Sport Management Concentration
703-993-2060
Email: srht@gmu.edu
Webpage: https://rht.gmu.edu/under-degrees

This 120-credit degree allows students to specialize in one of three varied concentrations:

- Concentration in Parks and Outdoor Recreation (Green Leaf program)
- Concentration in Sport Management
- Concentration in Therapeutic Recreation

Requirements

Degree Requirements
Total credits: 120
This is a Green Leaf program.

Concentration in Parks and Outdoor Recreation (POR)
This concentration within the Recreation Management program explores the contribution of recreation and parks to public well-being and quality of life. The curriculum includes courses in natural resources management, outdoor recreation programming, and environmental education. The Recreation Management program is accredited by the Council on Accreditation of Parks, Recreation, Tourism and Related Professions. Graduates of this career ready program are employed in national, state, and local recreation and park agencies, non-profit organizations, and private and commercial operations. Students complete both a supervised practicum and internship in professional settings.

Admissions & Policies

Policies
For policies governing all undergraduate degrees, see Academic Policies. Students should also review Mason Core requirements.

Internship Application
The internship is a 12-credit capstone course taken at the end of a student's academic program. Students must have earned 90 credit hours and met the specific prerequisites for their concentration to be eligible for the internship (see PRLS 490 Recreation Management Internship (Mason Core), and SPMT 490 Internship (Mason Core). The internship is designed to be a capstone experience for each student in his or her specific concentration area.

The internship process begins with a mandatory meeting hosted by the internship coordinator. During the preliminary phase students will develop learning goals and consult with faculty on viable internship sites. Once the internship site has been selected, the student must complete 400 hours of an applied experience in their field of study for Sport Management and Parks and Outdoor Recreation. Therapeutic Recreation (TR) requires a 560-hour, sixteen consecutive week field placement experience in therapeutic recreation services under a certified therapeutic recreation therapist (CTRS) using the therapeutic recreation process.

Throughout the internship for all programs, the student will be monitored by a site supervisor (CTRS for therapeutic recreation), as well as a university supervisor, to facilitate a meaningful experience.

Concentration in Sport Management (SPMT)

This concentration enhances the professional development of liberal arts-educated students, thereby preparing them to assume entry-level managerial positions in the multi-billion dollar sport industry, including private enterprises, government or public employment sectors, nonprofit or voluntary agencies, and commercial sport ventures. Preparation in sport marketing, sales, finance, ethics, sport communications, economics, law, operations, planning, and program leadership fosters the skills that enhance students’ acquisition and advancement in sport management careers. An integral part of the program is the opportunity to complete two field experiences in sport organizations: a part-time practicum and a full-time internship.

Concentration in Therapeutic Recreation (TR)

This concentration within the Recreation Management program teaches a holistic approach to the treatment for people with disabilities across the lifespan. Completion of the therapeutic recreation (TR) foundation, issues, processes, programming and assessment courses to name a few, as well as an internship supervised by a Certified Therapeutic Recreation Specialist (CTRS), prepares graduating seniors to sit for the national exam sponsored by the National Council for Therapeutic Recreation Certification (http://nctrc.org) and become a CTRS. The Recreation Management program is accredited by the Council on Accreditation of Parks, Recreation, Tourism and Related Professions. Graduates find employment in clinical and community settings; senior and adult health care; non-profit organizations; and schools.

### Accelerated Master’s

#### Bachelor’s Degree (any)/Sport and Recreation Studies, Accelerated MS

**Overview**
Qualified Mason undergraduates may be admitted to a bachelor’s/accelerated master’s program and obtain a BA or BS in any degree area and a Sport and Recreation Studies, MS. See AP.6.7 Bachelor’s/Accelerated Master’s Degree for policies related to this option.

#### Application Requirements
Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in Graduate Admissions Policies. Additionally, applicants must have an overall GPA of at least 3.00. See the Accelerated Master’s Admissions (https://www2.gmu.edu/admissions-aid/how-apply/accelerated-masters) webpage to apply.

#### Accelerated Option Requirements
During their senior year, students complete three to six graduate credits in consultation with the academic program coordinator that apply to both the bachelor’s and master’s degrees. These courses are considered advanced standing for the master’s. A minimum grade of B must be earned to be eligible to count as advanced standing. While still in undergraduate status, students may take up to six graduate credits that are reserve graduate credit and therefore, are applicable to the master’s but do not count toward the undergraduate degree. Early in their final undergraduate semester, students must submit the Bachelor’s/Accelerated Master’s Transition Form to the CEHD Admissions Office and specify which courses are to be designated as advanced standing and reserve graduate credit.

#### Bachelor’s Degree (selected)/Environmental Science and Policy, Accelerated MS

**Overview**
This degree option allows highly qualified George Mason University students to earn an Environmental Science and Policy, MS in less time than if they had first graduated with an environmentally-focused Green Leaf-designated BA or BS degree and then applied to the MS program sequentially.

For more detailed information, see AP.6.7 Bachelor’s/Accelerated Master’s Degrees. For policies governing all graduate programs, see AP.6 Graduate Policies.

#### Admission Requirements
Students with an overall GPA of at least 3.20 who are pursuing any Green Leaf-designated major or minor may apply for provisional acceptance into this accelerated master’s program after completing two semesters of chemistry (including CHEM 211 General Chemistry I (Mason Core) and CHEM 212 General Chemistry II (Mason Core) and three semesters of biology, including a course in ecology, or the equivalent, for example:

Health, Fitness, and Recreation Resources, BS

Select one of the following options:

**Option 1:**
- BIOL 213 Cell Structure and Function (Mason Core)
- BIOL 214 Biostatistics for Biology Majors
- BIOL 308 Foundations of Ecology and Evolution

**Option 2:**
- EVPP 210 Environmental Biology: Molecules and Cells
- EVPP 301 Environmental Science: Biological Diversity and Ecosystems
- EVPP 302 Environmental Science: Biomes and Human Dimensions
- EVPP 305 Environmental Microbiology Essentials
- EVPP 306 Environmental Microbiology Essentials Laboratory

**Option 3:**
- CONS 401 Conservation Theory
- CONS 402 Applied Conservation
- 6 credits of BIOL or CONS electives

**Option 4:**
- CONS 403 Ecology and Conservation Theory
- CONS 404 Biodiversity Monitoring
- 6 credits of BIOL or CONS electives

By the beginning of the undergraduate’s senior year, they should first submit a Graduate Application for Accelerated Master’s Program form (obtained from the Office of Academic and Student Affairs (https://cos.gmu.edu/about/contact-us)). Secondly, in their senior year accelerated master’s students must complete the two graduate courses indicated on their Accelerated Master’s Program Application with a minimum grade of 3.00 in each course. They must maintain a minimum GPA of 3.00 in all coursework and in coursework applied to their major. Upon completion and conferral of the undergraduate degree in a Green Leaf-designated program, in the semester indicated in the application, they must additionally submit the Bachelor’s/Accelerated Master’s Transition form found on the Office of the University Registrar website (http://registrar.gmu.edu/forms) and will subsequently be admitted into graduate status.

By at least the beginning of their senior year, they should seek out a faculty member in the Department of Environmental Science and Policy who is willing to serve as their advisor (unless the student is planning to enroll in the MS concentration in Environmental Management). This advisor will aid the student in choosing the appropriate graduate courses to take and help to prepare the student for graduate studies. Admission into a research-oriented master’s concentration is dependent upon securing the agreement of a faculty advisor. Faculty from a variety of departments and colleges at George Mason (called “program faculty”) can serve as master’s advisors. Potential students are encouraged to speak with the graduate program coordinator in the department to obtain guidance on this issue.

**Application Requirements**

Applicants to all graduate programs at Mason must meet the admission standards and application requirements for graduate study as specified in the Graduate Admission Policies section of this catalog, excluding the GRE exam requirement (which is not required for those enrolled in the accelerated program). This includes three letters of recommendation (at least one from a former professor or someone with a PhD), a recent resume, a statement of interest/research goals and interests (including information on the candidate’s proposed MS research), and a letter from their advisor stating that the advisor agrees to take on the candidate as an MS student, how the candidate would be a good fit for them and why candidate’s research topic would be suitable (please note that a letter of endorsement from an advisor not necessary for candidates taking the Environmental Management concentration).

For information specific to the accelerated Environmental Science and Policy, MS, see Graduate Admissions on the department’s website (http://esp.gmu.edu/academic-programs/graduate/admissions).

**Reserve Graduate Credits**

Students admitted to this program may take graduate courses after completing 90 undergraduate credits, and up to 6 credits of appropriate environmentally-focused graduate coursework may be used in partial satisfaction of the requirements for the undergraduate degree. If students earn at least a 3.00 GPA in these classes, they are granted advanced standing in the master’s program and must then complete an additional 27-31 credits to receive the master’s degree.

To apply these credits to the master’s degree, students must request that the credits be moved from the undergraduate degree to the graduate degree using the Bachelor’s/Accelerated Master’s Transition form found on the Office of the University Registrar website (http://registrar.gmu.edu/forms) (as noted above).

Students may take up to 6 additional environmentally-focused graduate credits as reserve graduate credit. These credits do not apply to the undergraduate degree but will reduce the subsequent master’s degree credits accordingly (e.g., with 6 credits counted towards undergraduate degree plus the maximum 6 reserve credits, an MS could be completed with 21 post-bachelor’s credits). The ability to take courses for reserve graduate credit is available to all high achieving undergraduates with the permission of the department.
