geoinformation-science

The Earth Systems and Geoinformation Sciences (ESGS) doctoral program is based upon the integration of the scientific disciplines in geosystems, geography, geosciences, and geoinformatics. Students receive broad-based training in systematic geosciences and geography, as well as technical courses in computation and geoinformation sciences. The ESGS doctoral program represents a gateway to an academic career for some students; for others, it facilitates career advancement in the public sector or private industry. Graduates are equipped to participate in interdisciplinary research, which is the norm in today's research arena.

Admissions & Policies

Admissions

University-wide admissions policies can be found in Graduate Admissions Policies (http://catalog.gmu.edu/admissions/graduate-policies/).

To apply for this program, please complete the George Mason University Admissions Application (https://www2.gmu.edu/admissions-aid/applynow/).

Eligibility

This program is intended for graduates who hold a MS or MA degree in atmospheric science, climatology, meteorology, Earth science, geology, environmental science, remote sensing, hydrology, oceanography, geography, or a related field. Highly-qualified students with a BS or BA in applicable fields are also encouraged to apply. Knowledge of mathematics through calculus is preferred. Interested applicants should contact the GGS academic coordinator or the graduate coordinator for more specific advice.

Application Requirements

To apply, prospective students should complete the George Mason University Admissions Application (https://www2.gmu.edu/admissions-aid/apply-now/). Official transcripts from each college and graduate institution attended, a current résumé, three letters of recommendation, and an expanded goals statement will be required.

GRE scores are not required for admission into this program, but are strongly encouraged if a student is seeking internal funding support.

Policies

For policies governing all graduate programs, see AP.6 Graduate Policies (http://catalog.gmu.edu/policies/academic/graduate-policies/).

Reduction of Credits

For students entering the doctoral program with a master's degree in a related field from an institution of higher education accredited by a Mason-recognized U.S. institutional accrediting agency or international equivalent, the number of required credits may be reduced up to 30 credits, subject to approval of the program faculty and the associate dean for student affairs. See AP.6.5.2 Reduction of Credits (http://catalog.gmu.edu/policies/academic/graduate-policies/#ap-6-5-2) for more information.

Secondary Program Options

Students enrolled in this doctoral program have the option of adding a secondary graduate certificate or master's program (http://catalog.gmu.edu/colleges-schools/science/geographygeoinformation-science/#programstext). Depending upon the secondary program chosen, many courses may be applicable to both programs. Before adding a secondary program, students are advised to carefully review AP.6.8 Requirements for Graduate Certificate (http://catalog.gmu.edu/policies/academic/graduate-policies/#ap-6-8)s or AP.6.9 Requirements for Master's Degrees (http://catalog.gmu.edu/policies/academic/graduate-policies/#ap-6-9) and AP.6.10 Requirements for Doctoral Degrees (http://catalog.gmu.edu/policies/academic/graduate-policies/#ap-6-10). Faculty advisors should be contacted for further guidance and for secondary program suggestions.

Requirements

Degree Requirements

Total credits: 72

Students should refer to the Admissions & Policies tab for specific policies related to this program.

Core Courses

GGS 656

Students are required to choose from the following courses in the core areas below. Of the cores, students must complete at least one course in five of the cores and two courses in at least three of those five cores.

Code	Title	Credits
The core areas fro	m which to choose these credits are:	24
Quantitative Co	re:	
GGS 560	Quantitative Methods	
GGS 754	Earth Science Data and Advanced Data Analysis	
GGS 791	Advanced Spatial Statistics	
Geoinformatics	Core:	
GGS 650	Introduction to GIS Algorithms and Programming	
GGS 664	Spatial Data Structures	
GGS 675	Location Science	
GGS 692	Web-based Geographic Information Systems	
GGS 787	Scientific Data Mining for Geoinformatics	
Geosciences ar	nd Physical Geography Core:	

The Hydrosphere

	GGS 657	The Lithosphere		
	GGS 670	Introduction to Atmosphere and Weather		
	PHYS 575	Atmospheric Physics		
	Human Geography Core:			
	GGS 505	Transportation Geography		
	GGS 507	Geographic Approaches for Sustainable Development		
	GGS 516	Geography of Latin America		
	GGS 517	Geography of China		
	GGS 518	Geography of North Africa and the Middle East		
	GGS 526	Geography of Eastern Europe and Russia		
	GGS 533	Issues in Regional Geography		
	GGS 540	Health Geography		
	GGS 704	Spatial Demography		
	Geographic Information Science Core:			
	GGS 553	Geographic Information Systems		
	GGS 563	Advanced Geographic Information Systems		
	Remote Sensing Core:			
	GGS 579	Remote Sensing		
	GGS 622	Drone Remote Sensing		
	GGS 626	Physical Fundamentals of Remote Sensing		
	GGS 629	Remote Sensing of the Environment and Earth System		
	GGS 680	Earth Image Processing		
	GGS 760	Advanced Topics in Remote Sensing		
	GGS 777	Remote Sensing Natural Hazards		
T	otal Credits		24	

Research Synthesis and Colloquium

Code	Title	Credits
Research Synthes	is	
Select one from th	e following:	3
GGS 684	Selected Topics in Geospatial Intelligence	
GGS 689	Seminar in Geographic Thought and Methodology	
Colloquium		2
GGS 900	Geography and Geoinformation Science Colloquium (complete twice)	
Total Credits		5

Electives

Code	Title	Credits
In consultation with the advisor, students select credits		19-31
necessary to	reach 72 total credits 1	

At least half of the elective credits taken at Mason must be from GGS courses.

Dissertation Research

Students take 12-24 credits, with at least 6 credits in GGS 999 Dissertation. After reaching candidacy, students must stay continuously enrolled GGS 999 Dissertation until defending their dissertation.

Code	Title	Credits
Select 12-24 credits	from the following:	12-24
GGS 998	Dissertation Proposal	
GGS 999	Dissertation	
Total Credits		12-24

Dissertation Committee

All students will be assigned a temporary academic advisor when they first enroll in the program. No later than the end of the second year, each student should identify a dissertation advisor and form a doctoral committee. The committee will be chaired by a GGS tenure or tenure-track professor and be composed of at least four members. GGS tenure or tenure-track faculty should be at least 50% and have larger committee membership than any other Mason department/academic unit or external organization. At least one member should be a tenure or tenure-track faculty member from another Mason department or program outside of GGS. All members of the committee must be Mason Graduate Faculty and approved by the department's chair.

Candidacy Examination

After completing all required courses, each student must take a candidacy exam administered by the dissertation committee. The exam will have written and oral components. Its purpose is to determine whether the student has acquired adequate general knowledge in the selected subject area, as well as much more detailed knowledge of the specific research topic planned for the dissertation.

Dissertation Proposal and Advancement to Candidacy

After students have completed all required courses and passed the candidacy exam, they should prepare an acceptable dissertation proposal. After the dissertation proposal is approved and the appropriate paperwork is completed, the student will be advanced to candidacy.

Doctoral Dissertation

The degree will be awarded upon completion of the required coursework and successful defense of a PhD dissertation that makes an original and significant contribution to the field.
