This master's degree provides advanced training for recent college graduates, professionals in teaching, and technical workers in research organizations who have an interest in chemistry or biochemistry.

Admissions & Policies

Admissions

University-wide admissions policies can be found in the Graduate Admissions Policies section of this catalog.

To apply for this program, please complete the George Mason University Admissions Application (https://www2.gmu.edu/admissions-aid/apply-now).

To be considered for admission to degree status, students must have a bachelor's degree in chemistry, biochemistry, or a related field from a regionally accredited institution and must meet general admission requirements for graduate study as specified in Graduate Admission Policies. Admission is based on a departmental evaluation of the applicant's background as evidenced by transcripts, résumés, and letters of recommendation.

Policies

CHEM 500 Selected Topics in Modern Chemistry may not be applied toward the MS degree.

CHEM courses numbered 502 through 510 may be applied toward the degree only with prior written approval of the department.

For policies governing all graduate programs, see AP.6 Graduate Policies.

Requirements

Degree Requirements

Total credits: 30

Students should refer to the Admissions & Policies tab for specific policies related to this program.

Core Courses

Select three of the following core courses. Courses must be selected from three different core areas shown below: ¹

<table>
<thead>
<tr>
<th>Analytical:</th>
<th>Inorganic:</th>
</tr>
</thead>
<tbody>
<tr>
<td>CHEM 624</td>
<td>CHEM 641</td>
</tr>
<tr>
<td>Principles of Chemical Separation</td>
<td>Solid State Chemistry</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Biochemistry:</th>
<th>Organic:</th>
</tr>
</thead>
<tbody>
<tr>
<td>CHEM 660</td>
<td>CHEM 613</td>
</tr>
<tr>
<td>Protein Biochemistry</td>
<td>Modern Polymer Chemistry</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Environmental:</th>
<th>Total Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>CHEM 662</td>
<td>9</td>
</tr>
<tr>
<td>Modern Methods of Drug Discovery</td>
<td></td>
</tr>
</tbody>
</table>

MS without Concentration

General chemistry students who do not wish to pursue a concentration complete the following requirements and choose either the Thesis Option or the Non Thesis Option:

One Additional Core Course

<table>
<thead>
<tr>
<th>CHEM 633</th>
<th>Chemical Thermodynamics and Kinetics</th>
</tr>
</thead>
</table>

Chemistry Electives

<table>
<thead>
<tr>
<th>Select 3 credits of CHEM designated courses</th>
</tr>
</thead>
</table>

Select 6 credits of courses in chemistry or related fields, approved by the graduate committee prior to registration

Seminar

<table>
<thead>
<tr>
<th>CHEM 790</th>
<th>Graduate Seminar</th>
</tr>
</thead>
</table>

Thesis or Non Thesis

Select the Thesis Option or the Non Thesis Option

<table>
<thead>
<tr>
<th>Select the Thesis Option or the Non Thesis Option</th>
</tr>
</thead>

<tbody>
<tr>
<td>21</td>
</tr>
</tbody>
</table>

Thesis Option

The Thesis Option is designed for students planning to pursue a doctoral degree or a career involving research in the chemical, biochemical, environmental, or pharmaceutical industries.

Students must choose a research laboratory advisor during their first semester in the program and begin working on their thesis project no later than the second semester. The thesis is based on research that must be preapproved by the thesis or advisory committee, which is appointed prior to the first semester of registration in CHEM 799 Master's Thesis. Students must complete CHEM 799 Master's Thesis and present a seminar, followed by an oral defense.

<table>

</thead>
<tbody>
<tr>
<td>6</td>
</tr>
</tbody>
</table>

Non Thesis Option

The Non Thesis Option is designed for those seeking to go on to professional school, teach chemistry in secondary schools, or pursue other careers in which advanced work in chemistry is necessary or advantageous.

Students selecting this option are not required to complete a laboratory-based thesis. Instead, they must complete a research project or gain
teaching experience in undergraduate chemistry labs, as described below.

Any combination of CHEM 670 Teaching Practicum and CHEM 796 Directed Reading and Research may be used to fulfill this requirement. However, CHEM 796 Directed Reading and Research may be used to fulfill this requirement only with prior written approval of the department and must be used to complete a laboratory or library-based research project, or must otherwise enhance the student’s teaching skills.

**Non Thesis Option**
Select 3 credits of the following: 3
- CHEM 670 Teaching Practicum
- CHEM 796 Directed Reading and Research

Additional Chemistry Electives 3
Select 3 credits of CHEM designated courses

Total Credits 6

**MS with Concentration in Biochemistry (BC)**
Students who wish to pursue an optional concentration in biochemistry complete the following requirements and choose either Thesis Option or the Non Thesis Option:

**One Additional Core Course** 3
- CHEM 633 Chemical Thermodynamics and Kinetics

**Chemistry Electives** 3
Select 3 credits of CHEM designated courses

**Seminar** 3
- CHEM 790 Graduate Seminar

**Thesis or Non Thesis** 12
Select the Thesis Option or the Non Thesis Option

Total Credits 21

**Thesis Option**
The Thesis Option is designed for students planning to pursue a doctoral degree or a career involving research in the chemical, biochemical, environmental, or pharmaceutical industries.

Students must choose a research laboratory advisor during their first semester in the program and begin working on their thesis project no later than the second semester. The thesis is based on research that must be preapproved by the thesis or advisory committee, which is appointed prior to the first semester of registration in CHEM 799 Master’s Thesis. Students must complete CHEM 799 Master’s Thesis and present a seminar, followed by an oral defense.

**Biochemistry Electives** 6
Select 6 credits of electives in biochemistry or related fields with approval from department

**Thesis** 6
- CHEM 799 Master’s Thesis

Total Credits 12

**Non Thesis Option**
The Non Thesis Option is designed for those seeking to go on to professional school, teach chemistry in secondary schools, or pursue other careers in which advanced work in chemistry is necessary or advantageous.

Students selecting this option are not required to complete a laboratory-based thesis. Instead, they must complete a research project or gain teaching experience in undergraduate chemistry labs, as described below.

Any combination of CHEM 670 Teaching Practicum and CHEM 796 Directed Reading and Research may be used to fulfill this requirement. However, CHEM 796 Directed Reading and Research may be used to fulfill this requirement only with prior written approval of the department and must be used to complete a laboratory or library-based research project, or must otherwise enhance the student’s teaching skills.

**Non Thesis Option**
Select 3 credits of the following: 3
- CHEM 670 Teaching Practicum
- CHEM 796 Directed Reading and Research

Biochemistry Electives 9
Electives in biochemistry or related fields with approval from department

Total Credits 12

**Accelerated Master’s**

**Chemistry, BS/Chemistry, Accelerated MS Overview**
This bachelor’s/accelerated master’s degree program allows academically strong undergraduates with a commitment to research to obtain both the Chemistry, BS and the Chemistry, MS degrees within an accelerated timeframe. Upon completion of this 144 credit program, students will be exceptionally well prepared for entry into a professional school or a PhD program in chemistry or a related discipline. Students are eligible to enter this program and enroll in graduate courses after successfully completing 90 undergraduate credits, inclusive of prerequisites, toward the Chemistry, BS degree. This flexibility makes it possible for students to complete graduate coursework during their final year.

For more detailed information, see AP.6.7 Bachelor’s/Accelerated Master’s Degrees. For policies governing all graduate degrees, see AP.6 Graduate Policies.

**Application Requirements**
Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in the Graduate Admission Policies section of this catalog. Application information for this accelerated master’s program can be found here (https://www2.gmu.edu/admissions-aid/how-apply/accelerated-masters).

Successful applicants will have an overall undergraduate GPA of at least 3.00. Additionally, they will have completed 36 credits of CHEM courses with a GPA of at least 3.00.

**Accelerated Option Requirements**
At the beginning of the student’s final undergraduate semester, students must submit a bachelor’s/accelerated master’s transition form (available from the Office of the University Registrar (http://registrar.gmu.edu)) to the College of Science’s Office of Academic and Student Affairs (https://cos.gmu.edu/about/contact-us). Students must begin their
master's program in the semester immediately following conferral of the bachelor's degree.

Students must maintain an overall GPA of 3.00 or higher in graduate coursework and should consult with their faculty advisor to coordinate their academic goals within the chemistry and biochemistry concentrations.

**Reserve Graduate Credit**

While still in undergraduate status, a maximum of 6 additional graduate credits may be taken as reserve graduate credit and applied to the master’s program. Reserve graduate credits do not apply to the undergraduate degree.
