BIOLOGY, MS

Banner Code: SC-MS-BIOL

Ancha Baranova, Program Director

312 Colgan Hall
Science and Technology Campus

Phone: 703-993-4263
Email: biologygrad@gmu.edu
Website: ssb.gmu.edu

This program provides advanced training for college graduates or professionals seeking careers in the biomedical research, biotechnology, neuroscience or biodefense, as well as evolutionary and animal biology, animal biology and biology teaching. Master’s level concentrations are available in microbiology and infectious disease, molecular biology, neuroscience, evolutionary biology, and translational and clinical research. Alternatively, students may choose the program in general biological sciences, which allows flexibility to build a degree program tailored to a specific research or career interest.

Admissions & Policies

Admissions

University-wide admissions policies can be found in the Graduate Admissions Policies section of this catalog.

To apply for this program, please complete the George Mason University Admissions Application (https://www2.gmu.edu/admissions-aid/apply-now).

While each applicant’s qualifications are reviewed as a whole, the following are provided: Applicants to the program must have a bachelor’s degree in biology or its equivalent. Additionally, all MS concentrations require a GPA of 3.00 in biology coursework or in the last 60 credits of undergraduate study. Students must also submit three letters of recommendation and scores on the GRE general exam. Exam scores should be in the 45th percentile or above. Admission is contingent on acceptance by a faculty research advisor.

Microbiology and Infectious Disease (MID) Concentration

Students who choose the Microbiology and Infectious Disease Concentration (MID) must have a lecture and lab course in microbiology and a lecture course in biochemistry.

Translational and Clinical Research (TCR) Concentration

Students who choose the Translational and Clinical Research Concentration may submit MCAT scores in place of GRE general exam scores.

Evolutionary Biology (EB) Concentration

Students who choose the Evolutionary Biology Concentration must also submit a personal statement/statement of interest consistent with at least one faculty member’s research program. GRE score should be approximately 303.

Policies

For policies governing all graduate programs, see AP:6 Graduate Policies.

Requirements

Degree Requirements

Total credits: 30

Students should refer to the Admissions & Policies tab for specific policies related to this program.

Program of Study

The faculty advisor and the student work together to develop a program of study that best fits the student’s background and interests. The student must submit a program of study to the program director for approval within the first 12 credits of coursework. By the end of the second semester of coursework, students will form a graduate committee made up of three faculty members. At least two committee members must be faculty in the School of Systems Biology.

Concentration Options

Candidates for the Biology, MS focus their study in one of five approved concentrations below, or by completing coursework for the program in biological sciences in an area of study chosen in consultation with the student's advisor and program director.

Research Options

Students have the option to complete a 3-6 credit master's thesis (BIOL 799 Thesis) or a 1-3 credit research project (BIOL 798 Master's Research Project). In accordance with AP:6 Graduate Policies, the same quality of work is expected of students regardless of which option they choose.

• Thesis: In general, the MS thesis is most appropriate for students planning or considering a research career. Students pursuing the thesis option must write a formal thesis that meets the requirements of the school and must defend their thesis and present their results in a public seminar.

• Research Project: The MS project is most appropriate for students who have scheduling commitments, such as a full-time job, that may preclude performing a complete series of laboratory experiments. Students pursuing the project option must successfully complete written and oral comprehensive exams.

**Research** 1-6

Select one from the following:

- BIOL 798  Master’s Research Project
- BIOL 799  Thesis (3-6 credits)

**Electives** 7-14

Select 7-14 credits from the following:

- BIOL 564  Techniques in Virology
- BIOL 553  Advanced Topics in Immunology
- BIOL 682  Advanced Eukaryotic Cell Biology
- BIOS 743  Genomics, Proteomics, and Bioinformatics
- BIOS 710  Current Topics in Bioscience

Or relevant graduate level coursework selected in consultation with the advisor

**Total Credits:** 30

---

**MS with Concentration in Molecular Biology (MOB)**

**Research Methodology** 1-3

- BIOL 690  Introduction to Graduate Studies in Biology
- or BIOS 702  Research Methods

**Core Biology** 13

- BIOL 568  Advanced Topics in Molecular Genetics
- or BIOS 744  Molecular Genetics
- BIOL 583  General Biochemistry
- BIOL 682  Advanced Eukaryotic Cell Biology
- BIOL 579  Molecular Evolution and Conservation Genetics
- or BIOS 767  Molecular Evolution

**Bioinformatics** 3

Select one from the following:

- BIOL 580  Computer Applications for the Life Sciences
- BINF 630  Bioinformatics Methods
- BINF 634  Bioinformatics Programming

**Molecular Techniques** 2-4

Select 2-4 credits from the following:

- BIOL 585  Eukaryotic Cell Biology Laboratory
- BIOL 678  Cell-Based Assays
- BIOS 740  Laboratory Methods in Functional Genomics and Biotechnology

Special topics courses, such as BIOL 575 or BIOL 691, may also be approved for this requirement by the program director, but only in semesters in which they are primarily a laboratory course of at least two credits with substantial content of techniques in molecular biology.

**Seminar** 2

- BIOL 695  Seminar in Molecular, Microbial, and Cellular Biology

**Research** 1-6

Select one from the following:

- BIOL 798  Master’s Research Project
- BIOL 799  Thesis (3-6 credits)

**Electives** 0-8

Select 0-8 credits from the following:

- BIOL 553  Advanced Topics in Immunology
- BIOL 568  Advanced Topics in Molecular Genetics
- BIOL 669  Pathogenic Microbiology
- BIOL 715  Microbial Physiology
- BIOL 718  Techniques in Microbial Pathogenesis
- BIOL 695  Seminar in Molecular, Microbial, and Cellular Biology

**Total Credits:** 30
### MS with Concentration in Neuroscience (NEUR)

**Research Methodology**

Select 2 credits from the following:

- NEUR 600 Chemistry and the Brain
- NEUR 601 Developmental Neuroscience
- NEUR 602 Cellular Neuroscience
- NEUR 603 Mammalian Neuroanatomy
- NEUR 604 Ethics in Scientific Research
  or BINF 705 Research Ethics
- NEUR 701 Neuroscience Laboratory

**Seminar**

Select 2 credits from the following:

- BIOL 695 Seminar in Molecular, Microbial, and Cellular Biology
- BIOS 704 Topics in Biosciences
- NEUR 709 Neuroscience Seminars

**Statistics**

Select 3-4 credits from the following:

- ECE 528 Introduction to Random Processes in Electrical and Computer Engineering
- PSYC 611 Advanced Statistics

**Total Credits:** 30

---

### MS with Concentration in Evolutionary Biology (EB)

**Seminar**

Select 2 credits from the following:

- BIOL 692 Seminar in Biology
  or BIOL 695 Seminar in Molecular, Microbial, and Cellular Biology
- BIOL 692 Seminar in Biology
  & BIOL 695 Seminar in Molecular, Microbial, and Cellular Biology

**Core Courses**

Select at least two courses from the following:

- BIOL 574 Population Genetics
- BIOL 579 Molecular Evolution and Conservation Genetics
- BIOL 648 Population Ecology

**Organismal Biology**

Select 6-8 credits from the following suggestions in consultation with an advisor and/or committee and the program director:

- BIOL 501 Microbial Diversity: An Organismal Approach
- BIOL 507 Selected Topics in Ecology
- BIOL 508 Selected Topics in Animal Biology
- BIOL 518 Conservation Biology
- BIOL 532 Animal Behavior
- BIOL 533 Selected Topics in Plant Biology

**Total Credits:** 30

Biology, MS

Curriculum Notes

- For students concurrently enrolled in the Advanced Biomedical Sciences Graduate Certificate, contact your advisor for details regarding:
  - BMED course credit that may be counted towards this concentration
  - Meeting requirements for graduate certificates and requirements for master's degrees

Accelerated Master's

Biology, BS/Biology, Accelerated MS

Overview

Qualified undergraduates may be admitted into an accelerated master's program and obtain both a Biology, BS and a Biology, MS within an accelerated time frame. Students admitted to this program may take graduate courses after completing 90 undergraduate credits, and up to 6 credits of graduate work may be used in partial satisfaction of the requirements for the undergraduate degree. If students earn at least a 3.00 GPA in these classes, they are granted advanced standing in the master's program and must then complete an additional 24 credits to receive the master's degree. All other master's degree requirements must be met, including a minimum of 18 credits taken for the master's after the bachelor's degree is complete.

For more detailed information, see AP.6.7 Bachelor’s/Accelerated Master’s Degrees. For policies governing all graduate programs, see AP.6 Graduate Policies.

Application Requirements

Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in the Graduate Admission Policies section of this catalog. Application information for this accelerated master's program can be found on the School of Systems Biology's website (http://ssb.gmu.edu/admissions).

Successful applicants will have an overall undergraduate GPA of at least 3.20. Additionally, they will have completed the following courses with a GPA of 3.00 or higher:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>BIOL 213</td>
<td>Cell Structure and Function (Mason Core)</td>
<td>4</td>

<td>Organic Chemistry I</td>
<td>3</td>
</tr>
<tr>
<td>CHEM 315</td>
<td>Organic Chemistry Lab I</td>
<td>2</td>
</tr>
</tbody>
</table>

Three letters of recommendation, including one from a prospective thesis or project advisor, are required.

Accelerated Option Requirements

At the beginning of the student's final undergraduate semester, students must submit a bachelor's/accelerated master's transition form (available from the Office of the University Registrar (http://registrar.gmu.edu)) to the College of Science's Office of Academic and Student Affairs (https://cos.gmu.edu/about/contact-us). Students must begin their master's program in the semester immediately following conferral of the bachelor's degree.

Students must maintain an overall GPA of 3.00 or higher in graduate coursework and should consult with their faculty advisor to coordinate their academic goals.

After completing 120 credits and all requirements for the bachelor's degree and filing the Graduation Intent Form, students are awarded a bachelor's degree. Accelerated master's students must then submit scores on the GRE to have the provisional qualifier removed. Ordinarily, students should receive a minimum combined score of 303 on the verbal and quantitative portions of the general test.

Reserve Graduate Credit

While still in undergraduate status, a maximum of 6 additional graduate credits may be taken as reserve graduate credit and applied to the master's program. Reserve graduate credits do not apply to the undergraduate degree.
