The MS in Applied Information Technology is the very best graduate education in IT for high-potential leaders, especially those working on IT solutions that affect the federal government, industry or non-profit. Its objective is to graduate individuals of competence and character who can lead multidisciplinary teams in the design, justification, development, management, and sustainment of mega-systems from data to decision in the private and federal sectors. The MS in AIT provides a high quality curricula for students seeking to pursue their careers in the leading IT areas including Cyber Security, Big Data Analytics, Knowledge Mining, Data Analytics in Social Media, and Cyber-Human Interaction. Faculty include professors from the Volgenau School, the School of Business, and the College of Humanities and Social Sciences, plus industry leaders with unique reputations in the subject area as adjunct professors and guest lecturers. The faculty expose students to the pragmatic issues of IT, not just the theory.

Admissions & Policies

Admissions
Applicants must have completed a baccalaureate degree from an accredited program with a reputation for high academic standards and an earned GPA of 3.00 or better in their 60 highest-level credits. They must be experienced in the fundamentals of IT and quantitative methods. In addition, applicants must:

- Provide two letters of recommendation, preferably from academic references or references in industry or government who are familiar with the applicant's professional accomplishments.
- Provide a resume and detailed statement of career goals and professional aspirations.
- If their native language is not English, students must earn a minimum TOEFL score of 575 for the paper-based exam or 230 for the computer-based exam (a minimum score of 600 for the paper-based exam or 250 for the computer-based exam is required for applicants who wish to be considered for a graduate teaching assistantship).

Requirements

Degree Requirements
Total credits: 30-36 credits

Completion of the MS program requires a minimum of 30 approved graduate credits (10 courses). To provide a common background in the fundamentals of information sciences and technology, all students are required to complete four core courses. In addition to the core courses, students must choose a concentration within the program by taking six courses from one of the concentration areas listed below.

Students in all concentrations may take other VSE graduate-level courses not listed below as part of their MS technical electives subject to advisor approval.

Core Courses

AIT 724  Data Analytics in Social Media  3

**Electives**  6

AIT 614  Big Data Essentials  
AIT 624  Knowledge Mining from Big-Data  
AIT 699  Research Project  
AIT 711  Rapid Development of Scalable Applications  
AIT 734  Advanced Web Analytics Using Semantics  
AIT 799  Master’s Thesis  

Total Credits  18

**Data Analytics and Intelligence Methods (DAIN)**

Complete four required courses and two electives from the following list of courses.

**Foundation**

AIT 614  Big Data Essentials  3
AIT 624  Knowledge Mining from Big-Data  3
AIT 677  Intelligence Analysis Methods  3
AIT 724  Data Analytics in Social Media  3

**Electives**  6

AIT 582  Applications of Metadata in Complex Big Data Problems  
AIT 699  Research Project  
AIT 711  Rapid Development of Scalable Applications  
AIT 716  Human Computer Interaction  
AIT 734  Advanced Web Analytics Using Semantics  
AIT 799  Master’s Thesis  
CFRS 500  Introduction to Forensic Technology and Analysis  
CFRS 660  Network Forensics  

Total Credits  18

**IT Management in Federal Sector (IMFS)**

Select six courses from the following:  

AIT 582  Applications of Metadata in Complex Big Data Problems  
AIT 614  Big Data Essentials  
AIT 622  Determining Needs for Complex Big Data Systems  
AIT 660  Cyber Security Fundamentals  
AIT 665  Managing Information Technology Programs in the Federal Sector  
AIT 670  Cloud Computing Security  
AIT 672  Identity and Access Management  
AIT 677  Intelligence Analysis Methods  
AIT 678  National Security Challenges  
AIT 679  Law and Ethics of Big Data  
AIT 685  Capstone Seminar  

AIT 697  Leading Organizations Through Change  
AIT 701  Cyber Security: Emerging Threats and Countermeasures  

Total Credits  18

1. Students in this concentration may also take other IST graduate-level courses not listed below as part of their MS technical electives, subject to approval of the advisor.

### Accelerated Master’s

**Individualized Study, BIS/Applied Information Technology, Accelerated MS**

Overview

Highly-qualified students in the individualized Study, BIS have the option of obtaining an accelerated Applied Information Technology, MS.

For more detailed information, see AP.6.7 Bachelor’s/Accelerated Master’s Degrees. For policies governing all graduate degrees, see AP.6 Graduate Policies.

**Application Requirements**

Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in Graduate Admissions. Mason undergraduate students in the BIS Program can apply in the semester in which they will have completed 90 or more credits (including 15 Mason resident credits) applicable toward the BIS. Students must have an overall GPA of at least 3.30 to apply to the program. Criteria for admission are identical to criteria for admission into the MS in AIT Program, except that students do not need to have completed an undergraduate degree prior to acceptance into the accelerated program.

**Reserve Graduate Credit**

Students may take up to 6 additional graduate credits as reserve graduate credit. These credits do not apply to the undergraduate degree. The ability to take courses for reserve graduate credit is available to all high achieving undergraduates with the permission of the department. Permission to take a graduate course for reserve graduate credit is normally granted only to Mason seniors within 15 hours of graduation.

To apply these credits to the master’s degree, students must request that the credits be moved from the undergraduate degree to the graduate degree using the Bachelor’s/Accelerated Master’s Transition Form (http://registrar.gmu.edu/forms).

**Accelerated Option Requirements**

Students in the accelerated master’s option must maintain a minimum 3.30 GPA in the undergraduate segment until they have satisfied all requirements for the BIS degree. On completion and conferral of the undergraduate degree they submit the Bachelor’s/Accelerated Master’s Transition Form (http://registrar.gmu.edu/forms) and are admitted to graduate status.

As graduate students, accelerated master’s students have an advanced standing. Students must complete all credits that satisfy requirements of the BIS program and those of the MSAIT program, with two courses overlapping from the courses necessary to earn the BIS with a
concentration IND (individualized), applied information technology emphasis as listed below.

Note: All of the prerequisite courses indicated below must be passed with a grade of C or higher.

Students may take additional graduate-level courses as part of their BS technical electives with advisor approval. These additional graduate-level courses will not count toward the MS degree. See AP.1.4.4 Graduate Course Enrollment by Undergraduates.

**Degree Conferral**

Students must apply the semester before they expect to complete the BS requirements to have the BS degree conferred. In addition, at the beginning of the student’s final undergraduate semester, students must complete a Bachelor’s/Accelerated Master’s Transition form that is submitted to the Office of the University Registrar and the VSE Graduate Admissions Office. At the completion of MS requirements, a master’s degree is conferred.
