/univserv/parking for current information and rates.

Financial Aid

Office of Student Financial Aid
South Chesapeake Module
E-mail: finaid@gmu.edu
Phone: 703-993-2353
Fax: 703-993-2350
Web: financialaid.gmu.edu

The Office of Student Financial Aid provides a variety of services to help students finance their education. They include counseling, referral and information resources, and financial assistance. Student financial aid awards consist of grants, loans, and work-study. Awards are based primarily on financial need, although there are some alternative resources available for those who may not qualify for need-based aid.

The office has a comprehensive listing of various scholarship opportunities for students to research on the financial aid web page. Students are encouraged to review the scholarship information early and frequently to meet deadlines, since the listings are updated often.

Located in South Chesapeake Module, the office is open 9 a.m. to 5 p.m. Monday through Friday. Financial aid counselors are assigned to students alphabetically based on students’ last names and are available daily by appointment.

To apply for financial aid, each year new and currently enrolled students must complete a Free Application for Federal Student Aid (FAFSA). George Mason’s federal school code for the FAFSA is 003749. Priority consideration for all sources of financial aid is given to those students whose financial aid applications are on file with the Office of Student Financial Aid by March 1. To meet this priority filing date, students should file the FAFSA as soon as possible after January 1. The FAFSA can be filed online at www.fafsa.ed.gov or a paper copy can be obtained from the office.

Financial aid for summer is generally limited to students who have remaining Federal Pell Grant or federal loan eligibility. Contact the Office of Student Financial Aid for specifics regarding eligibility. The summer aid application is available online and in the office on April 1.
All students receiving financial aid must be enrolled in an eligible degree or certificate program for at least half-time in any given semester; maintain satisfactory academic progress as defined by the Office of Student Financial Aid, in accordance with federal guidelines (see below); and be a U.S. citizen or eligible noncitizen as defined by the U.S. Department of Education.

All aid recipients are responsible for becoming familiar and complying with applicable federal and state laws, university regulations, Mason student aid information resources, and the student aid satisfactory academic progress policy. This policy is detailed in the glossary section of the home page of financialaid.gmu.edu and in the Office of Student Financial Aid.

Academic Progress Standards
Federal legislation governing the administration of federal programs requires colleges and universities to define and enforce standards of progress for students receiving or applying for financial aid. To comply with this legislation, the Office of Student Financial Aid has established a formal satisfactory academic progress policy. For detailed information, go to the Student Financial Aid home page at financialaid.gmu.edu or contact the Office of Student Financial Aid.

Aid Programs
The university administers the following federal, state, and other aid programs:

- **Federal programs**: These include the Federal Pell Grant, Federal Supplemental Educational Opportunity Grant (FSEOG), Federal Work-Study (FWS), Federal Perkins Loan Program, Federal Subsidized Stafford Loans, and Federal Parent Loans for Undergraduate Students (FPLUS). For more information, refer to the Student Guide for Federal Financial Aid, which is available in the Office of Student Financial Aid, or go to the Student Financial Aid home page at financialaid.gmu.edu.

- **State programs for undergraduate Virginia residents**: Eligibility for all state programs is based on results received from the FAFSA. State grant funds are limited, so adherence to the March 1 priority filing date is critical.

- **Virginia Commonwealth Award**: This program is open to undergraduate students who have demonstrated financial need, are enrolled at least half time, and are domiciliary residents of Virginia.

- **Virginia Guaranteed Assistance Program (VGAP)**: This program is a component of the Virginia Commonwealth Award Program that is open to students who demonstrated academic achievement in high school. VGAP awards are renewable for up to four years.

- **College Scholarship Assistance Program (CSAP) Grant**: This program uses a combination of federal and state funds to provide additional assistance to students who are enrolled at least half time, are Virginia residents, and who demonstrate significant financial need.

- **Graduate student assistance**: Assistantships, fellowships, and scholarships exclusive of the federal financial aid programs identified earlier are administered by the individual graduate programs. Students interested in pursuing graduate assistantships, fellowships, or scholarships should contact their graduate program.

Emergency Loan Programs
- **Mary E. Ferguson Emergency Loan Program**: Currently enrolled students may borrow funds for legitimate emergencies, excluding tuition, fees, books, and supplies. Emergency loans must be repaid within 30 days; overdue payments result in a late charge of $5 for each 30 days past due. Failure to repay the loan within 30 days without requesting an extension for a reasonable justification will result in financial suspension. Students financially suspended for nonpayment of an emergency loan are ineligible for any future emergency loans. Application is made through the Office of Student Financial Aid.

- **Doug Beaman Emergency Loan Program**: The George Mason University Alumni Association established an emergency loan fund through which students may borrow up to $100 with repayment due within 30 days. The program is available to all students, with priority given to children of alumni. Application is made through the Office of Student Financial Aid.

- **Lisa Kenaga Memorial Student Emergency Loan Fund**: The Office of Student Financial Aid has established an emergency loan fund through which currently enrolled students may borrow funds for legitimate emergencies, excluding tuition and fees. Emergency loans must be repaid within 30 days with a $10 processing fee; overdue payment results in a late charge of $5 for each 30 days past due. Failure to repay the loan within 30 days without requesting an extension for a reasonable justification results in financial suspension. Students financially suspended for nonpayment of an emergency loan are ineligible for future emergency loans. Application is made through the Office of Student Financial Aid.

ROTC Scholarships
Please see the Reserve Officer Training Corps section in the Academic Programs and Resources chapter.
Academic Policies

Policies and Procedures Affecting All Students

Knowledge of University Policies
Each student is responsible for knowing Mason’s rules, regulations, requirements, and academic policies. This catalog is the normal repository of policy statements, but corrections, changes, or interpretations can be promulgated by other means, including electronic publication.

When the university or one of its academic units changes course requirements, grading procedures, or criteria for acceptance into particular programs, academic standing, or graduation, the changes apply to all students enrolled at the time of implementation of the change and thereafter.

Students have certain choices regarding the set of degree requirements under which they graduate, as detailed in the Catalog Requirements for Degrees section of this chapter.

The Special Collections and Archives section of the Fenwick Library has copies of all previous catalogs. They may not be checked out but may be photocopied. Any student in doubt about an academic matter should consult a faculty advisor or dean.

Students are subject to the university’s stated policies regarding patents and copyrights. These policies are available at www.gmu.edu/research/OSP/Policies.html.

Official Communication with Students

Web: mail.gmu.edu

Mason uses electronic mail to provide official information to students. Examples include notices from the library, notices about academic standing, financial aid information, class materials, assignments, questions, and instructor feedback. Students are responsible for the content of university communication sent to their Mason e-mail account and are required to activate that account and check it regularly.

Student Requests for Academic Actions

All requests for academic actions, such as special permissions or exceptions to published academic regulations, must be submitted to the head of the unit in which the student’s program is housed, for example, department chair, institute director, or school or college dean. Request forms and instructions on how to initiate an academic action are available in the academic unit and on the unit’s web site. For students who have not yet declared a major, the academic actions process is executed in the Office of Student Academic Affairs, Johnson Center, Room 245. Students will be informed of the average wait time for decisions on academic actions undertaken within their units. Those who need assistance with the academic actions form may consult their academic advisor, or they may be directed to the university ombudsman.

Appeals of Academic Procedures

Students have the right to appeal decisions regarding requests for academic actions. The appeals process begins in the academic unit. Each college, school, and institute at Mason has its own procedures, and students will be informed of those procedures in a clear and timely manner. Students who feel the final decision rendered by a college or school is unfair may appeal to the Provost’s Office. All appeals must be in writing, and they must demonstrate that the student has exhausted all options within the college or unit.

The Provost’s Office may refer the case to the University Academic Appeals Committee. The committee consists of five faculty members, including at least one member of the Faculty Senate and the provost (or designee), who serves in an ex officio, nonvoting capacity. The committee hears only those cases where procedural irregularities or a questionable application of university policies is demonstrable, or when the provost or the committee deems the case relevant to the application of university-wide policies. The burden of proof rests with the student, who must provide clear and convincing documentation to support the contention that the decision was unfair. The committee’s decision is final. Note that the University Academic Appeals Committee is not charged to hear grade appeals or appeals of Honor Committee decisions.

The Provost’s Office is responsible for maintaining appeals records, determining whether students have just cause, and ensuring that complete documentation is available for all committee members. The committee communicates its decision to the student, the relevant unit, and the provost.

University Ombudsman
Johnson Center, Room 245
Phone: 703-993-3006
E-mail: ombuds@gmu.edu
Web: www.gmu.edu/departments/ombudsman
Administration
Dolores Gomez-Moran, Ombudsman
The ombudsman is a neutral, independent, informal, and confidential party who provides assistance to students in resolving university-related concerns. The ombudsman is an advocate for fairness and the equitable treatment of students, operates independently of all formal grievance processes at the university, and considers all sides of an issue in an impartial and objective manner. The ombudsman has no authority to make exceptions or to grant requests but can perform informal investigations and, as a result, may recommend actions that lead to changes in processes and policies at the university. Meetings with the ombudsman are confidential. The ombudsman serves all undergraduate and graduate students at the university.

Privacy of Student Records
Office of the Registrar
Web: registrar.gmu.edu/ferpa.html
Each year, Mason informs students of the Family Educational Rights and Privacy Act (FERPA) of 1974. The university fully intends to comply with this act, which protects the privacy of education records, establishes the right of students to inspect and review their education records, and provides guidelines for amending inaccurate or misleading data through informal and formal hearings. Students also have the right to file complaints with the Family Policy Compliance Office (U.S. Department of Education) concerning alleged failures by Mason to comply with the act.
The Notification of Rights under FERPA and the Public Notice Designating Directory Information detail students’ rights and the procedures implemented by the university to comply with FERPA. Both notices are published in the Schedule of Classes and are available on the web. For more information about FERPA, contact the Office of the Registrar.

Academic Assessment
Students may be called on from time to time to participate in focus groups, complete questionnaires, or contribute in some other way to this process. At any time, students may contact the Office of Institutional Assessment at assessment@gmu.edu with concerns, comments, and recommendations about their educational experiences at Mason.
Furthermore, all academic programs have student learning goals that are reflected in the curriculum and extracurricular opportunities available to students. To find out more about the goals of a specific program, go to assessment.gmu.edu and click on “Academic Program Review.”

Student Identification Card
After registering, each student should obtain a university photo identification card. It must be presented to use library services and is required for admission to university events and when using facilities after normal operating hours. It is not transferable and is validated each semester after payment is made for classes. For more information, call the Photo ID Office at 703-993-1004, or go to the Photo ID Office section in the General Policies chapter of this catalog.

Change of Status, Address
Each student is required to maintain with Mason current contact and identifying information, including permanent and local addresses, telephone numbers, student number, and legal name. Each student must also maintain the university e-mail account assigned at the time of admission. Students are responsible for official communications directed to Mason e-mail accounts. For more information, go to mail.gmu.edu.
Addresses should be updated over the Internet using Patriot Web. Name and Social Security number changes require official documentation and must be processed in person at the Office of the Registrar or with the original copy of a notarized request.

Honor System and Code
Web: honorcode.gmu.edu
Mason shares in the tradition of an honor system that has existed in Virginia since 1842. The Honor Code is an integral part of university life. On the application for admission, students sign a statement agreeing to conform to and uphold the Honor Code. Students are responsible, therefore, for understanding the code’s provisions. In the spirit of the code, a student’s word is a declaration of good faith acceptable as truth in all academic matters. Cheating and attempted cheating, plagiarism, lying, and stealing of academic work and related materials constitute Honor Code violations. To maintain an academic community according to these standards, students and faculty must report all alleged violations to the Honor Committee. Any student who has knowledge of, but does not report, a violation may be accused of lying under the Honor Code.
The Honor Committee is independent of the student government and the university administration. It is composed of students selected by the student body, and it has the primary duty of espousing the values of the Honor Code. Its secondary function is to sit as a hearing committee on all alleged violations of the code.
At the beginning of each semester, faculty members have the responsibility of explaining to their classes their policy regarding the Honor Code. They must also explain the extent to which aid, if any, is permitted on academic work.
The complete Honor Code is as follows:
To promote a stronger sense of mutual responsibility, respect, trust, and fairness among all members of the George Mason University community and with the desire for greater academic and personal achievement, we, the student members of the university community, have set forth this honor code: Student members of the George Mason University community pledge not to cheat, plagiarize, steal, or lie in matters related to academic work.

Honor Committee
The Honor Committee is a group of Mason students selected to promote academic integrity as a core value for our university community. Members of the committee also serve on hearing panels established to investigate and resolve alleged violations of the code.
Membership will be limited to 100 members who apply for membership and are confirmed at an election held each spring. Members appointed by the chair of the Honor Committee may serve provisionally pending the next election. Members must have no Honor Code violations, maintain a cumulative GPA of 2.30, be in good academic standing, and successfully complete the training and orientation program. If more than 100 students apply for membership, a candidate list will be maintained according to the date of the application, and appointments will be made as vacancies occur. The term of office extends
from initial appointment until final graduation, provided the member is not found responsible for an Honor Code violation, serves on at least two hearing panels each semester, remains in good academic standing, and maintains the required GPA.

A chair and vice chair will be elected in April of each year by the members of the committee. The term of office will be one year. A faculty advisor, chosen jointly by the chair of the committee and the vice president for university life, will provide administrative assistance for committee business.

Student Responsibilities

Students should request an explanation of any aspect of the professor’s policies regarding the Honor Code that they do not fully understand. They also have an obligation not only to follow the code themselves, but also to encourage respect among their fellow students for the provisions of the code. This includes an obligation to report violations by other students to the Honor Committee.

Faculty Responsibilities

Faculty members are responsible for maintaining the integrity of the learning and testing process. They should explain at the beginning of each semester what would be considered an integrity violation in their courses. Special attention should be given to the subject of plagiarism. Faculty members may actively proctor exams in situations they believe warrant such action.

Procedures for Reporting Violations

Suspected violations should be reported to the Honor Committee in a timely manner using forms provided by the Honor Committee. The Honor Committee will promptly notify the involved students in writing. Those students will meet with a representative of the Honor Committee to review the information and arrange for resolution of the matter.

Hearing Panels

When a student disputes an allegation, a five-member panel of Honor Committee members, appointed by the chair of the Honor Committee, will meet with both the student and the person(s) reporting the alleged offense. Each side will present information, and the panel will determine whether clear and convincing evidence of a violation has been presented. At least four of the five panel members must judge that the evidence proves responsibility for the offense. If the student is found responsible, a sanction or sanctions will be determined by majority vote of the panel.

Counsel

The hearing panel will have a faculty member present during the hearing to offer assistance when requested by the chair of the panel. All other parties may have an advisor present if that advisor is a member of the George Mason University student body, other than a student from the School of Law.

Sanctions

The hearing panel may impose oral and written reprimands and other such nonacademic sanctions as it deems proportionate to the offense. It can recommend sanctions to the course professor that involve reduced grades. Recommendations for nonacademic suspension and nonacademic dismissal are forwarded to the provost’s delegate. In determining sanctions, panel members should keep in mind the nonpunitive educational purpose of the Honor Code process.

Appeals

Appeals of honor committee decisions must be submitted in writing within seven business days of the hearing. Appeals can be granted only on the basis of new evidence, procedural irregularity, or other grounds of sufficient gravity to call into serious doubt the original hearing panel’s decision. The decision to accept or deny the appeal will be made by three Honor Committee members who have had no prior contact with the case. In the event that a faculty member does not elect to follow the Honor Committee’s recommended sanction, students may appeal the faculty member’s action to the Academic Appeals Committee, via the Provost’s Office. The decision of this committee is final.

Amendments

The Honor Committee, by majority vote, may approve proposed amendments to the Honor Code. The proposed amendments will be submitted to the student population at the next spring election, and they must be approved for implementation by a two-thirds majority of those voting.

Human Subjects Research

All research activities involving human subjects or data regarding human subjects that are directed by faculty, staff, or students that involve faculty, staff, or students as participants must be submitted to the Office of Research Subject Protections for review and approval. The form for submission can be found at www.gmu.edu/research/ORSP/HumanSubjects.html. All research activities will be reviewed by the Human Subjects Review Board prior to implementation of the activity. Separate approval by the vice provost for academic affairs is required if contact information for Mason students is needed to conduct the research. All student research must be supervised by a faculty member. The faculty member will serve as the principal investigator for the research and will assume responsibility for the legal and ethical conduct of the work.

Animal Use in Research

All work with live animals, whether for research, teaching, or testing, must be approved by the Institutional Animal Care and Use Committee (IACUC) prior to initiation of the work. All care and use of animals at Mason must be carried out under the supervision of a faculty member who is qualified and experienced in the work being conducted and assumes responsibility for legal and ethical conduct. Further information and submission forms can be found at the Office of Research Subject Protections web site at www.gmu.edu/research/ORSP/AnimalCareAndUse.html.

Student Work, Intellectual Property

Copyrightable works, including dissertations and patentable works developed in connection with course work by students who are not Mason employees, are deemed to belong to the student. Mason may, however, claim copyright ownership of a work or ownership of a patentable invention when extraordinary use of university facilities, personnel, or resources is made in the development of the materials or invention, especially when unrelated to course work. Ownership and disposition of intellectual property developed by students while employed by the university, including undergraduates and graduate research and teaching assistants, is governed by university policies generally applicable to employees.
Registration and Attendance

Registration for the next semester or summer term begins after midsemester of fall or spring semesters, according to priority groups (graduate students, seniors, juniors, and so on). The Registrar’s Office assigns each student a time ticket, which is a specific date and time after which a student may register. The time ticket is based on the number of credits earned. Thus, the time ticket will not be the same for all students within a particular priority group. Students should consult the Schedule of Classes and Patriot Web for information about their registration date and time.

Financial Good Standing; No Holds on Record

Financial good standing and a university record clear of holds are required for students to receive academic services. Services, including, but not limited to, transcript issuance, diploma release, and class registration (add, drop, withdrawal, and such) will not be provided to students with a financial balance due or a hold of any kind on their record. Holds are based on outstanding obligations and may be financial. Examples include fines owed for traffic or parking violations, incomplete immunization records, fines owed to the Mason or consortium libraries, and other administrative holds.

Registration Procedure

The Schedule of Classes, made available by the Registrar’s Office before priority registration each semester, contains written instructions for registration. Courses listed in the Schedule of Classes may be canceled for insufficient enrollment. Mason reserves the right to change the class schedule and adjust the individual section enrollment as necessary.

Registration is usually accomplished using the Patriot Web; however, if a section is closed or registration into a selected section is controlled, permission to enroll must be obtained from the academic program offering the course. Various schools and departments have their own processes for granting this permission. For some courses, the student must submit a completed and signed course permit form in person to the Registrar’s Office.

Students must be present at the first meeting of every laboratory course (lecture and laboratory) to validate their registration. If students cannot attend the first meeting, they must notify the instructor beforehand if they intend to continue in that section. Otherwise, their name may be removed from the class roll in both lecture and lab.

Students are responsible for registering properly and paying by the deadline. Students should confirm the correctness of their enrollments (including drop and add) via the Patriot Web. Incorrect enrollments may result in academic and financial penalties.

Students are responsible for full tuition payment and grades received for all courses in which they are registered unless registration is canceled administratively because of suspension, dismissal, or termination; the section is canceled; or the course is dropped before the tuition liability begins. See the Schedule of Classes for deadlines.

Changing Registration

Registration changes must be completed within the schedule adjustment period defined below and indicated in the Schedule of Classes. Changes to registration are usually made using the Patriot Web.

The last day for adding a 14-week course is two calendar weeks after the first day of classes. The last day for dropping a 14-week course is five calendar weeks after the first day of classes (including the first day). Courses meeting for fewer than 14 weeks have add, drop, and tuition-liability dates proportional to their length. These dates are published on the registrar’s web site each semester. Students who drop all courses during the drop period will have no entry on their transcript for that semester and will not be considered full time or an enrolled student for that semester. If it is the student’s first semester, the student will not have a Mason transcript and must contact Admissions regarding enrollment in a future semester.

All students are expected to complete their initial enrollment before the first day of classes for the semester. Any additions to that enrollment must be processed by the end of the add period through official registration procedures. Students will not receive credit for courses unless their names are on the official class rosters and final grade sheets. Retroactive credits will not be awarded to students who report that they attended classes but were not on the official rosters. After the date listed in the Schedule of Classes for adding courses, add actions are limited to unusual circumstances beyond the student’s control and require approval by the chair of the academic department offering the course.

All students are expected to drop by the end of the drop period those courses that they do not intend to continue. Registration is not canceled for failure to drop courses properly. Furthermore, registration is not canceled for failure to attend classes unless stated otherwise in the Schedule of Classes.

All classes in which a student is enrolled past the drop deadline will remain part of the official academic record. For more information, see the Additional Grade Notations—Administrative Failure section of this chapter. After the date listed in the Schedule of Classes for dropping courses, withdrawal approval is granted only for nonacademic reasons by the student’s academic dean. This approval usually is given for all courses at once, constituting withdrawal from a semester. For more information, see the Withdrawal from a Semester section of this chapter.

No change of registration transaction is complete until it is processed by the Office of Student Accounts and the Office of the Registrar.

Students will not receive written confirmation of schedule changes and are responsible for checking their schedules via the Patriot Web before the end of the add or drop period to verify that their schedules are correct and they are properly enrolled. Students will not be allowed to remain in classes unless they are properly enrolled. Students will be responsible, both financially and academically, for all courses in which they remain officially enrolled.

Canceling Registration

Students who cannot attend classes during the semester for which they have registered should cancel registration using the Patriot Web prior to the first day of classes for the semester. Refunds of tuition and after the first day of classes are made according to the tuition-liability dates published in this catalog and the Schedule of Classes.
Selective Withdrawal for Undergraduates
Undergraduates enrolled in degree programs are eligible to withdraw from a limited number of classes without the dean’s approval and at the student’s own discretion. Students may process a maximum of three such selective withdrawals during their entire undergraduate career at Mason. The three classes may have any number of credits. The academic calendar for each semester will include an open withdrawal period beginning the day following the last day to drop the class and extending through the ninth week. For classes shorter than a semester (14 weeks), the period will be set in proportion to the length of the class. Procedures are published in the Schedule of Classes.

Course Withdrawal with Dean Approval
For graduate and nondegree students, withdrawal after the last day for dropping a course requires approval by the student’s academic dean, and is permitted only for nonacademic reasons that prevent course completion. For undergraduate students, withdrawal after the open withdrawal period, for cause within the period, or after a student has used all three elective withdrawals, requires approval by the student’s academic dean and is permitted only for nonacademic reasons that prevent course completion. Different college level standards for approval may apply.

Semester Withdrawal with Dean Approval
Undergraduates taking three or fewer classes may use the selective withdrawal for all courses for a semester; see the Selective Withdrawal for Undergraduates section of this chapter. Otherwise, students may withdraw from a semester after the end of the drop period without academic penalty only for nonacademic reasons approved by the academic dean as sufficient to merit a policy exception. Students who stop attending classes without the dean’s approval and without processing a selective withdrawal, if eligible, will receive F’s in all courses. Withdrawal forms are available at the appropriate academic dean’s office.

Effects of Course or Semester Withdrawal
Approved or selective withdrawal results in a grade of W on the student’s transcript for the course(s) affected. While a grade of W does not affect the GPA, undergraduate students should note that withdrawn courses are part of “attempted credit hours,” which serve as the basis for the student’s credit level. In the university’s undergraduate retention system, GPA standards increase according to credit level. See the section on Requirements for Retention.

Academic Load
The minimum full-time load for undergraduate students is 12 credits per semester. For graduate full-time load, see the Graduate Policies section below. For planning purposes, applicants for admission are asked to indicate their preference for full- or part-time status, and day or evening classes; however, they may freely choose between evening and day sections of courses and may change their full- or part-time status.

Although many students must work to meet living expenses, employment must not take priority over academic responsibilities. Students employed more than 20 hours a week are strongly urged not to attempt a full-time academic load. Students employed more than 40 hours a week should attempt no more than 6 credits per semester. Students who fail to observe these guidelines may expect no special consideration for academic problems arising from the pressures of employment. Although 12 credits per semester represent a minimum full-time undergraduate load, students planning to graduate in four years need to carry an average of at least 15 credits per semester. Written approval must be submitted to the Registrar’s Office before students can register for more than the maximum allowable credits. The Overload Permission Chart declares maximum credits and approval authority for all categories of students; it is published in the Schedule of Classes each semester.

Course Prerequisites, Corequisites
Course prerequisites or corequisites state requirements for student entry into courses and reflect necessary preparation for attempting the course. It is the student’s responsibility to be aware of these as stated in the catalog and have prerequisites recently enough to be of value. The administrator of the academic unit in which the course is taught or the instructor of the course may summarily drop students who have enrolled in a course for which they have not met the prerequisites. Graduate course prerequisites are normally met with a grade of B- or better; undergraduate course prerequisites are normally met with a grade of C or better. Questions should be addressed to the academic department or course instructor.

Repeating a Course
Some courses are annotated in the catalog as “repeatable for credit.” These are courses in which students receive additional credit for more than one taking of the same course, up to a maximum number of credits specified in the catalog. Special topics and independent study courses are examples. For all other courses, the following conditions apply:

• Graduate students who have passed a course with a grade of B- or better are not permitted to repeat the course for credit. Also, they must obtain permission from the offering department to repeat a course in which a grade of C or below has been earned. Duplicate credit is not earned. Each department establishes procedures for granting such permission. When a course is repeated, all credits attempted are used to determine warnings, suspensions, or dismissal; the transcript shows grades for all courses attempted; and only one grade per course may be presented on the degree application.

• Some undergraduate courses, such as special topics courses, are repeatable for a limited number of additional credits. As long as students do not exceed the maximum allowable credits for repeatable courses, all takings of the course count for credit and in the student’s GPA. In cases where the student has exceeded allowable credits in a repeatable class, repeat rules will exclude the grade and credits of the earliest taking of the class. For undergraduate classes not repeatable for credit, undergraduate degree students may repeat courses for which they seek a higher grade. A grade received in a repeated course will replace a grade in prior takings of the same course in the calculation of the cumulative GPA, even if the more recent grade is lower. Repeat rules apply to the same course and courses designated in the catalog as equivalent. Repeat rules apply throughout a student’s academic history. All instances of courses and their grades remain part of the student’s transcript. Duplicate credit is not given. No adjustment to the cumulative GPA will be made when the grade in the repeated course is W. A grade in a Mason course will not be
excluded from the cumulative GPA based on a subsequent taking of an equivalent course at a transfer institution. The exclusion of earlier grades of repeated courses will not change the academic standing or dean’s list notations for the earlier semester. Note that individual programs may disallow students from retaking certain high-demand courses simply for the purpose of improving their grade.

**Advisor’s Permission to Register**

All newly admitted students and undeclared undergraduates on academic warning or academic probation are required to obtain an advisor’s approval for registration. All students are encouraged to consult with their advisors concerning course registration each semester.

**Credit to Be Earned at Other Institutions**

Students who apply for admission to Mason usually do not seek simultaneous enrollment at another collegiate institution. In those unique situations when a student does seek concurrent enrollment, the student must obtain advance written approval from the appropriate Mason dean. This process permits a student to enroll elsewhere in a suitable course unavailable at Mason. Catalog numbers and descriptions of courses to be taken elsewhere must be submitted with the request for approval. Students must submit an official transcript for all such course work to the Registrar’s Office. Note that while credit may be approved for transfer and a minimum grade must be achieved, grades themselves do not compute into any Mason GPA. Students who enroll elsewhere without advance written permission while enrolled at Mason may not receive transfer credit for course work taken at other institutions.

**Permission to Register as Graduate Student**

Registration for courses in a graduate program is permitted only after the student has been notified of admission. Admitted students are given preference over nondegree students through the registration process. Dual registration (for example, as a graduate student and nondegree enrollee) is not permitted. The graduate student is responsible for being properly registered and aware of all regulations and procedures required by a program of study. Regulations and degree requirements are not waived nor are exceptions granted because of ignorance of any regulations. Registration in graduate-level courses is restricted to admitted graduate degree students and nondegree graduate students (unless excluded by program). Undergraduate degree students may register for graduate courses only with special approval (see section below). Nondegree undergraduate students may not enroll in courses numbered 500 or above. Courses numbered 800 and above are available only to admitted graduate degree students.

**Graduate Course Enrollment by Undergraduates**

Courses numbered 700 and above are closed to undergraduates. Undergraduates may enroll in graduate-level courses 500 to 699 only with written permission, which must be obtained before registration. Forms are available at the Office of the Registrar. Written permission is waived for undergraduate students admitted to combined bachelor’s and accelerated master’s programs.

To enroll in graduate courses for credit applicable to an undergraduate degree, undergraduates must have completed all course prerequisites, have exhausted all upper-level undergraduate courses relevant to their educational objectives, and be able to demonstrate the level of maturity required for graduate courses.

Approval to register for reserve graduate credit (earned credit held in reserve to apply later toward a graduate degree) is given only to Mason seniors within 15 credits of completing undergraduate study who have successfully completed all course prerequisites. In addition, this privilege is normally extended only to seniors who have completed at least 12 credits at the university, have a cumulative GPA of 3.00 or better, and have a major in the department offering the course. Approval for reserve graduate credit is limited to 6 credits and does not imply approval for admission into a Mason graduate program or that credit so earned will be accepted at another graduate school.

Undergraduates enrolled in graduate courses are eligible to receive only those letter grades applicable to graduate grading. For more information, see the Grading System section below. Credit for the same course is not given toward both graduate and undergraduate degrees.

**Combined Bachelor’s and Accelerated Master’s Degrees**

The university offers a number of combined bachelor’s and accelerated master’s degree programs for academically strong undergraduates with a commitment to research or graduate or professional studies. Students admitted into these programs may take a number of graduate courses in their field of study (with permission from their undergraduate and graduate advisors) after fulfilling 90 undergraduate credits and fulfilling all prerequisites. A maximum of 6 graduate credits completed with a 3.00 GPA or better in each course will apply to the undergraduate degree and give the student advanced placement in the related Mason master’s program. A maximum of 6 graduate credits may also be taken as reserve graduate credit and only applied to the master’s. See Graduate Course Enrollment by Undergraduates section above.

Students in an accelerated degree program must fulfill all university requirements for the master’s degree, including a minimum of 18 applicable graduate credits taken after the bachelor’s degree has been completed and posted to the student’s academic record. More information is available in the various schools and institutes. Admission is competitive; undergraduates are advised to inquire early in their undergraduate careers. Applications must be approved by the undergraduate coordinator in the student’s major program, the graduate coordinator in the graduate school or department, and the relevant graduate associate dean. The university waives the graduate application fee for Mason undergraduates.

**Special Registration for Nonenrolled Students**

Degree-seeking students not enrolled in a credit-bearing course but whose academic department certifies that they are pursuing an activity related to their Mason enrolled program can retain active status by registering for Special Registration (ZREG 200) for a $45 fee. Written approval from the student’s advisor and the academic department chair is required. Special registration allows students to retain library and computer privileges, receive a student ID, and buy a parking decal. Students must have active status to apply for or receive a degree, take an exam, or participate in cooperative education.
Enrolling for Credit Without Grade Points

Entire courses normally graded as satisfactory/no credit (S/NC) are annotated in the catalog, but students may elect to take credit without grade points. Undergraduates may take up to 6 credits to be graded S/NC; this option applies only to electives outside the field of the major, concentration, minor, general education requirement, or certificate program. Graduate students may elect the S/NC grade option only for courses that do not apply to the degree or certificate requirements. S/NC grading will also be used for courses numbered 998 and 999. For more information, see the Additional Grade Notations section below.

Auditing a Course

Auditing a course requires the course instructor’s permission. Audit forms are available at the Registrar’s Office. A previously audited course may be taken again for credit in a later term. Students may also audit a course previously taken and passed; however, students may not change from credit to audit status nor from audit to credit status after the end of the drop period, as defined above. The usual tuition and fees apply to audit status.

Academic Common Market

The Academic Common Market (ACM) is a cooperative tuition-reduction program agreement among 16 states, including Virginia, which compose the Southern Regional Education Board. Students who are not legal residents of Virginia but wish to pursue a degree in a selected Mason program that is not available in their home state may be able to participate in the ACM and thereby attend Mason without incurring out-of-state tuition charges. Likewise, legal residents of Virginia may take advantage of programs in other states. More information about this program is available at the Office of the Registrar or at registrar.gmu.edu/students/domicile/nonresidents.html.

University Consortium

Mason is a member of the Consortium of Universities of the Washington Metropolitan Area, which includes American University, Catholic University of America, Corcoran College of Art and Design, Gallaudet University, George Washington University, Georgetown University, Howard University, Marymount University, Southeastern University, Trinity College, the University of the District of Columbia, and the University of Maryland-College Park. Eligible Mason students may enroll in courses at any of the consortium institutions. The consortium’s cross-registration arrangement permits students enrolled in eligible degree programs at one member institution to take a course at another member institution.

Participation in consortium cross registration is available to degree-seeking juniors, seniors, and graduate students in good standing and currently enrolled at Mason. Participation is limited to courses that are approved by the student’s department chair and dean, apply to the student’s program of study, are not offered during that semester at Mason, and have space available at the visited institution. Additional restrictions apply. Students may take just one course per semester, with a career maximum of 6 credits for undergraduates (9–12 if foreign language study is approved) and 6 credits for graduate students. Credit earned through the consortium is considered resident credit, so grades count in the Mason GPA.

Information and regulations, including restricted and excluded courses, for both outgoing and incoming Mason consortium students are available in the Schedule of Classes and on the web at registrar.gmu.edu/students/consortium/index.html. Information pertaining to all member institutions is available at www.consortium.org/main.aspx. For more information, call the consortium coordinator in the Office of the Registrar at 703-993-2436.

Attendance Policies

Students are expected to attend the class periods of the courses for which they register. In-class participation is important not only to the individual student, but also to the class as a whole. Because class participation may be a factor in grading, instructors may use absence, tardiness, or early departure as de facto evidence of nonparticipation. Students who miss an exam with an acceptable excuse may be penalized according to the individual instructor’s grading policy, as stated in the course syllabus.

Absence for Religious Observances or Participation in University Activities

It is Mason’s policy to encourage its faculty to make a reasonable effort to allow students to observe their religious holidays or to participate in university-sponsored activities (e.g., intercollegiate athletics, forensics team, dance company, etc.) without academic penalty. Absence from classes or exams for these reasons does not relieve students from responsibility for any part of the course work required during the absence. Students who miss classes, exams, or other assignments as a consequence of their religious observance or for participation in a university activity will be provided a reasonable alternative opportunity, consistent with class attendance policies stated in the syllabus, to make up the missed work. It is the obligation of students to provide faculty, within the first two weeks of the semester, with the dates of major religious holidays on which they will be absent, and the dates for which they are requesting an excused absence for participation in any university-sponsored activity scheduled prior to the start of the semester, and as soon as possible otherwise. Students requesting an excused absence for participation in a university-sponsored activity must provide their instructor with a letter from a university official stating the dates and times that participation in the activity would result in the student missing class. Faculty members are encouraged to take religious observances into consideration when constructing class schedules and syllabi.

Final Exams

Final exams are usually given at the end of all undergraduate courses. Except in predominantly laboratory courses, exams may not be given during the last week of classes. Exams may not exceed the scheduled length of two hours, 45 minutes. Changes in location or time of in-class final exams must be approved by the appropriate department chair and dean. A professor who is considering assigning a take-home exam or significant end-of-semester paper or project should inform the students at the beginning of the semester. Such assignments should be distributed by the beginning of the last week of classes so that students can coordinate them with preparation for other exams. Students must not be required to submit exams before the date of the regularly scheduled exam for a course. Retaking final exams is not permitted.
Absences
Absences from final exams will not be excused except for sickness on the day of the exam or other cause approved by the student’s academic dean or director. The effect of an unexcused absence from an undergraduate final exam shall be determined by the weighted value of the exam as stated in the course syllabus provided by the instructor. If absence from a graduate final exam is unexcused, the grade for the course is entered as F. See the Additional Grade Notations section below for information on being absent with permission.

Grading System
University course work is measured in terms of quantity and quality. A credit normally represents one hour per week of lecture or recitation or not fewer than two hours per week of laboratory work throughout a semester. The number of credits is a measure of quantity. The grade is a measure of quality. For grades applicable to graduate courses, see the Graduate Academic Standards, Grades section of this chapter.

The university-wide system for undergraduate grading is as follows:

<table>
<thead>
<tr>
<th>Undergraduate</th>
</tr>
</thead>
<tbody>
<tr>
<td>Grade</td>
</tr>
<tr>
<td>-------</td>
</tr>
<tr>
<td>A+</td>
</tr>
<tr>
<td>A</td>
</tr>
<tr>
<td>A-</td>
</tr>
<tr>
<td>B+</td>
</tr>
<tr>
<td>B</td>
</tr>
<tr>
<td>B-</td>
</tr>
<tr>
<td>C+</td>
</tr>
<tr>
<td>C</td>
</tr>
<tr>
<td>C-</td>
</tr>
<tr>
<td>D</td>
</tr>
<tr>
<td>F</td>
</tr>
</tbody>
</table>

No credit toward graduation accrues from a failing grade or a grade that is replaced by a retaken course. For more information, see the Registration and Attendance section of this chapter.

Additional Grade Notations
Satisfactory/No Credit (S/NC): An S grade reflects satisfactory work (C or better for undergraduate students, B- or better for graduate students); otherwise, the student receives no credit (NC). S and NC have no effect on the student’s GPA. Entire courses normally graded S/NC are annotated in the catalog. Students may also elect to take credit without grade. For more information, see the Registration and Attendance section of this chapter.

A/B/C/NC: Students who successfully complete English Composition and Introduction to Literature (ENGL 101) or Composition for Non-Native Speakers of English (ENGL 100) are graded A, A-, B+, B, B-, or C. Students who do not attain at least a C in these courses receive no credit (NC). NC has no effect on the GPA.

Incomplete (IN): This grade may be given to students who are passing a course but who may be unable to complete scheduled course work for a cause beyond reasonable control. The student must then complete all the requirements by the end of the ninth week of the next semester, not including summer term, and the instructor must turn in the final grade by the end of the 10th week. Unless an explicit written extension is filed with the Registrar’s Office by the faculty deadline, the grade of IN is changed by the registrar to an F. The maximum IN extension is to the end of the same semester in which it was originally due. Students who have filed their intent to graduate have only six weeks from the date of degree conferral to resolve any incomplete grades and have the final grades recorded by the Registrar’s Office.

While a grade of IN remains on the transcript, it is treated as an unsatisfactory grade in determining probation, suspension, termination, or dismissal. Removal of INs from the transcript may result in retroactive elimination of probation, suspension, termination, or dismissal.

Incomplete, extended (IX): IX is given by the Registrar’s Office after receiving an Incomplete Extension form signed by the instructor and the course dean. The extension gives students additional time to complete work; the amount of time is specified by the instructor. The final grade must be submitted to the Registrar’s Office before final exams for the semester in which the IN grade was originally due. A grade of IX affects the academic record in the same way a grade of IN does.

In Progress (IP): This grade may be given in selected courses, including graduate theses, dissertations, practica, and internships. IP may also be used when the work of BIS 490 or a course that is graded S/NC or A/B/C/NC is not completed within one semester. IP has no effect on the GPA. With the exception of BIS 490, IP remains on the record until the work is completed and a final grade is assigned. An IP in BIS 490 not changed to a final grade by the last day of classes of the next semester, not including summer term, is changed by the registrar to an F. IP grades will also be awarded in courses numbered 998 and 999 until successful completion, and then they will be changed to S/NC. Upon successful completion of 998 or 999 and submission of the final grade, grades for all prior sections will be changed to S/NC.

Absent with permission (AB): A student who has received permission from the academic dean or director to be absent from a final exam for cause beyond reasonable control may receive a temporary grade of AB. A rescheduled exam must be administered within 10 business days of the original exam date, or the AB will automatically become an F. Final determination of academic status is not complete while the AB remains on the transcript.

Special Provision (SP): The grade of SP may be given by a dean to students who are unable to complete the course requirements because of extraordinary long-term circumstances, such as major illness or military deployment. SP has no effect on the GPA and remains on the transcript until the work is completed and a final grade is assigned.

Midterm Reports
Midterm progress is reported for all full-semester 100- and 200-level classes, and for 300- and 400-level classes at the discretion of the professor. The reporting period extends from the fifth through the eighth week of the semester, allowing flexibility as to when individual faculty provide reports for their classes. Students should check with their instructors as to when reports will be complete and available for viewing through Patriot Web. These progress reports, which appear in Patriot Web as “Midterm Grades,” do not become part of the student’s official record. They are not calculated in any GPA, and they do not appear on any official or unofficial transcript.
Final Grades
Semester grade reports are available through Patriot Web. Students may print a grade report for their own records or to issue to a third party. Official semester grade reports for tuition reimbursement may be obtained through the Office of the Registrar. Students may also order an official transcript through the Registrar’s Office.

Transcripts
Official transcripts include all credit course work attempted at the university. Official transcripts will not be issued when unsatisfied financial obligations to the university exist. Unofficial transcripts may be printed by the student from Patriot Web. See registrar.gmu.edu for information and instructions on requesting official transcripts.

GPA
Quality point values are assigned to letter grades as indicated in the grading system table. A quality point score is computed by multiplying the value of a letter grade by the number of credits for the course. For example, a student receiving an A in a 3-credit course earns 12 quality points. The GPA is computed by dividing the quality points earned by the number of credits graded A+ through F (GPA hours).

For undergraduates, the GPA computed for the current term gives the current GPA, which is the measure of academic performance in one semester and affects eligibility for the dean’s list. The GPA computed for all institutional credit gives the cumulative GPA, which is the basis for the university’s retention policies, including good standing, warning, probation, suspension, and dismissal. Cumulative GPA also determines students’ eligibility to graduate and have university honors posted to their record at graduation.

Current GPA and cumulative GPA do not apply to graduate students. A notation of academic warning is entered on the transcript of a graduate student who receives a grade of C, or a grade of F in a graduate course or while a grade of IN or IX is in effect. A degree GPA is computed for graduate students based on graded courses completed at the university and applied toward the degree. For more information, see the Graduate Policies section of this chapter.

Change of Grade
The conditions and time limits for changes from the temporary grades IN, IP, AB, and SP to final grades appear in the Additional Grade Notations section.

Once a final grade has been recorded by the Office of the Registrar, it can be changed only in cases of computational or recording error, or pursuant to a successful appeal of the grade as described below. Additional work of any type submitted to improve a grade after the final grade has been assigned and sent to the Office of the Registrar is never accepted.

All changes of final grades must be initiated, approved, and recorded by the last day of classes of the next regular semester (spring for fall grades, and fall for spring and summer term grades).

Grade Appeals
Although faculty members are generally the best judges of student performance, there may be times when a student believes a grade is unfair. In such cases, the student should ask the faculty member to reconsider the grade. If the student is not satisfied, an appeal may be made to the head of the unit offering the course (the department chair, institute director, or designee). The recipient of the appeal should ask the student to return to the faculty member who assigned the grade for further consultation.

If the instructor is no longer associated with the university, the local administrator of the unit offering the course will appoint a faculty surrogate, who will assume magisterial authority of the instructor record at this level of appeal.

If a mutually satisfactory agreement is not reached, the student may request that the chair form a committee of three faculty peers of the faculty member who assigned the grade. If the chair believes the student’s complaint is not legitimate, this reservation is reported to the chair’s supervisor, usually the dean. No review is conducted unless the dean believes the complaint has merit.

The faculty member or the student may challenged and have replaced one of the members of the committee without giving a reason for the challenge. The committee meets separately with the faculty member and the student to explore the full particulars of the case. A nonparticipating observer of the student’s choice may attend the meeting. Every effort is made to avoid an adversarial relationship.

After the committee has reviewed the case thoroughly, it issues to the chair (with a copy to the faculty member) a written recommendation that includes the reasons for its findings. At this time, the faculty member has an opportunity to take the recommended action, if any. If the matter is not resolved at this point, the chair considers the committee recommendation and makes a recommendation to the dean. The decision of the dean is not subject to further appeal. If the dean decides that a change of grade is appropriate and the faculty member refuses to make the change, then the dean may direct the registrar to do so.

Grade appeals are not accepted after the last day of classes of the following semester (spring for fall grades, fall for spring and summer grades).

Pending Grade Appeal
In select cases, a student may request a delay from the dean in imposing academic suspension because of a pending grade appeal that could change the student’s status. An approved delay allows the student to register.

If the grade appeal is successful, the official transcript is corrected and the student continues in classes as a student in good academic standing. If the grade appeal is not successful, the student is required to stop attending all classes immediately. No record of registration for the academic period appears on a transcript and the student receives the appropriate refund as of the decision date.

Degree Conferral
Mason awards degrees and certificates in programs and at levels authorized by the State Council of Higher Education for Virginia (SCHEV). The university confers degrees at the bachelor’s, master’s, and doctoral levels. An academic program may include a degree program and additional majors, minors, or certificates. The university offers no certificate program below the bachelor level; some postbaccalaureate certificates, however, may be awarded concurrently with the bachelor’s degree. For more information, see the Programs of Study chapter.
Definitions of Degree Components

- **Degree program, major, or field**: A program of study that normally requires at least 30 credits of course work in the specified field. The primary program name (degree and major or field) appears on the diploma for bachelor’s and master’s degrees. Only the degree name appears for doctoral degrees. An undergraduate who desires to graduate with a BA or BS degree in two or more subjects must meet departmental requirements for the major in each field. For each major, at least 18 credits used to fulfill its requirements cannot be used to fulfill the requirements of another major, a concentration, a minor, or an undergraduate certificate.

- **Concentration**: A second-order component of a degree program or a component of a track. A concentration consists of at least 12 hours that are not applied to any other concentration. Undergraduate concentrations are approved by the unit at the undergraduate level or by the Graduate Council at the graduate level.

- **Certificate**: A nondegree program complementary to a degree that requires at least 24 undergraduate or 15 graduate credits. Certificates are approved by the school or college at the undergraduate level and by the university Graduate Council at the graduate level. The name of a completed certificate program appears on the transcript after the conferral of an undergraduate degree. For each undergraduate certificate, at least 15 credits used to fulfill its requirements cannot be used to fulfill the requirements of a major, a concentration, a minor, or another undergraduate certificate.

- **Minor**: A complement to a bachelor’s degree program or major normally requiring at least 15 credits in a field other than the student’s major. Of the courses presented for a minor, at least 8 credits must be applied only to that minor and may not be used to fulfill requirements of the student’s major, concentration, an undergraduate certificate, or another minor.

- **Option**: The choice of a thesis or nonthesis path in graduate programs.

Catalog Requirements for Degrees

Catalog year refers to the setting of course and noncourse requirements within academic programs as stated in the school and college section of a specific catalog. Catalog year does not set academic policies in place, however. For more information, see the Knowledge of University Policies section of this chapter. Not all programs and degree components are available in all catalogs. For any one degree, all requirements must be met as stated in a single catalog.

Bachelor’s degree candidates who have been continuously enrolled (allowing absences from summer terms or single semesters) may choose to graduate under the terms of any catalog in effect at or after their admission. Students who have been inactive for five or more years or who have attended another institution without prior approval from their academic dean or director must graduate under a catalog in effect at or after their re-enrollment.

Master’s and doctoral degree candidates who have been continuously enrolled may choose to graduate under the terms of any catalog in effect at or after their admission. Students who have been inactive more than one year, however, must graduate under a catalog in effect after they have been granted permission to re-enroll, or they must petition their unit dean or director to graduate under an earlier catalog. The final decision rests with the unit dean or director.

Application for Degree

In the semester prior to the expected completion of degree requirements, students must confirm their intent to graduate through Patriot Web. The deadline to file the intent to graduate is generally six to seven months prior to the conferral date. Specific deadlines are published on the registrar’s web site registrar.gmu.edu. Some graduate programs require a paper application. Applications are available on the registrar’s web site as well as complete instructions and deadlines regarding graduation. Separate applications for each graduate degree or certificate are required.

For a degree to be conferred, all course work must be completed, even if the course work is not being applied to the degree. Master’s degree students must complete non-course degree requirements including credit-by-exam, oral exams, theses, scholarly papers, and comprehensive exams prior to the conferral (graduation) date. Master’s theses and doctoral dissertations are due in the library well before the conferral date. For more information, go to www.gmu.edu/library/specialcollections/dwebguide.

Students must have active registration status the semester or summer term of graduation. Students not registered for course work in the term of graduation must obtain a special registration. (For more information, see the Registration and Attendance section of this chapter.) Degree applications will not be automatically extended if graduation is postponed; students must reapply for each conferral date.

Commencement

Commencement provides an opportunity for students and their families to share in the conferral of academic degrees. Students who wish to participate should check the web site at events.gmu.edu for current information about all Commencement details including tickets, regalia, and schedules. Bachelor’s and master’s degree candidates who declare their intent to graduate in August but who have not yet completed all degree requirements may participate in the commencement ceremony in anticipation of degree completion. Their names are marked with an asterisk identifying them as candidates pending completion of all requirements. Doctoral students may participate only if they have successfully completed all degree requirements, including defending and submitting a signed, final copy of their dissertation by the deadline.

Undergraduate Policies

Student Classification

Admitted undergraduates are classified as follows: freshman, 0–29 credits completed; sophomore, 30–59 credits completed; junior, 60–89 credits completed; and senior, 90 or more credits completed. Full-time undergraduates are classified as those students enrolled in 12 or more credits per semester. Please note that different criteria for full-time status may apply for tuition, verification, and financial aid purposes. For more information, contact the offices of Student Accounts, Registrar, and Student Financial Aid, respectively.
Academic Advising

The mission of academic advising at Mason parallels the university’s mission by providing resources and programs to mentor, teach, and guide students in their decision making as they develop their educational and career goals toward the successful completion of a degree program. Admitted undergraduate students should meet regularly with an academic advisor to discuss academic programs, educational goals, and career plans. With their advisors, students plan academic programs to meet the general university degree requirements and specific requirements within their major fields. It is the student’s responsibility to read the catalog and know and fulfill the requirements of a specific baccalaureate degree. To assist in the advising process, Mason provides a computerized degree evaluation. Students may access their individualized reports through Patriot Web.

Individual departments establish their own advising processes; students should check with their departments for the appropriate procedures. During their freshman and sophomore years, students in the Honors Program in General Education plan their schedules with honors advisors. Every department coordinates advising of its honors students through the Honors Office, Enterprise Hall, Room 305.

Some departments require that students be advised prior to registration each semester. For the categories of students who may not register until they have seen an advisor, see the Registration and Attendance section of this chapter.

Academic Advising Center
Student Union Building I, Room 304, MS 2E6
Phone: 703-993-2470
Fax: 703-993-2478
Web: www.gmu.edu/departments/advising
E-mail: advisor@gmu.edu

Admitted students who have not yet declared a major or are considering a change of major are assisted in the Academic Advising Center. Students are encouraged to make an appointment for information about general education requirements, programs, policies, procedures, and other academic concerns. The center also provides information and guidance for students who are interested in preprofessional programs in the health fields. Advising is available by appointment Monday through Friday, 9 a.m. until 5 p.m., and Tuesday until 8 p.m. when classes are in session.

Student Academic Affairs and Advising
Johnson Center, Room 245, MS 2C4
Phone: 703-993-9082
Fax: 703-993-9008
Web: www.gmu.edu/departments/saa

Student Academic Affairs and Advising consists of six centers: the Freshman Center, Transfer Center, University Scholars, Postgraduate Fellowships and Scholarships, Undergraduate Research Apprenticeships, and the University Transitions Office. Student Academic Affairs and Advising also rules on all academic actions submitted by students not in a declared major.

Advising upon Entrance into Upper Division (Junior Standing)

Upon entrance into the upper division, every student should meet with an advisor to adopt a program of study. This meeting should cover the following:

- Review of requirements for the degree and major the student has chosen
- Review of the student’s record including any deficiencies, which must be made up
- Discussion of career or graduate study options open to the student enrolled in such a program
- Opportunities for departmental faculty to evaluate the student’s suitability to major in the chosen discipline.

This advising session occurs in the semester in which the student will have completed 60 or more acceptable credits. The results are a matter of record, with any approved modifications being entered into the student’s computerized degree plan.

Although an upper-division student who has filed an approved program of study is usually not required to consult again with an academic advisor, it remains the student’s responsibility to seek approval for any program change so that the computerized degree plan may be kept current. In particular, once a student has completed 60 credits, a change of major requires an extended session with an advisor in the new major and approval of a new program of study before the change is complete.

A student in lower-division status may change majors by filing a Change/Declaration of Academic Program Form with the registrar. These are minimal advising procedures to be followed in all undergraduate segments of the university; individual units may require additional advising sessions.

Health Professions Advising and the Medical Sciences Advisory Committee
Phone: 703-993-9305
Web: prehealth.gmu.edu

Students are responsible for educating themselves about a career in the health professions (e.g., dentistry, medicine, pharmacy, optometry, podiatry, or veterinary medicine) and should become familiar with the admissions process. The health professions advisor coordinates academic and career advising for Mason students and alumni as the chair of the Health Professions Advising and the Medical Sciences Advisory Committee. The committee reviews all qualified candidates for admission to health professions programs in dentistry, podiatry, veterinary, allopathic, and osteopathic medicine to create a composite letter of evaluation for the applicant. The committee comprises university faculty and professional advising staff. For more information, consult the advising web site or contact the health professions advisor, Student Academic Affairs and Advising, 4400 University Drive, MS 2C4, Fairfax, Virginia 22030.

Requirements for Retention

The following system of academic progress became effective in fall 2004 and applies to all undergraduate degree and nondegree students at Mason, including those formerly categorized as extended studies students.

Academic retention is based solely on the cumulative GPA. The significance of the cumulative GPA varies according to the credit level or attempted credit hours, which is a combination of all credits attempted at the university plus credits transferred from other institutions or obtained by testing.

Dean’s List

Students in degree status who take at least 6 credits in a semester and earn a semester GPA of 3.50 or higher merit placement on the Dean’s List. Courses subsequently repeated and ex-
Academic Policies

Students in good academic standing unless they are academically dismissed, suspended, or on probation. Students on academic warning are still considered to be in good academic standing.

Student Retention Categories
The university’s minimum standard for academic achievement is 2.00 on a 4.00 scale. Students with at least 7 attempted credits and a cumulative GPA of less than 2.00 fall into one of three categories: warning, probation, and suspension. All notations of academic standing are included in a student’s permanent record. The cumulative GPA range that defines each of the categories varies according to the credit level, as noted below:

Periods of Academic Suspension
Students in degree status who incur a first suspension following a spring semester or summer term serve a period of suspension through the next fall semester. Students who incur a first suspension following a fall semester serve a period of suspension through the next summer term. A second suspension is for one calendar year: two semesters and a summer term. Students returning from suspension are on probation for one academic period. Course credits earned at other colleges during the period of suspension from Mason (for academic or nonacademic reasons) are not accepted for the degree program.

Nondegree undergraduate students placed on suspension have no specified rights of return to the university. Nondegree students who have been suspended and wish to resume their studies after a period of absence must qualify for readmission through the Office of Admissions.

Academic Dismissal
A third suspension results in academic dismissal, a status that is usually permanent. In exceptional cases, students who have been dismissed may apply for readmission after a minimum absence of three calendar years from the university, but only if they meet one or more of the following conditions after having been dismissed:

- Demonstrate academic success (2.50 GPA or better) in at least 18 credits of classes taken during the period of dismissal at an accredited two- or four-year college or university. Such credits may be considered for transfer back to Mason, but there is no guarantee of acceptance of the credit.
- Provide other evidence of a renewed ability to achieve academic success.
- Provide evidence that all degree requirements will be met once an additional 12 or fewer credits are complete.

Meeting the above requirements does not guarantee a return. The Office of Admissions and the appropriate school or college dean will make individual decisions in the best academic interests of the student and the university. For students seeking readmission to a new school or college, the new dean will make the decision in consultation with the former dean and the Office of Admissions. For more information, see the Academic Clemency section of this chapter.

Academic Period
Academic period refers to fall semester, spring semester, or summer term. For determining the duration of academic warning, probation, and suspension, an academic period is defined as follows:

Each academic period begins on the 15th day following the last scheduled day of final exams for the previous period. Each academic period ends on the 14th day after the last scheduled day of final exams. For example, assume that the last scheduled day of final exams for a semester is Monday, December 23. That period then ends on Monday, January 6. The next period begins on Tuesday, January 7.

Academic Performance and Credit Limit
Undergraduate students on warning, probation, or returning from suspension are limited to a maximum of 13 credits for following semesters until they achieve good standing. Students registered for 14 or more credits are responsible for seeking academic advisement and adjusting their enrollment to a maximum of 13 credits.

Academic Standing and Student Activities
Only students in good academic standing are eligible to hold or run for elective or appointive office in any organization or activity associated with Mason, compete in any athletic or other activity representing Mason on either an intercollegiate or a club level, or serve as a working staff member of any student organization. Note that students on warning are considered to be in good standing.

A student whose eligibility for an activity requires the completion of a semester will have fulfilled that requirement when the student’s publicly scheduled exams are over, unless continued eligibility depends on the grades received. In the latter case, the student will not become eligible until the end of the semester as defined in the Academic Period section of this chapter.

Academic Clemency
Undergraduate students returning to Mason after a separation of a minimum of three calendar years may petition their academic dean to have a number of previously earned grades and credits removed from the calculation of their cumulative GPA. Up to 16 credits and corresponding grades from courses previously completed at Mason may be removed from calculation of the GPA and will not be counted toward graduation requirements. Note that the courses, with their original grades and the notation “Academic Clemency,” will remain listed on the student’s transcript permanently. The
petition for clemency must be filed in the first semester of returning to Mason; approval may depend on successful completion of that semester. Approval of the request is neither automatic nor guaranteed.

**Undergraduate Academic Program**

To plan a sound academic program, undergraduates should select a degree and major as soon as it is practical but no later than four weeks before the end of the sophomore year. To declare a major, students should confer with the appropriate advisor or designate of either the new major program or, if undeclared, the Academic Advising Center (in Student Union Building I, Room 304). Students should obtain signatures from both departments in the Change of Major section of the Change/Declaration of Academic Program Form, which is available in the Registrar’s Office and the Academic Advising Center.

**Change of Academic Program**

Students considering a change in their academic program (major or degree) are encouraged to see an advisor in the Academic Advising Center or a faculty advisor in their prospective discipline. Departmental chapters of this catalog describe requirements for acceptance. Students not meeting the requirements may appeal to the department chair for an exception.

Once a student has completed 60 credits, a change of major requires a meeting with an advisor in the new major before the change is complete. To file a change of major, signatures of advisors or designates in both the new and former major programs must be obtained on the Change/Declaration of Academic Program Form.

**Credit for More than One Undergraduate Major**

Students seeking to graduate with a BA or BS degree in two or more subjects must meet departmental requirements for the major in each field. For each major, at least 18 credits used to fulfill its requirements cannot be used to fulfill the requirements of another major, a concentration, a minor, or an undergraduate certificate.

Students given permission to pursue two or more concurrent majors must complete the Declaration of Second Major section of the Change/Declaration of Academic Program form, available in the Registrar’s Office or at registrar.gmu.edu/forms. The applicant must present a detailed program of study for both majors and obtain the authorizing signature from the chair or director of the second major program and from the dean or director, if required by the college, school, or institute. When required, department chairs and deans or directors must also approve all changes to the programs of study. Students may begin a program at any time that permits completion before the anticipated graduation date.

**Minors**

Students may elect minor programs of study in addition to major fields by completing the Declaration or Change of Minor section of the Change/Declaration of Academic Program Form. Minors usually require between 15 and 21 credits of study, at least 8 of which must be applied only to that minor and may not be used to fulfill requirements of the student’s major, concentration, an undergraduate certificate, or another minor. Students must complete at least 6 credits in their minor at Mason and achieve a minimum 2.00 GPA in courses applied to the minor. Students interested in a minor should consult the appropriate chapters in this catalog.

**Undergraduate Certificates**

Students may elect undergraduate certificate programs of study in addition to major fields by completing the Change/Declaration of Academic Program Form. Students pursuing undergraduate certificates must be admitted to Mason in degree-seeking status. Undergraduate certificate programs require at least 24 credits, 15 of which may not also be used to fulfill the requirements of a major, a concentration, a minor, or another undergraduate certificate. More than half of the credit hours for an undergraduate certificate must be taken at Mason, and more than half must be taken in degree-seeking status. Students must achieve at least a 2.00 GPA in courses applied to the certificate. Students with a previous bachelor’s degree, who are admitted to an undergraduate certificate program alone, have four years to complete certificate requirements. A completed undergraduate certificate may be posted to the transcript only after completion of a bachelor’s degree. Note that these are university minimum requirements; individual programs may have higher standards and/or more restrictive requirements.

**Baccalaureate Degree Requirements**

To qualify for a bachelor’s degree, students must have been admitted, completed at least 120 credits that count toward graduation, fulfilled all degree requirements, and achieved a cumulative GPA of 2.00 or higher. Students seeking a bachelor’s degree must apply at least 45 credits of upper-level courses (numbered 300 or above) toward graduation requirements. Some programs may have higher standards for grades allowable in majors, minors, or certificates. Please refer to the appropriate section of this catalog for more information.

**General Education Requirements**

All undergraduates seeking a baccalaureate degree at Mason must complete the General Education requirements. For more details, go to the University General Education chapter of this catalog. Additional requirements for specific degree programs can be found in the description of each college or school in this catalog.

**English Composition Requirement**

Mason requires students to complete at least two semesters of English composition. Students enrolled in the honors program in General Education or New Century College learning communities complete the English composition requirement as specified in those programs. All other students, unless they have received equivalent credit through transfer or proficiency exam, must enroll in ENGL 101 (or 100) upon admission and, after meeting its prerequisites, ENGL 302. Students must attain a minimum grade of C in composition courses to fulfill degree requirements.

**Writing-Intensive Course Requirement**

In addition to English composition and as part of the university’s commitment to literacy in all programs, at least one course in each major has been designated “writing intensive.” While other courses in the major may require written projects, writing-intensive courses emphasize the process of drafting and revision. Faculty members give constructive comments on drafts of at least one course project. Students then revise and resubmit, or use for future submissions. Writing-
intensive courses are numbered 300 and above. See the description of each major for the specific courses that fulfill the requirement.

Residence Requirements
At least one-fourth of the total credits applied to the degree must be completed at Mason and include at least 12 upper-level credits (courses numbered 300 or above) in the major program. For more information, see the Credit to Be Earned at Other Institutions section.

Second Bachelor’s Degree
A second bachelor’s degree may be earned, either concurrently or sequentially. To graduate with two degrees, students must present at least 30 Mason credits beyond those required by either degree alone. For sequential awarding of degrees, students must be readmitted for the second degree through the Office of Admissions and complete a minimum of 30 credit hours after that point to have fulfilled the residency requirement for that degree.

Students who are concurrently pursuing two bachelor’s degrees at Mason must present a detailed program of study for both degrees and obtain authorizing signatures from the chair or director of each degree program and the dean or director, if required by the college, school, or institute. Students may declare the second concurrent degree by completing the Declaration of Second Bachelor’s Degree section of the Change/Declaration of Academic Program Form. Students pursuing concurrent degrees should apply to graduate when both degrees are complete, or be prepared to meet the requirements noted above for sequential awarding of degrees.

University Honors
A student graduates with distinction from the university when at least 60 credits applied toward graduation are earned at Mason, and the student’s cumulative GPA is at least equal to one of three values: 3.90, summa cum laude; 3.70, magna cum laude; or 3.50, cum laude.

A student graduates with recognition from the university when between 45 and 59 (inclusive) credits applied toward graduation are earned at Mason, and the student’s cumulative GPA is at least 3.80.

Graduate Policies

Graduate Council
The Graduate Council is the governing body for all graduate academic policies and procedures. The council approves all new graduate programs; authorizes all graduate course work, policies, and degrees conferred by the university; and sets minimum standards for admission to and graduation from any graduate program. These are minimum standards that all programs must meet; individual programs may set and enforce higher standards. The Office of the Provost administers university graduate policies for the Graduate Council.

Graduate Faculty
The graduate faculty consists of all tenured and tenure-track faculty members and other faculty members appointed to the graduate faculty by the provost.

Academic Programs
At the graduate level, Mason offers certificates and master’s and doctoral degrees. There are also a number of combined bachelor’s and accelerated master’s degree programs for academically strong undergraduates with a commitment to research. For more information, see the Registration and Attendance section of this chapter.

Student Status
Students may access graduate classes and programs according to their status as nondegree or enrolled degree students. For more information, see the Admission chapter of this catalog.

Full-Time Classification
Graduate students are considered full time if they are enrolled in at least 9 graduate credits per semester or hold a full-time assistantship (20 hours a week) and are enrolled in at least 6 graduate credits per semester. Graduate students who are enrolled in dissertation credits (either 998 or 999) are considered full time if they are enrolled in at least 6 credits per semester, regardless of whether they hold an assistantship. Graduate students who have completed the minimum number of credits required by their degree program, including the minimum number of credits of 998 and 999 required by the university and their degree program, are considered full time if they are registered for at least 1 credit of 999 and their advisors and department chairs certify each semester that they are working full time on the dissertation. Note that different criteria for full-time status may apply for tuition, verification, loan deferral, and financial aid. Contact Student Accounts, the Registrar’s Office, and Student Financial Aid, respectively, for more information.

Change from Nondegree Status
A student admitted for graduate study in nondegree status may request a change to degree status within the same program. All admission requirements (as usually defined by the student’s program for degree status) must be met, including official transcripts and letters of recommendation. If the student intends to use credits earned in nondegree status toward a degree, the credits must be approved on the Graduate Transfer of Credit Request form. The credit must have been earned within six years prior to first enrollment as an admitted student in the specific certificate or degree program, and a minimum grade of B (3.00) must have been earned. There is a limit on the number of credits that can be transferred when changing from nondegree to degree status; please see the applicable degree program for specific information.

Removing Provisional Qualifier
For policies concerning students admitted provisionally, see the Graduate Admission Policies section in the Admission chapter of this catalog.

Permission to Re-Enroll
Permission to re-enroll in a program must be obtained by all master’s and doctoral degree students who have failed to enroll in at least 1 credit of course work for two or more consecutive semesters at Mason. A program may allow a student to petition to graduate under any catalog in effect while the student was enrolled. The final decision rests with the unit dean or director. Forms are available from the Office of the Registrar at registrar.gmu.edu/forms.
Voluntary Resignation from Graduate Academic Program

Degree-seeking students may officially resign from their academic program with the approval of their department or program chair and their dean. The Voluntary Resignation form must be approved by the student’s program and Student Accounts, then submitted to the Registrar’s Office for notation on the transcript. Resignations after the drop period will result in grades of W on the student’s transcript for that semester, and removal from any future registered courses. Program resignation is final. Students who have been granted a resignation will not be able to register for any courses unless admitted to another degree program or nondegree status in a different program.

Academic Advising

At the time the student was admitted to graduate study, the student is assigned a faculty advisor by the academic program responsible for the student’s program of study. Registration for newly admitted graduate students, as well as continuing students, begins with a visit to the student’s academic advisor. There, the student can obtain information about specific courses and degree requirements and develop an individual program of study. Progress in an approved program of study is the shared responsibility of the student and the advisor. The graduate student is responsible for compliance with the policies and procedures of the college, school, or institute, and all applicable departmental requirements that govern the individual program of study. Students should consult with their advisors before registration each semester.

Transfer of Credit

Graduate credit earned prior to admission to a certificate, master’s, or doctoral program may be eligible to be transferred into the program and applied to the certificate or degree. Transfer of credit requires the approval of the program director and dean or director of the school, college, or institute. They will determine whether the credit is eligible for transfer and applicable to the specific certificate or degree program. Note that credits accepted for transfer do not compute into any Mason GPA. Limits on the number of credits that can be transferred derive from the degree requirements given below.

Credit is usually considered for transfer at the student’s request at the time of initial registration as a degree-seeking student. Students must supply official transcripts plus an official transcript evaluation for transcripts from outside the United States, and an official translation for transcripts not in English if these documents were not supplied in the admissions process. Credit transfer requests from students who are admitted provisionally are not considered until the students have fulfilled the conditions of their admission and had the provisional qualifier removed from their records.

Students requesting a reduction of credit must supply official transcripts plus an official transcript evaluation for transcripts from outside the United States, and an official translation for transcripts not in English if these documents were not supplied in the admissions process. Reduction-of-credit requests from students who are admitted provisionally are not considered until the students have fulfilled the conditions of their admission and had the provisional qualifier removed from their records.

Credits used in reduction of credit are not subject to time limits, and the credits must have been applied to a previous degree. All the other conditions given above for eligibility of transfer of credit apply also to reduction of credits.

Credit by External Exam

Degree credit for satisfactory completion of an external exam is limited to those exams and achievement levels specifically approved by the Graduate Council.

Credit from Other Institutions

Students enrolled in a degree program may take graduate courses at another accredited institution and apply these credits to a master’s or doctoral degree with prior approval. Approval must be secured in writing from the director of the graduate program and the dean or director of the school, college, or institute, and submitted to Mason’s Office of the Registrar before registering at the other institution. Upon completion of the course, students must arrange for an official transcript to be submitted to Mason so that the credits may be transferred into their Mason degree program. These credits are subject to all the other conditions given above for transfer credit, including limits on numbers of credits that can be taken elsewhere. Note that credits accepted for transfer do not compute into any Mason GPA. Permission to take a course elsewhere does not exempt a graduate student from satisfying the degree requirements given below.

Enrolled, degree-seeking graduate students may be eligible to take courses through the Consortium of Universities of the Washington Metropolitan Area. See the University Consortium section. Credits earned through the consortium are considered resident, not transfer, credits, and are therefore not subject to transfer of credit conditions or limitations.
Graduate Academic Standards, Grades

University course work is measured in terms of quantity and quality. A credit normally represents one hour per week of lecture or recitation, or not fewer than two hours per week of laboratory work, throughout a semester. The number of credits is a measure of quantity. The grade is a measure of quality. The university-wide system for grading graduate courses is as follows:

<table>
<thead>
<tr>
<th>Grade</th>
<th>Quality Points</th>
<th>Graduate Courses</th>
</tr>
</thead>
<tbody>
<tr>
<td>A+</td>
<td>4.00</td>
<td>Satisfactory/Passing</td>
</tr>
<tr>
<td>A</td>
<td>4.00</td>
<td>Satisfactory/Passing</td>
</tr>
<tr>
<td>A-</td>
<td>3.67</td>
<td>Satisfactory/Passing</td>
</tr>
<tr>
<td>B+</td>
<td>3.33</td>
<td>Satisfactory/Passing</td>
</tr>
<tr>
<td>B</td>
<td>3.00</td>
<td>Satisfactory/Passing</td>
</tr>
<tr>
<td>B-</td>
<td>2.67</td>
<td>Satisfactory*/Passing</td>
</tr>
<tr>
<td>C</td>
<td>2.00</td>
<td>Unsatisfactory/Passing</td>
</tr>
<tr>
<td>F</td>
<td>0.00</td>
<td>Unsatisfactory/Failing</td>
</tr>
</tbody>
</table>

* Although a B- is a satisfactory grade for a course, students must maintain a 3.00 average in their degree program and present a 3.00 GPA on the courses listed on the graduation application.

Academic Warning

A notation of academic warning is entered on the transcript of a graduate student who receives a grade of C or F in a graduate course or while a grade of IN is in effect.

Academic Termination

Graduate students who are admitted provisionally may be terminated from their academic programs if they fail to meet the conditions of their admission in the time limits set at admission. Students admitted provisionally and nondegree graduate students may be terminated upon accumulating grades of F in two courses or 9 credits of unsatisfactory grades in graduate courses. Provisionally admitted students who accumulate 12 credits of unsatisfactory grades in undergraduate courses will also be terminated. (For students admitted provisionally, graduate and undergraduate grades are not combined in the calculation of unsatisfactory credits leading toward termination.) Although the university will make every effort to notify students when their performance reaches the threshold for termination, each student is responsible for knowing the termination criteria for non-degree students at Mason, for knowing when their grades have met the standard, and for initiating any appeal to their dean. Students may be terminated if they fail to achieve satisfactory progress toward their degree. A letter of termination is sent by the dean or director of the school, college, or institute, and notification of academic termination is affixed to the graduate student’s official record. A student who is dismissed may not take additional course work at Mason.

Requirements for Graduate Certificates

Candidates must satisfy all university requirements and all requirements established by the graduate certificate program faculty. Individual departmental graduate certificate requirements are listed under their academic departments in this catalog. Note that the following are university minimum requirements; individual programs may have higher standards and/or more restrictive requirements.

- Graduate certificate programs require a minimum of 15 graduate credits.
- Only graduate courses may apply toward the graduate certificate.
- A maximum of 3 graduate credits taken at another institution can be transferred into a graduate certificate program. See Transfer of Credit section.
- Candidates must have a minimum GPA of 3.00 in course work presented on the certificate application, which may include no more than 3 credits of C. (Grades of C+, C-, and D do not apply to graduate courses.) The GPA calculation excludes transfer credits.
- Certificate students are subject to graduate termination and dismissal policies.

Students in Master’s or Doctoral Programs also Pursuing Graduate Certificates

Admission

Students must be admitted to the master’s or doctoral program in degree status. They must also be admitted to degree status for the graduate certificate program at least one semester before completion of certificate requirements.

Course Work in Degree Status

More than half of the credits required for the certificate program must be taken in degree status for the master’s or doctoral degree.

Time Limits

The time limits coincide with the six-year time limit for master’s degrees or the six-year time limit for advancement to candidacy in a doctoral degree. Master’s and doctoral time limit rules apply.

Multiple Programs

Students may be enrolled in one or two graduate certificate programs while they pursue a master’s and/or doctoral degree. Students who have completed a graduate certificate may subsequently be approved to apply many of those credit hours to a master’s degree. Courses applying to the master’s or doctoral program may also apply to up to two graduate certificate programs. When such sharing of credits between graduate certificates and graduate degrees has occurred, a maximum of two graduate certificates may be conferred.
Students in Graduate Certificate Programs Only

**Admission**

Students must be admitted to the graduate certificate program in degree status.

**Course Work in Degree Status**

More than half of the credits required for the graduate certificate program must be taken in degree status for that program.

**Time Limits**

The time limit for completion is six years from the date of enrollment into degree status for the graduate certificate program. The time limit is not extended because of an absence and subsequent re-enrollment into the graduate certificate program. Failure to meet the time limit or to secure an extension request may result in termination from the program.

**Multiple Programs**

Students may be admitted to two graduate certificate programs at the same time. The graduation application for each graduate certificate must include a minimum of 12 credits that apply only to that certificate and not to another.

**Requirements for Master’s Degrees**

Candidates must satisfy all university degree requirements and all requirements established by the master’s program faculty. Individual departmental degree requirements are listed under the respective master’s programs in this catalog.

- Candidates must earn a minimum of 30 graduate credits.
- Only graduate courses may apply toward the degree.
- The majority of the credits applied to the degree must be earned at Mason or, in the case of programs offered through joint, cooperative, or consortial arrangements, at the participating institutions.
- A minimum of 18 credits must be taken in degree status, after admission to the degree program.
- A maximum of 6 credits of master’s thesis research (799) or master’s project may be applied to the degree.
- Candidates must have a minimum GPA of 3.00 in course work presented on the degree application, which may include no more than 6 credits of C. Grades of C+, C-, or D do not apply to graduate courses. The GPA calculation excludes all transfer courses and Mason nondegree studies credits not formally approved for the degree.

**Thesis Options**

Requirements regarding a thesis vary with the degree program. A number of master’s programs offer both thesis and non-thesis options. The same quality of work is expected of students regardless of their chosen option. For more information, consult the section on degree requirements under each degree program.

**Time Limit**

Master’s degree students have six years from the time of first enrollment as a degree-seeking student to complete their degrees. Individual master’s programs may have stricter time limits, which are published in this catalog. Students who are given permission to re-enroll following an absence from Mason may not count the six-year time limit as beginning on the date of re-enrollment. Students who will not meet published time limits because of circumstances beyond their control may petition for an extension. Failure to meet the time limits or to secure approval of an extension request may result in termination from the program.

**Master’s Thesis**

When a thesis proposal has been approved by the appropriate department, the department chair sends the collegiate dean or director a copy of the thesis proposal, including the approval signatures of the master’s thesis committee members. Students may enroll in thesis research (799) at the beginning of the next semester. Students must register for 3 credits per semester until they reach the last 3 required credits. Once they have only 3 credits remaining, students may enroll for 1 credit per semester until graduation. To be considered a full-time student, the advisor and department chair must certify each semester that the student is working full time on the thesis. Please note: Graduate students must maintain continuous enrollment in 799 while writing and submitting a thesis. Graduation candidates who miss the library deadline for thesis submission, but do submit officially before the next semester begins, do not have to register for 799 in that next semester, but must stay active to graduate.

The master’s thesis committee is named by the candidate’s department chair, who designates a member of the graduate faculty from that department as the thesis committee chair. The committee is appointed after consulting with the candidate and advisor and consists of at least three people. Two must be members of the graduate faculty from the candidate’s department, while one may come from outside the department.

The thesis committee chair is primarily responsible for directing and guiding the candidate’s research and writing activities. The student is responsible for keeping all committee members informed of the scope, plan, and progress of the research as well as the thesis.

Students selecting the thesis option should obtain a copy of Mason’s Thesis, Dissertation, or Project Guide, which is available at thesis.gmu.edu. Students may register in 799 Thesis only after their thesis proposal has been submitted and approved as prescribed in the guide. Any student not in attendance at Mason who is preparing a thesis under the active supervision of a member of the faculty or wishes to take an exam must maintain continuous registration in 799 for at least 1 credit per semester.

**Thesis Submission**

The university has a policy on the dissemination of scholarly works created by graduate students. The Electronic Thesis and Dissertation (ETDs) program encourages masters-level graduate students to submit an electronic copy of their thesis for broad scholarly dissemination through the Mason Archival Repository Service (MARS). Student participation in the ETDs program is strongly encouraged, but not mandatory. All students choosing to participate in this program will be required to sign the MARS Author/Contributor Permission Agreement.

On or before the thesis deadline for any semester, the student will submit a complete (signed Signature Sheet through Curriculum Vitae) 100% cotton copy of his or her thesis to the University Libraries along with a transmittal sheet. The student may also opt to submit an electronic copy of his/her thesis. These submissions can be in Word, WordPerfect, or in portable document format (PDF). Media formats (tiff, jpeg, png, wav, avi, mpeg, mov, rm, wmv, wma, etc.) for supporting materials will also be accepted. Datasets may be accepted at the discretion of the libraries. The files may be submitted on
CD, DVD, or USB memory device. Please note that those students opting out of the ETDs program are required to submit two 100% cotton copies of their thesis.

For degree conferral in a particular semester, the above materials must be submitted to the library by 5 p.m. on the last Friday of classes in that semester. For specific deadlines and other information, go to registrar.gmu.edu.

**Requirements for Doctoral Degrees**

Candidates must satisfy all university degree requirements and all requirements established by the doctoral program faculty. Departmental degree requirements are listed under the respective doctoral programs in this catalog. Programs may impose more stringent requirements.

- Candidates must earn a minimum of 72 graduate credits, which may be reduced by a maximum of 30 credits from a completed master’s degree or other suitable, approved transfer work.
- The remaining 42 credits for students with a master’s degree may apply only to the doctoral degree and not to a second master’s degree.
- Only graduate courses may apply toward the degree.
- The majority of credits applied to the doctoral degree (minimum 72) must be earned at Mason or in the case of programs offered through joint, cooperative, or consortial arrangements, at the participating institutions.
- More than half of all credits (minimum 72) must be taken in doctoral degree status, after admission to the degree program.
- Candidates must pass a written or oral doctoral candidacy (qualifying) exam, or both.
- Candidates must complete a minimum of 12 credits of doctoral proposal (998) and doctoral dissertation research (999). A maximum of 24 credits of 998 and 999 may be applied to the degree.
- Candidates must pass a final public defense of the doctoral dissertation.
- Candidates must have a minimum GPA of 3.00 in course work presented on the degree application, which may include no more than 6 credits of C. (Grades of C+, C-, or D do not apply to graduate courses. The GPA calculation excludes all transfer courses and Mason extended studies or nondegree credits not formally approved for the degree.)

**Time Limit**

Doctoral students have six years from the time of first enrollment as a degree-seeking student to become advanced to candidacy. Students have five years from the time of advancement to candidacy to graduation. Individual doctoral programs may have stricter time limits, which are published in this catalog. Students who are given permission to re-enroll following an absence from Mason may not count the time limits as beginning on the date of re-enrollment. Students who will not meet published time limits because of circumstances beyond their control may petition for an extension. Failure to meet the time limits or to secure approval of an extension request may result in termination from the program.

**Doctoral Research Skill Requirements**

Some doctoral degree programs require demonstration of proficiency in a research skill, including knowledge of the research literature in a foreign language, computer language, statistical methods, or a research tool specific to the discipline. Research skill requirements are included with the degree requirements for the specific doctoral degree. Where demonstration of research skills is required, certification that this requirement has been met must be completed for advancement to candidacy.

**Program of Study**

Usually before the end of the second year of graduate study but no later than consideration for advancement to candidacy, doctoral students must submit a program of study for approval by the dean or director of the college, school, or institute. The program of study must include major courses and supporting courses to be completed, research skills required, subject areas to be covered by the candidacy exam, and a proposed date for the candidacy exam. Program of Study Forms are available from each program’s doctoral coordinator. Any changes in the programs of study must be documented with an amended Program of Study Form.

**Advancement to Candidacy**

Advancement to candidacy implies that a doctoral student has demonstrated both a breadth and a depth of knowledge in the field of study and is capable of exploring problems on the boundaries of knowledge. The candidacy exam includes a written part and may include an oral part, depending on the particular doctoral program. Doctoral students should consult the degree requirements for each doctoral program to determine whether an oral portion is required, whether it is judged separately or with the written portion, the number of times a failed candidacy exam may be repeated and any time limits for repeating, and any time limits for attempting the candidacy exam.

Before doctoral students may be advanced to candidacy by the unit dean or director, they should have completed all course work required by the program faculty, been certified in all doctoral research skills required, passed the candidacy exam, and been recommended by the doctoral supervisory committee or program coordinator. Students advanced to candidacy after the add period for a given semester must wait until the following semester to register for 999 Dissertation Research.

**Dissertation Committee**

By the time a doctoral student is advanced to candidacy, the dean or director of the school, college, or institute appoints a dissertation committee upon recommendation of the program director. The committee consists of a graduate faculty member (see the Graduate Faculty section in this chapter) from the department of the student’s field of study and at least two other members of the graduate faculty, one of whom must be from outside the student’s local academic unit (school, college, institute, or department). Additional members may be appointed who are not members of the graduate faculty but are from outside the university.

Student-initiated changes in the composition of the dissertation committee may occur only with the approval of the dean or director in consultation with the committee. Such changes may be made for extenuating circumstances only. Faculty may resign from a dissertation committee with appropriate notice by submitting a written resignation.
Dissertation Registration (998, 999)

Students working on dissertation research (999) must register for a minimum of 3 credits of 999 per semester (excluding summers) until they have completed the minimum number of credits of 995 and 999 required by the university and their degree program. Then, they must register for 1 credit of 999 until the dissertation is complete and has been officially submitted to the library. See the Full-Time Classification section for more information.

All registration for doctoral dissertation research (999) must be planned with the dissertation director and approved by the dean or director of the school, college, or institute. Dissertation research (999) is open only to doctoral students who have advanced to candidacy. Once enrolled in 999, students must maintain continuous registration in 999 each semester until graduation, excluding summers. Students who defend in the summer must be registered for at least 1 credit of 999 in the summer. Individual doctoral programs may require continuous registration beginning with 998. Graduation candidates who miss the library deadline for dissertation submission, but do submit officially before the next semester begins, do not have to register for 999 in that next semester, but must stay active to graduate.

It is the student’s responsibility to complete registration for dissertation proposal (998) or research (999) prior to the first day of classes for the semester. If this date is missed, students must still enroll in these courses via Add or Late Schedule Adjustment procedures and are subject to Late Registration fees. Failing to register on time in a particular semester does not alter the requirement for continuous registration in 999.

Doctoral Dissertation

A dissertation is required for the doctor of philosophy degree and most professional doctoral degrees. The dissertation is a written piece of original thinking that demonstrates doctoral candidates’ mastery of subject matter, methodologies, and conceptual foundations in their chosen field of study. This is generally achieved through consideration of a problem on the boundaries of knowledge in the discipline.

The director of the dissertation committee is primarily responsible for directing the doctoral candidate’s research and guiding the preparation of the written dissertation. After the dissertation committee is appointed, the student should begin discussions with the director to define a suitable problem for the dissertation. Before the student may enroll in doctoral dissertation research (999), the dissertation proposal must be approved by the dissertation committee and evidence of approval sent to the unit dean or director for approval. Before that time, the student may enroll in proposal research (998).

Guidelines for the content and general format of doctoral dissertations are in the Thesis, Dissertation, or Project Guide, which is available at thesis.gmu.edu. Consult a doctoral coordinator to determine which additional reference manuals are suitable.

Doctoral Defense

As soon as all degree requirements have been satisfied, including completion of the doctoral dissertation, the doctoral candidate may request a doctoral defense. Approval for the defense is given by the doctoral dissertation committee, department or program chair, and relevant dean or director of the school, college, or institute. Notice of a defense must be circulated to the university community two weeks before the defense date. The public defense should demonstrate the candidate’s maturity of judgment and intellectual command of the chosen branches of the field of study.

At the close of the final defense, the dissertation committee makes final judgments for approving the dissertation. The doctoral candidate is responsible for making all required changes promptly, submitting the original and required copies, and obtaining signatures. Final approval for the dissertation is given by the doctoral dissertation committee, department or program chair, and the relevant dean or director of the school, college, or institute, all of whom must sign the final copy.

For a dissertation to be approved, all members of the committee must sign. If a committee member refuses to do so, the student or any member of the committee may petition the unit dean or director for a review and ruling. The dean or director may seek the advice of outside reviewers to provide an assessment of the work. The final decision is that of the dean or director, and is not subject to appeal.

Dissertation Submission and Fee

The university has a policy on the dissemination of scholarly works created by graduate students. The Electronic Thesis and Dissertation (ETDs) program encourages doctoral-level graduate students to submit an electronic copy of their dissertation for broad scholarly dissemination through the Mason Archival Repository Service (MARS). Student participation in the ETDs program is strongly encouraged, but not mandatory. All students choosing to participate in this program will be required to sign the MARS Author/Contributor Permission Agreement.

On or before the dissertation deadline for any semester, the student will submit a complete (signed Signature Sheet through Curriculum Vitae) 100% cotton copy of his or her dissertation to the University Libraries along with a transmittal sheet. The student will also submit an electronic copy of his or her dissertation. These submissions can be in Word, WordPerfect, or in portable document format (PDF). Media formats (tif, jpg, png, wav, avi, mpeg, mov, rm, wmv, wma, etc.) will be accepted. Datasets may be accepted at the discretion of the libraries. The files may be turned in on CD, DVD, or USB memory device. Please note that those students opting out of the ETDs program are required to submit two 100% cotton copies of their dissertation.

Submission of an additional PDF on CD of the dissertation to University Microfilms International (ProQuest) is required; a fee of either $55 or $150 (depending on publishing option chosen) is paid by the student for this process. Submission of a completed Survey of Earned Doctorates is also required. All copies of the dissertation must be submitted and all fees paid before the doctoral degree is awarded.

For degree conferral in a particular semester, the above materials must be submitted to the library by 5 p.m. on the last Friday of classes in that semester. (For specific deadlines and more information, go to registrar.gmu.edu.) To be included in Mason’s published commencement program, doctoral students must submit materials to the library by the commencement program deadline.
University Dissertation and Thesis Services

University Dissertation and Thesis Services (UDTS) facilitates completion and submission of dissertations, theses, and graduate-level projects. The program assists Mason students in all stages of production. The UDTS web site, thesis.gmu.edu, provides students with useful tools, including download-able templates of necessary elements, forms required for the submission process, and links to related web sites. Students completing a thesis or dissertation are required to complete a format review. UDTS is located in Fenwick Library, Special Collections and Archives, Wing 2C. For more information, contact the university dissertation and thesis coordinator at 703-993-2222.
Equal Opportunity and Nondiscrimination Policy

George Mason University is committed to providing equal opportunity and an educational and work environment free from any discrimination on the basis of race, color, religion, national origin, sex, disability, veteran status, sexual orientation, or age. Mason shall adhere to all applicable state and federal equal opportunity/affirmative action statutes and regulations.

The university is dedicated to ensuring access, fairness, and equity for minorities, women, individuals with disabilities, and veterans (as covered by law) in its educational programs, related activities, and employment. Mason shall thus maintain a continuing affirmative action program to identify and eliminate discriminatory practices in every phase of university operations.

Retaliation against an individual who has raised claims of illegal discrimination or cooperated with an investigation of such claims is prohibited.

Students and employees should bring questions or concerns to the attention of the Office of Equity and Diversity Services, Mason Hall, Suite D105, 703-993-8730. The Equal Opportunity/Affirmative Action Grievance Procedures list the various ways to file a complaint. Grievance procedures can be found at www.gmu.edu/equity/policies_grievances.htm.

Sexual Harassment Policy

It is the policy of the university to provide an academic and work environment free from sexual harassment. Sexual harassment is contrary to the standards and mission of the university. Sexual harassment is illegal and will not be tolerated. Each member of the university community has a responsibility to maintain an academic and work environment free from sexual harassment. The university will take whatever action is necessary to prevent, stop, correct, or discipline harassing behavior. Same-sex sexual harassment violates this policy and is subject to discipline under the same procedures.*

Sexual harassment is defined by law as unwelcome sexual advances, requests for sexual favors, and other verbal, physical, or other form of expressive communication of a sexual nature when submission to or rejection of such conduct is used as a basis for employment or academic decisions, or such conduct has the purpose or effect of unreasonably interfering with an individual’s work or academic performance, or creating an intimidating, hostile, or sexually offensive work or academic environment. Examples of behavior that may be considered sexual harassment include, but are not limited to, the following:

- Sexual assault
- Explicitly or implicitly requiring submission to sexual advances as a condition or term of education or employment, i.e., grades, employment, promotion, letters of recommendation, or other privileges
- Repetitive sexual comments, questions, jokes, gestures, or other forms of sexually explicit expression

Any student, faculty member, or staff employee who believes he or she is the victim of sexual harassment should report the incident promptly in the manner most comfortable to him or her. The Equal Opportunity/Affirmative Action Grievance Procedures list the various ways to file a complaint. Grievance Procedures can be found at www.gmu.edu/equity/policies_grievances.htm.

Retaliation against an individual who has raised claims of illegal discrimination or cooperated with an investigation of such claims is prohibited.

Any employee who becomes aware of sexual harassment or other potentially discriminatory behavior must contact the Office of Equity and Diversity Services. The Office for Equity and Diversity Services is responsible for administering and monitoring Mason’s equal opportunity/affirmative action policies and procedures. Inquiries about or complaints alleging violation of the university’s equal opportunity/affirmative action policies should be directed to the Office of Equity and Diversity Services, Mason Hall D105, 4400 University Drive, MS 2C2, Fairfax, Virginia 22030. Phone: 703-993-8730; TTY: 703-993-8787.

* Note: Sexual harassment does not include verbal expression or written material that is relevant to course subject matter or curriculum, and this policy shall not abridge academic freedom or the university’s educational mission.

Nondiscrimination and Reasonable Accommodations on the Basis of Disability

The university is committed to providing equal access to employment and educational opportunities for people with disabilities. Mason recognizes that individuals with disabilities may need reasonable accommodations to have equally
effective opportunities to participate in or benefit from the university educational programs, services, and activities, and have equal employment opportunities. The university will adhere to all applicable federal and state laws, regulations, and guidelines with respect to providing reasonable accommodations as necessary to afford equal employment opportunity and equal access to programs for qualified people with disabilities. Applicants for admission and students requesting reasonable accommodations for a disability should call the Office of Disability Services at 703-993-2474. Employees and applicants for employment should call the Office of Equity and Diversity Services at 703-993-8730 or 703-993-8787 (TTY). Questions regarding reasonable accommodations and discrimination on the basis of disability should be directed to the ADA coordinator in the Office of Equity and Diversity Services.

**Conduct within the University Community**

The Mason community respects and protects the individual dignity, integrity, and reputation of all its members. All students, faculty, and staff must comply with the conventions and regulations of university life that are necessary to maintain order, protect individuals and property, and fulfill the purposes and responsibilities of a university. This includes ensuring our commitment to high standards of civility and decency toward all.

Students enrolling in the university assume an obligation to conduct themselves in a manner compatible with the university’s function as an educational institution. The Code of Virginia (Section 23-9.2:3) confers upon the university the responsibility for maintaining order within the university and the right to exclude those who are disruptive.

The Office of Judicial Affairs is administratively responsible for supervising student conduct on campus. Questions regarding student conduct should be directed to the Judicial Affairs Office, SUB I, Room 302, 703-993-2884, judicialaffairs.gmu.edu.

**Student Health Services**

Student Health Services provides high-quality health care to all currently enrolled students. There is no evaluation fee, but there are minimal charges for most tests and procedures. The staff includes physicians, nurse practitioners, registered nurses, a medical technologist, and various levels of support personnel. Appointments are required for nonemergency services.

Offices are located on the Fairfax, Prince William, and Arlington Campuses. Contact information is as follows:

**Fairfax Campus**: SUB I, Room 214, 703-993-2831

**Prince William Campus**: Occoquan Building, Room 229, 703-993-8374

**Arlington Campus**: 3330 Washington Boulevard, Room 150 F and I, 703-993-4863

**Immunization Requirements**

Immunization policies are determined by legislation enacted by the Virginia General Assembly and recommendations from the Advisory Committee on Immunization Practice, the Centers for Disease Control and Prevention (CDC), and the American College Health Association. All students born after December 31, 1956, are required to provide documented evidence that they have been immunized against certain communicable diseases.

The **required immunizations** are as follows:

- Two doses of measles, mumps, rubella (MMR), with first dose given after first birthday and after 1967 or a laboratory report of a titer documenting immunity is acceptable.
- Primary tetanus, diphtheria, and pertussis series, with last tetanus and diphtheria booster within past 10 years. Students requiring a decennial booster should receive Tdap.
- Students must be immunized against meningococcal disease, or they must sign a waiver stating that they have received and reviewed information on meningococcal disease and the availability and effectiveness of the vaccine but have chosen not to be vaccinated. If that student is younger than 18 years old, the waiver must also be signed by a parent or other legal representative.
- Students must be immunized against hepatitis B disease, or they must sign a waiver stating that they have received and reviewed information on hepatitis B disease and the availability and effectiveness of the vaccine but have chosen not to be vaccinated. If the student is younger than 18 years old, the waiver must also be signed by a parent or other legal representative.
- Tuberculosis (TB) screening is required for all students at high risk for contracting TB as defined by the Centers for Disease Control and Prevention (CDC) and the Virginia Department of Health. TB screening, completed in the United States, is also required for all students from countries where TB is endemic as defined by the CDC.

The Immunization Record must be submitted by October 1 for fall entrance and March 1 for spring entrance. Records can be sent to the Immunization Office, Room 215, in care of Student Health Services, SUB I, 4400 University Drive, MS 2D3, Fairfax, Virginia 22030. Immunization records can also be faxed to 703-993-4053. The immunization record is included as a tear-out form in the orientation booklets that are mailed to all new undergraduate and transfer students when their application for admission to the university has been approved. For more information, call 703-993-2836, e-mail immunize@gmu.edu, or go to www.gmu.edu/student/hcs/imm.html.

**Drug and Alcohol Policy**

The abuse of drugs and alcohol by members of the campus community is not compatible with the goals of the university. Mason attempts to prepare individuals to act responsibly by defining standards of behavior and providing educational programs to create an awareness of drug- and alcohol-related problems. Those in need of assistance in dealing with drug- and alcohol-related problems are encouraged to seek the confidential help of the university’s Office of Alcohol, Drug, and Health Education, adhe.gmu.edu.
Drugs

- Use or possession of illegal drugs and drug paraphernalia is prohibited on all Mason campuses. Violation of this community standard will be considered a serious offense. Implementation of this policy will be in accord with established university procedures as contained in the University Judicial Code.
- The University Police will enforce all applicable local, state, and federal laws in accord with established standing orders, procedures, and guidelines.
- There will be a university judicial review of all reports of drug offenses occurring on campus. Action under the University Judicial Code will neither prejudice nor be prejudiced by action taken in the criminal justice system or by the management of the Office of Housing and Residence Life.
- Any student found responsible for a violation of law or regulation involving illegal drugs may, at the discretion of the hearing officer, be required to undergo an evaluation administered by personnel of the university’s Office of Alcohol, Drug, and Health Education prior to readmittance to the university.
- The housing status of a resident student found in violation of a campus drug regulation will be determined by the appropriate housing official. Guests and visitors found responsible of violating a campus drug regulation while in a residence hall will be issued a trespass order prohibiting their presence in any and all residential buildings on the university’s campuses. This trespass order will be in effect for a minimum of one calendar year.
- In addition to any action taken by the Office of Housing and Residence Life, the standard sanction for a student’s first on-campus violation involving possession or use of marijuana or possession of drug paraphernalia will be suspension from the university for a minimum of one academic semester.
- Any student found responsible for a violation involving the sale or the possession of an illegal substance with intent to distribute will be permanently separated from the university.
- Any student found responsible for use or possession of an illegal drug other than marijuana will be suspended from the university for a minimum of one year. The suspended student must provide evidence of successful participation in a drug treatment program prior to reinstatement.
- All first-time offenses of this policy by residential students, except those involving severe intoxication and/or emergency medical response, will be adjudicated through the housing judicial system. All offenses by nonresident students will be referred to the university judicial administrator.
- Housing discipline sanctions will be primarily educational, but may include a housing assignment change, referral to the university judicial administrator, and/or removal from housing.
- All cases involving severely intoxicated students and/or police or emergency medical response will be referred to the university judicial administrator for disciplinary action. The university judicial administrator may mandate an evaluation by the Office of Alcohol, Drug, and Health Education or an outside agency.
- Sanctions imposed by the university judicial administrator or the university Judicial Board will be designed to offer assistance in overcoming an identified problem. While the purpose of the judicial action will be educational and remedial, it may be appropriate to remove the student from campus housing or the university.
- The university will encourage parental involvement whenever there is a repeat offense or the first offense indicates a serious problem. This involvement will be in accord with the provisions of the Family Education Rights and Privacy Act.

Notice to All State Employees

The federal Drug-Free Workplace Act requires the university to inform all employees of the state that the unlawful manufacture, distribution, possession, or use of a controlled substance is prohibited in the workplace. The workplace consists of any state-owned, controlled, or leased property, or the site where state work is performed. Any employee who violates this prohibition will be subject to disciplinary action up to and including discharge and, at the discretion of management, will be required to satisfactorily participate in a drug abuse assistance or rehabilitation program. Employees must abide by the terms of this prohibition as a condition of employment and must notify their supervisor no later than five days after conviction of any criminal drug statute conviction occurring in the workplace.

Commonwealth Policies on Alcohol, Drug Use

Those who purchase, possess, and consume alcoholic beverages on campus must do so responsibly and must have reached the legal age of 21. All members of the university community (students, faculty, staff, and alumni, and their guests) are expected to comply with university-related regulations, as well as federal and state laws regarding the use of alcohol. Compliance also extends to university-sponsored activities held off campus. Students and employees are expected to take personal responsibility for their own conduct when making decisions regarding alcohol use.

Virginia law prohibits the purchase, possession, or consumption of beer, 3.2 beverages, wine, or distilled spirits by those under the age of 21. The law also prohibits purchasing for or serving such beverages to a person under age 21. Underage people who use or attempt to use a driver’s license that has been altered, forged, borrowed, or in any way deceptive in an attempt to obtain prohibited beverages shall have their...
driver’s license revoked for a minimum of 30 days but for not more than one year. Consuming alcohol in unlicensed, public places or offering a drink to another in a unlicensed, public place is also a violation of Virginia law. The sale of alcoholic beverages to an intoxicated person is prohibited. In addition, it is unlawful for an intoxicated person to purchase or possess alcoholic beverages. While purchase or possession by an intoxicated person is a misdemeanor, violators are subject to having their driver’s license revoked for one year.

It is illegal to operate a motor vehicle, including mopeds, when a person has a blood alcohol concentration (BAC) of 0.08 percent or higher. Individuals under age 21 who drive with a BAC of more than 0.02 percent but less than 0.08 percent risk having their driver’s license suspended for six months and being fined up to $500. If a person is arrested for driving with a license revoked or suspended under a prior driving-under-the-influence (DUI) conviction, the offender’s car is immediately impounded for 30 days. Following conviction, the court can impound the vehicle for an additional 90 days. If the car does not belong to the offender, the owner of the car may petition the court for release of the vehicle.

Sobriety spot checks to detect drunken drivers are legal. Refusing a breath test or having a BAC of 0.08 percent or higher may result in an individual’s driver license being revoked for seven days. The option to request a blood test instead of a breath test for an alcohol-related offense is no longer available.

It is illegal to serve alcohol from an unregistered keg, which is defined as a common container holding four gallons or more. Only University Dining Services or other authorized entity may serve alcohol from kegs.

Possession, use, sale, or distribution of controlled substances, including marijuana, is a violation of federal and state laws, as well as university regulations. The 1988 federal Drug-Free Workplace Act also prohibits the unlawful manufacture, distribution, possession, or use of a controlled substance in the workplace.

Students, faculty, staff, and sponsoring organizations found in violation of state or university regulations may be subject to disciplinary action, civil action, or loss of the privilege to reserve or use university facilities. Disciplinary action for students or student organizations will be conducted in accordance with the Mason Judicial System for Student Conduct, and civil proceedings may occur in certain situations. University sanctions are intended not to punish individuals but to provide education and rehabilitation services.

Sanctions depend on the severity of the violation. They range from written warnings to expulsion from the university. Most sanctions require the student to be evaluated by Substance Abuse Programs and Services personnel, who will assess the severity of alcohol and other drug problems and offer referrals to arrange community service hours. Employees found in violation of the university’s drug and alcohol policy may be subject to action by the appropriate administrative office.

**Health Risks**

Alcohol is a depressant that slows brain activity. Alcohol use can impair decision-making abilities and lead to negative consequences, including risky sexual behavior. Drinking alcohol should be avoided by pregnant women and anyone taking prescription medications or operating a motor vehicle. Long-term or heavy use of alcohol is linked to cancer, heart and liver damage, and other serious illnesses, and can lead to tolerance and physical and psychological dependence. Excessive alcohol intake can cause death because of alcohol poisoning. All students and employees are expected to respect those who choose not to drink.

Illicit drugs have more than legal consequences; they have specific health and ethical risks that can cause dangerous consequences and unhealthy, dependent behavior. Use of alcohol (or any other drug) in a manner that leads to impairment or intoxication is unhealthy and risky, and should be avoided and discouraged. The potential for health problems can also develop from the use of nicotine or caffeine products.

Those who need assistance in dealing with alcohol and other drug problems are encouraged to seek the confidential services of the resources listed in the Campus and Community Resources section listed below.

**General Rules for Serving Alcoholic Beverages**

University regulations prohibit the possession or consumption of any alcoholic beverage on university grounds unless the university has sanctioned the location and conditions for possession or consumption, such as the Bistro. For more information, please review the comprehensive guidelines for alcohol service available in the Office of Substance Abuse Programs and Services.

**Campus and Community Resources**

- **Fairfax Campus—Health and Wellness Education Resource Room:** SUB I, Room 220, 703-993-3686, and SUB I, Room 219, 703-993-2830

- **State Employee Assistance Service:** 804-786-6741

- **Alcoholics Anonymous:** 703-993-3686 for campus meetings; for other locations, 703-876-6166

- **Narcotics Anonymous:** 703-532-1255

The drug and alcohol policy outlines university regulations on substance use and abuse. This policy is distributed annually to all employees and students to inform the campus community of alcohol and drug laws, health risks, and campus and community resources. University regulations regarding the drug and alcohol policy have been developed by a committee of faculty, staff, and students. This policy statement is available in the Office of Substance Abuse Programs and Services, Health and Wellness Center, SUB I, Room 219K. This policy is also distributed through the student and faculty and staff handbooks and the university newspaper, **Broadside**.

**Responsible Use of Computing Policy**

The Responsible Use of Computing (RUC) policy applies to all academic and operational departments and offices at all George Mason University (Mason) locations owned and leased. The policies and procedures provided herein apply to all Mason faculty, staff, students, visitors, and contractors.

The university provides and maintains general computing services including web and Internet resources, as well as telecommunication technology, to support the education, research, and work of its faculty, staff, and students. At the same time, Mason wishes to protect all users’ rights to an open exchange of ideas and information. This policy sets
forth the responsibilities of each member of the Mason community in preserving the security, confidentiality, availability, and integrity of Mason computing resources. To accomplish these ends, this policy supports investigations of complaints involving Mason computing abuse, including sexual harassment, honor code, federal, state, applicable industry, and local law violations.

University faculty and staff members, as state employees, are subject to the Freedom of Information Act, §2.2-3700, et seq., of the Code of Virginia, and all applicable state and federal rules and regulations. While this policy endeavors to maintain user confidentiality it cannot create, nor should faculty or staff members presume, any expectation of privacy.

Violations of this policy may result in revocation of access, suspension of accounts, disciplinary action, or prosecution. Evidence of illegal activity will be turned over to the appropriate authorities. It is the responsibility of all users of Mason computing resources to read and follow this policy and all applicable laws and procedures (user sign-on agreement).

To report violations of this policy, or any related university policy, e-mail the Security Review Panel (SRP) at StopIt@ gmu.edu or abuse@gmu.edu.

Definitions
Mason Computing Resources. All computers, systems, workstations, networks, networking equipment, peripheral devices, servers, and any other university property attached to Mason’s web site or Internet network. These resources include all software, files, documents, and databases stored in Mason computing systems. The Mason web site includes all web pages that reside on servers owned by Mason. The Mason web site does not include servers or other resources owned by Internet Service Providers or personal resources owned by members of the Mason community who may use the resources to access Mason computing resources.

System Administrator (SA). Anyone who has the responsibility to maintain, configure, operate, or repair Mason’s computing resources. System administrators have special privileges and special responsibilities under this policy.

Information Technology Unit (ITU). The organizational entity that is responsible for IT equipment and services within the Mason campus system. The ITU is headed by the vice president for Information Technology (VPIT), who is administratively responsible for this policy.

Technology Council. A group of Mason faculty and staff members that provide advice and recommendations to the VPIT regarding the selection and architecture of technologies used to provide IT services.

Responsibilities of the Various Groups
System Administrator. The SAs have extraordinary powers to override or alter access controls, configurations, and passwords. This power should be exercised with great care and integrity. SAs’ actions are constrained by this policy and by the policies of local administrative units.

Data stewards of Mason units who employ SAs are responsible for ensuring that the SAs comply with and enforce the requirements of this policy in the systems for which they are responsible. SAs who violate this policy or who misuse their powers are subject to disciplinary action.

If an SA observes someone engaging in activities that would seriously compromise the confidentiality, availability, or integrity of a Mason system, network, or electronic Mason data, the SA may take immediate action to stop the threat or minimize the damage or contact the ITU Support Center to activate the Computer Security Incident Response Team (CSIRT). SAs who observe suspected violations of law should immediately alert the Mason Police.

Security Review Panel (SRP). This policy establishes an SRP that is responsible for reviewing SAs’ decisions, responding to complaints, providing security advice, and periodically reviewing this policy. The SRP consists of the Director, IT Security, three faculty members, two members of Mason’s Technology Council, one representative from the Faculty Senate, one graduate student, one undergraduate student, one ITU staff member, and one non-ITU system administrator. The VPIT appoints the SRP members. The SRP chair will be one of the faculty members and will be appointed by the VPIT.

The SRP is responsible for periodically reviewing the RUC Policy and recommending improvements and clarifications as needed. All modifications to the policy will be made after full public disclosure and a reasonable period for public comment.

The SRP will establish a dispatching procedure for routing StopIt complaints to the appropriate official or staff member for action.

Rules of Use
Access to Mason’s computing resources is a privilege granted on a presumption that every member of the Mason community will exercise that privilege responsibly. Because it is impossible to anticipate all the ways in which individuals can damage, interrupt, or misuse Mason’s computing resources, this policy focuses on a few simple rules. These rules describe actions that users should avoid and the principles behind them. Each rule is followed by a non-exhaustive list of examples of actions that would violate the rule.

Rule 1: Use Mason computing resources consistently with the following intended purposes:
- Educational, research, and administrative purposes of Mason
- Uses indirectly related to Mason purposes that have an educational or research benefit, such as news reading, web browsing, chat sessions, and personal communications
- Employees and contractors of the Commonwealth of Virginia may not use Mason’s computing resources for recreation or entertainment.

Rule 2: Do not use computer accounts for illegitimate purposes.
Account usernames identify individuals to the entire international Internet user community. Users may be held responsible for actions in the account. If that person violates any policies, his or her actions will be traced back to the username and the account holder may be held responsible.

Forbidden:
- Selling access to Mason’s computing resources
- Engaging in commercial activity not sanctioned by Mason
- Intentionally denying or interfering with any network resources
• Using or accessing any Mason computing resource, or reading or modifying files without proper authorization
• Using the technology to in any way misrepresent or impersonate someone else
• Sending chain letters
• Violating copyright laws and licenses
• Violating federal or state law, or university policy

Rule 3: Honor the privacy of other users.

Mason respects the desire for privacy and voluntarily chooses to refrain from inspecting users’ files, except as described below in Section V. System administrators who carry out standard administrative practices, such as backing up files, cleaning up trash or temporary files, or searching for rogue programs, do not violate privacy. Some examples of privacy violations are:
• Accessing the contents of files of another user without explicit authorization from that user.
• Intercepting or monitoring any network communications meant for another person.
• Transmitting or distributing personal or private information about individuals without explicit authorization from the individuals affected.
• Creating or using programs (e.g., keyloggers) that secretly collect information about users. Note that most systems keep audit trails and usage logs; these are not secret and are considered normal parts of system administration.

Rule 4: Do not use any account except the one you have been authorized to use.

If a user has a legitimate reason to give someone else access, it should be strictly temporary. The account holder should change the password after another user finishes using the account.

Rule 5: Do not use Mason’s computing resources to violate other policies or laws.

The list below is not comprehensive. In case of doubt, ask the Security Review Panel (SRP), or e-mail stopit@gmu.edu.
• Using Mason’s computing resources to violate harassment laws or policies. Various types of harassment, including sexual or racial, are proscribed by Mason policies.
• Using Mason’s computing resources to violate the Honor Code
• Extending the Mason network without explicit permission from ITU Network Engineering. The unauthorized use of routers, switches, modems, and other devices can impact the security and stability of the network.
• Running vulnerability scans on systems are considered hostile. If required for academic reasons, written permission from the system owner is required.
• Using Mason’s computing resources to transmit, store, display, download, print or intentionally receive obscene material, or to distribute pornographic material. All users of Mason computing resources are subject to all federal and state obscenity laws. State employees should also be aware of state laws prohibiting the use of state equipment to access, store, print, or download sexually explicit material.

Electronic Information Environment

Personal e-mail, electronic files maintained on Mason equipment, and personal web sites are part of a unique electronic information environment. This environment creates unique privacy issues that involve federal and state laws as well as Mason policies.

Mason reserves the right to inspect user files and communications for all lawful purposes, to include investigating allegations of illegal activity, violations of Mason policies, or to protect the integrity and security of network systems.

Web pages. Mason will investigate all complaints involving personal web sites and will remove or block material or links to material that violate federal or state law or university policy.

Compliance

The StopIt Process. The process described here, called “StopIt,” uses a graduated approach to handle violations of this policy. This policy distinguishes between incidents that pose no immediate dangers to persons or to system integrity, and incidents that do. The three-step StopIt process described below is for cases in which there are no immediate dangers.

Incidents posing immediate dangers to persons or systems require immediate action. These include active system break-ins or intrusions, denials of service, and incidents or criminal activity conducted using Mason computing resources. In these cases, the responsible SA may take reasonable actions to deal with the threat, such as temporarily disconnecting the system from the network, temporarily suspending accounts, and calling law enforcement officers. The SA taking such actions will notify his or her supervisor and the ITU Support Center as soon as practicable.

The StopIt process rests on two foundations:

Wide distribution of policy information: Notices describing the essence of the RUC policy will be displayed in academic computing labs on Mason premises; the same information will be provided to the community at least annually. By logging on to the Mason network, users are agreeing to the conditions of the RUC policy (user sign-on agreement).

Standard reporting mechanism: The StopIt e-mail address is monitored regularly by individual(s) appointed by the SRP. Harmful or disruptive behavior should be reported to the StopIt e-mail or to the Mason Police. The individual who responds to a complaint will normally forward it to the SA of the system on which the infraction apparently occurred. That SA will investigate the complaint, determine its validity, and take appropriate actions (see below).

The steps of the process are:

StopIt 1: First Warning

The SRP member handling a case (or SA, if the case is delegated) will send a warning letter or email to the alleged perpetrators of improper use of Mason computing resources, harassment, or other uncivil behavior. The letter will have this form:

“Someone using your account did [description of offense].” This is followed by an explanation of why this behavior violates which policy. “Account holders are responsible for the use of their accounts. If you were unaware that your account was being used in this way, it may have been compromised.”
Your system administrator can help you change your password and secure your account. If you are aware, then please make sure that this does not happen again.”

This warning ensures that the alleged perpetrators are aware that a policy violation may have occurred and that there was a complaint. It offers them an opportunity to desist without having to admit guilt and secure their account against unauthorized use.

StopIt 2: Second Warning
If there is a second offense from an account that received a first-warning letter, the SRP member will issue a second warning and may require that the account holder come to a mandatory interview. The SRP chair can authorize the temporary suspension of access to the user’s account if the individual fails to arrange for a mandatory interview. The user can request a hearing before the full SRP.

StopIt 3: Disciplinary Procedures
If the previous StopIt stages do not convince the perpetrators to desist, the matter will be turned over to the appropriate Mason authority designated for that type of offense. The SRP will make available all information and evidence it has on the case to that authority.

If it appears from the evidence that any federal or state laws may have been violated, the SRP may recommend suspension of the account pending the outcome of the Mason or law enforcement authorities’ investigation.

Amendments
All amendments to the Responsible Use of Computing Policy Number 1301 are to be reviewed and approved by the Office of the Provost and the Office of the Senior Vice President.

Effective Date
The policies herein are effective October 20, 1997 and were revised December 17, 2007. This policy shall be reviewed and revised, if necessary, annually to become effective at the beginning of Mason’s fiscal year, unless otherwise noted.

Parking Policy
Sandy Creek Parking Office
Phone: 703-993-2710
Web: parking.gmu.edu

All faculty, staff, and students who park on property owned or operated by the university must display a valid permit or park in a parking deck and pay an hourly or daily rate. On the Fairfax Campus, the decks are located on Mason Pond Drive and Sandy Creek Way off Patriot Circle. Visitors and guests must park in the deck or at a meter unless special arrangements have been made through Parking Services. Permit enforcement runs 24 hours a day, seven days a week. Metered parking is designated for short-term use and is monitored from 7 a.m. to 10 p.m. Monday through Friday, and 8 a.m. to 8 p.m. Saturday and Sunday. Broken meters are considered closed parking spaces; any vehicles parked in such spaces, and fire and emergency lanes are monitored 24 hours a day, seven days a week.

To avoid receiving a substantial fine, students, faculty, and staff should purchase a permit as soon as they arrive on campus. Parking permits are available on an annual or semester basis. Permits may be purchased online at parking.gmu.edu or at the Parking Services sales office, located in the Sandy Creek Parking Office. Hours are 8:30 a.m. to 5 p.m. Monday, Wednesday, Thursday, and Friday, and 8:30 a.m. to 7 p.m. on Tuesday. Current parking fee amounts and citation fine amounts, as well as information pertaining to the Arlington and Prince William Campuses, are listed on the Parking Services web site.

Disabled parking is available at a number of convenient locations at Mason facilities. A Department of Motor Vehicles (DMV) disabled placard or license plate must be displayed along with a university permit; a DMV placard or license plate alone is not sufficient for parking in disabled spaces in university lots. A visitor with a DMV placard or license plate may park in a parking deck at prevailing rates. Parking in or blocking access to a disabled space carries a fine at the prevailing rate.

Some parking lots have designated spaces reserved for faculty and staff, resident students, special permit holders, or service and repair vehicles. Please read all signs posted at entrances to the parking lots. All vehicles must be parked in a marked space. Complete parking regulations can be found at the Parking Services web site. For more information, call the Parking Services Office at 703-993-2710 or e-mail parking@gmu.edu. Please check the Parking Services web site for special announcements and changes to the policy.

Motorist Assistance Program
Phone: 703-993-2715

The Motorist Assistance Program (MAP) is designed to assist drivers who have minor car problems. Trained MAP personnel are available to help with dead batteries, and can contact lockout or towing services at the driver’s request and expense. MAP is available at the Fairfax Campus from 8 a.m. to 11 p.m. Monday through Sunday. To access this service, call 703-993-2715.

Mason Shuttles/CUE Bus/Transportation
Mason Shuttles: 703-993-2828
Transportation: 703-993-4156
Web: shuttle.gmu.edu
transportation.gmu.edu

The following shuttles are operated by the Mason Shuttle program free of charge to the user:

• Prince-William Fairfax shuttle providing service between the Prince William and Fairfax Campuses, Monday through Friday
• Mason to Metro shuttle providing service Monday through Friday and Saturday evenings between the Fairfax Campus and the Vienna Metro Station
• West Campus Shuttle providing service between Presidents Park and the West Campus Parking Lot on the Fairfax Campus

For more information and current shuttle schedules, go to shuttle.gmu.edu, call 703-993-2828, or e-mail shuttle@gmu.edu.

Mason faculty, staff, and students may also ride the City of Fairfax CUE bus for free by showing their
Mason ID card. For schedule information, go to www.fairfaxva.gov/CUEBus/CUEBus.asp. For other transportation information, go to transportation.gmu.edu or e-mail transportation@gmu.edu.

Other Policies

Sexual Assault Policy
The following policy applies equally to all members of the Mason community: students, faculty, administrators, staff, contract employees, and visitors.

The university is committed to providing an institutional environment where all people may pursue their studies, careers, duties, and activities in an atmosphere free of threat of unwelcome and unwanted sexual actions. It strongly condemns sexual offenses, will not tolerate sexual offenders, and supports those who have been victimized.

Sexual assault includes the attempt or act of rape (sexual intercourse without consent or with a child under the age of 13, by a stranger, an acquaintance, or an intimate), forced sodomy (forced oral or anal sex), or the forced penetration by a foreign object either animate, such as a finger, or inanimate. Nonpenetration sexual assault includes the act of touching an unwilling person’s intimate parts such as genitalia, anus, groin, breast, or buttocks, or the clothing covering these parts, or forcing an unwilling person to touch another’s intimate parts.

The above acts constitute sexual assault when they are committed against a person’s will as evidenced by refusal of consent; through the use of force, threat, manipulation, or intimidation; or against a person who, by virtue of mental incapacity or physical helplessness, is unable to give or withhold consent. This includes, but is not limited to, incapacity or helplessness caused by alcohol or other drugs. Intoxication of the assailant shall not diminish the assailant’s responsibility for the sexual assault.

The university will respond promptly, fairly, and decisively to all reports of sexual assault. Members of the university community accused of sexual assault will be subject to university disciplinary procedures when the alleged incident has occurred on campus or the incident has occurred off campus and materially affects the learning environment or operations of the university.

Sexual assaults are serious violations of the university’s student judicial code, faculty standards, and university employee policies. They are crimes under state law and punishable by fines or imprisonment. In addition, these actions are subject to civil suit for damages.

Mason is compliant with the Jeanne Clery Disclosure of Campus Security Policy and Campus Crime Statistics Act (the Clery Act) as amended in 1998, which requires all postsecondary institutions to publish and distribute certain information regarding campus crimes, including reports of campus sexual assault, sexual assault policies, and security programming to all current students, employees, and any applicant who so requests.

Through the Office of Sexual Assault Services, 24-hour assistance is available to those who have been affected by sexual assault.

For more information, contact Sexual Assault Services at 703-993-4364.

Stalking Policy
Stalking is a crime under Virginia state law (18.2-60.3). Incidents of stalking outside the Commonwealth of Virginia may be admissible in court if they are relevant to the case and may be punishable as a misdemeanor or a felony. Stalking behavior is prohibited and will not be tolerated by Mason.

The university defines stalking as a series of behaviors that in context intend to place or have knowledge that the behaviors might place another person in reasonable fear of his or her safety or mental or physical well-being. Such behaviors include nonconsensual (unwanted) communication or contact, including face-to-face, telephone calls, voice messages, electronic mail, instant messaging, written letters, and unwanted gifts; harassment, either by the individual or through a third party; use of threatening gestures; pursuing or following; surveillance or other types of observation; use of electronic devices or software to track or obtain private information; trespassing; vandalization; and nonconsensual (unwanted) touching.

Some behaviors may result in separate criminal charges. While certain acts can be classified as crimes, others that do not rise to criminal behavior may still be subject to the campus judicial process. The university can take action and has the right to impose sanctions on an offender. Incidents occurring on or off campus are subject to university discipline when such actions materially affect the learning environment or operations of the university.

Legal options available to victims of stalking include reporting to the campus or local police, seeking a remedy through civil proceedings, and using the campus judicial process. Additional support is available from Sexual Assault Services.

This policy applies equally to all members of the Mason community: students, faculty, administrators, staff, contract employees, and visitors.

The university is committed to protecting the right of all individuals to pursue their intellectual, vocational, and personal interests without harassment or interference. The university is also committed to providing an environment in which visitors to and members of the campus community are treated with dignity, respect, and regard for their welfare and learning needs.

For more information on stalking issues or this policy, call Sexual Assault Services at 703-993-4364.

Other Regulations

Annual Security Report
Mason’s 2007 Annual Security Report is available on the University Police Department web page. This report contains the previous three years of crime statistics and includes policies concerning campus security such as sexual assault, stalking, and other matters that pertain to safety on campus. To view a copy of the report, go to www.gmu.edu/police/annualsecurity.htm. Paper copies of this report are available at any police facility.

Weapons
The unauthorized possession, storage, display, or use of any kind of ammunition, firearm, firework, explosive, air rifle, air pistol, or other lethal instrument is prohibited on university property. For more information, call University Police at 703-993-3840.
**Smoking**
Smoking is not permitted in any building on campus.

**Bicycles and Skateboards**
Bike racks are provided at various on-campus locations for the convenience of students who bike to and from campus. For resident students, bike racks are located in the residential complexes. Bikes and skateboards are not permitted on sidewalks, stairs, ramps, footpaths, or grassy areas of the campus. They also are not allowed inside university buildings.

**Pets**
No pets, except those assisting people with disabilities, are permitted in university buildings at any time. Pets on campus grounds must be on a leash and under supervision at all times.

**Solicitors and Salespeople**
Except on official business with the university, solicitors and salespeople are not permitted on the campus without prior approval of the University Services Office.
University Academic Programs and Resources

University Libraries
Phone: 703-993-2250

Administration
John G. Zenelis, University Librarian and Associate Vice President, Information Technology Fenwick Library, Room A227
Craig Gibson, Associate University Librarian for Research, Instructional, and Outreach Services
Clyde W. Grotophorst, Associate University Librarian for Digital Programs and Systems
John C. Walsh, Associate University Librarian for Resources and Collection Management Services

Professional Faculty

Administrative Faculty
Fletcher, Matthews, Perry, Stockwell, Vay

Resources and Services
Resources and services of the George Mason University Libraries are housed on the Fairfax Campus at the Charles Rogers Fenwick Library and the George W. Johnson Center Library; on the Arlington Campus at the Arlington Campus Library; and on the Prince William Campus at the Mercer Library. The School of Law Library, on the Arlington Campus, is administered separately. Combined holdings, including the law library, total more than 1.2 million books and bound journal volumes; 11,000 current print serial subscriptions; 3.0 million microform units; 341,000 print government documents; 214,000 maps; 36,000 multimedia materials; 550 electronic databases; 31,000 electronic journals and proceedings; 100,000 electronic books; and significant holdings of manuscripts, special collections, and archives.

Mason’s integrated library information system provides an online, public-access catalog; circulation; electronic reserves; and library-processing services. The information system can be used in any of the libraries from campus locations on the network or via the web. The web site library.gmu.edu offers access to a variety of networked digital resources and electronically mediated services, including a virtual reference service.

The library liaison program supports a variety of cooperative and collaborative activities. Liaison librarians work with academic departments and programs to develop print collections and electronic resources. They also offer introductory and advanced information literacy instruction sessions, as well as advanced reference and research consultation services to students and faculty. Each of the four libraries has its own dedicated instruction room for information literacy classes.

Through membership and active participation in local, regional, and national library consortia, the University Libraries are able to better respond and meet the needs of the university’s growing and diverse academic and research programs. Current affiliations include the following:

• The Virtual Library of Virginia (VIVA) Program, a Virginia-funded electronic and resource-sharing program for public higher-education institutions
• Washington Research Library Consortium (WRLC), whose membership also includes American, Catholic, Georgetown, and George Washington universities
• Association of Southeastern Research Libraries, which includes the 36 largest university libraries in a 10-state region
• Center for Research Libraries, a Chicago-based research library for research libraries whose multimillion volume holdings comprise specialized and uniquely held materials in North America
• The international Online Computer Library Center, whose extensive computerized system and network facilitate national and international library resource-sharing activities

An intercampus delivery service is available for students and faculty requesting materials held at any Mason campus library. Materials not held by Mason can be obtained by direct borrowing from WRLC institution libraries via the Consortium Loan Service, interlibrary loan, or commercial delivery services when required.

Expanded academic support services also include the following:

Educational Services Unit
The Educational Services Unit leads planning and program development for information literacy initiatives throughout all
the libraries and, through collaboration with other university units, creates institution-wide projects and initiatives focused on students’ research abilities. The Educational Services Unit staff designs classes, tutorials, instructional materials, and program-level plans to teach students how to identify, assess, and manage information for their academic courses and other endeavors, and conduct research in an ethical way. This unit is also responsible for leading assessments related to information literacy and fluency projects.

**iMasonLibraries Service**  
Web: library.gmu.edu/research  
This service enables users to ask reference questions via an instant messenger.

**Mason Archival Repository Service**  
Phone: 703-993-3742  
Web: mars.gmu.edu  
The Mason Archival Repository Service (MARS) provides a stable digital archive for scholarly and research materials of lasting value held notably by Special Collections and Archives or produced by Mason faculty, students, and staff. MARS is managed by Digital Programs and Systems. The MARS librarian offers expert advice on archiving these materials, file formats, copyright issues, long-term management of archived materials, and issues pertaining to scholarly communication.

**University Copyright Assistance Office**  
Johnson Center, Rooms 227 EB  
Phone: 703-993-2544 or 2427  
Fax: 703-993-4116  
Web: library.gmu.edu/copyright  
This office provides guidance and assistance on copyright and fair use issues, including copyright use in classroom teaching and technology, online courses, distance education, university publications, university web sites, networked library collections and related services, electronic course reserves, and course readers. Workshops are offered on a regular basis.

**University Dissertation and Thesis Services**  
Phone: 703-993-2222  
Web: thesis.gmu.edu  
The University Dissertation and Thesis Service (UDTS) assists students and academic units in the dissertation, thesis, and graduate-level project process by helping students meet all university requirements and deadlines for submission of work. The UDTS web site provides useful tools such as the university’s Thesis, Dissertation, or Project Guide, which contains downloadable templates of necessary elements, forms required for the submission process, and links to related web sites. UDTS also assists graduate students through individual consultation and informational workshops.

**Records Management**  
Phone: 703-993-2220  
Web: specialcollections.gmu.edu/rm_net.html  
A part of the Special Collections and Archives, this service assists university academic and administrative departments with the retention and disposition of temporary records by providing a number of online resources to members of those departments. The records manager works with members of university departments to ensure that records are retained, retrieved, managed, and disposed of appropriately, in accordance with Virginia state laws, policies, and guidelines.

**Statistical Research Services**  
Phone: 703-993-3417  
Web: library.gmu.edu/srs  
This office provides expert consultation services for students and faculty who need assistance with statistics-based research projects, including quantitative and qualitative research design analysis, and help with the myriad statistical-analysis software.

**Fenwick Library**  
Phone: 703-993-2240  
Fenwick is the main library in the university’s library system. It holds most of the book collections across disciplines, as well as current and bound journals, microforms, special collections and archives materials, federal and Virginia government documents, and maps. Instruction and reference classes are available in search strategies, information sources, and information technology. In addition, publicly accessible computer workstations and data ports for laptop use enable access to the entire system’s electronic resources and associated services.

**Johnson Center Library**  
Phone: 703-993-9060  
This library is part of the George W. Johnson Center integrated learning environment. Electronic access to scholarly information is complemented by a print-reference collection, multimedia collections, and a growing circulating book collection comprising core texts and readings supporting the university’s undergraduate curriculum. This library, in particular, supports interdisciplinary programs such as the Honors Program and New Century College through its collections and outreach services. The library also holds designated discipline-based circulating book collections. It is the center for multimedia collections and services for the university library system. This library also provides course support through reserve materials (electronic, print, and media) for students and faculty on the Fairfax Campus and manages the entire electronic reserves service. A collection of international newspapers rounds out the collections and services. The Johnson Center has a wireless network that students may use anywhere in the building. Assistive technologies include screen-reading software, text-enlargement software, and special hardware for individuals with disabilities.

**Arlington Campus Library**  
Phone: 703-993-8818  
This library is a full-service research facility supporting the teaching and research needs of Mason faculty, students, and staff on the Arlington Campus. Consistent with this campus’ distinct areas of academic specialization at the graduate level, the library’s collection emphasizes public policy, international commerce, economics, education, management of nonprofit organizations, and conflict resolution. The library holds a core of reference materials and is a depository of European Union documents. Interlibrary delivery of circulating materials from other library sites is also available. Library
staff can provide reference assistance and instruction for students, faculty, and staff in identifying and using resources. Physical library holdings continue to grow, and a critical component of the library emphasizes providing many of its resources and services online. This library supports a wireless network, and assistive technologies are available for people with disabilities.

**Mercer Library (Prince William Campus)**

Phone: 703-993-8340

This library supports faculty and students in the programs and courses offered at the Prince William Campus, including education; biotechnology, bioinformatics, and biodefense; computer science; health, fitness, and recreation resources; and administration of justice. The library provides access to university-wide electronic resources, with an emphasis on instruction and assistance with information resources and research. Notable holdings include scientific journals in bioscience and biomedicine. The library is fostering partnerships to provide information services to the rapidly expanding corporate and technology presence in Prince William County. This library has a wireless network, as well as assistive technologies for people with disabilities.

**School of Law Library (Arlington Campus)**

Phone: 703-993-8106

**Administration**
Dolores Gomez-Moran, Associate Dean, Library and Technology

This library supports the School of Law and has holdings in law and economics, including specialized academic tracks in intellectual property, litigation, corporate and securities law, international business, regulatory law, and technology and law. The library also provides access to electronic law resources including Lexis, Westlaw, and LegalTrac. This library is open to all members of the university community, and its collections are available for checkout by all faculty, students, and staff.

**University Ombudsman**

Johnson Center, Room 245
Phone: 703-993-3006
Web: www.gmu.edu/departments/ombudsman

**Administration**
Erek Perry, MEd

The ombudsman serves all undergraduate and graduate students at the university.

**University Scholars Community**

Student Academic Affairs
Johnson Center, Room 245
Phone: 703-993-9082

**Administration**

Erica Hernandez

The university awards four-year scholarships annually to top high school graduates who have demonstrated superior academic achievement, outstanding leadership, and exemplary school and community service. Applications must be submitted by December 1 to receive priority consideration for the scholarship.

The University Scholars reside in a common residence hall their first year and share the Dr. Noreen McGuire Prettyman University Scholars Lounge. Students enrolled in the University Scholars Program participate in a dynamic learning community that provides opportunities for intellectual, cultural, and social engagements.

The program draws to Mason a special caliber of student, one who is actively involved in all facets of academic and student life. In addition to excelling in their respective academic areas, the scholars have historically emerged in a variety of student leadership positions and service-related activities.

Intellectual dialogue is fostered among scholars, professors, and administrators through stimulating seminars, discussion groups, cultural activities, service projects, internships, campus events, and participation in organizations that complement the scholars’ academic experiences. The peer interaction, faculty guidance, and academic focus of the University Scholars community reflect the university’s commitment to providing a stimulating and supportive environment that encourages academic excellence and personal growth.

**University Courses**

University (UNIV) courses are special undergraduate academic seminars that appeal to a wide range of majors. They are designated as transitional, interdisciplinary honors, and special topics courses. Enrollment in these courses is limited in size to encourage interaction between students and faculty. Because of their interdisciplinary nature, the courses sometimes can satisfy general education requirements.

**University Transitions Courses**

This series of courses focuses on transition through the various stages of college. UNIV 100 helps freshmen adjust academically, develop decision-making skills, and learn about the services and opportunities for involvement on campus. UNIV 200 topics focus on choosing a major or career. UNIV 300 has three tracks: the first is for new transfer students making the transition to a new university, the second focuses on career readiness for internships and research as-
sistantships, and the third is designed for specific groups of student leaders. UNIV 400 emphasizes preparation for the workplace, graduate school, and life responsibilities.

**University Interdisciplinary Honors Seminars**
These seminars are offered exclusively to students who have demonstrated strong academic performance. They are developed to give high-ability freshmen and advanced-standing students the opportunity to study with a senior professor in a small classroom setting. The Freshman Seminars (UNIV 190) are open to eligible first-year students and are taught exclusively by the Robinson professors. Qualified students with 30 or more credits are invited to participate in the UNIV 390 seminars, which are taught by Robinson professors and other distinguished faculty scholars.

**University Special Topics Courses**
Upper-level university courses are open to all students unless specific prerequisites are indicated. They are usually repeated offerings. Two regularly offered university courses, each worth 3 credits, are UNIV 301 Great Ideas in Science and UNIV 441 AIDS: Its Impact in Our Society.

**UNIV 101: Freshman Academic Transition (1:2:0)**
This seminar focuses on academic transition and development issues for second semester freshmen. A special emphasis is placed on resources and techniques to assist students with assessing and improving their academic performance. Students will work closely with their instructor to track their academic progress over the course of the semester.

**International Programs and Resources**

Global Connections (International Degrees)
Web: www.gmu.edu/global

Academic programs focused specifically on international and global issues include the following:

- BA and MA in anthropology (Department of Sociology and Anthropology)
- BA in communication, with a concentration in international and intercultural communication (Department of Communication)
- BA, BS, MA, PhD in conflict analysis and resolution (Institute for Conflict Analysis and Resolution)
- BA, BS in geography (Department of Geography)
- BA in global affairs
- BA in government and international politics, with a concentration in international and comparative politics (Department of Public and International Affairs)
- BA in Latin American studies (Department of History and Art History)
- BA in Russian studies (Modern and Classical Languages)
- BA in foreign languages, with concentrations in French and Spanish (Department of Modern and Classical Languages)
- MEd in curriculum and instruction, with concentrations in multilingual and multicultural education, foreign language education, and teaching of English as a second language
- MA in foreign languages, with concentrations in French or Spanish, or in Spanish and bilingual-multicultural education (Department of Modern and Classical Languages)
- MS in global health (College of Health and Human Services)
- MS in health science, concentration in international health (College of Health and Human Services)
- MA in history, with concentrations in comparative world history and modern European history (Department of History and Art History)
- MA in international commerce and policy (School of Public Policy)
- MA in political science, with specialization in international politics and comparative government
- MS in professional studies: peace operations
- MPA with a concentration in international management
- MA in telecommunications with a concentration in international telecommunications
- Interdisciplinary minors in ancient Mediterranean art and archaeology, Asia-Pacific studies, global systems, Islamic studies, Judaic studies, Latin American studies, linguistics, the New Europe
- Minors in Chinese, conflict analysis and resolution, French, German, global affairs, international and comparative studies, Latin, Russian, and Spanish
- Undergraduate certificate in Islamic studies and teaching of English as a second language
- Graduate certificates in global trade management; international business planning; international e-commerce and telecommunications policy; international governance and institutions; international health; international health care; international market analysis; managing international commerce; science, technology, and the global economy; teaching of English as a second language; world religions, diplomacy, and conflict resolution

For new developments, go to the Global Connections web site: www.gmu.edu/global.

**Center for Global Education: Study-Abroad Office**
Johnson Center, Room 235
Phone: 703-993-2154
Fax: 703-993-2153
Web: globaled.gmu.edu
E-mail: cge@gmu.edu

**Administration**
Dr. Yehuda Lukacs, Director

The Center for Global Education (CGE) offers students the opportunity to challenge their assumptions about themselves and other cultures in an educational environment by offering study-abroad programs of varying lengths, academic emphasis, and locations. Students can discover new cultures, sharpen language skills, and travel while earning credit. Study options include faculty-led, short-term study tours and intensive language programs; semester and year-long Mason-sponsored...
programs; direct exchange programs and international internship programs. Most programs are open to Mason undergraduate and graduate students and short-term programs are also open to faculty, staff, and the general public.

CGE offers a wealth of resources to help create a personalized international experience, including information sessions about study-abroad and internship options; one-on-one student advising; transfer of approved international program credits; a resource library of travel books; international and diplomatic community programming; advising to international students from partner schools; and International Student Identity Cards.

**English Language Institute**

Krug Hall, Room 202  
Phone: 703-993-3660  
Fax: 703-993-3664  
E-mail: ELI@gmu.edu  
Web: eli.gmu.edu

**Administration**  
John Pope, MA, Director  
Baotran Nguyen, MA, Assistant Director

The English Language Institute (ELI) provides quality instruction in English as a second language to develop students’ language and academic skills, as well as cultural awareness necessary for academic, personal, and professional success. ELI offers two programs: the Intensive English Program, which serves international students who have come to the United States to study English in preparation for academic study at an American college or university, and the Support Services Program, which provides programs for nonnative English-speaking students newly admitted to Mason and other international members of the campus community. ELI also provides contract services to private corporations, embassies, and government agencies.

**Office of International Programs and Services**

Phone: 703-993-2970  
Web: oips.gmu.edu

The Office of International Programs and Services (OIPS) advises and consults on matters affecting non-immigrant students, scholars, faculty, staff, and families at Mason. Staff members provide regulatory information related to non-immigrant status and have been designated by the university to issue and sign immigration documents and paperwork on behalf of the institution. OIPS advisors are available by appointment to discuss any concern and to provide practical assistance to students and scholars as they adjust to U.S. culture. OIPS conducts a comprehensive orientation program for new international students and offers social and cultural programming throughout the fall and spring semesters. Most notably, the staff works with student groups and the Student Activities Office to coordinate Mason’s International Week held annually in April.

**International Student Umbrella**

Phone: 703-993-2898  
E-mail: isu@gmu.edu

The International Student Umbrella consists of a variety of international student organizations that coordinate educational and social activities to promote cross-cultural understanding and international awareness.

**International Student Association**

Phone: 703-993-2970  
E-mail: oips@gmu.edu

The International Student Association is a group of students from around the world who work together to assist newly arriving students and meet for fellowship and fun. Their goal is to make all students feel welcome and comfortable at George Mason University and to participate in activities with classmates of various cultures and backgrounds.

**Office of Continuing Professional Education**

**Administration**  
Janet Niblock, Executive Director

The Office of Continuing Professional Education (OCPE) serves as Mason’s initial point of contact and referral for the business and professional community, and responds to all professional development and continuing education inquiries, requests, and needs. Supported program activities include contracted academic credit programs, noncredit public programs and seminars, online courses, professional certificate programs, continuing education units (CEUs), onsite contract training programs, special professional development events and programs, special workforce development programs, and training center facilities.

The OCPE is strategically located at the Fairfax Campus in Krug Hall, the Prince William Campus, and the Center for Innovative Technology (CIT) in Herndon. Current continuing education program information, offerings, and capabilities can be reviewed at ocpe.gmu.edu.

The Krug Hall office serves as the primary point of inquiry and referral. It facilitates, promotes, and administers the delivery of contract credit courses, online courses, and other specialized professional programs. This office also administers the award of CEUs, which are nationally recognized standard units of measurement earned for satisfactory completion of qualified programs of continuing education. OCPE provides this service to all Mason academic groups that deliver noncredit professional development programs.

The Prince William Campus office facilitates a variety of open enrollment and contract programs (both noncredit and credit) that support the strengths of the programs on that campus. Programs are targeted to meet the professional de-
development needs of the business community of the Prince William area, as well as Northern Virginia local and state government communities.

The CIT in Northern Virginia’s high-technology corridor facilitates a variety of professional development programs targeted to the area’s business and federal government organizations. This office reaches out to the business community by designing, marketing, and delivering noncredit training courses and in-depth certificate programs. Public seminars and customized, contract training programs are targeted to respond to the needs and interests of managerial, technical, and professional employees in private, nonprofit, and public organizations located in Northern Virginia and Washington, D.C.

New Professional Studies, MA/MS

The Master of New Professional Studies Program was established in 1996 to provide graduate education for working professionals. The highlights of this innovative, interdisciplinary degree are as follows:

- Course activities are designed to adapt to the demands of working professionals with a variety of obligations. Through innovative use of information technologies and flexible course scheduling, participants are able to balance the demands of work with an intensive learning experience.
- The degree incorporates action-oriented group learning as a way to integrate theory and practice. Grouped into teams, candidates are immersed in the practical problems of organizations and, at the same time, engage each other through collaborative technologies. By dealing with practical organizational issues, participants gain deeper insight into how complex organizations work.
- The program produces a tightly integrated learning experience and focuses on building a learning community. Participants work on projects as teams and gain an understanding of how to develop team-based organizations.
- Collaborative technology skills developed early on are used throughout the degree program. They enable a high degree of collaboration and interaction between students.

New Professional Studies is an umbrella degree program with four tracks: knowledge management, organization development and knowledge management, peace operations, and teaching. Four core courses (12 credits) are common to all tracks: MNPS 700 The New Professionalism: Theory and Practice; MNPS 702 The New Professional as Reflective Practitioner; MNPS 703 Technology and Learning in the New Professions; and MNPS 704 Research Methodologies in the New Professions. The remaining elective courses (21 credits) are selected from participating disciplines. For information about the tracks on knowledge management, organization development and knowledge management, and peace operations, see the School of Public Policy chapter of this catalog. For information about the teaching track, see the Graduate School of Education section in the College of Education and Human Development chapter.

Reserve Officer Training Corps

Phone: 703-993-2706
Fax: 703-993-2708

Administration

James S. Overbye
Director, Military Science Department
Northeast II Module, Room 104

The U.S. Army Reserve Officers’ Training Corps (ROTC) is an elective program that offers qualified students the opportunity to earn a commission as an officer in the active U.S. Army, Army National Guard, or U.S. Army Reserve while pursuing a baccalaureate or graduate degree as a full-time student. The program emphasizes student learning and participation in applied leadership, leadership theory and assessment, decision making, management skills, time management, ethics and military law, logistics, military roles and national objectives, strategic and tactical planning and principles, and basic military knowledge and skills.

Enrollment

Enrollment in military science (MLSC) courses is open to all students. Freshmen (MLSC 100 and 101), sophomore (MLSC 200 and 201), and junior (MLSC 300 and 301) classes are awarded 1 credit each. Senior classes (MLSC 400 and 401) are 3 credits each. Credit earned in military science courses may count toward degree completion as elective credit. No service obligation is incurred by enrolling in Army ROTC. Courses can be dropped or added, just as with any elective course at Mason.

The four-year program is organized into two successive phases: the basic course and the advanced course. For students seeking the opportunity to earn a commission as an officer, several entry methods and participation strategies can be used. A minimum of four semesters must remain in the student’s academic curriculum to complete commissioning requirements; these semesters may be part of either an undergraduate or graduate degree. Course descriptions appear under Military Science (MLSC) in the Course Descriptions chapter of this catalog.

Basic Course Curriculum

The basic course curriculum is a four-course series (MLSC 100, 101, 200, 201), usually taken in the freshman and sophomore years. Each class awards 1 academic credit. The basic course trains students in the topics listed above, as well as in applied topics, including map reading, land navigation, first aid, physical fitness, leadership, ethics and communication skills. Each lecture class meets once a week for 75 minutes. Textbooks are provided free of charge to all enrolled students. Uniforms and equipment are also issued to students at no cost, but students must return them at the end of each semester. While only one section is listed for most MLSC classes, small sections or individual tutorials are offered when scheduling conflicts exist.

Mason’s Army ROTC program has numerous experiential aspects. MLSC LAB 201 Leadership Laboratory encompasses several different activities. Students enrolling in any
ROTC lecture class must enroll in the required, nongraded lab section. Only the ROTC director can dismiss LAB 201 enrollment in certain circumstances, such as scheduling conflicts.

All LAB 201 sections meet as a combined unit on Thursdays from 1:30 to 4 p.m. During this time, the unit trains in a variety of hands-on, practical leadership skills and military tasks, ranging from drills and ceremonies to squad and platoon tactics. Other experiential aspects of LAB 201 include field training exercises and physical training (PT). PT classes are conducted every Monday, Wednesday, and Friday from 7 to 8 a.m. at the Field House, but they are voluntary for noncontracted students. During the four-year program, there are progressive requirements for meeting physical fitness standards, weight limits, and leadership positions. Much emphasis is placed on cadets to meet established academic standards. A student must maintain an overall GPA of at least 2.00 to earn commissioning credit for ROTC.

Army ROTC also organizes numerous optional events, including rappelling, orienteering, and helicopter orientations. A battlefield visit is offered every year, and a formal military ball is held during the spring semester. The unit has an organized color guard and a Ranger Challenge Club. Airborne and air assault training, among other Army formal schools, is available to enrolled cadets. Enrolled students typically become progressively more involved to enhance their training, develop esprit de corps, and take part in social aspects of the program.

Advanced Course Curriculum
The advanced course consists of a four-course series (MLSC 300, 301, 400, 401) taken during the junior and senior years. MLSC 300 and 301 are each 1 credit, while MLSC 400 and 401 are 3 credits each. Normally, advanced-course cadets contract to become commissioned officers and thus incur a service obligation on graduation and commissioning. An active duty tour is not guaranteed, although many cadets request and receive active duty tours upon graduation. ROTC also offers guarantees of entering either the Army Reserve or Army National Guard to students so inclined.

The 300-level courses emphasize squad and platoon leadership, tactics, and preparation for the Leadership Development Assessment Course (LDAC). LDAC is a five-week training and evaluation activity required of contracted students. Cadets typically attend LDAC in the summer between their junior and senior years; however, they may attend after their senior year if necessary. Salary, travel expenses, and room and board are all provided during the course. LDAC is a critical part of the ROTC program that students must pass to receive a commission.

There is also a professional military education requirement. Contracted cadets must take and pass a military history course: American Military History (HIST 389) or an alternative course approved by the program director. This course may simultaneously fulfill the student’s general education or academic major requirements.

Because all students may enroll in ROTC classes, students who want to take an upper-level course must declare their intentions when seeking enrollment approval from the ROTC director or instructor. Prerequisites exist for upper-level courses. For more information, see the Course Descriptions chapter of this catalog.

Noncontract students who want to take MLSC 300- and 400-level courses must have junior or senior standing in their majors and meet the appropriate prerequisites. Course requirements will be established between the ROTC director and students to tailor the class to the students’ interests and needs.

The 400-level courses are considered to be the transition to officer phase. These courses focus on leadership, staff operations, logistics, military law, and ethics. Seniors are expected to organize and attend an additional one-hour staff and training meeting per week as part of their leadership experience and duties. Planning and implementation of training becomes the primary focus for seniors in LAB 201.

Earning a Commission
There are several methods by which students may enter Army ROTC to earn a commission as a second lieutenant on graduation:

- Students may complete the four-year program.
- Freshman and sophomore classes may be compressed into the sophomore year.
- Veterans may enter directly into the junior year (when academically aligned as a junior).
- Sophomores may attend a five-week Leaders Training Camp (LTC) between the sophomore and junior years to gain experience equivalent to the basic course.
- A special four-semester program is available to nursing majors in which LTC is not required.

Students who complete the ROTC program may take up to two years to complete their baccalaureate studies; education delays for graduate study also may be approved for graduating cadets before commissioning. Graduate students and resident aliens who become U.S. citizens by a certain time may become commissioned officers.

Scholarship Programs
Two- and three-year ROTC scholarships are available to freshmen and sophomores in all majors on a competitive basis. Students are required to have a minimum 2.50 GPA to apply and be under age 31 when commissioned. Scholarships pay 100 percent of tuition, an annual book allowance of $1,200, and a stipend of at least $300 per month during the school year, all tax free. Students do not have to be enrolled to apply, and there is no service obligation incurred when applying.

A two-year Reserve Forces Duty scholarship is available that guarantees reserve duty upon graduation and commissioning (no active duty tour). Students should contact the ROTC director to determine eligibility.

Four-year scholarships are available, but students should apply by December 15 of their senior year in high school for a scholarship that would start in the fall semester of their freshman year at Mason. Contact the ROTC director for details.

Many students participate in ROTC as nonscholarship cadets. A nonscholarship cadet cannot contract to receive a commission until the sophomore year. For the sophomore, junior, and senior years, nonscholarship contracted students receive the monthly stipend for the school year.
The George Mason Army ROTC Patriot Battalion began in 1981, achieved independent status in 2000, and frequently conducts training with Georgetown University and the University of Maryland Army ROTC.

Air Force ROTC
Two programs are available for college men and women to earn a commission as a second lieutenant in the U.S. Air Force while completing their university degree requirements. To enter, students should call 301-314-3242 or go to www.afrotc.umd.edu. Mason students can register for the appropriate courses through the Consortium Office, but mandatory courses are held at the University of Maryland. Car pools among Mason students are usually available.

Oak Ridge Associated Universities (ORAU)

Phone: 865-576-3306
Web: www.orau.org

Administration
Matthew J. Kluger, Vice President for Research and Economic Development; ORAU Councilor for George Mason University
Monnie E. Champion, ORAU Corporate Secretary

Since 1993, the students and faculty of George Mason University have benefited from its membership in Oak Ridge Associated Universities (ORAU). ORAU is a consortium of 98 colleges and universities and a contractor for the U.S. Department of Energy (DOE) located in Oak Ridge, Tennessee. ORAU works with member institutions to help their students and faculty gain access to federal research facilities throughout the country; keep its members informed about opportunities for fellowship, scholarship, and research appointments; and organize research alliances among its members.

Through the Oak Ridge Institute for Science and Education (ORISE), the DOE facility operated by ORAU, undergraduates, graduates, postgraduates, and faculty members enjoy access to a multitude of opportunities for study and research. Students can participate in programs covering a wide variety of disciplines, including business, earth sciences, epidemiology, engineering, physics, geological sciences, pharmacology, ocean sciences, biomedical sciences, nuclear chemistry, and mathematics. Appointment and program length range from one month to four years. Many of these programs are especially designed to increase the number of underrepresented minority students pursuing degrees in science- and engineering-related disciplines. A comprehensive listing of these programs and other opportunities, their disciplines, and details on locations and benefits can be found at sec.orau.org or by calling either of the contacts below.

ORAU’s Office of Partnership Development seeks opportunities for partnerships and alliances among ORAU’s members, private industry, and major federal facilities. Activities include faculty development programs, such as the Ralph E. Powe Junior Faculty Enhancement Awards, the Visiting Industrial Scholars Program, consortium research funding initiatives, faculty research, and support programs, as well as services to chief research officers.

Center for Global Studies

Phone: 703-993-9430
Web: cgs.gmu.edu

Administration
Peter Mandaville, Codirector and Associate Professor, Government and Politics
Terrence Lyons, Codirector and Associate Professor, Conflict Analysis and Resolution
Andrea Zizack, Coordinator

Dedicated to the promotion of multidisciplinary research on globalization, the Center for Global Studies coordinates outreach efforts in global affairs, facilitating access for external communities to the university’s full range of global expertise. Ongoing activities include hosting guest speakers and visiting scholars, an annual conference, electronic and paper publications, and an annual cycle of small grants to support faculty research. The center also manages multidisciplinary unit research projects and a number of regional and thematic working groups.

The Center for Real Estate Entrepreneurship

Phone: 703-993-9843
Web: realestate.gmu.edu

Administration
Greg Hero, Executive Director and Professor

Pulling resources and expertise from the Volgenau School of Information Technology and Engineering, the School of Public Policy, and the School of Management, the Center for Real Estate Entrepreneurship is designing undergraduate, graduate, and certificate programs in real estate development that encompass the entire real estate development continuum from land use and environmental considerations to acquisition dynamics and construction management. Areas of emphasis currently being developed include land use and zoning, sustainable development, real estate finance, management of the development process, development company management, marketing and asset management, and entrepreneurship and leadership.
The Krasnow Institute for Advanced Study seeks to expand the understanding of mind, brain, and intelligence by conducting research at the intersection of the separate fields of cognitive psychology, neurobiology, and the computer-driven study of artificial intelligence and complex adaptive systems, including social systems. These separate disciplines increasingly overlap and promise progressively deeper insight into human thought processes. The institute also examines how new insights from cognitive science research can be applied for human benefit in the areas of mental health, neurological disease, education, computer design, and social system analysis.

The Krasnow Institute for Advanced Study was chartered in 1990 as a private nonprofit Virginia corporation and merged with Mason in 2002, becoming a chartered institute under the Office of the Provost. The Center for Social Complexity joined the Krasnow Institute in 2005. In 2007, the institute became an academic unit housing the Department of Molecular Neuroscience and the Department of Computational Social Science (pending SCHEV approval). With an annual budget of $3.1 million, the institute is home to a scientific staff of 60. Cognitive research at the institute spans from molecules to the mind to social systems. Krasnow scientists have published extensively in the most prestigious scholarly journals and collectively have brought in more than $22 million in sponsored research from federal agencies such as the National Institutes of Health and private sources such as the Sir John Templeton Foundation.

GRADUATE PROGRAMS

■ Neuroscience, PhD SC-PHD-NEUR
Phone: 703-993-4381
Web: neuroscience.gmu.edu

The Krasnow Institute, together with the College of Science (COS) and the College of Humanities and Social Sciences (CHSS), oversees the campuswide Neuroscience Council in developing the Neuroscience PhD curriculum.

Neuroscience PhD courses are listed under NEUR in the Course Descriptions section of this catalog. Neuroscience PhD admissions and program requirements are listed under Neuroscience in the College of Science section of this catalog.

■ Computational Social Science, PhD SC-PHD-CSS
Phone: 703-993-1402
Web: socialcomplexity.gmu.edu
E-mail: cssgrad@gmu.edu

The core objective of the PhD in Computational Social Science (CSS) Program is to train graduate students to be professional computational social scientists in academia, government, or business. The program offers a unique and innovative interdisciplinary academic environment for systematically exploring, discovering, and developing skills to successfully follow careers in one of the areas of computational social science.

Admission Requirements
Applicants should have a bachelor’s degree in one of the social sciences; computer science, engineering, or a relevant discipline, and have taken undergraduate courses in these and related areas. Bachelor’s degrees in the physical or biological sciences are also eligible, but applicants may be advised to take additional courses in social science or computer science as prerequisites to admission. Minimal requirements also include one undergraduate course in calculus and knowledge of a computer programming language, preferably an object-based language. Applicants should have an undergraduate degree from an accredited institution, with a GPA of at least 3.25. To apply, prospective students should send to the COS Fairfax Campus Graduate Admissions Processing Center a completed Mason graduate application, two copies of official transcripts from each college and graduate institution attended, a current résumé, an expanded goals statement not to exceed 2,000 words, and the names of two Mason faculty members who may be suitable advisors. Applicants should also include three letters of recommendation from faculty members or individuals with direct knowledge of the student’s academic or professional capabilities. The letters must arrive directly from the senders. Applicants should also submit an official report of scores obtained on the GRE. TOEFL scores are required of all international applicants.
Degree Requirements

Students must maintain a minimum GPA of 3.00 in the program. The program requires 72 credits beyond the baccalaureate degree, with a minimum of 48 credits in course work and 24 credits of dissertation research. For those holding a master’s degree, the 72 required credits may be reduced by up to 30 credits, depending on graduate courses. A maximum of 24 credits of prior graduate course work may be transferred, provided such credits have not been used for another degree. The 48 credits of courses have the functional distribution and learning objectives indicated below:

- 12 credits of required core CSS courses:
  - CSS 600 Introduction to Computational Social Science
  - CSS 605 Object-Oriented Modeling for Social Science
  - CSS 610 Computational Analysis of Social Complexity
  - CSS 620 Origins of Social Complexity
- 6 credits of extended core CSS courses taken from the following:
  - CSS 625 Complexity Theory in the Social Sciences
  - CSS 645 Spatial Agent-Based Models
  - CSS 692 Social Network Analysis
- 15 credits of discipline-based social science courses in a specific area such as anthropology, economics, geography, history, linguistics, political science, or sociology, as approved by the student’s advisor, to provide domain-specific knowledge
- 15 credits of elective courses or independent research, as approved by the student’s advisor, to provide further substantive or methodological specialization as needed. (Students possessing a strong background in computing, such as an MS in computer science, but weaker social science training will be required to use all or most of these electives in a substantive social science. Conversely, students with a strong background in social science, such as a BS in economics, will be required to use most or all of these electives in computing courses.)
- 24 credits of dissertation research to demonstrate doctoral-level originality and research excellence

Areas for dissertation research include, but are not limited to, the following:
- Agent-based computational economics: trade, finance, decision making under risk
- Computational political economy: voting, institutions, norms, inequality
- Computational linguistics: generative grammars, parsing, classifiers, inference
- Social network analysis: connectivity, structure, evolution of the Internet, cyberwarfare
- Computational anthropology: emergence of hierarchy, settlement patterns
- Computational political science: systems of government, conflict and war, cooperation
- Computational sociology: segregation, collective action, leadership, trust
- Complexity theory: power laws, potential theory, criticality, bifurcation
- Computational methodology: multiagent systems, evolutionary computation

During the first year, each student will form a graduate studies committee, called the First-Year Committee, consisting of the student’s advisor plus two or three appropriately qualified individuals. The committee assists the student in designing a specific plan of study and evaluating the student’s progress by the end of the first year. During the second year, the student forms a doctoral committee, with membership approved by the CSS program director. The committee will advise the student in preparing for the doctoral candidacy exams and preparing, developing, and defending the doctoral dissertation.

The candidacy exam is taken after students have completed all core requirements and a majority of additional course work (18 plus 15 credits), which typically corresponds to the fifth semester in the program. The purpose of the candidacy exam is to assess the student’s substantive and methodological knowledge in CSS as a whole and in the chosen area of concentration; ability to integrate materials from different courses; and potential for a successful dissertation.

The exam will consist of written and oral parts. On passing the candidacy exam and submitting an acceptable dissertation proposal, students are advanced to doctoral candidacy. The degree is awarded on the successful defense of a PhD dissertation that represents a detailed written report of an original and significant research contribution to the CSS field.

Graduate Certificate in SC-CERG-CSS Computational Social Science

This 15-credit program is designed for students who seek training in computer simulation and related computational methods for analyzing social systems and processes. The program is open to all students with graduate standing at Mason and all students who hold a bachelor’s degree from an accredited university. The CSS certificate allows students with social science or computational backgrounds to acquire new knowledge and modeling skills to improve their qualifications and attractiveness to employers in government, academia, or industry. The core courses provide a common foundation; additional elective courses allow for a variety of student interests across diverse social domains.

Students in the CSS certificate program must take both CSS 600 Introduction to Computational Social Science and CSS 610 Computational Analysis of Social Complexity. Students are also required to take a minimum of 9 credits in elective courses (for example, CSS 605, 620, 692). Students may include a maximum of 3 credits of programming courses to meet the requirements. Such programming courses as procedural, object-oriented languages, or other approved programming approaches (such as CSI 603 or 604 Introduction to Scientific Programming I or II may be used with approval of the director. Some courses on computational techniques, modeling, or statistics, such as visualization, graphics, and statistical and database packages (such as CSI 606 and 607), may also be used to meet the requirements with prior approval of the director. Students intending to obtain the CSS certificate must apply to the CSS certificate program before beginning any CSS course work intended to satisfy requirements. They must also have their course work plan approved by the director.

Admission Requirements

Applicants should have an undergraduate degree from an accredited institution with a GPA of at least 3.00. To apply, prospective students should send to the COS Fairfax Campus Graduate Admissions Processing Center a completed Mason graduate application, two copies of official transcripts from each college and graduate institution attended, and a current résumé. TOEFL scores are required of all international applicants.
Life, Liberty, and the Pursuit of Happiness: A Rationale for General Education at George Mason University

“Life, liberty, and the pursuit of happiness”—this ringing phrase from the Declaration of Independence makes a fine statement about the ideals of general education (or, as it is more classically called, liberal education) as we strive to articulate it at Mason. Let’s take the three parts of Thomas Jefferson’s affirmation of humanity’s “unalienable rights” and see how they apply to the goals of a general, or liberal, education.

Life. A liberal education prepares us for life’s unpredictable, fascinating journey. One sobering truth about formal learning is that no matter how many courses we take or degrees we earn, we can’t master every skill and possess every piece of knowledge that we need to succeed in a dynamic world. A liberal education proposes that the highest value of the college experience is the development of our ability to continue learning, adapting, creating, and responding to an ever-changing society and career environment. A liberal education is the most practical of all, because it never goes out of date; the habits of mind it fosters help us to stay current with our careers and the life of our times.

Liberty. A liberal education takes its name from this part of Jefferson’s phrase; the root word for both the concept we so cherish and the education we practice is the Latin liber, meaning “free.” So this kind of education is meant to increase our freedom—of thought and action, from prejudice and ignorance. It is the foundation stone of citizenship as Jefferson and his contemporaries envisioned that notion, a liberty built on rights, responsibilities, and respect for differences. A liberally educated person feels free to seek knowledge and wisdom from across the whole spectrum of human experience—free to challenge the assumptions of the past (and also, after critical consideration, to accept them).

The pursuit of happiness. The liberal arts tradition provides tools for the pursuit of a happier, more fulfilled life. The definition of happiness is personal; for some, an appreciation of “the best that has been thought and said”—or composed, constructed, painted, danced, or acted—is a necessary condition for happiness. For others, it might be an understanding of the wonder of the natural universe, the ability of humans to create marvelous new inventions, or the complexities of the social fabric in an increasingly borderless world. For still others, it is a call to serve the community and the world in large and small ways, acting for the betterment of humanity. For most, it is some combination of the above. No matter the specifics; a liberal education offers the joy of discovery and the satisfaction of engagement with the largest questions of our time—and all time.

At George Mason University, we have created several ways to experience the excitement and gain the value of liberal education. The University General Education Program is detailed in the following pages; the New Century College First-Year Experience, pp. 205; the Mason Topics Program, pp. 178; and, for a small group of outstanding students, the Honors Program in General Education, pp. 166. Though their approaches are very different, as befits the creative spirit and diverse nature of our university, they are united in their commitment to the ideals of life, liberty, and the pursuit of happiness.

Category Goals and Requirements

Foundation Requirements

Foundation requirements help ensure that students are equipped with the tools and techniques necessary to succeed in college and throughout their lives and careers. These courses emphasize skills—in writing, speaking, and working with numbers and technology—that can be applied to any major field of study.

Written communication goal: Students develop the ability to use written communication as a means of discovering and expressing ideas and meanings: in short, writing as a way of thinking. Students begin this process at the fundamental level in English 101 (100 for ESL students) and build higher-level skills in English 302. Writing will be emphasized in many courses throughout a student’s career, and at least one course in every student’s major is designated “writing intensive.”

Required: English 101 (or 100), 302, and an approved writing-intensive course in the major.
Oral communication goal: Students develop the ability to use oral communication as a way of thinking and learning, as well as sharing ideas. Courses provide opportunities for students to learn to express themselves in public or group settings, apply critical thinking skills to public messages, and gain understanding of the cultural, psychological, political, and practical significance of communication, with a special emphasis on the role of communication in a free society.

Required: One approved course. Students will be expected to continue developing oral communication skills in additional general education courses as appropriate.

Quantitative reasoning goal: Students develop the ability to use and critically evaluate numerical information, and create and critique logical arguments using quantitative reasoning. Courses are intended to give students the capability to reason quantitatively through the examination of important problems and ideas. Students must take a placement exam to determine their proficiency before attempting courses that satisfy this requirement. Those who demonstrate a higher proficiency may choose among an approved set of courses that develop quantitative reasoning, while those with basic proficiency must satisfy this requirement with one course, MATH 106.

Required: MATH 106, or if the student has achieved an appropriate placement score on quantitative skills, one of the following: Math 108, 110, 111, 113, 115, or 125; or IT/STAT 250. (Students are assumed to have achieved satisfactory completion of the high school math required for admission.)

Information technology (IT) goal: Students develop a command of basic software and hardware concepts, terminology and functions, and file and data structures. They also use appropriate electronic tools for data organization and search, including databases, web browsers, and search engines; data analysis, including spreadsheets, geographic information systems, and statistical software; and data presentation and communication, including text, electronic slides, web pages, graphs, presentation software, HTML, word processing, and e-mail.

Ethics component: In addition, students are required to have classroom experience in, knowledge of, and appreciation for fundamental ethical issues relating to IT and our changing world. These issues include computer security, privacy laws, public policy issues and professional codes of ethics, intellectual property issues, copyright, security, and financial data.

Required: One approved 3-credit course to meet all IT requirements, or completion of an appropriate combination of courses, proficiency exams, and modules.

Core Requirements

Core requirements help ensure that students are introduced to the broad range of intellectual domains that contribute to a liberal education. By gaining exposure to the subject matter and ways of knowing in a variety of fields, students will be better able to synthesize new knowledge, respond to fresh challenges, and meet the demands of a complex world.

Literature goal: Courses foster understanding and appreciation of the aesthetic, cultural, historical, and intellectual aspects of major literary works through critical analysis. Students will identify, analyze, write about, and discuss aspects of theme, plot, central idea, narrative, audience, perspectivive, figurative language, and the relationship between structure and ideas.

Required: One approved course.

Arts goal: Students will develop an understanding of the aesthetic and intellectual components of the arts through critical analysis of major artistic works or creative work of their own. Courses are intended to give students knowledge and understanding of the arts through critical or historical analysis, theory, and practice. Arts courses provide distinctive modes of thought, ways of working, and avenues for student achievement, and establish a foundation for ongoing intellectual and artistic development. Some courses emphasize the development of artistic technique, problem solving, and the creative and interdisciplinary process, while others focus on developing aesthetic sensibility and understanding historical and cultural contexts.

Required: One approved course.

Natural science goal: Courses provide an understanding of natural science, by addressing the critical approach of the scientific method, relation of theory and experiment, use of quantitative and qualitative information, and development and elaboration of major ideas in science.

Required: Two approved science courses. At least one course will include laboratory experience.

Western civilization/world history goal: Course covers the period of Western civilization from the Greek and Roman civilizations to the contemporary era. Students will develop awareness and understanding of a major civilization that has influenced thought, culture, and politics in the United States and throughout the world.

Required: One approved course.

Global understanding goal: Courses examine some of the principal global issues and concerns that shape our world today. After completing a course from this category, students will be able to identify the causes and consequences of change in significant global issues. While some courses may deal with a specific global problem, institution, or issue, others may focus on a specific area or region outside the contemporary Western world by incorporating specific comparisons of several cultures. These courses stress the interconnectedness, difference, and diversity that are central to understanding and operating in a global society.

Required: One approved course.

Social and behavioral sciences goal: Courses provide students with an understanding of the social and behavioral sciences. Students are engaged in reasoning using the scientific method, the use of quantitative and qualitative information, and the analysis of empirical observations in relation to theory, among other methods. The development of major ideas in social science is also addressed.

Required: One approved course.

Synthesis Requirement

Synthesis goal: All students will take one upper-division synthesis course, typically after all other university general education requirements are met (or concurrently enrolled). Synthesis courses draw on the skills and knowledge base attained through the General Education Program, applying the power of liberal learning to a specific field; often, though not always, in the student’s major. Synthesis courses may link particular issues in a given field to wider intellectual and
community concerns; other courses might be interdisciplinary. Some synthesis courses also serve as capstone courses in a major. All synthesis courses require students to demonstrate advanced skills in oral and written presentations.

Required: One approved course.

Writing-Intensive Course Requirement
In addition to English composition and as part of the university’s commitment to literacy in all programs, at least one course in each major is designated as “writing intensive.” For more information, go to the Academic Policies chapter of this catalog. Please read the description of each major for the specific courses that fulfill this requirement.

Approved Courses
The course list reflects approved courses as of press time. For the most current list, go to www.gmu.edu/departments/provost/gened/GENEDapprovedcourses.htm.

Foundation Requirements
Written communication (6 credits: 3 lower, 3 upper)
ENGL 100 or 101, 302

Oral communication (3 credits)
COMM 100 or 101

Information technology (IT, all)
ADJ 300, ANTH 395, CHEM 350, GOVT 300, IT 103, MUSI 415

Information technology (IT, all except ethics)
AVT 180; CS 112; PHYS 251; PSYC 300, 301, 372 (these must be taken in sequence); SOCI 410

Information technology ethics (IT Ethics)
CS 105 (1 credit), 305 (3 credits); ENGR 107 (2 credits); IT 304; PHIL 112 (1 credit)

Quantitative reasoning (3 credits)
IT 250; MATH 106, 108, 110, 111, 113, 115, 125; STAT 250

Core Requirements
Literature (3 credits)
CHIN 310, 311, 325, 328; CLAS 250, 260, 340, 350, 360, 380; ENGL 201; FREN 325, 329; FRLN 330; GERM 325; PHIL 253; RUSS 325, 326, 327; SPAN 325

Arts (3 credits)

Western civilization/world history (3 credits)
HIST 100 or 125

Social and behavioral science (3 credits)
ADJ 100; AFAM 200; ANTH 114, 120, 125, 396; CONF 101; ECON 100, 103, 104, 110, and 111 (110 and 111 must be taken in sequence); EDUC 372; GEOG 103; GOVT 101; 103; HEAL 230; HIST 120; LING 326; PSYC 100, 211, 231; SOCI 101; SOM 100, TOUR 311; WMST 200

Global understanding (3 credits)
ADJ 405; ANTH 302, 304, 306, 309, 311, 312, 313, 331, 332, 333, 385; ARTH 203, 319, 320, 380, 382, 383, 384, 385; CEIE 100; COMM 305, 456; DANC 118, 318; ECON 360, 361, 362, 380, 390; ENGL 349, 350; GCH 205; GEOG 101; GLOA 101; GOVT 132, 133; HIST 130, 251, 252, 261, 262, 271, 272, 281, 328, 329, 356, 364, 365, 387, 459, 460, 462; MSOM 305; MUSI 103, 431; RELI 100, 211, 212, 313, 315, 341, 374; RUSS 354; SOCI 120, 320, 332; SPAN 322; THR 359; TOUR 210; WMST 100

Natural science (7 credits total)
Nonlab (3 credits): ASTR 103, 302; CDS 101, CHEM 101, 102, 201, 202; CLIM 101, EVPP 201; GEOG 102; UNIV 301
Lab (4 credits): ASTR 111, 112, 113, 114; BIOL 103, 104, 213, 303, 304; CHEM 103, 104, 155, 156, 211, 212, 251; EOS 121, EVPP 110, 111; GEOL 101, 102; PHYS 103, 104, 160, 243 and 244, 245 and 246, 260 and 261, 262 and 263

Synthesis requirement
ADJ 303; ANTH 400; ARTH 394; ASTR 497, 498; BINF 354; BIOL 301; BIS 490; CAS 313; CEIE 490; COMM 326, 362, 454; CONF 490; CS 306, 491; DANC 490; ECE 447, 492, 493; ECON 309; EDCI 490; ENGL 325; EOS 304; EVPP 335; FRLN 385; GEOG 303, 304; GEOL 420; GOVT 490, 491; HIST 300, 499; IT 492; LAS 499; MATH 400; MUSI 490; NCLC 308; NEUR 354; NURS 465; PHIL 309, 493, 377, 378; RELI 490; RUSS 353; SOCI 377, 483; SOCW 323; SOM 498; SYST 495; THR 440, 496; UNIV 342, 442

Total: 40 credits
Institute for Conflict Analysis and Resolution

Phone: 703-993-1300  
Web: icar.gmu.edu  
College Code: CA

Administration  
Sara Cobb, Director  
Kevin Avruch, Associate Director

Faculty  
Professors: Avruch, Cheldelin, Gopin, Jeong, Rothbart, Rouhana, Rubenstein, Sandole  
Associate professors: Bartoli, Cobb, Hirsch, Lyons, Warfield  
Assistant professors: Goodale, Howard, Nan, Paczynska, Schoeny, Simmons  
Research professors: Korostelina, Price, Sluzki  
Affiliate faculty: Dale  
Emeritus faculty: Mitchell

Course Work  
The Institute for Conflict Analysis and Resolution (ICAR) offers all course work designated CONF in the Course Descriptions chapter of this catalog.

Academic Programs  
ICAR provides the following academic offerings:

Undergraduate  
• BA in Conflict Analysis and Resolution  
• BS in Conflict Analysis and Resolution  
• Minor in Conflict Analysis and Resolution

Graduate  
• MS in Conflict Analysis and Resolution  
• PhD in Conflict Analysis and Resolution  
• Dual Degree Program in Social Work and Conflict Analysis and Resolution (MSW and MS)  
• Graduate Certificate in Conflict Analysis and Resolution Advanced Skills  
• Graduate Certificate in Conflict Analysis and Resolution for Collaborative Leadership in Community Planning  
• Graduate Certificate in Conflict Analysis and Resolution for Prevention, Reconstruction, and Stabilization Conflicts  
• Graduate Certificate in World Religions, Diplomacy, and Conflict Resolution

UNDERGRADUATE PROGRAM  
Phone: 703-993-4165  
E-mail: ugradcar@gmu.edu  
Location: Fairfax Campus

Susan F. Hirsch, Undergraduate Program Director  
Conflict Analysis and Resolution (CAR) offers students a BA, a BS, or a minor in a growing interdisciplinary social science field with practical applications. Conflict analysis and resolution is committed to analyzing the sources and dynamics of conflict and the means for resolution toward lasting peace. All CAR students take a series of core courses that provide a background in conflict theory, analysis, and conflict resolution skills. Required bridge courses cover conflict analysis and resolution at three levels: interpersonal conflict, community and organizational conflict, and international conflict. After selecting a level of conflict as a concentration, students choose courses from units throughout the university that relate to the concentration and their areas of interest, such as anthropology, communication, government, philosophy, psychology, management, sociology, and New Century College. The major also requires 3 credits of field experience in the form of an internship, a service-learning opportunity, or study abroad.

Conflict Analysis and Resolution, BA  
In addition to satisfying the university-wide general education requirements and the College of Humanities and Social Sciences (CHSS) college-level requirements for philosophy or religious studies, foreign language proficiency, social sciences, and non-Western culture, CAR majors must complete 39 credits for the BA degree:

Students pursuing a double major/degree with a program outside of the ICAR undergraduate program will be expected to fulfill all of the university general education and college requirements necessary to complete the second major. Please check with the second major department concerning additional requirements.

Required core courses (15 credits): CONF 101, 300, 301, 302, 490

Required bridge courses (9 credits): CONF 320, 330, 340

Field experience (3 credits): Students can choose to fulfill this requirement through an internship, service learning, or study abroad. Students register for internship credits through
New Century College. More information is available at http://ncc.gmu.edu. Students interested in study abroad should register through the Center for Global Education. More information can be found at http://www.gmu.edu/departments/cge. Prior approval by the major advisor is required for all field experience options.

- Internship: NCLC 390/490 or CONF 375
- Service Learning: NCLC 495
- Study Abroad: CONF 385

**Concentration courses (12 credits):** Students choose courses from one of three levels of conflict: interpersonal (micro level), community and organizational (mezzo level), and international (macro level). Students should choose classes that pertain to their concentration and are listed as approved. Students are encouraged to check special topics courses each semester and think creatively about the applicability of courses that support learning in their chosen concentration. Independent study approved by the advisor is also an option. The CAR director will consider student requests for approval of courses not listed below.

**Concentration in Interpersonal Conflict (MICR)**
Students choose four courses from the following areas: ADJ 302, 404, 406; ANTH 315, 365, 371; COMM 305; CONF 202, 393, 399, 495; NCLC 305, 310, 315, 317, 320, 395; PHIL 309, 355; PSYC 231, 321, 324, 467; SOCI 300, 302, 305, 309, 350; SOCW 323

**Concentration in Community and Organizational Conflict (MEZZ)**
Students choose four courses from the following areas: ADJ 302, 402, 407, ANTH 310, 365, 488; COMM 326, 335, 350, 432; CONF 202, 240, 393, 399, 495; ECON 309, 320; GEOG 306, 406; GOVT 301, 309, 337, 365, 414; HIST 340, 350, 418; MGMT/MSOM 301; MGMT 412, 463; NCLC 301, 304, 310, 320, 361, 381, 395; PHIL 254, 309, 326, 355, 395; PSYC 231; SOCI 300, 301, 302, 307, 308, 315, 326, 332, 340, 352, 373, 492; SOCW 351, 425; UNIV 342

**Concentration in International Conflict (MACR)**
Students choose four courses from ADJ 405, 475; ANTH 312, 331, 332, 333, 365, 385, 440; COMM 412/GOVT 412; CONF 240, 393, 399, 495; ECON 360, 361; GEOG 301; GOVT 331, 332, 333, 334, 336, 337, 338, 342, 345, 349, 421, 432, 446, 448; HIST 364, 461, 466; MGMT 461; MSOM 305; NCLC 381, 395, 424; PHIL 327, 355; SOCI 307, 320, 326, 400, 450

**Conflict Analysis and Resolution, BS**

In addition to satisfying the university-wide general education requirements CAR majors must complete 54 credits for the BS degree:

Students pursuing a double major/degree with a program outside of the ICAR undergraduate program will be expected to fulfill all of the university general education and college requirements necessary to complete the second major. Please check with the second major department concerning additional requirements.

**Required core courses (15 credits):** CONF 101, 300, 301, 302, 490

**Required bridge courses (9 credits):** CONF 320, 330, 340

**Non-Western culture (3 credits):** from institute BA requirement list. Cannot be double counted for global understanding requirement.

**Research methods (6 credits):**

- STAT 250
- 3 credits chosen from ADJ 300; ANTH 380, 450; ENGL 327; GOVT 300, 366, 400; HIST 300; PHIL 357/SOCI 599; PSYC 300, 301; SOCI 303, 313, 410; STAT 362/IT 362, STAT 474

**Field experience (3 credits):** Students can choose to fulfill this requirement through an internship, service learning, or study abroad. Students register for internship credits through New Century College. More information is available at http://ncc.gmu.edu. Students interested in study abroad should register through the Center for Global Education. More information can be found at http://www.gmu.edu/departments/cge. Prior approval by the major advisor is required for all field experience options.

- Internship: NCLC 390/490 or CONF 375
- Service Learning: NCLC 495
- Study Abroad: CONF 385

**Concentration courses (12 credits):** Students choose courses from one of three levels of conflict: interpersonal (micro level), community and organizational (mezzo level), and international (macro level). Students should choose classes that pertain to their concentration and are listed as approved. Students are encouraged to check special topics courses each semester and think creatively about the applicability of courses that support learning in their chosen concentration. Independent study approved by the advisor is also an option. The CAR director will consider student requests for approval of courses not listed below.

**Concentration in Interpersonal Conflict (MICR)**
Students choose four courses from the following areas: ADJ 302, 406, 407; ANTH 315, 365, 488; COMM 326, 335, 350, 432; CONF 202, 240, 393, 399, 495; ECON 309, 320; GEOG 306, 406; GOVT 301, 309, 337, 365, 414; HIST 340, 350, 418; MGMT/MSOM 301; MGMT 412, 463; NCLC 301, 304, 310, 320, 361, 381, 395; PHIL 254, 309, 326, 355, 395; PSYC 231; SOCI 300, 301, 302, 307, 308, 315, 326, 332, 340, 352, 373, 492; SOCW 351, 425; UNIV 342

**Concentration in Community and Organizational Conflict (MEZZ)**
Students choose four courses from ADJ 302, 404, 406; ANTH 315, 365, 371; COMM 305; CONF 202, 393, 399, 495; NCLC 305, 310, 315, 317, 320, 395; PHIL 309, 355; PSYC 231, 321, 324, 467; SOCI 300, 302, 305, 309, 350; SOCW 323

**Concentration in International Conflict (MACR)**
Students choose four courses from ADJ 302, 406, 407; ANTH 310, 365, 488; COMM 326, 335, 350, 432; CONF 202, 240, 393, 399, 495; ECON 309, 320; GEOG 306, 406; GOVT 301, 309, 337, 365, 414; HIST 340, 350, 418; MGMT/MSOM 301; MGMT 412, 463; NCLC 301, 304, 310, 320, 361, 381, 395; PHIL 254, 309, 326, 355, 395; PSYC 231; SOCI 300, 301, 302, 307, 308, 315, 326, 332, 340, 352, 373, 492; SOCW 351, 425; UNIV 342

**Concentration in International Conflict (MACR)**
Students choose four courses from ADJ 405, 475; ANTH 312, 331, 332, 333, 365, 385, 440; COMM 412/GOVT 412; CONF 240, 393, 399, 495; ECON 360, 361; GEOG 301; GOVT 331, 332, 333, 334, 336, 337, 338, 342, 345, 349, 421, 432, 446, 448; HIST 364, 461, 466; MGMT 461; MSOM 305; NCLC 381, 395, 424; PHIL 327, 355; SOCI 307, 320, 326, 400, 450

**Major electives (6 credits):** Elective courses can be chosen from the approved concentration course list at any level but
may not count for both concentration and elective credit. Independent study approved by the advisor is also an option.

**Minor in Conflict Analysis and Resolution**

Students are required to achieve a minimum of 2.00 GPA in courses applied to a minor. At least 8 credits of the minor must be applied only to the CAR minor and may not be used to fulfill requirements of the student’s major, major concentration, or another minor.

Students pursuing a minor complete 18 credits distributed as follows:

- **Required core courses (6 credits):** CONF 101 and 300

- **One of three bridge courses (3 credits):** CONF 320, 330, 340

- **Emphasis courses (9 credits):** Students choose courses from one of three levels of conflict: interpersonal (micro level), community and organizational (mezzo level), and international (macro level). With permission of the advisor, students may use other CONF designated courses to fulfill emphasis requirements. The CAR director will consider student requests for approval of courses not listed below.

- **Emphasis in Interpersonal Conflict**
  Students choose three courses from ADJ 302, 404, 406; ANTH 315, 365, 371; COMM 305; CONF 202, 393, 399, 495; NCLC 305, 310, 315, 327, 320, 395; PHIL 309, 355; PSYC 231, 321, 324, 467; SOCI 300, 302, 305, 309, 350, SOCW 323

- **Emphasis in Community and Organizational Conflict**
  Students choose three courses from ADJ 302, 406, 407; ANTH 310, 365, 488; COMM 326, 335, 350, 432; CONF 202, 240, 393, 399, 495; ECON 309, 320; GEOG 306, 406; GOVT 301, 309, 337, 365, 414; HIST 340, 350, 418; MGMT/MSOM 301; MGMT 412, 463; NCLC 301, 304, 310, 320, 361, 381, 395; PHIL 254, 309, 326, 355; PSYC 231; SOCI 300, 301, 302, 307, 308, 315, 326, 332, 340, 352, 373, 492, SOCW 351, 425; UNIV 342

- **Emphasis in International Conflict**
  Students choose three courses from ADJ 405, 475; ANTH 312, 331, 332, 333, 365, 385, 440; COMM 412/GOVT 412; CONF 240, 393, 399, 495; ECON 360, 361; GEOG 301, GOVT 331, 332, 333, 334, 336, 337, 338, 342, 345, 349, 421, 432, 446, 448; HIST 364, 461, 466; MGMT 461; MSOM 305; NCLC 381, 395, 424; PHIL 327, 355; SOCI 307, 320, 326, 340, 450

**Writing-Intensive Requirement**

All Mason students are required to complete at least one course designated as “writing intensive” in their major at the 300-level or above. CONF 302 has been designated “writing intensive.”

**Advising**

CAR advisors help students create interdisciplinary programs that meet their interests and career goals. All majors and minors are strongly encouraged to meet regularly with a CAR academic advisor who will help students develop and follow a coherent plan of study and complete the degree in a timely manner.

**Physical Education Courses**

PHED courses offered by the School of Recreation, Health, and Tourism that are activity courses cannot be counted toward credits required for a degree in CAR. Students may use non-activity PHED courses for elective credit for CAR degrees.

**GRADUATE PROGRAMS**

**Conflict Analysis and Resolution, MS**

This two-year professional program prepares students for practice and further academic work by integrating conflict analysis and resolution theory, research, and practical techniques. Participants study the theory, methods, and ethical perspectives of the field, and apply this knowledge in laboratory simulations and workshops, internships, and field practice. Graduates work in a variety of settings where conflict resolution is useful and interest groups are in conflict with current and emergent public policy. Examples are businesses, unions, government agencies, religious groups, court systems, educational institutions, community centers, international relief and development organizations, and consulting firms.

**Admission Requirements**

In addition to meeting all admission requirements for graduate study, applicants must submit all undergraduate and graduate transcripts; three letters of recommendation, one of which should be from a faculty member in the applicant’s undergraduate or graduate major field; and a 750- to 1,000-word essay on goals and reasons for seeking admission to the program. GRE or other standardized test scores are not required but may be submitted. The TOEFL is required of international students. For more information, see the Admission of International Students section in the Admissions chapter of this catalog.

Background courses in social sciences, as well as prior work experience, are desirable. Prior graduate academic work is evaluated on an individual basis for possible transfer credit and fulfillment of program requirements; however, Mason usually does not reduce the total credits required for the degree. Although students may enroll on a full- or part-time basis, entry into the program is in the fall semester only.

**Degree Requirements**

Forty-one credits are required: 15 in required core courses, 20 in elective courses, and 6 in integrative courses (students can choose from a defined list). Mason requires all students to complete the master’s degree within six years of their official admission date.

Because the choice of electives can vary significantly according to individual goals or needs, each student should develop a plan of study that should be discussed once each semester with the advisor and updated as appropriate.

**Required Courses**

Students take 15 credits of required course work.

CONF 501 Introduction to Conflict Analysis and Resolution

CONF 601 Theories of Conflict and Conflict Resolution

CONF 610 Philosophy and Methods of Conflict Research

CONF 642 Integration of Theory and Practice

CONF 713 Reflective Practice in Interpersonal-Multiparty Conflicts
**Elective Courses**

Students take 20 credits of elective course work. Electives are any 500-, 600-, or 700-level CONF courses, except required courses and courses from the Graduate Certificate Program. With the advisor’s approval, each student is eligible to include a maximum of 6 credits of electives from outside the ICAR Program, including courses in other Mason departments, consortium courses, ICAR graduate certificate courses, and transfer courses from other universities.

**Integrative Courses**

Students must complete 6 credits of integrative work, choosing one of the following options:

- CONF 690 Practicum in Conflict Analysis and Resolution: Applied Practice and Theory (3 credits in fall semester, 3 credits in spring semester)
- CONF 694 Internship (3 credits) and CONF 795 Professional Development Seminars (3 credits) or CONF 694 Internship (6 credits)
- CONF 799 Master’s Thesis (6 credits) or CONF 798 Thesis Proposal (1 credit) and CONF 799 Master’s Thesis (5 credits)

**Directed Readings**

Only two directed readings (CONF 697) may be applied toward requirements for the master’s degree.

**Field Opportunities**

The internship program provides students with opportunities to use and develop conflict resolution skills, integrate theory and practice of conflict analysis and resolution, and network with professionals in the field to enhance employment opportunities. Experience does not necessarily have to be explicitly hands on. CONF 694 requires at least 160 hours of supervised work on a project toward the analysis or resolution of conflict. Such work must be spelled out in a memorandum of agreement to be signed by the student, the site supervisor, and the internship coordinator before the internship begins.

The Applied Practice and Theory (APT) Program is a 6-credit course that runs yearlong. It is designed to take the concepts presented in class and practiced in labs into real situations with conflict and consequences. Students work in teams integrating research and practice with theory development and applied ethics.

**Dual Degree HH-MSW-SOCW, MS-CONF in Social Work and Conflict Analysis and Resolution**

The Department of Social Work and the Institute for Conflict Analysis and Resolution have joined forces to offer a three-year dual-degree program. Students can earn both an MSW and an MS in conflict analysis and resolution while taking advantage of the diversity of the Washington, D.C., metropolitan area and the university’s proximity to the nation’s capital. This is the only dual-degree program of its kind.

**Admissions Requirements**

Students applying for the dual MSW and MS in conflict analysis and resolution must apply separately to both the programs. If accepted into both programs, students request permission to pursue the dual degree. See admissions information for both the College of Health and Human Services and the Institute for Conflict Analysis and Resolution.

**Degree Requirements**

Students must successfully complete the following:

**Social Work Courses**
- SOCW 623 Human Behavior and Social Systems I ..........3
- SOCW 624 Human Behavior and Social Systems II ..........3
- SOCW 651 Social Policies, Programs, and Services ..........3
- SOCW 652 Influencing Social Policy .........................3
- SOCW 657 Directed Social Work Practice I .................3
- SOCW 658 Directed Social Work Practice II ..............3
- SOCW 670 Communication and Technology for Social Work Practice ..........................3
- SOCW 672 Foundation Field Practicum and Seminar I ....3
- SOCW 673 Foundation Field Practicum and Seminar II ...3
- SOCW 684 Social Work and the Law .........................4
- SOCW 685 Organizational Leadership for Social Workers ..................................................4
- SOCW 687 Empowering Communities for Change ..........4
- SOCW 688 Advanced Research in Social Work ..........3
- SOCW 690 Social Change Field Practicum ..................6
- SOCW 691 Social Change Field Seminar ...................3
- SOCW electives (selected with approval from ICAR) ....12

**Conflict Analysis and Resolution Courses**
- CONF 501 Introduction to Conflict Analysis and Resolution ........................................3
- CONF 601 Theories of Sources of Conflict and Conflict Resolution ......................................3
- CONF 610 Philosophy and Methods of Conflict Research ..................................................3
- CONF 642 Integration of Theory and Practice .............3
- CONF 694 Internship ................................................3
- CONF 713 Reflective Practice in Interpersonal-Multiparty Conflicts ..................................3
- CONF 795 Professional Development Seminar ..........5
- CONF electives (selected with approval from ICAR) ....12

Total .................................................................86

**Conflict Analysis and Resolution, PhD**

The doctoral program, the first of its kind in the United States, provides advanced study for students in the fields of conflict and conflict resolution. Students are prepared for careers as researchers, theoreticians, and teachers in higher education, and as policy administrators, analysts, and consultants in the public and the private sectors.

The program stresses a close link between knowledge of theory and process in the resolution of conflict. For this, training in the methods of research and analysis is emphasized. In addition, students are expected to obtain a background in a substantive area of conflict, usually related to the topic of the dissertation.

**Admission Requirements**

In addition to the requirements listed for applicants to the MS program, requirements for the PhD program include a written sample of work that shows the applicant’s potential for completing dissertation research in a doctoral program. Although students may enroll on a full- or part-time basis, entry into the program is in the fall semester only. A master’s degree or equivalent degree is required for admission to the PhD program.
Degree Requirements
Fifty-seven credits are required.

Required Core Doctoral Courses
Students take 27 credits of required course work; each course is 3 credits.

CONF 711 The Conventions of Statistical Methodology
CONF 713 Reflective Practice in Interpersonal-Multiparty Conflicts
CONF 801 Introduction to Conflict Analysis and Resolution
CONF 802 Theories of the Person
CONF 803 Structural Theories
CONF 810 Philosophy and Conflict Research
CONF 811 Advanced Quantitative Research Methods
CONF 812 Advanced Qualitative Research Methods
CONF 900 Integrating Theory, Practice, and Method in Conflict Analysis

Elective Courses
Eighteen elective credits must be completed prior to comprehensive exams. Electives are any 500-, 600-, and 700-level CONF courses, except required courses and courses from the Graduate Certificate Program. With the advisor’s approval, each student may include a maximum of 6 credits of electives from outside the ICAR Program, including courses in other Mason departments, consortium courses, ICAR graduate certificate courses, and transfer courses from other universities. The intent is to allow students to have maximum flexibility in selecting courses to build skills and knowledge needed in dissertation work.

Directed Readings
Only two directed readings (CONF 897) can be applied toward doctoral elective requirements.

Dissertation Units
Twelve combined dissertation proposal and research credits are required:

CONF 998 Doctoral Dissertation Proposal (All CONF 998 courses are graded In Progress until completion of the proposal. At that time, an appropriate grade is issued.)

CONF 999 Doctoral Dissertation Research (All CONF 999 courses are graded In Progress until the dissertation defense is successfully completed. At that time, an appropriate grade is issued.)

Credit for Prior Study
Students who have earned an MS in conflict analysis and resolution from Mason may have the course total required for a doctoral degree reduced by 15 credits. The actual number of credits reduced is determined in consultation with the student’s advisor and the program coordinator after a review of courses taken.

Students entering with other relevant degrees (MA, MS, or JD) may have the required course load reduced by up to 15 credits. The actual number of applied credits is determined in consultation with the student’s advisor and the program coordinator after a review of courses taken.

Foreign Language Requirement
Every doctoral student must show competence in a foreign language (that is, a language other than their native tongue) before advancing to candidacy. Students cannot register for CONF 998 without evidence of meeting this requirement. International students may use English as their foreign language and the TOEFL as a demonstration of competency. The Department of Modern and Classical Languages has ruled that neither American Sign Language nor computer languages can be used to fulfill this requirement. All students, regardless of how recently language courses have been taken, are required to fulfill the same standard before advancing to candidacy.

Competence in a foreign language must be shown by taking a placement test at Mason’s Language Laboratory. The test has oral and written components. If the test is passed at a level greater than 300, which indicates the end of intermediate and beginning of advanced competency, the Department of Modern and Classical Languages will issue a certificate of proficiency.

If the student desires testing in a language that Mason does not offer, the test can be taken at an outside organization, embassy, church, or other entity. The student must submit a letter to Mason certifying that the test was passed at a high, intermediate, or low advanced level. The student may submit for approval the names and qualifications of those capable of administering such a test.

After students pass their comprehensive exam and before they register for CONF 998, they should notify the PhD coordinator about the language they have selected to satisfy the foreign language requirement.

Advancement to PhD Candidacy
After completing course work (except the dissertation) listed on the Program of Studies, passing written comprehensive exams, and completion of the language requirement students are advanced to candidacy. A candidate is permitted five years from the advancement date to complete the dissertation.

Graduate Certificates
Phone: 703-993-1300
E-mail: icarcert@gmu.edu
Location: Arlington Campus
Mara Schoeny, Certificate Program Director
Four graduate certificate programs are administered exclusively by ICAR. Each of these one-year, 15-credit programs is specifically tailored to provide students with practical knowledge of conflict analysis and resolution relevant to their focused areas of work. Designed for midcareer professionals studying in a cohort environment, the certificate programs integrate conflict analysis and resolution theory, research, and practical technique. These programs use intensive course sessions, lecture, seminar, and applied mentored learning in real and simulated situations to prepare students to use conflict analysis and resolution approaches in their work in a variety of fields.

Admission Requirements
In addition to meeting all admission requirements for graduate study, applicants must submit an undergraduate transcript
showing completion of an undergraduate degree or equivalent, and a curriculum vitae or résumé indicating relevant work experience.

In addition, prior work experience in areas related to the chosen graduate certificate is desirable. GRE or other standardized test scores are not required but may be submitted. The TOEFL is required of international students. For more information, see the Admission of International Students section in the Admissions chapter of this catalog. Although students may enter the program in either the fall or spring semester, they are strongly encouraged to participate fully in the cohort learning experience by enrolling for the fall semester, taking two courses in the fall and two in the spring, and completing their certificate with the final course in the summer.

Degree Requirements
Fifteen credits are required for each graduate certificate degree. Each degree consists of three courses (9 credits) required of all certificate programs.

- **Graduate Certificate CERG-CARA in Conflict Analysis and Resolution Advanced Skills**

  **Required Courses**
  Students take 12 credits of required course work. The semester in which the courses are generally offered is indicated in parentheses:
  
  - CONF 502 Intensive Introduction to Conflict Analysis and Resolution (fall and spring)
  - CONF 650 Conflict Analysis and Resolution Advanced Skills (fall)
  - CONF 660 Conflict Assessment and Program Evaluation (spring)
  - CONF 668 Applied Integration for Graduate Certificates (summer)

  **Elective Courses**
  Students take 3 credits of elective course work. They may choose from the following:
  
  - CONF 656 Integrating Complementary Approaches in Conflict Analysis and Resolution (spring)
  - CONF 657 Facilitation Skills (spring)
  - CONF 658 Diversity in Conflict Analysis and Resolution (spring)
  - CONF 659 Leadership in Conflict Analysis and Resolution (spring)

  Application of any other course toward fulfillment of the elective requirement must be approved by the director of certificates.

- **Graduate Certificate CERG-CARC in Conflict Analysis and Resolution for Collaborative Leadership in Community Planning**

  **Required Courses**
  Students take 12 credits of required course work. The semester in which the courses are generally offered is indicated in parentheses:
  
  - CONF 502 Intensive Introduction to Conflict Analysis and Resolution (fall and spring)
  - CONF 651 Conflict Analysis and Resolution for Collaborative Leadership in Community Planning (fall)
  - CONF 660 Conflict Assessment and Program Evaluation (spring)
  - CONF 668 Applied Integration for Graduate Certificates (summer)

  **Elective Courses**
  Students take 3 credits of elective course work. They may choose from the following:
  
  - CONF 656 Integrating Complementary Approaches in Conflict Analysis and Resolution (spring)
  - CONF 657 Facilitation Skills (spring)
  - CONF 658 Diversity in Conflict Analysis and Resolution (spring)
  - CONF 659 Leadership in Conflict Analysis and Resolution (spring)

  Application of any other course toward fulfillment of the elective requirement must be approved by the director of certificates.

- **Graduate Certificate CERG-CARP in Conflict Analysis and Resolution for Prevention, Reconstruction, and Stabilization Conflicts**

  **Required Courses**
  Students take 12 credits of required course work. The semester in which the courses are generally offered is indicated in parentheses:
  
  - CONF 502 Intensive Introduction to Conflict Analysis and Resolution (fall and spring)
  - CONF 652 Conflict Analysis and Resolution for Prevention, Reconstruction, and Stabilization Contexts (fall)
  - CONF 660 Conflict Assessment and Program Evaluation (spring)
  - CONF 668 Applied Integration for Graduate Certificates (summer)

  **Elective Courses**
  Students take 3 credits of elective course work. They may choose from the following:
  
  - CONF 656 Integrating Complementary Approaches in Conflict Analysis and Resolution (spring)
  - CONF 657 Facilitation Skills (spring)
CONF 658 Diversity in Conflict Analysis and Resolution (spring)
CONF 659 Leadership in Conflict Analysis and Resolution (spring)

Application of any other course toward fulfillment of the elective requirement must be approved by the director of certificates.

■ Graduate Certificate CERG-CARW in World Religions, Diplomacy, and Conflict Resolution

Required Courses
Students take 12 credits of required course work. The semester in which the courses are generally offered is indicated in parentheses:
CONF 502 Intensive Introduction to Conflict Analysis and Resolution (fall and spring)
CONF 653 World Religions, Diplomacy, and Conflict Resolution (fall)
CONF 660 Conflict Assessment and Program Evaluation (spring)
CONF 668 Applied Integration for Graduate Certificates (summer)

Elective Courses
Students take 3 credits of elective course work. They may choose from the following:
CONF 656 Integrating Complementary Approaches in Conflict Analysis and Resolution (spring)
CONF 657 Facilitation Skills (spring)
CONF 658 Diversity in Conflict Analysis and Resolution (spring)
CONF 659 Leadership in Conflict Analysis and Resolution (spring)

Application of any other course toward fulfillment of the elective requirement must be approved by the director of certificates.
The College of Education and Human Development (CEHD) comprises the Division of Undergraduate Studies in Education (USIE); the School of Recreation, Health, and Tourism (RHT); and the Graduate School of Education (GSE). The college is committed to excellence, innovation, and collaboration in research and the preparation of professionals for the highest levels of practice and service in diverse schools, organizations, and communities.

CEHD provides leadership in transforming schools, organizations, and communities through research, teaching, and collaboration. CEHD faculty members prepare scholars and practitioners through multidisciplinary programs of study that facilitate the understanding, integration, and application of knowledge. Through research activities, faculty and students expand and refine the knowledge base for teaching and learning. In response to the richness and complexity of a pluralistic society, CEHD infuses diversity into academic programs and research. The faculty develops and supports knowledgeable, caring, and reflective professionals who facilitate excellence and equity for all learners. CEHD faculty and students demonstrate their growth and development in ways meaningful to their communication and professional organizations. Innovative programs and the integration of technology provide opportunities for students to develop, examine, evaluate, and practice professional knowledge, skills, and dispositions.

**Professional Teacher Licensure**

CEHD is responsible for professional courses, special standards, and licensure recommendations for students wishing to complete requirements for licensure programs approved by the commonwealth and the National Council for the Accreditation of Teacher Education to prepare teachers, administrators, counselors, and related instructional personnel.

Initial teacher licensure at the undergraduate level in dance and music education, physical education, and secondary education English is offered through the major program’s unit (College of Visual and Performing Arts, RHT, and USIE). Initial teacher licensure at the graduate level is provided within the following master’s programs: art education (College of Visual and Performing Arts), early childhood education (UTEEM), elementary education, English as a second language, foreign language, and secondary education. The Special Education Program offers initial teacher licensure exclusively through graduate certificates that include early childhood special education, severe disabilities, visual impairment, and students with disabilities accessing the general curriculum.

For more information and the dates and times of Think You Want to Be a Teacher? information sessions, call the CEHD admissions office at 703-993-2892 or visit cehd.gmu.edu.

**Administration**

Jeff Gorrell, Dean
Martin Ford, Senior Associate Dean
Peter Barcher, Associate Dean for Research
Joan Isenberg, Associate Dean for Outreach and Program Development
Ellen Rodgers, Associate Dean for Teaching and Academic Affairs
David Wiggins, Director of the School of Recreation, Health, and Tourism
Jeannine Tate, Director of the Division of Undergraduate Studies in Education

**Faculty**

**Professors:** Anderson, Behrmann, Bemak, Brayley, Brozo, Chung, Dimitrov, Earley, Galluzzo, Goor, Haley, Kelly, King-Sears, Levy, Mastropieri, Maxwell, Naunit, Norton, Schrum, Scruggs, Shaklee, Sterling, Sturtevant, White, Williams

**Associate professors:** R. Baker, Bannan-Ritland, Banville, Bauer, Berger, Bever, Bon, Brazer, Brigham, Burns, Castle, Clark, Dabbagh, Daniels, DeMulder, Dieke, Duck, Dunklee, Dzama, Falconer, Fowler, Fox, Grant, Hicks, Kaffenberg, Kidd, Kitsantas, Kozlowski, Miller, Ndura, Osterling, Pierce, Razeghi, Reaybold, Rigsby, Rikard, P. Rodgers, Samaras, Sanchez, Schack, Sprague, Talleyrand, Thomas, Thorp, Upperman, Walker, Werner, Wiggins, Wong

**Instructors:** Anderson, Bailly, Bartlett, Casserly, Hathaway, Neuber, Norden, Parham, Rioux-Bailey, Rollins, Stribling, Zam
Professional faculty: Anderson, Berlin, Biderman, Carter, Daniels, Fahe, Ganley, George, Graff, Hall, Jang, Klein, Landeros, Levy, Little, Loomis, Lux, Miller, Ok, Shahrokhi, Sharp, Steele, Stockton, Stull, Talbert, Waddell, Wiley

Course Work
CEHD offers all course work designated ATEP, EDAE, EDAL, EDCD, EDCI, EDEP, EDIT, EDLE, EDRD, EDRS, EDSE, EDUC, EDUT, EFHP, HEAL, IETT, PHED, PRLS, SPMT, and TOUR in the Course Description chapter of this catalog.

Academic Programs

School of Recreation, Health, and Tourism (RHT)

Undergraduate Minors
• Exercise Science (EXS)
• Health Promotion (HPR)
• Parks, Recreation, and Leisure Studies (PRLS)
• Sports Management (SPMT)

Undergraduate Certificate Program
• Outdoor Adventure

Undergraduate Degree Programs
• Athletic Training, BS
• Health, Fitness, and Recreation Resources, BS
  Exercise Science
  Health Promotion
  Parks and Outdoor Recreation
  Sport Management
  Therapeutic Recreation
  Tourism and Events Management
• Physical Education, BSEd
• Tourism and Events Management, BS (pending SCHEV approval)

• Secondary Education (6–12) Physics
School of Recreation, Health, and Tourism

Phone: 703-993-2060
Web: rht.gmu.edu

The School of Recreation, Health, and Tourism (RHT) prepares students for careers in health and physical education, athletic training, parks and outdoor recreation, therapeutic recreation, exercise science, health promotion, tourism, and events management, and sports management. The BS in athletic training prepares students for careers in athletic training and is accredited by the Commission on the Accreditation of Allied Health Education Programs. The BSEd in physical education prepares students for a teaching career (K–12) in public and private schools. The BS in health, fitness, and recreation resources prepares students for supervisory and management careers in private and public parks and recreation systems (clinical and community), health promotion agencies, nonprofit and for-profit sport organizations, and tourism and events management sites. The parks and outdoor recreation and therapeutic recreation concentrations are accredited by the National Recreation and Parks Association. The MS in exercise science, fitness, and health promotion prepares professionals for advanced work in the field. The MAIS concentration in recreation resources management is designed for practicing professionals and students seeking advanced careers in recreation and natural resources management.

For more information and the dates and time of RHT Orientation Sessions, call RHT’s office at 703-993-2098 or visit rht.gmu.edu.

Faculty

Professors: Anderson, Brayley, Nauright, D. Wiggins
Associate professors: Baker, Banville, Bever, Daniels, Dieke, Kozlowski, Miller, Rikard, E. Rodgers, P. Rodgers, Schack, Walker, B. Wiggins
Assistant professors: Allen, Ambegaonkar, Caswell, Harmon, Lee, Park, Shelby, Winchester
Instructors: Norden, Parham
Professional faculty: Lux, Waddell

Course Work

RHT offers course work designated ATEP, EFHP, HEAL, PHED, PRLS, SPMT, and TOUR in the Course Descriptions chapter of this catalog. Additional courses are offered for elective credit to George Mason University students. These courses are included under PHED and PRLS.

UNDERGRADUATE MINORS

Students not obtaining a BS in health, fitness, and recreation resources (HFRR) may complement their degree with a minor chosen from five different areas.

Minor in Exercise Science

(16 credits, 8 credits unique to the minor)

UNDERGRADUATE CERTIFICATE PROGRAMS
Certificate in Outdoor Adventure

This 24-credit program provides students with specialized skills unique to a variety of outdoor adventure activities, such as backpacking, rock climbing, canoeing, kayaking, and challenge-course facilitation. Course work focuses on the acquisition of technical skills and application of theory-to-experiential learning in an outdoor adventure curriculum. Students completing the program will be certified as Wilderness First Responders and Leave-No-Trace Trainers and will be fully prepared to work as challenge-course facilitators at outdoor education and adventure education organizations. This initiative combines the resources and services of RHT and Hemlock Overlook Center for Experiential Education.

Course Work Credits
Required Core Courses (15 credits)
PRLS 110 Exploring Outdoor Adventure ..........................2
PRLS 200 Wilderness First Responder ........................2
PRLS 210 Introduction to Recreation and Leisure ..........3
PRLS 214 Field Study in Natural History .....................3
PRLS 220 Experiential Education Theory and Application ....3
PRLS 221 Challenge Course Facilitator Field Work ......2
PRLS 316 Outdoor Education and Leadership ..........3

Elective Courses (9 credits)
Choose 9 credits from the following:
PRLS 115 Introduction to Fly Fishing ............................1
PRLS 117 Introduction to Rock Climbing .......................2
PRLS 120 Introduction to Backpacking .......................2
PRLS 170 Introduction to Whitewater Kayaking ..........1
PRLS 173 Basic Coastal Kayaking ...............................2
PRLS 180 Whitewater Canoeing ................................2
PRLS 181 Whitewater Canoeing II ................................2
PRLS 190 Downhill and Cross-Country Skiing ............1
PRLS 250 Wilderness Travel and Sustainability Leadership ...........................................2
PRLS 480 Special Topics ...........................................3

Complementary Certificate Programs

Students also may complete a complementary graduate certificate outside RHT in the following areas:

Environmental management (27 credits) See the Environmental Science and Policy section of the College of Science chapter. (SC-CERG-EVMG)

Note: Students interested in the environmental management certificate should take BIOL 213 and either BIOL 303 or BIOL 304 instead of BIOL 103 and 104.

Gerontology (24 credits) See the College of Health and Human Services chapter. (HH-CERG-GERO)

Note: Students interested in the gerontology certificate should take BIOL 124 and BIOL 125.

UNDERGRADUATE DEGREE PROGRAMS

Athletic Training, BS

This program provides educational and clinical experiences concerning the management of injuries and health problems associated with physical activity. The goal is to equip students with the knowledge and skills that must be mastered to successfully challenge the Board of Certification (BOC®) Examination and practice as an entry-level certified athletic trainer.

Application Process

Freshmen Applications

Admission to George Mason University is competitive, and successful candidates generally have a B+ average or higher in a challenging college preparatory curriculum. All students accepted to George Mason University and declaring athletic training as a major are admitted into the preprofessional phase...
of the program (typically freshmen). Freshmen are bound to university admission criteria as stated in the University Catalog. To progress into the professional phase of the program, students must earn a minimum grade of C in all within-major courses and continuously maintain a cumulative minimum within-major GPA of 2.50 or greater.

Transfer Student Applications
Application for admission as a transfer student into the ATEP is competitive. Transfer applicants are evaluated based on satisfactory completion of standards identical to all other students enrolled in the ATEP. Students transferring from another institution must produce documentation that demonstrates successful completion of all preprofessional course work and related clinical experiences. Students must provide documentation of completion of all prerequisite course work with a letter grade of C or better and a cumulative within-major GPA of 2.50 or greater on a 4.00 scale. Additional documentation includes transcripts, course syllabi, letter from the ATEP director of previous institution certifying satisfactory completion of all clinical experiences, completed proficiency assessments signed and dated by an approved clinical instructor attained at previous institution, and current emergency cardiac care certification. Students unable to provide this documentation will not be admitted into the professional phase of the ATEP.

Degree Requirements
The degree requires a minimum of 120 credits. The Athletic Training Education Program (ATEP) is divided into preprofessional and professional phases. Students begin the preprofessional phase on admission to Mason by enrolling in prerequisite courses, including BIOL 124 and 125; HEAL 110, 205, and 330; and ATEP 228 and 229.

On successful completion of all preprofessional course work with a grade of C or better and a minimum cumulative GPA of 2.50, students may advance into the professional phase of the program and enroll in didactic and clinical education courses, along with other professional courses. The professional phase consists of three levels. In Level I, students enroll in their first clinical education course and begin the first of five semester-long clinical experiences. Typically, athletic training didactic courses are paired with a clinical education course. Levels I through III of the professional phase require satisfactory completion of prerequisites, including maintenance of a minimum cumulative within-major GPA of 2.50, successful completion of prerequisite courses, concurrent enrollment in didactic and clinical education courses, and maintenance of current emergency cardiac care (ECC) certification.

*Denotes clinical education course requiring clinical experience component.

During Level III, students complete all courses, including ATEP 441 Practicum. This course is a capstone of the program, as well as a synthesis requirement of Mason’s general education program. ATEP 441 is offered following completion of the professional courses in the major; thus, ATEP 441 is offered during the spring semester of the students’ graduating year.

The professional phase of the ATEP involves clinical education. The five clinical education courses are ATEP 315, 325, 357, 413, and 441. Students may enroll in only one clinical course per semester. Therefore, students can expect to enroll in a clinical education course for five semesters to complete the degree. Each clinical course consists of a laboratory component and a clinical field experience. Students will be assigned to a George Mason University ATEP-approved clinical instructor to satisfactorily complete clinical experience requirements. Students will develop a schedule with the clinical instructor requiring approximately 10 to 20 hours per week throughout the semester at the clinical setting. Clinical experience assignments may be located in athletic training settings, such as secondary schools, colleges, and universities; professional sports programs; sports medicine and other medical clinics; industry; and military training programs. Students will be evaluated on the mastery of educational
competencies and clinical proficiencies in athletic training. Evaluation will occur in formal academic courses and clinical field experiences. Students should meet with their academic advisor every semester before scheduling courses.

**Writing-Intensive Requirement**

The university’s writing-intensive requirement is satisfied by the successful completion of PRLS 450.

**Special Requirements**

Fees and expenses specific to the ATEP are as follows: laboratory supplies and equipment, clinical attire, clinical supplies, and clinical education manuals. Preprofessional phase students enrolling in ATEP 229 will be assessed a laboratory fee $110. Preprofessional phase students will be assessed a laboratory fee of $100 for each clinical education course. Payment is due at the first meeting of each course.

After admission to the preprofessional phase, students must submit a technical standards certification statement indicating that they have read, understand, and can meet the technical standards for athletic training students, either with or without accommodation. These standards outline the essential functional tasks that students must be able to perform to enroll in and complete the program. Students requiring special accommodations are encouraged to contact the Office of Disability Services.

Athletic training students are required to obtain a health examination and immunizations before entering the professional phase of the program. Students must have evidence of completion of the three hepatitis B immunizations and provide proof of tuberculosis screening in accordance with current U.S. Public Health Service recommendations. Students choosing not to complete hepatitis B immunizations will be required to sign a declination waiver. All professional phase students must complete annual blood-borne pathogens training and may be required to submit to a criminal background check. All students must have emergency cardiac care (CPR, AED) certifications before entering their first clinical experience and maintain these certifications through the remainder of the ATEP. Examples of courses that provide the above certifications are Professional Rescuer + AED by the American Red Cross or Basic Life Support for the Healthcare Provider CPR + AED by the American Heart Association. Other providers are those adhering to the standards of the International Guidelines for Cardiopulmonary Resuscitation and Emergency Cardiac Care.

**Health, Fitness, and Recreation Resources, BS**

**Writing-Intensive Requirement**

The university’s writing-intensive requirement is satisfied by the successful completion of PRLS 450.

**Internship Application**

The HFRR internship is a 12-credit course taken toward the end of a student’s academic program. Students must have earned 90 credit hours and met the specific prerequisites for their concentration to be eligible for the internship (see HEAL 490, PRLS 490, SPMT 490, and TOUR 490 prerequisites). The internship is designed to be a synthesis experience for each student in their specific concentration area. The initial phase of the internship process begins with an internship in-service run by the internship coordinator. During this stage, the student will develop learning goals and consult with faculty on viable internship sites. Once the internship site has been selected the student must complete 400 hours (480 for therapeutic recreation) of an applied experience in their field of study. Throughout the internship, the student will be monitored by a site supervisor, as well as a university supervisor, to facilitate a meaningful experience. All of the specific requirements for this course can be reviewed in the Internship Manual.
Degree Requirements

**Exercise Science Concentration (EXS)**
This concentration emphasizes promotion of healthy lifestyles outside school settings. This degree prepares students for supervisory and managerial careers in private and public fitness agencies and clinical and public safety settings. Students complete supervised internships in professional settings; a minor is available.

**Parks and Outdoor Recreation Concentration (POR)**
This concentration explores the contribution of recreation and parks to public well-being and quality of life. The curriculum includes courses in natural resources management, outdoor recreation programming, and environmental education. The program is accredited by the National Recreation and Park Association. Graduates are employed in national, state, and local recreation and park agencies, nonprofit organizations, and private and commercial operations. Students complete supervised internships in professional settings; a minor is available.

**Sport Management Concentration (SPMT)**

This concentration enhances the professional development of liberal arts-educated students, thereby preparing them to assume entry-level managerial positions in the $300 billion sport industry, including private enterprises, government or public employment sectors, nonprofit or voluntary agencies, and commercial sport ventures. Preparation in sport marketing, finance, ethics, law, operations, planning, and program leadership fosters the skills that enhance students’ acquisition and advancement in sport management careers. An integral part of the program is the opportunity to complete two field experiences in sport organizations. A minor is available.

**Therapeutic Recreation Concentration (TR)**

This concentration teaches students how to use activities as therapeutic tools toward a renewed quality of life for people with disabilities across the lifespan. Completion of the foundation, law, issues, and assessment courses, as well as an internship supervised by a certified therapeutic recreation specialist, prepares graduating seniors to sit for the national exam sponsored by the National Council for Therapeutic Recreation Certification (ntcrc.org). The program is accredited by the National Recreation and Park Association. Graduates find employment in local, state, and federal recreation settings; senior and adult health care; nonprofit organizations; and educational and clinical institutions.

▲ Tourism and Events Management Concentration (TEM)

This concentration prepares students to enter a diverse profession in the world’s third-largest industry. Built on the curricula cornerstones of resort management, environmental tourism, event management, and cultural and heritage tourism, courses equip students with knowledge, skills, and experience in managing the tourism experience for the benefit of the traveler, host, and supporting industry. Graduates are employed in commercial, private, and public agencies, and in a wide variety of jobs in many geographic or business settings. A minor is available with a work-experience option.

■ Physical Education, BSEd BSED-PHED

The physical education degree program is accredited by the National Council for Accreditation of Teacher Education. Graduates of this degree earn full teacher licensure for grades PK–12 in health and physical education from the Virginia Department of Education. The degree requires a minimum of 120 credits, with the final semester dedicated to student teaching.

Student Teaching Internship

To enroll in student teaching, physical education majors must have a minimum 2.50 GPA in the last 60 credits of course work and submit copies of official passing scores for the VCLarts and PRAXIS II exams. The application must be completed one full semester before taking PHED 415 Student Teaching in Physical Education. Application deadlines are listed below and forms are located at rht.gmu.edu/phed/student_teaching.

Student Teaching Internship Application Deadlines

Fall Semester—February 1
Spring Semester—September 1

Admission

Four-year students: Students entering as freshmen with an interest in majoring in physical education will initially be accepted with BPRE (pre-PHED) status. Students must successfully complete a minimum of 45 credits and attain a cumulative GPA of 2.50 to apply to the BSED in Physical Education Program. In addition, students must submit passing Praxis I scores and have earned passing grades in BIOL 124, BIOL 125, PHED 201, and PHED 202.

Degree-seeking transfer students: Transfer students can apply for BSED status by having (1) a minimum of 45 credits from their previous institution with a cumulative GPA of 2.50 or by completing 12 credits at Mason with a minimum of a 2.50 GPA; (2) submitting passing scores for PRAXIS I or its approved substitutes; and (3) have passed BIOL 124 and 125, and PHED 201 and 202 (only a C grade or higher is accepted for BIOL 141 and 142 if transferred from a VCCS institution).

Writing-Intensive Requirement

The university’s writing-intensive requirement is satisfied by the successful completion of PHED 365.

**Tourism and Events Management, BS (pending SCHEV approval)**

This 120-credit degree program prepares students to enter a diverse profession in the world’s third-largest industry. Built on the curricula cornerstones of resort management, environmental tourism, events management, and cultural and heritage tourism, courses equip students with knowledge, skills, and experience in managing the tourism experience for the benefit of the traveler, host, and supporting industry. Graduates are employed in commercial, private, and public agencies, and in a wide variety of jobs and many geographic or business settings. A minor is available. This program is also offered on the GMU-RAK Campus.

**GRADUATE PROGRAMS**

**Admission Requirements**

In addition to fulfilling graduate admission requirements, applicants must submit three letters of recommendation,
transcripts of all college course work, and GRE or MAT scores. Applicants should also have completed undergraduate course work in human anatomy, physiology, nutrition, exercise physiology, and kinesiology. Applicants must provide a written goals statement from 500 to 1,000 words explaining how the program relates to their educational and career plans. Those who do not satisfy the above requirements may be offered provisional or nondegree status in accordance with the general regulations of the Graduate Council. Admission decisions are made whenever applicant files are complete. Following their admission, students may enroll in any term, although full enrollment is recommended given the sequence of courses.

Exercise, Fitness, and Health Promotion, MS

The master of science in exercise, fitness, and health promotion focuses on the role of physical activity in the promotion of health, fitness, and quality of life. Completion of this degree may lead to the pursuit of further academic study (doctoral programs) or preparation of professionals equipped to more adequately serve their communities. Students may select to pursue a thesis or nonthesis option for completion of this degree.

Electives .................................................................................................................. 6
EFHP 799 Thesis .................................................................................................. 1–6
or Nonthesis Option
Electives .................................................................................................................. 12

Written comprehensive examination

*Students must have an advisor to supervise thesis work and chair the three-member thesis committee. Committee members are appointed by the EFHP graduate coordinator. The advisor must be a member of the exercise, fitness, and health promotion graduate faculty; one committee member may be selected from faculty outside the program. Students may not register for thesis credit until a proposal has been approved by the student’s thesis committee and the EFHP graduate coordinator.

Additional RHT Courses

Physical Activity and Sports Courses

Our courses in physical activity and sports provide a broad range of opportunities that promote the health and wellness of students, faculty, and staff. Taught by experts with a wealth of experience and commitment to sharing their knowledge and skills, the courses include more traditional individual and dual sports, self-defense and martial arts, and recreation activities concerned with wilderness and outdoor pursuits. Open to students in any major, these courses are designed to foster educational growth, encourage leisure interests, and promote lifetime fitness for the entire Mason community.

Division of Undergraduate Studies in Education

Phone: 703-993-2078
Web: usie.gmu.edu

The Division of Undergraduate Studies in Education (USIE) is the unit within CEHD that supports and develops initiatives for undergraduate Mason students interested in the field of
education. Examples include undergraduate minors, certificates, teacher endorsement and licensure processes, and education courses of interest to the undergraduate population. USIE also has strong ties with GSE; RHT; the College of Humanities and Social Sciences, including New Century College; the College of Science; and the College of Visual and Performing Arts. USIE encourages faculty initiatives throughout Mason in developing curriculum that is integrated with the education professions.

UNDERGRADUATE MINORS

Minor in Education Studies
This 18-credit minor is designed for students with a strong interest in exploring the field of education to develop a conceptual and situated understanding of schools and schooling. Eight credits of course work must be unique to the minor. The minor in education studies is separate from teacher licensure programs in CEHD.

Course Work Credits
EDUC 300 Introduction to Teaching ................................. 3
SOCI 382 Education in Contemporary Society ................. 3

Electives: Choose four courses from the following:
EDIT 413 Technology, Society, and Culture of Learning .................................................. 3
EDLE 412 Schools and the Law ........................................... 3
EDLE 420 Organization and Management of Schools .... 3
EDUC 303 Politics of American Education ...................... 3
NCLC 312 Images and Experiences of Childhood: Social Construct, Literature, and Film ....... 3

Minor in Secondary Education English
This 24-credit minor in secondary education English provides undergraduates with all the course work needed to fulfill the Virginia Department of Education’s professional education requirements to teach English in grades 6 through 12. Eight credits of course work must be unique to the minor. For information, call the USIE advisor at 703-993-2078 or visit the web at usie.gmu.edu.

Course Work Credits
EDCI 370 Young Adult Literature in Multicultural Settings .................................................. 3

Collaborative Undergraduate Degree Licensure Programs
Chemistry Education Concentration
The bachelor of science in chemistry with a concentration in chemistry education allows students to obtain licensure to teach chemistry in Virginia public school systems. Requirements are listed in the College of Science chapter under the Department of Chemistry and Biochemistry. For more information, call the Department of Chemistry and Biochemistry at 703-993-1082.
Dance Licensure (PK–12)
To be considered for licensure in dance education, a student must successfully complete the requirements for a BA or BFA in dance. Additional requirements are listed in the College of Visual and Performing Arts chapter under the Department of Dance, Certification to Teach. For more information, call 703-993-1114.

Music Education Concentration (PK–12)
The bachelor of music with a concentration in music education allows students to obtain certification to teach in Virginia public school systems. Students may follow an instrumental or choral/general music emphasis in curriculum. Requirements are listed in the College of Visual and Performing Arts chapter under the Department of Music, Bachelor of Music, Concentration in Music Education. For more information, call the Department of Music at 703-993-3778.

Physics Education Concentration
The bachelor of science in physics with a concentration in physics education allows students to obtain licensure to teach physics in Virginia public school systems. Requirements are listed in the College of Science chapter under the Department of Physics and Astronomy. For more information, call the Physics Department at 703-993-1280.

Graduate School of Education
Phone: 703-993-2892
Web: cehd.gmu.edu
The Graduate School of Education (GSE) offers doctoral and master degrees, as well as teacher licensure and certificate programs.

Faculty
Associate professors: Bannan-Ritland, Bauer, Berger, Bon, Brazer, Brigham, Burns, Castle, Clark, Dabbagh, DeMulder, Duck, Dunklee, Dzama, Falconer, Fowler, Fox, Grant, Hicks, Kaffenberger, Kidd, Kitsantas, Ndura, Osterling, Pierce, Razeghi, Reybold, Samaras, Sanchez, Sprague, Talleyrand, Thomas, Thorp, Uperman, Werner, Wong
Instructors: Daniels, Ganley, George, Graff, Hanfman, Hathaway, Ingram, Jang, Neuber, Rollins, Rioux-Bailey, Zam
Administrative faculty: Barchek, Ford, Gorrell, Isenberg, McCreadie, Parker, E. Rodgers, Tate

Counseling and Development, MEd
The 45-52-credit master’s program offers two separate concentrations. The first option is community agency and the second is school counseling. It emphasizes the integration of theory and practice, and culminates with an internship in an appropriate setting. Those with a master’s degree in education or a related profession who are seeking licensure either as a school counselor or professional counselor may apply to the post-master’s counseling licensure graduate certificate program. For more information, see the Graduate Certificate Programs section of this chapter.

Curriculum and Instruction, MEd
The master’s degree is offered to students preparing for initial teacher licensure, advanced teacher education, and ancillary educational programs.

Advanced Studies in Teaching and Learning (ASTL) Concentrations
The ASTL concentrations are for teachers and other educators with one or more years of teaching or education-related experience who want to continue to grow professionally. The program offers advanced study in a specific concentration area, including Virginia’s Standards of Learning content.
areas, cohort classes, an innovative schedule, and the use of technology. The courses, aligned with the National Board for Professional Teaching Standards, help teachers think and practice as board-certified teachers. The program develops teacher-leaders who practice reflection through action research, problem-based learning, and self-inquiry, and teacher expertise in a concentration that will identify the teacher as a potential leader in that area.

The program provides two options to experienced teachers and other educators. Educators with or without a master’s degree may apply for the full master’s degree program, which includes core and emphases, or an 18- to 21-credit graduate certificate program or advanced study in a particular area.

▲ Early Childhood Education–UTEEM Concentration (Licensure) (EDUT)
This 63-credit concentration prepares students to apply for triple teacher licensure. It provides professionals with the skills to work with culturally, linguistically, and ability-diverse young children and their families in schools and diverse community settings. Participation in the program requires a full-time, primarily daytime commitment for one summer and two academic years of integrated study and ongoing practice in four different internships. The program is designed to provide professionals with the specialized knowledge, skills, and dispositions needed to meet the developmental and educational needs of young children.

Education & Human Development

These 30-36-credit concentrations are designed to offer professionals and students the opportunity to apply principles
of learning, cognition, and motivation to vital problems in the area of education; develop a solid understanding of research, assessment, and evaluation methodologies; and develop an analytical and scholarly approach to critically assessing theoretical perspectives, research, and practice within and across content domains. By participating in a supportive and collegial environment with faculty from numerous educational disciplines and expertise, students are expected to develop the skills to meet the needs of diverse populations, and design and implement effective educational programs appropriate for a broad range of cultural contexts.

**Optional Supervised Project or Thesis 3–6 credits**

Students in the following educational psychology concentrations may choose to work on a supervised research project or a master’s thesis as part of completing the MEd in curriculum and instruction. Students who select this option will conduct research in an area of interest.

*Choose from the following:*

- EDUC 598 Directed Reading, Research, and Individual Project .................................................. 3
- EDUC 599 Thesis ..................................................... 3

▲ **Concentration in Learning, Cognition, and Motivation (EDPL)**

▲ **Concentration in Teacher Preparation (EDPT)**

The teacher preparation concentration is for individuals completing the requirements to become licensed to teach in a public school classroom and requires admission to and concurrent enrollment in one of the following teacher licensure certificate programs, administered by other programs in CEHD: secondary education, special education, foreign language, and English as a second language (ESL). For the teacher preparation concentration, students apply three courses (i.e., 9 credits) from within one teacher licensure certificate program toward their MS degree in educational psychology with the expectation that they will complete the teacher certification program.

Three approved teacher licensure certificate program courses | 9

### Elementary Education Concentration (ELED)

The 39-credit elementary education concentration and initial licensure component provides professionals with the specialized knowledge, skills, and dispositions needed to meet the educational needs of students attending today’s elementary schools. Specific content and endorsement courses are required. Two programs (one- or two-semester internships) provide flexibility for all students. The two-semester internship program (Professional Development Schools (PDS) Program) begins each fall semester; the one-semester internship program Partnership Schools (PS) Program begins each summer semester.

**Performance-Based Assessment**

All students are required to submit and successfully complete a series of performance-based assessments. These assessments include content knowledge, pedagogical skills, and dispositions.

▲ **English as a Second Language (PK–12)**

Concentration (CISL)

This 39-credit ESL/ESOL PK–12 concentration provides initial state teacher licensure (endorsement) for candidates wanting to teach in Virginia public schools, grades PK to 12. This program provides teachers with the specialized knowledge, skills, and professional dispositions required to meet the educational needs of English language learners (ELLs). Candidates whose first language is not English may be required to pass an oral and written proficiency assessment in English to meet state licensing requirements and national professional standards. This program has a licensure component of 27 credits and requires an additional 12 credits for completion of the MEd.

**Prerequisite for admission:** 6 credits of a modern foreign language (graduate or undergraduate, do not count toward the MEd)

**Field experience:** Field experiences involving observations and analyses in public schools are required throughout the program; a maximum of 15 clock hours per course or 30 clock hours per term. Arrangements can be made with each course instructor.

**Licensure Requirements (27 credits)**

**Internship Options**

A 6-credit, 15-week daytime internship (EDCI 790) is required for completion of the state-approved licensure program. Both elementary and middle school or secondary school placements...
are required. Two options are available to meet the needs of most individuals:

- **Placement internship**: One semester, daytime internship in the classroom of a cooperating teacher in the public schools. Intern assumes coteaching and independent teaching responsibilities.

- **On-the-job internship**: Available only to students who are employed as full-time, provisionally licensed teachers* and are teaching ESL/ESOL in an accredited school. In addition to a fall or spring experience, this option includes a summer or other appropriate experience.

*Provisionally licensed teachers: In lieu of an internship, provisionally licensed teachers may use their full-time teaching to satisfy the internship requirements; however, the 39-credit master’s degree requires that candidates substitute 6 credits in approved courses for the internship.

▲ **Foreign Language or Latin (PK–12) Concentration (FLL)**

This 39-credit foreign language or Latin concentration with an initial licensure component prepares professionals with the knowledge, skills, and professional dispositions needed to teach specific foreign languages, including Spanish, German, French, Russian, Japanese, Chinese, Arabic, or Latin, to students in grades PK through 12. The program has a licensure component of 27 credits and requires an additional 12 credits for completion of the MEd.

**Prerequisite for admission**: A language proficiency test is required.

**Field experience**: Field experiences involving observations and analyses in public schools are required throughout the program; a maximum of 15 clock hours per course or 30 clock hours per term. Arrangements can be made with each course instructor.

**Internship Options**

A 6-credit, 15-week daytime internship (EDCI 790) is required for completion of the state-approved licensure program. Both elementary and middle school or secondary school placements are required. Two options are available to meet the needs of most individuals:

- **Placement internship**: One-semester daytime internship in the classroom of a cooperating teacher. Intern assumes coteaching and independent teaching responsibilities.

- **On-the-job internship**: Available only to students who are employed as full-time, provisionally licensed teachers and are teaching in their endorsement area in an accredited school. In addition to a fall or spring experience, this option includes a summer or other appropriate experience.

*Provisionally licensed teachers: In lieu of an internship, provisionally licensed teachers may use their full-time teaching to satisfy the experience requirements; however, the 39-credit master’s degree requires that candidates substitute 6 credits in approved courses for the internship.

### Instructional Technology Concentrations

Four concentrations with an instructional technology focus provide professionals the specialized knowledge and skills needed to apply a wide range of computer and telecommunications technologies in achieving educational goals within school, community, and corporate or public settings. The concentrations combine current theoretical foundations of technology development and integration with practical, hands-on experiences in using state-of-practice and state-of-the-art technologies. These concentrations serve the various needs and interests of specific types of instructional technology clients: instructional design and development, integration of technology in schools, technology innovations in education, and assistive and special education technology.

### International Education FAST TRAIN ESOL (PK–12) Concentration (FTES)

This 30-credit concentration is specifically designed for teachers and educators who are working abroad or plan on teaching overseas, or individuals living outside the Washington, D.C., area who want a license and master’s degree in ESOL. This program has a licensure component of 21 credits and requires an additional 9 credits for completion of the MEd. Course work includes integrated fieldwork in schools and all requirements for a Virginia ESOL license PK–12. The convenient schedule enables participants to complete the program through on-campus study during two summers and online study during the academic year. On successful completion of course work and passing scores on the required exams, participants are eligible to receive a statement of eligibility from the state. After completing an internship requirement overseas (either one term of student teaching or one year of full-time teaching), candidates are eligible to apply for the ESOL PK–12 Virginia license.

**Licensure Requirements (21 credits)**

### International Education FAST TRAIN (Elementary) PK–6 Concentration (FTEL)

This 33-credit concentration is an alternative teacher licensure program that prepares educators for international teaching assignments.

This program has a licensure component of 18 credits and requires an additional 15 credits for completion of the MEd. The course work may be completed in the part-time evening program or during the summer completing five weeks of intensive study course work. All course work requires 20 hours of integrated fieldwork observation and practice. On successful completion of course work and passing scores on the required exams, participants are eligible to receive a statement of eligibility from the state. After completing an
internship requirement overseas (either one term of student teaching or one year of full-time teaching), candidates are eligible to apply for the elementary PK–6 Virginia license.

**Note:** These courses are required to add the ESOL endorsement in Virginia. Students should check with the state where they currently hold a license to see whether these courses will meet their requirements. No additional internship is required for licensed teachers.

**Multilingual and Multicultural Education Concentration (CIMM)**

This 30-credit concentration prepares professionals to work with a diverse population of individuals. It provides courses for licensed teachers and the required courses for an add-on endorsement in English as a second language (ESL) PK–12, also known as English for speakers of other languages (ESOL). The program is appropriate for individuals who are not licensed and wish to complete a master’s degree. Six credits of a foreign language (undergraduate or graduate level) are required but do not count toward the master’s degree.

**Secondary Education (6–12) Concentrations**

The seven 33-credit secondary education concentrations with a licensure component are designed to meet the needs of individuals who wish to be licensed or need to satisfy the requirements of a provisional license to teach at the secondary level. Specific endorsement areas are biology, chemistry, Earth science, English, history and social science, mathematics, and physics. Add-on endorsements are available in speech communications, English as a second language, and algebra I.

The Career Switcher Program is an alternative licensure route that prepares experienced professionals for licensure as secondary school teachers with endorsements in biology, chemistry, Earth science, English, history and social science, mathematics, or physics. Successful applicants must have at least five years of work experience and passing scores on the Praxis I and II, and VCLA exams. In addition, they must have completed all required endorsement courses. The program consists of six months of course work and fieldwork, followed by a closely mentored year of full-time paid classroom teaching.

**Field Experience**

Field experiences in public schools will be required throughout the program; a maximum of 15 clock hours per course or 30 clock hours per term. Arrangements will be made at the beginning of each term.

**Concentration in Secondary Education Biology (SECB)**

**Licensure Requirements (21 credits)**

**Internship Options**

A 6-credit 15-week daytime internship (EDCI 790) is required for completion of the state-approved licensure program. Three options are available to meet the needs of most individuals:

- Professional Development School (PDS) internship: a one-term daytime internship as a PDS intern in a school identified by secondary faculty members
- Student teaching internship: a one-term daytime internship in the classroom of a cooperating teacher. Intern assumes coteaching and independent teaching responsibilities.

• On-the-job internship: Available only to students who are employed as full-time provisionally licensed teachers and teaching in their endorsement area in an accredited middle or secondary school and want to complete a master’s degree. In lieu of an internship, provisionally licensed teachers may choose to use their full-time teaching to satisfy the experience requirement for a full license; however, the 33-credit master’s degree requires that 6 credits of approved coursework be substituted for the internship.

### Education Leadership, MEd MED-EDLE

This master’s program with a licensure component prepares candidates for leadership and management positions in a variety of educational settings. The program emphasizes an understanding of the complexities of change in schools, communities, and organizations. Participants are expected to develop and demonstrate the knowledge, skills, and dispositions necessary to create and maintain learning environments that value diversity, continual knowledge acquisition, instructional leadership, innovative and ethical decision making, reflective practice, and successful achievement of all school-aged youth. Programs are also available in the mathematics or science education leadership concentration for those who desire to be specialists in the teaching of mathematics (K–8) or science (K–12).

*Internship experiences are required in a variety of administrative settings with the guidance of professionals on site and at Mason. The internship that is integral to the Education Leadership Program provides an opportunity to synthesize and apply the knowledge and practice the skills identified in the Educational Leadership Constituency Consortium standards through substantial, sustained work in educational settings.

### Licensure Requirements

Participants who are admitted into the program who already have a master’s degree and three years of teaching may complete only the licensure course work for the administration and supervision PK–12 license. The licensure course work is the first 24 credits of the master’s degree program and must be taken in the sequence shown above.

### Mathematics Education Leadership (K–8) Concentration (EDML)

The 33-credit concentration in mathematics education leadership prepares individuals for master teacher, lead teacher, or schoolwide leadership positions in elementary or middle school mathematics. Course work includes study or experiences in education leadership, mathematics teaching and learning, instructional technology, and curriculum development. Program participants study and use research that has significant positive effects on professional development and teaching and learning mathematics. Program experiences prepare students to select, develop, and implement school-based curricula and teaching and learning materials, as well as in-service and professional development programs for teachers. The internship is an individual experience designed and developed in consultation with a faculty advisor or mentor.

### Mathematics Specialist Leader (K–8) Concentration (MSLR)

The 33-credit math specialist leader concentration includes the required course work for state licensure as a K–8 mathematics specialist. Students study mathematics content and mathematics pedagogy in the program. Students who apply for math specialist licensure must have three years of successful teaching experience and a master’s degree.

### Science Education Leadership (PK–12) Concentration (EDSL)

This 30-credit concentration in science education leadership is a PK–12 program that focuses on education leadership and science teaching and learning. It includes the required course work for the administration and supervision PK–12 license in Virginia. Students study the changing nature of science, science teaching, assessment, curriculum, technology, safety, and meeting the diverse needs of learners. Students also develop skills in science teaching and learning, data-driven decision making, systematic and continual improvement, and leading dynamic organizations. Internship experiences include working with a practicing scientist in a research setting and

EDSE 791 Midpoint Portfolio .......................... 1
EDSE 792 Final Portfolio .......................... 1
Electives from EDSE courses .......................... 13

Notable courses include:
- EDSE 517 Computer Applications for Special Populations
- EDSE 590 Research in Special Education
- EDSE 662 Consultation and Collaboration
- EDSE 782 Comprehensive Topics in Special Education
- EDSE 791 Midpoint Portfolio
- EDSE 792 Final Portfolio

Electives from EDSE courses

Certificate in ASTL: Alternative Education

This 18-credit certificate is designed for professionals who are interested in or are working in alternative education settings. It offers the knowledge and skills necessary to work effectively with at-risk students, their families, and involved agencies.

Course Work Credits
EDAE 600 Alternative Education for At-Risk Youth .......... 1
EDAE 601 Curriculum and Methods in Alternative Education .......... 3
EDAE 602 Preparing Students for Employment and Living Independently .......... 2
EDSE 551 Classroom Management: Theory and Practice .......... 3
EDAE 603 Communication and Management Strategies for Alternative Education .......... 3
EDAE 604 Multidisciplinary and Interagency Collaboration .......... 3
Elective, with advisor approval .......... 3

Certificate in ASTL: Art Education

The 18-credit art education certificate is designed for art teachers with current licensure in art PK–12. It consists of six required courses that address contemporary professional development content areas in art education.

Course Work Credits
AVT 605 Issues and Research in Art Education .......... 3
AVT 694 Advanced Studies in Teaching Critical Response to Art, PK–12 .......... 3
AVT 615 Technology for Art Teachers .......... 3
AVT 697 Advanced Strategies and Curricular Innovations in the Visual Arts .......... 2
EDEP 601 Creativity and Cognition in the Arts and Media .......... 3
Note: AVT 615 is considered a 3-credit studio course.

Qualified students who test out of this course will elect two of the following 4-credit studio courses for a total of 8 studio credits.

Choose one studio course from the following:
- AVT 667 Two-Dimensional Art Making: Form, Theme, and Context
- AVT 668 Three-Dimensional Art Making across Cultures
- AVT 669 Four-Dimensional Art Making: Technology and New Media
### Certificate in ASTL: Early Childhood Education

This 18-credit certificate is designed for early childhood professionals who work in various roles with young children and their families. It focuses on the practice and study of early childhood education and is based on the early childhood generalist standards of the National Board for Professional Teaching Standards.

EDCI 627 Advanced Practicum and Research in Gifted Education*..................................... 3

*Only 21 credits required for those not currently teaching.

Certificate in ASTL: History  CERG-AHIS
This 18-credit certificate is designed for PK–12 classroom teachers who wish to gain depth in history content to become leaders in their discipline.

Course Work
GEOG 520 Geography for Teachers .............................................. 3
HIST 510 Approaches to Modern World History .......................................................... 3
HIST 601 Themes in U.S. History I ........................................................................... 3
HIST 602 Themes in U.S. History II ........................................................................... 3
HIST 508 Themes in World History ............................................................................. 3
HIST 605 Themes in European History ......................................................................... 3

Courses may be substituted with advisor-approved history electives.

Certificate in ASTL: Instructional Technology  CERG-AINT
This 18-credit certificate is designed for PK–12 classroom teachers who wish to gain depth in instructional technology content to become leaders in their discipline.

Course Work
EDIT 611 Innovation in Distance Learning ................................................................. 3
EDIT 725 Technology and Diversity ............................................................................... 3
EDIT 746 Educational Technology and Assessment .................................................... 3
EDIT 750 Emerging Technology .................................................................................... 3

Choose two from the following:
EDIT 742 Interactive Technologies: Gaming and Robotics .............................................. 3
EDIT 743 Technology and Community Partnerships ..................................................... 3
EDIT 747 Technology and Teacher Education ................................................................. 3

Certificate in ASTL: Literacy: Reading Specialist  CERG-ALRS
This 21-credit certificate, a state-approved sequence of courses leading to Virginia reading specialist licensure, is designed for teachers who have a master’s degree. Course work includes foundational knowledge, instructional and assessment strategies for individuals and groups, and preparation as a literacy coach and staff developer. Licensure also requires a master’s degree, passing of the Virginia Reading Assessment, and three years of teaching under contract.

Course Work  Credits
EDRD 630 Advanced Literacy Foundations and Instruction, Birth to Middle Childhood ......................................................... 3
EDRD 631 Advanced Literacy Foundations and Instruction, Adolescence through Adulthood ....................................................... 3
EDRD 632 Literacy Assessments and Intervention for Groups ........................................................................................................... 3
EDRD 633 Literacy Assessments and Intervention for Individuals .................................................................................................. 3
EDRD 634 School-Based Leadership in Literacy ........................................................................ 3
EDRD 635 School-Based Inquiry in Literacy ........................................................................ 3
EDRD 637 Supervised Literacy Practicum ............................................................................. 3

Certificate in ASTL: Literacy: PK–12 Classroom Teachers
This 18-credit certificate includes three required literacy courses and three approved electives in ESOL, special education, psychology, secondary and elementary education, early childhood, writing, and other areas. Theory and strategies in literacy and reading for teachers in any discipline, PK–12.

Course Work
EDRD 630 Advanced Literacy Foundations and Instruction, Birth to Middle Childhood ......................................................... 3
EDRD 631 Advanced Literacy Foundations and Instruction, Adolescence through Adulthood ....................................................... 3

Electives: choose four of the following:
EDCI 520 Assessment of Language Learners ................................................................ 3
EDRD 615 Reading/Writing for Multilingual Students ................................................... 3
EDRD 633 Literacy Assessments and Interventions for Individuals ......................................................... 3
EDRD 637 Supervised Literacy Practicum ............................................................................. 3
EDSE 662 Consultation and Collaboration .......................................................................... 3
EDSE 627 Psychoeducational Assessment ......................................................................... 3

Certificate in ASTL: Mathematics (Middle/Secondary)  CERG-AMTH
This 18-credit certificate provides advanced professional development in mathematics teaching and learning for practicing middle or high school mathematics teachers. The 18 credits include five mathematics classes and one special topic in education course. Students must choose to pursue either middle or secondary education requirements.

Course Work  Credits
Middle Education, Grades 6–8:
EDCI 597 Special Topics in Education ............................................................................. 3
MATH 601 Analysis I for Teachers ................................................................................... 3
MATH 604 Geometry for Teachers ................................................................................... 3
MATH 605 Discrete and Finite Mathematics for Teachers ..................................................... 3
MATH 607 Algebraic Structures for Teachers ..................................................................... 3
MATH 608 Problem Solving in Mathematics ..................................................................... 3

Secondary Education, Grades 9–12:
EDCI 597 Special Topics in Education ............................................................................. 3
MATH 601 Analysis I for Teachers ................................................................................... 3
MATH 602 Analysis II for Teachers ................................................................................... 3
MATH 604 Geometry for Teachers ................................................................................... 3
MATH 605 Discrete and Finite Mathematics for Teachers ..................................................... 3
MATH 607 Algebraic Structures for Teachers ..................................................................... 3
■ Certificate in ASTL: Physical Education

This 18-credit certificate program is designed for professionals who are interested in enhancing and promoting teacher knowledge, abilities, and status as educators and professional leaders in physical education.

Course Work

- EDLE 623 Research Design and Statistical Reasoning ............................. 3
- PHED 670 Analysis of Teaching in Physical Education .......................... 3
- PHED 672 Curriculum Development and Assessment in Physical Education ............................................ 3
- PHED 673 Motor Development for Special Populations .......................... 3
- PHED 680 Mentoring and Supervision in Physical Education .................. 3

Elective: choose one from the following or a course pre-approved by advisor

- DANC 553 Teaching Creative Movement .............................................. 3
- DANC 580 Laban Movement Analysis .................................................... 3
- EDIT/EDCI 705 Instructional Design ...................................................... 3
- EDLE 610 Leading Schools and Communities ......................................... 3
- EDUC 539 Human Development and Learning, PK–12 ......................... 3
- EDUC 672 Human Development and Learning, Secondary Education ...... 3
- EFHP 606 Foundations of Exercise, Fitness, and Health Promotion ........ 3
- EFHP 610 Advanced Exercise Physiology ................................................ 3
- EFHP 611 Fitness Assessment: Theory and Practice .................................. 3
- EFHP 614 Advanced Exercise Nutrition ................................................. 3
- EFHP 618 Exercise and Sport Psychology ............................................... 3

■ Certificate in ASTL: Science

This 18-credit certificate provides course work in the area of science related to the Virginia Standards of Learning. Students are prepared to be lead teachers on either of two levels: K–6 or 6–12.

Course Work

- EDCI 663 Research in Science Teaching ............................................... 3
- EDCI 683 Curriculum Development and Evaluation in Science Education ........................................................................ 3
- EDCI 693 Leadership and Organizational Issues in Science Education ........................................................................ 3
- EDLE 791 Internship in Education Leadership ........................................ 3

Science courses relevant to school level with advisor’s approval ................. 6

■ Certificate in ASTL: Teacher Leadership

This 18-credit certificate provides practicing teachers with course work in educational leadership that can be applied in their school settings.

Course Work

- EDLE 612 Educational Law .................................................................. 3
- EDLE 618 Supervision and Evaluation of Instruction ............................ 3
- EDLE 610 Leading Schools and Communities ................................ ........ 3
- EDLE 620 Organizational Theories and Leadership Development .......... 3
- EDUC 597 Special Topics in Education: Trends and Issues in Instruction ........................................................................ 3
- EDUC 598 Directed Reading, Research, and Individual Projects .......... 3

■ Certificate in Applied Behavior Analysis

This 15-credit nonlicensure certificate is designed to increase the professional training of individuals responsible for designing, implementing, and monitoring behavioral treatment programs in schools, agencies such as psychiatric hospitals, and training centers for people with severe disabilities.

Course Work

- EDSE 619 Applied Behavior Analysis Principles, Procedures, and Philosophy .................................................. 3
- EDSE 621 Advanced Applied Behavior Analysis Empirical Basis ........ 3
- EDSE 623 Advanced Applied Behavior Analysis Assessments and Interventions ....................................................... 3
- EDSE 624 Applied Behavior Analysis Applications ............................. 3
- EDSE 625 Applied Behavior Analysis Verbal Behavior ......................... 3
- EDSE 790 Internship Special Education* ............................................. 1–6

* May be taken to meet BCACA supervised practicum requirements

■ Certificate in Assistive Technology

This 15-credit certificate provides supplemental training for practitioners, families, and caregivers who use assistive technology while working with people with disabilities. The certificate is appropriate for general and special educators, related service personnel, adult service providers, and families and caregivers who need to apply assistive technology solutions within their specific discipline or school, work, home, or community setting.

Course Work

- EDSE/EDIT 510 Introduction to Assistive Technology ......................... 3
- EDSE 610 Designing Adaptive Environments ...................................... 2

Electives: Choose ten credits from the following:

- EDIT 522 Assistive Technology for Individuals with Sensory Impairments ......................................................... 2
- EDSE/EDIT 523 Accessibility and Input Modification ..................... 1
- EDSE/EDIT 524 Assistive Technology for Individuals with Learning Disabilities .................................................. 2
- EDSE/EDIT 525 Software for Individuals with Special Needs ............ 2
- EDSE/EDIT 526 Web Accessibility and Design ................................. 1
- EDSE 527 Adapted Sports, Recreation, and Leisure ......................... 1
- EDSE 528 Low-Technology Assistive Technology Solutions ............ 1
- EDSE/EDIT 529 Internet as an Assistive Technology Tool ................ 2
- EDSE 534 Communication and Severe Disabilities ......................... 3
- EDSE 622 Augmentative Communication ........................................ 2
- EDIT 797 Special Topics ............................................................. 1–3
- EDUC 600 Workshop in Education .................................................. 1–6

■ Certificate in E-Learning

This 15-credit graduate certificate provides professionals with the specialized knowledge and skills needed to apply today’s Internet and web-based technologies to educational and training goals within school, community, and corporate settings. Courses are delivered in online, face-to-face, and blended formats that model e-learning delivery modes.
### Certificate in FAST
- **CERG-ADIB**
  - **TRAIN Advanced International Baccalaureate (Studies)**
  
  This 18-credit certificate provides advanced professional development for teachers on the philosophy, elements, and assessments of the PYP, MYP, and DP programs. The concentration focuses on the theory, pedagogy, and research underlying the International Baccalaureate programs.
  
  - EDUC 621 Teaching and Learning in the International Baccalaureate Primary Years Program ........................................ 3
  - EDUC 622 Curriculum Development across International Baccalaureate Programs .................................................. 3
  - EDUC 623 Models and Strategies for Teaching and Learning in International Baccalaureate Schools .......................... 3
  - EDUC 624 Assessment and Learning in International Baccalaureate Schools ......................................................... 3
  - EDUC 626 Inquiry into Action: International Baccalaureate Teachers, Learners, and Schools ................................. 3
  - EDUC 627 Contemporary Issues in International Baccalaureate ................................................................. 3

### Certificate in FAST
- **CERG-SPFT**
  - **TRAIN Special Education**
  
  This 15-credit certificate is designed for preservice and inservice international teacher educators who desire additional training in special education. All course work may be applied to the MEd in special education program and will count for Virginia licensure in special education PK through grade 12.
  
  - **Course Work**
  - EDUC 501 Introduction to Special Education .......................... 3
  - EDUC 502 Classroom Management and Applied Behavior Analysis ................................................................. 3
  - EDUC 540 Characteristics of Students with ED/LD ............. 3
  - EDUC 627 Psychoeducational Assessment .......................... 3
  - EDUC 622 Consultation and Collaboration ........................ 3
  
  **Note:** Most course work has some field experience component.

### Certificate in Integration
- **CERG-ITTS**
  - **Technology in Schools**
  
  This 16-credit certificate is offered to teachers who wish to gain the necessary knowledge and skills for integrating technology into the K–12 curriculum. It is designed to fulfill the state-mandated technology competencies for teachers.
  
  - **Course Work**
  - EDUC 514 Methods of Integration ..................................... 3
  - EDIT 561 Teaching with Telecommunications ................... 1
  - EDIT 562 Teaching with Databases .................................. 1
  - EDIT 566 Teaching with Multimedia and Hypermedia .......... 2
  - EDIT 579 Advanced Topics in Education: Web-Based Learning ................................................................. 3
Certificate in the Online Academy for Teachers

This 15-credit certificate is offered to teachers who want to gain the necessary knowledge and skills to teach students in virtual environments.

Course Work Credits
EDCI 714 Designing Online Learning .........................3
EDIT 641 Understanding Virtual Schools ..................1
EDIT 642 The Online Academy .................................1
EDIT 643 Online Mentoring 1: Building Virtual Relationships .................................................................1
EDIT 644 Online Mentoring 2: Promoting Self-Regulation .................................................................1
EDIT 645 Online Mentoring 3: Conceptual Learning ....1
EDIT 646 Online Mentoring 4: Moderating .................2
EDIT 790 Practicum in Instructional Technology ........2
EDIT 611 Innovations in Distance Learning .................3

Certificate in Post-Master’s Counseling Licensure

This 15-credit certificate offers courses toward school counseling and community agency counseling licensure for post-master’s degree students. These certificates are designed for individuals who possess a master’s degree in counseling or a highly related field and seek at least 15 credits of post-graduate course work to meet licensure requirements for a Virginia school counselor or licensed professional counselor.

Course Work Credits
Choose 9 to 16 credits from the following:
Post-Master’s Counseling Licensure – Virginia School Counselor
EDCD 606 Counseling Children and Adolescents ..........4
EDCD 611 Introduction to Ethical and Legal Issues in School Counseling ..................................................2
EDCD 626 Principles and Practices of School Counseling .................................................................3

Post-Master’s Counseling Licensure – Licensed Professional Counselor
EDCD 609 Advanced Counseling Skills and Strategies ....4
EDCD 652 Introduction to Substance Abuse Counseling ..3
EDCD 654 Counseling, Ethics, and Consultation in Community Agencies .........................................................3
EDCD 656 Diagnosis and Treatment Planning for Mental Health Professionals ...............................................3
EDCD 658 Couples and Family Counseling ..................3
Choose 3 to 6 credits from the following (with permission of the instructor):
EDCD 597 Special Topics in Education .....................1–3
EDCD 895 Emerging Issues in Counseling and Development ........................................................................3
EDCD 896 Advanced Multicultural Counseling ................3
EDCD 897 Advanced Group Counseling ....................3

Choose from the following (may be substituted for other courses):
EDCD 755 Practicum in Counseling ..........................3
EDCD 791 Internship in Counseling ..........................3

Certificate in Secondary Education Licensure

This 21-credit certificate offers course work for teacher licensure to students enrolled in nonlicensure graduate programs at Mason or those who already have a master’s degree.

Course Work Credits
EDUC 522 Foundations of Secondary Education ...........3
EDCI 500-level Curriculum and Methods
Choose one content course specific to your program: ....3
EDCI 567 Social Science
EDCI 569 English
EDCI 572 Mathematics
EDCI 573 Science
EDUC 672 Human Development and Learning ..........3
EDCI 600-level Advanced Curriculum and Methods.
Choose one content course specific to your program: ....3
EDCI 667 Social Science
EDCI 669 English
EDCI 672 Mathematics
EDCI 673 Science
EDRD 619 Literacy in the Content Areas (must be taken with the internship) .........................................3
EDCI 790 Internship in Secondary Education .............6

Certificate in Severe Disabilities

This 36-credit certificate offers required course work for teacher licensure in severe disabilities to be completed with 15 to 36 credits based on the number of equivalent courses completed prior to enrollment.

Course Work Credits
EDSE 501 Introduction to Special Education .................3
EDSE 531 Transition and Community-Based Instruction ..3
EDSE 532 Positive Behavior Supports or EDSE 502 Classroom Management and Applied Behavior Analysis .........................................................3
EDSE 534 Communication and Severe Disabilities .......3
EDSE 533 Curriculum and Assessment in Severe Disabilities or EDSE 627 Psychoeducational Assessment ..........3
EDSE 547 Medical and Developmental Risk Factors for Children with Disabilities ....................................3
EDSE 557 Language Development and Emergent Literacy for Diverse Learners, Ages 3–5 .........................3
EDSE 661 Curriculum and Methods: Severe Disabilities ........................................................................3
EDSE 662 Consultation and Collaboration ....................3
EDSE 669 Interdisciplinary Approaches for Children with Sensory and Motor Disabilities ..................3
EDSE 790 Internship Special Education* (two experiences) .................................................................4
EDSE 791 Midpoint Portfolio ......................................1
EDSE 792 Final Portfolio ...........................................1
*One elementary level and one secondary level. May be taken to meet BCABA supervised practicum.

Certificate in Special Education Leadership

This 15-credit certificate is designed to provide training for educators who administer program implementation efforts for learners with exceptional needs. It is appropriate for those who have an interest in becoming special education directors, program coordinators, department chairs, or lead teachers; however, opportunities beyond special education also exist.

Course Work Credits
EDSE 743 Leadership in Special Education Administration .................................................................3
EDSE 744 Current Issues in Special Education .............3
Choose three from the following:
EDSE 626 The Inclusive Classroom........................................3
EDSE 701 Legal Issues and Special Populations..................3
EDSE 702 Managing Resources for Special Education
Programs........................................................................3
EDSE 703 Creating a Collaborative Culture.......................3

■ Certificate in Students CERG-SDGC
with Disabilities who Access
the General Curriculum (Licensure)
This 33-credit certificate offers required course work for
teacher licensure in learning disabilities, emotional distur-
ance, and mental retardation to be completed with 15 to 36
credits based on the number of equivalent courses completed
prior to enrollment.

■ Education, PhD PHD-EDUC
The PhD in education provides advanced professional educa-
tion for experienced educational practitioners pursuing or
planning careers in educational settings. The program requires
85–96 credits beyond the baccalaureate degree or a minimum of
55–66 credits beyond the master’s degree. A student’s individu-
Al credit requirement depends on goals, program require-
ments, and previous preparation. A limited number of
graduate credits taken previously may be applied; however,
a student’s total program typically requires 10 more credits
than those minimum requirements, depending on goals,
program requirements, and previous preparation.

With the guidance of faculty, students develop individual
programs of study in concert with their goals, program re-
quirements, and self-assessed skills and knowledge. Each
student’s program must include study in a professional field,
such as education administration, educational psychology,
instructional technology, special education, curriculum, in-
struction, international education, bilingual education,
counseling and development, early childhood education, or
literacy. The specific nature of courses is determined by the
student in conjunction with a faculty doctoral advising com-
mittee after completing two semesters. Students also complete
a secondary concentration of study consisting of 12 credits.

To complete the PhD program, each student must demonstrate
competence in oral and written English, computer literacy,
mastery of knowledge and skills in the area of professional
expertise, and the ability to apply general and specific knowl-
edge and skills to significant educational problems. Students
demonstrate these competencies by successfully completing
courses, seminars, and a doctoral portfolio, and preparing and
orally defending a doctoral dissertation. Students have five
years from the time they enroll in their first class to complete
all course work and the doctoral portfolio. Five additional
years, starting with the date on which students are advanced
to candidacy, are allowed to complete the dissertation.

**Admission Requirements**
Candidates are admitted to study by GSE; admission is
highly selective. Applicants must fulfill the following admis-
sion requirements:

- A minimum of three years of successful experience as a
  practitioner in an educational setting
• Baccalaureate or master’s degree from an accredited institution
• Demonstrated high intellectual capability
• Demonstrated leadership potential
• Three letters of recommendation
• GRE general test scores and the writing assessment
• Written goals statement relating study in the PhD program to educational and career plans
For more information, call the PhD in Education Program Office at 703-993-2011.
Completed applications must be submitted to the GSE Graduate Admissions Office by February 1 for admission for the following summer or fall, or by September 1 for admission for the following spring.

EDRS 821 Advanced Applications of Quantitative Methods

EDRS 822 Advanced Applications of Qualitative Methods

EDRS 823 Advanced Research Methods in Single Subject and Case Design

Professional Specialization

These courses differ according to a student’s major specialization but always include 3 internship credits. Professional specialization fields of study include counseling and development, early childhood education, education leadership, educational psychology, international education, instructional technology, literacy and reading, mathematics or science education leadership, multilingual or multicultural education (English as a second language), research methodology, special education, and teaching and teacher education.

Secondary Emphasis

Students have several options including secondary emphasis within GSE or other Mason units, interdisciplinary secondary emphasis, or using the master’s degree as part of the secondary emphasis requirements.

Internships

Students enroll in at least one and up to three internships designed to broaden their professional expertise. One internship must be taken in a setting that differs from the student’s work setting.
The mission of the College of Health and Human Services (CHHS) is to equip professionals to provide leadership, care, and services related to health promotion, wellness, disease prevention, and quality of life through the promotion of physical, social, and environmental health practices. Graduates practice in a variety of roles in settings that are complex, multicultural, and dynamic. The college is a resource for health promotion to the university, as well as to citizens of Virginia.

The State Council of Higher Education for Virginia and the State Board of Nursing approved the baccalaureate nursing program in 1974. Since then, the program has grown from a department of nursing to a school of nursing. In 1993, the school was reorganized into the College of Nursing and Health Science, and in 2006, into the College of Health and Human Services to provide the breadth needed to respond to dramatic and dynamic fundamental changes occurring in health care and social work. The expanded, multidisciplinary CHHS offers degree programs and research opportunities in health administration, health policy, health information systems, health services research, nursing, nutrition, rehabilitation science, senior care, and social work.

Administration
Shirley Travis, Dean
Robin Remsburg, Associate Dean and Director, School of Nursing
J. Goodlett McDaniel, Associate Dean, Practice, Marketing, and Finance
Frank J. Whittington, Associate Dean, Academic Affairs
Vacant, Assistant Dean, Student Affairs and Enrollment Management
Lisa Pawloski, Chair, Global and Community Health
P. J. Maddox, Chair, Health Administration and Policy
Miriam Raskin, Acting Chair, Social Work

Faculty
Faculty emeriti: Ailinger, Carty, Cohelan, Jenkins, Johnson-Brown, Parker-Smith, Redmond, Silva, Walker

Professors: Alemi, Butler, Gaffney, Gerber, Hadley, Howell, Maddox, Meiners, Metcalf, Moore, Raskin, Ritchie, Rose, Sluzki, Sorrell, Travis, Whittington

Assistant professors: Boland, Boyd, Brenkus, Cangelosi, Carle, Cartwright, Cleaveland, Gewa, Hahn, Ihara, Jacobsen, Kitsantas, Kodadek, Mariedegue, Miklancie, Normile, Oh, Perlin, Roberts, Rudowski, Smoczynski, Telford, Tompkins, Urban, Webster, Weinstein, Willis, Yang, Young, Zhou

Instructors: Almond, Blasser, Campo, Clark, Cox, Davis, Dickman, Durham, Gaston, Gillette, Hall, Henderson, Kiernan-Stern, Liss, Middle, Moss, Mulqueen, Shiver, Stoehr, Toulouse, Venske, Welsh

Course Work
CHHS offers all course work designated GCH, HAP, HHS, NURS, and SOCW in the Course Descriptions chapter of this catalog.

Health and Human Services in a variety of agencies in the Northern Virginia area. Continuing education is a commitment of CHHS and Mason.

Academic Outreach

Continuing education is a commitment of CHHS and Mason. Activities are planned to meet the special needs of individuals and groups in the community. CHHS offers opportunities for credit and noncredit courses. Contract courses are offered in a variety of agencies in the Northern Virginia area. Comments and suggestions for programming from the health care community are welcomed. For information about specific activities, call 703-993-1910 or 703-993-2120.

Professional Conduct Policy

CHHS reserves the right to place on probation, suspend, or dismiss any student in the program who does not demonstrate professional conduct. This conduct includes, but is not limited to, verbal abuse or insubordination, as well as behavior that threatens the safety of a client, another student, a faculty member, or other health care provider when the behavior occurs within the context of the academic program. The student has the right to appeal.

Student Affairs and Enrollment Management

The Office of Student Affairs and Enrollment Management maintains student records and reviews for degree completion, acts on all student issues with the exception of grade appeals (which are filed according to university policy described in the Academic Policies chapter of this catalog), and processes all academic actions for undergraduate and graduate students enrolled in the college. Student health and immunization records, copies of active licenses, and copies of current CPR certification are maintained in student files. All students are assigned an academic advisor and are expected to meet with the advisor at least one time per semester.

Many clinical agencies and practicum sites mandate that all students have a criminal background check. All students enrolled in the School of Nursing are required to complete a background check prior to beginning their program. Students enrolled in other CHHS programs may be required to complete background checks before entering a practicum environment.

Information obtained from the background check is confidential and may result in a student’s inability to perform clinical or practicum activities and, therefore, will disqualify the student from entering or continuing in the academic program. Students must pay a fee for the background check. Students also are responsible for notifying the assistant dean of student affairs and enrollment management of any arrests, regardless of adjudication, that occur after acceptance and during enrollment in the program. Failure to promptly notify the assistant dean of student affairs and enrollment management may be grounds for dismissal from the student’s program.

To comply with the regulations established by the Commonwealth of Virginia and the agencies to which students are assigned and minimize risks to student health, every student enrolled in a CHHS program requiring clinical or practicum course work must document and submit evidence of good health and currency in immunization requirements on admission to the CHHS. Immunizations can be obtained from Student Health Services in Student Union Building I on the Fairfax Campus, the Truland Building on the Arlington Campus, or the Occoquan Building on the Prince William Campus. Students must submit copies of required health records to the CHHS Office of Student Affairs and Enrollment Management. That office may verify compliance for clinical and practicum agencies but will not release health records to any agency without authorization from the student. Students should keep their own copies of health records available for clinical and practicum assignments should the agency require documentation. All costs associated with immunization and certifications are the student’s responsibility.
All students are required to have an active Mason e-mail account. Students are responsible for their own uniforms and transportation. Student liability insurance is provided by the university. Students are strongly advised to maintain health insurance coverage at all times. An accident and health insurance plan is available through Mason. Students are responsible for their own health care, including emergency care. CHHS assumes no financial responsibility for the health care of students.

**School of Nursing**

**UNDERGRADUATE PROGRAMS**

**Bachelor of Science in Nursing**

The Bachelor of Science in Nursing (BSN) Program is accredited by the Virginia State Board of Nursing and the Commission on Collegiate Nursing Education. The undergraduate nursing program prepares students to deliver superior nursing care and provide leadership in nursing in the increasingly complex and challenging field of modern health care. Graduates are in demand as professional nurses in hospitals, long-term care facilities, and community health and other health care agencies. The program emphasizes health promotion and disease prevention, capitalizing on early detection of potential health problems, health maintenance in ambulatory services, and preparation for the managerial responsibilities of nursing.

The School of Nursing offers four pathways to complete the BSN, all of which lead to completion of the objectives of the undergraduate program. The traditional pathway is a two-year curriculum following the completion of general education and prerequisite requirements. The LPN-to-BSN pathway is offered for students holding current LPN licenses and is also a two-year curriculum following completion of general education and prerequisite requirements. An accelerated RN-to-BSN pathway for students holding current registered nurse (RN) licenses can be completed in one year (full-time) following completion of general education and prerequisite requirements. The accelerated, second degree pathway is a 12-month, full-time pathway for students holding a baccalaureate degree outside of nursing. The nursing programs may be completed on a full-time or a part-time basis, with the exception of the accelerated second degree program. Students who are interested in pursuing a major in nursing, with the exception of those currently licensed as RNs, must make an additional and separate application through the School of Nursing and are encouraged to contact the nursing program for advising prior to applying to the nursing major.

Clinical nursing begins at the junior level. Students must complete a prenursing curriculum and be admitted to junior standing or one of the accelerated pathways. These conditions do not apply to students who are already RNs.

Attendance at the first meeting of all nursing courses (lectures, on-campus laboratories, and agency laboratories) is mandatory.

**Acceptance into the Traditional Nursing Pathway**

To be eligible to apply for junior standing, traditional prenursing students must complete the designated nursing prerequisite course work (wherever taken). The acceptable GPA may increase each year based on the number of spaces available in the nursing program. Transfer students and those changing their majors to nursing are ranked downward from 4.00 on the basis of the number of junior spaces available in any given year. Students admitted as prenursing freshmen must have a minimum GPA of 3.00 in the designated nursing prerequisites.

Students are accepted for junior standing each fall. The application deadline is March 1, and students are notified of their status in June. Permission to register for courses with NURS prefixes requires prior acceptance into junior standing in nursing. Full-time nursing requires carrying a heavy schedule; therefore, outside obligations should be limited to ensure success. Mason provides opportunity for credit by exam in several courses for students presenting evidence of previous education.

**Traditional BSN Pathway Requirements**

Candidates for the degree must present at least 120 credits. Specific requirements are as follows:

<table>

</table>

No more than 3 credits of nursing electives may be used to satisfy this requirement.
BIOL 124 and 125 meet the natural science portion of Mason’s general education requirements. Statistics 250 fulfills the quantitative reasoning portion of Mason’s general education requirements. Nursing students must take an approved synthesis course (HHS 465, 3 credits).

**Acceptance into the LPN-to-BSN Nursing Pathway**

To be eligible to apply for junior standing, students who are LPNs must complete the designated nursing prerequisites and general education requirements by the end of the spring semester preceding entry to the nursing program. Students must earn a C or better in anatomy and physiology (BIOL 124 and 125, 8 credits); microbiology (BIOL 246 and 306, 4 credits); statistics (STAT 250, 3 credits); nutrition (GCH 295, 3 credits); developmental psychology (PSYC 211, 3 credits); and ethics (PHIL 151 or 309, 3 credits). Applicants to the second degree pathway must achieve a minimum GPA of 3.00 in the designated prerequisite course work.

Students who are interested in pursuing a major in nursing must make an additional and separate application for junior standing through CHHS. Admission to the nursing program is competitive. It is based on a minimum cumulative GPA of 3.00 in the designated nursing prerequisite course work (wherever taken). The acceptable GPA may increase each year based on the number of spaces available in the nursing program.

Students are accepted for junior standing each fall. The application deadline is March 1, and students are notified of their status in June. Permission to register for courses with NURS prefixes requires prior acceptance into junior standing in nursing. Full-time nursing requires carrying a heavy schedule; therefore, outside obligations should be limited to ensure success. Mason provides opportunity for credit by exam in several courses for students presenting evidence of previous education.

**Credit by Exam**

5

On successful completion of NURS 334, LPN students will be awarded 5 credits in nursing.

**Total**

120

BIOL 124 and 125 meet the natural science portion of Mason’s general education requirements. Statistics 250 fulfills the quantitative reasoning portion of Mason’s general education requirements. Nursing students must take an approved synthesis course (HHS 465, 3 credits).

**Acceptance into the Accelerated, Second Degree BSN Pathway**

The Accelerated, Second Degree BSN Pathway is designed for students who already hold a degree who are interested in pursuing an undergraduate degree in nursing. Students must have a baccalaureate degree from an accredited college or university. This full-time accelerated program begins in the fall semester and is completed in 12 months. Students must earn a C or better in anatomy and physiology (BIOL 124 and 125, 8 credits); microbiology (BIOL 246 and 306, 4 credits); statistics (STAT 250, 3 credits); nutrition (GCH 295, 3 credits); developmental psychology (PSYC 211, 3 credits); and ethics (PHIL 151 or 309, 3 credits). Applicants to the second degree pathway must achieve a minimum GPA of 3.00 in the designated prerequisite course work.

Admission to the second degree nursing program is competitive. Students must have a minimum cumulative GPA of 2.75 in their first degree or a 3.00 GPA in the last 30 credits of the undergraduate degree. They also must complete the application including an intentional essay. To be eligible to apply to this program, students must complete the designated nursing prerequisites by the end of the spring semester preceding entry into the nursing program.

The application deadline is March 1, and students are notified of their status in June. Permission to register for courses with NURS prefixes requires prior acceptance into junior standing in nursing. Full-time nursing requires carrying a heavy schedule; therefore, outside obligations should be limited to ensure success. Mason provides opportunity for credit by exam in several courses for students presenting evidence of previous education.

▲ **Accelerated, Second Degree BSN Pathway Requirements (SEC)**

Candidates for the degree must present at least 120 credits: 24 credits are required prerequisites, and 49 credits are transfer credits from the first degree. Specific requirements are as follows:

<table>
<thead>
<tr>
<th>General Education</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>Mason general education requirements are satisfied by the initial degree and fulfilled through transfer credit.</td>
<td>49</td>

Total ................................................................. 120
Nursing students must take an approved synthesis course (HHS 465, 3 credits).

Acceptance into the Accelerated RN-to-BSN Pathway

Students who hold current RN licenses need to apply only to the university and have no separate application to the School of Nursing. The Accelerated RN-to-BSN Pathway allows RNs to progress quickly through the program while meeting the objectives of the undergraduate curriculum. On completion of the general education requirements and designated nursing prerequisites, RN students can complete the BSN in two semesters of full-time study. The program can also be completed on a part-time basis.

RN students must satisfy all general education requirements and nursing prerequisites. Transfer credits are accepted for many general education and prerequisite courses that may have been completed at other colleges or universities. RN students may use any 6 credits of psychology to satisfy the PSYC 100/211 requirement. Mason provides opportunity for credit by exam in several courses for students presenting evidence of previous education.

▲ Accelerated RN-to-BSN Pathway Requirements (RN)
Candidates for the degree must present at least 120 credits. A minimum of 30 credits must be earned at Mason to fulfill requirements for graduation. Specific requirements are as follows:

<tr>
<td>Total</td>
<td>120</td>
</tr>
</tbody>
</table>

BIOL 124 and 125 meet the natural science portion of Mason’s general education requirements. Statistics 250 fulfills the quantitative reasoning portion of Mason’s general education requirements. Nursing students must take an approved synthesis course (HHS 465, 3 credits).

Writing-Intensive Requirement

Mason requires all students to complete at least one course in their majors designated “writing intensive” at the 300 level or above. Students majoring in nursing fulfill this requirement by successfully completing HHS 465.

Academic Grade Standards

Students who earn a final grade lower than a C in a nursing course must repeat the course and earn a grade of C or higher. In these cases, students are placed on nursing academic warning. Students on nursing academic warning must notify the assistant dean for Student Affairs and Enrollment Management of their intent to repeat the course in writing, within two weeks of the course. Students should be aware that space may not be available in some clinical nursing courses that they may need to repeat. Although attempts at placement will be made, students must understand that they may have to sit out a semester or more until space becomes available.

Nursing majors who fail a course must repeat the course and earn a C or higher to resume progression in classes with the NURS prefix. Before the course is repeated, the student may not register for any other courses with a NURS prefix without permission from CHHS.

Dismissal from any one of the nursing pathways constitutes dismissal from the School of Nursing.

Professional Conduct Policy

All students in the School of Nursing are expected to adhere to the Professional Conduct Policy outlined for CHHS.

Readmission

Readmission to the School of Nursing for nonacademic or professional infractions is not automatic. Former students must apply in writing for readmission to the assistant dean for student affairs and enrollment management by September 1 for the spring semester, February 1 for the fall semester, or November 1 for Summer Term. The letter should include a description of the circumstances surrounding the nonacademic suspension, a description of interim activities, steps taken to support success on readmission, reasons readmission is justified, and rationale to support expectation of success on readmission. Students meeting the above criteria are considered for readmission on a space-available basis. Students have the right to appeal unfavorable decisions.

Leave of Absence

Students in good standing may request a leave of absence from the program of up to two semesters. Readmission following the leave of absence is granted only on a space-available basis.

Appeal Process

Faculty members in the nursing program are generally the best judges of a student’s professional performance; however, some students may feel that the faculty member’s
judgment of readmission or dismissal is unfair. In such cases, the student should ask the assistant dean for undergraduate programs to reconsider the decision. If the student remains dissatisfied, the matter may be appealed to the director of the School of Nursing. If the director believes the student may have a legitimate complaint, the director will appoint a committee of three faculty members and a student peer to review the decision. After the committee thoroughly reviews the student’s case, it will issue a written recommendation to the director with a copy to the assistant dean for student affairs and enrollment management.

Student Learning Portfolio
All BSN students in the School of Nursing initiate a learning portfolio during the first semester of their junior year. The portfolio provides evidence of a student’s ability to meet programmatic outcomes as a care provider; designer, manager, and coordinator of care; and member of the profession. The portfolio also demonstrates development of professional values and behaviors by providing evidence of work completed throughout the nursing program. A Best Works Portfolio at the conclusion of the nursing program evaluates program outcomes and is used for ongoing professional development. Each course requires elements of the portfolio and is integrated into the course syllabus.

NCLEX Assessment
All BSN students, with the exception of RN-to-BSN students, must participate in preparation for the NCLEX-RN exam as specified in the School of Nursing. This may include taking a practice computerized NCLEX-preparation exam and achieving a passing score, as well as completion of remediation activities. Successful completion of the NCLEX review exam and any required remediation is required to achieve a passing grade in HHS 465.

Special Requirements
Fees and expenses specific to the nursing program are as follows: laboratory equipment kit, standardized testing, uniforms, stethoscope, name pin, books, course materials, transportation to and from agencies, CPR certification, review of health forms, immunizations, and any other additional fees as mandated by clinical agencies, such as the criminal background check.
A one-time lab fee and criminal background check are required of all students.

Nursing students are required to obtain a health exam and immunizations before registering for their first clinical course. Students must complete the three hepatitis B immunizations in accordance with current U.S. Public Health Service recommendations before entering the first clinical setting. The cost of the immunizations is the responsibility of the student. Students also must have annual tuberculosis screenings by PPD. Student immunization records are monitored at the CHHS Office of Student Affairs and Enrollment Management.

All students must have CPR certification before entering the first clinical nursing course and maintain it through the remainder of the program. Either the American Red Cross Professional Rescuer or the American Heart Association Basic Life Support is required. Clinical agencies sometimes require additional records and documentation before student participation. Any cost is the responsibility of the student.

Student assignments are based on the learning needs of the student without regard to the HIV or HBV status of the client. Failure to practice universal precautions and blood-borne pathogen safety results in dismissal from the program.

No student or faculty member will be discriminated against or denied admission to the nursing program for the sole reason that the student or faculty member has been exposed to, infected with, or diagnosed with HIV or HBV. In the event that a student has a clinical experience or practicum exposure to body fluids of a client, procedures and appropriate incident reports are to be completed according to institutional and nursing policies. Information related to exposure or infection is confidential, and dissemination of such information is based on the need-to-know criteria that apply generally in health care situations. A complete and detailed HIV/HBV policy is available in the CHHS Office of Student Affairs and Enrollment Management.

The drop period for nursing courses offered for fewer than 14 weeks is 3 weeks.

Because knowledge, skills, and behavior patterns in the major field of this program are so vital to the health and perhaps even the survival of individuals or groups being served, failure or borderline achievement cannot be tolerated. Therefore, the faculty of the nursing program has established, with approval of university faculty and administration, special major field quality standards that go beyond the general university quality standards printed elsewhere in this catalog.

RN and LPN Licensure Requirement
RN and LPN students are required to submit a copy of their current license prior to entering the first nursing course. RN- and LPN-licensed students must maintain their licensure throughout the academic program.

GRADUATE PROGRAMS

■ Master of Science MSN-NURS in Nursing

The Master of Science in Nursing (MSN) Program is accredited by the Virginia State Board of Nursing and the Commission on Collegiate Nursing Education. The program prepares nurses for a variety of leadership roles in the health care delivery system. The adult, adult/gerontological, and family nurse practitioner primary care concentrations are part of a collaborative program with George Washington University School of Medicine and Health Sciences. These concentrations have been approved by the state boards of nursing and medicine in Virginia. The concentration in advanced clinical nursing prepares nurses to provide and manage care of individuals, families, and groups, including the chronically ill, the elderly, and others with self-care limitations. The concentration in nursing administration prepares nurses to function in management positions in hospitals, nursing homes, community health agencies, and other health-related facilities. The nurse educator concentration prepares graduates for faculty positions in schools of nursing, as well as nurse educator positions in hospitals and community health agencies. The clinical nurse leader concentration prepares nurses as generalists with solid foundations in health policy and finance to provide competent care and clinical leadership within the health care system.
Admission Requirements
In addition to meeting graduate admission requirements, applicants to MSN programs must have a cumulative GPA of 3.00 for the last 60 credits of undergraduate work, hold an active license as a registered nurse (RN), and submit two letters of recommendation, a résumé, and a goals statement. Although the GRE is not formally required, applicants may be asked to submit GRE scores at the discretion of the school when it believes those scores will lead to a clearer presentation of the applicant’s qualifications. Applicants must have successfully completed undergraduate statistics and a graduate bivariate statistics course. (HHS 597)

Students applying to the advanced clinical nursing, clinical nurse leader, nurse educator, and all the nurse practitioner concentrations must have a health assessment skills continuing education course within 18 months prior to taking NURS 514 or 719. In addition, applicants to the nursing administration concentration are required to have the equivalent of one year’s experience in direct patient care as a registered nurse. Students applying to any nurse practitioner concentration are required to have a minimum of one year experience in direct patient care. It is recommended that students applying to the advanced clinical nursing concentration have the equivalent of one year’s experience in direct patient care as an RN.

Special Requirements
Graduate students are required to have annual health exams and immunizations before enrolling in practicum courses. Students must be in the process of completing a hepatitis B immunization series when they enroll for their first practicum course. Student health and immunization records are monitored at the CHHOS Office of Student Affairs and Enrollment Management. Criminal background checks are required of all School of Nursing students. All students are required to have an active Mason e-mail account.

Degree Requirements
The master’s program in nursing requires 37 to 48 graduate credits. Of these, a 13-credit core consists of course work in the theoretical foundations of nursing, applications in nursing research, a seminar in the ethics of health care, and a course on the organization of nursing and health care delivery systems. The nursing administration and clinical nurse leader concentrations require an additional 24 credits; the nurse educator concentration, an additional 25 credits; the advanced clinical nursing concentration, an additional 25 to 31 credits; the adult nurse practitioner concentration, an additional 29 credits; and the adult/gerontological and family nurse practitioner concentrations, an additional 35 credits. A graduate course in which a grade of C or below is earned may be repeated only once. Graduate students (both master’s and doctoral) may repeat no more than two courses in their total program of study.

Actual clinical hours may exceed those listed in the catalog. Actual clinical hours will meet those required for certification purposes. Credits listed in the catalog reflect the minimum required credits.

RN-to-MSN Pathway
This pathway allows RNs who have completed the general education requirements (as listed in the undergraduate RN-to-BSN Pathway) and have demonstrated substantial involvement in professional nursing within the past two years to earn the MSN degree. Students entering a concentration through this pathway must meet all the requirements for admission to that concentration.

In addition to fulfilling admission requirements for degree status at Mason, applicants must hold a current license to practice nursing, have earned a 3.00 GPA in the general education courses at an accredited institution, and demonstrate substantial involvement in professional nursing within the past two years as an RN in clinical practice.

Students in the RN-to-MSN pathway are required to take the following bridge course:

**NURS 595 RN-MSN Transition: Evidence-Based Community Health Nursing**
3 credits

After completion of the bridge course, students choose one of the seven concentrations and meet all requirements of the graduate program.

NURS 756 Advanced Pathology and Pathophysiology .......... 4

* Required for ANPR, AGNP, and FNUP concentrations.
Colloquium with George Washington University (GWU) School of Medicine and Health Sciences. All courses offered at GWU are charged at GWU’s tuition rates. Nurse practitioner students must have taken a continuing education health assessment course with a skills component within 18 months of taking NURS 719.

▲ Advanced Clinical Nursing Concentration (NUAC)

Course Work ................................................................. 25
NURS 513 Advanced Pharmacology in Nursing ................ 3
NURS 514 Application of Advanced Health Assessment Methods* ......................................................... 1
NURS 550 Pathophysiologic Bases for Major Health Deviations of Individuals ................................. 3
NURS 773 Advanced Clinical Nursing I ........................... 3
NURS 775 Advanced Specialty Practice I ......................... 3
NURS 776 Advanced Clinical Nursing II ......................... 3
NURS 778 Advanced Specialty Practice II ......................... 3
Nursing Electives .............................................................. 6

*A continuing education health assessment course with a skills component is required within 18 months prior to taking NURS 514.

Clinical Nurse Specialist Emphasis

Students in the advanced clinical nursing concentration may opt for the clinical nurse specialist emphasis and accrue 500 clinical hours by completing NURS 740 Clinical Nurse Specialist Internship. NURS 740 is 3 credits and can be repeated for up to 6 credits.

▲ Nursing Administration Concentration (NUAD)

Course Work ................................................................. 12
NURS 763 Administrative Theory in Nursing .................. 3
NURS 765 Practicum in Nursing Administration I ............. 3
NURS 766 Administrative Strategies in Nursing ............... 3
NURS 768 Practicum in Nursing Administration II ............. 3

Nursing Administration Support Courses ........................ 12
NURS 654 Nursing Administration Financial Management or HAP 703 Financial Management in Health Organizations ................................................................. 3
Management/organizational theory ..................................... 3
Recommended courses include HAP 621, LRNG 601, or PUAD 620.
Nursing or related discipline electives ............................... 6

▲ Nurse Educator Concentration (NURE)

Course Work ................................................................. 15
NURS 556 Principles of Assessment and Evaluation in Nursing Education or EDRS 531 Educational and Psychological Measurement ................................................................. 3
NURS 726 Perspectives in Nursing Education .................. 3
NURS 727 Application of Nursing Education Principles to Curriculum and Program Development ......................... 3
NURS 728 Practicum and Seminar in Nursing Education I ........................................................................ 3
NURS 729 Practicum and Seminar in Nursing Education II ........................................................................ 3

Nurse Educator Support Courses .................................... 10
NURS 514 Application of Advanced Health Assessment Methods* ......................................................... 1
NURS 550 Pathophysiologic Bases for Major Health Deviations of Individuals ................................. 3
Nursing or related discipline electives ............................... 6

*A continuing education health assessment course with a skills component is required within 18 months prior to taking NURS 514.

▲ Clinical Nurse Leader Concentration (NUCL)

Course Work ................................................................. 17
HAP 586 Quality Management in Health Care ................. 3
NURS 654 Nursing Administration Financial Management ................................................................. 3
NURS 730 Leadership Strategies for the Clinical Nurse Leader ................................................................. 2
NURS 731 Clinical Nurse Leader Role Integration ............. 2
NURS 732 Practicum: Clinical Nurse Leader ..................... 7

Clinical Nurse Leader Support Courses ........................ 7
NURS 513 Advanced Pharmacology in Nursing ............... 3
NURS 550 Pathophysiologic Bases for Major Health Deviations of Individuals ................................. 3
NURS 514 Application of Advanced Health Assessment Methods* ......................................................... 1

*A continuing education health assessment course with a skills component is required within 18 months prior to taking NURS 514.

Master’s International

The MSN prepares nurses for a variety of leadership roles in health care delivery systems. Courses are held on the Fairfax Campus and in distributed local health care facilities. Most classes are offered after 4 p.m., Monday through Friday. Mason is a public institution with excellent tuition rates for those who qualify for Virginia residency. Peace Corps volunteers accepted into the MSN program who are not Virginia residents may be eligible for the tuition support program to obtain the in-state rate. The program has been rated in the top 50 graduate nursing programs by U.S. News & World Report.

The Master’s International (MI), a joint program of Mason and the Peace Corps, enables participants to prepare for Peace Corps service while earning the MSN. Participants apply separately to the Peace Corps and to Mason. The MSN offers several concentrations, but two are more appropriate to the Peace Corps experience: advanced clinical nursing, a 38-credit program, and nursing administration, a 37-credit program. Students are able to complete initial requirements of 31 or 32 credits within one year (to include summer sessions). Six credits are earned as practicum credits for the overseas Peace Corps service. Students return to Mason for their final project presentation, during which they discuss and share their Peace Corps experiences with faculty and other MSN students.

Requirements

Applicants should hold a BSN. They must submit a completed application for graduate admission, along with the nonrefundable application fee; application for Virginia in-state rates for those claiming eligibility; original transcripts from all previously attended colleges or universities; GRE scores
Applications are reviewed throughout the year for admission to either the fall or the spring semester, although new students may take their initial course during Summer Term. Students accepted into the program but waiting for notification of acceptance from the Peace Corps may begin their master’s program but will not be eligible for tuition support until they have been accepted into the Peace Corps.

For more information about Master’s International, contact the Peace Corps regional office at 1-800-424-8580. For the Fellows/USA program, call the above number and then extension 1440.

**MSN/MBA Program MSNBA-NBA**

The MSN/MBA Program, offered with the School of Management (SOM), prepares nurses for mid- and top-level administrative, leadership, and health policy roles in health and health-related organizations. A variety of health care and health-related settings are used for clinical practice experiences. The program requires 58 graduate credits, including graduate nursing, business, decision sciences, and elective courses.

Applicants must have GMAT scores sent directly to Mason and must meet admission requirements for graduate degree status in both CHHS and SOM.

(Students who qualify for a 3-credit practicum because of their educational experience may choose the remaining 3 credits from courses designated by the graduate nursing program.)

To earn the certificate, students must complete all courses with a 3.00 GPA.

**Certificate in Forensic CERG-NUED Nursing**

This program provides advanced education at the graduate level to students who are actively involved or wish to pursue a career in forensic nursing. The certificate will provide the educational requirements for certification as a sexual assault nurse examiner (SANE) through the International Association of Forensic Nurses (IFAN) and as a certified forensic nurse through the American College of Forensic Examiners (ACFE).
Certificate Requirements
Applicants must have a current nursing license and a bachelor’s degree from an accredited institution of higher education. Courses are open to other graduate students, with the exception of NURS 734, which requires students to have a current nursing license.

Required Courses .............................................................. 15
NURS 733 Introduction to Forensic Science ......................... 3
NURS 734 Role of the Sexual Assault Nurse Examiner and Interpersonal Violence* ........................................... 3
NURS 735 Crime Lab and Crime Scene Investigation ............. 3
NURS 736 Psychological and Legal Aspects of Forensic Science ................................................................. 3
NURS 737 Investigation of Injury and Death ........................ 3

*Students who are currently certified as a SANE take GCH 602 Global Health Issues Related to Violence in place of NURS 734.

PhD in Nursing

The PhD in Nursing Program builds on the MSN degree. The objective of the program is to prepare nurses for executive and educational roles in nursing and health care. Graduates of the program exemplify the administrative and the leadership characteristics essential to assuming executive roles; conduct and support research in nursing and health care ethics, health care administration, health policy, and nursing education; and influence the formation and implementation of public policy in health care through analysis of sociocultural, economic, fiscal, political, ethical, and governmental processes.

Admission Requirements
In addition to fulfilling admission requirements for degree status in CHHS, applicants must hold a master’s degree in nursing from an accredited program equivalent to 30 credits or a master’s degree in a related health field with a baccalaureate degree in nursing. They must have earned a minimum GPA of 3.50 on a 4.00 scale in a master’s program. They also must show evidence of one year of experience as an RN prior to enrollment. Other requirements are as follows:

• For international students, a TOEFL score of at least 250 (computer-based exam) or 600 (paper-based exam)
• Evidence of current licensure to practice professional nursing. Students on foreign student visas must present evidence of their country’s nursing licensure or the equivalent.
• Three letters of recommendation from professional or academic sources, with at least two of the references from people who have had contact with the applicant within the past two years
• Interview with one or more members of the doctoral admissions committee
• Writing sample describing goals in pursuing preparation for the PhD
• Evidence of prerequisite graduate-level course work in applied statistics (past two years)
• A résumé of professional experience

Students are admitted for fall semester only. All materials for admission must be submitted to Mason’s Admissions Office by March 1 of the year of application.

Students must supply official transcripts documenting satisfactory grades for graduate-level semester credits (as designated by the educational institution where taken), as well as official catalog descriptions of each course petitioned for transfer. Students may transfer up to 12 credits from other academic institutions. Transfer credits may be applied to degree requirements pending approval from the director of the program.

Other requirements are as follows:

• Successfully complete the program of study outlined in the PhD curriculum.
• Successfully complete a written doctoral candidacy comprehensive exam after completing all PhD credit requirements, except NURS 998 and 999.
• Successfully pass the final oral doctoral dissertation defense, and submit the doctoral dissertation approved by the doctoral dissertation committee, the director of doctoral program, and the CHHS dean. (The dissertation is submitted in the approved format to University Libraries and the director of the doctoral program.)
• Complete application material for graduation and the PhD degree in accordance with prevailing Mason policies.

Degree Requirements
The PhD in Nursing Program offers a concentration in nursing education (minimum 58 credits), a concentration in nursing administration (minimum 58 credits), and an individualized area of concentration (minimum 51 credits). Before advancing to candidacy and enrolling for dissertation credit (12 credits), students must have their program of study approved by CHHS and the director of the CHHS doctoral program.

Concentration in Nursing Education (NUED)
Prerequisites for this concentration are PUAD 620 Organizational Behavior and HHS 597 Approaches to Quantitative Data Analysis in Health Care Research, or the equivalent.

Credits

Scientific Base/Research Core .................................................. 19
NURS 804 Advanced Quantitative Data Analysis for Health Care Research I ................................................. 3
NURS 805 Advanced Quantitative Data Analysis for Health Care Research II ................................................. 3

- 58

### Advancement to Candidacy
After students have successfully completed the qualifying exam and all required course work, the director of the School of Nursing doctoral program approves advancement to candidacy.

### Dissertation Proposal
The proposal must focus on a topic in nursing and be approved by the doctoral dissertation committee, the doctoral program director, and the CHHS dean. The dissertation proposal and written dissertation must be consistent with the guidelines outlined in Mason’s Guide for Preparing Graduate Theses, Dissertations, and Projects.

### Doctoral Dissertation
Before enrolling for dissertation credit, the student must have advanced to candidacy. The completed dissertation must be approved by the doctoral dissertation committee, the doctoral program director, and the CHHS dean.

### Final Oral Doctoral Exam
The doctoral dissertation committee chair, on preliminary approval of the doctoral dissertation by the committee, petitions the doctoral program director in the CHHS to schedule the final oral doctoral exam, which includes a defense of the doctoral dissertation. The final oral doctoral exam also demonstrates the candidate’s intellectual command and maturity of judgment in the area of emphasis chosen by the candidate and approved by the doctoral dissertation committee. At the close of the final oral doctoral exam, the committee makes a final judgment regarding approval of the doctoral dissertation and successful completion of PhD degree requirements.

### Time Requirements
Students must complete all planned course work, including electives, and advance to candidacy within six years of admission to degree or provisional status in the PhD program. The student must successfully complete the doctoral dissertation, final oral doctoral exam, and all PhD degree requirements within five years following the semester of advancement to candidacy.
■ Doctor of Nursing Practice  DNP-NURS (pending SCHEV approval)

The Doctor of Nursing Practice (DNP) builds on the MSN degree. The objective of the program is to prepare graduates for the highest level of nursing practice. Emphasis will be placed on evaluating and applying the evidence that supports practice, understanding and creating practice delivery systems based on patient outcomes, and assuming leadership roles in practice settings. Along with these core competencies, the degree will offer concentrations to develop greater expertise in education and leadership in clinical practice. The DNP will be the terminal practice degree in the profession. The degree will draw on expertise from throughout CHHS in such areas as health economics, health policy, and epidemiology. Graduates of the program will be able to assume many roles in the health care system, including direct patient care, clinical nursing faculty, practice management, and policy development.

Admission Requirements

In addition to fulfilling admission requirements for the CHHS, applicants for the DNP must have a master of science degree in nursing from an accredited program equivalent to a minimum of 30 credits and be currently licensed as an RN. They must be advanced practice nurses with evidence of certification and a minimum of 500 practice hours in their field. They must demonstrate a GPA of 3.50 or better in their graduate program. Students must show evidence of a graduate course in research methodology. Students seeking admission will be asked to provide a 500-word statement outlining an area of practice inquiry interest. Other requirements are as follows:

- Three letters of recommendation of which a minimum of two are from persons able to speak to the applicant’s clinical expertise
- A statement describing the applicant’s area of practice inquiry interest
- An interview with program faculty
- A current résumé
- Evidence of RN licensure and advanced certification
- Evidence of a graduate-level research methodology course

Applicants will be accepted for the fall semester only. All application material must be submitted by June 1 of the year in which admission is sought.

- NURS 980 Practice Inquiry I .......................................................... 4
- NURS 981 Practice Inquiry II .......................................................... 4

Total ................................................................................. 44

* Required of all DNP students

Advancement to Candidacy

The final step in completion of the degree is the implementation of a practice inquiry project. The proposal for this project must be prepared with ample time for submission to the Human Subjects Review Board at George Mason University. The student will identify a committee of three faculty members to serve as advisors for the practice inquiry. At a minimum, the chair and one member of this committee must be from the School of Nursing. The third member may be drawn from other university faculty with expertise in the area of practice inquiry or from outside the university with permission from the committee chair and the director of the DNP program. The committee is responsible for approving the final written report of the project and its oral defense by the student. The practice inquiry project must demonstrate to the
Committee’s satisfaction knowledge in the core competencies of finance, policy, technology, and health care delivery systems. This project will be completed within two semesters.

**Time Requirements**
The student must successfully complete all aspects of the program within 6 years of admission to the program.

---

### Global and Community Health

#### UNDERGRADUATE PROGRAMS

- **Bachelor of Science in Community Health**
  
  **BS-COMH**

  **(pending SCHEV approval)**

  Upon final approval of the bachelor of science in community health, this degree will replace the community health concentration under the bachelor of science in health science.

  This degree prepares students with a basic knowledge and understanding of public health, the health care system, and issues and policies related to health promotion, disease prevention, and education. The focus is to understand health issues related to specific communities and larger populations at the national and international levels.

  Public health and community health professionals work in partnerships with other professionals in private and public community organizations and are expected to confront complex behavioral, cultural, and social health issues within communities. The skills and knowledge gained through this program prepare graduates to address the local, national, and global health needs of communities and populations, providing understanding, education, monitoring, evaluation, and interventions within a community setting.

  The program may be completed on a full-time or part-time basis. Interested students are encouraged to contact the Department of Global and Community Health before admission.

  A criminal background check may be required of students prior to beginning the internship if the organization requires one. A minimum grade of C must be maintained in all major courses. Students may substitute two 3-credit GCH courses for the internship, depending on the student’s work experience, with their advisor’s approval.

#### Community Health Major Courses

- GCH 295, 332, 350, 440, 460, 498
- HAP 303, 378, 416
- HHS 465
- Electives | 24 |
- Community health electives | 15 |
- General electives | 9 |

| Total | 120 |

BIOL 124 and 125 meet the natural science portion of Mason’s general education requirements. HHS 465 fulfills the university synthesis requirement.

- **Bachelor of Science in Health Science**
  
  **BS-HSCI**

  This degree prepares students to become managers and clinicians in a variety of settings, including hospitals; clinics; schools; community health, home care, long-term care, employee health, and managed care organizations; group medical practices; manufacturing, medical technology, and supply organizations; the insurance industry; and financial consultant services. Concentrations are offered in community health and gerontology.

  The community health concentration prepares students to understand health issues related to the community and larger populations at the national and international levels. The community health concentration will be replaced by the bachelor of science in community health upon SCHEV approval of the degree.

  The gerontology concentration is designed for students interested in providing services to the elderly in a variety of settings such as hospitals, clinics, community health centers, home health situations, senior centers, senior housing, long-term care, and many other service arenas. The program provides foundational knowledge in health science and aging, and is suitable for students who wish to work as clinicians, managers, and advocates for the elderly.

  The program may be completed on a full- or part-time basis. Interested students should contact the Department of Global and Community Health before admission. All pathways lead to completion of the objectives of the undergraduate program.

  A criminal background check may be required of all students prior to beginning the internship, if the organization requires one.

  A minimum grade of C must be obtained in all major courses.

  Students pursuing the gerontology concentration must be prepared to complete a 128-hour practicum experience of six to eight hours per week in an appropriate organization.

  Students must check with their advisor to ensure that all university general education requirements have been met prior to graduation. Students may substitute two 3-credit GCH courses for the internship with the approval of the advisor, depending on work experience.

BIOL 124 and 125 meet the natural science portion of Mason’s general education requirements. HHS 465 fulfills the university synthesis requirement.

Minor in Nutrition

The minor in nutrition offers a variety of courses for students pursuing undergraduate degrees at Mason. Students who may be interested in completing the minor include those pursuing degrees related to nutrition, health, and education. The minor is intended to increase knowledge of nutrition issues. This minor is not equivalent to the registered dietitian license and does not provide a license to practice therapeutic nutrition.

Minor Requirements

Applications are encouraged from all areas at Mason. Application is made through CHHS. Students are required to take an introductory nutrition course such as GCH 295. To complete the minor, students are required to pass 15 credits of undergraduate course work. At least 6 credits must be completed at Mason, and no more than 3 credits of C- or D in the minor are accepted.

Credits
Required Courses ............................................................. 12
GCH 420 Strategies for Nutrition Education ....................... 3
GCH 421 Community Nutrition ......................................... 3
GCH 422 Nutrition throughout the Life Cycle .................... 3
GCH 423 Nutrition and Chronic Illnesses ......................... 3

Electives ............................................................................. 3
Select one of the following:
CHEM 102 Introduction to Organic and Biological Chemistry .................................................... 3
CHEM 463 General Biochemistry ......................................... 3
GCH 466 Nutrition and Weight Management* .................. 3
GCH 530 Nutrition: A Global Perspective ......................... 3
GCH 583 Food and Culture: Biocultural Perspectives on Food and Nutrition ........................................ 3

*GCH 466 can be used to substitute for either GCH 420 or GCH 421.

Undergraduate Certificates in Global and Community Health

■ Undergraduate Certificate CERB-GERO in Gerontology

The undergraduate certificate program in gerontology prepares students for work with older adults, as well as with professionals who are already working with the elderly. The program provides a background of basic knowledge in gerontology and prepares students in professional skill areas such as counseling, recreation, social work, nursing, and administration.

The certificate program is administered by CHHS. Three other academic units participate in the program: the College of Education and Human Development, the Department of Psychology, and the Department of Sociology and Anthropology. A Gerontology Certificate Committee determines program policy and curriculum.

Academic advising and an application form are available through CHHS.

Certificate Requirements

The certificate program consists of 24 credits. Students receiving the certificate must already hold a baccalaureate degree or
have earned one from Mason by the time they receive the certificate.

**Course Requirements**

**Core Courses** ................................................. 12

Select four from the following:

- GCH 480 Health Maintenance and Health Aspects of Aging
- NURS 505 Case Management
- NURS 570 Cultural Dimension of Aging
- PSYC 415 Psychological Factors in Aging
- SOCI 441 The Sociology of Aging
- SOCW 483 Selected Approaches to Social Work Intervention

Gerontology Practicum (GCH 498) .................................. 6

Students must have completed at least 9 credits of core courses before enrolling in the practicum.

**Electives** ......................................................... 6

Select from the following:

- GCH 332; HEAL 110, 323, 480; PHED 415, 450, 499;
- PRLS 210, 310; PSYC 211, 325, 326, 415, 423; PUAD 502;
- SOCI 350, 390, 599; SOCW 200, 351, 352; reading and research in gerontology from any department

**Undergraduate Certificate CERB-NUTR in Nutrition**

This program offers a variety of courses in nutrition for future and present health care professionals, researchers, and others who are commonly faced with community-related nutrition issues. The program is intended to help health care professionals and others who would like to increase their knowledge in nutrition. This certificate is not equivalent to the registered dietitian license and does not provide a license to practice therapeutic nutrition.

**Certificate Requirements**

Applicants need not have a bachelor’s degree. Applications are encouraged from all areas of nursing and health sciences. Application is made through CHHS. A requirement for the certificate is 24 credits of undergraduate course work.

**Program of Study** .............................................. 12

Required Courses ................................................... 21

- GCH 295 Nutrition for Health Professionals
- GCH 420 Strategies for Nutrition Education
- GCH 421 Community Nutrition
- GCH 422 Nutrition throughout the Life Cycle
- GCH 423 Nutrition and Chronic Illnesses
- One sociology or anthropology course (which may include GCH 583)
- One developmental course such as in psychology or education

General Nutrition Electives ....................................... 3

Select one that has not been taken as a required course:

- CHEM 102 Introduction to Organic and Biological Chemistry
- CHEM 463 General Biochemistry
- GCH 466 Nutrition and Weight Management
- GCH 530 Nutrition: A Global Perspective
- GCH 583 Food and Culture: Biocultural Perspectives on Food and Nutrition

*GCH 466 may be substituted for either GCH 420 or 421.

---

**GRADUATE PROGRAMS**

**Master of Science in MS-EBST Epidemiology and Biostatistics**

The program prepares participants to apply epidemiological and statistical principles to quantitative analysis of health care issues. It is aimed at health scientists and professionals in government agencies, such as the National Institutes of Health, pharmaceutical companies, research hospitals, public health agencies, and other medical research organizations with the need to design experiments for medical and health services research. Graduates are expected to analyze and interpret increasingly complex, nonexperimental health care data. The degree is taught jointly by faculty from the Department of Statistics in the Volgenau School of Information Technology and Engineering and the Department of Global and Community Health in CHHS.

**Admission Requirements**

Applicants must hold a baccalaureate degree in a discipline related to health science or statistics, with a GPA of 3.00 in the last 60 credits. Courses in calculus at the undergraduate level through multivariate calculus equivalent to Math 113, 114, and 213 with a grade of B or better are required for admission to the program. Applications to the degree program are made through CHHS. Admission decisions are made by a joint faculty committee from the Department of Statistics and the Department of Global and Community Health.

**Degree Requirements**

Students must complete 36 credits of graduate course work. A graduate course in which a grade of C or below is earned may be repeated only once. Graduate students may repeat no more than two courses in their stated program of study. Students must achieve a 3.00 GPA to graduate.

**Program of Study** .............................................. 9

Required Courses ................................................... 12

- GCH 712 Introduction to Epidemiology
- GCH 726 Advanced Seminar in Epidemiology
- STAT 554 Applied Statistics
- STAT 660 Biostatistical Methods

Epidemiology and Biostatistics Requirements .................. 9

Select a minimum of three courses from the following:

- GCH 605 Social Epidemiology
- GCH 680 International Research Ethics and Methods
- GCH 722 Infectious Disease Epidemiology
- GCH 732 Chronic Disease Epidemiology
- GCH 752 Nutritional Epidemiology
- GCH/NURS 804 Advanced Quantitative Data Analysis for Health Care Research I
- GCH/NURS 805 Advanced Quantitative Data Analysis for Health Care Research II
- GCH/NURS 807 Measurement Theories and Applications in Health Care Research

Statistics Requirements ........................................... 9

Select a minimum of three courses from the following:

- STAT 544 Applied Probability
- STAT 574 Survey Sampling
- STAT 652 Statistical Inference
- STAT 655 Analysis of Variance
- STAT 656 Regression Analysis
Health and Human Services

Global Health. Students will learn about the fundamentals of cultural and multidisciplinary environments inherent to learning, students will be prepared to work in the diverse health environment. Through course work and experiential skills to work and conduct research within the global health issues, and international health research. Options of practicum or thesis tracks allow students to explore in situ health issues, and international health research. Graduates of this program will be given the knowledge base to work, including either a practicum or a thesis track. A practicum or Thesis* ........................................................ 6

Practicum or Thesis*
- GCH 799 Practicum in Public Health II ........................3
- GCH 798 Practicum in Public Health I ..........................3

Thesis track:
- GCH 788 Public Health Research I ...............................3
- GCH 789 Public Health Research II ..............................3

Electives (select from the following) ................. 9
- ANTH 599 Anthropology of Health ............................3
- ANTH 631 Refugees in the Contemporary World ............3
- COMM 506 Communication in International Organizations ......................................................... 3
- COMM 656 Global Communication ...........................3
- EOS 704 Spatial Analysis and Models of Populations ....3
- GEOG 540 Medical Geography .................................3
- GCH 583 Food and Culture: Biocultural Perspectives on Food and Nutrition ................................. 3
- GCH 602 Global Health Issues Related to Violence ....3
- GCH 605 Social Epidemiology ................................. 3
- GCH 722 Infectious Disease Epidemiology ..................3
- GCH 726 Advanced Seminar in Epidemiology ............3
- GOVT 641 Seminar on Global Systems .....................3
- HAP 609 Comparative International Health Systems ....3
- PUAD 636 The NGO: Managing the International Nonprofit Organization ........................................... 3
- PUBP 757 Public Policy in Global Health and Medical Practice ....................................................... 3
- PUBP 758 Global Threats and Medical Policy ............3

*Students may register for the practicum or thesis only with approval from their advisor and after they have completed at least 27 credits of the program.

Practicum track
- For the practicum track, which entails the application of an idea or theory through fieldwork, students will be required to work a minimum of 112 hours per practicum in an international health agency under the guidance of a preceptor and their faculty advisor. Students will be encouraged to conduct one practicum abroad and one within the Washington, D.C., region. Students must attend two seminar courses, complete a project while working in each international health agency, and produce a formal report and presentation during each practicum.

Thesis track
- For the master’s thesis track, students are required to work with a committee of three faculty members. The faculty advisor must be within the Department of Global and Community Health and the two other faculty members may or may not need to be faculty within the department. For the thesis, students must conduct a research project that will result in a research thesis. Their research, which should be understood to entail an original design to test a theory, will complement one of the faculty expertise areas within the department, including epidemiology, biostatistics, rehabsilations science, chronic illness, mental health, social networks, gerontology, nutrition, and health behavior. Students must take two thesis classes while working on their thesis. Students must develop a proposal and have it approved by their committee before undergoing the
research project. The thesis must conform to the format stated within the University Libraries guidelines.

**Master of Science in MS-HSCI Health Science**

This interdisciplinary program prepares students to focus on social, economic, political, and physiological aspects of global and community health.

The concentration in international health prepares students to manage health care programs operating in third-world countries. Students learn about international issues related to management of health care, including demographic patterns, disease burdens, cultural basis of disease, international policies affecting health care, and political economy of health and development. Graduates of this concentration are expected to work in U.S. international organizations.

**Admission Requirements**

Applicants must hold a baccalaureate degree and have earned a 3.00 GPA on a 4.00 scale. They should submit a completed graduate application through CHHS. Students may be admitted provisionally if their GPA is less than 3.00, but they are also required to submit GRE or MAT scores. Students admitted provisionally must achieve a 3.00 GPA in the first 12 credits of graduate work. If they fail to do so, they will be dismissed from the program. Applicants to the international health concentration must have 6 credits (or the equivalent) of a foreign language.

**Degree Requirements**

Students must complete 36 credits of graduate course work. A graduate course in which a grade of C or below is earned may be repeated only once. Graduate students may repeat no more than two courses in their stated program of study. Students must achieve a 3.00 GPA to graduate.

**Graduate Certificates in Global and Community Health**

**Certificate in Biostatistics CERG-BSTN**

This program prepares participants to apply statistical methods to quantitative analysis of health care issues. It is aimed at health scientists and professionals in government agencies, such as the National Institutes of Health. It is also aimed at professionals in pharmaceutical companies, research hospitals, public health agencies, and other medical research organizations who design medical experiments and analyze and interpret increasingly complex health care data. In addition, the program helps prepare students to begin careers in such organizations.

The certificate is a joint graduate certificate program from the Department of Statistics in the Volgenau School of Information Technology and Engineering and the Department of Global and Community Health in CHHS. Courses are taught by faculty members from both programs.

**Admission Requirements**

Applicants must hold a bachelor’s degree from a regionally accredited institution of higher education in a discipline related to health science or statistics, with a GPA of 3.00 in the last 60 credits. Such fields include medicine, biology, nursing, health science, biostatistics, statistics, mathematics, and psychology. A course in statistics and a course in college algebra with a grade of B or higher are required for admission to the program.

**Certificate Requirements**

Students must complete one course from each of the five groups. A minimum of 6 credits must be taken through the health science program.

- STAT 535 or STAT 554
- STAT 660
- GCH/NURS 804 or STAT 656 or STAT 668
- GCH/NURS 805 or STAT 662
- GCH 712

**Certificate in CERG-EPID Epidemiology**

Epidemiology is the study of the factors that influence the occurrence, distribution, prevention, and control of disease. This certificate prepares students to apply the principles and methods of epidemiology to health research. The program emphasizes the development of skills such as study design, data collection and management, data analysis and interpretation, and communication of research findings. All students in the certificate program must complete introductory courses in epidemiology and biostatistics and then choose four elective courses in areas such as infectious disease epidemiology, chronic disease epidemiology, social epidemiology, and advanced epidemiological methods.
Certificate Requirements

Students applying to the certificate must hold a bachelor’s degree. Application is made through the CHHS. Course work in statistics, health science, biological science, and the social sciences are beneficial in preparation for this certificate. A minimum GPA of 3.00 is required to earn the certificate.

Required Courses
- GCH 530 Nutrition: A Global Perspective ..................3
- GCH 566 Nutrition and Weight Management ...............3
- GCH 712 Introduction to Epidemiology .....................3
- GCH 751 Nutritional Assessment, Monitoring, and Surveillance .........................3

Electives (select four of the following) ..................12
- GCH 605 Social Epidemiology ................................3
- GCH 680 International Research Ethics and Methods ....3
- GCH 722 Infectious Disease Epidemiology ................3
- GCH 726 Advanced Seminar in Epidemiology ............3
- GCH 732 Chronic Disease Epidemiology ..................3
- GCH 752 Nutritional Epidemiology .........................3

Total ................................................................. 18

Other epidemiology-related course may count toward the certificate with prior approval of the program director.

For the Certificate in Gerontology (CErG-GERO), please see Catalog Addendum.

■ Certificate in Global Health

This program develops an understanding of global health through a practicum, as well as a sequence of courses that includes global health, epidemiology, nutrition, anthropology, international relations, communications, and geography.

Certificate Requirements

Applicants must hold a bachelor’s degree. Application is made through CHHS.

Required Courses
- GCH 530 Nutrition: A Global Perspective ..................3
- GCH 543 Global Health: Trends and Policies .............3
- GCH 590 International Health Organizations .............3
- GCH 798 Public Health Practicum I .........................3

Electives (select two of the following) ..................12
- ANTH 631; COMM 502, 637; GEOG 540, 581;
- HAP 609; HHS 597; PUAD 636

Total ................................................................. 18

■ Certificate in Nutrition

The graduate certificate in nutrition prepares students to apply the principles and latest scientific evidence and methods of nutrition to health practice and research among different populations. The program emphasizes understanding the role of nutrition in population health and well-being and the development of skills required in the practice, analysis, and interpretation of nutrition-related information and data among individuals and populations. Students will acquire competencies in the following areas: public health nutrition framework, assessment and monitoring; research design and methodology; and planning and evaluation of nutrition programs.

Certificate Requirements

Admission to this certificate requires a bachelor’s degree from an accredited institution of higher education with a minimum GPA of 3.00 in the last 60 credits. Application is made through the CHHS. Undergraduate courses in natural sciences, nursing, health science, and sociology are helpful. A minimum of 3 credits in equivalent course work taken at another college or university can be applied toward the certificate. A minimum GPA of 3.00 is required to earn the certificate.

Required Courses
- GCH 510 Scientific Basis for Pain, Fatigue, and Suffering in Chronic Illness and Disability .........................3
- GCH 550 Introduction to Rehabilitation Science ..........3
- GCH 551 Research Methods in Rehabilitation Science....3
- HHS 597 Approaches to Quantitative Data Analysis in Health Care Research ........................................3

Electives (select one of the following) ..................3
- GCH 506 Clinical Exercise Physiology ....................3
- GCH 620 Psychosocial Aspects of Rehabilitation ..........3
- GCH 637 Normal Aging and Health Deviations ...........3
- GCH 659 Health Care of Aging Persons with Chronic Illnesses ..........................................................3
- GCH 712 Introduction to Epidemiology .....................3
- GCH 732 Chronic Disease Epidemiology ..................3
The BS in health science prepares students to become managers and clinicians in a variety of settings, including hospitals; clinics; schools; community health, home care, long-term care, employee health, and managed care organizations; group medical practices; manufacturing, medical technology, and supply organizations; advocacy and associations; the insurance industry; and financial consultant services. Concentrations are offered in health systems management and in assisted living administration. An accelerated pathway in health systems management is offered to students who have an associate of science degree in social services or allied health.

The concentration in health systems management traditional and accelerated pathways prepare graduates to serve in entry-level administrative and support positions in a variety of health-related agencies and organizations. The concentration in assisted living administration provides graduates with the operational, marketing, resident care, and hospitality services skills required to become effective leaders and managers of assisted living and senior housing communities.

The program may be completed on a full- or part-time basis; the accelerated pathway for graduates of allied health or social services technical programs takes into account the needs of the adult learner. All pathways lead to completion of the objectives of the undergraduate BS program. A criminal background check is required of all students prior to beginning their internship. A minimum grade of C must be obtained in all required courses.

Students must check with their advisor to ensure that all university general education requirements were met prior to graduation. HAP 498 is a competitive internship elective offered in the student’s final semester as described below.

*The internship course (HAP 498) is a 6-credit requirement in assisted living and senior housing or hospitality services as approved by the program coordinator. This internship is designed to provide selected students with project-focused work experience in an assisted living or senior housing or hospitality enterprise under the direction of a preceptor.

HHS 465 satisfies the university synthesis requirement.

**GRADUATE PROGRAMS**

**Master of Science in Health Systems Management**

This program provides students with the skills and tools to work as leaders and executive-level managers in evolving health systems, health policy analysts, or consultants and managers of electronic commerce and technology products and enterprises in the health system. The curriculum was developed in response to the demand for advanced health management and policy preparation for a variety of health care and allied health professionals. Six concentrations are offered: executive management, health information systems, health care security and privacy, health policy analysis, assisted living/senior housing administration, and risk management and patient safety.

The program of study offers state-of-the-art technical and humanistic skills so that graduates may serve as leaders, managers, consultants, and health policy advisors and analysts in various settings. Graduates are prepared to work in public and private health care systems (including public health agencies); legislative arenas and policy-related professional and advocate organizations; and health accreditation and regulatory organizations. The curriculum integrates concepts from a variety of disciplines such as business management, economics, philosophy, organizational behavior, information technology, social psychology, public policy, law, and ethics as they uniquely apply to health systems and technology management, assisted living and senior housing services administration, and health policy formulation. For example, the concentration in assisted living/senior housing administration provides multidisciplinary education to support development and management and marketing of such services or entities, based on concepts of normal aging and integration and optimization with health-related services and systems to maximize and promote independence and quality of life for seniors.

The interdisciplinary curriculum is designed to prepare graduates with an understanding of the larger sociopolitical, global health, and economic contexts in which the U.S. health system operates. It provides working professionals with leadership knowledge and managerial skills and abilities that contribute to improving the efficiency and effectiveness of health systems and alignment of decisions and resources to optimize organizational and health-related public policy goals. Students examine social imperatives for access to health services and the feasibility, need, and mechanisms of market factors. They create links and alignment between public and private sectors and among voluntary, market, and regulatory forces in the context of a variety of public policy frameworks. Students explore the design and management of seamless systems of care, information technology, and services that support the providers of health-related care and services over the life span continuum, including assisted living and senior housing services. Using ethical principles, students explore approaches to improving access to care and services, the quality and safety of health systems and senior housing services and their integration to maximize quality of life and community health.

**Admission Procedures and Requirements**

Health care professionals with a baccalaureate degree and at least three years of recent leadership experience in a health or related management, public policy, or technology field are eligible to apply. Applicants must submit the following: transcripts from all previous college-level studies, a letter of interest specifying study goals, a curriculum vita, and a complete Mason graduate admissions form. GRE or GMAT scores may be requested if the applicant does not have a graduate degree or has an undergraduate GPA lower than a 3.00. Applicants are competitively selected. Admitted students begin study in January and August each year. Provisional admission can be made for students whose undergraduate GPA is lower than 3.00, but whose work since school indicates a high likelihood of success in graduate work. Students admitted provisionally with lower than a 3.00 GPA must achieve a 3.00 GPA in the first 12 credits of graduate work.

**Program Format and Curriculum Features**

The program schedule is geared toward working professionals. The usual schedule for students involves part-time study, comprising two classes (6 credits) per semester. Classes are held primarily in evenings, with some Saturday daytime classes. Selected courses also are available via the Internet.

Courses offer the following unique features:
• Content focuses on individual competencies in analytic decision making, and how services are provided across institutions and levels of care through integrated systems.
Services are analyzed according to their effect on individual health status and enrolled populations, and how individuals and groups affect the use of health services and outcomes. Business functions are taught in the context of integrated systems versus individual institutions. For example, financial management examines how risk is incurred and distributed across multiple institutions.

- Management skills are taught from the contexts of leadership in learning organizations and as team leaders managing self-directed professionals across functional and specialized service units. Business and clinical decisions are integrated with competencies in information systems and data management for effective administrative operations in health-related organizations, clinical decision support systems, quality and safety improvement efforts (including evaluation of clinical outcomes), and interorganizational relations and operations.
- Managerial competencies are also taught relating concepts of integrated services and managed care, based on optimization of the delivery of care and services to targeted populations in the community and market. The curriculum prepares graduates to assess health risks, understand consumer behavior, and structure community networks, specialty services, and integrated health systems.
- Health policy curriculum teaches applied public policy skills that support the development and analysis of health policy and the management of political, legislative, and regulatory processes involving the financing and service delivery in the health industry and health-related technology and information management, and governing health professionals practice.

**Degree Requirements**

The program of study comprises 39 credits (three concentrations): 24 credits from the common core of the degree and another 15 from one of the six concentrations.

**Required Courses**

- HAP 501 Business Statistics for Health Services Management ............................................ 3
- HAP 512 Introduction to Health Services Research ......................................................... 3
- HAP 586 Process Improvement in Health Services ......................................................... 3
- HAP 621 Management of Health Service Organizations ............................................. 3
- HAP 715 Health Economics ......................................................................................... 3
- HAP 740 Management of Health Information Systems ............................................ 3
- HHS 750 Legal Issues Relevant to Health Care Administration .................................. 3
- HAP 790 Health Management Practicum and Capstone Seminar ................................ 3

**Electives (select two of the following)**

- HAP 612 Maintaining Business Continuity in Health Care ............................................. 3
- HAP 735 Risk Analysis in Health and Biosciences ....................................................... 3
- HAP 745 Health Care Security Policy ........................................................................... 3
- HAP 746 Advanced Seminar on Security .................................................................... 3
- INF 565 Database and Distributed Systems Security Principles ..................................... 3

**Concentration in Health Information Systems (HISN)**

**Required Courses**

- HAP 601 Electronic Commerce and Online Marketing for Health Services .................. 3
- HAP 709 Health Care Databases ................................................................................... 3
- HAP 720 Health Data Integration .................................................................................. 3
- HAP 745 Health Care Security Policy ........................................................................... 3

**Concentration in Health Policy Analysis (HP)**

**Required Courses**

- HAP 542 Health Policy .................................................................................................. 3
- HAP 730 Health Care Decision Analysis .................................................................... 3
- HAP 866 Health Care Public Policy ............................................................................. 3

**Electives (select two of the following)**

- HAP 609 Comparative International Health Systems .................................................. 3
- HAP 703 Financial Management in Health Systems ...................................................... 3
- HAP 727 Program Evaluations in Health Care ................................................................ 3
- HAP 745 Health Care Security Policy ........................................................................... 3
- HAP 762 Cost-Effectiveness for Health Care Management and Policy Decisions ........ 3
- HAP 764 Health Policy and Government Payment Systems for Health Care Services ... 3
- HHS 855 Ethics in Health Care Administration ............................................................. 3
- PUAD 640 Public Policy Process ................................................................................... 3

**Concentration in Health Care Security and Privacy (HCSP)**

**Required Courses**

- HAP 612 Maintaining Business Continuity in Health Care ............................................. 3
- HAP 735 Risk Analysis in Health and Biosciences ....................................................... 3
- HAP 745 Health Care Security Policy ........................................................................... 3
- HAP 746 Advanced Seminar on Security .................................................................... 3
- INF 565 Database and Distributed Systems Security Principles ..................................... 3

**Concentration in Health Care Administration (ASHA)**

**Required Courses**

- HAP 650 Assisted Living Management and Operations ............................................. 3
- HAP 705 Strategic Management and Marketing in Health Care .................................... 3

**Electives (select three of the following)**

- GCH 585 Care and Management of Persons with Alzheimer’s Disease and Related Disorders 3
- GCH 637 Normal Aging and Health Deviations ............................................................ 3
- HAP 662 Aging and Health Care Policy ....................................................................... 3
- HAP 702 Health Accounting in Health Care ................................................................. 3
- HAP 703 Financial Management of Health Systems ..................................................... 3

**Concentration in Assisted Living/Senior Housing Administration (ASHA)**

**Required Courses**

- HAP 650 Assisted Living Management and Operations ............................................. 3
- HAP 705 Strategic Management and Marketing in Health Care .................................... 3

**Electives (select three of the following)**

- GCH 585 Care and Management of Persons with Alzheimer’s Disease and Related Disorders 9
- GCH 637 Normal Aging and Health Deviations ............................................................ 3
- HAP 662 Aging and Health Care Policy ....................................................................... 3
- HAP 702 Health Accounting in Health Care ................................................................. 3
- HAP 703 Financial Management of Health Systems ..................................................... 3

**Concentration in Risk Management and Patient Safety (RMPS)**

**Required Courses**

- HAP 690 Independent Study ......................................................................................... 3

(Students may also meet this requirement by taking courses in economics and law from the Law School or in the Administration of Justice Program within the Department of Public and International Affairs)

- HAP 730 Health Care Decision Analysis .................................................................... 3
- HAP 735 Risk Analysis in Health and Biosciences ....................................................... 3
Health and Human Services

Students accepted into the program but waiting for notification may take their initial course during Summer Term. Applicants must hold a bachelor’s degree. They must submit the Mason application and two letters of recommendation. Knowledge of the health care system and design of databases is not required, but students without this knowledge are required to take additional courses. Application is made through CHHS.

Certificate in Assisted Living/Senior Housing Administration
This 15- to 18-credit certificate is offered as part of the overall program in assisted living/senior housing administration within CHHS. It provides multidisciplinary education in assisted living and senior housing services management, including marketing, normal aging, and integration and optimization with health-related services and systems to maximize and promote quality of life for seniors. Courses enable students to evaluate, analyze, and synthesize information relative to the aging population, the evolution of assisted living and senior housing services within the U.S. health system, the application of business practices to these services, and current regulatory and policy issues. An additional focus is on biological, psychological, and social aspects of healthy aging, including those that support quality of life and independence for seniors with special needs (i.e., memory issues and dementias).

Certificate Requirements

</tr>
</tbody>
</table>

*HAP 678 may be substituted for an additional HAP approved course if the student has three or more years of previous health care-related experience.

Additional Requirements

Applicants must hold a bachelor’s degree in a health-related field or business administration or management, or a nonhealth or business bachelor’s degree and a minimum of two years professional experience in the health care industry. Students must complete all courses with a 3.00 GPA to earn the certificate.

Certificate in Health Care Security and Privacy
The curriculum is expected to enhance the skills of directors responsible for information and physical security at area hospitals, nursing homes, public agencies, insurance companies, and other health care agencies. The curriculum improves the effectiveness of these directors in bringing about change within their own organization and coordinating activities with counterparts in public and private agencies.

Requirements

Applicants must hold a bachelor’s degree. They must submit the Mason application and two letters of recommendation.
Program of Study

Students are expected to have broad health care experience or complete HAP 678, and knowledge of health care databases or complete HAP 709 or INFS 601.

Courses can be taken in any sequence. The recommended sequence is in the order of course numbers.

■ Certificate in Health Information Systems

This certificate prepares clinicians and health care managers to develop and manage health information systems and electronic commerce services. Students learn the development and management of systems and service related to patient records, enterprise data management in health industry, and Telehealth. The certificate is ideal for people with technical and programming skills who have been promoted to new managerial positions in the health care industry and wish to enhance their understanding of health care issues and management techniques. It is also ideal for clinicians and managers with little background in database management who wish to gain more skills and understanding about organizing health databases.

Admission Requirements

Applicants must have a bachelor’s degree. No prior computer programming training is needed, although knowledge of HTML language is assumed. Application is made through CHHS.

Program of Study

The certificate is composed of 15 credits. If the student does not have recent, relevant experience in the U.S. health industry, HAP 678 Introduction to the U.S. Health System (3 credits) is required, thus bringing the number of required credits to 18.

■ Certificate in Quality Improvement and Outcomes Management in Health Care Systems

This certificate prepares working clinicians and administrative support staff in health care organizations to implement quality-improvement initiatives and manage populations of patients to optimize efficiency and effectiveness of care and services. Participants acquire the knowledge and ability to work in interdisciplinary health care teams using the tools and techniques of statistical process control, and selected methods and tools from operations research and quality improvement. In addition, they use information management technology and qualitative decision-making applications to identify opportunities for clinical and administrative improvement, support decision-making optimization, and improve health-service outcomes for identified populations.

Certificate Requirements

Applicants must hold a bachelor’s degree. Application is made through CHHS.

Note: A course in basic computer skills (credit or noncredit) and HAP 678 Introduction to the U.S. Health System (mandatory for students without recent working experience in the U.S. health system) are considered optional for students who already possess the requisite knowledge and skills. They are required of those who do not.

To earn the certificate, students must complete all courses with a 3.00 GPA.

■ Certificate in Risk Management and Patient Safety

This graduate certificate prepares individuals with advanced skills in health-related risk assessment, management, and safety improvement in health care organizations to gain in-depth knowledge to function effectively as health care risk managers.

Certificate Requirements

Applicants must have a bachelor’s of science degree from an accredited university, or its equivalent. Applicants must have a grade point average of 3.00 or better, submit two letters of reference, and complete an application to the certificate program. No GRE, GMAT, or other tests are necessary. Foreign students must provide a TOEFL score.

Social Work

Phone: 703-993-2030 (Undergraduate programs)  
Phone: 703-993-4247 (Graduate programs)

UNDERGRADUATE PROGRAMS

■ Social Work, BS

This degree prepares students for beginning generalist professional practice in social work at the baccalaureate level and
has been granted full accreditation by the Council on Social Work Education. Students are expected to abide by the Code of Ethics of the National Association of Social Workers.

No academic credit toward field experience or course work is given based on life or previous work experience.

The social work program does not offer all required courses during evening hours. Students should meet with an advisor to develop a plan to complete course work for the degree.

SOCW 323 has been approved as a university synthesis course and is open to all majors.

### Admissions Requirements

To be admitted to the social work program, a student must have completed at least 45 credits with a GPA of 2.30; completed or be registered in BIOL 103, ENGL 101, SOCI 101, and PSYC 100; earned at least a C in SOCW 200, 301, 323, 351, and 357; satisfactorily completed at least 60 hours in one semester in a service learning agency in conjunction with SOCW 301; and submitted an application for the social work major to the director of social work admissions. Students should file this application during the junior year. The student’s application for admission to the social work major is reviewed for action by social work faculty members. A personal interview may be required.

There is no admission to the social work program in the summer. Students who have not met all criteria for admission to the major (including completion of service learning requirements) by May 30 will not be considered for admission until the fall semester.

### Degree Requirements

Students must successfully complete the following requirements:

<table>
<thead>
<tr>

<td></td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Electives</th>
<th>24–25</th>
</tr>
</thead>
</table>

Six credits must be in social work at the 400- or 500-level, not including courses listed above; SOCW 499 may be used to satisfy an additional 1 to 3 credits toward general electives.

**Total** 120

SOCW 110 Global Perspectives on Human Rights is open to social work and nonsocial work majors; it does not count toward the social work degree requirements.

The Social Work faculty evaluates student performance periodically and may require students to withdraw from the program when, in their judgment, performance is not satisfactory. The decision is based on the quality of academic and field performance, as well as on personal fitness for the profession of social work. Students have the right to appeal.

Class attendance is required in all Social Work courses.

SOCW 301 can only be taken in the fall semester and is a prerequisite to SOCW 359, SOCW 323, 351, and 357 are sequenced courses offered only during the fall semester. The second parts, SOCW 324, 352, and 358/359, are offered only during the spring semester and can only be taken on successful completion of the first parts (a grade of C or better). The sequencing requirement pertains only to social work majors. Graduation will be delayed if courses are not taken in proper sequence.

### Writing-Intensive Requirement

The university requires all students to complete at least one course designated “writing intensive” in the 300 level or above.

### Minor in Social Work

A minor in social work requires 19 credits as follows:

<table>
<thead>
<tr>
<th>Required Courses</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>SOCW 200 Introduction to Social Work</td>
<td>3</td>
</tr>
<tr>
<td>SOCW 301 Laboratory in Interpersonal Communication</td>
<td>4</td>
</tr>
<tr>
<td>SOCW 323 Human Behavior in the Social Environment I</td>
<td>4</td>
</tr>
<tr>
<td>SOCW 351 Social Policy and Social Justice I</td>
<td>3</td>
</tr>
<tr>
<td>Social work electives</td>
<td>6</td>
</tr>
</tbody>
</table>

Minor courses must be completed with a minimum GPA of 2.00. SOCW 357, 358, 359, 452, 453, 454, and 456 are not open to minors. See an advisor in the social work program for more information.

### Immunization and Fees

All students who are enrolled in a course that requires a field placement (SOCW 301, 359, 453, and 456) must have an annual tuberculosis screening (PPD). In addition, students must complete the entire hepatitis B immunization series in accordance with current U.S. Public Health Service recommendations. The cost of immunizations is the responsibility of the student. The majority of agencies used for field placements require fingerprinting, a criminal background check (may be more extensive than the university requirement), and a child protective services check. Any cost related to these requirements are the responsibility of the student.

### Insurance Coverage

Students who participate in internships (SOCW 301, 359, 453, and 456) are covered for liability under Virginia’s Self-Insured General Liability Insurance Plan and for medical malpractice under the Medical Malpractice Insurance Plan established by the Department of General Services, Division of Risk Management. These plans cover activities that the instructor has determined to be part of the student’s course work. Activities that are not part of the course practicum are not covered. (Exclusions
in the plan are listed in Section VII.) A copy of the Self-Insured General Liability Insurance Plan for Virginia is available in the Office of the Director of Field Education.

Mason is an affirmative action institution, and the social work program is committed to the principle that access to study or employment opportunities afforded by the university and program, including all benefits and privileges, be accorded to each person—student, faculty, or staff—on the basis of individual merit and without regard to race, color, religion, ethnic or national origin, veteran status, disability, sexual or political orientation, sex, or age (except where sex or age is a bona fide occupational qualification).

GRADUATE PROGRAMS

Social Work, MSW  MSW-SOCW

The MSW Program prepares students for advanced practice in social work. Following completion of a foundation year of study, students complete specialized concentrations in social change or clinical practice. Students are expected to abide by the Code of Ethics of the National Association of Social Workers. No academic credit toward field experience or course work is granted based on life or previous work experience.

To accommodate working students, MSW courses are offered on the Arlington Campus during late afternoon and evening hours. Field placements, however, generally require availability during regular daytime hours.

Admission Requirements

Admission is for fall semester only. In addition to meeting the university’s graduate admission requirements, students must have a minimum of 30 undergraduate credits in the liberal arts, including at least 3 credits in each of the following: English composition, human biology, history or government, social sciences, and statistics.

Students may complete the MSW Program under a two-year or three-year plan. All courses are sequenced and must be taken in the order designated. Students should meet with their academic advisor to ensure timely completion of all degree requirements.

To remain in good standing, students must earn a B- or better in each required course and maintain a 3.00 GPA. A course in which the student earns a C may be repeated once. A prerequisite must be satisfied with a B- or better before registering for the next course in a sequence. No more than 8 total credits of C may be repeated overall. Two course grades of F or 9 credits of unsatisfactory grades (C or F) will result in dismissal from the program.

Social Work faculty members evaluate each student’s performance periodically and may require the student to withdraw from the program when, in their judgment, performance is not satisfactory. The decision is based on the quality of academic and field performance, as well as on personal fitness for the profession of social work. The student has the right to appeal.

Nondegree students must seek department approval before registering for courses.

Total | 60

Additional Requirements

- Successful completion of 1,050 hours of supervised field practicum in agencies approved by the director of field education: 600 hours in conjunction with SOCW 672 and 673, and 450 hours in conjunction with SOCW 690
- Successful completion of a culminating thesis project

Advanced Standing

Students with a BSW degree who demonstrate superior academic achievement and excellence in social work practice will be considered for advanced standing. Advanced standing students begin the MSW Program in the summer and then move directly into the concentration year.

Minimum admission requirements include a BSW degree earned within the past five years from a program accredited by the Council on Social Work Education; a GPA of 3.20 for the last 60 credits; and 30 credits of undergraduate liberal arts courses, including a minimum of 3 credits in each of the following subjects: statistics, human biology, English composition, history or government, and social science. To receive an MSW, advanced standing students must successfully complete the following:

College of Health and Human Services  139

Health and Human Services
Conflict Analysis and Resolution.

Admissions information for both CHHS and Institute for MSW and MS programs. If accepted into both programs, students applying for the dual MSW and MS in conflict analysis and resolution program of its kind.

The Department of Social Work is partnering with Mason’s nationally recognized Institute for Conflict Analysis and Resolution to offer a three-year dual-degree program. Students can earn both an MSW and an MS in conflict analysis and resolution while taking advantage of the diversity of the Washington, D.C., metropolitan area and the university’s proximity to the nation’s capital. This is the only dual-degree program of its kind.

Admissions Requirements

Students applying for the dual MSW and MS in conflict analysis and resolution must apply separately to both the MSW and MS programs. If accepted into both programs, students request permission to pursue the dual degree. See admissions information for both CHHS and Institute for Conflict Analysis and Resolution.

Degree Requirements

Students must successfully complete the following:

**Social Work Courses**

- SOCW 623 Human Behavior and Social Systems I ...........................................3
- SOCW 624 Human Behavior and Social Systems II ...........................................3
- SOCW 651 Social Policies, Programs, and Services ...........................................3
- SOCW 652 Influencing Social Policy ....................................................................3
- SOCW 657 Directed Social Work Practice I .......................................................3
- SOCW 658 Directed Social Work Practice II ......................................................3
- SOCW 670 Communication and Technology for Social Work Practice .........3
- SOCW 672 Foundation Field Practicum and Seminar I ................................3
- SOCW 673 Foundation Field Practicum and Seminar II ................................3
- SOCW 684 Social Work and the Law .................................................................4
- SOCW 685 Organizational Leadership for Social Workers ..............................4
- SOCW 687 Empowering Communities for Change ...........................................4
- SOCW 688 Advanced Research in Social Work .................................................3
- SOCW 690 Social Change Field Practicum .......................................................6
- SOCW 691 Social Change Field Seminar ..........................................................3
- SOCW 697 Thesis Project Seminar ....................................................................3

**Conflict Analysis and Resolution Courses**

- CONF 601 Theories of Sources of Conflict and Multiparty Conflicts .........3
- CONF 610 Philosophy and Methods of Conflict Research ...............................3
- CONF 642 Integration of Theory and Practice .................................................3
- CONF 694 Internship .......................................................................................3
- CONF 713 Reflective Practice in Interpersonal-Multiparty Conflicts ............3
- CONF 795 Professional Development Seminar ..........................................5
- CONF Electives (selected with approval from ICAR) ...................................12

**Total** ..............................................................................................................86

**Insurance Coverage**

Students engaged in internships are covered for liability under the Commonwealth of Virginia’s Self-Insured Liability Insurance Plan and covered for medical malpractice under the Medical Malpractice Insurance Plan, as established by the Department of General Services, Division of Risk Management. Only practicum activities that have been determined by the field instructor to be part of the course are covered. Students are encouraged to obtain professional liability coverage through the National Association of Social Workers, although this additional coverage is optional.

**Immunizations**

All students who are enrolled in a course that requires a field placement (SOCW 672, 673, 690) must have an annual tuberculosis screening (PPD). In addition, students must complete the entire Hepatitis B immunization series in accordance with current U.S. Public Health Service recommendations. Any cost related to these requirements is the responsibility of the student. Students can register for classes prior to the completion of the immunizations. Immunizations are program requirements and must be completed by the student even if they are not required by the agency. Documentation must be submitted to the MSW Program administrative assistant.
The College of Humanities and Social Sciences (CHSS) is composed of 11 departments in the humanities and social sciences and 11 major interdisciplinary programs. The college is also home to New Century College, an innovative interdisciplinary first-year experience and degree program; Mason Topics, a unique first-year experience; and Technology Across the Curriculum, a program that promotes the use of technology to enhance learning in all courses and disciplines. Students are encouraged to explore interdisciplinary approaches to course work, taking advantage of the diverse academic learning community and access to faculty members who are leading scholars in their fields. Special opportunities for students include the Honors Program in General Education, honors programs within selected majors, first-year experience programs, internships, study abroad, and research experiences.

Our degrees give students a strong foundation of knowledge grounded in theory and research that is designed to address the complexity of real world issues. Undergraduate students in CHSS attain breadth through a broad distribution of courses in general education and depth through a major field of study. After building strengths in such areas as communication, ethics, leadership, and knowledge of global issues, students transition easily into positions that allow them to apply their knowledge to society. Undergraduates go on to graduate or professional schools, or they pursue a range of careers in public service, nonprofit organizations, and the private sector. Graduate students engage in specialized study at the master’s and doctoral levels, which allows them to seek first or second careers, job advancement, or personal enrichment.

The college has a distinguished faculty of more than 400, including one Nobel laureate and recipients of the Pulitzer Prize and the MacArthur and Guggenheim awards. They strive to make students rigorous thinkers and clear communicators, while encouraging experimentation with new approaches and ideas that are grounded in scholarship and research. Students are thus prepared for their role as informed citizens in a complex global society, able to adapt to an ever-changing world.

**Administration**
Jack R. Censer, Dean
Dee Ann Holisky, Senior Associate Dean
Doris A. Bitler, Associate Dean for Undergraduate Academic Affairs
Jamie S. Cooper, Associate Dean for Graduate Academic Affairs
Nance Lucas, Associate Dean for New Century College
Matthew Zingraff, Associate Dean for Research
Walter Rankin, Deputy Associate Dean for Undergraduate Academic Affairs
Donna Fox, Assistant Dean for Undergraduate Academic Affairs
Evan Baum, Director of Undergraduate Academic Programs
Heidi Bruce, Director of Development
Daniel Collier, Director of Information Technology
Leslie Dyre, Director of Finance and Human Resources
Glenda Morgan, Director of Technology and Learning Initiatives
Susan Swett, Director of CHSS Graduate Admissions

**GRADUATE PROGRAMS AND POLICIES**
The college offers 16 master’s degrees, including a master of public administration and a master of fine arts in creative writing, and 10 doctoral degrees. The requirements for each...
degree are described in the sections below. In addition to the policies stated in the first chapters of this catalog, the following policies and procedures apply to all graduate students in the college.

All correspondence from the department, program, college, and university administration is sent to the student's official Mason e-mail account. Students should use their Mason e-mail account to communicate with their department and other administrative units.

Rescinding an Offer of Graduate Admission

If an applicant is offered graduate admission, the college reserves the right to withdraw that offer of admission if:

1. During his or her academic studies, the admitted applicant has a significant drop in academic performance or fails to graduate with a degree prior to the first day of classes for the term admitted.
2. There has been a misrepresentation in the application process.
3. Prior to the first day of classes for the term admitted, the college learns that the admitted applicant has engaged in behavior that indicates a serious lack of judgment or integrity, irrespective of the outcome of any disciplinary process related to such behavior.

The university further reserves the right to require the applicant to provide additional information (and/or authorization for the release of information) about any such matter.

Academic Load

Graduate students can enroll in up to 12 credits of course work each semester. Nondegree students can enroll in up to 10 credits of course work each semester.

Non-degree Enrollment

Graduate non-degree students may enroll in 500-, 600-, and 700-level courses. In exceptional cases graduate non-degree students in the College of Humanities and Social Sciences may request to enroll in an 800-level course if they have an appropriate academic or professional background, and have written permission of the course instructor, director of the graduate program offering the course, and the graduate dean.

Consortium of Universities Registration

Students are limited to one consortium course per semester, with a career maximum of 6 credits. To register for a consortium course, students must have an overall GPA of at least 3.00 and be in good academic standing. Students with grades of IN on their record or who earned grades of C or F in the most recent semester are not eligible to register for a consortium course. Students who have received a grade less than 3.00 in a consortium course are not permitted to enroll in additional consortium courses. Newly admitted graduate students are not permitted to enroll in consortium courses during their first semester of graduate study. Students who wish to enroll in consortium courses during their second semester of study must wait until the grades for the previous semester have been posted. More information about the Consortium of Universities can be found in the Academic Policies chapter.

Transfer of Credit

To be eligible for transfer, credits must have been earned at an accredited graduate degree-granting institution (and applicable to a graduate degree at that institution) or at Mason while in nondegree status. Courses accepted for transfer credit must have been completed within six years of the admission term and with a grade of B or better (3.00 or higher). Courses with grades of P or S are not accepted for transfer unless the official transcript indicates that the grade is equivalent to a B (3.00) or better. Some programs have more stringent standards on transfer of credit; students should contact their graduate program for specific information.

Credit from Other Institutions

Students must obtain all approvals, including course equivalencies, prior to enrolling in any course work at another institution. All appropriate paperwork must be submitted to the Registrar’s Office by the last day to add during the academic term the course meets. Students enrolling in courses at other institutions with different drop/add timetables must still abide by Mason’s drop/add deadlines in terms of acquiring necessary approvals.

Provisional Admission

Students provisionally admitted to their graduate degree program are not eligible to enroll in consortium course work or study at another institution until the conditions of the provisional contract have been met. Provisionally admitted students are also not eligible to participate in any study abroad programs until the provisional qualifier has been removed. Transfer of credit requests for course work taken in nondegree status at Mason or from another institution prior to admission will not be considered until the provisional contract has been fulfilled.

Dissertation Committee Criteria

All dissertation committees must consist of at least three members of the graduate faculty, two of whom have a full-time appointment at Mason. At least one member must be a tenured or tenure-track faculty member in the College of Humanities and Social Sciences, and at least one member must be from outside the student’s academic unit. Additional members may be appointed who are not members of the graduate faculty or who are not full-time employees of the university. Individual departments and programs may set additional requirements for committee membership. The graduate program director recommends appointment of the dissertation committee to the dean. Though the dean appoints the committee it is the responsibility of the student to find qualified faculty who are willing and able to supervise the dissertation.

Dissertation (999) Registration

Doctoral students must be advanced to candidacy before they may enroll in 999. Students must register for 999 before the add deadline published each semester in the Schedule of Classes. Once doctoral students begin registering for 999, they must enroll in at least 3 credits of 999 each semester (excluding summers) until they have completed the total number of dissertation credits required on their individual program of study. Once enrolled in 999, all doctoral students must maintain continuous enrollment in 999 until they deposit their approved dissertation in the University Library. If they have completed the number of dissertation credits required on their program.
of study, they may maintain continuous enrollment by registering for only 1 credit of 999. See detailed information in the Academic Policies chapter of this catalog.

Graduate Appeals of Dismissal or Termination
All graduate students should be familiar with the university polices on dismissal and termination as stated in the Academic Policies chapter. Students who meet the criteria for dismissal or termination may submit a written appeal to the Office of Graduate Academic Affairs. Appeals should include all relevant information on the basis for appeal, as well as any appropriate documentation. Appeals of termination and dismissal are reviewed at the beginning of each semester by a faculty committee. The ruling of that committee represents the final decision of the college.

Grievances
Grievances should be directed in writing to the senior associate dean. The CHSS Graduate Academic Affairs Office may also provide guidance to students on how to resolve their concerns.

UNDERGRADUATE PROGRAMS AND POLICIES
The baccalaureate degree is designed to provide a broad knowledge of the world, develop in students the ability to think conceptually and critically, acquaint them with many different methods of inquiry, and provide skills to continue intellectual growth throughout life. Because these goals can be achieved in many ways, students may select from a range of courses for completing them. The selection of courses should not only deepen knowledge in areas of interest, but also expand the range of those interests. The courses enable students to link the present to the past, their culture to other cultures, and what is to what could be. Learning to make these connections increases the ability to understand and enjoy the world in ways not yet imagined.

CHSS offers 16 bachelor of arts (BA) degrees, 6 bachelor of science (BS) degrees, and a bachelor of individualized study (BIS) degree. The undergraduate degree consists of course work in four areas: university-wide general education, college-level requirements, a major area of study, and electives. All students must complete 120 credits, of which at least 45 must be in upper-level courses (numbered 300 and above). At least one course at the 300 or 400 level must be designated “writing intensive.” All entering students who have not yet satisfied the university-wide general education requirement in quantitative reasoning are required to take the math placement test prior to enrollment.

CHSS cooperates with the Institute for Conflict Analysis and Resolution (ICAR) to provide courses from various disciplines in the college toward a BA, BS, and minor in conflict analysis and resolution (CAR). More information about CAR undergraduate degree programs can be found in the Institute for Conflict Analysis and Resolution chapter.

Students should consult the University General Education chapter for information concerning university-wide general education requirements for undergraduate degrees. All students are responsible for reviewing their transcripts and degree audits regularly to ensure that they are correct and meet all their requirements. Transfer students are encouraged to meet with their academic advisor prior to registering for classes to review their transcripts and course equivalencies. In some cases, students may need to earn more than 120 credits to complete all of their requirements.

Excluded Courses
Military Science (MLSC), Physical Education (PHED), and Parks, Recreation, and Leisure Studies (PRLS) activity courses cannot be counted toward credits required for a degree in CHSS. Students may use nonactivity PHED and PRLS courses for elective credit for CHSS degrees.

Accommodations for Disabled Students
Students with documented disabilities should contact the Office of Disability Services (Student Union I, Room 222; 703-993-2474) to open a file and learn more about accommodations that may be available to them.

Exceptions to Academic Policies
Students with questions regarding exceptions to academic policies and college-level requirements should consult with the CHSS Undergraduate Academic Affairs Office (Enterprise Hall, Suite 316; 703-993-8725; chssdean@gmu.edu). Policy information and forms are available online at www.gmu.edu/student/academicaffairs.

Grievances
Grievances should be directed in writing to the senior associate dean. The CHSS Undergraduate Academic Affairs Office may also provide guidance to students on how to resolve their concerns.

College-Level Requirements
Bachelor of Arts
The BA degree provides students with a breadth of knowledge as well as the necessary skills to make in-depth study of a major truly meaningful. In addition to the university-wide general education program, students pursuing a BA degree must complete the course work below. Except where expressly prohibited, a course used to fulfill a college-level requirement may also be used simultaneously to satisfy other requirements (university-wide general education requirements, college-level requirements, or requirements for the major).

- Philosophy or religious studies: 3 credits fulfilled by any course in philosophy or religious studies (PHIL, RELI)
- Social and behavioral science: 3 credits in addition to the university-wide requirement in social and behavioral science for a total of 6 credits. The two courses used to fulfill the combined college and university requirements must be from different disciplines in the social and behavioral sciences. This requirement may be fulfilled by completing any course in ADJ, ANTH, ECON, GEOG (except GEOG 102 or 309), GOVT, HIST (except 100 or 125), LING, PSYC, or SOCI.
- Natural science: 1 credit in addition to the university-wide requirement for a total of 8 credits. This requirement can be fulfilled by completing two of any approved natural science courses that include a laboratory experience. This requirement may not be fulfilled by BIOL 124 or 125.
- Foreign language: intermediate-level proficiency in one foreign language. This requirement may be fulfilled by...
Minors
Students may elect to take a minor in addition to their major field of study. For policies governing all minors, see the Academic Policies chapter of this catalog. Students interested in earning a minor should complete the appropriate section of the Change/Declaration of Academic Program form and submit it to the Office of the Registrar.

Administration of Justice

Phone: 703-993-8315
Web: adj.gmu.edu

Faculty
Professors: Mastrofski (chair), Taxman, Zingraff
Research professors: Gantley, Patten, Turner, Waddington
Associate professors: Gallagher, Gould, Wilson
Assistant professors: Agha, Johnson, Lum, Merola, Portillo, Rudes, Willis
Term instructors: Newmark, Sizemore, Wheeldon
Affiliate faculty: Uchida

Course Work
The Administration of Justice Department offers all course work designated ADJ and JLCP in the Course Descriptions chapter of this catalog.

UNDERGRADUATE PROGRAM

**Administration of Justice, BS  BS-ADJ**

This program provides a sound foundation in the liberal arts and a focused study of the justice system and social, human, and moral problems raised in the administration of justice. The course of study prepares students for careers in law enforcement, corrections, the courts, investigations, juvenile justice, private and homeland security, and related social and human services. The program also provides a strong background for law school and graduate study in criminal justice or law and society.

Students may use up to 18 credits of approved ADJ courses taken at Northern Virginia Community College (NVCC) or another community college to fulfill the requirements detailed below. Once a student matriculates at Mason, no courses may be taken at another institution without prior written approval from the program and the dean.

**Degree Requirements**

In addition to satisfying the university general education requirements, students pursuing this degree must complete 67 credits with a minimum GPA of 2.00 distributed as follows:

- Five core courses (16 credits): ADJ 100, 300, 303, 306, 424
- 36 credits of approved elective courses chosen from the following, including at least 24 credits of ADJ courses: ADJ 301, 302, 304, 305, 307, 308, 400, 401, 402, 403, 404, 405, 406, 407, 408, 409, 422, 423, 425, 460, 461, 462, 471, 475, 490, 491, 492, 499; GOVT 101, 103, 320, 420, 421, 452; PHIL 151, 311, 326; PSYC 100, 211, 231, 314, 325, 326; SOCI 101, 301, 308, 310, 315, 352, 401, 475; SOCW 400, 410, 423, 430; CONF 300, 302, 320, 330, 393

**Bachelor of Science**

The BS degree provides students with a more intensive approach to the core technical questions of their majors. This curriculum has a reduced number of courses in humanities and social sciences in comparison with the BA degree to allow students to achieve greater depth in their majors. CHSS students pursuing a BS must complete the university-wide general education program plus 1 additional credit of natural science (for a total of 8 credits), which must be fulfilled by an approved two-semester laboratory science sequence in a single science. This may not be fulfilled by BIOL 124 and 125. Requirements for each major are listed in the departmental sections that follow.

**Teacher Licensure**

Students who plan to seek teacher licensure and become K–12 teachers should consult the College of Education and Human Development chapter of this catalog and attend an information session early in their undergraduate career. For more information, call 703-993-2892, e-mail gseadmis@gmu.edu, or go to gse.gmu.edu.
• 15 credits of skills for the justice professional chosen from the following: ADJ 479/480; foreign language courses that develop or require foreign language skills and are taught in the language; GEOG 311; GOVT 305, 309, 351, 355, 356, 357, 359, 364, 366, 376, 400, 416, 459, 464; PSYC 260; SOCI 405, 410; STAT 362, 455, 463, 474; SOCW 200, 301, 323, 324, 351, 352, 425, 430; any CS course; any IT course

ADJ majors have the option of obtaining a concentration by completing 15 of their 36 elective credits within one of the following areas.

▲ Concentration in Criminal Justice (CJUS)
15 credits chosen from ADJ 302, 304, 305, 307, 400, 401, 402, 403, 404, 408, 409, 425, 471

▲ Concentration in Law and Society (LAWS)
15 credits chosen from ADJ 301, 308, 405, 406, 407, 408, 422, 423, 460; GOVT 452

Credits earned in ADJ 490, 491, 492, and 499, when relevant, may be applied to a concentration with prior written approval of the director of the BS in Administration of Justice Program.

Writing-Intensive Requirement
The university requires all students to complete at least one course designated “writing intensive” in their majors at the 300 level or above. Students majoring in administration of justice fulfill this requirement by successfully completing ADJ 303. Students should complete ENGL 302 before taking the writing-intensive course in the major or take the two courses simultaneously.

Honors Program
Qualified students may pursue advanced work leading to graduation with honors. Those highly qualified students selected for the honors program participate in a two-course sequence, ADJ 491 and 492. To graduate with honors in ADJ, students must complete these courses with a minimum GPA of 3.50.

Minor in Administration of Justice
This minor develops knowledge of the principles, institutions, and practices for systems of administering justice. It provides a solid foundation for students seeking to supplement their major area of study, develop knowledge and skills needed for justice-related occupations, or lay the foundation for possible graduate study in the justice field. Students first obtain an overview of the justice system, learn legal or ethical standards by which to judge the behavior of justice practitioners, and then develop advanced knowledge of selected features of the justice system.

Students pursuing this minor must complete 15 credits distributed as follows:
• One required course (3 credits): ADJ 100
• Four courses (12 credits) of upper-level ADJ courses (excluding ADJ 479 and ADJ 480)

Students should plan their course of study with an Administration of Justice faculty advisor who will be assigned by the program. The minor must be approved by the Administration of Justice Program before graduation. At least 9 credits must be completed at Mason. For policies governing all minors, see the Academic Policies chapter of this catalog. In accordance with university policy, at least 8 credits must be applied only to the minor and may not be used to fulfill requirements of the student’s major, concentration, or another minor.

GRADUATE PROGRAMS

- Justice, Law, and Crime Policy, MA

The master’s degree in justice, law, and crime policy (JLCP) prepares graduate students for doctoral study or employment in academia or relevant policy or practitioner communities.

The program draws from a multidisciplinary faculty in the Administration of Justice Program for required core courses and electives. It also makes available a wide range of other electives from many different university programs, including those in computational social science, conflict analysis and resolution, economics, government, law, philosophy, psychology, public administration, sociology, and statistics.

The program takes advantage of the university’s proximity to many justice organizations at the federal, state, and local levels in the capital region. The curriculum is structured to give students the skills to do policy-relevant research and work with justice and security agencies in the region to exercise those skills and serve the needs of those agencies.

Application Requirements
See the Application for Graduate Study for admissions deadlines. Late applications will be considered on a space-available basis. There is no required background or preferred experience, but students should demonstrate interest in and aptitude for graduate study in justice, law, and crime policy. In addition to meeting all requirements for graduate study, applicants should submit three letters of recommendation from faculty members or individuals with first-hand knowledge of academic or professional capabilities; a statement of purpose of study no longer than 500 words; official verbal, quantitative, and analytical GRE scores on tests taken within five years of application submission; and a writing sample of a recent sole-authored work of at least 2,500 words. An interview may be required.

Satisfactory Progress
Each new student is assigned a faculty advisor who helps develop a program of study. The advisor and JLCP faculty assess the progress of all students annually. Students who fail to make satisfactory progress may be terminated from the program. Satisfactory progress in the JLCP Program is defined as maintaining a GPA of at least 3.00 and all course work must result in grades of B- or above. An academic warning will be issued at the first grade below B-, and dismissal will be initiated at the second grade below B-.

Degree Requirements
Students pursuing this degree must complete 30 credits distributed as follows:
• Four core courses (12 credits) in three fields:
  • Justice and law: JLCP 700, 720
  • Justice organizations, administration, and leadership: JLCP 740
  • Crime and crime policy: JLCP 760
• 9 credits of analytic methods: JLCP 780; 782, 783
Students must show satisfactory progress in the degree program.

Financial Assistance

The program offers financial assistance on a competitive basis through graduate assistantships and fellowships. Students on financial assistance must show satisfactory progress in the degree program.

Reduction of Credit

Students entering the doctoral program with a master’s degree in a related discipline, including law degrees, may request that the required credits for the doctoral degree be reduced by a maximum of 24 credits with approval of the program director and dean and in accordance with university policy. Students who have prior graduate course work that has not been applied to another degree may request to have a maximum of 12 of these graduate credits transferred to their JLCP degree program, with approval of the program coordinator and dean and in accordance with university policy.

Satisfactory Progress

Each new student is assigned an advisor who helps develop a program of study. The program of study must be submitted by the end of the first year. On advancing to candidacy, the chair of the dissertation committee becomes the advisor. The advisor and JLCP faculty assess the progress of all students annually. Students who fail to make satisfactory progress may be terminated from the program or dismissed from the university. Satisfactory progress in the JLCP program is defined as maintaining a GPA of at least 3.00 and all course work must result in grades of B- or above. An academic warning will be issued at the first grade below B-, and dismissal will be initiated at the second grade below B-.

Degree Requirements

In addition to satisfying the requirements for all doctoral degrees, students must successfully complete required course work, pass two qualifying exams, and form a dissertation committee, after which they are advanced to candidacy. The final requirements are the dissertation proposal defense and a dissertation of original research representing a significant contribution to the field, which should be publishable in a refereed journal or a quality press.

The 72 credits of course work are distributed as follows:

- Four core substantive courses (12 credits): JLCP 700, 720, 740, 760
- Four analytical methods courses (12 credits): JLCP 780, 782, 783; and one elective course chosen from analytic methods courses listed below
- Six elective substantive courses (18 credits): Three courses (9 credits) in each of two substantive fields of study listed below
- At least one elective course (3 credits) relevant to JLCP
- 3 to 6 credits of dissertation proposal JLCP 998
- 12 to 21 credits of dissertation JLCP 999

Once enrolled in 998, a student must maintain continuous registration in 998 or 999 each semester until the dissertation is submitted to and accepted by the University Library.

Qualifying Exams

Students must pass written qualifying exams in two core substantive fields of the student’s choosing, selected from the three fields below. Students may take a single qualifying exam at each sitting. All three qualifying exams will be offered at each sitting.

Students are not eligible to take the qualifying exams until they have successfully completed the required course work, as well as course work in the substantive area in which they intend to sit for the qualifying exam. Students earning the master’s in JLCP must have completed the master’s thesis (799).
Students have one opportunity across both exam areas to retake a failed exam.

**Advancement to Candidacy**
To advance to candidacy, students must complete all course work required on their approved program of study. Students must also successfully complete and pass two qualifying exams. In addition, students must have a dissertation committee appointed by the Dean’s Office.

**Dissertation Committee**
The student’s committee is composed of at least three faculty members and a chair, at least two of whom must be full-time JLCP faculty and one, a member of the graduate faculty outside JLCP. The chair must be a full-time JLCP faculty member.

**Substantive Fields of Study**
In addition to the required analytical methods and substantive core courses, the curriculum offers three substantive fields. Doctoral students must select two substantive areas and complete three courses within each area. Master’s students may take any of the elective courses. Elective courses in each of these areas of study are listed below. Students may take one non-JLCP elective course in each area.

**Justice and Law**
Justice-related electives: JLCP 702, 703; GOVT 520, 725, 631; SOCI 611, 612, 619, 640; CONF 501, 701, 720, 721, 723, 724, 726, 747, 802, 803; PHIL 656; ECON 611, 852, 854

Law-related electives: JLCP 721, 722, 723, 730; SOCI 503; PHIL 611; CONF 733; ECON 895 (when topic is law and economics); selected LAW courses*

*Successful completion of JLCP 720 and 721 is a prerequisite for enrollment in LAW courses, which also requires preapproval from the JLCP coordinator, law school instructor, and associate dean for student academic affairs of the Law School.

**Justice Organizations, Administration, and Leadership**
JLCP 741, 742, 743, 749, 509, 510, 691; PUAD 502, 620, 621, 622, 640, 661, 671, 680, 700, 727, 781; CONF 731, 741, 742, 743; PSYC 532, 631, 639; SOCI 505, 523, 525, 692

**Crime and Crime Policy**
JLCP 761; SOCI 607; GOVT 745; PUAD 640, 644, 741; CONF 734; PSYC 616, 617

Elector courses under the analytical methods requirement JLCP 781; SOCI 631, 632, 634; STAT 574, 658, 662, 665, 673, 674; PSYC 633, 640; PUAD 643; CSS 600, 610

Students may use other courses offered by JLCP or other programs as elective credit for a substantive field with prior written approval of the student’s advisor, director of the JLCP program, and sponsoring program.

---

**Communication**

**Communication, BA**

**Communication, BA-IOC**

Study in communication prepares students for graduate study or entry-level positions in such fields as interpersonal and organizational communication, journalism, media production and criticism, persuasive and political communication, and public relations.

**Degree Requirements**
In addition to satisfying the university-wide general education requirements and requirements for the BA degree in CHSS, students pursuing this degree must complete 36 credits distributed as follows:

- Six required courses (18 credits): COMM 200, 300, 301, 302, 305, 400 (Students must complete COMM 200 with a grade of C (2.00) or better before enrolling in COMM 300, 301, 302, or 305.)
- Two courses (6 credits) of electives in communication
- Four courses (12 credits) in an approved concentration. Students must declare a concentration before they earn more than 75 credits. Transfer students with 60 or more credits are encouraged to declare a concentration by the end of their first semester. Specific sections of COMM 399 Special Topics in Communication may be applied toward a concentration with prior written approval of the undergraduate director.

**Concentration in Interpersonal and Organizational Communication (IOC)**

Four courses (12 credits) chosen from COMM 201, 230, 320, 332, 335, 344 (1), 349 (1), 401, 430, 434, 465

---

**Faculty**

**Professors:**
- Bolteau, Botan, Decker, Friedley, Kreps
- (Eileen P. and Steve A. Mandell Term Professor of Health Communication; chair), Lichter, Lont, Maibach, McAuley, Rowan (associate chair)
- Emeritus professors: Looney, Manchester, Taylor
- Associate professors: Gibson, Muir, Nicotera, Villagran
- Assistant professors: Cai, Farnsworth, Hopson, Muthuswamy, Zhao

**Term full professor:** Pober
**Term associate professor:** Finn
**Term assistant professors:** Bedore, Powell, Wright
**Term research assistant professor:** Roser-Renouf
**Term instructors:** Anderson, M. Dickerson, Haynes, Klein, R. Smith, Talkington, Tomasic, Warren
**Term research instructor:** McCutcheon

**Adjuncts:** Ahmad, Akyeampong, Atwell, Aw, Barber, Beck, Biedrzycki, Chaaban, Chilcote, Clark, Cordero, Dance, Dickerhoof, N. Dickerson, Dillon, Doyle, Effros, Feigenbaum, Fisher, Garifo, Gauthier, Gladis, Greiner, Hadji, Hansche, Harzold, Holsonbake, Kahn, Kehoe, Kohlmann, Kraus, Kubiske, Ledford, Lehman, LeValley, Long, Mangus, Mattox, Moss, Outlaw, Payne, Peck, Plaag, Schmeidler, Simpson, Slagle, Stumpo, Suarez, Trowbridge, Van Zummeren, Walsch, Walter, Wilson, Wolyn, R. Wood

**Affiliate:** J. R. Censer (professor)
▲ Concentration in Journalism (JNL)
One required course (3 credits): COMM 303
Three courses (9 credits) chosen from COMM 145 (1), 203, 210, 330, 345 (1), 351, 352, 353, 356, 361, 362, 370, 391, 412, 431, 434, 435, 454, 455, 475

▲ Concentration in Media Production and Criticism (MPC)

▲ Concentration in Persuasive and Political Communication (PPC)
Four courses (12 credits) chosen from COMM 140 (1), 141 (1), 142 (1), 143 (1), 230, 260, 261, 320, 326, 340 (1), 341 (1), 342 (1), 343 (1), 362, 380, 412, 430, 431, 432, 454, 465

▲ Concentration in Public Relations (PR)
Four courses (12 credits) chosen from COMM 202, 230, 260, 261, 303, 320, 330, 335, 351, 362, 375, 389, 390, 391, 430, 454

▲ Individualized Concentration (IC)
With the approval of their advisor and associate chair, students may construct an individualized concentration.

Of the 21 credits in the second and third categories above, at least 12 must be at the 300-400 level. The 21 credits may include no more than 10 credits from the following courses: COMM 140, 141, 142, 143, 145, 148, 157, 340, 341, 342, 343, 345, 346, 348, 349, 450, 451, 452, 499; and no more than 6 credits of COMM 450 (internship). No more than 9 credits of internship (COMM 450 or GOVT 450) in total may be applied to the 120 credits required for a degree.

Communication majors must earn a C (2.00) or better in all required or elective communication courses applied to the major. Students declaring the major in fall 2005 and thereafter must meet this requirement.

Writing-Intensive Requirement
The university requires all students to complete at least one course designated as writing intensive in their majors at the 300 level or above. Students majoring in communication fulfill this requirement by successfully completing COMM 300.

Presentation-Intensive Requirement
All communication majors are required to take at least one of the following courses to fulfill a presentation-intensive requirement: COMM 100, 210, 260, 310, 320, 356, or 399 (when the topic is special occasion speaking).

Communication Student Activities and Organizations
All students are encouraged to participate in one of the communication activities: Broadcast, debate, forensics, GMView, Mason Cable Network, PRSSA, or WGMU. Many students include an internship during their senior year as a way of gaining practical experience with national and international businesses, associations, or government agencies.

Honors Program in Communication
Communication majors who have completed 80 credits with an overall minimum GPA of 3.50 and a minimum GPA of 3.50 in communication courses are eligible to apply to the departmental honors program. Candidates for the honors program must have satisfactorily completed or be enrolled in COMM 200, 300, 301, 302, 305, and 400 before applying to be in COMM 425. Students who meet the criteria for admission are invited to submit a proposal for an honors thesis. If the proposal is approved, they are admitted to the honors program. To graduate with honors in communication, students must complete COMM 425 Honors Seminar in Communication, maintaining a minimum GPA of 3.50 in this course and an overall minimum GPA of 3.50. For more information, contact the director of the honors program in communication.

Minors
Students may choose to minor in any discipline that offers an undergraduate minor program (refer to this course catalog for descriptions of all university minors). The Communication Department houses two minors: communication and electronic journalism (see below). It also participates in several minors, including film and media studies, multimedia, and women and gender studies. For a description of these minors, see the Interdisciplinary Minors section of this chapter. In accordance with university policy, at least 8 credits must be applied only to the minor and may not be used to fulfill requirements of the student’s major, concentration, or another minor.

Minor in Communication
The Department of Communication offers a minor to students who major in any other discipline.

Students pursuing the minor must complete 18 credits in communication beyond the 3 credits used to satisfy the university general education requirement distributed as follows:

- One required course (3 credits): COMM 200
- Two courses (6 credits) chosen from COMM 300, 301, 302, 305
- One course (3 credits) that is public presentation intensive (PPI) chosen from COMM 100, 210, 310, 320, or 356.
  (COMM 399, when it is PPI, may be applied to this requirement with prior approval of the director of the minor.)
- 6 additional credits of COMM courses

Students must earn a C or better in all courses applied to the minor.

Minor in Electronic Journalism
Electronic journalism provides a foundation in journalism with a focus on the writing style and research techniques unique to broadcast, online, and computer-assisted reporting.

Students pursuing this minor must complete 18 credits with a minimum GPA of 2.00 distributed as follows:

- Four required courses (12 credits): COMM 303, 351, 361, 475
- Two electives (6 credits) chosen from COMM 203, 352, 353, 370, 399*, 435, 450**, 454
  * All 399 courses must be approved by the director of the minor.
  ** If topic or internship is approved by the director of the minor.

This minor is not available to communication majors pursuing a concentration in journalism. For policies governing all minors, see the Academic Policies chapter of this catalog.
Teacher Licensure
Students who plan to seek teacher licensure and become K–12 teachers should consult the College of Education and Human Development chapter and attend an information session early in their undergraduate career. For more information, call 703-993-2892, e-mail gseadmit@gmu.edu, or go to gse.gmu.edu.

GRADUATE PROGRAM

Communication, MA

The master of arts (MA) degree in communication at Mason examines the powerful role played by communication practices in contemporary society. The program has two major areas of emphasis: health and strategic communication.

Our strategic communication faculty members teach courses on planning, developing, executing, and evaluating public communication campaigns based on their expertise in public relations theory and research. Our health communication faculty members explore the relationship between communication practices and the health and well-being of individuals and communities, including everything from how to improve cooperation and coordination between health care providers and patients to how to develop more effective health promotion campaigns. The program is committed to providing students with a strong foundation in communication theory and research while at the same time encouraging students to apply their skills in the public, private, and non-profit sectors.

Assistantships
The department offers a limited number of merit-based teaching assistantships to students taking at least 6 graduate credits each semester. Other sources of support, such as research assistantships, are available as funding permits.

Application Requirements
Students must meet the admission standards and application requirements of the university. See the Graduate Admission Policies section of the catalog. In addition to fulfilling the university application requirements, applicants must submit

- Three letters of recommendation
- Evidence of GRE taken within the past five years
- 500-word essay addressing the communication area in which the applicant is interested

Review of applications is ongoing. Late applications will be considered on a space-available basis. Because the number of students admitted is limited, meeting the minimum requirements does not guarantee admission.

Degree Requirements
Student pursuing the degree must complete 33 credits of graduate course work distributed as follows:

- Five core courses (15 credits) COMM 600, 650, 798 and two theory courses (6 credits) chosen from COMM 602, 605, 620, 630, 634, or 635
- One practicum course (3 credits) chosen from COMM 604, 621, 653, 655, 694, 697, 721, 820 (Other courses including independent study courses can be used to fulfill this requirement with the prior approval of the director of graduate studies.)

- 12 to 15 credits of electives chosen from graduate communication courses, including those listed above under theory or practicum. Students may take up to 6 credits of course work outside the department with prior approval of the director of graduate studies.
- 3 credits of thesis (optional)

Students electing the thesis option should consult the section on Master’s Thesis in the Academic Policies section of this catalog.

Communication, PhD

The doctor of philosophy (PhD) degree in communication at Mason examines the powerful roles performed by communication in contemporary society. The program has two major areas of emphasis: health and strategic communication.

Degree Requirements
To receive the PhD in communication, students must complete a minimum of 60 credits beyond the master’s degree, including core courses in theory and research methods, course work in a concentration, and a research practicum. Following completion of all required course work, students must pass a written qualifying examination and an oral defense of it, after which they are advanced to candidacy by the dean and complete a dissertation, an original and independent research project.

- Four courses (12 credits) of theory: COMM 600 and 9 credits chosen from COMM 602, 605, 634, 635
- Three courses (9 credits) of research methods (at least 6 at the 700 level): COMM 650 and 6 credits chosen from COMM 725, 750, or other courses with approval of the director.
- Six courses (18 credits) in one of the following substantive fields of study:
  - Health communication: 9 credits chosen from COMM 620, 705, 720, 820, and 9 credits of relevant course work with approval of the advisor and director
  - Strategic communication: 9 credits chosen from COMM 630, 705, 706, 735, and 9 credits of relevant course work with approval of the advisor and director
- 3 credits of a research practicum: COMM 604, 890 or 896 depending on the nature of the research being conducted
- 18 credits of dissertation proposal and research: 3 credits of COMM 998 and 15 credits of COMM 999

Once enrolled in 998, students must maintain continuous registration for at least 1 credit; once enrolled in 999, students must follow the university continuous registration policy. A maximum of 3 credits of COMM 998 and 15 credits of COMM 999 may be applied toward the 60 credits required for the degree, although because of continuous registration policy, students may be required to register for additional credits of these courses.

If specific requirements are waived by the director because of previous course work or experience, students must complete additional electives as approved by the department and recorded on their program of study.

Advancement to Candidacy
To advance to candidacy, students must complete all course work required on their approved program of study. Students must also successfully complete and pass a written qualifying exam and an oral qualifying exam. In addition, students must
have a dissertation committee appointed by the Dean’s Office as well as an approved proposal. Evidence of the approved proposal must be on file in the Dean’s Office before a student can advance to candidacy.

Cultural Studies
Phone: 703-993-2851
Web: culturalstudies.gmu.edu

Faculty
Albanese, Amireh, Bergoffen, Best, Bickford, Bockman, Brown, Burr, Censer, Chang, Copelman, Dshmukh, Fiolliott, Foreman, Foster, Froman, Fuchs, Gibson, Gilbert, Greet, Guagnano, Gusterson, Hanrahan, Hodges, Holt, Horton, Jacobs, Jann, Johnsen-Neshati, Kaplan, Karush, Kaufmann, Lancaster (director), Landsberg, Leeman, Lont, Mandaville, Matz, Miller, O’Connor, O’Malley, Palkovich, Rabin, Ricouart, Rosenblum, Sample, Scarletta, Seligman, Shituka, P. Smith, S. Smith, Sockett, Stewart, Todd, Trafton, Travis, Vallas, Yadav, Yocom, Zagurri

Course Work
The Cultural Studies Program offers all course work designated CULT in the Course Descriptions chapter of this catalog.

GRADUATE PROGRAM

Cultural Studies, PhD
This doctoral program, the first of its kind in the United States, unites selected faculty members from programs across the university to serve students contemplating careers in scholarship and practice. Cultural studies is an emerging field of interdisciplinary inquiry, arising in response to dramatic historical and social changes. As the focus on cultural process transforms an entire range of disciplines in the humanities and social sciences, scholars are embracing new conceptions of culture and new methods for its study.

This program is distinctive in several respects. Similar programs at other universities are usually departmentally based (English, history, sociology, or communication), emphasizing either the humanities or the social sciences. By contrast, the Cultural Studies Program at Mason explicitly seeks to link the social sciences and the humanities, combining methods of interpretation and explanation to explore the production, distribution, and consumption of cultural objects in their social contexts. With particular focus on theory and method, the program engages contemporary issues of nationality, class, race, and gender while opening its scope to all forms of culture, past, and present.

Application Requirements
Students who already have an MA in a relevant field are eligible to apply to the program. Students with only a bachelor’s degree should apply to a master’s program in a department that has an established feeder program in cultural studies: English, History and Art History, Modern and Classical Languages, Philosophy, Religious Studies, or Sociology and Anthropology. These feeder programs culminate in a capstone seminar, CULT 802. Students may, if they choose, apply simultaneously to the PhD in cultural studies so that faculty members may review their academic promise and suitability of their interests to the program. Especially strong candidates with bachelor’s degrees may be admitted into the doctoral program on a conditional basis, depending on their performance in the MA program, particularly in CULT 802.

Students who wish to apply for an MA and the cultural studies PhD simultaneously must submit two separate applications, one for each program.

In addition to materials required of all applicants for graduate study at Mason, applicants to cultural studies should submit the following:
• Scores on the GRE (general test is required; subject tests are optional)
• Three letters of recommendation from individuals who can judge the applicant’s scholarly potential
• Statement of purpose
• Writing sample demonstrating scholarly potential

Degree Requirements
As with all doctoral programs, the emphasis in this program is on the development of intellectual mastery and professional competence. The most important requirements are comprehensive exams and completion of a doctoral thesis reflecting the student’s ability to do original interdisciplinary work that meets professional standards. Students are required to demonstrate proficiency in at least one foreign language before being permitted to defend the doctoral dissertation proposal.

Students pursuing this degree must complete 48 credits beyond the MA degree distributed as follows:
• Three core courses (9 credits): CULT 802, 806, 808
• One course (3 credits) in theory chosen from CULT 810, 814, 820
• One course (3 credits) in a topic chosen from CULT 812, 816, 818
• One course (3 credits) in methodology. Students choose a course in a relevant methodology in which they are not already trained from departmental graduate offerings (600 level or above) under the guidance of faculty advisory committees.
• A minimum of 3 courses (9 credits) in each of two fields (see below)
• Oral defense of two written field statements (see below)
• Proficiency in a foreign language
• Dissertation research (12 credits; 998, 999)

Students are required to register for a minimum of 3 credits of 998 or 999 each semester until they have completed the minimum number of credits of 998 and 999 required on their program of study. Once enrolled in 998, a student must maintain continuous registration in 998 or 999 each semester until the dissertation is submitted to and accepted by the University Library.

Field Requirement
Under the guidance of faculty advisory committees, students select two fields that point topically and theoretically toward teaching interests, dissertation research, and related forms of professional development. Students select relevant courses from theory or topic courses not used to fulfill the requirements above, departmental graduate offerings (600 level or above), independent study courses, and special topics courses. As part of the minimum 9-credit field requirement, students must take a 3-credit directed readings course, CULT 870, in each field with that field’s primary advisor. Students
demonstrate competence in each field by producing and orally defending a field statement that consists of a comprehensive, critical literature review.

Advancement to Candidacy
To advance to candidacy, students must complete all course work required on their approved program of study. Students must also successfully complete two written field statements and pass an oral comprehensive exam based on them.

Economics

Phone: 703-993-1130
Web: economics.gmu.edu

Faculty
Distinguished professor emeriti: Buchanan, Smith
Professors: Bennett, Boettke, Boudreaux (chair), Congleton, Cowen, Crain, Heiner, House, Iannaccone, Klein, Levy, McCabe, Nye, Richardson, Roberts, Rowley, Stratman, Troesken, Tullock, Wagner, Williams
Associate professors: Caplan, Hanson, Meyer, Ramirez, Reid, Tabarrok, Thorbecke, Wiest
Assistant professors: Al-Ubaydli, Jones, Leeson
Instructor: Rustici
Professors emeriti: Chung (emeritus), Phillips (emeritus), Snively (emeritus), Vaughn (emerita)

Course Work
The Economics Department offers all course work designated ECON in the Course Description chapter of the catalog.

UNDERGRADUATE PROGRAMS

■ Economics, BA  BA-ECON
This program is designed primarily for students with a stronger interest in the liberal arts. It is appropriate for those who prefer a less quantitative degree program and may be especially appropriate for students planning to attend law school or graduate programs in business or public administration.

Degree Requirements
In addition to satisfying the university-wide general education requirements and the requirements for a BA degree in CHSS, students pursuing the degree must complete the course work distributed as follows:

• Four required courses (12 credits): ECON 103, 104, 306, and 311
• Eight elective courses (24 credits) in economics at the 300 and 400 level
• OM 210, or STAT 250 and 350
• MATH 108
• IT 103
Students must earn a GPA of at least 2.00 in ECON courses.

Some economics courses may fulfill the university-wide general education requirement in global understanding or the CHSS requirement in non-Western culture. Check with the departmental advising office for more information. Economics majors can fulfill the university-wide general education synthesis requirement with ECON 309.

■ Economics, BS  BS-ECON
The BS degree program is designed for students who desire a more technical program with a stronger emphasis on economic and quantitative analysis. It is especially appropriate for students who anticipate a career as an economic analyst in government, consulting, trade associations, or other privatesector positions that emphasize economic research and analysis. The requirements are also appropriate for students planning postgraduate education in economics or more quantitative business administration programs.

Degree Requirements
In addition to satisfying the university-wide general education requirements, students pursuing the degree must complete the course work distributed as follows:

• Five required courses (15 credits): ECON 103, 104, 306, 311, and 345
• Eight elective courses (24 credits) in economics at the 300 and 400 level
• STAT 362, ACCT 203, or MSOM 300
• OM 210, or STAT 250 and 350
• MATH 113 and 114
• IT 103
• 8 credits of a laboratory science sequence

Students must earn a GPA of at least 2.00 in ECON courses. IF ECON 340 Mathematical Economics is chosen as an elective, students need not take MATH 114; however, MATH 114 is strongly recommended for students considering graduate school in economics and is required for admission to most graduate programs. An additional calculus course beyond MATH 114 is also advisable for students considering graduate study in economics.

Some economics courses may fulfill the university-wide general education requirement in global understanding. Check with the departmental advising office for more information. Economics majors can fulfill the university-wide general education synthesis requirement with ECON 309.

Writing-Intensive Requirement
The university requires all students to complete at least one course designated as “writing intensive” in their majors at the 300 level or above. Students majoring in economics fulfill this requirement by successfully completing ECON 320, 345, 350, 360, or 365.

Minor in Economics
Students pursuing this minor must complete 21 credits in economics with a minimum GPA of 2.00 distributed as follows:

• Three required courses (9 credits): ECON 103, 104, and 306
• Four elective courses (12 credits) in economics at the 300 or 400 level

A minimum of 9 credits of upper-level economics course work must be taken at Mason. With permission of the department chair or undergraduate director, a course in a closely related field may be substituted for 3 credits of economics electives. A course in statistics is highly recommended: OM 210, or STAT 250 or 344 may substitute for up to 3 credits of economics electives.

In accordance with university policy, at least 8 credits must be applied only to the minor and may not be used to fulfill
requirements of the student’s major, concentration, or another minor. For policies governing all minors, see the Academic Policies chapter of this catalog.

Minor in Economic Systems Design

The design of processes that efficiently allocate resources and foster exchange are crucial in society, organizations, personal interactions, and individual decision making. Economic systems design is the scientific study of the design, development, testing, and understanding of economic institutions. Economic systems design explores problems in the design of allocation systems and provides a method to develop and test the properties of such systems. A minor in economic systems design prepares students to undertake the scientific process of understanding and developing systems of exchange and their incentives. The skills offered through this minor can be of use to e-commerce designers, policy analysts, systems designers, engineers, and computer scientists.

Students pursuing the minor must complete 15 credits distributed as follows:

- Three required courses (9 credits): ECON 440, 441, 442
- Two electives courses (6 credits) chosen in consultation with an advisor in the minor. Typical courses include MIS 491, MATH 441, SYST 420 and 470, CS 480 and 483, and ECON 335 and 415.

In accordance with university policy, at least 8 credits must be applied only to the minor and may not be used to fulfill requirements of the student’s major, concentration, or another minor. For policies governing all minors, see the Academic Policies chapter of this catalog.

Teacher Licensure

Students who plan to seek teacher licensure and become K–12 teachers should consult the College of Education and Human Development chapter of this catalog and attend an information session early in their undergraduate career. For more information, call 703-993-2892, e-mail gseadmit@gmu.edu, or go to gse.gmu.edu.

Bachelor’s/Accelerated Master’s Program in Economics

Highly qualified Mason undergraduates may apply to the accelerated master’s degree program and obtain both bachelor’s and master’s degrees in economics after satisfactory completion of 144 credits. Well-prepared undergraduates are encouraged to apply as they near completion of 90 credits. Admitted students are able to use up to 6 graduate credits in partial fulfillment of requirements for the undergraduate degree. On completion and conferral of the undergraduate degree with satisfactory performance (3.00 in each course, grade of B or better) in graduate courses, students are given advanced standing in the master’s program. All other master’s degree requirements must be met. Graduates are exceptionally well-prepared for a professional school or a PhD program in economics or a related discipline. Interested students should contact the department for details about the application process.

GRADUATE PROGRAMS

■ Economics, MA

The MA in economics strengthens students’ knowledge of economic theory and improves their skills in applying the theory to economic problems. Graduates are qualified to read and judge other research and conduct their own research, either individually or as members of government or business teams. They are also prepared to write policy analysis articles. Students who plan to pursue a PhD in economics should apply directly to the doctoral program.

Application Requirements

Applicants should hold an undergraduate degree, which does not have to be in economics, from an accredited institution. They should have satisfactorily completed intermediate microeconomics and macroeconomics and MATH 108 or equivalent, and at least one semester of calculus before enrolling in any graduate courses. Students entering the master’s program should be familiar with basic statistics as well. Students also should have earned a 3.00 GPA in the last two years of undergraduate work and in all economics courses, as well as satisfactory scores on the GRE (subject exam is optional).

All applicants must submit two letters of recommendation and a brief personal statement explaining their interest in the program.

Degree Requirements

Students pursuing this degree must complete 30 graduate credits distributed as follows:

- Three required courses (9 credits): ECON 611, 612, and 615
- Seven elective courses (21 credits) in economics chosen from any of the fields offered by the department. ECON 630 Mathematical Economics and ECON 535 Survey of Applied Economics are strongly recommended.
- Students may receive departmental permission to substitute up to 6 credits of electives taken outside economics in closely related fields. Students may also elect the thesis option, which offers 6 credits for independent research and writing under the supervision of a faculty member in lieu of 6 credits of electives.
- Passing grades on comprehensive exams in micro- and macroeconomics (Exams are offered twice each year.)

Although the department does not guarantee availability of courses every semester, a typical first-year sequence includes ECON 611 and 630, and an elective in the fall, and ECON 612 and 615, and an elective in the spring. If possible, part-time students should arrange their work schedules to take two courses per semester in the first year. Master’s degree students must enroll at the Arlington Campus for core theory courses. A cumulative GPA of 3.00 is required, and no more than two courses with a grade of C may be applied toward the degree.

■ Certificate in Economic CERG-ECSD Systems Design

This certificate provides graduate students with a program of courses and laboratory experience. Course work for the graduate certificate can be used for credit toward the MA and PhD in economics. The primary purpose is to provide a well-defined target for students who want to advance or update their knowledge in this fast-moving field.

Graduate students in economics, computer science, mathematics, systems engineering, and informatics find this certificate a strong complement to their major area of study. The courses and project work provide skills that can be used in
A cumulative GPA of 3.00 is required, and no more than one course with a grade of C may be applied toward the certificate.

■ Economics, PhD  PHD-ECON

This program prepares students for careers in academia, business, and government. Core courses train students in modern theory and quantitative techniques, while field courses stress the application of theory to relevant economic problems. Dissertation work requires students to master and apply the skills of original research. The department emphasizes publishing; many students have had articles accepted for publication in professional journals while in the graduate program. Research in the Department of Economics covers a broad spectrum, from problems of immediate policy importance to fundamental questions of economic and social organization.

Application Requirements

Applicants should hold an undergraduate degree, which does not have to be in economics, from an accredited institution and have satisfactorily completed intermediate microeconomics and macroeconomics. They also should have one year of calculus, one year of statistics, and one semester each of matrix algebra and econometrics. Applicants should have earned a 3.00 GPA in the last two years of undergraduate work and in all economics courses, as well as received satisfactory scores on the GRE (subject exam is optional).

Applicants must submit two letters of recommendation and a brief personal statement explaining their interest in the program. The department accepts doctoral students only for the fall semester.

Reduction of Credit

Students who enter with a master’s degree in economics may have their credit requirement reduced by up to 30 credits at the discretion of the department with approval of the dean. Credit is not given for comprehensive and field exams from other universities.

Degree Requirements

In addition to satisfying the university requirements for all doctoral degrees, students must successfully complete 72 credits of course work plus exams distributed as follows:

- Six required core courses (18 credits): ECON 630, 637, 715, 811, 812, 816
- Two required courses in each of two fields listed below (12 credits) in preparation for field exams
  - Field exams in two fields of study
  - Comprehensive exams in microeconomics and macroeconomics
  - Six to 10 elective courses (18 to 30 credits)
  - 12 to 24 credits of dissertation (998, 999)

A cumulative GPA of 3.00 is required, and no more than two courses with a grade of C may be applied toward the degree. Once enrolled in 998, a student must maintain continuous registration in 998 or 999 each semester until the dissertation is submitted to and accepted by the University Library.

Subject to course availability, the department offers exams in the following fields of study. Consult the department for the required courses for each field.

- Austrian economics
- Constitutional economics
- Economic history
- Economics and religion
- Experimental economics
- Industrial organization
- Law and economics
- Monetary theory
- Public choice
- Public finance

Advancement to Candidacy

To advance to candidacy, students must complete all course work required on their approved program of study. Students must also successfully complete and pass comprehensive exams in microeconomics and macroeconomics, as well as field exams in two knowledge areas. In addition, students must have a dissertation committee appointed by the Dean’s Office as well as an approved proposal. Evidence of the approved proposal must be on file in the Dean’s Office before a student can advance to candidacy.

Law and Economics, Joint Degree Programs

Four degree programs are offered jointly with George Mason University’s School of Law: JD/PhD, LLM PhD, JD/MA, and LLM/MA. Details are available at www.law.gmu.edu/econ/jointdegrees.html.

English

Phone: 703-993-1160
Web: english.gmu.edu

Faculty

Professors: L. Brown, Cheuse, D’Andrea (Robinson Professor), Foster, Goodwin, Hodges, Jann, Lathbury, Lowry, Nadeau, Pankey

Associate professors: Albanese, Amireh, Anderson, Atkinson, Burr, Clark, Foreman, Fuchs, Gallehr, Hawk, Holisky, Jones, Kaplan (chair), Kaufmann, Keaney, Kuebrich, Lattanzi Shatika, Matz, Rutledge, Tichy, Trafton, Weinberger, Yadav, Yocom

Assistant professors: Eisner, Eyman, Habila, Harvey, Keith, Lin, Marcatonio, McCarthy, Ngalabak, Reid, Sample, Widerhold, Zawacki
Term associate professors: Koch, Michals, Miller, Samuelian, Scott, Taciuch, Taylor, Thompson
Term instructors: Beach, Hoy, Raffel, Scolaro
Adjunct assistant professors: Burnham, DeFazio, Dreisonstok, Fowler, Humbertson, Jacobs, Kuhta, Moody, Pabich, Redondo
Adjunct instructors: Cooper, Grogan-Barone, Gulshan, Holcomb, Johnston, McKinney

Course Work
The English Department offers all course work designated CL, ENGL, LING, and NAIS in the Course Descriptions chapter of this catalog.

Related Courses
Courses offered by other departments are occasionally cross-listed with English and given the ENGL course designator; such courses may be counted toward the English major.

UNDERGRADUATE PROGRAMS

■ English, BA

Degree Requirements
In addition to university-wide general education requirements and college-level requirements for the BA degree in CHSS, students pursuing this degree must complete 30 credits (nine courses) in English beyond ENGL 302 with a minimum GPA of 2.00 distributed as follows:

• One required course (6 credits): ENGL 325, with a minimum grade of C (2.00)
• Four core courses (12 credits) distributed as follows:
  One course (3 credits) in literature before 1800 (may simultaneously satisfy a concentration), chosen from ENGL 335, 336, 400, 401, 402, 404, 405, 431, 440, 443, 450, 471, 472, and 474, and by special topics courses as approved by the department
  One course (3 credits) in literature before 1915 (may simultaneously satisfy a concentration), chosen from courses listed above and ENGL 368, 370, 406, 407, 423, 425, 436, 452, and 453; and by special topics courses as approved by the department
  One course (3 credits) in minority, folkloric, or popular literary and cultural traditions (may simultaneously satisfy a concentration), chosen from ENGL 333, 334, 349, 350, 368, 369, 370, 371, 372, 375, 439, 460, 479, 491, 492, and 493, and by special topics courses as approved by the department
  One course (3 credits) of an elective above ENGL 302
• Four courses (12 credits) in one of the following concentrations:

▲ Concentration in American Literature (ALIT)
Four courses (12 credits) chosen from ENGL 333, 368, 370, 371, 372, 375, 380, 390, 423, 425, 447, 452, 454, 463, 478, or from special topics courses when designated by department

▲ Concentration in Creative Writing (CW)
Four courses (12 credits) chosen from ENGL 344, 397, 398, 399, 458, 464 or 497

▲ Concentration in Cultural Studies (CULT)
Four courses (12 credits) chosen from ENGL 327, 330, 332, 333, 334, 338, 349, 368, 369, 370, 371, 372, 460, 479, 491, 493, or from special topics courses when designated by department. Up to one course (3 credits) may be from outside the English Department from COMM 465; CULT 320; PSYC 362; SOCI 315; WMST 300, 330.

▲ Concentration in Drama (DRA)
Four courses (12 credits) chosen from ENGL 335, 336, 440, 443, 445, 447, 448, 449 or from special topics courses when designated by department. A maximum of one course (3 credits) may be from courses on Shakespeare. Up to one course (3 credits) may be from outside the English Department from FREN 413, 442; RUSS 407; SPAN 565; THR 350, 351, 352, 380, 381

▲ Concentration in Fiction (FIC)
Four courses (12 credits) chosen from ENGL 380, 398, 463, 437, 450, 452, 453, 454, 456, 459, 460, 492 or from special topics courses when designated by department

At least one of the four courses (3 credits) must be in fiction before 1915 chosen from ENGL 436, 450, 452, 453, or from special topics courses when designated by department

▲ Concentration in Film and Media Studies (FILM)
Four courses (12 credits) chosen from ENGL 327, 332, 343, 421, 422, 490 or from special topics courses when designated by department. Up to one course (3 credits) may be from outside the English Department from ARTH 362, 373, 374; COMM 380, 465; MUSI 301; RUSS 470

▲ Concentration in Folklore and Mythology (FML)
At least two courses (6 credits) in folklore and mythology chosen from ENGL 311, 333, 337, 491, 498, 591 or from special topics courses when designated by department. Up to one course (3 credits) may be from outside the English Department from ANTH 450 or CLAS 340

Up to two courses (6 credits) related to folklore and mythology chosen from ENGL 327, 335, 336, 349, 368, 370, 371, 372, 400, 445, 471, 472, 474. One course (3 credits) may be from outside the English Department from ANTH 301, 302, 303, 304, 306, 307, 308, 311, 313, 332; ARTH 319, 321, 322, 340, 342, 345, 382, 383, 384, 385; RELI 351

▲ Concentration in Linguistics (LING)
One required course (3 credits): LING 326
Three courses (9 credits) chosen from LING 322, 326, 450, 485, 486, 490, 499, 507, 521, 522, 523, 581, 582

▲ Concentration in Medieval and Renaissance Literature (MRL)
Four courses (12 credits) chosen from ENGL 355, 336, 400, 401, 402, 431, 440, 471, 472, 473, 474 or from special topics courses when designated by department. Up to one course (3 credits) may be from outside the English Department from ARTH 334, 340, 341, 342, 344, 345; HIST 304, 305, 306, 321; PHIIL 302; RELI 371

▲ Concentration in Modern British Literature (MBL)
Four courses (12 credits) chosen from ENGL 404, 405, 406, 407, 443, 445, 450, 453, 456, 462 or from special topics courses when designated by department
A Concentration in Nonfiction Writing and Rhetoric (NWR)
Four courses (12 credits) chosen from 309, 311, 342, 343, 392, 399, 410, 489, 496, 498, 503, 504, 505 or from special topics courses when designated by department

A Concentration in Poetry (POE)
Four courses (12 credits) chosen from ENGL 335, 336, 390, 397, 400, 401, 402, 404, 406, 407, 462, 463, 468, 471 or from special topics courses when designated by department

A Concentration in World Literature (WLIT)
At least two courses (6 credits) chosen from ENGL 349, 350, 436, 437, 439, 448 or from special topics courses when designated by department

Up to one course (3 credits) chosen from courses from the concentrations in Medieval and Renaissance Literature, American Literature, or Modern British Literature

Up to one course (3 credits) in a relevant course from these approved courses: ANTH 300; CULT 320; HIST 308, 309, 387; CHIN 310, 311, 325, 328; FRLN 330; FREN 325, 329; GERM 325; JAPA 320; RUSS 325, 326, 327; SPAN 325, 329

Students should consult with an English Department advisor to learn ways in which the university-wide general education requirements can also satisfy college-level requirements or the English major. Graduating majors participate in assessment of the degree by preparing a dossier of writing completed in their upper-level courses.

Comparative Literature Emphasis
The English Department and the Modern and Classical Languages Department offer a BA in English with an emphasis in comparative literature. This program combines the study of literature in English with the study of one or more foreign literatures and with cross-cultural literary study. It requires 10 courses above ENGL 302, distributed as follows:

1. One introductory course in literary criticism, as appropriate for the student’s focus: ENGL 325, FREN 381, or SPAN 311
2. CL 300 (if offered) or an approved alternative
3. Two courses in English or American literature
4. Two courses in a literature other than English or American, either in translation or, for those pursuing foreign language study, with selected readings in the original language
5. Three courses designated as comparative or world literature courses by the comparative literature committee and generally selected in consultation with the advisor every semester (Examples are ENGL 350, 431, 436, 437, and 439; various 300-level CLAS courses; FRLN 330 courses; and appropriate special topics courses in ENGL, FREN, GERM, RUSS, SPAN, or other language.)
6. CL 514

Students should consult with their advisor to design a program of study that best suits their particular interests and goals.

Writing-Intensive Requirement
The university requires all students to complete at least one course designated as “writing intensive” in their majors at the 300 level or above. Students majoring in English fulfill this requirement by successfully completing ENGL 325.

English in a Double Major
Students interested in designing a double major are encouraged to discuss their plans with their English advisor and the director of undergraduate programs in English.

Honors Program in English
To qualify for graduation with honors, students must complete the honors course sequence and receive a 3.50 GPA in all courses counted toward the major and, separately, a minimum 3.50 GPA in their honors courses. Honors courses may simultaneously satisfy concentration and distribution requirements in the major.

Students may satisfy the honors course sequence in several ways:

- Students may take two sections of ENGL 414 Honors Seminar.
- Students may take one section of ENGL 414 Honors Seminar and ENGL 415 Honors Thesis Writing Seminar in conjunction with another advanced literature or cultural studies course.
- Students in the creative writing concentration may take one section of ENGL 414 Honors Seminar and write a creative honors thesis in ENGL 416 Honors Independent Study.
- Students in the nonfiction concentration may take ENGL 416 Honors Independent Study in conjunction with an advanced course in nonfiction writing and complete a nonfiction thesis as part of ENGL 415 Honors Thesis Writing Seminar.

See the English Department for application procedures and other information.

Minor in English
A minor in English provides students with a sound introduction to the field of literary studies and allows them to select a set of courses to suit their individual interests. Prerequisites for the minor in English are the 3-credit university-wide general education requirement in literature.

Students pursuing this minor must complete 18 credits above ENGL 302 with a minimum 2.00 GPA distributed as follows:

- One required course (6 credits): ENGL 325
- Three courses in a concentration listed under the English major or three courses that satisfy the core requirements for the major (9 credits)
- One elective course (3 credits)

The minor must be approved by the English Department undergraduate advisor before graduation. In accordance with university policy, at least 8 credits must be applied only to the minor and may not be used to fulfill requirements of the student’s major, concentration, or another minor. For policies governing all minors, see the Academic Policies chapter of this catalog.

Minor in Teaching English as a Second Language
The minor in teaching English as a second language (TESL) helps prepare undergraduate students to teach nonnative speakers of English in the United States or abroad. This course of study combines linguistic theory, second language acquisition theory, and ESL teaching methodology.
The minor in TESL may be pursued concurrently with any undergraduate major. English majors concentrating in linguistics can apply up to 9 credits in LING used for the major to the TESL minor. Students in the TESL minor must have approval from the director to register for the 500-level courses in the TESL program.

Students pursuing this minor complete 18 credits distributed as follows:

- Five required courses (15 credits): LING 322, 326, 521, 523, and 582
- One elective course (3 credits) chosen from ANTH 114; COMM 305; ENGL 327; LING 450, 485, 486, 490, 499, 525; or any course (3 credits) in a foreign language beyond the college requirement for the BA degree

Other suitable elective courses may be applied to the minor with the prior approval of the director. In accordance with university policy, at least 8 credits must be applied only to the minor and may not be used to fulfill requirements of the student’s major, concentration, or another minor.

Interdisciplinary Minors

The department coordinates or co-coordinates the interdisciplinary minors in film and media studies, folklore and mythology, and linguistics. See the Interdisciplinary Minors section of this chapter for more information.

Undergraduates in Graduate Courses

The English Department permits qualified undergraduates to enroll in its graduate courses numbered 500 through 599, either for undergraduate or reserve graduate credit. See the department for details on how to enroll.

Teacher Licensure

Students who plan to seek teacher licensure and become K–12 teachers should consult the College of Education and Human Development chapter and attend an information session early in their undergraduate career. For more information, call 703-993-2892, e-mail gseadmit@gmu.edu, or go to gse.gmu.edu.

Writing Center

The Writing Center offers one-on-one conferencing during all stages of the writing process. Conferences are free to all Mason students, faculty, staff, and alumni. Writing Center tutors, who are graduate teaching assistants in the English Department, have been trained in current methods of composition instruction. They can help clients overcome writing anxiety, develop organizational and revision skills, and learn useful strategies for editing their own work. Appointments should be made by calling 703-993-1200 or stopping by the center in Robinson Hall A, Room 116, to schedule a session.

Northern Virginia Writing Project

The Northern Virginia Writing Project (NVWP) is an in-service organization dedicated to improving the writing of Northern Virginia students, kindergarten through university level. Each summer, selected teachers attend an intensive five-week institute where they demonstrate successful teaching techniques, study research on the teaching of writing, and write. After the summer institute, participants return to their schools, colleges, and universities to lead workshops and in-service seminars for other teachers. NVWP is an affiliate of the National Writing Project and one of the seven sites of the Virginia Writing Project.

Bachelor’s/Accelerated Master’s Program in Linguistics

Highly qualified Mason undergraduates may apply to the accelerated master’s degree program and obtain both a BA in English and an MA in English with a concentration in linguistics after satisfactory completion of 144 credits. Well-prepared undergraduates are encouraged to apply as they near completion of 90 credits. Satisfactory performance in LING 326 is a prerequisite for admission. Admitted students are able to use up to 6 graduate credits in partial fulfillment of requirements for the undergraduate degree. On completion and conferral of the undergraduate degree with satisfactory performance (3.00 in each course, grade of B or better) in graduate courses, students are given advanced standing in the master’s program. All other master’s degree requirements must be met. Interested students should contact the director of linguistics for details about the application process.

GRADUATE PROGRAMS

The English Department offers graduate programs in the study and practice of literature and writing, as well as course work in related fields such as folklore, film, and cultural studies. The MA in English (30 credits) provides concentrations in literature, cultural studies, professional writing and rhetoric, the teaching of writing and literature, and linguistics. The department also offers a terminal degree, the MFA in creative writing (48 credits), with concentrations in fiction, poetry, and nonfiction. In addition, the department offers a certificate in teaching English as a second language (TESL, 18 credits), a certificate in professional writing and rhetoric (18 credits), and courses as part of the PhD in education.

■ English, MA

Application Requirements

In addition to fulfilling admission requirements for graduate study, applicants must submit one copy of a 1,000-word analytical writing sample and two letters of recommendation. For those applying in cultural studies, literature, professional writing and rhetoric, and the teaching of writing and literature, the writing sample should be an interpretive paper on a literary text. In addition to the writing sample, applicants must submit a goals statement of no more than 750 words. Applicants for the concentration in professional writing and rhetoric must also submit two copies of a 10- to 15-page portfolio of their nonfiction work such as a technical or business report, essay, term paper, editing project, or any other material reflecting interests and skills in nonfiction writing. Applicants may submit scores from the GRE when they believe those scores will lead to a clearer representation of their qualifications. Those with undergraduate majors in disciplines other than English are encouraged to apply, but they may be required to make up deficiencies before entering the program.

Degree Requirements

Students pursuing this degree must successfully complete 30 credits in graduate English courses in one of the following concentrations. Students must also demonstrate foreign language proficiency by course work equivalent to Mason’s
foreign language 210 or by passing a translation test administered by the department.

▲ Concentration in Cultural Studies (CULT)
- Two required course (6 credits): ENGL 701 (usually in the first semester of study) and 676
- Two courses (6 credits) chosen from ENGL 551, 555, 665, 670, 675, 685, 705, 740 (each of the latter three may be repeated once with permission of the director of graduate studies)
- One course (3 credits): CULT 802 (may not be taken before ENGL 676; completion of at least 24 credits of the degree required)
- Five courses (15 credits) of literature
- Thesis option: 6 credits of ENGL 799 (substitutes for 6 credits of literature)
- Foreign language proficiency as described above

▲ Concentration in Linguistics (LING)
The linguistics concentration of the MA in English combines courses in linguistics with courses in some related area of language study, such as teaching English as a second language, bilingual education, or foreign language teaching. The course of study is designed to prepare students for teaching in one of these fields or for doctoral work. The certificate in teaching English as a second language can be earned concurrently. Students pursuing the linguistics concentration must successfully complete 30 graduate credits, distributed as follows, and demonstrate foreign language proficiency (see above).
- Six core courses (18 credits): LING 690, 691, 692, 785, 786, 787
- Four elective courses (12 credits), chosen in consultation with an advisor, which reflect one or more areas of language study (Electives can be in such areas as linguistics, the teaching of reading or writing, literary criticism, bilingual education, or a foreign language, and may include 6 credits of thesis.)

▲ Concentration in Literature (LIT)
- One required course (3 credits): ENGL 701 (usually in the first semester of study)
- One course (3 credits) in critical theory, chosen from ENGL 514, 551, 675, 676, or 705
- Eight courses (24 credits) of literature
- Thesis option: 6 credits of ENGL 799 thesis may substitute for 6 credits of literature
- A maximum of 6 credits of related study outside the department may substitute for the equivalent number of literature credits, with permission of the graduate director
- Foreign language proficiency as described above

▲ Concentration in Professional Writing and Rhetoric (PWR)
- Two required courses (6 credits): ENGL 501 (usually in the first semester of study) and 502
- Two courses (6 credits) in professional writing and rhetoric
- Two courses (6 credits) in writing or nonfiction
- Three courses (9 credits) chosen from designated courses in rhetorical studies, literature and literary theory, linguistics, cultural studies, film and media studies, and folklore
- 3 credits in ENGL 797
- Foreign language proficiency as described above

▲ Concentration in the Teaching of Writing and Literature (TWL)
- One required course (3 credits): ENGL 701 (usually in the first semester of study)
- Two courses (6 credits) in writing
- Two courses (6 credits) of literature
- One course (3 credits) in linguistics, usually LING 522
- Two courses (6 credits) in the teaching of writing and in the teaching of literature, usually ENGL 615 and ENGL 610
- One course (3 credits) in composition theory: either ENGL 697 or an appropriate section of ENGL 611
- One elective course (3 credits) in literature or writing
- Thesis option: A thesis may be arranged through the advisor and director of graduate studies in English; this option requires 6 credits and expands the degree program from 30 to 33 credits.
- Foreign language proficiency as described above

Creative Writing, MFA (MFA-CW)
The MFA program has three concentrations: poetry, fiction, and nonfiction. Students should apply to only one concentration, although a student turned down by one concentration may subsequently apply to another or to that same concentration in a subsequent year.

Students interested in taking individual courses or in applying in the future to the MFA program are welcome to apply to take classes as nondegree students; however, such enrollments are allowed only with the instructor’s permission. Regular applicants to the MFA program who are denied admission may not take courses as nondegree students. Students interested in taking a course as nondegree should submit a brief letter of introduction and a writing sample to the professor at least one week before the start of classes.

Admission Requirements
In addition to fulfilling admission requirements for graduate study, applicants must submit two letters of recommendation, one copy of a 1,000-word analytical writing sample, and a portfolio of original work. The analytical writing sample may be a paper written for an undergraduate class or any other work that gives evidence of advanced writing skills. For those applying to the MFA concentration in fiction, the portfolio should consist of up to 50 pages of fiction; at least two complete short stories are preferred. For those applying to the poetry concentration, the portfolio should consist of up to 20 pages of poetry. For those applying to the nonfiction concentration, the portfolio should consist of up to 50 pages of creative nonfiction.

Degree Requirements
Students pursuing this degree must successfully complete 48 graduate credits, distributed as follows:
- Two to four courses (6 to 12 credits) in literature
- Four to six courses (12 to 18 credits) of writing workshops in one of the following concentrations:
  ▲ Concentration in Fiction (FIC)
  - One course (3 credits) in the form: ENGL 566
  - 9 credits in writing workshops: ENGL 618, 751
  ▲ Concentration in Nonfiction (NFW)
  - One required course: ENGL 506 (Students should enroll the first semester it is offered after they enter the program.)
• One course (3 credits) in the form: ENGL 565
• 9 credits in writing workshops: ENGL 616, 752

▲ Concentration in Poetry (POE)
• One course (3 credits) in the form: ENGL 564
• 9 credits in writing workshops: ENGL 617, 750
• At least one course (3 credits) in another genre, which may be ENGL 608
• 6 credits in thesis (may be taken in the summer term only with permission of the thesis committee)
• 6 to 12 credits in ENGL 608, with a minimum of 6 credits in student’s chosen genre
• Up to five courses (15 credits) of electives chosen in consultation with the writing program faculty
• 1 credit of ENGL 699

With the approval of the MFA faculty, the program director, and the dean, the number of credits required for an MFA may be reduced by a maximum of 20 credits on the basis of graduate course work before admission.

Students in poetry must pass a written MFA exam based on the authors they have chosen. The authors are selected in collaboration with the writing faculty any time after completing 12 credits of course work and before completing 32 credits. The exam must be completed at least one semester before the student registers for the final 3 credits of thesis.

Students in fiction and nonfiction must pass an MFA exam or complete an MFA project. Students who elect to take the MFA exam select, after the completion of 18 credits and with the approval of their faculty advisors, a list of authors and an area of emphasis (for example, the European novel). Students who elect to complete an MFA project (such as editing an anthology) must carry out the project under the direction of a faculty member and may register for ENGL 798 to fulfill this requirement. ENGL 798 may not be used to fulfill the literature requirement or as thesis preparation. The exam or project must be completed at least one semester before the student registers for the final 3 credits of thesis.

Students who have not completed the equivalent of Mason’s foreign language 210 must do so or demonstrate proficiency by passing a translation test administered by the English Department.

■ Certificate in Folklore CERG-FLK

The certificate in folklore enables students to explore the processes of tradition that move through multiple expressive forms, such as folktales, folk beliefs, folk medicine, folk art, folksong, and literature. A discipline based on ethnographic fieldwork, folklore offers students a chance to work in communities and collect living traditional materials that are critical to human identity and values. Interdisciplinary by nature, folklore thrives on local particularities as well as compelling global connections. This certificate prepares students for careers in cultural agencies, governmental organizations, and teaching institutions, and advanced study in the humanities.

Certificate Requirements
Students pursuing this certificate must complete 18 credits distributed as follows:
• Five required courses (15 credits):
  ENGL 529, 591 (6 credits), 798; ANTH 750
• One research course (3 credits) chosen from ENGL 701, HIST 610, SOCI 634

■ Certificate in Teaching CERG-TESL

English as a Second Language

The Teaching English as a Second Language (TESL) certificate prepares students to teach non-native speakers of English in the United States or abroad. Certificate courses fulfill, in part, requirements for an endorsement in English as a second language to the Virginia state teaching credential. Students who want to earn this endorsement should consult with an advisor.

Application Requirements
Applicants must be admitted to graduate study or approved for graduate course enrollment as nondegree students. Students who initially enroll in the certificate program as nondegree must apply for admission to the graduate program no later than the second semester of study. When formal admission to graduate study is sought, applicants must submit one copy of an analytical writing sample of approximately 1,000 words, a goals statement, and two letters of recommendation.

The certificate may be pursued concurrently with any of several degree programs offered through the Graduate School of Education, the English Department, and the Modern and Classical Languages Department. Part of the course work toward the certificate may be applied toward degrees in those departments. Students enrolled in another graduate degree program who want to work for the certificate must apply to the English Department for admission into the certificate program.

Certificate Requirements
Students pursuing this certificate must complete 18 credits, earning a grade of 3.00 or better, distributed as follows:
• Six required courses (18 credits): LING 520, 521, 522, 523, 525, and 582

■ Certificate in Professional CERG-PWE Writing and Editing

This certificate provides graduate students with course work in nonfiction writing in specific genres, current writing practices and theories of writing in organizational settings, research methods in professional writing, and nonfiction literature.

Admission Requirements
Applicants must submit an analytical writing sample of at least 1,000 words, a goals statement, two letters of recommendation, and a portfolio of writing or editing. Applicants must be currently admitted to a graduate degree program or approved for enrollment as nondegree students. Because only 6 credits earned as a nondegree student may be applied to the certificate, students who initially take courses as nondegree should apply for admission before completing 6 credits of course work. Completion of course work is not in itself a guarantee of admission to the certificate program.

The certificate may be pursued concurrently with any of several degree programs in English and elsewhere in CHSS. Part of the course work toward the certificate may be applied to those degrees.

Certificate Requirements
Students pursuing this certificate must complete 18 credits of English graduate courses, earning a grade of B or better in each, distributed as follows:
Global Affairs

Phone: 703-993-9185
Web: globalaffairs.gmu.edu

Faculty
Bockman, Breglia (assistant director), Copelman, Fyfe, Habila, Harbour, Hirsch, Jones, Mandaville, Mc Dow, McGlinchey, Paczynska, Samara, Smith, Wan (director)

Course Work
The Global Affairs Program offers all course work designated GLOA in the Course Descriptions chapter of this catalog.

UNDERGRADUATE PROGRAMS

Global Affairs, BA

Global affairs is an interdisciplinary major that introduces students to the global processes affecting all societies. Drawing on the broad international expertise of Mason faculty, the BA in global affairs incorporates courses from across the university. Global affairs majors examine transnational and international processes in a wide range of areas, including politics, economics, culture, peace and conflict, and the environment. Majors also study specific regions and languages and investigate the ways particular parts of the world experience and influence global processes. Study abroad and internships are strongly encouraged. Students can complement their major with a second major or a minor.

Degree Requirements
In addition to satisfying the university-wide general education requirements and requirements for the BA degree in CHSS, student pursuing this degree must complete 36 credits distributed as follows:

• Six core courses (18 credits): GLOA 101 or SOCI 120, CONF 340, CULT 320, ECON 385, EVPP 337, and GOVT 322
• Four courses (12 credits) in an approved concentration (see below)
• 9 credits of language courses beyond 210 or 6 credits beyond 202. Students must have a minimum grade of C (2.0) in each of the core courses and a minimum grade of C- in each of the courses used to fulfill the concentration and global affairs language requirement. Students must achieve a cumulative GPA of 2.0 or higher in all course work to receive a baccalaureate degree. Students who major in global affairs are not eligible to earn the global systems minor or receive credit for ECON 390.

Concentrations
Courses applied to a global affairs concentration must come from at least two different departments or programs and cannot be applied to any other major, minor, concentration, or certificate. In addition to the courses listed below, other relevant courses, including special topics courses, study abroad, and internships, may be applied to a concentration with prior written approval from the director. (Registration in courses at the 500 level requires approval of the department offering the course.)

By Global Topic

 ▲ The Environment (EVT)
 BIOC 301, 371; EVPP 110, 336, 377; GEOG 303, 311; GEOL 309; TOUR 312, 340

 ▲ Global Communications and Technology (GCT)

 ▲ Global Economy and Management (GEM)
 ECON 360, 361, 380; FNAN 440; GOVT 343; MSOM 303, 305; NCLC 423 (6 credits); BULE 302, 402 (BULE courses require the approval of the director.)

 ▲ Global Governance (GLGV)
 ADJ 405, 475; ANTH 312; COMM 305; GEOG 301; GOVT 342, 343, 344, 347, 445, 446, 447, 448; HIST 345; NCLC 305 (6 credits), 422, 424; PHIL 429; SOCI 340

 ▲ Global Inequalities and Responses (GIR)
 ADJ 405; ANTH 365, 488; ECON 321; GEOG 301, 318, 414, 446, 448; HIST 366; NCLC 304, 424; SOCI 307, 308, 315, 401, 475; WMST 100

 ▲ International Development (IDEV)
 ANTH 331, 333; ECON 360, 361, 362; GEOG 303; GOVT 434, 445, 446; HSCI 150; HEALTH 350; NCLC 401; PHIL 429; SOCI 350; SOCW 351; TOUR 340

 ▲ World Arts (WA)
 ARTH 203, 362, 380, 382, 383, 384, 385, 394; AVT 372; CHIN 311, 320; CL 300, 514; DANC 391, 418 (1 to 3 credits); ENGL 333, 349, 350, 380, 439; FREN 325, 378, 451, 452, 470; FRLN 330; GERM 325, 340, 451; JAPA 320; RUSS 325, 327, 470; SPAN 321, 325; THR 359

By World Region

 ▲ Africa (AFR)
 ARTH 380; FREN 451; GOVT 432; HIST 261, 262, 335, 336, 466, 565

 ▲ Asia (ASA)
 ANTH 304, 306, 309, 311; ARTH 203, 382, 383, 384, 385; CHIN 311, 320; GOVT 333, 341, 433; HIST 252, 354, 357, 555; JAPA 320; RELI 212

 ▲ Europe (EU)
 ARTH 362; FREN 325, 378, 470; GEOG 320; GERM 325, 340, 451; GOVT 334, 337; HIST 309, 314, 322, 436, 524; PHIL 450; SPAN 321, 325
Latin America (LA)
ANTH 302, 385; ECON 361; GEOG 316; GOVT 331; HIST 271, 272, 364, 365, 525

Middle East and North Africa (MNA)
ARTH 319, 320; FREN 453; GEOG 325; GOVT 332; HIST 282, 461, 465, 585; RELI 211

North America (NA)
ANTH 301; ENGL 380, 390; FREN 452; GEOG 315; GOVT 301, 307, 308, 335, 337; HIST 330, 416, 418; USST 401

Russia and Central Asia (RCA)
GEOG 330; GOVT 328, 340, 447; HIST 329; RUSS 325, 327, 354, 470

Individualized Concentration (IST)
Students may construct an individualized concentration with the director’s help and written approval.

Writing-Intensive Requirement
The university requires all students to complete at least one course designated as “writing intensive” in their major at the 300 level or above. Students majoring in global affairs should consult the program advisor for courses that can be used to fulfill this requirement.

Global Affairs in a Double Major
Students interested in designing a double major are encouraged to discuss their plans with an advisor in their major and the advisor for global affairs.

Minor in Global Affairs
The minor in global affairs provides students with a global perspective that can enhance many different majors. The minor is not available to students majoring in global affairs or minoring in global systems.

Students pursuing this minor must complete 15 credits distributed as follows:
- Five courses (15 credits) chosen from GLOA 101 or SOCI 120, CULT 320, ECON 385, GOVT 322, CONF 340 or EVPP 337

In accordance with university policy, at least 8 credits must be applied only to the minor and may not be used to fulfill requirements of the student’s major, concentration, or another minor. For policies governing all minors, see the Academic Policies chapter of this catalog.

GRADUATE PROGRAMS

MAIS Concentration in MAIS-ISIN (CCT) Community College Teaching
See the Interdisciplinary Studies (MAIS) chapter for information. The concentration qualifies students to teach entry-level courses in growing fields at the community college.

MAIS Concentration MAIS-ISIN (HEDU) in Higher Education
See the Interdisciplinary Studies (MAIS) chapter for information. This concentration prepares individuals for administrative and leadership positions in two-year colleges or four-year colleges and universities. Students may focus on administration or student services.

Community College DA-EDCC Education, DA
The doctor of arts in community college education (DACCE) prepares students to be leaders in undergraduate education. In addition to expertise in a selected disciplinary or interdisciplinary knowledge area, graduates are proficient in four core areas related to undergraduate education: scholarly activity related to teaching and learning; effective integration of technology in the teaching and learning process; pedagogy appropriate to the discipline; and program and curriculum design, development, and assessment. With this background and the guided practical experience provided by internships, students are prepared to lead their institutions to respond to the changing needs of 21st-century students.

Application Requirements
Students are accepted for the fall semester only. Applications submitted after the posted deadline will be considered on a space-available basis. In addition to meeting admission requirements for graduate study at Mason, applicants should have a master’s degree, and submit a writing sample, a statement of purpose, three letters of recommendation, GRE scores, and a résumé.

Degree Requirements
Students pursuing this degree must complete a minimum of 60 credits beyond the master’s degree, distributed as follows:
- Eight courses (24 credits) in a knowledge area, including 3 credits of methodology
- Six courses (18 credits) in the education core: CTCH 601, 602, 603, 604, 605, and 3 credits from approved electives
- 6 credits of internships (CTCH 885)
- 12 credits of dissertation (CTCH 998, 999)

Once enrolled in 998, students must maintain continuous registration in 998 or 999 each semester until graduation, excluding summers. Students who defend in the summer must be registered for at least 1 credit of 999 in the summer.

Within the 60 credits, a minimum of 6 credits must be in courses with a technology focus. These include the required CTCH 603, courses in the knowledge area, or electives in the education core, as approved by the program director.
Knowledge Area
Substantial work in a knowledge area is essential to the leadership in curriculum expected of students. Given the dynamic nature of the community college and growth of programs in nontraditional fields, the choice of a knowledge area and relevant course work should be guided by the student’s developing interests and a vision of the student’s role as a community college educator. While many DACCE students take their 24 knowledge area credits exclusively in one discipline or department, they are encouraged to think broadly and in terms of multiple disciplines and work with their advisor to choose appropriate courses from more than one discipline or department.

Education Core
The 18-credit core of education courses is designed to develop leaders in undergraduate education. The program emphasizes a broad knowledge base in teaching and course work in the history and philosophy of the community college and instructional technology. These courses concentrate on scholarship and practice in teaching and learning, instructional technology, and program and curriculum design and assessment. All courses emphasize leadership, ethics, and diversity in higher education.

Internships
Students participate in two 3-credit internships to learn skills applicable to college-based teaching and higher education administration or policy. Internships provide an important educational experience that complements classroom-based course work. Students doing an internship should have completed 18 credits of education core requirements, 6 credits in the knowledge area, and an approved program of study. Internships, which must be approved by the advisor and internship coordinator, require a minimum of 180 hours of work for 3 credits and participation in an internship seminar.

Program of Study
Working with an advisor, students develop a program of study that outlines courses that will be used to fulfill degree requirements. The program of study is approved by the advisor and director; any modifications require the student to file a revised program of study.

Candidacy Exams
Students must pass candidacy exams to demonstrate breadth and depth of knowledge in both the knowledge area and education core. To be eligible to take a candidacy exam, students need to have completed all course work in the specific area, be in good standing (minimum cumulative GPA of 3.00), and be registered for at least 1 credit. The competency exam for the education core is a written exam administered by the Higher Education Program. The knowledge area exams are administered by the liaison in the knowledge area; each area has its own exam guidelines.

Students who do not pass a candidacy exam in either area have until the last day of the next semester (published in the Schedule of Classes) to retake it. (For students who take exams in the summer months, this will be the published date for the fall semester.) Students who do not retake the exam by this deadline or do not successfully complete the candidacy exam the second time will be terminated from the program.

Advancement to Candidacy
To advance to candidacy, students must complete all course work required on their approved program of study. Students must also successfully complete and pass comprehensive exams on the education core and the major knowledge area. In addition, students must have a dissertation committee appointed by the Dean’s Office as well as an approved proposal. Evidence of the approved proposal must be on file in the Dean’s Office before a student can be advanced to candidacy.

Dissertation
In the dissertation, students demonstrate an ability to conduct original research that contributes new knowledge or a reinterpretation of existing knowledge to the area of investigation. Students who focus their dissertation in the knowledge area must connect their research to higher education. Dissertations may be practice-oriented, focusing on new and replicable ways of teaching within the knowledge area.

To register for dissertation proposal (998), students need to have an approved program of study and must have completed the two internships, all other course work, and candidacy exams in the education core and the knowledge area. To register for dissertation research (999), students must be advanced to candidacy. Students enrolled in 999 are required to submit evidence of progress to the dissertation advisor and the program by the last day of classes each semester (as published in the Schedule of Classes), such as a draft of a chapter or a brief, descriptive report of research activities. Students showing successful progress will receive a grade of IP. Those who do not will receive an IN.

Students are required to take at least 3 credits of proposal research (998) and 9 of research writing (999), and no more than 12 credits of 998 and 999 combined may be applied to the doctoral degree.

Certificate in College Teaching
The certificate is designed for graduate students who are planning a career in undergraduate education. The program offers courses that enhance pedagogical skills, explore pedagogical scholarship and the use of technology in instruction, and explain the history and philosophy of the two-year college.

Students must apply for admission to the certificate program and meet the admission standards and application requirements for all graduate students as stated in the Graduate Admissions Policies section.

Students pursuing this certificate must complete 18 credits distributed as follows:

- Three required courses (9 credits): CTCH 602, 603, and either 604 or 605; or equivalents with a specific disciplinary focus
- Two elective courses (6 credits), chosen in consultation with an advisor and with approval of the director
- 3 credits of practicum: CTCH 685

Certificate in Higher Education Administration
The certificate in higher education administration is designed for individuals who are planning or enhancing a career in a broad range of administrative positions in higher education institutions. The certificate will provide core knowledge for
administrative processes in the context of higher education institutions.

Students must apply for admission to the certificate program and meet the admission standards and application requirements for all graduate students as stated in the Graduate Admissions Policies section.

Students pursuing this certificate must complete 18 credits distributed as follows:

- Three required courses (9 credits): CTCH 621, 622, 624
- One course (3 credits) chosen from CTCH 603, 606, 626, or 645. Special topics courses, when relevant, may be used to fulfill elective credits with the prior approval of the coordinator.
- Two elective courses (6 credits), chosen in consultation with an advisor

**History and Art History**

Phone: 703-993-1250
Web: historyarthistory.gmu.edu

**Faculty**

- Mathy Professor: Mattusch (art history)
- Robinson Professor: Bakhash (history)
- Professors: J. R. Censer (dean), J. T. Censer, Holt, Kierner, Petrik, Sherwin, Stearns (provost), Stewart, Wade, Zagarri (history)
- Associate professors: Bristol, Carton, Chang, Copelman, Deshmukh, Hamdani, Karush, Kelly, Landsberg, Lytton, O’Malley, Platt (chair), Smith (history); Butler, DeCaroli (director), Todd (art history)
- Assistant professors: Barnes, Bottoms, Bristol, Cohen, Collins, Hamner, Kelly, Lair, Manuel-Scott, McDow, Schrag, Scully, Verhoeven (history); Greet (art history)
- Term faculty: Leon, McCord, Orens, Scheinfeldt, Schram, Walmsley (history); Gregg, Richardson (art history)
- Postdoctoral teaching fellows: Arthurs, Hudgins, Olsen, Rushford, Scales, Szelenyi

**Course Work**

This department offers all course work designated HIST and ARTH in the Course Descriptions chapter of this catalog.

**UNDERGRADUATE PROGRAMS**

| History, BA | BA-HIST |

**Degree Requirements**

In addition to satisfying university general education requirements and requirements for the BA degree in CHSS, students pursuing this degree must complete 36 credits of history, with at least 18 credits at the 300 and 400 levels. Additional credits of history in excess of 36 may be presented as elective credits to be counted toward graduation. The 36 credits must have a minimum GPA of 2.00 and be distributed as follows:

- Two courses (6 credits) of U.S. history
- Two courses (6 credits) of European history (3 credits fulfilled by the university-wide requirement HIST 100)
- Two courses (6 credits) of global, Latin American, African, Asian, or Middle Eastern history (Six credits will be met if approved history courses are used to fulfill the university general education requirement in global understanding and the college-level requirement in non-Western culture.)
- One methods course (3 credits): HIST 300 (with a minimum grade of 2.00)
- One course (3 credits) of HIST 499 (fulfills university synthesis requirement)
- Four courses (12 credits) of history electives (at the 300 or 400 levels if necessary to complete the 18-credit, upper-level history requirement)

HIST 300 and 499 may not be used to satisfy requirements in the first three bullets. Before registering, students should see an advisor to help plan their history program to meet university general education and college-level requirements. The advisor also can help students choose electives or a minor.

**Writing-Intensive Requirement**

The university requires all students to complete at least one course designated as “writing intensive” in their majors at the 300 level or above. Students majoring in history may fulfill this requirement by successfully completing HIST 300 and 499.

**Honors Program in History**

History majors who have completed 75 credits (a minimum of 15 in history, 6 of which must have been taken at Mason) with a 3.50 overall GPA and a 3.50 GPA in history are eligible to apply to the history honors program. Candidates must have completed or be enrolled in HIST 300 at the time of application. The statement of application should include two Mason history faculty members as references. If a major part of the student’s work includes transfer credit, transcripts may be required. Not all applicants who meet the minimum requirements are guaranteed acceptance into the program.

To graduate with honors in history, students must complete HIST 490 and 491, which are linked individualized courses usually given by the same instructor. Students must have completed at least one course in the field (or with the professor) chosen for these honors courses. HIST 490 should be taken before 491, although they may be taken concurrently. Either course may be taken concurrently with HIST 499 Senior Seminar in History. These 6 credits must be passed with a minimum 3.50 GPA, and the overall history GPA presented for graduation must be a minimum of 3.50. These 6 credits may be counted toward the 36-credit major requirement in history, but they do not replace HIST 499.

**Minor in History**

The program must be approved by the undergraduate director before graduation.

Students pursuing this minor must complete 18 credits in history with a minimum 2.00 GPA.

- Four courses (12 credits) at the 300 and 400 levels
- Three courses (9 credits) concentrated in a region or topic related, if possible, to the student’s major

In accordance with university policy, at least 8 credits must be applied only to the minor and may not be used to fulfill requirements of the student’s major, concentration, or another minor. For policies governing all minors, see the Academic Policies chapter of this catalog.
Interdisciplinary Minor

The department collaborates with various interdisciplinary minors including African American studies, ancient Mediterranean art and archaeology, Asia Pacific studies, Islamic studies, and Latin American studies. Students can earn credits toward these minors by taking selected history and art history courses. See the Interdisciplinary Minors section of this chapter for a description.

Advising

The undergraduate director advises majors and minors. History majors are urged to discuss their programs periodically with the director.

Teacher Licensure

Students who plan to seek teacher licensure and become K–12 teachers should consult the College of Education and Human Development chapter and attend an information session early in their undergraduate career. For more information, call 703-993-2892, e-mail gseadmit@gmu.edu, or go to gse.gmu.edu.

■ Art History, BA  

As a liberal arts discipline, art history emphasizes the analysis of visual data in a historical context. The major program prepares students for graduate study in art history as well as for professional work.

Degree Requirements

In addition to satisfying university-wide general education requirements and requirements for a BA degree in CHSS, students pursuing this degree must complete 33 to 34 credits with a minimum GPA of 2.00 distributed as follows:

• 3 to 6 credits in ARTH at the 100 or 200 level, including 3 credits from ARTH 200, 201, 203, or 204
• One course (3 credits): ARTH 394 (fulfills university synthesis requirement)
• 15 to 18 additional credits of ARTH at the 300 level
• Two courses (6 credits) of ARTH at the 400 level or above, including 3 credits from ARTH 400, 420, 430, 440, 460, 471, 472, or 482
• 3 to 4 credits in AVT 103, 104, 222, 232, 243, 252, 253, 262

All art history majors are encouraged to pursue internships in art history (ARTH 393 or, with permission, ARTH 593) in their junior or senior year. Up to 6 credits in art history internships may be applied toward ARTH requirements for the major, with permission of the art history undergraduate director.

Students are strongly recommended to participate in a study abroad program. Students contemplating graduate study in art history should acquire a reading knowledge of French, German, or other appropriate research languages in consultation with an advisor.

Writing-Intensive Requirement

The university requires all students to complete at least one course designated as “writing intensive” in their majors at the 300 level or above. Students majoring in art history fulfill the university’s writing-intensive requirement by successfully completing any 400-level ARTH course.

Honors Program in Art History

Majors who have completed 75 credits (a minimum of 15 credits in art history, with 6 credits taken at Mason) with a 3.50 overall GPA and a 3.80 GPA in art history are eligible to apply to the art history honors program. Eligible students should apply to the undergraduate director by November 15 or April 15 with a statement of application, which includes the names of two Mason art history faculty members to serve as references. Transfer students may also submit transcripts. Not all applicants who meet the minimum requirements may be accepted into the program.

To graduate with honors in art history, students must complete ARTH 492 and 493, which are linked individualized courses that culminate in a research paper. Students must have completed at least one course in the field (or with the professor) chosen for these honors courses. ARTH 492 should be taken before 493, but they may be taken concurrently. These 6 credits must be passed with a minimum 3.50 GPA, and the overall art history GPA presented for graduation must be a minimum of 3.50. These 6 credits may be counted toward the 33- to 34-credit major requirement in art history, but they do not replace the 6 required credits in ARTH 400, 420, 430, 440, 460, 471, 472, or 482.

Minor in Art History

The minor covers a broad spectrum of periods, cultures, and themes, with an emphasis on historical context.

Students pursuing this minor must complete 18 credits with a minimum GPA of 2.00 distributed as follows:

• 3 to 6 credits of 100- or 200-level art history courses
• 12 to 15 credits of 300- or 400-level art history courses

ARTH 394 is not required for the minor but is strongly encouraged.

In accordance with university policy, at least 8 credits must be applied only to the minor and may not be used to fulfill requirements of the student’s major, concentration, or another minor. For policies governing all minors, see the Academic Policies chapter of this catalog.

Interdisciplinary Minor

The Art History Program coordinates the interdisciplinary minor in ancient Mediterranean art and archaeology. See the Interdisciplinary Minors section of this chapter for a description of the minor.

GRADUATE PROGRAMS

■ History, MA  

The Department of History and Art History provides graduate training in historical methods and analysis for students with widely varying goals. The MA concentrations that follow are designed to meet those goals.

Admission Requirements

Applicants must fulfill admission requirements for graduate study and the Department of History and Art History. These requirements include satisfactory scores on the GRE and two letters of recommendation from history professors with whom the applicant has studied or others directly familiar with the applicant’s professional competence and interests.
The GRE requirement is waived for students who received their undergraduate degrees 10 or more years ago or hold another graduate degree.

**Degree Requirements**

Students pursuing this degree must complete the requirements for one of the concentrations described below. The concentrations require 30 credits of course work along with a specialization in U.S. history (AH), modern European history (EH), or world history (WH). The concentration in teaching requires 36 credits.

To remedy deficiencies in their undergraduate preparation, students may be required to take up to 12 additional credits of foundation courses, which cover broad thematic areas (HIST 601, 602, 605, 606). If required as foundational, these credits cannot be applied toward the credits required for the degree. If foundation courses are not required at admission, students in the concentrations in enrichment and teaching may apply one of the themes courses toward their degree. Students in the other concentrations may not apply these courses toward their degree.

**Concentrations in Predoctoral History (AH1, EH1, WH1)**

These concentrations are for students planning to continue to doctoral studies.

- One required course (3 credits): HIST 610 taken within the first 9 credits
- Five courses (15 credits) in an area of specialization listed below, including 3 credits of a research seminar (HIST 711, 731, or 751) and 3 credits of a comprehensive reading course (HIST 790, 791, or 792) designed by the student and a professor and taken during the last semester of course work. (The comprehensive readings course generally requires reading beyond what is required in the other concentrations. This course is used to round out general historical knowledge and prepare students for the comprehensive exam.)
  - Specialization in U.S. history (at least 3 credits from each group): Origins to 1861, 1861–1914, 1914 World War I to the present
  - Specialization in European history (at least 3 credits from each group): Ancient, medieval, and early modern to 1789; 1789–1914; 1914 to the present
  - Specialization in world history (at least 3 credits from two regions): Africa, Asia, Middle East, Latin America
- Two courses (6 credits) of electives in history
- Written comprehensive exam (Students who do not pass are given the option of a second written exam following the original procedures. The second exam must be taken within a calendar year.)
- 3 credits in HIST 798 (HIST 798 requires the completion of a major paper on a topic in cultural history that is a substantial and original contribution to historical knowledge on the model of an article in a scholarly journal.)
- Reading proficiency in a modern foreign language, as demonstrated by course work or an exam

**Concentrations in Predoctoral History with an Emphasis in Cultural History (AH5, EH5, WH5)**

This emphasis is for students with a particular interest in cultural history and students considering future work in the cultural studies doctoral program. Completion of this emphasis does not guarantee admission into the doctoral program; those interested in enrolling in that program should contact the Cultural Studies Program.

- One required course (3 credits): HIST 610 taken within the first 9 credits
- Five courses (15 credits) in an area of specialization listed below, including 3 credits of a research seminar (HIST 711, 731, or 751) and 3 credits of a comprehensive reading course (HIST 790, 791, or 792) designed by the student and a professor and taken during the last semester of course work. (The comprehensive readings course generally requires reading beyond what is required in the other concentrations. This course is used to round out general historical knowledge and prepare students for the comprehensive exam.)
  - Specialization in U.S. history (at least 3 credits from each group): Origins to 1861, 1861–1914, 1914 World War I to the present
  - Specialization in European history (at least 3 credits from each group): Ancient, medieval, early modern to 1789; 1789–1914; 1914 to the present
  - Specialization in world history (at least 3 credits from two regions): Africa, Asia, Middle East, Latin America
- One course (3 credits): CULT 802
- One course (3 credits) of approaches to cultural history
- One course (3 credits) from outside the area of specialization, containing a significant cultural history component as defined by the instructor
- Written comprehensive exam (Students who do not pass are given the option of a second written exam following the original procedures. The second exam must be taken within a calendar year.)
- 3 credits in HIST 798 (HIST 798 requires the completion of a major paper on a topic in cultural history that is a substantial and original contribution to historical knowledge on the model of an article in a scholarly journal.)
- Reading proficiency in a modern foreign language, as demonstrated by course work or an exam

**Concentrations in Applied History (AH2, EH2, WH2)**

This concentration is for students seeking expertise in applied history fields, such as archival management, museum studies, historic preservation, and historical editing. It is also suitable for professionally employed historians who desire to further their careers.

- One required course (3 credits): HIST 610 taken within the first 9 credits
- Five courses (15 credits) in an area of specialization listed below, including 3 credits of a research seminar (HIST 711, 731, or 751)
  - Specialization in U.S. history (at least 3 credits from each group): Origins to 1861, 1861–1914, 1914 World War I to the present
  - Specialization in European history (at least 3 credits from each group): Ancient, medieval, early modern to 1789; 1789–1914; 1914 to the present
  - Specialization in world history (at least 3 credits from two regions): Africa, Asia, Middle East, Latin America
- 6 credits of applied history courses (historic preservation, museum studies, archives, historical editing, or new media and information technology)
• 3 or 6 credits of internship (if a 3-credit internship is selected, the other 3 credits are taken in applied history course work)
• Proficiency in a relevant research tool (computers, statistics, or a modern foreign language), as demonstrated by course work or exam

▲ Concentrations in Applied History with New Media and Information Technology Emphasis (AH4, EH4, WH4)
• One required course (3 credits): HIST 610 taken within the first 9 credits
• Five courses (15 credits) in an area of specialization listed, below including 3 credits of research seminar (HIST 711, 731, or 751)
  • Specialization in U.S. history (at least 3 credits from each group): Origins to 1861, 1861–1914, 1914 World War I to the present
  • Specialization in European history (at least 3 credits from each group): Ancient, medieval, early modern to 1789; 1789–1914; 1914 to the present
  • Specialization in world history (at least 3 credits from two regions): Africa, Asia, Middle East, Latin America
• Two courses (6 credits) in new media and information technology course work
• 3 or 6 credits of internship in information technology (If a 3-credit internship is selected, the other 3 credits are taken in applied history course work.)
• Proficiency in a relevant research tool (computer science, statistics, information technology, or a modern foreign language), as demonstrated by course work or exam

▲ Concentrations in Enrichment (AH3, EH3, WH3)
This concentration is for students who want to study history for intellectual self-fulfillment or vocational reasons. It allows more flexibility in the selection of courses and does not have a foreign language requirement.
• One required course (3 credits): HIST 610 taken within the first 9 credits
• Five courses (15 credits) in an area of specialization listed below, including 3 credits of a research seminar (HIST 711, 731, or 751)
  • Specialization in U.S. history (at least 3 credits from each group): Origins to 1861, 1861–1914, 1914 World War I to the present
  • Specialization in European history (at least 3 credits from each group): Ancient, medieval, early modern to 1789; 1789–1914; 1914 to the present
  • Specialization in world history (at least 3 credits from two regions): Africa, Asia, Middle East, Latin America
• One course (3 credits) of research seminar: HIST 711, 731, or 751
• Four courses (12 credits) of electives

Six credits of thesis work HIST 799 are optional. If a thesis is elected, students must complete only 6 credits of electives. 

▲ Concentration in Teaching (IS4)
This concentration is intended for students already licensed for teaching or seeking licensure. Although it includes course work in history and education, completion of this concentration alone is not sufficient to qualify for licensure. A licensure program is offered by the College of Education and Human Development (CEHD), and admission is limited. Students are advised to consult with CEHD for specific requirements regarding licensure.
• One required course (3 credits): HIST 610 taken within the first 9 credits
• Six courses (18 credits) in history at least 3 credits each from U.S., European, and world history
• One course (3 credits) of research seminar: HIST 711, 731, or 751
• Four courses (12 credits) in graduate education courses, including EDCI 567

■ Art History, MA
MA-AH
This program offers a unique master’s degree based on departmental strengths in traditional research, the application of new media, and the vast cultural resources of the Washington, D.C., area. Students study a broad range of art-historical periods, theory, and research methods. In addition, the program emphasizes new media skills, museum studies, and pre-professional internship training. Graduates are well-prepared for art museum and gallery professional work, where an MA degree is now routinely required, or further study in PhD programs.

Application Requirements
In addition to meeting requirements for graduate study at Mason, applicants should hold a BA in art history or a minor in art history that includes two courses at the 400 level, or have an equivalent background. Candidates without the requisite background may be admitted provisionally. In addition to the application materials required for graduate study, applicants should submit the following:
• Résumé that clearly describes student’s background in art history or related fields
• Goals statement that explains student’s interest in art history graduate study
• Satisfactory scores on GRE (This requirement is waived for students who received their undergraduate degree 10 or more years ago, or hold another graduate degree.)
• Writing sample
• Two letters of recommendation from art history professors or others closely associated with the candidate’s preprofessional activities

Degree Requirements
Students pursuing this degree must complete 30 graduate credits distributed as follows:
• One required course (3 credits): ARTH 600
• Five courses (15 credits) of electives in ARTH and HIST (electives from AVT, ANTH, or CULT may be used, with prior written permission of the graduate director)
• One course (3 credits) of applied preprofessional learning: ARTH 593 or 594
• One course (3 credits) of technology and new media chosen from HIST 696 or 697; ARTH 699 (3 credits), ARTH 696 (3 credits) in preparation for the comprehensive exam
• Demonstration of reading ability in one relevant research language, to be approved by the graduate director
• Written comprehensive exam (Students may retake the exam once, following the original procedures; the second exam must be taken within one calendar year.)
History, PhD  
PHE-HIST

The PhD in history prepares students for careers in college teaching, digital media, publishing, educational administration, public history, and historical research. Students gain expertise in conventional historical methods and web-based technologies. Major fields include U.S. history, European history, and world history; minor fields are chosen by the student and may include such areas as public history, constitutional studies, and new media and information technology. Depending on career goals and interests, students can also focus their degrees in one of four areas:

**College and university teaching:** This emphasis is for students who are seeking a career in teaching or research at the community college, college, or university level.

**New media and information technology:** Although all students in the program take some courses in new media, students in this emphasis seek careers specifically in new media (publishing, education, or a college or university history department where they would serve as the department’s lead person in new media and information technology). This emphasis requires more advanced work in new media than any other.

**Public and applied history:** This emphasis prepares students for work in applied areas of history, such as museums, archives, federal government work, preservation, and editing, or helps students already working in those areas to advance. In some cases, students will do advanced course work in their field of work; in other cases, they will acquire knowledge or skills that will foster their professional work (such as nonprofit management).

**Professional development:** This emphasis responds to the needs of students who have already launched a career and want a doctoral degree to further career goals or fulfill personal intellectual goals. Candidates who need flexible scheduling will be advised on a case-by-case basis.

**Application Requirements**

In addition to meeting all admission requirements for graduate study, applicants should submit the following:

- Three letters of recommendation from professional colleagues or academic mentors
- GRE score
- Goals statement that explains the applicant’s academic credentials, professional background, intellectual interest in the doctoral program in history, and ultimate career goals
- Writing sample consisting of a history essay, research paper, or professional paper

Admission decisions are usually sent in early March.

**Financial Assistance**

The department offers several research and teaching assistantships to highly qualified applicants. Other aid is available in the form of work study and federal student loans.

**Reduction of Credit**

For students entering the doctoral program with a master’s degree, the number of required credits may be reduced by a maximum of 30 credits, subject to approval of the program faculty and the dean. Requests for reduction of credit are reviewed only after acceptance to the doctoral program.

**Degree Requirements**

Students pursuing this degree must complete a minimum of 72 graduate credits. In addition to core courses, students must complete course work in a major field of study and two minor fields: pass a comprehensive exam; and complete a dissertation. The dissertation demonstrates mastery of the subject matter, methodologies, and conceptual foundations in the chosen field of study. This requirement is generally achieved through consideration of a problem on the boundaries of knowledge in the discipline. The credits are distributed as follows:

- Six core courses (21 credits): HIST 610 (3 credits), HIST 696 (3 credits), HIST 697 (3 credits), HIST 711/713/751 (3 credits), HIST 810 (1 credit per semester for 6 credits), and HIST 811 (3 credits)
- Major field: 15 credits chosen from U.S. history, European history, comparative world history
- Minor fields: 18 credits in two minor fields (9 credits each)
- Doctoral research skills: Students must demonstrate basic competency in computers. Students whose research requires knowledge of a foreign language must also demonstrate a reading knowledge of one foreign language. The department sets specific research skills requirements for students, depending on their field of study.
- Comprehensive exam: Students need to pass a comprehensive exam that consists of a written field statement for each minor field and an oral exam for the major field.
- Dissertation: HIST 998 (3 credits minimum; 6 credits maximum) and HIST 999 (15 credits)

Once enrolled in 998, students must maintain continuous registration in 998 or 999 each semester until the dissertation is submitted to and accepted by University Libraries.

Students will be terminated from the program if they receive more than one unsatisfactory grade (C or F).

**Advancement to Candidacy**

To advance to candidacy, students must complete all course work required on their approved program of study. Students must also successfully complete and pass an oral comprehensive exam in a major field and written field statements in two minor fields. In addition, students must have a dissertation committee appointed by the Dean’s Office as well as an approved proposal. Evidence of the approved proposal must be on file in the Dean’s Office before a student can be advance to candidacy.

**Honors Program in General Education**

Phone: 703-993-1110  
Web: honors.gmu.edu

**Faculty**

Albanese, Alligood (associate director), Bakhash, Bergoffen, Bristol, Burr (director), Burt, Butler, Carboneau, Carton, J. R. Censer, Cherubin, Constantine, Dakake, D’Andrea, DeCaroli, Deshmukh, Diecchio, Fox, Geller, Gifford, Gould, Granfield, Haines, Harbour, Hecló, Hodges, M. Holt, Jacobs, Jann, Johnsen-Neshati, Jones, Karush, Koch, Kulesza, Lee, man, Maloney, Mandaville, Mandes, Mattusch, McFerson, Metcalf, L. Miller, Nadeau, Nichols, J. Paden, Palkovich, Ramos-Pellucia, Roan, Roman-Mendoza, Reid, Rutledge, Sachs, Sample, Samuelian, Seligmann, Shutika, V. Smith, C.  
Snyder, Stearns, Taciuch, Tangney, Taylor, Todd, Trefil, Wilkins, T. Williams, B. Wilson, Yadav, Zaccaro, Zagarri

**Course Work**

The program offers all course work designated HNRS in the Course Descriptions chapter of this catalog.

**Honors Program**

The Honors Program offers a unique selection of integrated, interdisciplinary courses designed for highly motivated students and taught by Mason’s most experienced teachers and accomplished scholars. Taken together, these courses satisfy the general education requirements in social sciences and humanities for all colleges and majors in the university. Because most honors classes have fewer than 25 students, honors students have the opportunity to be known and mentored by distinguished faculty during their first years on campus. The science, technology, engineering, economics, and mathematics track offers honors sections of first-year courses in these disciplines, as well. The Honors Program also offers students special access to the technical, intellectual, and artistic resources of the university and the national capital region, and seeks to develop among its students a sense of intellectual community and a commitment to lifelong learning.

**Admission**

Admission is limited and competitive. If your application meets the criteria for admission to the Honors Program, the applicant will receive an invitation to the program shortly after receiving the acceptance letter to the university. Candidates applying to Mason who also want to be considered for the Honors Program do not submit a separate application. Applicants are evaluated on the strength of their entire academic record, including the rigor of the high school curriculum, GPA, and standardized test scores. Students who do not submit standardized test scores with their application will not be considered for the Honors Program. Students are allowed to use AP, IB, and dual-enrollment credit taken before admission to Mason to substitute for certain HNRS courses, excluding HNRS 110 and HNRS 353.

**Requirements**

The core of the honors curriculum is designed to satisfy the university general education requirements through a small number of interdisciplinary courses, allowing students increased opportunities to pursue minors or other individual interests. Students then have a choice of two tracks, determined by their majors and degrees. The STEM track is designed for students pursuing a bachelor of science degree in a science, technology, engineering, economics, or mathematics major. Those pursuing a bachelor of arts degree have further college general education requirements that are satisfied through the Liberal Arts and Social Sciences (LASS) track.

To receive honors recognition on their transcript, students must earn a minimum GPA of 3.00 in HNRS courses and supporting courses required for their approved honors program. Students whose cumulative GPA falls below 3.00 may complete the program but will not receive honors recognition on their transcripts.

**Continuation in Honors**

Students in the program who are placed on academic warning because their GPA falls below 2.00 (1.80 in the first or second semester) may be ineligible to continue in the program. Honors students are expected to maintain high standards of academic integrity and personal conduct. Students may be asked to withdraw from the program for a violation of the University Honor Code or any other conduct that reflects adversely on the Honors Program.

Students who leave the program before completion must meet university general education requirements and college-level requirements of their particular degree programs. On leaving the program and before registering for general education courses, students should be advised on equivalencies between the honors courses they have completed and general education requirements.

**Transfers**

*Within George Mason:* Because of the sequential and integrated nature of the program, honors courses may not correspond exactly to other courses used to fulfill general education requirements. A list of equivalencies is available in the Honors Program Office and on the web site.

*Outside George Mason:* Course work in the Honors Program may meet the general education requirements of other universities. As in all transfer situations, general education requirements of one institution may not precisely match those of another.

**Individualized Study**

Phone: 703-993-4556
Web: bis.gmu.edu

**Administration**

Jeannie Brown Leonard (Director)

**Bachelor of Individualized BIS-INDV Study**

The bachelor of individualized study (BIS) degree provides an alternative to the traditional baccalaureate, offering students a distinctive educational opportunity that allows them to integrate previous experiences into university course work. Recognizing that college-level learning may be acquired through varied professional, military, and personal experience, the BIS provides mechanisms for translating experiential learning into academic credit. The BIS Program accepts transfer credits from traditional institutions of higher education, as well as credits earned through other appropriate means (see Credit for Nontraditional Modes of Learning below).

There are two pathways for obtaining the BIS. Students can pursue a BIS standardized concentration or design their own individualized interdisciplinary program of study. These alternatives require different course work, prerequisites, and eligibility requirements.

**BIS Eligibility Requirements**

Applicants must have completed high school at least seven years prior to admission to the program (except the BIS in early childhood education studies degree) and have accumu-
lated at least 30 college-level credits, 15 of which must have been earned through conventional classroom instruction.

Application and Acceptance

Students interested in the program must attend a BIS information session and submit a separate application to the BIS Program. The BIS application and information schedule are available online at www.bis.gmu.edu. Admission is selective and based on a minimum GPA of 2.50 on previous course work. Students must also submit an undergraduate admissions application to the university.

University Requirements

BIS students must complete a minimum of 120 credits of course work. At least 45 credits must be upper-level courses (300 level or above) and at least 30 credits must be taken at Mason. All BIS students must complete basic general education requirements, including 6 credits in English composition (ENG 101 and ENG 302), 3 credits in synthesis (BIS 490), and 9 credits each in humanities, social sciences, and science/quantitative reasoning/information technology. To fulfill the latter, students must complete 3 credits in MATH or STAT (MATH 106 or STAT 250), 3 credits in IT-designated course work, and 3 credits in a nonlab science.

BIS Standardized Concentrations

In standardized concentrations, BIS students complete designated interdisciplinary programs of study. In a standardized concentration, students must complete 34 credits with a minimum GPA of 2.00. At least 25 credits of the concentration must be at the 300 level or above, and 25 credits of the concentration must be completed at Mason. No more than 6 credits of C- or D grades may be applied to the concentration.

▲ BIS Concentration in Business Communications (BCO)

This concentration provides an interdisciplinary foundation for students who want to pursue a variety of business and/or communication-related careers. Drawing from course work in management, psychology, communication, and English, students learn about communication in the workplace from multiple perspectives.

Concentration Requirements

In addition to the university requirements for BIS students given above, students pursuing this degree must complete 34 credits distributed as follows:

• Two required courses (4 credits): UNIV 300 (1 credit) and BIS 490 (classroom-based synthesis course)
• 30 credits of interdisciplinary course work, including COMM 305 or 332, 320, 330 or 389, 335, 401 or 434; MSOM 301, 302, 303; ENG 410; PSYC 467; SOCI 304

▲ BIS Concentration in Educational Psychology (EDP)

This concentration provides an interdisciplinary foundation for students who want to go into educational careers, including administrative, instructional, and counseling roles across the K–12 spectrum. Drawing from psychology and education course work, students in this concentration learn about the psychology of learning, including cognitive processes across developmental stages and educational strategies through which individuals better comprehend and internalize knowledge.

Concentration Requirements

In addition to the university requirements for BIS students given above, students pursuing this concentration must complete 34 credits, distributed as follows:

• Two required courses (4 credits): UNIV 300 (1 credit) and BIS 490 (classroom-based synthesis course)
• 30 credits of interdisciplinary course work, including EDUC 301, 302, 422 or 472; EDUT 411, 413 or 414; PSYC 211, 213, 309 or 317, 314 or NCLC 312 and PSYC 321 or 325

▲ BIS Concentration in Early Childhood Education Studies (ECES)

This concentration offers students holding a Northern Virginia Community College associate’s degree in applied science degree in early childhood development the opportunity to obtain a BIS in early childhood education studies and a minor in management. This concentration does not lead to teacher licensure in early childhood education.

Admission Requirements

Admission to this concentration requires a separate application to the program after admission to the university. Students are guaranteed admission to Mason and the BIS program if they have achieved the GPA stipulated in the Mason/NVCC general articulation agreement (currently 2.75) and completed all requirements for an associate’s degree in applied science in early childhood development. Unlike the individualized program, there is no restriction regarding years since high school graduation for admission into the BIS in early childhood education.

Concentration Requirements

In addition to fulfilling the all university general education requirements, students pursuing this concentration must complete the following:

• Three courses (7 credits): BIS 390, 490, and 491 (1 credit; taken concurrently with BIS 490)
• 27 credits of interdisciplinary course work, including ENGL 302, EDUC 302, SOCI 303 or GOVT 300, NCLC 312, PSYC 313, EDUT 413 or 414, EDUT 423 or 424
• 15 credits leading to a minor in business: MSOM 300, 301, 303, 304, 305

▲ BIS Concentration in Human Resources and Organizational Studies (HROS)

This concentration provides an interdisciplinary foundation for students who want to pursue careers in employee relations, human resources management, and organizational development. Drawing from course work in sociology, management, psychology, and communication, students learn theories on employee and organizational behavior from multiple perspectives as well as ethical and best practices in the field.

Concentration Requirements

In addition to the university requirements for BIS students given above, students pursuing this concentration must complete:

• Two required courses (4 credits): UNIV 300 (1 credit) and BIS 490 (classroom-based synthesis course)
• 33 credits of interdisciplinary course work, including MGMT 301, 321, 413 or 414, 421, 431; PSYC 320, 330, 333 or 435; SOCI 304; COMM 320 or 335; NCLC 305; SOM 301 or ENG 410
 ▲ BIS Individualized Concentrations (IND)

Working with BIS staff and a faculty mentor, BIS students develop an interdisciplinary concentration to meet their academic needs and interests. Students may incorporate into their individualized concentrations up to 9 credits of previously earned college course work and nontraditional credit from other institutions. The concentration is 34 to 46 credits, completed with a minimum GPA of 2.00. At least 25 credits applied to the concentration must be at the 300 level or above and 25 credits of the concentration must be completed at Mason. No more than 6 credits of C- or D grades may be applied to the concentration.

Concentration Requirements

In addition to the university requirements for BIS students given above, students pursuing an individualized concentration must complete 34 to 46 credits distributed as follows:

• Four courses (10 credits) of BIS course work: BIS 300, 390, 490, and 491 (1 credit taken concurrently with BIS 490). Students are encouraged to include BIS 489 Directed Readings in the concentration before their senior capstone project. The BIS course work is not transferable to other degree programs at Mason.

• 24 to 36 credits drawing from a minimum of two disciplines

BIS 390 is designated “writing intensive” and a grade of 2.00 or better is required as is the case for ENGL 302, which must be completed before enrolling in BIS 390. BIS 490 is a student’s senior capstone project and varies according to the individual program of study. It may be a research or creative project, and it must be appropriate to the student’s concentration. BIS 490 requires a significant written component and fulfills the synthesis requirement. Students must receive a grade of 2.00 or better in BIS 490. The project is evaluated by a committee consisting of the student’s faculty mentor and at least one other faculty member or qualified professional. BIS 490 and BIS 491 are taken when no more than 6 credits remain in the concentration.

Courses in the concentration may not be counted toward requirements for general education. Students are encouraged to pursue a minor, but 15 credits of the minor must be applied only to the minor and not to the BIS concentration.

Credit for Nontraditional Modes of Learning

The BIS program allows students to receive college credit for learning acquired through a variety of nontraditional methods indicated below. The maximum allowable credits are indicated for each category.

Nationally recognized exam programs such as the College Level Examination Program (CLEP) when the particular exam has been approved for Mason credit. For an approved list, go to admissions.gmu.edu/exams/ExamCLEP.asp (45 maximum credits).

Certain university approved industry, government, or military training credits if such credits are indexed and recommended as college-level credit by the American Council on Education (ACE). To be eligible for Mason credit, training and course specifics must exactly match what is in the ACE guide (45 maximum credits) and be approved for Mason credit. The specific credits must also be approved by the program director and the dean. Note: Total combined credit for exams and ACE-approved training cannot exceed 60 credits. For ex- ample, if 45 credits are accepted by ACE-approved training, a maximum of 15 credits can be accepted for the exam.

Experiential learning demonstrated by portfolios subject to approval by the program director and the dean (30 maximum credits)

College-level credit earned at institutions accredited by bodies other than recognized regional accrediting organizations subject to approval by the program director and the dean. These credits can only be considered if the institution is listed in Accredited Institutions of Postsecondary Education published by ACE (30 maximum credits).

Students may not pursue credit for options 1, 2, and 4 once they have matriculated at Mason. They must complete the third option within their first 30 credits after matriculation. Although the types of credit noted above may be applied to a BIS degree, not all university and program requirements can be fulfilled in these ways. All students are required to complete specific courses at Mason to earn the BIS degree regardless of the numbers of credits they transfer to Mason.

Bachelor’s/Accelerated Master’s Program in Telecommunications

Students in the BIS program may apply for admission to an accelerated MS in telecommunications while they are undergraduate students. For more information, see the BS/Accelerated MS in Telecommunications Program in the Volgenau School of Information Technology and Engineering chapter.

Interdisciplinary Minors

In addition to department-based minors, CHSS offers many minors in interdisciplinary areas of study. These minors require course work from two or more disciplines and are administered by interdepartmental faculty groups. In accordance with university policy, at least 8 credits must be applied only to the minor and may not be used to fulfill requirements of the student’s major, concentration, or another minor. For policies governing all minors, see the Academic Policies chapter of the catalog.

Minor in African American Studies

Phone: 703-993-1201

Faculty
Brigety, Carbonneau, Carton, Cherubin, Clark, Dennis, Fauntroy, Fuchs, Haley, Horton, Johnson, Lepore, Levine, Manuel-Scott, Miller, Paden, Richards Jordan, Smith, Stewart, Trafton, Travis (director), Weatherspoon, Wilkins

The African American Studies Program offers all course work designated AFAM in the Course Descriptions chapter of this catalog.

The African American Studies Program is an interdisciplinary program that examines the cultural, historical, economic, and political dimensions and experiences of people of African descent in America, the Caribbean, Africa, and throughout the Diaspora. It introduces students to theories and methodologies that examine the complex dynamics of race, class, gender, and ethnicity in America. The program enables students to develop critical and analytical approaches to societal issues because such issues are addressed and delineated in a variety of academic disciplines and programs.
Students pursuing this minor must complete a minimum of 15 credits of related course work with a minimum GPA of 2.00 distributed as follows:

- One required course (3 credits): AFAM 200
- Four elective courses (12 credits) chosen from AFAM 490, 499; DANC 118; ENGL 368, 370, 371, 372; FREN 451, 454; GEOG 325; GOVT 464; HIST 130, 261, 262, 335, 336, 340, 466; SOCI 308, 332

Other electives may be approved in advance by the director.

**Minor in Ancient Mediterranean Art and Archaeology**

Phone: 703-993-3770

**Faculty**

Butler (coordinator), Cherubin, Lytton, Mattusch, Winkler

This interdisciplinary minor is for students with diverse interests in the material culture of the ancient world. Course work combines the study of archaeology, literature, art, history, philosophy, myth, and religion. The minor’s scope is not limited to Greece and Rome, but touches on all the ancient civilizations of the Mediterranean and the heirs of late antiquity such as Byzantium and early Islam.

The program represents foundation work crucial to graduate study in traditional departments of classical, near Eastern, or Mediterranean art and archaeology. Through this minor, students are given credit for acquiring practical linguistic skills and archaeological field experience as well as scholarly background. Students should consult with the coordinator in designing a program. At least 3 credits must be taken in ARTH, and at least 9 credits must be taken outside of ARTH.

Students pursuing this minor must complete 18 credits distributed as follows:

- Preparatory work: at least 3 credits of Greek, Latin, or a modern research language in addition to the basic two-year introductory language sequence; or GREE 150, 160; or 3 credits of course work in ancient literature chosen from ARTH 102; CLAS 250, 260; RELI 211
- 6 to 9 credits of electives from ANTH 324; ARTH 319, 320, 321, 322, 324, 333, 399 (with approval of the coordinator); CLAS 340, 350, 360, 370, 380, 390; HIST 301, 302, 480; PHIL 301; RELI 351, 352, 381; other courses pertaining to the region and period, with approval of the coordinator
- 3 credits of seminar: ARTH 420 or 430 (if topic is appropriate)
- 3 to 6 credits of practicum: a museum course (ARTH 394/594); ANTH 322, 325, 420, 430; or archaeological field work done for credit or an appropriate ARTH 393 internship (with prior, written approval of the coordinator)

**Minor in Asia-Pacific Studies**

Phone: 703-993-2957

**Faculty**

Butler, Chang, Cuong, DeCaroli, Hinton, H. Nguyen (coordinator), Lin, Paden, Platt, Ro, Wan, Zhang

The interdisciplinary minor in Asia-Pacific studies is for students whose interests focus on the humanities and social sciences and Asia’s role in global systems and the cultural mosaic of human experience. In particular, a new type of transregionalism is explored: the links between Asia and North America.

Students pursuing this minor must complete a minimum of 18 credits distributed as follows:

- Two required courses (6 credits) chosen from ARTH 203; GOVT 333; HIST 251, 252; RELI 212; any single 200-level or higher course in an Asian language
- Four elective courses (12 credits), chosen from ANTH 306, 311, 315, 387, 434, 435, 436, 437; GOVT 433; HIST 353, 354, 356, 357; RELI 314, 315, 337; or any course from the list of required course options not used to fulfill the requirement

Other electives are possible, including approved study abroad or internships, when relevant, are possible with prior approval of the coordinator. Language courses in Chinese, Korean, or Japanese are strongly recommended.

**Minor in Film and Media Studies**

Phone: 703-993-2768

**Faculty**

Christensen, Fuchs (director), T. Gibson, A. Landsberg, Lont, Ricouart, Roan, Sample, Scarcleta, Winkler

The Film and Media Studies (FAMS) interdisciplinary minor explores mass culture in its visual manifestations and helps students develop an informed awareness of culture and media, ideological tendencies, and effects on daily experience. Committed to interdisciplinarity, the program addresses the increasing complexity and multiplicity of visual cultures and offers students the tools with which to read a variety of texts, including film, television, video, and new media.

Most course work is offered through the Departments of Communication and English, with other courses available through the Department of Modern and Classical Languages and the Program in Film and Video Studies. The two required courses provide an introduction to the languages of film and popular media and modes of analysis appropriate to each. They are prerequisites for all advanced work in the minor. Students select four additional courses designed to introduce a more specialized level of study. Students may decide to focus on film, television, or the study of mass culture, or they may choose some mix of courses that suits their interests.

Communication majors must choose at least 6 credits outside of communication for their FAMS elective courses.

Students pursuing this minor must complete 18 credits distributed as follows:

- Two required courses (6 credits): ENGL 332 and COMM 380

* Requires prior written approval of FAMS coordinator
** May be repeated if topic is different
*** With permission of instructor and approval of FAMS coordinator
Minor in Folklore and Mythology
Phone: 703-993-1172

Faculty
Burns, Decaroli, ffolliott, Fuchs, Johnsen-Neshati, Mattusch (cocoordinator), Owens, Rutledge, Shiner, Shutika, Todd, Winkler, Yocom (co-coordinator)

Stories told in both sacred and secular contexts, along with festivals, foods, music, material objects, and other traditional art forms, continue to influence our lives. This interdisciplinary minor offers students tools to explore the compelling meanings within these seemingly simple, everyday cultural texts, and helps them become more aware of the ways these texts are used by individuals and institutions for various goals. Students study folklore and mythology by juxtaposing the multiple viewpoints of anthropology, art history, classical studies, literary studies, and religious studies.

Students pursuing this minor must complete 18 credits chosen from three groupings given below with a minimum GPA of 2.00. If one of these courses is used to fulfill the 3 credits of literature required for general education, it may not be used to fulfill a requirement for the minor.

• One course from Group 1 (3 credits): ARTH 102; CLAS 250; RELI 100, 211, 212 (Students may take only one Group 1 course from a department for credit toward the minor.)
• Four or five courses from Group 2 (12 to 15 credits): ANTH 418, 427, 450; ARTH 319, 321, 322, 382, 383, 384, 385; CLAS 340, 350; ENGL 311, 333, 337, 491, 498, 591; RELI 351, 401, 408
• Up to one course from Group 3 (0 to 3 credits) Independent study and internships: ANTH 299, 495; ARTH 393, 490, 491; ENGL 498, 499; summer field work schools offered by the American Folklife Center at the Library of Congress and other institutions approved by faculty

To avoid duplication of courses, English majors who choose the folklore and mythology interdisciplinary minor may not select the English Department’s folklore, mythology, and literature concentration.

Minor in Global Systems
Phone: 703-993-1400

Faculty
Harbour (coordinator)

The minor consists of 18 credits of non-region-specific courses that deal with global connections or transactions. It is ideal for majors in business disciplines, economics, languages, geography, government and international politics, history, and other disciplines that take a global view. At least 9 credits must be at the 300 level or above.

Other globally oriented courses may also fulfill or substitute for the requirements of this program with written permission of the coordinator prior to registration.

Students pursuing this minor must complete a minimum of 18 credits distributed as follows:

• One required course (3 credits): GLOA 101, GOVT 132, or HIST 130
• Five elective courses (15 credits) chosen from at least two of the following fields:

• Field A: Government, geography, and administration of justice
  ADJ 405; GEOG 101, 301, 303, 304, 305; GOVT 132, 348, 349, 444
• Field B: Economics, anthropology, marketing, history, and sociology
  ANTH 300, 312, 331, 333, 375; ECON 360, 361, 380, 390; HIST 125, 130, 387; MKTG 407; SOCI 332
• Field C: Environmental science, global health, systems engineering, urban and suburban studies, civil and infrastructure engineering
  BIOL 307, 377; CEIE 100, 450, 455, 456; EVSC 206; GCH 543; SYST 201; USST 301
• Field D: Modes of communication
  COMM 305, 456, 656; DANC 118; MUSI 103, 431; THR 359

Minor in Immigration Studies
Phone: 703-993-1178

Faculty
Cleaveland, Haines, Ibara, Leeman, Maloney, Rabin, Ritchie, Seligmann, Shutika (coordinator)

The minor in immigration studies combines perspectives from the humanities and social sciences to provide an interdisciplinary and comparative understanding of the immigrant experience, ethnic identity, assimilation, ethnic exclusion and conflict, and refugee situations.

Students pursuing this minor must take 15 credits with a minimum GPA of 2.00, distributed as follows:

• One required course (3 credits): ANTH 340
• One course (3 credits) focused on ethnicity in the United States chosen from SOCI 308; HIST 418; ENGL 375, 479
• One course (3 credits) focused on global perspectives on migration and ethnicity chosen from ANTH 331, GOVT 445, CONF 302
• Two elective courses (6 credits) chosen from FRLN 385; NCLC 361; SOCI 332; SPAN 430; ENGL 420

Minor in Islamic Studies
Phone: 703-993-1261

Faculty: Amireh, Bakhsh, Butler, Dakake, Decaroli, Hamdani (coordinator), Hilmi, Katz, Lukacs, Mandaville, Paden, Sheers

The minor in Islamic Studies is designed for students interested in the societies, culture, history, and politics of the Islamic world. It is available to currently enrolled undergraduates.

Students pursuing this minor complete 21 credits distributed as follows:

• Three core courses (9 credits): GOVT 345, HIST 281, RELI 272
• Three elective courses (9 credits) chosen from ANTH 309, 311; ARTH 320, 382; FREN 453; GEOG 325, 330; GOVT 328, 332; HIST 282, 462, 465; RELI 374, 375
• One course (3 credits) in a foreign language of any country with a significant Muslim population. While Arabic may be used to fulfill this requirement, other languages can be substituted with prior approval of the coordinator. Students may have this requirement waived by demonstrating proficiency in a relevant foreign language.

Field A: Government, geography, and administration of justice
ADJ 405; GEOG 101, 301, 303, 304, 305; GOVT 132, 348, 349, 444
Field B: Economics, anthropology, marketing, history, and sociology
ANTH 300, 312, 331, 333, 375; ECON 360, 361, 380, 390; HIST 125, 130, 387; MKTG 407; SOCI 332
Field C: Environmental science, global health, systems engineering, urban and suburban studies, civil and infrastructure engineering
BIOL 307, 377; CEIE 100, 450, 455, 456; EVSC 206; GCH 543; SYST 201; USST 301
Field D: Modes of communication
COMM 305, 456, 656; DANC 118; MUSI 103, 431; THR 359

Minor in Immigration Studies
Phone: 703-993-1178

Faculty
Cleaveland, Haines, Ibara, Leeman, Maloney, Rabin, Ritchie, Seligmann, Shutika (coordinator)

The minor in immigration studies combines perspectives from the humanities and social sciences to provide an interdisciplinary and comparative understanding of the immigrant experience, ethnic identity, assimilation, ethnic exclusion and conflict, and refugee situations.

Students pursuing this minor must take 15 credits with a minimum GPA of 2.00, distributed as follows:

• One required course (3 credits): ANTH 340
• One course (3 credits) focused on ethnicity in the United States chosen from SOCI 308; HIST 418; ENGL 375, 479
• One course (3 credits) focused on global perspectives on migration and ethnicity chosen from ANTH 331, GOVT 445, CONF 302
• Two elective courses (6 credits) chosen from FRLN 385; NCLC 361; SOCI 332; SPAN 430; ENGL 420

Minor in Islamic Studies
Phone: 703-993-1261

Faculty: Amireh, Bakhsh, Butler, Dakake, Decaroli, Hamdani (coordinator), Hilmi, Katz, Lukacs, Mandaville, Paden, Sheers

The minor in Islamic Studies is designed for students interested in the societies, culture, history, and politics of the Islamic world. It is available to currently enrolled undergraduates.

Students pursuing this minor complete 21 credits distributed as follows:

• Three core courses (9 credits): GOVT 345, HIST 281, RELI 272
• Three elective courses (9 credits) chosen from ANTH 309, 311; ARTH 320, 382; FREN 453; GEOG 325, 330; GOVT 328, 332; HIST 282, 462, 465; RELI 374, 375
• One course (3 credits) in a foreign language of any country with a significant Muslim population. While Arabic may be used to fulfill this requirement, other languages can be substituted with prior approval of the coordinator. Students may have this requirement waived by demonstrating proficiency in a relevant foreign language.
language as determined by the Department of Modern and Classical Languages. Such students will have 3 additional elective credits. Courses in another language of the Islamic world can also be applied toward elective credits. Special topics courses, when relevant, may be used to fulfill elective credits for the minor with prior written approval of the coordinator.

- Three core courses (9 credits): GOVT 345, HIST 281, RELI 272
- Three elective courses (9 credits) chosen from ANTH 309, 311; ARTH 320, 382, FREN 453, GEOG 325, 330; GOVT 328, 332; HIST 282, 462, 465; RELI 374, 375
- One course (3 credits) in a foreign language of any country with a significant Muslim population. While Arabic maybe used to fulfill this requirement, other languages can be substituted with prior approval of the coordinator.

Students may have the foreign language requirement waived by demonstrating proficiency in a relevant foreign language as determined by the Department of Modern and Classical Languages. Such students will have 3 additional elective credits. Courses in another language of the Islamic world can also be applied toward elective credits.

Special topics courses, when relevant, may be used to fulfill elective credits for the minor with prior written approval of the coordinator.

Minor in Latin American Studies
See the Latin American Studies section of this chapter for a description of the minor.

Minor in Linguistics
Phone: 703-993-1188

Faculty
Chamberlain, Goldin, Holisky, Jones, Leeman, Levine, McCarthy, Ramos-Pellicia, Roman-Mendoza, Weinberger (coordinator), Wulf

Linguistics is the scientific study of language. Language is studied descriptively, theoretically, computationally, and psychologically, and as a social phenomenon. The field of linguistics thus informs and is informed by many other areas of study, including philosophy, psychology, sociology, computer science, the study of individual languages and literatures, literary studies, and education.

The interdisciplinary minor in linguistics may be combined with a major in one of the areas listed above or in any other field. This minor introduces the fundamental concepts of modern linguistic theory and explores how these concepts relate to various other disciplines.

Students pursuing this minor must complete 15 credits distributed as follows:
- 3 credits in general linguistics
- 3 credits from syntactic theory, phonological theory, or linguistic semantics
- 9 credits of electives, chosen in consultation with the linguistics director

Minor in Middle East Studies
Phone: 703-993-2926

Faculty
Amireh, Bakhash, Bryant, Butler, Gopin, Haddad (director), Hamdani, Hilmi, Katz, Lukacs, Mandaville, Massi-Dakake, Paczynska, Rouhana

Today, more than ever before, Middle East politics has become intertwined with American politics and the lives of many Americans. The minor in Middle East studies is designed to equip undergraduates with a firm multidisciplinary grounding in the region, its history, and its international relations. It is available for enrolled Mason students.

Students pursuing this minor must complete 18 credits, distributed as follows:
- Three core courses (9 credits): HIST 282, GOVT 332, and one of the following: ENGL 349 or ANTH 330
- Three elective courses (9 credits) chosen from GOVT 345; HIST 281, 462, 465, 465, 387; ANTH 399, 399; RELI 211, 272, 374, 375; ARTH 319, 320; GEOG 325; ARAB 325, 330/331. Other relevant courses may be approved by the director of the program.

Only one of the following courses may count as an elective: GOVT 328, 447; CONF 399, 340. Only one elementary or intermediate language course may count as an elective (relevant languages: Arabic, Hebrew, Farsi, Turkish). Students are strongly encouraged to sign up for one of the study tour courses on the Middle East offered by the Study Abroad Program at the Center for Global Education. Destinations include Egypt, Israel, Palestine, Syria, Lebanon, Turkey, Yemen, Morocco, Jordan, and the United Arab Emirates.

Minor in Multimedia
Phone: 703-993-4318

Faculty
Cambridge (co-coordinator), Chung, Forche, Higgins, Lont, Martin, O’Connor, L. Smith (co-coordinator), Weinberger, White

In the multimedia minor, students learn how to create original work and communicate with others through the fusion of images, text, sound, and video. Students analyze and incorporate into their productions contemporary design principles and current software applications. As part of this process, students are encouraged to focus on how multimedia technologies, which offer new tools for investigating and disseminating ideas, can enhance undergraduate research and writing. These skills, now important in most academic disciplines, are also increasingly valuable not only in the specialized information technology industries, but also in business, education, and politics.

This minor is not available to students majoring in AVT with a concentration in digital arts.

Students pursuing this minor must complete 18 to 20 credits distributed as follows:
Students pursuing this minor must complete a minimum of 18 credits. Where relevant to the minor, special topics courses, seminars, independent study, internships, and study abroad may also be taken for elective credit, with prior approval by the coordinator. The credits are distributed as follows:

- One required course (3 credits): GOVT 334 or GOVT 444 (with prior approval of the coordinator)
- Five electives (15 credits), at least one from each field:
  - Field A: History, geography, and politics
    - GEOG 320; GOVT 334 (if not taken as the required course), 337, 338; HIST 314, 322, 329; RUSS 354
  - Field B: Language, literature, and the arts
    - ARTH 362; FREN 441, 442, 470, 580; GERM 451, 580; PHIL 336; SPAN 484, 580

Minor in Political Philosophy

Phone: 703-993-1265

Faculty
Bergoffen, Cherubin, De Nys, Feit, Harbour, Mandaville, Miller, Paden (coordinator), Snyder

The minor provides intensive study in the area of political philosophy and political theory and includes courses that focus on the history of political philosophy; the moral evaluation of political institutions; the ethical, social, and political issues raised by globalization; and the conceptual foundations of democracy and human rights. The minor provides the opportunity for students to study this field from a variety of interdisciplinary perspectives; develops a deeper philosophical perspective on political institutions; and lays the foundation for further graduate study in philosophy, government, or policy studies.

Students pursuing this minor must complete 15 credits distributed as follows:

- Two core courses (6 credits) chosen from PHIL/GOVT 323, 324, 327
- Three elective courses (9 credits) chosen from PHIL/GOVT 323, 324, or 327 (if not used to fulfill the core requirement), PHIL/GOVT 427; PHIL 325, 429; GOVT 328, 329, 420, 421, 428, 448

Special topics courses and independent studies courses, when relevant, may be used to fulfill elective credits with prior approval of the coordinator.

Minor in Science and Society

Phone: 703-993-9621

Faculty
Bitler (co-director), McAuley, Fox, Jacobsen, Kinnaman, Rankin (co-director), Rutledge, Rowan, Smith, Thompson

Through the course work in this minor students explore the effect of science in their daily lives and develop an understanding of the multiple ways that science is integrated into different, nonscience disciplines. As a prerequisite to the minor, students should have completed their general education science requirement of 7 to 8 credits. In coordination with their minor advisor and through CHSS 200, students develop a core of five courses that revolves around a specific theme through which they connect science and society more closely. Possible themes include the environment, ethics, ethnography, faith, healing, justice and the law, media, and medicine, among
others. The program of study must include one foundation course in the related field of study. In addition to completing 15 credits of core courses, students start with CHSS 200 Introduction to Science and Society, which provides them with a broad overview of related topics and helps them to develop their individualized core of courses, and end with a capstone CHSS 400 Perspectives on Science and Society, in which they demonstrate what they have learned through their course of study. Students pursuing this minor must complete a minimum of 18 credits distributed as follows:

- 2 credits of CHSS 200
- 15 credits of an individualized core
- 1 credit of CHSS 400

Only 9 lower-level credits can be applied to the minor (7 within the core and the 2-credit CHSS 200), and no more than 3 credits can be applied to both university general education requirements and the minor. No more than two courses from a single department can be applied to the minor. A minimum GPA of 2.00 is required for course work in this minor.

Sample Individualized Cores

Science, Society, and the Environment
- ECON 335, EVPP 110 (foundation course), GEOG 303, NCLC 319, PHIL 343

Science, Society, and Ethnicity
- ANTH 135 (foundation course), ANTH 365, ENGL 311, GEOG 304, HIST 418

Science, Society, and Faith
- ANTH 135 (foundation course), ANTH 496, PHIL 377, PHIL 378, RELI 100 (foundation course)

Science, Society, and Humankind
- ANTH 120 (foundation course), BIOL 313, ENGL 492, NCLC 300, PHIL 111

Science, Society, and Healing
- HSCI 150 (foundation course), NCLC 378, PHIL 309, RELI 341, SOCI 390

Minor in Urban and Suburban Studies

Phone: 703-993-1418

Faculty

Clapsaddle, Clark, Dumont, Gifford, Hackler (coordinator), Haynes, Horton, Hysom, Mattusch, Samara, Schintler, Schrag, Sockett, Stough, Todd, Travis, Verheyen, Wong

The program offers all course work designated USST in the Course Descriptions chapter of this catalog.

Students pursuing this minor must complete a minimum of 18 credits distributed as follows:

- Three core courses (9 credits): USST 301, 390, 401
- Three elective courses (9 credits) chosen from a list of approved electives, which must be selected from more than one of the following categories: environment and culture, government and policy, and economy. Consult the coordinator for a list of approved courses in each category.

Minor in Women and Gender Studies

See the Women and Gender Studies section of this chapter for a description of the minor.

Interdisciplinary Studies

Phone: 703-993-8762
Web: mais.gmu.edu

Executive Committee

Addleson, Burns, Jordan, Kidd, Lont, Martin, Rodgers, Salmon, Seligmann, Simmons, Snyder (director), Sorrell, Wood, Yocom

Course Work

Students in the Master of Arts in Interdisciplinary Studies (MAIS) Program do most of their work in courses listed under the disciplines that they integrate through this graduate program. In addition, this program offers courses designated MAIS in the Course Descriptions chapter of this catalog.

GRADUATE PROGRAM

- Interdisciplinary MAIS Studies, MAIS

This program is for students who seek a master’s degree that integrates knowledge from several disciplines. It addresses the rapidly evolving demand for unique graduate study by promoting advanced scholarship that transcends traditional disciplinary boundaries.

MAIS offers the following structured interdisciplinary concentrations:

- Community college teaching (in communication, English, information systems, math, Spanish, or TESL)
- Folklore
- Higher education (administration or student affairs)
- Religion, culture, and values
- Video-based production
- Women and gender studies
- Zoo and aquarium leadership

The MAIS also offers students the opportunity to design an individualized concentration to meet the special needs of their careers.

Admission Requirements

Students must show a capacity for original thought in cross-disciplinary research. Students will be admitted only if the program can assign a faculty advisor appropriate for the intended course of study. Applicants must fulfill Mason admission requirements for graduate study. Additional requirements vary by concentration.

Degree Requirements

Students pursuing this degree must successfully complete 36 credits of graduate course work. Students must submit a curriculum contract that has been approved by their faculty advisor and the MAIS director. Specific requirements vary by concentration.

Credits that apply to the MAIS degree follow and are subject to the following restrictions:

- Maximum of 6 credits earned through independent study or directed readings and research courses
• Maximum of 6 credits taken through the Consortium of Universities of the Washington Metropolitan Area (credits are counted as resident, not transfer, credit.)
• Maximum of 15 transfer credits*
• Of the possible transfer credits, a maximum of 6 may be from other accredited institutions (12 for students in the zoo and aquarium leadership concentration)

*Transfer credits are those taken before first enrolling as an admitted degree-seeking student, whether taken at another institution, another Mason graduate program, or completed as a Mason nondegree student, or credits taken at another institution (with prior MAIS approval) after admission to the MAIS Program.

All students complete their work in the program with a project or thesis. Students admitted under this catalog are required to take MAIS 797 Proposal (1 credit) and either MAIS 798 Project (2–5 credits) or MAIS 799 Thesis (5 credits).

▲ MAIS Concentration in Community College Teaching (CCT) (communication, English, information systems, mathematics, Spanish, or teaching English as a second language)

The concentration combines 12 credits of college-teaching courses (including course work required for the certificate in college teaching) with 21 credits of graduate work in one of the following knowledge areas: communication, English, information systems, mathematics, psychology, Spanish, or teaching English as a second language (TESL). This concentration qualifies students to teach entry-level courses in these growing fields at the two-year level. In addition, this MA concentration is an appropriate graduate degree for some faculty currently teaching in community colleges.

Concentration Requirements

Students pursuing this concentration must complete 36 credits of work, distributed as follows:

- College teaching course requirements (12 credits)
  - Four required courses: CTCH 601, 602, 603, 685
- Knowledge area course requirements (21 credits)
  - Communication: 12 credits of core courses (COMM 602 or 634, 605 or 635, 650, 653) and 9 credits of electives in consultation with a faculty advisor from graduate-level communication courses, including core courses listed above not used to meet the 12-credit requirement
  - English: ENGL 701, 610 and/or 615 and additional courses in English chosen in consultation with faculty advisor
  - Information Systems: INFS 515, 590, 612, 614 and three additional graduate-level INFS or INFS-related courses chosen in consultation with a faculty advisor
  - Mathematics: MATH 621, 675 and additional courses in mathematics and related disciplines (including statistics) chosen in consultation with a faculty advisor
  - Spanish: SPAN 502, 505, 510 and an additional 12 credits of graduate-level courses (9 credits must be in designated Spanish courses, of which 3 may be in a graduate course designated FRLN.
  - TESL: LING 520, 521, 522, 523, 525, 582 and one elective chosen in consultation with a faculty advisor. LING 507 may be substituted for LING 521.
- 1 credit of MAIS 797 Proposal
- 2 credits of MAIS 798 Project

▲ MAIS Concentration in Folklore (FLK)

This concentration explores the processes of tradition that move through multiple expressive forms, such as folktales, folk beliefs, folk medicine, folk art, folksong, and literature. A discipline based on ethnographic fieldwork, folklore offers students a chance to work in communities and collect living traditional materials that are critical to human identity and values.

Interdisciplinary by nature, folklore thrives on local particularities and compelling global connections. This course of study prepares students for careers in cultural agencies, governmental organizations, and teaching institutions, and advanced study in the humanities.

Concentration Requirements

Students choose a specialization that draws on unique programs throughout Mason, such as museum studies, conflict resolution, nonprofit management, telecommunications, and writing. Internships in the many Washington, D.C., metropolitan area folklore organizations are central to students’ experiences.

Students pursuing this concentration must successfully complete 36 credits of graduate course work (at least 6 credits must be taken in courses from outside the Department of English) distributed as follows:

- 18 credits of core courses, including
  - 9 credits of special topics in folklore (ENGL 591, 798)
  - 3 credits of pathways in folklore scholarship (ENGL 591 or 798)
  - 3 credits of internship in folklore (ENGL 604)
  - 3 credits of research methodology chosen from ENGL 701, HIST 610, SOCI 634
- 9 credits of specialization (approved by advisor).
  Specialization topics include public folklore (museums, archives, arts and humanities councils, and nonprofit organizations); folklore (ethnicity and immigration); folklore and literature; folklore and the teaching of writing and literature; folklore and history; and folklore and conflict resolution. Students also can opt for open specialization, with courses chosen in consultation with advisor. Possibilities include folklore and editing, applied storytelling, folklore and mythology, folklore and art history, folklore and gender studies, and folklore and communication.
- 3 to 6 credits of electives (approved by advisor)
- 1 credit of MAIS 797 Proposal
- 2 to 5 credits of MAIS 798 Project or 5 credits of MAIS 799 Thesis

▲ MAIS Concentration in Global Interaction (GLOI)

This concentration in global interaction is not available on the Northern Virginia campuses. It is aimed at international students who wish to develop professional skills for functioning in English-language international settings, whether of business, government, education, or civil society. The curriculum provides a range of skills in such crucial areas as organizational structures, economic development, legal instruments, and multicultural communications. It does so with an emphasis on the language and topical skills that are basic to work and life in the global English-speaking community, which spans North America, Europe, Asia, and Africa. The program is explicitly interdisciplinary and multicultural, with an emphasis on course work and thesis development that will help position graduates in this broader global community.
**Concentration Requirements**

Students pursuing this concentration must complete 36 credits distributed as follows:

- Four core courses (12 credits): SOAN 500, GOVT 841, PUAD 504, SOCI 804
- Three courses (9 credits) of specialization chosen from ANTH 635; ECON 676; GEOG 525; GOVT 631, 833; HAP 609; PUAD 636; SOAN 510; SOCI 633
- 1 credit of MAIS 797
- 5 credits of MAIS 799
- Three elective courses (9 credits) chosen from ANTH 617, 630, 632, 640, 655; CONF 720, 728; ECON 825, 842; EDLE 610, 614; GEOG 533, 553; GCH 543; GOVT 540, 614, 725; HAP 542, 621; ITRN 603; JTCP 702, 760; PUAD 502, 640, 643, 660; PUBP 503, 602; RELI 633; SOAN 670; SOCI 635, 651, 619, 692, 850

Courses listed under specialization may also serve as electives subject to advisor approval.

▲ **MAIS Concentration in Higher Education (HEDU)**

This concentration prepares individuals for administrative and leadership positions in colleges and universities, associations, and government agencies whose activities affect higher education. Within the concentration, students may choose to emphasize administration or student affairs.

**Concentration Requirements**

Students pursuing this degree must complete 36 credits distributed as follows:

- Four core courses (12 credits): CTCH 621 or 601 with remaining courses chosen in consultation with advisor
- One course (3 credits) of research methodology
- One course (3 credits) of specialization: CTCH 622 or 644
- Three courses (9 credits) of electives chosen in consultation with advisor
- 3 credits of CTCH 685 Practicum
- 1 credit of MAIS 797 Proposal
- 5 credits of MAIS 798 or 5 credits of MAIS 799

▲ **MAIS Individualized Concentration (IND)**

This concentration is for students who wish to design a graduate program to meet the special needs of their careers and life plans. Students usually choose this option because traditional graduate programs do not meet their specific goals. Students, with help from faculty advisors, design unique programs of study that include courses from several academic departments.

Students must complete a project or thesis that represents the culmination of their program of study. Work on the project or thesis is done under the direction of a faculty committee, usually chaired by the student’s faculty advisor. Project or thesis proposals must be approved by the faculty committee and the MAIS Executive Committee before students can register for project or thesis credits (MAIS 798, 799). The university thesis requirement for continuous registration also applies to the project.

**Concentration Requirements**

Students have access to most graduate courses offered by Mason; note that all course prerequisites are applicable. Specific courses for an individualized degree vary according to student goals and plans. Each student must submit a curriculum contract approved by the student advisor and MAIS director during the first semester enrolled. Any subsequent amendments must have approval of the student advisor and the MAIS director.

Students pursuing this concentration must successfully complete 36 credits of graduate course work distributed as follows:

- 12 to 18 credits in a single discipline (Individualized plan must include a minimum of 12 and a maximum of 18 credits in one concentration.)
- 9 to 18 credits in complementary disciplines (as approved by advisor and MAIS director)
- 3 credits of research methodology (as approved by advisor and MAIS director)
- 1 credit of MAIS 797 Proposal
- 2 to 5 credits of MAIS 798 Project or 5 credits of MAIS 799 Thesis

▲ **MAIS Concentration in Religion, Culture, and Values (RCV)**

This concentration is particularly applicable to, but not restricted to, careers in law, national and international government, print and media journalism, library sciences, archives and museums, public and social service, teaching, advanced graduate studies, and religious communities and institutions. The Washington, D.C., metropolitan area is rich in the presence of many major religious traditions and their places of worship.

**Concentration Requirements**

Students pursuing this concentration must complete a minimum of 36 credits distributed as follows:

- Two core courses (6 credits): RELI 630 and 631
- Two or three additional courses in religious studies (6 to 9 credits) chosen from RELI 591 (may be repeated for credit), 633, 634, 641, or 642
- One course in research methodology (3 credits) chosen from HIST 610 or SOCI 634
- Two or three courses in a specialization (6 to 9 credits) should include one course (3 credits) of religion Specialization in religion, culture, and communication
- COMM 605 and 656
- Specialization in religious traditions and conflict analysis
- CONF 695 (if appropriate), 702, 722, 725
- Specialization in religion, culture, and ethics
- RELI 633, PHIL 640, PHIL 643
- Specialization in religion, values, and international politics
- GOVT 540 and 741 (if appropriate)
- One to four elective courses (3 to 12 credits)
- 1 credit of MAIS 797 proposal
- 2 to 5 credits of MAIS 798 project or 5 credits of MAIS 799 thesis

Electives are chosen in consultation with the student’s advisor, bearing in mind the student’s specialization, project, or thesis topic. Any of the courses listed under the specializations listed above or courses from other disciplines listed below may be used as an elective.

ANTH 535, 615, 684; COMM 605, 656; CONF 695, 702, 722, 725; EDUC 537; ENGL 591 (if appropriate); GOVT
4, 741 (if appropriate); HIST 510; PHIL 604, 617, 640, 643; SOCI 611, 612, 614; WMST 640

MAIS Concentration in Video-Based Production (VBP)
The concentration emphasizes video production that encompasses various components, such as videoconferencing, multimedia, and editing. As low-end, high-quality video equipment becomes more affordable, more organizations (for profit and nonprofit) are investing in in-house production studios and staff. Their needs include traditional videography, videoconferencing, web design, multimedia, and linear editing.

Four units offer relevant courses for the concentration. The Communication Department offers courses in the theory and practice of video production. In the College of Education and Human Development, courses in interactive and distance learning provide a background for pedagogy and a wide spectrum of interactive skills. The English Department offers a course in film theory, and the Art and Visual Technologies Department focuses on computer-mediated visual applications, including the study of multimedia tools and design, digital and electronic art, animation, and virtual reality.

Students must have a basic knowledge of video production. Students with little or no video experience must take COMM 590 Seminar in Video Production within the first 9 credits of the program. Students with video experience who wish to waive a course in film theory, and the Art and Visual Technologies spectrum of interactive skills. The English Department offers a course in film theory, and the Art and Visual Technologies Department focuses on computer-mediated visual applications, including the study of multimedia tools and design, digital and electronic art, animation, and virtual reality.

Students must have a basic knowledge of video production. Students with little or no video experience must take COMM 590 Seminar in Video Production within the first 9 credits of the program. Students with video experience who wish to waive this requirement must provide a videotape of their past work.

Concentration Requirements
Students pursuing this concentration must complete 36 credits distributed as follows:

- Six required core courses: COMM 590, COMM 655 or ENGL 670, COMM 590 or EDIT 704, COMM 697, EDIT 611 or EDIT 750, COMM 694
- 9 to 12 credits of electives chosen from AVT 676; COMM 554, 590, 602, 621, 636, 656, or 696; EDIT 571, 572, 575, 771, 772; HIST 697
- 1 credit of MAIS 797 proposal
- 2 to 5 credits of MAIS 798 project or 5 credits of MAIS 799 thesis

MAIS Concentration in Women and Gender Studies (WGST)
This concentration is for students who wish to explore gender and women’s issues from a variety of disciplinary perspectives. The program combines graduate courses in women and gender studies with courses in a discipline of interest, such as history, literature, sociology, communication, health, education, or public policy. Expertise in the study of gender is increasingly applicable in a variety of professional and academic settings.

Concentration Requirements
Students pursuing this concentration must complete 36 credits distributed as follows:

- Two core courses (6 credits): WMST 630, 640
- 12 credits in a disciplinary focus, selected in consultation with advisor, including 3 credits in a course cross-listed with WMST
- 9 to 12 credits of elective courses, including at least 6 credits in courses cross-listed with WMST that are not part of the disciplinary focus
- 3 credits of research methods, selected in consultation with advisor
- 1 credit of MAIS 797 Proposal
- 2 to 5 credits of MAIS 798 Project or 5 credits of MAIS 799 Thesis

MAIS Concentration in Zoo and Aquarium Leadership (ZAL)
This program prepares students for advanced careers in modern professional zoos and aquariums. The curriculum is designed to enhance relevant social and analytical skills involving critical thinking, problem solving, information technology, and group interaction, as well as advance necessary skills in leadership and fiscal and personnel management.

This concentration offers three specializations within the concentration (see web site for full description): leadership in zoo and aquarium collections management, leadership in zoo and aquarium administration, and leadership in zoo and aquarium conservation education.

Concentration Requirements
Students pursuing this concentration must successfully complete 36 credits of graduate course work distributed as follows:

- Four core courses (12 credits): PUAD 505; NCLC 510, 511, 520
- Three courses (9 credits) of cognate courses, determined by field of specialization and chosen in consultation with advisor and approval of Zoo and Aquarium Leadership (ZAL) faculty coordinator
- 9 to 12 credits of electives, approved by advisory committee and selected in consultation with faculty advisor
- 1 credit of MAIS 797 Proposal
- 2 to 5 credits of MAIS 798 Project or 5 credits of MAIS 799 Thesis

Admitted students who wish to take a course at another accredited institution and apply the credit to this concentration must receive prior approval from the advisor, the MAIS program director, and the dean.

Latin American Studies
Phone: 703-993-1010
Web: las.gmu.edu

Faculty
Berroa (Modern and Classical Languages), Bristol (History and Art History), Burt (Public and International Affairs), Francescato (Modern and Classical Languages), Greet (History and Art History), Karash (History and Art History, director), Leeman (Modern and Classical Languages), Lepore (Dance), Meyer (Economics), Rabin (Modern and Classical Languages), Ramos-Pellicia (Modern and Classical Languages), Seligmann (Sociology and Anthropology), Shutika (English), Yocom (English)

This program offers the opportunity to study one of the world’s most diverse and fascinating regions. Contemporary Latin America is the product of a long and turbulent history of conquest, resistance, and cultural mixing. The result is a rich and unique amalgam of African, indigenous, and European cultures. Understanding these complex societies has never
been more crucial than it is today. While globalization has intensified the historical, cultural, economic, and political links that connect us to Latin America, Latino immigration is transforming who we are. Latinos are now the largest minority group in the United States, representing more than 13 percent of the population, and the numbers continue to rise. Knowledge of Latin American history, culture, society, and politics has become indispensable for anyone who seeks to understand the contemporary United States and its place in the world.

Course Work
The Latin American Studies Program offers courses designated LAS in the Course Descriptions chapter of this catalog. As an interdisciplinary program, Latin American Studies offers many other courses across a range of departments that do not bear the LAS code. For the major and minor, students should consult with the director to determine whether a particular course may be used to fulfill a Latin American studies requirement or elective.

UNDERGRADUATE PROGRAMS

• Latin American Studies, BA  BA-LAS

Degree Requirements
In addition to satisfying university general education requirements and requirements for the BA degree in CHSS, students pursuing this degree must complete 31 credits in Latin American studies with a minimum GPA of 2.00 distributed as follows:
- One course (1 credit) of LAS 100 (weekly lecture series in which students are introduced to the faculty and the various disciplines that compose Latin American studies)
- Two courses (6 credits) in history: HIST 271, 272
- Two courses (6 credits) of social science courses related to Latin America chosen from GOVT 331, ANTH 302, ECON 361, GEOG 316
- One course (3 credits) of humanities courses related to Latin America chosen from ENGL 333, SPAN 322, SPAN 325
- One course (3 credits) of LAS 499 (synthesis, capstone class)
- Four elective courses (12 credits) in Latin American studies.

Students may satisfy the electives requirement with any course that contains a significant emphasis on Latin America or the culture, politics, sociology, or history of Latinos living in the United States. In addition, students are strongly encouraged to use an internship (LAS 490) or a study-abroad program to fulfill some of these credits.

In addition, all Latin American studies majors must demonstrate reading, speaking, or writing knowledge of Spanish or Portuguese by exam or achieving a minimum grade of 2.00 in a 300-level course in the language selected. Upper-level Latin American literature or culture courses taught in Spanish or Portuguese may be used to satisfy the electives requirement.

Minor in Latin American Studies
Students pursuing this minor must complete a minimum of 18 credits distributed as follows:
- One course (3 credits) chosen from HIST 271, 272; GOVT 331
- Five elective courses (15 credits) in Latin American studies in at least three departments.

Students may fulfill the electives requirement with courses in anthropology, dance, economics, folklore, francophone Caribbean literature, geography, government, history, and Latin American literature or culture. Selection of courses should be made in consultation with the program director.

Students minoring in Latin American studies must also demonstrate competence in reading, speaking, or writing Spanish, Portuguese, or French. Language ability is evaluated by interview or exam with an appropriate faculty member or by achieving at least a C (2.00) in a 300-level course in francophone Caribbean literature or Latin American literature or culture. (Students taking upper-level Latin American literature or culture courses may count them toward the second requirement above.)

In accordance with university policy, at least 8 credits must be applied only to the minor and may not be used to fulfill requirements of the student’s major, concentration, or another minor.

Mason Topics

Phone: 703-993-3912
Web: masontopics.gmu.edu

Faculty
Beach, Berg, Behmand, Burns, Caraballo, Carroll, Cherubin, Chang, Cressey, DeNys, Fahema, Gregg, Kelly, Koch, Lytton, McPherson, Michals (director), Nanian, Robbins, Samuelian (coordinator), Schrag, Scheinfeldt, Shiner, Taciuch, Thompson (coordinator), Tomasovic, Zawacki

Introduction
The Mason Topics Program encourages academically motivated students to make meaningful connections between classes in different disciplines by enrolling them in two linked popular general education classes each semester of freshman year. Faculty members teaching these linked classes work together to highlight shared concepts and skills. Class discussions are not confined to the classroom. The program showcases the cultural resources of the Washington, D.C., region and the university. Students enjoy films, talks, and study sessions linked to their classes on the Mason Topics Living and Learning fl ours in the freshman residence halls, helping academics become a focus for social life.

Course Work
The program coordinates curricular links between a variety of courses that are offered by individual academic departments. These courses satisfy university-wide general education requirements for graduation. The courses selected for linkage vary each semester.

Admission
All entering freshmen are eligible for the program, but priority is given to those students whose high school record indicates they are academically motivated and prepared for the program.
Requirements
The program is not an academic major. Rather, it links classes that fulfill a number of general education requirements for graduation that apply to all majors.

Transfers
Because the program links classes that are regularly offered by Mason’s academic departments, it does not affect the process of transferring to another institution.

Modern and Classical Languages

Phone: 703-993-1220
Web: mcl.gmu.edu

Faculty

Professors: Gilbert, Ricouart, Winkler
Associate professors: Berroa, Chamberlain, Christensen (chair), Goldin, Leeman, Levine, Rabin, Roman-Mendoza
Assistant professors: Carreño-Rodriguez, Markx, Ramos-Pellicia, Sanusi, So, Vivancos-Perez, Zhang
Term assistant professors: Daniels, Descalzo de Blas, Fyfe, Pankova
Term instructors: Hilmi, Kirsch, Lamothe, Mircea-Pines, Sievern, Sweet

Course Work
This department offers all course work designated ARAB, CHIN, CLAS, FREN, FRLN, GERM, GREE, HEBR, ITAL, JAPA, KORE, LATN, RUSS, andSPAN in the Course Descriptions chapter of this catalog.

The following courses are offered in English. Knowledge of a foreign language is not required:

- ARAB 325; CHIN 310, 311, 320, 325, 328; FREN 325, 329;
- GERM 301, 325; RUSS 325, 326, 327, 353, 354; SPAN 321, 322, 325, 329; and all courses designated CLAS and FRLN.

Courses numbered 325 may be repeated once for credit if the authors studied are different.

Courses that Fulfill General Education Requirements
Language courses through the intermediate (200) level can be used to fulfill the college-level requirement in foreign languages for the BA degree in CHSS. Approved literature courses offered by the Department of Modern and Classical Languages can be used to fulfill the university general education requirement in literature. FREN 451 and RUSS 353 and 354 fulfill the college-level requirement in non-Western culture. RUSS 354 and SPAN 322 fulfill the university global understanding requirement.

UNDERGRADUATE PROGRAMS

Foreign Languages, BA

This degree, which offers concentrations in French and Spanish, prepares students for teaching careers at the secondary school level, graduate study in languages, and research and professional work in government and private enterprise. Language majors are encouraged to complete a minor or, if possible, a second major in another field. Students who want a double major in a language and another subject should plan a program of study in consultation with advisors from both disciplines.

Writing-Intensive Requirement
The university requires all students to complete at least one course designated “writing intensive” in their majors at the 300 level and above. Students in language concentrations may fulfill this requirement by successfully completing FREN 352 or SPAN 452.

Concentration in French (FRN)
In addition to satisfying the university-wide general education requirements and requirements for a BA degree in CHSS, students pursuing this concentration must complete a minimum of 33 credits in French courses at the 300 level and above, each with a minimum grade of 2.00. Students are expected to complete a balanced program that includes courses in language, culture and civilization, and literature. The 33 credits required in the concentration must include the following:

- One advanced language course (6 credits): FREN 309
- Two courses (6 credits) in literature and civilization chosen from FREN 340, 370, 371
- Three elective courses (9 credits) in FREN at the 300 level or above
- Four courses (12 credits) of FREN courses at the 400 level or above: application of French language, and French and francophone literary and cultural competencies, to the study of a given period, genre, or theme (Prerequisites: 15 credits of FREN courses at the 300 level, including FREN 309, or permission of the instructor.)

No more than one course (3 credits) conducted in English (FREN 325, 329) may be used to fulfill requirements for the concentration in French.

Students are encouraged to take courses in other languages and literatures, and related disciplines, such as music, art, history and philosophy.

Concentration in Spanish (SPN)
In addition to satisfying the university-wide general education requirements and requirements for a BA degree in CHSS, students pursuing this concentration must complete a minimum of 33 credits in Spanish courses at the 300-level and above, each with a minimum grade of 2.00.

- Six credits in SPAN 305 and 306; or SPAN 309; or SPAN 315 and one elective course in Spanish (3 credits)
- Three additional required courses (9 credits): SPAN 370, 385, 390
- 12 credits in SPAN courses at the 400 level
- Two Spanish elective courses (6 credits) that may include other SPAN courses not specifically required or not used to fulfill another requirement

With approval of the department, one course taught in English may be applied toward the concentration in Spanish.

Comparative Literature Emphasis
This program combines the study of a language with cross-cultural literary study. The program requires 10 courses above the 200 level, distributed as follows:

- Two courses in a foreign literature with selected readings in the original language
Minor in Classical Studies

The minor is for students who wish to become familiar with the classical cultures and broaden their knowledge of the foundations of Western civilization and students who are studying other areas of the humanities, especially English, languages, comparative literature, history, art history, philosophy, or religion. The minor provides enough flexibility for students to choose relevant courses according to their primary interests.

Students pursuing this minor must complete 18 credits with a minimum grade of 2.00 distributed as follows:

- 6 credits in classics, including CLAS 250
- 3 credits in classical history (HIST 301, 302, 304, 388, or, with approval, 480)
- 3 credits in classical art history, classical philosophy, or religious studies
- 6 credits of approved elective courses from classical art history, classics, classical history, classical philosophy, and religious studies

In accordance with university policy, at least 8 credits must be applied only to the minor and may not be used to fulfill requirements of the student’s major, concentration, or another minor.

Focus on language

- Four courses (12 credits) in Japanese language: JAPA 330, 331, 440, 441
- One course (3 credits) of Japanese and Japan-related history chosen from HIST 251, 252, 356, 357; ARTH 385
- One elective course (3 credits) chosen from JAPA 320; ARTH 482; CHIN 328; GOVT 333, 433; RELI 212, 315

Focus on history and culture

- Two courses (6 credits) in Japanese language chosen from JAPA 330, 331, 440, 441
- Two courses (6 credits) in Japanese and Japan-related history chosen from HIST 251, 252, 356, 357; ARTH 385
- Two elective courses (6 credits) chosen from JAPA 320; ARTH 482; CHIN 328; GOVT 333, 433; RELI 212, 315

Special topics courses, such as HIST 387, when relevant, may be applied to the minor with prior written approval of the coordinator.

In accordance with university policy, at least 8 credits must be applied only to the minor and may not be used to fulfill requirements of the student’s major, concentration, or another minor.

Minors in Chinese, French, German, Latin, Russian, or Spanish

Prerequisite: Completion of an intermediate (202 or 209) course in Chinese, French, German, Russian, Spanish, or Latin, or equivalent placement test score.

A minor in any of these languages consists of 18 credits above the intermediate level in a single language. Students must achieve a minimum grade of 2.00 in each course applied to the minor. Except for the minor in Latin, no more than one course taught in English may be applied to the minor.

In accordance with university policy, at least 8 credits must be applied only to the minor and may not be used to fulfill requirements of the student’s major, concentration, or another minor. For policies governing all minors, see the Academic Policies chapter of this catalog.

Minor in Chinese

- Three courses (9 credits) chosen from CHIN 300, 301, 305, 480, or 481
- One course (3 credits) chosen from CHIN 318, 355, or 365
- One additional Chinese course (3 credits) chosen from either of the above groups
- One course (3 credits) chosen from CHIN 310, 311, 320; ARTH 384; HIST 353, 354, 355, 387; RELI 314

Minor in French

- One advanced language course (6 credits): FREN 309
- Two courses (6 credits) in literature and civilization chosen from FREN 340, 370, 371
- Three elective courses (9 credits) in FREN at the 300 level or above

Minor in German

- Three courses (9 credits) chosen from GERM 310, 316, 318, 415, or 418
- One course (3 credits) chosen from genre courses at the 300 level or period courses at the 400 level
- One course (3 credits): GERM 301 or 340
- One German elective course at the 300 level or above (3 credits)
Minor in Latin
• Six courses (18 credits) chosen from LATN 351, 352, 451, 452
• Courses vary in content and may be repeated for credit.

Minor in Russian
• Three courses (9 credits) chosen from RUSS 302 or 303, 380, and 381
• One course (3 credits) chosen from RUSS 310 or 311
• One course (3 credits) chosen from RUSS 353 or 354
• One Russian elective at the 300 level or above (3 credits; course must be conducted in Russian)

Minor in Spanish
• 6 credits of required courses: SPAN 305 and 306; or SPAN 309; or SPAN 315 and one elective course in Spanish (3 credits)
• Two additional required courses (6 credits): SPAN 370 and one course chosen from SPAN 385, 388, 390
• Two Spanish elective courses (6 credits) at the 300 or 400 level (not to include courses taught in English)

Graduate Programs

Foreign Languages, MA – MA-FRLN
This program meets the needs and interests of prospective and practicing teachers and other professionals, and prepares students for doctoral study at other institutions. The program offers three concentrations: French or Spanish, French and Spanish, and Spanish/bilingual-multicultural education.

Application Requirements
In addition to satisfying general admission requirements for graduate study, applicants must hold a baccalaureate degree in French or Spanish, have at least a 3.00 GPA (on a 4.00 scale) in the field, and submit two letters of recommendation from people familiar with their academic qualifications.

Applicants whose baccalaureate degrees were earned in other fields or who otherwise do not meet the above requirements but who provide evidence of a capacity to pursue graduate study are encouraged to apply and may be admitted to the program with provisional status. Applicants in this category may be asked to appear for a personal interview and take the appropriate parts of the GRE. They may also have undergraduate deficiencies to make up before having the provisional qualifier removed.

Degree Requirements
Students who elect a concentration in one language must complete a program of 30 credits. Those who concentrate in two languages must complete a program of 42 credits. The concentration in Spanish/bilingual-multicultural education requires 36 credits. In all three concentrations, 6 of the total credits may be earned with a thesis. Regardless of the concentration selected, all students must meet the core and distribution requirements given below and pass a comprehensive exam.

Concentration in French (FRN)
Students pursuing this concentration must complete 30 credits, with at least 18 credits earned in courses with the subject code FREN and distributed as follows:
• At least 6 credits in literature courses covering two different periods
• At least 6 credits in language and linguistics courses
• At least 6 credits of French elective courses in literature or language
• 12 credits of elective courses, of which up to 6 credits may be used for directed reading and research (798) and thesis (799)

Concentration in Spanish (SPN)
Students pursuing this concentration must complete 30 credits, distributed as follows:
• Three core courses (9 credits): SPAN 502, 505, 510
Full-time students must take this core in their first year.
Part-time students must include these courses within their first 12 credits. Core courses may be taken concurrently with other courses.
• 9 credits of courses in Spanish chosen from
One course (3 credits) in the literature of Spain
One course (3 credits) in the literature of Spanish America
One course (3 credits) in Spanish language or Spanish linguistics
• 12 credits of elective courses chosen from
• Additional courses in Spanish language and literature, including courses taken through the Consortium of Universities of the Washington Metropolitan Area
• Up to 6 credits in SPAN 798 Directed Reading and SPAN 799 Thesis
• Courses under the rubric FRLN
• Courses transferred from other universities, including study abroad
• Up to 6 credits of courses in related fields
Students intending to go on for the PhD in linguistics or literature are strongly encouraged to pursue the thesis option. Independent studies courses are not available for graduate students of Spanish.

Concentration in Spanish and French (SF)
Students pursuing this concentration must complete 42 credits distributed as follows:
• 18 credits in French distributed according to the requirements for the concentration in French
• 18 credits in Spanish distributed according to the requirements for the concentration in Spanish
• 6 credits of elective courses, which may be used for directed reading and research (798) and thesis (799)

Concentration in Spanish/ Bilingual-Multicultural Education (SBM)
Students pursuing this concentration must complete 36 credits distributed as follows:
• At least 18 credits in SPAN distributed according to the requirements for the concentration in Spanish and 6 credits of bilingual education seminars selected from EDCI 516, 517, 518, 519, 520, and 521
• 12 credits of elective courses, of which up to 6 may be used for directed reading and research (SPAN 798) and thesis (SPAN 799)
Philosophy

Phone: 703-993-1290
Web: philosophy.gmu.edu

Faculty

Professors: Bergoffen, Rothbart
Associate professors: Cherubin, De Nys, Eckenwiler, Froman, Holman, Kinnaman (chair), Light, Paden, S. M. Skousgaard
Assistant professor: Leighton
Adjunct professors: Bayer, D. Gregory, Oberoi, Sojka, Yost

Course Work

This department offers all course work designated PHIL in the Course Descriptions chapter of this catalog.

UNDERGRADUATE PROGRAMS

- Philosophy, BA

BA-PHIL

The degree program in philosophy covers the major issues and areas in philosophy and serves the needs of students who wish to pursue graduate studies in philosophy or emphasize philosophy while acquiring a broad liberal arts education. Students can use this major as preparation for such professions as law or government service, or complement other interests by taking a double major in philosophy and a related field of study.

Degree Requirements

In addition to university-wide general education requirements and requirements for a BA degree in CHSS, students pursuing this degree must complete at least 33 credits in philosophy, earning a minimum grade of 2.00 in each course. At least 21 credits must be at the 300 level or above, including at least 6 credits at the 400 level or above. The credits must be distributed among area requirements as indicated below. No course may be used to fulfill more than one such requirement.

- At least one course (3 credits) in logic: PHIL 173 or 376
- Two courses (6 credits) in history of philosophy: PHIL 301, 303
- At least one course (3 credits) in the analytic tradition chosen from PHIL 332, 371, 373, 374
- At least one course (3 credits) in the continental tradition chosen from PHIL 336, 337, 340
- At least one course (3 credits) in ethics and social and political philosophy chosen from PHIL 311, 323, 324, 325, 327, 355, 429, 470
- Six elective courses (18 credits) in philosophy chosen from any PHIL courses including those above not used to meet a distribution requirement

When the subject matter is appropriate and with the undergraduate coordinator’s approval, PHIL 391, 392, 421, 425, or 426 may be used to fulfill the analytic tradition, continental tradition, or ethics and social and political philosophy requirements. The following philosophy courses fulfill the general education synthesis requirement: PHIL 309, 343, 377, and 378. Students may choose a concentration in philosophy and law, see below.

▲ Concentration in Philosophy and Law (PHLW)

The concentration in philosophy and law offers philosophy majors the opportunity to focus their study of philosophy in a way that prepares them for the study of the law. In addition to satisfying the university-wide general education requirements and the requirements for a BA degree in CHSS, students pursuing this concentration must also successfully complete 33 credits, with at least 6 credits at the 400 level or above, distributed as follows:

- Five courses (15 credits) from the categories given above in logic (3 credits), history of philosophy (12 credits), the analytic tradition (3 credits), and the continental tradition (3 credits)
- One required course (3 credits): PHIL 311
- At least two courses (6 credits) chosen from PHIL/GOVT 323, 324, 327, 428; PHIL 442 or GOVT 448; PHIL 429, 470
- At least three additional elective courses in philosophy (9 credits)

Other relevant courses may be applied to the concentration with advance written permission of the department.

Writing-Intensive Requirement

The university requires all students to complete at least one course designated “writing intensive” in their majors at the 300 level or above. All senior seminars in philosophy are writing intensive. Philosophy majors should consult the undergraduate coordinator for other courses that can be taken to fulfill this requirement.

Honors Program in Philosophy

Qualified students may pursue advanced work leading to graduation with honors. An undergraduate student wishing to pursue departmental honors in philosophy must apply for that option. To apply for the honors option, a student must be a philosophy major in his or her last semester as a junior (the semester in which the student will complete his or her 90th credit) and must have a GPA in the major of 3.50 or higher. The application must include a transcript, one letter of recommendation from a member of the philosophy faculty, and one writing sample (a paper from one of the student’s PHIL courses). A committee of departmental faculty will determine whether to accept a student for honors course work in philosophy. A student may begin honors option course work only after the completion of 90 credits.

A student will only receive departmental honors if he or she has taken 6 credits of honors course work and has satisfactorily completed all honors requirements for those courses. A student who fails to complete all assignments or who completes them in an unsatisfactory way may receive credit for the course (if earned) but not departmental honors. To receive honors in philosophy, students must complete 6 credits of honors course work in either PHIL 422, 425, or 471. To graduate with honors in philosophy, students must complete these courses with a minimum GPA of 3.50. Work submitted toward the fulfillment of the honors option requirements will be reviewed by the instructor of each course for which the work was assigned.

PHIL 425, Independent Study in Philosophy, may be used toward the honors option only if all of the following conditions are fulfilled: the student submits a proposal for his or her independent study course to the department and the department approves the proposal before registering for the
course: the student and faculty member meet weekly; the student submits written work as specified by the faculty member each week; the student submits a final research paper; the assignments for this course are in accordance with the standards and guidelines for honors course work set by the department.

Minor in Philosophy
Students can take a general minor or one organized around specific emphases, each one stressing a different aspect of philosophy. The emphasis in the history of philosophy is particularly useful to students in the humanities, especially those who wish to pursue graduate study. Students majoring in the human and natural sciences would benefit from the emphasis in reality, knowledge, and science; while those who hope to pursue a career in law or politics would be well-advised to complete the emphasis in social and political philosophy.

Students pursuing this minor must complete 18 credits in philosophy with a minimum grade of 2.00 in each course. No course may be used to fulfill more than one requirement. The credits are distributed as follows:

• One course (3 credits) in logic chosen from PHIL 173, 180, or 376
• Two courses (6 credits) in history of philosophy: PHIL 301 and 303
• Three elective courses (9 credits) in philosophy (at least 6 must be at the 300 level or above). Students may take their electives within one of the emphases listed below: Emphasis in history of philosophy:
  • At least one course (3 credits) in the history of philosophy chosen from PHIL 302, 305, 332, 335, 336, or 337
  • Two courses (6 credits) of electives Emphasis in reality, knowledge, and science:
  • At least two courses (6 credits) chosen from PHIL 312, 337, 340, 357, 371, 373, 374, 375, 377, or 378
  • One course (3 credits) of electives Emphasis in social and political philosophy:
  • Three courses (9 credits) chosen from PHIL 311, 312, 323, 324, 325, 327, 338, or 470

When the subject matter is appropriate and with the undergraduate coordinator’s approval, PHIL 391, 392, 421, or 425 may be used to fulfill the emphasis requirements.

In accordance with university policy, at least 8 credits must be applied only to the minor and may not be used to fulfill requirements of the student’s major, concentration, or another minor.

Minor in Philosophy and Law
The minor in philosophy and law offers students a course of study that emphasizes the philosophical analysis of legal issues. It acquaints students with the rich tradition of philosophical argument dealing with the justification of law, its relation to moral theory, the justifications for punishment, and the concepts of justice, rights, liberty, and legal responsibility. In addition, an education in philosophy in general, and these courses in particular, stress intellectual skills that are important in the study of law.

Students pursuing this minor must complete 18 credits distributed as follows:

• Four required courses (12 credits): PHIL 173, 301, 303, 311
• Two elective courses (6 credits) chosen from PHIL/GOVT 323, 324, 327, 428; PHIL 442 or GOVT 448; PHIL 429, 470 (One elective course (3 credits) may be chosen from other course work designated PHIL with permission of the department.)

In accordance with university policy, at least 8 credits must be applied only to the minor and may not be used to fulfill requirements of the student’s major, concentration, or another minor.

The department also coordinates the interdisciplinary minor in political philosophy. See the Interdisciplinary Minors section in this chapter for a description.

GRADUATE PROGRAM

Philosophy, MA

The department offers a master’s degree with concentrations in either traditional and contemporary philosophy or professional and applied ethics. The degree is designed for students who intend to go on to pursue a doctorate in philosophy and those who seek the master’s as a terminal degree, either in pursuit of their intellectual interests or to further their professional expertise. Both concentrations provide grounding in the history of philosophy, ethics, metaphysics, epistemology, contemporary continental thought, contemporary analytic philosophy, and philosophy of science. The department also offers a graduate certificate in professional ethics for those master’s students interested in combining the study of ethics in a variety of career settings.

Application Requirements

In addition to fulfilling university admission requirements for graduate study, applicants must submit three letters of recommendation, a statement of student goals in pursuing the degree, and a writing sample. GRE exams are not required. They are recommended, especially for those students planning to pursue a PhD in philosophy.

Degree Requirements

Students pursuing this degree must successfully complete 30 credits, which may include a project or thesis. Students need to identify an advisor on entering the program and meet regularly with that advisor during their course of study. With their advisor’s approval, students may apply up to 9 credits from other departments toward the degree. The credits are distributed as follows:

• Four courses (12 credits) of required course work
  3 credits in ancient or medieval philosophy (PHIL 602, 604, or 681, or 691 where appropriate)
  3 credits in modern philosophy (PHIL 605, 608, or 681, or 691 where appropriate)
  3 credits in contemporary philosophy (PHIL 615, 616, 618, or 681, or 691 where appropriate)
  3 credits in an advanced seminar (PHIL 720, 721, or 733)
• Six elective courses (18 credits), which may include 3 to 6 credits of project or thesis

Concentration in Philosophy and Cultural Theory (PHCT)

Students pursuing this concentration must successfully complete 30 credits distributed as follows:

• Two elective courses (6 credits) chosen from PHIL/GOVT 323, 324, 327, 428; PHIL 442 or GOVT 448; PHIL 429, 470 (One elective course (3 credits) may be chosen from other course work designated PHIL with permission of the department.) In accordance with university policy, at least 8 credits must be applied only to the minor and may not be used to fulfill requirements of the student’s major, concentration, or another minor.

The department also coordinates the interdisciplinary minor in political philosophy. See the Interdisciplinary Minors section in this chapter for a description.
• Four courses (12 credits) of required course work
One course (3 credits) in ancient or medieval philosophy (PHIL 602, 604, or 681, or 691 where appropriate)
One course (3 credits) in modern philosophy (PHIL 605, 608, or 681, or 691 where appropriate)
One course (3 credits) in contemporary philosophy (PHIL 615, 616, 618, or 681, or 691 where appropriate)
One course (3 credits) in an advanced seminar (PHIL 720, 721, or 733)
• One required course (3 credits): CULT 802
• One elective course (3 credits) in cultural studies, which may include philosophy courses cross-listed with cultural studies. Students are encouraged to take 802 as early in the program as possible.
• Four elective courses (12 credits) including 3 to 6 credits of project or thesis

▲ Concentration in Professional Ethics (PETH)
Students pursuing this concentration must complete 30 credits distributed as follows:
• Two courses (6 credits) in the history of philosophy, including PHIL 640 (PHIL 691 may be taken to fulfill this requirement only with the written permission of the graduate coordinator.)
• One course (3 credits) in professional ethics: PHIL 641
• Two courses (6 credits) in applied ethics chosen from PHIL 642, 643, 644, or 645 (Where appropriate, and with approval of the student’s advisor, PHIL 691 and 721 may be used to fulfill this requirement.)
• 9 to 12 credits of elective courses
• 3 to 6 credits of project or thesis

■ Certificate in Professional Ethics
CERG-PETH

Students must be admitted to graduate study or approved for graduate course enrollment in nondegree status. Students who initially enroll in the certificate program as nondegree students must apply for admission to the graduate program no later than the second semester of study. The certificate may be pursued concurrently with any other graduate program in the university.

Certificate Requirements
Students pursuing this certificate must successfully complete 15 graduate credits distributed as follows. In consultation with an advisor, students should select their courses to create a coherent program of study.
• One course (3 credits) in the history of ethical theory: PHIL 640
• One course (3 credits) in professional ethics: PHIL 641
• Two courses (6 credits) in applied ethics chosen from PHIL 642, 643, or 644
• One elective course (3 credits) (This requirement may be fulfilled by taking a course in philosophy, but students are encouraged to take courses in other disciplines.)

Psychology

Phone: 703-993-1342
Web: gmu.edu/departments/psychology

Faculty

Professors: Ascoli, Boehm-Davis (chair), Cortina, Denham (director, Applied Developmental Program), Klimoski, Maddux (director, Clinical Program), Mandes, Naglieri (director, School Psychology Program), Parasuraman (director, Human Factors/Applied Cognition Program), Pasnak, Riskind, Rojahn (director, Center for Cognitive Development), R. Smith (director, Biopsychology Program), Tangney, Tetrick (director, Industrial/Organizational Program), Winsler, Zaccaro

Associate professors: Bitler, Blackwell, Buffardi, Flinn, Greenwood, Kello, Kozhevnikov, Peterson, Sanford

Research professors: Butler, Olds

Research associate professors: Bachus, Warren

Assistant professors: Baldwin, Cattaneo, Dalal, Kashdan, Kaplan, King, Mcknight, Mohr, Monk, Perez-Edgar, Rowe, Thompson

Term associate professors: Chroniak, Wanschura

Research assistant professors: Bassett, Fu, McDonald, Stuewig, Tran

Term assistant professors: Battaglia, Hurley, Meier

Affiliates: Eby, Hunt, Traffon

Adjuncts: Anderson, Benedi, Curtin, Dechman, Hawley, Hirsch, Levitas, Mayfield, Perez, Pomeroy, Schumann, Shiraev, Stanhope, Steve, Werber

Course Work
The Psychology Department offers all course work designated PSYC in the Course Descriptions chapter of this catalog.

UNDERGRADUATE PROGRAMS

■ Psychology, BA
BA-PSYC

In addition to university-wide general education requirements and requirements for the BA degree in CHSS, students pursuing this degree must complete the course work with a minimum GPA of 2.00 distributed as follows:

36 credits of psychology (24 of which must be at the 300 and 400 levels), including PSYC 100 (fulfills the university social science requirement), 211 (or two of 313, 314, 415), 231, 300, 301, 317, 325, 372 (or 375, 376), and 465 (Students must have a minimum grade of C- [1.67] in each of these nine or more courses.)

It is strongly recommended that students fulfill the natural science requirement by completing BIOL 103 and 104 because these courses are prerequisites to PSYC 372.

Students who receive transfer credit for a research methods course must take PSYC 304, 309, or 323 unless the transfer course has been approved as writing intensive.

Some of these courses may simultaneously fulfill university general education or college-level requirements; students should consult with an advisor in planning their programs.

■ Psychology, BS
BS-PSYC

In addition to satisfying the university-wide general education requirements for a BS degree, students pursuing this degree
must complete the course work with a minimum GPA of 2.00 distributed as follows:

- 38 credits of psychology (24 of which must be at the 300 and 400 levels), including PSYC 100 (fulfills the university social science requirement), PSYC 211 (or two of 313, 314, 415), 231, 300, 301, 317, 325, 372 (or 375, 376), and 465; and one of the following: PSYC 304, 309, 320, 323, or 373 (Students must have a minimum grade of C- [1.67] in each of these 10 or more courses.
- 14 credits of natural science, including BIOL 103 and 104 (which fulfill the university natural science requirement), plus 6 credits from ASTR, BIOL, CHEM, GEOG 102 and 309, GEOL, PHYS, and UNIV 301
- 6 credits of mathematics, selected from MATH 108, 110, 111, 113, 114; and STAT 250 (Three credits of this requirement fulfill the university quantitative reasoning requirement.)
- 3 credits of IT 103 (fulfills the university information technology proficiency requirement)
- 12 credits of social and behavioral science (not in psychology and not GEOG 102 or 309) and fine arts/religious studies/philosophy (other than PHIL 173 and 376) (Courses must include a minimum of 6 credits in social and behavioral science and 3 credits in fine arts/religious studies/philosophy. These may fulfill the university social and behavioral sciences and fine arts requirements.)
- 3 credits of either ENGL 410 or a third laboratory course in psychology selected from PSYC 304, 309, and 323

For All Psychology Majors

Any psychology course may be used to satisfy the 36-credit psychology requirement for the BA degree or the 38-credit psychology requirement for the BS degree with the following restrictions:

- A maximum of 6 credits of 327, 328, 421, 422, 548, and 549 may be applied to required psychology credits.
- A maximum of 6 credits of 260, 350, and 460 may be applied to required psychology credits.
- No more than 9 credits can be taken from the above without written permission of the department chair.
- PSYC 330 may not be taken for credit by psychology majors.

In addition to course work, undergraduate research experience and letters of recommendation are major factors for admission to graduate study. Therefore, students interested in graduate study should distribute courses across a number of areas in psychology and work closely with one or more professors on individual projects during the junior and senior years.

Honors Program

To receive honors in psychology, students take a sequence of three courses (PSYC 490, 491, and 492) during the spring semester of their junior year and fall and spring semesters of their senior year.

To be eligible for admission, psychology majors must have completed at least 50 credits, a minimum cumulative GPA of 3.25, and a minimum GPA in psychology courses of 3.40. To graduate with honors in psychology, students are required to maintain a minimum cumulative GPA of 3.25 and a minimum GPA of 3.40 in psychology courses. Students must earn at least 3.50 in the three honors courses, which cumulates in the successful completion and presentation of an independent honors thesis.

■ Neuroscience, BS

The BS in neuroscience is an interdisciplinary program emphasizing the relationship between the biology and chemistry of the nervous system and behavior of an organism. The BS in neuroscience prepares students for graduate-level study in both medical school and doctoral and master's-level programs in neuroscience and other health-related fields, and work in the neuroscience field.

In addition to university-wide general requirements, students pursuing this degree must complete the course work distributed as follows:

- Two foundation courses in biology (8 credits): BIOL 213 and 303
- Two foundation courses in chemistry (8 credits): CHEM 211–212*
- One foundation course in mathematics (3 or 4 credits): MATH 113, 114*, or 213
- One foundation course in statistics (3 or 4 credits): STAT 250, PSYC 300, MATH 352, or BIOL 312
- Four foundation courses in physics (8 credits): PHYS 243–244 and 245–246 or PHYS 160–161 and 260–261
- Three foundation courses in psychology (9 credits): PSYC 100, 375, 376
- One foundation course in computer science (4 credits): CS 112
- Three required core courses in neuroscience (9 credits): NSCI 200, 327, and 335
- One required psychology lab course (1 credit): PSYC 373
- 12 credits of elective courses in foundation areas (see advisor for list)
- 12 credits of elective courses in neuroscience (see advisor for list)
- One writing-intensive course (4 credits): NSCI 301

The program requirements also meet the university general education requirements in quantitative reasoning, social and behavioral science, and natural science.

*Students intending to pursue a PhD program in neuroscience or an MD are advised to take CHEM 313 and 315 and MATH 114.

Writing-Intensive Requirement

The university requires all students to complete at least one course designated “writing intensive” in their majors at the 300 level or above. Students majoring in psychology may fulfill this requirement by successfully completing PSYC 301, 304, 309, or 323. Students majoring in neuroscience may fulfill this requirement by successfully completing NSCI 301.

Minor in Psychology

The Psychology Department offers a minor to students who major in any other discipline. Students pursuing this minor must complete 18 credits in psychology distributed as follows:

- One required course (3 credits): PSYC 100
- Three courses (9 credits) from three of the following five areas (at least one area must be cognition or physiological):
  - Developmental: PSYC 211 or 313
  - Social/personality: PSYC 231 or PSYC 324
  - Cognition: PSYC 317
  - Abnormal: PSYC 325
  - Physiological: PSYC 372 (or 375, 376)
• 6 additional credits of psychology courses (with no more than 3 credits taken from PSYC 260, 350, and 460)

Related course work in psychology can enhance many different majors. Please contact the Undergraduate Psychology Office or the Psychology Department web site for a list of suggested courses for students who are majoring in specific disciplines or areas of study that interact well with psychology.

In accordance with university policy, at least 8 credits must be applied only to the minor and may not be used to fulfill requirements of the student’s major, concentration, or another minor. For policies governing all minors, see the Academic Policies chapter of this catalog.

Teacher Licensure
Students who plan to seek teacher licensure and become K–12 teachers should consult the College of Education and Human Development chapter and attend an information session early in their undergraduate career. For more information, call 703-993-2892, e-mail gseadmit@gmu.edu, or go to gse.gmu.edu.

Bachelor’s/Accelerated Master’s Program in Psychology (concentration in biopsychology)
Highly qualified undergraduates may apply to the accelerated master’s degree program and obtain a bachelor’s in psychology and a master’s in psychology with a concentration in biopsychology following satisfactory completion of 146 credits. Well-prepared undergraduates are encouraged to apply as they near completion of 90 credits. Admitted students are able to use up to 6 graduate credits in partial fulfillment of requirements for the undergraduate degree. On completion and conferral of the undergraduate degree with satisfactory graduate-level performance (3.00 in each course, grade of B or better) in graduate courses, students are given advanced standing in the master’s program. All other master’s degree requirements must be met. This program is available only to students pursuing the concentration in biopsychology. Interested students should contact the department for details about the application process.

GRADUATE PROGRAMS

■ Psychology, MA

The MA in psychology has concentrations in industrial/organizational psychology, human factors/applied cognition, school psychology, applied developmental psychology, and biopsychology. The department does not offer an MA in clinical or counseling psychology, but an MA concentration in clinical psychology is available for students who have been admitted to the PhD program.

Application Requirements
In addition to fulfilling admission requirements for graduate study, applicants must have 15 credits in psychology, including a course in statistics and a laboratory course in psychology. In addition, school psychology requires courses in personality or abnormal psychology, developmental psychology, and tests and measurements. Applicants are required to submit results of the GRE taken within the past five years (applicants should plan to take the GRE at least two months before the deadline); three letters of reference from professors or supervisors; and a departmental application. In addition, applicants are asked to submit a biographical statement outlining their background and experience and describing their future goals in psychology. An overall GPA of 3.00 for the last 60 undergraduate credits is required and, generally, a minimum GPA of 3.25 in undergraduate psychology courses, and combined GRE scores of 1,000 or above are also required. Work experience, publications, or special recommendations may compensate for deficiencies in other qualifications. Because the number of students admitted to each program is limited, meeting these minimum requirements does not guarantee admission.

Financial Assistance
Financial assistance is available through graduate assistantships and various forms of grants, loans, and employment.

Nondegree Status
Applicants who qualify for degree status but who are not applicants for a degree at the university may be admitted to nondegree status. Nondegree status is not intended as a qualifying program for degree status. While consideration may later be given to the application of credits earned toward a degree program while in nondegree status, applicants are not ensured that such requests will be granted; however, if granted, no more than 12 credits earned in nondegree status may be applied to a degree program. All students seeking to pursue this option should make their interests known to the appropriate program director.

Provisional Admission
Students may be admitted provisionally and be required to take 12 credits in psychology and earn a minimum GPA of 3.25 in those courses to qualify for removal of the provisional qualifier. Programs may add other conditions to provisional admission. Individualized study work does not count toward the 12 credits.

Degree Requirements

▲ Concentration in Applied Developmental Psychology (APD)
The applied developmental psychology concentration focuses on child development. It provides basic knowledge about normal development, skills for assessing developmental level, and techniques for planning and evaluating programs that foster optimal development.

Students must complete 32 graduate credits, distributed as follows:

• 6 credits of core from cognitive (PSYC 701, 766, 768), biological (PSYC 558, 559, 702), or social (PSYC 667, 668, or 703)
• 8 credits of quantitative methods: PSYC 611, 612
• 9 credits of specialized content from PSYC 592 (with developmental content), 648, 666, 669, 704, or 780
• 4 credits of research/practicum experience from thesis (4 credits of a combination of 798/799) or practicum/directed reading and research (3 credits of 792 and 1 credit of 597)
• 2 credits of professional seminar (PSYC 591 in fall semester of first year)
• 3 credits of an elective course (content course, practicum, or directed reading and research)
The School of Psychology offers a curriculum that provides an integrative and comprehensive approach to the sciences of mind, brain, behavior, and society. The program is designed to prepare students for careers as researchers, educators, practitioners, and leaders in psychology. Students are encouraged to develop a strong foundation in psychology, with opportunities for specialization and interdisciplinary study.

The curriculum is divided into five concentrations:

1. **Concentration in Biopsychology (BP)**
   - Emphasizes training in the neurobiological bases of behavior.
   - Students pursue a master's degree in psychology.
   - Must complete 32 credits distributed as follows:
     - 8 credits of specialized content: PSYC 527, 531, 558
     - 3 credits from PSYC 556 or 599
     - 8 credits of quantitative methods: PSYC 611, 612
     - 1 credit of professional seminar: PSYC 591
     - 6 credits of elective courses chosen from BIOL 583; PSYC 561, 702, 704
     - 6 credits of thesis: PSYC 798, 799 (A thesis is normally required, but 6 credits of practicum [PSYC 792] may serve as a substitute if approved by the advisor and program coordinator.)

2. **Concentration in Clinical Psychology (CLN)**
   - Emphasizes training in the evolving functions of clinical psychologists, including research, direct provision of clinical services, consultation, program development and evaluation, and consultation.
   - Students pursue a clinical psychology concentration.
   - Must complete 32 credits distributed as follows:
     - Four required courses (14 credits): PSYC 810 (4 credits), PSYC 811 (4 credits), PSYC 822, PSYC 823
     - Two courses (8 credits) in advanced statistics: PSYC 611 and PSYC 612
     - One course (3 credits) in practicum: PSYC 881
     - One course (1 credit) in seminar: PSYC 890
     - Two courses (6 credits) chosen from:
       - Biological bases of behavior (PSYC 558, 559, or 702)
       - Developmental bases of behavior (666, 669, or 704)
       - Social and Cognitive Foundations of Clinical Psychology (PSYC 833)
       - History, Systems, and Theories of Personality and Psychotherapy (PSYC 830)
       - Social-Cognitive Interventions in Clinical Psychology (PSYC 831)
       - Community Psychology I (PSYC 840)
       - Community Psychology II (PSCY 841)

3. **Concentration in Industrial/Organizational Psychology (IO)**
   - Emphasizes training in work settings.
   - Students pursue an industrial/organizational psychology concentration.
   - Must complete 32 credits distributed as follows:
     - One core course (3 credits): PSYC 667, 701, or 703
     - Two courses (8 credits) of quantitative and research methods: PSYC 611, 612
     - One course (1 credit) in seminar: PSYC 890
     - Two courses (6 credits) chosen from:
       - Biological bases of behavior (PSYC 558, 559, or 702)
       - Developmental bases of behavior (666, 669, or 704)
       - Social and Cognitive Foundations of Clinical Psychology (PSYC 833)
       - History, Systems, and Theories of Personality and Psychotherapy (PSYC 830)
       - Social-Cognitive Interventions in Clinical Psychology (PSYC 831)
       - Community Psychology I (PSYC 840)
       - Community Psychology II (PSCY 841)

4. **Concentration in School Psychology (SCH)**
   - Emphasizes training in the sciences of mind, brain, behavior, and society.
   - Students pursue a school psychology concentration.
   - Must complete 38 credits distributed as follows:
     - Four courses (12 credits) of specialized content: PSYC 636 and 639; 3 credits from PSYC 557, 592, 631, 638, 640, 733, and 736; and select 3 credits from PSYC 592, 635, 735, 739, and 741
     - Practicum (optional: 6 credits of practicum; requires permission of advisor)
     - Thesis (optional: 6 credits of thesis; requires permission of chair)
     - Electives: no more than 6 credits of advisor-approved electives from outside the department

   - Emphasizes training in the sciences of mind, brain, behavior, and society.
   - Students pursue a certificate of advanced graduate studies in school psychology.
   - Must complete 32 graduate credits with a grade B or better distributed as follows:
     - EDCD 603; EDSE 628 or 629; PSYC 669 or 704 or 506; PSYC 592, 611, 612, 617, 619, 671, 709, 710, 750, 892

The certificate in advanced graduate studies in school psychology forms a two-level degree program with the school psychology concentration in the MA in psychology. This program prepares graduates for professional certification in school psychology and is approved by the National Association of School Psychologists.

Students who wish to apply directly to the certificate program must have earned a master’s degree in an allied field, such as counseling, clinical psychology, developmental psychology, or special education, in which at least 15 graduate credits correspond to required courses in the master’s curriculum. They must complete all requirements of the master’s in school psychology that they have not previously taken.
Students who have not already earned a master’s degree in a related field must apply for admission to both the master’s program and the certificate.

Students pursuing this certificate must complete 26 credits. They must receive a grade of B or better in the course work, which must be completed before the internship (PSYCH 790). School psychology students are required to enroll full time. The credits are distributed as follows:

- PSYC 592, 597, 722, 750, 790, 792; EDCD 608

Previously Earned Credit

With approval of the school psychology faculty, graduate coordinator, and dean, the number of credits required for the concentration may be reduced by a maximum of 18 credits on the basis of graduate course work completed before admission.

With approval of the graduate coordinator and the dean, students admitted directly to the certificate program may transfer up to 3 graduate credits from another institution.

A special policy applies to students admitted directly to the certificate program who received a master’s degree in psychology with a concentration in school psychology from Mason. If the degree was received within five years of admission to the certificate program and students took at least 13 credits of course work in the certificate of advanced graduate studies as part of the master’s, they may earn the certificate with as few as 6 additional graduate credits. Such students should consult with an advisor.

Students choose to complete a thesis or practical research project. All students must complete a full year of internship. An unsatisfactory evaluation at any time by the school psychology committee may result in separation from the School Psychology Program.

Concentration in Human Factors/Applied Cognition (HF)

The human factors/applied cognition concentration trains students in the application of cognitive science to real-world problems. Students gain expertise in such areas as human-computer interaction, cognitive system engineering, cognitive ergonomics, and transportation. Faculty members help place students who do not have real-world experience in a part- or full-time practicum before completing the degree.

Students pursuing this concentration must complete 32 graduate credits distributed as follows:

- One core course (3 credits): PSYC 701, 759, 766, or 768
- Two courses (8 credits) of quantitative and research methods: PSYC 611, 612
- Two courses (6 credits) of specialized content: PSYC 530, 645
- Two courses (6 credits) of PSYC 734, 766, 768, or 737 (these may be repeated)
- Practicum 792 (optional: 6 credits of practicum requires advisor’s permission)
- Thesis 798, 799 (optional: 6 credits of thesis requires chair’s permission)

Other courses within or outside the department may be taken with advisor’s approval.

Certificate Programs

A certificate may meet the needs of students who desire to upgrade their skills and earn a certificate as evidence of their skill attainment. Each of these certificates may be earned separately or concurrently with another program or certificate.

The certificate programs are open to all students who hold a bachelor’s degree from an accredited university and meet admissions requirements for the MA or PhD concentration in human factors and applied cognition. Students who have been admitted as certificate-seeking students may apply for admission to the master’s degree program in human factors and applied cognition at any time. A maximum of 12 credits may be transferred to the master’s degree program from the certificate program with the approval of the program director and the dean, provided that the grade in each course is 3.00 or better. (There are other restrictions on the number of credits that may be transferred, so students interested in this option should consult the program director.)

Certificate in Aviation CERG-AVIP Psychology

Students pursuing this certificate must successfully complete five courses (15 credits) distributed as follows:

- Three required courses (9 credits): PSYC 530, 645, and 734 (when aviation-related topic is approved for this certificate by the program director)
- Two elective courses (6 credits) chosen from PSYC 597 (when topic is approved for this certificate), 768, 766; SYST 560, 671

Certificate in Usability CERG-UBTY

Students pursuing this certificate must successfully complete five courses (15 credits) distributed as follows:

- Three core courses (9 credits): PSYC 530, 645, 737
- Two elective courses (6 credits) of electives chosen from PSYC 597 (when topic is approved for this certificate), 764, 734 (when topic is approved for this certificate), 737, 766, 768; EDIT 526, 571, 705, 773

Certificate in Cognitive Neuroscience CERG-CNEU

Students pursuing this certificate must successfully complete six courses (18 credits) distributed as follows:

- Three core courses (9 credits): PSYC 530 and 768 (repeatable, when topic is cognitive neuroscience)
- One course (3 credits) chosen from PSYC 527, 531, 556, 558, or 559
- Two elective courses (6 credits) chosen from PSYC 702 and PSYC 768, 766, 597 (when topics for these three courses are approved for this certificate by the program director)

Neuroscience, PhD SC-PHD-NEUR

The interdisciplinary doctoral program in neuroscience is offered jointly by CHSS, the College of Science, and the Krasnow Institute for Advanced Study. For details, see the College of Science chapter in this catalog.

Psychology, PhD PHD-PSYC

The goal of the doctoral program is to train students in the principles and applications of psychology. The program provides knowledge of the basic content areas in psychology and practical experience in applying this knowledge to solving human problems in life, work, and school. The program offers
the following concentrations: industrial/organizational psychology, human factors/applied cognition, clinical psychology, applied developmental psychology, and biopsychology.

**Admission Requirements**

Entering students are accepted only for fall semesters. The department does not usually consider applications that fail to meet the minimum criteria of 3.00 undergraduate GPA, 3.25 GPA in psychology course work, and combined GRE scores of 1,100. Applicants who meet this minimum receive continued consideration for the final candidate pool on the basis of experience, letters of recommendation, objective test scores, and (in some programs) an interview. No specific set of qualifications guarantees admission.

In addition to admission materials required by the university, applicants must submit the following:

- Completed Department of Psychology form
- Three letters of recommendation from individuals who have firsthand knowledge of the applicant’s academic capabilities or work experience
- A two- to three-page typewritten personal statement describing professional goals, training history, and reasons for seeking the PhD
- GRE results taken within the past five years and before the application deadline. Applicants should take the GRE by October because applications cannot be processed until these scores are received. Scores must be sent directly from Educational Testing Service, P.O. Box 955, Princeton, NJ 08541. Only the aptitude scores are required, but scores for the Advanced Test in Psychology may also be submitted.

Applicants are responsible for ensuring that all materials arrive before the application deadline. Also, applicants in the final candidate pool may be required to participate in an interview.

In addition to fulfilling admission requirements, applicants are expected to have the following:

For the PhD with a concentration in industrial/organizational psychology or in human factors/applied cognition, at least 15 credits in psychology, including a statistics course and a laboratory course in psychology. A tests and measurements course is recommended.

For the PhD with a concentration in clinical psychology, at least 15 credits in psychology, including a statistics course, laboratory science course, and abnormal psychology. Courses in developmental psychology, personality, physiological psychology, and tests and measurements are desirable.

For the PhD with a concentration in applied developmental psychology, at least 15 credits in psychology, including statistics and a laboratory course in experimental psychology. Courses in personality, abnormal psychology, developmental psychology, and tests and measurements are also required for applications to the school psychology concentration within the MA program.

For the PhD with a concentration in biopsychology, at least 15 hours of psychology, including physiological psychology, statistics, and a lab course in experimental psychology.

**Financial Assistance**

Financial assistance is available through graduate assistantships, doctoral fellowships, and various forms of grants, loans, or employment.

**Reduction of Credit**

For students entering the doctoral program with a master’s degree, the number of credits required may be reduced by a maximum of 30 credits subject to the approval of the program faculty and the dean. Requests for reduction of credit are reviewed by a committee only after acceptance to the PhD program.

**Degree Requirements**

The PhD program has four educational components: core courses, upper-level specialty courses, supervised practica, and dissertation.

**Core Courses**

Core course requirements cover the basic subject matter identified by the profession as essential to doctoral training: biological bases of behavior, social bases of behavior, cognitive bases of behavior, individual behavior, and history of psychology.

**Specialty Courses**

The 700-, 800-, and 900-level courses provide doctoral candidates with greater depth of study in specific content areas.

**Practica**

The purpose of the practica is to provide a broad range of experiences in settings related to the students’ concentrations.

**Advancement to Candidacy**

To advance to candidacy, students must complete all required, nonelective course work on their approved program of study. Students must also successfully complete and pass written and oral comprehensive exams.

**Dissertation**

The dissertation requirement is designed to demonstrate the student’s ability to apply psychological principles to research problems. Students must take at least 3 credits of proposal (998) and 3 credits of research (999), and have at least 12 credits of 998 and 999 combined. (No more than 12 credits of 998 and 999 may be applied toward the degree.) Once enrolled in 998, a student must maintain continuous registration in 998 or 999 each semester until the dissertation is submitted to and accepted by University Libraries.

**Student Evaluation**

Students in the doctoral program are evaluated on the basis of grades, comprehensive exams, research, and communication skills. In doctoral courses, A and B are the only acceptable grades. Students in the doctoral program must successfully complete comprehensive exams administered each year.

▲ Concentration in Applied Developmental Psychology (APD)

The applied developmental psychology concentration is concerned with enhancing developmental processes and preventing developmental disorders in individuals and families across the life span. It uses the knowledge base and methodologies of developmental science to assist the development of individuals who vary in cultural and ethnic backgrounds; economic and social opportunities; physical, social, emotional, and cognitive abilities; and conditions of living (e.g., families, neighborhoods, communities, and physical
The program emphasis is on child development (infancy, early childhood, middle childhood, and adolescence), and students may focus their studies on the cognitive, social, emotional, language, personality, or physiological aspects of development.

The applied developmental concentration has two goals: to train students to teach and do research on basic and applied issues in child development for employment in such settings as universities, research institutes, and organizations, and to train students to do applied work in developmental psychology (consultation, program evaluation, assessment and evaluation, developmental interventions, and parent training) in such settings as schools, hospitals, courts, child care facilities, and other organizations. Applied developmental psychology doctoral students have the option of also completing course requirements for the MA concentration in school psychology.

Students pursuing this degree must complete 72 credits distributed as follows:

• 3 credits of developmental core (704)
• 6 credits of cognitive, biological, social, or history core (two of 701, 702, 703, or 705)
• 8 credits of quantitative methods: PSYC 611 and 612
• 9 credits of advanced specialized methods, including the following: quantitative methods: at least 3 credits from PSYC 652, 754, 755, or 756; research methods: at least 3 credits from PSYC 646 or 654; specialized methods: PSYC 619, 673, 684, 709*, 710*, 722*, 786; EDSE 649
• 15 credits of specialized content: foundations: at least 9 credits from PSYC 614, 615, 666**, 669**, 892 (special topics with developmental content); applications: PSYC 630, 648, 780**
• 3 credits of professional seminar/professional ethics (taken during first year: fall, 2 credits; spring, 1 credit)
• 8 credits of Directed Readings and Research (897)
• 12 credits of dissertation: PSYC 998 and 999 (at least 3 of 998 and 3 of 999)
• 8 credits of elective courses:
  • 0 to 6 credits of Practicum (792)
  • 0 to 8 credits of other electives
• Can be taken only by students concurrently enrolled in school psychology MA concentration.

** Required

In addition, students are required to complete a second-year research project before they can take comprehensive exams. The expectation is that the research will be submitted for presentation at a national conference or to an appropriate journal for publication.

▲ Concentration in Biopsychology (BP)

The biopsychology concentration focuses on studying the biological substrates of behavior. Core and affiliated faculty in the neuroscience and cognitive programs study areas as diverse as neural control of behavioral development; brain systems in substance abuse; animal models of learning and memory and their disorders (such as Alzheimer’s); human brain systems involved in cognition, perception, and movement; and computational models of neural functioning.

The program’s core facilities have well-equipped behavioral testing and histological/histochemical facilities. The program’s strong links to the Krasnow Institute for Advanced Study and the Center for Biomedical Genomics and Informatics allows opportunities for collaborative work as diverse as tissue slice preparations and molecular genetics. The doctoral program prepares students for research-based careers in academics, government, or industry.

Students pursuing this degree must complete 72 graduate credits distributed as follows:

• 11 credits from a biopsychology core: PSYC 527, 531, 558; and one of the following: 559, 556, 592
• 6 credits from a cognitive core (PSYC 701, 766, or 768), developmental core (PSYC 666, 669, 704), social core (PSYC 667, 668, 703), or historical (PSYC 705)
• 8 credits of quantitative and research methods: PSYC 611 and 612
• 6 credits of quantitative or research methods: at least 3 credits from PSYC 652, 754, 755, 766
• 6 credits of research: PSYC 897 (1 credit per first 3 semesters) and a third-year research project, 3 credits of PSYC 897, or credits of MA Thesis (PSYC 798, 799)
• 15 credits of specialized content selected from an approved list, including PSYC 561, 592, 702; BIOL 572, 583; CSI 734, 739
• 6 credits of elective courses with approval of advisor
• 12 credits from neuroscience seminars including 1 credit of professional seminar: PSYC 890 and NSC 709
• 12 credits of dissertation: PSYC 998 and 999

▲ Concentration in Clinical Psychology (CLN)

The clinical psychology concentration is committed to the scientist–practitioner model. The goal of the program is to train clinical psychologists who are capable of integrating research and applied clinical activities. The program is unique in approaching clinical psychology from social psychological and community perspectives. A social psychological approach uses theory and research from social psychology to understand emotional, cognitive, behavioral, and interpersonal functioning. A community approach stresses the impact of social and cultural factors on the individual and the impact of the individual on the community. Most of the faculty members employ cognitive–behavioral and interpersonal approaches to research and clinical practice.

Students pursuing this concentration must complete 72 graduate credits distributed as follows:

• One course (3 credits) of biological bases of behavior: PSYC 558, 559, or 702
• One course (3 credits) of developmental bases of behavior PSYC 666, 669, or 704
• Thirteen required courses (45 credits): PSYC 611 (4 credits), PSYC 612 (4 credits), PSYC 810 (4 credits), PSYC 811 (4 credits), PSYC 822, PSYC 823, PSYC 830, PSYC 831, PSYC 833, PSYC 840, PSYC 841, PSYC 881 (7 credits), PSYC 890 (1 credit)
• Three elective courses (9 credits), which must be approved by advisor
• 12 credits of dissertation (998 and 999; at least 3 credits of each)
• Full-time, 12-month clinical psychology internship at a site accredited by the American Psychological Association
• Optional, but recommended: part-time clinical psychology externship in the third or fourth year of the program
The human factors and applied cognition concentration covers basic theoretical and empirical issues and emphasizes research that applies cognitive science to real-world problems. The program builds bridges between human factors engineering and cognitive psychology. Many applications of cognitive science are in the domain of human factors, and many doctoral students who complete our program go on to be human factors professionals.

Students pursuing this concentration must complete 72 graduate credits distributed as follows:

- One course (3 credits) of cognitive core: PSYC 701, 759, 766, or 768
- Two courses (6 credits) of core from biological (PSYC 558, 559, or 702), social (PSYC 667, 668, or 703), developmental (PSYC 666, 669, or 704), or historical (PSYC 705)
- Two courses (8 credits) of quantitative and research methods: PSYC 611 and 612
- Two courses (6 credits) of core from biological (PSYC 558, 559, or 702), social (PSYC 667, 668, or 703), developmental (PSYC 666, 669, or 704), or historical (PSYC 705)
- Three courses (9 credits) of advanced statistics or qualitative methods
- Two courses (6 credits) of specialized content: PSYC 530 and 645
- Three courses (9 credits) of additional specialized content to include PSYC 734, 737, 766, or 768
- One course (3 credits) of special topics in professional issues: PSYC 890
- 12 credits of dissertation: PSYC 998 and 999
- Options: To reach the 72 credits required for the PhD, students may repeat 734, 737, 766, or 768, or they may take 3 to 6 credits of practicum (PSYC 730) with permission of the advisor. (Students who do not have work experience in applied cognition or human factors are encouraged to take up to 6 credits of practicum.)

Students are to take credits in PSYC 897 each semester. Students are strongly encouraged to develop competence in programming and computer science through course work or independent study. Students are encouraged to identify and take relevant courses within or outside the department (with advisor’s approval).

The industrial/organizational psychology concentration focuses on multiple aspects of behavior in organizational settings, including personnel selection, quantitative analyses, teams, leadership, work and family issues, and organizational health issues. Mason’s graduate work in this area emphasizes research as the key to knowledge in both academic and applied settings. The program fosters a peer-oriented environment where students collaborate on numerous projects in addition to working with faculty members, in many different areas of industrial/organizational psychology.

Students pursuing this concentration must complete 74 graduate credits distributed as follows:

- Three courses (9 credits) of core from cognitive (PSYC 701, 759, 766, or 768), social (PSYC 667, 668, or 703), and historical (PSYC 705) (one from each cluster)
- Two courses (8 credits) of quantitative and research methods: PSYC 611 and 612
- Three courses (9 credits) of advanced quantitative and research methods: PSYC 557, 754, and 756
- Six courses (18 credits) of specialized content: PSYC 636, 639; 6 credits from PSYC 631, 638, 640, 733, 736, 592/892; and 6 credits from PSYC 667, 735, 739, 741, 592/892
- One course (3 credits) of special topics in professional issues: PSYC 890
- Three elective courses (9 credits) (can be from outside the department with advisor approval)
- 6 credits of practicum: PSYC 730
- 12 credits of dissertation: PSYC 998 and 999

### Public and International Affairs

**Phone:** 703-993-1400  
**Web:** pia.gmu.edu

### Faculty

**Robinson Professors:** Hecko, Paden  
**Emeritus faculty:** Brown, Clark, Early, Gortner, Hart-Nibbring, Knight, White

**Professors:** Cioffi-Revilla, Conant, Conlan, Druckman, Dudley (chair), Katz, Posner, Regan, Sackett, Wan, Wilsford

**Associate professors:** Burt, Hackler, Harbour, Lukacs, Mahler, Mandaville, McDonald, McFerson, Nguyen, Sacco, Snyder, Toepler, Travis

**Assistant professors:** Balint, Benjamin, Brigety, Dueck, Koblenz, McClintchey, Miller, Tsvetovat

**Term assistant professors:** Burroughs, Bushée, Robbins, Walker

**Adjuncts:** Becella, Butler, Combs, Day, Dinella, Fant, Froehlich, Ghosh, Hall, Hauss, Heniff, Long, Maslyn, Raffety, Sauer, Shafroth, Shiraev, Stahl, Swanson, Tadie, Taylor, Tibbets, Vance, Willett

**Affiliate faculty:** Casamayou, Connolly, Edner, Shogan

### Course Work

The Public and International Affairs Department offers all course work designated BIOD, GOVT, and PUAD in the Course Descriptions chapter of this catalog.

### UNDERGRADUATE PROGRAMS

#### Government and International Politics, BA

In addition to satisfying university-wide general education requirements and requirements for the BA degree in CHSS, students pursuing this degree must complete the course work distributed as follows:

- Five core courses (16 credits): GOVT 101, 103, 132, 133, 300
- Eight advanced government field courses (24 credits) with at least 3 credits in each of the four fields:  
  - American politics: GOVT 301–319, 400–419  
**International and comparative politics:** GOVT 330−349, 430−449
**Public policy and administration:** GOVT 350−369, 450−469
- 3 credits of GOVT 490, 491 (fulfills the university synthesis requirement)

With permission of an advisor, 9 credits of GOVT 480 and 496 may be substituted for government field courses. Only 3 credits of GOVT 480 and 6 credits of GOVT 496 may be substituted for major requirements. GOVT 490 may not be applied to a field requirement or concentration.

Only courses passed with a grade of C (2.00) or better may be used to fulfill major requirements.

With careful planning, some courses required for the major may also fulfill general education requirements or college-level requirements for the BA. See an advisor before registering.

Students may choose to concentrate in one of the four advanced government fields by completing five courses in that field. They must still complete 3 credits in each of the other three fields.

▲ **Concentration in American Politics (AMP):**
Five courses (15 credits) chosen from GOVT 301−319, 400−419

▲ **Concentration in Political Theory and Law (PTL):**
Five courses (15 credits) chosen from GOVT 320−329, 420−429, 470−472

▲ **Concentration in International and Comparative Politics (ICOM):**
Five courses (15 credits) chosen from GOVT 330−349, 430−449

▲ **Concentration in Public Policy and Administration (PPA):**
Five courses (15 credits) chosen from GOVT 350−369, 450−469

■ **Public Administration, BS BS-PUAD**

In addition to satisfying university-wide general education requirements, students majoring in public administration must complete the following. With careful planning, some courses required for the major may also fulfill university general education requirements. See an advisor before registering.

- Six core courses (19 credits): GOVT 101, 103, 132 or 133, 300, 304, 351 (fulfill the university social science, global understanding, and information technology and information technology ethics requirements)
- 21 credits of advanced GOVT courses, including GOVT 355, 356; and 3 credits from GOVT 357, 358, 452, 464 or NCLC 331; 3 credits from GOVT 320s or 420s; 3 credits from GOVT 360s or 460s; 3 credits of upper-level GOVT taken outside of GOVT 350s and 450s (may include GOVT 480 or 496). Only 3 credits of GOVT 480 may be substituted for a major requirement.
- 3 credits of GOVT 490, 491 (fulfills the university synthesis requirement)
- 6 credits in analytical skills chosen from OM 210, 301; IT/STAT 250, 350; SOCI 313; MATH 106, 108, 110, 111, 113, or 115
- 9 credits from ECON 103, 104; and any upper-level course in ECON or FNAN, or GOVT 343
- 3 credits in ACCT or GOVT 358
- 9 credits in information technology or up to 12 credits in a foreign language

Information technology: GOVT 359, 459; any CS, INFSC, IT, or MIS course; STAT 362; SOCI 405
Foreign language: One modern foreign language through the intermediate level

Only courses passed with a grade of C (2.00) or better may be used to fulfill major requirements (which include GOVT courses, major supporting courses, and Option A or B courses). The following courses can be applied to only one major requirement: IT/STAT250; GOVT 343, 358, and 464.

**Writing-Intensive Requirement**

The university requires all students to complete at least one course designated “writing intensive” in their majors at the 300 level or above. Students majoring in government and international politics, and public administration may fulfill this requirement by successfully completing the 300-level GOVT courses in their major programs.

**Honors Program**

Qualified students majoring in government and international politics, and public administration may pursue advanced work leading to graduation with honors from the Department of Public and International Affairs. Those highly qualified students selected for the honors program participate in a two-course sequence, GOVT 491 and 496. To graduate with honors, students must complete these courses with a GPA of at least 3.00.

**Teacher Licensure**

Students who plan to seek teacher licensure and become K−12 teachers should consult the College of Education and Human Development chapter and attend an information session early in their undergraduate career. For more information, call 703-993-2892, e-mail gseadmit@gmu.edu, or go to gsw.gmu.edu.

**Interdisciplinary Minors**

The department coordinates the interdisciplinary minors in Asia-Pacific studies, global systems, and urban and suburban studies. It participates with the Philosophy Department in the minor in political philosophy. See the Interdisciplinary Minors section in this chapter for descriptions.

**Minors**

For policies governing all minors, see the Academic Policies chapter of this catalog. In accordance with university policy, at least 8 credits must be applied only to the minor and may not be used to fulfill requirements of the student’s major, concentration, or another minor. All courses applied to any minor offered by public and international affairs require a grade of C (2.00) or better.

**Minor in American Government**

This minor develops knowledge of the principles, institutions, and behaviors of the American political system.

Students pursuing this minor must complete 18 credits in government distributed as follows:
• One core course (3 credits): GOVT 103
• Five elective courses (15 credits) chosen from
  • Any GOVT 301–309 political institutions
  • Any GOVT 310–319 political behavior
  • GOVT 344
  • Any GOVT 409–420
  • Relevant GOVT 480 with approval of the minor coordinator

Minor in International/Comparative Studies
This minor increases students’ awareness of the regions and current issues of the world on theoretical and practical levels.

Students pursuing this minor must complete 18 credits in government distributed as follows:
• One core course (3 credits): GOVT 132 or 133
• Five elective courses (15 credits) chosen from
  • GOVT 101
  • Any GOVT 330–339 comparative politics
  • Any GOVT 340–349 international studies
  • Any GOVT 430–439 comparative politics
  • Any GOVT 440–449 international studies
  • Relevant GOVT 480 with approval of the minor coordinator

Minor in Legal Studies
This minor focuses on the constitutional foundations, interpretation, processes, and functions of domestic and international law.

Students pursuing this minor must complete 18 credits in government distributed as follows:
• Two core courses (6 credits): GOVT 103 and 301
• Four elective courses (12 credits) chosen from
  • GOVT 350–359 public administration
  • Any GOVT 360–369 public policy
  • Any GOVT 450–459 public administration
  • Any GOVT 460–469 public policy
  • Relevant GOVT 480 with approval of the minor coordinator

Minor in Public Policy and Management
This minor introduces students to the theory and process of policy formulation and implementation in the political and governmental arena.

Students pursuing this minor must complete 18 credits in government distributed as follows:
• Two core courses (6 credits): GOVT 103 and 301
• Four elective courses (12 credits) chosen from
  • GOVT 350–359 public administration
  • Any GOVT 360–369 public policy
  • Any GOVT 450–459 public administration
  • Any GOVT 460–469 public policy
  • Relevant GOVT 480 with approval of the minor coordinator

Bachelor’s/Accelerated Master’s Program in Political Science
Highly qualified undergraduates may apply to the accelerated master’s degree program and obtain both BA and MA degrees after satisfactory completion of 150 credits. Well-prepared undergraduates are encouraged to apply as they near completion of 90 credits. Admitted students are able to use up to 6 graduate credits in partial fulfillment of requirements for the undergraduate degree. On completion and conferral of the undergraduate degree with satisfactory performance (3.00 in each course, grade of B or better) in graduate courses, students are given advanced standing in the master’s program. All other master’s degree requirements must be met.

Applicants must have a cumulative GPA of 3.50 or higher and submit an application, two letters of recommendation (preferably from professors), and a résumé. The one-page application can be obtained at the graduate admissions desk in the Department of Public and International Affairs.

Bachelor’s/Accelerated Master’s Program in Public Administration
Highly qualified undergraduates may apply to the accelerated master’s degree program and obtain both BS and MPA degrees after satisfactory completion of 150 credits. Well-prepared undergraduates are encouraged to apply as they near completion of 90 credits. Admitted students are able to use up to 6 graduate credits in partial fulfillment of requirements for the undergraduate degree. On completion and conferral of the undergraduate degree with satisfactory performance (3.00 in each course, grade of B or better) in graduate courses, students are given advanced standing in the master’s program. All other master’s degree requirements must be met.

Applicants must have a cumulative GPA of 3.40 or higher and submit an application, two letters of recommendation (preferably from professors), and a résumé. The one-page application can be obtained at the graduate admissions desk in the Department of Public and International Affairs.

GRADUATE PROGRAMS

■ Biodefense, MS  MS-BIOD
The MS in biodefense provides students with a foundation in the science and technology of biodefense and the opportunity to specialize in the areas of intelligence and threat assessment, nonproliferation, and medical and public health preparedness. Students are able to select a concentration in one of two fields: international security or homeland security.

Application Requirements
Students must meet the admission standards and application requirements of the university. See the Graduate Admission Policies section of the catalog. Because of the breadth of the program, students with backgrounds in science or other areas, such as international affairs, political science, law, public policy, and conflict resolution, are encouraged to apply. In addition to fulfilling the admission requirements for graduate study, applicants must submit:
• Three letters of recommendation from faculty members or individuals who have firsthand knowledge of the applicant’s academic or professional capabilities
• A statement of purpose consistent with research interests or professional goals
• A current résumé
• Scores from GRE taken within five years prior to date of application

Degree Requirements
Students must successfully complete 37 credits distributed as follows:
• Seven required courses (19 credits): BIOD 604, 605, 609, 702 (1 credit); PUAD 630; GOVT 500, 540
• At least three elective courses (9 credits) in biodefense
• Up to two courses (6 credits) of approved non-BIOD electives
• 3 credits of BIOD 798 or 6 credits of BIOD 799

Students may elect to take their elective courses within one of the concentrations listed below.

▲ Concentration in International Security (INLS)
Four courses (12 credits) chosen from BIOD 620, 621, 622, 705, 706, 709, 722, 725, 760, 761; GOVT 641, 741, 745, 843; PUAD 504, 701, 727

▲ Concentration in Homeland Security (HMLS)
Four courses (12 credits) chosen from BIOD 710, 722, 723, 725, 726, 751, 752, 760, 761, 766, 767; GOVT 510, 706, 755; PUAD 631, 635, 727, 731, 750; PUBP 757, 758; PHIL 642

Students are strongly encouraged to take the core courses as early as possible because they provide the foundation for the rest of the program. The schedule of courses that students plan on taking should be approved in an education plan designed by the students and their advisor during the student’s first semester. Students must receive the permission of their advisor to take courses outside of the Biodefense Program.

To graduate from the MS in Biodefense Program, students must complete a substantial research paper to demonstrate the ability to conduct original, independent research. This goal can be achieved in two ways: a research project or a thesis. The objectives of both the research project and thesis are to serve as a capstone for the student’s graduate education and to demonstrate the student’s research, analytical, and writing skills. Both options require the student to produce a substantial and original contribution to the fields of biodefense or biosecurity on the model of a paper suitable for presentation at a scholarly conference or an article in a peer-reviewed scholarly journal.

■ Biodefense, PhD PHD-BIOD

The PhD program in biodefense is designed to prepare students to serve as scholars and professionals in the fields of biodefense and biosecurity. The program integrates knowledge of natural and man-made biological threats with the skills to develop and analyze policies and strategies for enhancing biosecurity. Other areas of biodefense including nonproliferation, intelligence and threat assessment, and medical and public health preparedness are integral parts of the program.

Application Requirements
Students must meet the admission standards and application requirements of the university. See the Graduate Admission Policies section of the catalog. Because of the breadth of the program, students with backgrounds in science and other areas, such as international affairs, political science, law, public policy, and conflict resolution, are encouraged to apply. In addition to fulfilling the admission requirements for graduate study, applicants must submit:

• Three letters of recommendation from faculty members or individuals who have firsthand knowledge of the applicant’s academic or professional capabilities
• A statement of purpose consistent with research interests or professional goals
• A current résumé or curriculum vitae
• Scores from GRE taken within five years prior to date of application
• Writing sample such as a full-length research paper

Degree Requirements
Students pursuing this degree must successfully complete a minimum of 72 graduate credits distributed as follows:

• Seven required courses (19 credits): BIOD 604, 605, 609, 630, 702 (1 credit); GOVT 540, 500
• One course (3 credits) of an additional approved advanced research course (qualitative or quantitative)
• Four courses (12 credits) in a concentration:

▲ Concentration in International Security (INLS)
Four courses (12 credits) chosen from BIOD 620, 621, 622, 705, 706, 709, 722, 725, 760, 761; GOVT 641, 741, 745, 843; PUAD 504, 701, 727

▲ Concentration in Homeland Security (HMLS)
Four courses (12 credits) chosen from BIOD 710, 722, 723, 725, 726, 751, 752, 760, 761, 762, 766; GOVT 510, 706, 755; PUAD 631, 635, 727, 731, 750, 757, 758; PHIL 642

• Two courses (6 credits) from the field outside of the student’s concentration
• 6 to 9 credits of BIOD 998
• 15 to 18 credits of BIOD 999

Once enrolled in 998, a student must maintain continuous registration in 998 or 999 each semester until the dissertation is submitted to and accepted by the University Library.

Students are strongly encouraged to take the core courses as early as possible because they provide the foundation for the rest of the program. The schedule of courses that students plan on taking should be approved in an education plan designed by the students and their advisor during the student’s first semester. Students may take up to 12 credits of courses outside of the Biodefense Program. Students must obtain the permission of their advisor to take such courses. Consult with the graduate program director or coordinator for a list of BIOD electives and approved non-BIOD electives that can be used to fulfill these concentration and distribution requirements. Some electives can be counted for more than one concentration. The same course, however, cannot be used to fulfill requirements in more than one concentration.

Reduction of Credit
Students entering the doctoral program with a master’s degree or other graduate credit may be able to apply up to 30 credits toward PhD requirements. The number of credits that will be accepted will be approved by the director of the Biodefense Program. Students and their advisor will make a recommendation to the director as to how many credits should be accepted and toward which requirements they will be counted. At minimum, the last 42 of the 72 credits for the PhD must be earned in the program. University standards for prior course credits and reduction of credit are described in the Academic Policies/Graduate Policies section of this catalog.

Advancement to Candidacy
Following completion of all required course work, students are required to take a qualifying exam. On successful completion, the student is advanced to candidacy and may select a dissertation committee. The student must offer a successful public defense of the dissertation proposal before registering for 999 dissertation credits. Students must present the results of the dissertation research to their dissertation committee in a seminar and defend their dissertation to the university community. Successful completion of a dissertation is contingent on approval of the dissertation committee and the dean.
Political Science, MA

MA-POS

This 36-credit degree program prepares students for advanced work in political science, teaching, and research about government; a career in government and politics; and work in domestic and international nongovernmental organizations. Students may specialize in American government and politics, international relations, or comparative politics. In addition, interdisciplinary opportunities allow students to take up to 9 credits in related fields such as history or public policy.

The program is made up of four core courses in political science, two required seminars in a field of specialization, advanced seminars in the Department of Public and International Affairs, and elective courses in other departments.

The MA degree is the first step in an engaging and stimulating career. Students develop a deeper understanding of political ideas and institutions, more sophisticated research skills, a better grasp of the intricacies of governments abroad, and a deeper knowledge of the complexities of international politics. This degree can lead to a career teaching about government; working with legislative bodies, government agencies, and international organizations; or doing research and writing about politics and government.

Application Requirements

Admission is in the fall and spring. Late applications are considered on a space-available basis. In addition to university graduate application requirements, applicants to the master’s in political science should submit three letters of recommendation, preferably from recent professors; GRE scores; resume listing employment and volunteer work; and a statement of interests and career goals. A writing sample is strongly recommended.

Degree Requirements

Students complete 36 credits distributed as follows:

- Four core courses (12 credits): GOVT 510, 520, 530, 540
- Three to five courses (9 to 15 credits) in one of three fields:
  - American government and politics: 6 credits of required field seminars chosen from GOVT 603, 604, 605, 706, and 3 to 9 credits of elective courses
  - Comparative politics: 6 credits of required field seminars (GOVT 631 and 731) and 3 to 9 credits of elective courses
  - International relations: 6 credits of required field seminars chosen from GOVT 641, 741, 743, 745 and 3 to 9 credits of elective courses
- Two courses (6 credits) of methods courses: GOVT 500 and 711
- 3 credits of GOVT 798 Research Project or 6 credits of GOVT 799 Thesis; 3 credits of GOVT 798 may be linked to an advanced specialty course to produce a final research project. A director and a committee of two additional faculty members read and approve the thesis if this option is selected. Arrangements for any of these options should be made with the advisor
- Remaining credits chosen from additional courses and may include an internship, additional courses in the specialization, or course work from other departments (see below)

Up to 9 credits of course work from other departments may be selected to complement the specialization and reflect the ideas, institutions, or processes of contemporary governance. Courses should be approved in an education plan designed by students and their advisor. Students who wish to begin or alter their career in government and politics are encouraged to take a 3-credit internship in their area of interest. Internships can be arranged through the Department of Public and International Affairs.

Political Science, PhD

PHD-POS

The PhD program is designed to prepare students for teaching and conducting research about government, careers in government and politics, and work in domestic and international nongovernmental organizations. The program allows students to combine their academic education with experience in the kinds of complex domestic and international political organizations they are studying. This model for political science education, patterned after the American Political Science Association’s Congressional Fellows Program, is designed to foster scholarship and a firsthand understanding of domestic and international institutions such as think tanks, international bodies, nongovernmental organizations, journals of political opinion, and congressional and executive branch offices.

Application Requirements

Applications will be accepted for the fall semester only. In addition to university graduate admissions requirements, applicants should submit three letters of recommendation from faculty members or those who can evaluate the applicant’s academic potential, a statement of purpose of study, GRE scores, and a writing sample such as a full-length research paper. Usually, GRE scores up to five years old may be used.

Degree Requirements

The degree requires 72 credits of course work divided among core courses, advanced courses in the student’s major and minor fields, supporting courses that can be outside the department, research methods courses, courses in political theory, experiential learning, and dissertation guidance. The program allows students to specialize in one of four major fields: American government and politics, international relations, comparative politics, or public administration.

The course work is distributed as follows:

- Three core courses (9 credits) chosen from GOVT 510, 520, 530, 540, 550
- At least seven advanced courses (21 credits) divided between two major fields:
  - American government and politics: 6 credits of required field seminars chosen from GOVT 603, 604, 605, 706, and 3 to 9 credits of elective courses
  - Comparative politics: 6 credits of required field seminars (GOVT 631 and 731) and 3 to 9 credits of elective courses
- International relations: 6 credits of required field seminars chosen from GOVT 641, 741, 743, 745, and 3 to 9 credits of elective courses
- Public administration: 6 credits of required field seminars (GOVT 753 and 755) and 3 to 9 credits of elective courses
- At least three advanced courses (9 credits) in a third field to be designed by the student and advisor to complement the major fields and with written approval of student’s advisor on the education plan
- Three advanced methodology courses (9 credits): GOVT 500, 711, and one other course in quantitative or
Financial Assistance

The program offers financial assistance on a competitive basis through graduate teaching assistantships. Students on financial assistance must show satisfactory progress in the degree program.

Reduction of Credit

For students entering the program with a bachelor’s or MPA degree, the number of credits required for the doctorate may be reduced by a maximum of 30 credits subject to approval of the graduate coordinator and the dean.

Progress Review

For students who have been admitted with a bachelor’s degree, the Faculty Review Committee will review each student’s progress after 30 credits of course work to determine whether the student will be allowed to continue their work toward the PhD. For students entering the program with a master’s degree, this review will occur after 12 credits in this program. If this decision is negative, the student will continue to be eligible for the MA degree.

Advancement to Candidacy

To advance to candidacy, students must complete all course work required on their approved program of study. Students must also successfully complete and pass two qualifying exams in major fields. In addition, students must have an approved dissertation committee as well as an approved proposal. Evidence of the approved proposal must be on file in the Dean’s Office before a student can advance to candidacy.

Public Administration, MPA-PUAD

This 36-credit program is designed to build the knowledge base and skills of people who are playing or intend to play a leadership role in organizations that develop or implement public policy. In addition, the program is among the first to address implications of the growing reliance of government on a wide range of third parties, including other governments, private contractors, and nonprofits, for public goals and accountability. In the required courses, emphasis is placed on the development of knowledge about public policy and management, as well as analytical problem-solving and communication skills, and third-party governance. Elective courses can be used by students to focus their knowledge and skill development within one of the following concentrations: public management, policy studies, public and nonprofit finance, nonprofit management, international management, state and local government, environmental science and public policy, human resources management, administration of justice, emergency management and homeland security, and third-party governance. Alternatively, the electives can be used to extend the breadth of study, with courses drawn from a variety of concentrations or even from other departments and schools within the university.

MPA students at Mason have the research and cultural resources of the Washington, D.C., area at their disposal. Government agencies representing all levels in the U.S. federal system are located close to the campus, as are the National Archives, the Library of Congress, and the Smithsonian Institution. Another benefit is the wide range of internship opportunities available in governmental and nonprofit organizations. The MPA Program regularly has internship invitations from national, state, and local government organizations, as well as from nonprofit organizations whose principal work is at the local, state, national, or international levels. Many of these internships are paid positions.

MPA courses are held at the Fairfax and the Arlington Campuses during the week and on the weekend in an accelerated format.

Application Requirements

Students are admitted for fall or spring semesters. Late applications are considered on a space-available basis. In addition to the graduate application requirements specified in the Admissions chapter of the catalog, students should submit three letters of recommendation; test scores from the GRE, GMAT, or LSAT; a résumé listing work experience and volunteer activity, and a statement of professional goals. Applicants may petition the Admissions Committee by letter to waive the exam if the student has a master’s degree or an undergraduate cumulative GPA of 3.30 or above from a U.S. institution of higher education. Students who want to be considered for an assistantship must submit a GRE score.

Transfer of Credits

Students may transfer credit into the MPA Program from graduate courses taken at other institutions or taken at Mason in nondegree status. Transfer credit is subject to university and college policies and must be approved by the MPA Program director and the dean. Students who enroll initially through nondegree studies should submit their application to the MPA Program in the first semester of study. Only 9 credits taken in nondegree status may be transferred to the degree program.

Degree Requirements

To receive an MPA, students must successfully complete 36 credits distributed as follows. The required courses are focused
on the knowledge and skills needed by people who want to play a leadership role in organizations that develop and implement public policy. Through these courses, students develop a shared knowledge base and skill set.

• Six core courses (18 credits): PUAD 502, 611, 620, 640, 700, and 703
• One additional methods course (3 credits) chosen from PUAD 612, 613, 741 or 742
• One course (3 credits) in accounting, budgeting, and financial management chosen from PUAD 660, 662, 663 or 664
• Four elective courses (12 credits)

Students may take their elective courses within one of the concentrations listed below. As an alternative, with the approval of their advisor, students may select their elective courses from several concentrations or fields. Students may declare only one concentration. PUAD 794 Internship and PUAD 796 Directed Reading and Research may be applied to a concentration where content is appropriate and with prior written approval of the MPA director. Other courses may also be applied to a concentration with prior written approval of the director.

▲ Concentration in Administration of Justice (ADJ)
• Four courses (12 credits) chosen from PUAD 730, 781; CONF 501; ILCP 509, 510, 691, 740, 741, 742, 743, 749, 781; SOCI 607, 608, 609

▲ Concentration in Emergency Management and Homeland Security (EMHS)
• Four courses (12 credits) chosen from PUAD 630, 631, 632, 633, 634, 635, 727, 731, 738; BIOD 723, 752; COMM 637; PUBP 742, 754, 758

▲ Concentration in Environmental Science and Public Policy (EVPP)
• One required course (3 credits): PUAD 642
• Three elective courses (9 credits) chosen from PUAD 730, 741, 749, 758 or BIOL and EVPP courses with written approval of an advisor

▲ Concentration in Human Resources Management (HRM)
• One required course (3 credits): PUAD 670
• Three elective courses (9 credits) chosen from PUAD 623, 652, 671, 672, 729, 730; PSYC 631, 635, 638, 639, 640, 667

▲ Concentration in International Management (IM)
• One required course (3 credits): PUAD 504
• Three elective courses (9 credits) chosen from PUAD 634, 636, 730, 738, 739; GOVT 540, 631
• CONF and ITRN courses with written prior approval of the director

▲ Concentration in Nonprofit Management (NPMG)
• Two required courses (6 credits): PUAD 505 and 659
• Two elective courses (2 credits) chosen from PUAD 636, 652, 653, 654, 655, 657, 660, 664, 680, 720, 730

▲ Concentration in Policy Studies (PS)
• Four courses (12 credits) chosen from PUAD 615, 622, 661, 662, 663, 680, 727, 730, 741, 742, 749, 750, 781; GOVT 520, 605, 703

▲ Concentration in Public Management (PMG)
• Four courses (12 credits) chosen from PUAD 615, 622, 623, 660, 661, 662, 663, 664, 670, 680, 720, 729, 730, 731, 742, 750, 781

▲ Concentration in Public and Nonprofit Finance (PNF)
• Four courses (12 credits) chosen from PUAD 660, 661, 662, 663, 664, 729, 730, 769

▲ Concentration in State and Local Government (SLG)
• Four courses (12 credits) chosen from PUAD 505, 615, 623, 630, 651, 660, 661, 662, 663, 680, 729, 730, 750, 759, 781

▲ Concentration in Third-Party Governance (TPG)
• Four courses (12 credits) chosen from PUAD 613, 622, 623, 635, 636, 659, 750

Certificate Programs

The department offers six graduate certificates. Students must apply for admission to the certificate program and meet the admission standards and application requirements for all graduate students as stated in the Graduate Admissions Policies section.

Students pursuing a certificate must complete five courses (15 credits) distributed as follows:

■ Certificate in Administration of Justice
  - CERG-ADJ
  • Three required courses (9 credits): PUAD 502; ILCP 509, 691
  • Two JLCP elective courses (6 credits)

■ Certificate in Association Management
  - CERG-AM
  • Three required courses (9 credits): PUAD 657, 659, 664
  • Two elective courses (6 credits) in the nonprofit area

■ Certificate in Critical Analysis and Strategic Responses to Terrorism
  - CERG-CASR
  The Certificate in Critical Analysis and Strategic Responses to Terrorism (CASR) in an interdisciplinary introduction to the phenomenon of modern terrorism and its implications for US domestic and foreign policy. It focuses on multidisciplinary analysis and holistic cross-sectoral approaches to long-term prevention of and response to terrorism.
  • Two required courses (6 credits): GOVT 541 and 640
  • Three elective courses (9 credits) related to terrorism analysis and/or response chosen in consultation with an advisor and approved in advance by the program director.

■ Certificate in Emergency Management and Homeland Security
  - CERG-EMHS
  • Three required courses (9 credits): PUAD 502, 630, 632
  • Two elective courses (6 credits) in the emergency management and homeland security area
Certificate in Nonprofit Management

This certificate is offered in class or online.

- Three required courses (9 credits): PUAD 505, 659, 664
- Two elective courses (6 credits) in the nonprofit area

Certificate in Public Management

- Three required courses (9 credits): PUAD 502, 620, 640
- Two elective courses (6 credits) in the public management area

Religious Studies

Phone: 703-993-1290
Web: religious.gmu.edu

Faculty

Associate professors: Bond, Burns, M. Dakake, M. Farina, Nguyen, Rashkover, Ro (chair), Shiner
Adjuncts: Bond, Catlett, D. Dakake, Dreyer, Hebbar, Hostetter, Padgett

Course Work

This department offers all course work designated RELI in the Course Descriptions chapter of this catalog.

UNDERGRADUATE PROGRAMS

Religious Studies, BA

The major in religious studies is intended to bring the student to an understanding of the major traditions of world religions. Areas of study include Asian religious traditions; Near (Middle) East religious traditions, including Judaism, Islam, and Christianity; and comparative aspects of religion. Students develop skills in reading and interpreting sacred texts. They explore the cultural and social dimensions of religion, along with a consideration of religious values and ethics, from comparative and cross-cultural perspectives with relation to global issues.

The courses are writing intensive. They enable students to study and analyze religious ideas and symbols, and encourage them to present well-argued papers.

In addition to university-wide general education requirements and requirements for a BA in CHSS, religious studies majors must complete at least 33 credits in religious studies, earning a minimum grade of 2.00 in each course. Note that all students must have a minimum cumulative GPA of 2.00 to graduate. No course may be used to fulfill more than one requirement.

Students pursuing this degree must complete the course work distributed as follows:

- Two required courses (6 credits) of introduction to the main world religions: RELI 211 and 212
- One writing-intensive seminar (3 credits) taken during the senior year: RELI 420
- Two courses (6 credits) emphasizing comparative or methodological aspects of the study of religion, chosen from ANTH 313, PHIL 313, RELI 337, RELI 341, RELI 490, SOCI 385.

When the subject matter is appropriate, with the approval of the undergraduate coordinator, RELI 376 may be used to fulfill this requirement.

- A minimum of 12 credits in 300- or 400-level RELI courses other than those not used to fulfill the second and third requirements above
- 6 elective credits in religious studies or related disciplines (including anthropology, art history, and history) to be chosen in consultation with the student’s advisor

Up to 6 credits of a scriptural language (such as Arabic, Biblical Hebrew, Chinese, Classical Greek, Latin, or Sanskrit) may be used to fulfill either of the last two requirements.

Writing-Intensive Requirement

Mason requires all students to complete at least one course designated “writing intensive” in their majors at the 300 level or above. Religious studies majors may fulfill this requirement by successfully completing the second requirement above.

Minor in Judaic Studies

The minor in Judaic studies is designed for students interested in the culture, history, and politics of Jewish communities across the world.

Students pursuing this minor must complete 15 credits distributed as follows:

- Three core courses (9 credits): RELI 370, 371; HIST 388/SOC 450 or HIST 461
- Two elective courses (6 credits) chosen from HEBR 150; HIST 465; RELI 211, 352, 372, 373

Special topics courses and independent studies courses, when relevant, may be used to fulfill elective credits for the minor with prior approval of the coordinator.

In accordance with university policy, at least 8 credits must be applied only to the minor and may not be used to fulfill requirements of the student’s major, concentration, or another minor.

Minor in Religious Studies

The minor in religious studies introduces students to the world’s religious traditions. Within the minor, students may pursue religious traditions of Asia or the Near (Middle) East or comparative aspects of religion.

Students pursuing this minor must complete 18 credits distributed as follows:

- One course (3 credits) chosen from RELI 100, 211, 212
- Five elective courses (15 credits) with at least three courses (9 credits) in 300- and 400-level RELI courses

Students must earn a minimum grade of 2.00 in each course applied to the minor.

In accordance with university policy, at least 8 credits must be applied only to the minor and may not be used to fulfill requirements of the student’s major, concentration, or another minor.
**Russian Studies**

Phone: 703-993-1233
Web: russianstudies.gmu.edu

Faculty
Barnes (History and Art History), Bockman (Sociology and Anthropology), Boettke (Economics), Christensen (Modern and Classical Languages), Johnsen-Neshati (Theater), Katz (Public and International Affairs), T. Mills Kelly (History and Art History), Levine (Modern and Classical Languages, director), McGlinchey (Public and International Affairs), Verhoeven (History and Art History)

UNDERGRADUATE PROGRAM

**Russian Studies, BA**  
BA-RUST

Students may pursue one of two directions in this degree program: Russian studies as one element of a double major or Russian studies as a single degree program. In the first option, students must fulfill all requirements of the program as noted below. Students must also fulfill requirements of the second major. Obvious combinations with Russian studies include geography, history, government and international politics, and economics. This program may be accomplished within a four-year period and is recommended for students who intend to seek employment in government, industry, or journalism.

The second option is recommended for students who intend to study Russian language and literature in graduate school, are interested in careers as translators, or are studying for self-enrichment.

Degree Requirements
In addition to satisfying university-wide general education requirements and requirements for a BA degree in CHSS, students majoring in Russian studies must complete the following course work with a minimum GPA of 2.00:

- Russian language through the intermediate level through course work or testing
- Two courses (6 credits) of RUSS 380 and 381
- One course (3 credits) of RUSS 480 or 481 (preferably both)
- Two courses (6 credits) of Russian literature
- Three courses (9 credits) of additional upper-level courses bearing the RUSS course code, two of which must chosen from RUSS 302, 303, 310, 311, 401, 410, and 480 or 481 (whichever is not taken to fulfill the third requirement above)
- One course (3 credits) of RUSS 353 or HIST 328
- One course (3 credits) of RUSS 354 or HIST 329
- One course (3 credits) of GEOG 330 or GOVT 338

Qualified students are strongly encouraged to participate in study abroad programs in Russia. Through a cooperative agreement with the American Council of Teachers of Russian, students may apply to summer or semester Russian language programs at one of several leading universities in Moscow and St. Petersburg. Interested students should consult with their major advisor.

**Writing-Intensive Requirement**
The university requires all students to complete at least one course designated “writing intensive” in their majors at the 300 level or above. Students majoring in Russian studies may fulfill this requirement by successfully completing RUSS 302, 325, or 407.

**Sociology and Anthropology**

Phone: 703-993-1440  
Web: sociology.gmu.edu  
anthropology.gmu.edu

Faculty
Emeritus faculty: Black, Dumont, Golomb (anthropology)  
Professors: Gusterson, Lancaster, Seligmann, Williams (anthropology); Dennis, Scimecca, Vallas (chair) (sociology)  
Associate professors: Haines, Palkovich, Snead, Trencher (anthropology); Best, Guagnano, Hanrahan, Jacobs, Rader, Rosenblum (sociology)  
Assistant professors: Bentiez (anthropology); Bickford, Bryant (anthropology); Bockman, Dale, Davis, Samara (sociology)  
Term associate professor: Masters (sociology)  
Term assistant professors and instructors: Arabandi, Zimmerman (sociology)  
Affiliate professors: Avruch (anthropology); Bainbridge, Dopkins, Goldstone, Johnson, Levine (sociology)  
Adjuncts: Mashayekhi, Minnich, Nambiar, Pearlman, Sandole-Staroste

Course Work
This department offers all course work designated ANTH, SOAN, and SOCI in the Course Descriptions chapter of this catalog.

UNDERGRADUATE PROGRAMS

**Anthropology, BA**  
BA-ANTH

Anthropology is the study of human beings and their cultures. It draws broadly from the social sciences, humanities, and natural sciences. Anthropology is thus an ideal undergraduate major, providing sound interdisciplinary preparation for a variety of careers.

Degree Requirements
In addition to satisfying university-wide general education requirements and requirements for the BA degree in CHSS, students pursuing this degree must complete 36 credits with a minimum GPA of 2.00 distributed as follows:

- Three core courses (9 credits) anthropology: ANTH 114, 390, 490  
- One course from each of the three fields listed below (9 credits): Anthropology: ANTH 120 or 420  
  Biological anthropology: ANTH 135 or 365  
  Linguistic anthropology: ANTH 380 or LING 326  
- Six courses (18 credits) of 300- and 400-level electives: SOCI 311 and 313 may be applied toward the 18-credit elective requirement. SOCI 311 may substitute for ANTH 390.
See an advisor to learn how anthropology majors may fulfill university-wide requirements in global understanding, information technology, and synthesis, as well as the CHSS requirement in non-Western culture.

Students wishing to pursue careers in anthropology should consider including ANTH 492 (or subfield specialty equivalents, such as ANTH 420, 450, 495, or 496) as an elective in their program of study.

Writing-Intensive Requirement
The university requires all students to complete at least one course designated “writing intensive” in their majors at the 300 level or above. Students majoring in anthropology may fulfill this requirement by successfully completing ANTH 490.

Honors Program in Anthropology
Anthropology majors who wish to pursue the honors program in anthropology must meet the following criteria: a minimum GPA of 3.50, 60 credits, completion of ENGL 302 for the social sciences, 3.75 GPA in anthropology courses, and 15 credits of anthropology (ANTH 114, 120, and 135, and two additional courses).

Candidates for honors in anthropology are expected to earn 6 credits in one of two possible sequences of special honors sections: ANTH 492 (for those focusing on sociocultural anthropology) or ANTH 420 (for those interested in archaeological or biological anthropology). All honors candidates will undertake additional research leading to the completion of an honors thesis in ANTH 499. For more information, contact the anthropology coordinator at 703-993-1334.

Minor in Anthropology
Students pursuing this minor must complete 21 credits in anthropology with a minimum GPA of 2.00 distributed as follows:

- Four required courses (12 credits): ANTH 114, 120 or 135, 332, 430 or 450
- One regional ethnography course (3 credits) chosen from ANTH 301, 302, 303, 304, 306, 307, 308, 309, 311
- One topical course (3 credits) chosen from ANTH 300, 305, 310, 312, 313, 315, 320, 322, 325, 360, 365, 370, 371, 375, 380, 381, 399
- One additional 300- or 400-level anthropology course (3 credits)

In accordance with university policy, at least 8 credits must be applied only to the minor and may not be used to fulfill requirements of the student’s major, concentration, or another minor. For policies governing all minors, see Minors under the Undergraduate Academic Program section in the Academic Policies chapter of this catalog.

Sociology, BA

Sociology involves the systematic study of social structures, cultural patterns, and human relationships. The sociological imagination combines rigorous methods with theory and observation, yielding insights that challenge commonly held assumptions about the social world. Sociology also informs the practice of social and public service, aiding efforts to address important social problems. Majoring in sociology positions students so they can pursue a varied set of career paths, ranging from teaching, human service, and human resource occupations to positions in the criminal justice system, marketing, and social research. The sociology major is excellent preparation for students considering law school or graduate training in the social and behavioral sciences.

Degree Requirements
In addition to satisfying university-wide general education requirements and requirements for the BA degree in CHSS, students pursuing this degree must complete 35 credits of sociology courses with a minimum GPA of 2.00 distributed as follows:

- Five core courses (17 credits): SOCI 101 or 102, 303, 311, 313, and 412, each of which must be completed with a minimum grade of 2.00
- Six elective courses (18 credits) in sociology at the 300 or 400 level

Of the required 35 credits in sociology, no more than 6 credits of courses with unsatisfactory grades (C- or D) may be applied toward the degree, none of which can be core courses.

Concentrations
In completing the 18 credits of study beyond the core sociology courses, students are strongly encouraged to select a concentration to suit their interests and career objectives. Students who are invited to participate in the sociology honors program may apply 3 credits of honors course work (480, 481, or 482) to their selected concentration.

Concentration in Childhood and Youth (CYC)
This concentration focuses on the changing social realities, experiences, and identities of children and youth as they are formed in different social and historical contexts. It emphasizes children in peer groups, youth subcultural activities, youth and children and the media, schools, families, social movements, social policy, and the welfare state. This concentration is appropriate for students interested in working directly with children and youth or in organizations serving them in a broad range of fields, such as educational counseling, teaching, policy, advocacy or clinical work, family and community services, social work, early childhood development, and juvenile justice.

Students pursuing this concentration must complete 12 credits distributed as follows:

- One required course (3 credits): SOCI 360
- Three courses (9 credits) chosen from SOCI 302, 307, 309, 315, 382, 395 (depending on topic), 483; ANTH 315

Concentration in Culture (CLTR)
This concentration focuses on the social and institutional forces that shape religion, the arts, language, gender, and cultural norms and tastes. It is appropriate for students interested in the media, the arts and popular culture, identity, multiculturalism, and the problems of cultural difference, religion, education, and the construction of knowledge in contemporary societies. Cross-cultural work in this field is encouraged.

Students pursuing this concentration must complete 12 credits distributed as follows:

- One required course (3 credits): SOCI 314
- Three courses (9 credits) chosen from SOCI 309, 315, 332, 355, 377, 382, 385, 395 (depending on topic), 414, 505; ANTH 332, 488
■ Concentration in Deviance, Crime, and Social Control (DSCS)
This concentration focuses on the social, legal, and political systems that underpin social control in Western societies and beyond. The emphasis is on how norms, values, and common sense regulate human action and the social forces that produce deviant behavior and societal responses to it. This concentration is appropriate for students interested in the criminal justice system and the law.

Students pursuing this concentration must complete 12 credits distributed as follows:
• One required course (3 credits): SOCI 300
• Three courses (9 credits) chosen from SOCI 301, 302, 307, 308, 310, 332, 340, 352, 355, 395 (depending on topic), 402, 502

■ Concentration in Global Sociology (GSOC)
This concentration focuses on global interconnectedness and its effect on the nature of societies around the world. It emphasizes new technologies and social processes, migration, transnational communities, global cities, and social movements working across state borders. This concentration is appropriate for students interested in pursuing internationally oriented careers in social change, political reform, and international development.

Students pursuing this concentration must complete 12 credits distributed as follows:
• One required course (3 credits): SOCI 320
• Three courses (9 credits) chosen from SOCI 307, 308, 326, 332, 340, 413 (depending on topic), 523; ANTH 332

■ Concentration in Inequality and Social Change (INSC)
The focus is on inequalities, such as those of race, class, and sex, and on the manner in which such inequalities become structurally rooted in a society. The emphasis is on understanding the rise of the struggle for human rights, democracy, and various social movements that have sought to reverse these inequalities through protests, demonstrations, counterorganizations, and the ballot. This concentration is appropriate for students who seek careers in social justice organizations, social services, or teaching, and those who wish to participate in social and political movements.

Students pursuing this concentration must complete 12 credits distributed as follows:
• One required course (3 credits): SOCI 355
• Three courses (9 credits) chosen from SOCI 300, 308, 310, 315, 332, 340, 360, 390, 395 (depending on topic), 450, 523

Writing-Intensive Requirement
The university requires all students to complete at least one course designated “writing intensive” in their majors at the 300 level or above. Students majoring in sociology may fulfill this requirement by successfully completing SOCI 412.

Honors Program in Sociology
Sociology majors who have completed 75 credits (with a minimum of 15 credits in sociology, 6 of which must have been taken at Mason) and have a 3.50 GPA overall and a 3.50 GPA in sociology may apply for admission to the honors program in sociology. To graduate with honors in sociology, students must complete SOCI 480 and 481 with a minimum GPA of 3.50 overall and in sociology courses presented for graduation. The 6 credits of honors courses may be counted toward the major requirement in sociology. For more information or application procedures, contact the department.

Minor in Sociology
Students pursuing this minor must complete 21 credits in sociology with a minimum GPA of 2.00 distributed as follows:
• Two required courses (6 credits): SOCI 101 and 311
• Five elective courses (15 credits)

Students may select a focus to their minor from one of the five concentrations offered by the department.

Academically strong undergraduate majors are encouraged to apply to the accelerated master’s program after they complete 90 credits. Applicants should have a 3.25 GPA, with a 3.50 in sociology courses. If not, they may submit two letters of reference from faculty in the department. For more information, see the sociology graduate coordinator.

In accordance with university policy, at least 8 credits must be applied only to the minor and may not be used to fulfill requirements of the student’s major, concentration, or another minor.

Interdisciplinary Minors
The department coordinates the interdisciplinary minor in immigration studies. See the Interdisciplinary Minors section of this chapter for more information.

Teacher Licensure
Students who plan to seek teacher licensure and become K–12 teachers should consult the College of Education and Human Development chapter and attend an information session early in their undergraduate career. For more information, call 703-993-2892, e-mail geoadmit@mcm.edu, or go to gse.gmu.edu.

Bachelor’s/Accelerated Master’s Program in Sociology
Highly qualified undergraduates may apply to the accelerated master’s degree program and obtain both a BA and an MA in sociology following satisfactory completion of 144 credits. Well-prepared undergraduates are encouraged to apply as they near completion of 90 credits. Accepted students are able to use up to 6 graduate credits in partial fulfillment of requirements for the undergraduate degree. On completion and conferral of the undergraduate degree with satisfactory grade-level performance (3.00 in each course, grade of B or better) in graduate courses, students are given advanced standing in the master’s program. All other master’s degree requirements must be met.

Applicants must have a cumulative GPA of 3.25 or higher, with a 3.50 in sociology courses, or submit two letters of reference from faculty in the department. Interested students should contact the department for details about the application process.
GRADUATE PROGRAMS

Assistantships
The Department of Sociology and Anthropology offers a limited number of merit-based graduate assistantships.

Financial Aid
The Department of Sociology and Anthropology offers a limited number of graduate assistantships. For more information, call 703-993-1440.

Anthropology, MA  MA-ANTH
The master’s degree program in anthropology prepares students for advanced work in anthropology through courses focusing on the study of culture. Students learn how to use participant-observation field work methods, as well as comparative and holistic knowledge and research methods. Areas of emphasis are advanced training in sociocultural anthropology; culture, health and bioethics; and transnational and global issues. Regional area coverage includes Central and South America, Europe, Africa, the Middle East, Asia, and the United States. Course work progresses from core courses to more advanced courses and culminates in a thesis.

Nondegree Status
Students with a 3.00 or above who do not wish to pursue a degree may enroll as nondegree students. Nondegree students may later apply for admission to the degree program, and up to 9 credits earned in non degree status may be applied to the master’s degree, subject to the approval of the program director and dean.

Application Requirements
In addition to fulfilling the admission requirements for graduate study at Mason, applicants for this degree must submit:

• Three letters of recommendation from faculty members or others who can evaluate the applicant’s academic potential (If possible, at least one letter should be from an academic setting.)
• 1,000-word writing sample, such as an essay or full-length research paper
• A current résumé

Degree Requirements
Students must successfully complete 36 credits distributed as follows:

• Six required core courses (16 credits): ANTH 535, 536, 635, 650, 750, 797 (1 credit)
• 14 credits of elective courses chosen from advanced courses in anthropology. Up to 6 credits may be from other programs, subject to the approval of the director.
• 6 credits of proposal (ANTH 798) and thesis (ANTH 799)

Students have the option of completing an internship (ANTH 690). An internship can serve as a primary field research site for the thesis, if appropriate. Courses in archaeology and biological anthropology may not be used to meet any requirements for the MA in anthropology.

Sociology, MA MA-SOCI
Students pursuing a master’s degree in sociology may choose an emphasis in general sociology; sex and gender; crime, delinquency, and corrections; race and ethnicity; cultural studies; or conflict analysis and management. The general sociology emphasis allows maximum flexibility in the application of sociological knowledge to the analysis of social processes and systems. All emphases are appropriate for those anticipating further graduate study leading to the PhD in sociology.

The department provides opportunities for students to develop expertise in a variety of areas, including applied methods, community, conflict analysis and management, development and social change, deviance, environmental sociology, gerontology, medical sociology, occupations and professions, policy analysis, race and ethnicity, sociology of science and technology, cultural studies, and survey research.

Admission Requirements
In addition to meeting general admissions requirements for graduate study, applicants must present the following:

• Minimum of 3 credits each in undergraduate sociological theory, statistics, and research methods. Equivalent courses in other disciplines may be substituted for some of these requirements, with permission.
• Three letters of recommendation from people who have supervised the student’s work. Two should be from an academic setting.
• A written statement (approximately 600 words) explaining the student’s interest in sociology
• Writing sample, such as an essay or full-length research paper
• A current résumé

Nondegree Status
Students with a 3.00 or above who do not wish to pursue a degree may enroll as nondegree students. Nondegree students may later apply for admission to the degree program, and up to 12 credits earned in non degree status may be applied to the master’s degree, subject to the approval of the program director or dean.

Degree Requirements
Students are required to complete 33 credits distributed as follows:

• Two courses (6 credits) of social theory: SOCI 611 and 612
• Three courses (9 credits) of research methods, including SOCI 530
• 3 to 6 credits of master’s thesis (SOCI 799)
• 14 to 17 credits of elective courses
• 1 credit of SOCI 797

Emphasis in General Sociology
Additional sociology electives

Emphasis in Sex and Gender
9 credits in sex and gender (SOCI 505, 525, and 696)

Emphasis in Conflict Analysis and Management
9 credits in the sociology of conflict and conflict management
Emphasis in Race and Ethnicity
9 credits in race and ethnicity

Emphasis in Crime, Delinquency, and Corrections
9 credits in crime, delinquency, and corrections (SOCI 607, 608, and 609)

Emphasis in Sociology of Culture
A degree with this emphasis prepares students for the doctoral program in cultural studies. It requires SOCI 614; a 3-credit master’s-level course that also serves as an introduction to a cultural studies feeder program in a department other than Sociology and Anthropology; and CULT 802.

Master’s Thesis
A master’s thesis is required to demonstrate capacity to carry out independent research. The thesis consists of a substantial sociological research or theoretical project that will contribute to sociological knowledge.

Sociology, PhD
PHD-SOCI
The PhD in sociology provides rigorous training in public and applied social research, including skills in research design, data analysis, and substantive areas that are pertinent to various sectors in the Washington, D.C., area. Successful students have the theoretical, analytical, and professional skills that allow them to transition into academic positions in teaching or research. They are also well-qualified for nonacademic positions in the many settings that look to sociologists, such as human service agencies, marketing research firms, educational systems, nonprofit foundations, and law enforcement agencies.

Application Requirements
See the Application for Graduate Study for admission deadlines. In addition to materials required of all applicants for graduate study at Mason, applicants to the PhD in sociology should submit the following:
- A statement of purpose of academic study
- A writing sample such as a full-length research paper
- Three letters of recommendation from faculty members or those who can evaluate the applicant’s academic potential
- GRE scores (the general test is required; subject tests are optional)

Degree Requirements
To receive the PhD, students must complete a minimum 72 credits including foundation courses in theory and methods, course work in a specialization, and electives. Following completion of all required course work and passing a candidacy exam, students are advanced to candidacy by the dean and complete a dissertation, an original and independent research project. Students with a master’s degree may be allowed a reduction of credit up to a maximum of 30 credits, subject to the approval of the program director and the dean.
- Nine foundation courses (27 credits)
  6 credits of SOCI 801, 802
  6 credits of theory: SOCI 711, 712
  9 credits of methodology and analysis: SOCI 620, 636, then 730 or 634
  6 credits of statistics/methods courses chosen from SOCI 631, 632, 634; PUBD 704, 705; ANTH 613, 650; WMST 610; COMM 644
- Two courses (6 credits) of proseminars: SOCI 803, 804
- Three courses (9 credits) in one of two specializations, up to 6 credits of which may be from courses that are not in sociology
  Specialization in institutions and inequalities
  SOCI 605 840, 844, 845; PUAD 620, 640, 651, 750;
  GOVT 852; ILCP 749, WMST 610, 611
  Specialization in sociology of globalization
  SOCI 523, 850, 851, 853, 857; ANTH 630, 631, 632, 655;
  CONF 736; PUBP 602, 758
- Five courses (15 credits) of electives, up to 6 credits may be from courses that are not in sociology, with the guidance of the student’s advisor or the graduate director
- 15 credits of dissertation proposal and research
  3 credits of SOCI 998
  12 credits of SOCI 999

Once enrolled in SOCI 998, students must maintain continuous registration for at least 1 credit; once enrolled in 999 students must follow the university continuous registration policy.

Research Proficiency
Students must demonstrate proficiency in a range of quantitative and qualitative research methods prior to taking the qualifying exams for candidacy. Proficiency is determined by satisfactory course work or an exam. Students in the specialization in sociology of globalization must also demonstrate proficiency in one foreign language at an advanced level of reading and comprehension.

Advancement to Candidacy
To advance to candidacy, doctoral students must complete all course work required on their approved program of study. Students must also successfully pass two written qualifying examinations. One examination is in the foundations of sociological inquiry, linking research methods and sociological theory to public concerns. The second examination is in the student’s area of specialization, administered by a faculty committee appointed by the graduate program director. In addition, students must have a dissertation committee appointed by the Dean’s Office as well as have an approved dissertation proposal. Evidence of the approved proposal must be on file in the Dean’s Office before a student can be advanced to candidacy.

Women and Gender Studies

Phone: 703-993-2896
Web: wmst.gmu.edu

Faculty
Amireh, Baker, Beach, Bergoffen, Bernard, Best, Bullard, Burr, Carbonneau, Cattaneo, Censer, Cheldelin, Cherubin, Christensen, Cohen, Constantine, Copelman, Davidson, Davis, Deshmukh, Dunne, Eby, Ffolliott, Fischer, Friedley, Fuchs, Frye, Gilbert, Gring-Pemble, Hamdani, Hanrahan (director), Harvey, Hodges, Hodzie, Jadallah, Johnsen-Ne-shati, Jordan, Kaplan, Karametou, King, Kirkland, Kirsch, Koch, Lont, Mann, Masters, Michals, Misencik, Muir, Palkovich, Pascarell, Pavloski, Rabin, Regan, Ricouart, Rosenblum, Samuelian, Sandole-Staroste, Scott, Seligmann, Snyder, Stearns, Tichy, Todd, Tolchin, Travis, Vivancos Perez, Weitzman, Yocom, Zawacki
Course Work
The Women and Gender Studies Department offers all course work designated WMST in the Course Descriptions chapter of this catalog.

By choosing to pursue work in women and gender studies, students at all levels engage in an interdisciplinary exploration of gender roles in social, political, cultural, and economic life; gender roles in history; women and the media; feminist theory; the relationship between sex and gender; the impact of sex, race, class, disability, and sexual orientation on people’s lives; and the ways in which gender stereotypes influence the self in relationship to others. Students in many courses have the opportunity to investigate these issues in a cross-cultural and global perspective.

UNDERGRADUATE PROGRAM

Minor in Women and Gender Studies
This is an interdisciplinary minor open to the entire undergraduate student body. Students in this minor complete 18 credits with a minimum GPA of 2.00, distributed as follows:

- Two required courses (6 credits): WMST 200, 330
- Four courses (12 credits) selected from courses in women and gender studies, courses cross-listed with women and gender studies, or course offerings in other departments approved by the director. No more than 6 credits may be taken in any one department.

In accordance with university policy, at least 8 credits must be applied only to the minor and may not be used to fulfill requirements of the student’s major, concentration, or another minor.

GRADUATE PROGRAM

Certificate in Women and Gender Studies
The certificate may be taken alone or in conjunction with another graduate program. Courses taken toward the certificate may also be used in a degree program, subject to approval of the graduate coordinator in the respective program.

Admission
The certificate is open to all students who meet university criteria for admission to graduate study. Students must submit an application for graduate study.

Transfer Credit
Students may transfer up to 3 graduate credits earned at another accredited institution, and 9 graduate credits earned at Mason in nondegree status toward the certificate, subject to approval of the director and the dean and in accordance with university policy.

Certificate Requirements
Students must complete 15 graduate credits and a capstone portfolio. The credits are distributed as follows:

- Two required courses (6 credits): WMST 630, 640
- Three electives (9 credits) chosen from relevant courses with approval of the director

These credits may be in departments across the university that address the study of women and gender, courses in the Women and Gender Studies Program, and appropriate directed readings or independent study courses.

- Capstone portfolio

Students synthesize their work in the certificate program by reflecting on how issues, ideas, and theories raised in the core courses inform their understanding of gender issues within their area of interest. The portfolio includes three to five items produced in previous course work and a 7- to 10-page essay discussing them. Items selected may include course papers, performance videos, photos of exhibits, tapes of music, or other items as agreed on by the student and advisor. The portfolio must be approved by the advisor and submitted to the Women and Gender Studies where it will be presented, displayed, and archived.

See MAIS section of this chapter for MAIS concentration in Women and Gender Studies.

New Century College

Phone: 703-993-1436
Web: ncc.gmu.edu

An integral part of CHSS, New Century College (NCC) offers students a small college interdisciplinary education within the context of a large public university. Using a cohesive interdisciplinary faculty and borrowing faculty members from other disciplines, NCC provides a learning environment that integrates interdisciplinary knowledge with workplace and lifelong learning skills. NCC has a strong commitment to enhancing technology skills, improving student writing, and providing challenging opportunities.

NCC meets this challenge by having students interact closely with faculty; engage in critical thinking, problem solving, creative activity, and leadership development; and participate in experiential education in the form of internships, field studies, service learning, or study abroad. NCC teaches students to develop original ideas, engage in active and reflective learning, master competency areas, and conduct independent inquiry with high ethical standards. Both NCC’s structure and curriculum respond to the needs of civic and corporate communities and provide instruction for a rapidly changing society.

Administration
Nance Lucas, associate dean
Kelly Dunne, director of academic affairs
Karen Misencik, director of experiential learning
Sarah Sweetman, director of student services

Faculty
Professor: O’Connor
Associate professors: Gabel, Garner, Gring-Pemble, Lucas, Muir, Smith, Wood
Assistant professors: Cambridge, Wingfield
Term assistant professors: Scott, Szuclczewski
Adjunct faculty: Bernard, Bruno, Fuertes, Grymes, Holder, Johnson, Raffel, Ryan, Underwood, Uy-Tioco, West

Centers
Center for Field Studies
Greg Justice, program manager
Center for Leadership and Community Engagement
Heather Hare, associate director
Misty Hensley-McGaffey, program coordinator

Course Work
NCC offers all course work designated NCLC in the Course Descriptions chapter of this catalog.

UNDERGRADUATE PROGRAMS

Integrative Studies, BA-INTS, BS-INTS
The curriculum is based on intensive, interdisciplinary learning communities, coordinated with traditional academic programs. The result is an integrated program of study that emphasizes collaboration, experiential learning, and self-reflection. The program provides interdisciplinary, integrated concentrations.

Students who enroll in this degree program their first year of college take four highly focused, interdisciplinary courses (8 credits each), one course at a time. They learn how to make distinctions, appreciate different perspectives, and find connections in what they learn. After the first year, the curriculum offers various learning communities that feature experiential learning and faculty-student research that addresses fundamental questions. Students complete their degree programs with an interdisciplinary concentration. The program requires mastery of essential competencies (communication, valuing, global understanding, problem solving, group interaction, effective citizenship, aesthetic awareness, critical thinking, and information technology) assessed through freshman and graduation portfolios.

Admission Requirements
Students who meet Mason’s general admission requirements may enroll in the integrative studies program. Each student works with an advisor from the college’s advising staff to identify the student’s academic and professional objectives.

Degree Requirements
Students must complete an equivalent of 120 credits of course work with at least 24 credits in learning communities, 12 credits of experiential learning (see Curriculum Requirements below), and 35 credits in general education. A student’s concentration consists of at least 30 credits with a minimum GPA of 2.00, which may draw from learning communities, experiential learning, independent study, and traditional university courses. Students must present a final cumulative portfolio and a college senior exposition.

Curriculum Components
The curriculum has four major components. Division I is general education, which can be completed through the first year of common courses, experiences, and integrated learning (also known as the “First-Year Experience”) or through traditional university course work. Thereafter, students pursue their academic and career goals through learning communities (Division II) and courses for their concentration (Division III), and experiential learning (Division IV).

General education requirements are met in Division I and II. Division I fulfills most general education requirements. Students may also test out of some requirements. The university’s 6-credit written communication general education requirement is met through completion of Division I and Division II with an overall 2.00 GPA. All 300-level and above learning communities include at least one writing assignment that requires revision.

Division I, or first-year, experience/general education: The first-year experience is a sequence of four courses following a common curriculum. Each learning community (NCLC 110, 120, 130, 140) is six or seven weeks long and separated by two-week intersession or a winter intersession. Each meets Monday through Thursday and may include lectures and exams but emphasizes seminar discussions, collaborative assignments, and problem-centered projects.

NCLC 110 emphasizes composition and communication, computer applications, and analytical reasoning; NCLC 120 studies the natural world and develops computational skills; NCLC 130 studies the socially constructed world through the interdisciplinary study of global civilization; and NCLC 140 studies the relationship between the individual and society. The intersessions are built into the curriculum to allow co-curricular activities, such as community service learning, leadership training, or specialized workshop courses. The winter intersession also allows for intensive short courses, study abroad, individualized projects, research, or experiential learning outside the college.

Division II, learning communities: combines subjects usually taught in separate courses into a single course of study. Learning communities offer the equivalent of between 3 and 9 credits of undergraduate work and replace the often fragmented classroom experience many students encounter in a series of unconnected course offerings. In interdisciplinary learning communities, faculty and students explore various ways to understand a topic. Learning communities also offer a greater sense of identity with an academic community, especially in the college environment typical of a regional state university. Several learning communities are scheduled to make attendance easier for part-time students. Team teaching: collaborative projects; emphasis on writing and critical thinking; opportunity for independent study; and integrative experiential learning are all important components of learning communities. Many learning communities have experiential learning attached, either as a part of the class or an option for students to take. A minimum of 24 credits in learning communities is required for graduation.

Division III, a concentration: the equivalent of a major in a traditional degree program. Students complete an interdisciplinary concentration already established in the integrative studies curriculum or, in some cases, create with faculty a unique program of study to fit their particular interests and needs. The concentration comprises traditional courses, learning communities, independent study, and experiential learning. Students must create a portfolio of their work that is reviewed by NCC faculty, as well as a culminating college senior exposition, which is done through NCLC 491 Senior Capstone. Students are required to take NCLC 491 the semester prior to graduation.

Division IV, experiential learning requirement: A minimum of 12 credits of experiential learning are required to fulfill graduation requirements. Experiential learning sites may change each semester to include study abroad programs, internships, community service learning, and field study opportunities. In many cases, students should complete learning contracts for experiential learning activity undertaken. This
Humanities &
Social Sciences

206

College of Humanities and Social Sciences

requirement reflects the college’s commitment to provide
educational experiences that prepare graduates for the workplace and the demands of active and responsible citizenship.
The faculty’s goal is twofold: to engage the workplace as a
site of instruction and expose students to the variety of skills
needed to succeed, and to combine work experience with
academic study so that each will enrich the other. Experiential learning may include course field trips and off-campus
learning experiences. Students may be responsible for their
own transportation, including bus, subway, and carpooling.
Student liability insurance for the experiential learning internship is provided by Mason. Students are responsible for their
own health care, including emergency care. New Century
College assumes no financial responsibility for the health
care of students. An accident and health insurance plan is
available through the university. No more than 24 credits of
experiential learning can count toward a student’s total credits for graduation.

Concentrations for Bachelor of Science

**Concentration in Civil Engineering (CENG)**
- BIOL 103, 104, 213, 214, 300, 301, 303, 304, 312, 364; ECON 100, 103, 300, 301, 303, 304, 305, 306, 309; ENGL 100, 102, 103, 309; GOVT 103, 132, 133, 318, 351, 357, 364; HIST 110, PRLS 100, 300, 302, 316, 402
- One course chosen from NCLC 220, 305, 307, 308, 331

**Concentration in Environmental Engineering (EEENG)**
- BIOL 103, 104, 213, 214, 300, 301, 303, 304, 312, 364; ECON 100, 103, 300, 301, 303, 304, 305, 306, 309; ENGL 100, 102, 103, 309; GOVT 103, 132, 133, 318, 351, 357, 364; HIST 110, PRLS 100, 300, 302, 316, 402
- One course chosen from NCLC 220, 305, 307, 308, 331

**Individualized Concentration (IND)**
With approval of the undergraduate director, students may construct an individualized concentration.

**Concentration in Biology and Biotechnology (BBTB)**
- BIOL 103, 213, 303, 304, 307; ECON 103 or 307; GOVT 311, 314, 401; HIST 110, 111, 112, 113, 114; PHIL 105 or 309; STAT 250

**Concentration in Chemistry (CCHEM)**
- BIOL 103, 213, 300, 303, 304, 307; CHEM 110, 111, 112, 113, 114; HIST 110, 111, 112, 113, 114; PHIL 105 or 309; STAT 250

**Concentration in Computer Science (CSC)**
- BIOL 103, 213, 300, 303, 304, 307; CHEM 110, 111, 112, 113, 114; HIST 110, 111, 112, 113, 114; PHIL 105 or 309; STAT 250

**Concentration in Economics (CECON)**
- BIOL 103, 213, 300, 303, 304, 307; ECON 103, 104, 303, 304, 305, 306, 309; GOVT 103, 132, 133, 318, 351, 357, 364; HIST 110, PRLS 100, 300, 302, 316, 402
- One course chosen from NCLC 220, 305, 307, 308, 331

**Transfer Students**
NCC accepts students from other four-year institutions or community colleges, as well as from other academic units within Mason, into the integrative studies program after admission to the university. NCC’s academic advisors work with students to best use transfer credits and provide a plan for timely completion of the bachelor’s degree. All transfer students are required to take NCLC 391 within their first two semesters in NCC and meet with an academic advisor as soon as possible. For more information, call 703-993-1436.

**Minor in Leadership**
The minor in leadership helps prepare students to lead effectively in the 21st century. It provides a broad understanding of leadership in contemporary society and emphasizes civic engagement. Through the required course work, students
examine theories of leadership, analyze methods and styles of leadership, and participate in experiences to develop their own leadership skills. Students demonstrate what they have learned through community service-learning to Mason and the greater Washington, D.C., metropolitan area.

The minor in leadership may be pursued concurrently with any undergraduate major.

In accordance with university policy, at least 8 credits must be applied only to the minor and may not be used to fulfill requirements of the student’s major, concentration, or another minor. For policies governing all minors, see the Academic Policies chapter of this catalog.

Requirements

Students in the minor complete 15 credits of course work distributed as follows:

• Three required core courses (11 credits): NCLC 204 (4 credits), NCLC 375 (3 credits), NCLC 435 (4 credits)
• One course (1 to 3 credits) of experiential learning, which may be fulfilled through an approved internship, community service course, or other course work that includes experiential learning. The following courses fill this requirement as do some offerings under the courses NCLC 195, 395, and UNIV 300. Students should seek prior approval of the director for courses to apply to this requirement.
  COMM 349 (1 credit)
  NCLC 195 (1 credit)
• One elective course (3 to 4 credits), which may be fulfilled through AVT 309/NCLC 346 (4 credits), AVT 370 (4 credits); CONF 300; CVPA 305; DESC 456; EDUC 303; EVPP 361; FNAN 401; GOVT 430; HEAL 323; HSCI/ NURS 436; IT 304; MGMT 413; MIS 435; MKTG 471; MLSC 300 (1 credit), 400, 401; MSOM 301, 302, 305, 306; PRLS 316; PSYC 231, 333; SOCI 307; TOUR 330

Other electives may be applied to the minor with prior approval of the director.

Interdisciplinary Minor in Multimedia

NCC and the College of Visual and Performing Arts coordinate the interdisciplinary minor in multimedia. See the Interdisciplinary Minors section of this chapter for a description.

Minor in Nonprofit Studies

Faculty

Benjamin, Sacco, Smith (coordinator), Toepler

The nonprofit minor introduces students to the theories and practical realities of working in the American nonprofit or charitable sector. The required course work highlights the historical, legal, and social foundations of nonprofit organizations and their operating characteristics, focusing on such distinctive issues as mission-drive management, earned and unearned revenue, and volunteerism. Elective courses and experiential learning encourage students to explore their professional and/or personal interests.

Students pursuing this minor must complete 16 credits distributed as follows:

• Three required courses (11 to 12 credits): NCLC 331* (4 credits), NCLC 431* (4 credits), one course chosen from GOVT 358 (4 credits), NCLC 435 (4 credits); CONF 101, 300; NCLC 305 (Sections of NCLC 375 or 395 may count toward this requirement when appropriate and with prior written approval of the coordinator.)
• One to two elective courses (3 to 4 credits) chosen from AVT 370; COMM 300, 301, 335; CVPA 305; ECON 309; ENGL 410; MSOM 301, 321; NCLC 211, 304*, 340, 349, 410, 422; SOCI 492; SOCW 352, 483 (Sections of NCLC 375 and 390/490* may be used with prior written approval of the coordinator.)

Each of the required courses is writing intensive with a requirement of at least 3,500 words in logs, essays, and analyses. Writing assignments are aggregated with a cover document at the end of the program into a portfolio that documents the student’s experience in studying the nonprofit world.

* These courses are approved to earn experiential learning credits.

In accordance with university policy, at least 8 credits must be applied only to the minor and may not be used to fulfill requirements of the student’s major, concentration, or another minor. For policies governing all minors, see the Academic Policies chapter of this catalog.
The Volgenau School of Information Technology and Engineering

Graduate Admissions: 703-993-1512
Graduate Student Services: 703-993-1505
Undergraduate Student Services: 703-993-1511
Web: volgenau.gmu.edu
College Code: VS

Administrative Units
Department of Applied Information Technology
Department of Civil, Environmental, and Infrastructure Engineering
Department of Computer Science
Department of Electrical and Computer Engineering
Department of Statistics
Department of Systems Engineering and Operations Research

The Volgenau School of Information Technology and Engineering is concerned primarily with study areas that involve integrating the information basis for modern engineering with the more conventional physical and materials science approach. The careful integration of these areas results in a unique academic experience for highly motivated students.

The Volgenau School offers several degree programs that concentrate on important contemporary technological issues and needs. Bachelor’s degree programs are offered in the areas of applied computer science, civil and infrastructure engineering, computer engineering, computer science, electrical engineering, electronics and communications engineering, information technology, and systems engineering. Minors in information technology, computer science, software engineering, and data analysis are also available.

Master’s degree programs are available in the following areas: applied information technology, civil and infrastructure engineering, computer engineering, computer science, electrical engineering, electrical engineering, information security and assurance, information systems, operations research, software engineering, statistical science, systems engineering, and telecommunications. Several doctoral programs are offered, including a cross-disciplinary program in information technology and more focused programs in civil and infrastructure engineering, computer science, electrical and computer engineering, systems engineering and operations research, and statistical science. In addition, the engineer degree in information technology provides post-master’s training in an application area.

Undergraduate certificates are offered in applied statistics, computer science, information technology, postbachelor computer science, and operations research and engineering. For graduate students, certificate programs are offered in advanced network protocols for telecommunications; architecture-based systems engineering; biometrics; e-commerce; command, control, communications, and intelligence; intelligent agents; communications and networking; computational modeling; systems engineering for computer, information, and software-intensive systems; federal statistics; information engineering; information systems security; military operations research; signal processing; software engineering; telecommunications forensics and security; very-large-scale-integration (VLSI) design and manufacturing; civil infrastructure and security engineering; discovery, design, and innovation; computer networking; network technologies and applications; wireless communications; telecommunications systems modeling; data mining; database management; and web-based software engineering.

The undergraduate degree programs prepare students to enter directly into professional employment or continue studies at the graduate level. The requirements for the bachelor’s degrees include required and elective courses in mathematics, humanities, and general education, and specialty courses in applied computer science, civil and infrastructure engineering, computer engineering, computer science, electrical engineering, electronics and communications engineering, information technology, and systems engineering. Each program strongly emphasizes English composition and communication.

Students also have opportunities to develop interest areas in other fields within the Volgenau School that offer undergraduate courses but do not have undergraduate majors. The bachelor of individualized study (BIS) degree program may appeal to adult students who have completed a substantial portion of their studies at other institutions.

Bioengineering has been increasingly represented at the Volgenau School. New faculty members are working with other departments, schools, and institutes at Mason to provide a quality education to students interested in this rapidly growing field. The faculty at the Volgenau School hopes to work with numerous Washington-area organizations dedicated to health-oriented research or clinical service.

Administration
Lloyd Griffiths, Dean
Daniel A. Menasce, Associate Dean for Research and Graduate Studies
E. Bernard White, Associate Dean for Undergraduate Studies
Sharon Caraballo, Assistant Dean for Academic Affairs
Jennifer Lamb, Assistant Dean for Development
Terri Mancini, Director, Sponsored Research Administration
Melinda Barnhart, Executive Director, Finance and Administration
Jonathan Goldman, Director, Computing Resources

Bachelor of Science Programs
The Volgenau School offers eight programs in its academic units. Policies regarding admission and degree requirements are provided in the department sections that follow.

BS Degree | Department
---|---
Applied Computer Science | Computer Science
Civil and Infrastructure Engineering | Civil, Environmental, and Infrastructure Engineering
Computer Engineering | Electrical and Computer Engineering
Computer Science | Computer Science
Electrical Engineering | Electrical and Computer Engineering
Electronics and Communications Engineering | Electrical and Computer Engineering
Engineering Information Technology | Applied Information Technology
Systems Engineering | Systems Engineering and Operations Research

Undergraduate Mission, Goals
The undergraduate mission is to provide a quality education to support the needs of Virginia and the nation. The goal is to graduate students who are technically competent; prepared for ethical professional practice and a lifetime of learning; communicate effectively and work as members or leaders of technical teams; and understand the global nature and effect of information technology and engineering.

Degree Requirements
The following general requirements must be completed by all undergraduate students:

- At least 120 credits of academic work including at least 45 credits of upper-level courses (numbered 300 or above)
- At least 6 credits of English composition, 3 credits of literature, and 3 credits of oral communication (university general education electives)
- At least 3 credits of arts, 3 credits of Western civilization, 3 credits of social and behavioral science, and 3 credits of global understanding issues (university general education electives)
- At least 24 credits of social science and humanities course work, which is normally satisfied by the 24 credits of university general education courses described above
- All requirements listed in the following sections for specific Volgenau School majors, including university requirements for mathematics, natural science, information technology competency and ethics, and synthesis

Freshmen who are undecided about their specific majors may select Volgenau School undeclared as their major. Sample schedules that fulfill degree requirements for individual programs within the Volgenau School are available from the departments. With approval of department advisors, some courses may be taken out of the indicated sequences, particularly English, literature and social science courses.

Students should consult the baccalaureate degree requirements in the Academic Policies chapter in this catalog for detailed information concerning requirements for graduation, residence, and academic quality for graduation. That chapter also lists additional university requirements for minor programs and additional (double) majors. The requirements for the BIS degree can be found in the College of Humanities and Social Sciences chapter. Requirements for the civil and infrastructure engineering, computer engineering, computer science, electrical engineering, electronics and communications engineering, IT, and systems engineering undergraduate degree programs are provided in the academic departments’ sections of this chapter.

Academic Progression, Course Repeat
Students majoring in the Volgenau School programs are expected to have an acceptable plan of study formulated with assistance from the department advisor on file. They are expected to make reasonable progress toward their degree during each semester they are enrolled. Students may be required to obtain permission from the Volgenau School Student Services Office to repeat some courses required for the major in which they have previously received a grade of D or F. Individual Volgenau School programs may disallow students from retaking certain high-demand courses in which they have already earned a grade of C or better if they want to retake the course to improve their GPA.

Restricted Courses
Students are encouraged to take advantage of the many excellent courses available to broaden their educational experience or strengthen their background; however, some credits earned may not satisfy any degree requirements. Degree requirements for the Volgenau School undergraduate programs may not include credits earned in activity courses in any department. Examples are many of the courses listed under the catalog designations of art, dance, music, or theater; individual sports, physical education, or team sports; and recreational activities. Exceptions in these categories are courses that meet the university general education requirements for the major, including global understanding or Arts. Whenever there is uncertainty, students must consult with an academic advisor in their department. Generally, degree requirements for computer science and engineering majors may not be met by 100- to 400-level courses designated “IT” (and any associated cross-listed courses) in the Course Descriptions chapter of this catalog. The respective computer science or engineering student’s department might approve requests for some IT courses, such as IT 350, 362, 462, and 466, to satisfy degree requirements. For more information, contact the department or the Volgenau School Student Services Office at 703-993-1511.

Writing-Intensive Requirement
The university requires all undergraduate students to successfully complete a course, or combination of courses, designated “writing-intensive” in their majors at the 300 level or above. To determine the writing-intensive course requirements for specific degrees, refer to the major program descriptions in the following department sections.
BS/Accelerated MS Programs

Many of the BS degree programs offered within the Volgenau School may be packaged with some of the MS degree programs in ways that reduce the total number of credits required. Details may be found in the following department sections.

Master of Science Programs

Degree Requirements

The Volgenau School offers 12 master of science programs in its academic units. Policies regarding admission and degree requirements are provided in the department sections that follow.

Doctor of Philosophy Programs

The Volgenau School offers PhDs in computer science, electrical and computer engineering, IT, and statistical science. The PhD in computer science is described in the Computer Science section of this chapter, the PhD in electrical and computer engineering is described in the Electrical and Computer Engineering section, and the PhD in statistical science is described in the Statistics section of this chapter. The PhD in information technology is a program that builds on a fundamental core and emphasizes cross-disciplinary efforts among the 12 master’s programs in the Volgenau School, as well as with related units at Mason. Specific entrance and degree requirements for this doctoral program are found in the Interdisciplinary Programs section of this chapter.

Engineer Degree in Information Technology

The engineer degree is a post-master’s degree, but it does not confer a doctorate. Students pursuing the engineer degree can take advanced PhD courses and complete a project of an applied nature to fulfill program requirements. Students who are awarded an engineer degree will be able, at a later date, to work toward a PhD in information technology. Details about the engineer degree can be found in the Interdisciplinary Programs section of this chapter.

Applied Information Technology

Phone: 703-993-3565
Web: ait.gmu.edu

Faculty

Professors: Gantz (chair), Jajodia, Marchant
Associate professor: Snow (associate chair)
Assistant professors: Aksoy, Boicu, Bruno, Rytko
Instructors: D’Alessandro, Islam, Lyons, Quinn, Sanghara
Adjunct professors: Alper, Angelone, Curts, Eichers, Enochson, Farrel, Garrison, Haliyur, Hammond, Jainou, Kahrl, Khan, Long, Lord, Montana, Moody, Phung, Raymond, Reo, Ronk, Santucci, Schorling, Sun, West, Zabin

Information Technology, BS – BS-INFT

The BS in information technology prepares students to apply IT to support business processes. The degree produces graduates with strong problem-solving, writing, and communication skills who successfully compete for technical employment and are prepared for advanced study. The objective of the degree is to provide students with the following:

- Fundamental knowledge regarding concepts, tools, and methods of IT, including the opportunity to learn appropriate conceptual and computational tools essential for a successful career
- A broad background across fundamental areas of IT along with a depth of understanding in a particular area of interest
- Skills for effective written and oral communication with technical and nontechnical people in the IT field and the chosen area of interest, as well as skills and strategies for facilitating group projects and activities
- Working knowledge of leading-edge technologies and advanced systems through computer laboratory courses
- Industry-validated curriculum that maintains currency with business needs
- Preparation for graduate studies in information security, information systems, telecommunications, and related IT areas
- Appreciation for the global influence of IT on society and an understanding of the ethical and social responsibilities of IT professionals

The BS in information technology aims to meet the existing and emerging needs of the IT industry by educating new IT workers in current principles and practices in IT and its applications. Graduates are versed in the technical aspects of IT, but their role in the modern enterprise will focus on the use and management of IT resources rather than on the development of leading-edge intellectual property. Graduates fill jobs that focus on the application of IT in an increasing number of emerging subdisciplines, including network administration, information security, information systems, telecommunications, web development, and computer graphics.
Admission Requirements
Students who meet Mason’s general eligibility requirements may apply for admission to the IT major. Admission is based on the appropriateness of the student’s academic objectives and the likelihood of the student benefiting from the program. Preference in admission is given to students who have four years of high school mathematics, including precalculus.

The program can be successfully completed in eight full-time years of high school mathematics, including precalculus. The 120-credit degree requirement consists of Mason general education requirements, IT foundation and core courses, and courses required for the chosen IT concentration. At least 30 credits toward the BS degree must be earned at Mason, and at least 45 credits must be at the 300 level or above. The Applied Information Technology Department is based at the Prince William Campus.

Degree Requirements
In addition to Mason general education requirements, including humanities and social sciences and mathematics and basic sciences, the BS in information technology requires IT foundation, core, and concentration courses as described below. The IT major also requires a 7-credit capstone design project to be completed over two consecutive semesters.

Total ..................................................................................... 13

Writing-Intensive Requirement
The university writing-intensive requirement is satisfied by IT 343.

Grades
Students must have a C or better in any course that satisfies a prerequisite for an IT course. To graduate with the BS in information technology, students must have a GPA of 2.50 or better across the IT foundation, core, capstone, and concentration courses.

BS in Information Technology/Accelerated MS in Information Security and Assurance
See the description listed under the Computer Science Department.

BS in Information Technology/Accelerated MS in Information Systems
See the description listed under the Computer Science Department.

BS in Information Technology/Accelerated MS in Software Engineering
See the description listed under the Computer Science Department.

BS in Information Technology/Accelerated MS in Telecommunications
See the description listed in the Interdisciplinary Programs section of the Volgenau School chapter.

Certificate in Information Technology
This certificate is designed primarily for those students who have earned a nontechnical bachelor’s degree. It allows students with nontechnical backgrounds to augment the knowledge gained through their major-related courses with additional computer and IT knowledge, and skills to improve their attractiveness to employers in the high-technology community. This certificate requires a minimum of 24 credits, including 15 credits of core courses. Beyond these requirements, the student is free to define a technical focus area. The focus area must be composed of at least three courses (9 credits). Elective courses selected for the technical focus area must be approved by an IT advisor.

Credits
Core Courses ........................................................................ 15
IT 101 Introduction to Information Technology ....................... 3
IT 103 Introduction to Computing ............................................ 3
IT 108 Programming Fundamentals ....................................... 3
Select two of the following:
IT 212 Computer Hardware Fundamentals ........................... 3
IT 213 Multimedia and Computer Graphics ........................... 3
IT 214 Database Fundamentals ............................................. 3
IT 250 Introductory Statistics I .............................................. 3
Technical Focus Area ......................................................... 9

Minor in Information Technology
The minor is designed primarily for those non-Volgenau School majors who desire to augment the knowledge gained through their major-related courses with additional computer and IT knowledge. It also gives students the necessary skills to improve their attractiveness to employers in the high-technology community. The minor requires a minimum of 15 credits, including 9 credits of core courses. Beyond these requirements, the student is free to define a technical focus area, for example, information security. Focus areas are composed of at least two courses (6 credits). Students pursuing the IT minor should obtain a list of approved electives from the Applied Information Technology Department.

Credits
Core Courses ................................................................. 9
IT 101 Introduction to Information Technology ....................... 3
IT 103 Introduction to Computing ............................................ 3
IT 108 Programming Fundamentals ....................................... 3
Technical Focus Area ......................................................... 6

Applied Information Technology, MS (pending SCHEV approval)
We propose to provide the very best graduate education in IT for high-potential leaders, especially those working with IT solutions that affect the federal government. Our objective...
is to graduate men and women of competence and character who can lead multidisciplinary teams in the design, justification, development, and the management of megasystems from data to decision in the private and federal sectors. Faculty includes professors from the Volgenau School, the School of Management, and the College of Humanities and Social Sciences, plus industry leaders with unique reputations in the subject as adjunct professors and guest lecturers. The faculty exposes students to the pragmatic issues of IT, not just the theory.

Admission Requirements

Applicants must have completed a baccalaureate degree from an accredited program with a reputation for high academic standards and have earned a GPA of 3.00 or better over their 60 highest-level credits. They must be experienced in the fundamentals of IT, quantitative methods, and finance. In addition, applicants must

• provide three letters of recommendation, preferably from academic references or references in industry or government who are familiar with the applicant’s professional accomplishments.
• provide a detailed statement of career goals and professional aspirations.
• be able to show satisfactory performance on the GRE if they have not earned a bachelor’s degree from a U.S. university.
• have a minimum TOEFL score of 575 for the paper-based exam or 230 for the computer-based exam (a minimum score of 600 for the paper-based exam or 250 for the computer-based exam is required for applicants who wish to be considered for a graduate teaching assistantship) if their native language is not English.

Degree Requirements

This 30-credit program consists of a set of IT core courses, plus electives chosen from complementary subject areas. Students take four core courses (12 credits), plus electives in IT (9 credits), analysis and management (3 credits), leadership and ethics (3 credits), and a final capstone seminar course (3 credits).

Choose one 3-credit course from the following analysis and management courses:

- IT 665 Managing Information Technology
- Programs in the Federal Sector
- OR 540 Management Science
- SWE 625 Software Project Management

Choose one 3-credit course from the following leadership and ethics courses:

- PHIL 641 Ethics and the Professions
- PHIL 644 Business and Organizational Ethics
- TECM 700 Leading Information Technology Organizations through Change

Capstone Course

IT 685 Capstone Seminar

Civil, Environmental, and Infrastructure Engineering

Phone: 703-993-1675
Web: civil.gmu.edu

Faculty

**Professors:** Arciszewski, Bronzini (chair), Houck
**Associate professors:** deMonsabert, Flannery, Venigalla
**Assistant professors:** Casey, Urgessa
**Research professor:** Hero
**Adjunct professors:** Ali, Binning, Chase, Chipley, Choudhury, Donahue, Doyle, Furey, Gagne, Goode, Hartmann, Harrop-Williams, Kirby, Liner, Matusik, Miller, Rodriguez, Ward, Zobel

The Civil, Environmental, and Infrastructure Engineering (CEIE) Department offers a BS and an MS in civil and infrastructure engineering. These degree programs complement the study of civil and environmental engineering with advances in information technology (IT), and they focus on the physical and organizational infrastructure essential to the functioning of an urban society. The bachelor’s program in civil and infrastructure engineering is accredited by the Engineering Accreditation Commission of the Accreditation Board for Engineering and Technology, 111 Market Place, Suite 1050, Baltimore, Maryland 21202-4012; 410-347-7700. Students interested in pursuing doctoral education in civil and infrastructure engineering are encouraged to read the sections on the interdisciplinary PhD in information technology and PhD study in civil and infrastructure engineering.

Civil and infrastructure engineering is the study of land, transportation, water, environmental, structural, energy, and telecommunications systems from a civil engineering perspective and within a complex technological, social, political, economic, and environmental context. The focus is on how these systems are successfully conceived, developed, designed, built, operated, maintained, and renewed in the built environment such as the Washington, D.C., metropolitan area.

An urban society thrives and prospers when adequate, appropriate, reliable, robust, secure, and cost-effective infrastructure systems are provided. The investment in existing infrastructure and other urban systems in the United States is enormous. The investment required to maintain, operate, renew, and manage the evolution of these infrastructure systems in the future is even greater. The need for highly
educated professionals to confront and solve these continuing vital problems is pressing. Examples of infrastructure systems include water supply and distribution; streets, roads, and highways; wastewater management; transit; storm water management; public utilities; energy supply and distribution; telecommunications; buildings, facilities, and structures; and solid waste management.

**Course Work**
The department offers all courses designated CEIE and some of the ENGR and IT courses in the Course Descriptions chapter of this catalog.

**Undergraduate Program**

**Civil and Infrastructure Engineering, BS-CEIE**
The bachelor's degree program provides a solid foundation in the theory of civil and infrastructure engineering. Students benefit from exposure to practical civil, environmental, and infrastructure engineering problems and their solutions in the classroom, lab, and field. Students also have the opportunity to work as engineering interns each summer. The goal of the department is to graduate students who are prepared to

- Solve problems in the civil engineering domain, such as integrating the traditional civil engineering disciplines of transportation, environment, structures, construction, and water; incorporating social, political, and economic considerations; and including a conscious life-cycle costing philosophy.
- Develop and apply IT to civil engineering problems.
- Communicate effectively in written, oral, and visual ways.
- Pursue a lifelong process of learning.
- Enter the civil engineering profession as productive engineers.

Civil engineering students can look forward to a career in local, state, and federal government organizations and architectural and engineering firms that specialize in land development, transportation, water resources, environment, structures, construction, and other related fields. The program also prepares students for continuing graduate studies.

**Degree Requirements**
Degree requirements include 120 credits distributed in courses in three main areas: mathematics and basic science, humanities and social sciences, and civil engineering analysis and design.

The prerequisite structure for these courses is extensive. The sample schedule below provides a listing of major and general education course requirements, as well as a guide to the progression of the courses to satisfy all prerequisites.

Students are required to see their faculty advisor at least once each semester to plan for the next semester’s registration. Each student is expected to complete an approved plan of study, which constitutes a learning plan for the degree program.

A variety of classes will count for credit as CEIE technical electives. All electives must be selected with the advice and approval of the academic advisor. Paid internships during the summer (CEIE 197, 198, and 199; 297, 298, and 299; and 397, 398, and 399) may also be used as technical electives.

**Writing-Intensive Requirement**
The university’s writing-intensive requirement for civil and infrastructure engineering majors is satisfied by the successful completion of CEIE 360.

**Sample Schedule and Degree Requirements**

**First Semester**

- CHEM 251 General Chemistry for Engineers ...............4
- ENGL 101 Composition ............................................3
- ENGR 107 Introduction to Engineering ......................2
- ENGR 183 Engineering Computer Graphics ..................3

Total ................................................................................ 15

* Of the 12 technical elective credits, 3 credits of a CEIE transportation elective and 3 credits of a CEIE environmental elective are required.

BS/Accelerated MS in Civil and Infrastructure Engineering

This option provides a way for Mason students to earn an MS in civil and infrastructure engineering in less time than if they graduated from the BS program and then applied to the MS program. This program can be completed in 144 credits.

Admission Requirements

Mason students in the BS in Civil and Infrastructure Engineering Program may apply for the BS/accelerated MS if they have earned 90 undergraduate credits with an overall GPA of at least 3.30 or their GPA in ENGR and CEIE courses is at least 3.30. Students who have not yet finished 90 credits may be accepted provisionally subject to satisfactory completion of 90 credits. All other criteria for admission are identical to criteria for admission into the MS program.

Degree Requirements

Students must complete 144 credits that satisfy requirements for both the BS and MS programs. Students register for 6 credits of CEIE 500-level courses in place of undergraduate technical elective courses. The CEIE 500-level courses selected for this purpose must be approved by the academic advisor. Students complete all MS requirements and may apply the two CEIE 500-level courses included in the BS program toward satisfaction of these requirements.

Conferral of Degrees

Students must apply to have the BS degree conferred the semester before they expect to complete the BS requirements. The master’s degree is granted on completion of MS requirements.

GRADUATE PROGRAMS

Civil and Infrastructure MS-CEIE Engineering, MS

The MS program educates students in the theory and practice of civil, environmental, and infrastructure engineering. IT and automated tools for analyzing and solving urban systems problems are important components of the program. The civil and infrastructure engineer can look forward to pursuing a career in the private or public sector or continuing graduate study toward the PhD.

Admission Requirements

To be considered for admission to the program, a candidate must:

• Satisfy general university requirements for admission to a graduate program.
• Have earned a baccalaureate degree in engineering, physical sciences, economics, or other civil and infrastructure engineering-related field.

• Provide three letters of reference, submitted by former professors or supervisors.

Acceptance to the degree program is based on an assessment of the applicant’s capacity to pursue these graduate studies successfully. Consideration is given to the undergraduate record, any previous graduate work, professional work experience, reference letters, and any recent GRE scores, which are required for international students. Well-qualified students with minor admission deficiencies may be admitted subject to completing an articulation program. Courses taken in the articulation program extend the minimum requirements for the degree.

Degree Requirements

The program includes three core courses, electives selected by the student with the aid of a faculty advisor, a thesis or civil infrastructure engineering project, and a seminar requirement. Students must complete a faculty-approved plan of study with a minimum of 30 credits of graduate work, including the thesis (6 credits) or the research project (3 credits).

Core Courses

Students must complete the following three core courses. These courses provide a common background for understanding the breadth and complexity of civil and infrastructure engineering, and introducing the application of IT and the systems approach to analyzing and solving problems in civil and infrastructure engineering.

CEIE 601 Infrastructure Modeling
CEIE 605 Infrastructure Systems Analysis
CEIE 685 Civil Engineering Information Management

Emphases

Students must select an additional five or six electives that together constitute an emphasis area. With prior approval of a faculty advisor, students may design their own emphasis or select from one of several standard emphases, including the following:

• Water and environmental systems
• IT in civil engineering
• Infrastructure management
• Civil infrastructure and security engineering
• Real estate development
• Transportation engineering

Project or Thesis

Students must complete a project (3 credits) or thesis (6 credits) under the direction of a CEIE faculty member. Under the project option, students complete 3 credits of CEIE 798, during which they prepare and present a scholarly paper. The scholarly paper is a technical report on an independent study, laboratory or computer experimentation, or literature search on a current civil and infrastructure engineering topic selected under the guidance of a faculty advisor. Students must demonstrate knowledge of the topic and make a satisfactory technical presentation of the paper in the CEIE graduate seminar (CEIE 795).

Under the thesis option, students complete 6 credits of CEIE 799. The master’s thesis should reflect a significant independent research effort. The work is conducted under the guidance of a faculty thesis advisor, and the final written thesis and oral defense are approved by a three-member faculty committee. In addition, students must make a satisfactory presentation of
the thesis in the CEIE graduate seminar. The thesis is particularly recommended for those students who wish to develop and document their research skills, or contemplate subsequent enrollment in a PhD program.

Seminar Requirement
All degree candidates must attend a minimum of 10 graduate seminars approved by the CEIE Department for the degree program.

■ Graduate Certificate in CERG-CISE
Civil Infrastructure and Security Engineering
This program is appropriate for civil infrastructure (such as transportation, water and wastewater, and utilities) operators and operators, designers, planners, maintenance staff, and other technical workers in the public and private sectors who are responsible for improving facility and equipment performance, reliability, security, efficiency, and management practices.

New approaches to civil infrastructure problems are emerging that use traditional civil engineering domain knowledge in the context of IT with a systems approach to analyze the complexity of and interaction among various infrastructure components and their performance. Currently, the most important challenge to infrastructure engineering is to improve the quality of stewardship, which falls far short of public expectations, and improve immediately the security of critical civil infrastructure. The certificate is intended to respond uniquely to the need for broad training in the holistic and systems approach to the long-term management of infrastructure, with specific attention to risk and vulnerability assessments, and creative solutions to providing improved system security. The certificate program is flexible and can be tailored to the needs of students within the infrastructure engineering community, but it is also intended to be responsive to the needs of infrastructure owners, operators, and other technical staff.

Admission Requirements
Candidates should have a bachelor’s degree in engineering, architecture, mathematics, science, or other related technical field, and must be computer literate. Candidates should inquire with the certificate coordinator for details of program planning. Courses are offered in late afternoon and evening and are particularly suitable for part-time students.

Certificate Requirements
The certificate program consists of 15 credits (five courses) selected from certificate program courses and elective courses. The certificate courses are aimed at building the foundations of asset management methods based on a holistic and systems approach. The certificate program courses consist of the following:

One core course Credits
CEIE 680 Introduction to Infrastructure and Security Engineering............................................... 3

Minimum of two of the following specific sector courses:
CEIE 681 Security of Structural Systems ...................... 3
CEIE 683 Water and Wastewater Systems Security .............. 3
CEIE 686 Transportation System Security and Safety ........ 3

Remaining elective credits selected from the following:
CEIE 510 Geographical Information Systems in Engineering
CEIE 511 Design and Inventive Engineering
CEIE 670 Civil Engineering Decision Methods and Tools
CEIE 671 Best Engineering Management Practices
CEIE 685 Civil Engineering Information Management
CEIE 690 Special Topics (depends on the topic; requires coordinator approval)
PUAD 640 Public Policy Process
PUAD 661 Public Budgeting Systems
PUBP 729 Transportation Asset Management
PUBP 752 Infrastructure Finance

Selection of courses is subject to approval of the certificate coordinator to ensure cohesiveness and compatibility. Some courses may have prerequisites for which the student must qualify or seek a waiver from the appropriate instructor. A cumulative GPA of 3.00 is required, and no more than one course with a grade of C may be applied toward the certificate.

■ Graduate Certificate in CERG-DDI
Discovery, Design, and Innovation
This program responds to the growing need for professional knowledge in innovation. It provides students with a balanced understanding of the entire process from the discovery of knowledge, its use in inventive problem solving and the development of inventions, and familiarity with the use of various inventive design methods and tools. The program is available to students who hold a master’s degree in engineering and scientific disciplines or are currently in such graduate programs. Students may pursue the certificate concurrently with any of the graduate programs in the Volgenau School; however, the certificate is not awarded until all requirements have been completed.

Certificate candidates must complete at least 15 credits with an average grade of B or higher. To obtain the certificate, students must take SYST 520 and IT 894 and IT/OR/SYST 944. Students also must take two of the following: CEIE 601 or 670; SYST 512 (recommended courses if continuing for MS in civil and infrastructure engineering) or 573; STAT 664/ SYST664; SYST 781/STAT 781; STAT 652, 700, and 701; or 671/SYST 671; or IT 819.

For the Graduate Certificate in Foundations in Real Estate Development (CERG-FRED), please see Catalog Addendum.

For the Graduate Certificate in Sustainability and the Environment (CERG-SENV), please see Catalog Addendum.

PhD Study in Civil and Infrastructure Engineering
Doctoral studies in civil and infrastructure engineering may be pursued in two ways.

Doctoral study in civil and infrastructure engineering is available through the PhD in Information Technology Program, which offers advanced courses in this discipline. Pending approval of the State Council of Higher Education of Virginia (SCHEV), the CEIE Department will be offering a PhD in Civil and Infrastructure Engineering Program beginning fall 2008.

■ Information Technology, PhD PHD-INFT
▲ Concentration in Civil and Infrastructure Engineering (CEIE)
Students who pursue a concentration in this doctoral program will have the concentration noted on their transcript. The degree conferred on a graduating student is a PhD in information technology with a concentration in civil and infrastructure
engineering. Students may also pursue such doctoral studies without designating a concentration.

**Requirements**

Students seeking this concentration must satisfy all the requirements for the PhD in information technology degree. In addition, the following requirements must be met:

**Plan of Study**

All decisions concerning the student’s course requirements and plan of study must be approved by the advisor or director, with the consent of the CEIE Department chair.

**Doctoral Supervisory Committee**

The dissertation director must be a CEIE Department faculty member. The composition of the doctoral supervisory committee is to be approved by the CEIE Department chair and the Volgenau School associate dean for research and graduate studies. Permission for the comprehensive exam and the dissertation defense is requested from the Volgenau School associate dean on the basis of a written request and plan approved by the supervisory committee and the CEIE Department chair.

<table>
<thead>
<tr>
<th>Civil and Infrastructure Engineering, PhD (pending SCHEV approval)</th>
</tr>
</thead>
</table>

The doctoral program offered by the CEIE Department is unique in Virginia, incorporating the varied areas of civil engineering with a focus on infrastructure operation and management. The program is structured to prepare students for advanced leadership positions in research and development in the public or private sector, academics, and government. Students may elect to study in the areas of IT and computing in civil engineering, environmental engineering, water and wastewater engineering, construction engineering and management, infrastructure security and engineering, structural engineering, or transportation engineering. Requirements include course work, qualifying exams, a teaching requirement, dissertation proposal defense, and dissertation research and defense.

**Admission Requirements**

All general Mason and specific Volgenau School admission requirements apply. In addition, all applicants, including Mason undergraduates, must submit the following:

- Official transcript of undergraduate and graduate course work
- For applicants whose native language is not English, official TOEFL results showing a minimum score of 575 for the paper-based exam or 230 for the computer-based exam. A minimum score of 600 for the paper-based exam or 250 for the computer-based exam is required for students who wish to be considered for a graduate teaching assistantship.
- Three letters of recommendation, with at least two from individuals with doctorates
- Recent résumé
- Substantial statement of interest that includes a description of specific area of proposed dissertation research, contacts they have made with potential faculty advisors, and an explanation of career and research goals
- Official results of the GRE general test are recommended for students with BS or MS degrees obtained outside the United States

Applicants will be encouraged to schedule an interview with the graduate coordinator or faculty member in their proposed area of research. Admission decisions will be based on the student’s qualifications and the availability of a faculty advisor. The application material will be reviewed by the department doctoral committee and decisions made with input from appropriate faculty members.

The application material will be reviewed by the graduate admissions officer for the department and decisions made with input from appropriate faculty members and/or the department chair.

**Dissertation Committee**

A dissertation committee is recommended to be formed within the first semester following successful completion of the qualifying exams. The dissertation committee is to consist of the CEIE Department dissertation director, two or more CEIE Department faculty members, and at least one committee member from outside the department. At least three members of the committee are to be members of the Mason graduate faculty. The composition of the dissertation committee must be approved by the CEIE Department chair.

**Degree Requirements**

With the completion of a BS degree, 72 additional credits are required to complete a PhD in civil and infrastructure engineering. Of these 72 credits, 24 are required for dissertation research. Students may apply up to 24 credits from their MS degree toward their required 72 credits beyond the BS subject to the approval of the dissertation committee and the CEIE Department chair. Students with degrees earned outside the United States may use some course credit toward the required 72 credits but not more than 24 credits.

Of the 72 credits beyond the BS, 48 credits of course work are required. Of these 48 hours, a maximum of 18 credits (normally part of the MS or equivalent program) may be at the 500 level, and a minimum of 9 credits at the 700 level or higher must be completed. For courses taken elsewhere, the PhD director must determine equivalent levels and obtain approval from the CEIE Department chair to apply these courses to the required 48 credits of course work. Individualized reading courses at any level cannot exceed 6 credits. A minimum GPA of 3.50 is required and no C grades are allowed for the 24 credits earned beyond the MS.

Students are also required to take a minimum of 3 credits of statistics at the 500 level or above outside the CEIE Department. Substitution of quantitative or scientific course work in some other discipline that is more relevant to the intended doctoral research may be approved by the dissertation committee and the department chair.

Research work in the PhD program is to be completed in courses CEIE 998 and CEIE 999. A minimum of 12 credits of CEIE 998 (Doctoral Dissertation Proposal Preparation) and 12 credits of CEIE 999 (Doctoral Dissertation) are to be completed. Students cannot enroll in CEIE 999 before the research proposal is presented and approved by the dissertation committee.
Qualifying Exam

Qualifying exams will be offered twice a year prior to the start of the fall and spring semesters. The qualifying exam is intended to test the student’s familiarity with concepts presented at the MS level or post-BS level and serve as guidance for the dissertation director to help shape the student’s course work needs at the PhD level.

Students entering with an MS degree must take the qualifying exam on completion of 18 credits of study. Students entering without an MS degree must take the qualifying exam on completion of 24 credits. The qualifying exam consists of a written exam taken in an eight-hour period and an oral interview attended by an examining committee of at least five members of the CEIE faculty. The qualifying exam may be repeated once. A student failing the qualifying exam twice will be removed from the program.

The qualifying exam includes information from the following focus areas:

Area A: Water and Environmental Engineering
Area B: Information Technology and Computing in Civil Engineering
Area C: Construction Engineering and Management
Area D: Land Development Engineering
Area E: Transportation Engineering
Area F: Infrastructure and Security Engineering
Area G: Structural Engineering

Prior to the exam, students are required to select two focus areas for examination. Candidates for the PhD in information technology and engineer degree in information technology who wish to transfer to the PHD-CEIE program who have successfully completed two qualifying exams based on CEIE courses are not required to take the CEIE qualifying exam.

Dissertation Committee

A dissertation committee is recommended to be formed within the first semester following successful completion of the qualifying exams. The dissertation committee is to consist of the CEIE Department dissertation director, two or more CEIE Department faculty members, and at least one committee member from outside the department. At least three members of the committee are to be members of the Mason graduate faculty. The composition of the dissertation committee must be approved by the CEIE Department chair.

Research Competency Exam, Dissertation Proposal Defense

Students may not schedule their dissertation proposal defense (research competency exam) before successful completion of the qualifying exam. On completing all course work and successfully passing the qualifying exam, students are to present their written dissertation proposal to their dissertation committee. The dissertation proposal defense includes a written proposal and presentation of the intended direction of the dissertation research. The dissertation proposal defense is not to include completed research because the dissertation committee is to use the dissertation proposal defense to provide input and guidance to the student prior to beginning dissertation research. The dissertation proposal defense is also an opportunity for dissertation committee members to examine the student’s knowledge in higher-level course work and familiarity with existing and emerging research related to the student’s research area. The exam is administered by the student’s dissertation committee and must be attended by all dissertation committee members and the department chair.

In preparation for the dissertation proposal defense, the student shall prepare a written dissertation proposal outlining the intended direction of the research and the review of existing research previously published on the topic. The dissertation proposal shall be submitted to the dissertation committee for review at least two weeks prior to the dissertation proposal defense date. The dissertation proposal is then presented by the student as part of the research competency exam. If a student fails the competency exam, the student may request to take the exam again through a formal written request to the doctoral dissertation director within 60 days of receiving notice of the exam result. If the student fails the competency exam and does not request to take the exam again within 60 days of the original date, the student will be dismissed from the PhD program. After successful completion of this requirement, the student is formally admitted as a PhD candidate.

Teaching Requirement

Because one of the characteristics of a good researcher and scholar is the ability to express ideas and concepts to a broader audience in a clear manner, each doctoral candidate will be required to organize and deliver a series of lectures and recitations in the CEIE Department to undergraduate students. Working with his or her doctoral dissertation advisor, the candidate will gain experience in the classroom that will benefit the student should he or she decide to pursue an academic or an advanced research career.

Dissertation Research and Defense

On successful completion of the dissertation proposal, students are to conduct research under the guidance of their dissertation director and dissertation committee members. Students are not to schedule their dissertation defense sooner than two semesters after a successful proposal defense. During the dissertation research period, students must present their research at least once in the form of a department seminar. The dissertation must represent achievement in research, must be a significant contribution to the field of civil engineering, and should be deemed publishable in refereed journals. When the majority of the research has been completed, the candidate is to submit a written draft dissertation to the doctoral dissertation committee and schedule an oral predefense with the doctoral dissertation committee. The predefense is to be attended by the doctoral dissertation committee and the department chair.

A final public oral defense may be scheduled no sooner than one month after the conclusion of the predefense, which will allow for a minimum of two weeks to advertise the defense. The final defense is to be attended by the doctoral dissertation committee and the department chair. On successful completion of the oral defense, students must submit a final publishable dissertation that meets the guidelines specified by the Guide for Preparing Graduate Theses, Dissertations, and Projects. If the student fails to defend the dissertation successfully, the student may request a second defense following the same procedures as the initial defense. This request has no time limit, other than the general time limits for the doctoral degree as per Mason policy. An additional predefense is not required; however, the student is strongly advised to consult with the committee before scheduling the second defense. If the student fails on the second attempt to defend the dissertation, the student will be dismissed from the PhD program. If the student does not request to take the exam again within 60 days of the original date, the student will be dismissed from the PhD program. After successful completion of this requirement, the student is formally admitted as a PhD candidate.
program. Following a successful public defense and completion of the final form of the dissertation, the dissertation committee recommends the candidate for the degree of doctor of philosophy.

Center for Real Estate Entrepreneurship
The CEIE Department is the administrative home for the university-wide Center for Real Estate Entrepreneurship, which draws on the resources and expertise of the Volgenau School, the School of Public Policy, and the School of Management. The center is designing undergraduate and graduate programs that encompass the entire real estate development continuum from land use and environmental considerations to acquisition dynamics and construction management. For further details, see the center’s web site at realestate.gmu.edu.

Computer Science

Phone: 703-993-1530

Faculty
Professors: Barbara, J. Chen, DeJong, Gomaa (chair), Hamburger (emeritus), Kerschberg, Menasce, Motro, Offutt, Pullen, Rine (emeritus), Sibley, Sood, Tecuci, Wechsler
Associate professors: Ammann, Aydin, Baum (emeritus), Brodsky, Carver, Duric, Kosecka, Luke, Richards, Setia, Simon, P. Wang, White, Wijesekera
Assistant professors: S. Chen, Domeniconi, Jiang, Li, Lien, Lin, Malek, Sousa, Stavrou, X. Wang, Zhong
Instructors: Fleck, Heishman, T. Maddox, Nordstrom
Adjunct professors: Ahmed, Armour, Baldo, Claussen, Doughty, Duan, El-Ansary, Ellis, Foxwell, Geldon, Gravatt, Howard, Hwang, M. Maddox, Martin, Mastiyoowski, Nidiffer, Pettit, Redding, Ritchey, Sainju, Sharif, Smeltzer, Smith, Tompkins, Wu

Introduction
Computer science is at the center of the information revolution in the 21st century. Advanced computation tools and techniques are revolutionizing and transforming the way we work, play, communicate, collaborate, and conduct business. In addition, computation is creating new scientific and engineering fields, such as robotics, computational sciences, bioinformatics, astrophysics, and health informatics, to name a few. Computer science is a discipline concerned with the analysis, design, implementation, maintenance, and evolution of computer-based systems used in almost all walks of life.

Computer scientists must be well-grounded not only in the theory of computing, but also in its application to diverse application areas, for example, web-based applications such as e-mail, wireless networking, online group gaming, social networks, and e-commerce. Computer scientists must be capable of working closely with members of other professions associated with computing. Students who pursue this discipline will learn (1) theories of computation, analysis of algorithms, operating systems, and artificial intelligence; (2) communication and coordination via advanced computer networks; (3) storage, retrieval, and management of large databases; and (4) analysis, design, and implementation of reliable software systems.

Course Work
The Department of Computer Science (CS) offers courses designated CS, EC, INFS, ISA, and SWE, as well as some IT courses, in the Course Descriptions chapter of this catalog. The department offers undergraduate programs in computer science and applied computer science. A double major is offered in computer science and computer engineering. Students may also elect a minor in computer science or software engineering. Several accelerated BS Computer Science/MS Programs are offered. Graduate programs offered are an MS in computer science, an MS in information security and assurance, an MS in information systems, an MS in software engineering, an MS in e-commerce, a PhD in computer science, and several graduate certificate programs. The department also participates in the PhD in Information Technology Program with the following concentrations: PhD study in information security and assurance, PhD study in information systems, and PhD study in software engineering. See the descriptions below.

UNDERGRADUATE PROGRAMS

■ Applied Computer Science, BS

This program presents an innovative approach to the integration of computer science with disciplines where knowledge of computation provides the required expertise for an emerging subdiscipline.

Degree Requirements
For the BS-ACS degree, students must complete 120 credits, including the university general education requirements, consisting of humanities, social sciences, synthesis, and basic science requirements (if needed), the program requires foundation, core, and concentration courses as described below. These course requirements provide expertise in programming, computer systems, software engineering, formal methods, and analysis of algorithms.

ACS foundation courses (22 credits):
- CS 101, 105, 112, 211; MATH 113, 114, 125, 203

ACS core (22 credits):
- ECE 301; CS 262, 310, 330, 367, 421, 465, 483

ACS elective (3 credits):
- One CS course numbered above 400

Concentration (36 credits):
- At least 36 additional credits to meet course requirements of one of the concentrations

▲ Concentration in Biology (BIOL)
- Foundation (24 credits): BIOL 213, 303, 304, 305/6; CHEM 211, 212
- Core: BIOL 311, 312, 385, 482, 580
- One BIOL course numbered above 300

▲ Concentration in Computer Game Design (CGDS)
- Foundation (13 credits): CS 225, 325; AVT 104, STAT 344
- Core: CS 425, 426, 451; AVT 382, 383
Two approved electives related to game design
(Natural science requirement will include PHYS 160/161 and 260/261.)

▲ Concentration in Geography (GEOG)
- Foundation (18 credits): GEOG 101, 102, 103, 110, 300; STAT 244
- Core: GEOG 310, 311, 411, 412, 416, 463
- One GEOG course numbered above 300

Students should consult the sample schedules below and ensure that course prerequisites are satisfied. Students should obtain computer-generated audits periodically to ensure that degree requirements are being met.

Sample Schedules

### Biology Concentration

#### First Semester
- BIOL 213 Cell Structure and Function ........................................... 4
- CS 101 Preview of Computer Science ............................................ 2
- CS 112 Introduction to Computer Programming ............................ 4
- ENGL 101 Composition .................................................................. 3
- MATH 113 Analytic Geometry and Calculus I ................................. 4

#### Second Semester
- BIOL 303 Animal Biology .......................................................... 4
- COMM 100 Oral Communications ................................................... 3
- CS 105 Computer Ethics and Society ............................................. 1
- CS 211 Object-Oriented Programming ......................................... 3
- MATH 114 Analytic Geometry and Calculus II ............................... 4

#### Third Semester
- CHEM 211 General Chemistry I .................................................. 4
- CS 262 Low-level Programming ................................................... 1
- CS 310 Data Structures ................................................................ 3
- ECE 303 Digital Electronics ....................................................... 3
- MATH 125 Discrete Mathematics .................................................. 3

#### Fourth Semester
- BIOL 304 Plant Biology .............................................................. 4
- CHEM 212 General Chemistry II .................................................. 4
- CS 367 Computer Systems and Programming................................. 3
- Western civilization course .......................................................... 3

#### Fifth Semester
- BIOL 305/6 Biology of Microorganisms ....................................... 4
- CS 330 Formal Methods and Models ............................................. 3
- CS 465 Computer Systems Architecture ........................................ 3
- MATH 203 Matrix Algebra .......................................................... 3
- Literature course ......................................................................... 3

#### Sixth Semester
- BIOL 311 Genetics ................................................................. 4
- BIOL 482 Introduction to Molecular Biology ................................. 3
- CS 421 Introduction to Software Engineering ................................. 3
- ENGL 302 Advanced Composition ............................................. 3
- Arts course ............................................................................... 3

#### Seventh Semester
- BIOL 385 Biotechnology and Genetic Engineering ....................... 3
- BIOL 312 Biostatistics (or STAT 344) ........................................... 3
- CS 483 Analysis of Algorithms .................................................... 3
- Global understanding course ..................................................... 3
- Social science course ............................................................... 3

#### Eighth Semester
- BIOL 580 Computer Applications in the Life Sciences .................. 3
- BIOL Senior .............................................................................. 3
- CS Senior ............................................................................... 3
- Synthesis course ..................................................................... 3
- Elective ................................................................................... 3

### Computer Game Design Concentration

#### First Semester
- CS 101 Preview of Computer Science ......................................... 2
- CS 112 Introduction to Programming .......................................... 4
- ENGL 101 Composition ............................................................... 3
- MATH 113 Analytic Geometry and Calculus I ............................... 4
- PHYS 160/161 University Physics I ............................................. 4

#### Second Semester
- COMM 100 Oral Communications ............................................. 3
- CS 105 Computer Ethics and Society ......................................... 1
- CS 211 Object-Oriented Programming ...................................... 3
- MATH 114 Analytic Geometry and Calculus II ............................. 4
- PHYS 260/261 University Physics I ............................................. 4

#### Third Semester
- CS 225 Culture of Games ........................................................ 3
- CS 262 Low-Level Programming ............................................. 1
- CS 310 Data Structures ............................................................. 3
- ECE 301 Digital Electronics ....................................................... 3
- MATH 125 Discrete Mathematics ................................................ 3
- Western civilization course ....................................................... 3

#### Fourth Semester
- AVT 104 Introduction to Digital Arts ........................................... 4
- CS 325 Introduction to Computer Game Design ......................... 3
- CS 367 Computer Systems and Programming............................... 3
- MATH 203 Matrix Algebra ........................................................ 3

#### Fifth Semester
- AVT 382 Digital Art and Animation ............................................ 4
- CS 330 Formal Methods and Models ......................................... 3
- CS 465 Computer Systems Architecture .................................... 3
- Natural science course ............................................................ 4

#### Sixth Semester
- AVT 383 Three-Dimensional Digital Art .................................... 4
- CS 421 Introduction to Software Engineering .............................. 3
- CS 451 Computer Graphics ....................................................... 3
- STAT 344 Probability and Statistics for Engineers ...................... 3
- Literature course ................................................................. 3

#### Seventh Semester
- CS 425 Game Programming I ................................................... 3
- CS 483 Analysis of Algorithms .................................................. 3
- ENGL 302 Advanced Composition ............................................ 3
- Game design elective ............................................................... 3
- Elective ................................................................................... 3

#### Eighth Semester
- CS 426 Game Programming II .................................................. 3
- CS Senior ............................................................................... 3
- Synthesis course ..................................................................... 3
- Game design elective ............................................................... 3
- Elective ................................................................................... 2

### Geography Concentration

#### First Semester
- CS 101 Preview of Computer Science ......................................... 2
- CS 112 Introduction to Programming .......................................... 4
- ENGL 101 Composition ............................................................... 3
- GEOG 102 Physical Geography ................................................ 3
- MATH 113 Analytic Geometry and Calculus I ............................. 4

#### Second Semester
- COMM 100 Oral Communications ............................................. 3
The objectives of the BS in Computer Science Program relate to the abilities of the graduates several years after graduation. The objectives include:

- **Foundation for successful careers in industry**: Graduates of the program will have a broad understanding of the fundamental concepts, methodologies, tools, and applications of computer science. They will have the educational foundation that leads to successful careers in the computing industry.
- **Foundation for graduate study**: Graduates of the program will have the academic preparation for successful completion of rigorous graduate programs.
- **Professional preparation**: Graduates will have effective in written, oral, and visual communication skills, and be able to work collaboratively in a professional and ethical manner.

This bachelor’s degree program is accredited by the Computing Accreditation Commission of the Accreditation Board for Engineering and Technology, 111 Market Place, Suite 1050, Baltimore, Maryland 21202-4012.

**Degree Requirements**

For the BS-CS degree, students must complete 120 credits, including the university general education requirements and all the following:

- **Computer science core (33 credits)**: CS 101, 105, 112, 211, 262, 306, 310, 330, 367, 421, 465, and 483; and ECE 301. Students must take CS 101 within their first year at the university. Students should take CS 105 during their second semester. A grade of C or better must be earned in CS 306 for this course to satisfy the university general education synthesis requirement.
- **Senior computer science (12 credits)**: Any four of the following: CS 440, 450, 451, 455, 468, 471, 475, 480, 482, 484, or 490.
- **Mathematics (23 credits)**: MATH 113, 114, 125, 203, and 213; or 481 or MATH 446 and STAT 344. MATH 105 and 108 cannot be counted toward this degree.
- **Computer science-related courses (6 credits)**: Two courses chosen from STAT 354; OR 335, 441, 442; ECE 280, 431, 442, 447, 501; SWE 432, 437, 443; SYST 371, 470; PHIL 371, 376; and any MATH or CS course numbered above 300 (except MATH 351). Students may need to choose electives to satisfy prerequisites for these courses. Those planning to take MATH 352 may replace STAT 344 with MATH 351.
- **Natural sciences**: 12 credits in courses intended for scientists and engineers. Two of the courses for this requirement must have laboratory components and constitute a sequence. A list of relevant courses can be obtained from the department office.
- **COMM 100 (3 credits)**: Computer science students must make a technical presentation. The course fulfills the general education requirement in oral communication for Volgenau School students.
- **Three credits in arts, humanities, or social science in addition to the general education requirements**

Students should consult the sample schedule below and ensure that course prerequisites are satisfied. Students should obtain computer-generated audits periodically to ensure that degree requirements are being met.

**Sample Schedule**

### First Semester

- **CS 101** Preview of Computer Science .......................... 2
- **CS 112** Introduction to Computer Programming ............ 4
- **ENGL 101** Composition ............................................. 3
- **MATH 113** Analytic Geometry and Calculus I ............... 4
- **Western civilization course** ....................................... 3
- **Total** ........................................................................... 16

### Second Semester

- **CS 105** Computer Ethics and Society .......................... 1
- **CS 211** Object-Oriented Programming ......................... 3
- **MATH 114** Analytic Geometry and Calculus II ............... 4
- **Arts course** ............................................................... 3
- **Literature course** ...................................................... 3
- **Total** ........................................................................... 14
Third Semester
CS 262 Introduction to Low-Level Programming .......... 1
ECE 301 Digital Electronics ........................................ 3
MATH 213 Analytic Geometry and Calculus III .......... 3
Natural science course .............................................. 4
Social and behavioral science course elective .......... 3
Total ....................................................................... 14

Fourth Semester
COMM 100 Oral Communication .................................. 3
CS 310 Data Structures .............................................. 3
MATH 125 Discrete Mathematics I ............................ 3
Natural science course .............................................. 4
General elective ..................................................... 3
Total ....................................................................... 16

Fifth Semester
CS 330 Formal Methods and Models ......................... 3
CS 367 Computer Systems Architecture ..................... 3
ENGL 302 Advanced Composition ............................. 3
MATH 203 Matrix Algebra ........................................ 3
Global understanding course ..................................... 3
Total ....................................................................... 18

Sixth Semester
CS 421 Introduction to Software Engineering ............... 3
CS 465 Computer Systems Architecture ..................... 3
STAT 344 Probability and Statistics for
Engineers and Scientists I .......................................... 3
Humanities course ................................................... 3
Natural science course .............................................. 4
Total ....................................................................... 19

Seventh Semester
CS 483 Analysis of Algorithms .................................... 3
OR 481 Numerical Methods in Engineering ................. 3
Senior computer science course ............................... 3
Senior computer science course ............................... 3
Computer science-related elective ............................ 3
Total ....................................................................... 22

Eighth Semester
Senior computer science courses .............................. 3
Senior computer science courses .............................. 3
Computer science related ......................................... 3
CS 306 (Synthesis) ................................................... 3
General elective ..................................................... 3
Total ....................................................................... 21

Change of Major
Students requesting a change of major to computer science
must have a GPA of at least 2.75 and successfully completed
two of the following: CS 112, 211; MATH 113, 114, or
125.

Advanced Placement, Credit by Exam
Some students may receive credit for CS 112 or 211 by passing
departmentally administered exams. In addition, a score of
3 on the Advanced Placement (AP) computer science exam qualifies the student for credit in CS 112. An AP score of 4,
together with demonstrated competence in the programming language used in CS 211, qualifies students for credit in CS
211. A score of 4 on the International Baccalaureate computer
science exam qualifies students for credit in CS 112, and a score of 5 or more qualifies students for credit in CS
211.

Writing-Intensive Requirement
Computer science majors complete the writing-intensive
requirement through a sequence of projects and reports in CS
306 and 421. Faculty members provide feedback on students’
expository writing.

Grades
Students must earn a C or better in any course intended to
satisfy a prerequisite for a computer science course. Com-
puter science majors may not use more than one course with
grade of C- or lower toward department requirements.

Cooperative Education
Students may participate in the Mason cooperative education
program or a work-study program in the Washington, D.C.,
area.

BS/Accelerated MS in Computer Science
This program is for those interested in immediately continu-
ing on to graduate studies in computer science.

Admission Requirements
Students in a BS program in computer science or a related
area may apply for the BS/accelerated MS program if they
have earned 90 undergraduate credits with an overall GPA
of at least 3.50. Criteria for admission are identical to criteria
for admission to the MS program.

Degree Requirements
Students must complete 144 credits that satisfy requirements
for the BS program and the MS program, with 6 credits overlap.

Students register for 6 credits of CS 500-level basic courses
in place of the corresponding CS 400-level courses required
for the undergraduate degree requirements. That is, students
must register for two of CS 540, 571, 580, and 583 in place
of the corresponding 400-level courses.

Students are permitted to take additional graduate basic
courses in their undergraduate programs. In such cases, those
classes cannot be counted toward requirements for the MS.

Degree Conferral
Students must apply to have the BS degree conferred the
semester before they expect to complete the BS requirements.
At the completion of the MS requirements, a master’s degree
is granted.

BS in Computer Science/Accelerated
MS in Information Security and
Assurance
This program is for students interested in immediately con-
tinuing their undergraduate studies in computer science with
graduate studies in information security and assurance.

Admission Requirements
Students in the BS in Computer Science Program can apply
for this program if they have earned 90 undergraduate cred-
its with an overall GPA of at least 3.30. Criteria for admission
are identical to criteria for admission to the MS in Information
Security and Assurance Program.
Degree Requirements

Students must complete 144 credits that satisfy requirements for the BS in Computer Science Program, as well as those for the MS in Information Security and Assurance Program, with 6 credits overlapping. Students register for two of the following courses (6 credits of 500-level computer science core courses) in place of the corresponding 400-level computer science courses, as part of the undergraduate degree requirements: CS 540, 571, 580, and 583. Students complete all MS in information security and assurance core courses and apply the two courses from the above list toward the MS in information security and assurance requirements.

Degree Conferral

Students must apply to have the BS in computer science degree conferred the semester before they expect to complete the BS requirements. At the completion of the MS in information security and assurance requirements, a master’s degree will be granted.

BS in Computer Science/Accelerated MS in Information Systems

This program is for students interested in immediately continuing undergraduate studies in computer science with graduate studies in information systems.

Admission Requirements

Students in the BS in computer science program can apply to this program if they have earned 90 undergraduate credits with an overall GPA of at least 3.30. Criteria for admission are identical to the criteria for admission to the MS in Information Systems Program.

Degree Requirements

Students must complete 144 credits that satisfy requirements for the BS in Computer Science Program, as well as those for the MS in Information Systems Program, with 6 credits overlap. Students register for two of the following courses (6 credits of 500-level computer science core courses) in place of the corresponding 400-level computer science courses, as part of the undergraduate degree requirements: CS 540, 571, 580, and 583.

Students complete all MS in information systems core courses and apply the two courses from above toward the MS in information systems elective requirements.

Degree Conferral

Students must apply to have the BS in computer science degree conferred the semester before they expect to complete the BS requirements. At the completion of the MS in information systems requirements, a master’s degree is granted.

BS in Computer Science/Accelerated MS in Software Engineering

This program is for students interested in immediately continuing undergraduate studies in computer science with graduate studies in software engineering.

Admission Requirements

Students in the BS in Computer Science Program can apply to this program if they have earned 90 undergraduate credits with an overall GPA of at least 3.30. Criteria for admission are identical to criteria for admission to the MS in Software Engineering Program.

Degree Requirements

Students must complete 144 credits that satisfy requirements for the BS in Computer Science Program, as well as those for the MS in Software Engineering Program, with 6 credits overlap. Students register for two of the following courses (6 credits of 500-level computer science core courses) in place of the corresponding 400-level computer science courses, as part of the undergraduate degree requirements: CS 540, 571, 580, and 583. Students complete all MS in software engineering core courses and apply the two courses from the above list toward the MS in software engineering elective requirements.

Degree Conferral

Students must apply to have the BS in computer science degree conferred the semester before they expect to complete the BS requirements. At the completion of the MS in software engineering requirements, a master’s degree is granted.

BS in Information Technology/Accelerated MS in Information Security and Assurance

This program is for students interested in immediately continuing on to graduate studies in information security and assurance.

Admission Requirements

Students in the BS in Information Technology Program may apply for this program if they have completed INFS 515 and 519 with a 3.00 or better. Criteria for admission are identical to criteria for admission to the MS program.

Degree Requirements

Students must complete all credits that satisfy requirements for the BS program and those for the MS program, with 6 credits overlapping.

Degree Conferral

Students must apply to have the BS degree conferred the semester before they expect to complete the BS requirements. At the completion of MS requirements, a master’s degree is granted.

BS in Information Technology/Accelerated MS in Information Systems

This program is for students interested in immediately continuing on to graduate studies in information systems.

Admission Requirements

Students in the BS in Information Technology Program may apply if they have earned 90 undergraduate credits with an overall GPA of at least 3.30. In addition, students must have completed INFS 515 and 519 with a 3.00 or better. Criteria for admission are identical to the criteria for admission to the MS program.
Degree Requirements
Students must complete all credits that satisfy requirements for the BS program as well as those for the MS program, with 6 credits overlapping.

Degree Conferral
Students must apply to have the BS degree conferred the semester before they expect to complete BS requirements. At the completion of MS requirements, a master’s degree is granted.

BS in Information Technology/ Accelerated MS in Software Engineering
This program is for students interested in immediately continuing on to graduate studies in software engineering.

Admission Requirements
Students in the BS in Information Technology Program may apply to this program if they have earned 90 undergraduate credits with an overall GPA of at least 3.30. In addition, students must have completed INFS 515 and 519 with a 3.00 or better. Criteria for admission are identical to criteria for admission to the MS in Software Engineering Program.

Degree Requirements
Students must complete all credits that satisfy requirements for the BS program and those for the MS in Software Engineering Program, with 6 credits overlapping with SWE 619 and 622.

Degree Conferral
Students must apply to have the BS degree conferred the semester before they expect to complete the BS requirements. At the completion of MS requirements, a master’s degree is granted.

Minor in Computer Science
The minor requires completion of at least 17 credits. Required courses are CS 105 or 306, 112, 211, and 310.

Two additional computer science courses should be selected from the following: CS 330, 332, 363, 365, 367, 421, 450, 451, 455, 456, 471, 480, 483, and 484. Students should pay careful attention to prerequisites when selecting courses.

Minor in Software Engineering
Candidates for the minor in software engineering must complete 16 credits in software engineering with a minimum GPA of 2.00, comprising CS 112 and either CS 211 or CS 222, and three from CS/SWE 332, CS/SWE 421, SWE 432, SWE 437, and SWE 443. At least 8 credits must be used only for the minor and not for the student’s major.

For policies governing all minors, see the Academic Policies chapter of this catalog.

Computer Science, Computer Engineering Double Major
Computer science majors can earn a double major in computer science and computer engineering if they complete an additional 26 credits of courses beyond the 120 credits required for the computer science degree. The additional 26 credits must be part of an approved plan of study. For more information, visit the department web site.

Certificate in Computer Science (Postbachelor)
This certificate targets students who are working on or possess an undergraduate degree in a technical (science or engineering) field but lack formal certification in the computer science field. The certificate also targets students who have shown an aptitude for graduate study but do not have the academic prerequisites required for admittance into a graduate MS computer science program.

Admissions Requirements
Students must have programming experience at the level of CS 112 and 211, and either a BS in a technical field with a 3.00 GPA or higher, or current enrollment in a technical undergraduate major.

Certificate Requirements
Basic Computer Science: CS 310, 330, 365, 367; and ECE 301
Math: MATH 125, 213
Completion of one of the following: CS 483; and two of CS 421, 440, 450, 451, 455, 468, 471, 480, and 484

GRADUATE PROGRAMS

Computer Science, MS
The graduate program leading to an MS in computer science prepares students for research and professional practice in computer science and related technologies. The program includes both fundamentals and advanced work in the areas of artificial intelligence and databases, programming languages and software engineering, systems and networks, theoretical computer science, and visual computing. Graduate classes are divided into basic classes, which do not have a graduate class as prerequisite, and advanced classes, which have a graduate class as a prerequisite. Graduate classes are generally offered in the late afternoon and evening. Financial aid in the form of graduate assistantships may be available for full-time degree-seeking students.

Plan of Study
Before the end of the second semester, students must have a plan of study approved by their academic advisor. This plan should be kept up to date by regular consultation with the academic advisor. A final signed version of the plan must be included when the student submits a graduation application.

Admission Requirements
In addition to fulfilling Mason’s admission requirements for graduate study, applicants must meet the following requirements:

• Hold a baccalaureate degree that includes Data Structures and Algorithms (CS 310), Automata Theory and Formal Languages (CS 330), and Computer Architecture including Assembly Language (CS 465). Students also must have completed Calculus I and II and a substantial course in discrete mathematics (such as MATH 125). Students with some deficiencies in preparation may be admitted provisionally pending completion of foundation courses in mathemat-
ics or computer science. Undergraduate credit earned for this purpose may not be applied toward the graduate degree.

- Have earned a cumulative GPA of 3.00 for the last two years of undergraduate work, preferably with a major in a technical field such as computer science, mathematics, physical sciences, engineering, or information systems.
- Submit transcripts of all postsecondary education, a self-assessment form (included in the application package or available from the department), three letters of recommendation, and an official GRE report.

### Degree Requirements

In addition to general university requirements, completion of this program requires 30 credits of graduate courses as follows:

- CS 583 Analysis of Algorithms is required.
- At least five classes (15 credits) must qualify as “advanced” by having suitable graduate courses as prerequisites.
- Advanced classes must be taken from three different areas. The list of preapproved classes with the areas they belong to is provided below.
- At least six classes, including two advanced classes, must be designated CS.
- At least eight classes must be taken from the list of preapproved classes. Up to two computer science-related classes that are not on the list of preapproved classes may be taken with Computer Science Department approval.
- All prerequisites must be satisfied. In some cases, basic classes (including CS 583) may be skipped with approval of the Computer Science Department if equivalent undergraduate classes were taken previously.
- Project/Thesis (optional): three to six of the advanced classes may be replaced by a project (3 credits of CS 798) or a thesis (6 credits of CS 799). The project or thesis must be guided and approved by a committee of three appropriate faculty members and presented at an appropriate forum. The thesis must meet relevant university requirements.

### Preapproved MS CS Courses by Area

#### Artificial Intelligence and Databases

- CS 580 Introduction to Artificial Intelligence (basic)
- CS 650 Databases and Knowledge Engineering
- CS 680 Natural Language Processing
- CS 681 Designing Expert Systems
- CS 685/ECE 651/SYST 672 Intelligent Systems for Robots
- CS 687 Advanced Artificial Intelligence
- CS 688 Pattern Recognition
- CS 750/IT 750 Theory and Applications of Data Mining
- CS 771/IT 817 Neural Networks
- CS 775/IT 844 Advanced Pattern Recognition
- CS 780 Data Mining in Multimedia Databases
- CS 782 Machine Learning
- CS 785 Knowledge Acquisition
- INF 614 Database Management (basic)
- INF 740 Database Programming for the Web
- INF 755 Data Warehousing and Mining
- INF 760 Advanced Database Management
- INF 764 Object-Oriented Database Systems
- INF 772 Intelligent Agents and the Semantic Web
- INF 795 Special Topics in Data Mining Applications

### Theoretical Computer Science

- CS 583 Analysis of Algorithms (basic)
- CS 600 Theory of Computation
- CS 633 Computational Geometry
- CS 683 Parallel Algorithms
- CS 684 Graph Algorithms
- CS 735 Concurrency
- CS 753/IT 815 Parallel Computation

---

ISA 765 Database and Distributed Systems Security
CS 811/IT 811 Research Topics in Machine Learning and Inference
CS 880/IT 910 Research Topics in Artificial Intelligence
CS 884/IT 940 Advanced Topics in Computer Vision and Robotics

### Programming Languages and Software Engineering

- CS 540 Language Processors (basic)
- CS 631 Object-Oriented Software Development
- CS 640 Advanced Compilers
- CS 645 Programming Language Semantics
- CS 719/IT 809 Scaling Technologies for E-business
- CS 732/IT 822 Software Maintenance and Reuse
- ISA 640 Programming Language Security
- ISA 681 Secure Software Design
- SSE 619 Object-Oriented Software Specification and Construction (basic)
- SSE 620 Software Requirements Analysis and Specification (basic)
- SSE 621 Software Modeling and Architectural Design
- SSE 622 Distributed Software Engineering
- SSE 623 Formal Methods and Models in Software Engineering
- SSE 632 User Interface Design and Development
- SSE 637 Software Testing
- SSE 642 Software Engineering for the World Wide Web
- SSE 645 Component-Based Software Development
- SSE 720 Advanced Software Requirements
- SSE 721 Reusable Software Architectures
- SSE 727 Quality of Service for Software Architectures

### Systems and Networks

- CS 555 Computer Communications and Networking (basic)
- CS 571 Operating Systems (basic)
- CS 635 Introduction to Parallel Computation
- CS 668 Computer Architecture Systems
- CS 671 Advanced Operating Systems
- CS 672 Computer Systems Performance Evaluation
- CS 673 Multimedia Computing and Systems
- CS 675 Distributed Systems
- CS 706 Concurrent Software Systems
- CS 755 Advanced Computer Networks
- CS 756 Performance Analysis of Computer Networks
- CS 758/IT 758 Networked Virtual Environments
- CS 773 Real-time Systems Design and Development
- CS 818/IT 818 Topics in Computer Systems
- ISA 562 Information Security Theory and Practice (basic)
- ISA 564 Security Laboratory (basic)
- ISA 656 Network Security
- ISA 673 Operating System Security
- ISA 674 Intrusion Detection
- ISA 697 Topics in Information Security
- ISA 763 Security Protocol Analysis
- ISA 764 Security Experimentation
- ISA 767 Secure Electronic Commerce
- ISA 785 Digital Forensics

---

**Information Technology and Engineering**

Volgenau School of Information Technology and Engineering
Information Systems, MS

CS 850/IT 915 Research Topics in Parallel Computation

Visual Computing
CS 652 Computer Graphics
CS 662 Computer Graphics Game Technologies
CS 682 Computer Vision
CS 686 Image Processing
CS 752 Interactive Graphics Software
CS 774/IT 835 Computational Vision
CS 776/IT 852 Graphical Real-Time Simulation
CS 777 Human-Computer Intelligent Interaction
CS 778/IT 778 Biometrics
CS 884/IT 940 Advanced Topics in Computer Vision and Robotics

These courses are not classified by area. Note that CS 695/CS 795 can be used to satisfy the breadth requirement if the area is listed in the syllabus for the course.

CS 695 Topics in Computer Science
CS 697 Independent Reading and Research
CS 795 Advanced Topics in Computer Science
CS 798 Project Seminar
CS 799 Thesis
CS 895 Research Topics in Computer Science

Foundation Requirements

To ensure students have an adequate background in mathematical methods, computer technology, and business knowledge, the program requires the following foundation courses or their equivalents:

INFS 501 Discrete and Logical Structures for Information Systems
INFS 515 Computer Organization
INFS 519 Program Design and Data Structures

Admission Requirements

Applicants must hold a four-year (120-credit) baccalaureate degree from an accredited institution and have earned a GPA of 3.00 or better in the last 60 credits. They also must meet the following requirements:

- Show proof of a satisfactory score on the GMAT or GRE, if required. The applicable test should have been taken within five years of applying for admission. The department policy is that the GMAT or GRE is required unless the applicant has an undergraduate degree in science or engineering from a U.S. university and graduated with a GPA of 3.00 or better in the last 60 hours; a graduate degree in science or engineering from a U.S. university; or been admitted as a nondegree student and meets all the following requirements: an undergraduate degree from a U.S. university, an undergraduate GPA of 3.00 or better in the last 60 hours, and a B or better grade in all foundation courses taken at Mason or elsewhere.

- Submit the appropriate application forms with three letters of recommendation from people directly knowledgeable of the applicant’s professional and academic competence, a one-page goals statement, and a work résumé.

Submit a department self-evaluation form that is essential for evaluating foundation requirements by the department faculty. This form may be obtained from the department office or the department web page. International students must submit their TOEFL score.

Advising

The department holds orientation meetings in January and August to advise newly admitted and continuing students. Members of the faculty are present to answer questions and offer advice concerning programs of study. Detailed information is available on the department web site.

The department also provides an advising function to students, as outlined in the student advising form available from the department. Each student is assigned a faculty advisor with whom to confer on matters related to degree requirements. A plan of study form for the MS degree should be completed and submitted by the student soon after admission to the program. This plan serves as a guide for the student.
Degree Requirements
Completion of the MS program requires a minimum of 30 approved graduate credits (10 courses). To provide a common background in the fundamentals of information systems, the following four courses are required of all students:

- INFS 612 Principles and Practices of Communication Networks
- INFS 614 Database Management
- INFS 622 Information Systems Analysis and Design
- ISA 562 Information Security Theory and Practice

For students taking the emphasis area and/or graduate certificate in software engineering, SWE 620 should be substituted for INFS 622.

The core courses constitute the technical body of knowledge for the program. The elective courses are organized into the following emphasis areas: database management, data mining, and data warehousing; electronic commerce; software engineering; knowledge management; and information security and assurance.

Elective Courses
Students may take six elective courses within an emphasis area, or they may mix and match electives according to their professional interests. Students may also plan their electives so as to obtain certificates offered by the department. There are also preapproved electives from other programs in the Volgenau School, as well as from university-wide programs. The department’s web site has a list of preapproved electives. Special courses may be used as electives with the approval of the student’s academic advisor and the graduate coordinator.

Listed below are the emphasis areas and the approved courses in each area.

Database Management
- INFS 623 Classical and Web Information Retrieval
- INFS 740 Database Programming for the Web
- INFS 760 Advanced Database Management
- INFS 772 Intelligent Agents and the Semantic Web
- INFS 796 Directed Readings
- ISA 765 Database and Distributed Systems Security

Data Mining and Data Warehousing
- CS 780 Data Mining in Multimedia Databases
- CS 782 Machine Learning
- INFS 755 Data Warehousing and Mining
- INFS 623 Classical and Web Information Retrieval
- INFS 795 Special Topics in Data Mining Applications
- INFS 785 Data Mining for Homeland Security
- INFS 796 Directed Readings

Electronic Commerce
- INFS 640 Introduction to Electronic Commerce
- INFS 770 Knowledge Management for E-Business
- INFS 772 Intelligent Agents and the Semantic Web
- INFS 790 Information Systems Policy and Administration
- INFS 796 Directed Readings
- ISA 656 Network Security
- ISA 767 Secure Electronic Commerce

Software Engineering
- SWE 619 Object-Oriented Software Specification and Construction
- SWE 621 Software Architecture and Design
- SWE 625 Software Project Management
- SWE 632 User Interface Design and Development
- SWE 637 Software Testing
- SWE 642 Software Engineering for the World Wide Web
- SWE 721 Reusable Software Architectures
- SWE 727 Quality of Service for Software Architectures

Knowledge Management
- CS 580 Introduction to Artificial Intelligence
- CS 681 Expert Systems
- CS 785 Knowledge Acquisition
- INFS 623 Classical and Web Information Retrieval
- INFS 650 Microsoft .NET Framework for Information Systems Applications
- INFS 740 Database Programming for the Web
- INFS 755 Data Warehousing and Mining
- INFS 770 Knowledge Management for E-Business
- INFS 772 Intelligent Agents and the Semantic Web
- INFS 774 Enterprise Architecture
- INFS 790 Information Systems Policy and Administration
- INFS 796 Directed Readings

Information Security and Assurance
- ISA 640 Programming Languages Security
- ISA 656 Network Security
- ISA 673 Operating Systems Security
- ISA 674 Intrusion Detection
- ISA 681 Secure Software Design
- ISA 763 Security Protocol Analysis
- ISA 764 Security Experimentation
- ISA 765 Database and Distributed Systems Security
- ISA 767 Secure Electronic Commerce
- ISA 796 Directed Readings in Information Security

Certificates may be also obtained by following the specific instructions for each, available at the department web site: database management, data mining, information engineering, electronic commerce, information security and assurance, software engineering, and web-based software engineering. These certificates are described in the computer science certificates section of this catalog.

Students, with the consent of a faculty sponsor and faculty advisor, may also elect courses in individualized study, special topics, or a 6-credit thesis, which is primarily intended for students planning to pursue a PhD in information technology with a concentration in information systems. The course designations are
- INFS 697 Topics in Information Systems
- INFS 796 Directed Readings in Information Technology
- INFS 797 Advanced Topics in Information Systems
- INFS 798 Research Project
- INFS 799 Thesis

Software Engineering, MS MS-SWE
This program provides specialized knowledge and experience in developing and modifying large, complex software systems. It emphasizes technical and management aspects of software engineering development. Software engineering is an established discipline based on requirements analysis, design, construction, testing, maintenance, economics, and management issues. A pragmatic approach to problem solving is the hallmark of a software engineer. Software engineers are concerned with the theoretical and practical aspects of technology, cost, and social impact of software systems that are effective and efficient.
Software engineers are in demand in every segment of society affected by computing technology. Potential employers include all software vendors and Internet-based companies, electronic business organizations, businesses that build and sell computers, research and development laboratories, aerospace companies, government contractors, banks, insurance companies, and manufacturing organizations. The master’s program is concerned with technical and managerial issues, but primary emphasis is placed on the technical aspects of building and modifying high-quality software systems.

Successful applicants have a broad variety of undergraduate backgrounds, including computer science, science and mathematics, engineering, liberal arts, and business. Many students are working or have worked in the software industry.

The program is revised on a regular basis to stay abreast of the latest developments in information technology (IT). The program introduced a major revision for fall 2005; recent additions include software construction with the object-oriented Java programming language, requirements analysis with use cases and the Unified Modeling Language (UML), object-oriented software design with the UML, graphical user interface design, software engineering for the web, software project management using the spiral life cycle model and the Capability Maturity Model, software architecture, design patterns, system testing and testing of object-oriented components, and formal methods using the Object Constraint Language. All classes are scheduled in the late afternoon and early evening to accommodate employed students.

Foundation Requirements

Students entering the MS program must have course work or equivalent knowledge in the following areas: introductory programming in any language; knowledge of an object-oriented programming language such as Java, C++, or C#; data structures and algorithms; machine organization (such as those given in computer system architecture or assembly language courses); and topics in discrete mathematics, including sets, relations, functions, trees, graphs, and inductive proofs. The level of knowledge required in these areas is equivalent to that taught in undergraduate courses and may be achieved by taking the following foundation courses from Mason:

- INFS 501 Discrete and Logical Structures for Information Systems
- INFS 515 Computer Organization
- INFS 519 Program Design and Data Structures
- SWE 510 Object-Oriented Programming in Java

In addition, it is desirable, though not required, that entering students have at least one year of work experience in building or modifying software systems.

Prospective students are asked to complete a department self-evaluation form, indicating whether previously taken courses may satisfy these foundation requirements. On acceptance, students are advised of the necessary foundation courses to be satisfactorily completed to meet this requirement. Foundation courses do not earn credit toward the MS degree; however, they must be successfully completed with a grade of B or better before enrolling in the core curriculum.

Students may test out to indicate they have the requisite knowledge for those foundation courses. The exams are given before classes begin in January and August, and can only be taken once. Registration is not required; students need only be present at the date, time, and location specified and bring some form of photographic identification. Detailed information is available on the department web site. Students failing any one of the exams must take the equivalent course before enrolling in the core curriculum courses.

Admission Requirements

In addition to general admission requirements of the university, each applicant to the MS program must hold a four-year (120-credit) baccalaureate degree in an appropriate discipline from an accredited institution and have earned a GPA of 3.00 or better in the last 60 credits of undergraduate study. Other requirements are as follows:

- Provide a one- to two-page statement of educational and work experience in the computing field that includes a statement of career goals in software engineering.
- Submit a department self-evaluation form, which can be obtained from the department. This form provides summary information concerning background and preparation for the program.
- Show proof of a satisfactory score on the GRE, if required. The test should have been taken within five years of applying for admission. The department policy is that the GRE is required unless the applicant has an undergraduate degree in science or engineering from a U.S. university and graduated with a GPA of 3.00 or better in the last 60 hours; a graduate degree in science or engineering from a U.S. university; or been admitted as a nondegree student and meets all the following requirements: an undergraduate degree from a U.S. university, an undergraduate GPA of 3.00 or better in the last 60 hours, and a B in all foundation courses taken at Mason or elsewhere.
- Submit the appropriate application form with three letters of recommendation from people directly knowledgeable of the applicant’s professional and academic competence.

Acceptance into the MS program is based on an overall assessment of the applicant’s ability to complete the program of study satisfactorily. Well-qualified students with minor deficiencies may be admitted to the program in provisional status, with specified course work to be completed within a specified time.

Advising

The department holds orientation meetings each January and August to advise incoming and continuing students. Members of the faculty are present to answer questions and offer advice concerning programs of study. Detailed information is available on the department web site.

The department also provides an advising function to students, as outlined in the student advising form available from the department. Each student is assigned a faculty advisor with whom to confer on matters related to degree requirements. A plan of study form for the MS degree should be completed and submitted by the student soon after admission; this plan serves as a guide for the student.

Degree Requirements

In addition to the general requirements of the university, the MS in software engineering requires a minimum of 30 graduate credits. The course work is divided into three categories: a breadth requirement of 12 credits of core courses,
a depth requirement of 9 credits of emphasis courses, and 9
credits of elective courses.

**Four Core Courses (12 credits)**
- SWE 619 Object-Oriented Software Specification and
  Construction
- SWE 620 Software Requirements Analysis and Specifi-
  cation
- SWE 621 Software Modeling and Architectural Design
- SWE 622 Distributed Software Engineering

**Emphasis Courses (9 credits)**
Students may choose an emphasis by taking three courses
from one of the emphasis areas of software design, software
assurance, software management, and web applications. With
permission from the advisor, a student may choose to not take
an emphasis. The emphasis area courses are

**Software Design**
- SWE 626 Software Project Laboratory
- SWE 632 User Interface Design and Development
- SWE 721 Reusable Software Architectures
- SWE 727 Quality of Service for Software Architectures
- SWE 781 Secure Software Design and Programming

**Software Assurance**
- SWE 623 Formal Methods and Models in Software
  Engineering
- SWE 637 Software Testing
- SWE 723 Precise Modeling
- SWE 781 Secure Software Design and Programming

**Software Management**
- SWE 625 Software Project Management
- SWE 626 Software Project Laboratory
- SWE 630 Software Engineering Economics
- SWE 637 Software Testing

**Web Applications**
- SWE 632 User Interface Design and Development
- SWE 637 Software Testing
- SWE 642 Software Engineering for the World Wide
  Web
- SWE 645 Component-Based Software Development

**Elective courses (9 credits)**
Students may select the remaining courses from the list of
approved courses, including other emphasis areas, available
from the department office and department web site. Students
may choose other graduate electives with the consent of their
faculty advisor and the graduate coordinator.

Students, with the consent of a faculty sponsor and faculty
advisor, may also elect courses in individualized study, special
topics, or a 6-credit thesis, which is primarily inten-
ted for students planning to pursue a PhD in information
technology with a concentration in software engineering. The
course designations are
- SWE 699 Special Topics in Software Engineering
- SWE 796 Directed Readings in Software Engineering
- SWE 798 Research Project
- SWE 799 Thesis

**Information Security and Assurance, MS**

The Department of Computer Science’s master of science
degree program in information security and assurance prepares
graduates to fill the current and future need for information
security and assurance professionals. Graduates work in a
wide variety of capacities, protecting the information systems
of different types of organizations and supporting the nation’s
information infrastructure. The master of science in information
security and assurance provides students with the general and
technical knowledge and skills to understand the relationship
between information security and advancing information
systems technology. The program gives graduates a theoretical
understanding of the science and methodologies for ensuring
the secrecy and integrity of data, as well as the availability and
legitimate use of data and information systems.

Students focus on the technical and management aspects of
information security and examine ways to provide secure
information processing systems by investigating operating
systems security, distributed secure system architectures,
database security, software applications security, security
policies, secure e-commerce, network and distributed systems
security, cryptography, and security protocols. Graduates of
the program are actively recruited by federal, state, and local
governments, as well as the private sector. Typical employers
include Internet-based companies, software companies, banks
and insurance companies, and in general any organization
that depends heavily on the use of IT. All classes are sched-
uled in the late afternoon and early evening to accommodate
employed students.

**Foundation Requirements**
To ensure that students have an adequate background in
mathematical methods and computer technology, the program
requires the following four foundation courses, or their
equivalents:
- INFS 501 Discrete and Logical Structures for Information
  Systems
- INFS 515 Computer Organization
- INFS 519 Program Design and Data Structures
- SWE 510 Object-Oriented Programming in Java

Prospective students are asked to complete a department self-
evaluation form, indicating whether previously taken courses
may satisfy these foundation requirements. On acceptance,
students are advised of the necessary foundation courses to be
satisfactorily completed to meet this requirement. Foundation
courses do not earn credit toward the MS degree; however,
they must be successfully completed with a grade of B or bet-
ter before enrolling in the core curriculum.

Students may test out to indicate that they have the requisite
knowledge for those foundations of INFS 501, 515, and 519.
The exams are given before classes begin in January and
August, and can only be taken once. Registration is not re-
quired; students need only be present at the date, time, and
location specified with some form of photographic identifica-
tion. Detailed information is available on the department web
site. Students failing any one of the exams must take the
equivalent course before enrolling in the core curriculum
courses.

**Admission Requirements**
Applicants must hold a four-year (120-credit) baccalaureate
degree from an accredited institution and have earned a GPA
of 3.00 or better in the last 60 credits. Other requirements are
as follows:
- Show proof of a satisfactory score on the GMAT or GRE,
  if required. The applicable test should have been taken
  within five years of applying for admission. The department
  policy is that the GMAT or GRE is required unless the ap-
Completion of the degree program requires a minimum of 30 approved graduate credits (10 courses). To provide the necessary background and fundamentals of information systems security and assurance, the program has three [Please check: four courses listed] courses that are required of all students:

- CS 555 Computer Communications and Networking
- CS 571 Operating Systems
- ISA 562 Information Security Theory and Practice
- ISA 563 Fundamentals of Systems Programming

To continue in the program, students are required to obtain a B- or better grade in the required courses. Students are allowed to repeat the required classes. Students are encouraged to complete the required courses before pursuing the electives.

Elective Courses

Security Electives

To provide breadth and depth of knowledge in information security and assurance, the degree program requires four electives to be taken from the following list of ISA courses:

- ISA 564 Security Laboratory
- ISA 640 Programming Languages Security
- ISA 650 Security Policy
- ISA 652 Security Audit and Compliance Testing
- ISA 656 Network Security
- ISA 673 Operating Systems Security
- ISA 674 Intrusion Detection
- ISA 681 Secure Software Design
- ISA 763 Security Protocol Analysis
- ISA 764 Security Experimentation

ISA 765 Database and Distributed Systems Security
ISA 767 Secure Electronic Commerce
ISA 785 Digital Forensics
IT 862 Security Models

Other Electives

The remaining two courses may be chosen from any combination of (1) courses at the ISA 600 and 700 level, including ISA 697, ISA 796, ISA 797, and ISA 798; (2) courses at the CS 500, 600, and 700 level; and (3) a list of preapproved qualified electives available from the department office or department web site. A thesis option is available whereby a student may elect to complete a 6-credit thesis.

Certificates

The department offers certificates in biometrics, computer games technologies, computer networking, database management, data mining, electronic commerce, foundations of information systems, information security and assurance, information engineering, intelligent agents, software architecture, software engineering, and web-based software engineering.

Course work toward these certificates can be used for credit toward the department MS programs or PhD in computer science or PhD in information technology. Note also that the certificates also may be pursued independently, as well as concurrently with any of the graduate degree programs in the Volgenau School.

Certificate in Biometrics CERG-BMCS

Biometrics, the science of recovering or verifying a person’s identity, measures the physical characteristics that make people unique (including fingerprints, an eye’s retina or iris, face, hand geometry, signature, and voice) and uses those measurements for person recognition or authentication. Biometrics are related to the science of forensics, which uses and interprets physical evidence for legal purposes. The importance of biometrics lies in the fact that traditional means of identification and verification are often unreliable or cumbersome. Passwords are difficult to remember and easy to steal. Keys, driver’s licenses, and passports can be lost or forged. The human body and its behavior, on the other hand, can’t be forgotten, stolen, forged, or misplaced. Practical uses for such biometrics are widespread and include maintaining the security for physical space and cyberspace. In particular, biometrics aids in controlling access to an office, computer network or an ATM, smart cards, and wireless communication; confirming the identity of buyers and sellers to make electronic commerce safe and reliable; confirming student identity for distant learning; and safeguarding electronic records related to health care services.

The certificate requires completion of 15 credits and consists of two required courses and three courses of choice. Projects (3 credits) can substitute for one of the choice courses. One of the three courses of choice can be taken from another department, with the advisor’s approval, provided that it belongs to the certificate’s area.

Required Courses (6 credits)

- CS 688/IT 688 Pattern Recognition
- CS 778 Biometrics

Choose from the following elective courses (9 credits)

- BINF 739 Signal and Image Processing for Bioinformatics
- CS 580 Introduction to Artificial Intelligence
Certificate in Computer Games Technology

Admission Requirements
The certificate program in computer games technology is open to all students who are eligible for entrance into the master’s degree program in computer science or any scientific or engineering discipline at Mason. To obtain the certificate, candidates must complete the following courses for a total of 15 credits. Transfer credit may substitute for at most one of these courses, subject to department approval:

Certificate Requirements
Required courses (12 credits):
- CS 652 Computer Graphics
- CS 662 Computer Graphics Game Technologies
- CS 758 Networked Virtual Environments
- CS 777 Human Computer Interaction

Plus one courses from the following (3 credits):
- AVT 616 Networked Art Practice
- AVT 676 Sound and Music for Video and Animation
- AVT 686 Three-Dimensional Video Art
- AVT 688 Digital Animation
- CS 633 Computational Geometry
- CS 673 Multimedia Computing and Systems
- CS 686 Image Processing and Applications
- CS 687 Advanced Artificial Intelligence
- CS 752 Interactive Graphics Software

Certificate in Computer Networking

When brought together to form computer networks, the technologies of computing and communications exhibit a synergy that is revolutionizing our world. In-depth knowledge of the new discipline of computer networking increasingly is in demand as a basis for design and deployment of new information systems ranging from aspects of the global Internet to distributed systems in a variety of application domains. The courses for this certificate have been selected to provide a solid basis for understanding the core software and communications technologies on which today’s networks are based and how they may be combined to create effective computer networks. Courses cover mainstream and leading-edge technology considerations, ensuring that students are prepared to function at the professional level in this fast-moving and technologically challenging field.

Admission Requirements
The certificate program is open to all students who are eligible for entrance into the master’s degree program in computer science or any scientific or engineering discipline at Mason.

Certificate Requirements
Students must complete the following courses, for a total of 15 credits:

Required courses (6 credits):
- CS 555 Computer Communications and Networking
- CS 571 Operating Systems

At least one of the following (3-6 credits):
- CS 755 Advanced Computer Networks
- CS 756 Performance Analysis of Computer Networks

One or two of the following electives (3 or 6 credits):
- ECE 542 Computer Network Architectures and Protocols
- ECE 642 Design and Analysis of Computer Communication Networks
- ECE 742 High-Speed Networks
- ISA 656 Network Security
- ISA 666 Internet Security Protocols
- IT 657 Advanced Network Science

Certificate in Foundations of Information Systems

This certificate program is designed primarily for students who earned an undergraduate degree in an area other than information systems and are willing to acquire solid foundations to pursue further education and career in information systems, software engineering, information security and assurance, or a related discipline.

Admission Requirements
The admission requirements for the certificate in foundations of information systems is a four-year bachelor’s degree with a GPA of 3.00 or higher. Also, the admission to the MS in Information Systems Program allows automatic admission to the certificate program.

Application forms may be obtained from the Computer Science Department or from the department web site.

Certificate Requirements
Certificate candidates must complete five courses, with an average grade of B or better, for a total of 15 credits of graduate study. To obtain the certificate, a student needs to complete the following:

Required courses (12 credits)
Take each one of the following foundation courses (no replacement is allowed):
- INFS 501 Discrete and Logical Structures for Information Systems
- INFS 515 Computer Organization
- INFS 519 Program Design and Data Structures
- SWE 510 Object-Oriented Programming in Java

Elective (3 credits)
Take any one course from the INFS, SWE, or ISA programs that do not require any prerequisites other than the above foundation courses.

Certificate in Database Management

This graduate certificate program provides comprehensive coverage that includes theoretical foundations, practical experience, and recent advances. The area of databases is considered by most experts to be a fundamental area of computer and information science.
**Admission Requirements**

Applicants must hold a baccalaureate degree from an accredited institution and have earned a GPA of 3.00 or better in the last 60 credits. Applicants must complete a self-assessment form, which can be obtained from the Computer Science Department. The form provides information concerning background and preparation for the program.

Applicants must possess knowledge equivalent to that provided by the following courses:

INFS 501 Discrete and Logical Structures for Information Systems
INFS 515 Computer Organization
INFS 519 Program Design and Data Structures
SWE 510 Object-Oriented Programming in Java

Students not enrolled in a graduate degree program at Mason should apply for the database management certificate program through the Volgenau School Graduate Admissions Office. Students enrolled in a graduate degree program at Mason should contact the department for admission to the certificate program. Admission to the certificate program does not guarantee acceptance into any MS program.

**Certificate Requirements**

Students must complete five courses in information systems and IT with an average grade of B or higher, for a total of 15 credits of graduate study. To obtain the certificate, students must take the following:

**Required courses (6 credits):**
INFS 614 Database Management
INFS 760 Advanced Database Management

**Three from the following (9 credits):**
INFS 623 Classical and Web Information Retrieval
INFS 740 Database Programming for the Web
INFS 755 Data Warehousing and Mining
INFS 764 Object-Oriented Database Systems
INFS 795 Special Topics in Data Mining Applications
INFS 797 Advanced Topics in Database Management
ISA 765 Database and Distributed Systems Security
IT 861 Distributed Database Systems
IT 864 Scientific and Statistical Databases

For more information, contact the department or visit the department web site.

■ **Certificate in Data Mining**  CERG-DTM

This graduate certificate program is intended for people interested in the analysis and knowledge discovery from large and diverse data sources. The goal of the program is to study data mining concepts and successful applications. The certificate in data mining may be pursued concurrently with any of the graduate programs in the Volgenau School.

**Admission Requirements**

Applicants must hold a baccalaureate degree from an accredited institution and have earned a GPA of 3.00 or better in the last 60 credits. In addition, applicants must complete a self-assessment form, which can be obtained from the Computer Science Department. This form provides summary information concerning background and preparation for the program.

Each applicant must possess knowledge equivalent to that provided by the following courses:

CS 310 Computer Science III
STAT 344 Probability and Statistics for Engineers and Scientists

Students not enrolled in a graduate degree program at Mason should apply for the data mining certificate program through the Volgenau School Graduate Admissions Office. Students enrolled in a graduate degree program at Mason should apply to the department for admission into the certificate program. Admission into the certificate program does not guarantee acceptance into any MS program.

**Certificate Requirements**

Students must complete five courses, with an average grade of B or better, for a total of 15 credits of graduate study. At least one course from three of the following groups must be taken to obtain the certificate:

**Group I**
CS 750 Theory and Applications of Data Mining
CS 780 Data Mining in Multimedia Databases
ISA 785 Digital Forensics
IT 844 Pattern Recognition

**Group II**
IT 875/CIS 703 Scientific and Statistical Visualization
IT 871 Statistical Data Mining
STAT 663/CSI 773 Statistical Graphics and Data Exploration
STAT 753 Computer Intrusion Detection

**Group III**
INFS 755 Data Warehousing and Mining
INFS 795 Data Mining Applications

**Group IV**
SYS/STAT 664 Bayesian Inference and Decision Analysis

■ **Certificate in E-Commerce**  CERG-ECOM

The Internet is having a significant effect on the way people interact with each other, government, and business. This graduate certificate program is for people who are interested in the use of Internet-based technology by people, government, and industry. We are witnessing the emergence of e-tailing, e-government, e-business, and business-to-business applications that are transforming society. The influence of electronic commerce is also being felt across international boundaries where it affects the management and administration of international business. The goal of the certificate in electronic commerce is to study the concepts, tools, policies, and underlying technology that enable Internet-based applications.

**Admission Requirements**

Applicants must hold a BS degree with a 3.00 or higher in the last 60 credits. They also must possess knowledge equivalent to the following four Mason courses, which are considered foundation courses: INFS 501 Discrete and Logical Structures for Information Systems, INFS 515 Computer Organization, INFS 519 Program Design and Data Structures, and SWE 510 Object-Oriented Programming in Java. Applicants also must possess equivalent knowledge of INFS 612 and 614; SWE 619, 620, and 621; or the prerequisite courses required for the selected electives.

Applicants must submit a one- to two-page statement of educational and work experience in the computing field. Applicants also need to complete a self-assessment form.
form provides summary information concerning background and preparation for the program.

For those students not enrolled in a Mason graduate degree program, application for the certificate program is made through the Volgenau School Graduate Admissions Office. Students enrolled in a Mason graduate degree program should contact the department for admission to the certificate program. Admission to the certificate program does not guarantee admission into any MS program.

Certificate Requirements

Students must complete five courses, with an average grade of B or better, for a total of 15 credits of graduate study. To obtain the certificate, a student must complete the following:

Two courses (6 credits):
INFS 640 Introduction to Electronic Commerce
INFS 770 Knowledge Management for E-Business

Three additional courses (9 credits) from the following:
Electives have been organized into emphasis areas, but students may also mix and match elective courses subject to satisfying course prerequisites:

Information Security
ISA 562 Information Security Theory and Practice
ISA 656 Network Security
ISA 767 Secure Electronic Commerce

Database Management
INFS 740 Database Programming for the Web
INFS 755 Data Warehousing and Mining
INFS 760 Advanced Database Management
INFS 772 Intelligent Agents and the Semantic Web
INFS 774 Enterprise Architecture

Internet Software Engineering
SWE 632 User Interface Design and Development
SWE 642 Software Engineering for the World Wide Web
SWE 645 Component-Based Software Development

Health Medical Information Systems
HAP 678 Introduction to the U.S. Health System*
HAP 714 Tele-Health Applications
HAP 740 Management of Health Information Systems

Note: Course may be waived for a person with experience in health care systems management and permission of the instructor.

Students enrolled in the MS in E-commerce program who wish to obtain the certificate in electronic commerce should consult the interdisciplinary programs, E-Commerce, MS in this catalog for details.

Certificate in Information CERG-INFE Engineering

This graduate certificate program is tailored for people involved in the specification, design, implementation, and management of data- and knowledge-intensive information systems. The certificate program prepares students for research, development, and professional practice in information engineering by offering a hands-on set of courses providing theoretical knowledge and practical experience with methods and tools associated with database management systems, data modeling, knowledge acquisition, data and knowledge representation, and software engineering.

Admission Requirements

Applicants must have a baccalaureate degree from an accredited institution and have earned a GPA of 3.00 or higher in the last 60 credits. In addition, applicants must complete a self-assessment form, which can be obtained from the Computer Science Department. This form provides summary information concerning background and preparation for the program.

Applicant must possess knowledge equivalent to that provided by the following courses:
INFS 501 Discrete and Logical Structures for Information Systems
INFS 515 Computer Organization
INFS 519 Program Design and Data Structures
SWE 510 Object-Oriented Programming in Java

Students not enrolled in a Mason graduate degree program should apply for the information engineering certificate program through the Volgenau School Graduate Admissions Office. Students enrolled in a Mason graduate degree program should apply to the department for admission into the certificate program. Admission into the certificate program does not guarantee acceptance into any MS program.

Certificate Requirements

Students must complete five courses, with an average grade of B or better, for a total of 15 credits of graduate study. To obtain the certificate, students must complete the following:

Four required courses (12 credits):
INFS 612 Principles and Practices of Communication Networks
INFS 614 Database Management
SWE 620 Software Requirements Analysis and Specification
SWE 621 Software Modeling and Architectural Design

One of the following courses (3 credits):
INFS 770 Knowledge Management for E-Business
SWE 625 Software Project Management

Note: Students enrolled in the MS in Information Systems Program must substitute SWE 620 for INFS 622 to obtain this certificate. Credit is not given for taking both INFS 622 and SWE 620; only 3 credits will be awarded. For more information, contact the department or visit the department web site.

Certificate in Information CERG-ISA Security and Assurance

This graduate certificate program is for people who are interested in science and methods for ensuring secrecy, integrity, availability, and legitimate use of information systems. The certificate may be pursued concurrently with any of the graduate programs in the Volgenau School.

Admission Requirements

Applicants must hold a baccalaureate degree from an accredited institution and have earned a GPA of 3.00 or higher in the last 60 credits. In addition, applicants must complete a self-assessment form, which can be obtained from the Computer Science Department. This form provides summary information concerning background and preparation for the program.

Applicants must possess knowledge equivalent to that provided by the following courses:
Certificate Requirements

Students must complete five courses with an average grade of B or better for a total of 15 credits of graduate study.

Two required courses (6 credits):
ISA 562 Information Security Theory and Practice
ISA 656 Network Security

Three additional courses (9 credits):
Three electives to be taken from ISA 564 and courses at the ISA 600 and 700 level, excluding ISA 697, ISA 796, ISA 797, and ISA 798.

Certificate in Intelligent Agents

This certificate concentrates on the theory and practice of designing and developing systems that rely on knowledge and reasoning, generically called intelligent agents: expert systems, knowledge-based systems, knowledge-based decision support systems, expert database systems, intelligent tutoring systems, and so on. Capturing, using, preserving, transferring, and sharing knowledge is of critical importance to any organization as society evolves from an information society to a knowledge society. Therefore, the ability to design and develop intelligent agents for a wide variety of domains is becoming a highly valuable expertise. The courses in this certificate program cover the basics of knowledge engineering and intelligent agents, as well as advanced research topics. Basic topics include knowledge representation, knowledge acquisition, heuristic search, problem solving and planning, uncertainty reasoning, machine learning, natural language processing, design of expert systems, human-computer interaction, data mining, knowledge discovery, and knowledge management. Advanced topics include the development of multiagent systems, mixed-initiative intelligent systems, web-based intelligent agents, and distributed ontologies.

Admission Requirements

The program is open to all students who are eligible for entrance into the master’s degree program in computer science or any scientific or engineering discipline at Mason.

Certificate Requirements

Students must complete the following courses for a total of 15 credits:

Required (3 credits):
CS 580 Introduction to Artificial Intelligence

Plus four of the following elective courses (12 credits):
CS 680 Natural Language Processing
CS 681 Designing Expert Systems
CS 685 Intelligent Systems for Robots
CS 687 Advanced Artificial Intelligence
CS 750 Theory and Applications of Data Mining
CS 777 Human-Computer Intelligent Interaction
CS 780 Data Mining in Multimedia Databases
CS 782 Machine Learning
CS 785 Knowledge Acquisition and Problem Solving
CS 798 Project Seminar
CS 811/IT 811 Research Topics in Machine Learning and Inference
CS 880/IT 910 Research Topics in Artificial Intelligence
INFS 772 Intelligent Agents and the Semantic Web

One of the four courses may be taken from another MS or PhD program in the Volgenau School with advisor approval, provided it belongs to the certificate area.

Certificate in Software Architecture

This graduate certificate program provides knowledge, tools, and techniques to those who are working or planning to work in software architecture but do not want to complete the requirements for a master’s degree in the field. The certificate may be pursued concurrently with any of the graduate degree programs in the Volgenau School.

Software architecture is an essential part of a software system and can be considered the backbone for such a system. Many industrial organizations recognize the important role of software architecture and have requested specific courses and graduate certification in this area. This proposed graduate certificate program addresses this industrial need. Mason is well-positioned to address this need because the university already offers several relevant courses and has the faculty with the necessary expertise to teach them.

Admission Requirements

Applicants must hold a baccalaureate degree from an accredited institution and have earned a GPA of 3.00 or higher in the last 60 credits. In addition, applicants must complete a self-assessment form, which can be obtained from the department. This form provides summary information concerning background and preparation for the program.

Applicants must possess knowledge equivalent to the following undergraduate courses: structured programming in a modern programming language, data structures, discrete mathematics, and machine organization. The level of knowledge may also be achieved by taking the following foundation courses at Mason: INFS 501 Discrete and Logical Structures for Information Systems, SWE 510 Object-Oriented Programming in Java, INFS 515 Computer Organization, and INFS 519 Program Design and Data Structures. In addition, it is desirable, but not necessary, for applicants to have at least one year of appropriate work experience in building or modifying software systems.

Applicants must submit a one- to two-page statement of educational and work experience in the computing field that includes a statement of career goals in software engineering. Students not enrolled in a Mason graduate degree program should apply for the certificate program through the Volgenau School Graduate Admissions Office. Students enrolled in a Mason graduate degree program should apply to ISE for...
admission into the certificate program. Admission into the certificate program does not guarantee acceptance into any MS program.

Certificate Requirements
Students must complete five courses with an average grade of B or better for a total of 15 credits of graduate study.

Required courses (9 credits):
SWE 621 Software Modeling and Architectural Design
SWE 721 Reusable Software Architectures
SWE 727 Quality of Service for Software Architectures

Optional courses (minimum of two courses must be selected) (6 credits):
CS 672 Computer Systems Performance Evaluation
CS 732/IT 822 Software Maintenance and Reuse
CS 773 Real-Time Systems Design and Development
IT 823 Software for Critical Systems
SWE 620 Software Requirements Analysis and Specification
SWE 622 Distributed Software Engineering
SWE 625 Software Project Management
SWE 631/CS 631 Object-Oriented Design Patterns
SWE 637 Software Testing
SWE 641/SYST 621 Systems Architecture for Large-Scale Systems
SWE 781/ISA 681 Secure Software Design and Programming
SWE 645 Component-Based Software Development

Certificate in Software Engineering CERG-SWE

This graduate certificate program provides knowledge, tools, and techniques to those who are working in or planning to work in software engineering but do not want to complete requirements for a master’s degree in the field. The certificate may be pursued concurrently with any of the graduate degree programs in the Volgenau School.

Admission Requirements
Applicants must hold a baccalaureate degree from an accredited institution and have earned a GPA of 3.00 or higher in the last 60 credits. In addition, applicants must complete a self-assessment form, which can be obtained from the Computer Science Department. This form provides summary information concerning background and preparation for the program.

Applicants must possess knowledge equivalent to the following undergraduate courses: structured programming in a modern programming language, data structures, discrete mathematics, and machine organization. The level of knowledge may also be achieved by taking the following foundation courses at Mason: INFS 501 Discrete and Logical Structures for Information Systems, SWE 510 Object-Oriented Programming in Java, INFS 515 Computer Organization, and INFS 519 Program Design and Data Structures. In addition, it is desirable, but not necessary, for applicants to have at least one year of appropriate work experience in building or modifying software systems.

Applicants must submit a one- to two-page statement of educational and work experience in the computing field that includes a statement of career goals in software engineering. Students not enrolled in a Mason graduate degree program should apply for the certificate program through the Volgenau School Graduate Admissions Office. Students enrolled in a Mason graduate degree program should apply to the Computer Science Department for admission into the certificate program. Admission into the certificate program does not guarantee acceptance into any MS program.

Certificate Requirements
Students must complete five courses with an average grade of B or better for a total of 15 credits of graduate study.

Three required courses (9 credits):
SWE 619 Object-Oriented Software Specification and Construction
SWE 620 Software Requirements Analysis and Specification
SWE 621 Software Modeling and Architectural Design

Two additional courses (6 credits): (subject to satisfying their prerequisites) from the following:
CS 706 Concurrent Software Systems
CS 707 Distributed Software Systems
CS 735 Concurrency
SWE 622 Distributed Software Engineering
SWE 623 Formal Methods and Models in Software Engineering
SWE 625 Software Project Management
SWE 630 Software Engineering Economics
SWE 631 Object-Oriented Design Patterns
SWE 632 User Interface Design and Development
SWE 637 Software Testing
SWE 641/SYST 621 Systems Engineering of Information Architectures
SWE 642 Software Engineering for the World Wide Web
SWE 645 Component-Based Software Development
SWE 699 Special Topics in Software Engineering
SWE 720 Advanced Software Requirements
SWE 721 Reusable Software Architecture
SWE 723 Precise Modeling
SWE 763 Software Engineering Experimentation
SWE 781 Secure Software Design and Programming
SWE 724 Model-Driven Software Development
SWE 727 Quality of Service for Software Architectures
SWE 798 Research Project

Note: Students enrolled in the MS in Information Systems Program may substitute SWE 620 for INFS 622 to obtain this certificate. Credit is not given for taking both INFS 622 and SWE 620; only 3 credits will be awarded.

Students enrolled in the MS in Computer Science Program may obtain a certificate in software engineering by taking any five SWE courses. If CS/SWE 706 is included, it is possible to complete the MS in computer science and the certificate in software engineering within 30 hours.

Certificate in Web-Based Software Engineering CERG-WBSE

This graduate certificate program provides knowledge, tools, and techniques to those who are working in or planning to work in web and distributed software applications. Graduate students in the Volgenau School may pursue a specialization in web-based software engineering leading to this certificate.
Admission Requirements

Applicants must hold a baccalaureate degree from an accredited institution and have earned a GPA of 3.00 or better in the last 60 credits. Applicants must complete a self-assessment form, which can be obtained from department or the department web site. The form provides information concerning background and preparation for the program.

Applicants must possess knowledge equivalent to that provided by the following courses: INFS 501 Discrete and Logical Structures for Information Systems, SWE 510 Object-Oriented Programming in Java, INFS 515 Computer Organization, and INFS 519 Program Design and Data Structures.

Students not enrolled in a Mason graduate degree program should apply to the certificate program through the Volgenau School Graduate Admissions Office. Students enrolled in a Mason graduate degree program should contact the department for admission to the certificate program. Admission to the certificate program does not guarantee admission to any MS program.

Certificate Requirements

Students must complete five courses with an average grade of B or higher for a total of 15 credits of graduate study.

Three required courses (9 credits):
SWE 622 Distributed Software Engineering
SWE 632 User Interface Design and Development
SWE 642 Software Engineering for the World Wide Web

One of the following courses (3 credits):
CS 656 Computer Communications and Networking
ECE 542 Computer Network Architectures and Protocols
INFS 612 Principles and Practices of Communication Networks

One of the following courses (3 credits):
CS 707 Distributed Software Systems
INFS 614 Database Management
ISA 666 Internet Security Protocols
SWE 619 Object-Oriented Software Specification and Construction
SWE 621 Software Modeling and Architectural Design
SWE 637 Software Testing
SWE 645 Component-Based Software Development

For more information, please consult the department web site.

■ Computer Science, PhD PHD-CS

The PhD program requires course work, qualifying and comprehensive examinations, and a doctoral dissertation that is first proposed and eventually defended. Mason's general doctoral requirements apply to this program.

Admission Requirements

All applicants must have an undergraduate degree, and their prior academic work must show a strong academic background in computer science. In addition, they must have taken the GRE exams: the General Test is required from every applicant; the Subject Test in Computer Science is not required but is recommended. Finally, each applicant must provide a brief statement of career goals and personal aspirations, as well as three letters of reference. Each application receives careful consideration from the PhD Admission Committee.

Qualifying Exams

Students must demonstrate breadth of knowledge in computer science by passing written qualifying exams. The exams are offered once every semester (usually in the week before the semester begins). To qualify, each student must pass exams in four areas, one of which is foundations of computer science. The other three areas are chosen from these eight areas: operating systems, networks, compilers and languages, object-oriented software specification and construction, software modeling and architectural design, artificial intelligence, database systems, and information systems security. The four exams must be attempted in the same semester, and a failed exam may be retaken once only in the next semester. A student who fails to pass the four exams in two consecutive semesters is subject to termination from the program. Each student must take a set of four exams no later than the first opportunity following the completion of 24 credits. If a student enters the program without a master's degree in computer science or a related area, then the exams must be taken no later than the first opportunity following the completion of 36 credits.

Course Requirements

The course requirement for the degree is 72 credits. Of these, 30 credits at most may be granted for an approved MS degree. The following courses, totaling 30 credits, are required from all students: CS 700 Quantitative Methods and Experimental Design in Computer Science (3 credits); CS 800 Computer Science Colloquium (2 credits); CS 990 Dissertation Topic Presentation (1 credit); CS 998 Doctoral Dissertation Proposal (12 credits); and CS 999 Doctoral Dissertation (12 credits). The remaining 12 credits must be obtained in advanced graduate courses chosen from a list maintained by the program.

Dissertation Committee Selection

Each student must form a dissertation committee, comprising four or five individuals. Three members of the committee must be tenured or tenure-track faculty in the Computer Science Department. The fourth member must be from outside the department. The chair of the dissertation committee, who must also be the dissertation director, must be tenured or tenure-track faculty in the Volgenau School. The committee must be approved by the chair of the Computer Science Department and the associate dean for graduate studies of the Volgenau School.

Comprehensive Exam

Students must pass an oral comprehensive exam, in which they demonstrate depth of knowledge in their intended area of research, and ability to perform original research in that area. The scope of the oral exam is defined by a reading list prepared by the student and the dissertation director. The list should include research papers and textbooks that adequately cover the basic tools used in the research area, the fundamentals of the research area, and state-of-the-art knowledge in the specific focus of research. The reading list must be accompanied by a one-page description of the intended research. This document must be approved by the dissertation committee prior to the exam and becomes part of the student’s record. The duration of the oral exam is typically two hours. Students who fail the exam are allowed to retake it once. Failure in the second attempt results in dismissal from the program.
Dissertation Proposal

Each student must prepare a written dissertation proposal. While preparing this proposal, the student enrolls in CS 998 Doctoral Dissertation Proposal. The proposal must be presented to and approved by the dissertation committee. The committee determines whether the proposal has merit and can lead to significant contributions to the area and whether the student has the knowledge and skills to complete the proposed work successfully and in a timely manner. On completing this requirement successfully, the student is advanced to candidacy for the PhD degree.

Dissertation Preparation and Defense

While preparing the dissertation, the candidate enrolls in CS 999 Doctoral Dissertation. When the work is deemed complete, the dissertation is defended. The public defense is preceded by a predefense meeting in which only the candidate, the dissertation committee members, and possibly the director of the PhD in Computer Science Program (or his or her representative) are present. If the committee approves, the candidate may then schedule the final public defense. There should be at least one month between the predefense meeting and the defense, and the defense must be announced at least two weeks in advance. The dissertation must be made available to the committee at least two weeks in advance of the defense. The entire dissertation committee must be present at the defense, unless an exception is approved by the director of the PhD in Computer Science Program in advance of the defense. The dissertation must make significant contributions to its area and be publishable in refereed journals or conferences. If the candidate defends the dissertation successfully, the dissertation committee recommends that the final form of the dissertation be completed under the supervision of the dissertation director and the graduate faculty of Mason accept the candidate for the PhD degree. If the candidate fails to defend the dissertation, the candidate may request a second defense, following the same procedures as for the initial defense. There is no time limit for this request, other than general time limits for the doctoral degree, and an additional predefense is not required. A candidate who fails a second attempt to defend the dissertation is dismissed from the program.

PhD Study in Information Technology with CS Concentrations

Doctoral study in information systems, software engineering, and information security is available through the PhD in Information Technology Program, which offers advanced courses in these disciplines. The doctoral program allows students to take a broad range of courses and research options. Students can specialize in various areas including information systems, software engineering, and information security.

Information Technology, PhD

▲ Concentration in Information Security and Assurance (ISA)

Students who pursue a concentration in this doctoral program will have the concentration noted on their transcript. The degree conferred on a graduating student is the PhD in information technology with concentration in information security. Students may also pursue such doctoral studies without designating a concentration.

Requirements

Students seeking this concentration must satisfy all requirements for the PhD in information technology. In addition, the following requirements must be met.

Plan of Study

All decisions concerning the student’s course requirements and plan of study must be approved by the advisor or director, with the consent of Computer Science doctoral coordinator.

Doctoral Supervisory Committee

The dissertation director must be a faculty member of the Volgenau School. The composition of the doctoral supervisory committee is to be approved by the Computer Science doctoral coordinator and department chair, and the Volgenau School associate dean for research and graduate studies. Permission for the comprehensive exam and dissertation defense is requested from the Volgenau School associate dean on the basis of a written request and plan that has been approved by the supervisory committee and the Computer Science doctoral coordinator.

For information regarding qualifying exams and emphasis areas, please consult the department web site.

Information Technology, PhD

▲ Concentration in Information Systems (ISYS)

Students pursing a concentration in this doctoral program will have the concentration noted on their transcript. The degree conferred on a graduating student is the PhD in information technology with concentration in information systems. Students may also pursue such doctoral studies without designating a concentration.

Requirements

Students seeking this concentration must satisfy all the requirements for the PhD in information technology. In addition, the following requirements must be met.

Plan of Study

All decisions concerning the student’s course requirements and plan of study must be approved by the advisor or director, with the consent of the Computer Science doctoral coordinator.

Doctoral Supervisory Committee

The dissertation director must be a Computer Science faculty member. The composition of the doctoral supervisory committee must be approved by the Computer Science doctoral coordinator, the Computer Science chair, and the Volgenau School associate dean for research and graduate studies. Permission for the comprehensive exam and dissertation defense is requested from the Volgenau School associate dean on the basis of a written request and plan approved by the supervisory committee and the Computer Science doctoral coordinator.

For information regarding qualifying exams and emphasis areas, please consult the department web site.
**Information Technology, PhD**

▲ Concentration in Software Engineering (SWE)

Students who pursue a concentration in this doctoral program will have the concentration noted on their transcript. The degree conferred on a graduating student is the PhD in information technology with concentration in software engineering. Students may also pursue such doctoral studies without designating a concentration.

**Requirements**

Students seeking this concentration must satisfy all requirements for the PhD in information technology. In addition, the following requirements must be met.

**Plan of Study**

All decisions concerning the student’s course requirements and plan of study must be approved by the advisor or director, with the consent of the Computer Science doctoral coordinator.

**Doctoral Supervisory Committee**

The dissertation director must be a faculty member of the Computer Science Department. The composition of the doctoral supervisory committee is to be approved by the Computer Science doctoral coordinator, the Computer Science chair, and the Volgenau School associate dean for research and graduate studies. Permission for the comprehensive exam and dissertation defense is requested from the Volgenau School associate dean on the basis of a written request and plan that has been approved by the supervisory committee and the Computer Science doctoral coordinator.

For information regarding qualifying exams and emphasis areas, please consult the department web site.

**Electrical and Computer Engineering**

Phone: 703-993-1569  
Web: ece.gmu.edu

**Faculty**

**Professors:** Allnutt, Cook, Ephraim, Gertler, Griffiths, Ioannou, Jabbari, Katona, Levis, Manitius (chair), Mulpuri

**Associate professors:** Berry, Chang, Gaj, Hintz, Mark, Paruchowitz, Paris, W. Sutton, Wage

**Assistant professors:** Hwang, Kaps, Li, Nelson, Peixoto, Sikdar

**Adjunct professors:** Bales, Beatty, Gharay, Holdener, Lazarevich, Mital, Rader, Shackelford, Storey, Watson, West

**Course Work**

The Electrical and Computer Engineering (ECE) Department offers all courses designated ECE and BENG in the Course Descriptions chapter of this catalog. The department also offers most of the courses designated TCOM and some ENGR courses.

---

**UNDERGRADUATE PROGRAMS**

The undergraduate education mission of the ECE Department is to provide a quality education for electrical engineering, computer engineering, and electronics and communications engineering students to support the needs of Virginia and the nation.

The objectives of undergraduate programs within the ECE Department relate to the abilities of our graduates three to five years after graduation. These objectives include:

- **Technical knowledge:** Graduates will be able to apply the fundamentals in the appropriate engineering discipline as demonstrated by success as productive engineers in industry, government, or graduate school.

- **Preparation for further study:** Graduates will have the knowledge and skills to engage in lifelong learning.

- **Professionalism:** Graduates will have the skills and understanding needed to fulfill their professional responsibilities as engineers, including written and oral communication, ethics, and teamwork.

**Computer Engineering, BS**

The field of computer engineering can be described as a blend of electrical engineering and computer science. It is an amalgam of the computer hardware orientation of an electrical engineering program and the operating systems and languages of a computer science program. Computer engineers are involved in research, development, design, production, and operation of a wide variety of digital systems, from integrated circuits to computer systems and large-scale computer networks. Reflecting the industry trend to integrate hardware and software development, the computer engineering program is built around software running on advanced hardware that can simulate and assist in the design of new digital systems. Advanced software, such as VHDL, and software tools, such as logic and system design tools by Mentor Graphics and Cadence Design Systems, can be used to model hardware and hardware functionality from the system and architecture level down to the gate level and include relations to integrated circuit fabrication technology. Design and testing methodology involving these tools is taught in the program.

Career opportunities exist in engineering research and development, product design, digital system design and integration, engineering management, engineering consultancy, technical sales, and patent law, among others. The program provides a strong preparation for graduate study.

The bachelor’s program in computer engineering at Mason is accredited by the Engineering Accreditation Commission of the Accreditation Board for Engineering and Technology, 111 Market Place, Suite 1050, Baltimore, Maryland 21202-4012; 410-347-7700. The computer engineering program is staffed by 25 full-time professors, including five fellows of IEEE or other professional societies.

The curriculum provides a strong background in the fundamentals of computer engineering. A number of technical elective concentrations are offered, ranging from strongly hardware-oriented concentrations to strongly software-oriented ones. A major project with appropriate planning, documentation, and oral and written reports is required.

The requirements for the degree may be satisfied on a part-time or co-op basis. Cooperative education provides students the opportunity to integrate paid career-related work experience.
with classroom learning. In addition to the usual financial aid available to all students through the Office of Student Financial Aid, computer engineering majors are eligible to apply through the ECE Department for several scholarships provided by professional societies and industrial organizations, including the Armed Forces Communications and Electronics Association, the Association of Old Crows, the Institute of Electrical and Electronics Engineers, and Rockwell International.

**Degree Requirements**

All computer engineering students are strongly encouraged to see their major advisor each semester before course registration. Students interested in computer engineering who have not declared a major are also invited to obtain advising at the ECE Department office. Students are strongly encouraged to follow the sample schedule below to ensure that course prerequisites are satisfied.

Students must complete each ECE, ENGR, and CS course presented as part of the required 120 credits for the degree with a grade of C or better.

The 120 credits required for the BS in computer engineering are as follows:

- Electrical and computer engineering: ECE 201, 220, 280, 331, 332, 333, 334, 445, 447, 448, 465, 491, 492, 493
- Computer science: CS 112, 211, 262, 367, 471
- Technical electives (9 credits)
- Engineering: ENGR 107
- English: ENGL 101, 302; COMM 100
- Literature general education course (3 credits)
- Economics: ECON 103
- Western civilization: HIST 100 (3 credits)
- Arts general education course (3 credits)
- Global understanding general education course (3 credits)
- Mathematics: MATH 113, 114, 125, 203, 213, 214; STAT 346
- Physics: PHYS 160, 161, 260, 261, 262
- Synthesis general education course: ECE 492/493

**Note:** General education courses should be selected from the department’s list of approved courses. All students must submit at least 24 credits of social science and humanities course work, which is normally satisfied by the 24 credits of university general education social science and humanities courses listed above. Technical electives should be selected from the department’s list of approved technical elective concentrations. Students are also encouraged to propose additional technical elective concentrations for approval.

### Sample Schedule

The following presents a sample schedule that undergraduate computer engineering majors would pursue to obtain a bachelor’s degree.

#### First Semester

<table>
<thead>
<tr>
<th>Course</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>CS 112 Computer Science I</td>
<td>4</td>
</tr>
<tr>
<td>ECON 103 Contemporary Microeconomic Principles</td>
<td>3</td>
</tr>
<tr>
<td>ENGL 101 Composition</td>
<td>3</td>
</tr>
<tr>
<td>ENGR 107 Engineering Fundamentals</td>
<td>2</td>
</tr>
<tr>
<td>MATH 113 Analytic Geometry and Calculus I</td>
<td>4</td>
</tr>
<tr>
<td><strong>Total</strong></td>
<td><strong>16</strong></td>
</tr>
</tbody>
</table>

#### Second Semester

<table>
<thead>
<tr>
<th>Course</th>
<th>Credits</th>

#### Change of Major

Students who want to change their majors to computer engineering must have at least a 2.75 GPA in all math, physics, engineering, and computer science courses, and should have successfully completed MATH 114.

#### Writing-Intensive Requirement

Mason’s writing-intensive requirement is satisfied by completion of ECE 492 and 493 Senior Advanced Design Project I and II, in which various aspects of project documentation and reports are prepared and critiqued. The faculty provides feedback on student writing. Drafts and revisions are required.
Double Major in Computer Engineering and Computer Science

Computer engineering majors can earn a double major in computer engineering and computer science if they complete an additional 26 credits of courses according to an approved plan of study. Details are available in the department brochures or at the Volgenau School website ite.gmu.edu.

Electrical Engineering, BS - BS-ELEN

Electrical engineering is a major field of modern technology. Electrical engineers are involved in research, development, design, production, and operation of a wide variety of devices and systems, from integrated circuits and microwave and laser devices, communication systems, control systems, radar, robots, large telecommunication networks, and power networks.

The bachelor’s program in electrical engineering at Mason is accredited by the Engineering Accreditation Commission of the Accreditation Board for Engineering and Technology, 111 Market Place, Suite 1050, Baltimore, Maryland 21202-4012; 410-347-7700. The electrical engineering program is staffed by 25 full-time professors, including five fellows of IEEE or other professional societies. The curriculum provides a strong background in the fundamentals of electrical engineering and senior-level courses in the important areas of electronics, networks, communications and signal processing, computer engineering, and controls and robotics. Further, the curriculum includes 9 credits of senior technical electives, 2 credits of advanced engineering labs, and 3 credits of senior advanced design project, which may be used for further concentration in one of these areas.

Career opportunities exist in engineering research and development, system design, system integration, engineering management, engineering consultancy, technical sales, and patent law, among others. The program provides a strong preparation for graduate study.

Degree requirements may be satisfied on a part-time or co-op basis. Cooperative education provides students with the opportunity to integrate paid career-related work experience with classroom learning. In addition to the usual financial aid available to all students through the Office of Student Financial Aid, electrical engineering majors are eligible to apply at the ECE Department for several scholarships provided by professional societies and industrial organizations, including the Armed Forces Communications and Electronics Association, the Association of Old Crows, the Institute of Electrical and Electronics Engineers, and Rockwell International.

Degree Requirements

All electrical engineering students are strongly encouraged to see their major advisor before course registration each semester. Students interested in electrical engineering who have not declared a major also are invited to obtain advising from the ECE Department. Students are strongly encouraged to follow the sample schedule below to ensure that course prerequisites are satisfied.

Students must complete each ECE and ENGR course presented as part of the required 120 credits for the degree with a grade of C or better.

The 120 credits required for the BS in electrical engineering are as follows:

Electrical and computer engineering: ECE 101, 201, 220, 280, 305, 320, 331, 332, 333, 334, 421, 433, 445, 460, 491, 492, 493

Computer science: CS 112, 222

Advanced ECE labs (2 credits)

ECE technical electives (9 credits)

Engineering: ENGR 107

English: ENGL 101, 302; COMM 100

Literature general education course (3 credits)

Economics: ECON 103

Western civilization: HIST 100 course (3 credits)

Arts general education course (3 credits)

Global understanding course (3 credits)

Mathematics: MATH 113, 114, 203, 213, 214; STAT 346

Physics: PHYS 160, 161, 260, 261, 262, 263

Synthesis general education course: ECE 492/493

Note: General education courses should be selected from the department’s list of approved courses. All students must submit at least 24 credits of social science and humanities course work, which is normally satisfied by the 24 credits of university general education social science and humanities courses listed above. Technical electives should be selected from the department’s list of approved courses. The required design content must be satisfied by the technical electives.

Concentrations

Concentrations are available within the electrical engineering baccalaureate program. Completion of specific science courses and senior-level courses leads to one of these designations on the student’s transcript on graduation.

Concentration in Bioengineering (BIOE)

In place of 13 credits of PHYS 262, PHYS 263, ECE 460, ECE 492, ECE 493, and one 3-credit technical elective as listed under the Degree Requirements section above, take 13 credits of BIOI 213 (4 credits), BENG 401 (4 credits), BENG 402 (1 credit), BENG 492 (2 credits), and BENG 493 (2 credits).

Concentration in Communications and Signal Processing (CSP)

Students must complete

• ECE 461
• ECE 492/493, Senior Advanced Design Project, with a communications and signal processing topic
• Three courses from ECE 410, 462, 463, 464, 465, 499 (communications and signal processing topic only), 528, 535, 567, 590 (communication and signal processing topic only), and PHYS 306

Concentration in Computer Engineering (CPE)

Students must complete

• ECE 447
• ECE 492/493, Senior Advanced Design Project, with a computer engineering topic
• Two courses from ECE 431, 437, 448, 450, 499 (computer engineering topic only), 548, 590 (computer engineering topic only), and CS 471

Concentration in Control Systems (CON)

Students must complete

• ECE 429
• ECE 492/493, Senior Advanced Design Project, with a control systems topic
• Three courses from ECE 422, 447, 450, 499 (control systems topic only), 511, 521, 528, 549, and 590 (control systems topic only)

▲ Concentration in Electronics (ELE)
Students must complete
• ECE 434 or ECE 435
• ECE 492/493 Senior Advanced Design Project, with an electronics topic
• Three courses from ECE 430, 431, 437, 447, 448, 499 (electronics topic only), 513, 520, 563, 565, 567, 584, 586, 587, 590 (electronics topic only), PHYS 306, and PHYS 308

Sample Schedule
The following is a sample schedule that an undergraduate electrical engineering major would follow to obtain a bachelor's degree.

First Semester
CS 112 Computer Science I .................................................. 4
ECON 103 Contemporary Microeconomic Principles ............. 3
ENGR 107 Introduction to Engineering .................................. 2
ENGL 101 Composition ....................................................... 3
MATH 113 Analytic Geometry and Calculus I ....................... 4
Total ................................................................................. 16

Second Semester
CS 222 Computer Programming for Engineers .................... 3
ECE 101 Information Technology for Electrical Engineers .... 3
MATH 114 Analytic Geometry and Calculus II ..................... 4
PHYS 160 University Physics I ............................................ 3
PHYS 161 University Physics I Laboratory ............................ 1
Total ................................................................................. 14

Third Semester
ECE 201 Introduction to Signal Analysis .............................. 3
MATH 213 Analytic Geometry and Calculus III ...................... 3
MATH 203 Matrix Algebra ................................................. 3
PHYS 260 University Physics II ........................................... 3
PHYS 261 University Physics II Laboratory .......................... 1
Literature course ............................................................... 3
Total ................................................................................. 16

Fourth Semester
ECE 280 Electric Circuit Analysis ........................................ 5
ECE 220 Signals and Systems I ............................................ 3
MATH 214 Elementary Differential Equations ....................... 3
PHYS 262 University Physics III .......................................... 3
PHYS 263 University Physics III Laboratory ........................ 1
Total ................................................................................. 15

Fifth Semester
ECE 320 Signals and Systems II ......................................... 3
ECE 331 Digital System Design .......................................... 3
ECE 332 Digital Electronics and Logic Design Lab .............. 1
ECE 333 Linear Electronics I ............................................. 3
ECE 334 Linear Electronics I Lab ....................................... 1
STAT 346 Probability for Engineers .................................... 3
Arts course ................................................................. 3
Total ................................................................................. 17

Sixth Semester
COMM 100 Oral Communication ........................................ 3
ECE 421 Classical Systems and Control Theory .................... 3
ECE 433 Linear Electronics II ............................................ 3
ECE 445 Computer Organization ........................................ 3
ECE 460 Communication and Information Theory ............... 3
Total ................................................................................. 15

Seventh Semester
ECE 305 Electromagnetic Theory ........................................ 3
ECE 491 Engineering Senior Seminar .................................. 1
ECE 492 Senior Advanced Design Project I ........................ 1
ENGL 302 Advanced Composition (for natural sciences) ..... 3
Advanced engineering lab .................................................. 1
Technical elective ............................................................ 3
Global understanding course ............................................. 3
Total ................................................................................. 15

Eighth Semester
ECE 493 Senior Advanced Design Project II ....................... 2
HIST 100 History of Western Civilization ........................... 3
Advanced engineering lab .................................................. 1
Technical elective ............................................................ 3
Technical elective ............................................................ 3
Total ................................................................................. 12

Change of Major
Students who want to change their major to electrical engineering must have at least a 2.75 GPA in all math, physics, engineering, and computer science courses, and should have successfully completed MATH 114.

Writing-Intensive Requirement
Mason’s writing-intensive requirement is satisfied by completing ECE 492 and 493 or BENG 492 and 493, Senior Advanced Design Project I and II. Faculty members provide feedback on student writing. Drafts and revisions are required.

Electronics and Communications Engineering, BS (Ras Al Khaimah Campus only)
The bachelor’s program in electronics and communications engineering will be offered only at Mason’s Ras Al Khaimah Campus in the United Arab Emirates. This program will provide quality education in electronics and communications engineering to meet the emerging needs of many employers in the region. The program emphasizes learning of fundamental engineering knowledge in subjects, such as signals and systems; digital logic; circuits and electronics; and theory and applications of digital communications, including a specific emphasis in the areas of networks and wireless communications. Several credits of engineering test and measurement and computer-based laboratory work are included in the program. The graduation requirements also include an engineering seminar and a capstone senior design project. It is expected that graduates of the program will have competitive skills in the areas of computer networking, wireless communications, and satellite communications. This program is not accredited by the Engineering Accreditation Commission of the Accreditation Board for Engineering and Technology.

Degree Requirements
All electronics and communications engineering students are required to see their major advisor before course registration each semester. Students are strongly encouraged to follow the sample schedule below to ensure that course prerequisites are satisfied.

Students must complete each ECE and ENGR course presented as part of the required 120 credits for the degree with a grade of C or better.
The 120 credits required for the BS in electronics and communications engineering are as follows:

Engineering: ENGR 107; ECE 101, 201, 220, 280, 305, 320, 331, 332, 333, 334, 431, 433, 434, 460, 461, 462, 463, 491, 492, 493

Information technology: IT 300, 481, 488

Computer science: CS 112

English: ENGL 101, 302; COMM 100

Literature general education course (3 credits)

Economics: ECON 103

Western civilization: HIST 100 course (3 credits)

Arts general education course (3 credits)

Global understanding general education course (3 credits)

Mathematics: MATH 113, 114, 203, 213, 214; STAT 346

Physics: PHYS 160, 161, 260, 261, 262, 263

Synthesis general education course: ECE 492/493

Note: General education courses should be selected from the department’s list of approved courses. All students must submit at least 24 credits of social science and humanities course work, which is normally satisfied by the 24 credits of university general education social science and humanities courses listed above.

Concentrations

In addition to the general ECE Program, a concentration in information technology (INFT) is also offered. Students will follow the basic ECE Program but do not take certain required courses and instead take a set of alternative required courses. See the note preceding the sample schedule for a listing of courses that are not part of the INFT concentration and a listing of the alternative courses, required for the INFT concentration.

▲ Concentration in Information Technology (INFT)

In place of 24 credits of ECE 305, 320, 431, 433, 434 and 461, and IT 300 and 481, and PHYS 262 and PHYS 263 as listed under the Degree Requirements section above, take 24 credits of CS 211 (3); and IT 341 (3), 342 (3), 441 (3), 445 (3), 455 (3), 462 (3); and IT 484 (3).

Writing-Intensive Requirement

Mason’s writing-intensive requirement is satisfied by completing ECE 492 and 493 Senior Advanced Design Project I and II. Faculty members provide feedback on student writing. Drafts and revisions are required.

BS/Accelerated MS in Electrical Engineering or Computer Engineering

This program is for highly capable students who are interested in immediately continuing their undergraduate academic program in electrical or computer engineering into a graduate program in their respective discipline. It allows for the completion of both bachelor’s and master’s degrees in electrical engineering or computer engineering in five years with 144 credits.
Admission Requirements
Students can apply for the program during the semester in which they expect to complete 90 undergraduate credits applicable toward the BS degree. An overall GPA of at least 3.50 at the time of application is required. Criteria for admission are identical to criteria for admission to the MS in Electrical Engineering Program or the MS in Computer Engineering Program. Application is made using the accelerated graduate program application forms, and all usual requirements must be met. The accelerated program application form specifies the overlapping courses and details the 3.50 undergraduate GPA.

Degree Requirements
Students must complete 144 credits that satisfy all the requirements for the BS and MS degrees, with 6 credits overlap. Students take 6 credits of 500-level courses as part of their technical electives or substitutes for required courses as part of their 120-credit undergraduate program. The specific courses that may be taken and applied to the accelerated program will be specified by the ECE Department. Students may take additional graduate-level courses as part of their BS technical electives with advisor approval. These additional graduate-level courses will not count toward the MS degree. Students admitted to the accelerated program must maintain an overall GPA of at least 3.50 during the entire BS/MS program and present a GPA of at least 3.50 for the 24 credits of graduate work submitted for the MS degree.

Degree Conferral
Students must apply to have the BS in electrical engineering or computer engineering conferred the semester before they expect to complete the BS requirements. At the completion of the MS requirements, the MS degree will be awarded.

GRADUATE PROGRAMS
Graduate programs leading to MS and PhD degrees in engineering prepare students for careers in industry, government, and academia. Graduate certificate programs provide well-defined targets for students who want to advance or update their knowledge in selected areas. ECE offers the PhD in electrical and computer engineering, MS degrees in computer engineering and electrical engineering, and certificates in communications and networking, signal processing, and very large-scale integration design and manufacturing. The PhD in information technology is offered by the Volgenau School and includes a number of courses with an electrical engineering or computer engineering emphasis. Details about these programs are available at the gm.edu.

ECE is committed to high standards of teaching and research excellence in communications, digital systems design, computer networks, microprocessor and embedded systems, distributed computing, signal and image processing, control systems, intelligent systems, microelectronics, electromagnetics, and optoelectronics. The department recognizes the need to augment and enhance these areas through the use of modern IT. Graduate students are offered a progressive environment with ample opportunities for the type of advanced engineering research needed to confront the complex realities of the 21st century.

The courses in these programs are offered during the evening or late afternoon hours to accommodate students who are employed full time. For those who enter the programs on a full-time basis, some financial aid may be available in various forms, such as teaching assistantships, research assistantships, and work-study and co-op agreements with local industry.

Admission
Admission is very competitive. The department’s policy is to admit only those students who have demonstrated a potential for outstanding performance in their graduate work.

Admission Categories
Each student may be admitted into one of the following categories: degree, provisional, or nondegree. Provisional admission is for anyone whose past performance provides reasonable, but not strong, evidence of ability to pursue graduate work. To advance to degree status, a provisional student must achieve a 3.00 GPA after 12 credits, remove all undergraduate deficiencies by completing the corresponding courses with grades of B or better, and receive Bs or better in two core courses specific to the student’s selected program and emphasis. The nondegree category is used primarily by students who want to take courses but not necessarily pursue a degree. Nondegree students seeking to enter degree programs must formally apply for admission.

Admission Requirements
To be considered for admission to the master’s program, applicants should have a baccalaureate degree in electrical engineering, computer engineering, or a closely related discipline from an accredited program with a reputation for high academic standards, and have earned a GPA of B or better during the last 60 credits. Other requirements are as follows:

• Three letters of recommendation, preferably from academic references or references in industry or government who hold advanced degrees and are familiar with the applicant’s professional accomplishments
• Detailed statement of career goals and aspirations
• For students who have not earned a bachelor’s degree from a U.S. university, satisfactory performance on the GRE
• For students whose native language is not English, a minimum TOEFL score of 575 for the paper-based exam or 230 for the computer-based exam. A minimum score of 600 for the paper-based exam or 250 for the computer-based exam is required for applicants who wish to be considered for a graduate teaching assistantship.

Non-ECE Students
Students with BS or MS degrees in ECE-related disciplines (for example, computer science, mathematics, mechanical engineering, physics, or electrical engineering technology) are encouraged to apply for admission. They may initially be admitted into the provisional category and advance to degree status by satisfying requirements described in the Admissions Categories section. Such students may also be advised to take some courses from the undergraduate electrical or computer engineering curriculum, according to their intended areas of emphasis and specific backgrounds.

Computer Engineering, MS

The computer engineering field is at the interface of the computer science and electrical engineering disciplines because it involves knowledge of hardware and software de-
velopment. The major distinction between computer engineering and computer science is that the computer engineer is more concerned with the physical implementation of computing devices, the interaction between hardware and software, and the methodologies for designing digital systems. The major distinction between computer engineering and electrical engineering is that the computer engineer is more concerned with the computational aspects of electrical engineering problems and the implementation of these solutions in digital devices. The computer engineering program offers the following emphases: digital systems design, computer networks, distributed computing systems, microprocessor and embedded systems, and network and system security.

**Course Work**

Students must complete a minimum of 30 graduate credits beyond the bachelor’s degree. This work must represent a cohesive set of courses leading to comprehensive knowledge in one area of computer engineering; it cannot be a set of disjointed courses. The plan of study for the degree must include the following:

- **Two core courses** (with a B or better in each) from the following:
  - CS 571 Operating Systems
  - ECE 511 Microprocessors
  - ECE 542 Computer Network Architectures and Protocols
  - ECE 545 Introduction to VHDL
  - ECE 548 Sequential Machine Theory
  - Minimum of three courses, with a grade of B or better in each, at the 600 level and above (not including ECE 798 or 799), including approved doctoral courses (800 and 900 levels)

The remaining courses must be taken from the list of approved computer engineering courses (available through the ECE and Computer Science Department offices and on the web), which includes selected courses offered by both departments.

The plan of study usually has no fewer than 15 credits of courses designated ECE.

Lists of courses appropriate for emphases areas, such as digital systems design, computer networks, network and system security, and microprocessor and embedded systems, are available from the department office. A self-defined emphasis may be created when appropriate, with the approval of the computer engineering graduate program coordinator. This emphasis must include components of hardware and software development and the corresponding plan of study must comprise courses from ECE and the Computer Science Departments.

**Electrical Engineering, MS**  **MS-ELEN**

The electrical engineering program offers the following emphases: bioengineering, communications, signal processing, control and robotics, microelectronics, electromagnetics, and optoelectronics. Computer engineering remains a valid emphasis within the electrical engineering program; however, students interested in this emphasis are encouraged to pursue the MS in computer engineering instead.

**Course Work**

Students must complete a minimum of 30 graduate credits beyond the bachelor’s degree. This work must represent a cohesive set of courses leading to comprehensive knowledge in one area; it cannot be a set of disjointed courses. The plan of study for the degree must include the following:

- **Minimum of two core courses**, with a B or better in each, from the following:
  - ECE 521 Modern Systems Theory
  - ECE 528 Introduction to Random Processes in Electrical and Computer Engineering
  - ECE 548 Sequential Machine Theory or ECE 546 Parallel Computer Architectures
  - ECE 584 Semiconductor Device Fundamentals or ECE 565 Introduction to Optical Electronics
- **Minimum of three courses**, with a B or better in each, at the 600 level or above (not including ECE 798 or 799) from a chosen emphasis, including approved doctoral courses (800 and 900 levels)
- **Maximum of 6 credits of non-ECE courses**, subject to prior department approval. Approved IT courses (including doctoral 800- and 900-level courses) that cover ECE topics may be taken for credit toward an MS in electrical engineering, subject to prior department approval, in addition to the 6 credits of non-ECE courses.

**Common Degree Requirements for CPE or ELEN Master’s Program**

The following policies apply to students pursuing the MS in computer engineering or the MS in electrical engineering.

**Student Advising**

Newly admitted graduate students must consult with the ECE graduate coordinator before they register for classes. Students should make an appointment by calling the ECE office. Students are expected to select an emphasis from those available in each MS degree program. Students then are assigned an academic advisor from that area.

**Plan of Study**

Before the end of the second semester, each student must submit to the graduate coordinator’s office a plan of study that has been approved by the academic advisor. This plan should be kept up to date by regular consultation with the academic advisor. A final, signed version of the plan must be turned in when the student submits a graduation application.

**Seminar Requirement**

All degree candidates must attend a minimum of 10 graduate seminars approved for the given degree program.

**GPA Requirements**

A maximum of 6 credits of courses with grades of C or B- may be applied toward the degree. The student must present a GPA of at least 3.00 for all courses submitted for the degree.

**Graduation Requirements**

To complete requirements for graduation, students may select one of the following options:

**Thesis Option**

Students must complete ECE 799 Master’s Thesis (6 credits) and 24 credits of course work. The thesis is particularly recommended for those students who wish to develop and document their research skills or contemplate subsequent enrollment in a PhD program. The thesis involves a research effort, which is conducted under the guidance of a faculty advisor. In some
cases, permission may be granted to complete a portion of the work at the student’s place of employment. The final written thesis and oral defense are approved by the student’s advisory committee.

For the electrical engineering program, this committee consists of at least three full-time faculty members, including two from the student’s major area, and one from outside the area. For the Computer Engineering Program, this committee includes faculty members from the ECE and the Computer Science Departments, including at least two affiliated with the MS in Computer Engineering Program, one of whom must be from ECE and one from outside the MS in Computer Engineering Program. Thesis students may not register for ECE 798 Research Project. Students must register for at least 3 credits of thesis for their first thesis semester. Following their first thesis semester, they must register for at least 1 credit of thesis each fall and spring semester until graduation.

Scholarly Paper Option

Students who select this option must complete 30 credits of course work or 27 credits of course work plus ECE 798 Research Project, and must present a scholarly paper. The scholarly paper, with the theme selected under the guidance of a faculty advisor, can be a technical report on an independent study or laboratory or computer experimentation; a literature search on a current scientific or technological topic, such as a survey of new technologies or new methodologies; or a case study of new applications. Students must demonstrate knowledge of the topic and make a satisfactory technical presentation of the paper in the graduate seminar. The scholarly paper and final presentation must be approved by the student’s advisory committee. When a student elects to submit an ECE 798 final report as a scholarly paper, it is expected that the 3 credits of effort in ECE 798 will result in a much more substantial paper than a scholarly paper submitted in addition to 30 credits of regular course work.

Certificate in Communications and Networking

This certificate provides graduate students with the opportunity to reach a demonstrated level of competence in communications and networking. Course work toward the graduate certificate may be used for credit toward the MS in electrical engineering or computer engineering; however, the certificate’s primary purpose is to provide a well-defined target for students who want to advance their knowledge of modern communications but do not necessarily want to complete requirements for the MS degree. The certificate may be pursued concurrently with any of the graduate degree programs in the Volgenau School.

Admission Requirements

The certificate program in communications and networking is open to all students who hold BS degrees in scientific and engineering disciplines from accredited universities.

Certificate Requirements

The certificate is awarded on completion of five graduate courses (15 credits) in communications and networking. A cumulative GPA of 3.00 is required and one course with a grade of C at most may be applied toward the certificate. The certificate courses comprise two required foundation courses and three elective courses.

Foundation courses (6 credits):
ECE 528 Introduction to Random Processes in Electrical and Computer Engineering
ECE 542 Computer Network Architectures and Protocols
or CS 656 Computer Communications and Networking

Elective courses (9 credits):
After completing the foundation courses, students choose electives by taking three courses from the following:
ECE 535 Digital Signal Processing
ECE 565 Introduction to Optical Electronics
ECE 567 Optical Fiber Communications
ECE 630 Statistical Communication Theory
ECE 633 Coding Theory
ECE 635 Adaptive Signal Processing
ECE 642 Design and Analysis of Computer Communication Networks
ECE 643 Telecommunications Switching Systems
ECE 646 Cryptography and Computer Network Security
ECE 663 Fourier Optics and Holography
ECE 731 Digital Communications
ECE 732 Mobile Communication Systems
ECE 734 Detection and Estimation Theory
ECE 735 Data Compression
ECE 737 Spread Spectrum Communications
ECE 738 Advanced Digital Signal Processing
ECE 739 Satellite Communications
ECE 741 Wireless Networks
ECE 742 High-Speed Networks
IT 834 Telecommunications Networks
IT 886 Information Theory
OR 635 Discrete System Simulation
OR 643 Network Modeling
OR 647 Queuing Theory

Certificate in Signal Processing

This certificate provides graduate students with a concise sequence of courses and laboratory experiences within the wide field of signal processing. Course work toward the graduate certificate may be used for credit toward the MS in electrical engineering, computer engineering, or statistical science; however, the certificate’s primary purpose is to provide a well-defined target for students who want to advance or update their knowledge in this fast-moving field, but who do not necessarily wish to complete requirements for the MS degree. The certificate may be pursued concurrently with any of the graduate degree programs in the Volgenau School.

Admission Requirements

The program is open to all students who hold BS degrees in scientific and engineering disciplines from accredited universities and hold graduate status (either degree or nondegree) in the Volgenau School.

Certificate Requirements

The certificate is awarded on completion of five graduate courses (15 credits) in signal processing. A cumulative GPA of 3.00 is required, and one course with a grade of C at most may be applied toward the certificate. The certificate courses comprise two foundation courses taken by all students and three elective courses.
Admission Requirements

The program is open to all students who hold a BS degree in scientific and engineering disciplines and hold graduate student status (degree or nondegree) in the Volgenau School. Students with nonscientific and nonengineering degrees are required to take remedial courses before being admitted into the certificate program.

Certificate Requirements

The certificate is awarded on completion of five graduate courses (15 credits): a required foundation course, a compulsory core course, and three electives. A cumulative GPA of 3.00 is required, and only one course with a grade of C may be applied toward the certificate. At most, one course may be transferred from graduate course work at other accredited universities.

After completing the foundation course (ECE 684), students choose one of the two emphases, VLSI design or VLSI manufacturing, by taking four courses in that emphasis, one of which will be the core course in that area.

Foundation course (3 credits):

ECE 684 MOS Device Electronics

VLSI Design Emphasis (12 credits)

Core course:

ECE 586 Digital Integrated Circuits

Electives

Take 9 credits from the following:

ECE 545 Introduction to VHDL
ECE 587 Design of Analog Integrated Circuits
ECE 645 Computer Arithmetic: Hardware and Software Implementations
ECE 680 Physical VLSI Design
ECE 681 VLSI Design Automation
ECE 682 VLSI Test Concepts

VLSI Manufacturing Emphasis (12 credits)

Core course

ECE 689 VLSI Processing

Electives

ECE 586 Digital Integrated Circuits
ECE 680 Physical VLSI Design
ECE 745 ULSI Microelectronics

PhD in Electrical and Computer Engineering

This program, offered by ECE, is the only combined electrical engineering and computer engineering doctoral program in Virginia. The program prepares students for leadership positions in research and development in industrial, government, and academic settings. It includes course requirements; a qualifying exam testing fundamental concepts and the ability to think creatively; a teaching requirement; a research competency exam; and dissertation proposal defense, dissertation research, and dissertation defense. Students may choose an emphasis in such areas as communications, networking, computer engineering, control and robotics, signal processing, electronics, photonics, and electromagnetics. These emphasis areas may include biological or medical applications. Mason’s general doctoral requirements apply to this program.

Admission Requirements

All general Mason and specific Volgenau School admission requirements apply. In addition, all applicants, including Mason undergraduates, must submit official transcripts (undergraduate and graduate) and official results of the GRE General Test. Applicants whose native language is not English must submit official TOEFL results showing a minimum score of 575 for the paper-based exam or 230 for the computer-based exam. A minimum score of 600 for the paper-based exam or 250 for the computer-based exam is required.
for applicants who wish to be considered for a graduate teaching assistantship. Students typically admitted to the program hold MS degrees in electrical engineering, computer engineering, and other related areas. Students holding European (or equivalent) diploma degrees may also be considered for admission. The application material for each student is reviewed by the department doctoral committee, which makes a recommendation to the department chair.

**Advisor and Dissertation Director**

On admission to the program, each student is assigned a faculty member as advisor. On passing the qualifying exam, the advisor is replaced by or becomes the dissertation director. All decisions concerning the student’s course requirements and selections must be approved by the PhD advisor with the consent of the ECE Department chair.

A dissertation committee is formed within a year after the student has passed the qualifying exam. The committee is headed by the dissertation director and includes two more graduate faculty members from ECE Department and one from outside the department. One more member, from outside the university, may be added to the dissertation committee if justified by the subject of the dissertation. The composition of the dissertation committee must be approved by the ECE Department chair.

**Course Requirements**

After the BS degree, 72 credits are required; dissertation research is usually 24 credits. Students entering with an MS degree may use up to 30 credits of course work from their MS program, subject to approval. Students entering with European diploma degrees may use some course credit, subject to individual consideration, but not more than 30 credits.

Of the required 42 credits of course work, a maximum of 6 credits may be at the 500 level and at least 9 credits must be at the 700 level or higher. For courses taken elsewhere, the equivalent levels are to be determined by the PhD advisor, subject to approval by the ECE Department chair. Individualized reading courses at any level cannot account for more than 6 credits.

ECE 798 Research Project is primarily an MS course and is not intended to be part of the PhD course work. Research in the PhD program should be included in ECE 998 and ECE 999 courses.

Students are required to take one graduate course (3 credits) at the 600 level outside the department in a subject considered foundational for their area of specialization. Typical examples are advanced mathematics or statistics courses for those pursuing an emphasis in signal processing or control, physics courses for those desiring an emphasis in electronics, and computer science courses for those pursuing the computer engineering emphasis. Because such courses are usually not taken for MS degrees, this requirement can rarely be satisfied with a course taken previously.

Students are required to take two courses (6 credits) within the department but outside their area of emphasis. This requirement may be satisfied with courses taken during previous studies, subject to approval. Candidates must complete a minimum of 12 credits of doctoral proposal (ECE 998) and doctoral dissertation research (ECE 999). A maximum of 24 credits of ECE 998 and ECE 999 may be applied to the degree.

Students who choose to take fewer than 24 credits of ECE 998 and ECE 999 may earn the remaining credits from approved course work. Students cannot enroll in ECE 999 before their research proposal is accepted and approved by the dissertation committee.

**Qualifying Exam**

The department offers a doctoral qualifying exam once each year. The exam is primarily for testing the student’s familiarity with fundamental concepts and the ability to think creatively.

Students must take the exam within the first year after they have entered the program with an MS degree. Students in the MS-PhD track must take the exam within the first year after they have completed 24 credits beyond the BS degree. The qualifier consists of a written in-class exam and an oral interview. Students must select one area from the list below for their qualifying exam. The qualifying exam may be repeated once. A student failing the exam twice is removed from the program. The qualifying exam is not tied to any particular course. It is offered in the following areas, and each area consists of four subjects:

- Area A: Communications, Controls, and Signal Processing
- Area B: Computer Engineering
- Area C: Electronics and Devices

The written exam consists of two problems in each subject. Students must solve five problems from no more than three subjects in their selected area. Subject to ECE Department approval, students with a non-ECE background may substitute one subject compatible with their background and relevant to their planned research in the ECE PhD program. Information technology PhD transfer students are required to take the ECE qualifying exam.

**Teaching Requirement**

To acquire lecturing and teaching experience, each doctoral student is required to participate in the department’s teaching activity. This typically takes the form of working as a recitation instructor. The minimum requirement is one full semester of such activity in one course or equivalent arrangements approved by the doctoral coordinator.

**Research Competency Exam, Dissertation Proposal, Advancement to Candidacy**

On completing all course work requirements, students take an oral research competency exam to demonstrate their preparation for dissertation research. The exam comprises a presentation of the research dissertation proposal and competency in the knowledge derived from higher-level courses relevant to the student’s research and familiarity with technical literature. The exam is administered by the student’s dissertation committee.

The student prepares a written dissertation proposal outlining the contents of the dissertation and the research activities leading up to it. The dissertation proposal is submitted to the dissertation committee for approval. The proposal is orally presented as part of the research competency exam. Upon passing this exam, the student is advanced to candidacy.

**Dissertation Research and Defense**

Students conduct dissertation research under the guidance of their dissertation director, with regular consultation with other members of the dissertation committee. During this
period, students must present research results at least once in the form of a department seminar. The dissertation must represent an achievement in research, must be a significant contribution to its field, and should be deemed publishable in refereed journals or at highly selective conferences. On completion of the dissertation, a public defense is administered by the dissertation committee, which may be preceded by a predefense in the presence of the committee members only at the committee’s discretion. A copy of the dissertation must be placed in the University Libraries four weeks prior to the public defense. After a successful public defense and completion of the final form of the dissertation, the dissertation committee recommends the candidate for the degree of doctor of philosophy.

**Interdisciplinary Programs**

### E-Commerce, MS  
**MS-ECOM**  
**Phone:** 703-993-1640  
**Web:** ite.gmu.edu/msecom

Managed by the Computer Science Department within the Volgenau School, the MS in E-commerce Program is a joint degree program with the School of Management (SOM), the School of Public Policy (SPP), the School of Law, the College of Humanities and Social Sciences (CHSS), and the College of Health and Human Services (CHHS). The program provides graduates with depth and breadth knowledge required to apply electronic-commerce (e-commerce) concepts, tools, and methods to problems faced by industry, government, and nonprofit organizations in the digital economy. They will study the management, public policy, and information technology (IT) viewpoints, and effectively integrate them in developing e-commerce solutions to a wide variety of applications, such as electronic government, electronic banking, digital content management, and health information systems. More important, they will respond to the demand for professionals to work in various capacities in digital age organizations in Northern Virginia and elsewhere. This program is composed of a few new courses, with the designation EC in the Course Descriptions chapter of this catalog, as well as existing courses as indicated in the Degree Requirements section that follows.

**Format**

Completion of the degree program requires 36 credits. All students complete an e-commerce core (the breadth requirement) comprising six courses from four interdisciplinary foundation disciplines totaling 18 credits. Following completion of these core courses, students take specialized courses, for a total of 15 credits, in one of four chosen fields of specialization: IT, business and economics, public policy and law, and health care and services industry. Students deepen their theoretical and practical knowledge through courses in their specialization (the depth requirement), building on a common core of knowledge.

One of the unique features of the degree program is an e-commerce capstone project course (3 credits), taken by all students at the completion of all course work. The capstone project is an interdisciplinary course that reinforces and integrates material covered in core and specialization courses. It allows students to pursue a mixed-team-based practical project related to e-commerce in an identified area of opportunity. This capstone project gives students an integrative experience in response to digital age challenges and opportunities. It also allows them to work with other students having diverse backgrounds.

### Admission Requirements

Applications must be submitted to the Volgenau School Graduate Admissions Office. Applicants must fulfill all admission requirements for graduate study at Mason; hold a baccalaureate degree with a satisfactory GPA from an accredited college or university; and demonstrate programming experience in at least one block-structured programming language such as Java, C, C++, Visual Basic, or Pascal, or in a scripting language such as JavaScript, used in web design. This experience can be obtained through courses or work experience. Course descriptions and syllabi, as well as copies of transcripts and grades obtained, must be provided. If only work experience is available, a statement describing the work experience in programming must be submitted. This statement should include the name of the organization, the type of programs the applicant was responsible for developing, years of experience in each job, and the programming languages used.

Applicants must submit transcripts of all postsecondary education; a self-assessment form (usually included in the application package or available online); a one- to two-page statement of educational and work experience; three letters of recommendation; and official reports of the GRE, GMAT, or LSAT. TOEFL scores are required from non-native English speakers who did not use English as the official language in their college education.

### Degree Requirements

In addition to meeting the general requirements that apply to all master’s degrees at the university, completion of this program requires the following:

**Core courses (21 credits):**  
- EC 511 E-commerce Basic IT Infrastructure  
- EC 512 E-commerce Software Services  
- EC 521/MBA 603 Managerial Economics and Decisions of the Firm  
- EC 522/MBA 613 Financial Reporting and Decision Making  
- EC 531 Law and Public Policy in E-commerce or PUBP 710 Special Topics  
- MBA 734 Electronic Commerce or HAP 601 Electronic Commerce and Online Marketing for Health Services  
- EC 600 Group Project in Electronic Commerce (3 credits)

**Concentration or specialization (15 credits):**  
An IT concentration and three specializations in business and economics, public policy and law, and health care and services industry are offered. Take 15 credits in one of the four areas.

#### Information Technology Concentration (INFT)

Students who select this specialization must take 15 credits, which must include the following three courses (3 credits each):  
- CS 650 Database Engineering or INFS 614 Database Management  
- CS 555 Computer Communications and Networking, ECE 542 Computer Network Architectures and Protocols, or INFS 612 Principles and Practices of Communication Networks
ISA 562 Information Security Theory and Practice
Also, students must take at least one course from List A that follows and at most one course from Lists B, C, or D to complete the five courses required for this specialization.

The Computer Science Department has created a special certificate program in electronic commerce for MS in e-commerce students that may be used for the IT concentration, which consists of the following courses:
INFS 612 Principles and Practices of Communication Networks
INFS 614 Database Management
ISA 562 Information Security Theory and Practice
ISA 767 Secure Electronic Commerce

Business and Economics Specialization
Students must take MBA 623 Marketing Management, and select four additional courses from the following:
MBA 712 Project Management
MBA 725 Leadership
MBA 731 Business Systems Analysis and Design
MBA 732 Knowledge Management
MBA 733 Business Data Communications
MBA 734 Electronic Commerce and E-Business
MBA 735 Systems Thinking and Business Simulation

Public Policy and Law Specialization
Students must take 15 credits by choosing, in consultation with their advisor, a coherent set of courses from List C below.

Health Care and Services Industry Specialization
Students must take 15 credits: 12 required and 3 elective credits. Electives are selected, in consultation with the advisor, from List D below. The required courses are as follows:
HAP 601 Electronic Commerce and Online Marketing for Health Services
HAP 678 Introduction to the U.S. Health System
HAP 709 Health Care Databases
HAP 740 Management of Health Information Systems
HAP 760 can be waived for students who have prior, broad health care experience. HAP 709 can be waived for students with prior experience with database design and structured query language. Electives may be used to substitute for HAP 678 and 709. Suggested electives are HAP 720 Health Data Integration, HAP 745 Health Care Security Policy, and those from List D below.

Courses in Concentrations and Specializations
A description of these courses can be found in the Course Descriptions chapter of this catalog. Students must satisfy the prerequisites for these courses or obtain permission from the instructor.

List A (Information Technology)
CS 571, 671, 672, 673, 719/IT 809, 750/INF 750, CS 755; ECE 646, 741; INF 601, 623, 640, 750, 755, 760, 770, 772, 774; ISA 562, 564, 650 656, 674, 681, 763, 765, 767; OR 635; SWE 619/CS 619, SWE 620/CS 620, SWE 621/CS 621, SWE 632/CS 632, SWE 642; SYST 781/INF 781/STAT 781. Note: CS 571 and INF 601 are mutually exclusive; only one can be used for the MS in E-Commerce Program. CS 650 and INF 614 are mutually exclusive; only one can be used for the MS in E-Commerce Program.

List B (Business and Economics)
MBA 623, 712, 725, 731, 732, 733, 734, 735

List C (Public Policy and Law)
ITRN 604, 612, 712, 730, 731, 742, 756, 759, 772, 773; LRNG 762; PUBP 710 (special topics with approval) 736, 737, 760

Engineer Degree in
Information Technology

The engineer degree is a post-master’s degree but does not confer a doctorate. Students in the engineer degree can take advanced PhD courses and complete a project of an applied nature to fulfill program requirements.

Admission Requirements
Admission requirements for the engineer degree are the same as for the PhD in information technology.

Plan of Study
The program is made up of specialized course work followed by completion of an applied project summarized in a project report. Under the guidance of the supervisory committee, students prepare a tentative plan of study. The plan lists the intended courses and their expected timing. The plan should also contain a tentative subject for the applied project.

Specialized Course Work
Students must include in the plan of study a well-defined advanced concentration area. Successful completion of this requirement should enable students to conduct applied research in a significant contemporary area in IT.

The supervisory committee and the Volgenau School associate dean for research and graduate studies must approve a plan of study. These approvals must occur before a student completes the courses in the area of concentration. There is no guarantee that a course taken before this approval will be accepted. Students must take 30 credits of graduate-level course work. A GPA of 3.50 is required in these credits.

Students may waive up to 6 credits of course work by passing two of the qualifying exams (3 credits for each exam) from any of the PhD programs offered by the Volgenau School. The plan of study may include at most 3 credits of directed reading course work. At least 12 credits must be in courses numbered 700 or higher, and these 12 credits cannot include directed reading, a project, or thesis courses.

Courses that cannot be included in any plan of study are any INF 500-level courses; IT 500 and 599; OR 540; STAT 510, 512, and 530; and SYST 500. The associate dean must approve exceptions to any of these rules in advance.

Supervisory Committee
On admission to the program, students are assigned a temporary advisor. Students are responsible for working with the temporary advisor until they select a project director and a
supervisory committee. It is recommended that a student form a supervisory committee as soon as feasible.

The supervisory committee includes the project director plus at least two additional members. The committee must contain at least two graduate faculty members from the Volgenau School. It is strongly recommended that the committee include at least one person from outside the university who is knowledgeable in the subject area of the project. The supervisory committee supervises the project proposal presentation and the project defense.

Project Proposal Presentation

Near the end of the course work, each student prepares a written project proposal, which is presented to the supervisory committee. Students may enroll in IT 996 Engineer Project Proposal to complete this effort. During the term students expect to present the project proposal to the committee, they should enroll in IT 991 Engineer Project Presentations. After successfully completing this requirement, students are formally admitted as candidates for the engineer degree. The application for candidacy is submitted to the Office of the Associate Dean on a standard form.

Project and Final Defense

With the concurrence of the supervisory committee, students proceed with the project research, during which time they must continuously enroll in IT 997 Engineer Project. Students must complete a minimum of 12 credits from among IT 991, 996, and 997, with a minimum of 6 credits of IT 997. When the central portions of the project work have been completed to the point that students are able to describe the contributions of the project effort, they submit the written project report to the supervisory committee. Once the committee believes the student is ready, a final public oral defense may be scheduled; the application for the defense must be submitted to the associate dean at least one month in advance of the defense so that the announcement is posted for at least two weeks.

Following a satisfactory evaluation of the oral defense of the project by the supervisory committee, the student must submit, with supervision from the project director, a final project that the supervisory committee supervises the project proposal presentation and the project defense.

Project Proposal Presentation

Near the end of the course work, each student prepares a written project proposal, which is presented to the supervisory committee. Students may enroll in IT 996 Engineer Project Proposal to complete this effort. During the term students expect to present the project proposal to the committee, they should enroll in IT 991 Engineer Project Presentations. After successfully completing this requirement, students are formally admitted as candidates for the engineer degree. The application for candidacy is submitted to the Office of the Associate Dean on a standard form.

Project and Final Defense

With the concurrence of the supervisory committee, students proceed with the project research, during which time they must continuously enroll in IT 997 Engineer Project. Students must complete a minimum of 12 credits from among IT 991, 996, and 997, with a minimum of 6 credits of IT 997. When the central portions of the project work have been completed to the point that students are able to describe the contributions of the project effort, they submit the written project report to the supervisory committee. Once the committee believes the student is ready, a final public oral defense may be scheduled; the application for the defense must be submitted to the associate dean at least one month in advance of the defense so that the announcement is posted for at least two weeks.

Following a satisfactory evaluation of the oral defense of the project by the supervisory committee, the student must submit, with supervision from the project director, a final project that represents a definitive contribution to applied knowledge in IT. This document must meet format guidelines specified by the Guide for Preparing Graduate Theses, Dissertations, and Projects and must be submitted to the library. If the candidate successfully defends the project, the supervisory committee recommends that the final form of the project be completed and Volgenau School faculty and the graduate faculty of Mason accept the candidate for the engineer degree.

Applying and Completing a PhD Program

Students who are awarded an engineer degree are able, at a later date, to work toward a PhD in information technology. Some restrictions and limitations apply. After applying and being accepted into the PhD in Information Technology Program, students will be able to apply for a reduction of up to 12 credits in course requirements. The request must satisfy the rules for transfer credit at Mason, and courses must be relevant to the student’s planned dissertation research. In addition, the qualifying exams for the doctoral program will be waived for such students. All other requirements for the doctoral program must be satisfied.

| Information Technology, PhD |

PHD-INFT

The general doctoral requirements of Mason apply to this program.

When the term “information technology (IT) and engineering” is used at Mason to describe the school and its activities, it is intended to mean information technology and the branches of engineering most closely associated with information use and management. These aspects of technology are emphasized in this geographic region, and the relevance of the IT doctoral program has grown with the increasing dependence of the nation’s commerce on the effective use of information. Our focus on the science and technology of information processing complements and enhances the more traditional approaches to engineering that are more strongly based on the physical and material sciences.

Course Work

The PhD in Information Technology Program offers courses designated IT in the Course Descriptions section of this catalog.

Admission Requirements

Students are selected on the basis of scholarship and potential from among applicants with appropriate degrees from institutions of high standing. Generally, a master’s degree in an information technology-related area, such as engineering, computer science, operations research, statistics, mathematics, physical sciences, economics, and psychology, is required for admission to the program.

In addition, well-qualified students without an appropriate master’s degree may apply directly to the PhD program. Such students will have to complete the equivalent of an appropriate Mason master’s degree as part of their program of study. In some cases, it may be possible to obtain transfer credit for graduate course work taken elsewhere, subject to meeting requirements for transfer credit imposed by the university. (The description here assumes that a student has already received an appropriate master’s degree.)

An undergraduate GPA of 3.00 and a graduate GPA of 3.50 scale are basic requirements for applicants. The admission process involves submitting the following materials: application for admission, undergraduate and graduate transcripts from previous colleges and universities attended, GRE test results when available or if required by the specific concentration, three letters of reference, a résumé, a short statement of career goals and aspirations, and a self-assessment of past background. Translations of international credentials must be provided if they are not in English. In some cases, applicants will be required to have documents evaluated by an external agency. An applicant’s entire background is examined before an admission decision is made.

Students who wish to be considered for Mason’s President Scholarship, which provides a stipend and tuition support for three years, must submit GRE scores with a score of at least 1,200 with their application. One President Scholarship is awarded per PhD program per year.

To ensure a common ground of fundamentals, students should have a background in such topics as calculus, differential equations, linear algebra, discrete structures, probability, and statistics. In addition, students entering the PhD in Information Technology Program must have a sound working knowl-
edge in computing as demonstrated by examples of programs or applications developed and tested in at least one high-level programming language environment. Because much of the course work within this program requires computational proficiency, experience with a variety of languages and computer hardware is useful as is an understanding of computer architecture. Highly qualified students who do not present evidence of appropriate course work may be admitted and then required to take appropriate articulation courses.

Plan of Study
The program is made up of a breadth requirement (assessed via qualifying exams) and specialized course work (assessed via the comprehensive exam), followed by preparation of a dissertation. Generally, students have already obtained a master’s degree in a field appropriate to IT, which prepares them for the qualifying exams.

Under the guidance of the doctoral supervisory committee, students prepare a tentative plan of study. The plan lists the intended courses and expected timing. The plan should also contain the intended dates of the qualifying and comprehensive exams, and a tentative subject of the dissertation research.

Qualifying Exams
To satisfy the breadth requirement of the PhD degree, students must pass a set of written qualifying exams designed to test fundamental knowledge. These exams correspond to a set of disciplines related to the individual master’s programs in the Volgenau School. Each exam is based on a reading list posted on the school’s web site. The qualifying exams are not associated with specific courses, although some courses may help students prepare for these exams. The qualifying exams are offered twice a year at specified locations on campus, typically near the beginning of the fall and the spring semesters. Each exam is allocated two hours. The exams are graded on a pass or fail basis.

Students must indicate which exams are being requested through an appropriate form signed by the student and the supervisor and submitted to the office of the associate dean.

Each student must pass a set of four different exams in two consecutive offerings of the exams. Four exams must be attempted in the first offering. Thus, the following passing scenarios are allowed: (1) pass all four on the first attempt, (2) pass three in the first attempt and one in the next, (3) pass two in the first attempt and two in the next, (4) pass one in the first attempt and three on the second, and (5) pass all four on the second attempt. The exams attempted on the second offering need not be the same as in the first. A student who fails to pass the qualifying exams under any of these scenarios is subject to termination from the program.

Students must take the qualifying exams within two years of enrolling in the program, unless fewer than 24 credits of course work have been completed in that time. Otherwise, the exams must be taken no later than the first opportunity after completion of 24 credits. If a student enters the program without a master’s degree, these time limits are measured from the date when the student completes the equivalent of an appropriate Mason master’s degree.

Advanced Emphasis Requirement
Students must include in the plan of study a well-defined set of advanced courses in a focused area. Successful completion of this requirement should enable the student to do basic or applied research in a significant contemporary area in IT.

The doctoral supervisory committee and the Volgenau School associate dean for graduate studies and research must approve the plan of study. These approvals must occur before a student completes courses in the area of concentration or specialization. There is no guarantee that courses taken before this approval will be accepted.

Students must take a set of 24 credits of graduate-level course work independent of the qualifying exams they take. That is, if a student takes a qualifying exam related to OR 541, then OR 541 cannot be counted as 3 credits of specialty course work. A GPA of 3.50 is required in these 24 credits. The plan of study may include a maximum of 3 credits of directed reading course work. At least 12 of the 24 credits must be in courses numbered 700 or higher, and these 12 credits cannot include directed reading, project, or thesis courses.

The following courses cannot be included in any plan of study: any INFS 500-level courses; IT 500 and 599; OR 540; STAT 510, 512, and 530; and SYST 500. Exceptions must be approved in advance by the associate dean.

Each PhD student is allowed to designate an emphasis from among the titles of the MS degree programs offered by the Volgenau School. For more information, see department sections.

Concentrations
Within the PhD in Information Technology Program, several concentrations are offered. For more information on the concentrations, please see the corresponding department sections of the catalog.

▲ Civil and Infrastructure Engineering (CEIE)
▲ Information Security and Assurance (ISA)
▲ Information Systems (ISYS)
▲ Operations Research (OPRS)
▲ Software Engineering (SWE)
▲ Systems Engineering (SYST)

Choosing a concentration narrows program flexibility, so it is not necessary to choose a concentration. In particular, a concentration may be inappropriate for students doing interdisciplinary research. Students who do declarate a concentration will have the concentration noted on their transcript.

Doctoral Supervisory Committee
On admission to the program, students are assigned a temporary advisor. Students are responsible for working with the temporary advisor until they choose a dissertation director and an advisory committee. Students should make this selection as soon after admission as possible. This is especially important for students who have completed a considerable amount of graduate work elsewhere.

Students work collaboratively with the program director and faculty to form the dissertation committee, with the understanding that some areas of research may be impossible to support due to available faculty expertise. Program personnel
will facilitate the formation of the dissertation committee to the extent possible, but there can be no guarantee of successful formation.

The doctoral supervisory committee includes the dissertation director, who must be a member of the Mason graduate faculty, and at least three other people from the Mason graduate faculty. At least three committee members must be from the Volgenau School and at least two of the departments of the Volgenau School must be represented on this committee.

In addition, industrial representatives and faculty members from departments outside the school are highly desirable, but not required, on the committee. The doctoral supervisory committee administers the comprehensive exam, dissertation proposal presentation, and the dissertation predefense and defense. Permission for the comprehensive exam and dissertation defense are requested from the Volgenau School associate dean on the basis of a written request and plan that has been approved by the supervisory committee.

**Comprehensive Exam**

The comprehensive exam is an oral exam taken after students have satisfactorily completed all course work requirements in their approved plan of study. To initiate the exam process, the student meets with the advisor to prepare a memorandum, which has to be approved by the entire supervisory committee, to be forwarded to the associate dean for research and graduate studies requesting the comprehensive exam and the appointment of an exam committee. The exam committee consists of the doctoral supervisory committee plus any outside examiners considered appropriate. The requesting memorandum should contain a list of all courses taken by the student that form the plan of study for the PhD, a one-page description of the intended area of research, and a reading list on which the student will be examined. The reading list should include articles or books that cover the fundamentals, state-of-the-art knowledge, and tools needed to perform research in the intended area. This exam is to be taken at a designated place on campus.

The objective of the comprehensive exam is to allow the exam committee to assess the student’s readiness to complete doctoral research in an area of concentration. The result of the comprehensive exam is a grade of pass or fail with recommendations for removing any deficiencies. Students must pass the comprehensive exam before being advanced to candidacy, i.e., passing the dissertation proposal exam. The comprehensive exam must be attempted for the first time no later than one year after completing all course work requirements.

Students who fail the comprehensive exam may request reexamination within 60 days of receiving notice of the exam result. The request should be made in writing to the associate dean. A student may request a new exam in a different format if the intended area of research has changed, but the request must comply with the rules specified above. If the student fails again or does not request reexamination within 60 days, the student will be dismissed from the program. Appeals on any of the two attempts must be submitted in writing to the associate dean within 15 days of the date the decision was communicated to the student.

**Dissertation Proposal Presentation**

Near the end of the course work, doctoral students prepare a written dissertation proposal, which is presented to the doctoral supervisory committee. Students may enroll in IT 998 Doctoral Dissertation Proposal to complete this effort. During the term the student expects to present the dissertation proposal to the committee, the student should enroll in IT 999 Dissertation Topic Presentations. After successfully completing this requirement, the student is formally admitted as a candidate for the PhD degree. The application for candidacy is submitted to the associate dean on a standard form.

**Dissertation and Final Defense**

With the concurrence of the advisory committee, students proceed with the doctoral research, during which time they must be continuously enrolled in IT 999 Doctoral Dissertation. Students must complete a minimum of 24 credits from among IT 990, 998, and 999, with a minimum of 12 credits of IT 999. When the central portions of the research have been completed to the point that students are able to describe the original contributions of the dissertation effort, they submit the written dissertation to the supervisory committee and schedule an oral defense for the committee. The predefense is to be held no sooner than one month after members of the committee have copies of the dissertation. Once the committee believes the student is ready, a final public oral defense may be scheduled no sooner than one month after the conclusion of the predefense so that the announcement is posted for at least two weeks. The entire dissertation committee must be present at the defense, unless an exception is approved by the associate dean in advance of the defense.

Following satisfactory evaluation of the oral defense of the dissertation by the supervisory committee, the student must prepare, with supervision from the dissertation director, a final publishable dissertation that represents a definitive contribution to knowledge in IT. This document must meet format guidelines specified by the Guide for Preparing Graduate Theses, Dissertations, and Projects. If the candidate successfully defends the dissertation, the dissertation defense committee recommends that the final form of the dissertation be completed and the Volgenau School faculty and the graduate faculty of Mason accept the candidate for the PhD degree.

If the student fails to successfully defend the dissertation, the student may request a second defense, following the same procedures as for the initial defense. There is no time limit for this request, other than general time limits for the doctoral degree. An additional predefense is not required, but students are strongly advised to consult with the committee before scheduling a second defense. If the student fails on the second attempt to defend the dissertation, the student will be dismissed from the program.

### Telecommunications, MS

**MS-TCOM**

Phone: 703-993-3810
Web: telecom.gmu.edu

The innovative, interdisciplinary MS in Telecommunications Program provides a blend of cutting-edge engineering-oriented courses in wireless and fiber communications systems, networks, computers, and Internet protocols, combined with courses on telecommunications policy, law, business, international aspects, and other fields. The interdisciplinary program is designed for students who wish to enter the field of telecommunications or are working in the field and want to advance their knowledge of telecommunications. It concentrates on practical applications of telecommunications rather than on the theoretical approach. It focuses on the engineer-
ing and IT aspects of telecommunications, in combination with the interdisciplinary knowledge offered by some of the courses in the former MA in Telecommunications Program, now incorporated in the School of Public Policy’s new master’s in telecommunications policy. More than 30 new engineering and IT courses have been designed specially for this program, including five certificate programs that may be incorporated into, and taken concurrently with, the MS in telecommunications. Two of the certificates are at an advanced level: the telecommunications forensics and security certificate and the advanced networking protocols for telecommunications certificate.

A novelty of the program is its structure, which consists of five specialty modules corresponding to areas of emphasis. The program offers a mix of 3-credit full-semester courses together with 1.5-credit half-semester courses. This structure allows students to identify more clearly the various specialties in telecommunications technology. Students enjoy considerable flexibility because they are able to design their master’s programs to fit their technical preferences, including the option of taking courses in other programs at Mason.

A majority of the course material comes from the Electrical and Computer Engineering (ECE) Department and the Systems Engineering and Operations Research (SEOR) Department. Courses offered by ECE focus on network technologies, such as fiber optics, ATM, and Internet protocols; network applications, such as networked multicomputer systems, client-server architectures, and network management; and wireless communications, such as digital communications, satellite communications, mobile communications, PCS, and GPS.

Unique courses in the telecommunications program, such as Border Gateway Protocols, Interior Gateway Protocols, MPLS, GPS, and Advanced Link Design, complement courses given in ECE programs. In addition to the many new telecommunications courses developed for this program, ECE already offers a number of other graduate courses in communications as part of the graduate electrical engineering and computer engineering programs. Those courses may also be taken for credit under the MS in Telecommunications Program, provided students have the prerequisite background. Courses related to systems engineering, project management, capacity modeling, and business of telecommunications (including the design and optimization of large, complex communication networks) are offered by SEOR. Both SEOR fields, systems engineering and operations research, play significant roles in all aspects of the design, operation, and business of telecommunications, and this knowledge is important for students of telecommunications.

The blend of in-depth knowledge of specific elements of telecommunications technology, combined with knowledge of broader issues in telecommunications, is increasingly necessary for people who intend to work in a management or decision-making position within the telecommunications industry, telecommunications-related businesses, or government institutions dealing with telecommunications. The MS in telecommunications provides that blend.

Course Work

The program offers courses designated TCOM in the Course Descriptions chapter of this catalog and some of the other disciplines’ courses listed below.

Format

The program consists of 9 credits of mandatory engineering and technology core courses (TCOM 500, 501, 502, and 521); 6 credits of electives drawn from an interdisciplinary group of core courses common with the former MA in telecommunications (PUBP 726, LAW 181, and TELE 750 or TCOM 750), and a basic switching lecture and laboratory course (TCOM 514) or an Internet protocol routing lecture and laboratory course (TCOM 515); and five specialty modules (areas of emphasis). Students who enter the program with an undergraduate degree that shows evidence of successfully completing LAN and WAN technologies may substitute TCOM 509 and TCOM 529 for TCOM 501 and TCOM 502 in their mandatory core program, respectively.

Students must complete 30 credits of course work through a combination of core courses and specialty modules. The core consists of 15 credits, with the remaining 15 credits earned in specialty modules. The specialty modules are subareas of telecommunications that provide the necessary depth in the selected areas of emphasis.

Students are usually expected to take courses from at least two specialty modules. Up to 6 credits from the core program may be carried forward into the specialty modules, thus permitting up to 6 credits of electives to be taken inside or outside the prime specialty module chosen by the student. TCOM 501/502 may be carried forward into specialty module 1, 2, or 3; TCOM 521 may be carried forward into specialty module 4 or 5. Double counting is not permitted, but the courses carried forward into a given module may permit that module’s credit requirement to be satisfied, thus allowing elective courses to be taken outside that module. Usually, a minimum of 6 credits is needed to satisfy one specialty module. Credit for each specialty module can be obtained by taking an appropriate combination of full-semester courses (3 credits) and half-semester courses (1.5 credits). In many cases, a pair of coordinated, half-semester courses (for example, TCOM 503/513) on fiber optic communications and networks permits students to take a half-semester course to get an introduction to the field or a full-semester course for a more complete knowledge of that topic.

Admission Requirements

Courses are open to students who hold a BS or BA degree from an accredited college or university in engineering, math, science, computer science, business (with a quantitative background), economics, or other analytical disciplines, and students who have equivalent work experience indicating analytical aptitude. Depending on their background, some applicants may be required to complete 3 to 6 credits of preliminary course work before they are allowed to enroll in any of the core courses or specialty courses in the program. Applicants who have not studied mathematics beyond the equivalent of algebra II/trigonometry at high school or introductory calculus classes (such as those offered in business or database management programs) will be required to take TCOM 575, the foundation course that prepares students for TCOM 500, prior to being allowed to take TCOM 500. A minimum undergraduate GPA of 3.00 is usually required.

Students may be admitted to the MS program as degree-seeking students, or they may be admitted for nondegree study within the program, which allows them to take individual courses. Students in the nondegree program may apply to the regular program, provided their GPA within the MS in Telecommunications Program is 3.00 or above. Up to 12 credits
earned in nondegree study may be transferred into the regular program, provided each of the courses to be transferred was passed with a grade of B or above.

Degree Requirements
Students must complete a minimum of 30 graduate credits with a GPA of 3.00 or higher. Students must earn a B (3.00) or above in core courses TCOM 500, 501, 502, and 521. Up to 6 credits of a combination of C or B- grades may be carried within the program from the remaining core courses or from the specialty module courses, provided the overall GPA is 3.00 or higher.

The plan of study includes the following:

15 credits from the following 21 credits of core courses:

Mandatory courses:
- TCOM 500 Modern Telecommunications (3 credits)
- TCOM 501 Data Communications and Local Area Networks (1.5 credits) or TCOM 509 Internet Protocols (1.5 credits)*
- TCOM 502 Wide Area Networks and Internet (1.5 credits) or TCOM 529 Advanced Internet Protocols (1.5 credits)*
- TCOM 521 Systems Engineering for Telecommunications Management (3 credits)

*Students must receive prior permission to make the substitution(s).

Elective courses (6 credits selected from the following):
- LAW 181 Telecommunications Law and Regulation (3 credits)
- PUBP 726 Telecommunications Policy and International Strategies (3 credits)
- TCOM 514 Basic Switching Lecture/Laboratory (3 credits) or TCOM 515 Internet Protocol Routing Lecture/Laboratory (3 credits)*
- TELE 750 Coordinating Seminar (3 credits) or TCOM 750 Coordinating Seminar (3 credits)**

*Both may be taken for credit, but only one may be used to satisfy the core elective requirement.

Minimum of 15 credits of courses listed under the following specialty modules:

Students usually take 15 credits from at least two of the five specialty modules, or they may elect to take all 15 credits from the systems engineering of telecommunications module (module 5). Students electing to carry forward a core course (TCOM 501/502 or TCOM 521) into an appropriate specialty module have the option of taking an elective course in that module or another module to bring the total number of credits in the specialty modules to 15.

A specialty module (group of courses in an area of emphasis) can be completed by a combination of full-segment courses and half-segment courses listed under the module or considered applicable to that module for a total of at least 6 credits in that module. Some specialty module courses, are in more than one module; for example, TCOM 509 Internet Protocols is in module 1, network technologies, and module 2, network applications. Half-segment 1.5-credit courses may only be counted in one module, even if they apply to more than one. Full-segment 3-credit courses may be counted in one module or split between two modules. For example, TCOM 551 Digital Communication Systems, which is in modules 1 and 3, may be counted as 3 credits in either module, or 1.5 credits in each module.

Basic courses in each module have been specially designed for the telecommunications program. These courses do not require completion of prerequisites from other MS programs in the Volgenau School. Other courses, which are marked with asterisks, are from other MS programs in the Volgenau School and represent viable options for students who have appropriate prerequisites in some technical areas. Although these courses assume certain prerequisites from their specific MS programs, advanced students who already know the prerequisite material can seek instructor permission to enroll in those courses.

Alternatives to completing each specialty module by using appropriate combinations of courses not listed under a given module may be admissible subject to prior approval by the program director. In addition, independent study, reading, and research courses may be taken in all five modules. These courses permit students to make use of their work experiences to undertake nonclassroom courses for credit within the program.

Mason has negotiated an articulation agreement with the University of Virginia that allows up to 12 credits of the Informational Systems Management certificate program from the University of Virginia to be transferred into modules 4 and 5 of the TCOM Program. In addition, graduate students from the National Defense University (NDU) may transfer up to 9 credits from NDU’s Information Security Certificate Program.

A capstone project course, TCOM 699, is required under the systems engineering of telecommunications module (module 5) should the student elect to take all 15 credits in this specialty module. Students taking only 7.5 credits in modules 4 or 5 have the option of taking TCOM 699, but the course is not required unless the student takes all 15 credits in module 5.

Specialty Modules
Courses marked with asterisks are courses from other graduate programs in the Volgenau School that can be taken for credit in this program if the student has the appropriate prerequisites. Other courses from other programs may be taken for credit, with prior approval.

Module 1. Network Technologies
- TCOM 503, 504, 505, 509, 510, 513, 515, 519, 529, 539, 548, 551, 556, 562, 609, 610, 660, 661, 663; ECE 513*, 542*, 565*, 642*, 643*, CS 571*, 656*, 756*

Module 2. Network Applications
- TCOM 505, 509, 510, 513, 515, 519, 529, 539, 540, 541, 548, 555, 556, 562, 603, 609, 610, 611, 660, 662, 663; ECE 646*; CS 656*, 756*; INFS 612*, 640*, 762*

Module 3. Wireless Communications
- TCOM 506, 516, 517, 518, 526, 551, 552, 562, 606, 607, 707; ECE 732*, 739*, 763*, 741*

Module 4. Modeling of Telecommunications Systems
- TCOM 540, 541, 542, 545, 546, 547, 548, 562, 699; OR 641*, 642*, 644*

Module 5. Systems Engineering of Telecommunications
This module may be taken as one of two specialty modules or as one 15-credit module. No more than two SYST courses can be taken within this module.
- TCOM 520, 546, 548, 699; SYST 510*, 513*, 520*, 542*, 562; INFS 612*, 614*, 640*; ITRN 772*
Applicable BS/Accelerated MS in Telecommunications Programs

This degree program may be taken as part of an accelerated MS in Telecommunications Program with four undergraduate degree programs: BS in systems engineering, computer science, information technology, and integrative studies. The four accelerated MS/BS programs are described below.

BS in Systems Engineering/Accelerated MS in Telecommunications

Students in the BS in Systems Engineering Program may elect to enter an accelerated MS in Telecommunications Program while they are undergraduate students. The program is designed for qualified undergraduate students in the systems engineering program who would like to proceed directly into the MS program, completing the two degrees with 144 credits. Students must satisfy requirements for the BS (120 credits) and the MS (30 credits), with 6 credits of overlap permitted. The MS is on an accelerated track, with 6 credits taken as an undergraduate and 24 credits completed as a graduate student. The 6 undergraduate credits must be selected from those given in the listing that follows.

Applicants must be Mason undergraduate students who preferentially have chosen to take the systems engineering of telecommunications elective sequence. Other students will be considered on their individual merit. Students may apply for the accelerated program during a semester after which they will have completed 90 or more credits applicable toward the BS in systems engineering as an undergraduate. Students must have an overall GPA of at least 3.25 to apply for the program. Students who have not yet finished 90 credits may be accepted provisionally subject to satisfactory completion of 90 credits. Criteria for admission are identical to criteria for admission into the MS in Telecommunications Program, except that students do not need to have completed an undergraduate degree prior to admission into the accelerated program.

Accepted students must maintain a minimum 3.25 GPA in the undergraduate segment of the accelerated program and a 3.00 GPA in the graduate segment. That is, students who have been accepted into the program must maintain a 3.25 average until they have satisfied all requirements for the BS in systems engineering. They must then maintain a minimum 3.00 GPA in the graduate segment. Should their GPA fall below 3.00 while a graduate student, they will be dropped from the accelerated program to the regular program. Those graduate telecommunications courses taken and applied to the BS program will no longer be admissible for the MS in telecommunications. Students must satisfy requirements for the BS in systems engineering and those graduate telecommunications courses taken and applied to their BS in Computer Science Program will no longer be admissible for the MS in telecommunications. If students are dropped from the accelerated program and have taken and applied telecommunications core courses toward their BS degree, they do not need to repeat those courses for the regular MS in Telecommunications Program if they obtained a grade of B or above in those courses; however, they will need to take elective courses in their place to satisfy the 30-credit requirement for the regular MS in telecommunications.

BS in Computer Science/Accelerated MS in Telecommunications

Students seeking a BS in computer science may elect to enter an accelerated MS in Telecommunications Program while they are undergraduate students. The accelerated program is designed for qualified undergraduate students in the computer science program who would like to proceed directly into the MS in Telecommunications Program, completing the two degrees with 144 credits. Accelerated students must satisfy the requirements for the BS in computer science (120 credits) and the MS in telecommunications (30 credits), with 6 credits of overlap permitted. The MS degree is on an accelerated track, with 6 credits taken as an undergraduate and 24 credits as a graduate student. The 6 undergraduate credits must be selected from those given in the listing that follows.

Applicants must be Mason undergraduate students in the computer science program. Students may apply for the accelerated program during a semester after which they will have completed 90 or more credits applicable toward the BS degree. Students must have an overall GPA of at least 3.25 to apply for the program. Students who have not yet finished 90 credits may be accepted provisionally subject to satisfactory completion of 90 credits. Criteria for admission into the accelerated program are identical to criteria for admission into the MS in Telecommunications Program, with the exception that students do not need to have completed an undergraduate degree prior to admission.

Accepted students must maintain a minimum 3.25 GPA in the undergraduate segment of the accelerated program and a 3.00 GPA in the graduate segment. That is, they must maintain a 3.25 average until they have satisfied all the requirements for the BS in computer science. They must then maintain a minimum 3.00 average in the graduate segment of the accelerated program. Should their GPA fall below 3.00 while a graduate student, they will be dropped from the accelerated program to the regular program, and those graduate telecommunications courses taken and applied to their BS in Computer Science Program will no longer be admissible for the MS in telecommunications. If students are dropped from the accelerated program and have taken and applied telecommunications core courses toward their BS degree, they do not need to repeat those courses for the regular MS in Telecommunications Program if they obtained a grade of B or above in those courses; however, they will need to take elective courses in their place to satisfy the 30-credit requirement for the regular MS in telecommunications.
Similarly, if students are dropped from the accelerated program and they have taken and applied noncore telecommunications courses toward the BS in computer science, they do not need to repeat those courses for the regular MS in Telecommunications Program if they obtained a C or higher for those courses. Elective courses will be required to replace telecommunications courses already taken and dropped from the program. **Note:** Up to two C grades may be carried in the regular telecommunications program in noncore courses. A minimum GPA of 3.00 is required to graduate with an MS in telecommunications.

Students must complete all requirements for the BS in computer science. Students in the accelerated program must apply to have the BS in computer science conferred the semester before they expect to complete the BS requirements. The MS in telecommunications is granted on completion of all requirements for the accelerated program.

Telecommunications courses that computer science undergraduate students may take as part of the accelerated program are noted below. All of the prerequisite courses indicated below must be passed with a grade of B or higher.

**Telecommunications courses:**
- TCOM 500 Modern Telecommunications
- TCOM 502 Wide Area Networks and Internet (prerequisite: TCOM 501 or CS 455, or equivalent)
- TCOM 503 Fiber Optic Communications (prerequisite: TCOM 500 or equivalent)
- TCOM 504 Asynchronous Transfer Mode Network (prerequisites: TCOM 501 and TCOM 502, or equivalent)
- TCOM 505 Networked Multicomputer Systems (prerequisites: TCOM 501, CS 455, ECE 462, or equivalent)
- TCOM 509 Internet Protocols (prerequisite: TCOM 501 and 502, or equivalent)
- TCOM 510 Client Server Architectures and Applications (prerequisite: TCOM 505)
- TCOM 513 Optical Communications Networks (prerequisite: TCOM 503)
- TCOM 519 Voice Over IP (prerequisites: TCOM 509, CS 455, or equivalent)
- TCOM 529 Advanced Internet Protocols (prerequisite: TCOM 509)
- TCOM 539 Advanced Voice Over IP (prerequisite: TCOM 519)
- TCOM 551 Digital Communication Systems (prerequisite: TCOM 500 or equivalent)
- TCOM 607 Satellite Communications (Prerequisite: TCOM 551, ECE 463, or equivalent)

**Note:** Students in the Accelerated BS in Computer Science/MS in Telecommunications Program who have passed CS 455 with a grade of B will not be required to take TCOM 501 in the MS in telecommunications core and may take an elective 1.5-credit course instead.

**BS in Information Technology/Accelerated MS in Telecommunications**

Students in the BS in Information Technology Program may elect to enter the Accelerated MS in Telecommunications (MS in TCOM) Program while they are undergraduate students. The accelerated program is designed for qualified undergraduate students in the information technology program who would like to proceed directly into the MS in TCOM Program, with the two degrees with 144 credits. Students must satisfy requirements for the undergraduate degree (120 credits) and the MS degree (30 credits), with 6 credits of overlap permitted. The MS in TCOM is on an accelerated track, with 6 credits taken as an undergraduate and 24 credits as a graduate student. The 6 undergraduate credits must be selected from those given in the listing that follows and will be substituted for BS degree concentration electives, subject to prior approval by an advisor. **Note:** Students in the accelerated program must take ECE 301 as one of their BS in information technology concentration electives.

Applicants must be Mason undergraduate students in the BS in Information Technology Program. Students may apply for the accelerated program during the semester after which they will have completed 90 or more credits applicable toward the BS degree. Students must have an overall GPA of at least 3.25 to apply for the program. Students who have not yet finished 90 credits may be accepted provisionally subject to satisfactory completion of 90 credits. Criteria for admission into the accelerated program are identical to criteria for admission into the MS in TCOM Program, except that students do not need to have completed an undergraduate degree prior to admission.

Accepted students must maintain a minimum 3.25 GPA in the undergraduate segment of the accelerated program and a 3.00 GPA in the graduate segment. That is, after students have been accepted into the accelerated program, they must maintain a 3.25 GPA and have satisfied requirements for the undergraduate degree. They must then maintain a minimum 3.00 GPA in the graduate segment of the accelerated program. Should their GPA fall below 3.00 while a graduate student, they will be dropped from the accelerated program to the regular program, and those graduate TCOM courses taken and applied to the BS in information technology will no longer be admissible for the MS in TCOM. If students are dropped from the accelerated program and have taken and applied TCOM core courses toward the BS degree, then they need not repeat those courses for the regular MS in TCOM Program if they obtained a grade of B or higher in those courses. But they will need to take elective courses in their place to satisfy the 30-credit requirement for the regular MS in TCOM.

Similarly, if students are dropped from the accelerated program and have taken and applied noncore TCOM courses toward the BS degree, then they do not need to repeat those courses for the regular MS in TCOM Program if they obtained a grade of C or higher for those courses. Elective courses will be required to replace TCOM courses already taken and dropped from the program. **Note:** Up to two C grades may be carried in the regular TCOM Program in nonmandatory core courses. A minimum GPA of 3.00 is required to graduate with an MS in TCOM.

Students must complete all requirements for the BS degree. Students in the accelerated program must apply to have the BS degree conferred the semester before they expect to complete the BS requirements. The MS in TCOM is granted on completion of all requirements for the accelerated degree.

TCOM courses that may be taken as an undergraduate student as part of the Accelerated BS in Information Technology/MS in TCOM Program are noted in the listing below. **Note:** All of the prerequisite courses indicated below must be passed with a grade of B or higher.

**Telecommunications courses:**
- TCOM 500 Modern Telecommunications
- TCOM 501 Data Communications and LANs (prerequisite: acceptance into the Accelerated BSIT/MS TCOM Program)
BIS/Accelerated MS in Telecommunications

Students who are in the Bachelor of Individualized Study (BIS) Program may elect to enter an Accelerated MS in TCOM Program while they are undergraduate students. The accelerated program is designed for qualified undergraduate students in the BIS Program who would like to proceed directly into the MS in TCOM Program, completing the two degrees with 144 credits. Accelerated students must satisfy requirements for the BIS (including 120 credits) and the MS (30 credits), with 6 credits of overlap permitted. The MS in TCOM is on an accelerated track, with 6 credits taken as an undergraduate and 24 credits as a graduate student. The 6 undergraduate credits must be selected from those given in the table that follows and will be substituted for BIS concentration courses, subject to prior approval by a BIS advisor. Note: Accelerated students must take ECE 301 or 303 as one of their BIS concentration courses.

Applicants must be Mason undergraduate students in the BIS Program. Students may apply for the accelerated program during the semester after which they will have completed 90 or more credits and 15 Mason resident credits applicable toward the BIS as an undergraduate. Students must have an overall GPA of at least 3.25 to apply for the program. Students who have not yet finished 90 credits may be accepted provisionally subject to satisfactory completion of 90 credits. Criteria for admission are identical to criteria for admission into the MS in TCOM Program, except that students do not need to have completed an undergraduate degree prior to admission into the accelerated program.

Students who have been accepted into the accelerated program must maintain a minimum 3.25 GPA in the undergraduate segment of the accelerated program and a 3.00 GPA in the graduate segment. That is, after students have been accepted into the accelerated program, they must maintain a 3.25 GPA until they have satisfied all requirements for the BIS degree. They must then maintain a minimum 3.00 GPA in the graduate segment of the accelerated program. Should their GPA fall below 3.00 while a graduate student, they will be dropped from the accelerated program to the regular program, and those graduate TCOM courses taken and applied to their BIS Program will no longer be admissible for their MS in TCOM degree. If students are dropped from the accelerated program and they have taken and applied TCOM core courses toward their BIS degree, then they do not need to repeat those courses for the regular MS in TCOM Program if they obtained a grade of B or above in those courses. But they need to take elective courses in their place to satisfy the 30-credit requirement for the regular MS in TCOM.

Similarly, if students are dropped from the accelerated program and they have taken and applied noncore TCOM courses toward their BIS degree, they do not need to repeat those courses for the regular MS in TCOM Program if they obtained a C grade or above for those courses. Elective courses will be required to replace TCOM courses already taken and applied to the BIS Program. Note: Up to two C grades may be carried in the regular TCOM Program in nonmandatory core courses. A minimum GPA of 3.00 is required to graduate with an MS in TCOM.

Students must complete all requirements for the BIS degree. Students in the accelerated program must apply to have the BIS degree conferred the semester before they expect to complete BIS requirements. The MS in TCOM is granted on completion of all requirements for the accelerated degree. TCOM courses that may be taken by a BIS undergraduate student as part of the accelerated program are given in the table below. Note: All of the prerequisite courses indicated below must be passed with a grade of B or higher.

Telecommunications courses:
- TCOM 500 Modern Telecommunications
- TCOM 501 Data Communications and LANs (prerequisite: acceptance to accelerated program)
- TCOM 502 Wide Area Networks and Internet (prerequisites: TCOM 501, IT 341, or equivalent)
- TCOM 503 Fiber Optic Communications (prerequisite: TCOM 500 or equivalent)
- TCOM 504 Asynchronous Transfer Mode Network (prerequisites: TCOM 501 and 502, IT 341, or equivalent)
- TCOM 505 Networked Multicomputer Systems (prerequisites: TCOM 501, IT 341, or equivalent)
- TCOM 509 Internet Protocols (prerequisites: TCOM 501 and 502, IT 341, or equivalent)
- TCOM 510 Client Server Architectures and Applications (prerequisite: TCOM 505)
- TCOM 513 Optical Communications Networks (prerequisite: TCOM 503)
- TCOM 519 Voice Over IP (prerequisites: TCOM 509, IT 341, or equivalent)
- TCOM 529 Advanced Internet Protocols (prerequisite: TCOM 509)
- TCOM 539 Advanced Voice Over IP (prerequisite: TCOM 519)
- TCOM 607 Satellite Communications (prerequisites: ECE 463, TCOM 551, or equivalent)
Note: Accelerated students who have passed IT 341 with a grade of B or higher will not be required to take TCOM 501 in the MS in TCOM core. They may take a 1.5-credit elective instead. Other TCOM courses may be approved on a case-by-case basis.

BIS Concentration ..................................................... 34–46
Credits
BIS 300/390/490/491 .................................................. 10
ECE 301 Digital Electronics or ECE 303 ......................... 3
IT 212 How Computers Work ..................................... 3
IT 341 Network/Operating ......................................... 3
TCOM 500 Modern Telecommunications ...................... 3
TCOM 504 Asynchronous Transfer Mode Networks ........ 1.5
TCOM 509/529 Internet Protocols/Advanced Internet Protocols (1.5 credits each) or TCOM 515 Internet Protocol Routing (3 credits)
TCOM 609 Interior Gateway Protocols (IGP) (3 credits)
TCOM 610 Border Gateway Protocols (BGP) (3 credits)

Elective Courses
Choose 6 credits from following:
TCOM 509/529 Internet Protocols/Advanced Internet Protocols (1.5 credits each)
TCOM 515 Internet Protocol Routing (3 credits)
TCOM 519/539 Voice Over IP/Advanced Voice Over IP (1.5 credits each)
TCOM 611 Multiple Protocol Label Switching (MPLS) (3 credits)
TCOM 662 Advanced Secure Networking (3 credits)
Note: TCOM 509/529 and TCOM 515 cannot be taken twice for credit. If any of these courses is taken in the core element, it cannot be taken again in the elective element.

Certificate in Network Technologies and Applications
The certificate provides a broad understanding of the technologies used in telecommunications networks and the various applications of telecommunications networks. To obtain the certificate, students must complete the following, for a total of 15 credits:

Core Courses
Choose 9 credits from the following:
TCOM 304 Asynchronous Transfer Mode Networks (1.5 credits)
TCOM 505 Networked Multicomputer Systems (1.5 credits)
TCOM 509 Internet Protocols (1.5 credits)
TCOM 510 Client-Server Architectures and Applications (1.5 credits)
TCOM 519 Voice Over IP (1.5 credits)
TCOM 529 Advanced Internet Protocols (prerequisite: TCOM 509)
TCOM 539 Advanced Voice Over IP (prerequisite: TCOM 519)
TCOM 555 Network Management (3 credits)

Elective Courses
Six credits are required. Students may elect to take any additional 6 credits from specialty modules 1, 2, and 3, including those in the mandatory course list that are not part of the 9 credits of core courses for the certificate.

Certificate in Information Technology Forensics and Security
The objective of this certificate is to provide an in-depth understanding of security and forensics as they apply to networks and digital storage media. Students must complete the following for a total of 15 credits:

Core Courses
Choose 9 credits from the following:
TCOM 548/556 Security Issues in Telecom/Cryptography and Network Security (1.5 credits each) or TCOM 515 Internet Protocol Routing (3 credits)
TCOM 562 Network Security Fundamentals (3 credits) or ISA 562 Information Systems Security (3 credits)
TCOM 660 Network Forensics (3 credits), TCOM 661 Digital Media Forensics (3 credits), or TCOM 663 Operations of Intrusion Detection for Forensics

Elective Courses
Choose 6 credits from the following:
ISA 562 Information Systems Security (formerly ISA 662, and prior to that INFS 762; 3 credits)
TCOM 660 Network Forensics (3 credits)
Certificate in Wireless Communications  
**CERG-WIRE**

This certificate provides a broad understanding of the technologies, applications, and systems used in all forms of wireless communications. Students must complete the following, for a total of 15 credits:

**Core Courses**

*Choose 9 credits from the following:*

- TCOM 516 Global Positioning System (GPS) (1.5 credits)
- TCOM 526 Advanced GPS (1.5 credits)
- TCOM 551 Digital Communications Systems (3 credits)
- TCOM 552 Introduction to Mobile Communication (3 credits)
- TCOM 606 Advanced Mobile Communications
- TCOM 607 Satellite Communications (3 credits)

**Elective Courses**

Six credits are required. Students may earn the credits from specialty modules 1, 2, and 3, including those in the mandatory course list that are not part of the 9 credits of core courses for the certificate.

Certificate in Telecommunications Systems Modeling  
**CERG-TESM**

This certificate provides a broad understanding of the end-to-end systems engineering approach to telecommunications projects. Students must complete the following, for a total of 15 credits:

**Core Courses**

*Choose 9 credits from the following:*

- TCOM 521 Systems Engineering for Telecommunications Management (3 credits)
- TCOM 540 Telecommunications Network Optimization: Routing, Flow Management, and Capacity Modeling (1.5 credits)
- TCOM 541 Network Design and Pricing (1.5 credits)
- TCOM 545 Reliability and Maintainability of Networks (3 credits)
- TCOM 546 Financial Models of Telecommunications Systems (3 credits)

**Elective Courses**

Six credits are required. Students may earn the credits from specialty modules 4 and 5, including those in the mandatory course list that are not part of the 9 credits of core courses for the certificate.

Statistics

Phone: 703-993-3645  
Web: statistics.gmu.edu

Faculty

**Professors:** Carr, Gentle, Rosenberger (chair), Wegman  
**Associate professors:** Bell, Bolstein, Davis (associate chair), Habib, Miller, Sutton  
**Assistant professors:** Diao, Tang  
**Instructors:** Sims (visiting)  
**Adjunct professors:** Cohen, Jang, Kamocsai, Keller, McFadden, Srigany, Sullivan

Course Work

The Statistics Department offers all courses designated STAT in the Course Descriptions chapter of this catalog. Statistical methods and methods for data analysis are crucial for researching and exploring the life sciences, natural sciences, social sciences, business, nursing, education, and engineering. The Statistics Department offers a variety of introductory courses and more advanced course work in specialized statistical methodology and applications. The focus of the department’s offerings is applied, with special emphasis on biostatistics, graphics and visualization, federal and survey statistics, and engineering applications of statistics and data analysis.

Introductory courses are targeted for undergraduates in the College of Humanities and Social Sciences and the College of Health and Human Services, as well as in the Volgenau School. The STAT 250–350 sequence is targeted for general audiences, while the STAT 344–354 sequence is targeted for technical and scientific audiences. STAT 362 deals with computer statistical packages and is appropriate as a second or third course for students from a wide variety of backgrounds. It is strongly recommended for students who elect to minor in data analysis.

Although the department does not offer an undergraduate degree in statistics, it does offer a certificate program in applied statistics and a minor in data analysis. Also, a variety of advanced undergraduate courses is available for inclusion in other degree programs.

UNDERGRADUATE PROGRAMS

Certificate in Applied Statistics  
**CERB-ASTA**

This program complements undergraduate degree programs in computer science, systems engineering, electrical engineering, civil and infrastructure engineering, and mathematics. Undergraduates majoring in other discipline areas may be admitted to the certificate program at the discretion of the department.

The program expands career options available to students because the demand is great in the Washington, D.C., metropolitan area for people with interdisciplinary training, which includes a background in statistics and data analysis. Inquiries should be directed to the Statistics Department. Students who plan to work toward the certificate should seek advice from the department’s undergraduate coordinator.
Certificate Requirements
This certificate program requires 24 credits: STAT 344 or 346; 354; 362; and 474 or 574, along with four courses chosen from STAT 435, 455, 457, 463, 498, 499; ECON 445; OR/SYST 335; OR/MATH 441, 442; OR 481/MATH 446; and SYST 473.

Minor in Data Analysis
The minor provides students with a background in data analysis and statistical methodology. It is intended to complement undergraduate degree programs in the Volgenau School and the College of Science, especially computer science, economics, environmental engineering, geography, mathematics, public administration, sociology, and systems engineering.

Requirements
The minor requires 15 credits: a core sequence of 6 credits, plus 9 credits of electives. Grades of C or better are required in all courses. At least 9 of the 15 credits must be in STAT courses. At least 8 credits must be in courses not required by the student’s major.

To satisfy the core requirement, students must complete one of these sequences with grades of C or better: STAT 250–350 or STAT 344–354. Mathematics majors may substitute MATH 351–352 for STAT 344–354, provided the 9 elective credits are all STAT courses. The 9 elective credits must be chosen from a list of courses approved by the department’s undergraduate coordinator. Courses currently approved for the minor are STAT 362, 435, 455, 457, 463, 474, 499; CEIE 410; CS 450; ECON 445; GEOG 300; GOVT 400; OR/SYST 335; SOCI 405; and SYST 473.

BS/Accelerated MS in Statistical Science
This degree option allows Mason students to earn an MS in statistical science in less time than if they had first graduated from a suitable Mason BS program and then applied to the MS program.

Admission Requirements
Students must begin MS work within six months following completion of a BS degree in any one of the Volgenau School major areas or a BS in mathematics from the College of Science. Admission is guaranteed to any student with an overall GPA of 3.00 in courses taken after the first two undergraduate years (60 credits) with grades of B or better in the two 500-level STAT courses selected from STAT 544, 554, and 574.

Degree Requirements
The program consists of a minimum of 144 credits that satisfy the requirements for both the BS in the undergraduate major and the MS in statistical science with 6 credits of overlap. Twenty-four credits are required for the MS, provided that students have taken two of STAT 544, 554, and 574 as part of their BS course work.

GRADUATE PROGRAMS
- Statistical Science, MS MS-STAT

Statistical science is regarded as one of the oldest and most successful information technology (IT) subjects. It focuses on the conversion of raw data into information. In this graduate program, students are trained in the theory and practice of statistical methodology, particularly as it impinges on high-technology applications.

The MS program offers a choice of the following subject matter emphases: applied statistics, computational statistics, engineering statistics, federal statistics, and statistical signal processing. Students usually select one of these emphases or design a customized curriculum in conjunction with a faculty advisor. Students also select the research or the professional option. The research option is for students planning to continue with a PhD degree or begin or continue careers in statistical methodology research. The professional option provides MS degree qualifications to those seeking an expanded knowledge base in modern statistical theory and practice but do not wish to pursue a research career. Such students might plan to work in statistics, go on to professional schools, teach statistics at a secondary level, or pursue other careers in which advanced work in statistical methodology is necessary or advantageous but in which independent research is not involved.

Admission Requirements
In addition to satisfying general admission requirements for graduate study, all applicants must demonstrate basic computer literacy. They also must hold a bachelor’s degree from an accredited institution in a field that includes course work in calculus or real analysis, matrix or linear algebra, and calculus-based probability and statistics. Applicants with degrees in such fields as mathematics, computer science, statistics, and engineering automatically meet this requirement. For applicants with degrees in other fields, this requirement is normally satisfied if students have successfully completed courses equivalent to the following Mason courses: MATH 113, 114, 213; 203 or 322; and STAT 344 or MATH 351. Course work taken to correct deficiencies in undergraduate preparation is not counted toward the degree.

While the GRE is not required for admission, it is recommended for students competing for graduate teaching assistantships, fellowships, and research assistantships. International students from non-English-speaking countries who seek a graduate teaching assistantship should take the Test of Spoken English in addition to the TOEFL, which is required for admission.

Degree Requirements
In addition to meeting general requirements that apply to master’s degrees at Mason, all students must complete the 12-credit core requirements for the degree:

- STAT 544 Applied Probability
- STAT 554 Applied Statistics
- STAT 652 Statistical Inference
- STAT 656 Regression Analysis

The core course work covers the basic elements of statistics at the graduate level. STAT 544 covers the major mathematical framework for statistical theory and practice. STAT 652 provides basic statistical theory. After completing this course, students have the theoretical basis from which statistical methods are derived.

STAT 554 is a survey of statistical methods that have become the backbone of statistical practice. Focus in this course is on techniques that quantify random behavior. The final core course is STAT 656, which focuses on determining the rela-
Information Technology and Engineering

Essay.

Students opting not to write an essay must take 30 credits of course work.

Elective courses may be chosen from any graduate STAT courses except STAT 535, 700, 701, and STAT courses numbered 876 or higher.

Elective courses may be chosen from any graduate STAT courses except STAT 535, 700, 701, and STAT courses numbered 876 or higher.

Each emphasis area requires students to select four courses from a specific list and two approved electives. The lists are as follows:

- **Applied statistics:** STAT 574, 655, 660, 662, 665, 668, 760
- **Computational statistics:** STAT 657, 663, 751, 875; CS 652
- **Engineering statistics:** STAT 645, 655, 658, 758; OR 635
- **Federal statistics:** STAT 574, 634, 660, 663, 665, 673, 674
- **Statistical signal processing:** STAT 658, 662, 758; ECE 535

Elective courses may be chosen from any graduate STAT courses except STAT 535, 700, 701, and STAT courses numbered 876 or higher. STAT 779 and 789 may be repeated for credit with prior written approval of the department’s graduate coordinator. Also, certain courses from other departments may be chosen with prior written approval of the department’s graduate coordinator, generally not to exceed 6 credits.

A student enrolled in the Certificate in Actuarial Sciences Program and the MS in Statistical Sciences Program may count MATH 555 and 556 as approved non-STAT elective courses and can count MATH 653 and 654 as STAT electives when designing a curriculum for this degree. Credit toward the MS in statistical sciences will not be given for both MATH 654 and STAT 668. The full curriculum should be designed with the approval of the student’s statistics academic advisor and the statistics graduate coordinator.

Students select either the professional or research option, depending on career ambitions. This choice should be made no later than the end of the semester in which 15 credits have been completed.

**Professional Option**

The professional option focuses on completing course work in modern statistical theory and practice. Thirty credits are required for the degree; 12 credits must be in core courses taken by all MS students, with 18 additional credits taken from the approved list or with advisor approval. Students electing this option are encouraged to pursue a broad background in statistical science, and they may seek to concentrate on applications of statistical methodology to other disciplines.

Students who select the professional option may elect to write a master’s essay. This piece is not an original research report but a scholarly essay on a topic of current interest in the statistical science discipline. The essay is usually about 20 to 25 pages long and demonstrates the student’s ability to read and synthesize current technical literature into a scholarly essay. The essay is evaluated by the student’s advisor, taking into account the comprehensiveness of the coverage of the scientific literature, the accuracy of presentation and interpretation, and the literary style. Students are notified of their evaluations, and they may be required to revise their essay to develop their skills in preparing reports on technical subjects. The essay is usually written in the context of STAT 798 Master’s Essay. Students who complete the essay take 27 credits of course work and 3 credits of STAT 798 Master’s Essay. Students opting not to write an essay must take 30 credits of course work.

**Research Option**

The research option requires 30 credits, including 6 credits that must be in independent research (thesis). Research is done under the guidance of a faculty member. Research may be carried out at Mason or, if appropriate, at nearby facilities. For example, students may pursue research at their place of employment on topics of interest to their employer, provided the research meets the standards of the university. The remaining 24 credits must include the 12 core credits and elective courses taken from the approved list or added with the consent of the thesis advisor.

In addition to satisfying general university requirements for a master’s degree, candidates with the research option must submit a thesis or report based on the research to the student’s thesis committee, which must give preliminary approval. The composition and appointment of this committee follows graduate program policies.

Candidates also must pass a final oral exam that concentrates on, but is not limited to, the area on which the thesis or report is written. The exam is administered by the student’s thesis committee, and all interested members of the graduate faculty are invited to attend and participate in the questioning. The thesis committee makes the final decision on whether the candidate passes or fails.

### Dual-Degree MS in MS-OPRS, MS-STAT Operations Research and Statistical Science

This program allows students to earn an MS in operations research and an MS in statistical science by completing 48 credits of course work in both areas instead of the 60 that would be required if the degrees were sought independently.

**Admission Requirements**

Applicants must satisfy admission requirements for the MS in Operations Research Program and the MS in Statistical Science Program. A joint faculty committee from the Statistics and Systems Engineering and Operations Research Departments make final admission decisions into the dual-degree program.

**Degree Requirements**

The dual-degree program requires a total of 48 credits as specified below:

- 12 elective credits in OR courses at the 600 level, including at least one deterministic methods course chosen from OR 641, 642, 643, 644 and at least one stochastic methods course chosen from OR 645, 647, 648, 675, 677
- 12 elective credits in STAT courses numbered 574 or higher, excluding STAT 700 and 701. Courses must be approved in advance by the student’s statistics academic advisor and the statistics graduate coordinator.

A maximum of 6 credits across the two disciplines may be in independent research (thesis). The requirements for independent research are the same as detailed for the associated MS program.

Students in either the BS/Accelerated MS in Operations Research Program or the BS/Accelerated MS in Statistics Program cannot get a reduction of 6 credits toward this dual
degree. Students who want to proceed to a PhD degree will only be able to waive the number of credits specified in the associated PhD degree requirements, even though they will have 48 credits at the MS level.

If a student decides not to complete the required 48 credits, a single MS degree will not be granted unless the student fulfills the requirements for the MS in operations research or the MS in statistical science.

### Dual-Degree MS in MS-MATH, MS-STAT Mathematics and Statistical Science

This program allows students to earn an MS degree in mathematics and an MS degree in statistical science by completing 48 credits of course work in both areas instead of the 60 that would be required if the degrees were sought independently.

#### Admission Requirements

Applicants must satisfy admission requirements for both the MS in Mathematics Program and the MS in Statistical Science Program. A joint faculty committee from the Mathematical Sciences and Statistics Departments make final admission decisions into the dual-degree program.

#### Degree Requirements

The dual-degree program requires a total of 48 credits as specified below:

- **Core Requirements** ......................................................... 12
  - GCH 712 Introduction to Epidemiology .................................3
  - GCH 726 Advanced Seminar in Epidemiology .......................3
  - STAT 554 Applied Statistics ..............................................3
  - STAT 660 Biostatistical Methods .......................................3

- **Epidemiology and Biostatistics** Requirements ........................9
  - Select a minimum of three courses from the following:
    - GCH 605 Social Epidemiology ..........................................3
    - GCH 680 International Research Ethics and Methods .............3
    - GCH 722 Infectious Disease Epidemiology ..........................3
    - GCH 732 Chronic Disease Epidemiology ............................3
    - GCH 752 Nutritional Epidemiology ...................................3
    - GCH/NURS 804 Advanced Quantitative Data Analysis for Healthcare Research I ..................3
    - GCH/NURS 805 Advanced Quantitative Data Analysis for Healthcare Research II ...............3
    - GCH/NURS 807 Measurement Theories and Applications in Healthcare Research ................3

- **Statistics Requirements** .................................................. 9
  - Choose three from the following list of statistics courses:
    - STAT 544 Applied Probability .........................................3
    - STAT 574 Survey Sampling I ..........................................3
    - STAT 652 Statistical Inference .........................................3
    - STAT 655 Analysis of Variance .......................................3
    - STAT 656 Regression Analysis ......................................3
    - STAT 657 Nonparametric Statistics ..................................3
    - STAT 662 Multivariate Statistical Methods ..........................3
    - STAT 665 Categorical Data Analysis .................................3
    - STAT 668 Survival Analysis ...........................................3
    - STAT 673 Statistical Methods for Longitudinal Data Analysis ....3

- **Electives** ......................................................................... 6
  - Choose two electives (6 credits) in consultation with advisor.

#### MS in Epidemiology HH-MS-EBST and Biostatistics

This joint program with the College of Health and Human Services (CHHS) prepares participants to apply epidemiological and statistical principles to quantitative analysis of health care issues. It is aimed at health scientists and professionals in government agencies such as the National Institutes of Health, as well as in pharmaceutical companies, research hospitals, public health agencies, and other medical research organizations with the need to design experiments for medical and health services research. Graduates are also expected to analyze and interpret increasingly complex nonexperimental health care data. The degree is taught jointly by faculty from Volgenau School's Department of Statistics and CHHS' Department of Global and Community Health.

#### Admission Requirements

A bachelor’s degree from an accredited institution of higher education in a discipline related to health science or statistics with a GPA of 3.00 in the last 60 credits is required. Such fields include medicine, biology, nursing, health science, biostatistics, statistics, mathematics, and psychology. Courses in calculus at the undergraduate level through multivariate calculus equivalent to MATH 113, 114, and 213 with a grade of B or better are required for admission to the program. Applications to the degree program are made through CHHS. A joint faculty committee from the Volgenau School’s Department of Statistics and CHHS’ Department of Global and Community Health make admission decisions.

#### Program of Study

The degree requires 36 credits, as specified below:

Choose two electives (6 credits) in consultation with advisor.

#### Certificate in Biostatistics CERG-BSTA

This certificate, a joint program with CHHS, prepares participants to apply statistical methods to quantitative analysis
of health care issues. It is aimed at health scientists and professionals in government agencies such as the National Institutes of Health, pharmaceutical companies, research hospitals, public health agencies, and other medical research organizations that design medical experiments and analyze and interpret increasingly complex health care data. The program will also help prepare students begin careers in such organizations. The certificate is taught jointly by faculty from the Department of Statistics and Department of Global and Community Health.

Admission Requirements
Applicants must hold a bachelor’s degree from a regionally accredited institution of higher education in a discipline related to health science or statistics, with a GPA of 3.00 in the last 60 credits. Such fields include medicine, biology, nursing, health science, biostatistics, statistics, mathematics, and psychology. A course in college algebra with a grade of B or higher is required for admission to the program.

Certificate Requirements
Students must complete one course from each of the five groups.

- STAT 535 or 554
- STAT 660
- GCH/NURS 804 or STAT 656 or STAT 668
- GCH/NURS 805 or STAT 662
- GCH 712

Certificate in Federal Statistics

This professional program is targeted at upgrading the skills of practitioners. The federal statistical system is a complex data collection and analysis system that requires a wide variety of multidisciplinary skills for its maintenance. The federal statistics certificate is intended to respond to the need for broad training in statistics; survey methods; data analysis, including graphics and data visualization; databases and data security; parallel computation and related technology; geographic information systems; and issues of statistics and public policy. The program is extremely flexible and can be tailored to the needs of students within the federal statistical sector. It is also intended to be responsive to the needs of those in state and local governments, and those in the private sector involved in the collection, interpretation, or statistical analysis of federal data.

Admission Requirements
Potential candidates should hold a bachelor’s degree and have taken at least two courses in calculus and one course in probability or statistics at the 300 level or higher. The recommended minimum preparation includes MATH 113–114 and STAT 344 or their equivalents. Candidates must also be computer literate. Applicants typically have degrees in such fields as sociology, economics, engineering, mathematics, statistics, and business. Candidates should inquire with the department’s graduate coordinator for details of program planning. Courses are offered in late afternoon and evening and are particularly suitable for part-time students.

Certificate Requirements
The certificate program consists of 15 credits (five courses), which are selected from certificate courses and electives. The certificate courses build the foundations of statistical analysis and survey methods. They consist of the following:

- STAT 535 Analysis of Experimental Data
- STAT 554 Applied Statistics
- STAT 574 Survey Sampling I
- STAT 634 Case Studies in Data Analysis
- STAT 663 Statistical Graphics and Data Exploration
- STAT 665 Categorical Data Analysis
- STAT 673 Statistical Methods for Longitudinal Data Analysis
- STAT 674 Survey Sampling II
- STAT 779 Topics in Survey Design and Analysis

All of these courses, except for STAT 535, may be used for credit toward the MS in statistical science. Credit is granted for only one of STAT 535 and 554.

For the certificate program, students must choose three of the certificate courses plus two electives chosen with the consent of the department’s graduate coordinator. The electives are intended to provide a broad background supportive of the multidisciplinary needs of complex statistical systems. They include courses from economics, operations research, public administration, sociology, and statistics. Only one course (3 credits) can be outside the Statistics Department program and must be approved in advance by the department’s graduate coordinator. Suggested electives include STAT 544, 655, 656, 657, 660, 662, 664, 668, 875; ECON 637; OR 541, 542; PUAD 741, 742; and SOCI 631. Some courses may have prerequisites for which students must qualify or seek a waiver from the appropriate instructor. A cumulative GPA of 3.00 is required, and no more than one course with a grade of C may be applied toward the certificate. Only one of STAT 501–503 can be applied toward the 15 credits required for the certificate.

Certificate in Signal Processing

The Department of Statistics, in conjunction with the Department of Electrical and Computer Engineering, offers the certificate in signal processing, which provides graduate students with a program of courses and laboratory experience. Course work for the graduate certificate can be used for credit toward the MS in statistical science as well as the MS in electrical engineering. The primary purpose is to provide a well-defined target for students who want to advance or update their knowledge in this fast-moving field. The certificate may be pursued concurrently with any of the graduate degree programs in the Volgenau School.

Admission Requirements
The program is open to all students who hold a bachelor’s degree in any scientific or engineering discipline from an accredited university.

Certificate Requirements
The certificate consists of five graduate courses (15 credits) in signal processing. A cumulative GPA of 3.00 is required, and no more than one course with a grade of C may be applied toward the certificate. The certificate courses consist of two required foundation courses and three elective courses. See the list of courses under the Certificate in Signal Processing in the Electrical and Computer Engineering section of this chapter.

Statistical Science, PhD

The terminal degree PhD in statistical science represents the highest academic attainment for a statistician and, as such, requires in-depth knowledge of modern statistical theory and
practice. Current research areas of key department faculty in the program include sampling, statistical signal processing, biometric identification, biostatistics, statistical genetics, statistical graphics, and data exploration.

Degree Requirements

Students are required to complete 72 credits. Typically, a student entering with a master’s degree in statistics, mathematics, or similar discipline is able to receive a reduction of up to 24 credits from approved course work. In particular, students entering with a master’s degree in statistics are expected to have completed course work equivalent to STAT 544, 554, 652, and 656 with a 3.50 GPA. The program also requires a course in advanced calculus (MATH 315 or equivalent) with a B or better. In exceptional circumstances, talented students with a mathematically intensive undergraduate degree may be admitted.

Written qualifying exams will be taken in the following areas:

Applied Probability
Applied Statistics and Data Analysis
Statistical Inference

Students are required to complete 24 credits of advanced emphasis course work, including three core courses:

STAT 876 Measure and Linear Spaces or STAT 971 Probability Theory
STAT 972 Mathematical Statistics I
STAT 973 Mathematical Statistics II

The remaining five courses are selected and approved by the doctoral supervisory committee and the Statistics Department chair and should be numbered 600 or above. For STAT courses, qualified electives must be numbered 655 or above. STAT 700–701 do not count as electives for the PhD program.

No later than the end of the second semester of study, students should select a dissertation director and a doctoral supervisory committee. The chair of the doctoral supervisory committee, if a tenured member of the Department of Statistics, will ordinarily be the doctoral dissertation supervisor. If not a tenured member of the department, the chair will be chosen from among tenured department faculty on the committee. The committee will consist of the dissertation advisor, at least two graduate faculty members from the Department of Statistics, and an external member. The doctoral supervisory committee must be approved by the department chair.

Admission to candidacy is acquired on completion of an oral comprehensive exam administered by the doctoral supervisory committee, covering the three core courses and five advanced emphasis courses, and a dissertation proposal. The student is evaluated as pass, conditional pass, and fail. A student who fails the comprehensive exam may take it a second time. If the student fails a second time, the student is terminated from the program.

The dissertation defense serves as the student’s final examination and is conducted by the doctoral supervisory committee. Both the comprehensive exam and final exam are scheduled on approval of a written request to the department chair.

For more information, e-mail specific questions to statistics@gmu.edu.

Systems Engineering and Operations Research

Phone: 703-993-1670
Web: seor.gmu.edu

Faculty

Professors: Adelman, Chang, Donohue, Hoffman, Nash, Polyak, Sage, Schum, Sofer (chair)
Associate professors: Brouse, Chen, Laskey, Loerch, Shortle, White
Assistant professors: Ganesan, Liu
Affiliated faculty members: Gulledge, Houck, VanTrees

Research and term professors: Gross, Sherry, Wagenhals, Wagner, Wolman

Adjunct professors: Alexander, Barry, Camp, Carley, Durbin, Fischer, Humphrey, Killam, Laveson, McDevitt, Nguyen, Patel, Rothwell, Wieland, Yost

The Systems Engineering and Operations Research (SEOR) Department offers a bachelor’s degree in systems engineering, a certificate for undergraduates (the equivalent of a minor) in operations research and engineering, and master’s degrees in systems engineering and operations research. In addition, the department offers five certificate programs at the master’s level: architecture-based systems engineering; command, control, communications, computing, and intelligence (C4I); military operations research; computational modeling; and systems engineering for computer, information, and software-intensive systems. Students interested in pursuing doctoral education in operations research or systems engineering are encouraged to read the sections on the interdisciplinary PhD in information technology and the PhD study in systems engineering and operations research.

Systems engineers determine the most effective ways for an organization to use all of a given system’s components: people, machines, materials, information, and energy. The engineers plan, design, implement, and manage integrated systems, working to ensure performance, safety, reliability, and maintainability. They also work to ensure that systems are delivered on time at a reasonable cost. Examples of systems are computer networks, automobiles, intelligent robots, stereos, the Metro, and Mason. Whereas other engineering disciplines concentrate on individual aspects of a system, such as electronics, ergonomics, or software, systems engineers focus on the system as a whole. Systems engineering, perhaps more than any other engineering discipline, is involved with the human and organizational aspects of developing the desired system. Systems engineering is the people-oriented engineering profession.

Operations research is the professional field that deals with using scientific methods in engineering and management decision making, often focusing on how best to allocate limited resources. Operations researchers do for organizations what physicists do for the physical world: they try to find order in apparent chaos by identifying the structure in complex situations and understanding how the components of organizations interact. The goal is to explain and predict the effects of actions taken on these systems. Much of this work is developing and manipulating mathematical and computer models of organizational systems composed of people, ma-
machines, information, and procedures. The overall purpose is to provide a rational basis for decision making.

Mason’s operations research faculty members are principally involved in the theoretical and empirical study of managerial and operational processes, and the use of mathematical and computer models to optimize these systems. Models are needed for a variety of decision-making purposes in business, industry, scientific research, and government to describe different environments and relate alternative plans of action. Thus, the courses in operations research focus on quantitative modeling and the analysis of complex systems. Courses stress the use of contemporary computer hardware and software in modeling and analysis. The Bureau of Labor Statistics predicts that the field of operations research will be one of the fastest-growing professions of the next decade. Obviously, there is much overlap between systems engineering and operations research. The department encourages students of either discipline to elect courses in the other. For more information, go to seor.gmu.edu.

Course Work
The department offers all courses designated SYST and OR in the Course Descriptions chapter of this catalog.

UNDERGRADUATE PROGRAM
The mission of the undergraduate program is to equip students with the ability to participate productively in the many professional activities associated with engineering a trustworthy system that satisfies client needs. The term “system” is interpreted broadly to include information, telecommunication, defense, health delivery, transportation and manufacturing systems, and corporate processes.

Specifically, the objectives of the systems engineering program are that graduates of the program will be able to

- Apply fundamental concepts of mathematics, science, information technology, and engineering to contemporary and future systems.
- Contribute to the development of systems using systems engineering methods, processes, models, and tools.
- Work effectively as a member of multidisciplinary teams and behave in a professional, ethical, and responsible manner (including establishing a foundation for lifelong learning in systems engineering and related areas).
- Communicate effectively with team members and decision makers orally and in writing.

Systems Engineering, BS BS-SYST
The program leading to the BS in systems engineering prepares students for a professional career in systems engineering. The educational program reflects the systems engineer’s unique perspective, which considers all aspects of a system throughout its lifetime. Mason’s systems engineering program is interdisciplinary, drawing from engineering, computer science, operations research, psychology, and economics. The core systems engineering courses tie these diverse threads to provide a global understanding of how individual engineering disciplines fit into the development of complex, large-scale systems. Students gain depth in a technical area by selecting a sequence of technical electives that constitute an emphasis. Students construct their own emphasis with the help of their advisor. A yearlong senior design project provides hands-on experience in applying various systems engineering methods and tools.

This program is accredited by the Engineering Accreditation Commission of the Accreditation Board for Engineering and Technology, 111 Market Place, Suite 1050, Baltimore, Maryland 21202-4012; 410-347-7700. The requirements for the degree may be satisfied on a part-time basis. Cooperative education provides students with the opportunity to integrate paid career-related work experience with classroom learning.

Degree Requirements
In addition to Mason’s general education requirements, students must meet specific requirements for this degree. In the first two years, students obtain a basic foundation in mathematics, the natural sciences, computing, writing, humanities, arts, and social sciences. The systems engineering program builds on this foundation, teaching theoretical knowledge, practical skills, and the ability to apply systems thinking to problems. Teamwork, collaborative learning, analytical skills, practical problem solving, and oral and written communication are strongly stressed.

Degree requirements for the systems engineering major include 120 credits. Students must complete the following:

- Mathematics and statistics: MATH 113, 114, 203, 213, 214; STAT 346, 354
- Natural sciences: PHYS 160, 161, 260, 261; CHEM 251 or 211
- Computer science: CS 112, 211
- Humanities and social sciences: COMM 100; ENGL 101, 302; ECON 103; approved courses in literature, Western civilization, global understanding, arts, and synthesis to satisfy the university’s general education requirement
- Engineering: ENGR 107
- Systems engineering: SYST 101, 210, 220, 221, 320, 330, 335, 371, 470, 473, 489, 490, 495; OR 441, 442; and three approved technical electives. Students must complete each of these courses with a grade of C or better

Writing-Intensive Requirement
Mason’s writing-intensive requirement for systems engineering majors is satisfied by successful completion of SYST 489.

Synthesis Requirement
Mason’s synthesis requirement for systems engineering majors is satisfied by successful completion of SYST 495.

General Education Electives
General education electives should be selected from the department’s list of approved courses.

Sample Schedule
The following sample schedule shows the required and elective courses in the program. Students are strongly encouraged to follow this sample schedule to ensure that prerequisites are satisfied. For students who do not place into MATH 113 by taking the math placement exam, an alternative schedule is available. The position of the technical elective courses within the schedule will vary depending on the specialization, and the position of some general education classes may vary.
as well. Please consult with your advisor to plan the correct sequence.

**First Semester**
- COMM 100 Oral Communication ................................................. 3
- ECON 103 Contemporary Microeconomic Principles ................. 3
- ENGL 101 Composition ............................................................. 3
- ENGR 107 Introduction to Engineering ...................................... 2
- MATH 113 Analytic Geometry and Calculus I .......................... 4
- Total .................................................................................. 15

**Second Semester**
- CS 112 Introduction to Computer Programming .........................4
- MATH 114 Analytic Geometry and Calculus II .......................... 4
- PHYS 160 University Physics I .................................................. 3
- PHYS 161 University Physics I Laboratory ................................ 1
- SYST 101 Understanding Systems Engineering ....................... 3
- Total .................................................................................. 15

**Third Semester**
- CS 211 Object-Oriented Programming ..................................... 3
- MATH 213 Analytic Geometry and Calculus III ......................... 3
- PHYS 260 University Physics II ............................................... 3
- PHYS 261 University Physics II Laboratory ................................ 1
- SYST 210 Systems Design ...................................................... 3
- Literature course .................................................................... 3
- Total .................................................................................. 16

**Fourth Semester**
- CHEM 251 General Chemistry or CHEM 211 General Chemistry.................................................. 4
- MATH 203 Matrix Algebra ....................................................... 4
- MATH 214 Elementary Differential Equations .......................... 3
- SYST 220 Dynamical Systems I .............................................. 3
- SYST 221 Systems Modeling Laboratory ................................ 1
- Total .................................................................................. 14

**Fifth Semester**
- ENGL 302 Advanced Composition (for natural sciences and technology) .................................................. 3
- OR 441 Deterministic Operations Research ............................. 3
- STAT 346 Probability for Engineers ......................................... 3
- SYST 320 Dynamical Systems II ............................................ 3
- Arts course ........................................................................... 3
- Total .................................................................................. 15

**Sixth Semester**
- STAT 354 Engineering Statistics ............................................. 3
- SYST 330 Systems Methods .................................................... 3
- SYST 335/OR 335 Discrete Systems Modeling and Simulation .................................................. 3
- SYST 371 Systems Engineering Management .......................... 3
- Technical elective .................................................................... 3
- Total .................................................................................. 15

**Seventh Semester**
- SYST 470 Human Factors Engineering ................................ 3
- SYST 489 Senior Seminar ..................................................... 3
- SYST 490 Senior Design Project I .......................................... 3
- SYST 473 Decision and Risk Analysis A ................................. 3
- Technical elective .................................................................... 3
- Total .................................................................................. 15

**Eighth Semester**
- OR 442 Stochastic Operations Research ................................ 3
- SYST 495 Senior Design Project II ....................................... 3
- Technical elective .................................................................... 3
- Global understanding course ............................................... 3
- Western civilization or world history course .......................... 3
- Total .................................................................................. 15

All systems engineering students are assigned a faculty advisor. With the advisor’s help and approval, each student is required to complete a plan of study. This plan of study, contained in the detailed pamphlet available from the SEOR office, constitutes a learning plan for the degree program. The advisor must approve changes to the plan of study. All students in systems engineering are required to see their advisor at least once each semester to plan for the next semester’s registration.

The systems engineering program requires 9 credits of technical electives. Students must select one of the following technical specializations, each containing three courses.

**Operations Research**
- OR 481 Numerical Methods
- SYST 420 Network Analysis
- SYST 465 Pricing in Optimization and Game Theory

**Aviation Systems**
- SYST 420 Network Systems
- SYST 460 Introduction to Air Traffic Control
- SYST 461 Air Transportation Systems Engineering

**Control Systems**
- ECE 201 Introduction to Signal Processing
- ECE 220 Signals and Systems I
- SYST 421 Classical Systems and Control Theory

**Computer Network Systems**
- SYST 420 Network Analysis
- ECE 465 Computer Networking Protocols
- TCOM 500 Modern Telecommunications

**Software-Intensive Systems**
- CS 310 Data Structures
- CS 332 Object-Oriented Software Design and Implementation
- CS 421 Software Requirements and Design Modeling

**Engineering Systems**
- CEIE 230 Hydraulics
- ENGR 210 Statics and Dynamics
- ENGR 310 Mechanics of Materials

In addition to receiving a BS degree, students may wish to select a sequence that contributes toward a minor program.

**Change of Major**

Students who want to change their major to systems engineering must have a GPA of at least 2.75 in all math, physics, engineering, and computer science courses taken to fulfill requirements for the systems engineering degree and should have completed MATH 114 with a grade of B or better.

### Certificate in Operations Research and Engineering

This certificate program is open to students enrolled in the computer science, decision sciences, and mathematics undergraduate degree programs. The certificate augments the standard curricula with material on the computational aspects of operations research. Because the demand for people trained in this area is great, this program expands the career options available to students.

**Required Courses**
- MATH 313 Introduction to Applied Mathematics
- OR 335 Discrete Systems Simulation Modeling
- OR 441 Deterministic Operations Research
OR 442 Stochastic Operations Research
STAT 344 Probability and Statistics for Engineers and Scientists or STAT 346 Probability for Engineers
STAT 362 Introduction to Computer Statistical Packages

Plus two of the following courses:
OR 481 Numerical Methods in Engineering
OR 498 Independent Study in Operations Research
OR 499 Special Topics in Operations Research
STAT 354 Statistical Methods for Engineers and Scientists
Any 400-level STAT class

Students seeking the certificate must apply to the SEOR Department.

Interdisciplinary Minor Programs
By taking appropriate sequences of technical electives and, in some cases, a few courses in addition to the 120 credits required for graduation, students in the systems engineering program can obtain a minor in an interdisciplinary program. Available minors include data analysis and computer science. Students should check with their advisor and the departments offering the minors for specific requirements.

BS/Accelerated MS Program in Systems Engineering
Qualified undergraduate students may apply for this five-year program, which leads to a BS in an engineering discipline and an MS in systems engineering. The program can be completed in 144 credits. Applicants must be Mason undergraduate students majoring in systems engineering, computer science, computer engineering, electrical engineering, or civil and infrastructure engineering. Students may apply after they have completed at least 90 credits applicable to the BS degree. Students must have an overall GPA of at least 3.30 on courses applicable to the BS degree and must have completed all MATH and PHYS requirements. The MS degree is granted on completion of remaining courses.

Up to two courses (6 credits) of master’s level courses taken as part of the undergraduate degree may be applied to the graduate degree. For BS candidates, these graduate courses replace the corresponding undergraduate courses. The undergraduate version of these courses may not be applied to the MS degree. Systems engineering majors in the accelerated program are required to take OR 541 and 542 in place of OR 441 and 442.

GRADUATE PROGRAMS

Operations Research, MS

This program prepares students for research and professional practice associated with the formulation and analysis of mathematical models for decision making and their computer implementation. Major components include optimization, queueing and network modeling, computer simulation and applied probability, and application of these components to realistic and relevant operational problems. Students are expected to become proficient in these areas, as well as in supporting areas of information technology necessary to implement operations research methods.

The program includes core and elective courses selected by the student with the aid of a faculty advisor. To obtain the MS degree, students complete an approved plan of study that contains a minimum of 30 graduate credits. Students may take courses through the Commonwealth Graduate Engineering Program. Appropriate courses may be transferred, with advisor approval, into this Mason degree program.

Admission Requirements
To be admitted to the program, students must hold a baccalaureate degree from an accredited institution in engineering, mathematics, computer science, physical sciences, economics, or a related field. They also must have completed courses in calculus (MATH 113, 114, and 213), matrix algebra (MATH 203), differential equations (MATH 214), applied probability and statistics (STAT 346), and a scientific programming language (CS 112). Other requirements are as follows:
- Provide evidence of satisfactory educational achievement in at least one of the following forms: a GPA of at least
3.00 as an undergraduate or an acceptable GPA in graduate courses. International students must also achieve satisfactory scores on the GRE. Nonnative English speakers must have a satisfactory score on the TOEFL.

• Provide three letters of recommendation submitted by former professors or supervisors.

The department offers SYST 500 as an intensive review of undergraduate engineering mathematics, including matrix algebra, transforms, differential equations, probability, and statistics. On acceptance, students will be required to take a foundation qualification test a week or two before school starts, unless waived by the department chair or graduate coordinator. Students who fail the test will be required to take SYST 500. A sample test is available from the department.

Students with minor deficiencies in preparation may be accepted conditionally pending removal of the deficiencies. Courses taken to remove admission deficiencies (including SYST 500) extend minimum requirements for the degree. Students whose undergraduate training was in the quantitative social sciences or quantitatively oriented business administration may be allowed to complete a portion of the mathematics prerequisite by taking SYST 500.

**Degree Requirements**

The program consists of 30 credits. Students must complete four core courses and the project (15 credits).

**Core Courses, Project**

- OR 541 Operations Research: Deterministic Models
- OR 542 Operations Research: Stochastic Models
- OR 635 Discrete Event Simulation
- OR 680 Project Course in Operations Research, Systems Engineering, and Computational Modeling
- STAT 544 Applied Probability*

* Students who have performed well in their undergraduate calculus-based probability class may take OR 645 Stochastic Processes instead.

In addition, at least three 600-level or higher OR courses must be taken. These include at least one deterministic methods and one stochastic methods course.

**Deterministic methods courses:**

- OR 640 Global Optimization and Computational Intelligence
- OR 641 Linear Programming
- OR 642 Integer Programming
- OR 643 Network Modeling
- OR 644 Nonlinear Programming

**Stochastic methods courses:**

- OR 645 Stochastic Processes
- OR 647 Queuing Theory
- OR 648 Production and Inventory Systems
- OR 675 Reliability Analysis
- OR 674 Dynamic Programming
- OR 677 Statistical Process Control

**Electives**

Up to two additional elective courses may be chosen with written concurrence of the advisor. These courses should be taken in an area appropriate to the student’s interests, such as operations research statistics, computer science, information systems, systems engineering, electrical and computer engineering, economics, and mathematics. At least one of these electives must be taken from SEOR’s course offerings.

With the advisor’s permission, a qualified student may elect to write a thesis in place of 3 credits of course work from the methodological or applications area.

Students may construct concentration areas by choosing electives from among special groupings. The four concentrations available are decision analysis, military operations research, optimization, and stochastic modeling.

▲ **Concentration in Decision Analysis (DA)**

Students concentrating in decision analysis must complete OR 671 and 681, and SYST/STAT 664. The remaining two electives are chosen with written concurrence of the student’s advisor and must include one deterministic methods course and one stochastic methods course.

▲ **Concentration in Military Operations Research (MOR)**

Students concentrating in military operations research must complete OR 651 and 652, and SYST 683. The remaining two courses are chosen with written concurrence of the student’s advisor and must include one deterministic methods course and one stochastic methods course.

Particularly important to students planning a PhD program are the core courses that satisfy the breadth requirement.

▲ **Concentration in Optimization (OPT)**

Students whose primary interest is in optimization may complete a concentration by choosing three courses from OR 640, 641, 642, 643, 644, 682, and 741. The remaining two courses are chosen with written concurrence of the advisor. They should be tailored to the student’s interest and must include at least one stochastic methods course. The other course may be chosen from the department’s offerings, appropriate offerings in other departments within the Volgenau School, and appropriate courses from other university departments. A sample of possible courses outside SEOR is available from the department office.

▲ **Concentration in Stochastic Modeling (STM)**

Students concentrating in stochastic modeling must complete one 600-level statistics course (numbered 634 or above) and two courses from OR 645, 647, 648, 674, and 677. The remaining two courses are chosen with written concurrence of the student’s advisor and must include at least one deterministic methods course.

**Systems Engineering, MS**

This program prepares students for a professional career in systems design, development, and management, associated with problem formulation, issue analysis, and evaluation of alternative courses of action. The program emphasizes both analytical and practical aspects of engineering complex systems. Students are expected to demonstrate proficiency in several quantitative modeling disciplines. Students are also expected to master issues relevant to practical aspects of systems design, engineering, and management. The program prepares students for careers in research and development, and pursuing advanced graduate study leading to the PhD in information technology.

Each student is assigned a faculty advisor with whom to work to complete an approved plan of study. This plan of study must include three core courses, two methods courses, three to four electives in an emphasis area, and a thesis or systems...
engineering project. The plan of study must include 30 graduate credits. Either a thesis (6 credits) or research project (3 credits) is required for the degree. Matriculation requirements for candidates needing additional work in mathematics or engineering also may be included in the plan of study.

Foundation and Admission Requirements

Applicants should have a baccalaureate degree from an accredited institution in engineering, mathematics, computer science, physical sciences, economics, or a related field. They also should have completed courses in calculus (MATH 113, 114, and 213), matrix algebra (MATH 203), differential equations (MATH 214), applied probability and statistics (STAT 346), and a scientific programming language (CS 112). Other requirements are as follows:

- Evidence of satisfactory educational achievement in at least one of the following forms: a GPA of at least 3.00 as an undergraduate or an acceptable GPA in graduate courses. International students must also achieve satisfactory scores on the GRE. Nonnative English speakers must have achieved a satisfactory score on the TOEFL exam.
- Three letters of recommendation submitted by former professors or supervisors
- Working background in engineering mathematics and computer systems. Students with minor deficiencies in preparation may apply for admission to the program, but they will be required to take one or more foundation courses. The department offers SYST 500 as an intensive review of undergraduate engineering mathematics, including matrix algebra, transforms, differential equations, probability, and statistics.

Students who have not completed a basic engineering undergraduate mathematics sequence will be required to complete courses in engineering calculus and matrix algebra prior to acceptance. On acceptance, students will be required to take a foundation qualification test a week or two before school starts, unless waived by the department chair or graduate coordinator. Students who fail the test will be required to take SYST 500 or other foundation courses. A sample test is available from the department.

Familiarity with analytical modeling software, such as spreadsheets or math packages, is also expected. Students should acquaint themselves with these software packages before beginning classes.

Project or Thesis

Each student must complete a project (3 credits) or thesis (6 credits). Under the project option, students complete 3 credits of SYST 798, in which students propose and conduct an approved team project. A project report is submitted at the end of the semester, and a final presentation is made to the Systems Engineering and Operations Research Department faculty. Under the thesis option, students complete 6 credits of SYST 799. The master’s thesis should reflect a significant independent research effort. The work is conducted under the guidance of a faculty thesis advisor from the Systems Engineering and Operations Research Department, and the final written thesis and oral defense are approved by a three-member faculty committee and submitted to the Volgenau School. The thesis work is expected to be completed while taking 6 credits of SYST 799. Although students may register for more than 6 credits, only 6 credits can be applied toward the degree.

Core Courses

Students must complete the following three core courses (9 credits):

- SYST 510 Systems Definition and Cost Modeling
- SYST 520 System Engineering Design
- SYST 530 System Management and Evaluation

Methods Courses

Students must complete two basic methods courses, including SYST 611 System Methodology and Modeling. The other basic methods course may depend on the emphasis chosen by the student and must be selected from the following list:

- ECE 528 Introduction to Random Processes in Electrical and Computer Engineering
- OR 541 Operations Research: Deterministic Models
- OR 542 Operations Research: Stochastic Models
- OR 635 Discrete System Simulation
- SYST 563 Research Methods in Systems Engineering and Information Technology
- SYST 573 Decision and Risk Analysis
- SYST 620 Discrete Event Systems
- SYST 664 Bayesian Inference and Decision Analysis

Emphasis Courses

Students must complete a set of elective courses that, together with the basic methods courses, constitute a clearly defined emphasis within systems engineering. Students pursuing the thesis option complete three electives in an emphasis; students pursuing the project option complete four electives in an emphasis.

Students may create their own emphasis with the approval of their advisor, or they may choose one of the following six emphases: systems engineering analysis, systems management, architecture-based systems integration, C4I, systems engineering of software-intensive systems, and advanced transportation systems. Approved basic methods courses and electives for the major emphases are as follows.

Systems Engineering Analysis Emphasis

Systems engineers must address a broad range of issues relevant to the design, implementation, analysis, and management of systems. This emphasis provides methodological tools that can be applied to the systems engineering process. Areas of focus include decision support systems, distributed intelligent systems, knowledge-based planning systems, network systems, probabilistic reasoning systems, sensor fusion systems, and optimization methods. The graduate program in systems engineering recognizes the importance of balancing an education in quantitative models and engineering tools with a proper understanding of the systems perspective.

Basic methods courses:

- SYST 611 System Methodology and Modeling

One additional course from the list of basic methods courses

Emphasis-specific courses:

Students must complete the following course:

- SYST 542 Decision Support Systems Engineering

The remaining courses are electives taken from the list below. The set of elective courses must constitute a well-defined focus and must be approved by the student’s advisor. Courses designated as basic methods courses may also be used as elective courses once the requirement of two basic methods courses has been met.
SYST 619 Introduction to Architecture-Based Systems Engineering
SYST 621 System Architecture Design
SYST 677/OR 677/STAT 677 Statistical Process Control

**Systems Management Emphasis**
The management aspect of systems engineering involves tracking and control of system development through the major phases of the system lifecycle, identifying and resolving problems to minimize their effect on cost, schedule, or performance, and iteratively improving product and process. This track emphasizes the theory and practice of systems management and prepares students for careers in managing the development of complex systems.

**Basic methods courses:**
SYST 611 System Methodology and Modeling

One additional course from the list of basic methods courses

**Emphasis-specific courses:**
*Students must complete the following courses:*
SYST 571 Systems Engineering Management
SYST 619 Introduction to Architecture-Based Systems Engineering

The remaining courses are electives taken from the list below. The set of elective courses must constitute a well-defined focus. Courses designated as basic methods courses may also be used as elective courses once the requirement of two basic methods courses has been met:

SYST 513 Total Systems Engineering, Re-engineering, and Enterprise Integration
SYST 540 Analysis for Systems Management
SYST 542 Decision Support Systems Engineering
SYST 621 Systems Architecture Design
SYST 622 System Integration and Architecture Evaluation
SYST 671/OR 671 Judgment and Choice Processing and Decision Making
SYST 677/OR 677/STAT 677 Statistical Process Control

**Architecture-Based Systems Integration Emphasis**
There is much interest today in the engineering of systems that comprise other component systems, where each of the component systems serves organizational and human purposes. These systems families are often categorized as systems of systems, federations of systems, or coalitions of systems. The design of architectures is a major ingredient in the design of systems families. Furthermore, it provides the conceptual basis for achieving system integration. This emphasis covers the formulation of the system integration problem, definition of architecture frameworks, use of structured analysis and object-oriented methodologies for the design of architectures, modeling and simulation for the evaluation of architectures, and approaches to integration. Both defense and industrial applications are considered.

**Basic methods courses:**
SYST 611 System Methodology and Modeling
SYST 620 Discrete Event Systems

**Emphasis-specific courses:**
*Students must complete the following courses:*
SYST 619 Introduction to Architecture-Based Systems Engineering
SYST 621 System Architecture Design
SYST 622 System Integration and Architecture Evaluation

The remaining course is an elective taken from the list below. Courses designated as basic methods courses may also be used as elective courses once the requirement of two basic methods courses has been met:

SYST 513 Total Systems Engineering, Re-engineering, and Enterprise Integration
SYST 542 Decision Support Systems Engineering
SYST 571 Systems Engineering Management
SYST 683 Modeling, Simulation, and Gaming

**Command, Control, Communications, Computing, and Intelligence Emphasis**
C4I systems are concerned with gathering, retrieving, analyzing, and disseminating time-sensitive information to achieve mission-critical objectives. These systems support military operations across the spectrum of conflict, intelligence operations, transportation monitoring, emergency response, drug interdiction, and law enforcement, among others. C4I systems include the equipment, people, and procedures necessary to accomplish the mission. The equipment may include a variety of sensors, communications systems, and information processing and decision-support systems.

The program focuses on the analysis, design, development, and management of C4I systems. Topics addressed include C4I architectures and software, communications, decision support, modeling and simulation, and sensor data fusion.

**Basic methods courses:**
OR 542 Operations Research: Stochastic Models or ECE 528 Introduction to Random Processes in Electrical and Computer Engineering
SYST 611 System Methodology and Modeling

**Emphasis-specific courses:**
*Students must complete the following courses:*
SYST 680/ECE 670/OR 683 Principles of C4I
SYST 683 Modeling, Simulation, and Gaming

The remaining courses are electives taken from the list below. The set of elective courses must constitute a well-defined focus. Courses designated as basic methods courses may also be used as electives once the requirement of two basic methods courses has been met:

SYST 671/OR 671 Judgment and Choice Processing and Decision Making
SYST 684 Sensor Data Fusion
SYST 685 Estimation and Tracking: Principles and Techniques
SYST 760 Special Topics in C4I Systems Engineering
OR 651 Military Operations Research I: Cost Analysis
OR 652 Military Operations Research Modeling II: Effectiveness Analysis
ECE 542 Computer Network Architectures and Protocols
ECE 630 Statistical Communication Theory
ECE 642 Design and Analysis of Computer Communication Networks

**Systems Engineering of Software-Intensive Systems Emphasis**
This emphasis addresses the software component of the systems engineering life cycle. It specifically covers the allocation of system requirements to software. Practitioners are concerned with the theoretical and practical aspects of tech-
Basic methods courses:
SYST 611 System Methodology and Modeling
One additional course from the list of basic methods courses

Students must complete one of the following:

Emphasis-specific courses:
Syudents must complete the following courses:
SYST 513 Total Systems Engineering, Re-engineering, and Enterprise Integration
SYST 619 Introduction to Architecture-Based Systems Engineering

The remaining courses are electives taken from the list below. The set of elective courses must constitute a well-defined focus. Courses designated as basic methods courses may also be used as elective courses once the requirement of two basic methods courses has been met:

- CS 571 Operating Systems
- CS 631 Object-Oriented Design Patterns
- INFS 622 Information Systems Analysis and Design
- SWE 619 Object-Oriented Software Specification and Construction
- SYST 540 Analysis for Systems Management
- SYST 542 Decision Support Systems Engineering
- SYST 571 Systems Engineering Management

At most, one of the following:
- CS 555 Computer Communications and Networking
- ECE 542 Computer Network Architectures and Protocols
- INFS 612 Principles and Practices of Communication Networks

Advanced Transportation Systems Emphasis

The air transportation system is one of the most complex networked systems. This specialization is designed to provide students with the skills to address the next generation of challenges of the air transportation system. Topics addressed include congestion and safety of the national air space, economic and human factors, impact of technology innovation, and public policy. The program emphasizes design, modeling, and analysis to support decision making for government and the aviation industry.

Basic methods courses:
SYST 611 System Methodology and Modeling
One additional course from the list of basic methods courses.

Emphasis-specific courses:
Students must complete the following courses:
SYST 560 Introduction to Air Traffic Control
SYST 660/OR 660 Air Transportation Systems Modeling

The remaining courses are electives taken from the list below. The set of electives must constitute a well-defined focus. Courses designated as basic methods courses may also be used as electives once the requirement of two basic methods courses has been met:

- SYST 571 Systems Engineering Management
- SYST 619 Introduction to Architecture-Based Systems Engineering
- SYST 671 Judgment and Choice Processing and Decision Making

This program allows students to earn an MS in operations research and an MS in statistical science by completing 48 credits of course work in both areas instead of the 60 that would be required if the degrees were sought independently.

Admission Requirements

Applicants must satisfy admission requirements for the MS in Operations Research Program and the MS in Statistical Science Program. A joint faculty committee from the Statistics Department and the Systems Engineering and Operations Research Department make final admission decisions into the dual-degree program.

Degree Requirements

The dual-degree program requires a total of 48 credits as specified below:

- OR 541, 542, 635, and 680
- STAT 544, 554, 652, and 656
- 12 elective credits in OR courses at the 600 level, including at least one deterministic methods course chosen from OR 641, 642, 643, 644, and at least one stochastic methods course chosen from OR 645, 647, 648, 675, 677
- 12 elective credits in STAT courses numbered 574 or higher, excluding STAT 700 and 701. Courses must be approved in advance by the student’s statistics academic advisor and the statistics graduate coordinator.

A maximum of 6 credits across the two disciplines may be in independent research (thesis). The requirements for independent research are the same as detailed for the associated MS program.

Students in either the BS/Accelerated MS in Operations Research Program or the BS/Accelerated MS Statistics Program cannot get a reduction of 6 credits toward this dual degree. Students who want to proceed to a PhD degree will only be able to waive the number of credits specified in the associated PhD degree requirements, even though they have 48 credits at the MS level.

If a student decides not to complete the required 48 credits, a single MS degree will not be granted unless the student fulfills the requirements for the MS in operations research or the MS in statistical science.

Certificate in Architecture-Based Systems Integration

This program is available to students who hold bachelor’s degrees in engineering and scientific disciplines or are in graduate status in such programs. Admission requirements are identical to those for the master’s degree in systems engineering. To be eligible for a certificate, students must complete SYST 520, SYST 611 or ECE 521; SYST 619, 620, 621, and 622 with an average grade of B or better. The following is a suggested program of study for obtaining the certificate while studying for the MS in systems engineering degree:
Certificate in Command, Control, Communications, Computing, and Intelligence

This certificate program is available to students who hold bachelor’s degrees in engineering and scientific disciplines or are in graduate status in such programs. Admission requirements are identical to those for the master’s degree in systems engineering. To be eligible for a certificate, students must complete with an average grade of B or better SYST 680; ECE 528 or OR 542; and three electives from SYST 664, 683, 684, 685, 760, OR 635, 651, 652, ECE 542, 630, 642. The following is a suggested program of study for obtaining the certificate while studying for the MS in systems engineering degree (certificate required courses indicated in italics):

**Core courses:**
SYST 510, 520, 530

**Methods courses:**
SYST 611
ECE 528 or OR 542

**Emphasis-specific courses:**
SYST 680, 683, and two C4I approved elective courses

**Project:**
SYST 798

* Required for certificate

Certificate in Discovery, Design, and Innovation

This program responds to the growing need for professional knowledge in innovation. It provides a balanced understanding of the entire process: discovery of knowledge, use in inventive problem solving, development of inventions, and familiarity with using various inventive design methods and tools. The program is available to students who hold master’s degrees in engineering and scientific disciplines or who are in such graduate programs. Students may pursue the certificate concurrently with any of the graduate programs in the Volgenau School; however, the certificate is not awarded until all requirements have been completed.

Certificate candidates must complete at least 15 credits with an average grade of B or better.

To obtain the certificate, students must take SYST 520 and IT 894 and 944, and two of the following: CEIE 601 or 670; SYST 573 (recommended if going on for MS in civil and infrastructure engineering); STAT 664/SYST 664; SYST 781/STAT 781; STAT 652, 700, and 701; OR 671/SYST 671; or IT 819.

Certificate in Military Operations Research

This program provides knowledge, tools, and techniques to those who work or plan to work in the field of military operations research. It is appropriate for students who cannot complete requirements for a master’s degree in operations research, but who want a concentrated study of military modeling. Admissions requirements are identical to those for the master’s degree in operations research.

Certificate candidates must complete six courses, with an average grade of B or better, for a total of 18 graduate credits.

To obtain the certificate, a student needs to complete the following: OR 541, 542, 635, 651, and 652, and SYST 683. Students who already have 3 credits of deterministic operations research can receive the certificate with 15 graduate credits. Those who already have taken a course equivalent to OR 542 should substitute OR 681.

Certificate in Systems Engineering of Software-Intensive Systems

This certificate is available to any student who holds a bachelor’s degree in an engineering or scientific discipline or has graduate status in such a program. Admission requirements are identical to those for the master’s degree in systems, except that the math requirements include only MATH 113, MATH 114, and a probability and statistics course. Note: Some certificate electives may require stronger math requirements.

To be eligible for a certificate, students must complete with an average grade of B or better SYST 510, 513, and 520, and two of these electives: SYST 542, 619, SWE 619, ECE 542; CS 555; INF 612; only one of CS 555, ECE 542 and INF 612 may be taken. The following is a suggested program of study for obtaining the certificate while studying for the MS in systems engineering:

**Core courses:**
SYST 510*, 520*, 530

**Methods courses:**
SYST 611 and one other method course
**Information Technology and Engineering**

**Project:**
SYST 798

*Required for certificate

### PhD Study in Systems Engineering and Operations Research

Doctoral studies in systems engineering and operations research may be pursued in two ways.

Doctoral study in both systems engineering and operations research is available through the PhD in Information Technology Program, which offers advanced courses in this discipline. The doctoral program allows students to take a broad range of courses and research options. Students may designate a concentration in systems engineering or operations research in their doctoral degree title. In that case, the degree conferred on a graduating student is a PhD in information technology with concentration in operations research or a PhD in information technology with concentration in systems engineering. Students may also pursue such doctoral studies without designating a concentration in their degree title.

Pending approval of the State Council of Higher Education for Virginia, the SEOR Department will offer a PhD in Systems Engineering and Operations Research (SEOR) Program, beginning spring 2009. The PhD in SEOR curriculum will offer a unique integration of systems engineering and operations research. This integration will give students a strong analytical and computational capability on the one hand and an overarching systems perspective that is well-grounded in application of the other. No other department in the nation offers a PhD degree program that covers systems engineering and operations research in this integrated manner. On approval of this degree program, students will have the opportunity to transfer into the new PhD in SEOR Program or complete the PhD in information technology with a concentration in systems engineering or operations research. When all students have graduated from the concentration (or have transferred into the PhD in SEOR), we will discontinue the concentration.

### Information Technology, PhD

#### Concentration in Systems Engineering (SYST)
#### Concentration in Operations Research (OPRS)

**Requirements**

Students seeking one of these concentrations must satisfy all requirements for the PhD in information technology. In addition, the following requirements must be met.

**Admissions**

Students are usually admitted with an MS degree in systems engineering, operations research, or some related engineering or information technology area. The admissions materials are similar to those of the PhD in information technology; however, submittal of GRE scores is mandatory.

### Plan of Study

All decisions concerning the student’s course requirements and plan of study must be approved by the advisor or director, with consent of the department’s doctoral coordinator.

### Doctoral Supervisory Committee

The committee chair should be selected from the list of approved chairs of SEOR, and the dissertation director must be a member of SEOR. The doctoral supervisory committee must include at least three members from SEOR. The composition of the doctoral supervisory committee is to be approved by the department’s doctoral coordinator. Permission for the comprehensive exam and dissertation defense are requested from the Volgenau School associate dean on the basis of a written request and plan that has been approved by the supervisory committee and the department’s doctoral coordinator.

### Qualifying Exams

Each student must take a set of four exams from three different degree programs from the following:

- OR 541 Deterministic Models in Operations Research
- OR 542 Stochastic Models in Operations Research
- STAT 544 Applied Probability
- STAT 554 Applied Statistics
- SYST 520 System Design and Integration
- SYST 573 Decision and Risk Analysis

### Advanced Emphasis Requirement

For students specializing in operations research, at least 18 of the 24 credits in the advanced emphasis requirement must be in OR courses numbered 600 or higher or in IT courses with an OR designation. For students specializing in systems engineering, at least 18 of the 24 credits must be in SYST courses numbered 600 or higher, or in IT courses with a SYST designation. All exceptions to this rule must be approved by the student’s doctoral supervisory committee and the department’s doctoral coordinator. The doctoral supervisory committee and the associate dean for graduate studies and research of the Volgenau School must approve the overall plan of study. A list of IT courses with an OR or SYST designation is available from the SEOR office.

### Systems Engineering and Operations Research, PhD

(筹备 SCHEV 批准)

**Requirements**

All general Mason and specific Volgenau School requirements apply. In addition, the following rules apply.

**Admissions**

Candidates for the PhD program must hold an MS degree from an accredited institution of higher education in systems engineering, operations research or related areas in engineering mathematics and computer science with a minimum graduate GPA of 3.50 and a minimum undergraduate GPA of 3.00. In addition, well-qualified candidates holding a BS degree in these areas may apply directly to the PhD program.

All applicants should have a strong background in engineering mathematics, which includes three semesters of calculus, differential equations, linear algebra, and probability. In addition, students entering the doctoral program must have a sound working knowledge in computing.
The admission process involves submitting the application for admission, undergraduate and graduate transcripts from previous colleges and universities attended, GRE test results, three letters of reference, a résumé and a statement of career goals and aspirations, and a self-assessment of past background. Translations of international credentials must be provided, if they are not in English; in some cases, applicants will be required to have documents evaluated by an external agency. A satisfactory score on the TOEFL examination is required for nonnative English speakers. All of an applicant’s background is examined before an admission decision is made.

Course Requirement
Students entering with a master’s degree in a related discipline will be required to complete 48 credits. In particular, students entering with a master’s degree are required to complete the following: at least 24 credits of advanced emphasis course work and at least 24 research credits from SEOR 998 Doctoral Dissertation Proposal and SEOR 999 Doctoral Dissertation, with at least 12 credits of SEOR 999.

The advanced course work includes the following:

- STAT 554 Applied Statistics (3 credits)
- SYST 763 Research Methods in Systems Engineering and IT (3 credits)
- 15 credits of 700-level SEOR approved courses, a list of approved courses is available from the department.
- 3 credits in a SYST or OR course numbered 600 or higher, excluding SYST 798 Project Course in Systems Engineering and OR 680 Project in Operations Research.

No more than 3 credits are allowed for a directed reading course. All courses must be approved by the student’s dissertation committee chair. Course substitutions must be approved by the dissertation committee chair and the SEOR Department chair. A GPA of 3.50 is required, and no grade of C is allowed in these 24 credits.

Students entering without a master’s degree are required to complete an additional 24 credits of master’s level courses. Consult the SEOR Department for further details.

Plan of Study
All decisions concerning the student’s course requirements and plan of study must be approved by the advisor or director, with consent of the department’s doctoral coordinator.

Qualifying Exam
Each student must take four exams within two years of enrolling in the program. The exam is primarily for testing the students’ familiarity with fundamental concepts.

- SYST 510 Systems Definition and Cost Modeling
- SYST 520 Systems Engineering Design
- OR 541 Operations Research: Deterministic Models
- OR 542 Operations Research: Stochastic Models

A student who passes three of the four exams in the first attempt must retake and pass the failed exam within one year. A student who passes fewer than three exams in the first attempt must retake and pass an entire set of four exams within one year. After two unsuccessful attempts, a student is dismissed from the PhD program.

Doctoral Supervisory Committee
The dissertation director must be a member of the SEOR graduate faculty or a member of the Mason graduate faculty with approval from the SEOR Department chair. The doctoral supervisory committee must include at least three members from the SEOR Department-approved graduate faculty, and at least one non-SEOR member from the Mason faculty. The composition of the doctoral supervisory committee is to be approved by the doctoral coordinator. At least three members of the committee must be members of the Mason graduate faculty.

Comprehensive Exam
The comprehensive exam is taken after the student has satisfactorily completed all the advanced emphasis course work requirements in the approved plan of study filed by the student. The examiners will include SEOR faculty and the supervisory committee plus any outside examiners considered appropriate; however, the supervisory committee determines whether the student passes or not. The comprehensive exam consists of an eight-hour written exam and an oral exam. The committee will determine whether the student has a mastery of the advanced emphasis course work. If a student fails the comprehensive exam, the student may request a re-examination within 60 days of receiving notice of the exam result. The request should be made in writing to the doctoral coordinator. If the student fails the re-examination or does not request a re-examination within 60 days, the student will be dismissed from the PhD program.

Dissertation Proposal
After passing the comprehensive exam, each doctoral student prepares a written dissertation proposal, which is presented to the doctoral supervisory committee. After successfully completing this requirement, the student is formally admitted as a candidate for the PhD degree.

Dissertation Defense
When the central portions of the research have been completed to the point where the student is able to describe the original contributions of the dissertation effort, a candidate submits the written dissertation to the supervisory committee and schedules an oral predefense with the committee. This predefense is attended by the supervisory committee. The supervisory committee must approve the work or the student must schedule a second predefense.

Once the committee believes the student is ready, a final public oral defense may be scheduled no sooner than one month after the conclusion of the predefense, to have an announcement posted for at least two weeks. Following a satisfactory evaluation of the oral defense of the dissertation by the supervisory committee, the student must prepare, with supervision from the dissertation director, a final publishable dissertation that represents a definitive contribution to knowledge in systems engineering and operations research. This document must meet format guidelines specified by the Guide for Preparing Graduate Theses, Dissertations, and Projects. If the student fails to successfully defend the dissertation, the student may request a second defense, following the same procedures as for the initial defense. There is no time limit for this request, other than the general time limits for the doctoral degree. An additional predefense is not required, but
the student is strongly advised to consult with the committee before scheduling a second defense. If the student fails on the second attempt to defend the dissertation, the student will be dismissed from the PhD program.

**Virginia Commonwealth Graduate Engineering Program**

The Commonwealth Graduate Engineering Program (CGEP) is a cooperative program of Mason, the University of Virginia (UVA), Virginia Tech, Old Dominion University (ODU), and Virginia Commonwealth University (VCU) designed to make graduate engineering education available in locations throughout Virginia through distance learning. CGEP offers graduate degree programs in engineering and information technology. Instruction takes place through a mix of videoconferencing and web-based courses available at educational and corporate receive sites around the state.

Each degree program is taught by one of the five participating universities, and prospective students should apply directly to the university offering the degree of interest. Mason’s master of science in computer science degree is available through CGEP. Courses from the other institutions may be offered at Mason’s Fairfax or Prince William campuses. For more information, go to <ite.gmu.edu/graduates/commonwealth_graduate_engineering.php>.
The School of Management (SOM) provides the following academic offerings:

Undergraduate
- Accounting (ACCT)
- Finance (FNAN)
- Information Systems and Operations Management (ISOM)
- Management (MGMT)
- Marketing (MKTG)
- Business Minor (MSOM)
- Business Administration for RAK Campus (BUAD)

Graduate
- MBA (Master of Business Administration)
- Executive MBA
- MS in Accounting
- MS in Technology Management
- Postbaccalaureate Accounting Certificate

SOM has provided high-quality business education to the region since 1972. SOM’s 80 full-time and 80 adjunct faculty members bring both theoretical and applied expertise to the classroom.

SOM faculty members have research and teaching expertise on topics such as executive compensation, effect of insider trading on stock prices and e-commerce, and international work groups and teams. Faculty members have testified before nearly every federal agency and served as consultants to industry and organizations such as NASDAQ, the Federal Deposit Insurance Corporation, and the Department of Defense.

Today, more than 3,800 students are studying in five undergraduate majors, the business minor, and four graduate programs. SOM’s offerings provide a solid business core that emphasizes information technologies and communication, entrepreneurial thinking, and a global business strategy. We prepare students to lead with initiative, imagination, and innovation. The Mason MBA, Executive MBA, and MS in Technology Management are pioneers nationwide, being among the first graduate business programs to require a global residency program for all graduate business students.

Of more than 2,000 business programs in the nation, only one-quarter are fully accredited by the Association to Advance Collegiate Schools of Business (AACSB) International. SOM is one of only 167 business schools with both business and accounting accreditation by AACSB International.

A Mason business degree provides in-depth exposure in an area of specialization, as well as the skills required for success in a global business world. The school’s unique undergraduate key and capstone courses develop communication and analytical skills and provide students with opportunities to interact with regional business leaders.

More than 90 percent of the school’s graduate students study while employed, which gives them numerous opportunities to link classroom learning to real-world business challenges. Because our graduate programs emphasize learning in teams, each student has the opportunity to test classroom concepts against the best practices of some of the region’s premier organizations. SOM integrates teamwork, technology, and innovation into a state-of-the-art curriculum to prepare students for tomorrow’s business environment.

Course Work
SOM offers all course work designated ACCT, BULE, EMBA, FNAN, MBA, MGMT, MIS, MKTG, MSOM, OM, SOM, and TECM in the Course Descriptions chapter of this catalog.

UNDERGRADUATE PROGRAMS
Because all organizations face constant change driven largely by information technology (IT), organizations and business models are continuously evolving. SOM faculty and students are intellectually curious about what IT, new business models, and paradigm shifts mean to present and future organizations.

Success in business requires a broad portfolio of skills, as well as a desire for lifelong learning. When studying business, focusing on just one discipline is not enough. Today’s workforce must be able to perform successfully in an environment of change and ambiguity. The SOM interdisciplinary curriculum prepares students to be successful in the fast-paced world of global business.

Bachelor of Science Degree
Associate Dean for Undergraduate Programs
Phone: 703-993-1880
Web: som.gmu.edu

The programs in management education culminate in a BS degree with a major from one of five areas: accounting, finance, information systems and operations management, management, or marketing. A minimum of 120 credits of course work is required, of which at least 45 credits must be at the 300 or 400 level.

Students should consult the Baccalaureate Degree Requirements section in the Academic Policies chapter in this catalog for information concerning literacy, general education, residence, and other academic requirements.

In addition, students should carefully examine prerequisites for SOM courses. Students may be removed from a course if they enroll without having fulfilled the prerequisites.

Writing-Intensive, Synthesis Requirements
Mason’s writing-intensive requirement for SOM majors is satisfied by successful completion of SOM 301. The synthesis requirement is satisfied by successful completion of SOM 498.

Degree Requirements
All degree applicants must complete a minimum of 30 credits of SOM core and major courses at Mason. They must include at least 9 credits required for the specific major and SOM 498. A grade of C or higher must be earned in SOM core and major requirements.

SOM students pursuing a BS degree must complete the university-wide general education program plus 1 additional credit of natural science. The natural science requirement must be fulfilled by completing two 4-credit laboratory sciences. All degree applicants must complete the following SOM degree requirements:

- ECON 103* .................................................. 3
- ECON 104* .................................................. 3
- ECON 300–400 ........................................... 3
- ANTH, PSYC, SOCI, or SOM 100 .................. 3
- MATH 108 or 113* (satisfies university requirement for quantitative reasoning) .................... 3

School of Management Core* .................................. 35
- ACCT 203 .................................................. 3
- ACCT 301 .................................................. 3
- BULE 302 .................................................. 3
- FNAN 301 .................................................. 3
- MGMT 301 .................................................. 3
- MIS 102 ..................................................... 1
- MIS 301 ..................................................... 3
- MKTG 301 .................................................. 3
- OM 210 ..................................................... 4
- OM 301 ..................................................... 3
- SOM 301 ..................................................... 3
- SOM 498 ..................................................... 3
- Major* ..................................................... 18

General Electives ..................................................... 20
These credits may not include pure activity courses, such as those listed under the catalog designations of individual sports, physical education, team sports, and recreational activities. Certain courses under the designation of dance, music, theater, and arts are also restricted. Consult the SOM web site for specific information.

Total Credits
University General Education and SOM .................. 120
*Completion with a grade of C or better is required for graduation.

Acceptance into SOM
A student interested in pursuing a major in accounting, finance, information systems and operations management, management, or marketing must apply for acceptance to SOM during the semester in which the student will complete acceptance requirements. A student who has not received acceptance will have a degree status classified as “BPRE,” until the application is approved.

Acceptance is selective, based on completion of the following:
- At least 48 credits, with a minimum of 9 credits at Mason
- A GPA of 2.50 or higher at the end of the semester of application for acceptance for all courses attempted and from all schools and universities attended
- Successful completion of the following courses with a grade of C or better: ACCT 203 (prerequisite: C or better in ECON 103); OM 210 (prerequisite: C or better in MATH 108); SOM 301 (prerequisite/corequisite: C or better in ACCT 203 and OM 210); MATH 108
• A minimum Mason cumulative and semester GPA of 2.00 at the end of the semester of application

**Note:** Students must meet the SOM acceptance requirements in effect at the time of application to the school.

Applications must be submitted by November 1 for the following spring semester; April 1 for the following summer term; and July 1 for the following fall semester. Students should file the application at the beginning of the semester in which they anticipate completing the requirements set forth above. For more information about the application process, contact the Office of Academic and Career Services, 703-993-1880, or visit som.gmu.edu.

**Academic Advising**

Academic planning for undergraduate students is available in the SOM Office of Academic and Career Services, Enterprise Hall, Room 008. Students are encouraged to consult with an advisor regularly. Any student who wishes to change to a major in SOM must consult a SOM academic advisor for degree requirements. For more information about making an appointment or walk-in advising hours, call 703-993-1880, or go to som.gmu.edu.

**Accounting, BS**

**Degree Requirements**

The BS in accounting (ACCT) prepares students for professional careers in the private and public sectors. Students learn how to evaluate fundamental value propositions for various types of organizations and transactions, and convert financial and economic information from these organizations and transactions into information that is useful for making decisions. Students also learn how to design and test information systems that provide reliable and relevant information for planning and control. Furthermore, students learn how to identify value-creating opportunities and choose from among competing operating, investing, financing, and disclosure alternatives to maximize firm or organizational value.

The program emphasizes, but is not limited to, the accounting profession and its role in business and government, including professional responsibilities and ethics. The program stresses conceptual understanding, technical competencies, analytic abilities, communication skills, and computer literacy. The accounting degree program is separately accredited by AACSB International.

In addition to general requirements for the BS degree, students must complete all required credits in upper-level accounting courses, with grades of C or better in each course. Students majoring in accounting must complete 18 credits composed of the following:

• ACCT 311 Managerial and Cost Accounting
• ACCT 331 Intermediate Financial Accounting I
• ACCT 332 Intermediate Financial Accounting II
• ACCT 351 Taxation and Managerial Decision Making
• ACCT 361 Accounting Information Systems
• ACCT 461 Assurance and Audit Services

The following elective courses are offered by the accounting area:

• ACCT 372 Business Analysis and Valuation
• ACCT 411 Advanced Managerial Accounting
• ACCT 433 Advanced Financial Accounting
• ACCT 451 Advanced Federal Taxation

• ACCT 462 Honors Seminar in Accounting
• ACCT 472 Government and Not-for-Profit Accounting
• ACCT 491 Seminar in Accounting
• ACCT 499 Independent Study

Materials are available in the Office of Academic and Career Services to provide guidance regarding recommended electives. Students who anticipate taking the CPA, CMA, CIA, or other professional exam should consult applicable regulations and meet with their advisor. State regulations regarding professional examinations may dictate course selections.

**Finance, BS**

**BS-FNAN Degree Requirements**

The BS in finance (FNAN) prepares students for professional careers by providing a solid foundation in the financial principles necessary to make operating decisions for an organization. In addition to general degree requirements for the major, students must complete 18 credits in upper-level finance courses with a grade of C or better in each course.

**Required courses (choose three)**

FNAN 302 Financial Analysis and Forecasting
FNAN 311 Principles of Investment
FNAN 321 Financial Institutions
FNAN 401 Advanced Financial Management

**Electives (choose three)**

FNAN 302, 311, 321, or 401, if not taken as a required course
FNAN 351, 411, 412, 421, 440, 451, 454, 462, or 491

**Information Systems and Operations Management, BS**

**BS-ISOM Degree Requirements**

The BS in information systems and operations management (ISOM) prepares students for a range of career options by instilling in them skills that add value to organizations. Graduates will apply their knowledge of technology and business functions to design and improve existing operational and core business processes. They will integrate different business functions into seamless IT-enabled processes and collaborate with business users in defining requirements, identifying new IT-driven business opportunities, building prototypes to validate operations, and managing complex technology projects. The content of the ISOM major is at the intersection of technology, process, and people.

In addition to general degree requirements for the major, students who major in ISOM must complete 18 credits of upper-level ISOM courses with a grade of C or better in each course. Of these, 9 credits in the required courses for the major are listed below. Students have considerable flexibility in their choice of electives and may choose from two tracks of study: one in management information systems, which prepares students for a career in the IT industry, and the other in management of business operations, which develops expertise in areas such as quality, project, and supply chain management and business process analysis. Students are strongly urged to discuss their choice of electives and programs of study with their academic advisor. It is also strongly recommended that students planning to major in ISOM take MIS 302 as part of their program.
Required courses
MIS 310 Introduction to Database Management Systems
MIS 330 Computer Systems Analysis and Design
OM 493 Management of Technology Projects

Electives (choose three)
OM 320, 352, 435, 452, 456, or 499
MIS 302, 320, 411, 412, 430, 435, 440, 450, 491, or 499

Management, BS

Degree Requirements
The BS in management prepares students to take leadership, management, and entrepreneurial roles in the public and private sectors. Students learn such skills as strategic thinking, motivating and managing nationally and internationally diverse workforces, building and leading team efforts, negotiating successfully, and instituting planned change in organizations. In addition to general degree requirements for the BS, students must complete 18 credits in upper-level management courses with a grade of C or better in each course.

Required courses
MGMT 312 Principles and Practices of Management
MGMT 321 Introduction to Human Resource Management
Electives (choose four):
MGMT 412, 413, 421, 431, 451, 461, 462, 463, 464, 471, 491; BULE 402

Management majors may focus their careers in several areas. In selecting four elective courses, students may want to consider a likely career path. Recommended courses for three possible careers are provided below.

- Human Resource Management
  MGMT 421, 431
  Two other courses from above list
- Front-Line Manager or Management Trainee
  MGMT 412, 463, 464
  One other course from above list
- Entrepreneur
  MGMT 451, 471; BULE 402
  One other course from above list

Students with a GPA of at least 3.00 are offered the opportunity to further distinguish their record by participating in MGMT 462 Management Honors Seminar, which addresses a key contemporary management issue in an intensive small group format.

Enrollment in MGMT 462 is by management faculty invitation. To be eligible for an invitation, students must be accepted into SOM with a management major, have a cumulative GPA of at least 3.00 with a minimum of 75 semester hours of course work, and have a minimum GPA of 3.00 in course work completed for the management major. The size of the Honors Seminar will be kept small. If the number of interested and qualified students exceeds the number of available spots, management area faculty will select the most qualified students to participate.

Marketing, BS

Degree Requirements
The BS in marketing prepares students for a broad range of global and domestic career options in market and consumer research, brand management, advertising, customer relationship management, new market and business development, and marketing strategy. Marketing opportunities are increasing in the new economy as firms, government agencies, and non-profit organizations adopt a market orientation.

A marketing major provides students with a solid background in marketing concepts and practices, with emphasis on market analysis and planning, research, and consumer behavior. Because marketing draws on a variety of disciplines for its foundation and is practiced globally, marketing majors are encouraged to take electives in related fields such as psychology, sociology, economics, public policy, international studies, computer science, and foreign languages. Students must complete 18 credits of upper-level marketing courses with a grade of C or better in each course.

Required Courses
MKTG 312 Consumer Behavior
MKTG 351 Marketing Research Techniques and Applications
MKTG 471 Marketing Management

Electives (choose three):
MKTG 311, 313, 315, 332, 333, 407, 451, 481, 491, 499

Concentration in Internet Marketing

Resiliency (IMR)
Marketing also offers a concentration in Internet marketing resiliency within the marketing major. This concentration prepares students to enhance and protect the electronic marketing efforts of their firms.

Required courses
Choose four from the following six courses:
MIS 320 Business Data Communications
MKTG 315 Internet Marketing
MKTG 351 Marketing Research Techniques and Applications
MKTG 451 Competitive Intelligence and Information Security
MKTG 471 Marketing Management
MKTG 491 Special Topics in Marketing

Marketing majors are advised to work closely with their academic advisor to ensure that electives taken in related fields provide the opportunity to gain proficiency in specific marketing-related areas.

Certificate Program in Accounting

CERB-ACCT
This program provides an opportunity for nondegree-seeking students to earn the academic credit necessary to sit for the Uniform CPA Examination in Virginia. The requirement for enrollment is a bachelor’s degree or higher from an accredited college or university.

Students are required to complete a minimum of 30 credits of accounting courses. Fifteen credits must be taken at Mason after acceptance to the certificate program. Successful completion of the certificate program requires a grade of C or better in accounting courses and a GPA of at least 2.00 in all courses. All students who want to sit for the Uniform CPA Examination in Virginia are required to have completed 150 college-level credits, including at least 30 credits of accounting courses in financial accounting, auditing, taxation,
and management accounting, and at least 24 credits of nonaccounting business courses. To receive the Mason accounting certificate, individuals must have completed the following required accounting courses or their equivalents:

**Required courses**

- ACCT 203 Survey of Accounting
- ACCT 301 Financial Accounting and Managerial Decision Making
- ACCT 311 Managerial and Cost Accounting
- ACCT 331 Intermediate Financial Accounting I
- ACCT 332 Intermediate Financial Accounting II (prerequisite FNAN 301)
- ACCT 351 Taxation and Managerial Decision Making
- ACCT 361 Accounting Information Systems
- ACCT 461 Assurance and Audit Services

**E electives (choose two):**

- ACCT 372 Business Analysis and Valuation
- ACCT 382 Financial Analysis and the Business Life Cycle
- ACCT 411 Advanced Managerial Accounting
- ACCT 433 Advanced Financial Accounting
- ACCT 451 Advanced Federal Taxation
- ACCT 462 Honors Seminar in Accounting
- ACCT 472 Government and Not-for-Profit Accounting
- ACCT 491 Seminar in Accounting
- ACCT 499 Independent Study in Accounting

If a student has not previously studied business, the following courses are recommended:

- BULE 302 Legal Environment of Business
- BULE 402 Commercial Law
- FNAN 301 Financial Management (Prerequisite for ACCT 332)
- FNAN 302 Financial Analysis and Forecasting
- MIS 301 Introduction to Business Information Systems
- OM 210 Statistical Analysis for Management

If a student has a previous degree in business or accounting, the faculty recommends that students take SOM courses above the 301 level to complete the 15 Mason credits needed after acceptance to the certificate program.

**Minor in Business**

The business minor provides an introduction to the skills needed for success in the rapidly changing and evolving world of business. Because it is designed for nonbusiness students who seek to learn business essentials to enhance their own area of expertise, the minor provides broad exposure to business concepts and theories. The minor also presents and integrates the major functional areas in business to solve management problems through the use of IT. Strong written and oral communication skills are expected. Prior to beginning the minor, students must have sophomore standing.

The minor consists of the following seven courses. Students must complete five of the seven courses for a total of 15 credits.* **Students must achieve a grade of C or better in each course that is applied toward the minor.**

**Required courses**

- MSOM 300 Managing Financial Resources
- MSOM 301 Managing People and Organizations
- MSOM 302 Managing Information in a Global Environment
- MSOM 303 Marketing in the Global Economy

**Electives (choose one of the following)**

- MSOM 304 Entrepreneurship: Starting and Managing a New Enterprise
- MSOM 305 Managing in a Global Economy
- MSOM 306 Managing Projects and Operations

These courses may not be taken for credit by SOM majors, except for MSOM 305, which may be used only to fulfill the university general education global understanding requirement.

General education students who have already taken and received credit for MGMT 301, MIS 301, MKTG 301, or OM 301 shall substitute courses as follows: MGMT 301 for MSOM 301, MIS 301 for MSOM 302, MKTG 301 for MSOM 303, and OM 301 for MSOM 306. Both courses cannot be taken for credit. Students who have taken and received credit for both ACCT 203 and FNAN 301 shall substitute the combination for MSOM 300. All three courses cannot be taken for credit. Transfer students may transfer a maximum of 6 credits toward the business minor.

### Business Administration, BS

**George Mason University at Ras Al Khaimah (RAK)**

The program in business administration offered by SOM at the Mason RAK Campus culminates in a BS degree. A minimum of 120 credits of course work is required, of which at least 45 credits must be at the 300 or 400 level.

Students should consult the Baccalaureate Degree Requirements section in the Academic Policies chapter of this catalog for information concerning the literacy requirement, English composition requirement, core requirements, catalog requirements, residence requirements, and academic requirements. All undergraduates seeking a baccalaureate degree from Mason must complete the university’s general education requirements. The requirements and the selection of courses that fulfill those requirements are listed earlier in this catalog. SOM degree requirements and acceptance to degree status must be completed as stated earlier in this section. Additional courses to satisfy the 18 credits of major courses will be in advanced accounting, finance, management, marketing, operations management, and management information systems, along with global business administration.

This program is available only on the Mason RAK Campus. More information may be found at the rak.gmu.edu.

### GRADUATE PROGRAMS

**Graduate Admissions**

4400 University Drive, MS 5A2
Fairfax, VA 22030
Phone: 703-993-2136
Fax: 703-993-1778
E-mail: somgrad@gmu.edu
Web: som.gmu.edu

SOM offers an MS in accounting, MBA, Executive MBA, and MS in technology management. Graduate programs are accredited by AACSB International.

### Accounting, MS

**MS-ACCT**

Phone: 703-993-2136
E-mail: somgrad@gmu.edu

The MS in accounting (MSA) is designed to meet the special needs of new professionals entering the accounting profession.
The programs allow students to earn a state-of-the-art graduate degree in accounting and thereby meet the 150-credit requirement to sit for the Uniform CPA Examination in Virginia and CPA exams in most other states. The program integrates fundamental business skills and specialized knowledge and skills required by the accounting profession.

Admission Requirements

All students registering for SOM graduate courses must have graduate standing. Nondegree student status is not available. Admission is highly competitive and available to qualified candidates holding a baccalaureate degree in accounting from an AACSB-accredited business school. Applicants are evaluated primarily on their undergraduate record and GMAT performance. For information on the GMAT, go to www.mba.com. Professional work experience is not required. Students begin the program in the fall or spring semester. The priority deadline for application is April 1 for the fall semester and November 1 for the spring semester.

Students can have part- or full-time status. Students completing the MS in accounting course work may elect to further develop their leadership potential by transferring to the MBA with a concentration in accounting. Please contact the department for details.

Required Courses

All MS in accounting students must complete the following 10 courses (3 credits each):

- ACCT 741 Information Technology Auditing
- ACCT 742 Corporate Governance and Ethics
- ACCT 743 Corporate Financial Reporting
- ACCT 744 Fraud Deterrence and Detection
- MBA 603 Managerial Economics and Decisions of the Firm
- MBA 633 Statistics for Business Decision Making
- MBA 638 Managing Operations and Technology for the Digital Enterprise
- MBA 643 Managerial Finance
- MBA 653 Organizational Behavior and Human Resource Management
- MBA 701 Business Analysis and Valuation

Students must either graduate with an MSA degree on completion of 30 credits or opt into the Mason MBA program.

Business Administration, MBA

Phone: 703-993-2136
E-mail: mba@gmu.edu

The Mason MBA Program provides a high-level professional education in business administration. It is offered in both part- and full-time formats. The curriculum integrates functional areas with an emphasis on group work, information technology, and the global business environment.

Admission Requirements

All students registering for SOM graduate courses must have graduate standing. Nondegree student status is not available. Admission is highly competitive and available to all qualified candidates without regard to prior academic major. No previous course work in business administration is required, but a four-year undergraduate degree and a college-level calculus course must be successfully completed before matriculation.

Admission is based on a combination of academic, professional, and leadership factors. No portion of the portfolio is considered more important than another; careful consideration is given to every part of the application packet to ensure that the Admission Committee has an accurate profile of a candidate’s professional and academic qualifications. For information on the GMAT, go to www.mba.com. A minimum of two years of professional work experience is required before entering the program.

The part-time MBA format commences twice a year: fall and spring semesters. Priority is given to applicants submitting their application by November 1 for the following spring semester and April 1 for the following fall semester. Applications for admission received after November 1 and April 1 will be considered on a space-available basis. The full-time MBA format begins only in the fall and has an application deadline of April 1. International students have an application deadline of February 1.

The MBA core curriculum effectively integrates functional areas with the use of IT, oral and written communication, and teamwork. The MBA program requires 48 credits: 30 credits of core courses and 18 credits of elective courses. Students complete the degree program in two or three years depending on the cohort selected. Because of the cohort structure, part-time students commit to attending classes a minimum of two times per week and full-time students attend classes in the late afternoon three or four days each week. Part-time students are required to enroll in classes during the summer session to complete their degrees on a timely basis.

Core Courses

Thirty credits of core courses are completed prior to enrollment in electives. Part-time students enroll in at least 6 credits per semester and at least 3 credits each summer. Full-time students enroll in 12 credits per semester, with no expectation for enrollment in the summer session. All MBA students complete the following core courses:

<table>

*Travel outside the United States is required. Travel costs are included in the MBA program tuition and fees.

Elective Courses

After completing the core courses, students must complete a series of market-driven elective courses (18 credits). A limited number of courses from outside the MBA Program or through the Consortium of Universities of the Washington
Metropolitan Area may be taken as electives with the permission of the program director.

Concentrations
MBA students may use electives to complete courses leading to a concentration in accounting, financial management, entrepreneurship, market and business development, information systems management, or project management.

▲ Accounting (ACCT)
Required courses
MBA 741 Information Technology Auditing
MBA 742 Corporate Governance and Ethics
MBA 743 Corporate Financial Reporting
MBA 744 Fraud Deterrence and Detection
One course from the following:
MBA 701 Business Analysis and Valuation
MBA 702 Corporate Financial Policy
MBA 703 Financial Markets
MBA 706 Investment Analysis
MBA 708 Taxes and Business Strategy
MBA 717 International Finance
Note: One elective must be taken outside this concentration.

▲ Entrepreneurship (ENTR)
Required courses
MBA 705 Venture Capital and Private Finance
MBA 711 Entrepreneurship
MBA 714 Managing Growth of Small Businesses
Two courses from the following:
MBA 701 Business Analysis and Valuation
MBA 708 Taxes and Business Strategies
MBA 712 Project and Cost Management
MBA 713 Human Resource Management
MBA 719 Entrepreneurship Laboratory (1 credit, may be repeated 3 times)
MBA 721 Marketing Decision Systems
MBA 725 Leadership
Note: One elective must be taken outside this concentration.

▲ Financial Management (FM)
Required courses
MBA 701 Business Analysis and Valuation
MBA 702 Corporate Financial Policy
MBA 703 Financial Markets
Two courses from the following:
MBA 704 Risk Management and Financial Innovation
MBA 705 Venture Capital and Private Finance
MBA 706 Investment Analysis
MBA 708 Taxes and Business Strategies
MBA 717 International Finance
Note: One elective must be taken outside this concentration.

▲ Information Systems Management (ISM)
Required courses
MBA 731 Business Systems Analysis and Design
MBA 737 Information Technology Governance and Policy
MBA 738 Business Intelligence and Data Management
Two courses from the following:
MBA 711 Entrepreneurship
MBA 732 Knowledge Management
MBA 734 Electronic Commerce and E-Business
MBA 735 Systems Thinking and Business Simulation
MBA 741 Information Technology Auditing
Note: One elective must be taken outside this concentration.

▲ Market and Business Development (MBD)
Required courses
MBA 721 Marketing Decision Systems
MBA 722 Consumer Behavior
MBA 723 Supply Chain Management
Two courses from the following:
MBA 711 Entrepreneurship
MBA 724 Marketing Communications
MBA 725 Leadership
MBA 732 Knowledge Management
MBA 734 Electronic Commerce and E-Business
Note: One elective must be taken outside this concentration.

▲ Project Management (PMGT)
Required courses
MBA 712 Project Management
MBA 715 Advanced Project and Program Management
MBA 725 Leadership
Two electives from the following:
MBA 713 Human Resource Management
MBA 724 Marketing Communications
MBA 726 Negotiation
MBA 731 Business Systems Analysis and Design
MBA 732 Knowledge Management
MBA 737 Information Technology Governance and Policy
Note: One elective must be taken outside this concentration.

■ Executive MBA
MBA-BUEx
Phone: 703-993-4457
E-mail: emba@gmu.edu

The Executive MBA Program is completed in 21 months, including a summer break between the first and second year. Students attend classes one day per week, on alternating Fridays and Saturdays. The program’s focus is management decision making, strategic management of business resources, and leadership.

Dedicated faculty, an innovative and relevant curriculum, a student-centered program team, and great colleagues contribute to the learning experience of a lifetime.

Participants
The Executive MBA is designed for those with a minimum of 7 to 10 years of significant business and professional experience. Participants must have the support of their organizations to attend Friday classes and participate in global and domestic residencies.

Sponsoring organizations have included ATPCO, AMS, Apple Federal Credit Union, Blue Cross/Blue Shield, Booz Allen Hamilton, Case New Holland, the Center for Naval Analyses, Cisco, CSC, DISA, Department of Defense, Department of Homeland Security, EDS, Ernst & Young, Exxon-Mobil, Fannie Mae, Freddie Mac, GE Healthcare Financial Services, General Dynamics, HP, IBM, KPMG, Level (3) Communications, Lockheed Martin, ManTech International, Marriott, Nextel, Northrop Grumman, OPM, Orbital Sciences, PamAmSat, Pinkerton Computer Consultants, Raytheon, SAIC, SRA, Sunrise Senior Living, USA Today, the
Management

Program Schedule

Eight Modules

During each of our seven-week modules, students complete two to three courses in an applications-oriented sequence that takes them from developing core management skills through the understanding and application of the tools of business performance to the talents of leadership.

Module 1: The Economic and Analytical Foundations of Management

Module 2 and 3: Managing Resources for Performance

Module 4: The Global Perspective

Module 5 and 6: Sustainable Business Performance

Module 7 and 8: Leadership and Strategy

Academic Year I

EMBA 603 Managerial Economics

EMBA 613 Financial Reporting and Decision Making

EMBA 623 Marketing Management

EMBA 633 Statistics for Managers

EMBA 638 Strategies for Operations Management: Process and Supply Chain Leadership

EMBA 641 Building the High Performance Team

EMBA 643 Managerial Finance

EMBA 653 Organizational Behavior

EMBA 752 Strategic View of the Firm

EMBA 791 Business, Government, and Regulatory Interface

EMBA 798 International Business Environment

Academic Year II

EMBA 612 Managing Costs and Evaluating Performance

EMBA 660 Management of Information Technology

EMBA 673 Legal Environment for Managers

EMBA 678 Strategic Management

EMBA 703 Financial Markets

EMBA 713 Human Resource Management

EMBA 735 Systems Thinking for Business Performance

EMBA 750 Capstone Course

EMBA 791 Business, Government, and Regulatory Interface

And two electives*

EMBA 708 Taxation and Business Strategy

EMBA 715 Special Topics in Accounting

EMBA 716 Managing Change

EMBA 717 Corporate Governance

EMBA 724 Integrated Marketing Communication

EMBA 725 Leadership and the Role of the General Manager

EMBA 734 Electronic Commerce

EMBA 735 Special Topics in Decision Science

EMBA 745 Special Topics in Finance

EMBA 751 Corporate Strategy and Policy

EMBA 755 Special Topics in Management

EMBA 765 Special Topics in Management Information Systems

EMBA 775 Special Topics in Marketing

Technology Management, MS

Phone: 703-993-1792
E-mail: techman@gmu.edu

The MS in technology management is designed to provide students with a graduate management education that will help them further their leadership careers in technology and technology-oriented businesses and organizations. With technology innovation and commercialization occurring at an increasing pace and industries becoming more networked and global, business success depends on the successful management of technology. Companies are succeeding with rapid innovation, insightful technology integration, creation of focused technology organizations, and skillful management of complexity. The program addresses how to succeed in this marketplace and emphasizes leadership and management; special considerations of technology innovation, commercialization, introduction, and integration; and methods and approaches of systems thinking.
Students are from the major firms and organizations in the Washington, D.C., region. They average 14 years of work experience, and almost 30 percent of the students already have graduate degrees. Approximately two-thirds of the students work for the private sector, while the remainder work for federal government agencies or departments.

Program graduates receive chief information officer (CIO) certification, in partnership with the federal CIO Council, in addition to their MS degree. The program satisfies the requirements for federal government CIOs that were developed in response to the passage of the Information Technology Management Reform Act. Mason is one of only six institutions certified to offer this qualification and was one of the founding university partners with CIO University.

Admission Requirements
Students must have a bachelor’s degree from an accredited institution, three years of professional work experience, two professional references, and a GMAT score or other evidence that they can perform graduate-level work.

Program Schedule
The program, designed for working professionals, starts in January and lasts for 18 months. Classes are held on the Fairfax Campus on Saturdays from 8 a.m. to 5 p.m. The program is 36 credits and includes a capstone project and an international residency.

Spring Semester, First Year
- TECM 610 Communications and Leadership
- TECM 620 Economics of Technology Management
- TECM 635 Metrics and Statistics for Quality and Project Management
- TECM 702 Interpersonal Dynamics and Teamwork

Summer Session, First Year
- TECM 700 Business Engineering and Change Management
- TECM 740 Managing of the Client Relationships

Fall Semester, First Year
- TECM 615 Decision Making Using Accounting and Financial Information
- TECM 704 Planning and Control of Projects
- TECM 720 Analysis of IT Industries

Spring Semester, Second Year
- TECM 640 Management of Consulting and Technical Professionals
- TECM 703 Technology Assessment, Evaluation, and Investment
- TECM 745 Business Function and Operations: Client Industries

Summer Session, Second Year
- TECM 735 Technology Management Capstone Project
- TECM 750 Global IT Management International Residency
School of Public Policy

Rooted in the strong democratic government traditions of the commonwealth of Virginia, the School of Public Policy (SPP) is committed to transcending traditional conceptual boundaries of research and teaching by integrating real-world experience and problem solving into public policy education. The school’s programs focus on the interplay of culture, organizations, and technology to find alternative approaches to public policy decisions and policy making. Teaching and research are focused on six themes: governance and public management; international commerce and policy; organizational informatics and e-government; regional development and transportation policy; science and technology policy; and society, culture, and values in public policy.

SPP contributes to new and innovative concepts in policy formation while building on the fundamental, pluralistic, and democratic characteristics of policy making in the United States. SPP endorses creativity and responsibility in governance, public management, and the development of economic policy.

Graduate Degree Programs
Public Policy, PhD
Public Policy, MPP
International Commerce and Policy, MA
Transportation Policy, Operations, and Logistics, MA
New Professional Studies: Organization Development and Knowledge Management, MS
New Professional Studies: Peace Operations, MS
New Professional Studies: Knowledge Management, MA
Joint JD and MPP

Graduate Certificate Programs
Collaboration and Learning in Policy Organizations
Culture and Values in Social Policy
Global Medical Policy
Global Trade Management
Governance Systems and Policy Management
International Business Planning
International Governance and Institutions
International Market Analysis
Managing International Commerce
National Security and Public Policy
Regional Economic Development and Technology Policy
Regional Trade Policy and Planning
Science and Technology Policy
Science, Technology, and the Global Economy
Transportation and Logistics Policy

Administration
Kingsley E. Haynes, Dean
James H. Finkelstein, Vice Dean
Roger R. Stough, Associate Dean for Research, Development, and External Affairs
Keith B. Segerson, Assistant Dean for Research Administration and Outreach
Matthys van Schaik, Senior Assistant Dean for Graduate Professional Programs
Jill V. Emerson, Assistant Dean for Student Services
Leslie Metzger Levin, Assistant Dean for Graduate Admissions and Marketing
Elizabeth C. Eck, Acting Assistant Dean for Program Management
William H. Coester, Administrator

Faculty

Associate Faculty
Avruch, Bernold, Conlan, Donahue, Fearnssides, Flood, Frase, Friesz, Guagnano, Heclo, Hennessey, Mahler, Paden, Regan, Scimecca
Research and Term Faculty
Benson, Cook, Courtot, Davis, Ferrin, Fowler, Ha, Heineman-Pieper, Holleman, Jain, Johnson, Keenan, Kil, Kingston, Kulkarni, Leitch, Nicogossian, Paelinck, Regan, Riggle, Robb, Spalding, Wheeler

Adjunct Faculty
Bensimon, Burris, Curtis, Gaske, Gianturco, Gordon, Kewley, Muhlhausen, Ravera, Robinson, Rogowsky, Spear, Stabile, Sullivan, Thompson, Varkonyi, Watkins

Faculty Emeritus
Kash, Warfield

Course Work
SPP offers courses designated PUBP, ITRN, MNPS, LRNG, and TELE in the Course Descriptions chapter of this catalog. Other academic courses are offered in conjunction with the research activities of the Mason Enterprise Center.

GRADUATE PROGRAMS

■ Public Policy, PhD  PHD-PUBP

Phone: 703-993-2280
This program is distinctive in its heavy emphasis on the combined influence of technology, culture, and institutions on public policy. Students investigate the increasing tensions created by technologically driven organizational change.

To investigate the policy issues associated with substantive policy areas, students develop in-depth understanding of American institutions, values, and culture; competence in research methods and advanced analytical methodologies; and a comparative, international perspective. At the time of admission, each student is assigned a faculty advisor who assists in the design and development of the student’s program.

Admission Requirements
The program seeks students with exceptional potential for accumulating, sorting, analyzing, and communicating information and findings effectively. Public policy is inherently complex and value laden. In the end, high-quality policy analysis requires thoughtful and judicious management of complex and incommensurate information, both quantitative and qualitative. Potential students must be able to manage and integrate both kinds of information and produce persuasive, well-organized, written syntheses and analytical insight.

The ideal applicant has demonstrated capabilities in research and writing, basic mathematical skills roughly equal to the first semester of calculus, competence in statistics, some background in economics, and a theoretical and working knowledge of public policy processes. Applicants with strong records who are lacking in one or more of these areas may be admitted to the program and will receive assistance in making up deficiencies.

Applicants must hold a master’s degree from an accredited institution and have a GPA of 3.00 or higher. Prospective students are encouraged to attend an information session.

Please see the Graduate Admissions Policies section in this catalog and online at http://admissions.gmu.edu/grad/ for general information on graduate admission to George Mason University.

The following items should be included when applying:
• Graduate application with fee (no fee waivers)
• Two- to three-page written statement of goals and interest in advanced study in public policy
• Current résumé or vita
• Two official transcripts of all university work. International students must also submit a translation of all international transcripts into English, if applicable.
• GRE or GMAT results; scores should not be older than five years.
• Two letters of recommendation, with at least one from an individual qualified to attest to the candidate’s academic potential
• A writing sample approximately 10 to 20 pages in length, such as a technical report, professional publication, or term or seminar paper
• For international applicants, TOEFL results with a minimum score of 600 on the paper-based exam; 250 on the computer-based exam; or 100 with a minimum of 23 on each of the subsections on the Internet-based exam. Students may also be required to be tested by the English Language Institute.
• International Graduate Student Form (for students requesting an F-1 or J-1 visa)

Deadlines
The application deadline is February 1 for international students and March 1 for domestic students.

Degree Requirements
Students are required to complete a minimum of 82 credits of course work, of which no more than 12 may be dissertation credits. Up to 30 credits from a prior master’s degree may be applied toward the doctoral requirements at the program director’s discretion. Credit is not given for comprehensive exams passed at other universities.

Specific course work requirements include four foundational core courses, one semester of participation in the research colloquium, two courses in an area of program specialization, and four advanced courses tailored to the student’s research needs and interests. Courses are determined in collaboration with the student’s advisor and are drawn widely not only from SPP, but also from other programs at Mason.

At the completion of the first academic year of full-time study, students must pass a qualifying exam that evaluates mastery of the first year’s material, as well as the ability to integrate that material when addressing important and complex public policy problems and issues. The program also requires that students pass a field exam structured around their specific field of proposed doctoral research. Other requirements include the successful preparation and defense of a doctoral research proposal and the ensuing dissertation.

A complete description of the program policies, procedures, and requirements is in the SPP student and faculty handbook, which is published annually.

■ Public Policy, MPP  MPP-PUBP

Phone: 703-993-8200
The master’s program in public policy leads to a degree for aspiring or experienced professionals who seek career advance-
ment through cutting-edge education and training in policy analysis and development in increasingly technical and global environments. The program prepares students to be reflective practitioners who develop, implement, manage, analyze, evaluate, and effect innovative change in the public and private sectors through a course of study that emphasizes the fundamentals of policy development; the role of technology, analytic assessment, and modeling for policy evaluation; and the implications of international and global perspectives on policy formation. Courses are offered primarily in late afternoon and evening to fit the schedules of busy professionals.

Admission Requirements

Completed applications for fall and spring semesters are reviewed on a rolling basis, with late applications considered on a space-available basis. Applicants must hold a bachelor’s degree from an accredited institution, with a preferred GPA of 3.00 or higher on a 4.00 scale.

The following items must be included when applying:

• Graduate application with fee (no fee waivers)
• Two- to three-page written statement of student’s goals and interest in the program
• Current résumé
• Two official transcripts of all university work completed. International students must also submit a translation of all international transcripts into English, if applicable.
• For international applicants, TOEFL scores with a minimum score of 575 on the paper-based exam; 230 on the computer-based exam; or 88 with a minimum of 20 on each of the subsections on the Internet-based exam. Students may also be required to be tested by the English Language Institute.
• Two letters of recommendation, with at least one from an individual who is qualified to attest to the candidate’s academic potential.

Submission of GRE or GMAT scores is required only for students requesting merit-based funding consideration.

Students may be admitted for nondegree study and apply a limited number of credits toward the master’s degree should they choose to apply to the degree program later, in accordance with university policy.

Degree Requirements

Students must complete 39 to 42 credits of course work through a combination of core courses, a sequence of courses in their area of emphasis, and a professional experience requirement. Appropriate professional experience can be demonstrated through previous employment, a supervised internship, or an approved policy project activity. Students will also be exposed to the global nature of public policy activity through the core requirement of international comparative policy assessment.

One of the courses in the emphasis sequence will also have an international focus. The plan of study includes the following:

PUBP 741 Financial Policy Processes and Procedures .......... 3
ITRN 503 Investment and Macroeconomics .................. 4
And one of the following:
PUBP 705 Advanced Statistical Methods for Policy Research ................................................................. 3
PUBP 711 Rational Choice and Uncertainty: Systems Dynamics Policy Making ........................................... 3
PUBP 712 Policy Analysis and Management Science ........ 3
PUBP 713 Policy and Program Evaluation ........................ 3

Substantive Policy Emphases ........................................ 12
Electives are chosen from one of the following policy emphases:

• Transportation Policy, Operations, and Logistics
• Regional Economic Development and Technology Policy
• Governance Systems and Policy Management
• International Governance and Institutions
• Collaboration and Learning in Policy Organizations
• Science and Technology Policy
• Culture, Values, and Social Policy
• National Security
• Global Medical and Health Policy

Professional Experience Requirement .......................... 0–3
Certification that the student has experience in the public policy process outside the classroom and is ready to take leadership responsibilities must be exhibited by one of two ways: previous professional experience, approved by the program director, or an approved internship.

Total Credits ................................................................ 39–42

Certificate Programs

SPP offers nine certificate programs in conjunction with the Master of Public Policy Program. All certificates require the completion of at least 15 credits (five courses) of work, including a required core course and electives approved in consultation with an MPP faculty advisor. Students already pursuing a master’s degree in the School of Public Policy may, after admission to a certificate program, earn an additional 9 credits (three courses) in SPP to receive a certificate in addition to the master’s degree.

Participants have to be admitted to a certificate program. Admission requirements are the same as those for the master’s program above, including possession of a bachelor’s degree.

■ Certificate in Governance CERG-GSPM
Systems and Policy Management

Required Core Course
PUBP 700 Theory and Practice in Public Policy ............... 3
The International Commerce and Policy (ICP) Program is an interdisciplinary course of study to help students from around the world prepare for jobs in the new economy. Unlike traditional international affairs programs, the degree is focused on such international economic issues as global trade and investment. The MA in international commerce and policy differs from an MBA program by providing training in the political, social, and technological aspects of the global economy. In today’s world, it is critical for all participants in global markets to understand the multifaceted environment in which they work.

The core faculty is augmented by adjunct faculty members who bring a wealth of practical knowledge and experience, as well as strong academic qualifications to the program. Adjuncts are drawn from the U.S. Commerce and State Departments, the Office of the U.S. Trade Representative, and the International Trade Commission, among other government agencies, as well as from the private sector, the think tank community, and trade associations.

Courses are offered primarily in the late afternoon and evening to fit the schedules of busy professionals. In addition to classroom study, the program emphasizes experiential learning by supporting student internships, cooperative education, and research activities with private- and public-sector employers, and sponsoring a variety of study-abroad experiences.

Admission Requirements

Students from all academic backgrounds are welcome to apply; however, some knowledge of economics, preferably through at least two undergraduate economics courses, is encouraged. While many students may have prior educational and work-related training in business and economics, others see the ICP Program as a bridge from government, education, and other nonbusiness occupations to careers in the global economy.

Complete applications for fall and spring semesters are reviewed on a rolling basis, with late applications considered on a space-available basis. Applicants must hold a bachelor’s degree from an accredited institution, with a preferred GPA of 3.00 or higher on a 4.00 scale.

Please see the Graduate Admissions Policies section in this catalog and online at http://admissions.gmu.edu/grad/ for general information on graduate admission to George Mason University.

The following items must be included when applying:

- Graduate application with fee (no fee waivers)
- Two- to three-page written statement of student’s goals and interest in the program
- Current résumé
- Two official transcripts of all university work completed. International students must also submit a translation of all international transcripts into English, if applicable.
- For international applicants, TOEFL scores with a minimum score of 575 on the paper-based exam; 230 on the computer-based exam; or 88 with a minimum of 20 on each of the subsections on the Internet-based exam. Students may also be required to be tested by the English Language Institute.
- Two letters of recommendation, with at least one from an individual who is qualified to attest to the candidate’s academic potential.

Submission of GRE or GMAT scores is required only for students requesting merit-based funding consideration.

Students may be admitted for nondegree study and apply a limited number of credits toward the master’s degree should they choose to apply to the degree program later, in accordance with university policy.
Degree Requirements

The ICP Program requires 42 credits of course work. All degree candidates must take 30 credits of work in the required courses, as described below. The remaining 12 credits, which must be chosen in consultation with an ICP faculty advisor, consist of electives that include internships, independent studies, and study abroad. Most electives are grouped into thematic areas, such as international trade and finance, international marketing, international trade relations, and technology and international commerce. Many students focus their studies on a particular region of the world, a policy issue, or a business sector.

Students entering the program first complete core courses to prepare for higher-level course work.

- **Transportation Policy, Operations, and Logistics, MA**
  
  **Phone:** 703-993-8200
  
  The MA in Transportation Policy, Operations, and Logistics (TPOL) Program is designed for students and practicing professionals engaged in planning, regulating, managing, and operating transportation facilities and services. Students obtain a working knowledge of the theory, policy, law, research, and practices required to effectively and efficiently supply and operate transportation facilities and services. They also learn to think critically and analytically about the problems and challenges in this field and communicate their analyses clearly and effectively through written and oral presentations.

**Admission Requirements**

Students are admitted for fall and spring semesters. Complete applications are reviewed on a rolling basis, with late applications considered on a space-available basis. Applicants must hold a bachelor’s degree from an accredited institution, with a preferred GPA of 3.00 or better on a 4.00 scale.

Please see the Graduate Admissions Policies section in this catalog and online at http://admissions.gmu.edu/grad/ for general information on graduate admission to George Mason University.

To apply, applicants must submit the following:

- Graduate application with fee (no fee waivers)
- Two- to three-page written statement of goals and interest in the program
• Current résumé
• Two official transcripts of all university work completed. International students must also submit a translation of all international transcripts into English, if applicable.
• For international applicants, TOEFL scores, with a minimum score of 575 on the paper-based exam; 230 on the computer-based exam; or 88 with a minimum of 20 on each of the subsections on the Internet-based exam. Students may also be required to be tested by the English Language Institute.
• Two letters of recommendation, with at least one from an individual who is qualified to attest to the candidate’s academic potential.

Submission of GRE or GMAT scores is required only for students requesting merit-based funding consideration.

Degree Requirements
The degree requires completion of 36 credits; time required to complete the degree varies. Part-time enrollees may take up to six years. Other students enroll in cohorts that complete courses at a pace equivalent to five courses per year; these students complete the degree in two years. Accelerated programs for cohort groups from the same employer are actively promoted, allowing completion in a shorter time.

▲ Knowledge Management (PSKM)
Phone: 703-993-8200
This 36-credit program is offered jointly with the National Defense University (NDU) Information Resources Management College (IRMC). Master’s degree applicants must have completed the Chief Information Officer Program or the Advanced Management Program offered by the NDU IRMC or its equivalent. These applicants will generally be eligible to transfer in 15 graduate credits toward the master’s degree.

Courses offered by Mason comprise the additional 21 credits required for the master’s degree. These consist of 12 credits of required courses, 6 credits of electives, and an experiential component of 3 credits. The courses focus on the social-organizational aspects of knowledge management. Students undertake a series of projects in their organizations; learning is supported by the use of collaborative technology.

Admission Requirements
To be eligible, applicants must have completed an approved NDU program. In addition, they must hold a bachelor’s degree from an accredited institution with a preferred GPA of 3.00 or better on a 4.00 scale.

Please see the Graduate Admissions Policies section in this catalog and online at http://admissions.gmu.edu/grad/ for general information on graduate admission to George Mason University.

To apply, applicants must submit the following:
• Graduate application with fee (no fee waivers)
• Two- to three-page written statement of goals and interest in the program
• Current résumé
• Two official transcripts of all university work completed. International students must also submit a translation of all international transcripts into English, if applicable.
• For international students, TOEFL scores, with a minimum score of 575 on the paper-based exam; 230 on the computer-based exam; or 88 with a minimum of 20 on each of the subsections on the Internet-based exam. Students may also be required to be tested by the English Language Institute.
• Two letters of recommendation, with at least one from an individual who is qualified to attest to the candidate’s academic potential

Submission of GRE or GMAT scores is required only for those requesting merit-based funding consideration.

Degree Requirements

■ New Professional MS-NPST Studies, MS

▲ Organization Development and Knowledge Management (ODKM)
Phone: 703-993-8200
The MS in Organization Development and Knowledge Management (ODKM) Program is an integrated, 18-month program taught in executive format and designed for professionals who have several years of work experience. Providing conceptual tools and practical guidance to foster
organizational change, the program focuses on three related areas: creating and leveraging knowledge through networks of people who communicate and collaborate; understanding and managing change by integrating the diverse roles of people, processes, and technology; and enhancing and facilitating collaboration by building effective relationships in technology-rich environments. A feature of this program is the group-oriented approach to learning supported by the use of web-based collaborative computer technologies. Students develop the competencies to apply these technologies to make organizations more effective.

Admission Requirements
Students are considered for admission for the fall term only. Complete applications are reviewed on a rolling basis, with late applications considered on a space-available basis. Applicants must hold a bachelor’s degree from an accredited institution, with a preferred GPA of 3.00 or higher on a 4.00 scale.

Please see the Graduate Admissions Policies section in this catalog and online at http://admissions.gmu.edu/grad/ for general information on graduate admission to George Mason University.

The following items must be included when applying:
• Graduate application with fee (no fee waivers)
• Two- to three-page written statement of goals and interest in the program
• Current résumé
• Two official transcripts of all university work completed. International students must also submit a translation of all international transcripts into English, if applicable.
• For international applicants, TOEFL scores, with a minimum score of 575 on the paper-based exam; 230 on the computer-based exam; or 88 with a minimum of 20 on each of the subsections on the Internet-based exam. Students may also be required to be tested by the English Language Institute.
• Two letters of recommendation, with at least one from an individual who is qualified to attest to the candidate’s academic potential.

Submission of GRE or GMAT scores is required only for students requesting merit-based funding consideration.

Degree Requirements
ODKM is a 36- to 39-credit executive format program. Students work in teams and complete most of the courses in sequence. The second academic year includes an action-learning component, in which participants undertake projects in organizations and apply research methods. Overall, the process and methods of evaluation stress the cumulative development of competencies and the capacity to apply the insights gained. Students are expected to have easy access to a computer and the Internet. Minimum computer specifications can be obtained from the program office. Successful completion of the following courses is necessary to fulfill the course requirements of the program.

*Certain sections of MNPS 700, 702, and 703 are designated for the ODKM Program, and only those will satisfy the degree requirements.

■ New Professional Studies, MS

▲ Peace Operations (PSPO)

Phone: 703-993-8200

This program is designed for students and practicing professionals engaged in the planning, regulation, management, and conduct of peace operations. Students obtain a working knowledge of the theory, policy, law, research, and practices required to effectively and efficiently participate in or conduct a peace operation. Students also learn to think critically and analytically about the problems and challenges in this field and communicate their analyses clearly and effectively through written and oral presentations.

Admission Requirements

Complete applications for fall and spring semesters are reviewed on a rolling basis, with late applications considered on a space-available basis. Applicants must hold a bachelor’s degree from an accredited institution, with a preferred GPA of 3.00 or better on a 4.00 scale.

To apply, applicants must submit the following:
• Graduate application with fee (no fee waivers)
• Two- to three-page written statement of goals and interest in the program
• Current résumé
• Two official transcripts of all university work completed. International students must also submit a translation of all international transcripts into English, if applicable.
• For international applicants, TOEFL scores, with a minimum score of 575 on the paper-based exam; 230 on the computer-based exam; or 88 with a minimum of 20 on each of the subsections on the Internet-based exam. Students may also be required to be tested by the English Language Institute.
• Two letters of recommendation, with at least one from an individual who is qualified to attest to the candidate’s academic potential.

Submission of GRE or GMAT scores is required only for students requesting funding consideration.

Degree Requirements

Students must complete 39 credits. Part-time enrollees may take up to a maximum of six years to complete the degree requirements. All students are required to take the three common courses and four core courses listed below (24 credits), as well as five electives (15 credits).

*Only those sections of MNPS 700, 702, and 703 designated for the Peace Operations Program will satisfy degree requirements.

Total Credits: 39

Research Centers

Center for Regional Analysis
Director: Steve Fuller, PhD

Focusing on economic development in technologically intensive regions, the Center for Regional Analysis (CRA) maintains a corporate technology database for the national capital region. The CRA provides economic forecasting services to government agencies at all levels around the world.

Policy Analysis Center
Director: Thomas Gulledge, PhD

The Policy Analysis Center (PAC) is a clearinghouse for research on such topics as peacekeeping policy, enterprise integration, and information technology. Areas of focus include business-to-business electronic commerce, implementation planning for standard software solutions, and enterprise integration.

Center for Transport Policy and Logistics
Director: Kenneth J. Button, PhD

This center works with federal and state authorities to find better ways to manage existing transport networks from surface to air to space. The center is extremely active in the areas of intelligent transportation systems and aviation policy.

International Center for Applied Studies in Information Technology
Director: Stephen Ruth, PhD

The International Center for Applied Studies in Information Technology (ICASIT) is a consulting group dedicated to delivering the power of the Internet to businesses, underserved markets, and developing countries. ICASIT has contracts in more than 20 countries.

Mason Enterprise Center
Director: Roger Stough, PhD

Dedicated to creating and developing businesses in the Washington, D.C., area, the Mason Enterprise Center (MEC) is the synthesis of seven programs designed to meet the needs of growing businesses. The center focuses the energy, skills, and intellectual capital of the university on enterprise creation, expansion, and restructuring. MEC is highly geared on providing its clients with services that add value to their organizations. The center specializes in business development, entrepreneurship, government contracting, international business, technology ventures, and telework, making it a business-development center unlike any other. In addition, MEC conducts seminars and conferences related to its areas of expertise.

Center for Global Policy
Director: Jack Goldstone, PhD

This center conducts research on a wide range of global policy issues, including foreign trade, democratization and state-building, and transnational networks. It also analyzes specific policy issues for a variety of government agencies, and develops and serves as the home to several major cross-national databases for global policy.

Center for Science and Technology Policy
Director: Philip Auerswald, PhD

This center helps facilitate the exchange of information and ideas among the worldwide science, foreign affairs, trade, and technology communities. Areas of emphasis include international trade and science and technology.

Office of International Medical Policy
Director: Arnauld Nicogossian, MD

The Office of International Medical Policy provides leadership and focus on global medical and public health policies and processes, working collaboratively with health, science, and medical organizations in the public and private sectors and academic organizations to address pressing global policy concerns.

Center for Executive Education and Leadership in Public Policy
Director: A. Lee Fritschler, PhD

This center helps executives better understand, develop, and implement public policy, positive leadership roles, public and private sector cooperation, and programming. Programs focus on what business needs to know about government and public policy processes and what government and public policy makers should know about business and private sector management.
State Economic Development Center  
**Director:** Roger Stough, PhD

This center’s focus is on providing education, training, and research support for state-level economic development policy and programs. While the primary goal is to provide assistance to agencies and organizations in Virginia, the center also works with other government organizations in the United States as well as abroad. Methods employed by the center include roundtable discussions, formal focus groups, survey research, statistical analysis, and mathematical models.

Center for Entrepreneurship and Public Policy  
**Director:** Roger Stough, PhD

Economic development policy has shifted dramatically from a business and industry attraction strategy to a more entrepreneurship approach. The Center for Entrepreneurship and Public Policy focuses on entrepreneurship policy research and program delivery, offering programs in research, collaboration, and analysis.

Center for Aerospace Policy  
**Director:** Kenneth J. Button, PhD

The mission of the Center for Aerospace Policy is to develop the U.S. aerospace sector by providing educational and research resources. The center helps national agencies, such as NASA, enhance their internal efficiency and smooth the interface between U.S. agencies and other government agencies, the private sector, and foreign counterparts.
The College of Science (COS) serves as the nexus for research and education in the natural, mathematical, and computational sciences at Mason. The central mission of COS is to create and disseminate scientific knowledge, provide outstanding scholarship in concert with excellent teaching, and develop the human and technical resources required to address the current and future needs of society. Through its innovative and multifaceted educational and research mission, COS offers exciting opportunities to undergraduate and graduate students, scientists, educators, and other professionals in Northern Virginia and the national capital region.
In addition to the wide variety of undergraduate degree programs offered by its 10 departments, COS also offers many innovative graduate degrees and interdisciplinary minors. The research strength of COS provides an essential resource to graduate students and to undergraduates whose involvement in research is strongly encouraged. Many undergraduates go on to graduate school and to pursue careers in public service, nonprofit organizations, and the private sector. Graduate students engage in more specialized study at the master’s and doctoral levels, preparing them for first or second careers or job advancement and providing personal enrichment.

Faculty members are committed to teaching grounded in scholarship and research. They strive to make students rigorous thinkers and clear communicators while encouraging experimentation with new approaches and ideas. Students are thus prepared for their role as informed citizens in a complex, global society and able to adapt to an ever-changing world.

Administration

Vikas Chandhoke, dean
Evans J. Mandes, senior associate dean for budget and personnel
Maria Dworzecka, senior associate dean for academic planning and facilities
Peter A. Becker, associate dean for graduate programs
Richard J. Diecchio, associate dean for undergraduate programs
Paul S. Schopf, associate dean for research and computing

Graduate Degree Programs

COS offers 11 master’s degrees and 11 doctoral degrees. The requirements for each degree are described in the departmental and degree sections that follow.

Graduate Certificate in Forensics

This collegewide interdisciplinary graduate certificate program is designed for students seeking training in forensic science, as well as for current professionals employed by the federal government, local law enforcement, and private security corporations. Forensics refers to the application of scientific methodologies to the analysis of crime scenes, the collection of evidence, and the laboratory analysis of that evidence in support of criminal investigations. Related legal aspects are also considered as part of a comprehensive approach to forensics. Students enrolled in the forensic science concentration obtain the specific scientific skills necessary for laboratory employment in the field. Students enrolled in the general forensics concentration obtain a more general background in the field with a focus on criminal law and anthropology. At the time of completion, depending on the concentration, students will be able to

- Understand the basic principles of forensics.
- Perform a general crime scene analysis.
- Develop DNA profiles and interpret results of toxicological studies.
- Apply fundamental legal and anthropological concepts.
- Work collaboratively in interdisciplinary groups.

Admission Requirements

Applicants to the forensic science concentration should hold a BA or BS degree in biology or chemistry from an accredited university with a minimum GPA of 3.00. Applicants to the general forensics concentration should hold a BA or BS degree from an accredited university with a minimum GPA of 3.00. To apply, prospective students should forward a completed Mason graduate application, two copies of official transcripts from each college and graduate institution attended, and a current résumé to the COS Fairfax Campus Graduate Admissions Processing Center. TOEFL scores are required of all international applicants. Students may not pursue this certificate concurrently with any other graduate degree program or certificate program offered by COS because this certificate program will charge students at a differential (premium) tuition rate. However, students enrolled in academic programs outside COS may enroll in this certificate program concurrently.

Program Requirements

The certificate in forensics requires a total of 18 credits, comprising six 3-credit courses. A unique element of the program is the Forensics Capstone Course, which is shared by the two concentrations. In this class, students from the two concentrations will combine their skills as members of interdisciplinary investigation teams as they analyze a real-world crime scene. This unique course will demonstrate in practice how students with skills in the scientific/quantitative analysis or legal/anthropological areas can combine forces to understand and interpret the nuances of the evidence presented at an actual crime scene. The curriculum requirements for each concentration are listed below:

Required Core Courses:

- FRN 500 – Introduction to Forensic Science (3)
- FRN 510 – Crime Scene Analysis (3)

▲ Forensic Science Concentration (FRSC) Required Courses:

- FRN 520 – Toxicology (3)
- FRN 540 – Chemical Analysis (3)
- FRN 560/BINF 637 – Forensic DNA Sciences (3)
- FRN 590 – Forensics Capstone Course (3)

▲ General Forensics Concentration (FRSG) Required Courses:

- FRN 530 – Criminal Law (3)
- FRN 550 – Issues in Forensic Anthropology (3)
- FRN 570 – Introduction to Biochemical Forensics (3)
- FRN 590 – Forensics Capstone Course (3)

Undergraduate Degree Programs

The undergraduate degree consists of course work in university-wide general education, a major area of study, and electives. COS offers six bachelor of arts degrees and seven bachelor of science degrees. To earn a bachelor’s degree, students must complete 120 credits, of which at least 45 must be in upper-level courses (numbered 300 and above). At least one course at the 300 or 400 level must be designated “writing intensive.” All entering students who have not yet satisfied the university-wide general education requirement in quantitative reasoning are required to take the math placement test prior to enrollment.

Students should consult the University General Education chapter for information concerning university-wide general education requirements for undergraduate degrees.
College-Level Requirements

The baccalaureate degree is designed to provide a broad knowledge of the world, develop in students the ability to think conceptually and critically, acquaint them with many different methods of inquiry, and provide skills to continue intellectual growth throughout life. Because these goals can be achieved in many ways, students may select from a range of courses for completing them. But education involves more than fulfilling requirements. The selection of courses should not only deepen knowledge in areas of interest, but also expand the range of those interests. The courses enable students to link the present to the past, their culture to other cultures, and what is to what could be. Learning to make these connections increases the ability to understand and enjoy the world in ways not yet imagined.

Bachelor of Arts

The BA degree provides students with a breadth of knowledge, as well as the necessary skills to make in-depth study of a major truly meaningful. In addition to the university-wide general education program, students pursuing a BA degree must complete the course work below, and the courses listed in the departmental sections that follow. Except where expressly prohibited, a course used to fulfill a college-level requirement may also be used simultaneously to satisfy other requirements, such as university-wide general education requirements, college-level requirements, or requirements for the major.

- Philosophy or religious studies: 3 credits, fulfilled by any course in philosophy or religious studies (PHIL, RELI)
- Social science: 3 credits, fulfilled by any course in ADJ, ANTH, ECON, GEOG (except GEOG 102 or 309), GOVT, PSYC, or SOCI
- Foreign language: intermediate-level proficiency in one foreign language. This requirement may be fulfilled by completing a course in a foreign language numbered 202, 209, or 210 or higher, or by achieving a satisfactory score on an approved proficiency test. International students should consult the COS Undergraduate Academic Affairs Office about a possible waiver of this requirement.
- Science sequence requirement: 1 additional credit that may be fulfilled only by an approved two-semester sequence in a single science
- Non-Western culture: 3 credits that may be fulfilled by any of the following courses: ANTH 114, 300, 301, 302, 304, 305, 306, 311, 313, 330, 332, 396; ARTH 203, 319, 320, 380, 381, 382, 383, 384, 385, 482; CHIN 318, 320, 325; DANC 118; ECON 361, 362; FREN 451; GEOG 101, 316, 325, 330, 399; GOVT 328, 332, 333, 432; HIST 125, 130, 251, 252, 261, 262, 271, 281, 282, 328, 329, 353, 354, 355, 356, 365, 366, 387, 426, 459, 460, 461, 465, 466; MUSI 103; RELI 211, 212, 313, 314, 315, 337, 374, 490; or RUSS 353, 354

Students who can document attendance at a native school in a non-Western country for at least four years may request a waiver from this requirement through the COS Undergraduate Academic Affairs Office. In addition to the university-wide general education requirements, BS majors are required to take the courses listed in the departmental sections that follow.

Bachelor of Science

The BS degree provides students with a more intensive approach to the core technical concepts in their major field of study. Therefore, this curriculum has a reduced number of courses in humanities and social sciences in comparison with the BA degree to allow students to achieve greater depth in their majors. Requirements for each BS major are listed in the departmental sections that follow.

Physical Education Courses

Activity courses offered by the Health, Fitness, and Recreation Resources Department cannot be counted toward the credits required for a degree in COS. Students may take nonactivity PHED courses for the elective credit for COS degrees.

Teacher Licensure

Students who wish to become teachers should consult the College of Education and Human Development chapter and attend an information session early in their undergraduate career. For more information, call 703-993-2892, e-mail gseadmit@gmu.edu, or go to gse.gmu.edu.

Minors

Students may elect to take a minor in addition to their major field of study. For policies governing all minors, see the Academic Policies chapter of this catalog. Students interested in earning a minor should complete the appropriate section of the Change/Declaration of Academic Program form.

Bioinformatics and Computational Biology

Phone: 703-993-8400
Web: bioinformatics.gmu.edu

Faculty

Professors: Grefenstette, Jafri (chair), Willett
Associate professors: Kinser, Seto, Vaisman
Assistant professor: Klimov
Contract assistant professor: Solka
Affiliate faculty: Ascoli, Blackwell, Carr, Gillevet, Jamison, Olds, Weller

Course Work

The department offers all course work designated BINF in the Course Descriptions chapter of this catalog.

Minor in Bioinformatics

The bioinformatics minor is an interdisciplinary program consisting of required courses in biology, programming, statistics, and bioinformatics. Eight credits of course work must be unique to the minor.

Students must complete the following courses with a minimum GPA of 2.00, distributed as follows:

BINF 401 Bioinformatics and Computational Biology I
BINF 402 Bioinformatics and Computational Biology II
BINF 403 Bioinformatics and Computational Biology Lab I
BINF 404 Bioinformatics and Computational Biology Lab II
BIOL 213 Cell Structure and Function
BIOL 482 Introduction to Molecular Genetics
IT 108 Programming Fundamentals
IT 208 Program Design and Data Structures
or CS 112 Computer Science I (instead of IT 108 and IT 208)
STAT 344 Probability and Statistics for Engineers and Scientists I
or STAT 250 Introductory Statistics I

GRADUATE PROGRAMS

Bioinformatics Management, MS

This degree addresses the regional and national need for technically trained managers who will be able to lead teams of bioinformaticians in both the public and private sectors. The degree combines a solid foundation in bioinformatics research, tools, and techniques, with the management skills needed to address the associated legal, ethical, managerial, and business issues. The MS in bioinformatics management is intended for:

- Students seeking advancement in their current bioinformatics careers that requires an advanced degree in bioinformatics combined with management expertise.
- Students with a general background in biological science or computational methods who are planning to enter the field of bioinformatics as managers and would like to strengthen their bioinformatics and managerial expertise.

Admission Requirements

Applicants should have a bachelor’s degree in biology, computer science, or a related field, with a GPA of at least 3.00 in their last 60 credits of study. Applicants should have taken courses in molecular biology, computer science, calculus, physical chemistry, and statistics. Students with deficiencies in one or more of these areas may be required to take additional courses from the undergraduate curriculum. To apply, prospective students should forward a completed Mason graduate application, two copies of official transcripts from each college and graduate institution attended, a current résumé, and an expanded goals statement to the COS Graduate Admissions Processing Center. Applicants should also include three letters of recommendation and an official report of scores obtained on the GRE-GEN exam. The GRE requirement will be waived if the student holds a master’s degree from a U.S. institution. TOEFL scores are required of all international applicants.

Degree Requirements

Candidates must successfully complete 30 credits as follows:

Bioinformatics Core Courses (15 credits)—foundation courses in modern biotechnology, tools and methods for bioinformatics analysis, and methods for creating customized bioinformatics tools.

- BINF 630 Bioinformatics Methods
- BINF 631 Molecular Cell Biology for Bioinformatics
- BINF 634 Bioinformatics Programming
- One of the following: BINF 633 Molecular Biotechnology, BINF 636 Microarray Methodology and Analysis, or BINF 650 Data Modeling for Bioinformatics
- BINF 730 Biological Sequence Analysis or above

Management Core Courses (12 credits)—foundation courses in management theory related directly to the management of scientific programs and personnel.

- MBA 638 Managing Operations
- MBA 712 Project Management
- TECM 615 Decision Making Using Accounting and Financial Information
- TECM 640 Management of Consulting and Technical Professionals

Capstone research project (3 credits)—focusing on bioinformatics management issues and techniques
- BINF 798 Research Project

Bioinformatics and Computational Biology, MS

This degree addresses the growing national and regional demand for trained computational biologists. It combines a solid foundation in biotechnology with the computational skills required for bioinformatics. The flexibility of the degree structure permits students to custom design their curriculum under an advisor’s guidance, making the MS in bioinformatics especially relevant for students employed in today’s diverse biotechnology workplace. Students completing the program are qualified to pursue careers that require knowledge of current bioinformatics methods and the ability to develop new bioinformatics software.

Courses are generally offered in the late afternoon or early evening to accommodate students with full-time employment outside the university. Students employed at area biotechnology organizations may take up to 6 credits (out of 31) for bioinformatics work done on the job, under the guidance of a faculty member. This work-related project may be applied as either a 3-credit research project or a 6-credit master’s thesis.

Admission Requirements

Applicants should have a bachelor’s degree in biology, computer science, or a related field, with a GPA of at least 3.00 in their last 60 credits of study. Applicants should have taken courses in molecular biology, computer science, calculus, physical chemistry, and statistics. Students with deficiencies in one or more of these areas may be required to take additional courses from the undergraduate curriculum. To apply, prospective students should forward a completed Mason graduate application, two copies of official transcripts from each college and graduate institution attended, a current résumé, and an expanded goals statement to the COS Graduate Admissions Processing Center. Applicants should also include three letters of recommendation, and an official report of scores obtained on the GRE-GEN exam. The GRE requirement will be waived if the student holds a master’s degree from a U.S. institution. TOEFL scores are required of all international applicants.

Degree Requirements

Candidates must successfully complete 31 credits as follows:

- 12 credits of bioinformatics core courses: BINF 630, 631, 634, and 734
- 3 credits of advanced bioinformatics courses numbered BINF 730 and above
- 12 credits of electives in bioinformatics and computational biology, biology and biotechnology, or computational sciences, as approved by the advisor
- 1 credit of bioinformatics seminar BINF 704
- Research component: 3 credits of BINF 798 Research Project or 6 credits of BINF 799 Master’s Thesis; exercise
of the thesis option results in a corresponding reduction in the electives requirement from 12 credits to 9 credits

■ Certificate in Bioinformatics  CERG-BCB and Computational Biology

This graduate certificate program addresses the growing national and regional demand for trained computational biologists by combining a solid foundation in biotechnology with computational skills relevant to bioinformatics. The flexibility of the certificate structure permits students to custom design their curriculum under an advisor’s guidance, making the certificate in bioinformatics especially relevant for students employed in today’s diverse Northern Virginia high-technology workplace. Ideal candidates for this certificate are those who have a background in biological and computer sciences, and are currently working in or planning to enter the fields of biotechnology or bioinformatics. The certificate is also highly relevant for students who are interested in advancing their career goals but may not have adequate time available to undertake a graduate degree program.

Admission Requirements

Applicants should hold a BA or BS degree in a discipline related to biological or computer science from an accredited university, with a minimum GPA of 3.00. Applicants should have taken courses in molecular biology, computer science, calculus, physical chemistry, or statistics, and should also possess working knowledge of a computer programming language. To apply, prospective students should forward a completed Mason graduate application, two copies of official transcripts from each college and graduate institution attended, and a current résumé to the COS Graduate Admissions Processing Center. TOEFL scores are required of all international applicants.

The certificate program is a professional certification program that charges students at a differential (premium) tuition rate, with an additional $100 per credit added to the standard Mason graduate tuition rate for students who enroll in this certificate program, regardless of in-state or out-of-state status. The differential tuition is used to fund continuing improvements in the COS educational facilities used to support the certificate program. Students may not pursue this certificate concurrently with any other graduate degree program or certificate program offered by COS. In addition, students may not apply previous credit hours to the certificate program from another certificate, degree, or nondegree program because of the differential (premium) tuition rate.

Program Requirements

The certificate in bioinformatics and computational biology requires a total of 15 credits, based on the set of core courses supporting the MS and PhD degree programs in bioinformatics and computational biology, along with a set of elective courses. Students are required to take three core courses, plus two courses selected from the list of electives indicated below.

Required Core Courses: (all are required)

- BINF 630 - Bioinformatics Methods
- BINF 631 - Molecular Cell Biology for Bioinformatics
- BINF 634 - Bioinformatics Programming

Elective Courses: (choose two of the following or other courses approved by the coordinator)

- BINF 633 - Molecular Biotechnology
- BINF 636 - Microarray Methodology and Analysis
- BINF 639 - Biometrics
- BINF 730 - Biological Sequence Analysis
- BINF 731 - Protein Structure Analysis
- BINF 732 - Genomics
- BINF 733 - Gene Expression Analysis
- BINF 734 - Advanced Bioinformatics Programming
- BINF 739 - Topics in Bioinformatics

■ Bioinformatics and Computational Biology, PhD

Recent advances in molecular biology have produced an avalanche of data, including DNA sequences and genetic maps that cover thousands of genes whose functions are poorly understood or completely unknown. These advances are having a profound effect on the biological sciences and have resulted in the development of the new discipline of bioinformatics. Bioinformatics uses computational approaches to analyze patterns in biological data and create complex models of biological activity, including attempts to elucidate the functions of genes and their interactions in genetic pathways. Widespread social benefits are expected from the exploitation of the wealth of new knowledge concerning the genetic mechanisms of life and related processes. The coming years will see major developments in functional genomics, and environmental sciences, as well as profound advances in understanding the fundamental processes of biology. These benefits are increasingly dependent on the application of advanced information technology to the analysis of biological information.

The program’s main objective is to train the next generation of computational biologists for careers in academia, industry, and government. The program provides students with an interdisciplinary academic environment, including fundamental biosciences courses and core and advanced courses in bioinformatics. In general, course requirements may be completed within the first two years. The program is structured to be accessible for full- and part-time students.

Admission Requirements

Applicants should have a bachelor’s degree in biology, computer science, or a related field, with a minimum GPA of 3.25. Admission also requires minimum GRE scores of 1,100 (verbal plus quantitative) and 4.00 (analytical writing). Applicants should have taken courses in molecular biology, cell biology, biochemistry, genetics, calculus, physical chemistry, computer programming and data structures, and probability and statistics. Students with deficiencies in one or more of these areas may be admitted provisionally and required to take additional courses from the undergraduate curriculum. To apply, prospective students should forward a completed Mason graduate application, two copies of official transcripts from each college and graduate institution attended, a current résumé, and an expanded goals statement to the COS Graduate Admissions Processing Center. Applicants should also include three letters of recommendation and an official report of scores obtained on the GRE-GEN. The GRE-SUB is recommended if it is given in the student’s undergraduate major. The GRE requirement for admission to the doctoral programs will be waived if the student holds a master’s degree.
from a U.S. institution. TOEFL scores are required of all international applicants.

Degree Requirements
The program requires 72 credits beyond the baccalaureate degree, with a minimum of 48 credits in course work and 24 credits of dissertation research. For those holding master’s degrees, the 72 required credits may be reduced by up to 30 credits, depending on graduate courses completed. The curriculum is divided into four areas: 12 credits of fundamental biosciences courses; 13 credits of core bioinformatics courses; 23 credits of electives or independent research; and 24 credits of dissertation research. The course work is organized as follows:

• Fundamental bioscience courses: BINF 701 and 702, plus 3 credits each of BINF 703 and 704
• Core bioinformatics courses: BINF 690, 705, 730, 731, and either 732 or 740
• General electives

Students whose undergraduate record does not include basic biochemistry will be required to take a basic course prior to BINF 701 Biochemical Systematics (Biochemistry). If the undergraduate record is otherwise insufficient, students may be required to take prerequisite courses, some of which may not be applicable to the 48-credit course total for the bioinformatics PhD. By the end of the semester when course work is completed, the student must form a doctoral committee, which will supervise the candidacy exam. The exam includes written and oral components. On passing the candidacy exam and submitting an acceptable dissertation proposal, the student is advanced to doctoral candidacy.

Chemistry and Biochemistry

Phone: 703-993-1070

Faculty
Professors: Blaisten-Barojas, Cozzens, Davies, Foster (chair), Mose, Mushrush
Associate professors: Born, Davis (associate chair), Honeychuck, Hussam, Schreifels, Slayden, Weatherspoon
Term associate professor: Hatton
Assistant professors: Bishop, Cooper, Couch
Term assistant professors: Kort, Pettigrew

Course Work
This department offers all course work designated CHEM in the Course Descriptions chapter of this catalog.

UNDERGRADUATE PROGRAMS

■ Chemistry, BA  

BA-CHEM

This program, when coordinated with the necessary courses in education, meets requirements for teacher licensure (see below). It also meets requirements for entrance to medical and other professional schools.

In addition to satisfying the university-wide general education requirements and requirements for the BA degree in COS, students majoring in chemistry must complete the following.

(Through the course work below, chemistry majors satisfy the university-wide general education requirements in natural science and quantitative reasoning.)

• 37 credits of chemistry: CHEM 211, 212, 313, 314, 315, 318, 321, 331, 332, 336, and 337; and 5 credits of electives in chemistry
• 11 credits of math: MATH 113, 114, and 213
• 8–12 credits of physics: PHYS 243–246 (8 credits), or PHYS 160–161, 260–263 (12 credits)

▲ Concentration in Biochemistry (BC)

This program is for students interested in studying chemistry at its interface with the biological sciences. Those interested in health science careers can obtain an excellent science background through this concentration.

In addition to satisfying the university-wide general education requirements and requirements for the BA degree in COS, students majoring in chemistry with a concentration in biochemistry must complete the following. (Through the course work below, majors satisfy the university-wide general education requirements in natural science and quantitative reasoning.)

• 37 credits of chemistry: CHEM 211, 212, 313, 314, 315, 318, 321, 331, 446, 463, 465
• 11 credits of math and statistics: MATH 113, 114; STAT 250
• 8 credits of physics: PHYS 243–246
• 4 credits of biology BIOL 213

■ Chemistry, BS  

BS-CHEM

This program is approved by the American Chemical Society; on completion, students are certified to the society. Students planning professional careers in chemistry should choose this degree.

In addition to satisfying university-wide general education requirements for the BS degree, students majoring in chemistry must complete the following with a minimum GPA of 2.00. No more than two courses with a grade of D (1.00) may be applied to the major. (Through the course work below, chemistry majors satisfy the university-wide requirements in natural science, information technology, and quantitative reasoning.)

• 52 credits of chemistry: CHEM 211, 212, 313, 314, 315, 318, 321, 331, 332, 336, 337, 350, 422, 423, 441, 445, and 463; and 3 credits of electives in chemistry
• 14 credits of math: MATH 113, 114, 213, 214
• 8–12 credits of physics: PHYS 243–246 (8 credits), or PHYS 160–161, 260–263 (12 credits)

▲ Concentration in Biochemistry (BC)

Students planning professional careers in biochemistry, the pharmaceutical industry, medicine, biotechnology, or related fields with a chemistry emphasis should choose this program instead of the traditional BS in chemistry. This concentration provides students with a focus on biochemistry while retaining a strong chemistry foundation. Students are allowed to tailor the concentration to their interests with 9 credits of electives.

In addition to satisfying university-wide general education requirements for the BS degree, students majoring in chemistry with a concentration in biochemistry must complete the following with a minimum GPA of 2.00. No more than two courses with a grade of D (1.00) may be applied to the major. (Through the course work below, they satisfy the
The department offers a minor in chemistry. The program requires 16 credits of chemistry at the 300 level or above with a minimum GPA of 2.00. Eight credits of course work must be unique to the minor. For policies governing all minors, see the Academic Policies chapter of this catalog.

Certificate in Environmental Chemistry

The department offers an undergraduate certificate program in environmental chemistry. The program consists of 35 credits of course work dealing directly with environmental studies. To receive the certificate, students must hold a baccalaureate degree in any major or be earning one from Mason at the time they receive the certificate. Substitutions from the following list of required courses are allowed but require permission from the environmental chemistry certificate director: BIOL 377; CHEM 313, 314, 315, 318, 321, 331 or 333, 505, 554; EVPP 301, 454; STAT 344. To optimize employment and graduate school opportunities, students are encouraged to take additional courses in natural science, computer science, and environmental law.

Premedical, Predental, Prepharmacy, and Preveterinary Students

Web: prehealth.gmu.edu

Many students planning medical, dental, pharmacy, veterinary, optometry, or other health professional careers choose to pursue a major in chemistry. These students should consult the health professions advising web site on required course work and overall preparation.

Prepharmacy Society

Mason students who are interested in pursuing careers in pharmacy are encouraged to participate in the Prepharmacy Society. This student organization organizes supplemental programming focused toward pharmacy as a career.

Chemistry Club

The Chemistry Club provides a social and informational network for students. It serves the Department of Chemistry and Biochemistry by sponsoring informational programs and allowing students to work at university events.

Teacher Licensure

Students who wish to become teachers should consult the College of Education and Human Development chapter and attend an information session early in their undergraduate career. For more information, call 703-993-2892, e-mail gseadmit@gmu.edu, or go to gse.gmu.edu.

Chemistry, Bachelor's/Accelerated Master’s Degree

A five-year bachelor’s/accelerated master’s degree program leads to a research-based MS degree following satisfactory completion of 144 credits. It allows academically strong undergraduates with a commitment to research to obtain BS and MS degrees within five academic years plus the summer of the last year. On completion of this program, students will be exceptionally well prepared for entry into a professional school or a PhD program in chemistry or a related discipline. Students can enter this program after completing 90 credits and enroll in graduate courses when they have successfully completed prerequisites. This flexibility makes it possible for students to complete some of their graduate classes during their junior and senior years. Consult the department for details on the program.

Admitted students are able to use up to 6 graduate credits in partial satisfaction of the requirements for the undergraduate
degree. On completion of that degree and with satisfactory performance (3.00) in the graduate courses, students are given advanced standing in the master’s program and can complete an additional 24 credits to receive the master’s degree. All other master’s degree requirements must be met.

GRADUATE PROGRAMS

The department offers an MS in chemistry with a research project (thesis option) or an all-course-work program (non-thesis option). Within the MS, students may pursue a concentration in biochemistry. The PhD in all branches of chemistry is available through the degrees in environmental science and policy, bioscience, and physical sciences. An area of emphasis in computational chemistry is available through the PhD in computational sciences and informatics program offered in conjunction with the Department of Computational and Data Sciences.

Chemistry, MS

The MS in chemistry provides advanced training for recent college graduates, professionals in teaching, and technical workers in research organizations who have an interest in chemistry or biochemistry.

Admission Requirements

To be considered for admission to degree status, students must have a bachelor’s degree in chemistry, biochemistry, or a related field from an accredited institution and must meet general admission requirements for graduate study. Admission is based on a departmental evaluation of the applicant’s background as evidenced by transcripts and letters of recommendation. Applicants who received a bachelor’s degree more than five years before the application date must submit a résumé.

Degree Requirements

To receive an MS in chemistry, students must complete 30 credits of graduate work. The thesis option is for students planning to pursue a doctoral degree or a career in the chemical, biochemical, or pharmaceutical industry. The thesis is based on research that must be approved by the thesis or advisory committee, which is appointed during the first semester of registration in CHEM 799. Students who select the thesis option complete 6 credits of 799 and present a seminar followed by an oral defense. Students in this option are expected to choose a laboratory advisor during their first semester in the program and begin working on their thesis project no later than the second semester.

The nonthesis option is for those seeking to go on to professional school, teach chemistry in secondary schools, or pursue other careers in which advanced work in chemistry is necessary or advantageous. Students must complete the following requirements:

- CHEM 633
- 9 credits from the different core areas of chemistry (analytical, biochemical, environmental, inorganic, and organic) (Classes that fulfill this requirement are specifically designated in the catalog as core classes.)
- 6 credits of electives within chemistry (Eligible classes must have a CHEM designation.)
- 6 credits of electives within chemistry or related fields (Classes used to fulfill this requirement need to be approved by the Graduate Committee prior to registration.)
- 3 credits of CHEM 690, graduate seminar
- 6 credits of CHEM 799, thesis research

Nonthesis Option, Chemistry

This program is specifically designed for students seeking to go on to professional school, teach chemistry in secondary schools, or pursue other careers in which advanced work in chemistry is necessary or advantageous. Students must complete the following requirements:

- CHEM 633
- 9 credits from the different core areas of chemistry (analytical, biochemical, environmental, inorganic, and organic) (Classes that fulfill this requirement are specifically designated in the catalog as core classes.)
- 6 credits of electives within chemistry (Eligible classes must have a CHEM designation.)
- 6 credits of electives within chemistry or related fields (Classes used to fulfill this requirement need to be approved by the Graduate Committee prior to registration.)
- 3 credits of CHEM 690, graduate seminar
- 3 credits of CHEM 670/Chem 579 (see below)

Any combination of CHEM 670 and CHEM 579 may be used to fulfill the 3-credit requirement listed above. CHEM 579 may be used to fulfill these requirements only with prior written approval of the department and must be used to complete a laboratory- or library-based research project or enhance the student’s teaching skills.

Concentration in Biochemistry (BC)

Thesis Option

This program is specifically designed for students who wish to pursue a doctoral degree or a career in the biochemical or pharmaceutical industry. Students must complete the following requirements:

- 9 credits from the different core areas of chemistry (analytical, biochemical, environmental, inorganic, and organic) (Classes that fulfill this requirement are specifically designated in the catalog as core classes.)
- 6 credits of electives in biochemistry (A list of approved biochemistry electives may be obtained from the department.)
- 3 credits of electives within chemistry (Eligible classes must have a CHEM designation.)
- CHEM 531 or 633 (The specific requirement for each student will be made by the departmental graduate admissions committee at the time of acceptance into the program.)
• 3 credits of CHEM 690, graduate seminar
• 6 credits of CHEM 799, thesis research

Nonthesis Option
This program is specifically designed for students seeking to go on to professional school, teach biochemistry in secondary schools, or pursue other careers in which advanced work in biochemistry is necessary or advantageous. Students must complete the following requirements:
• 9 credits from the different core areas of chemistry (analytical, biochemical, environmental, inorganic, and organic) (Classes that fulfill this requirement are specifically designated in the catalog as core classes.)
• 9 credits of electives in biochemistry (A list of approved biochemistry electives may be obtained from the department.)
• 3 credits of electives within chemistry (Eligible classes must have a CHEM designation.)
• CHEM 531 or 633 (The specific requirement for each student will be made by the departmental graduate admissions committee at the time of acceptance into the program.)
• 3 credits of CHEM 690, graduate seminar
• 3 credits of CHEM 670/CHEM 579 (see below)

Any combination of CHEM 670 and 579 may be used to fulfill the 3-credit requirement listed above. CHEM 579 may be used to fulfill these requirements only with prior written approval of the department and must be used to complete a laboratory- or library-based research project or enhance the student’s teaching skills.

■ Physical Sciences, PhD PHD-PSCI
This interdisciplinary doctoral program is offered by the Department of Physics and Astronomy and the Department of Chemistry and Biochemistry. The degree focuses on preparing scientists in the separate disciplines listed above or as members of interdisciplinary science teams, primarily involving astronomy, biochemistry and biophysics, chemistry, and physics. The main emphasis is on theoretical, experimental, or laboratory research. The program is not intended to produce graduates who are scientific generalists; however, the areas of specialization are cut across traditional disciplines, as in the research fields mentioned above.

The degree is built on a foundation of several interdisciplinary courses that expose students to fundamental research problems in modern science and provide them with an introduction to each of the general areas that compose the degree (physics, chemistry, biochemistry and biophysics, and astronomy). The program curriculum, however, has been designed to provide enough flexibility to accommodate students seeking a fully interdisciplinary program, as well as those with interests more closely aligned with one of the traditional physical science disciplines. Students who seek a program with a heavy emphasis on computational methods may alternatively consider the doctoral program in computational sciences. This program includes concentrations in computational physics and space sciences and computational astrophysics. See the Department of Computational and Data Sciences section for degree and admission requirements.

Admission Requirements
The physical sciences PhD program is intended for students who (1) have completed an undergraduate program of study in one of the physical sciences, (2) have taken math to the level of differential equations, and (3) are computer literate.

Applicants are expected to have a BS degree with minimum GPA of 3.00 and acceptable GRE and TOEFL scores. The undergraduate degree should be in a scientific field, such as physics, chemistry, astronomy, mathematics, or engineering. Applicants with insufficient undergraduate records may be accepted provisionally and required to successfully complete selected remedial courses, some of which may not be applicable to the 48-credit total for the PhD course work requirement.

Interested students should submit a completed Mason graduate application, three letters of recommendation, official reports of GRE and TOEFL scores, and a goals statement reflecting their general research interests and career plans. Mason’s Educational Testing Service code is 5827.

Degree Requirements
The program requires 72 credits beyond the baccalaureate degree. All students in the physical sciences PhD program are required to take 48 credits of course work and 24 credits of dissertation research. For students entering the doctoral program with previous graduate work, the 48 credits of course work may be reduced by a maximum of 30 credits. Of the 48 credits of course work, 9 credits will consist of core courses to be taken by all students in the program, and at least 15 hours will be selected as part of a student’s contract with a three-member faculty committee (explained below). At least five of the contract core courses will be selected from the list presented below. Thus, the program consists of
• 3 credits of PSCI 703 (a 1-credit course that must be repeated three times)
• a minimum of 15 credits of course work chosen as part of a contract
• up to 24 credits of electives (approved by committee)
• 24 credits of dissertation research

A three-member predoctoral faculty committee will be formed by the student as soon as possible after admission but not later than after completion of the 9-credit core. The composition of the student’s committee must be approved by the program director. At this point, the student is expected to have selected a rather broad area of future research interest; typically, the area may not yet be specific enough to define an actual dissertation project.

Because students entering the program will have diverse backgrounds and goals and the program is explicitly designed to accommodate students preparing for a range of fields of research, it is not possible to have a completely standardized set of degree requirements. Instead, the student and his or her committee will decide on a set of at least five courses (15 credits) that will best meet the student’s goals and future research direction. This portion of the program will be set up in the form of a contract between the student and the committee. The contract will include courses that the student should take and books and articles that should be read. Fifteen of the contract credits must be chosen from the following list; however, no more than three classes can be taken in any one area, unless the student obtains special permission from the program director. Furthermore, no more than two classes at the 500 level can be selected.
• Astronomy courses: ASTR 530, 701, 766, 767
• Biochemistry and biophysics courses: CHEM 646, 660, 661, 662, 665
Students can choose their elective classes more widely, but these courses need to be approved by the faculty committee in order to be applied toward satisfaction of the degree requirements. As an example, a student planning to pursue interdisciplinary research in the general area of bioinorganic chemistry would form a committee headed by a bioinorganic scientist and would have a contract that probably required taking at least these five courses:

• CHEM 646 Bioinorganic Chemistry
• CHEM 660 Protein Biochemistry
• CHEM 662 Drug Design
• CHEM 633 Chemical Thermodynamic and Kinetics
• CHEM 617 Organic Structural Spectroscopy

The contract is an interactive document agreed to between the student and the committee. It can be revised, but any revisions must be approved by the program director. For purposes of the written preliminary exam, the scope of the contract will be narrowed to cover particular courses, books, and such as the committee sees fit. The final contract must be signed by the student and by all committee members.

Climate Dynamics

Phone: 301-595-7000
Web: climate.gmu.edu

Faculty

Professors: Schneider, Schopf, Shukla (chair), Strauss
Associate professors: DelSole, Houser, Huang, Kinter, Klinger
Contract professor: Krishnamurthy
Research assistant professor: Jin
Guest lecturers: Dirmeyer, Koster, Sud

Course Work

The department offers all course work designated CLIM in the Course Descriptions chapter of this catalog.

GRADUATE PROGRAMS

Climate Dynamics, PhD

The mission of this program is to train the next generation of world leaders in the science of climate dynamics. While there is no unambiguous definition of “climate,” climate dynamics is generally considered to encompass processes that determine the behavior of the atmosphere, land, and oceans averaged over time scales of weeks to centuries and millennia. Understanding climate variability and predictability poses difficult mathematical, computational, and observational questions that have generated increasing intellectual excitement in recent years.

Climate variability has important ramifications for society, from planning for next year’s electrical demand and forecasting agricultural production to answering complex questions involving long-term global change. While it is thought to be theoretically impossible to predict day-to-day weather more than a few weeks in advance, recent progress in predicting El Niño supports the idea that seasonal averages of temperature, rainfall, and other factors may be at least partly predictable months or even years in advance.

Climate dynamics faculty members are varied and have a blend of expertise in dynamics, statistics, and computational methods. Yet, they cover the traditional areas of atmospheric dynamics, physical and dynamical oceanography, land surface physics, and hydrology. The faculty and students involved in the program work closely with scientists at the Center for Ocean-Land-Atmosphere Studies (COLA) and the Center for Research on Environment and Water (CREW).

Faculty research focuses on the areas of climate prediction and predictability, climate variability, coupled ocean-atmosphere-land dynamics, and dynamical systems and retrospective analysis. Recent research topics include predictability of weather and climate; modeling of the complex climate system; El Niño dynamics; deforestation, desertification, and monsoons; atmosphere-ocean interaction; land-climate interaction; decadal climate variability; ocean circulation theory; abrupt climate change; and water and energy cycle dynamics.

External research collaborations exist with federal agencies, private corporations, and other universities, exemplifying COS’ and the university’s commitment to the development of effective regional and national collaborations. The faculty is heavily involved with national and international climate science efforts, providing students with the opportunity for participation in research.

Admission Requirements

Applicants should have demonstrated high aptitude for quantitative reasoning, applied mathematics, and physical science. Applicants should have an undergraduate degree from an accredited institution, with a GPA of at least 3.00 in undergraduate work and a combined GRE score of 1,100 (verbal plus quantitative). To apply, prospective students should forward a completed Mason graduate application, two copies of official transcripts from each college and graduate institution attended, a current résumé, and an expanded goals statement to the COS Fairfax Campus Graduate Admissions Processing Center. Applicants should also include three letters of recommendation and an official report of scores obtained on the GRE-GEN. The GRE-SUB is recommended if it is given in the student’s undergraduate major. The GRE requirement for admission to the doctoral programs will be waived if the student holds a master’s degree from a U.S. institution. TOEFL scores are required of all international applicants.

Degree Requirements

The program requires 72 credits beyond the baccalaureate degree, with a minimum of 48 credits in course work, and 24 credits of dissertation research. For those holding master’s degrees, the required 48 credits may be reduced by up to 30 credits, depending on graduate courses completed. The degree will be awarded on completion of the required course work and approval of a PhD thesis that makes an original and significant contribution to the field.

The 48-credit curriculum requirement is divided into four areas: 12 credits of fundamental climate science courses, 9 credits of core computational methods, 3 credits of seminar, and a minimum of 24 credits of electives. The course work is organized as follows:
• Fundamental climate science courses: CLIM 710, 711, 712, 714
• Core computational courses: CSI 700 and 701, and CLIM 715
• Climate seminar: 3 credits of CLIM 991
• 24 credits of electives, including up to 5 credits of independent research

After completing the fundamental climate science courses, students take a two-part qualifying exam that includes core and specialty components. The core component is administered by an examination committee. After successfully completing the core component, students take the specialty component, which is administered by the dissertation committee that students typically form by the spring semester of their second year. Following successful completion of both parts of the qualifying exam, students present a written dissertation proposal to the committee. Students may enroll in CLIM 998 Doctoral Dissertation Proposal to complete this effort. After approval of the dissertation proposal, students are formally advanced to doctoral candidacy and produce the dissertation while taking CLIM 999. The degree will be awarded on completion of the required course work and approval of a PhD thesis that makes an original and significant contribution to the field.

*Faculty holding primary appointments in other departments.

Course Work
The department offers all course work designated CDS, CSI, CSS, and NANO in the Course Descriptions chapter of this catalog.

UNDERGRADUATE PROGRAMS

Computational and Data Sciences, BS

The BS degree in computational and data sciences represents a new direction for integrated science at Mason based on the combination of applied mathematics, real-world computer science skills, data acquisition and analysis, and scientific modeling. Graduates of the BS program in computational and data sciences will possess the mathematical, scientific, and computational skills necessary to participate effectively as members of the interdisciplinary scientific simulation and analysis groups that are becoming more and more common in the public and the private sectors, particularly in Northern Virginia. Graduates will also be qualified to pursue graduate education in the sciences. Any student who meets the university’s general eligibility requirements may apply to the BS degree in Computational and Data Sciences Program.

In addition to satisfying the university-wide general education requirements for the BS degree, students must complete a total of 18 credits in computational and data sciences core courses, 15 credits in computer science, 23 credits in mathematics, 6 credits in statistics, 21 to 25 credits in a science concentration, and 3 to 9 credits in computational and data sciences electives with a minimum GPA of 2.00. (Through the course work below, computational and data sciences majors satisfy the university-wide requirements in natural science and quantitative reasoning.)

- Six required core computational and data sciences courses (18 credits): CDS 101, 301, 302, 401, 410, and 411
- Six required computer science courses (15 credits): CS 105, 112, 211, 261, 367, and 483
- Seven required mathematics courses (23 credits): MATH 113, 114, 125, 203, 213, 214, and 446
- Two required statistics courses (6 credits): STAT 344 and 354
- Science concentration (21–25 credits)
- Computational and data sciences electives (3–9 credits)

In meeting the above requirements, students choose a concentration in physics, chemistry, or biology. The courses required for each concentration are listed below. Students should plan a program of study in consultation with their advisor as appropriate for their selected concentration.

Concentration in Biology (BIOL)
This concentration is appropriate for students who wish to pursue a career or graduate education that applies computational techniques to the simulation of biological processes and systems. To complete this emphasis, students should take the following courses: CHEM 211, 212, 313, 315, and BIOL 213, 305, 306, and 311.

Concentration in Chemistry (CHEM)
This concentration is designed for students who wish to pursue a career or graduate education that applies computers to the simulation of chemical processes and systems. To complete this concentration, students should take the following courses: PHYS 243, 244, 245, 246, and CHEM 211, 212 plus either CHEM 313/315 or CHEM 331/336.

Concentration in Physics (PHYS)
This concentration is designed for students who wish to pursue a career or graduate education that applies computational techniques to the simulation of physical problems. To complete this concentration, students should take the following courses: PHYS 160, 161, 260, 261, 262, 263, and three of PHYS 303, 305, 306, 307, 308, 328.

Minor in Computational and Data Sciences
The minor in computational and data sciences (CDS) provides an attractive option for students majoring in mathematics, science, or engineering who wish to augment their major degree program with additional courses in scientific computing. The combination of computer science, numerical methods, science, and synthesis courses in computational and data sciences will significantly enhance the practical knowledge...
and computational skills of the students when compared with the major field alone. By absorbing the material in this cur-riculum, students will acquire the knowledge, skills, and techniques commonly used across scientific disciplines, which will allow them to apply their Mason education in a practical way in industrial, government, and academic settings.

At least 8 credits must be applied only to this minor and may not be used to fulfill requirements of the student’s major, concentration, or another minor or undergraduate certificate. Students must complete at least 6 credits in their minor at Mason and achieve a minimum 2.00 GPA in courses applied to the minor. Students interested in a minor should consult the appropriate chapters in this catalog.

The minor in computational and data sciences consists of 18 credits of course work as follows:

3 credits—CS 211 Object-Oriented Programming
3 credits—Math 446 Numerical Methods
9 credits—from any CDS or CSI courses
3 credits—from classes in physics, chemistry, biology, bioinformatics, environmental science and policy, geography, geology, astronomy, or statistics at the 300 level or above. Other discipline-based courses may be permitted with permission of the undergraduate program director.

Many of the courses listed above have additional prerequisites. Nonetheless, the CDS minor is within efficient reach of most students majoring in science, mathematics, engineering, or computer science, since these students will generally have the prerequisites for the classes listed above.

GRADUATE PROGRAMS

Computational Science, MS  MS-COMP

The interdisciplinary master’s program in computational science addresses the growing national and regional demand for trained computational scientists. It combines a solid foundation in information technology skills with computational courses in a variety of scientific areas. All courses are offered in the late afternoon or early evening to accommodate students with full-time employment outside the university.

The degree is centered on a strong computational component, which comprises 22 credits of course work. The remaining 9 credits represent the scientific component, which centers on specific areas such as mathematics, physics, chemistry, biology, and statistics. This provides students with a flexible set of options that can be used to create their own customized curriculum under the guidance of a faculty advisor. Students are encouraged to undertake an optional master’s thesis or research project that allows them to gain useful experience in the development of simulations and other aspects of computational science.

Admission Requirements

Applicants should have academic backgrounds in physical or biological sciences, engineering, mathematics, or computer science. They should have an undergraduate degree from an accredited institution, with a GPA of at least 3.00 in their last 60 credits of study. In addition, applicants should have taken at least one course in differential equations and have facility in using a high-level computer programming language. To apply, prospective students should forward a completed Mason graduate application, two copies of official transcripts from each college and graduate institution attended, a current résumé, and an expanded goals statement to the COS Fairfax Campus Graduate Admissions Processing Center. Applicants should also include three letters of recommendation and an official report of scores on the GRE-GEN. The GRE-SUB is recommended if it is given in the student’s undergraduate major. The GRE requirement will be waived if the student holds a master’s degree from a U.S. institution. TOEFL scores are required of all international applicants.

Degree Requirements

Candidates must successfully complete 31 credits as follows:

• 9 credits of computational core courses: CSI 700, plus two of CSI 701, 702, 703, 710
• 12 credits of computational techniques courses from the CSI PhD emphasis courses
• 9 credits of computational science electives as approved by advisor
• 1 credit of seminar or colloquium

Optional research component: 3 credits of CSI 798 or 6 credits of CSI 799; exercising the research option results in a corresponding reduction in the computational science electives requirement.

Computational Sciences and Informatics, PhD

The Computational Sciences and Informatics (CSI) doctoral program addresses the role of computation in science, mathematics, and engineering, and is designed around a core of advanced computer technology courses. Computational sciences is defined as the systematic development and application of computing systems and computational solution techniques to models of scientific and engineering phenomena. Informatics is defined as the systematic development and application of computing systems and computational solution techniques for analyzing data obtained through experiments, modeling, database searches, and instrumentation. Computing is now part of a triad, along with theory and experimentation, which provides a new integrated means of investigation. The resulting interdisciplinary approach often leads to understanding that, in many cases, traditional theory or experimentation alone cannot provide. The close relationship of the CSI doctoral program to the research and development activities in federal laboratories, scientific institutions, and high-technology firms affords students opportunities for continuing or new employment. Scheduled courses and sequences accommodate part-time students, with most courses meeting once a week in the late afternoon or early evening.

Overview of the CSI Program

Founded in 1992, the innovative Computational Sciences and Informatics (CSI) doctoral program at George Mason University addresses the role of computation in science, mathematics, and engineering. Computational sciences is defined as the development and application of computational methodologies and techniques to the modeling, simulation, and understanding of phenomena in the natural sciences and engineering. Informatics is defined as the design and implementation of complex software systems for the extraction of knowledge from large databases. The research and teaching activities associated with the CSI program reflect the recognized role of computation as part of a triad with theory and experimentation, leading to a better understanding of nature.
Areas of Emphasis within the PhD Program
Research opportunities leading to the doctoral degree are available in each of the following areas of emphasis:
- Computational Fluid Dynamics
- Computational Learning
- Computational Materials and Chemical Sciences
- Computational Mathematics
- Computational Physics
- Computational Statistics
- Quantum Information Science

Space Sciences and Computational Astrophysics
Students may also pursue interdisciplinary research that combines the areas of emphasis listed above with each other and also with computational neuroscience, climate dynamics, bioinformatics, and remote sensing, which are now separate PhD programs.

The department’s research activities reflect the recognized role of computation as part of a triad with theory and experiment to generate new knowledge and a better understanding of nature. CDS maintains several weekly colloquia and seminar series to ensure that students are exposed to the latest developments at area research institutions. Doctoral students are encouraged to participate in national and international meetings where they can present their latest findings.

Program of Study
The list of research areas tells only part of the story because the greatest strength of the CSI doctoral program lies in its ability to foster and promote truly interdisciplinary research that crosses traditional domain boundaries. In the CSI doctoral program, each student is presented with an exciting opportunity to create a new area of interdisciplinary inquiry that would not fit into a traditional PhD program. Students in the CSI doctoral program use computationally intensive methods to solve current problems in these scientific areas.

The 72-credit doctoral program combines three intellectual elements:
- Core computational science topics
- Computational intensive courses in specific scientific areas
- Research leading to the dissertation

The doctoral program, designed to be completed in 4 to 5 years, includes:
- 12 credits of core computational courses (scientific computing, databases, visualization)
- 15 credits from courses in one of the science areas
- 18 credits in electives from science courses, with at least 9 credits of CSI courses
- 3 credits in colloquium/seminar
- 24 credits in dissertation research

PhD Admission Requirements
Students interested in applying for admission into the CSI PhD program should have a bachelor’s degree in any natural science, mathematics, engineering, or computer science with a minimum GPA of 3.00 in their last 60 credits of study. All applicants to the PhD program should have a mathematics background up to and including differential equations. All applicants to the PhD program should also have knowledge of a computer programming language such as C, C++, FORTRAN, etc.

The GRE is required, unless the applicant holds a master’s degree from a school in the United States. A TOEFL score of 575 (paper-based exam) or 230 (computer-based exam) is required for international students. The ETS code for GMU is 5827.

Students should submit a completed graduate application along with three letters of recommendation, an expanded goals statement, and a $50 check to cover the application fee (payable to George Mason University) in addition to the items listed above.

Applications should be received by March 1 for fall semester and November 1 for spring semester. Applications requesting financial support must be received by February 1 for the fall semester. Please note that applications from local applicants may be accepted after these general deadlines.

Please send completed applications to the address below:
COS Graduate Applications Processing Center
George Mason University
4400 University Drive, MS 6A3
Fairfax, VA 22030

For additional information, phone 703-993-1988; fax 703-993-9300, or e-mail: blasten@gmu.edu.

Degree Requirements
General core course requirements—12 credits from the following:
- CSI 700 Numerical Methods
- CSI 701 Foundations of Computational Science
- CSI 702 High Performance Computing
- CSI 703 Scientific and Statistical Visualization
- CSI 710 Scientific Databases

Emphasis core requirements—15 credits in one of the following areas:
- Computational Fluid Dynamics
- CSI 720 Fluid Dynamics
- CSI 721 Computational Fluid Dynamics I
- CSI 722 Computational Fluid Dynamics II
- CSI 742 The Mathematics of the Finite Elements Method

Computational Learning
- CSI 771 Computational Statistics
- CSI 772 Statistical Learning
- CSI 773 Statistical Graphics and Data Exploration
- CSI 777 Principles of Knowledge Mining
- CSI 873 Computational Learning and Discovery

Computational Materials and Chemical Sciences
- CSI 685 Fundamental of Materials Science or CSI 687 Solid State Physics and Applications
- CSI 780 Computational Physics and Applications
- CSI 783 Computational Quantum Mechanics
- CSI 787 Computational Materials Science

One from CSI 786 Molecular Dynamics Modeling, CSI 789 Mechanics of Solids, CSI 885 Atomistic Modeling of Materials

Computational Mathematics
- CSI 742 The Mathematics of the Finite Elements Method
- CSI 747 Nonlinear Optimization and Applications
Computational Social Science, PhD

The core objective of the computational social science (CSS) PhD program is to train graduate students to be professional computational social scientists in academia, government, or business. The program offers a unique and innovative interdisciplinary academic environment for systematically exploring, discovering, and developing skills to successfully follow careers in one of the areas of computational social science.

Admission Requirements

Applicants should have as background a bachelor’s degree in one of the social sciences; computer science, engineering, or a relevant discipline; and undergraduate courses in these and related areas. Bachelor’s degrees in the physical or biological sciences are also eligible, but applicants may be advised to take additional courses in social science or computer science as prerequisites to admission. Minimal requirements also include one undergraduate course in calculus and knowledge of a computer programming language, preferably object-based. Applicants should have an undergraduate degree from an accredited institution, with a GPA of at least 3.25. To apply, prospective students should send to the COS Fairfax Campus Graduate Admissions Processing Center a completed Mason graduate application, two copies of official transcripts from each college and graduate institution attended, a current résumé, an expanded goals statement not to exceed 2,000 words, and the names of two Mason faculty members who may be suitable advisors. Applicants should also include three letters of recommendation from faculty members or individuals with direct knowledge of the student’s academic or professional capabilities. The letters must arrive directly from the senders. Applicants should also submit an official report of scores obtained on the GRE-GEN. TOEFL scores are required for all international applicants.

Degree Requirements

The program requires 72 credits beyond the baccalaureate degree, with a minimum of 48 credits in course work, and 24 credits of dissertation research. For those holding a master’s degree, the 72 required credits may be reduced by up to 30 credits, depending on graduate courses. A minimum of 24 credits of prior graduate course work may be transferred, provided such credits have not been used for another degree. The 48 credits of courses have the functional distribution and learning objectives indicated below.

- 12 credits of required core CSS courses:
  - CSS 600 Introduction to Computational Social Science
  - CSS 605 Object-Oriented Modeling for Social Science
  - CSS 610 Computational Analysis of Social Complexity
  - CSS 620 Origins of Social Complexity
- 6 credits of extended core CSS courses taken from the following:
  - CSS 625 Complexity Theory in the Social Sciences
  - CSS 645 Spatial Agent-Based Models
  - CSS 692 Social Network Analysis
- 15 credits of discipline-based social science courses in a specific area such as anthropology, economics, geography, history, linguistics, political science, or sociology, as approved by the student’s advisor, to provide domain-specific knowledge
- 15 credits of elective courses or independent research, as approved by the student’s advisor, to provide further
substantive or methodological specialization as needed (Students with a strong background in computing, for example, a prior MS in computer science, but weaker social science training will be required to use all or most of these electives in a substantive social science. Conversely, students with a strong background in social science, for example, a BS in economics, will be required to use most or all of these electives in computing courses.)

- 24 credits of dissertation research to demonstrate doctoral-level originality and research excellence

Areas for dissertation research include, but are not limited to, the following:

- Agent-based computational economics: trade, finance, decision making under risk
- Computational political economy: voting, institutions, norms, inequality
- Computational linguistics: generative grammars, parsing, classifiers, inference
- Social network analysis: connectivity, structure, evolution of the Internet, cyberwarfare
- Computational anthropology: emergence of hierarchy, settlement patterns
- Computational political science: systems of government, conflict and war, cooperation
- Computational sociology: segregation, collective action, leadership, trust
- Complexity theory: power laws, potential theory, criticality, bifurcation
- Computational methodology: multiagent systems, evolutionary computation

During the first year, each student will form a graduate studies committee, called the first-year committee, consisting of the student’s advisor plus two or three appropriately qualified individuals. The committee assists the student in designing a specific plan of study and evaluating the student’s progress by the end of the first year. During the second year, the student forms a doctoral committee, with membership approved by the CSS Program director. The committee will advise the student on preparing for the doctoral candidacy exams and preparing, developing, and defending the doctoral dissertation.

The candidacy exam is taken after students have completed all core requirements and a majority of additional course work (18 plus 15 credits), which typically corresponds to the fifth semester in the program. The purpose of the candidacy exam is to assess the student’s substantive and methodological knowledge in CSS as a whole and in the chosen focus area; the ability to integrate materials from different courses; and the potential for a successful dissertation.

The exam will consist of written and oral parts. Upon passing the candidacy exam and submitting an acceptable dissertation proposal, students are advanced to doctoral candidacy. The degree is awarded on the successful defense of a PhD dissertation that represents a detailed written report of an original and significant research contribution to the CSS field.

Physical Sciences, PhD

The department participates in the PhD in physical sciences administered by the Department of Chemistry and Biochemistry, and the Department of Physics and Astronomy. Please see those departmental listings for program requirements.

Graduate Certificate in Computational Social Science

This 15-credit program is designed for students who seek training in computer simulation and related computational methods for analyzing social systems and processes. The program is open to all students with graduate standing at Mason and all students who hold a bachelor’s degree from an accredited university. The CSS certificate allows students with social science or computational backgrounds to acquire new knowledge and modeling skills to improve their qualifications and attractiveness to employers in government, academia, or industry. The core courses provide a common foundation; additional elective courses allow for a variety of student interests across diverse social domains.

Admission Requirements

Applicants should have an undergraduate degree from an accredited institution, with a GPA of at least 3.00. To apply, prospective students should forward a completed Mason graduate application, two copies of official transcripts from each college and graduate institution attended, and a current résumé to the COS Fairfax Campus Graduate Admissions Processing Center. TOEFL scores are required of all international applicants.

Program Requirements

Students in the CSS certificate program must take both CSS 600 Introduction to Computational Social Science and CSS 610 Computational Analysis of Social Complexity. Students are also required to take a minimum of 9 credits in elective courses (for example, CSS 605, 620, 692). Students may include a maximum of 3 credits of programming courses to meet requirements. Programming courses such as procedural, object-oriented languages, or other approved programming approaches, such as CSI 603 or 604 Introduction to Scientific Programming I and II, may be used with the director’s approval. Some courses on computational techniques, modeling, statistics, visualization, graphics, and database packages (such as CSI 606 and 607) may also be used to meet the requirements with prior approval of the director. Students intending to obtain the certificate in CSS must contact the director no later than two semesters prior to completing the required credits.

Graduate Certificate in Computational Techniques and Applications

This certificate program focuses on mastering a variety of basic computational skills. The certificate is independent of the doctoral and master’s programs and is designed primarily for professionals in technical fields who seek to upgrade their computer expertise. This program is also available as an option for prospective or currently enrolled doctoral or master’s degree students.

Admission Requirements

Applicants should have an academic background in physical or biological sciences, engineering, mathematics, or computer science. They should have an undergraduate degree from an accredited institution, with a GPA of at least 3.00 in their last 60 credits of study. In addition, applicants should have taken at least one course in differential equations and have facility in using a high-level computer programming...
language. To apply, prospective students should forward a completed Mason graduate application, two copies of official transcripts from each college and graduate institution attended, and a current résumé to the COS Fairfax Campus Graduate Admissions Processing Center. TOEFL scores are required of all international applicants.

Program Requirements
The program comprises 15 credits of course work designed to provide an accelerated introduction to concepts in modern computation. Topics include operating systems, environments, languages, graphics, databases, and applications. The required courses may be selected as follows: 6 credits from CSI 601–607, 6 credits from CSI 600, 610, 700, and one CSI elective. Special course schedules may be designed depending upon the background and qualifications of the student. Waived credits are to be replaced with applications courses approved by the director of the certificate program.

■ Graduate Certificate in CERG-NANO Nanotechnology and Nanoscience

This graduate certificate program focuses on mastering a variety of technical skills in the rapidly developing area of nanotechnology. The field highlights the effect of size on the physical and engineering properties of materials and the design of various devices and systems. The certificate enables students to acquire knowledge covering a broad range of instrumentation, modeling, analysis, and production methods that facilitate the solution of practical nanotechnology-related problems in the workplace.

Admission Requirements
Applicants should hold a BS degree in any branch of engineering, physics, chemistry, or materials science, with a minimum GPA of 3.00. Exceptions are reviewed on an individual basis. To apply, prospective students should forward a completed Mason graduate application, two copies of official transcripts from each college and graduate institution attended, and a current résumé to the COS Fairfax Campus Graduate Admissions Processing Center. TOEFL scores are required for all international applicants.

Program Requirements
The certificate program comprises 15 credits of course work designed to provide an accelerated introduction to concepts in nanotechnology and nanoscience. Topics include nanomaterials, nanocharacterization, nanostructures, nanofabrication, nanoelectronics, and modeling for nanoscience. The prefix of the associated courses is NANO. Requirements are 9 credits of core courses (NANO 500, 510, 520) and 6 credits of electives (NANO 530, 610, 620).

The certificate program is a professional certification program that charges students at a differential (premium) tuition rate, with an additional $100 per credit added to the standard Mason graduate tuition rate for students who enroll in this certificate program, regardless of in-state or out-of-state status. The differential tuition is used to fund continuing improvements in the COS educational facilities used to support the certificate program.

Environmental Science and Policy
Phone: 703-993-1043
Web: esp.gmu.edu

Faculty
Professors: Diecchio, Hazen (Robinson Professor), Jones (chair), Lawrey
Term professor: Talbot
Associate professors: Birchard, Gillevet, Harlan, Jonas, Macfarlane, McBride, Rockwood, Torzilli
Assistant professors: Ahn, Balint, Crate, Darnall, Edwards, Forkner, Kraus, Krekeler, Kysar-Mattietti, Manca, Weeks
Term associate professors: Cressey, Parsons, Verardo
Term assistant professors: Cooper, Largen
Research associate professor: Litchfield
Emeritus professors: Bradley, Ernst, Kelso, Shaffer, Skog

Other Environmental Faculty
Professors: Black, Chandhoke, Conlan, Foster, Gifford, Haack, Houck, Mosc, Mushrush, Nadeau, Regan, Rowan, Sage, Schum, Wan, Willett, Wong
Associate professors: Beach, Christensen, Conant, deMonsabert, Fryxell, Guagnano, Honeychuck, Kozlowski, Mahler, Meyer, Paden, Palkovich, Rodgers, Royt, Seto, Stough, Wood
Assistant professor: Parker
Affiliate faculty: Bailey, Bartoldus, Baxter, Boggs, Bonnelly, Briggs, Buchino, Cooper, Fox, Hamdan, Hazen, Jordan, Kriechevsky, Leathery, Lebovitz, Leimgruber, Maladono, Marra, Maurakis, Magonigal, Mineau, Nead, Noe, Oren, Peters, Ragen, Rybicki, Seidensticker, Sillet, Sladen, Smith, Sonsasen, Strong, Wang, Wilder

Course Work
This department offers all course work designated EVPP and GEOL, and certain BIOL courses, listed in the Course Descriptions chapter of this catalog.

UNDERGRADUATE PROGRAMS

■ Biology, BS BA-BIOL

The undergraduate program in biology is offered by the Department of Environmental Science and Policy (ESP) and the Department of Molecular and Microbiology (MMB). The concentration in environmental and conservation biology is sponsored by ESP.

▲ Concentration in Environmental and Conservation Biology (ESCB)

This concentration is offered to students seeking a biology degree that focuses on ecology and organismal biology and prepares them for graduate work or employment in environmental and conservation fields, such as natural resources management, fisheries, forestry, water quality management, aquatic and wetland ecology, and conservation biology. The concentration is staffed and supported by the ESP Department.

In addition to satisfying university-wide general education requirements for the BS degree, students must complete the
following with a minimum GPA of 2.50. (Through the course work below, they satisfy the university-wide general education requirements in natural science, quantitative reasoning, and information technology proficiency.)

- 24 credits in biology, including BIOL 213, 303, 304, 305, 306, 307, 311
- 20 credits in environmental and conservation biology, including BIOL/EVPP 377, 471; EVPP 318; a field course (either EVPP 350 or BIOL 345); and other courses chosen from the following: BIOL 309, 326, 331, 332, 333, 342, 344, 345*, 440, 472, 449; EVPP 350*, 415, 451; NCLC 401

* If not used for field course requirement.

- 13 credits of chemistry, including CHEM 211, 212, 313, 315
- One of the following options: CHEM 314 and 318 (5 credits)
  One chemistry course at the 300 or 400 level (3 credits)
  GEO 101 and 102 (8 credits)
- 8 credits of physics: PHYS 243, 244, 245, 246
- At least 6 credits from the following: MATH 110, 111, 113, 114, STAT 250
- 3 credits of computer skills: IT 103

Geology, BA

In addition to the university-wide general education requirements and requirements for a BA degree in COS, candidates for a degree in geology must complete the following with a minimum GPA of 2.50. (Through the course work below, geology majors satisfy the university-wide requirements in natural science and quantitative reasoning.)

- 38 credits in geology, including GEO 101,102, 302, 304*, 308*, 312, 317, 401, and 404**
- MATH 110, 111, or 113
- CHEM 211, 212
- GEO 316 or a computer science course (CS 112 or IT 103), which may fulfill the university information technology requirement
- 9 credits of degree-related course work in a coherent program designed in coordination with advisor and approved by department chair
- Students must achieve a grade of 2.00 or better in GEO 302 before taking GEO 304 or 308.

** No longer offered regularly; 6-credit geology field camp is required as substitute (see your advisor for details).

Teacher Licensure

Students who wish to become teachers should consult the College of Education and Human Development chapter and attend an information session early in their undergraduate career. For more information, call 703-993-2892, e-mail gseadmit@gmu.edu, or go to gse.gmu.edu.

Global and Environmental Change, BS

This interdisciplinary undergraduate program, one of the first of its kind in the nation, distinguishes itself from other degrees in the natural sciences in that it examines from local, regional, and global scales the dynamics of Earth’s systems and their interactions: the geosphere, the atmosphere, the ecosphere, and the sociosphere. In addition, it emphasizes the dynamic and changing Earth systems and the use of Earth observing and remote sensing and related geoinformation technologies in detecting changes. It is jointly offered with the Department of Earth Systems and Geoinformation Sciences (esgs.gmu.edu).

Through the course work listed below, global and environmental change majors satisfy university-wide general education requirements in natural science, quantitative reasoning, information technology, global understanding, social science, and synthesis:

Six required core courses in global and environmental change (22 credits): EOS 121-122 or EVPP 110-111; plus EOS 353; EOS 305 or GEOL 305; GEOG 300 or BIOL 312; and EOS 304

Four required courses in geosphere and atmosphere (13 credits): GEOL 101(4) or PHYS 243-244(4); plus 3 courses from EOS 310, 312, 320; GEOG 309, 399; GEOL 317, 306, 309, 303; EVPP 490

Four required courses in ecosphere and sociosphere (12 credits): GLOA 101 or GEOG 101 or CEIE 100; and GEOG 103 or ANTH 135; and BIOL 371 or EVPP 377; and 1 from BIOL 318, BIOL 345, EOS 322, EOS 306, EVPP 336, EVPP 337, EVPP 350, EVPP 449 or GEOG 303

Two required courses in applications and techniques of detecting global change (6 credits): choose two from EOS 303, 354, 410, 455, 495, GEOG 412, 416, 463, GEOL 303

Two required supporting sciences sequence courses beyond general education requirements (8 credits): CHEM 211, 212 (8); or PHYS 243-244 (3–1), 245–246 (3–1); or ASTR 111–112 (4), 112–114 (4); or GEOL 101–102 (8); or BIOL 103–104 (8)

Four required supporting mathematics and IT courses (14 credits): MATH 113 and 114 (8), STAT 250/IT 250 (3), IT 103 (3)

General electives (27–31 credits)

In meeting the above requirements, students may choose a focus in environmental or global change.

Earth Science, BS

This degree is intended for students interested in studying the earth and its environment. Recognizing that these are integrated disciplines, students receive a broad background in Earth and environmental sciences and select a specialty concentration.

In addition to university-wide general education requirements, students must complete the following course work with a minimum GPA of 2.00. Through the course work below, earth science majors satisfy the university and college requirements in natural science and quantitative reasoning.

- 40 credits in core science and mathematics, including: CHEM 211, 212 GEOG 309 GEOL 101, 309 (BIOL 309), 406 or 420 MATH 113, 114 PHYS 160, 260, 261 or 243, 244, 245, 246 STAT 250
• 34–35 credits in one of the following concentrations:

▲ Earth Surface Processes (EP)
GEOL 102 or EVPP 110; GEOL 302, 303, 306, 316 or CS 112**, GEOL 317; and four of the following: GEOL 304*, 305, 313, 315, 363, 403, 417; GEOG 311, 412, 416

▲ Environmental Science (EVSC)
BIOL 307; EVPP 110, 111, 336, 377; GEOL 303, 305, 306; and two of the following: BIOL 345, 349, EVPP 350, 363

▲ Geology (GEOL)
GEOL 102, 302, 304*, 308*, 312, 317, 401, 404***

Earth science education (ESE): ASTR 111 or 112; EDCI 573; EDUC 522; GEOL 102, 302, 303, 408, 409; and three of the following: EVPP 110; GEOL 304, 308, 312, 317, 363, 401. Optional teacher licensure component: EDCI 673, 790; EDUC 672; EDRD 619

* Requires C or better in GEOL 302
** Satisfies general education information technology requirement
*** No longer offered regularly; 6-credit geology field camp is required as substitute (see advisor for details).

Writing-Intensive Requirement
Mason requires all students to complete at least one course designated as "writing intensive" in their majors at the 300 level or above. Students majoring in geology or earth science fulfill this requirement by successfully completing GEOL 317. Students in the environmental science concentration satisfy this requirement by taking BIOL 307.

Honors Program for Earth Science and Geology
Earth science and geology majors who have completed 16 credits of math and science, including GEOL 302 or BIOL 307, with a GPA of 3.00 or higher are eligible to enter the departmental honors program. Transfer students who have an incoming GPA of 3.10 or higher in math and science and a B or better in GEOL 302 or BIOL 307 are also eligible. To graduate with honors in Earth science or geology, students are required to maintain a minimum GPA of 3.00 in math and science and complete the following courses with an average GPA of 3.50 or better: GEOL 406, 410, and 411.

Minor in Conservation Biology
This minor is intended for nonbiology majors* with an interest in wildlife and habitat conservation issues. The minor may particularly suit global environmental change and Earth science majors, as well as New Century College students wishing to increase their understanding and qualifications in the field of conservation biology. The minor may also be of interest to nonscience majors, for example, students taking leisure studies classes with an interest in ecotourism.

Requirements
Candidates for the minor in conservation biology must complete at least 21 credits with a minimum GPA of 2.00, including

Core Biology Courses (15 credits)
BIOL 303 Animal Biology (4 credits)**
BIOL 304 Plant Biology (4 credits)**
EVPP 307/BIOL 307 Ecology (4 credits)

EVPP 318/BIOL 318 Conservation Biology (3 credits) or NCLC 401 Conservation Biology (3 credits only) and at least 6 credits of electives from the following courses:

Electives
EVPP 336 Human Dimensions of the Environment (3)
EVPP 361 Introduction to Environmental Policy (3)
EVPP 377 Applied Ecology (3)
EVPP 419 Marine Mammal Biology and Conservation (3)
EVPP 421 Marine Conservation (3) (requires BIOL 309/GEOL 309 Oceanography as a prerequisite)
EVPP 490 Conserving Endangered Species Topic (4)
NCLC 319 An Endangered Earth (3)
NCLC 520 Conservation Education (3)
NCLC 522 Developing an Institutional In Situ Conservation Strategy (3)
TOUR 312 Ecotourism (3)

Other conservation-oriented classes may also be applicable as an elective for this minor if agreed on with the faculty coordinator for the minor. Eight credits of courses must be unique to the minor and not count toward the student’s major.

*This minor cannot be taken by biology majors.
**These courses may have prerequisites that need to be met. See advisor for details.

Minor in Earth Science
To receive this minor, students must successfully complete 18 credits with a minimum GPA of 2.00 to include GEOL 101 and 309, GEOG 309, and 8 credits of geology electives. Eight credits of course work must be unique to the minor. Students may not receive both the minor in geology and the minor in earth science. For policies governing all minors, see the Academic Policies chapter of this catalog.

Minor in Environmental Policy
To receive this minor, students must successfully complete 21 credits with a minimum 2.00 GPA, including the following core courses (12 credits):

EVPP 336 (3) Human Dimensions of the Environment
EVPP 361 (3) Introduction to Environmental Policy
EVPP/BIOL 377 (3) Applied Ecology
PHIL 343 (3) Introduction to Environmental Ethics

Plus 9 credits from the following list (or other appropriate courses approved by the coordinator of the minor):

ANTH 370 (3) Ecology and Culture
ANTH 399 (3) Global Perspectives on Culture and Consumption
BIOL/EVPP 318 (4) Conservation Biology
BIOL 543 (4) Tropical Ecosystems
CEIE 456 (3) Environmental Law
EOS 306 (3) Sustainable Development
EOS 322 (3) Regional and Global Issues in the Earth and Environmental Sciences
EOS 355 (3) Environmental Impact Assessment
EVPP 337 (3) Environmental Policy Making in Developing Countries
EVPP 490 (3) Any policy-related course (for example, Conserving Endangered Species, Energy and the Environment, Ecological Economics, Environmental Sci-
ence of Puerto Rico, Marine Conservation, Marine Mammal Biology and Conservation) EVPP 505 (3) Any policy-related course GEOG 303 (3) Conservation of the Environment GEOG 399 (3) Special Topics: Climate Change and Global Warming GEOL 420 (3) Earth Science and Policy PRLS 300 (3) People with Nature PRLS 402 (3) Human Behavior in Natural Environments PRLS 526 (3) Environmental Education and Resource Interpretation SOCI 320 (3) Human Dimensions of Global Change SOCI 322 (3) Sociology of Urban Communities TOUR 312 (3) Ecotourism TOUR 340 (3) Sustainable Tourism TOUR 362 (3) Cultural and Environmental Interpretation TOUR 540 (3) Sustainable Tourism Management At least 8 credits of courses taken for the minor must be exclusive to the minor and not count toward the student’s major.

**Minor in Geology**
To receive the minor, students must successfully complete 20 credits with a minimum GPA of 2.00 to include GEOL 101, 102, and 302, and two of the following courses: GEOL 304*, 308*, 312, 317, or 401. Eight credits of course work must be unique to the minor.

*Students must achieve a grade of 2.00 or better in GEOL 302 before taking GEOL 304 or 308.

**Minor in Ocean and Estuarine Science**
To receive the minor, students must successfully complete 20 to 21 credits with a minimum GPA of 2.00 to include GEOL 101, BIOL 103 or BIOL 213 or EVPP 110, and BIOL/GEOL 309; plus GEOL/EVPP 363 or BIOL 449, and 6 credits from the following electives: GEOL/EVPP 363*, BIOL 449*, EVPP 350, 419, 421, NCLC 395 (Biological of the Chesapeake Bay or Exploring Underwater Archaeology topics), NCLC 495/BIO 440 (Coral Reef Ecology), BIOL/EVPP 546, and BIOL/EVPP 537. PHED 225 is strongly recommended but not required. Eight credits of course work must be unique to the minor.

*If not previously counted

**Certificate in Environmental Management**
This undergraduate certificate in environmental management is for students interested in environmental issues. The program consists of a minimum of 27 credits, most of which, with appropriate planning, may be counted toward fulfilling BS or BA requirements in biology, geography, Earth science, urban systems engineering, and other natural and social sciences. The curriculum provides a substantive appreciation of the biological, physical, and social aspects of environmental problems and methods for their analysis and resolution. The program should particularly interest students wishing to pursue graduate work or seeking employment in the environmental field. Inquiries should be made to the director of the environmental management certificate program.

Students receiving the certificate must hold a baccalaureate degree or be earning a baccalaureate degree from Mason at the time they receive the certificate. As an entry-level require-

- **Environmental certificate core (four courses):** EVPP/BIOL 377; GEOG 303 or 503; ECON 103, EVPP 351, EVPP 336, GOVT 351 or 357; a course in statistics
- **Physical perspective (one or two courses):** Options include BIOL/GEOL 309; BIOL 535; EVPP 550; EVPP/BIO 577; GEOG 102, 309; GEOG 305, 306, 363, 313, 317, 403, 405, 563; USE 440
- **Biological perspective (one or two courses):** Options include BIOL 307, 309, 344, 345, 371, 375, 440, 446, 449, 471, 532, 535, 536, 537, 543, 547; EVPP 315, 515, 550, 538; EVPP/BIO 318, 339, 350, 546, 577; HEAL 450
- **Social perspective (one course):** Options include ANTH 305, 365, 370, 440; CONF 501; ECON 350, 360; EVPP 336, 337, 361; GEOG 301, 304, 305, 306, 316, 325, 406; GOVT 318, 357, 364, 366; MGM 312; NURS 543; PHIL 555; PRLS 300, 402, 526; PUAD 502
- **Environmental methods (one course):** Options include BIOL 312; DESC 301, 352; EVPP 503, 555; GEOG 310, 311, 411, 412, 416, 463, 550, 553, 579, 580, 585

* Biology majors are required to complete two courses in physical or social perspective; geology or earth science majors are required to complete two courses in biological or social perspective. Social science majors are required to complete two courses in physical or biological perspective.

**GRADUATE PROGRAMS**

- **Environmental Science and Policy, MS**
The MS in environmental science and policy meets the increasing need for trained environmental professionals who can address the problems of land and water management, land use and urbanization, wetland loss, microbial ecology, bioremediation, conservation biology, and ecosystem preservation. These professionals will also contribute to the analysis and resolution of global problems, such as deforestation, insufficient world food supplies, acid deposition, population growth and public health, global warming, and depletion of the ozone layer. Areas of specific departmental focus include ecosystems, conservation; environmental biocomplexity; and sustainability science, policy, and management.

Environmental problems are defined in the real world and do not necessarily conform to traditional academic disciplines. As such, solutions require creative combinations of diverse interests and subjects. Effective training requires rigorous, problem-focused interdisciplinary action in a setting in which research is an essential element supporting instruction.

Four concentrations are available in the master’s program: environmental science and policy, environmental biocomplexity, Earth surface processes and environmental geochemistry, and environmental management. The first three concentrations, designed for students who wish to obtain a research-oriented master’s degree, serve as a training ground for
students wishing to further their education by pursuing the PhD in environmental science and public policy at Mason or doctoral programs at other universities. The environmental science and policy concentration is the largest and serves as a home for a broad array of research foci. The environmental biocomplexity concentration is designed for students who wish to obtain a research-oriented master’s degree in population genetics, microbial ecology, and molecular systematics. The concentration in Earth surface processes and environmental geochemistry provides a specific research focus in the earth science area.

The environmental management concentration serves as a terminal professional master’s degree for individuals working in or aspiring to work as managers in the environmental field in government or private industry. It combines the managerial and administrative skills developed in a traditional master of public administration degree program with the scientific knowledge and understanding normally found in a master of science degree.

**Admission Requirements**

Applicants must complete a standard Mason graduate application form, available from the Graduate Admissions Office or online at admissions.gmu.edu. Applicants should hold a bachelor’s degree with a GPA of 3.00 in natural or Earth sciences, engineering, resource planning, environmental studies, or a related field from an accredited institution. Applicants should have taken at least two semesters of chemistry and three semesters of biology, including a course in ecology. Applicants should submit a statement of interest, including at least one from a former professor or, if not available, from someone with a PhD. The aptitude portion of the GRE is required, and successful applicants usually have achieved a minimum score of 1,100 for verbal and quantitative combined. Applicants must also submit a statement of intent to the program, which should include the concentration to which they are applying, potential areas of emphasis, research option preferred, a statement of interactions with potential faculty advisors, and an explanation of career goals. Prospective students must contact potential faculty advisors appropriate to their interests during the application process. The availability of an advisor in the student’s area of interest is a prerequisite for admission. Students will choose their research skills option at the time of application but may change this option later with their advisor’s permission.

**Degree Requirements**

▲ Earth Surface Processes and Environmental Geochemistry Concentration (ESEG)

This concentration is for students desiring an MS degree with an earth science geology theme. Students must form a supervisory committee and submit a program of study to the graduate coordinator for approval within the first 9 credits of course work or by the end of the second semester, whichever comes first. The supervisory committee consists of the advisor and at least two other members, chosen in consultation with the advisor and conforming to Mason’s policy on master’s thesis committees. Requirements may be fulfilled by completing courses from a variety of academic units at Mason. The program requires a minimum of 33 graduate credits distributed in five categories to provide a breadth of knowledge appropriate for addressing current environmental and earth science issues. Course selection should support the research component of the student’s degree program.

• **Natural sciences:** At least 6 credits are required in courses that cover ecology, biogeochemistry, biochemistry, population genetics, molecular biology, molecular systematics, molecular evolution, microbial ecology, microbial diversity, quantitative genetics, and population biology.

• **Public policy:** At least 6 credits are required in environmental law, human ecology, environmental ethics, patent law, and legal and ethical issues in science.

• **Methods and statistics:** At least 9 credits are required in statistics, bioinformatics, information systems, instrumental analysis, microbiological techniques, molecular methods, phylogenetic methods, and bioinformatics.

• **Seminar:** At least 1 credit of EVPP 692 Master’s Seminar in Environmental Science and Public Policy on an appropriate topic is required.

• **Research:** This requirement may be satisfied in one of two ways: EVPP 798 Research Project (1–3 credits) or EVPP 799 Thesis; a thesis is required for this concentration.

Students present their results in a public seminar and defend their thesis before their committee. Students will be graded pass/no credit on the research component.

▲ Environmental Biocomplexity Concentration (EVBC)

This concentration is for students desiring an MS degree with an environmental biocomplexity theme. Students must form a supervisory committee and submit a program of study to the graduate coordinator for approval within the first 9 credits of course work or by the end of the second semester, whichever comes first. The supervisory committee consists of the advisor and at least two other members, chosen in consultation with the advisor and conforming to Mason’s policy on master’s thesis committees.

Course requirements may be fulfilled by completing courses from a variety of academic units at the university. The program requires a minimum of 33 graduate credits distributed in five categories to provide a breadth of knowledge appropriate for addressing current environmental issues. Course selection should support the research component of the student’s degree program.

Students are encouraged to complete at least 1 credit of directed studies (EVPP 693) as a lab rotation to broaden the scope of their experience in the concentration.

• **Natural sciences:** At least 6 credits are required in courses that cover ecology, biogeochemistry, biochemistry, population genetics, molecular biology, molecular systematics, molecular evolution, microbial ecology, microbial diversity, quantitative genetics, and population biology.

• **Public policy:** At least 6 credits are required in environmental law, human ecology, environmental ethics, patent law, and legal and ethical issues in science.

• **Methods and statistics:** At least 9 credits are required in statistics, bioinformatics, information systems, instrumental analysis, microbiological techniques, molecular methods, phylogenetic methods, and bioinformatics.

• **Seminar:** At least 1 credit of EVPP 692 Master’s Seminar in Environmental Science and Public Policy on an appropriate topic is required.

• **Research:** This requirement may be satisfied in one of two ways: EVPP 798 Research Project (1–3 credits) or EVPP 799 Thesis; a thesis is required for this concentration.
799 Thesis (3–6 credits) as described above for the environmental sciences and policy concentration.

▲ Environmental Management
Concentration (EVMG)
Students must complete 37 credits for the environmental management concentration. Students will be assigned an advisor on admission. Full-time students can complete this degree in three semesters; part-time students take six semesters. Course work must include the following:

- **Administration and policy:** At least 12 credits are required, including the following:
  - EVPP 670 Environmental Law or PRLS 501 Introduction to Natural Resources Law
  - PUAD 502 Administration in Public and Nonprofit Organizations or UAD 620 Organization Theory and Management Behavior
  - PUAD 640 Public Policy Process (with sections tailored to environmental science and policy)
  - EVPP 642 Environmental Policy

- **Environmental science:** At least 12 credits are required, including the following:
  - EVPP 546 Estuarine and Coastal Ecology or EVPP 550 Waterscape Ecology and Management or EVPP 644 Wetland Ecology and Management
  - EVPP 607 Fundamentals of Ecology (if student has not already taken a course in general ecology)
  - EVPP 641 Environmental Science and Public Policy
  - EVPP 677 Applied Ecology and Ecosystem Management

- **Methods and statistics:** At least 6 credits are required, including the following:
  - PUAD 611 Problem Solving and Data Analysis I (research design)
  - PUAD 612 Problem Solving and Data Analysis II (statistics)

- **Research/seminar:** Fulfilled with EVPP 741 Advanced Topics in Environmental Law and Public Policy: Problems in Environmental Management (4 credits)

- **Electives:** Students may choose 3 credits (or more to complete 37) from the following list of approved electives. Other courses may be used subject to approval of the program committee.
  - EVPP 524 Introduction to Environmental and Resource Economics
  - EVPP 525 Economics of Human/Environment Interactions
  - EVPP 546 Estuarine and Coastal Ecology (if not already taken)
  - EVPP 550 Waterscape Ecology and Management (if not already taken)
  - EVPP 620 Development of U.S. Environmental Policies
  - EVPP 621 Overview of Biodiversity Conservation
  - EVPP 622 Management of Wild Living Resources
  - EVPP 626 Environment and Development in South and East Asia
  - EVPP 627 Environmental Policy in Latin America
  - EVPP 628 Environment and Development in Africa
  - EVPP 630 Methods and Logic of Social Inquiry
  - EVPP 635 Environment and Society
  - EVPP 638 Corporate Environmental Policy
  - EVPP 644 Wetland Ecology and Management (if not already taken)
  - EVPP 650 Ecosystem Analysis and Modeling
  - EVPP 675 Environmental Planning and Administration
  - GEOG 550 Introduction to Geographic Information Science
  - PUAD 509 Justice Organizations and Processes
  - PUAD 615 Administrative Law
  - PUAD 622 Program Planning and Implementation
  - PUAD 657 Association Management
  - PUAD 729 Issues in Public Management: Lobbying and Advocacy
  - PUAD 741 Policy Analysis
  - PUAD 742 Program Evaluation
  - MBA 623 Marketing Management
  - MBA 712 Project and Cost Management
  - MBA 724 Marketing Communications
  - MBA 725 Leadership

▲ Environmental Science and Policy Concentration (EVSP)
This concentration encourages an independent and creative approach to the development of curricula that reside in the general field of environmental science and policy. Students must form a supervisory committee and submit a program of study to the graduate coordinator for approval within the first 9 credits of course work or by the end of second semester, whichever comes first. The supervisory committee consists of the advisor and at least two other members, chosen in consultation with the advisor and conforming to Mason policy on master’s thesis committees.

Course requirements may be fulfilled by completing courses from a variety of academic units at Mason. The program requires a minimum of 33 graduate credits distributed in four categories to provide a breadth of knowledge appropriate for addressing current environmental issues. Course selection should reflect a coherent individual program focus, which is stated and briefly described in the program of study, and support the research component of the student’s degree program.

- **Natural sciences:** At least 6 credits are required in biology, geology, geography, chemistry, or environmental engineering. For those students without previous course work in ecology, EVPP 607 is required in addition to the 6 credits.

- **Public policy:** At least 6 credits are required in environmental law, human ecology, environmental ethics, planning, or public affairs.

- **Methods and statistics:** At least 9 credits are required in statistics, remote sensing, information systems, instrumen-
tal analysis, or modeling. A course in statistics is highly recommended.

- **Seminar:** A minimum of 1 credit of EVPP 692 Master’s Seminar in Environmental Science and Public Policy on an appropriate topic is required.
- **Research:** This requirement may be satisfied in one of two ways: EVPP 798 Research Project (1–3 credits) or EVPP 799 Thesis (3–6 credits).

Students may conduct a project (EVPP 798) or produce a formal thesis (EVPP 799). The depth and sophistication of the research differs between the two options. The thesis normally involves original research with independent acquisition and interpretation of data, with the goal of peer-reviewed publication. Projects are generally less extensive and can include a broader range of activities.

Students fulfilling the research requirement with EVPP 798 are required to take a comprehensive exam administered by their committee. Students choosing to do a thesis and completing EVPP 799 will present their results in a public seminar and defend their thesis before their committee. Students will be graded pass/no credit on the research skills component.

### Earth Systems Science, MS

The department participates in the MS in Earth systems science administered by the Department of Geographical and Geospatial Sciences. Please see the departmental listing for program requirements.

### Graduate Certificate in Environmental Management

The graduate certificate allows students to expand their knowledge of the environment and environmental management beyond their undergraduate training. It offers a professional credential to students who might not have the time or background to enroll in a graduate degree program requiring a thesis or dissertation. Students who later obtain admission to the graduate degree programs in environmental science and policy may be able to use credits earned during the certificate toward their graduate degree program.

The curriculum provides a substantive exposure to the biological, physical, and social aspects of environmental problems, and methods for their analysis and resolution.

### Admission

Admission requirements are identical to those for admission to the graduate programs in environmental science and policy. Prospective students must have the following minimum requirements:

- Undergraduate (baccalaureate) degree, preferably in biology, chemistry, geology, geography, earth systems science, or some other environmentally related discipline
- Two semesters of general chemistry with a laboratory
- Two semesters of general biology with a laboratory
- Undergraduate course in general ecology; students who do not meet this requirement must take EVPP 607 Fundamentals of Ecology as their natural science elective.
- Three letters of reference and a statement of interest in the program

### Program Requirements

The certificate is awarded after satisfactory completion of six graduate courses (a minimum of 18 semester credits) as specified below:

- Environmental certificate core (three courses):
  - EVPP 677 Applied Ecology and Ecosystem Management
  - GEOG 503 Conservation and Natural Resources
  - One of the following:
    - EVPP 641 Environmental Science and Public Policy
    - EVPP 675 Environmental Planning and Administration
    - SOCI 635 Environment and Society
- Three electives (one from each of the following areas):
  - Natural sciences:
    - BIOL/EVPP 546 Estuarine and Coastal Ecology
    - BIOL/EVPP 577 Biogeochemistry: A Global Perspective
    - BIOL/EVPP 643 Microbial Ecology
    - BIOL/EVPP 745 Environmental Toxicology
    - EVPP 550 Waterscape Ecology and Management
    - EVPP 607 Fundamentals of Ecology
    - EVPP 644 Wetland Ecology and Management
    - EVPP 645 Freshwater Ecology
    - GEOG 570 Environmental Hydrology
  - Social sciences:
    - CONF 501 Introduction to Conflict Analysis and Resolution
    - EVPP 635 Environment and Society
    - EVPP 638 Corporate Environmental Policy
    - EVPP 641 Environmental Science and Public Policy
    - EVPP 642 Environmental Policy
    - EVPP 670 Environmental Law
    - or PRLS 501 Introduction to Natural Resources Law
    - EVPP 675 Environmental Planning and Administration
    - PHIL 555 Environmental Ethics
    - PRLS 526 Environmental Education and Resource Interpretation
    - PUAD 502 Administration in Public and Nonprofit Organizations
  - Environmental methods:
    - EVPP 650 Ecosystem Analysis and Modeling
    - GEOG 550 Introduction to Geographic Information Science
    - GEOG 553 Advanced Geographic Information Science
    - GEOG 579 Remote Sensing
    - GEOG 580 Digital Remote Sensing
    - GEOG 585 Quantitative Methods
    - SOCI 531 Statistical Reasoning

### Environmental Science and Public Policy, PhD

This interdisciplinary program draws on faculty and expertise from the environmental science and policy core faculty, as well as from the Departments of Molecular and Microbiology, Public and International Affairs, Chemistry and Biochemistry, Economics, Geography, Earth Systems and Geoinformation Sciences, and Sociology and Anthropology; as well as the School of Public Policy, the Volgenau School of Information Technology and Engineering, and the College of Education and Human Development.
Our graduates contribute to the solution of complex environmental problems, which require the development of knowledge and skills in the collection, analysis, and interpretation of scientific data, as well as in the integration of scientific understanding into the public policy process.

Admission Requirements

Applicants should have a bachelor’s degree with an overall GPA of at least 3.00. They should have taken at least two semesters of chemistry and three semesters of biology, including a course in ecology. The application deadline is February 15 for admission to fall semester; admission to spring semester is not available.

In addition to the materials required of all applicants for graduate study at Mason, applicants should submit the following:

• Scores on aptitude portion of GRE (may be waived for applicants with a master’s degree in an appropriate field)
• Three letters of recommendation, with at least two from individuals with doctorates
• Recent résumé
• Substantial statement of interest that includes a description of the specific area of proposed dissertation research, the potential focus (environmental science or environmental public policy), contacts that have been made with potential faculty advisors, and an explanation of career and research goals

Applicants should schedule an interview with the graduate coordinator or an environmental faculty member in their proposed area of research. Admission decisions are based on the student’s qualifications and the availability of a faculty advisor.

Degree Requirements

The doctoral program requires a minimum of 78 graduate credits beyond the bachelor’s degree. Students with a master’s degree in an appropriate field may obtain a reduction of credit for appropriate course work of up to 30 graduate credits. To ensure that all students obtain the necessary skills and knowledge to function as environmental professionals, the program requires all students to fulfill the following four category requirements:

• Natural sciences: At least 12 credits are required in biology, chemistry, environmental science, geology, geography, or environmental engineering.
• Public policy: At least 12 credits are required in public affairs, economics, sociology, and business. A course in environmental law is also required as part of this category.
• Research methods and technology: At least 9 credits are required in statistics, remote sensing, geographic information systems, analytical chemistry, modeling, or information technology. Students should carefully choose course work to ensure they have the necessary skills to support dissertation research. Course work for the first two categories, with a substantial methods component, may be used to meet some of this requirement, subject to approval of the student’s committee.
• Doctoral seminar: EVPP 991 must be taken twice, and students must present a total of 4 graduate seminar credits.

• Emphasis course work: Beyond these basic requirements, students focus their study on environmental science or environmental public policy. Those focusing on environmental science should take a total of 24 credits in natural science; those focusing on environmental public policy should take 24 credits of public policy course work. A specific set of recommended policy courses is provided for students in the environmental science focus. Previous thesis research courses may not be applied to this degree.

Before admission to the program, students are responsible for identifying a member of the environmental faculty willing to serve as their advisor. The advisor guides the student through course selection. An advisor may be changed by mutual consent of student and advisor, or petition to the graduate program director and the COS dean. Students are required to complete a course work proposal by the end of the second semester of courses. The proposal must be approved by the advisor and program director. In keeping with the general philosophy inherent in a PhD degree, students adopt an individual program that focuses on a specific area of research. The students’ course work must provide the knowledge base from which original research projects in their specific areas of interest can be successfully completed.

Before the end of the fourth semester of course work, students should assemble a dissertation committee of at least four members, three of whom must be from the Mason graduate faculty with representation from at least two academic departments. After reviewing the student’s course work proposal, progress to date, and area of research, the committee makes final recommendations concerning course work that will be codified in the program of study to be signed by all committee members and the graduate program director.

On completion of all or nearly all course work, students may request to take the qualifying or candidacy exam. The qualifying exam has both oral and written parts. The written portion consists of questions submitted by each member of the dissertation committee. Successful completion of the written exam should be followed by the oral portion within one month. The qualifying exam may be repeated once at the discretion of the student’s committee. On completion of all course work, passage of the qualifying exam, and submission of the program of study, the student is recommended for advancement to candidacy by the graduate coordinator. Students must advance to candidacy within six years of admission to the program.

Dissertation

Students must complete a dissertation (12 to 24 credits) by registering for credit in a combination of EVPP 998 and 999. No more than half the credits specified for dissertation credit on the student’s program of study may be taken as EVPP 998 Doctoral Dissertation Proposal. The dissertation is an original written work, demonstrating mastery of subject matter, methodologies, and conceptual foundations on a specific problem in the general field of environmental science and public policy. The dissertation generally involves collection and analysis of original data or the substantially new analysis and reinterpretation of existing data.

Before students may enroll in dissertation research, they must have advanced to candidacy and have a dissertation proposal approved by the dissertation committee, graduate program director, and dean of the college. Students must present the completed dissertation in a public seminar and
defend the work before the dissertation committee. Awarding of the degree is contingent on approval of the dissertation by the dissertation committee, graduate coordinator, and dean. The dissertation and defense must be completed within five years of advancement to candidacy.

### Geography and Geoinformation Science

Phone: 703-993-1210 or 703-993-1212  
Web: esgs.gmu.edu, www.gmu.edu/departments/geog

#### Faculty

**Professors:** Agouris, Di, Falconer, Haack, Taylor, Singh, Waters (director, GIS Center), Wong  
**Associate professors:** Beach, Boybeyi, Chiu, Curtin, Qu, Stefanidis, R. Yang, S. Yang  
**Assistant professors:** Cervone, Kronenfeld, Leslie, Manca, Rice, Sun, C. Yang, W. Yang, Zolnik  
**Research or contract professors:** Gomez, Pilon, Resmini, Self, Sommers, Wood  
**Term instructors:** Boudinot, Hallden

#### Course Work

This department offers all courses designated EOS and GEOG in the Course Descriptions chapter of this catalog.

#### UNDERGRADUATE PROGRAMS

**Geography, BA**

In addition to university-wide general education requirements and requirements for a BA degree from COS, candidates for a degree in geography must complete 28 credits in geography with a minimum GPA of 2.00. Requirements are as follows:

- Core courses (16 credits): GEOG 102, 103, 300, 310, and 415 (GEOG 103 fulfills the university requirement in social science)
- 12 credits of systematic (GEOG 301, 303, 304, or 305), geographical applications (GEOG 308, 311, 412, 416, or 463), and regional courses at the 300 level or above (some regional courses fulfill the college-level, non-Western culture requirement)
- 18 or more credits consisting of an approved double major, disciplinary minor, interdisciplinary minor, or certificate, or any other coherent 18-credit (minimum) package of courses approved by the advisor and the department chair. No more than 7 credits used to meet the 28-credit requirement may be used to meet this requirement. (Some of these courses may fulfill university-wide general education or college-level requirements.)

**Geography, BS**

In addition to the university-wide general education requirements, candidates for a BS degree in geography must complete the following with a minimum GPA of 2.00 for courses that fulfill requirements under the first two bulleted items.

- 28 credits in geography, including 16 credits of core courses GEOG 102, 103, 300, 310, and 415 (GEOG 103 fulfills the university requirement in social science); and 12 credits of systematic (GEOG 301, 303, 304, or 305) and regional courses at the 300 level or above. (Some of the regional courses fulfill the college-level, non-Western culture requirement.)
- 18 or more credits as a sequence of geographical applications courses, including GEOG 311, 411, 412, 416 or 463; and 6 additional credits of geography electives, which may also include an internship (GEOG 480) approved by the program advisor before enrollment
- 25 or 26 credits of required science, mathematics, statistics, and computer science courses, including GEOL 101, 102, and 317 (12 credits); or BIOL 103, 104, and 377 (11 credits, fulfills the university general education requirement in natural science); MATH 113 and 114 (8 credits, fulfills the university quantitative reasoning requirement); STAT 250 (3 credits); and IT 103 (3 credits, fulfills the university information technology proficiency requirement)

#### Minor in Geography

To receive the minor, students must complete 18 credits in geography, 8 credits of which must be unique to the minor, with a minimum GPA of 2.00, distributed as follows:

- 6 credits of GEOG 101 (fulfills the university requirement in global understanding); or GEOG 103 (fulfills the university requirement in social science) and GEOG 102 (nonlaboratory natural science credit)
- Four courses (12 credits) at the 300 and 400 level, including one systematic course (GEOG 301, 303, 304, 305, 306, or 309) and one regional course (GEOG 315, 316, 320, 325, 330, or 380)

#### Minor in Geographic Information Systems

To receive this minor, students must complete 18 or 19 credits in geography beyond the prerequisite of GEOG 102 or 103, with a minimum GPA of 2.00:

- Four required courses (12 credits): GEOG 110, 300, 311, 463
- Two elective courses (6–7 credits) chosen from GEOG 310, 411, 412, 416

With departmental permission, one course with significant geographic information systems (GIS) content may be substituted for one of the above. Eight credits of course work must be unique to the minor. For policies governing all minors, see the Academic Policies chapter of this catalog.

#### Writing-Intensive Requirement

The university requires all students to complete at least one course designated as “writing intensive” in their majors at the 300 level or above. Students majoring in geography fulfill this requirement by successfully completing GEOG 415.

#### Teacher Licensure

Students who wish to become teachers should consult the College of Education and Human Development chapter and attend an information session early in their undergraduate career. For more information, call 703-993-2892, e-mail gseadmit@gmu.edu, or go to gse.gmu.edu.
Global and Environmental Change, BS

This interdisciplinary undergraduate program, one of the first of its kind in the nation, distinguishes itself from other degrees in the natural sciences in that it examines, from local, regional, and global scales the dynamics of Earth’s systems and their interactions: the geosphere, the atmosphere, the hydrosphere, and the lithosphere. In addition, it emphasizes the dynamic and changing Earth systems and the use of Earth observing and remote sensing and related geoinformation technologies in detecting changes. It is jointly offered with the Department of Environmental Science and Policy (ESP) (esp.gmu.edu).

Through the course work listed below, Global and Environmental Change majors satisfy university-wide general education requirements in natural science, quantitative reasoning, information technology, global understanding, social science, and synthesis:

- Six required core courses in global and environmental change (22 credits): EOS 121–122 or EVPP 110–111; plus EOS 353; EOS 305 or GEOL 305; GEOG 300 or BIOL 312; and EOS 304
- Four required courses in geosphere and atmosphere (13 credits): GEOL 101(4) or PHYS 243–244 (4); plus three courses from EOS 310, 312, 320; GEOG 309, 399; GEOL 317, 306, 309, 303; EVPP 490
- Four required courses in ecosphere and sociosphere (12 credits): GLOA 101 or GEOG 101 or CEIE 100; and GEOG 103 or ANTH 135; and BIOL 371 or EVPP 377; and one from BIOL 318, BIOL 345, EOS 322, EOS 306, EVPP 336, EVPP 337, EVPP 350, EVPP 449 or GEOG 303
- Two required courses in the applications and techniques of detecting global change (6 credits): choose two from EOS 303, 354, 410, 455, 495, GEOG 412, 416, 463, GEOL 303
- Two required supporting sciences sequence courses beyond the general education requirements (8 credits): CHEM 211, 212 (8); or PHYS 243–244 (3–1), 245–246 (3–1); or ASTR 111–112 (4), 112–114 (4); or GEOL 101–102 (8); or BIOL 103–104 (8)
- Four required supporting mathematics and IT courses (14 credits): MATH 113 & 114 (8), STAT 250/IT 250 (3), IT 103 (3)
- General electives (27–31 credits)

In meeting the above requirements, students may choose a focus in environmental or global change.

Graduate Programs

Earth Systems Science, MS

This interdisciplinary master’s program is offered jointly with the Department of Environmental Science and Policy. The program addresses the growing demand for trained professionals in Earth systems science and applications. The degree emphasizes a research-oriented, global systems approach to studying the atmosphere, hydrosphere, and lithosphere, including their interrelationships and interactions with the biosphere. Emphasis is on the observation and quantitative analysis of Earth systems. Students completing the program are qualified to pursue careers that require knowledge of the basics of Earth systems science and the requisite tools. Students are encouraged to undertake an optional master’s thesis for more in-depth studies or a research project. In the latter case, students must pass a comprehensive exam.

Admission Requirements

Applicants should have a BS degree in Earth, environmental, or physical science. Previous course work should include two semesters each of calculus, chemistry, and physics, and one semester of statistics. They should have a minimum GPA of 3.00 in their undergraduate degree. To apply, prospective students should forward a completed Mason graduate application, two copies of official transcripts from each college and graduate institution attended, a current résumé, and an expanded goals statement to the COS Graduate Admissions Processing Center. Applicants should also include three letters of recommendation and an official report of scores obtained on the GRE-GEN. The GRE-SUB is recommended if it is given in the student’s undergraduate major. The GRE requirement will be waived if the student holds a master’s degree from a U.S. institution. TOEFL scores are required of all foreign applicants.

Degree Requirements

Candidates must successfully complete 30 credits as follows:

- 9 credits of Earth science core: CSI 655; EOS 656 and 657
- 3 credits of Earth observation courses: EOS 753 or GEOG 579
- 3 credits of quantitative techniques courses: CSI 654, EOS 754 or GEOG 585
- 3 credits of human and biological perspectives courses: one of EOS 704; EOS 721; EVPP 577, 636; GEOG 575
- 3 credits of colloquium or seminar: EOS 792 and EOS 900
- 3–6 credits of research: EOS 798 or 799
- General electives

Geographic and Cartographic Sciences, MS

The focus of this program is to prepare students for careers in geography, remote sensing, and GIS and its increasing applications in diverse fields, as well as cartography, visualization, and modeling. This expertise is useful to civil and defense federal agencies, state and local government agencies, private corporations, and educational institutions. Courses concentrate on the techniques of compilation, display and analysis of spatial data, and their applications. Students are also encouraged to select internships as part of their program. More than 400 of our alumni from this program have entered employment in the Washington, D.C., area since 1978.

Research Facilities

The department’s laboratories house SUN workstations, PCs, and Macs with multiple input and output devices to support ARCGIS, ARCMAP, ARCVIEW, IDRISI, ERDAS, and other cartography, GIS, and image-processing software packages. In addition, the department houses an extensive collection of spatial data in different formats. Enriching the program is a network of alumni, students, guest lecturers, and adjunct faculty who work in geography-related organizations in the greater Washington, D.C., area. Specialized instructional space for geographic information science is housed in In-
novation Hall on the Fairfax Campus. The department also is home to the Center of Excellence in GIS.

Admission Requirements
In addition to meeting all admission requirements for graduate study at Mason, applicants should have a bachelor’s degree in geography, cartography, or equivalent. Applicants without an undergraduate degree in geography may be required to take one course in each of the following: physical geography, human geography, and cartography. All applicants must have a course in statistics. The program also requires GRE aptitude scores, three letters of recommendation, transcripts of all college course work, and a statement of interest in the degree. Credit from courses taken at other departments and other universities may be applied to the program with prior approval.

Degree Requirements
Students must complete 30 graduate credits to include 3 to 6 credits of thesis or 36 graduate credits without a thesis. If the nonthesis option is selected, students are required to pass a comprehensive exam.

- Four required courses (12 credits)
  - GEOG 553 Geographic Information Systems
  - GEOG 579 Remote Sensing
  - GEOG 585 Quantitative Methods
  - GEOG 680 Seminar in Thought and Methodology
- 12–15 credits (thesis option) or 24 credits (nonthesis option) of elective courses in geography
- 3–6 credits of thesis (thesis option)
- Comprehensive exam (nonthesis option)

Electives should be selected in consultation with an advisor. With departmental approval, up to 9 credits from closely related disciplines may be applied to the degree.

Graduate Certificate in Geographic Information Sciences

This graduate certificate prepares students for employment in federal, state, and local government positions that require GIS skills. Graduates have typically been employed in major mapping programs of the Department of the Interior and in the related land management agencies at the federal and state level. The certificate has been found suitable for the needs of business and industry, including those corporations that serve as contractors to governments in the United States and overseas.

Admission Requirements
Applicants should submit an application for graduate studies and must meet all requirements for graduate study at Mason. All applicants should have a working knowledge of, or prior education or training in, computer technology. Knowledge of GIS, remote sensing technology, and cartography are preferred. Students from any discipline are welcome to apply, but students with a background in one of the physical sciences (atmospheric science, hydrology, or geology), geography, environmental science, or engineering are particularly well-suited to undertake this program.

Students with no knowledge of geospatial technology are required to take GEOG 550 prior to admission to the program.

Program Requirements
Students must successfully complete 15 graduate credits, distributed as follows:

- 9 credits of required core courses: GEOG 553 or CEIE 510, GEOG 563 or EOS 771, GEOG 653
- 6 credits of electives chosen from GEOG 505, GEOG 531, GEOG 556, GEOG 655, GEOG 664, EOS 772, 773; CEIE 685; INFS 614, 755, 795

Other courses may be used as electives with prior written approval of the department.

Graduate Certificate in Geospatial Intelligence

This graduate certificate program is for persons employed in geospatial intelligence applications (i.e., federal agency and/or corporate or association personnel) or those interested in entering this field. Our program offers fundamental knowledge on geospatial intelligence and the ability to apply this knowledge to a diverse range of constantly evolving geospatial intelligence situations.

Admission Requirements
Applicants to this graduate certificate program should hold a BA or BS degree in a discipline related to the certificate’s theme from an accredited university with a minimum GPA of 3.00. Applicants must submit a completed Mason graduate application, along with official transcripts, résumé, Virginia domicile classification form, and TOEFL scores if they are foreign nationals. GRE scores and letters of recommendation are not required but will considerably strengthen an application, if available.

Applicants should have undergraduate backgrounds that include courses in differential and integral calculus, and they should possess working knowledge of a computer programming language. Depending on the background of the individual student, the coordinator may recommend remedial or preparatory courses tailored to the student’s needs. Students may not pursue this certificate concurrent with any other graduate degree programs or certificates offered by COS (because this certificate will charge students a differential tuition rate). However, students enrolled in academic programs outside COS may enroll in this certificate program concurrently. Students may transfer no more than 3 credits into the certificate program with the approval of the academic director.

Program Requirements
The Geospatial Intelligence (GI) certificate requires a total of 18 credits, or 6 courses. These comprise five mandatory core courses and one elective. The mandatory core courses reflect the three key science concentration areas (CA) of this program, namely geospatial image analysis, spatial analysis, and information technology, as reflected in the following list:

Mandatory core courses:

- EOS 684 Select Topics in Geospatial Intelligence
- EOS 685 Capstone Course in Geoinformatics
- EOS 758 Earth Image Processing (CA: image analysis)
- GEOG 553 Geographic Information Systems (CA: spatial analysis)
- INFS 590 Program Design and Data Structures (CA: information technology)
Graduate Certificate in CERG-RSIP
Remote Sensing and Earth Image Processing

The Certificate in Remote Sensing and Earth Image Processing Program focuses on the skills needed to take advantage of the enormous increase in the availability and use of remotely sensed data related to the Earth. The certificate requires students to complete 15 credits of EOS graduate courses. Ideal candidates for this certificate are those who have a background in Earth and environmental sciences and are working in or planning to enter into the field of remote sensing, Earth observing, or image processing.

This professional certificate program charges students at a differential (premium) tuition rate, with an additional $100 per credit added to the standard Mason graduate tuition. This rate applies to all students who enroll in this certificate program, regardless of in-state or out-of-state status. The differential tuition will be used to fund continuing improvements in the departmental computational facilities used to support the certificate program.

Admission Requirements

Applicants should hold a BA or BS degree in a discipline related to the science and applications of remote sensing from an accredited university, with a minimum GPA of 3.00. Applicants should have some prior education or training in remote sensing or image processing. Students with a background in one of the physical sciences (physics, chemistry, atmospheric science, hydrology, or geology), geography, or environmental science will be particularly well-suited to undertake this program. Applicants should have an undergraduate background that includes courses in differential and integral calculus, and they should possess working knowledge of a computer programming language. To apply, prospective students should forward a completed Mason graduate application, two copies of official transcripts from each college and graduate institution attended, and a current résumé to the COS Graduate Admissions Processing Center. TOEFL scores are required of all international applicants.

Program Requirements

Required Core Courses:
- EOS 740 Hyperspectral Imaging Systems
- EOS 753 Observations of the Earth and Its Climate
- EOS 757 Techniques and Algorithms in Earth Observing and Remote Sensing
- EOS 758 Digital Processing of Remote Sensing Imagery

Elective Courses (one of the following or another course approved by coordinator):
- EOS 754 Earth Observing/Remote Sensing Data and Data Systems
- EOS 756 Physical Principles of Remote Sensing
- EOS 760 Remote Sensing Applications
- EOS 840 Hyperspectral Imaging Applications
- GEOG 562 Photogrammetry
- GEOG 580 Digital Remote Sensing

Earth Systems and Geoinformation Sciences, PhD

The innovative PhD in Earth Systems and Geoinformation Sciences (ESGS) Program is based on the integration of the scientific disciplines in geosystems, geosciences, and geography, with the two slightly more technology-oriented scientific disciplines in geoinformation sciences, remote sensing, and geographic information systems (GIS). Graduates from the ESGS doctoral program will be qualified to serve as lead scientists in a wide range of activities involving geosciences, geography, GIS, and remote sensing.

The continual expansion of the NASA Earth observation satellite constellation, the development and expansion of the geospatial data infrastructure at federal agencies, and the need to analyze these Earth-oriented data to achieve environmental and economic objectives ensure a constant need in the foreseeable future for qualified scientists in these fields. Students receive broad-based training in the geosciences and geography, as well as concentrated courses in computation and geoinformation sciences.

The ESGS doctoral program represents a gateway to an academic career for some students; for others, it facilitates career advancement in the public sector or private industry. Graduates are equipped to participate in interdisciplinary research, which is the norm in today’s research arena. In addition, students also receive training in teaching, qualifying them to join academic units in more traditional disciplinary and instruction-oriented settings or in multidisciplinary programs.

Admission Requirements

This program is intended for graduates who hold a BS or BA degree in atmospheric science, climatology, meteorology, Earth science, geology, environmental science, remote sensing and Earth observing, hydrology, oceanography, geography, or a related field with a minimum GPA of 3.00. Applicants should have knowledge of calculus and a working proficiency with a computer programming language.

Knowledge of mathematics through ordinary differential equations is preferred. Interested applicants should contact the academic coordinator or the ESGS chair for more specific advice. To apply, prospective students should forward a completed Mason graduate application, two copies of official transcripts from each college and graduate institution attended, a current résumé, and an expanded goals statement to the COS Fairfax Campus Graduate Admissions Processing Center.

Applicants should also include three letters of recommendation and an official report of scores obtained on the GRE-GEN. The GRE-SUB is recommended if it is given in the student’s undergraduate major. The GRE requirement for admission to the doctoral programs will be waived if the student holds a master’s degree from a U.S. institution. TOEFL scores are required of all international applicants.

Degree Requirements

The curriculum consists of 72 credits: 48 credits of course work and 24 credits of dissertation research. The 48-credit requirement may be reduced by up to 30 credits for a qualified student holding a previous master’s degree. Up to 24 credits of previous, relevant graduate course work may be transferred into the program as long as those credits have not been applied toward a previous degree. The curriculum is organized into the four areas of emphasis listed below:

- Geosciences (GSC)
- Geography (GEOG)
- Remote sensing and Earth observation (RS)
- Geographic information systems (GIS)
Students may select one of the four areas listed above, or they may opt to develop a curriculum that combines elements from two or more areas, subject to the program director’s approval. All students are required to select courses from a set of three core areas: computational-quantitative, geosciences-geography, and geoinformation. Additional requirements include courses in the area of emphasis, a single credit of colloquium taken three times, and electives relevant to the student’s focus.

In recognition of the diverse interests in this scientific area, students are given considerable flexibility to construct their curriculum under the guidance of a faculty advisor. To provide the desired level of flexibility and encourage interdisciplinary education and research, the following seven program elements are required:

- 6 credits of computational-quantitative core courses
- 6 credits of geosciences-geography core courses
- 6 credits of geoinformation sciences core courses
- 6 credits of emphasis courses
- 3 credits of colloquium (1 credit, taken three times)
- 21 credits of electives
- 24 credits of dissertation research

For a complete list of various courses in each category, go to cos.gmu.edu or esgs.gmu.edu.

All students will be assigned a temporary academic advisor when they first enroll in the program. No later than the end of the second year, each student should identify a dissertation advisor and form a doctoral committee. After completing all required courses, each student must take a candidacy exam administered by the dissertation committee.

The exam will have written and oral components. Its purpose is to determine whether the student has acquired adequate general knowledge in the selected subject area, as well as much more detailed knowledge of the specific research topic planned for the dissertation. After students have completed all required courses and passed the candidacy exam, they should prepare an acceptable dissertation proposal. After the dissertation proposal is approved, the student is formally advanced to doctoral candidacy. The degree will be awarded on completion of the required course work and approval of a PhD thesis that makes an original and significant contribution to the field.

PhD Studies in Other Programs

The department participates in other programs that provide opportunities for geographical research. A popular example is the Environmental Science and Public Policy PhD Program where faculty members serve as both dissertation committee members and chairs. Geographic studies fit well with many issues related to public policy, planning, conservation, and sustainable development. Program description and degree regulations are listed under the Department of Environmental Science and Policy.

The department also participates in the Public Policy PhD Program, along with some of the university’s leading geographers who are members of the School of Public Policy. In addition, geography faculty members provide joint supervision and serve as committee members to support those pursuing research primarily geographic in nature. Program description and degree regulations can be found under the School of Public Policy listing. Several departments participate in supervisory committees providing a rich opportunity for students to expand their interdisciplinary interests with these departments.

Mathematical Sciences

Phone: 703-993-1460
Web: math.gmu.edu

Faculty

Professors: Alligood, Colonna, Fischer (chair), Kulesza, B. Lawrence, J. Lawrence, Levy, Morris, Polyak, Sachs, Saperstone, Sauer (COS Distinguished Scholar), Shapiro (undergraduate coordinator), Singman, Soltan, Walnut (graduate coordinator)

Associate professors: Anderson, Gabel, Goldin, Kiley, Lamba, Lim, Lin, Sander, Seshaiyer, Wanner, Zoltak

Assistant professors: Agnarsson, Emelianenko, Griva, Napoletani

Adjuncts: Chouikha, Crain, Hiles, Lightbourne, Manigault, Morris, Moumen, Nefessi, Perencevich, Roberts, Shaw, Surina, Taylor, Wallace, Zampedro

Admin professional: O’Brien

Term instructors: Crossin, Goldman, Granfield, Matveev, Nuttall, O’Beirne, Orlova-Shokry

Affiliates: Loutstaunau, Peterson

Emeritus: Cabell

The department offers undergraduate and graduate degree programs in mathematics for students with various interests and career goals. Students may pursue the standard program or pursue a program focused on either actuarial mathematics or applied mathematics. Students may complement other interests by taking a double major in mathematics and a related field, such as chemistry, economics, physics, computer science, or engineering.

Graduating seniors are required to have an exit interview.

Course Work

The Mathematical Sciences Department offers all course work designated MATH in the Course Descriptions chapter of this catalog.

UNDERGRADUATE PROGRAMS

- Mathematics, BA
  BA-MATH

In addition to satisfying university-wide general education requirements and requirements for the BA degree in COS, students must present the following:

- 26 credits of required MATH courses: MATH 113, 114, 125, 203, 213 or 215, 214 or 216, 290, and 322
- 12 credits of electives in MATH numbered above 300
- CS 112 is recommended.

The above courses satisfy the university-wide requirement in quantitative reasoning. A maximum of 6 credits of grades below 2.00 in course work designated MATH may be applied toward the major.

- Mathematics, BS
  BS-MATH

Students may select an optional concentration in actuarial mathematics (AMT) or applied mathematics (ACTM). Stu-
Students who do not select a concentration study traditional mathematics. In addition to satisfying the university-wide general education requirements for the BS degree, students majoring in mathematics must present the following. (These courses satisfy the university-wide requirement in quantitative reasoning and natural sciences. A maximum of 6 credits of grades below 2.00 in course work designated MATH may be applied toward the major.)

- Mathematics core requirements: MATH 113, 114, 203, 213 or 215, 214 or 216, 290, and 322
- Science, accounting, and economics requirements:
  - For all students, a one-year sequence of a laboratory science selected from one of the following:
    - BIOL 213, and 303 or 304
    - CHEM 211 and 212
    - GEOL 101 and 102
    - PHYS 160, 260, 261
  - Computational requirement: 4 credits of CS 112 for all students; for students in the actuarial concentration, 3 credits of STAT 362
  - Program and concentration-specific requirements

Departmental Nonmathematical Requirements
- Students with no concentration or those with the applied mathematics concentration must select a second year of science from one of the following three options: a second sequence from the list above; 6 credits from more advanced courses in biology, chemistry, geology, or physics (but only courses acceptable for credit toward a natural science major); or the 4-credit option PHYS 262, 263.
- Students with an actuarial concentration must have 3 credits of ACCT 203 and 6 credits of economics, including ECON 103 (3 credits) and either ECON 306 or 310, or FNAN 321. (The Economics Department has agreed to waive ECON 104 as a prerequisite for ECON 306 for mathematics majors.)

Mathematical Requirements
- Students with no concentration must have 24 credits of MATH (MATH 125, 315, 316, and 321 or 431) and 12 credits of course work above MATH 300.
- Students with an applied mathematics concentration must have 24 credits of MATH (MATH 125, 315, 351, 413, 414, and 446) and 6 credits of course work above MATH 300.
- Students with an actuarial concentration must also have 24 credits of MATH (MATH 351, 352, 551, 554, 555, 556) and 6 credits from MATH 441, 442, or 446.
- The department recommends proficiency in French, German, or Russian.

General Comments
For math majors:
- MATH 105, 106, 108, 110, 111, 112, 271, and 272 cannot be used as substitutes for any requirements of the major in mathematics.

For nonmath majors:
- MATH 108, 110, and 111 are designed for students in the social and behavioral sciences.

- Liberal arts majors are advised to take MATH 106, 110, or 111.
- Students in the natural sciences who plan to do graduate work are advised to add courses from MATH 313, 314, 351, 352, 382, 441, 442, 446, and 447.

For both majors and nonmath majors:
- MATH 105, 106, 108, 110, 111, 112, 113 have a qualifying score on the Math Placement Test as a prerequisite. The Math Placement Test is given frequently; for the schedule, inquire at the department office or check the Mason website.
- Students who do not achieve the necessary test score needed to take a math course may go to the Math Learning Center (see below), or they may study and retake the test on their own. If they do not complete the relevant program in the Learning Center or do not achieve the necessary score after retaking the test, they are dropped from the course. Depending on their test scores, students who do not place into MATH 113 will be advised to take MATH 105 or visit the Math Learning Center to prepare for MATH 105.
- MATH 105 does not fulfill the university quantitative reasoning requirement.
- Students may not receive credit for both MATH 214 and 216; both MATH 213 and 215; both MATH 351 and STAT 344; and both MATH 352 and STAT 345.
- After receiving a grade of C or better in one of the courses listed below on the left, students may not receive credit for the corresponding course on the right:
  - MATH 113 MATH 105 or 108
  - MATH 351 or STAT 344 MATH 108
  - MATH 441 MATH 111
  - MATH 125 MATH 112

Writing-Intensive Requirement
Mason policy requires all students to complete at least one course designated as “writing intensive” in their majors at the 300 level or above. Students majoring in mathematics fulfill this requirement by successfully completing MATH 290.

Minor in Mathematics
To receive a minor in mathematics, students must complete 21 credits that include a total of 8 hours of math that are not applied toward the major. These courses must have a minimum GPA of 2.00, distributed as follows:
- five required courses (15 credits): MATH 125, 203, 213 or 215, 214 or 216, and 290
- 3 credits from any math course that requires MATH 290 as a prerequisite
- One elective course in math at the 300 or 400 level, or STAT 344.

Students must earn a 2.00 or better in MATH 290 and the courses chosen to fulfill the second requirement.

Minor in Mathematics for School of Management Students
To receive this minor, students must complete 20 credits with a minimum GPA of 2.00, including MATH 113, 114, 203,
Mathematics, Bachelor’s/Accelerated Master’s Degree

This five-year degree program allows academically strong students to obtain a BS and MS by successfully completing 144 credits within five academic years and one summer. Well-prepared students are admitted to this program on completion of 90 credits, take selected graduate courses during their senior year, and are able to use up to 6 graduate credits to partially satisfy requirements for the undergraduate degree. On completion of that degree and with satisfactory graduate-level performance (3.00) in graduate courses, students are given advanced standing in the master’s program and complete an additional 24 credits to receive the master’s degree. All other master’s degree requirements must be met.

GRADUATE PROGRAMS

| Mathematics, MS | MS-MATH |

The Department of Mathematical Sciences offers courses in pure and applied mathematics leading to the master of science degree in mathematics. The program offers a standard mathematics program and an emphasis in computational and applied mathematics.

Assistantships

A limited number of merit-based teaching assistantships are available for students taking at least 6 graduate credits each semester. Other sources of support, such as research assistantships, are available as funding permits. Graduate students also have the opportunity to work in the Math Tutoring Center and Math Learning Center.

Admission Requirements

In addition to fulfilling admission requirements for graduate study, applicants must submit three letters of recommendation. GRE scores are not required.

Students intending to pursue the MS degree must have taken an upper-division course in advanced calculus (equivalent to MATH 315) and an upper-division course in linear algebra (equivalent to MATH 322). Students intending to go into the computational and applied mathematics emphasis must have some computer knowledge.

Degree Requirements

Standard Program

In addition to fulfilling degree requirements for graduate study, students must complete 30 credits distributed as follows:

- 6 credits of MATH 621 and 675
- Six approved graduate courses (18 credits), at least four of which are MATH. All six courses must be approved by the student’s advisor. Courses not listed as MATH courses must be approved by the Graduate Committee. Different rules apply if the student wishes to count graduate actuarial courses toward his or her degree (see below).
- Research and creative component (see below)

Emphasis in Computational and Applied Mathematics

The emphasis in computational and applied mathematics provides students with the analytical skills and background in computational techniques most relevant to the needs of business, industry, and government. The large number of high-technology firms, telecommunications firms, and government laboratories in the Washington, D.C., metropolitan area gives students an opportunity to gain practical experience and secure employment after graduation.

In addition to fulfilling degree requirements for graduate study, students must complete 30 credits distributed as follows:

- 12 credits of MATH 621, 675, 677 or 678, and MATH 685
- Four approved graduate courses (12 credits), at least two of which are MATH courses. All four courses must be approved by the student’s advisor. Courses not listed as MATH courses must be approved by the Graduate Committee.
- Research/creative component (see below)

Research and Creative Component

A student may fulfill the research and creative component of the MS degree in any one of the following three ways:

- Thesis Option. In preparation for this option, the student must form a committee comprising a chair and two other faculty members. The chair and at least one other member must be from the department; one member may be from a related field.

The student completes a thesis under the direction of the committee chair. The thesis work is typically completed while students are registered for 6 credits of MATH 799. A thesis proposal and thesis are submitted in accordance with university rules. The student must give an oral defense of the thesis to the committee and the Mason community at large. Students are expected to respond to questions on the thesis and related material. The committee determines whether the defense is satisfactory.
• Paper presentation option. In preparation for this option, the student must form a committee comprising a chair and two other faculty members. The chair and at least one other member must be from the department; one member may be from a related field. The student gives an oral presentation of a paper (or series of papers or book chapter) chosen in consultation with the chair of the committee and approved by the full committee. The chosen material must be distinct from work done in fulfillment of course requirements. Students choosing this option take 6 additional credits of electives. The oral presentation is given to the committee and the Mason community at large. Students are expected to respond to questions on the paper and related material. The committee determines whether the defense is satisfactory.

• Preliminary exam for the PhD. The research and creative component of the MS degree can be fulfilled by passing the preliminary written examination for the PhD degree (see below).

Graduate Certificate in Actuarial Sciences

The certificate in actuarial sciences is designed to serve students and professionals in the Washington, D.C., area who are interested in pursuing careers as actuaries. The course content provides students with specific training related to the Society of Actuaries (SOA) Exam FM (formerly Course 2), SOA Exam M (formerly Course 3), SOA Exam C (formerly Course 4), VEE for applied statistics (formerly part of Course 4), and Exam EA-1 and EA-1A (for those pursuing EA designation from the U.S. Treasury). The courses also provide a solid foundation for the corresponding Casualty Actuary Society (CAS) exams. Preparation for the first exam is achieved in meeting the prerequisites for the certificate courses in the area of probability and statistics.

Admission Requirements

In addition to fulfilling admission requirements for graduate study, applicants must submit three letters of recommendation. GRE scores are not required.

Students intending to pursue a certificate in the actuarial sciences must have three semesters of calculus, a course in linear algebra (equivalent to MATH 203), a calculus-based course in probability (equivalent to MATH 351), and statistics (equivalent to MATH 352). Completion of the SOA Exam P is also sufficient preparation for the certificate program.

Requirements

Students must complete six courses (18 credits): MATH 551, 554, 555, 556, and two courses chosen from MATH 653, 654, or 655 (MATH 655 is recommended only for students who wish to pursue a career as a pension actuary). Substitutions for the elective courses may be made with approval of the Graduate Committee. The graduate certificate course work provides preparation for SOA and CAS exams as follows. MATH 551 is the SOA VEE for Applied Statistics and is preparation for part of the CAS Exam 3. MATH 554 covers all of the SOA Exam FM material (as well as CAS Exam 2). MATH 555, 556, and 653 cover all of the Exam M material and much of the CAS Exam 3 as well as the EA1 exam.

MATH 654 covers most of the SOA Exam C material (as well as CAS Exam 4). MATH 655 covers all of the EA2-A Exam material and some of the SOA Exam 8.

Counting Actuarial Courses for Other Mathematics Degrees

A student enrolled in the certificate program in actuarial sciences and another graduate degree program in mathematics can count actuarial mathematics courses toward that degree according to the following rules:

• None of the actuarial mathematics courses MATH 551, 554, 555, 556, 653, 654, and 655 can count toward the PhD degree in mathematics.

• None of the actuarial mathematics courses MATH 551, 554, and 655 can count toward the MS degree in mathematics.

• Up to four of the actuarial mathematics courses MATH 555, 556, 653, and 654 can count toward the MS degree in mathematics provided that all other courses counted toward that degree are MATH courses. An exception can be made if the student wishes to count only one actuarial mathematics course from the list toward the MS degree. In this case, at most one other non-MATH course can be counted toward the degree with approval of the graduate coordinator.

Counting Actuarial Courses toward the Statistical Sciences MS Degree

A student enrolled in the certificate program in actuarial sciences and in the MS program in statistical science can count MATH 555 and 556 as approved non-STAT elective courses and can count MATH 653 and 654 as STAT electives when designing a curriculum for this degree. The full curriculum should be designed in consultation with the student’s Statistics Department advisor.

Certificate in College Teaching

A student enrolled in the MS or PhD program in mathematics who is primarily interested in pursuing a career in undergraduate education at the college level is encouraged to consider enrolling in Higher Education Program’s Certificate in College Teaching, offered through the College of Humanities and Social Sciences (LA-CERG-CTCH). Students must complete 18 credits as follows: CTC 602, 603, 604 or 605 (or equivalents with a specific disciplinary focus), 685, and 6 credits of CTC 650 (practice) by working one semester as a graduate teaching assistant in the Mathematics Department.

Mathematics, PhD

The Department of Mathematical Sciences offers a PhD in mathematics. The program begins with graduate course work and advanced seminars and culminates in a thesis consisting of original research in mathematics. The PhD program in mathematics is designed to train students as research mathematicians for careers in academia, government, and private industry.

Fellowships and Assistantships

The Department of Mathematical Sciences offers a limited number of merit-based teaching assistantships. Other sources of support, such as research fellowships and assistant-
ships, are available as funding permits. Graduate students also have the opportunity to work in the Math Tutoring Center and the Math Learning Center.

**Admission Requirements**

It is expected that all applicants have a recent bachelor’s degree in mathematics or an equivalent amount of undergraduate mathematics preparation, with a GPA of at least 3.00 in their last 60 credits of study. Students without this background who have had an upper-division course in linear algebra (equivalent to MATH 322), an upper-division course in advanced calculus (equivalent to MATH 315), and familiarity with basic group theory (such as presented in MATH 321) are encouraged to apply to the MS program in mathematics. Such students may subsequently apply to the PhD program when all background issues have been addressed. It is recommended that all applicants have some familiarity with mathematical software.

To apply, prospective students should forward a completed Mason graduate application, two copies of official transcripts from each college and graduate institution attended, three letters of recommendation, and a goals statement to the COS Fairfax Campus Graduate Admissions Processing Center. TOEFL scores are required for all international applicants. GRE scores are recommended but not required.

**Degree Requirements**

The program requires 72 credits beyond the baccalaureate degree, with a minimum of 48 credits in course work and 12–24 credits of dissertation research. For those holding master’s degrees, the 72 required credits may be reduced by up to 30 credits, depending on graduate courses completed. Students must complete the following curriculum requirements:

- **Core courses**: 12 credits in MATH 621, 631, 675, and 677
- **Seminar (MATH 795)**: 6–9 credits
- **Preliminary written exam based on material in three core courses**
- **Qualifying exam**
- **Dissertation proposal and research**: 12–24 credits of MATH 998 and 999

All PhD students are required to take a 1-credit seminar (MATH 795) each semester. A student entering without a master’s degree in mathematics should expect to take a total of 8 to 9 credits of MATH 795. Portions of the preliminary written exam may be waived with approval of the graduate coordinator if the student enters the PhD program with a master’s degree in mathematics. Graduate mathematics courses taken elsewhere may be counted toward the degree either as transfer credit or through reduction of credit. Classes at the 500 level and actuarial classes MATH 653, 654, and 655 cannot be used for credit toward a PhD in mathematics.

**Preliminary Written and Qualifying Exams**

Students are required to take a preliminary written exam after completing the core courses, usually by the end of their second year. The exam is based on material presented in three of the four required courses (the student may choose which topic to exclude). These exams are offered two times a year. Students may take the exam as often as they like. A grade of “pass” on the preliminary written exam is sufficient to satisfy the creative component of the master’s degree in mathematics.

Students are required to take a qualifying exam after passing the preliminary written exam. This exam will have oral and written components. After passing the preliminary written exam, the student chooses a dissertation advisor and a three-person examination committee. In consultation with the advisor and committee, the student chooses a major and a minor area of study (the major and minor areas are presumed to be in two different branches of mathematics). The qualifying exam will cover the equivalent of approximately four courses of material from the major area and three courses from the minor area.

**Dissertation and Committee**

Approximately one semester after passing the qualifying exam, each doctoral student prepares a written dissertation proposal while taking MATH 998 (Doctoral Dissertation Proposal). The proposal must be approved by the thesis committee, which consists of the three qualifying exam committee members, plus a fourth member from outside the department. After successfully completing this requirement, the student advances to doctoral candidacy.

After advancing to candidacy, the student will work on a doctoral dissertation while enrolled in MATH 999. The dissertation is a written piece of original mathematics that demonstrates a doctoral candidate’s mastery of the subject matter. A student is expected to produce new and original research worthy of publication in a peer-reviewed journal. After the thesis is completed, the committee will review the thesis and examine the student in a public oral thesis defense.

**Molecular and Microbiology**

Phone: 703-993-1050
Web: gmu.edu/departments/mmb

**Faculty**

**Chair**: Willett

**Professors**: Bailey (distinguished), Chandhoke, Liotta, Petricoin, Popov, Sofer (distinguished university), Willett

**Associate professors**: Baranova, Christensen, Fryxell, Grant, Royt

**Assistant professors**: Cox, van Hoek, Wu

**Term assistant professors**: Beck (associate chair), Coss, Cupo, Fondufe, Kocache, Madden, Polayes

**Research professor**: Isbister

**Research assistant professor**: Popova

**Adjunct faculty**: McClintock, Tondi

**Affiliate faculty**: Anderson, Burgess, Connors, Cook, Dressick, Edmiston, Frank, Gunasinghe, Hearing, Hicks, Hunt, Karginov, Kulesh, Liu, McCreight, Monroe, Niemeyer, Patrick, Reilly, Schultz, Singh, Volfchikina, Wilhelmson, Wu

**Course Work**

The department offers all course work designated BIOL, BIOS, and MITCH in the Course Descriptions chapter of this catalog.

**UNDERGRADUATE PROGRAMS**

The bachelor degree programs in biology provide a sound liberal arts education with substantial experience in quantitative and analytical thought, along with preparation for a related profession. In addition to ensuring the strong background
necessary for graduate study in the many fields of biological science, the broad range of courses available at Mason allows students to develop careers in many areas, including secondary school teaching, environmental management, microbiology, molecular biology, biotechnology, genetics, and natural history. Alternatively, students may prepare for postgraduate studies in medicine, dentistry, veterinary medicine, wildlife management, fisheries biology, or marine science. The department also offers a BS in medical technology. Additional information can be found at the Molecular and Microbiology Department’s web site at gmu.edu/departments/MMB or by contacting the department, David J. King Hall, Room 3005, 703-993-1050.

Advising
All biology majors are strongly urged to see an academic advisor regularly to help them plan their schedule, so they can graduate on time. Biology majors should see an advisor for permission to register prior to their first semester and again as they complete 60 credits and 90 credits. Medical technology majors must see the medical technology advisor to obtain permission to register each semester. Call 703-993-1050 or visit David J. King Hall, Room 3005, to make an advising appointment.

Residence Requirement for Transfer Students
Students majoring in biology are required to complete 16 credits in the major at the 300 and 400 levels at Mason in addition to meeting the university residency requirement of at least 30 credits at Mason.

■ Biology, BA

In addition to satisfying the university-wide general education requirements and the requirements for a BA degree in COS, students must complete the following credits with a minimum GPA of 2.50 in the 32 credits of BIOL courses and a minimum GPA of 2.00 in the supporting courses listed below. No more than 8 credits of 100-level BIOL courses (103, 104, 124, 125) may be applied toward the 32 credits of required BIOL courses. (Through the course work below, biology majors satisfy the university-wide requirements in natural science, quantitative reasoning, and information technology proficiency.)

- 32 credits of biology, including BIOL 213, 303, 304, 305, 306, 307, 311, 492 or 494
- 8 credits of chemistry: CHEM 103, 104 or 211, 212
- 6 credits of STAT 250 and IT 103
- 6 credits from the following: ASTR 103, 111, 113; GEOL 101, 102; PHYS 243, 245

Students expecting to enter graduate or professional school are strongly urged to complete MATH 113 and 114. Organic chemistry and PHYS 243, 244, 245, and 246 are recommended.

■ Biology, BS

In addition to satisfying the university-wide general education requirements for the BS degree, students must complete the following course work with a minimum GPA of 2.50 in the 44 credits of BIOL courses and a minimum GPA of 2.00 in the supporting courses listed below. No more than 8 credits of 100-level BIOL courses (103, 104, 124, 125) may be applied toward the 44 credits of required BIOL courses. (Through the course work below, biology majors satisfy the university-wide requirements in natural science, quantitative reasoning, and information technology proficiency.)

- 44 credits of biology, including BIOL 213, 303, 304, 305, 306, 307, 311, and 492 or 494
- 13 credits of chemistry: CHEM 211, 212, 313, 315
- One of the following options:
  - CHEM 314 and 318 (5 credits)
  - One chemistry course at the 300 or 400 level (3 credits)
  - GEOL 101 and 102 (8 credits)
- 8 credits of physics: PHYS 243, 244, 245, 246
- At least 6 credits from the following: MATH 110, 111, 113, 114, or STAT 250
- 3 credits of computer skills: IT 103

Students are encouraged to consult with a biology faculty advisor to determine which option best meets their career goals. Students who wish to take biochemistry must take BIOL 483 to receive credit toward the major in biology. Students may choose to complete the requirements of one of the concentrations described below. Or, they may take biology elective courses of their choice to complete the requirement of 44 credits of biology.

▲ Concentration in Biotechnology (BT)

The biotechnology concentration consists of a selection of courses that provide essential skills to students who seek employment in the field or wish to include an applied component in their undergraduate training in biology.

In addition to satisfying the university-wide general education requirements for the BS degree, students majoring in biology with a concentration in biotechnology must complete the following. (Through the course work below, they satisfy the university-wide general education requirements in natural science, quantitative reasoning, and information technology proficiency.)

- 24 credits in biology, including BIOL 213, 303, 304, 305, 306, 307, 311

*Laboratories associated with courses are required.
**Subject to approval by program coordinator.
- 18 credits in chemistry, including CHEM 211, 212, 313, 314, 315, 318
- 8 credits of physics: PHYS 243, 244, 245, 246
- At least 6 credits from the following: MATH 110, 111, 113, or 114; or STAT 250
- 3 credits of computer skills: IT 103

▲ Concentration in Environmental and Conservation Biology (ESCB)

This concentration is offered to students seeking a biology degree that focuses on ecology and organismal biology, and prepares them for graduate work or employment in environmental and conservation fields, such as natural resources management, fisheries, forestry, water quality management, aquatic and wetland ecology, and conservation biology. The concentration is staffed and supported by the Department of Environmental Science and Policy.
In addition to satisfying university-wide general education requirements for the BS degree, students must complete the following. (Through the course work below, they satisfy the university-wide general education requirements in natural science, quantitative reasoning, and information technology proficiency.)

- **20 credits** in environmental and conservation biology, including BIOL/EVPP 377, 471; EVPP 318; a field course (either EVPP 350 or BIOL 345); and other courses chosen from the following: BIOL 309, 326, 331, 332, 333, 342, 344, 345*, 440, 472, 449; EVPP 350*, 415, 451; NCLC 401

*If not used for field course requirement.

- **13 credits** of chemistry, including CHEM 211, 212, 313, 315
- One of the following options:
  - CHEM 314 and 318 (5 credits)
  - GEOL 101 and 102 (8 credits)
- **8 credits of physics**: PHYS 243, 244, 245, 246
- **At least 6 credits** from the following: MATH 110, 111, 113, 114, STAT 250
- **3 credits of computer skills**: IT 103

**Concentration in Microbiology (MIB)**

This concentration offers lecture and laboratory courses in microbiology to prepare students for employment or advanced study in microbial genetics, physiology, diversity, and related fields.

In addition to satisfying university-wide general education requirements for the BS degree, students must complete the following. (Through the course work below, they satisfy the university-wide general education requirements in natural science, quantitative reasoning, and information technology proficiency.)

- **12 credits** in microbiology: BIOL 405, 406, 407
- **8 credits** in elective courses: BIOL 385, 402, 403, 404, 418, 452, 453, 459, 483, 506, 563, 580
- **18 credits** of chemistry, including CHEM 211, 212, 313, 314, 315, 318
- **8 credits** of physics: PHYS 243, 244, 245, 246
- At least **6 credits** from the following: MATH 110, 111, 113, 114, STAT 250
- **3 credits of computer skills**: IT 103

**Concentration in Molecular Biology (MOB)**

The molecular biology concentration provides basic knowledge of the structure of macromolecules, and chemical processes that occur in living cells. The concentration prepares students for employment or further advanced study in molecular biology.

In addition to satisfying university-wide general education requirements for the BS degree, students majoring in biology with a concentration in molecular biology must complete the following. (Through the course work below, they satisfy the university-wide general education requirements in natural science, quantitative reasoning, and information technology proficiency.)

- **12 credits in molecular biology**: BIOL 385, 482, 483, and 486
- **8 credits** of elective courses chosen from BIOL 322, 402, 403, 452, 453, 563, 568, 575, 580
- **18 credits** of chemistry, including CHEM 211, 212, 313, 314, 315, 318
- **8 credits** of physics: PHYS 243, 244, 245, 246
- At least **6 credits** from the following: MATH 110, 111, 113, 114, STAT 250
- **3 credits of computer skills**: IT 103

**Policy on Using Departmental Laboratories**

Only authorized experiments and exercises may be carried out in any departmental research or teaching laboratory and must be done under the supervision of a university faculty or staff member. No unauthorized work is allowed in any laboratory.

**Policy on Using Organisms in Classes**

Direct observations of actual organisms are considered an essential part of learning biology at all levels. Direct observations of organisms may involve the use of living or preserved specimens, dissections of organisms or parts of organisms, and microscopic examination of organisms or parts of organisms. All use of live animals conforms to National Institutes of Health guidelines for the use and care of laboratory animals. Activities specified above may be a required part of a course and thus serve as a basis for grading in the course. Any questions about the administration of this policy should be directed to the course coordinator or instructor.

**Writing-Intensive Requirement**

Mason requires all students to complete at least one course designated as “writing intensive” in their majors at the 300 level or above. Students majoring in biology fulfill this requirement by successfully completing BIOL 307. Students not taking BIOL 307 at Mason should consult the biology undergraduate coordinator for a course to fulfill this requirement.

**Honors Program in Biology**

**Admission Requirements**

Minimum requirements for invitation:
- GPA in biology courses must be 3.50 or better
- GPA in supporting requirements (math and other science) must be 3.00 or better
- Grade of B or better in Biol 213

Ideally, we would like to recruit students in their freshman or sophomore year.

**Retention Requirements**

Students in honors biology must maintain a biology GPA of 3.50 or better and a supporting GPA of 3.00 or better from the time they have accumulated 30 hours and thereafter.

Students who fall below this standard will be given a one semester probationary period in which to bring their GPA back up to the minimum standard.
Requirements to Graduate with Biology Honors
Students are required to take 6 to 7 credits in honors courses in BIOL including three semesters of BIOL 494 (honors seminar, 1 credit) or two semesters of Biol 494 and one semester of BIOL 493 (honors research, 1 credit).

The GPA requirements are as follows:
- Minimum 3.50 GPA in honors biology courses
- Minimum 3.50 GPA in biology requirements
- Minimum 3.00 GPA in supporting requirements
- Minimum 3.00 GPA overall

Minor in Biology
Candidates for the minor in biology must complete 19 to 20 credits in biology with a minimum GPA of 2.00, including BIOL 213, 303, 304, and either 307 or 311, in addition to one other 3- to 4-credit biology course at the 300, 400, or 500 level (not BIOL 301). Eight credits of course work must be unique to the minor. For policies governing all minors, see the Academic Policies chapter of this catalog.

Premedical, Predental, Prepharmacy, and Preveterinary Students
Web: prehealth.gmu.edu

Many students planning to enter medical, dental, pharmacy, veterinary, optometry, or other health professional schools choose to pursue a major in biology. These students should consult the health professions advising web site on required course work and overall preparation.

Teacher Licensure
Students who wish to become teachers should consult the College of Education and Human Development chapter of this catalog and attend an information session early in their undergraduate career. For more information, call 703-993-2892, e-mail gseadmit@gmu.edu, or go to gse.gmu.edu.

Biology for Nonmajors
Students who are not majoring in science or mathematics and wish to fulfill their natural science requirement with a two-semester laboratory sequence in biology should enroll in BIOL 103 and 104. With permission of the instructor, nonmajors may enroll in BIOL 213 and then take one of the following to complete the requirement: BIOL 303, 304, or 305/306. Chemistry, physics, and mathematics majors should consult their faculty advisor to determine which biology courses to take.

Medical Technology, BS — BS-MTCH

This program requires the equivalent of three years of full-time preprofessional study at the college level preceding a senior year of professional education in an affiliated school of medical technology. All affiliated schools are accredited by the National Accrediting Agency for Clinical Laboratory Sciences (NAACLS).

Responsibility for applying to schools of medical technology and gaining admission rests with the student; however, guidance is provided by the medical technology program director in the Molecular and Microbiology Department. Admission to medical technology schools is selective, so candidates should strive for strong academic standing. Students who fail to gain admission to a NAACLS-approved school are unable to complete the degree program. Such students may transfer to a biology major without loss of credits.

Application to medical technology schools should be initiated about a year before the desired entrance date. This fact, coupled with the large number of required courses in the preprofessional curriculum, makes it imperative that students in the program consult regularly with their faculty advisor. All medical technology majors and prospective majors are urged to enroll in MTCH 200 as early as possible. This course provides information on the profession, as well as the educational demands placed on candidates.

Students should be aware that the senior year spent off campus requires the following special interpretation of university policies. Transfer students must present at least 16 credits of 300- to 400-level biology or chemistry course work taken at Mason. Students may present no more than 6 credits of D grades in biology and chemistry courses required in the three years of preprofessional study. No unsatisfactory grades may be presented for courses in the senior year of professional study. Transfer students entering with more than 45 transfer credits are often unable to complete the preprofessional phase of their program in the usual three years of full-time study.

Senior students are registered at the university through special procedures. For details, consult the program director.

In addition to satisfying university-wide general education requirements for the BS degree and completing MTCH 200, candidates must present the following courses in their preprofessional programs with a minimum GPA of 2.00. (Through the course work below, majors satisfy the university-wide general education requirements in natural science, quantitative reasoning, and information technology proficiency.) Because of the extensive professional education requirements stipulated by NAACLS, students majoring in medical technology are exempt from the university-wide general education requirement in the fine arts.

- Biology: minimum 20 credits, including BIOL 213, 303, 305, 306, 311, 452, and 453
- Chemistry: minimum 18 credits, including CHEM 211, 212, 313, 314, 315, and 318
- Mathematics: minimum 6 credits (STAT 250 recommended; MATH 106 not applicable)
- Computer skills: IT 103

Students are encouraged to elect additional basic science courses during their preprofessional years. Recommended courses are BIOL 380, 465, 483, 484, and 485; CHEM 321; and PHYS 243, 244, 245, and 246.

Professional study during the senior year involves clinical education at an affiliated school of medical technology. Thirty credits of course work are required, including MTCH 401, 402, 403, 404, 405, and 406. The distribution of credits in these courses varies with the school of medical technology. No more than 30 professional credits may be applied toward the degree.

Medical Laboratory Technician Articulation Program

A special program is available for Medical Laboratory Technicians (MLTs) who are graduates of associate degree programs. This program provides substantial credit for the scientific and clinical aspects of the associate degree but requires students to meet clinical requirements for national...
certifying exams through approved work experience. For details, contact the program director.

**Major in Medical Technology as a Second Bachelor’s Degree**

While the standard program for medical technologists is three years on campus followed by a fourth year at a clinical affiliate (3 + 1), many students elect to complete a bachelor’s degree before entering the clinical program (4 + 1). Students who have completed a BS in biology or chemistry at Mason and then undertake a fifth year at a clinical affiliate may be eligible for a second bachelor’s degree with a major in medical technology. Students wishing to receive the second degree must apply before entering their fifth year. For further information, contact a medical technology advisor.

**Premedical Honor Society**

Alpha Epsilon Delta Zeta Premedical Honor Society is a national student support group, providing professional school tours, educational programs, and lectures on health topics and the professional school admissions process to students interested in such health-related fields as medicine, dentistry, optometry, and veterinary medicine. Active membership is awarded to students who have completed at least three semesters with a minimum scholastic GPA of 3.00. Associate membership is also available.

**Predental Society**

Mason students who are interested in pursuing careers in dentistry are encouraged to participate in the Predental Society. This student organization organizes supplemental programming focused toward dentistry as a career.

**Biology, Bachelor’s/Accelerated Master’s Degree**

Qualified undergraduates may be admitted to an accelerated master’s program and obtain both a BS and an MS within an accelerated time frame. This program is open only to those students who wish to pursue the master’s degree concentrations in microbiology or molecular biology. Students admitted to this program may take graduate courses after completing 90 undergraduate credits, and up to 6 credits of graduate work may be used in partial satisfaction of the requirements for the undergraduate degree. If students earn at least a 3.00 in these classes, they are granted advanced standing in the master’s program and must then complete an additional 24 credits to receive the master’s degree. All other master’s degree requirements must be met, including a minimum of 18 credits taken for the master’s after the bachelor’s degree is complete.

Students with an overall GPA of at least 3.00 may apply for provisional acceptance to the accelerated master’s program after completing BIOL 213, 303, 304, 305/306, 307, and 311; and CHEM 315 and 318; or after completing 75 undergraduate credits including BIOL 494. Three letters of recommendation, including one from a prospective thesis or project advisor, are required.

After completing 120 credits and all requirements for the bachelor’s degree, students are awarded a bachelor’s degree. Accelerated master’s students must then submit scores on the GRE and biology subject exam to have the provisional qualifier removed. Ordinarily, students should receive a minimum combined score of 1,100 on the verbal and quantitative portions of the general test and be in at least the 50th percentile on the subject exam.

**GRADUATE PROGRAMS**

**Biodefense, MS, PhD**

The interdisciplinary graduate degrees in biodefense are offered by the College of Science and the College of Humanities and Social Sciences (LA-MS-BIOD, LA-PHD-BIOD). For details, see the CHSS chapter in this catalog.

**Biology, MS**

This program provides advanced training for college graduates or professionals seeking careers in the biotechnology industry or biodefense, as well as more traditional careers in biomedical research, teaching, evolutionary biology, and animal biology. Master’s level concentrations are available in molecular biology, microbiology and infectious disease, bioinformatics and computational biology (BCB), and systematics and evolutionary biology. Alternatively, students may choose the program in biological sciences, which allows flexibility to specialize in additional areas.

**Admission Requirements**

Applicants must have a bachelor’s degree in biology or its equivalent, except for students who choose the BCB concentration. Students who choose the BCB concentration must have an undergraduate degree in any natural science, mathematics, engineering, or computer science. It is preferred that students who choose the BCB concentration have some undergraduate course work in cellular biology, molecular biology, genetics, and biochemistry (two to four upper-division courses), plus some undergraduate course work in computer science (two to four courses that include substantial programming projects). Students without this background may be asked to remedy their deficiencies. Students who choose the concentration in microbiology and infectious disease must have a lecture and lab course in microbiology and a lecture course in biochemistry. All MS concentrations require a GPA of 3.00 in biology course work or in the last 60 credits of undergraduate study is required. Students must also submit three letters of recommendation and scores on the GRE. Successful applicants usually score at least 1,100 on the verbal and quantitative sections of the GRE (1,200 for the BCB). Applicants to all concentrations except BCB must submit scores on the GRE subject exam in biology or biochemistry. Applicants to the BCB concentration must submit a GRE subject score in an area of their choosing (such as mathematics, computer science, physics, biology, or biochemistry). Admission is contingent on acceptance by a faculty research advisor.

**Degree Requirements**

An advisory committee and the student work together to develop a program of study that best fits the student’s background and interests. At least one member of the committee must be a member of the Molecrular and Microbiology Department. The student must submit a program of study to the program director for approval within the first 12 credits of graduate work and must complete at least 30 graduate credits.

Students have the option to write a thesis (3 to 6 credits of BIOL 799) or project (1 to 3 credits of BIOL 798). According to Mason graduate policies, the same quality of work is expected of students regardless of their chosen option; that is,
the MS thesis option or the MS project option. In general, the MS thesis is most appropriate for students planning or considering a research career. The MS project is most appropriate for students who have scheduling commitments, such as a full-time job, that may preclude performing a complete series of laboratory experiments. The requirements differ primarily at the conclusion of the project, when students pursuing the project option must successfully complete written and oral comprehensive exams. Students pursuing the thesis option must write a formal thesis that meets the requirements of the graduate school, as well as defending their thesis and presenting their results in a public seminar.

Students in the molecular biology, microbiology and infectious disease, and the bioinformatics and computational biology concentrations are required to present one research paper at the Departmental Journal Club meeting any time before graduation.

Program in Biological Sciences
This program is for students who wish to specialize in an area not covered by the concentrations described below.

Requirements
2–3 credits of BIOL 690 or BIOS 702
2 credits of BIOL 692 or 695
1–6 credits of BIOL 798 or 799
19–25 credits of electives in BIOL, BIOS, or related areas as approved by the student’s advisor

▲ Concentration in Bioinformatics and Computational Biology (BCB)

Requirements
2–3 credits of BIOL 690 or BIOS 702
2 credits of BIOL 692 or 695
1–6 credits of BIOL 798 or 799
3 credits of BIOL 580 or BINF 630
3 credits of BINF 634
3 credits of BIOS 741
2–4 credits in molecular techniques (see below)
5–15 credits in BIOL, BIOS, or related areas as approved by the student’s advisor, graduate committee, and the program director

▲ Concentration in Microbiology and Infectious Disease (MID)

Requirements
2–3 credits of BIOL 690 or BIOS 702
2 credits of BIOL 695
1–6 credits of BIOL 798 or 799
3 credits of BIOL 669 Pathogenic Microbiology
3 credits of BIOL 715 Microbial Physiology
3 credits of BIOL 718 Techniques in Microbial Pathogenesis
3 credits of BIOL 563 Virology
7–13 credits of electives to be chosen from the following:
BIOL 564 Techniques in Virology (2 credits)
BIOL 553 Advanced Topics in Immunology (3 credits)
BIOL 682 Advanced Eukaryotic Cell Biology (3 credits)
BIOL 720 Microbial Metabolism (3 credits)
BIOS 743 Genomics, Proteomics, and Bioinformatics (3 credits)
BIOS 710 Current Topics in Bioscience (1–3 credits)

▲ Concentration in Molecular Biology (MOB)

Requirements
2–3 credits of BIOL 690 or BIOS 702
2 credits of BIOL 695
1–6 credits of BIOL 798 or 799
4 credits of BIOL 583
6 credits of BIOL 568, 682
3 credits of BIOL 579 or BIOS 767
2–4 credits in molecular techniques (see below)
3 credits in bioinformatics (BIOL 580, BINF 630 or 634)
7 credits of electives in BIOL, BIOS, or related areas as approved by the student’s advisor, graduate committee and program director

▲ Concentration in Systematics and Evolutionary Biology (SEB)

Requirements
2–3 credits of BIOL 690 or BIOS 702
2 credits of BIOL 692 or 695
1–6 credits of BIOL 798 or 799
3 credits of BIOL 574
3 credits of BIOL 579 or BIOS 767
2–4 credits in molecular techniques (see below)
3–4 credits in organismal biology
5–14 credits of electives in BIOL, BIOS, or related areas as approved by the student’s advisor

Molecular Techniques Requirement
Students may satisfy the molecular techniques requirement with BIOL 668 or BIOS 740. Special topics courses, such as BIOL 575 or 691, may be approved for this requirement by the program director but only in semesters in which they are primarily a laboratory course with substantial content of techniques in molecular biology.

Recommended Electives
The following list, for students in molecular biology, bioinformatics, and computational biology, is provided as a suggestion only and is not intended to be complete. Note that two courses covering substantially similar topics may not both be counted in the student’s course plan. Students should consult their faculty research advisor when preparing a course plan.

BIOL 553, 568, 575, 578, 579, 583, 585, 682, 793
BIOS 740, 741, 742, 743, 744, 767

■ Biosciences, PhD

This program is a research-oriented field of study that prepares students for significant contributions in academic or industrial settings. The area of emphasis in functional genomics and biotechnology includes microarray analysis of gene expression, sequencing and analysis of genes, gene family evolution, mechanisms of toxicology and mutagenesis, and biotechnological applications. The concentration in microbiology and infectious disease stresses molecular mechanisms of infectious disease, genomic and proteomic analysis of pathogens, and the physiology and metabolism of pathogens. The academic component is a three-tiered structure. The first tier provides a set of four core courses designed to advance research skills across all disciplines. The second tier comprises four or five core courses and elective courses. The first two tiers are designed to be completed in approximately two
years, including the comprehensive exam. Only on completion of these requirements, the comprehensive exam, and a successful thesis proposal can the students advance to candidacy status. The third tier focuses on research and culminates in a dissertation.

**Admission Requirements**

In addition to materials required of all applicants for graduate study, the following is also required:

- Minimum 3.25 GPA in previous course work with significant training in the biological sciences. A TOEFL score of 575 on the paper-based exam or 230 on the computer-based exam is required of international students.
- Three letters of recommendation from faculty members or individuals who have firsthand knowledge of the applicant’s academic or professional capabilities.
- Statement of purpose consistent with the research interests of at least one faculty member in the program.
- Scores on GRE taken within the past five years prior to date of application submission.

An interview may be required. Applications should be submitted by February 1 for fall admission. Under unusual circumstances, applications may be considered for spring admission if they are received by October 1. Applications will be considered until positions are filled. Students are encouraged to meet application deadlines to be considered for scholarships and stipends. Strong candidates who lack several prerequisites may be admitted to provisional status. Removal from provisional status and continuation in the program is contingent on earning a GPA of 3.25 in the program’s fundamental courses, plus completion of missing prerequisites.

Students who have not taken a course in basic biochemistry will be required to complete one prior to BIOS 701.

**Degree Requirements**

Candidates for the PhD in biosciences must complete a minimum of 72 graduate credits.

- **Core courses:** 12 credits in BIOS 701, 702, 703, 704.
- **Emphasis or concentration:** 12–16 credits required courses (see below).
- **Elective:**
  - Two presentations at departmental Journal Club.
  - Qualifying exam.
  - Dissertation: 12–24 credits in proposal (BIOS 998) and research (BIOS 999).

On admission to the program, each student is assigned an advisor from the bioscience faculty. The advisor may be changed by mutual consent of student and advisor, or petition to the program director and dean. With their advisor, students adopt an individual program that focuses on a specific area of research.

By the end of the fourth semester of course work, students assemble a dissertation committee of four graduate faculty members with representation from at least two academic departments. The committee and the program director approve the program of study.

On nearing completion of course requirements, students take a qualifying exam with a written and an oral component. At the discretion of the committee, the written qualifying exam may be retaken once if the student’s performance was deemed below satisfaction. On successful completion of the qualifying exam, the majority of all course work, and an accepted thesis proposal, students will be recommended for advancement to candidacy by the committee and the program director.

After advancement to candidacy, students are eligible to enroll in dissertation (999). Students must present their dissertation results to their graduate committee on a regular basis until graduation. For graduation, students will present their results to their graduate committee and defend their dissertation publicly.

For students entering the doctoral program with a master’s of science degree, the number of credits required may be reduced by a maximum of 30 with approval of the advisor and the program director. Graduate credits taken previously and not used toward another degree may be transferred, subject to the approval of the advisor, the program director, and the dean.

Students in the doctoral program are required to present two research papers at the departmental Journal Club meeting any time before graduation.

**Emphasis in Functional Genomics and Biotechnology**

This emphasis prepares students for significant contributions in an academic or industrial research career. Areas of emphasis include microarray analysis, cancer genomics, molecular studies of disease mechanisms, and biotechnology.

**Requirements**

All students must take the following 15 graduate credits as their emphasis courses:

- BIOS 740 Current Lab Methods in Functional Genomics and Biotechnology
- BIOS 741 Genomics
- BIOS 742 Biotechnology
- BIOS 743 Genomics, Proteomics, and Bioinformatics
- BIOS 744 Molecular Genetics

Electives may include graduate-level courses relevant to the student’s research and authorized by the student’s advisor and program director.

▲ **Concentration in Microbiology and Infectious Disease (MID)**

Students in this concentration will be prepared for employment in academia, government, or industry. By stressing mechanisms of pathogenicity, physiology, metabolism, and genomics of pathogens, students will have a firm foundation for future research in infectious disease. Students will also be introduced to advanced laboratory practices, such as animal research methodologies and biocombustion laboratory work.

**Requirements**

In addition to the degree requirements stated previously, students are required to take the following:

- BIOL 563 Virology
- BIOL 669 Pathogenic Microbiology
- BIOL 715 Microbial Physiology
- BIOL 720 Microbial Metabolism
- BIOL 718 Techniques in Microbial Pathogenesis

Electives to complete 72 credits

To be chosen from BIOL 553, 564, 568, 578, 579, 580, 682, BIOS 710, 740, 741, 742, 743, 744, 760, 898, 899; or EVPP 551 or BINF 633, 636, 705
Neuroscience

**Neuroscience, BS**

The interdisciplinary undergraduate program in neuroscience is offered by the COS and the College of Humanities and Social Sciences (CHSS). For details, see the CHSS chapter in this catalog.

**Neuroscience, PhD**

The interdisciplinary doctoral program in neuroscience is offered by the COS, CHSS, and the Krasnow Institute for Advanced Study.

The program focuses on the complexity of the human brain and addresses the challenge of developing an integrative understanding of human cognition and higher brain function. In response to this challenge, the rapidly developing field of neuroscience has produced an exponential increase in the amount of data available to investigators as they develop new theories of brain function and new hypotheses to test. The main objective of the program is to prepare students to participate at the cutting edge of this exciting field in academia, industry, and government. The program provides students with a rich interdisciplinary intellectual environment that fosters the development of the skills they will need to successfully pursue research careers.

Current faculty research focuses on the broad areas of behavioral, anatomy, physiology, biochemistry, molecular biology, computational modeling, and informatics. External research collaborations exist with federal agencies, private and not-for-profit corporations, and other universities. The scope of research ranges from the subcellular and molecular level (in the context of such phenomena as drug addiction and the biological basis of schizophrenia) to the systems and behavioral level (including cognitive studies on great apes in collaboration with Great Ape Trust of Iowa).

Current research projects include the effects of drugs and alcohol on behavioral and neurological development, cellular organization and connections of sensory processing areas in fish, plasticity mechanisms supporting network formation and information processing, cellular and subcellular models of associative learning, biochemical dynamics in disorders of the basal ganglia, computational methods for simulation of complex biological systems, role of metals in memory and Alzheimer’s disease, dynamical behavior of neurons and networks of neurons, and adaptive control for stabilization of epilepsy.

**Admission Requirements**

Applicants should have a bachelor’s degree in a relevant field and undergraduate courses in chemistry, cell biology, and integral calculus. Admission requires a minimum GPA of 3.25 in undergraduate work and acceptable GRE scores. In addition, applicants must submit a statement of purpose consistent with the research interests of at least one faculty member in the program and the names of two faculty members who may be suitable as advisors or supervisory committee members. To apply, prospective students should forward to the COS Fairfax Campus Graduate Admissions Processing Center a completed Mason graduate application, two copies of official transcripts from each college and graduate institution attended, a current résumé, and a statement of purpose. Applicants should also include three letters of recommendation and an official report of scores obtained on the GRE-GEN. The GRE-SUB is recommended if it is given in the student’s undergraduate major. TOEFL scores are required of all international applicants.

**Degree Requirements**

The curriculum consists of 72 credits: 48 credits of course work and 24 credits of dissertation research. The 48-credit requirement may be reduced by up to 30 credits for a qualified student holding a previous master’s degree. Up to 24 credits of previous, relevant graduate course work may be transferred into the program provided those credits have not been applied toward a previous degree. Additional requirements for graduation include a dissertation and at least one publication (in print or in press) in a refereed journal.

Two areas of emphasis are included in the program: behavioral, anatomical, and molecular neuroscience, and theoretical, computational, and physiological neuroscience (TCP). All students will follow almost the same curriculum for the first two years, although emphasis prerequisites may vary slightly. For example, students in the TCP emphasis must have basic knowledge of integral calculus. It is expected that the selection of elective thesis topics will vary widely between the two areas of emphasis; however, students will be allowed to mix and match electives from both areas, with guidance and consent from the advisor or program director.

The courses, seminars, and laboratory rotations and readings (comprising a total of 48 credits) are organized as follows:

- Core science: NEUR 604, 611, 702
- Core neuroscience: NEUR 601, 602, 603, 701
- 9 credits of rotations and readings: NEUR 703
- 24 credits of dissertation research: NEUR 998, 999
- 17 credits of electives
- 1 credit of seminar: NEUR 709

When course work is nearing completion, students should form a doctoral committee and have their thesis proposal ready to defend. Candidacy exams include written and oral components. After passing the candidacy exam and receiving committee approval of the dissertation proposal, students are advanced to doctoral candidacy. The degree will be awarded after completion of the required course work and approval of a PhD thesis that makes an original and significant contribution to the field.

**Physics and Astronomy**

Phone: 703-993-1280  
Web: www.physics.gmu.edu

**Faculty**

**Professors:** Aharonov, Becker*, Bialetan-Barojas*, Dvorzecka, Ehrlich (chair), Ellsworth, Kafatos, Lieb, Mishin, Satija, Summers, Trefil (Robinson Professor)  
**Associate professors:** Barreto, Ceperley, Rubin, Satyapal, Sauer, So, Wallin*  
**Assistant professors:** Cressman, Opher, Rosenberg, Tian, Tollakken*, Weigel*, Weingartner, Zhang*  
**Term associate professor:** Oerter  
**Term assistant professors:** Geller, Goldman, Iacozetti, Jazaeri, Wyczalkowski  
**Term instructors:** Ericson, Ewell  
**Emeriti:** Ceperley, Evans, Mielczarek  
**Research faculty:** Gliozzi, Meier, Poland, Richards

*These guest faculty hold primary appointments in other departments.
Course Work
The Physics and Astronomy Department offers all course work designated ASTR and PHYS in the Course Descriptions chapter of this catalog.

UNDERGRADUATE PROGRAMS

Astronomy, BS  BS-ASTR
The BS in astronomy prepares students for graduate school or one of the many careers in research or teaching positions, or employment in industry, business, or education fields where analytical skills and a scientific background are advantageous. Students who are considering a double major in the fields of mathematics, science, computer science, and engineering should talk to the undergraduate coordinator. Note that at least 18 credits used to fulfill an astronomy BS cannot be used to fulfill another major or minor. Some course substitutions are allowed for double majors, but these must be approved in writing in advance.

In addition to satisfying the university-wide general education requirements for the BS degree, students must complete a total of 39 credits in physics and astronomy and 17 credits in mathematics with a minimum GPA of 2.00. Through the course work below, astronomy majors satisfy the university-wide requirements in natural science and quantitative reasoning. Also, by taking ASTR 402, they satisfy the university’s writing-intensive requirement.

- Seven required core astronomy courses (21 credits): ASTR 103 or 113, 328, 402, 403, 404, 428, and 490
- Eight required physics courses (18 credits): PHYS 160, 161, 260, 261, 262, 263, 305, and 308
- Five required math courses (17 credits): MATH 113, 114, 213, 214, and 313 or 314
- 9 credits from the following (at least 6 credits must be in upper-level courses): ASTR 302, 401, 408, 409, 530, 535; CS 112; MATH 203, 446, 447; PHYS 121, 122, 123, 124, 251, 303, 307, 510, and 575, or any preapproved BIOL, CHEM, MATH, or PHYS courses

In meeting the above requirements, students may choose an area of emphasis. Students who wish to complete an emphasis should plan a program of study in consultation with their advisors. Some emphases listed below require more than 9 credits in the last category above.

Emphasis in Astrobiology
This emphasis prepares students for careers in research, teaching, or science journalism. Students must take BIOL 213, 305, and 506 (The Origin of Life), and complete a senior project (ASTR 408) or internship (ASTR 409).

Emphasis in Computational Astronomy
This emphasis prepares students planning for computation and information-related jobs in industry and government labs. Students must take 9 credits of the following: ASTR 401; PHYS 251 or 310; and MATH 446 or 447. In addition, they should complete a senior project (ASTR 408) or internship (ASTR 409).

Emphasis in Graduate School Preparation
This emphasis prepares students for graduate study in observational or theoretical astronomy. Student must take two courses from ASTR 530 or 535, and MATH 446. They should complete a senior project (ASTR 408) or internship (ASTR 409) in the specialty that they intend to pursue in graduate school.

Astronomy, BA  BA-ASTR
The BA in astronomy prepares students for a career in industry, business, science education, and science writing, where analytical skills and scientific background are necessary. This degree is not suitable for students who intend to pursue a graduate degree in astronomy.

Students in the fields of mathematics, science, computer science, and engineering who are considering a double major should discuss this option with the undergraduate coordinator. Some course substitutions are allowed for such majors, but they must be approved in writing in advance.

In addition to satisfying university-wide general education requirements for the BA degree, students must complete a minimum of 26 credits in physics and astronomy and 6 credits in mathematics, with a minimum GPA of 2.00. Through the course work below, astronomy majors satisfy university-
wide requirements in natural science and quantitative reasoning. ASTR 402 also satisfies the university’s writing-intensive requirement.

- Eight required core astronomy courses (20 credits): ASTR 111, 112, 113, 114, 301, 302, 402, and 490
- One of the following physics sequences:
  - PHYS 243, 245 (6 credits)
  - PHYS 160, 161, 260, 261, 262 (11 credits)
- One of the following mathematics sequences:
  - MATH 106, 108 (6 credits)
  - MATH 113, 114 (8 credits)
  - MATH 115, 116 (8 credits)

Electives (15 credits, at least 3 credits in upper-level courses) drawn from the following list (or with permission of the department and course instructor) from advanced ASTR, PHYS, or MATH courses: ASTR 390, 403, 408; PHYS 121, 122, 123, 124; CS 112; BIOL 103, 104, 213; CHEM 101, 102, 103, 104, 155, 156, 201, 202, 211; GEOL 101, 102.

**Note:** Students who take the 10-credit physics sequence and one of the 8-credit math sequences can count the additional 6 credits beyond required minimum credits toward elective credit in the major.

**Minor in Astronomy**

The minor requires completion of a physics prerequisite and 15 credits in astronomy, with a minimum GPA of 2.00. Eight credits of course work must be unique to the minor. The physics prerequisite consists of one of the two sequences: PHYS 243, 244, 245, 246, or PHYS 160, 161, 260, 261, 262, 263. After the introductory physics sequence, students are required to take ASTR 111, 112, 113, and 114, and two astronomy courses chosen from ASTR 301, 302, 328, 402, 403, 404, 428, and 530.

For policies governing all minors, see the Academic Policies chapter of this catalog.

**Physics, BS**

**BS-PHYS**

The BS in physics prepares students for graduate school and careers in business or industry. Students in the fields of mathematics, science, and engineering who are considering a double major in physics should discuss this option with the undergraduate coordinator. Note that at least 18 credits used to fulfill a physics BS cannot be used to fulfill another major or minor. Some course substitutions are allowed for double majors, but these should be discussed in advance.

In addition to satisfying the university-wide general education requirements for the BS degree, students must complete a total of 45 credits in the major and 20 in mathematics, with a minimum GPA of 2.00, distributed as follows. Through the course work below, physics majors satisfy the university-wide requirements in natural science and quantitative reasoning, and the intensive writing requirement by taking PHYS 407.

- Eleven required core physics courses (27 credits): PHYS 160, 161, 260, 261, 262, 263, 303, 305, 308, 402, and 407 (Students double majoring in engineering and physics may substitute ECE 305 for PHYS 305.)
- Six credits from PHYS 251, 306, 307, 405 or 406, 408 or 409, 416; and ASTR 328 or 428
- 12 credits from PHYS 121, 122, 123, 124; CS 112; or any approved upper-level physics, astronomy, chemistry, electrical engineering, or mathematics courses
- Six required math and statistics courses (20 credits): MATH 113, 114, 203, 213, 214, and 313 or 413; or STAT 344

In meeting the requirement for 6 credits outside the core, students have the option of electing an emphasis. The courses required for each emphasis are listed below. Students who wish to complete an emphasis should plan a program of study in consultation with their advisor.

**Emphasis in Applied Solid State Physics**

This emphasis is for students who wish to pursue a career in the semiconductor industry. To complete this emphasis, students should take the following courses: PHYS 512, and ECE 430 and ECE 431. In addition, students should complete a senior project (PHYS 408 or 409) or honors thesis (PHYS 405 and 406) in applied solid state physics.

**Emphasis in Astrophysics**

This emphasis is for students who wish to pursue a career that applies computers to the solution of physical problems and data analysis. To complete this emphasis, students should take at least 9 credits from the following courses: PHYS 428; ASTR 328, 404, 530, 532, 535; and MATH 446. In addition, students should complete a senior project (PHYS 408) or honors thesis (PHYS 405 and 406) on an astrophysics problem.

**Emphasis in Computational Physics**

This emphasis is for students who wish to pursue a career in electronics. To complete this emphasis, students should select four courses from the following: PHYS 412; ASTR 328, 404, 530, 532, 535; and ECE 442, and ECE 446. In addition, students should complete a senior project (PHYS 408) or honors thesis (PHYS 405 and 406) on a problem that involves using a computer for the solution of a physical problem.

**Emphasis in Medical Physics**

This emphasis is for students who wish to pursue a career in industry, applying a strong background in electronics to physical problems. To complete this emphasis, students should take at least 9 credits from the following courses: ECE 301, 333, 430, 431, and 433. In addition, they should complete a senior project (PHYS 408) or honors thesis (PHYS 405 and 406) on an electronics problem.

**Emphasis on Graduate School Preparation**

Although any of the options listed here provide the successful student with a fully adequate background to enter graduate school, this emphasis is for students whose career goals definitely include graduate work in physics. To complete this emphasis, students should take at least 9 credits from the following courses: PHYS 510, 512, 540; and ASTR 530, and a senior project (PHYS 408) or honors thesis (PHYS 405 and 406) in the specialty that they intend to pursue in graduate school.

**Emphasis in Medical Physics**

Physics majors generally have an excellent acceptance record in applying to medical, dental, or veterinary schools. Although there is no formal set of courses within physics that is uniquely suitable, students should meet with a physics advi-
sor and a health sciences advisor for information about the university’s Medical Sciences Advisory Committee. For more information, call 703-993-1050.

Because schools in the health sciences vary both in their philosophies and specific requirements, it is wise for students to become aware of such information well in advance of applying for admission. Although specific requirements vary, most programs do require applicants to complete at least one year of biology. Other requirements generally include organic chemistry (CHEM 313, 314, 315, and 318 or 320).

Emphasis in Physics Education

This emphasis is intended for students wishing to pursue a career teaching high school physics. The goal of the program is to allow students to receive a license to teach physics in Virginia secondary schools within 120 credits. In addition to the standard requirements for the physics major, students should enroll in 3 credits of directed study in physics laboratory instruction under PHYS 390. The students must also take the following education courses: EDUC 422, 472, EDCI 472, 473, 491, EDRD 419, and pass the Praxis I and II exams to qualify for the teaching license. EDCI 472 also satisfies the social and behavioral science general education requirement, and EDCI 491 satisfies the synthesis general education requirement.

Sample Schedule for Physics BS
(excluding general education courses)

**First Semester**
- MATH 113 Calculus I .............................................4
- ENGL 101 Composition ........................................3
- CHEM 211 or BIOL 213 ........................................3
- PHYS 122 Relativity .............................................1
- PHYS 123 Inside the Quantum World ....................1

**Second Semester**
- MATH 114 Calculus II ............................................4
- PHYS 160 University Physics I ..............................3
- PHYS 161 University Physics I Lab ........................1
- CS 112 Computer Science I ...................................4

**Third Semester**
- PHYS 251 Introduction to Computer Techniques ........3
- PHYS 260 University Physics II ................................3
- PHYS 261 University Physics II Lab ........................1
- MATH 213 Calculus III .........................................3

**Fourth Semester**
- PHYS 262 University Physics III ..........................3
- PHYS 263 University Physics III Lab ........................1
- MATH 214 Elementary Differential Equations ...........3

**Fifth Semester**
- PHYS 303 Classical Mechanics .............................3
- PHYS 305 Electromagnetic Theory ........................3
- PHYS/MATH elective
- MATH 313 Introduction to Applied Mathematics ........3
- ENGL 302 Advanced Composition ........................3

**Sixth Semester**

Honors Program in Physics

Physics majors who have maintained an overall GPA of at least 3.50 in physics courses and a GPA of 3.50 in all courses taken at Mason may apply to the departmental honors program when they complete the first semester of their junior year. To graduate with honors in physics, a student is required to maintain a minimum GPA of 3.00 in physics courses and successfully complete PHYS 405 and 406 with a GPA of at least 3.50 and a grade of at least A- in PHYS 406.

Alternative Introductory Sequence

Normally, students who intend to major in physics should take the physics introductory sequence (PHYS 160, 161, 260, 261, 262, and 263). Students who decide to major in physics after completing PHYS 243, 244, 245, and 246 may do so but only with written permission of the Physics and Astronomy Department. Those students are required to take at least 4 additional credits in approved physics courses.

Physics for Nonmajors

PHYS 243, 244, 245, and 246 are recommended for biology, geology, and premedical students, and mathematics students who seek a BA degree. PHYS 101, 102, 103, and 104 are intended for nonscience majors. PHYS 160, 161, 260, 261 or 265, 262, and 263 constitute a calculus-based sequence in general physics to be taken by physics and engineering majors, and chemistry, computer science, and mathematics students who are pursuing a BS degree. Students may receive credit for only one of the following three sequences: PHYS 243, 244, 245, 246; PHYS 103, 104; or PHYS 160, 161, 260, 261, 262, 263.

Minor in Physics

The minor requires 18 credits with a minimum GPA of 2.00, including PHYS 160, 161, 260, 261, 262, and 263, and any two courses from PHYS 303, 306, 307, 308, 402, 428, and 305 or 513.

Eight credits of course work must be unique to the minor. For policies governing all minors, see the Academic Policies chapter of this catalog.

Physics, Bachelor’s and Accelerated Master’s Program

This program allows academically strong undergraduates with a commitment to research to obtain BS and MS degrees by successfully completing 144 credits within five academic years plus summers their last two years. On completion, students are exceptionally well prepared for entry into a professional school or a PhD program in physics or a related discipline. Well-prepared students are encouraged to apply to this program after they complete 90 credits. Admitted students take selected graduate courses during their senior year (when they have successfully completed prerequisites) and are able to use up to 6 graduate credits in partial satisfaction of requirements for the undergraduate degree. On
completion of that degree and with satisfactory performance (3.00) in the graduate courses, students are given advanced standing in the master’s program and complete an additional 24 credits to receive the master’s degree. All other master’s degree requirements must be met. See the department for further details.

Research Opportunities

The department offers many opportunities for undergraduate students to get involved with research. Students should consult with faculty working on research of interest to them, based on their examination of the Physics Department web site.

Teacher Licensure

Students who wish to become teachers should consult the College of Education and Human Development chapter and attend an information session early in their undergraduate career. For more information, call 703-993-2078, e-mail gacline2@gmu.edu, or go to gse.gmu.edu.

GRADUATE PROGRAMS

Applied and Engineering Physics, MS

This degree contains elements of traditional physics programs and the application of physics to a diversity of critical societal problems. The program is divided into three areas of emphasis. The standard emphasis is intended for students who may wish to pursue further graduate study in physics leading to a PhD degree in preparation for a career in basic research. The applied physics emphasis is intended for those who wish to apply the techniques and subject areas of physics to multifaceted problems encountered in the workplace, particularly in physics, engineering, computational science, and other related areas. The engineering physics emphasis allows students to select a larger number of courses from electrical engineering or nanotechnology, and other areas.

Many courses are offered during late afternoon or evening hours to allow students with full-time employment to attend easily. Students employed at area high-technology organizations may take up to 6 credits (out of 30) for work done on the job under the guidance of a faculty member. This employment-related research may be conducted under an optional 3-credit research project or an optional 6-credit master’s thesis. Master’s students who are not employed full time may apply for financial aid or a limited number of research assistantships.

Admission Requirements

Individuals holding a baccalaureate degree in physics or a related field from an accredited institution and who earned a GPA of 3.00 (out of 4.00) in their last 60 credits are invited to apply for admission. If the baccalaureate degree is in a field other than physics, applicants should have taken several courses beyond the introductory physics courses, such as junior-level classical mechanics, electricity and magnetism, or electronics. Applicants may be required to make up one or two deficiencies, based on a graduate physics advisor’s assessment, and still be permitted to enroll in the program. Three letters of recommendation must be submitted, preferably from former professors. The general GRE and the GRE subject test in physics are recommended for applicants who received their baccalaureate degrees within the past five years. Those with less recent bachelor’s degrees may present a statement of their work experience in lieu of the GRE.

Degree Requirements

Candidates for the degree must successfully complete 30 credits in the categories shown below:

- 6 credits of required core courses: PHYS 684 and PHYS 685. For the applied and engineering physics emphasis, students may substitute PHYS 502 for PHYS 684 and PHYS 513 for PHYS 685.
- 15 credits described below for each emphasis:
  
  Standard emphasis: Students should take any five of the following courses: PHYS 510, 512, 533, 540, 575, 612, 613, 620, 676, 701, 705, 711, 785, 728, 784, and 736; ASTR 530, 761, 764, 765, and 766
  Engineering physics emphasis: Students should take PHYS 510, PHYS 533 and 9 credits of ECE graduate courses.
  Applied physics emphasis: Students should take PHYS 510 and 533, and any 9 credits from this list: ASTR 535, 660, 760; BINF 731, 740, 741; CLIM 710, 711, 712, 713, 714, 715, 750; CSI 660, 721, 722, 728, 763, 783; ECE 500, 521, 528, 548, 565, 584, 699; NANO 500, 510; PHYS 512, 540, 575, 585, 612, 613, 640, 660, 767, 736, 760
- 9 credits of electives chosen from courses in physics, chemistry, mathematics, engineering, information technology, and computational sciences and informatics. No more than 6 credits may be chosen from areas outside ASTR, CSI, ECE, NANO, and PHYS. Elective credits can include a project (PHYS 798) or thesis (PHYS 799). Students may choose to do either ECE/PHYS 798 Research Project (3 credits) or ECE/PHYS 799 Master’s Thesis (6 credits), but not both. The research project may be conducted at a student’s place of employment with the concurrence of a faculty advisor. The thesis is a more substantial piece of work performed under the supervision of a major professor and requires students to make an oral defense. ECE/PHYS 798 may be taken only once. No more than 6 credits of PHYS 799 may be applied to the degree. In addition to the requirements stated above, students may also select an emphasis in astrophysics, atmospheric physics, biological applications of physics, computational physics, condensed matter, instrumentation (engineering physics), or nonlinear dynamics. An emphasis requires that students complete 15 credits of approved courses. Students in the master’s degree program can earn a graduate certificate in computational techniques and applications from the Department of Computational and Data Sciences by choosing an approved sequence of courses.

A sample list of courses for various emphases:

- Astrophysics: PHYS 711; ASTR 530, 680, 701, 767
- Atmospheric physics: PHYS 510, 676; CLIM 710, 713; CSI 721
- Biophysics: PHYS 510, 630, 711; BINF 731; NEUR 751
- Computational physics: PHYS 510, 728, 736, 764, 780
- Instrumentation/engineering physics: PHYS 510, 533; NANO 500, 510; ECE 699
- Material physics: PHYS 784, 785, 711, 512, 614
- Nonlinear dynamics: PHYS 510, 701, 705; MATH 673; NEUR 751
- Physics: PHYS 784, 785, 701, 705, 711
Physics, PhD (pending SCHEV approval)

A PhD in physics is pending approval by the State Council of Higher Education in Virginia. If approved, the program would begin in fall 2008. Answers to frequently asked questions about the new program and its relation to the existing PhD in physical sciences can be found on the department web site: physics.gmu.edu. All doctoral students accepted into the physics PhD program take a common core of four courses. By working with the Dissertation Committee, a student may choose to specialize in an emphasis area such as astrophysics, biophysics, nonlinear physics, planetary sciences, material physics, space weather physics, or others according to his or her particular interests. By the end of their first year, all students will pair with a faculty advisor who will guide them toward candidacy.

Admission Requirements

Those holding a baccalaureate degree in physics or astronomy from an accredited institution, who earned a GPA of 3.00 (out of 4.00) in their last 60 credits, and received acceptable scores on the GRE-GEN are invited to apply for admission. Three letters of recommendation must be submitted, preferably from former professors. The GRE subject test in physics is recommended for all interested applicants who received their baccalaureate degrees within the past five years. A degree-seeking graduate applicant with a baccalaureate degree who has not met all admission requirements may be offered provisional admission if sufficient evidence is presented to suggest the applicant has the ability to pursue graduate work. For more details concerning admission requirements to George Mason University, please refer to the Graduate Admission Policies and Admission of International Students sections of this catalog.

Degree Requirements

All students in the physics PhD program must earn a minimum of 72 graduate credits. Of these, 48 are required course work and preliminary research credits, and 24 are doctoral dissertation proposal (PHYS/ASTR 998) and doctoral dissertation research (PHYS/ASTR 999) credits. For students entering the doctoral program with previous graduate work, the 48 credits of course work may be reduced by a maximum of 30 credits. The required 48 credits of course work are divided among core courses, physics and astronomy elective courses, and seminar. The 12 credits of core courses include PHYS 684, 685, 705, and 711. Note that doctoral candidacy (qualifying) examinations will be given on the topics covered in these core courses. The remaining 36 credits includes 3 credits of PHYS 703, a 1-credit seminar that is repeated three times, 6 credits of physics or astronomy specialty courses, and 27 credits of general electives, which may be chosen from physics and astronomy, or other related disciplines. These elective courses may include research credits (PHYS/ASTR 796, PHYS/ASTR 798) in preparation for the Doctoral Dissertation. These research courses may be repeated with the approval of the student’s advisor or Dissertation Committee in order to be applied toward the degree requirements.

Qualifying examinations. All students must successfully pass the qualifying examinations for the four core courses. The qualifying exam is offered twice per year and is divided into four sections corresponding to the four topics in the core courses (Quantum Mechanics, Electromagnetic Theory, Classical Mechanics, and Statistical Mechanics). Grades of “Pass” or “Unsatisfactory” will be given individually for the four separate sections of the exam. If students receive a grade of “Unsatisfactory” in a given section of the exam, they will be allowed to retake that section a maximum of two times. Students can choose to take a particular section or a combination of sections at one sitting, but they must successfully pass all sections by the end of their third year. Students entering the program with equivalent courses taken at another institution may satisfy the core requirement by taking the qualifying exam directly. There is a written and an oral component for each section of the qualifying exam. A student must satisfactorily pass both components of the exam. The oral component may be waived by unanimous consent of the Qualifying Examination Committee for exceptional performance on the written component. At the beginning of each academic year, the program director will appoint members to the Qualifying Examination Committee (typically from faculty who most recently taught the core courses), and the committee is responsible for the creation and grading of the qualifying exam to be offered in that year.

Advancement to candidacy. After the successful completion of the qualifying examination, a Dissertation Committee should be formed as soon as possible. This committee consists of a graduate faculty member (see the Graduate Faculty section in the catalog) from the Department of Physics and Astronomy and at least two other members of the graduate faculty, one of whom must be from outside the student’s department or degree program. The composition of the committee must be approved by the program director. Qualified individuals who are not members of the graduate faculty (i.e., faculty at another university) may serve on a dissertation committee with the approval of the program director and the associate dean for graduate programs. The Dissertation Committee is responsible for directing students in their chosen field of research. The Dissertation Committee should work with the student to select specialty courses and electives to form a cohesive program of study. Preliminary research credits (PHYS/ASTR 796 and PHYS/ASTR 798) can be taken as a part of the electives to prepare for the student’s dissertation. Advancement to candidacy implies that a doctoral student has demonstrated both breadth and depth of knowledge in the field of study and is capable of conducting research on the boundaries of knowledge. Before doctoral students may be advanced to candidacy by the dean, they will need to have had completed all required course work, passed the qualifying examinations, and been recommended by the Dissertation Committee. A doctoral student has six years from the time of first enrollment as a degree-seeking student to advance to candidacy.

Doctoral dissertation. After advancing to candidacy, doctoral candidates will work with the Dissertation Committee to formalize their preliminary research into a doctoral dissertation. The dissertation research should represent a significant contribution to its scientific field and should be deemed publishable in refereed scientific journals. A total of 24 credits in the following two courses must be taken: PHYS 998 or ASTR 998 Dissertation Proposal (0 to 12 credit hours), and PHYS 999 or ASTR 999 Doctoral Dissertation (12 to 24 credit hours). Note that before the student may enroll in PHYS/ASTR 999, the dissertation proposal must be approved by the Dissertation Committee and evidence of its approval sent to the dean for approval. Before that time, the student may enroll in PHYS/ASTR 998 (Dissertation Proposal). Students
working on their Doctoral Dissertation (999) must register for a minimum of 3 credits of 999 per semester (excluding summers) until they have completed the 12-credit minimum requirement for 999, after which they must register for 1 credit of 999 until the dissertation is completed and accepted. The dissertation must be defended in a public forum before the Dissertation Committee and other interested faculty. After the candidate successfully defends the dissertation, the Dissertation Committee recommends to the Graduate Faculty of George Mason University the awarding to the candidate the degree of doctor of philosophy in physics. Students have five years from the time of advancement to candidacy to graduate.

### Physical Sciences, PhD

**PHD-PSCI**

This interdisciplinary doctoral program is offered by the Department of Physics and Astronomy and the Department of Chemistry and Biochemistry. The degree focuses on preparing scientists to perform research either in the separate disciplines listed above or as members of interdisciplinary science teams, primarily involving astronomy, biophysical sciences, chemistry, and physics. The main emphasis is on theoretical, experimental, or laboratory research. The program is not intended to produce graduates who are scientific generalists; however, the areas of specialization often cut across traditional disciplines, as in the research fields mentioned above.

The degree is built on a foundation of several interdisciplinary courses that expose students to fundamental research problems in modern science and provide them with an introduction to each of the general physical areas that compose the degree (physics, chemistry, biochemistry and biophysics, and astronomy). The program curriculum, however, has been designed to provide enough flexibility to accommodate students seeking a fully interdisciplinary program, as well as those with interests more closely aligned with one of the traditional physical sciences disciplines. Students who are seeking a program with a heavy emphasis on computational methods may alternatively consider the doctoral program in computational sciences. This program includes concentrations in computational physics and in space sciences and computational astrophysics. See the Department of Computational and Data Sciences chapter for degree and admission requirements.

### Admission Requirements

The physical sciences PhD program is intended for students who have completed an undergraduate program of study in one of the physical sciences, have taken math to the level of differential equations, and are computer literate.

Applicants are expected to have a BS degree with a minimum GPA of 3.00 and acceptable GRE and TOEFL scores. The undergraduate degree should be in a scientific field, such as physics, chemistry, astronomy, mathematics, or engineering. Applicants with insufficient undergraduate records may be accepted provisionally and required to successfully complete selected remedial courses, some of which may not be applicable to the 48-credit total for the PhD course work requirement.

Interested students should submit a completed Mason graduate application, three letters of recommendation, official reports of GRE and TOEFL scores, and a goals statement reflecting their general research interests and career plans. Mason’s Educational Testing Service code is 5827.

### Degree Requirements

All students in the 72-credit physical sciences PhD program are required to take 48 credits of course work and 24 credits of dissertation research. For students entering the doctoral program with previous graduate work, the 48 credits of course work may be reduced by a maximum of 30 credits. Of the 48 credits of course work, 9 credits will consist of core courses to be taken by all students in the program, and at least 15 credits will be selected as part of a student’s contract with a three-member faculty committee (explained below). At least five of the contract core courses will be selected from the list presented below. Thus, the program consists of:

- 3 credits of PSCI 703 (a 1-credit course that must be repeated three times)
- a minimum of 15 credits of course work chosen as part of a contract
- up to 24 credits of electives (approved by committee)
- 24 credits of dissertation research

A three-member predissertation faculty committee will be formed by the student as soon as possible after admission but not later than after completion of the 9-credit core. The composition of the student’s committee must be approved by the program director. At this point, the student is expected to have selected a rather broad area of future research interest; typically, the area may not yet be specific enough to define an actual dissertation project.

Because students entering the program will have diverse backgrounds and goals and the program is explicitly designed to accommodate students preparing for a range of fields of research, it is not possible to have a completely standardized set of degree requirements. Instead, the student and his or her committee will decide on a set of at least five courses (15 credits) that will best meet the student’s goals and future research direction. This portion of the program will be set up in the form of a contract between the student and the committee. The contract will include courses that the student should take and books and articles that should be read. Fifteen of the contract credits must be chosen from the following list; however, no more than three classes can be taken in any one area, unless the student obtains special permission from the program director. Furthermore, no more than two classes at the 500 level can be selected.

- Astronomy courses: ASTR 530, 701, 766, 767
- Biochemistry and biophysics courses: CHEM 646, 660, 661, 662, 665
- Chemistry courses: CHEM 617, 625, 633, 641, 651
- Physics courses: 684, 685, 705, 784, 785
- Interdisciplinary courses: PHYS 510, 512, 533, 575, 701, 711; ASTR 660, 760, 765; CHEM 563, 564, 648, 667, 728, 732, 737

Students can choose their elective classes more widely, but these courses need to be approved by the faculty committee to be applied toward satisfaction of the degree requirements. As an example, a student planning to pursue interdisciplinary research in the general area of bioinorganic chemistry would form a committee headed by a bioinorganic scientist and would have a contract that probably required taking at least these five courses:

- CHEM 617 Organic Structural Spectroscopy
- CHEM 633 Chemical Thermodynamic and Kinetics
- CHEM 646 Bioinorganic Chemistry
- CHEM 660 Protein Biochemistry
- CHEM 662 Drug Design
The contract is an interactive document agreed to between the student and the committee. It can be revised, but any revisions must be approved by the program director. For purposes of the written preliminary exam, the scope of the contract will be narrowed to cover particular courses, books, and such as the committee sees fit. The final contract must be signed by the student and all committee members.

Students are encouraged to undertake research under close faculty supervision in a number of potential areas, including the following examples:

- Analysis of complex dynamical systems
- Studies of the role of greenhouse gases in Earth’s atmosphere
- Modeling astrochemical processes in star-forming regions
- Searches for extrasolar planets
- Modeling the production of high-energy gamma rays from cosmic sources
- Analysis and prediction of space weather
- Quantum computation: theory and applications
- Solid state physics, including applications to materials science
- Interaction of organic molecules with solid surfaces

“Mason is deeply committed to the arts and educating our students about the significance the arts have in all our lives. This is why the arts are integral to our institution. We encourage active student participation in the many programs and related courses in the arts that are scheduled throughout the year. Students are able to receive a more balanced education, develop a deeper appreciation of the arts, and achieve a more enlightened perspective of the world.”

—Alan G. Merten
President, George Mason University

The College of Visual and Performing Arts (CVPA) creates an academic environment in which the arts are considered as individual disciplines as well as interdisciplinary forms that strengthen each other. Courses of study are designed to lead to careers as creators, performers, teachers, managers, and scholars of the arts, as well as prepare students for the challenges of a rapidly changing world. In addition to providing strong programs for arts majors and minors, CVPA strives to ensure that Mason’s entire student population has the opportunity to experience and study the arts as a key component of a well-rounded liberal arts education.

Studying the arts goes hand in hand with creation and performance. CVPA provides the theaters, studios, rehearsal spaces, computer laboratories, recital halls, and performance classrooms in which students hone their skills. The college’s faculty of practicing artist-teachers works closely with students in a variety of curricular and cocurricular creative projects. Once basic techniques are established, students are encouraged to stretch, grow, and experiment within this supportive environment. Students regularly perform, create, exhibit, and otherwise develop their art forms in a wide variety of public venues, enhancing their experience as working artists while enriching the cultural life of the campus community.

An education in the arts is deepened by regular contact with the work of distinguished visiting artists. The college is home to the Center for the Arts, which comprises a variety of professional presenting and producing units that provide a diverse program of cultural experiences for the entire university community, as well as Northern Virginia and the greater Washington, D.C., area. Artists from across the country and around the world regularly perform in the Concert Hall, give master classes, work with students during extended residencies, and interact with the community in a variety of other ways. The accessibility and vitality of the Concert Hall, TheaterSpace, the Fine Arts Building and Johnson Center
Academic Programs

CVPA houses the four academic departments of Art and Visual Technology, Dance, Music, and Theater; and programs in Arts Management, and Film and Video Studies. Each major features strong academic preparation in the history and theory of the art form, and a wide range of discipline-based technique courses offered by professional artist-teachers. Opportunities for creative work and performance are at the core of most courses of study.

Graduate Degree Programs

CVPA’s graduate programs offer highly focused study designed to prepare students for professional work in the arts and education. The requirements for each graduate degree are described in the sections that follow.

Transfer of Credit

Graduate credit earned prior to admission to a certificate, master’s, or doctoral program may be eligible to be transferred into the program and applied to a CVPA graduate certificate or degree. The total amount of credits that may be transferred into a CVPA graduate program is 12 credits; these may be Mason nondegree graduate credits, or graduate credits from another qualified college or university. Please see the Graduate Policies/Transfer of Credit portion of the catalog for more detailed information about the requirements.

Undergraduate Degree Programs

The undergraduate degree consists of course work in university general education, a major area of study, and electives. To earn a bachelor’s degree, students must complete a minimum of 120 credits, of which at least 45 must be upper-level courses (numbered 300 and above). At least one course at the 300 or 400 level must be designated “writing intensive.” All entering students who have not yet satisfied the university-wide requirement in quantitative reasoning are required to take the math placement test prior to enrollment.

Minimum Cumulative GPA in Major

Undergraduate students earning CVPA degrees must earn a minimum 2.00 cumulative GPA in their major or higher, if required by their program.

Physical Education Courses

Activity courses offered by the Health, Fitness, and Recreation Resources Department cannot be counted toward credits required for a degree in CVPA. Students may take nonactivity PHED courses for elective credit for CVPA degrees.

Academic Course Load

Undergraduate students earning degrees in CVPA may register for 18 credits per fall and spring semester without the dean’s permission. Students are advised that they will be required to pay additional tuition beyond the 16-credit, university full-time academic load. Graduate students earning degrees in CVPA may register for a maximum of 13 credits per fall and spring semester. Students should be cognizant of the time commitment when they register for their courses, especially if they register for high numbers of credits. Students are urged to consult with their advisor and familiarize themselves with Mason guidelines for work and academic load. Students are reminded that employment must not take priority over course work.

Advising

Students are assigned advisors and encouraged to meet with them on a regular basis. Undeclared CVPA students and undergraduate students in academic difficulty (cumulative GPA under 2.00) are required to see an advisor prior to registration for the semester following registration restriction.

Minors

University policy states that students must earn 8 distinct credits that are not used for their major toward their minor. Some departments have more specific criteria for applying credits to a minor.

Academic Policies

Students are strongly advised to consult the Academic Policies chapter of this catalog for information concerning university-wide requirements for degrees and requirements for nondegree students.

General Education Program

The baccalaureate degree requires students to take a range of courses that provide a broad knowledge of the world, develop the ability to think both conceptually and critically, acquaint them with many different methods of inquiry, and provide the skills to continue intellectual growth throughout their lives. Students select from a range of courses outlined in the University General Education chapter. Students accepted into the Honors Program in General Education fulfill their core general education requirements with completion of that program of study. The Mason Topics Program provides a way for students to register for two or more complementary general education courses at the same time for four semesters. The professors who teach in this program have coordinated readings and assignments. Students are strongly advised to consult the University General Education chapter of this catalog for information concerning general education.

Foreign Language Requirement

Some degrees within CVPA require intermediate-level proficiency in one foreign language. This requirement may be fulfilled by completing a course in a foreign language numbered 202, 209, or 210 (or higher level courses taught in the language) or achieving a satisfactory score on an approved proficiency test. International students should consult the CVPA Student Academic Affairs Office about a possible waiver of this requirement.
CVPA Courses
Some CVPA courses transcend individual disciplines. These courses are administered by the Dean’s Office and are designated CVPA in the Course Descriptions chapter of this catalog.

Minor in Arts Administration
Performing Arts Building
Room A407
Phone: 703-993-1321

Faculty
Miller, Coordinator
The field of visual and performing arts offers many career paths that rely on a strong foundation in one or more art forms and require specific knowledge and skills in administration and management. The minor in arts administration consists of 18 credits, including CVPA 305 Seminar in Arts Management (3 credits) and CVPA 489 Field Experience in the Arts (3-6 credits). All other credits are selected in consultation with a program advisor from relevant courses in CVPA, the Nonprofit Management Program in the Department of Public and International Affairs, the School of Management, the Department of Communication, or other appropriate areas of study. The minor is open to all CVPA majors as well as art history majors. All other students must complete 9 credits of arts-related course work to be eligible for this minor. See the program coordinator for more information.

Faculty
Harold Linton, Chair
Professors: Carbonneau, Frederick, Kravitz (gallery director), Linton (chair), Mandes, Sandell
Associate professors: Ashcraft (associate chair), Crawford, Feerick, Frenn, White
Assistant professors: Cooley, Cui, Endress, Rothstein, Sheridan, Wrbican
Term assistant professors: Constantine (associate chair), Del Popolo, Karametou, Malone, Stanley, Starr, Winant
Adjunct professors: Anderson, Bradley, Bulisova, Carr-Shaffer, Castellana, Chao, Clements, Cook, Cushner, DeLuca, Dicko, Ewers, Fairfax, Ferreira, Garland, Goldman, Gorman, Guerrieri, Herce, Hicks, Ho, Hoffmann, Ihnken, Kennedy, Kems, Kirk, Kojima, Nahidian, Organ, Petzwinkler, Plisker, Ratnapala, Rodrigue, Rozario, Sapsford, Serafin, Tomhave, Watson, Wiseman, Yilmaz

Mission
The Department of Art and Visual Technology (AVT) offers students an environment in which the pursuit of a degree is a commitment to a way of life that centers on creative thought processes and the production of artworks. The curriculum and the faculty focus on cultivating students’ appreciation of and expertise in studio and digital arts. Students are encouraged to dedicate themselves to academic excellence, skilled artistry, and employing visual literacy within an atmosphere of creative freedom. The faculty’s ongoing engagement with artistic practice forms a vital part of the student-instructor relationship. By offering instruction in traditional and contemporary technologies for art making, faculty members help students develop a strong foundation to realize their personal and professional goals.

A principle that underlies the AVT Program is its focus on fostering student understanding and experience of interdisciplinary in the visual arts. This focus is important because today crosses the boundaries of traditional disciplines and integrates traditional and technology-based media into the creation of new art forms. All AVT undergraduates are introduced to this interdisciplinary focus in such required courses as AVT 307 Aesthetics and AVT 395 Writing for Artists.

Course Work
The Department of Art and Visual Technology offers all course work designated AVT in the Course Descriptions chapter of this catalog.

UNDERGRADUATE PROGRAMS
Undergraduate studio degrees offered by the Department of Art and Visual Technology include the bachelor of arts (BA) and the bachelor of fine arts (BFA). The department also offers an undergraduate minor in AVT, an interdisciplinary minor in multimedia, and a departmental honors program for selected AVT majors.

Neither the BA nor the BFA program satisfies all requirements for teaching in the public schools. Undergraduate students interested in this field should contact the department’s art education advisor to learn more about teacher preparation. Nonmajors may also take course work in AVT. Consult the course listings for prerequisites.

Requirements
All students are admitted to AVT programs of study separately from their admission to the university and only by portfolio review. Students may be admitted to study in the BA program by one of three ways:

- Presenting a portfolio and any other requested credentials at designated portfolio review days before each semester and before applying for admission
- Completing the sequence of AVT 104, 105, and 222 with a 3.50 or higher average, and applying for admission
- Completing the sequence of AVT 104, 105, and 222, 323 or 324, or one 200-level course with a 3.00 or higher GPA; and applying for admission

BFA Portfolio Review
BA students who wish to apply for admission to the BFA degree program do so by presenting a substantive college-level portfolio and other requested credentials during the designated application period, usually the sixth week of the semester. See BFA requirements below.

Artsbus Requirement
All AVT students must meet the department’s requirement of travel to galleries and museums aboard the AVT Artsbus. Students meet this requirement by enrolling in AVT 300 Artsbus Attendance.

Freshmen who enroll as AVT majors must take AVT 300 for five semesters. Transfer students and students who change
their majors to AVT must take AVT 300 each semester they are enrolled at Mason, up to a maximum of five semesters. Semesters of enrollment in AVT 300 do not have to be consecutive. Students may take AVT 300 up to three times in a semester if they wish to accelerate their completion of the requirement.

The total number of bus seats for the term will meet or exceed class enrollment; tickets for each trip will be available on a first-come, first-served basis. Students have no guarantee that they will be able to attend the trip of their choice. The best way for students to attend their preferred trip is to secure the ticket as soon as the box office has them available.

Please note that there are no ticket refunds at the end of the semester for students who fail to attend one of the available Artsbus trips, just as there are no tuition refunds for students who fail courses.

**Writing-Intensive Requirement**

Mason requires all students to complete at least one course designated “writing intensive” in their majors at the 300 level or above. AVT students fulfill this requirement by successfully completing AVT 395 (or AVT 494 for BFA students planning to pursue the MAT in art education).

**Upper-Level Credits**

All undergraduate students are required to complete a minimum of 45 credits of upper-division courses at the 300–499 level.

**Major GPA**

All AVT undergraduate students must earn a minimum 2.00 cumulative GPA in their major.

**Studios**

Studios are open to students for extended periods mornings, evenings, and weekends whenever classes are not in progress. Policies, procedures, and schedules for studio use are established by the AVT studio faculty and are posted in the studios.

**Programs of Study**

**Art and Visual Technology, BA**

This program offers a broad background for students who want a liberal arts education with a major in studio or new media art. Students can concentrate a portion of their study in drawing, graphic design, interdisciplinary arts (InterArts), new media art, painting, photography, printmaking, or sculpture.

12 credits in one of the following areas:

**Drawing (DRW):** AVT 422, 423; 4 credits from AVT 324, 326, 333, 336, 337, 432, 433. Note: All AVT majors concentrating in drawing must complete AVT 232 (Painting I) under Breadth and Experience.

**Graphic Design (GD):** AVT 311, 313, 414

**InterArts (IA):** AVT 375, 473; 4 credits from 372, 374, 376, 377, 378, 491

**New Media Art (NMA):** 12 credits from AVT 382, 383, 390, 482, 483, 487

**Painting (PNT):** AVT 333, 432, 433

**Photography (PHO):** AVT 353, 459; and 4 credits from AVT 452, 453, 454, 455, 456, 457, 458**
Courses but are recommended as electives for BA students.

General Electives .......................................................... 20
BA students must use general electives to either complete a minor program outside the major field of study (15–20 credits) or demonstrate intermediate-level proficiency in one foreign language (0–12 credits).* After fulfilling one of these options, the remaining general electives may be taken inside or outside of the department. All students are required to take a minimum of 45 credits of upper-division courses (300 and 400 level); most students will require at least 13 elective credits at the 300 level or above. Note: AVT 393 Field Experience in the Arts and AVT 489 Internship are not required courses but are recommended as electives for BA students.

* See beginning of CVPA chapter for foreign language requirement.

Total ............................................................................... 120

Art and Visual Technology, BFA

BFA-AVT Total ..................................................................... 81

This intensive, 120-credit studio production program emphasizes analytical, creative, and experiential aspects of studio and new media art. It is designed to prepare students professionally as visual artists or for graduate study in the fine arts. Students devote a significant portion of their college careers to an in-depth study in one of the following concentrations: drawing, graphic design, interdisciplinary arts (InterArts), new media art, photography, painting, printmaking, or sculpture.

Application deadlines are at the end of the sixth week of the fall and spring semester of each year. Students planning to apply must meet with the coordinator of their AVT concentration in the semester prior to their application to discuss the portfolio.

Admission to the BFA program is highly competitive. Applicants must be a current BA student in art and visual technology and have completed AVT 104 and 105 or the equivalent. Other BFA admission requirements include the following:

- Portfolio of 10 to 15 original examples of college-level art work
- One-page, double-spaced essay
- Transcripts of all college-level study
- Must have at least a 3.00 cumulative GPA overall and in the major

Students interested in applying should contact the Department of Art and Visual Technology for an application and specific directions on presenting the portfolio.

AVT 497 Senior Project or AVT 498 Senior Design Project

Concentration......................................................................24

24 credits in one of the following areas:

Drawing (DRW): AVT 422 and 423; 4 credits from AVT 324, 326, 333, 336, 337, 432, 433; and 12 credits from AVT 300–499. Note: All AVT majors concentrating in drawing must complete AVT 232 (Painting I) under Breadth and Experience.

Graphic Design (GD): AVT 311, 313, 414, 415; and 8 credits of AVT 419 Topics in Graphic Design*

InterArts (IA): AVT 373, 473; and 12 credits from 372, 374, 376, 377, 378, 491, or 492; and 4 credits from AVT 300–499

New Media Art (NMA): 12 credits from AVT 382, 390, 482, 483, 487; and 12 credits from AVT 300–499

Painting (PNT): AVT 333, 432, 433; and 12 credits from 300–499

Photography (PHO): AVT 353 and 459; 8 credits from AVT 452, 453, 454, 455, 456, 457, and 458; and 8 credits from AVT 300–499**

New Media Art (NMA): 12 credits from AVT 300–499.

*All AVT majors concentrating in graphic design must complete AVT 252 Photography I or AVT 253 Introduction to Digital Photography under Breadth and Experience.

**All AVT majors concentrating in photography must complete AVT 252 Photography I under Breadth and Experience.

General Electives .........................................................120
**Printmaking (PMT):** AVT 343; and 8 credits from 345, 346, 442, 443; and 12 credits from 300–499  
**Sculpture (SCL):** AVT 363, 462, 463; and 12 credits from 300–499  

*All AVT majors concentrating in graphic design must complete AVT 252 Photography I or AVT 253 Introduction to Digital Photography under Breath and Experience.*

**All AVT majors concentrating in photography must complete AVT 252 Photography I under Breath and Experience.**

**General Electives:** 3  
Take the following art education foundation courses to meet state education requirements:  
EDUC 301 Educationally Diverse Populations .......... 3  
EDUC 302 Human Growth and Development .......... 3  

Total ......................................................... 120  

*Note:* Following this curriculum does not guarantee entry into the MAT Program. Prospective MAT students must meet all MAT admissions requirements as described in the catalog.

**AVT Honors Program**

Students interested in the Honors Program in Art and Visual Technology should contact the chair of the department. Both BA and BFA students are eligible to apply for admission to the program. Honors students must complete at least 4 credits of AVT 394 Honors Seminar.

**Minor in Art and Visual Technology**

The minor in AVT requires 20 credits and offers a core of foundational studies with the opportunity for further study the following areas: digital arts, graphic design, InterArts, painting, photography, printmaking, or sculpture. The requirements are as follows:

AVT 104 and 105 Studio Fundamentals I and II ........ 8  
AVT 222 Drawing I ............................................. 4  
AVT 200–299 ....................................................... 4  
AVT 300–399 ....................................................... 4  

Total .................................................................. 20  

**Interdisciplinary Minor in Multimedia**

For the program section for the multimedia minor, please see the catalog section on Interdisciplinary Minors in the College of Humanities and Social Sciences. This minor is not available to students majoring in AVT with a concentration in new media art (referred to as “digital arts” in previous catalogs).

**GRADUATE PROGRAMS**

**Art and Visual Technology, MA and MFA**

The MA in digital arts features courses that integrate visual information design, two-dimensional imaging, three-dimensional modeling, animation, video production, sound editing, multimedia authoring, and web publishing within a program that is grounded in theory and application.

The MA degree is a 45-credit professional program aimed at preparing students for employment in high-tech industries and businesses, including computer animation and video production firms, graphic design firms, web development and design companies, and computer-related research industries.

The MFA is a terminal degree that prepares students to become professional artists, work in technology or arts-related fields, and teach at the university level. It requires 60 credits, during which time students fulfill 45 credits of core and studio requirements plus an additional 15 credits of comprehensive experience.

MFA students may choose an emphasis in digital arts, painting, photography, printmaking, sculpture, or InterArts. The latter offers students the opportunity to combine art forms in interdisciplinary projects that may be installation, performance, publishing, time-based, or writing-based, and combine creative and critical approaches in their work.

While it is anticipated that students will move through the MFA as described in this catalog, individuals with extensive professional accomplishment may, upon recommendation of the AVT Graduate Committee and with prior approval of the CVPA dean, craft an individualized program that meets curricular requirements.

**Admission Requirements**

In addition to meeting the general university requirements for admission for graduate study, candidates for the MA or MFA must hold a BA or BFA degree. Upon applying, they must submit a portfolio, statement of intent and professional goals, and three letters of reference. Applications will be accepted for the fall semester only. The deadline for receipt of application materials is January 15.

Diversity among students accepted for study is another consideration. Applicants with degrees in areas other than art are welcome, although they may be required to complete undergraduate core courses.

**Portfolio Guidelines**

The applicant’s portfolio is a major selection criterion for graduate admission and should represent the applicant’s most accomplished work. Portfolio requirements are different for each graduate area of emphasis.

All portfolios must include a written image or slide information sheet with the corresponding number, title, date, medium, and size of each work. If included, slides must be labeled with slide number, applicant’s name, title of work, and date. Incomplete portfolios will not be considered.

Applicants’ portfolio items are considered part of the application for admission and, thus, cannot be returned. Please do not send original materials. The portfolio and all other application materials should be submitted to the Office of Graduate Admissions. For more information, contact the AVT Department at 703-993-8898.

**Portfolio requirements by area of emphasis:**

**Digital Arts:** 20 images on a Mac (Apple Macintosh platform)-compatible CD. All images must be numbered according to the printed list. Videos (no more than four minutes for each selection) must be playable from a Mac-compatible CD or DVD. Only the relevant parts of the video should be marked for viewing, with the applicant’s role clearly stated. Digital arts applicants should not submit slides.

Photography and Printmaking: 20 images on a Mac-compatible CD or slides. All images must be numbered according to the printed list. Printmaking also requires a print portfolio of 12 prints.

Sculpture and Painting: 20 slides only. All slides must be numbered and labeled according to the printed list.
InterArts: 20 images (on a Mac-compatible CD or slides), videos, or writing-based materials. All submissions must be numbered according to the printed list. If videos are included, they must contain no more than four minutes for each selection. Also, they must be on a Mac-compatible CD or DVD or, if videotape, VHS in NTSC format. Only the relevant parts of the video should be marked for viewing, with the applicant’s role clearly stated. If writing-based materials are submitted, they should be submitted in printed form.

Supplementary material for all applicants, such as CDs (Mac-compatible only), videos (DVD, VHS in NTSC format), web addresses, press clippings, or reviews of exhibitions may be submitted but will be reviewed only at the discretion of the AVT graduate application reviewers. Supplementary material should be clearly marked as such.

Facilities and Equipment
The Art and Visual Technology Graduate Program is located in the Fine Arts Building, which houses art studios in drawing, painting, photography, printmaking, and sculpture. AVT has four computer-equipped studios that cross platforms and are installed with current software applications used for two-dimensional imaging, three-dimensional modeling, animation, video production, sound editing, multimedia authoring, and web publishing.

Master of Arts in Teaching (MAT) in Art Education

The MAT in art education harnesses George Mason University’s programs and resources to prepare well-trained artists to become artist-teachers for PreK–12 public schools. Because teaching itself is a performing art that serves the individual, the discipline, and the community, the MAT in Art Education
Program links George Mason University with outstanding area school systems and cultural institutions.

The master of arts in teaching in art education is a preservice degree program that prepares students with a BFA degree or equivalent for PreK–12 art licensure by the Commonwealth of Virginia. Using a studio-based approach to art education and working closely with area public school systems, the MAT degree consists of 30 credits of graduate art education, school practicum experience, and studio work prior to preservice teaching internship and seminar.

Geared toward those with a passion for teaching and the visual arts, the MAT in Art Education Program fosters the quality studio breadth and expertise; comprehensive art historical knowledge; access to contemporary, local, and global art forms and artists; and proficiency in art education theory and practice needed to prepare highly qualified art teachers for a lifetime of professional teaching, learning, and leadership.

Admission Requirements

In addition to meeting the general university admission requirements for graduate study, admission to this program is contingent on completion of a BFA in art or approved equivalent. Also, candidates must have a minimum 3.00 cumulative undergraduate GPA; any exceptions will be considered on an individual basis. Eligibility for the MAT in Art Education Program may demand additional coursework to establish proficiency in visual arts. Students lacking a strong background in the visual arts or pedagogy will be required to satisfy prerequisite courses prior to the required graduate courses. Candidates will be selected by a department committee composed of the program director and faculty. Meeting minimum criteria does not guarantee admittance to the program.

Applications will be accepted for fall and spring semesters. The deadline for receipt of application materials is October 15 and March 15. Each applicant must provide the following materials:

- Completed application form
- Certified copies of all undergraduate transcripts and any graduate transcripts
- Statement of intent and professional goals for entering the field
- Three letters of reference from faculty members or individuals who have firsthand knowledge of the applicant’s academic or professional capabilities
- Official score on Praxis I or SAT equivalent
- TOEFL score, if required by Mason policies
- Portfolio of 15 to 20 images is required to reflect artistic breadth and depth, including drawing skills of the applicant’s art. The work should be in Power Point format on a Mac-compatible CD. All portfolios must include a written image sheet with the corresponding number, title, date, medium, and size of each work. Incomplete portfolios will not be considered. Applicants’ portfolio items are considered part of the application for admission and, thus, cannot be returned. Please do not send original materials.

The portfolio and all other application materials should be submitted to the Office of Graduate Admissions. Qualified applicants will be invited to an on-campus interview, portfolio review of original art works, and in-person writing sample.

Diversity among students is another consideration for acceptance into the program. Applicants with degrees in areas other than art are welcome, although they may be required to complete undergraduate core, and studio and art history courses.

MAT matriculants who earned a BFA at an institution other than Mason may be required to take additional undergraduate credits as postbaccalaureate core requirements before acceptance into the program. Without equivalent courses, they will be required to take a set of five BFA foundational courses in art education and education: AVT 396, 493, and 494 and EDUC 301 and 302.

In addition, applicants who did not take equivalent undergraduate courses must also take AVT 472 Critical Theory in the Visual Arts and AVT 180 Computers in the Creative Arts, plus any additional studio or art history course work to meet Virginia licensure requirements.

MAT students will receive ongoing evaluation reviews by the MAT faculty to determine whether they have achieved satisfactory progress toward their degree.

All MAT students must pass Praxis II and Virginia Communication and Language Assessment (VCLA) to receive placement for student teaching in the final semester.

Professional Teaching Portfolio and Qualifications Review

The comprehensive experience for the MAT includes the following: (1) a group exhibition, “The Art of Teaching Art Showcase,” in which MAT candidates display and formally present works of PreK–12 student art completed during the internship, along with exemplars of the MAT candidate’s own artwork, and (2) a culminating review of the intern’s competencies as reflected in a professional teaching portfolio, accomplished during the internship seminar course that accompanies student teaching. All process folios, lesson plans, explanations of projects, visual images, and other relevant materials must be made available for the project committee to review. Artworks and all materials should be exhibited in a manner that reveals the student’s aesthetic accomplishments. This exhibition and review will assess the MAT candidate’s final professional teaching portfolio that may be used at interviews for employment. These requirements will be accomplished during the internship seminar course that accompanies student teaching. A committee of MAT faculty will determine whether the student has mastered the field of study. Students who are unable to complete the full student teaching internship in art education and seminar for student teachers will be terminated from the MAT in Art Education Program.
Art Education

The College of Education and Human Development (CEHD) offers educational programs through its Advanced Studies in Teaching and Learning (ASTL) Program for art teachers with current licensure in art PreK–12, who are seeking professional development in art education. See the CEHD chapter of this catalog for information on the concentration in ASTL: Art Education (E1-MED-CRIN/AART) and the Graduate Certificate in ASTL: Art Education (E1-CERG-AART).

Arts Management, MA MA-AMGT

The MA in arts management responds to growing demand for graduates who can manage and coordinate the arts, bridging the world of performing and visual arts with applied managerial skills. The Washington, D.C., region is home to one of the nation’s largest concentrations of performing and visual arts organizations. The demand for arts managers with skills in financial and budgetary management, strategic management and entrepreneurship, and public relations, including marketing and advertising, has arguably never been more acute. The need for arts managers with skills in philanthropy, fund raising, and ongoing relationship-building management among the private and public arts sectors also continues to grow at a fast pace.

The MA is a 36-credit program of study that provides a core curriculum in the fundamentals of arts management. Students complete a 23-credit core and then select courses from a cluster: entrepreneurship in the arts and management; finance and budgeting for the arts; marketing and public relations; or an arts-specific cluster. Students also take internal and external internships. The internal internship affords an in-depth opportunity to work with professionals in residence at Mason’s Center for the Arts. The external internship provides the opportunity to work at one of 60 different visual and performing arts venues in the Washington, D.C., metropolitan area.

Admissions Requirements

The program is geared toward those with a passion for the arts. Diversity among applicants is anticipated and sought, and candidates are evaluated on a case-by-case basis. Work experience is strongly preferred. It is anticipated that applicants will come from the arts community, with experience and training in music, dance, theater, and visual and technical arts and wish to add the skills of marketing, finance, strategy, entrepreneurship, and management to their repertoire. It is also expected that students will enter with more developed skills in the business side of the arts and wish to unite these skills with prior experiences in the arts. Completed applications must be received by March 1 for fall and October 1 for spring.

In addition to meeting general requirements for university admission for graduate study, applicants must submit the following items:

• Official undergraduate transcripts listing a four-year bachelor’s degree from an accredited institution
• Two letters of recommendation from faculty members or individuals who have first-hand knowledge of the applicant’s academic or professional capabilities
• A two-page (maximum) statement of intent and goals

Applicants might be asked to interview with at least one member of the program faculty or Admissions Committee. In addition, applicants may submit a portfolio that demonstrates work experience. Internship experience for recent graduates will also be considered.

■ Graduate Certificate in CERG-AENT
Arts Entrepreneurship

The 15-credit Graduate Certificate in Arts Entrepreneurship is for early to mid-career professionals working in at least tangentially in an arts-related profit or nonprofit business. Participants will augment their existing knowledge by examining innovative case studies, studying advanced practices and processes, and the actual execution of business models. Certificate courses will address areas of idea generation, market analysis and testing, arts business and revenue modeling, public relations and marketing strategies, budgeting and finance, public policy, and government relations. Learning together in a cohort-modeled certificate program, students will develop strong interpersonal skills, public communication strategies, and team-based problem-solving strategies.

Admission Requirements

For admission into the arts entrepreneurship certificate, prospective students must show graduation from a bachelor’s program (or equivalent) and related work experience. Students apply through Mason’s Office of Admissions, and applications will be approved by a committee established by the Arts Management Program. Courses taken in pursuit of the certificate are eligible to be applied toward the master of arts in arts management, if these courses meet approval.

Course Work

The Department of Dance offers all course work designated DANC in the Course Descriptions chapter of this catalog.

UNDERGRADUATE PROGRAMS

The Dance Department offers a BFA and a BA. Entrance to either program is by audition. Information about the audition process, including dates and audition application, can be found on the department web page, dance.gmu.edu, or by calling the department office at 703-993-1114. Admission to the university is determined by the Admissions Office.

Writing-Intensive Requirement

The university requires all students to complete at least one course designated “writing intensive” in their major at the 300-level or above. Students in the BFA and BA in dance fulfill this requirement by successfully completing DANC 390 or 391.

Certification to Teach

This program is approved by the Virginia State Department of Education and administered through the College of Education and Human Development, which is accredited by the National Council for the Accreditation of Teacher Education (NCATE). To be considered for licensure in dance education, a student must successfully complete requirements for a BA or BFA in dance. In addition, students must meet the following requirements:

- Be formally accepted into the program by the Dance Education Committee. Before requesting an interview with the committee, students must complete 45 to 60 credits with a GPA of 2.80 or higher, and submit passing scores for the Praxis I tests (Reading, Writing, Mathematics). It is strongly recommended that students take the Praxis I tests as soon as they have completed ENGL 302, a course in literature, and a course in mathematics.

- Earn no grade lower than a C in dance (see major curriculum) and in professional education courses (EDUC 300, 302; EDRD 300; DANC 453, 454).

- Maintain an overall GPA of 2.80 or higher in all dance course work at Mason and at all other institutions of higher learning combined.

- As dance elective options, complete DANC 118 World Dance, DANC 453 Teaching Creative Movement, and DANC 131 Beginning Jazz Technique or 231 Intermediate Jazz Technique.

- With committee approval, register for and complete EDUC 300 and 302 and EDRG 300.

- After completing all required course work and with committee approval, submit passing scores on the VLCA and complete a full-time 15-week student teaching internship (DANC 455) that includes experiences at both elementary and middle or secondary levels.

For some students, this course of study will require a postbaccalaureate year. Students may design a four-year plan, including summer study, with the assistance of an advisor in the department.

■ Dance, BFA

Because of the professional nature of the BFA degree, the program requires completion of 126 credits of course work. The BFA in dance is a performance-oriented program designed to prepare students professionally as performers, choreographers, and teachers, as well as prepare them for graduate study. Students in this program demonstrate significant
The BFA degree offers a general modern dance major that allows for concentrated study in performance, choreography, or teaching. Technical training includes ballet, a strong emphasis on modern dance, and opportunities to study jazz and world dance forms. Students may request admission into the BFA program during the candidate’s freshman year. Student progress in the BFA program is assessed annually.

GRADUATE PROGRAM

Dance, MFA  MFA-DANC

The MFA in dance is a 60-credit program of study grounded in the modern dance genre that emphasizes performance, choreography, and teaching. Candidates are expected to enter the program with advanced technical proficiency in ballet or modern technique, and professional competence in choreography exemplified by a significant body of work.

Admission Requirements

In addition to fulfilling the admission requirements for graduate study, the applicant must submit directly to the Dance Department a résumé and a 10-minute video that illustrates the applicant’s choreography. All candidates must also demonstrate advanced technical proficiency through an audition. Contact the Dance Department at 703-993-1114 for dates and times.

All candidates must satisfy the following prerequisites: advanced dance technique, improvisation, two semesters of dance composition, two semesters of dance history, rhythmic analysis or music for dance, anatomy and kinesiology, and dance production. Prerequisite courses may be completed before or concurrent with graduate course work and are usually fulfilled if the applicant has earned a BA or BFA in dance.

Electives ......................................................................................................................... 6

Total Credits ................................................................................................................. 60

Mason does not guarantee the availability of these courses every semester; some are offered in alternate years.

GRADUATE PROGRAM

Dance, MFA  MFA-DANC

The MFA in dance is a 60-credit program of study grounded in the modern dance genre that emphasizes performance, choreography, and teaching. Candidates are expected to enter the program with advanced technical proficiency in ballet or modern technique, and professional competence in choreography exemplified by a significant body of work.

Admission Requirements

In addition to fulfilling the admission requirements for graduate study, the applicant must submit directly to the Dance Department a résumé and a 10-minute video that illustrates the applicant’s choreography. All candidates must also demonstrate advanced technical proficiency through an audition. Contact the Dance Department at 703-993-1114 for dates and times.

All candidates must satisfy the following prerequisites: advanced dance technique, improvisation, two semesters of dance composition, two semesters of dance history, rhythmic analysis or music for dance, anatomy and kinesiology, and dance production. Prerequisite courses may be completed before or concurrent with graduate course work and are usually fulfilled if the applicant has earned a BA or BFA in dance.

Degree Requirements

All students are required to take the following:

Faculty
Cynthia Lont, Program Director
Clayton Austin, Theater; Thomas Britt, Film and Video Studies; Julie Christensen, Modern and Classical Languages; Mark Cooley, Art and Visual Technology; Lynne Constantine, Art and Visual Technology; Edgar Endress, Art and Visual Technology; Peggy Feerick, Art and Visual Technology; Cynthia Fuchs, English; Edward Gero, Theater; Timothy Gibson, Communication; Carma Hinton, Robinson Professor; Richard Kamenitzer, Arts Management; Howard Kurtz, Theater; Alison Landsberg, History and Art History; Scott Martin, Arts Management; Kristina Olsen, Modern and Classical Languages; Paula Petrik, History and Art History; Janine Ricouart, Modern and Classical Languages; Jeanette Roan, English; Mark Sample, English; Jessica Scarlata, English; Gail Scott White, Art and Visual Technology; Martin Winkler, Modern and Classical Languages; Sue Wrbican, Art and Visual Technology

Course Work
The Film and Video Studies Program offers all course work designated FAVS.

UNDERGRADUATE PROGRAM

Film and Video Studies, BA

The Film and Video Studies Program offers a 120-credit multidisciplinary BA degree, which spans many units including Art and Visual Technology, Communication, English, History and Art History, Modern and Classical Languages, New Century College, and Theater. Students study film and video production, theory, criticism, ethics, screenwriting, and business.

The vocabulary of film (broadly defined) now pervades the intellectual, cultural, political, and social landscape. The tools the filmmaker wields apply to an ever-widening range of tasks across the fields of human endeavor, from traditional narrative and documentary productions to academic research and pedagogical applications to projects of personal expression. Emerging technology makes the means of production available to anyone with access to a moderate level of computing power. This combination of factors makes film an important subject for academic inquiry and training.

Writing-Intensive Requirement
The university requires all students to complete at least one course designated “writing intensive” in their majors at the 300 level or above. Students seeking a BA in film and video studies should speak with the program director about this requirement.

Degree Requirements*

General Education................................................................. 40

Foundation Requirements..................................................... 10

Written communication: ENGL 101 and 302 ......................... 6

Film and Video Studies Core Requirements .......................... 30

Take 6 credits from the following:

- CHIN 320 Contemporary Chinese Film
- COMM 255 Media Literacy
- COMM 365 Women and Media
- COMM 380 Media Criticism
- ENGL 334 Literary Approaches to Popular Culture (Film and Media)
- ENGL 421 Film History
- ENGL 422 Film Theory
- ENGL 490 Special Topics in Film
- ENGL 493 Special Topics in Popular Literature (Film and Media)
- FREN 470 Topics in French Cinema
- HIST 393 Topics in Film and History
- RUSS 470 Topics in (Post) Soviet Cinema

**Video Production............................................................... 6

Take 6 credits from the following:

- AVT 354 Digital Photo
- AVT 356 Studio Lighting
- AVT 374 Sound and Vision
- AVT 376 Live Movies
- AVT 382 Digital Art and Animation
- AVT 383 Three-Dimensional Digital Arts

- Nonnative speakers of English with limited proficiency may substitute ENGL 100 for ENGL 101. Students must attain a minimum grade of C in ENGL 100 or 101, as well as in 302, to fulfill degree requirements. Students are reminded that the English Department offers proficiency exams for credit and exemption from this requirement.

- Oral communication....................................................... 3
- Quantitative reasoning.................................................... 3
- Either appropriate placement score on quantitative skills and one of MATH 108, 110, 111, 113, 115, 125; or IT 250; or STAT 250; or lower placement score requiring MATH 106.

- Information technology.................................................. 3

- Core Requirements
- Literature............................................................................ 3
- Arts .................................................................................. 3
- Natural science (including one laboratory science).............. 7
- Western civilization.......................................................... 3
- Global understanding....................................................... 3
- Social and behavioral sciences....................................... 3
- Synthesis requirement...................................................... 3
- Foreign language or a minor**

- Major ................................................................................ 48
- Film and Video Studies Core Requirements ........................ 30
- Students must earn a minimum grade of C in all core courses (AVT 204; COMM 355, 454; ENGL 331, 332; FAVS 100, 355, 450, 499; THR 482).
- AVT 204 Visual Thinking................................................ 3
- COMM 355 Video Production: Principles and Practices ...... 3
- COMM 454 Free Speech and Ethics.................................. 3
- ENGL 331 Introduction to Documentary Film.................. 3
- ENGL 332 Introduction to Film........................................ 3
- FAVS 100 Colloquium (1 credit, three times).................... 3
- FAVS 355 Introduction to Business and Distribution of Film and Video......................................................... 3
- FAVS 450 Internship.......................................................... 3
- FAVS 499 Senior Thesis/Project....................................... 3
- THR 482 Advanced Screenplay Workshop.................... 3

- Analysis, History, Theory.................................................. 6
- Take 6 credits from the following:
  - CHIN 320 Contemporary Chinese Film
  - COMM 255 Media Literacy
  - COMM 365 Women and Media
  - COMM 380 Media Criticism
  - ENGL 334 Literary Approaches to Popular Culture (Film and Media)
  - ENGL 421 Film History
  - ENGL 422 Film Theory
  - ENGL 490 Special Topics in Film
  - ENGL 493 Special Topics in Popular Literature (Film and Media)
  - FREN 470 Topics in French Cinema
  - HIST 393 Topics in Film and History
  - RUSS 470 Topics in (Post) Soviet Cinema

- Visual and Performing Arts
AVT 390 Digital Media and Video Arts
AVT 457 Documentary Photography
AVT 482 Advanced Two-Dimensional Digital Arts
AVT 487 Advanced Digital Media
COMM 358 Video II: Producing and Directing
COMM 360 Video Editing
COMM 363 Video II: Intermediate Production
COMM 366 Theories of Visual Communication
COMM 399 Videography
FAVS 365 Documentary Filmmaking I
THR 215 Stage Make-Up
THR 230 Introduction to Technical Theater
THR 235 Fundamentals of Costume Construction
THR 314 Lighting Stagecraft
THR 334 Lighting Design
THR 336 Advanced Theater Technology
THR 423 Audition Techniques: Stage and Camera
Electives in Area of Specialization: 6

Students are required to take two courses demonstrating a focus in subject matter, possibly from the following departments: History, Music, Sociology and Anthropology, or Theater.

General Electives: 32

*FAVS majors may not double-count courses toward both the FAVS major and university general education requirements.

**See beginning of CVPA chapter for foreign language requirements.

***Students may count no more than 16 credits of AVT courses toward their FAVS degree in this category.

Music

Performing Arts Building, Room A417
Phone: 703-993-1380
Web: gmu.edu/departments/music

Faculty

James Gardner, Chair

Professors: Camphouse, Engebretson, J. Gardner (chair), Maiello, Miller, Smith

Term professor: Balakerskaia, Hearden, Johonnott, Lapple, Sternbach

Associate professors:Billingham, Carroll, Monson (associate chair), T. Owens

Term associate professors: Casagrande, Ker-Hackleman, Rendler

Assistant professors: Bergman, Bullard, Nickens, Novak

Applied Music Faculty

Bassoon: Douglas Kahlenbrink, Adjunct Associate Professor. BS, Ball State University; MM, James Madison University. Former faculty member, James Madison University.

Cello: Robert Park, Adjunct Assistant Professor. BS, University of Maryland, College Park; MM, DMA, Catholic University of America; principal cellist, U.S. Army Band of Washington, D.C. (Army Orchestra and Strolling Strings).

Loran Stephenson, Adjunct Associate Professor. BM, Curtis Institute of Music; MM, Catholic University of America; National Symphony Orchestra; former member, U.S. Army Band of Washington, D.C.

David Teie, Adjunct Associate Professor. Cello. BM, Peabody Conservatory of Music of the Johns Hopkins University; cellist, National Symphony Orchestra, Washington, D.C.

Clarinet: Sharon Bonneau, Adjunct Assistant Professor. BM, BME, Eastman School of Music; MA, George Mason University; former clarinetist, U.S. Air Force Band of Washington, D.C.

Lora Ferguson, Adjunct Associate Professor. BM, Oberlin Conservatory; MM, Catholic University of America; clarinetist, Kennedy Center Opera House Orchestra; Capitol Woodwind Quintet.

Bryan Jones, Adjunct Assistant Professor. BME, Florida State University; MM, Baylor University; DMA, Catholic University of America; former member, U.S. Air Force Band of Washington, D.C.; instructor of clarinet, Levine School of Music.

Composition: Steve Antosca, Adjunct Assistant Professor. BA, Tulane University; MM, Peabody Conservatory of Music of Johns Hopkins University; Artist-in-Residence, Duke Ellington School of the Arts; cochair, Composition Department at Levine School of Music.

Glenn Smith, Professor. BA, MA, California State University, Hayward; DMus, Indiana University. Mark Camphouse, Professor. BM, MM, Northwestern University; former director of bands, Radford University.

Conducting: Stanley Engebretson, Professor. BA, MA, University of North Dakota; DMA, Stanford University; artistic director, Masterworks Chorus and Orchestra; music director, New York Avenue Presbyterian Church; former associate conductor, Minnesota Chorale.

Anthony Maiello, Professor. BS, MS, Ithaca College; Director of Instrumental Music Studies, George Mason University; former chairman of performance, Potsdam College of State University of New York; former associate conductor, McLean (Virginia) Orchestra. Mark Camphouse (see Composition)

Euphonium: Roger Behrend, Adjunct Professor. BME, Michigan State University; MA, George Mason University; solo/principal euphoniumist, U.S. Navy Band of Washington, D.C.

Flute: Judith Lapple, Adjunct Professor. BM, Eastman School of Music; MM, Northeast Louisiana University; former principal flutist, U.S. Air Force Band of Washington, D.C.

Thomas Perazzoli, Adjunct Associate Professor. Philadelphia Musical Academy; flutist, National Symphony Orchestra.

Guitar (Classical): Larry Snitzler, Adjunct Professor. Former student of Andres Segovia (guitar) and Nadia Boulanger (theory).

Guitar (Jazz): Richard Whitehead, Adjunct Assistant Professor. Former member U.S. Air Force Airmen of Note.

Harp: Jeanné Chalifoux, Adjunct Assistant Professor. Artist Diploma, Curtis Institute of Music; former harpist, National Gallery Orchestra and National Symphony Orchestra.
Horn: Eric Moore, Adjunct Assistant Professor. BME, BA, Boston University; MM, University of Texas at Austin; principal horn, U.S. Navy Band and Fairfax Symphony.
Edwin Thayer, Adjunct Associate Professor. BM, MM, University of Illinois; hornist, National Symphony Orchestra.
David Whaley, Adjunct Associate Professor. BME, Drake University; MM, DMA, University of Illinois; hornist, National Symphony Orchestra.

Koto: Kyoko Okamoto, Adjunct Assistant Professor. Bachelor in Languages, Kyoto University of Foreign Studies; Toho Kinshu Kai (Koto School).

Oboe: Lorrie Berkshire-Brown, Adjunct Assistant Professor. BM, Arizona State University; MM, Manhattan School of Music; oboist, U.S. Army Band of Washington, D.C.; substitute oboist, New York Philharmonic Orchestra.

Organ: William Neil, Adjunct Professor. BA, Pennsylvania State University; MM, Syracuse University; University of Michigan; Juilliard School; organist and keyboardist, National Symphony Orchestra, Chamber Soloists of Washington.

Percussion: Kenneth Harbison, Adjunct Associate Professor. BM, Eastman School; MM, Catholic University of America; assistant principal percussionist, National Symphony Orchestra.
John Kilkenny, Adjunct Assistant Professor. BM, The Juilliard School; MM, Temple University; music director, Metropolitan Wind Symphony; cochair, University of Maryland Summer Percussion Workshop.

Percussion (Jazz): Harold Summey, Adjunct Assistant Professor. MM, Howard University; member, U.S. Army Band.

Piano: Anna Balakerskaia, Adjunct Artist Professor. MM, DMA, St. Petersburg State Conservatory, Russia; former faculty member, Moscow and St. Petersburg State Conservatories.
Joanne Haroutounian, Adjunct Associate Professor. BA, Trenton State College; MA, American University; PhD, University of Virginia; pedagogy author, lecturer, and clinician.
Linda Apple Monson, Associate Professor. BM, DMA, Peabody Conservatory of Music of Johns Hopkins University; diploma (piano performance), Santiago de Compostela, Spain; former faculty member of Peabody Institute, College of Notre Dame of Maryland, and Northern Virginia Community College.

Piano (Jazz): Wade Beach, Adjunct Assistant Professor. BM, MM, University of Maryland; former member, U.S. Air Force Band Airmen of Note.

Saxophone: Richard Parrell, Adjunct Assistant Professor. BA, BM, George Mason University; MME, North Texas State University; solo principal saxophonist, U.S. Army Band of Washington, D.C.
Timothy Roberts, Adjunct Associate Professor, Saxophone. BM Northwestern University; MM, DMA Catholic University of America; principal saxophonist and a National Tour soloist with the United States Navy Band in Washington, D.C.; coordinator of the Navy Band’s International Saxophone Symposium.
Dale Underwood, Adjunct Professor. Texas Tech University; former saxophone soloist, U.S. Navy Band of Washington, D.C.

String Bass: Glenn A. Dewey, Adjunct Associate Professor. BM, University of Illinois; MM, Northwestern University; bassist, U.S. Marine Band of Washington, D.C.; former double/electric bass instructor, Millikin University.

Trombone: Matthew Neff, Adjunct Assistant Professor. BS, MEd, Pennsylvania State University; MM, Catholic University; bass trombonist, U.S. Navy Band.

Trumpet: Stanley Curtis, Adjunct Associate Professor. BM, University of Alabama; MM, Cleveland Institute of Music; trumpeter, U.S. Navy Band.

Dennis Edelbrock, Adjunct Professor. BM, University of Iowa; MA, DMA, Catholic University of America; trumpeter, U.S. Army Band of Washington, D.C., and National Gallery Orchestra.
Kenneth Ritenhouse, Adjunct Assistant Professor, Jazz Trumpet. BA, Performance, West Virginia Wesleyan College; MM, Jazz Studies, University of Maryland; additional graduate study, Eastman School of Music; member of the United States Army “Blues” Jazz Ensemble in Washington, D.C.; performs regularly with the Smithsonian Jazz Masterworks Orchestra.

Tuba: Roger Behrend (see Euphonium).

Viola: Edwin Johonnott, Adjunct Professor. Former violist, National Symphony Orchestra. Studied at Indiana University and Illinois University.

Ramón Scavelli, Adjunct Associate Professor. Philadelphia Musical Academy; violist, National Symphony Orchestra.

Violin: James E. Gardner, Professor and Chair, Department of Music. BM, Oklahoma City University; MM, DMA, Southwestern Baptist Theological Seminary.

Peter Haase, Adjunct Professor. MM, State Conservatory of Music, Katowice, Poland; postgraduate studies, Moskow Conservatory and the Juilliard School; violinist, National Symphony Orchestra.

Edwin Johonnott (see Violin).

Voice: Samuel Bonds, Adjunct Associate Professor. Faculty member, Duke Ellington School for the Arts.

Carla Rae Cook, Adjunct Associate Professor. BM, University of Utah; MM, Boston University; Postgraduate Studies, Manhattan School of Music; performing dramatic mezzo-soprano.

Stanley Engebretson (see Conducting).

Kathryn Hearden-Botelho, Adjunct Professor. BM, St. Norbert College; MM, Performers Certificate, DMA, Eastman School of Music.

Laura Mann, Adjunct Professor. BM, MM, Eastman School of Music; DMA, University of Maryland.

Patricia Miller, Professor. BM, Boston University; MM, New England Conservatory; Artist Diploma, Accademia di Santa Cecilia (Rome); Advanced Vocal Studies, Mozarteum, Salzburg, Austria.

Seong Nam, Adjunct Assistant Professor. BM, Han-Yang University; MM, University of Maryland; chorus member, Washington National Opera; music director, Gyung Hyang Garden Presbyterian Church.

Richard Novak, Assistant Professor. Tenor. BM, MM, Stephen F. Austin University; DMA, University of North Texas; semifinalist-Metropolitan Opera National Council
Regional Auditions, Singer of the Year-National Association of Teachers of Singing; Wichita Grand Opera, Gilmore International Keyboard Festival, Monroe Symphony, the Living Opera, San Antonio Symphony, Des Moines Metro Opera, American Be Canto Opera. Debby Wenner, Adjunct Assistant Professor. BS, Frostburg State College; MM, George Washington University; graduate work, West Virginia University, Catholic University of America; former member, Metropolitan Opera Apprentice Program; performing mezzo-soprano.

Course Work
The Music Department offers all course work designated MUSI in the Course Descriptions chapter of this catalog.

UNDERGRADUATE PROGRAMS
The two undergraduate degree programs offered through the Department of Music, the bachelor of art (BA) in music and the bachelor of music (BM), prepare students for graduate work in music and music literature; research and professional work in musical activities; and state licensure, or certification, to teach vocal and choral or instrumental music at the elementary and secondary school levels.

Through its strategic plan, Music Outreach and the Teaching Professions, the department enables students to pursue worthwhile vocational goals as teachers, performers, conductors, and composers. The department also seeks to educate its students to reflect a concern for cultural and humanistic values as future ambassadors and advocates of music and other arts. Through innovative learning experiences, the department provides all students in the BA and BM programs with opportunities to become effective musicians, teachers, and advocates of music. Teaching music is the principal area in which students can find employment in private studios, public and private schools, academies, and higher education within the ever-changing workplace. Because of this, all music majors at Mason receive some training in the teaching of music.

The department also recognizes the critical outreach role it provides in serving students from all majors, as well as members of the community who significantly benefit from the values and experiences of an education in music. The department seeks to provide unique educational opportunities through its various course offerings, workshops, presentations, and performances for those seeking music enrichment.

Entrance to all music degree programs is by audition. Arrangements for an audition must be made in advance by contacting the Department of Music before the scheduled audition date. Auditions are held approximately once per month. Audition dates and audition application forms are available through the music department web site: gmu.edu/departments/music.

A fundamentals of music test is given during the first week of classes to all students enrolled in MUSI 115 Theory I. Call the Department of Music at 703-993-1380 for additional information.

Competency placement tests are required of all transfer students who wish to present transfer credit in any of the following areas: sight singing, ear training, and keyboard skills.

Students must earn a minimum 2.00 cumulative GPA in their major or higher, if required by their program.

Writing-Intensive Requirement
Mason requires all students to complete at least one course designated “writing intensive” in their major at the 300 level or above. Students majoring in music may fulfill this requirement by successfully completing MUSI 332. Students who transfer this course into Mason may be required to repeat it or enroll in some other suitable course to fulfill the writing-intensive requirement.

Music, BA

Students pursuing a BA must complete the general education program outlined below. This distribution enables students to develop a breadth of knowledge, as well as the necessary skills to make the in-depth study of a major truly meaningful. In addition to general education requirements, students must also demonstrate intermediate-level proficiency in one foreign language or complete a minor program. A minimum of 57 credits in music course work is required for the music major. A total of 120 credits is required.

Degree Requirements

▲ Concentration in Music Education (MUE)

Certification to Teach

The music education concentration is approved by the Vir-  
ginia State Department of Education and administered through  
the College of Education and Human Development, which  
is accredited by the National Council for the Accreditation  
of Teacher Education (NCATE). Minimum scores on the  
Praxis I and II, and VCLA tests must be achieved before state  
licensure is granted.

Students must be formally accepted into the music education  
concentration by the department’s Music Teacher Education  
Committee. They must have earned 45 to 60 credits and  
completed Sight Singing and Ear Training III, Keyboard  
Skills III, and Theory III with a grade of C or higher. Other  
requirements are as follows:

• Submit scores for the Praxis I (Reading, Writing, and  
  Mathematics) tests to the committee. It is strongly recom-  
  mended that students take the Praxis I tests as soon as ENGL  
  302, a course in literature, and a course in mathematics  
  have been completed.

• Maintain an overall GPA of 2.80 in all course work com-  
  pleted at Mason and in course work at all institutions of  
  higher learning combined.

• Earn no grade lower than a C in music and professional  
  education courses needed for graduation.

• Successfully pass sight singing, ear training, keyboard, and  
  conducting proficiency exams during the first music methods  
  course (MUSI 461, 463, 464, 466, or 467). Students in the  
  voice emphasis must also pass a voice proficiency exam, and  
  students in the instrumental emphasis must pass a musical
instrument fingerling proficiency exam during the first music methods course.

- Complete all course work in the program sequence.

On fulfilling the above requirements, students must complete 15 weeks of a full-time internship or student teaching. Applications for placement, subject to approval of the committee, are submitted to the Office of Teacher Education at the beginning of the previous semester. In addition, students must pass the VCLA before student teaching and the Praxis II (Music: Content Knowledge) test during the internship semester.

### MUE Degree Requirements

#### General Education ........................................................ 21
- **Foundation Requirements**
  - Written communication .................................................. 6
  - ENGL 101 and ENGL 302 Nonnative speakers of English with limited proficiency may substitute ENGL 100 for ENGL 101. Students must attain a minimum grade of C in ENGL 100 or 101, as well as 302, to fulfill degree requirements.

- MUSI 380, 383, 387, and/or 389 Ensemble (meets general education fine arts requirement) 3
- MUSI 171 and 172 Keyboard Skills I and II                                             2

(general education communications)
### College of Visual and Performing Arts

#### Teachers Licensure

Undergraduate students seeking certification to teach vocal and choral or instrumental music at the elementary and secondary levels must earn the BM degree as specified under Concentration in Music Education section in this chapter. Students who have earned a baccalaureate degree and are seeking state licensure to teach music must also complete this sequence of courses, which constitute a state-approved program for teacher education in music.

#### Minor in Music

All music minors must pass a music audition. Music minors in the keyboard area use the Keyboard Skills I credit as a music elective.

#### Minor in Jazz Studies

This minor is open to music and nonmusic majors who wish to explore America’s unique art form. It is open to all instrumentalists and vocalists, including students who perform on instruments not normally associated with jazz. No prior experience in jazz is needed, but candidates must pass a music audition. Jazz studies minors in the keyboard area use the Keyboard Skills I credit as a music elective.

#### Minor in World Music

**Faculty and Staff**

Ballard (coordinator), Carroll, Lepore, Owens

**Course Work**

This program is designed for those who wish to widen their scope of knowledge about music while deepening their understanding of the world’s peoples. Students learn in the classroom, as well as experientially, in the form of applied studies and exercises in field work how music making functions within cultural contexts, conveying varied meanings in bodily action and musical sound worldwide. Students gain skills that will serve them in many fields of endeavor, from developing specific musical expertise to acquiring proficiency with technological and anthropological aspects of ethnomusicology.

**Requirements**

Students must complete 16 to 18 credits, with a 10-credit core and opportunities to take electives in several departments at Mason.

**Prerequisite**

Students must first demonstrate to the coordinator a basic level of knowledge and training in some area of Western or non-Western music, or earn a grade of B or higher in MUSI 103 or 431. Prerequisites for specific courses are indicated below.

**Total Required**: 3
in music or another discipline, with courses equaling the music requirements (minus the 7- to 8-credit teaching sequence) for the BA in music offered at Mason. The following admission requirements must also be met:

- Performance: audition (single or multiple instruments)
- Conducting: audition
- Composition: submission of a portfolio of compositions
- Music education: interview with music faculty and submission of a two- to three-page paper on the applicant’s philosophy of music education
- Pedagogy and performance: audition in the primary applied teaching area is required. Applicants are expected to have large and small ensemble experience on the major instrument and presented a full solo recital or equivalent. All music teaching experience should be summarized.

Diagnostic Entrance Exam
All students are required to complete placement examinations in music theory, sight singing and ear training, and basic keyboard skills. These examinations must be taken prior to the beginning of the first semester of graduate study. A sufficient placement score can reduce or eliminate prerequisites for some of the 600-level and above courses in music theory and history. The exam is offered during a three-hour period, usually on the Saturday before the first day of classes of the fall and spring semesters. For the summer schedule, see the director of graduate studies.

Foreign Language Exams
(Vocal Performance Emphasis)
Students in the MM degree program (emphasis in vocal performance) must take proficiency exams in French, German, Italian, and English to demonstrate diction competency. Students may be required to take MUSI 525, 526 Performance Seminar for Singers and Accompanists I, II.

Comprehensive Exit Exam
All students are required to pass a comprehensive exit exam administered during the graduation semester or, in the case of students selecting the thesis option in the music education concentration, on completion of 24 credits of course work and immediately before beginning work on the thesis. August graduates must take this exam during the preceding spring term. This exam is usually a three-hour written test, with questions based primarily on course work the student has taken toward the degree at Mason.

Degree Requirements
A student must successfully complete the appropriate 30 credits in graduate music courses. With approval of the department, 3 nonmusic graduate credits may be taken.

The student is admitted as concentrating in one of five areas: performance (single or multiple instrument/voice), music education, composition, conducting, or pedagogy/performances. All students are required to complete the 11 credits described below as General Requirements plus 19 credits in one of the six areas identified below as Additional Requirements. There are some limited possibilities for double concentrations. For details, see the director of graduate studies.

General Requirements for the MM (for all six options):
11 credits
MUSI 611 Analytical Techniques.................................3

GRADUATE PROGRAMS

Music, MM

MM-MUSI

The expansion of professional education in the arts is paramount for the growth and development of a rich and vital cultural community and a supporting network of individual artists. The dynamics of contemporary society suggest that the influence of the arts on public life will continue to expand well into the 21st century. Each year, opportunities increase for creative work by performers, composers, sculptors, painters, dancers, actors, historians, theoreticians, and musicologists.

The MM degree is offered as an educational channel to meet the intellectual and career needs of qualified students. It is a comprehensive and advanced program of study with a choice of concentrations in performance (single or multiple instruments), music education, composition, conducting, and pedagogy and performance. The MM with a concentration in music education does not provide licensure to teach music in public or private schools.

Admission Requirements
In addition to fulfilling admission requirements for graduate study, applicants are expected to hold a baccalaureate degree
MUSI 630 Topics in Music History/Literature 3
MUSI 662 Introduction to Research in Music 3
Ensemble 2

Additional Requirements

▲ Concentration in Composition (CPO):
MUSI 728 PMI Composition 9
MUSI 613 Graduate Orchestration 3

▲ Concentration in Performance (PFM):
MUSI 610 Topics in Music Theory 3
MUSI 630 Topics in Music History 3
MUSI 72X Graduate PMI 9
MUSI 790 Graduate Recital 1
Electives 3

▲ Concentration in Pedagogy and Performance (PPFM):
MUSI 72X Graduate PMI 6
Pedagogy I — Take one of the following: 3
MUSI 551 Keyboard Pedagogy 3
MUSI 552 Vocal Pedagogy 3
MUSI 553 Instrumental Pedagogy 3
MUSI 660 Advanced Topics in Music Education:
Pedagogy II 3
MUSI 695 Teaching Internship 2
MUSI 690 Graduate Lecture-Recital 1
MUSI 790 Graduate Recital 1
MUSI 573 Accompanying/Musicianship III (piano pedagogy only) 3
Electives 0-3
The number of students accepted in the graduate conducting concentration is limited by the extent to which it is possible to provide students with practical experience. In most cases, each student accepted is offered an opportunity to gain conducting experience by serving as an assistant conductor of a university ensemble.

Artist Certificates
The certificate is a specialized, graduate-level program for advanced musicians who desire to further develop and refine their performance art. The certificate program is a two-year course of study requiring at least two consecutive semesters of residence. A total of 32 credits is required. Advisor’s approval is required for each semester’s enrollment.

Admission Requirements

• An artist certificate application and current résumé
• A bachelor’s degree in music or equivalent (as evaluated by the Music Department Admissions Committee)
• Transcripts from previous educational institutions
• One-page written statement of student’s goals and interest in the program
• Two letters of recommendation
• A CD (preferred), audiocassette, or videotape of a live performance of solo works from the standard repertory

Applicants must perform an audition recital and be interviewed on the Mason Campus. Applicants will be notified of the date and time of the audition and interview.

Elective 1

Total 32
The PhD in music education and the doctor of musical arts degree require 60 credits beyond the master’s degree in music.

The PhD in music education, a research-intensive degree, focuses on the gathering, processing, and interpretation of information. Students in the PhD program take seminars and topics courses in music education, as well as research courses through the College of Education and Human Development. PhD graduates are expected to demonstrate the ability to communicate significant concepts of music education.

The doctor of musical arts concentrations are composition, conducting, and performance. While these concentrations share some of the required course work, each is also distinct in course requirements. Professional musicians earn the DMA to enhance and extend their knowledge and practice within their area of specialization. The DMA student focuses on the profession of music performance, as well as the theory and practice of the discipline. DMA graduates are qualified to teach music at the college or university level, as well as K–12.

Admission Requirements
In addition to meeting all admission requirements for graduate study, applicants should submit the following:
- Master’s degree in music from an accredited university
- GPA of 3.00 in master’s-level music course work; 3.50 in courses related to the prospective area of doctoral study (music education, performance, composition, or conducting)
- Three recommendations
- Satisfactory scores on GRE
- A sample of academic writing such as a graduate-level paper from a musicology or music history course taken during MM studies
- Students in performance and conducting must audition. Specific details of those requirements are available from the advisors.

- Composition students must present a portfolio of recent compositions and recordings of performances.
- Music education majors must present a dossier of their teaching experience and activities, and they must schedule an interview with music faculty (including the DGS) prior to admission.
- There is no “provisional” admission. Students must meet appropriate standards prior to commencing doctoral studies.

Placement Examinations
Prior to the beginning of the first semester of doctoral studies, the student must complete placement examinations in music theory, music history, and musicianship (including sight-singing, ear-training, and keyboard skills). Positive scores on the placement exams may reduce or eliminate prerequisites for courses in music history and music theory. Recitals can be scheduled only after completion of any necessary prerequisites in music theory, music history, and musicianship.

Academic Progress
The doctoral student must maintain a minimum of 3.00 GPA in courses presented on the degree plan, which may include no more than 6 credits with a grade of C. The GPA calculation excludes all transfer courses and Mason extended studies or nondegree credits not formally approved for the degree.

Residency
One year (fall and spring) of consecutive full-time study (9 credits per semester) is required (18 total credits). Or, the academic residency requirement may be fulfilled by earning 21 credits within 12 months (fall and spring semesters and summer term). Academic residency should be completed during the first year of study. Any necessary prerequisite courses at the 500 level can be included to meet the residency requirement. Language courses at the undergraduate level may not. Note: The academic residency does not imply meeting the standards of Virginia residency for tuition purposes.

Language Requirements
Reading proficiency is required in a language appropriate to the student’s major area of study. Normally, this will be German, French, or Italian. The DGS and the student’s Faculty Committee will determine the appropriate area of study. Reading proficiency may be accomplished by completing a reading examination provided by the music faculty. The reading examination provided by the faculty will normally consist of translation (with dictionary) of appropriate technical passages relevant to the student’s area of study within a two-hour period. The language reading proficiency should be completed prior to earning 12 credits of courses at the 600 level or above.

Faculty Committee
During the first semester of study, the college’s director of graduate studies will recommend to the dean of the College of Visual and Performing Arts five faculty members to serve as the student’s Faculty Committee; two from the student’s area of specialization (performance, conducting, or composition), one from music theory, one from music history, and one at-large. The student’s major professor will chair the committee. The director of graduate studies of the Department of Music may be part of the committee; if not, he or she will serve ex-
The Faculty Committee will evaluate the progress of the student annually. Continuation in the program is subject to the endorsement of this group. Performance and composition recitals and projects moving toward the dissertation are also subject to approval of the committee.

**Comprehensive Exams**
After the completion of required courses (excluding dissertation credits) or during the semester when completion of those courses is anticipated, the student will take comprehensive examinations. The written exams may also be followed by a one-hour oral exam if needed to clarify issues included in the written exams.

**Advancement to Candidacy**
Before doctoral students may be advanced to candidacy by the dean of the College of Visual and Performing Arts, they must complete all course work required by the program faculty, be certified in all relevant doctoral research skills, pass the comprehensive exams, and be recommended by the Faculty Committee, the director of graduate studies, and the chair of the Department of Music. Students advanced to candidacy after the add period for a given semester must wait until the following semester to register for MUSI 999 Dissertation.

**Dissertation**
The dissertation is the capstone experience of doctoral study. The dissertation will be guided by the Dissertation Committee. This group may be the student’s Faculty Committee as described above, plus a faculty member from beyond the Department of Music. All Dissertation Committee members will be appointed by the dean of the College of Visual and Performing Arts and have graduate faculty status, as approved by the university provost.

**Final Defense and Graduation**
When all degree requirements have been satisfied, including completion of the doctoral dissertation, the doctoral candidate may request a doctoral defense. Approval for the defense must be obtained from the Dissertation Committee, the director of graduate studies and the chair of the Department of Music, and the dean of the College of Visual and Performing Arts. Notice of a defense must be circulated to the university community two weeks before the defense date.

All relevant rules regarding schedule, fees, and other matters as described in the catalog must be followed. All copies of the dissertation materials and fees must be paid before the doctoral degree is awarded.

Web: gmu.edu/departments/theater

**Faculty**

Clayton Austin, Chair

**Professors:** D’Andrea (Robinson professor), Davis

**Associate professors:** Austin, Gero, Johnson-Neshati, Kurtz

Assistant professor: Elston

Term associate professor: Chew, McDonald
Advisors: Lechter, Lee, McManus, Mountain, Murray, Nanni-Messere, Naser, Wallace

Course Work
The Theater Department offers all course work designated THR in the Course Descriptions chapter of this catalog.

UNDERGRADUATE PROGRAM
The BA degree stresses the breadth of liberal arts education in the belief that such study, combined with serious practical training and experience, offers the best preparation for a life in the theater. Students electing to major in theater complete the theater core, which is a group of courses providing a broad introduction to the various theater arts and striving to create a shared body of knowledge within the department’s student population.

To organize their advanced work within the major, students elect a course of study that includes courses in at least two of three areas: performance, design and technical theater, and theater studies. The department aims to prepare students for graduate study or entry into the profession through rigorous, concentrated, and individualized training; however, students are encouraged to maintain wide-ranging interests within the department and throughout the university’s extensive offerings.

Students seeking to earn a BA as a second bachelor’s degree, either concurrently or sequentially, must complete all theater degree requirements including foreign language.

Students must earn a minimum 2.00 cumulative GPA in their major.

Writing-Intensive Requirement
The university requires all students to complete at least one course designated writing-intensive in their majors at the 300 level or above. Students seeking a BA in theater fulfill this requirement by successfully completing THR 350 or THR 351.

BA-THR
Degree Requirements

General Education .......................................................... 40

Foundation Requirements
Written communication: ENGL 101 and 302 ................. 6
Nonnative speakers of English with limited proficiency may substitute ENGL 100 for ENGL 101. Students must attain a minimum grade of C in ENGL 100 or 101, and 302 to fulfill degree requirements. Students are reminded that the English Department offers proficiency exams for credit and exemption from this requirement.
Oral communication .................................................. 3
Quantitative reasoning .................................................. 3
Either appropriate placement score on quantitative skills and one of MATH 108, 110, 111, 113, 115, 125; or IT 250; or STAT 250; or lower placement score requiring MATH 106
Information technology ............................................... 3

Core Requirements

Total .......................................................................................... 120

Practicum

Students must earn a total of 4 practicum (THR 200) credits, 1 from each of the three groups below. Students will select their fourth practicum assignment from the group of their choice.

Group 1: Performance/Design (including acting, directing, design, stage management)
Group 2: Production Crew (including run crew, wardrobe, set construction, costume construction, electrics)
Group 3: Production Administration (including positions such as master electrician, company manager, publicity manager, dramaturg)

Minor in Theater

The theater minor consists of 18 credits in theater, selected in consultation with a faculty advisor and approved by the department chair.

Honors in Theater

Students wishing to pursue Honors in Theater should contact the department chair.
