

# MASON CORE

Bethany Usher, Associate Provost for Undergraduate Education

Office of the Provost

Phone: 703-993-3794

Website: [masoncore.gmu.edu](http://masoncore.gmu.edu)

## Overview

*The Mason Graduate is an Engaged Citizen and Well-Rounded Scholar who is Prepared to Act.*

The Mason Core is Mason's general education program that builds the foundation for The Mason Graduate. All undergraduates seeking a baccalaureate degree must complete Mason Core requirements. The Mason Core provides a breadth of liberal education courses, complementing the depth of knowledge and skills they build in their majors and minors. Additional requirements for specific degree programs can be found in the college or school sections of this catalog.

The Mason Core prepares students for work in their majors and minors, for their careers, and for life-long learning. Foundation courses build key knowledge and skills needed for academic success. Exploration courses provide a breadth of learning across the university. Integration courses include upper-division courses that are designed to integrate knowledge and skills learned from Foundation and Exploration courses into the major. Courses are designed around learning outcomes that help develop the qualities we expect of all students graduating with a Bachelor's degree from George Mason University.

All undergraduates seeking a baccalaureate degree must complete Mason Core requirements. Additional requirements for specific degree programs can be found in the college or school sections of this catalog.

Note: The course list reflects approved courses as of press time. Please visit the Mason Core website (<https://masoncore.gmu.edu/recently-approved-courses-2/>) for the most recent list of courses as the list is update throughout the academic year. Students may also find these courses by searching by Mason Core attributes in Patriot Web during registration.

## Foundation Requirements (12 credits)

Foundation requirements help ensure that students master the tools and techniques necessary to succeed in college and throughout their lives and careers. These courses emphasize skills—in writing, speaking, and working with numbers and technology—that can be applied to any major field of study and career goal.

### Written Communication (3 credits, lower-level)

#### Learning Outcomes:

Students develop the ability to use written communication as a means of discovering and expressing ideas and meanings: in short, employing writing as a way of thinking. Students begin this process at the Foundation level in English 101 (100 for ESL students) and build higher-level skills at the Integration level in English 302. Writing will be emphasized in many courses throughout a student's career, and at least one course in every student's major is designated "writing intensive" (Integration level).

#### Required:

The following courses as well as an approved writing-intensive course in the major.

Code	Title	Credits
ENGH 100	Composition for Multilingual Writers (Mason Core)	4
ENGH 101	Composition (Mason Core)	3

## Oral Communication (3 credits)

#### Learning Outcomes:

1. Students will demonstrate understanding of and proficiency in constructing and delivering multiple message types.
2. Students will understand and practice effective elements of ethical verbal and nonverbal communication.
3. Students will develop analytical skills and critical listening skills.
4. Students will understand the influence of culture in communication and will know how to cope with cultural differences when presenting information to an audience. Students develop the ability to use oral communication as a way of thinking and learning, as well as sharing ideas.

#### Required:

COMM 101 should be taken by all students unless their degree program specifies a different requirement. Students will be expected to continue developing oral communication skills in additional Mason Core courses as appropriate.

Code	Title	Credits
COMM 100	Public Speaking (Mason Core)	3
COMM 101	Fundamentals of Communication (Mason Core)	3
DANC 454	Methods of Teaching Dance (Mason Core)	3
INTS 101	Narratives of Identity (Mason Core)	6
INTS 202	Public Speaking and Critical Thinking Skills (Mason Core)	4

## Quantitative Reasoning (3 credits)

#### Learning Outcomes:

1. Students are able to interpret quantitative information (i.e., formulas, graphs, tables, models, and schematics) and draw inferences from them.
2. Given a quantitative problem, students are able to formulate the problem quantitatively and use appropriate arithmetical, algebraic, and/or statistical methods to solve the problem.
3. Students are able to evaluate logical arguments using quantitative reasoning.
4. Students are able to communicate and present quantitative results effectively.

#### Required:

One approved course.

			PHYS 251	Introduction to Computer Techniques in Physics	3
			SOCI 410	Social Surveys and Attitude and Opinion Measurements	3
			SYST 130	Introduction to Computing for Digital Systems Engineering	3

## Information Technology and Computing (3 credits)

### Learning Outcomes:

Information technology and computing can significantly augment humans' ability to produce, consume, process, and communicate information. Thus, students need to understand ways to use such technology to enhance their lives, careers, and society, while being mindful of challenges such as security, source reliability, automation, and ethical implications. These factors have made it essential for students to understand how to effectively navigate the evolving technological landscape. IT courses offered in the majors may focus on disciplinary applications and concerns of information technology.

IT courses meet the following learning outcomes:

1. Students will understand the principles of information storage, exchange, security, and privacy and be aware of related ethical issues.
2. Students will become critical consumers of digital information; they will be capable of selecting and evaluating appropriate, relevant, and trustworthy sources of information.
3. Students can use appropriate information and computing technologies to organize and analyze information and use it to guide decision-making.
4. Students will be able to choose and apply appropriate algorithmic methods to solve a problem.

### Required:

One approved 3-credit course that meets all IT requirements or an approved sequence of courses that meet all IT requirements.

### Courses meeting IT requirements

Code	Title	Credits
ANTH 395	Work, Technology, and Society: An IT Perspective	3
AVT 110	Digital Design Studio	3

The following must be taken in sequence:

PSYC 300	Statistics in Psychology	4
PSYC 301	Research Methods in Psychology	4
PSYC 372	Biopsychology	3

## Exploration Requirements (22 credits)

Exploration requirements help ensure that students become acquainted with the broad range of intellectual domains that contribute to a liberal education. By experiencing subject matter and ways of knowing in a variety of fields, students will be better able to synthesize new knowledge, respond to fresh challenges, and meet the demands of a complex world.

The course list reflects approved courses as of press time. See the most current list (<https://masoncore.gmu.edu/recently-approved-courses-2/>) for updates.

Note: Beginning Fall 2014, certain courses within the Mason Core can count for more than one category, if approved by the Mason Core committee. Students will be allowed to double count two courses (up to six credit hours) to fulfill their Mason Core requirements. Courses that qualify for double counting will be listed in their individually approved sections. Students may not double count credits in Oral Communication, Written Communication, or Quantitative Reasoning categories.

## Arts (3 credits)

Mason courses in the film making, visual and performing arts stress generative, inquiry based learning through direct aesthetic and creative experience in the studio environment. Art history courses address the intrinsic relationship of personal and cultural creativity, and the manifestation of aesthetics, visual culture and visual narrative within historical contexts.

### Learning Outcomes:

Students who successfully complete a course in the Arts category must meet the first learning outcome and a minimum of two of the remaining four learning outcomes:

1. Demonstrate an understanding of the relationship between artistic process, and a work's underlying concept, and where appropriate, contexts associated with the work.
2. Identify and analyze the formal elements of a particular art form using vocabulary and critique appropriate to that form.
3. Analyze cultural productions using standards appropriate to the form, as well as the works cultural significance and context.
4. Analyze and interpret the content of material or performance culture through its social, historical, and personal contexts.
5. Engage in generative artistic processes, including conception, creation, and ongoing critical analysis.

**Required:**

One approved course.

## Global Understanding (3 credits)

### Learning Outcomes:

The goal of the global understanding category is to help students see the world from multiple perspectives, reflect upon their positions in a global society, and be prepared for future engagement as global citizens. While it may include a historical perspective, global understanding courses focus primarily on a contemporary understanding of one's place in a global society.

### Courses in this category must meet a minimum of three of the following learning outcomes:

1. Identify and articulate one's own values and how those values influence their interactions and relationships with others, both locally and globally.
2. Demonstrate understanding of how the patterns and processes of globalization make visible the interconnections and differences among and within contemporary global societies.
3. Demonstrate the development of intercultural competencies.

4. Explore individual and collective responsibilities within a global society through analytical, practical, or creative responses to problems or issues, using resources appropriate to the field.

**Note:** A student may also meet the Global Understanding requirement through a full-semester study abroad or 12-15 credit hour program; shorter-term study abroad courses must include and meet the learning outcomes listed below and be evaluated prior to departure.

### Required:

One approved course.

## Literature (3 credits)

### Learning Outcomes:

1. Students will be able to read for comprehension, detail, and nuance.
2. Identify the specific literary qualities of language as employed in the texts they read.
3. Analyze the ways specific literary devices contribute to the meaning of a text.
4. Identify and evaluate the contribution of the social, political, historical, and cultural contexts in which a literary text is produced.
5. Evaluate a critical argument in others' writing as well as one's own.

### Required:

One approved course.

## Natural Science (7 credits total)

The Mason Core natural sciences courses engage students in scientific exploration; foster their curiosity; enhance their enthusiasm for science; and enable them to apply scientific knowledge and reasoning to personal, professional and public decision-making. Lab courses must meet all five learning outcomes. Non-lab courses must meet learning outcomes 1 through 4.

### Learning Outcomes:

1. Understand how scientific inquiry is based on investigation of evidence from the natural world, and that scientific knowledge and understanding: a) evolves based on new evidence, and b) differs from personal and cultural beliefs.
2. Recognize the scope and limits of science.
3. Recognize and articulate the relationship between the natural sciences and society and the application of science to societal challenges (e.g., health, conservation, sustainability, energy, natural disasters, etc.).
4. Evaluate scientific information (e.g., distinguish primary and secondary sources, assess credibility and validity of information).
5. Participate in scientific inquiry and communicate the elements of the process, including: a) making careful and systematic observations, b) developing and testing a hypothesis, c) analyzing evidence, and d) Interpreting results.

### Required:

Two approved science courses. At least one course will include laboratory experience.

**Note:** PHYS 170/270 when accompanied by PHYS 161/261 can be used to fulfill a 4-credit lab science requirement.

### Non-lab (3 credits)

## Social and Behavioral Sciences (3 credits)

### Learning Outcomes:

The following three learning outcomes are required goals of disciplinary or interdisciplinary courses:

1. Explain how individuals, groups or institutions are influenced by contextual factors;
2. Demonstrate awareness of changes in social and cultural constructs;
3. Use appropriate methods and resources to apply social and behavioral science concepts, terminology, principles and theories in the analysis of significant human issues, past or present.

### Required:

One approved course.

## Western Civilization/World History (3 credits)

### Learning Outcomes:

Courses must meet at least three of the five learning outcomes.

1. Demonstrate familiarity with the major chronology of Western civilization or world history.
2. Demonstrate the ability to narrate and explain long-term changes and continuities in Western civilization or world history.
3. Identify, evaluate, and appropriately cite online and print resources.
4. Develop multiple historical literacies by analyzing primary sources of various kinds (texts, images, music) and using these sources as evidence to support interpretation of historical events.
5. Communicate effectively—through speech, writing, and use of digital media—their understanding of patterns, process, and themes in the history of Western civilization or the world.

### Required:

One approved course.

Code	Title	Credits
HIST 202	Freshman/Sophomore Seminar in Global History	3
HIST 387	Topics in Global History (Mason Core)	3-6

## Integration Requirements (9 credits)

### Written Communication (3 credits, upper-level)

#### Learning Outcomes:

Students develop the ability to use written communication as a means of discovering and expressing ideas and meanings: in short, employing writing as a way of thinking. Students begin this process at the Foundation level in ENGH 101 Composition (Mason Core) (ENGH 100 Composition for Multilingual Writers (Mason Core) for ESL students) and build higher-level skills at the Integration level in ENGH 302 Advanced Composition (Mason Core). Writing will be emphasized in many courses throughout a student's career, and at least one course in every student's major is designated "writing intensive" (Integration level).

#### Required:

The following course as well as an approved writing-intensive course in the major.

Code	Title	Credits
ENGH 302	Advanced Composition (Mason Core)	3

### Writing-Intensive Course Requirement (usually 3 credits)

As part of the university's commitment to student writers in all undergraduate programs, at least one upper-division course in each major has been designated as fulfilling the "writing intensive" (WI) requirement.

The following courses have been approved to meet the writing-intensive requirement.

NOTE: students MUST select the course approved for their major. See specific degree program for details.

Code	Title	Credits
ACCT 461	Assurance and Audit Services	3

## Synthesis or Capstone Experience Requirement (minimum 3 credits)

The purpose of the synthesis course is to provide students with the opportunity to synthesize the knowledge, skills and values gained from the Mason Core curriculum. Synthesis courses strive to expand students' ability to master new content, think critically, and develop life-long learning skills across the disciplines. While it is not feasible to design courses that cover "all" areas of general education, synthesis courses should function as a careful alignment of disciplinary goals with a range of Mason Core learning outcomes.

### Learning Outcomes for Synthesis:

The Mason Core synthesis course must address outcomes 1 and 2, and at least one outcome under 3. Upon completing a synthesis course, students will be able to:

1. Communicate effectively in both oral and written forms, applying appropriate rhetorical standards (e.g., audience adaptation, language, argument, organization, evidence, etc.)
2. Using perspectives from two or more disciplines, connect issues in a given field to wider intellectual, community or societal concerns
3. Apply critical thinking skills to:
  - a. Evaluate the quality, credibility and limitations of an argument or a solution using appropriate evidence or resources, OR,
  - b. Judge the quality or value of an idea, work, or principle based on appropriate analytics and standards

### Required: One approved course.

Note: The course list reflects approved courses as of press time. See the most current list (<https://masoncore.gmu.edu/recently-approved-courses-2/>) for updates.

### Synthesis Courses

FRLN 385	Multilingualism, Identity, and Power (Mason Core)	3			
GAME 490	Senior Game Design Capstone (Mason Core)	3	The purpose of the capstone course or sequence of courses is to provide a high impact, culminating element of an undergraduate education, helping students develop a more comprehensive and integrative understanding of their area of study and to utilize critical thinking skills. Capstone courses provide students opportunities to apply and demonstrate their knowledge and generally involve integrative /applied/ experiential projects. Student learning in a Capstone course is assessed using a set of identified learning outcomes, and for critical thinking, as defined by the American Association of Colleges & Universities.		
GEOL 420	Earth Science and Policy (Mason Core)	3	<b>While each academic degree program defines its learning outcomes, a Capstone course or sequence should follow these guidelines:</b>		
GGG 303	Geography of Resource Conservation (Mason Core)	3	<ul style="list-style-type: none"> <li>• Minimum of 3 credits</li> <li>• Later in the curriculum, after a student has taken at least 85 credits, and at the 400 course level</li> <li>• No more than 35 students in the course or equivalent instructional/ mentored support</li> <li>• Emphasis on experiential/applied/integrative learning</li> <li>• Allow students to apply critical thinking skills</li> <li>• Learning outcomes defined by the degree program</li> </ul>		
GGG 304	Population Geography (Mason Core)	3	<b>Required:</b> One approved upper-division course. Please speak with an advisor to determine the appropriate course to fulfill your major's requirement.
