Academic Advising

Website: <https://chhs.gmu.edu/students/academic-advising/graduate-advising#nfs>

The master's in nutrition emphasizes a skill-set tailored to expanding nutrition-related needs. Students learn to assess, evaluate, and intervene in the most current and relevant nutrition issues. The curriculum prepares graduates to work for agencies, businesses, and organizations that seek to improve nutrition at the local, national, and global level. This program also prepares students to engage in further study for research careers in nutrition.

The curriculum includes two *optional concentrations*. The two concentrations are **Community Nutrition** and **Dietetics**.

Community Nutrition

The *Community Nutrition Concentration* emphasizes a skill-set tailored to expanding nutrition-related needs. Students learn to assess, evaluate, and intervene in the most current and relevant nutrition issues. The curriculum prepares graduates to work for agencies, businesses, and organizations that seek to improve nutrition at the local, national, and global level. This program also prepares students to engage in further study for research careers in nutrition.

Dietetics

The *Dietetics Concentration* prepares graduates for successful entrance into the field of dietetics as a competent entry-level dietician. Students learn to use the Nutrition Care Process to provide Medical Nutrition Therapy. Students will participate in learning activities, supervised and alternative experiences in a variety of Nutrition sectors.

Admissions & Policies

Admissions Requirements

Applicants must meet the admission standards and application requirements specified in Graduate Admissions (<http://catalog.gmu.edu/admissions/graduate-policies/>) and must apply using the online Application for Graduate Admission (<https://www2.gmu.edu/admissions-aid/>). For application deadlines and detailed application requirements, refer to the CHHS Admissions website (<https://chhs.gmu.edu/admissions/graduate-admissions/standards-requirements-and-deadlines/>).

Policies

Students must complete 39-45 credits of graduate coursework with at least a 3.00 GPA, which may include no more than 6 credits of courses with a grade of "C". A graduate course in which a grade of C or below is earned may be repeated only once.

For policies governing all graduate degrees, see AP.6 Graduate Policies (<http://catalog.gmu.edu/policies/academic/graduate-policies/>).

Transfer of Credit

Transfer credit is governed by university transfer of credit policy (<http://catalog.gmu.edu/policies/academic/graduate-policies/#ap-6-5>) and the university requirements for master's degrees (<http://catalog.gmu.edu/policies/academic/graduate-policies/#ap-6-9>), and transfer credit must be approved by the program director and the dean. Students who enroll initially through non-degree studies should seek course advising through the department prior to taking a course and plan to submit their application to the MS in Nutrition program in their first semester of study.

Requirements

Degree Requirements

Total credits: 39-45

Nutrition Core Courses

Code	Title	Credits
GCH 500	Foundations of Public Health	3
NUTR 515	Fundamentals of Cooking	3
NUTR 522	Nutrition Across the Lifespan	3
NUTR 620	Nutrition Education	3
NUTR 626	Food Systems	3
NUTR 651	Nutrition Assessment	3
NUTR 670	Nutrition Research Methods	3
NUTR 675	Nutrition Program Development, Interventions and Assessments	3
Total Credits		24

Concentrations

Students may select one of the concentration listed below. Students interested in a concentration should declare a concentration before starting their second semester in the program. Students not interested in a concentration must complete 12 credits of graduate-level coursework in consultation with their faculty advisor.

Concentration in Community Nutrition (CMNT)

The *Community Nutrition Concentration* emphasizes a skill-set tailored to expanding nutrition-related needs. Students learn to assess, evaluate, and intervene in the most current and relevant nutrition issues. The curriculum prepares graduates to work for agencies, businesses, and organizations that seek to improve nutrition at the local, national, and global level. This program also prepares students to engage in further study for research careers in nutrition.

Code	Title	Credits
NUTR 513	Advanced Community Nutrition	3
NUTR 553	Nutrients	3
NUTR 583	Food and Culture	3
Select one course from below:		3
NUTR 566	Nutrition and Weight Management	
NUTR 608	Perspectives on Food Security	
NUTR 610	Food Safety and Defense	
NUTR 611	Food and Nutrition Security Policy	

NUTR 630	Global Nutrition	
GCH 752	Nutritional Epidemiology	
Other electives as approved by faculty advisor.		
Total Credits		12

Concentration in Dietetics (DIET)

The Dietetics Concentration prepares graduates for successful entrance into the field of dietetics as a competent entry-level dietician. Students learn to use the Nutrition Care Process to provide Medical Nutrition Therapy. Students will participate in learning activities, supervised and alternative experiences in a variety of Nutrition sectors.

Code	Title	Credits
NUTR 537	Food Service Management	3
NUTR 587	Profession of Dietetics ¹	2
NUTR 622	Nutrition Counseling and Communication	3
NUTR 662	Medical Nutrition Therapy I	3
NUTR 667	Medical Nutrition Therapy II	3
NUTR 687	Supervised Experiential Practice ²	7
Total Credits		21

¹ NUTR 587 must be taken twice for a total of two credits.

² NUTR 687 must be taken four times for a total of seven credits. Students must work with their faculty advisor to discuss the total number of credits needed for each semester.

Electives

Students who do not select a concentration are required to take 12 credits of graduate-level coursework in consultation with their faculty advisor.

Capstone Experience

Students in the Community Nutrition Concentration or those who do not select a concentration must complete either the Practicum or Thesis option. Students in the Dietetics Concentration do not need to complete the Practicum or Thesis option.

Practicum Option

The practicum option entails a supervised practical application of previously studied theory through fieldwork. Students will be required to engage for a minimum of 200 contact hours per practicum in a nutrition-related organization under the guidance of a preceptor and a faculty advisor. Students must attend one seminar course, complete a project while working in the agency, and produce a formal report and presentation during the practicum. Students will enroll in the Pre-Practicum course the semester prior to conducting the practicum. In their final semester, students will enroll in the Nutrition Practicum.

Code	Title	Credits
NUTR 788	Pre-Practicum Seminar	0
NUTR 790	Nutrition Practicum	3
Total Credits		3

Thesis Option

The thesis option is a research project incorporating an original design to test a theory and resulting in a final written thesis. The topic must fall within one of the areas of faculty expertise within the department, including: food science, food studies, global nutrition, public health nutrition, nutrition policy, nutrition assessment, and chronic disease and

nutrition. Students may register for the thesis only with approval from their advisor and after they have completed at least 18 credits of the program.

Students in the master's thesis option are required to work with a committee of three faculty members. It is the responsibility of the student to form a committee at least 9 months before the desired graduation. The thesis director and at least one of the committee members must be members of the Department of Nutrition and Food Studies faculty, but the third member may or may not be from the department. Students must take the thesis course (3 credits total) while working on their thesis. Students must develop a proposal and have it approved by their committee and by the appropriate University committees, such as the Human Subjects Review Board, before undertaking the project. The thesis must conform to the format stated within Mason's University Libraries guidelines.

Code	Title	Credits
Three credits of		3
NUTR 799	Thesis Research	
Total Credits		3

Accelerated Master's

Bachelor's Degree (any)/Nutrition, Accelerated MS

Overview

Qualified undergraduates may be admitted to the bachelor's/accelerated master's program (BAM) and obtain a bachelor's degree in any program and an MS in Nutrition in an accelerated timeframe after satisfactory completion of a minimum of 147 credits.

See AP.6.7 Bachelor's/Accelerated Master's Degrees (<http://catalog.gmu.edu/policies/academic/graduate-policies/#ap-6-7>) for policies related to this program.

Students in an accelerated degree program must fulfill all university requirements for the master's degree. For policies governing all graduate degrees, see AP.6 Graduate Policies (<http://catalog.gmu.edu/policies/academic/graduate-policies/>).

BAM Pathway Admission Requirements

Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in Graduate Admissions Policies and Bachelor's/Accelerated Master's Degrees policies. For information specific to this accelerated master's program, see <https://chhs.gmu.edu/admissions/graduate-admissions/standards-requirements-and-deadlines#> (<https://chhs.gmu.edu/admissions/graduate-admissions/standards-requirements-and-deadlines/>).

Students will be considered for admission into the BAM Pathway after completion of a minimum of 60 credits, completion of NUTR 295 Introduction to Nutrition (Mason Core) (<http://catalog.gmu.edu/mason-core/>) or equivalent, completion of BIOL 124 Human Anatomy and Physiology or BIOL 213 Cell Structure and Function or equivalent, and a minimum overall GPA of 3.25.

Students who are accepted into the BAM Pathway will be allowed to register for graduate level courses after successful completion of a minimum of 75 undergraduate credits and course-specific prerequisites.

Accelerated Master's Admission Requirements

Students already admitted in the BAM Pathway will be admitted to the MS in Nutrition program, if they have met the following criteria, as verified on the Bachelor's/Accelerated Master's Transition form:

- Overall GPA of 3.25
- Successfully completed NUTR 295 Introduction to Nutrition (Mason Core) (<http://catalog.gmu.edu/mason-core/>) or equivalent.
- Successful completion of BIOL 124 Human Anatomy and Physiology or BIOL 213 Cell Structure and Function or equivalent.
- Successfully meeting Mason's requirements for undergraduate degree conferral (graduation) and completing the application for graduation.

Accelerated Pathway Requirements

To maintain the integrity and quality of both the undergraduate and graduate degree programs, undergraduate students interested in taking graduate courses must choose from the following:

Advanced Standing course:

Code	Title	Credits
NUTR 513	Advanced Community Nutrition	3
NUTR 515	Fundamentals of Cooking	3
NUTR 522	Nutrition Across the Lifespan	3
NUTR 626	Food Systems	3

*other courses as approved by department chair.

Reserve credit courses: (optional)

Code	Title	Credits
NUTR 553	Nutrients	3
NUTR 670	Nutrition Research Methods	3

For more detailed information on coursework and timeline requirements, see AP6.7 Bachelor's/Accelerated Master's Degrees (<http://catalog.gmu.edu/policies/academic/graduate-policies/#ap-6-7>) policies.
