Website: cs.gmu.edu/prospective-students/ms-programs/ms-in-software-engineering/

The MS in Software Engineering (MS-SWE) prepares students to become leaders in engineering high quality, large scale, computing solutions to real life problems. Software engineering spans all aspects of developing software, including requirements analysis, design, construction, testing, usability, security, maintenance, and economics. Software engineering spans all types of software, including mobile and web applications, software services, enterprise software, and large complex systems. We revise courses regularly to keep up with changes in software engineering.

The MS-SWE program emphasizes pragmatic problem solving that addresses reliability, usability, future growth, security, cost, and efficiency. Graduates go on to technical leadership positions such as engineering lead, software architect, director of engineering, and CTO, as well as managerial and executive positions. MS-SWE students come from a diversity of undergraduate backgrounds, including computer science, engineering, mathematics, sciences, and business. The DC area has one of the largest collections of software companies in the world and the workforce is constantly growing, making our graduates in very high demand. Many MS-SWE students work full-time at companies that are constantly hiring, making every class meeting a mini-job fair. All classes are scheduled in the late afternoon to accommodate part-time students.

Admissions & Policies

Admissions

To succeed in graduate courses, students entering the MS program must have coursework or equivalent knowledge in the following five foundation areas: (1) introductory programming in any programming language; (2) knowledge of an object-oriented programming language such as Java, C++, or C#; (3) data structures and algorithms; (4) machine organization such as those given in computer system architecture or assembly language courses; (5) and topics in discrete mathematics, including sets, propositional and predicate logic, relations, functions, trees, graphs, and inductive proofs.

The level of knowledge required in these areas is equivalent to that taught in undergraduate courses and may be demonstrated in one of several ways:

1. Applicable undergraduate coursework: Such courses must appear on transcripts from the student's undergraduate university, or another accredited university. Applicable courses from George Mason University and Northern Virginia Community College (NVCC) are given here:

   a. Foundation: OO programming
      - GMU CS: CS 211 Object-Oriented Programming
      - GMU IT: IT 106 Introduction to IT Problem Solving Using Computer Programming & IT 206 Object Oriented Techniques for IT Problem Solving
      - NVCC: CSC 201

   b. Foundation: Data structures
      - GMU CS: CS 310 Data Structures
      - GMU IT: IT 306 Data Structures and Algorithms in Java
      - NVCC: None

   c. Foundation: Machine organization
      - GMU CS: CS 367 Computer Systems and Programming or CS 465 Computer Systems Architecture
      - GMU IT: IT 342 Operating Systems Fundamentals
      - NVCC: None

   d. Foundation: Discrete math
      - GMU Math: MATH 125 Discrete Mathematics I (Mason Core) (http://catalog.gmu.edu/mason-core/)
      - NVCC: MATH 288

2. Preparatory coursework taken at GMU: The CS department offers the following bridge foundation courses: (1-2) SWE 510 Object-Oriented Programming in Java, (3) INFS 519 Program Design and Data Structures, (4) INFS 515 Computer Organization Course and Operating Systems, and (5) INFS 501 Discrete and Logical Structures for Information Systems. These courses may be taken by students in non-degree or provisional status.

3. Passing appropriate testout exams: Students can self-prepare and attempt testout exams for SWE 510 Object-Oriented Programming in Java, INFS 519 Program Design and Data Structures, INFS 515 Computer Organization Course and Operating Systems, and INFS 501 Discrete and Logical Structures for Information Systems. The exams are given before classes begin in January and August, and can only be taken once. Registration is not required; students need only be present at the date, time, and location specified and bring some form of photographic identification. Detailed information is available on the department web site. Students who fail any one of the exams must take the equivalent course before enrolling in the core curriculum courses.

Eligible domestic students who lack one or more foundation may be admitted provisionally and required to take the appropriate preparatory course or pass the testout exam. Other students may be advised to learn the foundation material and re-apply.

Application Requirements

In addition to general admission requirements of the university, each applicant to the MS program must hold a four-year (120-credit minimum) baccalaureate degree in an appropriate discipline from an accredited institution and have earned a GPA of 3.00 or better in the last 60 credits of undergraduate study. Other requirements are as follows:

   • Provide a resume and a one- to two-page statement of educational and work experience in the computing field that includes a statement of career goals in software engineering.
   • International students must submit their English Proficiency scores.
Policies

Program Requirements

In addition to the general requirements of the university, the MS in Software Engineering requires a minimum of 30 graduate credits. The coursework is divided into three categories: a breadth requirement of 12 credits of core courses, a depth requirement of 9 credits of emphasis courses, and 9 credits of elective courses.

Advising

The department holds orientation meetings each January and August to advise incoming and continuing students. Members of the faculty are present to answer questions and offer advice concerning programs of study. Detailed information is available on the department web site (https://cs.gmu.edu/).

The department also provides an advising function to students, as outlined in the student advising form available from the department. Each student is assigned a faculty advisor with whom to confer on matters related to degree requirements.

Software Engineering Related Courses

Students must take three courses from the following list:

Computer Science

- CS 540 Language Processors
- CS 550 Database Systems
- CS 555 Computer Communications and Networking
- CS 571 Operating Systems
- CS 675 Distributed Systems

Information Security and Assurance

- ISA 562 Information Security Theory and Practice
- ISA 650 Security Policy
- ISA 673 Operating Systems Security

Information Systems

- INFS 740 Database Programming for the World Wide Web

Operations Research

- OR 542 Operations Research: Stochastic Models

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>

<tbody>
<tr>
<td></td>
<td><strong>Total Credits</strong></td>
<td><strong>9</strong></td>
</tr>
</tbody>
</table>

1 Credit will not be given for both INFS 614 and CS 550.
2 Credit will not be given for both SWE 622 and CS 675.

Research Option

With the consent of a faculty sponsor and faculty advisor, students may complete a 6-credit thesis as part of the electives.

Electives

Students may select the remaining courses from the following list. Students may select courses not on this list with prior approval from the faculty advisor.

<table>
<thead>
<tr>

- All Software Engineering (SWE) courses at the 600-level or above. (http://catalog.gmu.edu/courses/swe/)
- All Computer Science (CS) courses at the 500-level or above. (http://catalog.gmu.edu/courses/cs/)
- All Information Security and Assurance (ISA) courses at the 600-level or above. (http://catalog.gmu.edu/courses/isa/)
- All Information Systems (INFS) courses at the 600-level or above. (http://catalog.gmu.edu/courses/infs/)
- Any of the following Electrical and Computer Engineering courses:
  - ECE 542 Computer Network Architectures and Protocols
  - ECE 612 Real-Time Embedded Systems
- Any of the following Operations Research courses:
  - OR 531 Analytics and Decision Analysis
  - OR 541 Operations Research: Deterministic Models
  - OR 542 Operations Research: Stochastic Models
- Any of the following Statistics courses:
  - STAT 544 Applied Probability
  - STAT 554 Applied Statistics I
- Any of the following Systems Engineering courses:
  - SYST 560 Introduction to Air Traffic Control
  - SYST 659 Topics in Systems Engineering
  - SYST 680 Principles of Command, Control, Communications, Computing, and Intelligence (C4I)
- Any of the following Psychology courses:
  - PSYC 530 Cognitive Engineering: Cognitive Science Applied to Human Factors
  - PSYC 734 Seminar in Human Factors and Applied Cognition

Accelerated Master's

Applied Computer Science, BS/Software Engineering, Accelerated MS

Overview
Highly-qualified students in the Applied Computer Science, BS (http://catalog.gmu.edu/colleges-schools/engineering/computer-science/applied-computer-science-bs/) can complete both a BS-ACS and a Software Engineering, MS in five years through the BS-MS accelerated (BAM) program.

General BAM policies are in the catalog under AP.6 Bachelor’s/Accelerated Master’s Degrees (http://catalog.gmu.edu/policies/academic/graduate-policies/#ap-6-7), Policies governing all graduate degrees are in the catalog under AP.6 Graduate Policies (http://catalog.gmu.edu/policies/academic/graduate-policies/).

Admission Requirements
Students in the Applied Computer Science, BS (http://catalog.gmu.edu/colleges-schools/engineering/computer-science/applied-computer-science-bs/) program are encouraged to apply to the BAM program after earning 60 undergraduate credits with an overall GPA of at least 3.30. Students must also have successfully completed CS 310 Data Structures and CS 330 Formal Methods and Models.

Accelerated Option Requirements
Students accepted to the BAM program may earn up to 12 credits of graduate coursework that count towards both the BS and MS degrees. They may begin taking graduate courses after completing 75 undergraduate credits and successfully completing CS 367 Computer Systems and Programming.

The following graduate courses can replace the corresponding undergraduate courses.

<table>
<thead>
<tr>

<td>3</td>
</tr>
</tbody>
</table>

Notes:

- Students may not use both the graduate course and the undergraduate alternative for their BS degree.
- Students must satisfy all recommended and required prerequisites for the graduate courses they take.
- Students also have the option to take up to 6 additional credits of graduate coursework on reserve, which can be used for the MS degree only.

Degree Conferral
Students must apply for degree conferral the semester before they expect to complete their BS requirements. At the beginning of their final undergraduate semester, students must submit a completed Bachelor’s-Accelerated Master’s Transition form to the CS department office. The master’s degree will be conferred after the student completes the MS requirements.

Computer Science, BS/Software Engineering, Accelerated MS

Overview
Highly-qualified students in the Computer Science, BS (http://catalog.gmu.edu/colleges-schools/engineering/computer-science/computer-science-bs/) program can complete both a BS-CS and a Software Engineering, MS in five years through the BS-MS accelerated (BAM) program.

General BAM policies are in the catalog under AP.6 Bachelor’s/Accelerated Master’s Degrees (http://catalog.gmu.edu/policies/academic/graduate-policies/#ap-6-7), Policies governing all graduate degrees are in the catalog under AP.6 Graduate Policies (http://catalog.gmu.edu/policies/academic/graduate-policies/).

Degree Conferral

Students must apply for degree conferral the semester before they expect to complete their BS requirements. At the beginning of their final undergraduate semester, students must submit a completed Bachelor’s/Accelerated Master’s Transition form to the CS department office. The master’s degree will be conferred after the student completes the MS requirements.

Information Technology, BS/Software Engineering, Accelerated MS

Overview

Highly-qualified students in the Information Technology, BS (http://catalog.gmu.edu/colleges-schools/engineering/information-sciences-technology/information-technology-bs/) have the option of obtaining an accelerated Software Engineering, MS.

For more detailed information, see AP.6.7 Bachelor’s/Accelerated Master’s Degrees (http://catalog.gmu.edu/policies/academic/graduate-policies/#ap-6-7). For policies governing all graduate degrees, see AP6 Graduate Policies (http://catalog.gmu.edu/policies/academic/graduate-policies/).

Admission Requirements

Students in the Information Technology, BS (http://catalog.gmu.edu/colleges-schools/engineering/information-sciences-technology/information-technology-bs/) program may apply to this option if they have earned 60 undergraduate credits and take graduate level courses after completion of 75 credits with an overall GPA of at least 3.30. Criteria for admission are identical to criteria for admission to the Software Engineering, MS Program.

Accelerated Option Requirements

Students must complete all credits that satisfy requirements for the BS and MS programs, with a minimum of 3 credits (maximum 6 credits) overlapping from the following courses:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>CS 583</td>
<td>Analysis of Algorithms (to replace CS 483)</td>
<td>3</td>
</tr>
<tr>
<td>CS 584</td>
<td>Theory and Applications of Data Mining (to replace CS 484)</td>
<td>3</td>
</tr>
<tr>
<td>CS 587</td>
<td>Introduction to Cryptography (to replace CS 487)</td>
<td>3</td>
</tr>
<tr>
<td>SWE 619</td>
<td>Object-Oriented Software Specification and Construction (to replace SWE 419)</td>
<td>3</td>
</tr>
<tr>
<td>SWE 637</td>
<td>Software Testing (to replace SWE 437)</td>
<td>3</td>
</tr>
<tr>
<td>SWE 642</td>
<td>Software Engineering for the World Wide Web (to replace SWE 432)</td>
<td>3</td>
</tr>
</tbody>
</table>

Note:

Students must complete MATH 125 Discrete Mathematics I (Mason Core) (http://catalog.gmu.edu/mason-core/) as their discrete math requirement and IT 306 Data Structures and Algorithms in Java as part of their concentration requirements in the BS program.

Degree Conferral

Students must apply the semester before they expect to complete the BS requirements to have the BS degree conferred. In addition, at the beginning of the student’s final undergraduate semester, students must complete a Bachelor’s/Accelerated Master’s Transition form that is submitted to the Office of the University Registrar and the VSE Graduate Admissions Office. At the completion of MS requirements, a master’s degree is conferred.
