PSYCHOLOGY (PSYC)

100 Level Courses

PSYC 100: Basic Concepts in Psychology. 3 credits.
Introduces psychology as scientific discipline. Examines concepts and methods in learning, motivation, development, personality, and measurement. Offered by Psychology. May not be repeated for credit.

Mason Core: Social/Behavioral Sciences

Schedule Type: Lecture, Recitation

200 Level Courses

PSYC 211: Developmental Psychology. 3 credits.
Review of major developmental theories including perspectives of childhood, adolescence, adulthood, and old age. Offered by Psychology. May not be repeated for credit.

Mason Core: Social/Behavioral Sciences

Recommended Prerequisite: PSYC 100 or permission of instructor.

Schedule Type: Lecture

PSYC 231: Social Psychology. 3 credits.
Study of human behavior development in a social matrix, including such topics as socialization, cultural behavior, group norms, and attitude formation. Offered by Psychology. May not be repeated for credit.

Mason Core: Social/Behavioral Sciences

Recommended Prerequisite: PSYC 100 or permission of instructor.

Schedule Type: Lecture

PSYC 260: Basic Research Methods in Psychology. 1-3 credits.
Introduction to research methods in psychology in the context of assisting faculty with research; individualized sections by arrangement with faculty. Methods taught vary but generally include basic data collection and recordkeeping methods in research. Notes: Course culminates in a paper describing techniques learned. No more than 6 credits in PSYC 260, 350, and 460 can be used toward a psychology major. Offered by Psychology. May be repeated within the term.

Recommended Prerequisite: A 3.0 overall G.P.A., and a written proposal approved before registration by the instructor and the department chair.

Schedule Type: Lecture

300 Level Courses

PSYC 300: Statistics in Psychology. 4 credits.
Descriptive and inferential statistics in design, analysis, and interpretation of psychological research with practical application using computers in laboratory. Notes: Students are strongly encouraged to take PSYC 301 concurrently. Offered by Psychology. May not be repeated for credit.

Recommended Prerequisite: 6 credits of PSYC and 3 credits of MATH course work or permission of instructor.

Recommended Corequisite: Students are strongly encouraged to take PSYC 301.

Schedule Type: Laboratory, Lecture

PSYC 301: Research Methods in Psychology. 4 credits.
General research design in psychology, with an emphasis on experimental design and control. Topics include use of human participants in research, reliability and validity, observational methods, and survey and longitudinal designs. Notes: Students are strongly encouraged to take PSYC 300 concurrently. Laboratory work will include designing and running research studies and writing manuscripts using appropriate style and format. Offered by Psychology. May not be repeated for credit.

Specialized Designation: Writing Intensive in the Major

Recommended Prerequisite: PSYC 100 and either PSYC 300, STAT 250, or STAT 350 or equivalent.

Schedule Type: Laboratory, Lecture

PSYC 304: Principles of Learning. 4 credits.
Principles of animal learning, including such topics as classical and operant conditioning, discrimination learning, and animal cognition. Notes: Laboratory projects require working with computer simulations. Offered by Psychology. May not be repeated for credit.

Specialized Designation: Writing Intensive in the Major

Recommended Prerequisite: PSYC 300 or permission of instructor.

Schedule Type: Laboratory, Lecture

PSYC 309: Sensation, Perception, and Information Processing. 4 credits.
Principles of perception, including topics such as psychophysics, perceptual organization, perceptual learning, and perceptual constancies. Notes: Laboratory projects demonstrate and investigate perceptual phenomena. Offered by Psychology. May not be repeated for credit.

Specialized Designation: Writing Intensive in the Major

Recommended Prerequisite: PSYC 300 and PSYC 301.

Schedule Type: Laboratory, Lecture

PSYC 312: Educational Psychology. 3 credits.
Enables students to apply psychological principles to the learning process in the classroom context. Examines the theoretical and applied aspects of learning, motivation, human development, personality, assessment, and evaluation in educational settings. Corresponding implications for effective teaching will be discussed. Offered by Psychology. May not be repeated for credit.

Schedule Type: Lecture

PSYC 313: Child Development. 3 credits.
Study of human psychological development from conception to adolescence including such topics as genetic factors, emotional and intellectual growth, and environmental influences. Offered by Psychology. May not be repeated for credit.

Recommended Prerequisite: PSYC 100 or equivalent.

Schedule Type: Lecture
PSYC 314: Adolescent Development. 3 credits.
Study of the biological and cultural changes accompanying adolescence, including the effect of these changes on emotional, intellectual, and social development. Offered by Psychology. May not be repeated for credit.

Recommended Prerequisite: PSYC 100 or equivalent.

Schedule Type: Lecture

PSYC 317: Cognitive Psychology. 3 credits.
An in-depth overview of important topics in cognitive psychology, including memory, attention, pattern recognition, problem solving, reasoning, and psycholinguistics. Offered by Psychology. May not be repeated for credit.

Recommended Prerequisite: Six credits of psychology or permission of instructor.

Schedule Type: Lecture

PSYC 320: Psychological Tests and Measurements. 4 credits.
Examination and application of principles underlying the theory, interpretation, and administration of psychological tests, including a study of tests of intelligence, achievement, and ability. Offered by Psychology. May not be repeated for credit.

Recommended Prerequisite: PSYC 300 or permission of instructor.

Schedule Type: Laboratory, Lecture

PSYC 321: Clinical Psychology. 3 credits.
Examines evidence-based psychological assessment and psychotherapy techniques to understand, prevent, and treat psychological distress and dysfunction and promote well-being. Offered by Psychology. May not be repeated for credit.

Recommended Prerequisite: PSYC 325 or permission of instructor.

Schedule Type: Lecture

PSYC 322: Behavior Modification. 3-5 credits.
Examination of experimental principles of human and animal learning within theoretical framework of applied behavior analysis, including design, implementation, and evaluation of operant intervention programs across a wide variety of human situations. Offered by Psychology. May not be repeated for credit.

Recommended Prerequisite: PSYC 324 or permission of instructor.

Schedule Type: Lecture

PSYC 324: Personality Theory. 3 credits.
Introduction to classical and contemporary theories of personality, and comparative evaluation of major theories in terms of relevant studies. Offered by Psychology. May not be repeated for credit.

Recommended Prerequisite: PSYC 100 or permission of instructor.

Schedule Type: Lecture

PSYC 325: Abnormal Psychology. 3 credits.
Study of development of abnormal behavior patterns, including such topics as methods of diagnosis and prevention of serious mental disorders such as psychosomatic disorders, psychoses, character disorders, and mental retardation. Offered by Psychology. May not be repeated for credit.

Recommended Prerequisite: PSYC 100 and either PSYC 211, 231, or 324 or permission of instructor.

Schedule Type: Lecture

PSYC 326: Therapeutic Communication Skills. 3 credits.
Introduction to understanding and use of basic therapeutic communication skills used in clinical and counseling psychology. Offered by Psychology. May not be repeated for credit.

Registration Restrictions:
Required Prerequisites: (PSYC 325 or L325).
C Requires minimum grade of C-.

Schedule Type: Lecture

PSYC 327: Psychology in the Community. 3 credits.
Individual placements in applied psychology settings. Notes: A maximum of 6 credits of PSYC 327, 328, 421, and 422 can be applied to the psychology major. Offered by Psychology. May be repeated within the degree for a maximum 6 credits.

Recommended Prerequisite: PSYC major with 6 hours of PSYC and permission of associate chair for undergraduate studies.

Schedule Type: Internship

PSYC 328: Psychology in the Community Laboratory. 1 credit.
Consists of a one-hour service learning component linked to selected psychology courses. Notes: A maximum of 6 credits of PSYC 327, 328, 421, and 422 can be applied to the psychology major. Offered by Psychology. May be repeated within the degree for a maximum 6 credits.

Recommended Prerequisite: PSYC major with 6 hours of PSYC and permission of instructor and associate chair for undergraduate studies.

Schedule Type: Internship

PSYC 333: Industrial and Organizational Psychology. 3 credits.
Examination of application of psychological principles and methods to problems commonly encountered in business and industry. Offered by Psychology. May not be repeated for credit.

Recommended Prerequisite: PSYC 100 and PSYC 300; or permission of instructor.

Schedule Type: Lecture

PSYC 335: Psychology of Creativity and Innovation. 3 credits.
Creativity and innovation take place in many domains such as business, science and the arts. Learn the distinction between creativity and innovation. Apply findings from the scientific literature about the antecedents of creativity and innovation including emotions, cognition, individual differences, and social contexts. Experiment with ways to enhance your creativity and skills for innovation. Offered by Psychology. May not be repeated for credit.

Recommended Prerequisite: PSYC 100 or permission of instructor.

Schedule Type: Seminar

PSYC 340: Human Factors Psychology. 3 credits.
Reviews history and current practice of optimal product and system design as a function of psychology. Includes a brief history of human
Psychology (PSYC) 3

Factors psychology, a review of human memory and attentional systems as they relate to product and system design, and an introduction to current methods used to analyze and redesign products and systems for optimal human interaction. Offered by Psychology. May not be repeated for credit.

Recommended Prerequisite: PSYC 100 or permission of instructor.

Schedule Type: Lecture

PSYC 350: Directed Reading and Research in Psychology. 1-3 credits.
Library research in psychology, culminating in a substantial formal paper; individualized sections by arrangement with faculty. Notes: No more than 6 credits in PSYC 260, 350, and 460 can be used toward psychology major. Offered by Psychology. May be repeated within the term.

Schedule Type: Independent Study

PSYC 372: Physiological Psychology. 3 credits.
Survey of neuroscience, including basic neuroanatomy, neural and synaptic transmission, neural mechanisms underlying normal and abnormal behavior, and biological mechanisms of drug action. Students may earn credit for PSYC 372 and either PSYC 375 or PSYC 376, but they may not earn credit for all three. Offered by Psychology. May not be repeated for credit.

Recommended Prerequisite: PSYC 100, BIOL 103, and BIOL 104 or permission of instructor.

Schedule Type: Lecture

PSYC 373: Physiological Psychology Laboratory. 1 credit.
Functional anatomy and physiology of the brain, including dissection of brain and eye, and a demonstration and practice in research methods for studying physiological mechanisms underlying behavior. Offered by Psychology. May not be repeated for credit.

Recommended Prerequisite: PSYC 372 or 375, or permission of instructor. Concurrent enrollment is also permitted.

Schedule Type: Laboratory

PSYC 375: Brain and Sensory Processes. 3 credits.
First half of comprehensive survey of neuroscience, including basic neuroanatomy, neural and synaptic transmission, neural mechanisms underlying normal and abnormal behavior, and biological mechanisms of drug action. Notes: Students may earn credit for 372 and either 375 or 376, but they may not earn credit for all three. Offered by Psychology. May not be repeated for credit.

Recommended Prerequisite: PSYC 100 with a grade of C- or better, and BIOL 103, 104 or BIOL 213; or permission of instructor.

Schedule Type: Lecture

PSYC 376: Brain and Behavior. 3 credits.
Second half of a comprehensive survey of neuroscience, including neural mechanisms underlying normal and abnormal behavior. Notes: Students may earn credit for 372 and either 375 or 376, but they may not earn credit for all three. Offered by Psychology. May not be repeated for credit.

Recommended Prerequisite: C or better in PSYC 375 or permission of instructor.

Schedule Type: Lecture

PSYC 380: Introduction to Forensic Psychology. 3 credits.
Explores the differing, yet varied facets of the field of forensic psychology including landmark legal cases relevant to psychology, potential careers in forensic psychology, police psychology, expert testimony, forensic psychological assessment, psychopathy, homeland security, ethics, correctional psychology, and issues in working in the juvenile justice system. Offered by Psychology. May not be repeated for credit.

Schedule Type: Lecture

PSYC 381: Mental Illness and Criminal Justice. 3 credits.
Examines the frequent intersection of individuals diagnosed with severe mental illness and the criminal justice system. Includes case studies that demonstrate possible judicial, therapeutic, correctional, and post-adjudication outcomes. Offered by Psychology. May not be repeated for credit.

Recommended Prerequisite: PSYC 325.

Schedule Type: Lecture

PSYC 382: Psychology of Crime Victims. 3 credits.
Explores short-term and long-term psychological effects of crime on victims through interviews with survivors of childhood abduction, elder abuse, intimate partner violence, and child abuse, among others. Evaluates roles and responsibilities of mental professionals and law enforcement when interacting with crime victims. Offered by Psychology. May not be repeated for credit.

Schedule Type: Lecture

PSYC 399: Psychology: College to Career. 3 credits.
Emphasizes development and readiness for a profession in the social sciences through self-assessment and professional skill acquisition. Offered by Psychology. May not be repeated for credit.
Recommended Prerequisite: At least 30 hours of completed college coursework and a declared major in the social sciences or permission of the instructor.

Schedule Type: Seminar

400 Level Courses

PSYC 405: Mystery, Madness, and Murder. 3 credits.
Multidisciplinary approach to taboo topics that fascinate and frighten us. Instructors from disciplines across the arts and sciences bring expertise and diverse perspectives to provocative issues such as cannibalism and serial murder. Students learn to think critically and objectively while examining use in myth, literature, and popular culture. Offered by Psychology. May not be repeated for credit.

Mason Core: Synthesis

Recommended Prerequisite: PSYC 100 or permission of instructor.

Schedule Type: Lecture

PSYC 406: Psychology of Communication. 3 credits.
An examination of the behavior of communicating across species and sensory modalities, with an emphasis on the evolutionary basis for the various communication strategies used by animals and humans. Offered by Psychology. May not be repeated for credit.

Mason Core: Synthesis

Recommended Prerequisite: PSYC 100 or permission of instructor.

Schedule Type: Lecture

PSYC 408: Psychological Fitness. 3 credits.
Evaluates and applies scientific research on psychological exercises to increase one's cognitive, behavioral, emotional, and physical health. Offered by Psychology. May not be repeated for credit.

Recommended Prerequisite: PSYC 313 and 325 or permission of instructor.

Schedule Type: Lecture

PSYC 414: Behavior Disorders of Childhood. 3 credits.
Review of the theories, methods, and research dealing with emotional and behavioral disorders of children. Offered by Psychology. May not be repeated for credit.

Recommended Prerequisite: PSYC 100.

Schedule Type: Lecture

PSYC 415: Psychological Factors in Aging. 3 credits.
Examination of the sensory, perceptual, intellectual, personality, health, and familial changes that occur as people age and adjust into their later years. Common and more serious adjustment difficulties and developments are discussed with attention to impacts on the individual and the family. Offered by Psychology. May not be repeated for credit.

Recommended Prerequisite: PSYC 100 or permission of instructor.

Schedule Type: Lecture

PSYC 417: Science of Well Being. 3 credits.
This course will examine and interpret the latest research in social, personality, and clinical psychology on well-being, character strengths, and personal growth. Emphasis will be placed on the ways in which scientists generate hypotheses regarding the nature of positive psychological traits and processes and the methods by which these ideas are tested. Offered by Psychology. May not be repeated for credit.

Recommended Prerequisite: PSYC 100 or permission of instructor

Schedule Type: Lecture

PSYC 418: Death, Dying, and Grieving. 3 credits.
Advanced survey of processes of grieving and their relationship to death and dying. Topics include ways of dying, effects of death on loved ones, and care for the terminally ill. Offered by Psychology. May not be repeated for credit. Equivalent to PSYC 518.

Recommended Prerequisite: PSYC 100 or permission of instructor.

Schedule Type: Lecture

PSYC 419: Synthesis in Psychology. 3 credits.
Understand and relate broad psychological issues to society as a whole. Possible topics include mental health in society, the psychology of food and eating behavior, and animals and society. See schedule of classes for current topic(s). Notes: May be repeated for credit when topic is different. Offered by Psychology. May be repeated within the degree for a maximum 15 credits.

Recommended Prerequisite: PSYC 100 or permission of instructor.

Schedule Type: Lecture

PSYC 423: Group Psychotherapy Techniques. 3 credits.
Review of theory and methods of group therapy with emphasis on humanistic and interpersonal approaches, including applications to family therapy, alcoholism, and drug abuse. Offered by Psychology. May not be repeated for credit.

Recommended Prerequisite: PSYC 324 or permission of instructor.

Schedule Type: Lecture

PSYC 427: Community Engagement for Social Change. 3 credits.
Explores social problems and interpersonal, intrapersonal, and social aspects of addressing them. Addresses both theoretical aspects of social problems through readings and class discussion and application through community service. Offered by Psychology. May not be repeated for credit.

Mason Core: Synthesis

Recommended Prerequisite: PSYC 100 or permission of instructor.

Schedule Type: Lecture

PSYC 435: Personnel Training and Development: A Psychological Perspective. 3 credits.
Overview and critique of training methods used in industry from viewpoint of psychological theory, including simulations, on-the-job training, supervisory/leadership skills training, computer-assisted instruction, and programmed texts. Principles of needs analysis, program development, and program evaluation are discussed within framework of industrial psychology. Offered by Psychology. May not be repeated for credit.

Recommended Prerequisite: PSYC 333, PSYC 320 (may be taken concurrently) or permission of instructor.
Schedule Type: Lecture

**PSYC 440: Forensic Psychology: Science and Pseudoscience.** 3 credits. Provides a critical, evidenced-based, examination of common psychological practices and constructs in the field of forensic psychology including psychological assessments, expert testimony, risk assessment, hypnosis, criminal profiling, polygraph examination, and methods of interrogation. Offered by Psychology. May not be repeated for credit.

Schedule Type: Lecture

**PSYC 441: Criminal Behavior: Psychological and Neurological Aspects.** 3 credits. Considers the psychological factors and structural and functional neurological differences that influence criminal behaviors including murder, sexual assault, fraud, intimate partner violence, and arson. The predictive and explanatory abilities of neuroimaging with respect to the criminal acts in question, as well as the role of neuroimaging in the judicial system, will also be explored. Offered by Psychology. May not be repeated for credit.

Schedule Type: Lecture

**PSYC 460: Independent Study in Psychology.** 1-4 credits. Advanced research methods in psychology in context of individual student projects or assisting with research on faculty projects; individual sections by arrangement with faculty. Notes: No more than 6 credits in PSYC 260, 350, and 460 can be used toward psychology major. Offered by Psychology. May be repeated within the term.

**Recommended Prerequisite:** 18 credits of PSYC, including PSYC 301 (grade of C or better), a 2.500 GPA in PSYC, and a written proposal approved before registration by the instructor and the department.

Schedule Type: Independent Study

**PSYC 461: Special Topics.** 1-3 credits. Selected topics reflecting interest in specialized areas. Notes: Topic announced in advance. May be repeated when topic is different. Offered by Psychology. May be repeated within the term.

Schedule Type: Lecture

**PSYC 462: Selected Topics in Forensic Psychology.** 3 credits. Selected topics reflecting interest in forensic psychology. Notes: May be repeated for credit when topic is different. Offered by Psychology. May be repeated within the term.

Schedule Type: Lecture

**PSYC 465: Pioneering Ideas in Psychology.** 3 credits. Historical background and major theoretical systems in modern psychology. Approaches include behaviorism, cognitive/information processing approaches, and psychodynamic theories. Offered by Psychology. May not be repeated for credit.

**Recommended Prerequisite:** 18 credits in psychology including PSYC 317 or permission of instructor.

Schedule Type: Lecture

**PSYC 466: Psychology of Intimate Relationships.** 3 credits. Advanced survey of theories and research related to intimate relationships, including romantic relations and those among family members and friends in diverse cultural and relationship contexts. Offered by Psychology. May not be repeated for credit.

**Recommended Prerequisite:** PSYC 100 and PSYC 231; PSYC 324 recommended.

Schedule Type: Lecture

**PSYC 467: The Psychology of Working in Groups and Teams.** 3 credits. Teaches knowledge and the skills to meet communication, interpersonal, and task-related challenges that arise when functioning in work teams. Through readings, classroom activities, and applied problem-solving exercises, students acquire or refine team-related competencies. Students study theory of group and team processes while gaining insight from feedback on their behavior in exercises to become more effective team members. Offered by Psychology. May not be repeated for credit.

**Recommended Prerequisite:** 60 credit hours, including PSYC 100, or permission of instructor.

Schedule Type: Lecture

**PSYC 472: Current Topics in Brain and Behavior.** 3 credits. Rotating topics. Physiological mechanisms underlying behavior. Selected topics include neuronal bases of learning and memory, Alzheimer’s disease, and biological bases of addiction. Notes: May be repeated with approval of instructor. Offered by Psychology. May be repeated within the term for a maximum 6 credits.

**Recommended Prerequisite:** PSYC 372 or PSYC 375, and PSYC 376; or permission of instructor.

Schedule Type: Lecture

**PSYC 490: Psychology Honors I.** 3 credits. Review of topics and issues in psychology, including historical overview, theory and supporting data, and influences on behavior. Notes: Topics vary. Offered by Psychology. May not be repeated for credit.

**Specialized Designation:** Research Associated

**Recommended Prerequisite:** Admission to psychology department Honors program.

Schedule Type: Seminar

**PSYC 491: Psychology Honors II.** 3 credits. Introduces advanced statistics, research methodologies, statistics packages, computing and information technology, and library technology appropriate for psychological research and pedagogy. Notes: Students required to complete proposal in preparation for admission to Psychology Honors III. Offered by Psychology. May not be repeated for credit.

**Specialized Designation:** Research Associated

**Recommended Prerequisite:** PSYC 300, 305 and 490.

Schedule Type: Seminar

**PSYC 492: RS: Psychology Honors III.** 3 credits. Completion of final honors project or thesis. Students must complete project or thesis, and present oral defense to committee and poster to class. Students also expected to prepare proposal to present project or thesis at regional or national conference, or prepare manuscript for publication in appropriate journal. Offered by Psychology. May not be repeated for credit.
Specialized Designation: Research/Scholarship Intensive

Recommended Prerequisite: PSYC 491 and approval of final honors project for thesis.

Schedule Type: Seminar

PSYC 499: Senior Thesis. 3 credits.
Directed research on topic agreed on by student and advisor. Notes: Students should take PSYC 460 with same advisor to develop thesis proposal before registering for PSYC 499. Students must complete thesis and defend it orally before advisor and two faculty members. Offered by Psychology. May not be repeated for credit.

Recommended Prerequisite: Psychology major with 84 hours, an experimental psychology laboratory course, PSYC 460, Permission of Instructor, and prior approval of thesis proposal.

Schedule Type: Independent Study

500 Level Courses

PSYC 518: Death, Dying, and Grieving. 3 credits.
Advanced survey of processes of grieving and their relationship to death and dying. Topics include ways of dying, effects of death on loved ones, and care for the terminally ill. Offered by Psychology. May not be repeated for credit. Equivalent to PSYC 418.

Recommended Prerequisite: PSYC 100

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

PSYC 527: Introduction to Neurobiology. 2 credits.
Introduction to neurobiology with overview of embryological development of nervous system in evolutionary context. Introduces regional and systems neuroanatomy by studying mammalian visual system with comparative perspective. Offered by Psychology. May not be repeated for credit.

Recommended Prerequisite: PSYC 372 or PSYC 375 and 376, or BIOL 213 and 303.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Application of cognitive theory to understand and predict interactions among human cognition, artifact, and task. Discusses recent research and case studies that emphasize empirical research, analytical modeling techniques, systems design, and development of tools and methods. Offered by Psychology. May not be repeated for credit.

Recommended Prerequisite: An experimental lab course or permission of instructor.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

PSYC 531: Mammalian Neurobiology. 3 credits.
Functional anatomy of brains of mammals, with emphasis on regional and systems neuroanatomy of humans. Anatomy correlated with material from clinical neurology where possible. Laboratory component includes brain dissections and clinical correlations. Offered by Psychology. May not be repeated for credit. Equivalent to BIOL 516.

Recommended Prerequisite: PSYC 527.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Laboratory, Lecture

PSYC 532: Histology/Histochemistry of the Brain. 4 credits.
Explores conceptual basics and provides hands-on experience in techniques for studying brain tissue, including stereotaxic surgery, perfusion, sectioning, Nissl and myelin stains, enzyme histochemistry, immunohistochemistry, in situ hybridization, and quantitative receptor autoradiography. Offered by Psychology. May not be repeated for credit.

Recommended Prerequisite: PSYC 372 or equivalent.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Laboratory, Lecture

PSYC 555: Neuroimaging. 3 credits.
Covers functional magnetic resonance imaging (fMRI) methods, experimental design and analysis issues in fMRI, structural MRI techniques and how they can contribute to cognitive neuroscience, and event-related potential methods. Offered by Psychology. May not be repeated for credit.
**Recommended Prerequisite:** Graduate enrollment in either Cognitive & Behavioral Neuroscience or Human Factors & Applied Cognition programs, or instructor approval.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Lecture

**PSYC 557: Psychometric Methods.** 3 credits.
Examines concepts of psychological measurement with emphasis on predictor test and criterion development. Discusses reliability, validity, and specialized techniques to develop tests of ability, interest, and personality. Offered by Psychology. May not be repeated for credit.

**Recommended Prerequisite:** PSYC 611 and 612 or permission of instructor

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Lecture

**PSYC 558: Neuronal Bases of Learning and Memory.** 3 credits.
Examines neuronal mechanisms involved in learning and memory, in animals ranging from invertebrates to humans. Offered by Psychology. May not be repeated for credit.

**Recommended Prerequisite:** PSYC 372, or 375 and 376; or permission of instructor.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Lecture

**PSYC 559: Behavioral Chemistry.** 3 credits.
Neurochemistry and neuroendocrinology, including neurotransmitter synthesis, genetic aspects of neural functioning, mechanisms of action of neurotransmitters and second messenger systems, regulation of neuroendocrine systems, neuroendocrine effects on behavior, and neuroimmunology. Offered by Psychology. May not be repeated for credit.

**Recommended Prerequisite:** PSYC 372, or 375 and 376; or permission of instructor.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Lecture

**PSYC 561: Behavioral Biology of Substance Abuse.** 3 credits.
Overview of biological effects of substance abuse, and biological mechanisms underlying addiction. Topics include alcohol, cocaine, marijuana, and other drugs; genetics of addiction; and neural systems underlying addiction and withdrawal. Offered by Psychology. May not be repeated for credit.

**Recommended Prerequisite:** PSYC 372 or equivalent.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Lecture

**PSYC 562: Research Methods in Human Experimental Psychology.** 3 credits.
Hands-on approach to selected current and/or classical human experimental psychology research methods. Course topics include experimental design, including psychophysical and physiological experimentation. In addition, mathematical, cognitive modeling and simulation, as well as advanced statistical techniques will be covered. Offered by Psychology. May not be repeated for credit.

**Recommended Prerequisite:** Graduate enrollment in either Cognitive and Behavioral Neuroscience or Human Factors and Applied Cognition programs.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Lecture

**PSYC 563: Laboratory Methods in Behavioral Neuroscience.** 3 credits.
Laboratory work, to be completed in groups, will include surgical, histological and behavioral techniques. Proper use and handling of animals, ethical issues, evaluation of neuroscience literature, experimental design and data analysis are addressed in lecture. This course requires working with laboratory rodents. Offered by Psychology. May not be repeated for credit.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.
Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Laboratory, Lecture

**PSYC 566: Cognitive and Perceptual Development.** 3 credits.
Survey of theory and the research on development of perception, memory, concepts, problem solving, intelligence, and academic skills in children. Offered by Psychology. May not be repeated for credit. Equivalent to PSYC 666.

**Recommended Prerequisite:** 6 credits of child psychology and course in experimental psychology or permission of instructor.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Lecture

**PSYC 592: Special Topics.** 1-6 credits.
Special topics reflecting interests in specialized areas. Notes: Topic announced in advance. May be repeated when topic is different. Offered by Psychology. May be repeated within the term for a maximum 9 credits.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Lecture

**PSYC 597: Directed Reading and Research.** 1-6 credits.
Independent reading or research on topic agreed on by student and faculty member. Notes: Directed reading or research for MA students in psychology. Offered by Psychology. May be repeated within the term for a maximum 6 credits.

**Recommended Prerequisite:** Permission of instructor.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Independent Study

**600 Level Courses**

**PSYC 611: Advanced Statistics.** 4 credits.
Test must be passed to take course. Open only to degree students. Integrates basic psychological statistics with overview of research methodology including experimental, quasi-experimental, field approaches, and measurement issues from advanced perspective. Lab work includes using computer packages for data handling and analyses. Notes: Students must enroll in 611 and 612 in sequential semesters. Offered by Psychology. May not be repeated for credit.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Laboratory, Lecture

**PSYC 612: Advanced Statistics.** 4 credits.
Open only to degree students. Integrates basic psychological statistics with overview of research methodology including experimental, quasi-experimental, field approaches, and measurement issues from advanced perspective. Lab work includes use of computer packages for data handling and analyses. Notes: Students must enroll in 611 and 612 in sequential semesters. Offered by Psychology. May not be repeated for credit.

**Recommended Corequisite:** Open only to degree students.

**Registration Restrictions:**
**Required Prerequisite:** PSYC 611B.

B Requires minimum grade of B.

Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Laboratory, Lecture

**PSYC 614: The Psychology of Aging.** 3 credits.
Review of the experimental literature in psychology of aging, including intellectual functioning, personality and adjustment, minor and major adjustment problems, and role changes in later life. Offered by Psychology. May not be repeated for credit.

**Recommended Prerequisite:** PSYC 100 and undergraduate or graduate course in aging.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Lecture

**PSYC 615: Language Development.** 3 credits.
Seminar covering theory and research on acquisition of language, including biological and environmental influences and constraints; research methods; role of parents; individual and cultural differences;
links between language and other domains of development including cognitive, behavioral, social, and emotional; language and the brain; animal language; bilingualism; and atypical language development. Offered by Psychology. May not be repeated for credit.

**Recommended Prerequisite:** 3 credits graduate Developmental Psychology or permission of instructor.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Seminar

**PSYC 617: Child Psychopathology.** 3 credits.
Intensive survey of major types of psychopathological disturbances of infancy and childhood. Offered by Psychology. May not be repeated for credit.

**Recommended Prerequisite:** PSYC 211 or 313 and 325.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Lecture

Focuses on basic principles and procedures of applied behavior analysis; identification of factors that contribute to behavioral problems and improved performance; and procedures that can be used to minimize behavioral problems, improve performance, teach new behaviors, and increase probability of behaviors occurring under appropriate circumstances. Offered by Psychology. May not be repeated for credit.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Lecture

**PSYC 630: Developmental Disabilities.** 3 credits.
Lectures, seminars discuss state-of-the-art and evidence-based information about developmental disabilities across life span with emphasis on mental retardation. Includes epidemiology, etiology, diagnoses, risk factors, treatment, supports, and prevention of developmental disabilities. Pertinent philosophical, ethical, and legal issues concerning this special-needs population will be discussed. Notes: In addition to course work and assigned reading, students sign up for a 20-hour per semester practicum. Offered by Psychology. May not be repeated for credit.

**Recommended Prerequisite:** 3 credit hours of graduate level developmental psychology courses or permission of the instructor.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Lecture

**PSYC 631: Industrial and Personnel Testing and Evaluation.** 3 credits.
Study of administration, scoring, and interpretation of standard tests used by industry for selection and assessment of personnel. Offered by Psychology. May not be repeated for credit.

**Recommended Prerequisite:** PSYC 300 and 320.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment limited to students in the MA Psychology or PHD Psychology programs.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Lecture

**PSYC 633: Evaluative Research in Psychology.** 3 credits.
Examines research techniques specifically designed to evaluate human effectiveness of organizations and mental health programs. Offered by Psychology. May not be repeated for credit.

**Recommended Prerequisite:** PSYC 300 or Permission of Instructor.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment limited to students in the MA Psychology or PHD Psychology programs.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Lecture

**PSYC 636: Survey of Industrial Psychology.** 3 credits.
Intensive survey of historical and current issues in major areas of applied (nonclinical) psychology. Offered by Psychology. May not be repeated for credit.

**Recommended Prerequisite:** PSYC 300 or permission of instructor.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment limited to students in the MA Psychology or PHD Psychology programs.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**PSYC 638:** Training: Psychological Contributions to Theory, Design, and Evaluation. 3 credits.

Focuses on applying learning principles derived from psychological research in development of training models and techniques of skill acquisition. Discusses research designs and empirical results appropriate to training evaluation. Offered by Psychology. May not be repeated for credit.

**Recommended Prerequisite:** PSYC 636 or permission of instructor.

**Registration Restrictions:**

Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment limited to students in the MA Psychology or PHD Psychology programs.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**PSYC 639:** Survey of Organizational Processes. 3 credits.

Trains at conceptual/theoretical and empirical levels in organizational processes. Includes individual, interpersonal, intra-group, and intergroup phenomena as they exist in context of organizational settings. Offered by Psychology. May not be repeated for credit.

**Recommended Prerequisite:** PSYC 333 or 632.

**Registration Restrictions:**

Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment limited to students in the MA Psychology or PHD Psychology programs.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**PSYC 640:** Techniques in Industrial/Organizational Psychology. 3 credits.

Skills-oriented course enabling students to construct instruments and perform functions critical to both researchers and practitioners in industrial/organizational psychology. Focuses on conducting job analysis interviews, developing and scoring task inventories, using critical incident and KSAO methods, and constructing performance appraisal and selection instruments. Offered by Psychology. May not be repeated for credit.

**Recommended Prerequisite:** PSYC 300 or Permission of Instructor.

**Registration Restrictions:**

Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**PSYC 644:** Methods for Social Research. 3 credits.

Examines issues in basic and applied social science methodology including internal validity, causal generalization, and construct validity. Offered by Psychology. May not be repeated for credit.

**Recommended Prerequisite:** PSYC 530 and 611.

**Registration Restrictions:**

Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Seminar

**PSYC 645:** Research Methods in Human Factors and Applied Cognition. 3 credits.

Hands-on approach to selected current or classical human factors/ applied cognition research methods; exact methods announced in advance. Potential methods include cognitive task analysis, usability evaluation methods, critical incident analysis, reliability analysis, workload measures, verbal protocol analysis, and engineering models of human performance. Offered by Psychology. May not be repeated for credit.

**Recommended Prerequisite:** PSYC 530 and 611.

**Registration Restrictions:**

Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**PSYC 646:** Issues and Methods in Longitudinal Developmental Research. 3 credits.

Examines techniques for measuring developmental change across lifespan. Offered by Psychology. May not be repeated for credit.

**Recommended Prerequisite:** PSYC 611 and 612, 6 credits of graduate developmental psychology.

**Registration Restrictions:**

Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.
Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

PSYC 648: Developmental Psychopathology. 3 credits.
In-depth look at emerging discipline of developmental psychopathology. Discusses specific disorders and contexts to illustrate how knowledge of normal development, deviant development, and maladaptive behavior illuminates principles underlying adaptive functioning. Offered by Psychology. May not be repeated for credit.

Recommended Prerequisite: 6 credits graduate developmental psychology.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Seminar

PSYC 652: Quantitative Methods II: Analysis of Variance. 3 credits.
Basic concepts in experimental design, fundamental assumptions in analysis of variance, and analysis of variance and covariance designs. Reviews multiple comparison tests. Offered by Psychology. May not be repeated for credit.

Recommended Prerequisite: PSYC 300 and either 304, 305, or 309.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

PSYC 654: Naturalistic Methods in Psychology. 3 credits.
Theory and techniques involved in studying people in their natural environment. Primary emphasis on quasiexperimental designs and methods of systematic observation. Offered by Psychology. May not be repeated for credit.

Recommended Prerequisite: PSYC 300 and either 304, 305, or 309.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

PSYC 667: Behavior in Small Groups and Teams. 3 credits.
Theories, methods, and topics relevant to individual behavior in small group setting. Includes effects of individual on group, effects of group on individual, and interaction effects among individuals. Offered by Psychology. May not be repeated for credit.

Recommended Prerequisite: PSYC 231.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to students with a major, minor, or concentration in Psychology.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

PSYC 668: Personality: Theoretical and Empirical Approaches. 3 credits.
Presents comprehensive overview of current theoretical and empirical approaches to personality. Emphasizes areas of special relevance to clinical, developmental, and industrial/organizational psychology. Offered by Psychology. May not be repeated for credit.

Recommended Prerequisite: PSYC 324 (or equivalent) or permission of instructor.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment limited to students in the MA Psychology or PHD Psychology programs.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

PSYC 669: Social and Emotional Development. 3 credits.
Surveys theory and research relevant to development of social relationships, emotional expressiveness and regulation, aggressive and altruistic behaviors, sex roles, and morality. Emphasizes influences on such development, including parents, other adults, peers, siblings, and broader culture. Offered by Psychology. May not be repeated for credit.

Recommended Prerequisite: Six hours of developmental psychology or permission of instructor.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture
**PSYC 671: Role and Function of the School Psychologist.** 3 credits.
Considers roles, functions of school psychologist in educational environment, including certification and ethical standards, issues, and trends. Notes: Open only to school psychology MA students, or by permission of instructor. Offered by Psychology. May not be repeated for credit.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Lecture

**PSYC 673: Prevention, Intervention, and Consultation in Schools.** 4 credits.
Examines theory and practice of behavior modification and consultation in school environment. Notes: Open to practicing school psychologists and students in school psychology, or by permission of instructor. Offered by Psychology. May not be repeated for credit.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Lecture

**PSYC 685: Cognitive Neuroscience.** 3 credits.
Provides an overview of the neural basis of human mental functions. Uses neuroimaging (PET, fMRI, ERPs, TMS, etc.), computational, and information-processing methods to examine functions such as attention, memory, language, emotion, and decision making. Offered by Psychology. May not be repeated for credit.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non Degree or Senior Plus.

Enrollment is limited to students with a major in Psychology.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Lecture

**700 Level Courses**

**PSYC 701: Cognitive Bases of Behavior.** 3 credits.
Surveys concepts in learning, cognitive, and affective processes, including theories and supporting data and their influences on behavior. Notes: Open only to degree students. Offered by Psychology. May not be repeated for credit.

**Registration Restrictions:**
Enrollment is limited to students with a major in Adv Grad Studies in Sch Psych or Psychology.

Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**PSYC 702: Biological Bases of Human Behavior.** 3 credits.
Surveys biological bases of behavior, including such topics as neural conduction, role of specific neurotransmitters, cortical functioning, and brain disorders. Notes: Open only to degree students. Offered by Psychology. May not be repeated for credit.

**Registration Restrictions:**
Enrollment limited to students with a major in Psychology.

Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Lecture

**PSYC 703: Social Bases of Behavior.** 3 credits.
Surveys social influences on behavior, including group processes, person perception, and attitude formation. Notes: Open only to degree students. Offered by Psychology. May not be repeated for credit.

**Registration Restrictions:**
Enrollment limited to students with a major in Psychology.

Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Lecture

**PSYC 704: Life-Span Development.** 3 credits.
Surveys theories and research regarding lifespan development and personality formation. Notes: Open only to degree students. Offered by Psychology. May not be repeated for credit.

**Recommended Prerequisite:** Admission to graduate program in psychology.

**Registration Restrictions:**
Enrollment limited to students with a major in Psychology.

Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Lecture

**PSYC 709: The Measurement of Intelligence.** 4 credits.
Administration, scoring, and interpretation of major infant, child, and adult intelligence tests, with emphasis on individual tests. Development of IQ tests, theories of intelligence, and current trends and developments in intellectual assessment. Notes: Open only to school psychology MA student. Offered by Psychology. May not be repeated for credit.

**Recommended Prerequisite:** PSYC 617 or 822 and PSYC 320 or equivalent; permission of department.

**Recommended Corequisite:** PSYC 611.

**Registration Restrictions:**
Enrollment limited to students with a major in Psychology.

Enrollment is limited to Graduate or Non-Degree level students.
Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Laboratory, Lecture

**PSYC 710: Psychological Assessment.** 4 credits.
Study of major instruments used in clinical assessment and nature, problems, and predictive value; administration and scoring of major techniques for evaluation of personality; and principles of interpretation of these procedures. Notes: Open only to school psychology MA students. Offered by Psychology. May not be repeated for credit.

**Recommended Prerequisite:** PSYC 617, 709, 822, or 810; and permission of director of School Psychology Program.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Laboratory, Lecture

**PSYC 722: Advanced Child Assessment.** 4 credits.
Problems involved in diagnostic assessment of children with various handicapping conditions such as learning disabilities, retardation, and emotional disturbances. Notes: Open only to school psychology MA or PhD students. Offered by Psychology. May not be repeated for credit.

**Recommended Prerequisite:** PSYC 709 and 710 or PSYC 810 and 811, and five intellectual assessments in the Psychology Clinic.

**Registration Restrictions:**
Enrollment is limited to students with a major in Psychology.

Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Laboratory, Lecture

**PSYC 730: Practicum in Applied Psychology.** 1-6 credits.
Practical experience in organizational setting as assigned. Notes: PhD students may repeat course for a maximum of 15 credits; MA students for a maximum 6 credits. Offered by Psychology. May be repeated within the degree for a maximum 15 credits.

**Registration Restrictions:**
Enrollment is limited to students with a major in Adv Grad Studies in Sch Psych or Psychology.

Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Internship

**PSYC 733: Issues in Personnel Psychology.** 3 credits.
Examines psychological literature on job analysis, job evaluation and compensation, performance appraisal, training, and EEOL selection issues. Methodological and psychometric issues in interpretation and evaluation of personnel psychology research receive particular attention. Offered by Psychology. May not be repeated for credit.

**Recommended Prerequisite:** PSYC 636 or permission of instructor.

**Registration Restrictions:**
Enrollment limited to students in the MA Psychology or PHD Psychology programs.

Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Lecture

**PSYC 734: Seminar in Human Factors and Applied Cognition.** 3 credits.
Emphasizes current research and application of human factors, ergonomics, applied cognition, and applied perception. Notes: May be repeated when topic is different. Offered by Psychology. May be repeated within the term for a maximum 9 credits.

**Recommended Prerequisite:** Six graduate credits in Human Factors and Applied Cognition or permission of instructor.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Seminar

**PSYC 737: Psychology of Human-Technology Interaction.** 3 credits.
Emphasizes current research and development in human-computer interaction, cognitive systems engineering, cognitive ergonomics, and cognitive engineering. Notes: May be repeated when topic is different. Offered by Psychology. May be repeated within the term for a maximum 9 credits.

**Recommended Prerequisite:** 6 graduate credits in human factors and applied cognition or permission of instructor.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Lecture

**PSYC 739: Seminar in Industrial/Organizational Psychology.** 3 credits.
Rotating topics such as leadership theories and management development, and performance appraisal. Notes: Topics announced in advance. May be repeated when topic is different. Offered by Psychology. May be repeated within the degree for a maximum 12 credits.

**Recommended Prerequisite:** PSYC 333 and 636, or permission of instructor.

**Registration Restrictions:**
Enrollment limited to students in the MA Psychology or PHD Psychology programs.

Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Seminar

**PSYC 741: Psychology of Work Motivation.** 3 credits.
Examines psychological literature of need, cognitive, and reinforcement theories of motivation; organizational attachment (commitment, absenteeism, and turnover); job design and quality of work issues. Emphasizes methodological and psychometric issues in interpreting and
evaluating work-motivation research. Offered by Psychology. May not be repeated for credit.

**Recommended Prerequisite:** PSYC 333 or permission of instructor.

**Registration Restrictions:**
Enrollment limited to students in the MA Psychology or PHD Psychology programs.

Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Lecture

**PSYC 750:** *School Psychology Practicum I.* 1 credit.
Practical experience in school psychology. Notes: Open only to school psychology MA students. Offered by Psychology. May not be repeated for credit.

**Recommended Prerequisite:** Admission to school psychology concentration and PSYC 709.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Internship

**PSYC 751:** *School Psychology Assessment Practicum II.* 2 credits.
Practical experience in school psychology. Notes: Open only to School Psychology MA students. Apply in writing for permission of department 60 days prior to beginning of semester. Offered by Psychology. May be repeated within the degree for a maximum 4 credits.

**Recommended Prerequisite:** PSYC 750.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Internship

**PSYC 754:** *Quantitative Methods III: Psychological Applications of Regression Techniques.* 3 credits.
Reviews psychological applications of regression techniques in variety of contexts including experimental, field, and survey settings. Offered by Psychology. May not be repeated for credit.

**Recommended Prerequisite:** PSYC 611 and 612.

**Registration Restrictions:**
Enrollment limited to students in the MA Psychology or PHD Psychology programs.

Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Lecture

**PSYC 756:** *Quantitative Methods IV: Multivariate Techniques in Psychology.* 3 credits.
Surveys multivariate statistical techniques as applied to psychological research. Emphasizes analysis of complex designs and interpretation of multivariate data analyses resulting from computer processing. Offered by Psychology. May not be repeated for credit.

**Recommended Prerequisite:** PSYC 611 and 612 or equivalent. PSYC 755 recommended.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Lecture

**PSYC 757:** *Advanced Topics in Statistical Analysis.* 3 credits.
Focuses on noncognitive individual differences that predict performance. Published work discussed in seminar format with emphasis on conceptual development, methodological adequacy, and new directions. Notes: May be repeated for credit when topic is different. Offered by Psychology. May be repeated within the degree.

**Recommended Prerequisite:** PSYC 754.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Lecture

**PSYC 768:** *Advanced Topics in Cognitive Science.* 3 credits.
Emphasizes current research in cognitive science. Topics may include computational cognitive models, nature of expertise, diagrammatic reasoning, display-based problem solving, visual attention, decision making, goal-based versus event-based cognition, and situated action. Notes: May be repeated when topic is different. Offered by Psychology. May be repeated within the term for a maximum 12 credits.

**Recommended Prerequisite:** PSYC 530 or 701.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Lecture

**PSYC 780:** *Applied Developmental Psychology.* 3 credits.
Examines how developmental theory, knowledge base, and methodology can be used to promote health and welfare of individuals across lifespan. Topics include contemporary social issues and child development, research in applied settings, developmental assessment and intervention, and program evaluation. Offered by Psychology. May not be repeated for credit.

**Recommended Prerequisite:** PSYC 704 or 3 credits of other graduate developmental psychology courses and permission of instructor.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Lecture

**PSYC 790:** *School Psychology Internship.* 3-6 credits.
Supervised field experience of one school year. Advanced school psychology student functions as full-time staff member in school psychology student functions as full-time staff member in school.
system. Student completes paper on practical research project involving alternative school psychology role in school system. Notes: Enrollment is for total 9 credits (thesis option) or 12 credits (nonthesis option) in increments of 3 credits according to placement. Students enrolled in PSYC 799 are not required to complete the practical research project. Offered by Psychology. May be repeated within the degree for a maximum 12 credits.

**Recommended Prerequisite:** Completion of required courses in school psychology and permission of program coordinator.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Internship

**PSYC 792:** *Psychology Practicum.* 1-6 credits.
Supervised experience working in applied, school, or agency settings.
Notes: For School Psychology, interested students must apply to area coordinator 60 days before registration. Offered by Psychology. May be repeated within the degree for a maximum 6 credits.

**Recommended Prerequisite:** Admission to psychology graduate program.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Internship

**PSYC 794:** *Developmental Assessment.* 1-6 credits.
Introduces considerations and methods needed for evaluating young children (ages two - six). Focus on the skills necessary for formulating, conducting, and reporting comprehensive developmental evaluations. Emphasizes evaluation of preschool children and includes information relating to infants, as well as older children functioning at lower developmental levels. Offered by Psychology. May be repeated within the term for a maximum 9 credits.

**Recommended Prerequisite:** Admission to applied developmental psychology program.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**PSYC 798:** *Thesis Proposal.* 1-6 credits.
Work on a proposal for master’s thesis. Offered by Psychology. May be repeated within the degree for a maximum 6 credits.

**Recommended Prerequisite:** Permission of program coordinator.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Thesis

**PSYC 799:** *Master’s Thesis.* 1-6 credits.
Research on approved master’s thesis topic under direction of thesis committee with approval of chair. Offered by Psychology. May be repeated within the degree.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Thesis

### 800 Level Courses

**PSYC 810:** *Psychological Assessment I.* 4 credits.
First of required two-course sequence that provides comprehensive coverage of principles, strategies, and techniques of psychological assessment. Emphasizes empirically supported methods. Notes: Open to clinical psychology PhD students, or other students with permission of instructor. Offered by Psychology. May not be repeated for credit.

**Recommended Prerequisite:** PSYC 810.

**Registration Restrictions:**
Enrollment is limited to students with a major in Psychology.

**Schedule Type:** Laboratory, Lecture

**PSYC 811:** *Psychological Assessment II.* 4 credits.
Second of required two-course sequence that provides comprehensive coverage of principles, strategies, and techniques of psychological assessment. Emphasizes empirically supported methods. Notes: Open to clinical psychology PhD students, or other students with permission of instructor. Offered by Psychology. May not be repeated for credit.

**Recommended Prerequisite:** PSYC 810.

**Registration Restrictions:**
Enrollment is limited to students with a major in Psychology.

**Schedule Type:** Laboratory, Lecture

**PSYC 822:** *Scientific Foundations of Clinical Psychology I.* 3 credits.
First of required two-course sequence that provides comprehensive coverage of major psychological problems, including review of empirically supported interventions. Notes: Open to clinical psychology PhD students, or other students with permission of instructor. Offered by Psychology. May not be repeated for credit.

**Registration Restrictions:**
Enrollment is limited to students with a major in Psychology.

**Schedule Type:** Lecture

**PSYC 823:** *Scientific Foundations of Clinical Psychology II.* 3 credits.
Second of required two-course sequence that provides comprehensive coverage of major psychological problems, including review of empirically supported interventions. Notes: Open only to clinical psychology PhD students. Offered by Psychology. May not be repeated for credit.

**Registration Restrictions:**
Enrollment is limited to students with a major in Psychology.
Enrollment is limited to Graduate level students.

**Schedule Type: Seminar**

**PSYC 830: History, Systems, and Theories of Personality and Psychotherapy.** 3 credits.
Review of history, systems, and theories of clinical psychology emphasizing traditional theories of personality and psychotherapy. Notes: Open to clinical psychology PhD students, or other students with permission of instructor. Offered by Psychology. May not be repeated for credit.

**Recommended Prerequisite:** Admission to doctoral concentration in clinical psychology.

**Registration Restrictions:**
Enrollment is limited to students with a major in Psychology.

**Schedule Type: Lecture**

**PSYC 833: Social And Cognitive Foundations Of Clinical Psychology.** 3 credits.
Review of theory and research in social psychology (particularly social cognition) relevant to understanding psychological adjustment, adjustment problems, and clinical interventions. Notes: Open to clinical psychology PhD students, or other students with permission of instructor. Offered by Psychology. May not be repeated for credit.

**Registration Restrictions:**
Enrollment is limited to students with a major in Psychology.

**Schedule Type: Seminar**
