Website: ssb.gmu.edu

This program provides advanced training for college graduates or professionals seeking careers in the biomedical research, biotechnology, neuroscience or biodefense, as well as evolutionary and animal biology, animal biology and biology teaching. Master’s level concentrations are available in microbiology and infectious disease, molecular biology, neuroscience, evolutionary biology, and translational and clinical research. Alternatively, students may choose the program in general biological sciences, which allows flexibility to build a degree program tailored to a specific research or career interest.

**Admissions & Policies**

**Admissions**

University-wide admissions policies can be found in the Graduate Admissions Policies (p. 68) section of this catalog.

To apply for this program, please complete the George Mason University Admissions Application (https://www2.gmu.edu/admissions-aid/apply-now).

While each applicant’s qualifications are reviewed as a whole, the following are provided: Applicants to the program must have a bachelor’s degree in biology or its equivalent. Additionally, all MS concentrations require a GPA of 3.00 in biology coursework or in the last 60 credits of undergraduate study. Students must also submit three letters of recommendation and scores on the GRE general exam. Exam scores should be in the 45th percentile or above. Admission is contingent on acceptance by a faculty research advisor.

**Microbiology and Infectious Disease (MID) Concentration**

Students who choose the Microbiology and Infectious Disease Concentration (MID) must have a lecture and lab course in microbiology and a lecture course in biochemistry.

**Translational and Clinical Research (TCR) Concentration**

Students who choose the Translational and Clinical Research Concentration may submit MCAT scores in place of GRE general exam scores.

**Evolutionary Biology (EB) Concentration**

Students who choose the Evolutionary Biology Concentration must also submit a personal statement/statement of interest consistent with at least one faculty member’s research program. GRE score should be approximately 303.

**Policies**

For policies governing all graduate programs, see AP6 Graduate Policies (p. 90).

**Requirements**

**Degree Requirements**

Total credits: 30

Students should refer to the Admissions & Policies (p. 794) tab for specific policies related to this program.

**Program of Study**

The faculty advisor and the student work together to develop a program of study that best fits the student’s background and interests. The student must submit a program of study to the program director for approval within the first 12 credits of coursework. By the end of the second semester of coursework, students will form a graduate committee made up of three faculty members. At least two committee members must be faculty in the School of Systems Biology (p. 786).

**Concentration Options**

Candidates for the Biology, MS (p. 794) focus their study in one of five approved concentrations below, or by completing coursework for the program in biological sciences in an area of study chosen in consultation with the student’s advisor and program director.

**Research Options**

Students have the option to complete a 3-6 credit master’s thesis (BIOL 799 Thesis) or a 1-3 credit research project (BIOL 798 Master’s Research Project). In accordance with AP6 Graduate Policies (p. 90), the same quality of work is expected of students regardless of which option they choose.

- **Thesis**: In general, the MS thesis is most appropriate for students planning or considering a research career. Students pursuing the thesis option must write a formal thesis that meets the requirements of the school and must defend their thesis and present their results in a public seminar.
- **Research Project**: The MS project is most appropriate for students who have scheduling commitments, such as a full-time job, that may preclude performing a complete series of laboratory experiments.
Students pursuing the project option must successfully complete written and oral comprehensive exams.

Select one from the following:

- BIOL 798 Master's Research Project
- BIOL 799 Thesis (3-6 credits)

**Electives**

19-26

Select 19–26 credits of electives in BIOL, BIOS, or related areas as approved by the student’s advisor and the program director.

- BIOL 553 Advanced Topics in Immunology
- BIOL 568 Advanced Topics in Molecular Genetics
- BIOL 575 Selected Topics in Genetics
- BIOL 579 Molecular Evolution and Conservation Genetics
- BIOL 583 General Biochemistry
- BIOL 585 Eukaryotic Cell Biology Laboratory
- BIOL 682 Advanced Eukaryotic Cell Biology
- BIOL 793 Research in Biology
- BIOS 740 Laboratory Methods in Functional Genomics and Biotechnology
- BIOS 741 Genomics
- BIOS 742 Biotechnology
- BIOS 743 Genomics, Proteomics, and Bioinformatics
- BIOS 744 Molecular Genetics
- BIOS 767 Molecular Evolution

**Total Credits:** 30

---

1 These courses are provided as suggestions only; this is not intended to be a comprehensive list of elective options. Note that two courses covering substantially similar topics may not both be counted in the student's program of study. Students should consult their faculty research advisor or the graduate program coordinator when preparing a program of study.

13

- BIOL 568 Advanced Topics in Molecular Genetics or BIOS 744 Molecular Genetics
- BIOL 583 General Biochemistry
- BIOL 682 Advanced Eukaryotic Cell Biology
- BIOS 579 Molecular Evolution and Conservation Genetics or BIOS 767 Molecular Evolution

**Bioinformatics**

3

Select one from the following:

- BIOL 580 Computer Applications for the Life Sciences
- BINF 630 Bioinformatics Methods
- BINF 634 Bioinformatics Programming
Molecular Techniques  2-4
Select 2-4 credits from the following:
- BIOL 585  Eukaryotic Cell Biology Laboratory
- BIOL 678  Cell-Based Assays
- BIOS 740  Laboratory Methods in Functional Genomics and Biotechnology

Special topics courses, such as BIOL 575 or BIOL 691, may also be approved for this requirement by the program director, but only in semesters in which they are primarily a laboratory course of at least two credits with substantial content of techniques in molecular biology.

Seminar  2
- BIOL 695  Seminar in Molecular, Microbial, and Cellular Biology

Research  1-6
Select one from the following:
- BIOL 798  Master’s Research Project
- BIOL 799  Thesis (3-6 credits)

Electives  0-8
Select 0-8 credits of electives in BIOL, BIOS, or related areas as approved by the student’s advisor and the program director.

- BIOL 553  Advanced Topics in Immunology
- BIOL 568  Advanced Topics in Molecular Genetics
- BIOL 575  Selected Topics in Genetics
- BIOL 579  Molecular Evolution and Conservation Genetics
- BIOL 583  General Biochemistry
- BIOL 585  Eukaryotic Cell Biology Laboratory
- BIOL 682  Advanced Eukaryotic Cell Biology
- BIOL 793  Research in Biology
- BIOS 740  Laboratory Methods in Functional Genomics and Biotechnology
- BIOS 741  Genomics
- BIOS 742  Biotechnology
- BIOS 743  Genomics, Proteomics, and Bioinformatics
- BIOS 744  Molecular Genetics
- BIOS 767  Molecular Evolution

Total Credits:  30

1  These courses are provided as suggestions only; this is not intended to be a comprehensive list of elective options. Note that two courses covering substantially similar topics may not both be counted in the student's program of study. Students should consult their faculty research advisor or the graduate program coordinator when preparing a program of study.

MS with Concentration in Neuroscience (NEUR)  2-4

Seminar  2
Select 2 credits from the following:
- BIOL 695  Seminar in Molecular, Microbial, and Cellular Biology
- BIOS 704  Topics in Biosciences
- NEUR 709  Neuroscience Seminars

Research  1-6
Select one from the following:
- BIOL 798  Master’s Research Project
- BIOL 799  Thesis (3-6 credits)

Electives  2-11
Select 2-11 credits, suggested electives include but are not limited to the following:

- BIOL 566  Cancer Genomics
- BIOL 568  Advanced Topics in Molecular Genetics
- BIOL 583  General Biochemistry
- BIOL 666  Human Genetics Concepts for Health Care
- BIOL 682  Advanced Eukaryotic Cell Biology
- BINF 630  Bioinformatics Methods
- BINF 705  Research Ethics
- BIOS 741  Genomics
- BIOS 742  Biotechnology
- BIOS 743  Genomics, Proteomics, and Bioinformatics
- BIOS 744  Molecular Genetics
- NEUR 689  Topics in Neuroscience

Total Credits:  30

MS with Concentration in Evolutionary Biology (EB)  3-4

Research  1-6
Select one from the following:
- BIOL 798  Master’s Research Project
- BIOL 799  Thesis (3-6 credits)

Electives  2-11
Select 2-11 credits, suggested electives include but are not limited to the following:

- BIOL 566  Cancer Genomics
- BIOL 568  Advanced Topics in Molecular Genetics
- BIOL 583  General Biochemistry
- BIOL 666  Human Genetics Concepts for Health Care
- BIOL 682  Advanced Eukaryotic Cell Biology
- BINF 630  Bioinformatics Methods
- BINF 705  Research Ethics
- BIOS 741  Genomics
- BIOS 742  Biotechnology
- BIOS 743  Genomics, Proteomics, and Bioinformatics
- BIOS 744  Molecular Genetics
- NEUR 689  Topics in Neuroscience

Total Credits:  30
BIOL 692  Seminar in Biology
& BIOL 695  Seminar in Molecular, Microbial, and Cellular Biology

**Core Courses**  6-9
Select at least two courses from the following:
- BIOL 574  Population Genetics
- BIOL 579  Molecular Evolution and Conservation Genetics
- BIOL 648  Population Ecology

**Organismal Biology**  6-8
Select 6-8 credits from the following suggestions in consultation with an advisor and/or committee and the program director:
- BIOL 501  Microbial Diversity: An Organismal Approach
- BIOL 507  Selected Topics in Ecology
- BIOL 508  Selected Topics in Animal Biology
- BIOL 518  Conservation Biology
- BIOL 532  Animal Behavior
- BIOL 533  Selected Topics in Plant Biology
- BIOL 537  Ornithology
- BIOL 538  Mammalogy
- BIOL 539  Herpetology
- BIOL 543  Tropical Ecosystems
- BIOL 559  Fungi and Ecosystems
- BIOL 566  Cancer Genomics
- BIOL 572  Human Genetics
- BIOL 581  Estuarine and Coastal Ecology
- BIOL 582  Estuarine and Coastal Ecology Laboratory
- BIOL 643  Microbial Ecology
- EVPP 536  The Diversity of Fishes

**Molecular Techniques**  4-7
- EVPP 615  Molecular Environmental Biology II
- EVPP 515  Molecular Environmental Biology I 1

**Research**  1-6
Select one from the following:
- BIOL 798  Master’s Research Project
- BIOL 799  Thesis (3-6 credits)

**Electives**  0-10
Select 0-10 credits of suggested courses from the following, but other courses are allowed if approved by an advisor and/or committee and the program director:
- BIOL 508  Selected Topics in Animal Biology
- BIOL 518  Conservation Biology
- BIOL 537  Ornithology
- BIOL 538  Mammalogy
- BIOL 539  Herpetology
- BIOL 543  Tropical Ecosystems
- BIOL 553  Advanced Topics in Immunology
- BIOL 568  Advanced Topics in Molecular Genetics
- BIOL 575  Selected Topics in Genetics
- BIOL 572  Human Genetics
- BIOL 579  Molecular Evolution and Conservation Genetics

**Research Methodology**  1-3
- BIOL 690  Introduction to Graduate Studies in Biology
  or BIOS 702  Research Methods

**Seminar**  2
Select 2 credits from the following:
- BIOL 695  Seminar in Molecular, Microbial, and Cellular Biology
- BINF 704  Colloquium in Bioinformatics
- BIOL 508  Selected Topics in Animal Biology (when the topic is research and development related to biotechnology)

**Advanced Eukaryotic Cell Biology**  3
- BIOL 682  Advanced Eukaryotic Cell Biology

**Bioinformatics/Biostatistics**  3
- BINF 630  Bioinformatics Methods
  or STAT 535  Analysis of Experimental Data

**Human Genes, Cells and Tissues**  3
Select 3 credits from the following:
**Accelerated Master's**

**Biology, BS/Biology, Accelerated MS**

**Overview**
Qualified undergraduates may be admitted into an accelerated master's program and obtain both a Biology, BS (p. 648) and a Biology, MS (p. 794) within an accelerated time frame. Students admitted to this program may take graduate courses after completing 90 undergraduate credits, and up to 6 credits of graduate work may be used in partial satisfaction of the requirements for the undergraduate degree. If students earn at least a 3.00 GPA in these classes, they are granted advanced standing in the master's program and must then complete an additional 24 credits to receive the master's degree. All other master's degree requirements must be met, including a minimum of 18 credits taken for the master's after the bachelor's degree is complete.

For more detailed information, see AP6.7 Bachelor's/Accelerated Master's Degrees (p. 93). For policies governing all graduate programs, see AP6 Graduate Policies (p. 90).

**Application Requirements**
Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in the Graduate Admission Policies (p. 68) section of this catalog. Application information for this accelerated master's program can be found on the School of Systems Biology's website (https://www2.gmu.edu/admissions-aid/how-apply/accelerated-masters).

Successful applicants will have an overall undergraduate GPA of at least 3.10. Additionally, they will have completed the following courses with a GPA of 3.00 or higher:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>BIOL 213</td>
<td>Cell Structure and Function (Mason Core) (p. 142)</td>
<td>4</td>
</tr>
<tr>
<td>BIOL 214</td>
<td>Biostatistics for Biology Majors</td>
<td>4</td>
</tr>
<tr>
<td>BIOL 308</td>
<td>Foundations of Ecology and Evolution</td>
<td>5</td>
</tr>
<tr>
<td>BIOL 310</td>
<td>Biodiversity</td>
<td>3</td>
</tr>

<tr>
<td>CHEM 313</td>
<td>Organic Chemistry I</td>
<td>3</td>
</tr>
<tr>
<td>CHEM 315</td>
<td>Organic Chemistry Lab I</td>
<td>2</td>
</tr>
</tbody>
</table>

Three letters of recommendation, including one from a prospective thesis or project advisor, are required.

**Accelerated Option Requirements**
At the beginning of the student's final undergraduate semester, students must submit a bachelor's/accelerated master's transition form (available from the Office of the University Registrar (http://registrar.gmu.edu)) to the College of Science's Office of Academic and Student Affairs (https://cos.gmu.edu/about/contact-us). Students must begin their master's program in the semester immediately following conferral of the bachelor's degree.

Students must maintain an overall GPA of 3.00 or higher in graduate coursework and should consult with their faculty advisor to coordinate their academic goals.
After completing 120 credits and all requirements for the bachelor's degree and filing the Graduation Intent Form, students are awarded a bachelor's degree. Accelerated master's students must then submit scores on the GRE to have the provisional qualifier removed. Ordinarily, students should receive a minimum combined score of 303 on the verbal and quantitative portions of the general test.

**Reserve Graduate Credit**

While still in undergraduate status, a maximum of 6 additional graduate credits may be taken as reserve graduate credit and applied to the master's program. Reserve graduate credits do not apply to the undergraduate degree.

**Neuroscience, BS/Biology, MS**

**Overview**

Qualified undergraduates may be admitted into an accelerated master's program and obtain both a Neuroscience, BS (p. 781) and a Biology, MS (https://catalog.gmu.edu/colleges-schools/science/systems-biology/biology-ms) within an accelerated time frame. Students admitted to this program may take graduate courses after completing 90 undergraduate credits, and up to 6 credits of graduate work may be used in partial satisfaction of the requirements for the undergraduate degree. If students earn at least a 3.00 GPA in these classes, they are granted advanced standing in the master's program and must then complete an additional 24 credits to receive the master's degree. All other master's degree requirements must be met, including a minimum of 18 credits taken for the master's after the bachelor's degree is complete.

**Application Requirements**

Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in the Graduate Admission Policies (https://catalog.gmu.edu/admissions/graduate-policies) section of this catalog. Application information for this accelerated master's program can be found on the School of Systems Biology's website (https://ssb.gmu.edu/). Successful applicants will have an overall undergraduate GPA of at least 3.10. Three letters of recommendation, including one from a prospective thesis or project advisor, are required. Additionally, they will have completed the following courses with a GPA of 3.00 or higher:

**Accelerated Option Requirements**

At the beginning of the student's final undergraduate semester, students must submit a bachelor's/accelerated master's transition form (available from the Office of the University Registrar (http://registrar.gmu.edu)) to the College of Science's Office of Academic and Student Affairs (https://cos.gmu.edu/about/contact-us). Students must begin their master's program in the semester immediately following conferral of the bachelor's degree. Students must maintain an overall GPA of 3.00 or higher in graduate coursework and should consult with their faculty advisor to coordinate their academic goals. After completing 120 credits and all requirements for the bachelor's degree and filing the Graduation Intent Form, students are awarded a bachelor's degree.

**Additional Requirements**

- Satisfactory performance in undergraduate coursework must be maintained.
- Satisfactory graduate-level performance in each approved graduate course taken while in undergraduate status (receiving a grade of B or better (3.0 or higher) in each course).
- Submission of documents to complete the master's application before the published deadline, including a goals statement and a resume. GRE scores are not required.
- Completion of undergraduate degree from George Mason University.
- Confirmation of a graduate faculty advisor.

Website: ssb.gmu.edu

This program is a research-oriented field of study that prepares students for significant contributions in academic or industrial settings. It is broken down into three concentrations: Cell and Molecular Biology, Microbiology and Infectious Disease, and Biocomplexity and Evolutionary Biology.

The academic component is a three-tiered structure. The first tier provides a set of core courses designed to advance research skills across all disciplines. The second tier comprises additional core courses and elective courses. The first two tiers are designed to be completed in approximately two years, including the comprehensive qualifying exam. Only on completion of these requirements, the qualifying exam, and a successful dissertation proposal can the students advance to candidacy status. The third tier focuses on research and culminates in a dissertation.
Admissions & Policies

Admissions

University-wide admissions policies can be found in the Graduate Admissions Policies (p. 68) section of this catalog.

To apply for this program, please complete the George Mason University Admissions Application (https://www2.gmu.edu/admissions-aid/apply-now).

Application Requirements

The following are required of applicants to this program:

• Minimum 3.25 GPA in previous coursework with significant training in the biological sciences.
• Three letters of recommendation from faculty members or individuals who have firsthand knowledge of the applicant’s academic or professional capabilities.
• Statement of purpose consistent with the research interests of at least one faculty member in the program.
• Scores on GRE general exam (required) and biology or biochemistry subject exam (recommended) taken within the past five years prior to date of application submission. The GRE exam is waived if applicants hold a master’s Degree from a fully-accredited U.S. university at the time of their application.
• A TOEFL score of 575 on the paper-based exam or 230 on the computer-based exam is required of international students.

An interview may also be required. Applications should be submitted by January 1st for fall admission. Under unusual circumstances, applications may be considered for spring admission if they are received by October 1st. Applications will be considered until positions are filled. Students are encouraged to meet application deadlines to be considered for scholarships and stipends.

Strong candidates who lack several prerequisites may be admitted to provisional status. Removal from provisional status and continuation in the program is contingent on earning a GPA of 3.25 in the program’s fundamental courses, plus completion of missing prerequisites.

Students who have not taken a course in basic biochemistry will be required to complete one prior to BIOS 701 Systems Biology.

Policies

For policies governing all graduate programs, see AP.6 Graduate Policies (p. 90).

Reduction of Credits

For students entering the doctoral program with a master’s degree in a related field from a regionally accredited institution, the number of required credits may be reduced up to 30 credits, subject to approval of the program faculty and the college’s associate dean for student affairs.

Transfer of Credit

Graduate credits taken previously and not used toward another degree may be transferred, subject to the approval of the advisor, the program director, and the associate dean. See AP.6.5 Credit by Exam, Reduction or Transfer (p. 91) for more information.

Requirements

Degree Requirements

Total credits: 72

Students should refer to the Admissions & Policies (p. 800) tab for specific policies related to this program.

Students in the doctoral program are required to present two research papers at a meeting or conference any time before graduation.

Concentration in Cell and Molecular Biology (CMB)

This concentration prepares students for significant contributions in an academic or industrial research career. Coursework covers microarray analysis of gene expression, proteome analysis, sequencing and analysis of gene polymorphisms, gene and genome evolution, molecular studies of disease mechanisms, mechanisms of toxicology and mutagenesis, developmental neuroscience, and biotechnological applications.

Total Credits 12

Concentration in Microbiology and Infectious Disease (MID)

Students in this concentration will be prepared for employment in academia, government, or industry. By stressing mechanisms of pathogenicity, physiology, metabolism, and genomic and proteomic analysis of pathogens, students will have a firm foundation for future research in infectious disease. Students will also be introduced to advanced laboratory practices, such as animal research methodologies and biocontainment laboratory work.

Concentration in Biocomplexity and Evolutionary Biology (BEB)

This concentration prepares students for careers in academia, government or industry. Through this concentration students will learn laboratory and quantitative skills that will enable them to investigate evolutionary relationships among organisms at the population, species or ecosystem level. Students will be encouraged to explore a wide range of coursework in order to develop a broad background in evolutionary biology and a deep knowledge of relevant methodologies necessary to keep abreast in this rapidly changing field.

The science of evolutionary biology is fundamentally concerned with documenting not only genetic change, but also the processes that cause it. Evolutionary biology includes paleobiology, population genetics, evolutionary ecology and phylogenetics. Biocomplexity is the study of living organisms, including their unique structural, chemical and genetic properties, their distribution and abundance in nature, and their evolutionary relationships to all other organisms. Given the fact that most of the earth’s biodiversity is unknown, collecting, cataloging and studying organisms have always been and will continue to be one of the most challenging aspects of biology.

Select 12 credits from the following:

- BIOL 574 Population Genetics
- BIOL 585 Eukaryotic Cell Biology Laboratory
- BIOS 716 Methods in Evolutionary Biology
- BIOS 767 Molecular Evolution

Total Credits 12

Electives

Select 23-36 credits from the following:

1. Students may take other courses related to their research topic if approved by their committee. Courses in Geographic Information Systems or Statistics are encouraged.

Dissertation Committee

Upon admission to the program, each student is assigned an advisor from the bioscience faculty. The advisor may be changed by mutual consent of student and advisor, or petition to the program director and associate dean. With their advisor, students adopt an individual program that focuses on a specific area of research.

By the end of the fourth semester of coursework, students assemble a dissertation committee of four graduate faculty members with representation from at least two academic departments. The faculty advisor and the program director approve the program of study.
Qualifying Examination
On nearing completion of course requirements, students take a qualifying exam with a written and an oral component. At the discretion of the committee, the written qualifying exam may be retaken once if the student’s performance was deemed below satisfaction.

Advancement to Candidacy
Upon successful completion of the qualifying exam, the majority of all coursework, and an accepted dissertation proposal, students will be recommended for advancement to candidacy by the committee and the program director.

The semester after advancement to candidacy, students are eligible to enroll in dissertation research (BIOS 999 Doctoral Dissertation Research). Students must review their progress on the dissertation with their graduate committee on a regular basis until graduation.

Dissertation Research
No more than 24 combined credits from BIOS 998 Doctoral Dissertation Proposal and BIOS 999 Doctoral Dissertation Research may be applied toward satisfying doctoral degree requirements. Students register for a minimum of 3 credits of BIOS 999 Doctoral Dissertation Research in the first semester of advancement.

</tr>
</tbody>
</table>

Total Credits: 12-24

Doctoral Dissertation
After advancing to doctoral candidacy, students work with their dissertation committee to develop their dissertation proposal into a completed doctoral dissertation. The dissertation research should represent a significant contribution that is publishable in a refereed scientific journal. When the dissertation is complete, students will present their results to their graduate committee and defend their dissertation in a public forum.

Personalized Medicine Graduate Certificate
Banner Code: SC-CERG-PRSM

Academic Advising
312 Colgan Hall
Science and Technology Campus
Phone: 703-993-8400
Email: biologygrad@gmu.edu
Website: ssb.gmu.edu

This certificate is based upon a set of core courses that currently support the Biology, MS (p. 794); the Biosciences, PhD (p. 799); the Bioinformatics and Computational Biology, MS (p. 788); and the Bioinformatics and Computational Biology, PhD (p. 792) degree programs. Students completing this certificate will receive the most up-to-date advanced education available in the region. Completion of the certificate will enhance the careers of those students who are already working in this area, and can also serve as a useful intermediate step towards later enrollment in master's or doctoral programs.

Courses are generally offered in the late afternoon or in the evening to accommodate students with full-time employment outside of the university.

This certificate may be pursued on a part-time or full-time basis.

Admissions & Policies
Admissions
University-wide admissions policies can be found in the Graduate Admissions Policies (p. 68) section of this catalog.

To apply for this program, please complete the George Mason University Admissions Application (https://www2.gmu.edu/admissions-aid/apply-now).

Prospective students should hold an undergraduate GPA of 3.00 or current employment in clinical or translational research, diagnostics lab, or biological data analysis field.

To be considered for admission, applicants must submit the George Mason University Admissions Application (https://www2.gmu.edu/admissions-aid/apply-now), all undergraduate transcript(s), three letters of recommendation, and a statement of interest.

Policies
Students may not enroll initially in any College of Science master's or doctoral program and later transfer into this certificate program.

For policies governing all graduate programs, see AP6 Graduate Policies (p. 90).

Premium Tuition
This certificate charges students a differential tuition rate of $100 per credit hour, which is added to the standard graduate tuition rate (regardless of in or out of state status).

Requirements
Certificate Requirements
Total credits: 15

This certificate may be pursued on a full-or part-time basis.

Students should refer to the Admissions & Policies (p. 802) tab for specific policies related to this program.

Credit for these courses may only be applied toward the certificate's electives if the research topic is relevant to personalized or translational medicine.

College of Visual and Performing Arts

The mission of the College of Visual and Performing Arts (CVPA) is to advance the study, creation, performance, exhibition, and management of the arts, acting on the strong belief in their transformative influence on individuals and civilizations. Fusing the academic and the professional, the campus and the community, the past and the present, CVPA seeks to engage new art forms, populations, and ways of working to meet the needs of a changing world both inside and beyond the walls of the university. The College strives to ensure that Mason’s entire student population has the opportunity to experience and study the arts as a key component of a well-rounded liberal education.

Studying the arts goes hand in hand with creation, performance, and management. Each major features strong academic preparation in the history and theory of the art form in support of discipline-based technique courses. The college’s faculty of practicing artist-teachers-managers works closely with students in a variety of curricular and co-curricular creative projects. Once basic techniques are established, students are encouraged to stretch, grow, and experiment within this supportive environment, enhancing their experience as working artists and arts managers while enriching the cultural life of the campus community.

An education in the arts is deepened by regular contact with the work of distinguished visiting artists. The college is home to the Center for the Arts (http://cfa.gmu.edu) on the Fairfax campus and the Hylton Performing Arts Center (https://hyltoncenter.org) on the Science and Technology campus, both of which present diverse programs of cultural experiences for the entire university community, as well as Northern Virginia and the greater Washington, D.C., area. Artists from across the country and around the world regularly perform, give master classes, work with students during extended residencies, and interact with the community in a variety of other ways. The accessibility and vitality of the Concert Hall, Hylton Center, TheaterSpace, the School of Art Gallery, Johnson Center Cinema, Harris Theater, and other campus and regional venues provide an unparalleled educational experience in the arts.

Requirements & Policies

General Academic Policies

The requirements for each academic program offered by the college are described in the sections below. Students are ultimately responsible for their academic progress towards their degrees. All students are subject to the university’s general academic policies in addition to those specific to each academic unit.

Accommodations for Disabled Students

Students with documented disabilities should contact the Office of Disability Services (http://ods.gmu.edu) (Student Union I, Room 222; 703-993-2474) to open a file and learn more about accommodations that may be available to them.

Auditing

Students who wish to audit a course must obtain written permission from the instructor before registering for the class. Students do not receive grades or credit for audited courses. A student who audits a course does so for the purposes of self-enrichment and academic exploration and is not required to actively participate in class assignments, presentations, or exams. The course is offered only on a space-available basis with the approval of the instructor. It is expected that auditing students will respect all class rules and practices.

The Course Audit Form can be found on the Registrar's website (http://registrar.gmu.edu). The form must be submitted to the Office of the University Registrar by the last day to drop the course.

Note: A previously audited course may be taken again for credit in a later term. Students may also audit a course previously taken and passed; however, students may not change from credit to audit status nor from...
audit to credit status after the end of the drop period, as defined above. The usual tuition and fees apply to audit status.

Auditing Courses under the Senior Citizen Waiver Program
Under terms of the Senior Citizen Higher Education Act of 1974, eligible Virginia residents (requires legal domicile for one year) that are 60 years of age or older are entitled to enroll to audit (no academic credit received) up to three academic credit courses per semester and pay no tuition or fees, except fees established for the purpose of paying for course materials or laboratory fees.

For more information on policies and procedures, please refer to the Registrar’s website (https://registrar.gmu.edu/topics/senior-citizen-waiver).

E-mail
George Mason University uses only Mason e-mail accounts to communicate with enrolled students. Students should activate their Mason e-mail, use it to communicate with their school/department/program and other administrative units, and check it regularly for important information.

Registration
Students are personally responsible for correctly registering for courses and paying all tuition and fees by the official university registration and payment deadlines. Instructors do not have the authority to add students to courses. All students should verify the accuracy of their enrollment before the end of the add and drop periods.

Questions about Academic Policies
Students with questions regarding exceptions to academic policies should contact the CVPA Academic Affairs Office (College Hall, C200; 703-993-4551).

Undergraduate Policies and Information
Degree Programs
The undergraduate degree consists of course work in the Mason Core (p. 142), a major area of study, and electives. To earn a bachelor’s degree, students must complete a minimum of 120 credits, of which at least 45 must be upper level courses (numbered 300 and above). At least one course at the 300 or 400 level must be designated “writing intensive.”

Academic Course Load
Undergraduate students earning degrees in CVPA may register for 18 credits per fall and spring semester without the dean’s permission. Students are advised that they will be required to pay additional tuition beyond the 16-credit, university full-time academic load. Students should be cognizant of the time commitment when they register for their courses, especially if they register for high numbers of credits. Students are urged to consult with their advisor and familiarize themselves with Mason guidelines for work and academic load. Students are reminded that employment must not take priority over course work.

Advising
Students are assigned advisors and are strongly encouraged to meet with them periodically, and particularly when they achieve 75 credits or are two semesters before expected graduation. Undeclared CVPA students and undergraduate students in academic difficulty (cumulative GPA under 2.00) are required to see an advisor prior to registration for the semester following registration restriction.

Minimum Cumulative GPA in Major
Undergraduate students earning CVPA degrees must earn a minimum 2.00 cumulative GPA in their major, or higher, if required by their program.

Foreign Language Requirement
Some degrees within CVPA require intermediate-level proficiency in one foreign language or the completion of a minor, double major or double degree. The foreign language requirement may be fulfilled by completing a course in a foreign language numbered 202, 209, or 210 (or higher level courses taught in the language) or achieving a satisfactory score on an approved proficiency test. International students should consult the CVPA Student Academic Affairs Office about a possible waiver of this requirement.

Leave of Absence
All undergraduate students who are planning an absence from George Mason must submit a formal request for Leave of Absence to the Office of the University Registrar. Students do not need to complete the Leave of Absence form if they are participating in a George Mason University sponsored study abroad program or have received permission to study elsewhere. The maximum time allowed for a Leave of Absence is two years. A new admission application will be required if a student is away for more than 2 academic years OR a Leave of Absence form was not submitted. Re-admission is not guaranteed. See AP.1.8 Undergraduate Leave of Absence (p. 81) for full university policy.

Mason Core Program
The baccalaureate degree requires students to take a range of courses that provide a broad knowledge of the world, develop the ability to think both conceptually and critically, acquaint them with many different methods of inquiry, and provide the skills to continue intellectual growth throughout their lives. Students select from a range of courses outlined in the Mason Core (p. 142) section. Students accepted into the Honors College fulfill some/all of their Mason Core (p. 142) requirements with completion of that program of study. Students are strongly advised to consult the University Mason Core (p. 142) page.

Minors
Some degrees within CVPA require a minor or intermediate-level proficiency in one foreign language. University policy states that students must earn 8 distinct credits toward their minor that are not used for their major. Some programs have more specific criteria for applying credits to a minor.

Physical Education Courses
Activity courses offered by the College of Education and Human Development cannot be counted toward credits required for a degree in CVPA. Students may take non-activity RECR courses for elective credit for CVPA degrees.

Prerequisites
Undergraduate students must earn a C or better in prerequisite courses to proceed to the next course.

Study Elsewhere
Students with fewer than 60 hours of transfer coursework (not including registration through the Consortium of Universities of the Washington Metropolitan Area or coursework completed through the Center for Global Education) may take up to 12 hours of coursework in CVPA disciplines at another institution. A student may seek permission for additional hours beyond these limits for summer registration if
his/her permanent residence is more than 50 miles from the George Mason University Fairfax campus. Students must obtain advance, written approval from the student’s dean and the course dean’s office. Students who enroll elsewhere without advance written permission while enrolled at Mason will not receive transfer credit for the course work taken at another institution unless they re-apply for admission to Mason as transfer applicants and meet all priority deadlines. Re-admission is not guaranteed and transfer credit is awarded based upon course equivalences in effect at the time of re-admission. Freshmen and transfer students in their first semester at Mason are not permitted to study elsewhere. Courses previously attempted at Mason (including withdrawals) cannot be taken elsewhere. Schools and Colleges have study elsewhere criteria for courses in their disciplines in addition to University policy. Students must be in good standing with a minimum cumulative GPA of 2.00 in their Mason courses. See AP.1.4.2 Permission to Study Elsewhere.

Transfer of Credit
Transfer students must resolve transfer credit issues within the first academic year of enrollment.

Undergraduate students may transfer a maximum of 18 credits earned in nondegree status at Mason.

Withdrawals
Students are responsible for all courses in which they remain officially enrolled once the drop period has ended.

Undergraduates enrolled in degree programs are eligible to withdraw from three classes through the ninth week (of a fifteen week semester) without dean’s approval and at the student’s own discretion during their entire undergraduate career at Mason. See AP.1.5.1 Selective Withdrawal (p. 81) for Undergraduates for further details.

Instructors do not have the authority to withdraw students from classes. Withdrawals other than Selective Withdrawals require the approval of the academic dean and are typically allowed only for full semesters at a time (all enrolled courses) and are only permitted for non-academic reasons. No withdrawals can be approved to avoid an unsatisfactory grade. When submitting a withdrawal request, students must provide original, verifiable, third-party documentation for the reason for the withdrawal. Requests for withdrawals should be submitted as early in the semester as possible, and never after the last day of classes.

Graduate Policies and Information
For items not listed below, please refer to the university’s policies: AP.6 Graduate Policies (p. 90).

Admissions
CVPA follows university policies for graduate admissions. Some programs ask for additional admissions requirements. Please refer to the program for a listing of all requirements.

All applicants, regardless of admission or not, will have their decision uploaded through their self-service center. Applicants will be notified that their decision is ready for their review via email to the address they provided at the point of application. Applicants will not be told decisions over the phone or in-person. Applicants who do not meet our minimum requirements (e.g., GPA, test scores, pre-screening requirements, portfolio requirements) may be issued a denial decision before their application is completed.

The College of Visual and Performing Arts does not offer an appeal process for admissions decisions. Applicants are welcome to file a new application for a future semester.

Graduate Programs
CVPA’s graduate programs offer highly focused study designed to prepare students for professional work in the arts and education. The requirements for each graduate degree are described under the program’s catalog entry.

Transfer of Credit
Graduate credit earned prior to admission to a certificate, master’s, or doctoral program may be eligible to be transferred and applied to a CVPA graduate program, certificate or doctoral degree. Please see AP.6.5.3 Transfer of Credit (p. 92) for more detailed information about the requirements.

Appeals Process
Appeals of Academic Procedures
See Appeals of Academic Procedures (p. 101) for University Policies.

CVPA Procedures for Grade Appeal
Although faculty members are generally the best judges of student performance in their classes, circumstances may cause a student to believe that a professor has made an unfair grade decision. Therefore, a Grade Appeal process has been established to ensure a fair hearing in such cases. Grade appeals are not accepted after the last day of classes for the following semester, as indicated in the Schedule of Classes (spring for fall grades, fall for spring and summer grades). The process for initiating and resolving a Grade Appeal is as follows:

1. The first step to resolve differences between an instructor and student concerning a grade should be a discussion with the instructor; this meeting should occur within two weeks of the student’s written request for a meeting; if the instructor is no longer affiliated with the University, the appeal is made to the Program Director.

2. If the instructor and student cannot resolve the issue, and the student wishes to pursue the matter further, he or she must present to the Program Director, a written appeal including the following: A description of the outcome of the informal discussion process. Any relevant documents the student would like to have reviewed as part of the appeal process. A copy of the course syllabus and assignment descriptions. Failing a satisfactory resolution, the student may appeal the grade by submitting a written appeal to the CVPA Academic Affairs Office. Undergraduate students will submit their request to the assistant dean; graduate students will submit their requests to the associate dean in the CVPA Academic Affairs Office.

The decision of the CVPA Assistant or Associate Dean is final.

CVPA Procedures for Appeal of an Academic Action
In exceptional circumstances a student may request a meeting to review the decision of an academic action.

1. The student must state in writing the reasons for requesting further appeal of an academic action, and provide any additional or new information relevant to the appeal.

2. The Assistant Dean (undergraduate)/Associate Dean (graduate) for Academic Affairs reviews all appeals.
3. The dean will conduct a review of the documentation provided by the student, and may request additional information in order to make an informed decision.

4. A nonparticipating observer of the student’s choice may attend the meeting with the dean, and the dean may also have a nonparticipating observer attend.

5. The student may follow University appeal procedures outlined in Appeals of Academic Procedures (p. 101).

**CVPA Procedure for Non-Academic Appeals or Grievance**

A student who intends to file a non-academic appeal, or intends to file a grievance against a faculty member, another student, or administrator undertakes the following steps:

1. The student meets with the professor and Program Director to discuss the non-academic appeal/grievance; this meeting should occur within two weeks of the student’s written request for a meeting; if the person is no longer affiliated with the University, the request is made to the Department or Program Director only.

2. The professor (Program Director) responds to the student within three days of the meeting.

3. If the student wishes to continue the non-academic appeal/grievance, the student must submit a written explanation to Academic Affairs Office. The Associate Dean reviews all non-academic appeals and grievances, and has the final decision for the college.

4. The student may follow additional University appeal procedures outlines in Appeals of Academic Procedures (p. 101).

**Academic Termination from an Undergraduate Program**

Termination from a major may be imposed as a result of excessive repeating of required courses without achieving the minimum standard, and for other evidence of continued failure to make adequate progress toward completion of the major. Some programs have specific criteria for termination from the major. See the program and AP5.2.4 Termination from the Major (p. 88).

**Academic Dismissal from an Undergraduate Program**

A third suspension results in academic dismissal from the university. See AP5.2.6 Academic Dismissal (p. 88) for details.

**Academic Dismissal from a Graduate Program**

The Office of the University Registrar contacts students via e-mail if they have earned an academic warning, or dismissal. Students wishing to appeal should contact the CVPA Graduate Programs Office within three days of the e-mail date. A deadline for the appeal documentation is determined, normally two weeks. Students are to submit:

1. A written statement explaining the circumstances that led to the dismissal, along with supporting documentation from employers, physicians, or other sources as necessary;

2. Evidence that the circumstances precipitating the unsatisfactory academic performance have been remedied;

3. Statement from department and program’s graduate coordinator supporting the student’s continued enrollment at the University.

Upon receipt of the above,

1. The Associate Dean of Academic Affairs reviews the appeal.

2. The final decision of the Associate Dean is forwarded to the student and the Office of the University Registrar.

3. The student may follow University appeal procedures outlined in Appeals of Academic Procedures (p. 101).

For these, and any other academic concerns, students are encouraged to contact George Mason University’s Ombudsman for Student Academic Affairs. The ombudsman is a neutral, independent, informal, and confidential party who provides assistance to students in resolving university-related concerns. The ombudsman is an advocate for fairness and the equitable treatment of students, operates independently of all formal grievance processes at the university, and considers all sides of an issue in an impartial and objective manner. The ombudsman has no authority to make exceptions or to grant requests but can perform informal investigations and, as a result, may recommend actions that lead to changes in processes and policies at the university. Meetings with the ombudsman are confidential. The ombudsman serves all undergraduate and graduate students at the university.

The MFA in Visual and Performing Arts is a terminal degree which prepares students as professional artists and scholars who can work within their specialty and teach at the university level. Creative work and skill building are at the core of the study. The curriculum is designed for serious and talented students who are prepared to examine modes of creative inquiry in an inclusive, unique environment that promotes exploration, analysis, synthesis, and development as artists.

**Admissions & Policies**

**Admissions**

**Concentration in Dance**

The MFA in Visual and Performing Arts, concentration in Dance, is a highly selective 60-credit program of study grounded in the modern
dance genre that emphasizes mastery in performance, choreography, and teaching in higher education. Applicants must have significant (5 years or more) professional performance experience in modern or ballet at the national or international level. They must also demonstrate professional competence in choreography as exemplified by a significant body of work, and have experience teaching technique at the advanced level.

All MFA applicants are required to submit the following items:

- Online Application and Fee
- Official transcripts from each institution of higher education attended
- 3 letters of recommendation
- Resume
- Goals Statement

The following should be sent directly to the School of Dance via SlideRoom:

- 15-minute video of original choreography
- Artistic Goals Statement
- Resume
- Applicant must satisfy the following prerequisites: advanced dance technique, improvisation, dance composition, history, anatomy/kinesiology, and dance production. Prerequisite courses are usually fulfilled if the applicant has earned a BA or BFA in Dance.

Qualified students will be invited for an audition after review of application materials.

**Concentration in Graphic Design**

All MFA applicants are required to submit the following items:

- Online Application and Fee
- Official transcripts from each institution of higher education attended
- 3 letters of recommendation
- Resume
- Goals Statement

Additional Requirements for Concentration in Graphic Design:

- Portfolio
- Writing Sample: A critical and historical essay or academic paper on a design- (preferred) or art-related topic.

**Portfolio Guidelines**

The applicant’s portfolio is a major selection criterion for graduate admission and should represent the applicant’s most accomplished work.

The portfolio and all other application materials should be submitted to the Office of Graduate Admissions. For more information, contact the School of Art office at 703-993-8898.

Portfolios should include 20 samples of design work submitted through SlideRoom. Samples must be labeled with: name of artist, title, and date. Videos and Flash files (no more than 4 minutes for each section) must be playable through SlideRoom. In the case of collaborative work, the applicant’s role should be clearly stated.

**Concentration in Theater**

Theater MFA students are admitted to a specific emphasis: acting, design & technology, directing, musical theater, or playwriting & dramaturgy.

Specific programs of study will be designed for each individual, based on previous experience and expertise.

**Admissions Requirements**

All MFA applicants are required to submit the following items:

- Online Application and Fee
- Official transcripts from each institution of higher education attended
- 3 letters of recommendation
- Resume
- Goals Statement

Additional requirements for concentration in Theater:

- Portfolio
- Interview or Audition

Diversity among students accepted for study is another consideration. Applicants with degrees in areas other than Theater are welcome, although they may be required to complete undergraduate endorsement core courses. Details available on School of Theater website.

**Portfolio Guidelines**

The applicant’s portfolio is a major selection criterion for graduate admission and should represent the applicant’s most accomplished work. The portfolio and all other application materials should be submitted to the Office of Graduate Admissions. For more information, contact the School of Theater office at 703-993-1120.

Portfolio requirements are different for each graduate area of emphasis and are listed below. Incomplete portfolios will not be considered. Applicants’ portfolio items are considered part of their application for admission and, thus, cannot be returned. Please do not send original materials.

**Portfolio Requirements by Area of Emphasis**

**Design & Technology**

One fully documented design in your area of emphasis (i.e. lighting, sound, scenery, costume, etc.). This may include: script analysis, research, renderings, paperwork, drafting, diagrams, sound clips and photographs of the production. Additional examples of design work and artistic vision may also be submitted. Guidelines available on School of Theater website.

**Playwriting & Dramaturgy**

One to three writing samples, totaling no more than 25 pages. Playwrights should submit a one-page synopsis and dialogue sample. Dramaturgs may submit essays, reviews, or articles written for the general public, along with a cover letter addressing key areas of interest in the field. Guidelines available on School of Theater website.

**Directing**

Applicants for the MFA with an emphasis in Directing must submit both a portfolio of produced work, as well as a directorial analysis of a play or opera. For the latter, include at least six visual images with annotation that support your ideas. Guidelines available on School of Theater website.

**Acting and Music Theater Performance**

A three page written character analysis of one of the roles to be presented at auditions. Guidelines available on School of Theater website. Please see audition requirements.
Audition Requirements

Acting
Applicants for the MFA with an emphasis in Acting must complete an audition for the program. Applicants should be prepared with three contrasting monologues. Two monologues will be required for the audition, and a third may be requested should additional material be needed. Please prepare both classical and contemporary work. Auditors will be looking for range, transformational potential, and vocal and physical expressiveness.

Musical Theater
Applicants for the MFA with an emphasis in Musical Theater must complete an audition for the program. Applicants should be prepared with two songs and two monologues. Contrast between the pieces is essential. Please prepare both classical and contemporary work. Auditors will be looking for musical ability, range, transformational potential, vocal and physical expressiveness, dance and movement skills, and emotional honesty through text and song. An accompanist may be provided and requires a cash fee on the day of audition. This includes a brief rehearsal prior to appointment time. Those auditioning may provide their own accompanist.

Concentration in Visual Art
All MFA applicants are required to submit the following items:

- Online Application and Fee
- Official transcripts from each institution of higher education attended
- 3 letters of recommendation
- Resume
- Goals Statement

Additional Requirements for Concentration in Visual Arts:

- Portfolio

Portfolio Guidelines
The applicant’s portfolio is a major selection criterion for graduate admission and should represent the applicant’s most accomplished work.

The portfolio and all other application materials should be submitted to the Office of Graduate Admissions. For more information, contact the School of Art office at 703-993-8898.

Portfolio requirements are different for each graduate area of emphasis and are listed below. Incomplete portfolios will not be considered.

Portfolio Requirements by Area of Emphasis

InterArts
20 images submitted through SlideRoom. Samples must be labeled with: name of artist, title and date. Videos and Flash files (no more than four minutes for each section) must be playable through SlideRoom. In the case of collaborative work, the applicant’s role should be clearly stated. If writing-based materials are submitted, they should be submitted in printed form.

New Media Arts
20 images submitted through SlideRoom. Samples must be labeled with: name of artist, title and date. Videos and Flash files (no more than four minutes for each section) must be playable through SlideRoom. Only the relevant parts of the video should be marked for viewing, with the applicant’s role clearly stated.

Painting and Drawing
20 images submitted through SlideRoom. Samples must be labeled with: name of artist, title and date.

Photography
20 images submitted through SlideRoom. Samples must be labeled with: name of artist, title and date.

Printmaking
20 images submitted through SlideRoom. Samples must be labeled with: name of artist, title and date.

Sculpture
20 images submitted through SlideRoom. Samples must be labeled with: name of artist, title and date.

Policies

Program Requirements
Candidates are required to complete 60 credits, of which 30 are made up from core requirements. An additional 30 credits are based on concentration area and comprehensive experience.

MFA concentrations include:

- Dance
- Graphic Design
- Theater
- Visual Art

While the faculty anticipate that students will work through their coursework as described in this catalog, individuals with extensive professional accomplishment may craft an individualized program that meets curricular requirements. Individualized programs require the recommendation of the Graduate Committee within the student’s respective school as well as the approval of the CVPA Associate Dean.

Requirements

Degree Requirements
Total credits: 60

Students should complete all requirements within the concentration to which they have been admitted. Candidates are required to complete 60 credits, of which 30 are made up from core requirements. An additional 30 credits are based on concentration area and comprehensive experience.

Concentration in Dance (DANC)
The MFA in Visual and Performing Arts, concentration in Dance, is a highly selective 60-credit program of study grounded in the modern dance genre that emphasizes mastery in performance, choreography, and teaching in higher education.

Concentration in Visual Art (VART)

The MFA in Visual and Performing Arts, concentration in Visual Arts, is a terminal degree that prepares students to become professional artists, work in technology or arts-related fields, and teach at the university level. Students select an emphasis in one of the following: New Media, Painting and Drawing, Photography, Printmaking, Sculpture, or InterArts. Students have the opportunity to combine art forms in projects that may be installation, performance, publishing, time-based, or writing-based, and combine creative and critical approaches in their work.

Arts Management Program

3434 N. Washington Boulevard
Arlington, VA 22201

Phone: 703-993-8926
Website: artsmanagement.gmu.edu

Undergraduate Program
Arts Management Minor

The field of visual and performing arts offers many career paths that rely on a strong foundation in one or more art forms and require specific knowledge and skills in administration and management. The minor in arts management is open to all CVPA majors as well as art history majors. All other students must complete 9 credits of arts-related course work to be eligible for this minor.

Graduate Program
MA in Arts Management

The MA in Arts Management responds to a growing demand for graduates who can manage and coordinate the arts, bridging the worlds of performing and visual arts with applied managerial skills. The Washington, D.C., region is home to one of the nation's largest concentrations of arts organizations. The demand for arts managers with skills in financial and budgetary management, strategic management and entrepreneurship, and public relations, including marketing and advertising, has arguably never been more acute. The need for arts managers with skills in philanthropy, fund raising, and ongoing relationship management in the private and public arts sectors also continues to grow at a fast pace.

The MA in Arts Management is a 36-credit program of study that provides a core curriculum in the fundamentals of arts management. Students complete a 24-credit core and then select 9 credits of approved elective courses. Students also take an internship, which affords an in-depth opportunity to work with professionals in the field. The internship provides the opportunity to work at more than 60 different visual and performing arts venues in Washington, D.C., as well as national and international locations.

Requirements & Policies

Requirements
Admissions

The program is geared toward those with a passion for the arts. Diversity among applicants is anticipated and sought, and candidates are evaluated on a case-by-case basis. Work experience is strongly preferred. It is anticipated that some students will come from the arts community, with experience and training in music, dance, theater, visual and technical arts and wish to add the skills of marketing, finance, strategy, fundraising, entrepreneurship, and management to their repertoire. It is also expected that some students will enter with more developed skills in business and wish to unite these skills with prior experiences in the arts.

For admissions requirements and deadlines, applicants should visit the graduate admissions page of the Arts Management website (http://artsmanagement.gmu.edu).

Admissions & Policies

Admissions

Admissions Requirements
The program is geared toward those with a passion for the arts. Diversity among applicants is anticipated and sought, and candidates are evaluated on a case-by-case basis. Work experience is strongly preferred. It is anticipated that some students will come from the arts community, with experience and training in music, dance, theater, visual and technical arts and wish to add the skills of marketing, finance, strategy, fundraising, entrepreneurship, and management to their repertoire. It is also expected that some students will enter with more developed skills in business and wish to unite these skills with prior experiences in the arts. Completed applications must be received by February 15 for fall and October 1 for spring.

In addition to meeting general requirements for university admission for graduate study, applicants must submit the following items:

- Official undergraduate transcripts listing a four-year bachelor’s degree from an accredited institution with a minimum GPA of 3.00
- Resume
- Two letters of recommendation from faculty members or individuals who have first-hand knowledge of the applicant’s academic or professional capabilities
- A two-page (maximum) statement of intent and goals
- Portfolio that demonstrates work experience (optional)
- Applicants may be interviewed by at least one member of the program faculty or Admissions Committee

Policies
Please see College of Visual and Performing Arts (p. 803) for college academic policies.

Accelerated Master's

Art and Visual Technology, BA/Arts Management, Accelerated MA

Overview
Undergraduates in Art may apply to the accelerated master’s degree in Arts Management. If accepted, students will be able to earn an Art and Visual Technology, BA (p. 831) and an Arts Management, MA (p. 813) after satisfactory completion of 150 credits.

Students choosing the accelerated option must fulfill all university requirements for the master’s degree. The regular designed timeframe would be a start in the Fall and completion of all coursework in the Summer five years later with the exception of Capstone, which is only offered in Fall and Spring. Students may need a longer timeframe to complete all requirements.

This accelerated option is offered through joint cooperation between the School of Art (p. 825) and the Arts Management Program (p. 812).

For more detailed information, see AP 6.7 Bachelor’s/Accelerated Master’s Degrees (p. 93). For policies governing all graduate degrees, see AP 6 Graduate Policies (p. 90).
Admissions Requirements
Applicants to accelerated master’s programs must have completed at least 75 credits that apply to their undergraduate degree (with at least 24 credits at Mason) and no more than 100 credits. Applicants should submit an Accelerated Master’s Program Application, available from the College of Visual and Performing Arts (CVPA) Academic Affairs Office. It includes the proposed conferral date for the undergraduate degree and the two graduate courses that are to be applied to the undergraduate degree.

Interested students should contact the Arts Management Program Office for more details about the application process.

Accelerated Option Requirements
As an undergraduate, the accelerated master’s student is required to complete the two graduate courses indicated on their Accelerated Master’s Program application with a minimum grade of 3.00 in each course. Students must maintain a minimum GPA of 3.00 in all coursework and in coursework applied to their major. On completion and conferral of the undergraduate degree in the semester indicated in the application, candidates submit the Bachelor’s/Accelerated Master’s Transition Form (which shall incorporate all of the Graduate Admission requirements of the university) and are admitted to graduate status.

As graduate students, accelerated master’s students have an advanced standing and must meet all master’s degree requirements except for the two courses (6 credits) completed as undergraduates. Students will begin their master’s program in the semester immediately following conferral of the undergraduate degree, and they may also begin in the summer term.

Reserve Graduate Credit
Students may take up to 6 additional graduate credits as reserve graduate credit. These credits do not apply to the undergraduate degree. The ability to take courses for reserve graduate credit is available to all high achieving undergraduates with permission of the School of Art. Permission to take a graduate course for reserve graduate credit is normally granted only to Mason seniors within 15 credit hours of graduation and must be approved by the Dean’s Office.

To apply these credits to the master’s degree, students must request that the credits be moved from the undergraduate degree to the graduate degree using the Bachelor’s/Accelerated Master’s Transition Form.

Art and Visual Technology, BFA/Arts Management, Accelerated MA
Overview
Undergraduates in Art may apply to the accelerated master’s degree in Arts Management. If accepted, students will be able to earn an Art and Visual Technology, BFA (p. 835) and an Arts Management, MA (p. 813) after satisfactory completion of 150 credits.

Students choosing the accelerated option must fulfill all university requirements for the master’s degree. The regular designed timeframe would be a start in the Fall and completion of all coursework in the Summer five years later with the exception of Capstone, which is only offered in Fall and Spring. Students may need a longer timeframe to complete all requirements.

This accelerated option is offered through joint cooperation between the School of Art (p. 825) and the Arts Management Program (p. 812).

For more detailed information, see AP 6.7 Bachelor’s/Accelerated Master’s Degrees (p. 93). For policies governing all graduate degrees, see AP 6 Graduate Policies (p. 90).

Admissions Requirements
Applicants to accelerated master’s programs must have completed at least 75 credits that apply to their undergraduate degree (with at least 24 credits at Mason) and no more than 100 credits. Applicants should submit an Accelerated Master’s Program Application, available from the College of Visual and Performing Arts (CVPA) Academic Affairs Office. It includes the proposed conferral date for the undergraduate degree and the two graduate courses that are to be applied to the undergraduate degree.

Interested students should contact the Arts Management Program Office for more details about the application process.

Accelerated Option Requirements
As an undergraduate, the accelerated master’s student is required to complete the two graduate courses indicated on their Accelerated Master’s Program application with a minimum grade of 3.00 in each course. Students must maintain a minimum GPA of 3.00 in all coursework and in coursework applied to their major. On completion and conferral of the undergraduate degree in the semester indicated in the application, candidates submit the Bachelor’s/Accelerated Master’s Transition Form (which shall incorporate all of the Graduate Admission requirements of the university) and are admitted to graduate status.

As graduate students, accelerated master’s students have an advanced standing and must meet all master’s degree requirements except for the two courses (6 credits) completed as undergraduates. Students will begin their master’s program in the semester immediately following conferral of the undergraduate degree, and they may also begin in the summer term.

Reserve Graduate Credit
Students may take up to 6 additional graduate credits as reserve graduate credit. These credits do not apply to the undergraduate degree. The ability to take courses for reserve graduate credit is available to all high achieving undergraduates with permission of the School of Art. Permission to take a graduate course for reserve graduate credit is normally granted only to Mason seniors within 15 credit hours of graduation and must be approved by the Dean’s Office.

To apply these credits to the master’s degree, students must request that the credits be moved from the undergraduate degree to the graduate degree using the Bachelor’s/Accelerated Master’s Transition Form.

Music, BA/Arts Management, Accelerated MA
Overview
Students choosing the accelerated option must fulfill all university requirements for the master’s degree. The regular designed timeframe would be a start in the Fall and completion of all coursework in the Summer five years later with the exception of Capstone, which is only offered in Fall and Spring. Students may need a longer timeframe to complete all requirements.
This accelerated option is offered through joint cooperation between the School of Music and the Arts Management Program.

For more detailed information, see AP.6.7 Bachelor’s/Accelerated Master’s Degrees. For policies governing all graduate degrees, see the Academic Policies section of the catalog.

**Application Requirements**

Applicants to accelerated master’s programs must have completed at least 75 credits that apply to their undergraduate degree (with at least 24 credits at Mason) and no more than 100 credits. Applicants should submit an Accelerated Master’s Program Application, available from the College of Visual and Performing Arts (CVPA) Graduate Studies. It includes the proposed conferral date for the undergraduate degree and the two graduate courses that are to be applied to the undergraduate degree.

Interested students should contact the Arts Management Program Office for more details about the application process.

**Accelerated Option Requirements**

As an undergraduate, the accelerated master’s student is to complete the two graduate courses indicated on their Accelerated Option Requirements.

As an undergraduate, the accelerated master’s student is to complete the two graduate courses indicated on their Accelerated Master’s Program application with a minimum grade of B in each course. Students must maintain a minimum GPA of 3.00 in all coursework and in coursework applied to their major. On completion and conferral of the undergraduate degree in the semester indicated in the application, they submit the Bachelor’s/Accelerated Master’s Transition Form (which shall incorporate all of the Graduate Admission requirements of the university) and are admitted to graduate status.

As graduate students, accelerated master’s students have an advanced standing. They must meet all master’s degree requirements except for the two courses (6 credits) they completed as undergraduates. Students will begin their master’s program in the semester immediately following conferral of the undergraduate degree, and they may also begin in the summer term.

**Reserve Graduate Credits**

Students may take up to 6 additional graduate credits as reserve graduate credit. These credits do not apply to the undergraduate degree. To apply these credits to the master’s degree, students must request that the credits be moved from the undergraduate degree to the graduate degree using the Bachelor’s/Accelerated Master’s Transition Form.
Theater, BA/Arts Management, Accelerated MA

Overview
Undergraduates in Theater may apply to the accelerated master’s degree in Arts Management. If accepted, students will be able to earn a BA in Theater (p. 882) and an MA in Arts Management (p. 813) after satisfactory completion of 150 credits.

Students choosing the accelerated option must fulfill all university requirements for the master’s degree. The regular designed timeframe would be a start in the Fall and the completion in the Summer five years later, but longer time frames may also be available.

See AP 6.7 Bachelor’s/Accelerated Master’s Degree (p. 93) for policies related to this program. For policies governing all graduate degrees, see AP 6 Graduate Policies (p. 90).

Admission Requirements
Applicants to accelerated master’s programs must have completed at least 75 credits that apply to their undergraduate degree (with at least 24 credits at Mason) and no more than 90 credits. Applicants should submit an Accelerated Master’s Program Application, available from the College of Visual and Performing Arts (CVPA) Graduate Studies. It includes the proposed conferral date for the undergraduate degree and the two graduate courses that are to be applied to the undergraduate degree.

Interested students should contact the Arts Management Program Office for more details about the application process.

Accelerated Option Requirements
As an undergraduate, the accelerated master’s student is to complete the two graduate courses indicated on their Accelerated Master’s Program application with a minimum grade of 3.00 in each course. Students must maintain a minimum GPA of 3.00 in all coursework and in coursework applied to their major. On completion and conferral of the undergraduate degree in the semester indicated in the application, they submit the Bachelor’s/Accelerated Master’s Transition Form (which shall incorporate all of the Graduate Admission requirements of the university) and are admitted to graduate status.

As graduate students, accelerated master’s students have an advanced standing. They must meet all master’s degree requirements except for the two courses (6 credits) they completed as undergraduates. The Internal Internship (AMGT 740 Internal Internship) will be within Theater at Mason (generally with the School of Theater). Students will begin their master’s program in the semester immediately following conferral of the undergraduate degree, and they may also begin in the summer term.

Reserve Graduate Credit
Students may take up to 6 additional graduate credits as reserve graduate credit. These credits do not apply to the undergraduate degree. The ability to take courses for reserve graduate credit is available to all high achieving undergraduates with permission of the School of Theater. Permission to take a graduate course for reserve graduate credit is normally granted only to Mason seniors within 15 hours of graduation and must be approved by the Dean’s Office.

To apply these credits to the master’s degree, students must request that the credits be moved from the undergraduate degree to the graduate degree using the Bachelor’s/Accelerated Master’s Transition Form.

Computer Game Design Program
Sang Nam, Director
2019 Art and Design Building
Fairfax Campus
Phone: 703-993-5734
Website: game.gmu.edu

Undergraduate Program
The 120-credit Computer Game Design program enables students to focus on the artistic components of computer game design while providing them with the technical skills prerequisite to the field. Required courses include computer science, art and visual technology, music, the humanities, and computer game design. The required internship provides students with practical experience that enhances their employability post-graduation.

Graduate Program
The MA in Computer Game Design prepares graduate students who may have studied game design at the undergraduate level or who have degrees in a related technology, humanities, or arts disciplines for a career in game development and design. The program’s intention is to prepare students for employment and further study in the computer game design and development fields with a curriculum that reflects the gaming industry’s demand for an academically rigorous, technical program coupled with an understanding of the artistic and creative elements of the evolving field of study.

Faculty

Program Faculty
Associate Professor
Martin (director VSGI), Willis
Assistant Professors
Dieterich, Grimsby, Hudson, Lebowitz, Nam (director, graduate coordinator), Nolan, Piccione (associate director), Prawat
Administrative Faculty (Instructional)
Casey (associate director, Virginia Serious Game Institute)

Requirements & Policies
Undergraduate Program
Admissions
A writing sample will be reviewed prior to admission into the Game Design Program. Students will either be accepted, provisionally accepted, or denied. Visit the department website (http://game.gmu.edu) for further instruction.
Writing-Intensive Requirement
The university requires all undergraduate students to complete at least one course designated “writing intensive” in their majors at the 300 level or above. Students in the BFA in computer game design fulfill this requirement by successfully completing GAME 332 RS: Story Design for Computer Games.

Upper-Level Credits
All undergraduate students are required to complete a minimum of 45 credits of upper-division courses at the 300-499 level. Fulfilling degree requirements does not guarantee this requirement will be met.

Major GPA
All GAME undergraduate students must earn a minimum 2.00 cumulative GPA in their major.

All GAME courses except GAME 101 Introduction to Game Design (Mason Core) (p. 142), GAME 250 Music for Film and Video and GAME 367 Writing and Editing Music and Sound must be passed with a grade of C or better.

Academic Policies
All GAME majors are required to adhere to the George Mason University Honor code. Failure to do so may result in academic sanctions up to an including dismissal from the University.

Please see College of Visual and Performing Arts (p. 803) for college academic policies.

Graduate Program
Admissions
Admission is competitive. An offer of admission is valid only for the semester for which the student applies. For application requirements and deadlines, applicants should visit the Computer Game Design website (http://game.gmu.edu). Mason encourages early applications from prospective students who wish to be considered for academic scholarships or grants.

The minor embodies the core components discovered in the larger game design field. It offers a core of foundational studies with intermediate and advanced course options in game animation, game sound and music, or game design and development. Students pursuing the minor will be able to participate in game program events, special activities, game design competitions, and in most projects hosted in the Computer Game Design Research Studio.

The MA in Computer Game Design prepares graduate students, who may have studied game design at the undergraduate level, or who have degrees in a related technology, humanities, or arts discipline. The program's intention is to prepare students for employment and further study in the computer game design and development fields, with a curriculum that reflects the gaming industry’s demand for an academically rigorous, technical program coupled with an understanding of the artistic and creative elements of the evolving field of study.

Admissions

Admission is competitive. An offer of admission is valid only for the semester for which the student applies. Application for graduate admission is made to the Office of Graduate Admissions. The application deadline for fall admission is March 1; the application deadline for the spring semester is November 1. Mason encourages early applications from prospective students who wish to be considered for academic scholarships, grants or teaching assistantships.

Eligibility

Admission is contingent on satisfactory completion of in-progress coursework, and graduation with a Bachelor degree, with a 3.00 GPA or higher, from an accredited undergraduate institute of higher education.

Application Requirements

The following items are required with applications for admission in the MA in Computer Game Design:

- Evidence of computer programming knowledge. A minimum of 3 credits (undergraduate or graduate) of Pearl or Python and 3 credits of Java or C# is required (subject to change as fields develop);
- Completed online application for graduate study;
- Application fee;
- Official transcripts from all undergraduate institutions attended;
- Three letters of recommendation: letters from instructors, professional supervisors, who can evaluate the applicant’s academic potential;
- International students must meet University criteria for the TOEFL (current University standard: 230 for computer-based, 88 for internet based tests), or other English proficiency examination;
- Goals statement: 1000 words, double spaced, 12 font;
- Writing sample: essay, review, project written within the last 3 years for academic course, college publication or competition, or for professional or community activity;
- Portfolio: must display 20 examples of the applicants’ most accomplished work. The applicant’s portfolio is a major selection criterion for graduate admission. Applicants’ portfolio items are considered part of the application for admission and, thus, cannot be returned. The portfolio and all other application materials will be submitted to the Office of Graduate Admissions. See website for submission instructions.

Policies

See College of Visual and Performing Arts (p. 803) for college academic policies.

Film and Video Studies Program

Giovanna Chesler, Director

C100 College Hall
Fairfax Campus
Phone: 703-993-3287
Website: film.gmu.edu

The Film and Video Studies Program offers a multidisciplinary Bachelor of Arts degree in cinematic arts production. We emphasize Directing, Producing, Cinematography, Screenwriting, Sound Design and Editing, along with business, ethics, history, and theory of film and media. Students engage with many genres of cinematic storytelling, including short fiction, documentary, video art, television, web series and interactive video.

Students take most of their courses in Film and Video Studies with additional coursework in Film and Media Studies, Art, Communication, Computer Game Design, Music, Theater, and many other departments. Students engage with emerging technologies alongside entrepreneurship and industry standards to prepare for our vibrant, ever-changing field. Screening events, guest lectures, pitching competitions, and production work on a teaching film set (our Mason Film Lab) allow students to earn credits while they learn.

Film at Mason is a community of cinematic storytellers that fosters creativity, analysis, and diverse perspectives, professional practice and socially-conscious filmmaking. The Film and Video Studies Program is grounded in flexible thinking, critical engagement, interpersonal communication and regional storytelling. Graduates apply their skills on film sets, in corporate environments, and with community organizations with professionalism that is creative, entrepreneurial, and adaptable.

Requirements & Policies

Requirements

Portfolio
Admission to Film and Video Studies is considered separately from admission to the university and only through a digital portfolio review. Information about the portfolio process, including submission deadlines and portfolio application requirements, can be found on the program’s website (https://film.gmu.edu) or by calling the Film office at 703-993-3287. Admission to the university is determined by the Admissions Office.

Writing-Intensive
The university requires all students to complete at least one course designated “writing-intensive” in their majors at the 300 level or above. Students seeking a BA in Film and Video Studies fulfill this requirement by completing ENGH 373 Film and Video Forms, FAVS 380 TV Writing, FAVS 498 Development for Senior Project or THR 482 Advanced Screenplay Workshop.

Major GPA
All Film and Video Studies undergraduate students must earn a minimum grade of C in all courses in their major.

Policies

Upper-Level Credits
All undergraduate students are required to complete a minimum of 45 credits of upper-division courses at the 300-499 level.
Termination from the Major

No Film and Video Studies course that is required for the major may be unsuccessfully attempted more than three times. A grade lower than a C constitutes an unsuccessful attempt in any given course. Those students who do not successfully complete such a course within three attempts will be terminated from the major. For more information, see the “Termination from the Major” section under AP5 Undergraduate Policies (p. 87).

Academic Policies

Please see College of Visual and Performing Arts (p. 803) for college academic policies.

Email: film@gmu.edu
Website: film.gmu.edu/students/undergraduate-program/

The Film and Video Studies degree is the first multidisciplinary undergraduate degree in Virginia focusing on cinematic arts production and film theory and history with core courses in ethics, business, writing for the moving image, fiction, documentary, interactive storytelling and episodic television.

Students complete courses in the Film Core. To fine-tune their craft, students select advanced courses of study from four concentrations:

• Directing
• Producing
• Production/Post-Production (Cinematography or Editing/Sound)
• Screenwriting

Each concentration includes a capstone experience wherein students are mentored by faculty on original projects in their senior year that prepare them for work in the cinematic arts.

Admissions & Policies

Admissions

All students are admitted to the Film and Video Studies (FAVS) program of study separately from their admission to the university and only by portfolio review.

Policies

Major GPA

All Film and Video Studies undergraduate students must earn a minimum grade of C in all courses in their major.

For policies governing all undergraduate degrees, see AP5 Undergraduate Policies (p. 87). See College of Visual and Performing Arts (p. 803) for policies specific to the college.

Requirements

Degree Requirements

Total credits: 120

Students must earn a minimum grade of C in all core and required FAVS courses.

Mason Core

Film majors may not double-count Literature and Art courses toward both the Film major and Mason Core requirements. The synthesis requirement is part of the Film core requirements.

**Analysis, History, Theory**

Choose one course from the following:

- AVT 377 Cyberpunk
- COMM 380 Media Criticism
- COMM 399 Special Topics in Communication
- ENGH 319 Popular Culture
- ENGH 370 Introduction to Documentary (Mason Core) (p. 142)
- ENGH 371 Television Studies (Mason Core) (p. 142)
- ENGH 372 Introduction to Film (Mason Core) (p. 142)
- ENGH 470 RS: Topics in Film/Media History (Mason Core) (p. 142)
- ENGH 472 Topics in Film/Media Theory
- ENGH 474 Topics in Film/Media Studies
- FAVS 399 Special Topics in Film and Video Studies
- HIST 389 Topics in U.S. History
- HIST 393 Topics in Film and History
- INTS 308 American Landscapes in Fiction, Film, and History (Mason Core) (p. 142)
- MUSI 301 Music in Motion Pictures (Mason Core) (p. 142)
- THR 411 Great Film Directors (Mason Core) (p. 142)
- THR 412 Great Film Performances (Mason Core) (p. 142)
- Other courses as approved by Program Director

**Diversity of Perspectives**

Choose one course from the following:

- ARAB 360 Topics in Arabic Cultural Production
- COMM 365 Gender, Race, and Class in the Media
- COMM 399 Special Topics in Communication
- ENGH 318 Introduction to Cultural Studies
- ENGH 319 Popular Culture
- ENGH 362 Global Voices (Mason Core) (p. 142)
- ENGH 418 Cultural Constructions of Sexualities
- FAVS 300 Global Horror Film (Mason Core) (p. 142)
- FAVS 399 Special Topics in Film and Video Studies
- FREN 470 French and Francophone Cinema
- FRLN 331 Topics in World Cinema (Mason Core) (p. 142)
- HIST 357 Postwar Japan (Mason Core) (p. 142)
- INTS 347 Gender Representation in Popular Culture (Mason Core) (p. 142)
- JAPA 320 Japanese Cinema
- WMST 300 Current Issues in Women and Gender Studies
- WMST 450 Current Topics in Women and Gender Studies
- Other courses as approved by Program Director

**Concentration**

Select one of the following concentrations:

- Directing
- Producing
- Production and Post-Production
- Screenwriting

**Total Credits** 66

1. Must be approved by Program Director.
2. May not be used to fulfill Mason Core.

<th>Credits</th>
</tr>
</thead>
</table>

Students must use general electives to complete a minor, a double major or double degree outside their primary major field of study (15-21 credits) or demonstrate intermediate-level proficiency in one foreign language (0-9 credits). After fulfilling one of these options, the remaining general electives may be taken inside or outside of the department.

Total Credits 17

School of Art

Website: soa.gmu.edu

Mission

George Mason University’s School of Art is a collaborative academic and professional community focused on advancing creativity through traditional and new media applied to varying social contexts. The School of Art is founded on the premise that art both reflects and inspires a creative society, improving the human condition while describing the world, both as it is and could be. We focus on the role of artists in that conversation. We encourage students to see art both as an individual expression and public interaction. We celebrate historical reference,
current relevance and experimentation-emphasizing innovative ways of thinking that enhance the impact of art on the future of society.

Embedded in a major liberal arts university rich in learning resources, the School of Art plays a vital role in the creative climate of the institution and the region through the cross-disciplinary research it facilitates and the artwork it produces and exhibits. The School's facilities engage an exceptional faculty of practicing artists, an active visiting artist program, and a diverse and intellectually curious graduate and undergraduate student body. Artistic skills and principles of creative practice in all visual media are grounded in a forward-thinking, adaptive curriculum. Faculty and students forge cross-disciplinary experimentation, challenging conventional thinking and blurring the lines between traditional artistic disciplines, indeed, between the arts and other humanities and sciences.

The School of Art educates artists and creative professionals to be responsible contributors to society, preparing them to be agents of change in an increasingly connected, complex, inclusive world. We highly value rigor in conceptual approach, skill in art production, and imaginative methods for implementing projects and engaging audiences. Each student is given a background in aesthetic and analytical judgment, the ethical framework for professional practice, the confidence to be both self-reliant and collaborative, and the mastery of design and production necessary to thrive as a professional artist in a competitive global environment.

Undergraduate Programs
Undergraduate studio degrees offered by the School of Art include the bachelor of arts (BA) and the bachelor of fine arts (BFA). An honors program enhances either degree for selected AVT majors. The school also offers undergraduate minors in art and visual technology, arts and social change, graphic design, photography, and web design.

For students who are interested in a career in teaching art in the public schools, neither the BA nor the BFA program satisfies all requirements for those seeking licensure. Undergraduate students interested in this field are highly encouraged to consider the accelerated degree path for the master of art in teaching and should contact the school's art education advisor to learn more about teacher preparation.

All George Mason University students are welcome to enroll in course work in the School of Art to fulfill Mason Core (p. 142) for requirements for the arts or to pursue minors. Consult the course listings for prerequisites and requirements. Students should carefully examine prerequisites for School of Art courses. Students may be removed from a course if they enroll without having fulfilled the prerequisites.

Studies
The School of Art program is located in the Art and Design Building which houses well-equipped studios for drawing, painting, photography, printmaking, and sculpture, as well as six computer-equipped studios that cross platforms and are installed with current software applications used for two-dimensional imaging, three-dimensional modeling, animation, video production, sound editing, multimedia authoring, photography, and web publishing.

Policies, procedures, and schedules for studio use are established by the AVT studio faculty and are posted in the studios.

Graduate Programs
The MA in Graphic Design offers students a comprehensive study and preparation for the graphic design profession. The program calls for 36 credits, which includes courses in typography, web design, image making, and brand design. The broad range of study is intended to develop professionals prepared for an ever-expanding graphic design field. This degree is the only MA in Graphic Design in the Washington Metropolitan region.

The Art Education Licensure Certificate is a post-baccalaureate program designed for those who currently hold a graduate degree in an art-related field along with those who want a more immediate entrance into the art teaching profession. This 'licensure only' program, which results in a pre K-12 art certification in the Commonwealth of Virginia, is a 21 credit program consisting of graduate education courses, area endorsements, student teaching internships and seminar.

The Master of Arts in Teaching in Art Education is a pre-service degree program that prepares students with a BFA degree or equivalent for pre K-12 art licensure by the Commonwealth of Virginia. Using a studio-based approach to art education and working closely with area public school systems, the MAT degree consists of 30 credits of graduate art education, school practicum experience, studio work, and preserve teaching internship and seminar.

MFA, Visual and Performing Arts
The School of Art offers two concentrations under the Master of Fine Arts, Visual and Performing Arts degree: Graphic Design and Visual Art. Applicants to the program must designate which concentration they intend to apply for on the application. Each concentration has its own unique set of admissions requirements and program requirements. For specific information, please refer to the Visual and Performing Arts, MFA entry.

The MFA is a terminal degree that prepares students to become professional artists, work in technology or arts-related fields, and teach at the university level. Candidates are required to complete 60 credits, of which 30 credits are made up from core requirements and 30 are made up of emphasis and studio requirements.

In the Visual Arts concentration, students may select an emphasis in new media, painting and drawing, photography, printmaking, sculpture, or InterArts. The latter offers students the opportunity to combine art forms in interdisciplinary projects that may be installation, performance, publishing, time-based, or writing-based; and combine creative and critical approaches to their work.

While it is anticipated that students will move through the MFA as described in this catalog, individuals with extensive professional accomplishment may, upon recommendation of the SOA Graduate Committee and with prior approval of the CVPA dean, craft an individualized program within their intended emphasis that meets curricular requirements.

Accelerated Master’s Options
The School of Art offers the following Accelerated Master’s programs:

- Art and Visual Technology, BA/Arts Management, Accelerated MA
- Art and Visual Technology, BFA/Art Education, Accelerated MAT
- Art and Visual Technology, BFA/Arts Management, Accelerated MA
- Art and Visual Technology, BFA/Graphic Design, Accelerated MA

Each program allows undergraduate students to take graduate classes that can be used towards a designated Master’s degree. Undergraduates who wish to pursue the accelerated Master’s route should talk to their academic advisor first to see if they qualify. Students must be within 75-100 credits of their Bachelor’s program to be eligible to apply; those
who have earned more than 100 credits will not be considered. Students must be approved by their academic advisor and formally apply and be accepted to the Master’s program through an Accelerated Master’s application. For more information about admissions requirements and the application process, students should visit the website (http://cvpa.gmu.edu).

**Requirements & Policies**

**Requirements & Policies**

**Undergraduate Admission to the School of Art**

Students are admitted to School of Art degree programs separately from their admission to George Mason University and only by portfolio review. The College of Visual and Performing Arts strongly encourages students to apply to the university by November 1 in order to receive maximum scholarship consideration, including merit and talent-based scholarships.

Applicants apply to George Mason University. Admission to George Mason is determined by the Admissions Office and is separate from admission to the School of Art degree programs. All School of Art applicants are encouraged to apply for admission to the university prior to submitting a portfolio for review.

Successfully complete a portfolio review. Please refer to the Portfolio Review Criteria (http://soa.gmu.edu).

**Artsbus Requirement**

All AVT majors must meet the school’s requirement of travel to galleries and museums through the Artsbus program. Students meet this requirement by enrolling in AVT 300 Artsbus Attendance. The procedure and requirements for enrollment in AVT 300 Artsbus Attendance are the same as for any other class.

Freshmen who enroll as AVT majors must register for AVT 300 Artsbus Attendance 5 times during their course of study. Transfer students and students who change their majors to AVT must register for AVT 300 Artsbus Attendance for the equivalent of each semester they are enrolled at Mason, up to a maximum of five semesters. Semesters of enrollment in AVT 300 Artsbus Attendance do not have to be consecutive. Students may take AVT 300 Artsbus Attendance up to three times in a semester if they wish to accelerate their completion of the requirement although this is strongly discouraged.

All rules and requirements to AVT 300 Artsbus Attendance participation are posted on the Artsbus website (http://artsbus.gmu.edu). Students are responsible for being familiar with and following the posted rules and requirements for Artsbus. The site also provides pertinent information for each trip regarding exhibits as well as reviews and articles for exhibitions.

**Visual Voices Requirement**

All AVT majors must fulfill three credits of AVT 301 Visual Voices Colloquium in order to graduate unless they are enrolled at Mason for fewer than three semesters. If enrolled for less than three semesters, students are required to register for AVT 301 Visual Voices Colloquium each semester in which they are enrolled. Visual Voices is an intrinsic part of the major, offering students a chance to meet with and hear nationally and internationally recognized artists speak about their work.

**Writing-Intensive Requirement**

Mason requires all students to complete at least one course designated “writing intensive” in their majors at the 300 level or above. AVT students fulfill this requirement by successfully completing AVT 395 Writing for Artists.

**Upper-Level Credits**

All undergraduate students are required to complete a minimum of 45 credits of upper-division courses at the 300–499 level.

**Major GPA**

All School of Art BA and BFA majors, AVT minor, Arts and Social Change minor, Graphic Design minor, Photography minor, and Web Design minor students must earn a grade of C or better in required AVT coursework, including Studio Foundation, Critical Analysis and Contemporary Practice, Breadth and Experience, Synthesis and Concentrations. All School of Art undergraduate students must earn a minimum 2.00 cumulative GPA in their major. To graduate with a BA or BFA in Art and Visual Technology with a concentration in Graphic Design, students are required to maintain a 2.40 GPA in concentration classes. Students who fail to maintain this minimum may either retake core classes (an earned higher grade replaces the old one) or take concentration special topics classes in order to raise their average to the threshold. The effect of this change will be that very weak students will have to return to required classes to master core skills, and marginally weak students will be able to meet the requirement while expanding the breadth of their education.

**Policies**

See CVPA Requirements and Policies (p. 803).

**Honors Program**

Students interested in the Honors Program in School of Art should contact the director of the school. Both BA and BFA students are eligible to apply for admission to the program. Honors students must complete at least 4 credits AVT 394 Honors Seminar. They must have a cumulative
GPA of at least 3.00 and at least 3.50 in AVT 394 Honors Seminar and the AVT major.

Art Education, MAT

Banner Code: AR-MAT-ARTE

2005 Art and Design Building
Fairfax Campus
Phone: 703-993-8898
Website: soa.gmu.edu

The Master of Arts in Teaching in Art Education (MAT I) is a pre-service degree program that prepares students with a BFA degree or equivalent for PreK-12 art licensure by the Commonwealth of Virginia. Using a studio-based approach to art education and working closely with area public school systems, the MAT degree consists of 30 credits of graduate art education, school practicum experience, studio work, and pre-service teaching internship and seminar.

Available Concentrations

This degree program has two concentrations: one concentration for those seeking certification (MAT I) as well as a one for licensed art teachers who are continuing education (MAT II). The concentration for licensed art teachers (MAT II) is designed for PreK-12 licensed art teachers who currently hold an undergraduate degree in art education and a current teaching license in Art Education. Applicants should be interested in obtaining a graduate art education degree for further professional development. Students take graduate art education courses, approved graduate level studio art courses, education courses, and complete a capstone project.

Admissions

Admissions

In addition to meeting the general university admission requirements for graduate study, admission to this program is contingent on completion of a BFA in visual art or approved equivalent. Candidates must have a minimum 3.00 cumulative undergraduate GPA.

Eligibility

Eligibility for the MAT I in Art Education program may demand additional course work to establish proficiency in visual arts. Students lacking a strong background in the visual arts or pedagogy, or those who earned a BFA or BA at an institution other than Mason, may be required to satisfy prerequisite courses prior to entry into the graduate program. Applicants must complete an endorsement worksheet through the College of Education and Human Development in order to prove that their previous coursework satisfies the prerequisite requirements for Virginia licensure and/or for entry into the Master’s program.

Students interested in pursuing the degree with the concentration for licensed art teachers must meet the above with the following exceptions: admission is contingent upon the completion of a BFA or BA in art or art education with a minimum 3.00 cumulative undergraduate GPA, maintaining a current PreK-12 license to teach art education with at least one or more years of art teaching experience.

Application Materials and Deadlines

Applications will be accepted for fall and spring semesters. The deadline for receipt of application materials is October 1 and March 1. Each applicant must provide the following materials:

• Completed application form
• Certified copies of all undergraduate transcripts and any graduate transcripts
• Statement of intent and professional goals for entering the field
• Three letters of reference from faculty members or individuals who have firsthand knowledge of the applicant's academic or professional capabilities
• Official scores on Praxis Core or SAT equivalent (MAT I only)
• Endorsement Worksheet (MAT I only)
• TOEFL score (for international applicants only)
• Portfolio Requirement:
  • MAT I: portfolio must include 15 to 20 images that reflect artistic breadth and depth, including drawing skills of the applicant's art.
  • MAT II: portfolio must include 10 images of the applicant's personal art that reflect artistic breadth and depth, including drawing skills, along with 10 student art works displaying a variety of 2-D and 3-D media. Student artwork is to be accompanied by a brief description of the lesson content.

All portfolios should be submitted through SlideRoom. All portfolios must include title, date, medium, and size of each work. Incomplete portfolios will not be considered.

All application materials should be submitted to the Office of Graduate Admissions. Qualified applicants may be invited to an on-campus interview. Applicants should visit the School of Art's website for more details.

Admissions & Policies

Diversity among students is another consideration for acceptance into the program. Applicants with degrees in areas other than art are welcome, although they may be required to complete additional undergraduate core, studio, and art history courses.
Policies
See College of Visual and Performing Arts (p. 803) for policies specific to the college.

Or other course as approved by director

Total Credits: 21

Note:
MAT I students will receive ongoing evaluation reviews by the MAT faculty to determine whether they have achieved satisfactory progress toward their degree.

MAT (I) Teacher Endorsement
MAT I students originally admitted under provisional status must complete all endorsements and any assigned art education foundational courses (which may include AVT 494 Strategies in Art Room: PK-12 and AVT 495 Introduction to Art Teaching and Learning) by the date indicated on the student’s provisional admission agreement and prior to admission to degree status. These courses may be taken concurrently with other MAT courses, but may not exceed a total of 9 credits. All MAT I students should meet all testing and coursework requirements prior to starting their student teaching internship.

Students must have a studio major in the Visual Arts and meet the Virginia Department of Education’s required semester credit hours in the following specific areas: 12 hours of two-dimensional media, 12 hours of three-dimensional media, 9 hours of cultural context and art history, judgment and criticism, aesthetics, and 3 hours of related areas of the fine arts.

Note:
MAT I students will receive ongoing evaluation reviews by the MAT faculty to determine whether they have achieved satisfactory progress toward their degree.

MAT (I) Professional Teaching Portfolio
The comprehensive experience for the MAT I includes the following:

1. a group exhibition, "The Art of Teaching Art Showcase," in which MAT candidates display and formally present works of PreK–12 student art completed during the internship, along with exemplars of the MAT candidate's own artwork, and
2. a culminating review of the intern’s competencies as reflected in a professional teaching portfolio, accomplished during the internship seminar course that accompanies student teaching.

A committee of MAT faculty will determine whether the student has mastered the field of study based on the final portfolio and exhibition. Students who are unable to successfully complete the full student teaching internship in art education and seminar for student teachers will be terminated from the MAT in Art Education program.

¹ Prior to internships, students must pass: Praxis II, VCLA, technology & child abuse standards.
Capstone:
LAT concentration students must complete a Capstone Project. Under the guidance of a faculty advisor, students will select a topic in a personal area of interest in art education pedagogy, carry out in-depth research, and prepare a capstone final project in the form of a written report and visual presentation.

Student Teaching Placement Requirement
All MAT students must pass Praxis II and Virginia Communication and Language Assessment (VCLA) to receive placement for student teaching in the final semester.

Accelerated Master's

Art and Visual Technology, BFA/Art Education, Accelerated MAT

Overview
Undergraduates in art may apply to the accelerated master's degree in Art Education. If accepted, students will be able to earn an Art and Visual Technology, BFA (p. 835) and an Art Education, MAT (p. 828) after satisfactory completion of 144 credits.

Students choosing the accelerated option must fulfill all university requirements for the master’s degree. The regular designed timeframe would be a start in the Fall and the completion in the Fall semester five and a half years later, but longer time frames may also be available.

For more detailed information, see AP 6.7 Bachelor’s/Accelerated Master’s Degrees (p. 93). For policies governing all graduate degrees, see AP 6 Graduate Policies (p. 90).

Admissions Requirements
Applicants to accelerated master’s programs must have completed at least 75 credits that apply to their undergraduate degree (with at least 24 credits at Mason) and no more than 100 credits. Applicants should submit an Accelerated Master’s Program Application, available from the College of Visual and Performing Arts (CVPA) Academic Affairs Office. It includes the proposed conferral date for the undergraduate degree and the two graduate courses that are to be applied to the undergraduate degree.

In addition to meeting the general university requirements for admission for graduate study, applicants must submit:

- Statement of intent and professional goals for entering the field
- Three letters of reference from faculty members or individuals who have firsthand knowledge of the applicant’s academic or professional capabilities
- Official score on Praxis Core or SAT equivalent
- MAT (for BFA students) portfolio must include 15 to 20 images that reflect artistic breadth and depth, including samples of work with ample attention to drawing and painting from observation. These works must be submitted through SlideRoom. All pieces must include the title of the piece, date, medium, and size of each work. Incomplete portfolios will not be considered.

Teacher Endorsement
Students for the MAT (for BFA students) must complete ALL endorsements, as well as the Praxis Core Exam and the PLUS art education foundational courses:

<table>
<thead>
<tr>

</tr>
<tr>
<td></td>
<td>3 hours of related areas of fine arts</td>
<td>3</td>
</tr>
<tr>
<td></td>
<td>Total Credits</td>
<td>36</td>
</tr>
</tbody>
</table>

Students should work closely with their advisor to ensure they complete these course requirements through the BFA in Art and Visual Technology (p. 835) and MAT (p. 828) degrees.

Accelerated Option Requirements
As an undergraduate, the accelerated master’s student is required to complete the two graduate courses indicated on their Accelerated Master’s Program application with a minimum grade of 3.00 in each course. Students must maintain a minimum GPA of 3.00 in all coursework and in coursework applied to their major. On completion and conferral of the undergraduate degree in the semester indicated on the application, candidates submit the Bachelor’s/Accelerated Master’s Transition Form (which shall incorporate all of the Graduate Admission requirements of the university) and are admitted to graduate status.

As graduate students, accelerated master’s students have an advanced standing and must meet all master’s degree requirements except for the two courses (6 credits) completed as undergraduates. Students will begin their master’s program in the semester immediately following conferral of the undergraduate degree, and they may also begin in the summer term.

Reserve Graduate Credit
Students may take up to 6 additional graduate credits as reserve graduate credit. These credits do not apply to the undergraduate degree. The ability to take courses for reserve graduate credit is available to all high-achieving undergraduates with permission of the School of Art. Permission to take a graduate course for reserve graduate credit is normally granted only to Mason seniors within 15 credit hours of graduation and must be approved by the Dean’s Office.

To apply these credits to the master’s degree, students must request that the credits be moved from the undergraduate degree to the graduate degree using the Bachelor’s/Accelerated Master’s Transition Form.
Art Education Licensure Graduate Certificate
Banner Code: AR-CERG-ARTL

2005 Art and Design Building
Fairfax Campus
Phone: 703-993-8898
Website: soa.gmu.edu

Following this curriculum does not guarantee entry into the Master of Art Teaching (MAT) Program (p. 828). Prospective MAT students must meet all MAT admissions requirements. Students must also complete a minimum of 18 credits in degree status after admission to the degree program.

This certificate may be earned either on a part time or full time basis.

Admissions & Policies

Admissions

Admission Requirements

In addition to meeting the general university admission requirements, admission to the licensure program is contingent on completion of a BFA, BA in art or approved equivalent along with a minimum 3.00 cumulative undergraduate GPA. Eligibility for the certificate may demand additional coursework to establish proficiency in visual arts. Students will be required to satisfy the required state endorsement courses prior to student teaching.

Applications will be accepted for fall and spring semesters. The deadline for receipt of application materials is October 1 for Spring and April 1 for Fall. Each applicant must provide the following materials:

- Completed application form
- Certified copies of all undergraduate transcripts and any graduate transcripts
- Statement of intent and professional goals for entering the field
- Three letters of reference from faculty members or individuals who have firsthand knowledge of the applicant’s academic or professional capabilities
- Official passing score on Praxis Core or SAT equivalent
- TOEFL score, if required by Mason policies
- Portfolio of 15-20 images that reflect artistic breadth and depth, including drawing skills of the applicant’s art. The work should be submitted via SlideRoom. All portfolios must include a written image sheet with the corresponding number, title, date, medium, and size of each work. Incomplete portfolios will not be considered. Applicants’ portfolio items are considered part of the application for admission and, thus, cannot be returned. Please do not send original materials.

The all application materials should be submitted to the Office of Graduate Admissions (https://www2.gmu.edu/admissions-aid/how-apply/graduate). Applicants refer to the graduate page of the School of Art website (http://soa.gmu.edu/graduateprograms) for more details.

Diversity among students is another consideration for acceptance into the program. Applicants with degrees in areas other than art are welcome, although they may be required to complete undergraduate core and studio and art history courses.

The certificate is a post-baccalaureate program designed for those who currently hold an undergraduate degree in an art-related field along with those who want a more immediate entrance into the art teaching profession. This “licensure only” program, which results in a pre K-12 art certification in the Commonwealth of Virginia, is a 21-credit program consisting of graduate education courses, art endorsements, student teaching internships and seminar.

International students may be required to undergo an additional audit of their undergraduate transcripts.

Policies

Students must earn a B- or higher in all coursework.

Certificate Requirements

Total credits: 21

This certificate may be pursued on a full-or part-time basis.

Total Credits 52-53

1 Students concentrating in Graphic Design must take either AVT 318 History of Graphic Design or AVT 410 Experiential Design History to fulfill this requirement. Students concentrating in photography must complete ARTH 350 History of Photography to fulfill this requirement.

2 Must be taken for a total of 3 credits or each semester, if less than 3 semesters
Students concentrating in Graphic Design must take AVT 396 Writing for Designers to fulfill this requirement.

At least one course must be a 200-level studio course. See each concentration for individual requirements.

All students concentrating in graphic design must complete AVT 413 Professional Design Practices.

**Artsbus Requirement**

All AVT majors must meet the school’s requirement of travel to galleries and museums through the Artsbus program. Students meet the requirement by enrolling in AVT 300 Artsbus Attendance. The procedure and requirements for enrollment in AVT 300 are the same as for any other class.

Freshmen who enroll as AVT majors must register for AVT 300 Artsbus Attendance 5 times during their course of study. Transfer students and students who change their majors to AVT must register for AVT 300 Artsbus Attendance for the equivalent of each semester they are enrolled at Mason, up to a maximum of five semesters.

Total Credits 18-19

1. Must be outside student’s primary major field of study.
2. May be taken inside or outside of the department. All students are required to take a minimum of 45 credits of upper-division courses (300 and 400 level); most students will require at least 13 elective credits at the 300 level or above. AVT 393 Field Experience in the Arts and AVT 489 Internship in Art and Visual Technology are not required courses but are highly recommended as electives for BA students.

Accelerated Master’s

Art and Visual Technology, BA/Arts Management, Accelerated MA

Overview

Undergraduates in Art may apply to the accelerated master’s degree in Arts Management. If accepted, students will be able to earn an Art and Visual Technology, BA (p. 831) and an Arts Management, MA (p. 813) after satisfactory completion of 150 credits.

Students choosing the accelerated option must fulfill all university requirements for the master’s degree. The regular designed timeframe would be a start in the Fall and completion of all coursework in the Summer five years later with the exception of Capstone, which is only offered in Fall and Spring. Students may need a longer timeframe to complete all requirements.

This accelerated option is offered through joint cooperation between the School of Art (p. 825) and the Arts Management Program (p. 812).

For more detailed information, see AP.6.7 Bachelor’s/Accelerated Master’s Degrees (p. 93). For policies governing all graduate degrees, see AP.6 Graduate Policies (p. 90).

Admissions Requirements

Applicants to accelerated master’s programs must have completed at least 75 credits that apply to their undergraduate degree (with at least 24 credits at Mason) and no more than 100 credits. Applicants should submit an Accelerated Master’s Program Application, available from the College of Visual and Performing Arts (CVPA) Academic Affairs Office. It includes the proposed conferral date for the undergraduate degree and the two graduate courses that are to be applied to the undergraduate degree.

Interested students should contact the Arts Management Program Office for more details about the application process.

Accelerated Option Requirements

As an undergraduate, the accelerated master’s student is required to complete the two graduate courses indicated on their Accelerated Master’s Program application with a minimum grade of 3.00 in each course. Students must maintain a minimum GPA of 3.00 in all coursework and in coursework applied to their major. On completion and conferral of the undergraduate degree in the semester indicated in the application, candidates submit the Bachelor’s/Accelerated Master’s Transition Form (which shall incorporate all of the Graduate Admission requirements of the university) and are admitted to graduate status.

As graduate students, accelerated master’s students have an advanced standing and must meet all master’s degree requirements except for the two courses (6 credits) completed as undergraduates. Students will begin
their master's program in the semester immediately following conferral of the undergraduate degree, and they may also begin in the summer term.

**Reserve Graduate Credit**

Students may take up to 6 additional graduate credits as reserve graduate credit. These credits do not apply to the undergraduate degree. The ability to take courses for reserve graduate credit is available to all high achieving undergraduates with permission of the School of Art. Permission to take a graduate course for reserve graduate credit is normally granted only to Mason seniors within 15 credit hours of graduation and must be approved by the Dean's Office.

To apply these credits to the master's degree, students must request that the credits be moved from the undergraduate degree to the graduate degree using the Bachelor's/Accelerated Master's Transition Form.

Other courses as approved by program director

Total Credits 24

1 AVT 491 Independent Study in Art and Visual Technology or AVT 496 Special Topics may be taken with permission of the Area Director.

InterArts (IA)
The concentration in InterArts is an individualized program of study focused on arts research with multidisciplinary goals. Students concentrating in InterArts are engaged with both creative and conceptual inquiry in the development of artistic practice bolstered by knowledge of other disciplines. Often, this work exists at the interstices of artforms, and focuses on research on areas of interest to the student. InterArts students draw on the large resources of the School of Art and the university in creating an individualized program of studio courses and complementary courses for a total of 24 credits (12 credits of disciplinary focus and 12 credits of complementary study). In consultation with a faculty advisor, the student drafts a curriculum contract outlining the course of study, which is approved by the InterArts faculty. Admission to the concentration is based on acceptance into the BFA program via a portfolio review process and project approval from the InterArts faculty.

Code Title Credits
Twelve credits of disciplinary focus 12
Twelve credits of complementary study 12

### Accelerated Master's

#### Art and Visual Technology, BFA/Art Education, Accelerated MAT

**Overview**

Undergraduates in art may apply to the accelerated master’s degree in Art Education. If accepted, students will be able to earn an Art and Visual Technology, BFA (p. 835) and an Art Education, MAT (p. 828) after satisfactory completion of 144 credits.

Students choosing the accelerated option must fulfill all university requirements for the master’s degree. The regular designed timeframe would be a start in the Fall and the completion in the Fall semester five and a half years later, but longer time frames may also be available.

For more detailed information, see AP.6.7 Bachelor’s/Accelerated Master’s Degrees (p. 93). For policies governing all graduate degrees, see AP6 Graduate Policies (p. 90).

**Admissions Requirements**

Applicants to accelerated master’s programs must have completed at least 75 credits that apply to their undergraduate degree (with at least 24 credits at Mason) and no more than 100 credits. Applicants should submit an Accelerated Master’s Program Application, available from the College of Visual and Performing Arts (CVPA) Academic Affairs Office. It includes the proposed conferral date for the undergraduate degree and the two graduate courses that are to be applied to the undergraduate degree.

In addition to meeting the general university requirements for admission for graduate study, applicants must submit:

- Statement of intent and professional goals for entering the field
- Three letters of reference from faculty members or individuals who have firsthand knowledge of the applicant’s academic or professional capabilities
- Official score on Praxis Core or SAT equivalent
- MAT (for BFA students) portfolio must include 15 to 20 images that reflect artistic breadth and depth, including samples of work with ample attention to drawing and painting from observation. These works must be submitted through SlideRoom. All pieces must include the title of the piece, date, medium, and size of each work. Incomplete portfolios will not be considered.

**Teacher Endorsement**

Students for the MAT (for BFA students) must complete ALL endorsements, as well as the Praxis Core Exam and the PLUS art education foundational courses:

<table>
<thead>
<tr>

<td>12 hours of three-dimensional media</td>
<td>12</td>
</tr>
<tr>
<td></td>
<td>9 hours of cultural context and art history, judgment and criticism, aesthetics</td>
<td>9</td>
</tr>
<tr>
<td></td>
<td>3 hours of related areas of fine arts</td>
<td>3</td>
</tr>
<tr>
<td></td>
<td>Total Credits</td>
<td>36</td>
</tr>
</tbody>
</table>

Students should work closely with their advisor to ensure they complete these course requirements through the BFA in Art and Visual Technology (p. 835) and MAT (p. 828) degrees.

**Accelerated Option Requirements**

As an undergraduate, the accelerated master’s student is required to complete the two graduate courses indicated on their Accelerated Master’s Program application with a minimum grade of 3.00 in each course. Students must maintain a minimum GPA of 3.00 in all coursework and in coursework applied to their major. On completion and conferral of the undergraduate degree in the semester indicated on the application, candidates submit the Bachelor’s/Accelerated Master’s Transition Form (which shall incorporate all of the Graduate Admission requirements of the university) and are admitted to graduate status.

As graduate students, accelerated master’s students have an advanced standing and must meet all master’s degree requirements except for the two courses (6 credits) completed as undergraduates. Students will begin their master’s program in the semester immediately following conferral of the undergraduate degree, and they may also begin in the summer term.

**Reserve Graduate Credit**

Students may take up to 6 additional graduate credits as reserve graduate credit. These credits do not apply to the undergraduate degree. The ability to take courses for reserve graduate credit is available to all high-achieving undergraduates with permission of the School of Art. Permission to take a graduate course for reserve graduate credit is normally granted only to Mason seniors within 15 credit hours of graduation and must be approved by the Dean’s Office.
To apply these credits to the master’s degree, students must request that the credits be moved from the undergraduate degree to the graduate degree using the Bachelor’s/Accelerated Master’s Transition Form.

Art and Visual Technology, BFA/Arts Management, Accelerated MA

Overview
Undergraduates in Art may apply to the accelerated master’s degree in Arts Management. If accepted, students will be able to earn an Art and Visual Technology, BFA (p. 835) and an Arts Management, MA (p. 813) after satisfactory completion of 150 credits.

Students choosing the accelerated option must fulfill all university requirements for the master’s degree. The regular designed timeframe would be a start in the Fall and completion of all coursework in the Summer five years later with the exception of Capstone, which is only offered in Fall and Spring. Students may need a longer timeframe to complete all requirements.

This accelerated option is offered through joint cooperation between the School of Art (p. 825) and the Arts Management Program (p. 812).

For more detailed information, see AP 6.7 Bachelor’s/Accelerated Master’s Degrees (p. 93). For policies governing all graduate degrees, see AP 6 Graduate Policies (p. 90).

Admissions Requirements
Applicants to accelerated master’s programs must have completed at least 75 credits that apply to their undergraduate degree (with at least 24 credits at Mason) and no more than 100 credits. Applicants should submit an Accelerated Master’s Program Application, available from the College of Visual and Performing Arts (CVPA) Academic Affairs Office. It includes the proposed conferral date for the undergraduate degree and the two graduate courses that are to be applied to the undergraduate degree.

Interested students should contact the Arts Management Program Office for more details about the application process.

Accelerated Option Requirements
As an undergraduate, the accelerated master’s student is required to complete the two graduate courses indicated on their Accelerated Master’s Program application with a minimum grade of 3.00 in each course. Students must maintain a minimum GPA of 3.00 in all coursework and in coursework applied to their major. On completion and conferral of the undergraduate degree in the semester indicated in the application, candidates submit the Bachelor’s/Accelerated Master’s Transition Form (which shall incorporate all of the Graduate Admission requirements of the university) and are admitted to graduate status.

As graduate students, accelerated master’s students have an advanced standing and must meet all master’s degree requirements except for the two courses (6 credits) completed as undergraduates. Students will begin their master’s program in the semester immediately following conferral of the undergraduate degree, and they may also begin in the summer term.

Reserve Graduate Credit
Students may take up to 6 additional graduate credits as reserve graduate credit. These credits do not apply to the undergraduate degree. The ability to take courses for reserve graduate credit is available to all high achieving undergraduates with permission of the School of Art. Permission to take a graduate course for reserve graduate credit is normally granted only to Mason seniors within 15 credit hours of graduation and must be approved by the Dean’s Office.

To apply these credits to the master’s degree, students must request that the credits be moved from the undergraduate degree to the graduate degree using the Bachelor’s/Accelerated Master’s Transition Form.

Art and Visual Technology, BFA/Graphic Design, Accelerated MA

Overview
Undergraduates in Art may apply to the accelerated master’s degree in Graphic Design. If accepted, students will be able to earn an Art and Visual Technology, BFA (p. 835) and a Graphic Design, MA (p. 841) after satisfactory completion of 150 credits.

Students choosing the accelerated option must fulfill all university requirements for the master’s degree. The standard timeframe would be a start in the Fall and the completion in the Fall semester five and a half years later, but longer time frames may also be available.

For more detailed information, see AP 6.7 Bachelor’s/Accelerated Master’s Degrees (p. 93). For policies governing all graduate degrees, see AP 6 Graduate Policies (p. 90).

Admissions Requirements
Applicants to accelerated master’s programs must have completed at least 75 credits that apply to their undergraduate degree (with at least 24 credits at Mason) and no more than 100 credits. Applicants should submit an Accelerated Master’s Program Application, available from the College of Visual and Performing Arts (CVPA) Academic Affairs Office. It includes the proposed conferral date for the undergraduate degree and the two graduate courses that are to be applied to the undergraduate degree.

In addition to meeting the general university requirements for admission for graduate study, applicants must submit three letters of recommendation from faculty, or those who can evaluate the applicant’s academic potential; a sample of academic writing about art or graphic design, such as a paper from an art or design history course; and 20 examples of original design works in a format that is viewable via SlideRoom.

Accelerated Option Requirements
As an undergraduate, the accelerated master’s student is required to complete the two graduate courses indicated on their Accelerated Master’s Program application with a minimum grade of 3.00 in each course. Students must maintain a minimum GPA of 3.00 in all coursework and in coursework applied to their major. On completion and conferral of the undergraduate degree in the semester indicated in the application, candidates submit the Bachelor’s/Accelerated Master’s Transition Form (which shall incorporate all of the Graduate Admission requirements of the university) and are admitted to graduate status.

As graduate students, accelerated master’s students have an advanced standing and must meet all master’s degree requirements except for the two courses (6 credits) completed as undergraduates. Students will begin their master’s program in the semester immediately following conferral of the undergraduate degree, and they may also begin in the summer term.
**Reserve Graduate Credit**

Students may take up to 6 additional graduate credits as reserve graduate credit. These credits do not apply to the undergraduate degree. The ability to take courses for reserve graduate credit is available to all high achieving undergraduates with permission of the School of Art. Permission to take a graduate course for reserve graduate credit is normally granted only to Mason seniors within 15 credit hours of graduation and must be approved by the Dean's Office.

To apply these credits to the master's degree, students must request that the credits be moved from the undergraduate degree to the graduate degree using the Bachelor's/Accelerated Master's Transition Form.

**Arts and Social Change Minor**

**Banner Code:** ASC

2050 Art and Design Building
Fairfax Campus
Phone: 703-993-8898
Email: avt@gmu.edu
Website: soa.gmu.edu

The minor leverages artistic and creative practice in an array of academic and social contexts. The goal is to infuse these practices into territories outside the traditional art world through research, participatory experimentation and documentary aesthetic aspects of social practice. With a focus on creative research and project production students experience direct engagement with communities while developing skills toward fostering positive change in communities via the arts.

**Admissions & Policies**

**Policies**

Students must complete an approved AVT course for their Mason Core Arts requirement.

Special topics courses will be noted in Patriot Web as a designated Arts and Social Change course.

Twelve credits of coursework must be unique to the minor. For policies governing all minors, see AP.5.3.4 Minors (p. 90).

Eight credits of coursework must be unique to the minor. For policies governing all minors, see AP.5.3.4 Minors (p. 90).
This minor is available to AVT majors. AVT majors must complete 12 credits unique to the minor.

It is recommended that non-AVT majors take AVT 104 Two-Dimensional Design and Color (Mason Core) (p. 142) for their Art Mason Core requirement as well as AVT 180 New Media in the Creative Arts (Mason Core) (p. 142) for the Information Technology (IT, except ethics) requirement. These courses are prerequisites for Graphic Design coursework.

#### Graphic Design Undergraduate Certificate

Banner Code: AR-CERB-GD

2050 Art and Design Building
Fairfax Campus

Phone: 703-993-8898
Email: avt@gmu.edu
Website: soa.gmu.edu

The Graphic Design Undergraduate Certificate is for prospective students with a 4-year baccalaureate undergraduate degree from an accredited institution who seek to gain the skills and competency to advance into a career in graphic design. It encompasses a specific body of knowledge and practice that prepares candidates for rewarding positions in the design field.

This certificate may be completed under part or full time basis.

#### Admissions & Policies

**Admissions**

There is not a portfolio review required for admission, but prospective students—with graphic design experience—should consider scheduling an interview with the program director prior to applying. Tuition is billed at the undergraduate rate, and most students complete certificate requirements in four semesters.

Students entering the certificate must be able to demonstrate basic skills in visual language and should have working knowledge of professional graphic design software, or must take AVT 180 New Media in the Creative Arts (Mason Core) (p. 142) in addition to other required courses.

#### Graphic Design, MA

Banner Code: AR-MA-GD

2005 Art and Design Building
Fairfax Campus

Phone: 703-993-8898
The MA in Graphic Design offers students a comprehensive study and preparation for the graphic design profession. The program calls for 36 credits, which includes courses in typography, web design, image making, and brand design. The broad range of study is intended to develop professionals prepared for an ever-expanding graphic design field.

Admissions & Policies

Admissions

Application deadlines are as published by the University. Applicants should have an earned BA or BFA degree in Graphic Design from an accredited college or university, with a GPA of 3.00 in art courses. However, applicants with a BA or BS in another discipline, and work experience in the field may also apply for admission. Student should schedule an interview with design faculty prior to admission.

In addition to meeting the general university requirements for admission for graduate study, applicants must submit three letters of recommendation from faculty members, or those who can evaluate the applicant’s academic potential; a sample of academic writing about art or graphic design, such as a paper from an art or design history course; and a portfolio with 20 examples of design works that are SlideRoom-compatible.

Portfolio Guidelines

The applicant’s portfolio is a major selection criterion for graduate admission and should represent the applicant’s most accomplished work.

Applicants’ portfolio items are considered part of the application for admission and, thus, cannot be returned. Please do not send original materials. The portfolio and all other application materials should be submitted to the Office of Graduate Admissions. For more information, contact the School of Art at 703-993-8898.

Studios

The School of Art is located in the Art and Design Building which houses well equipped studios for drawing, painting, photography, printmaking, and sculpture, as well as six computer-equipped studios that cross platforms and are installed with current software applications used for two dimensional imaging, three-dimensional modeling, animation, video production, sound editing, multimedia authoring, photography, and web publishing.

Policies

For policies governing all graduate degrees, see AP.6 Graduate Policies (p. 90).

See College of Visual and Performing Arts (p. 803) for policies specific to the college.

Accelerated Master’s

Art and Visual Technology, BFA/Graphic Design, Accelerated MA

Overview

Undergraduates in Art may apply to the accelerated master’s degree in Graphic Design. If accepted, students will be able to earn an Art and Visual Technology, BFA (p. 835) and a Graphic Design, MA (p. 841) after satisfactory completion of 150 credits.
Students choosing the accelerated option must fulfill all university requirements for the master's degree. The standard timeframe would be a start in the Fall and the completion in the Fall semester five and a half years later, but longer time frames may also be available.

For more detailed information, see AP6.7 Bachelor's/Accelerated Master's Degrees (p. 93). For policies governing all graduate degrees, see AP6 Graduate Policies (p. 90).

Admissions Requirements
Applicants to accelerated master's programs must have completed at least 75 credits that apply to their undergraduate degree (with at least 24 credits at Mason) and no more than 100 credits. Applicants should submit an Accelerated Master's Program Application, available from the College of Visual and Performing Arts (CVPA) Academic Affairs Office. It includes the proposed conferral date for the undergraduate degree and the two graduate courses that are to be applied to the undergraduate degree.

In addition to meeting the general university requirements for admission for graduate study, applicants must submit three letters of recommendation from faculty, or those who can evaluate the applicant's academic potential; a sample of academic writing about art or graphic design, such as a paper from an art or design history course; and 20 examples of original design works in a format that is viewable via SlideRoom.

Accelerated Option Requirements
As an undergraduate, the accelerated master's student is required to complete the two graduate courses indicated on their Accelerated Master's Program application with a minimum grade of 3.00 in each course. Students must maintain a minimum GPA of 3.00 in all coursework and in coursework applied to their major. On completion and conferral of the undergraduate degree in the semester indicated in the application, candidates submit the Bachelor's/Accelerated Master's Transition Form (which shall incorporate all of the Graduate Admission requirements of the university) and are admitted to graduate status.

As graduate students, accelerated master's students have an advanced standing and must meet all master's degree requirements except for the two courses (6 credits) completed as undergraduates. Students will begin their master's program in the semester immediately following conferral of the undergraduate degree, and they may also begin in the summer term.

Reserve Graduate Credit
Students may take up to 6 additional graduate credits as reserve graduate credit. These credits do not apply to the undergraduate degree. The ability to take courses for reserve graduate credit is available to all high achieving undergraduates with permission of the School of Art. Permission to take a graduate course for reserve graduate credit is normally granted only to Mason seniors within 15 credit hours of graduation and must be approved by the Dean's Office.

To apply these credits to the master's degree, students must request that the credits be moved from the undergraduate degree to the graduate degree using the Bachelor's/Accelerated Master's Transition Form.

Admissions & Policies

Admissions
Prospective Illustration Minor applicants are required to earn a 3.0 GPA in both AVT 222 Drawing I (Mason Core) (p. 142) and AVT 323 Drawing II prior to applying. A portfolio review is required for admission.

Policies
Eight credits of coursework must be unique to the minor, with a minimum 2.00 GPA earned in all courses applied to the minor. For policies governing all minors, see AP5.3.4 Minors (p. 90).

Website: soa.gmu.edu

The minor provides opportunities for students to develop a personal vision in response to photography's role in contemporary art and culture. Various studio classes emphasize a range of techniques in the production of traditional, digital and experimental imagery. Critical thinking combined with studio/lab experience enhance this comprehensive introduction to the field and practice of photography.

Admissions & Policies

Policies
Eight credits of coursework must be unique to the minor with a minimum 2.00 GPA earned in all courses applied to the minor. For policies governing all minors, see AP5.3.4 Minors (p. 90).

This minor is available to AVT majors. AVT majors must complete 12 credits unique to the minor.

### Admissions & Policies

#### Policies

Art and Visual Technology (AVT) majors must complete 12 credits unique to the minor. It is recommended that non-AVT majors take AVT 104 Two-Dimensional Design and Color (Mason Core) (p. 142) for their Mason Core (p. 142) Arts requirement as well as AVT 180 New Media in the Creative Arts (Mason Core) (p. 142) for the Mason Core (p. 142) Information Technology (IT, except ethics) requirement. These courses are prerequisites for Web Design coursework. For policies governing all minors, see the Undergraduate Policies (p. 87) section of this catalog.

#### BFA/BA Admissions Requirements

The School of Dance offers a BFA and a BA. Entrance to either program is by audition. Information about the audition process, including dates and audition application, can be found on the School of Dance website.
Master of Fine Arts, Visual and Performing Arts, Concentration in Dance

A Visual and Performing Arts, Master of Fine Arts with a concentration in Dance is offered by the College of Visual and Performing Arts. For specific information, please refer to the Visual and Performing Arts, MFA (p. 806).

Writing-Intensive Requirement

The university requires all students to complete at least one course designated “writing intensive” in their major at the 300-level or above. Students in the Dance, BFA and BA fulfill this requirement by successfully completing DANC 390 Dance History I (Mason Core) (p. 142) or DANC 391 Dance History II (Mason Core) (p. 142).

Policies

See CVPA Requirements and Policies (p. 803).

Fairfax Campus

Phone: 703-993-1114
Email: dance@gmu.edu
Website: dance.gmu.edu/academics/dance-programs

The BFA in Dance is a performance-oriented contemporary dance program designed to prepare students professionally as performers, choreographers, educators, and active leaders of the dance community. Students in this program demonstrate technical mastery and devote their college study to an intensive and comprehensive dance curriculum.

Daily technical training in modern dance and ballet, and numerous performance opportunities develops a versatile dancer. Student progress in the BFA program is assessed consistently. Because of the professional nature of the BFA degree, the program requires completion of 126 credits of coursework.

**Admissions & Policies**

**Admissions**

Entrance to the program is by audition. Information about the audition process, including dates and audition application, can be found on the school web page (http://dance.gmu.edu), or by calling the dance office at 703-993-1114. Admission to the university is determined by the Admissions Office.

**Policies**

For policies governing all undergraduate degrees, see AP5 Undergraduate Policies (p. 87).

Dance Appreciation Minor

Banner Code: DNCA

A300 deLaski Performing Arts Building
Fairfax Campus

Phone: 703-993-1114
Email: dance@gmu.edu
Website: dance.gmu.edu/academics/dance-programs

The minor offers students the opportunity to study a variety of movement styles and understand dance in its historical and cultural context.

Admissions & Policies

Policies

A maximum of four transfer credits may be applied to the minor. Eight credits of coursework must be unique to the minor. For policies governing all minors, see AP.5.3.4 Minors (p. 90).

Requirements

School of Music

Linda Monson, Director

A417 deLaski Performing Arts Building
Fairfax Campus

Phone: 703-993-1380
Website: music.gmu.edu

Undergraduate Programs

Bachelor's Degrees

The two undergraduate degree programs offered through the School of Music, the bachelor of arts (BA) in music and the bachelor of music (BM), prepare students for graduate work in music and music literature; research and professional work in musical activities; and state licensure, or certification, to teach vocal and choral or instrumental music at the elementary and secondary school levels.

The School of Music enables students to pursue worthwhile vocational goals as teachers, performers, conductors, composers, and in music technology. The School of Music also seeks to educate its students to reflect a concern for cultural and humanistic values as future ambassadors and advocates of music and other arts. Through innovative learning experiences, the School of Music provides all students in the BA and BM programs with opportunities to become effective musicians, teachers, and advocates of music. Teaching music is the principal area in which students can find employment in private studios, public and private schools, academies, and higher education within the ever-changing workplace. Because of this, all music majors at Mason receive some training in the teaching of music.

The School of Music also recognizes the critical outreach role it provides in serving students from all majors, as well as members of the community who significantly benefit from the values and experiences of an education in music. The School of Music seeks to provide unique educational opportunities through its various course offerings, workshops, presentations, and performances for those seeking music enrichment.

Teacher Licensure

Undergraduate students seeking certification to teach vocal and choral or instrumental music at the elementary and secondary levels must earn the BM degree as specified under Concentration in Music Education section in this section. Students who have earned a baccalaureate degree and are seeking state licensure to teach music must also complete this sequence of courses, which constitute a state-approved program for teacher education in music.
Graduate Certificates

Music Education Licensure for PK-12
This graduate certificate is designed as a pathway to music education licensure for music students without an undergraduate degree in music education. Upon completing this certificate students will be equipped with the necessary skills, knowledge, and experience to obtain music teaching licensure from the Commonwealth of Virginia.

Music for Well-Being Graduate Certificate
The Graduate Certificate in Music for Well-Being builds on courses currently offered in the School of Music and on the school-wide initiative around well-being as an important consideration and subject of study for all musicians.

Expanding and supplementing courses developed in connection with the undergraduate minor in Music for Well-Being, the certificate allows students to explore the connections between music and consciousness and between vibration, meditation, and well-being. The graduate certificate gives students a thorough grounding in theory and practice and includes instruction in compositional and improvisational approaches. Although there is some overlap in subject matter, this is not intended as a program in music therapy. The certificate is conceived as a compliment to the programs focused on mindfulness and well-being that are a priority across the university. The success of the long-running Healing Arts Ensemble at the graduate level, as well as the undergraduate level, and the growth in the new minor in Music for Well-Being indicates the potential level of student interest in the program.

This certificate may be pursued in either part-time or full-time status.

Instrumental Performance Artist Graduate Certificate
The certificate is a specialized, graduate-level program for advanced musicians who desire to further develop and refine their performance art. The certificate program is a two-year course of study requiring at least two consecutive semesters of residence. A total of 32 credits is required. Advisor’s approval is required for each semester’s enrollment.

Piano Performance Artist Certificate
The certificate is a specialized, graduate-level program for advanced musicians who desire to further develop and refine their performance art. The certificate program is a two-year course of study requiring at least two consecutive semesters of residence. A total of 32 credits is required. Advisor’s approval is required for each semester’s enrollment.

Vocal Performance Artist Certificate
The certificate is a specialized, graduate-level program for advanced musicians who desire to further develop and refine their performance art. The certificate program is a two-year course of study requiring at least two consecutive semesters of residence. A total of 32 credits is required. Advisor’s approval is required for each semester’s enrollment.

Graduate Programs

Accelerated Master’s Option
The School of Music offers a Music, BM (Performance)/Music, Accelerated MM (Performance) option which allows undergraduate students to take graduate classes that can be used towards a designated master’s degree. Undergraduates who wish to pursue the accelerated master’s route should talk to their academic advisor first to see if they qualify. Students must be within 75-90 credits of their bachelor’s program to be eligible to apply; those who have earned more than 90 credits will not be considered. Students must be approved by their academic advisor and formally apply and be accepted to the master’s program through an accelerated master’s application. For more information about admissions requirements and the application process, students should visit the website (http://cvpa.gmu.edu).

Music, MM
The MM degree is offered as an educational channel to meet the intellectual and career needs of qualified students. It is a comprehensive and advanced program of study with a choice of concentrations in performance, music education, composition, conducting, jazz studies, and pedagogy. The MM with a concentration in music education does not provide licensure to teach music in public or private schools.

Music Education, Ph.D.
The PhD in music education, a research-intensive degree, focuses on the gathering, processing, and interpretation of information. Students in the PhD program take seminars and topics courses in music education, as well as research courses through the College of Education and Human Development. PhD graduates are expected to demonstrate the ability to communicate significant concepts of music education.

The PhD in music education requires 60 credits beyond the master’s degree in music.

Doctor of Musical Arts (DMA)
The DMA concentrations are composition, conducting, and performance. While these concentrations share some required coursework, each is also distinct in course requirements. Professional musicians earn the DMA to enhance and extend their knowledge and practice within their area of specialization. The DMA student focuses on the profession of music performance, conducting, or composition, as well as the theory and practice of those disciplines.

The Doctor of Musical Arts (DMA) degree requires 60 credits beyond the master’s degree in music.

Faculty

School Faculty

Professors
Balakerskaia, Billingham, Camphouse, Carroll, Engebretson, Layendecker (Heritage Chair), Maiello, Miller, Monson (Director), Rendler, G. Smith

Associate Professors
Aler, Ciorba, Gillam, Guessford, Kilkenney, Nickens, T. Owens (Associate Director), G. Robinson

Assistant Professors
Alvarez, D. Purcell, Green, Huang, Lavengood, Mulcahy, Walsh

Administrative Faculty
Freer

Adjunct Faculty
Admission Requirements
Entrance to all music degree programs is by audition. Arrangements for an audition must be made in advance by contacting the School of Music before the scheduled audition date. Auditions are held approximately once per month. Audition dates and audition application forms are available through the School of Music (http://music.gmu.edu).

Program Requirements
A fundamentals of music test is given prior to the first week of classes to all students enrolled in MUSI 115 Introduction to Music Theory. Call for additional information.

Competency placement tests are required of all transfer students who wish to present transfer credit in any of the following areas: music theory, aural skills, and keyboard skills.

Students must earn a minimum 2.00 cumulative GPA in their major or higher, if required by their program.

Policies
See CVPA Requirements and Policies (p. 803).

Termination from the Major
No School of Music course that is required for the major may be unsuccessfully attempted more than three times. A grade of F constitutes an unsuccessful attempt in any given course. Those students who do not successfully complete such a course within three attempts will be terminated from the major. For more information, see AP.5.2.4 Termination from the Major (p. 88).

Writing-Intensive Requirement
Mason requires all students to complete at least one course designated "writing intensive" in their major at the 300 level or above. Students majoring in music may fulfill this requirement by successfully completing MUSI 332 Music History in Society II or MUSI 438 Music History in Society B. Students who transfer this course into Mason may be required to repeat it or enroll in some other suitable course to fulfill the writing intensive requirement.

Programs

Artist Graduate Certificate
Banner Code: AR-CERG-ARTC

Admissions & Policies

Admissions
Application Materials
- An artist certificate application and current résumé
- A bachelor's degree in music or equivalent (as evaluated by the School of Music Admissions Committee)
- Transcripts from previous educational institutions
- One-page written statement of student's goals and interest in the program
- Two letters of recommendation
- Recording of a live performance of solo works from the standard repertory submitted via SlideRoom.

Applicants must perform an audition recital and be interviewed on the Mason Campus. Applicants will be notified of the date and time of the audition and interview.

Policies
For policies governing all graduate certificates, see AP.6.8 Requirements for Graduate Certificates (p. 94).

Requirements
Certificate Requirements
Total credits: 22-32
This certificate may be pursued on a full- or part-time basis.

Requirements
Students must complete all requirements within a concentration. Total credits varies dependent on the concentration.

Ethnomusicology Minor

Banner Code: EMUS

Music Academic Advisor
A417 deLaski Performing Arts Building
Fairfax Campus
Phone: 703-993-1392
Email: music@gmu.edu
Website: music.gmu.edu/degree-programs/undergraduate/

The minor is designed for those who wish to widen their scope of knowledge about music while deepening their understanding of the world's peoples. Students learn in the classroom, as well as experientially, in the form of applied studies and exercises in field work how music making functions within cultural contexts, conveying varied meanings in bodily action and musical sound worldwide. Students gain skills that will serve them in many fields of endeavor, from developing specific musical expertise to acquiring proficiency with technological and anthropological aspects of ethnographic enquiry.

Admissions & Policies

Admissions
Students must first demonstrate to the Ethnomusicology coordinator a basic level of knowledge and training in some area of Western or non-Western music, or earn a grade of B or higher in MUSI 103 Musics of the World (Mason Core) (p. 142) or MUSI 431 Music History in Society III (Mason Core) (p. 142).

Policies
Eight credits of coursework must be unique to the minor with a minimum 2.00 GPA earned in all courses applied to the minor. For policies governing all minors, see AP.5.3.4 Minors (p. 90).

Requirements

Jazz Studies Minor

Admissions & Policies

Admissions

No prior experience in jazz is needed, but candidates must pass a music audition.

Policies

Students in the keyboard area use the Keyboard Skills I credit as a music elective.

University policy states that students must earn 8 distinct credits that are not used for their major toward their degree, with a minimum 2.00 GPA earned in all courses applied to the minor. For policies governing all minors, see AP 5.3.4 Minors (p. 90).

Requirements

This minor is open to music and non music majors who wish to explore America’s unique art form. It is open to all instrumentalists and vocalists, including students who perform on instruments not normally associated with jazz.

Total Credits 6

Applied Music Options

See Music advisor for registration permission and options.

MUSI 242 Applied Music in Keyboard 2

MUSI 243 Applied Music in Voice 2

MUSI 244 Applied Music in Woodwind 2

MUSI 245 Applied Music in Brass 2

MUSI 246 Applied Music in String 2

MUSI 247 Applied Music in Percussion 2

MUSI 248 Applied Music in Composition 2

MUSI 442 Applied Music in Keyboard 2-3

MUSI 443 Applied Music in Voice 2-3

Admissions & Policies

Admissions

No prior experience in jazz is needed, but candidates must pass a music audition.

Policies

Students in the keyboard area use the Keyboard Skills I credit as a music elective.

University policy states that students must earn 8 distinct credits that are not used for their major toward their degree, with a minimum 2.00 GPA earned in all courses applied to the minor. For policies governing all minors, see AP 5.3.4 Minors (p. 90).

Requirements

Music Education Licensure for PK-12 Graduate Certificate

Banner Code: AR-CERG-MELP

Music Academic Advisor
A417 deLaski Performing Arts Building
Fairfax Campus
Phone: 703-993-1392
Email: music@gmu.edu
Website: music.gmu.edu/degree-programs/undergraduate/

This certificate may be earned on a full-time or part-time basis.

This certificate program qualifies for Title IV Federal Financial Aid. For more information about the program graduation rates, the median debt of students who completed the program, and other important information, please visit our disclosure (https://irr2.gmu.edu/gedt/Music_Education_for_PK_12/Gedt.html) page.

Admissions & Policies

Admissions

• In addition to standard requirements through the university's online application, requirements for this program include:
  • Transcript audit that indicates: Bachelor of Music or its equivalent, minimum cumulative G.P.A. of 3.0 (Endorsement Worksheet)
  • Official copy of Praxis Core Academic Skills for Educators Test (or equivalency)¹
  • One page professional goals statement submitted with application
  • Upon application review by music education faculty, the successful applicant will be invited to an interview and music skills proficiency exam.

Coursework completed at other institutions will not be considered for transfer into this graduate certificate program. Applicants who believe they have met requirements for a license are encouraged to apply directly to the Virginia Department of Education (VDOE). Instructions and a type-and-print version of the application for a teaching license can be found on the VDOE website at: http://www.doe.virginia.gov/teaching/licensure/application.pdf

¹ Specifics regarding testing requirements and passing scores are dictated by the College of Education and Human Development (CEHD) and can be found online at https://cehd.gmu.edu/teacher/test/praxis

Required Courses

Upon admission to this graduate certificate the candidate must complete the following:²

<table>

Internship

Upon completion of coursework the candidate must complete a student teaching internship at the elementary and secondary levels in a program-approved public or private school (6 credits). Prior to being permitted to student teach, the candidate must complete and pass the VCLA, the Praxis Subject Assessment (Music Content Knowledge-5113)¹, and the MTEC Competency Check².

¹ Coursework completed at other institutions will not be considered for transfer into this graduate certificate program. Applicants who believe they have met requirements for a license are encouraged to apply directly to the Virginia Department of Education (VDOE). Instructions and a type-and-print version of the application for a teaching license can be found on the VDOE website at: http://www.doe.virginia.gov/teaching/licensure/application.pdf

² The requirements and procedures for applying for an internship as well as the MTEC Competency Checks is outlined in the Music Education Handbook (http://music.gmu.edu). Candidates will be advised to sign up for vocal and/or instrumental technique courses during coursework as needed to help prepare them for these exams. Note that techniques courses are not required and thus cannot be transferred or counted as course substitutions for completion of the certificate.

Music Education, PhD

Banner Code: AR-PHD-MUE

Charles Ciorba, Director of Music Education
A417 deLaski Performing Arts Building
The Music Education, PhD is a research-intensive degree, focuses on the gathering, processing, and interpretation of information. Students in the Music Education PhD program take seminars and topics courses in music education, as well as research courses through the College of Education and Human Development (p. 161). Music Education, PhD graduates are expected to demonstrate the ability to communicate significant concepts of music education. The Music Education, PhD requires 90 credits, 60 beyond the master's degree in music.

Admissions & Policies

Admissions

Admission Requirements

In addition to meeting all admission requirements for graduate study, applicants should submit the following:

- Master’s degree in music or its equivalent from an accredited university;
- GPA of 3.00 in master’s-level music course work; 3.50 in courses related to the prospective area of doctoral study (music education, performance, composition, or conducting);
- Three recommendations;
- Satisfactory scores on GRE;
- Sample of academic writing such as a graduate-level paper from a musicology or music history course taken during MM studies.
- Students in performance and conducting must audition. Specific details of those requirements are available from the advisors.
- Composition students must present a portfolio of recent compositions and recordings of performances.
- Music education majors must present a dossier of their teaching experience and activities, a video of sample classroom teaching, and they must schedule an interview with music faculty including the director of graduate studies (DGS) prior to admission.

Applicants should refer to the graduate admissions (https://music.gmu.edu/auditions/masters-auditions) page of the School of Music website for specific details on what is required and how to submit their materials. There is no “provisional” admission. Students must meet appropriate standards prior to commencing doctoral studies.

Policies

Reduction of Credit

Students must have a master’s degree before being admitted. Most students receive a reduction of study of 30 credits based on their previous master’s degree.

Requirements

Degree Requirements

Total credits: 90

The following degree plan is based on a student who receives a full 30 credit reduction. Students who do not receive a full credit reduction should choose additional credits in consultation with their advisor.

Placement Examinations

Prior to the beginning of the first semester of doctoral studies, the student must complete placement examinations in music theory, music history, and musicianship (including aural skills and keyboard skills). Positive scores on the placement exams may reduce or eliminate prerequisites for courses in music history and music theory.

Doctoral Coursework

The doctoral student must maintain a minimum of 3.00 GPA in courses presented on the degree plan, which may include no more than 6 credits with a grade of C. The GPA calculation excludes all transfer courses and Mason extended studies or nondegree credits not formally approved for the degree.

Select 6 credits in music theory

Select 6 credits of MUSI 500 - 800 level electives as approved by advisor.

Total Credits

48

Residency

More than half of all credits (minimum 72) must be taken in doctoral degree status, after admission to the degree program. One year (fall and spring) of consecutive full-time study (9 credits per semester) is recommended (18 total credits). Or, the academic residency requirement may be fulfilled by earning 21 credits within 12 months (fall and spring...
semesters and summer term). Academic residency should be completed during the first year of study. Any necessary prerequisite courses at the 500 level can be included to meet the residency requirement. Language courses at the undergraduate level may not be included. Note: The academic residency does not imply meeting the standards of Virginia residency for tuition purposes.

Language Requirements

Reading proficiency is required in a language appropriate to the student's major area of study. Normally, this will be German, French, or Italian. Alternatively, the student may choose to demonstrate proficiency interpreting statistical findings in quantitative-based educational research. The director of graduate studies and the Graduate Committee will determine the appropriate area of study. Reading proficiency may be accomplished by completing a reading examination provided by the music faculty. The reading examination provided by the faculty will normally consist of translation (with dictionary) of appropriate technical passages relevant to the student's area of study within a two-hour period. The language reading proficiency should be completed prior to earning 12 credits of courses at the 600 level or above.

Graduate Committee

The Graduate Committee will evaluate the progress of the student annually. Continuation in the program is subject to the endorsement of this group.

Comprehensive Exams

After the completion of required courses (excluding dissertation credits) or during the semester when completion of those courses is anticipated, the student will take comprehensive examinations. The written exams may also be followed by a one-hour oral exam if needed to clarify issues included in the written exams.

<td>Dissertation (A minimum of 6 credits)</td>
<td>2</td>
</tr>
</tbody>
</table>

Total Credits 12

Advancement to Candidacy

Before doctoral students may be advanced to candidacy by the dean of the College of Visual and Performing Arts, they must complete all coursework required by the program faculty, be certified in all relevant doctoral research skills, pass the comprehensive exams, and be recommended by the Graduate Committee, the director of graduate studies, and the director of the School of Music. Students advanced to candidacy after the add period for a given semester must wait until the following semester to register for MUSI 999 Dissertation.

Dissertation

The dissertation is the capstone experience of doctoral study. The dissertation will be guided by the Dissertation Committee consisting of at least three members of the music faculty. The student’s major professor will chair the committee. The director of graduate studies of the School of Music may be a part of the committee; if not, he or she will serve ex officio. All Dissertation Committee members will be appointed by the dean of the College of Visual and Performing Arts and have graduate faculty status, as approved by the university provost.

Final Defense and Graduation

When all degree requirements have been satisfied, including completion of the doctoral dissertation, the doctoral candidate may request a doctoral defense. Approval for the defense must be obtained from the Dissertation Committee, the director of graduate studies and the director of the School of Music, and the dean of the College of Visual and Performing Arts. Notice of a defense must be circulated to the university community two weeks before the defense date.

All relevant rules regarding schedule, fees, and other matters as described in the catalog must be followed. All copies of the dissertation materials and fees must be paid before the doctoral degree is awarded.

1 Nonnative speakers of English with limited proficiency in the language may substitute ENGH 100 Composition for Multilingual Writers (Mason Core) (p. 142) for ENGH 101 Composition (Mason Core) (p. 142). Students must attain a minimum grade of C in ENGH 100 Composition for Multilingual Writers (Mason Core) (p. 142) or ENGH 101 Composition (Mason Core) (p. 142), as well as in ENGH 302 Advanced Composition (Mason Core) (p. 142), to fulfill degree requirements.

2 All students excluding Music Technology and Pedagogy students must take MUSI 251 Musical/Oral Communication.

3 Also have significant elective choices as per Mason Core listing.

4 Two classes; one must contain a lab. Students completing the Concentration in Music Technology must take PHYS 103 Physics and Everyday Phenomena I (Mason Core) (p. 142).
All students excluding Music Technology and Pedagogy students must take MUSI 431 Music History in Society III (Mason Core) (p. 142)

Remaining Mason Core requirements are fulfilled with major coursework.

</tr>
</tbody>
</table>

¹ Required for keyboard students.
² Required for vocal students.
³ Topic varies; students must register for the topic corresponding with their major instrument. Required for strings and guitar students; recommended for wind, brass, or percussion students.

### Concentration in Music Technology (MTEC)

Students pursuing this concentration may not also pursue the Music and Technology minor. Students who wish to complete a concentration in music technology must also complete the following:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>MUSI 252</td>
<td>Popular Music Arranging</td>
<td>3</td>

- PSYC 211 Developmental Psychology (Mason Core) (p. 142)
Accelerated Master's

Music, BA/Arts Management, Accelerated MA

Overview
Students choosing the accelerated option must fulfill all university requirements for the master's degree. The regular designed timeframe would be a start in the Fall and completion of all coursework in the Summer five years later with the exception of Capstone, which is only offered in Fall and Spring. Students may need a longer timeframe to complete all requirements.

This accelerated option is offered through joint cooperation between the School of Music and the Arts Management Program.

For more detailed information, see AP 6.7 Bachelor's/Accelerated Master's Degrees. For policies governing all graduate degrees, see the Academic Policies section of the catalog.

Application Requirements
Applicants to accelerated master's programs must have completed at least 75 credits that apply to their undergraduate degree (with at least 24 credits at Mason) and no more than 100 credits. Applicants should submit an Accelerated Master's Program Application, available from the College of Visual and Performing Arts (CVPA) Graduate Studies. It includes the proposed conferral date for the undergraduate degree and the two graduate courses that are to be applied to the undergraduate degree.

Interested students should contact the Arts Management Program Office for more details about the application process.

Accelerated Option Requirements
As an undergraduate, the accelerated master's student is to complete the two graduate courses indicated on their Accelerated Option Requirements.

As an undergraduate, the accelerated master's student is to complete the two graduate courses indicated on their Accelerated Master's Program application with a minimum grade of B in each course. Students must maintain a minimum GPA of 3.00 in all coursework and in coursework applied to their major. On completion and conferral of the undergraduate degree in the semester indicated in the application, they submit the Bachelor's/Accelerated Master's Transition Form (which shall incorporate all of the Graduate Admission requirements of the university) and are admitted to graduate status.

As graduate students, accelerated master's students have an advanced standing. They must meet all master's degree requirements except for the two courses (6 credits) they completed as undergraduates. Students will begin their master's program in the semester immediately following conferral of the undergraduate degree, and they may also begin in the summer term.

Reserve Graduate Credits
Students may take up to 6 additional graduate credits as reserve graduate credit. These credits do not apply to the undergraduate degree. The ability to take courses for reserve graduate credit is normally granted only to Mason seniors within 15 hours of graduation and must be approved by the Dean's Office.

To apply these credits to the master's degree, students must request that the credits be moved from the undergraduate degree to the graduate degree using the Bachelor's/Accelerated Master's Transition Form.

Requirements

Degree Requirements
Total credits: 120

Students must complete all Mason Core (p. 142) requirements and core coursework, as well as the requirements within one selected concentration.

Mason Core
Coursework within the major and concentration fulfills the information technology, global understanding, oral communications, fine arts, and synthesis requirements. Students must fulfill the requirements remaining in the following areas:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>MUSI 113</td>
<td>Aural Skills I</td>
<td>1</td>

Total Credits: 10

### Concentration in Music Education (MUE)

Certification to Teach

The music education concentration at George Mason University is recognized by the Virginia Department of Education (VDOE) as an approved teacher preparation program that imparts licensure. Even though an undergraduate student may declare music education as their major, this is not an official indication of a student’s degree status. In order to be accepted into the degree, students must complete an application, meet all eligibility requirements, and pass the MTEC Interview and Skill Proficiency Exam. All entry requirements are described in Part 1 of the GMUsicEd Handbook located online (https://sites.google.com/site/gmusicedhandbook/Information/part1bme).

The deadline for applying to the BME and taking the MTEC exam is the 4th semester of coursework. The 4th semester is defined as a minimum of 36 attempted credits. Transfer and continuing students entering GMU as an undergraduate with 36 or more credits will be required to apply to the BME no later than their 2nd semester of coursework at GMU.

Student must complete all concentration requirements as well as requirements for one of the following emphases:

- Brass
- Guitar
- Keyboard
- Percussion
- String
- Voice
- Woodwind
### Courses Required for All Emphases

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>MUSI 214</td>
<td>Aural Skills IV</td>
<td>2</td>
</tr>
</tbody>
</table>

Select 9 credits from:

- MUSI 215  Theory for Pop and Jazz Music
- MUSI 216  Theory for 20th- and 21st-Century Music
- MUSI 217  Theory for 18th-Century Music
- MUSI 317  Baroque and Classical Forms

Select 8 credits from MUSI 242-MUSI 248 (see Applied Music Options)

Select 6 credits from MUSI 442-MUSI 448 (see Applied Music Options)

- MUSI 259  Music in Computer Technology (Mason Core) (p. 142)
- MUSI 319  Class Composition and Arranging
- MUSI 323  Music Education Recital
- MUSI 331  Music History in Society I
- MUSI 332  Music History in Society II
- MUSI 361  Class Strings
- MUSI 366  Class Percussion
- MUSI 367  Class Guitar
- MUSI 370  Laboratory Ensemble (To be repeated six times)
- MUSI 393  Music Administration and Management
- MUSI 432  Music History in Society IV

Six credits of:

- MUSI 495  Internship in Music Education (Mason Core) (p. 142) ¹
- EDRD 300  Literacy and Curriculum Integration
- EDUC 301  Educating Diverse and Exceptional Learners
- EDUC 302  Human Growth and Development or EDUC 539

Total Credits: 60

### Emphasis Requirement

#### Music Education: Brass Emphasis

<table>

**Accelerated Master's**

**Music, BM (Performance)/Music, Accelerated MM (Performance)**

**Overview**

Students in the Music, BM (p. 862) (Performance concentration) have the option of obtaining an accelerated Music, MM (p. 873) (Performance concentration).

For more detailed information, see AP.6.7 Bachelor's/Accelerated Master's Degrees (p. 93). For policies governing all graduate degrees, see AP.6 Graduate Policies (p. 90).

**Admissions Requirements**

Applicants to accelerated master's programs must have completed at least 75 credits that apply to their undergraduate degree (with at least 24 credits at Mason) and no more than 100 credits. Applicants should submit the following:

- An Accelerated Master's Program Application, available from the College of Visual and Performing Arts (CVPA) Graduate Studies
- 1-2 page Goals Statement
- Two letters of recommendation
- In addition, all applicants must complete a live performance audition. Arrangements for an audition must be made in advance by contacting the School of Music before the scheduled audition date. Auditions are held approximately once per month. Audition dates and audition application forms are available through the School of Music website.

Interested students should contact the Senior Academic Advisor, School of Music, for more details about the application process.

**Degree Requirements & Reserve Graduate Credit**

After admission and having earned 90 undergraduate credits, accelerated master's students complete 6 credits of graduate coursework in their field of study (with a 3.00 GPA or better in each course), specified by their undergraduate and graduate advisors. These credits will apply to the undergraduate degree and provide the student advanced standing in the MM Performance program. All graduate course prerequisites must be completed prior to enrollment. While still in undergraduate status, a maximum of 6 additional graduate credits may be taken as reserve graduate credit and applied to the master's program. Reserve graduate credits do not apply to the undergraduate degree.

To apply these credits to the master's degree, students should use the Bachelor's/Accelerated Master's Transition Form.

Students in the BM (Performance)/MM (Performance) accelerated degree program must fulfill all university requirements for the master's degree, including a minimum of 18 applicable graduate credits taken after the bachelor's degree has been completed and posted to the student's academic record. Successful completion of the accelerated MM will require one summer of coursework between years 4 and 5.

As graduate students, accelerated master's students have an advanced standing. They must meet all master's degree requirements except for the two courses (6 credits) they completed as undergraduates. The regular designed timeframe would be a start in the Fall and completion of all coursework in the Summer five years later with the exception of

Music Minor

Capstone, which is only offered in Fall and Spring. Students may need a longer timeframe to complete requirements.

For more detailed information, see AP.6.7 Bachelor’s/Accelerated Master’s Degrees (p. 90). For policies governing all graduate degrees, see Academic Policies (p. 77).

Music, BM/Arts Management, Accelerated MA

Overview

Students choosing the accelerated option must fulfill all university requirements for the master’s degree. The regular designed timeframe would be a start in the Fall and completion of all coursework in the Summer five years later with the exception of Capstone, which is only offered in Fall and Spring. Students may need a longer timeframe to complete all requirements.

This accelerated option is offered through joint cooperation between the School of Music and the Arts Management Program.

For more detailed information, see AP.6.7 Bachelor’s/Accelerated Master’s Degrees. For policies governing all graduate degrees, see the Academic Policies section of the catalog.

Admissions

Applicants to accelerated master’s programs must have completed at least 75 credits that apply to their undergraduate degree (with at least 24 credits at Mason) and no more than 100 credits. Applicants should submit an Accelerated Master’s Program Application, available from the College of Visual and Performing Arts (CVPA) Graduate Studies. It includes the proposed conferral date for the undergraduate degree and the two graduate courses that are to be applied to the undergraduate degree.

Interested students should contact the Arts Management Program Office for more details about the application process.

Accelerated Option Requirements

As an undergraduate, the accelerated master’s student is to complete the two graduate courses indicated on their Accelerated Option Requirements.

As an undergraduate, the accelerated master’s student is to complete the two graduate courses indicated on their Accelerated Master’s Program application with a minimum grade of C in each course. Students must maintain a minimum GPA of 3.00 in all coursework and in coursework applied to their major. On completion and conferral of the undergraduate degree in the semester indicated in the application, they submit the Bachelor’s/Accelerated Master’s Transition Form (which shall incorporate all of the Graduate Admission requirements of the university) and are admitted to graduate status.

As graduate students, accelerated master’s students have an advanced standing. They must meet all master’s degree requirements except for the two courses (6 credits) they completed as undergraduates. Students will begin their master’s program in the semester immediately following conferral of the undergraduate degree, and they may also begin in the summer term.

Reserve Graduate Credits

Students may take up to 6 additional graduate credits as reserve graduate credit. These credits do not apply to the undergraduate degree.

The ability to take courses for reserve graduate credit is available to all high achieving undergraduates with permission of the School of Music. Permission to take a graduate course for reserve graduate credit is normally granted only to Mason seniors within 15 hours of graduation and must be approved by the Dean’s Office.

To apply these credits to the master’s degree, students must request that the credits be moved from the undergraduate degree to the graduate degree using the Bachelor’s/Accelerated Master’s Transition Form.

Admissions & Policies

Admissions

All students pursuing a music minor must pass a music audition. Students in the keyboard area use the Keyboard Skills I credit as a music elective.

Policies

University policy states that students must earn 8 distinct credits that are not used for their major toward their minor, with a minimum grade of C earned in all courses applied to the minor. For policies governing all minors, see AP.5.3.4 Minors (p. 90).

Email: music@gmu.edu
Website: music.gmu.edu/degree-programs/graduate/

The Music, MM degree is offered as an educational channel to meet the intellectual and career needs of qualified students. It is a comprehensive and advanced program of study with a choice of concentrations in performance, music education, composition, conducting, jazz studies, and pedagogy. The Music, MM with a concentration in music education does not provide licensure to teach music in public or private schools.

Admissions & Policies

Admissions

Requirements

In addition to fulfilling admission requirements for graduate study, applicants are expected to hold a baccalaureate degree in music or another discipline, with courses equaling the music requirements (minus the 7- to 8-credit teaching sequence) for the BA in music offered at Mason.

The following admission requirements must also be met:

- Performance: pre-screening submitted through SlideRoom and audition
- Conducting: pre-screening submitted through SlideRoom and audition
- Composition: submission of a portfolio of compositions
- Music Education: interview with music faculty, a video of sample classroom teaching and submission of a two- to three-page paper on the applicant's philosophy of music education.
- Pedagogy: audition in the primary applied teaching area is required. Applicants are expected to have large and small ensemble experience on the major instrument and should have presented a full solo recital or equivalent. All music teaching experience should be summarized.
- Jazz Studies: A portfolio of at least five jazz tunes in contrasting styles, as well as a complete repertoire list of all jazz tunes studied/performed. Submit all jazz materials via SlideRoom and schedule audition.
- Collaborative Piano: pre-screening submitted through SlideRoom and audition

Applicants should refer to the graduate admissions page of the School of Music website for specific details on what is required and how to submit their materials.

Diagnostic Entrance Exam

All students are required to complete diagnostic entrance examinations in music theory, music history, aural skills, and basic keyboard skills. These examinations must be taken prior to the beginning of the first semester of graduate study. A sufficient placement score can reduce or eliminate prerequisites for some of the 600-level and above courses in music theory and history. The exam is offered during a three-hour period prior to the beginning of classes of the fall and spring semesters.

Foreign Language Exams (Vocal Performance Emphasis)

Students in the MM degree program (emphasis in vocal performance) must take proficiency exams in French, German, Italian, and English to demonstrate diction competency. Students may be required to take MUSI 525 Performance Seminar and Vocal Literature for Singers and Accompanists I, MUSI 526 Performance Seminar and Vocal Literature for Singers and Accompanists II.

Comprehensive Exit Exam

All students are required to pass a comprehensive exit exam administered during the graduation semester or, in the case of students selecting the thesis option in the music education concentration,
on completion of 24 credits of course work and immediately before beginning work on the thesis. August graduates must take this exam during the preceding spring term. This exam is usually a three-hour written test, with questions based primarily on course work the student has taken toward the degree at Mason.

Policies
For policies governing all graduate degrees, see AP .6 Graduate Policies (p. 90). See College of Visual and Performing Arts (p. 803) for policies specific to the college.

Program Requirements
A student must successfully complete the appropriate 30 credits in graduate music courses. With approval of the graduate advisor, 3 non-music graduate credits may be taken.

The student is admitted as concentrating in one of six areas: performance, music education, composition, conducting, jazz studies, or pedagogy. All students are required to complete the 11 credits described as General Requirements plus 19 credits in one of the six areas identified as Additional Requirements. There are some limited possibilities for double concentrations. For details, see the director of graduate studies.

Requirements

Degree Requirements
Total credits: 30

General Requirements for All Concentrations
Music Education students will have 9 credits of General Requirements and 21 credits of Concentration Requirements; all other concentrations will have 11 credits of General Requirements and 19 credits of Concentration Requirements.

Total Credits 19

1 Students may pass out of MUSI 613 Graduate Orchestration with a satisfactory score on the Graduate Orchestration Placement Exam. In this case, students will take an additional 3 credits of a theory or history elective chosen from: MUSI 610 Topics in Music Theory, MUSI 710 Advanced Topics in Music Theory, MUSI 630 Topics in Music History and Literature, or MUSI 730 Advanced Topics in Music History.

Concentration in Conducting (CDC)
The number of students accepted in the graduate conducting concentration is limited by the extent to which it is possible to provide students with practical experience.

Accelerated Master's

Music, BM (Performance)/Music, Accelerated MM (Performance)

Overview
Students in the Music, BM (p. 862) (Performance concentration) have the option of obtaining an accelerated Music, MM (p. 873) (Performance concentration).

For more detailed information, see AP 6.7 Bachelor's/Accelerated Master's Degrees (p. 93). For policies governing all graduate degrees, see AP 6 Graduate Policies (p. 90).

Admissions Requirements
Applicants to accelerated master's programs must have completed at least 75 credits that apply to their undergraduate degree (with at least 24 credits at Mason) and no more than 100 credits. Applicants should submit the following:

- An Accelerated Master's Program Application, available from the College of Visual and Performing Arts (CVPA) Graduate Studies
- 1-2 page Goals Statement
- Two letters of recommendation
- In addition, all applicants must complete a live performance audition. Arrangements for an audition must be made in advance by contacting the School of Music before the scheduled audition date. Auditions are held approximately once per month. Audition dates and audition application forms are available through the School of Music website.

Interested students should contact the Senior Academic Advisor, School of Music, for more details about the application process.

Degree Requirements & Reserve Graduate Credit
After admission and having earned 90 undergraduate credits, accelerated master's students complete 6 credits of graduate coursework in their field of study (with a 3.00 GPA or better in each course), specified by their undergraduate and graduate advisors. These credits will apply to the undergraduate degree and provide the student advanced standing in the MM Performance program. All graduate course prerequisites must be completed prior to enrollment. While still in undergraduate status, a maximum of 6 additional graduate credits may be taken as reserve graduate credit and applied to the master's program. Reserve graduate credits do not apply to the undergraduate degree.

To apply these credits to the master's degree, students should use the Bachelor's/Accelerated Master's Transition Form.

Students in the BM (Performance)/MM (Performance) accelerated degree program must fulfill all university requirements for the master's degree, including a minimum of 18 applicable graduate credits taken after the bachelor's degree has been completed and posted to the student's academic record. Successful completion of the accelerated MM will require one summer of coursework between years 4 and 5.

As graduate students, accelerated master's students have an advanced standing. They must meet all master's degree requirements except for the two courses (6 credits) they completed as undergraduates. The regular designed timeframe would be a start in the Fall and completion of all coursework in the Summer five years later with the exception of Capstone, which is only offered in Fall and Spring. Students may need a longer timeframe to complete requirements.

For more detailed information, see AP 6.7 Bachelor's/Accelerated Master's Degrees (p. 90). For policies governing all graduate degrees, see AP 6 Graduate Policies (p. 90).

Musical Arts, DMA

Banner Code: AR-DMA-MUAR

Music Academic Advisor
A417 deLaski Performing Arts Building
Fairfax Campus

Phone: 703-993-1392
Email: music@gmu.edu
Website: music.gmu.edu/degree-programs/graduate/

The Doctor of Musical Arts (DMA) requires 90 credits, 60 credits beyond the Master's degree in music. The doctor of musical arts concentrations are composition, conducting, and performance. While these concentrations share some of the required course work, each is also distinct in course requirements. Professional musicians earn the DMA to enhance and extend their knowledge and practice within their area of specialization. The DMA student focuses on the profession of music performance, as well as the theory and practice of the discipline.

Admissions & Policies

Admissions

Requirements
In addition to meeting all admission requirements for graduate study, applicants should submit the following:

- Master's degree in music from an accredited university;
- GPA of 3.00 in master's-level music course work, 3.50 in courses related to the prospective area of doctoral study (performance, composition, or conducting);
- Three recommendations;
- Satisfactory scores on GRE;
- A sample of academic writing such as a graduate-level paper from a (musicology or music history) course taken during MM studies;
- Audition (performance and conducting students only). Specific details of those requirements are available from the advisors.
- A portfolio of recent compositions and recordings of performances (composition students only).

Applicants should refer to the graduate admissions page of the School of Music website for specific details on what is required and how to submit their materials. There is no "provisional" admission. Students must meet appropriate standards prior to commencing doctoral studies.

Policies

For policies governing all graduate degrees, see AP .6 Graduate Policies (p. 90). See College of Visual and Performing Arts (p. 803) for policies specific to the college.
Reduction of Credit
Students must have a master’s degree before being admitted to the Doctor of Musical Arts Program. Most students receive a reduction of study of 30 credits based on their previous master's degree.

Requirements

Degree Requirements
Total credits: 90

The following degree plan is based on a student who receives a full 30 credit reduction. Students who do not receive a full credit reduction should choose additional credits in consultation with their advisor.

Placement Examinations
Prior to the beginning of the first semester of doctoral studies, the student must complete placement examinations in music theory, music history, and musicianship (including aural skills and keyboard skills). Positive scores on the placement exams may reduce or eliminate prerequisites for courses in music history and music theory. Recitals can be scheduled only after completion of any necessary prerequisites in music theory, music history, and musicianship.

Doctoral Coursework
The doctoral student must maintain a minimum of 3.00 GPA in courses presented on the degree plan, which may include no more than 6 credits with a grade of C. The GPA calculation excludes all transfer courses and Mason extended studies or non degree credits not formally approved for the degree.

Students must complete the following required courses as well as those in their chosen concentration:

Total Credits: 8

1 Must be taken within the student’s first 2 semesters.
Residency
More than half of all credits (minimum 72) must be taken in doctoral degree status, after admission to the degree program. One year (fall and spring) of consecutive full-time study (9 credits per semester; 18 credits per year) is recommended. Or, the academic residency requirement may be fulfilled by earning 21 credits within 12 months (fall and spring semesters and summer term). Academic residency should be completed during the first year of study. Any necessary prerequisite courses at the 500 level can be included to meet the residency requirement. Language courses at the undergraduate level may not. Note: The academic residency does not imply meeting the standards of Virginia residency for tuition purposes.

Language Requirements
Reading proficiency is required in a language appropriate to the student's major area of study. Normally, this will be German, French, or Italian. The director of graduate studies and the Graduate Committee will determine the appropriate area of study. Reading proficiency may be accomplished by completing a reading examination provided by the music faculty. The reading examination provided by the faculty will normally consist of translation (with dictionary) of appropriate technical passages relevant to the student's area of study within a two-hour period. The language reading proficiency should be completed prior to earning 12 credits of courses at the 600 level or above.

Graduate Committee
The Graduate Committee will evaluate the progress of the student annually. Continuation in the program is subject to the endorsement of this group.

Comprehensive Exams
After the completion of required courses (excluding dissertation credits) or during the semester when completion of those courses is anticipated, the student will take comprehensive examinations. The written exams will be followed by a one-hour oral exam to clarify issues included in the written exams.

Doctoral Research

</tr>
</tbody>
</table>

Total Credits: 13

Advancement to Candidacy
Before doctoral students may be advanced to candidacy by the dean of the College of Visual and Performing Arts, they must complete all course work required by the program faculty, be certified in all relevant doctoral research skills, pass the comprehensive exams, and be recommended by the Graduate Committee, the director of graduate studies, and the director of the School of Music. Students advanced to candidacy after the add period for a given semester must wait until the following semester to register for MUSI 999 Dissertation.

Dissertation Committee
The dissertation is the capstone experience of doctoral study. The dissertation will be guided by the Dissertation Committee consisting of at least three members of the music faculty. The student's major professor will chair the committee. The director of graduate studies of the School of Music may be part of the committee; if not, he or she will serve ex officio. All Dissertation Committee members will be appointed by the dean of the College of Visual and Performing Arts and have graduate faculty status, as approved by the university provost. Performance and composition recitals are also subject to the approval of the Dissertation Committee.

Final Defense and Graduation
When all degree requirements have been satisfied, including completion of the doctoral dissertation, the doctoral candidate may request a doctoral defense. Approval for the defense must be obtained from the Dissertation Committee, the director of graduate studies and the director of the School of Music, and the dean of the College of Visual and Performing Arts. Notice of a defense must be circulated to the university community two weeks before the defense date.

All relevant rules regarding schedule, fees, and other matters as described in the catalog must be followed. All copies of the dissertation materials and fees must be paid before the doctoral degree is awarded.

School of Theater

A407 deLaski Performing Arts Building
Fairfax Campus
Phone: 703-993-1120
Email: theater@gmu.edu
Website: theater.gmu.edu
Undergraduate Programs

Theater BA and BFA

The School of Theater offers BA and BFA degrees and prepares students for graduate study or entry into the profession through rigorous, concentrated, and individualized training; however, students are encouraged to maintain wide-ranging interests within the school and throughout the university's extensive offerings. Theater majors organize their advanced work within the major to include classes in areas of emphasis including performance, design and technical theater, and other theater studies.

Theater BA Concentrations

Theater majors must choose to complete their Bachelor of Arts degree with a concentration in one of the following areas: Design and Technical Theater, Performance (Acting and Directing), Theater Education for Theater Arts PK-12, or Theater Studies. Students must earn a minimum 2.5 cumulative GPA to complete a BA with a concentration.

Certification for Theater Education for Theater Arts PK-12

The Theater Education for Theater Arts PK-12 concentration is approved by the Virginia State Department of Education and administered through the College of Education and Human Development, which is accredited by the National Council for the Accreditation of Teacher Education (NCATE). Upon degree conferral and completion of all requirements, students may be eligible to apply for Virginia State Licensure. Minimum scores on the Praxis Core and VCLA tests must be achieved before state licensure is granted.

Students must be formally accepted into the Theater Education for Theater Arts PK-12 concentration.

Theater BFA Concentrations

In addition to the Mason Core requirements for the Bachelor of Arts degree, students in the Theater BFA must complete a minimum of 76 credits in the major: 46 credits of required core courses and 30 credits in a concentration. Concentrations are: Design for Stage and Screen, Musical Theater Performance, and Performance for Stage and Screen (Acting and Directing). All students pursuing a BFA in Theater must earn a minimum 2.5 cumulative GPA for graduation.

Graduate Programs

Accelerated Master's Program

The School of Theater offers a Theater, BA/Arts Management, Accelerated MA option which allows undergraduate students to take graduate classes that can be used towards a designated Master’s degree. Undergraduates who wish to pursue the accelerated Master’s route should talk to their academic advisor first to see if they qualify. Students must be within 75-90 credits of their Bachelor’s program to be eligible to apply; those who have earned more than 90 credits will not be considered. Students must be approved by their academic advisor and formally apply and be accepted to the Master’s program through an Accelerated Master’s application. For more information about admissions requirements and the application process, students should visit the college website (http://cvpa.gmu.edu).

Visual and Performing Arts, MFA

The School of Theater offers one concentration under the Master of Fine Arts, Visual and Performing Arts degree: Theater. Applicants to the program must designate which concentration they intend to apply for on the application. Each concentration has its own unique set of admissions requirements and program requirements.

Requirements & Policies

Admission Requirements

Admission to George Mason University requires application through Mason's Admissions Office. Entrance into all Theater programs is by interview and audition or portfolio review. Information about the audition, portfolio review and interview process, including dates, can be found at the College of Visual and Performing Arts (https://cvpa.gmu.edu/admissions/undergraduate-admissions/school-theater-admissions). Please note that these are two separate processes.

Interviews will be conducted by appointment and candidates must prepare an appropriate resume.

Contact the School of Theater to schedule your interview. Students who audition or present a portfolio at theater conferences (i.e. Virginia Theatre Association, Southeastern Theater Conference, etc.) before or after applying to Mason are required to attend a separate interview on campus.

Writing-Intensive Requirement

The university requires all students to complete at least one course designated writing-intensive in their major at the 300 level or above. Students seeking a BA or BFA in theater fulfill this requirement by successfully completing THR 350 Script Analysis or THR 482 Advanced Screenplay Workshop.

Production Requirements

Participation in Theater at Mason productions is expected of all declared majors. Students must have a minimum 2.5 cumulative GPA to participate in Theater at Mason productions.

Students must also earn four (4) practicum credits, one (1) credit for satisfactory completion (a minimum of 30 hours) of each of four (4) performance and production assignments in the major, including faculty
or guest-directed Mason Players Mainstage, and student-directed Studio productions.

All freshmen, first year transfer, and new Theater majors must register for THR 198 Theatrical Construction Practicum and THR 199 Production Run Crew Practicum during their first academic year.

Assignments for THR 196 Performance or Design Practicum and THR 197 Stage or Literary Practicum will include a presentation of portfolio documents demonstrating a practical analysis of the role, design, or support position to subject area mentors.

- THR 196 Performance or Design Practicum assignments include actor, designer, assistant designer, stage manager, and assistant stage manager.
- THR 197 Stage or Literary Practicum assignments include director, assistant director, dramaturg, master electrician, technical director, playwright, house management, and publicity.
- THR 198 Theatrical Construction Practicum assignments include scenery construction and painting, costume construction, electrician, and props.
- THR 199 Production Run Crew Practicum assignments include stage crew, light board operator, sound board operator, wardrobe, and fly crew.

Unless registered for a Theater course approved as directly connected to production (i.e. THR 196 Performance or Design Practicum, THR 197 Stage or Literary Practicum, THR 198 Theatrical Construction Practicum, THR 199 Production Run Crew Practicum, THR 492 Studio Project or THR 495 Senior Capstone Project) all students (including non-Theater majors) electing to participate in a Theater at Mason production must register for THR 200 Play Production Practicum concurrent with participation.

**Theater Honors Program**

See the Theater, BA (p. 884) or Theater, BFA (p. 887) for specific details.

**Policies**

**BA/BFA Policies**

Students seeking to earn a BA or BFA as a second bachelor’s degree, either concurrently or sequentially, must complete all theater degree requirements. Students must earn a minimum 2.00 cumulative GPA in their major. A student must earn a minimum cumulative GPA of 2.5 to complete a BA with a concentration or a BFA.

**Programs**

- Audio Production Minor
- Event Technical Production Minor (CVPA)
- Teaching Theatre PK-12 Graduate Certificate
- Theater Minor
- Theater Performance Minor

Those students interested in exploring audio production in a purely music-based experience should consider the minor in Music Technology (p. 858).

**Admissions & Policies**

**Policies**

University policy states that students must earn 8 distinct credits that are not used for their major toward their minor, with a minimum grade of 2.00 earned in all courses applied to the minor. For policies governing all minors, see AP 5.3.4 Minors (p. 90).

**Event Technical Production Minor (CVPA)**

Banner Code: EVTP

Sara Simanski, Academic Advisor
A407 deLaski Performing Arts Building
Fairfax Campus
This minor is offered by the College of Visual and Performing Arts (p. 803) (School of Theater (p. 878)) and the College of Education and Human Development (p. 161) (School of Recreation, Health, and Tourism (p. 221)). This minor, available to all Mason undergraduate students, offers the opportunity to study special event management and event technologies, design and production for installations and special events. Students will gain insights into industry standards and practices regarding planning, managing, and executing live events and presentations. The required courses in this minor provide students with a foundational overview of management and production. Students can complement that knowledge with specific electives that meet their individual interests in events and areas of design and technology.

### Teaching Theatre PK-12 Graduate Certificate

**Banner Code: AR-CERG-THRP**

Kristin Johnsen-Neshati, Dramaturg
The BA degree stresses the breadth of a liberal arts education in the belief that such study, combined with serious practical training and experience, offers the best preparation for a life in theater and screen.

Students complete the theater core. To organize their advance work within the major, students elect a course of study from five concentrations:

- Performance (Acting and Directing)
- Design and Technical Theater
- Playwriting and Dramaturgy
- Theater Education for Theater Arts PK-12
- Theater Studies

The BA degree stresses the breadth of a liberal arts education in the belief that such study, combined with serious practical training and experience, offers the best preparation for a life in theater and screen.

Total Credits  46

1  Must be taken four times during course of study.
2  May fulfill either Mason Core (p. 142) Global Understanding requirement or dramatic literature requirement but not both.

Theater Concentrations

Theater majors earning a BA in Theater must select one of the following concentrations:

Concentrations
- Concentration in Design and Technical Theater (DTT) (p. 883)
- Concentration in Performance (PFM) (p. 883)
- Concentration in Theater Education for Theater Arts PK-12 (THEA) (p. 883)
- Concentration in Theater Studies (THST) (p. 884)

Concentration in Design and Technical Theater (DTT)
Provides a foundation of knowledge, technique, and experience in one or more areas of theater design and technology in preparation for advanced study and professional work in the field.

Upper-Level Theater Electives  12
12 credits of 300-400 level THR coursework

Total Credits  24

Concentration in Performance (PFM)
Designed for the serious student of acting and directing with professional aspirations. Solid grounding in the fundamentals of performance analysis and basic training of the actor’s instrument are complemented by a rigorous, sequential instruction in the various facets of the actor’s craft.

At its core, the Performance Concentration is a blend of Modern and Classical actor training using a Stanislavski-grounded approach balanced with techniques for understanding texts written two hundred years before “motivation” and “characterization” entered the critical vocabulary. Rounding out the curriculum is specialized study in vocal production and movement technique. Matriculation in this program expresses a profound commitment to a rigorous intellectual, physical and emotional investigation of the discipline of performance over a two-year period. Professional development is enhanced with ongoing student progress reviews, support and advising from Performance Concentration faculty.

Concentration in Theater Education for Theater Arts PK-12 (THEA)
Designed for students interested in pursuing theater education. In addition to transcript review and the submission of an essay detailing goals for the concentration, students must:
- Have earned 45 to 60 credits.
- Submit scores for the Praxis Core (Reading, Writing, and Mathematics) tests to the committee. (It is strongly recommended that students take the Praxis Core tests as soon as ENGH 302
Advanced Composition (Mason Core) (p. 142), a course in literature, and a course in mathematics have been completed.)

- Maintain an overall GPA of 2.80 in all course work completed at Mason and in course work at all institutions of higher learning combined.
- Earn no grade lower than a C in theater and professional education courses needed for graduation.

Upon fulfilling THR 448 Foundations of Theater Education, THR 449 Elementary Theater Education, THR 450 Secondary Theater Education, EDRD 300 Literacy and Curriculum Integration, EDUC 301 Educating Diverse and Exceptional Learners, and EDUC 302 Human Growth and Development students must complete 15 weeks of a full-time student teaching internship (THR 455 Theater Education Internship). Applications for placement, subject to approval of the unit, are submitted to the Field Placement Specialist in the College of Education and Human Development at the beginning of the previous semester. In addition, students must pass the VCLA before student teaching.

**Concentration in Theater Studies (THST)**

Designed for the Theater generalist or the writer specializing in playwriting, screenwriting, production dramaturgy, season planning, theater criticism, and translation/adaptation for the stage. The Concentration in Theater Studies requires each student to work with a faculty adviser to craft an individualized course of study that challenges their development conceptually and creatively for a total of 24 credits of upper-division (300-400 level) THR courses.

**General Electives**

<table>

<td></td>
</tr>
<tr>
<td>Complete a double degree outside their primary field of study (15-21 credits)</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

**Honors**

**Honors in the Major**

Highly-qualified students who have completed 75 credits may pursue advanced work leading to graduation with honors in the major. Students apply for Honors in Theater by submitting to the Director (by November 15 or April 15) a two-page written statement outlining their reasons for pursuing advanced coursework and specific professional goals, along with the names of two Mason theater faculty members who have agreed to serve as references.

Students satisfy the honors course sequence by taking three honors-specific courses from their chosen concentration. They must also maintain an overall GPA of 3.50 and a GPA of 3.75 within the major.

**Accelerated Master’s**

**Theater, BA/Arts Management, Accelerated MA**

**Overview**

Undergraduates in Theater may apply to the accelerated master’s degree in Arts Management. If accepted, students will be able to earn a BA in Theater (p. 882) and an MA in Arts Management (p. 813) after satisfactory completion of 150 credits.

Students choosing the accelerated option must fulfill all university requirements for the master’s degree. The regular designed timeframe would be a start in the Fall and the completion in the Summer five years later, but longer time frames may also be available.

See AP.6.7 Bachelor’s/Accelerated Master’s Degree (p. 93) for policies related to this program. For policies governing all graduate degrees, see AP6 Graduate Policies (p. 90).

**Admission Requirements**

Applicants to accelerated master’s programs must have completed at least 75 credits that apply to their undergraduate degree (with at least 24 credits at Mason) and no more than 90 credits. Applicants should submit an Accelerated Master’s Program Application, available from the College of Visual and Performing Arts (CVPA) Graduate Studies. It includes the proposed conferral date for the undergraduate degree and the two graduate courses that are to be applied to the undergraduate degree.

Interested students should contact the Arts Management Program Office for more details about the application process.

**Accelerated Option Requirements**

As an undergraduate, the accelerated master’s student is to complete the two graduate courses indicated on their Accelerated Master’s Program application with a minimum grade of 3.00 in each course. Students must maintain a minimum GPA of 3.00 in all coursework and in coursework applied to their major. On completion and conferral of the undergraduate degree in the semester indicated in the application, they submit the Bachelor’s/Accelerated Master’s Transition Form (which shall incorporate all of the Graduate Admission requirements of the university) and are admitted to graduate status.
As graduate students, accelerated master's students have an advanced standing. They must meet all master's degree requirements except for the two courses (6 credits) they completed as undergraduates. The Internal Internship (AMGT 740 Internal Internship) will be within Theater at Mason (generally with the School of Theater). Students will begin their master's program in the semester immediately following conferral of the undergraduate degree, and they may also begin in the summer term.

Reserve Graduate Credit

Students may take up to 6 additional graduate credits as reserve graduate credit. These credits do not apply to the undergraduate degree. The ability to take courses for reserve graduate credit is available to all high achieving undergraduates with permission of the School of Theater. Permission to take a graduate course for reserve graduate credit is normally granted only to Mason seniors within 15 hours of graduation and must be approved by the Dean's Office.

To apply these credits to the master's degree, students must request that the credits be moved from the undergraduate degree to the graduate degree using the Bachelor's/Accelerated Master's Transition Form.

Theater BFA Concentrations

Theater majors earning a BFA in Theater must select one of the following concentrations:

- Design for Stage and Screen Concentration (DSS) (p. 886)
- Musical Theater Performance Concentration (MTPF) (p. 886)
- Performance for Stage and Screen (Acting and Directing) Concentration (PSS) (p. 887)

- THR 304 Advanced Movement for Actors
- THR 305 Unarmed Stage Combat
- THR 405 Advanced Stage Combat

or permission of Director

Total Credits 46
The School of Music offers placement tests in Theory, Sight Singing, Ear Training and Keyboard Skills for students with an exceptional level of competency or prior academic experience in these areas. Placement tests are optional. However, students must pass the specific placement tests in order to receive “credit-by-examination” to be applied for credit to the concentration. These exams are only available the semester you begin coursework at Mason and cannot be scheduled for a later time. Opportunities to take the placement exams and additional exam details are posted on the School of Music website: music.gmu.edu (https://music.gmu.edu)

- THR 427 Musical Theater Workshop
  or permission of Director

Total Credits 30

After fulfilling degree requirements, BFA students may use remaining general electives credits inside or outside of the department. All students are required to take a minimum of 45 credits of upper-division courses (300-400 level).

Honors

Honors in the Major

Highly-qualified students who have completed 75 credits may pursue advanced work leading to graduation with honors in the major. Students apply for Honors in Theater by submitting to the Director by November 15 or April 15 a two-page written statement outlining their reasons for pursuing advanced coursework and specific professional goals, along with the names of two Mason theater faculty members who have agreed to serve as references.

Students satisfy the honors course sequence by taking three honors-specific courses from their chosen concentration. They must also maintain an overall GPA of 3.50 and a GPA of 3.75 within the major.

School of Business

Enterprise Hall

Phone: 703-993-1880

Website: business.gmu.edu

Administration

- Maury Peiperl, Dean
- Anne Magro, Senior Associate Dean, Strategy and Impact
- Cheryl Druhl, Associate Dean, Faculty
- Richard Klimoski, Associate Dean, Research
- Paige Wolf, Associate Dean, Graduate Programs
- Patrick Soleymani, Associate Dean, Undergraduate Programs
- Diane Vermaaten, Executive Director, Finance and Administration

College Code: BU

The mission of the School of Business is to prepare a diverse student body to succeed in a global business environment. Through the faculty’s creation and dissemination of business knowledge, practice, and pedagogy, we enable our students to develop analytical and communication skills and to practice ethical business behavior.

Business leaders and organizations are actively involved with the School of Business through executive education programs, speaker engagements, classroom lectures, case competitions, internships, and career placement. The School of Business also maintains close connections to the business community through its advisory board and advisory councils to academic programs. 220 business leaders representing 168 different companies serve as advisory board (including Friends of the Alumni Chapter Board) or council members.

The School of Business enrolls more than 4,000 undergraduate students and more than 550 graduate students in its programs.

The School of Business’s programs offer students a variety of opportunities to enhance their professional endeavors.

- Our innovative curriculum meets the demands of the marketplace, focused on business fundamentals, strategic thinking and teamwork.
- Our distinguished faculty are cross-disciplinary collaborators and innovative practitioners that are passionate about education. They bring both theoretical and applied expertise to the classroom.
- Our outstanding career management professionals are dedicated to providing tailored support to promote our students’ professional advancement and leverage their degree over the short- and long-term.
- Our diverse student population offers unique opportunities to network and learn from your fellow classmates. Students at Mason represent over 130 different countries and all 50 states.

Undergraduate

The programs in business education culminate in a BS degree with a concentration in one of five areas: accounting, finance, information systems and operations management, management, or marketing.

Graduate

The School of Business offers an MBA, Executive MBA in National Security, and MS degrees in Accounting, Management, Real Estate Development, Technology Management, and Management of Secure Information Systems.

Highly-qualified Mason Accounting majors may apply to the accelerated master’s degree program and obtain both Accounting, BS (p. 891) and Accounting, MS (p. 897) degrees after satisfactory completion of a total of 144 credits.
Graduate certificates are offered in Business Analytics, Business Fundamentals, Accounting Analytics, Government Accounting, Forensic Accounting, IT Strategy and Digital Transformation, Chief Information Officer, and Global IT Leadership.

For policies governing all accelerated degree programs, see AP6.7 Bachelor’s/Accelerated Master’s Degrees (p. 93).

Centers
The School of Business houses four centers. The Center for Innovation and Entrepreneurship provides experiential learning through academic programs as well as hands-on programs for Mason students interested in innovation, invention, early stage startups, and entrepreneurship. The Center for Real Estate Entrepreneurship focuses on real estate research and education in real estate development and finance. The Investor Protection & Corporate Fraud Research Center strives to provide thought leadership on investor protection and fraud risk by sponsoring, conducting, and disseminating research in these areas. The Center for Infrastructure Protection & Homeland Security conducts research, develops projects, and provides expert analysis and insight into policy across a variety of infrastructure sectors and related fields, including energy, transportation, cyber-security, defense and finance. The Center for Government Contracting has established the first-in-the-nation university center to address business, policy, regulatory and other issues in government contracting.

Faculty

Accounting

Marketing
Cheng, Harvey, Hopner, Joiner, Josephson, Kulick, Meamber, Mishra, Tretola, Vadakkepatt

Requirements & Policies

Policies

Academic Policies
Students should become familiar with the university’s general academic policies (p. 77) in addition to those specific to each academic unit.

E-mail
George Mason University uses only Mason e-mail accounts to communicate with enrolled students. Students should activate their Mason e-mail, use it to communicate with their school/department/program and other administrative units, and check it regularly for important information.

Study Elsewhere Policy
A student who has matriculated at Mason may transfer a limited number of hours (9 for undergraduates, 6 for graduates) of coursework in School of Business disciplines from another institution (not including registration through the Consortium of Universities of the Washington Metropolitan Area or coursework completed through the Center for Global Education). Students are permitted to take courses elsewhere under unusual circumstances—these circumstances do not include scheduling or commuting convenience, or financial (lower cost) reasons.

Special instructions for School of Business students: courses that are attempted at a two-year institution may not be used to fulfill upper-level requirements. Any course that a student wished to transfer to fulfill major or graduate-level course requirements in the School of Business must be attempted at an institution accredited by the Association to Advance Collegiate Schools of Business (AACSB).

For additional information, see AP1.4.2 Permission to Study Elsewhere (p. 79).

Undergraduate Internship Policy
The School of Business recognizes the importance of experiential education in both learning to apply theory to practice and positioning students for success in their careers. Because the School of Business is committed to supporting students’ professional success, the School requires that all student internships for credit be registered with the School of Business as one of the following: ACCT 492, BUS 492, FNAN 492 (https://catalog.gmu.edu/search/?scontext=courses&search=FNAN+492) , MGMT 492 (https://catalog.gmu.edu/search/?scontext=courses&search=MGMT+492), MIS 492 (https://catalog.gmu.edu/search/?scontext=courses&search=MIS+492), MKTG 492 (https://catalog.gmu.edu/search/?scontext=courses&search=MKTG+492), OSCM 492 or OM 492 (https://catalog.gmu.edu/search/?scontext=courses&search=OM+492). Students may enroll in a maximum of 6 credits for these courses. For students in catalog years Fall 2016 and beyond, one internship course may apply to the major, and a second internship course would apply as elective credit. For students in catalog years prior to Fall 2016, a maximum of 6 credits of internship may apply to general electives.

Termination from the Major
A grade of C or higher is required in each of the School of Business listed core courses. Students will not be permitted to make more than three attempts to achieve a C or higher in the following School of Business core courses: ACCT 303 Accounting for Decision Making or ACCT 330 Financial Accounting I, BULE 303 Legal Environment...

Once a student has attempted a School of Business Core or Accounting major course twice unsuccessfully, they must meet with an academic advisor in order to receive an override to register for the third attempt. Those who do not successfully complete these core courses within three attempts will be terminated from their major and will not be eligible to receive a degree from the School of Business. Students terminated from the School of Business are prohibited from enrolling in any School of Business course. Students terminated from the School of Business are permitted to declare the business minor only, and are not able to declare any other School of Business minors. Student are limited to three attempts at ACCT 330. Any student who is unable to achieve a C or higher in ACCT 330 on the third attempt will not be able to pursue a Major in Accounting or Finance. For more information about this, see AP 5.2.4 Termination from the Major (p. 88).

University Consortium
Students should review university policies regarding the University Consortium under Special Registration Procedures in the Academic Policies section of this catalog. Students who have attempted or failed a course at Mason are not permitted to take the equivalent course through the consortium under any circumstance. All consortium registration requests must be submitted to the dean's office at least 3 weeks prior to the first day of classes for the relevant semester at Mason.

Any consortium course that a student wishes to register for to fulfill major or graduate-level course requirements in the School of Business must be attempted at an institution accredited by the Association to Advance Collegiate Schools of Business (AACSB).

Non-Business School Student Credit Limitation
Enrolled undergraduate students who are not declared in a School of Business major are limited to 9 credits of upper-level business coursework within the School of Business. This policy applies to any student who is declared in another major or program at Mason. This policy does not apply to students who have declared a School of Business minor and are earning required credit toward that minor.

Undergraduate Course Overload Policy
The School of Business recommends that undergraduate students attempt no more than 18 credits in an academic semester and no more than 14 credits in a summer term. Students wishing to attempt more than 18 credits must submit a Permission to Overload form to their academic advisor.

To be eligible for a course overload, a student must fulfill all of the following criteria:
- At least a 3.0 cumulative GPA at Mason
- Have completed all courses successfully in his/her previous semester with no Fs or incompletes (IN)
- Complete the Permission to Overload form and obtain an academic advisor's signature

Freshmen and transfer students in their first semesters are not given permission for overloads as they have yet to establish an academic record at George Mason University.

If approved for an overload, the student is responsible for adding the additional class(es) and paying for the related tuition by the official university deadlines.

Transfer Credit Expiration Policy
Transfer credit is not awarded for any business (management, marketing, finance, accounting, management information systems, operations management, foundations, core, or any other School of Business course), courses completed more than ten years prior to Mason enrollment. This includes any older courses completed at RBC or the VCCS.

Appeals Process
The School of Business strives to maintain policies and procedures that are consistent with those of the University, as well as in the best interest of our students. If you have any questions concerning a particular policy or procedure, contact the Office of Student Success & Academic Services, Room 008 of Enterprise Hall (703-993-1880) or visit the website (http://business.gmu.edu).

Courses Excluded from any School of Business BS Degree
Transfer credit is not awarded for any School of Business courses completed more than ten years prior to Mason enrollment.

#### Administration

- JK Aier, Chair, Accounting Area and Director, Investor Protection & Corporate Fraud Research Center

The Bachelor of Science in Accounting prepares students for professional careers in the private and public sectors. The accounting major is designed to produce accounting professionals who can both generate and apply financial information to solve business problems. Our students learn principles of business and accounting as well as the specific skills and specialized technical knowledge necessary for success in the dynamic field of accounting. Our program emphasizes ethics, critical thinking, written and verbal communication, and effective use and understanding of technology. Our graduates are employed by the assurance, tax advisory, and consulting groups of the top accounting firms as well as Fortune 100 companies. Our proximity to the nation’s capital provides unique opportunities for our graduates to work in government and in the federal practices of public accounting firms. The accounting degree program is separately accredited by AACSB International.

Students interested in CPA certification can apply to the Master of Science in Accounting (p. 897) degree to meet the 150 hour requirement for CPA certification in most states. The MSA (p. 897) allows students to meet the 150 hour requirement for CPA certification in most states in only nine months.

Students should become familiar with the university's general academic policies (p. 77) in addition to those specific to each academic unit.

E-mail

George Mason University uses only Mason e-mail accounts to communicate with enrolled students. Students should activate their Mason e-mail, use it to communicate with their school/department/program and other administrative units, and check it regularly for important information.

Study Elsewhere Policy

A student who has matriculated at Mason may transfer a limited number of hours (9 for undergraduates, 6 for graduates) of coursework in School of Business disciplines from another institution (not including registration through the Consortium of Universities of the Washington Metropolitan Area or coursework completed through the Center for Global Education). Students are permitted to take courses elsewhere under unusual circumstances—these circumstances do not include scheduling or commuting convenience, or financial (lower cost) reasons.

Special instructions for School of Business students: courses that are attempted at a two-year institution may not be used to fulfill upper-level requirements. Any course that a student wished to transfer to fulfill major or graduate-level course requirements in the School of Business must be attempted at an institution accredited by the Association to Advance Collegiate Schools of Business (AACSB).

For additional information, see AP1.4.2 Permission to Study Elsewhere (p. 79).

Undergraduate Internship Policy

The School of Business recognizes the importance of experiential education in both learning to apply theory to practice and positioning students for success in their careers. Because the School of Business is committed to supporting students' professional success, the School requires that all student internships for credit be registered with the School of Business as one of the following: ACCT 492, BUS 492, FNAN 492 (https://catalog.gmu.edu/search/?scontext=courses&search=FNAN+492), MGMT 492 (https://catalog.gmu.edu/search/?scontext=courses&search=MGMT+492), MIS 492 (https://catalog.gmu.edu/search/?scontext=courses&search=MIS+492), MKTG 492 (https://catalog.gmu.edu/search/?scontext=courses&search=MKTG+492), OSCM 492 or OM 492 (https://catalog.gmu.edu/search/?scontext=courses&search=OM+492). Students may enroll in a maximum of 6 credits for these courses. For students in catalog years Fall 2016 and beyond, one internship course may apply to the major, and a second internship course would apply as elective credit. For students in catalog years prior to Fall 2016, a maximum of 6 credits of internship may apply to general electives.

Termination from the Major

A grade of C or higher is required in each of the School of Business listed core courses. Students will not be permitted to make more than three attempts to achieve a C or higher in the following School of Business core courses: ACCT 330 Accounting for Decision Making or ACCT 330 Financial Accounting I, BULE 303 Legal Environment of Business, BUS 303 Develop Professional Skills II: Advanced Elements, FNAN 303 Financial Management, MGMT 303 Principles of Management, MIS 303 Introduction to Business Information Systems (Mason Core) (p. 142), MKTG 303 Principles of Marketing OM 303 Operations Management and OSCM 303 Operations Management. Once a student has attempted a School of Business Core or Accounting major course twice unsuccessfully, they must meet with an academic advisor in order to receive an override to register for the third attempt. Those who do not successfully complete these core courses within three attempts will be terminated from their major and will not be eligible to receive a degree from the School of Business. Students terminated from the School of Business are prohibited from enrolling in any School of Business course. Students terminated from the School of Business are permitted to declare the business minor only, and are not able to declare any other School of Business minors. Student are limited to three attempts at ACCT 330. Any student who is unable to achieve a C or higher in ACCT 330 on the third attempt will not be able to pursue a Major in Accounting or Finance. For more information about this, see AP5.2.4 Termination from the Major (p. 88).

University Consortium

Students should review university policies regarding the University Consortium under Special Registration Procedures in the Academic Policies section of this catalog. Students who have attempted or failed a course at Mason are not permitted to take the equivalent course through the consortium under any circumstance. All consortium registration requests must be submitted to the dean's office at least 3 weeks prior to the first day of classes for the relevant semester at Mason.

Any consortium course that a student wishes to register for to fulfill major or graduate-level course requirements in the School of Business must be attempted at an institution accredited by the Association to Advance Collegiate Schools of Business (AACSB).

Non-Business School Student Credit Limitation

Enrolled undergraduate students who are not declared in a School of Business major are limited to 9 credits of upper-level business coursework within the School of Business. This policy applies to any student who is declared in another major or program at Mason. This policy does not apply to students who have declared a School of Business minor and are earning required credit toward that minor.

Undergraduate Course Overload Policy

The School of Business recommends that undergraduate students attempt no more than 18 credits in an academic semester and no more than 14 credits in a summer term. Students wishing to attempt more than 18 credits must submit a Permission to Overload form to their academic advisor.

To be eligible for a course overload, a student must fulfill all of the following criteria:

- At least a 3.0 cumulative GPA at Mason
- Have completed all courses successfully in his/her previous semester with no Fs or incompletes (IN)
- Complete the Permission to Overload form and obtain an academic advisor's signature

Freshmen and transfer students in their first semesters are not given permission for overloads as they have yet to establish an academic record at George Mason University.
If approved for an overload, the student is responsible for adding the additional class(es) and paying for the related tuition by the official university deadlines.

**Transfer Credit Expiration Policy**

Transfer credit is not awarded for any business (management, marketing, finance, accounting, management information systems, operations management, foundations, core, or any other School of Business course), courses completed more than ten years prior to Mason enrollment. This includes any older courses completed at RBC or the VCCS.

**Appeals Process**

The School of Business strives to maintain policies and procedures that are consistent with those of the University, as well as in the best interest of our students. If you have any questions concerning a particular policy or procedure, contact the Office of Student Success & Academic Services, Room 008 of Enterprise Hall (703-993-1880) or visit the website (http://business.gmu.edu).

**Courses Excluded from any School of Business BS Degree**

Transfer credit is not awarded for any School of Business courses completed more than ten years prior to Mason enrollment.

**Requirements**

**Degree Requirements**

Total credits: 120

School of Business students pursuing a BS degree must complete a minimum of 120 credits, including the Mason Core requirements, business foundations, business core and major requirements. In addition, the following requirements must be met:

- A minimum of 45 credits at the 300- or 400-level.
- A minimum of 30 credits of School of Business core and major courses at Mason.
- At least 9 credits required for the specific major and BUS 498 Capstone Course: Advanced Business Models (Mason Core) (p. 142) taken at Mason.
A grade of C or higher earned in the business foundations, business core and major requirements.

Students should carefully examine prerequisites for School of Business courses. Students may be removed from a course if they enroll without having fulfilled the prerequisites.

Mason Core Requirements

Some Mason Core requirements may already be fulfilled by the major requirements listed below. Students are strongly encouraged to consult their advisors to ensure they fulfill all remaining Mason Core requirements.

¹ The School of Business natural science requirement must be fulfilled by completing two 4-credit laboratory sciences.
² School of Business students required to complete 8 credits of natural science by completing two 4-credit laboratory sciences.

Business Core

A grade of C or higher is required in each of the School of Business core courses listed below. Students will not be permitted to make more than three attempts to achieve a C or higher in the following School of Business core courses: ACCT 303 Accounting for Decision Making or ACCT 330 Financial Accounting I, BULE 303 Legal Environment of Business, BUS 303 Develop Professional Skills II: Advanced Elements, FNAN 303 Financial Management, MGMT 303 Principles of Management, MIS 303 Introduction to Business Information Systems (Mason Core) (p. 142), MKTG 303 Principles of Marketing and OM 303 Operations Management (also OSCM 303 Operations Management). Those who do not successfully complete these core courses within three attempts will be terminated from their major and will not be eligible to receive a degree from the School of Business. Students terminated from the School of Business are prohibited from enrolling in any School of Business course. Students terminated from the School of Business are permitted to declare a business minor. For more information about this, see AP.5.2.4 Termination from the Major (p. 88).

Total Credits 21

1 A grade of C or higher is required in each of the upper-level accounting major courses listed below. Students will not be permitted to make more than three attempts to achieve a C or higher in the following required Accounting courses: ACCT 311 Managerial and Cost Accounting, ACCT 331 Financial Accounting II, ACCT 332 Financial Accounting III, ACCT 351 Taxation and Managerial Decision Making, ACCT 361 Accounting Analytics, and ACCT 461 Assurance and Audit Services. Those who do not successfully complete these required courses within three attempts will not be eligible to receive a degree in Accounting from the School of Business. Students terminated from the BS Accounting program are prohibited from enrolling in any Accounting course.

2 Students who anticipate taking the CPA, CMA, CIA, or other professional exam should consult the applicable regulations and meet with their advisor. State regulations regarding professional examinations may dictate course selections.

3 Students in the MSAccel program and select high performing undergraduates may take graduate courses for undergraduate credit. Enrollment in a graduate level course is not guaranteed. Please contact an academic advisor for additional information.

**Capstone**
Students must successfully complete all Business Core courses to be eligible to enroll in BUS 498 Capstone Course: Advanced Business Models (Mason Core) (p. 142).

---

**Advanced Accelerated Accounting Pathway**
The A++ program is designed for incoming freshman who have credit for MATH 108, ECON 103, and ENGH 101 prior to starting at Mason. This is an advanced pathway for high performing accounting majors interested in completing their Bachelor’s and Master’s in Accounting in four years. Students interested in this pathway should discuss requirements with a School of Business academic advisor.

**Second Majors in Accounting**
Students declaring a second major in Accounting must complete the 18 required courses for the major in addition to ACCT 330 Financial Accounting I.

**Second Major Requirements**

**Honors in the Major**
The School of Business Accounting Honors Program provides highly motivated students majoring in accounting with an enriched academic experience integrating curricular, co-curricular and extra-curricular development. Admission to the Honors Program is by invitation only. Students who have been found responsible for an Honor Code violation are not eligible for the program.

**Admission Requirements**

- Minimum 3.0 cumulative GPA and 3.5 GPA in ACCT major.
- Must have a B or higher in each upper level accounting course.
- Two academic/professional references.
- Once admitted to the program, students with a cumulative GPA below 3.0 will be dropped from the program.

**Curricular Requirements**

- ACCT 330 Financial Accounting I with an A- or better.
Honors students must graduate with a 3.0 cumulative GPA and 3.5 GPA in the major.

Co-Curricular Requirements
The student must complete ONE of the following in addition to the curriculum requirements:

- ACCT 462 Honors Seminar in Accounting or a 600-level ACCT course.
- Study abroad (e.g., Aachen Dual Degree, Oxford Honors, China, South America).
- Internship (ACCT 492 Internship in Accounting) Internships where no credit is earned also qualify.
- Significant work experience (e.g., an experience that is comparable to an internship).
- Research paper/Thesis as an independent study (ACCT 499 Independent Study) course. (e.g., faculty research, Mason undergraduate apprentice program, QEP).

Extra-Curricular Requirements
- Attendance at Honors Events, as determined by the Honors Program Director.
- The student must show a high degree of engagement in a School of Business student organization, preferably in a leadership role.

Requirements for Students to Obtain the Honors Designation
- Honors students must meet all curricular, co-curricular, and extracurricular requirements mentioned above at graduation.

Accelerated Master’s

Accounting, BS/Accounting, Accelerated MS
Overview
Highly-qualified Mason Accounting majors may apply to the accelerated master’s degree program and obtain both Accounting, BS (p. 891) and Accounting, MS (p. 897) degrees after satisfactory completion of a total of 144 credits. Graduates will be exceptionally well-prepared for professional school or a PhD program in accounting or a related discipline.

In the accelerated program, six credits of ACCT 600-level courses can be used to meet both bachelor’s and master’s degree requirements. These six credits will replace six credits of general electives in the student’s undergraduate program. Students in the Accelerated MSA program may take any 600-level courses while an undergraduate.

For policies governing all accelerated degree programs, see AP.6 Graduate Policies (p. 90).

On completion and conferral of the undergraduate degree in the semester indicated in the application, the student submits the Bachelor’s/Accelerated Master’s Transition Form and is admitted to graduate standing. As graduate students, accelerated master’s students have an advanced standing. They must meet all master’s degree requirements except for the two courses (6 credits) they completed as undergraduates. Students must begin their master’s program the semester immediately following conferral of the undergraduate degree.

Reserve Graduate Credit
Students may take up to 6 additional graduate credits as reserve graduate credit. These credits do not apply to the undergraduate degree. The ability to take courses for reserve graduate credit is available to all high achieving undergraduates with the permission of the program director. Permission to take a graduate course for reserve graduate credit is normally granted only to Mason seniors within 15 hours of graduation. To apply these credits to the master’s degree, students must request that the credits be moved from the undergraduate degree to the graduate degree using the Bachelor’s/Accelerated Master’s Transition Form.

Accounting Undergraduate Certificate
Banner Code: BU-CERB-ACCT

Academic Advising
Phone: 703-993-1880
Email: masonbus@gmu.edu

This program provides an opportunity for nondegree-seeking students to earn the academic credit necessary to sit for the Uniform CPA Examination in Virginia.

This undergraduate certificate may be pursued on a part-time basis. Maintaining full-time status is not guaranteed. Students have four years to complete the certificate.

This certificate program qualifies for Title IV Federal Financial Aid. For more information about program graduation rates, the median debt of students who completed the program, and other important information, please visit our disclosure page. (https://irr2.gmu.edu/gedt/Accounting/Gedt.html)
Admissions & Policies

Admissions

The requirement for enrollment is a bachelor’s degree or higher from an accredited college or university.

Policies

Certificate Completion

Students are required to complete a minimum of 30 credits of accounting courses. At least 16 required credits must be taken at Mason after acceptance to the certificate program. Students have four years to complete certificate requirements. Students who are given permission to re-enroll following an absence from Mason may not count the four-year time limit as beginning on the date of re-enrollment.

Successful completion of the certificate program requires a grade of C or better in accounting courses and a GPA of at least 2.00 in all courses. Students are only permitted three attempts to pass each course with a C or better; following a third unsuccessful attempt the student will no longer be able pursue the certificate program.

Virginia Uniform CPA Examination

All students who wish to sit for the Uniform CPA Examination in Virginia are required to have completed 150 college-level credits, including at least 30 credits of accounting with courses in financial accounting, auditing, taxation, and management accounting; and at least 24 credits of non-accounting business courses.

Requirements

Certificate Requirements

Total credits: 30

This certificate may be pursued on a part-time basis only.

Administration

- Robert Broshears, Director, MSA Program

The MSA is designed to meet the needs of new professionals entering the accounting profession. The program allows students to earn a state-of-the-art graduate degree in accounting. When combined with a Bachelor’s degree in Accounting, the MSA meets requirements to take the Uniform CPA Examination in Virginia and in most other states. The program integrates fundamental business skills and specialized knowledge and acumen required by the accounting profession. The MSA program is pursued as a face to face or an online option.

Admissions & Policies

Admissions

Admission and Eligibility Requirements

All students registering for School of Business graduate courses must have graduate standing. Nondegree student status is not available. To be eligible for our MS in Accounting (the full-time, part-time and accelerated accounting programs), you must have a bachelor’s degree in accounting
or equivalent from an accredited institution or have completed 27 college credits in accounting.

Applicants who have a business degree, but do not have an accounting degree or equivalent will be provisionally admitted until they have completed the following courses or equivalents with a grade of B- or better:

- ACCT 531 Foundations of Financial Reporting I
- ACCT 532 Foundations of Financial Reporting II
- ACCT 551 Foundations of Taxation of Business Entities
- ACCT 561 Foundations of Assurance Services

The prerequisites are currently only available in-person, not online. Online students with business degree backgrounds are eligible to take these prerequisite courses in-person if admitted provisionally to the MS in Accounting program.

Applicants who do not have an accounting degree or business degree will be provisionally admitted until they have completed the following courses or equivalents with a grade of B- or better:

- ACCT 330 Financial Accounting I
- ACCT 331 Financial Accounting II
- ACCT 332 Financial Accounting III
- ACCT 531 Foundations of Financial Reporting I
- ACCT 532 Foundations of Financial Reporting II
- ACCT 551 Foundations of Taxation of Business Entities
- ACCT 561 Foundations of Assurance Services

The prerequisites are currently only available in-person, not online. Online students with business degree backgrounds are eligible to take these prerequisite courses in-person if admitted provisionally to the MS in Accounting program.

International students with accounting degrees that lack a course in U.S. tax will be required to take ACCT 351 prior to matriculation.

Full admission requirements can be viewed at the school's website. (http://business.gmu.edu/masters-in-accounting/admissions/requirements)

**Policies**

For policies governing all graduate degrees, see AP.6 Graduate Policies (p. 90).

**Electives**

Select 15 credits of electives from any 600- or 700-level ACCT course (p. 1201)

Total Credits 15

1. Electives cannot duplicate coursework taken as an undergraduate

**Accelerated Master’s**

**Accounting, BS/Accounting, Accelerated MS**

**Overview**

Highly-qualified Mason Accounting majors may apply to the accelerated master’s degree program and obtain both Accounting, BS (p. 891) and Accounting, MS (p. 897) degrees after satisfactory completion of a total of 144 credits. Graduates will be exceptionally well-prepared for professional school or a PhD program in accounting or a related discipline.

In the accelerated program, six credits of ACCT 600-level courses can be used to meet both bachelor’s and master’s degree requirements. These six credits will replace six credits of general electives in the student’s undergraduate program. Students in the Accelerated MSA program may take any 600-level courses while an undergraduate.

For policies governing all accelerated degree programs, see AP.6.7 Bachelor’s/Accelerated Master’s Degrees (p. 93).

**Application Requirements**

Applicants to accelerated master’s programs must have completed at least 75 credits that apply to their undergraduate degree (with at least 24 credits earned at Mason).

Students submit an application online through the Office of Graduate Admissions.

Admission requirements are as follows:

1. A minimum GPA of 3.00 in at least three accounting courses (e.g. ACCT 330 Financial Accounting I, ACCT 331 Financial Accounting II and ACCT 332 Financial Accounting III) with no grade less than a B- in those accounting courses.

2. Review and approval by the MSA program director.

GMAT is not required.

Interested students should contact the MSA program office for more details about the application process.

1. Excluding ACCT 203 Survey of Accounting

**Accelerated Option Requirements**

Students in an accelerated degree program must fulfill all university requirements for the master’s degree. For policies governing all graduate degrees, see AP6 Graduate Policies (p. 90).

On completion and conferral of the undergraduate degree in the semester indicated in the application, the student submits the Bachelor’s/ Accelerated Master’s Transition Form and is admitted to graduate
standing. As graduate students, accelerated master’s students have an advanced standing. They must meet all master’s degree requirements except for the two courses (6 credits) they completed as undergraduates. Students must begin their master’s program the semester immediately following conferral of the undergraduate degree.

Reserve Graduate Credit
Students may take up to 6 additional graduate credits as reserve graduate credit. These credits do not apply to the undergraduate degree. The ability to take courses for reserve graduate credit is available to all high achieving undergraduates with the permission of the program director. Permission to take a graduate course for reserve graduate credit is normally granted only to Mason seniors within 15 hours of graduation. To apply these credits to the master’s degree, students must request that the credits be moved from the undergraduate degree to the graduate degree using the Bachelor’s/Accelerated Master’s Transition Form.

Business Administration, MBA

Banner Code: BU-MBA-BUAD

Graduate Program Office

Administration
• Pallab Sanyal, Director, MBA Program

This degree prepares the next generation of world leaders through a rigorous, stimulating business and management curriculum based on a global perspective, industry demand and leadership.

The MBA core curriculum effectively integrates functional areas with the use of IT, oral and written communication, and teamwork. The MBA program requires 48 credits: 30 credits of core course, 3 credits of Global coursework and 15 credits of elective courses. The MBA program operates on an 8 week module structure and can be pursued either as a face to face or an online format.

JD/MBA Dual Degree Students can apply 15 credits of Law Elective coursework toward the MBA Elective degree requirement. See the Antonin Scalia Law School (http://www.law.gmu.edu/academics/degrees) for more details.

Admissions & Policies

Admissions

Admissions and Eligibility Requirements
• All students registering for School of Business graduate courses must have graduate standing. Non-degree student status is not available.
• An earned baccalaureate degree from a regionally-accredited institution of higher education, or international equivalent, verified from official transcripts.
• A minimum of two years of full-time, post-baccalaureate professional employment.
• One college-level calculus course prior to enrolling (recommended but not required).

Full admission requirements can be viewed are available on the program website (http://business.gmu.edu/mba-programs/admissions).

Policies

For policies governing all graduate degrees, see AP6 Graduate Policies (p. 90).

Requirements

Business Analytics Graduate Certificate

Banner Code: BU-CERG-BUSA

Graduate Program Office
Phone: 703-993-8006
Email: sbusgrad@gmu.edu

Administration

Pallab Sanyal, Director, MBA Program

The Business Analytics Graduate Certificate will help analysts and professionals from diverse domains to effectively analyze data through the hands-on use of decision modeling and other techniques using popular software tools. The program covers a wide array of methodologies and techniques — from data collection, organization, reporting and mining to extraction of useful and actionable information for decision makers.

This certificate may be completed on a part-time or full-time basis.

Non-MBA students enroll in GBUS courses while MBA students enroll in MBA courses.

This certificate qualifies for Title IV Federal Financial Aid. For more information about program graduation rates, the median debt of students who completed the program, and other important information, please visit our disclosure page (https://irr2.gmu.edu/gedt/Business_Analytics/Gedt.html).

Admissions & Policies

Admissions

Eligibility Requirements
All students registering for School of Business graduate courses must have graduate standing. Non-degree student status is not available.

Full eligibility and admission requirements can be viewed on the program website (http://business.gmu.edu/mba-programs/analytics).

Policies
Students may use the credits completed as part of their graduate degree requirements in accordance with program requirements and AP6 Graduate Policies (p. 90). A maximum of 3 graduate credits taken at another institution can be transferred to the graduate certificate. The time limit for completion is four years from the date of admission to the graduate certificate. Students must have a minimum GPA of 3.00 to complete the certificate.

Business Analytics Minor

Banner Code: ABUS

Academic Advising
Phone: 703-993-1880
Email: masonbus@gmu.edu

Administration

David Gallay, Director of Minor Programs

The amount of data flowing from, to, and through enterprises of all sorts is enormous, and growing rapidly—more rapidly than the capabilities of organizations to use it. Successful enterprises are those that make effective use of the abundance of data to which they have access: to make better predictions, better decisions, and form better strategies. Business analytics—which encompasses a variety of techniques to extract useful information from different sources of data—is being embraced at an increasing rate by organizations that need to gain actionable and forward-looking insight from their data. This minor in business analytics will provide students with the cutting-edge knowledge and skills they need to use and gather data to identify, understand, and deliver insights that internal and external clients find vital to organizational success.
At least eight credits of the minor courses must be unique to the Business Analytics Minor and not applied toward any other major, minor, or concentration. Students must achieve a grade of C or better in each course that is applied toward the minor. For policies governing all minors, see AP.5.3.4 Minors (p. 90).

### Business, BS

Banner Code: BU-BS-BUS

#### Academic Advising

Phone: 703-993-1880
Email: masonbus@gmu.edu

The School of Business is ranked in the top 10 percent of the nation's undergraduate business schools and offers a bachelor of science in business with innovative concentrations. The School of Business also offers several options for a minor for business and non-business majors, as well as an undergraduate certificate program in accounting. The School of Business programs are designed to prepare graduates for work in a rapidly changing and competitive marketplace with local, regional, and global companies. With Mason's location in Northern Virginia and proximity to Washington, D.C., combined with the assistance of the School of Business's own Career Services staff and Student Success and Academic Services staff, students are also afforded exceptional opportunities to gain practical experience and global engagement opportunities to complement their academic course work. Students admitted spring 2020 and later will graduate with a Bachelor of Science in Business degree.

### Admissions & Policies

#### Policies

**Academic Policies**

Students should become familiar with the university's general academic policies in addition to those specific to each academic unit.

**Email**

George Mason University uses only Mason e-mail accounts to communicate with enrolled students. Students should activate their Mason e-mail, use it to communicate with their school, department, program, and other administrative units, and should check it regularly for important information.

**Study Elsewhere Policy**

A student who has matriculated at Mason may transfer a limited number of hours (9 for undergraduates, 6 for graduates) of coursework in School of Business disciplines from another institution (not including registration through the Consortium of Universities of the Washington Metropolitan Area or coursework completed through the Center for Global Education). Students are permitted to take courses elsewhere under unusual circumstances - these circumstances do not include scheduling or commuting convenience, or financial (lower cost) reasons.

Special instructions for School of Business students: courses that are attempted at a two-year institution may not be used to fulfill upper-level requirements. Any course that a student wished to transfer to fulfill major or graduate-level course requirements in the School of Business must be attempted at an institution accredited by the Association to Advance Collegiate Schools of Business (AACSB).

For additional information, see AP.1.4.2 Permission to Study Elsewhere (p. 79).

**Undergraduate Internship Policy**

The School of Business recognizes the importance of experiential education in both learning to apply theory to practice and positioning students for success in their careers. Because the School of Business is committed to supporting students' professional success, the School requires that all student internships for credit be registered with the School of Business as either ACCT 492 Internship in Accounting, BUS 492 Internship in Business, FNAN 492 Internship in Finance, MGMT 492 Internship in Management, MIS 492 Internship in Management Information Systems, MKTG 492 Internship in Marketing, and OSCM 492 Internship in Operations and Supply Chain Management.

Students may enroll in a maximum of 6 credits for these courses. For students in catalog years Fall 2016 and beyond, one internship course may apply to the concentration, and a second internship course would apply as a general elective credit. For students in catalog years prior to
Fall 2016, a maximum of 6 credits of internship may apply to general electives.

**Termination Policy**

A grade of C or higher is required in each of the School of Business listed core courses. Students will not be permitted to make more than three attempts to achieve a C or higher in the following School of Business core courses: ACCT 303 Accounting for Decision Making, BULE 303 Legal Environment of Business, BUS 303 Developmental Skills II: Advanced Elements, FNAN 303 Financial Management, MGMT 303 Principles of Management, MIS 303 Introduction to Business Information Systems (Mason Core) (p. 142), MKTG 303 Principles of Marketing, and OSCM 303 Operations Management.

Once a student has attempted a School of Business Core or Accounting concentration course twice unsuccessfully, they must meet with an academic advisor in order to receive an override to register for the third attempt. Those who do not successfully complete these core courses within three attempts will be terminated from the School of Business and will not be eligible to receive a degree from the School of Business. Students terminated from the School of Business are prohibited from enrolling in any School of Business course. Students are limited to three attempts at ACCT 330. Any student who is unable to achieve a C or higher in ACCT 330 on the third attempt will not be able to pursue a concentration in Accounting or Finance.

Students terminated from the School of Business are permitted to declare the business minor only, and are not able to declare any other School of Business minors. For more information about this, see AP 5.2.4 Termination from the Major (p. 88). The School of Business Termination Policy is separate from the University Repeat Policy AP 1.3.4. (p. 77)

**University Consortium**

Students should review university policies regarding the University Consortium under Special Registration Procedures in the Academic Policies section of this catalog. Students who have attempted or failed a course at Mason are not permitted to take the equivalent course through the consortium under any circumstance. All consortium registration requests must be submitted to the dean’s office at least 3 weeks prior to the first day of classes for the relevant semester at Mason.

Any consortium course that a student wishes to register for to fulfill major or graduate-level course requirements in the School of Business must be attempted at an institution accredited by the Association to Advance Collegiate Schools of Business (AACSB).

**Non-Business School Student Credit Limitation**

Enrolled undergraduate students who are not declared in the School of Business are limited to 9 credits of upper-level business coursework within the School of Business. This policy applies to any student who is declared in another major or program at Mason. This policy does not apply to students who have declared a School of Business minor and are earning required credit toward that minor. This policy does not apply to students who have been terminated from the School of Business. Terminated students are prohibited from taking business courses.

**Undergraduate Course Overload Policy**

The School of Business recommends that undergraduate students attempt no more than 18 credits in an academic semester and no more than 14 credits in a summer term. Students wishing to attempt more than 18 credits must submit a Permission to Overload from to their academic advisor.

To be eligible for a course overload, a student must fulfill all of the following criteria:

- At least a 3.0 cumulative GPA at Mason
- Have completed all courses successfully in their previous semester with no F or incomplete (IN) grades
- Complete the Permission to Overload form and obtain an academic advisor’s signature

Freshmen and transfer students in their first semesters are not given permission for overloads as they have yet to establish an academic record at George Mason University.

If approved for an overload, the student is responsible for adding the additional class(es) and paying for the related tuition by the official university deadlines.

**Transfer Credit Expiration Policy**

Transfer credit is not awarded for any business (management, marketing, finance, accounting, management information systems, operations and supply chain management, foundations, core, or any other School of Business course) courses completed more than ten years prior to Mason enrollment. This includes any older courses completed at RBC or the VCCS.

**Appeals Process**

The School of Business strives to maintain policies and procedures that are consistent with those of the University, as well as in the best interest of our students. If you have any questions concerning a particular policy or procedure, contact the Office of Student Success & Academic Services, Room 008 of Enterprise Hall (703-993-1880) or visit the website (https://www.business.gmu.edu).

**Business Core**

A grade of C or higher is required in each of the School of Business core courses listed below. Students will not be permitted to make more than three attempts to achieve a C or higher in the following School of Business core courses: ACCT 303 Accounting for Decision Making, BULE 303 Legal Environment of Business BUS 303 Develop Professional Skills II: Advanced Elements, FNAN 303 Financial Management, MGMT 303 Principles of Management, MIS 303 Introduction to Business Information Systems (Mason Core) (p. 142), MKTG 303 Principles of Marketing, OM 303 Operations Management, and OSCM 303 Operations Management. Those who do not successfully complete these core courses within three attempts will be terminated from the School of Business and will not be eligible to receive a degree from the School of Business. Students terminated from the School of Business are prohibited from enrolling in any School of Business course. Students terminated from the School of Business are permitted to declare a business minor. For more information about this, see AP.5.2.4 Termination from the Major (https://catalog.gmu.edu/policies/academic/undergraduate-policies/#ap-5-2-4).

**Capstone**

Students must successfully complete all Business Core courses and BUS 310 Business Analytics II to be eligible to enroll in BUS 498 Capstone Course: Advanced Business Models (Mason Core) (p. 142).

**Concentration in Accounting (ACCT)**

The concentration in Accounting prepares students for professional careers in the private and public sectors. The accounting concentration is designed to produce accounting professionals who can both generate and apply financial information to solve business problems. Our students learn principles of business and accounting as well as the specific skills and specialized technical knowledge necessary for success in the dynamic field of accounting. Our program emphasizes ethics, critical thinking, written and verbal communication, and effective use and understanding of technology. Our graduates are employed by the assurance, tax advisory, and consulting groups of the top accounting firms as well as Fortune 100 companies. Our proximity to the nation’s capital provides unique opportunities for our graduates to work in government and in the federal practices of public accounting firms. The accounting concentration program is separately accredited by AACSB International. Students interested in CPA certification can apply to the MSA (https://catalog.gmu.edu/colleges-schools/business/business-accounting-ms) degree to meet the 150 hour requirement for CPA certification in most states. The MSA (https://catalog.gmu.edu/colleges-schools/business/business-accounting-ms) allows students to meet the 150 hour requirement for CPA certification in most states in only nine months.

Also available for eligible students, the Accelerated Advanced Accounting Pathway (A++) is a pathway that provides the ability to complete a bachelor and master's degree in accounting in four years. For more information, please meet with an academic advisor in the School of Business.

A grade of C or higher is required in each of the upper-level accounting concentration courses listed below. Students will not be permitted to make more than three attempts to achieve a C or higher in the following required accounting courses: ACCT 311 Managerial and Cost Accounting, ACCT 331 Financial Accounting II, ACCT 332 Financial Accounting III, ACCT 351 Taxation and Managerial Decision Making, ACCT 361 Accounting Analytics, and ACCT 461 Assurance and Audit Services. Those who do not successfully complete these required courses within three attempts will not be eligible for the concentration in Accounting. Students terminated from the Accounting concentration are prohibited from enrolling in any accounting course.

Students who anticipate taking the CPA, CMA, CIA or other professional exam should consult the applicable regulations and meet with their advisor. State regulations regarding professional examinations may dictate course selections.

Students in the Accelerated Master's program and select high performing undergraduates may take graduate courses for undergraduate credit. Enrollment in a graduate level course is not guaranteed. Please contact an academic advisor for additional information.

**Second Concentration in Accounting**

Students declaring a second concentration in Accounting must complete the 18 required credits (listed below) in addition to ACCT 330 Financial Accounting I.

**Concentration in Business Analytics (BUSA)**

Business analytics encompasses a wide array of methodologies and techniques, from collection, organization, reporting and mining of data to extraction of useful and actionable information for the decision makers. As the field matures, more organizations are turning to business analytics as part of their core function to assist decision making and strategy development. Business analytics is grounded in an understanding of business and uses knowledge and skills related to analytic tools to identify business questions that can be answered by data, identify appropriate data to answer the questions, evaluate the quality of the data, analyze the data, form conclusions, and meaningfully communicate those conclusions to relevant parties. Business analysts will work in practice with data scientists with backgrounds in engineering, math, or computer science whose expertise in data analytics is centered on data architecture or developing data analysis tools.

**Concentration in Finance (FNAN)**

The concentration in Finance prepares students for professional careers by providing a solid foundation in the principles necessary to make operating decisions for an organization and in financial market analysis. We educate our finance students to understand, evaluate, and manage risk. In addition, students learn to conduct and effectively present financial analysis and research valuing complex projects, assets, securities, and firms. Students in the finance concentration explore the relationships among investors, firms, financial institutions, markets, and regulators. Students with a concentration in Finance have a unique opportunity to compete globally, as well as regionally, for unique and diverse job opportunities, including government (U.S. Treasury and the Board of Governors), large financial corporations (Fannie Mae and Freddie Mac), international organizations (World Bank and IMF), and other careers related to Finance.

Students declaring a second concentration in Finance must complete the four required courses and two elective courses for the concentration.

### Concentration in Financial Planning (FNPL)

Consumers increasingly seek professional advice on managing their finances from professionals with wide-ranging knowledge from taxes and estate planning to insurance and retirement planning to portfolio management. In a recent article title, Forbes described Financial Planning as “One of the Fastest Growing Careers” and noted that the field “is in Desperate Need of Young Talent.” The article went on to explain that the field is expected to grow at a 32% rate over the next decade according to the Bureau of Labor Statistics while the average growth rate for all occupations is 14%.” (Touyralis, 2012). The field of financial planning includes several certifications including the Certified Financial Planner certification (CFP) through the CFP Board and Personal Financial Specialist (PFS) certification through the AICPA. The national CFP Board and regional FPA leadership have reached out to Mason to work with us to develop a CFP-registered program in Financial Planning due to the significant need in our region for graduates with this specialization.

1. Completion of FNAN 303 with a grade of B- or higher is a required prerequisite for FNAN 311, FNAN 321, FNAN 341, FNAN 401 and FNAN 440.

2. With the exception of FNAN 300 and FNAN 303.

### Concentration in Management (MGMT)

The concentration in Management prepares students to take leadership, management, and entrepreneurial roles in the public and private sectors. Students learn such skills as strategic thinking, motivating and managing nationally and internationally diverse work forces, building and leading team efforts, negotiating successfully, and instituting planned change in organizations.

Students with a concentration in management may focus their careers in several areas. In selecting five elective courses, students may want to consider a likely career path. Recommended courses for three possible careers are provided below.

### Human Resources Management
- MGMT 421: Advanced Human Resource Management (3 credits)
- MGMT 431: The Legal Environment for Employee and Labor Relations (3 credits)

### Management Consulting
- MGMT 412: Diversity in Organizations (3 credits)
- MGMT 463: Negotiations in Organizations (3 credits)
- MGMT 464: Teamwork and Interpersonal Skills (3 credits)

### Entrepreneurship
- MGMT 451: Introduction to Entrepreneurship (3 credits)
- MGMT 452: Experiential Entrepreneurship (3 credits)
- MGMT 454: Social Impact and Entrepreneurship (3 credits)

### Second concentration in Management
Students declaring a second concentration in Management must complete the two required courses and four elective courses for the concentration.

### Concentration in Management Information Systems (MIS)

The concentration in Management Information Systems encompasses analysis, design, implementation, and management of information systems, to support business processes and decision making in all functional areas of an organization. The curriculum highlights not only the fundamental building blocks of information systems, but also the interaction of technology, people and business processes. MIS students learn about designing, building, maintaining, and securing information systems to meet organizational goals. They also acquire skills to use data and information through business analytics to support better managerial decision making in areas such as marketing, accounting and finance. MIS graduates are capable of translating business needs into technology-based solutions, and new technological advances into business capabilities. The MIS concentration prepares students for diverse technology based careers including Business Analyst, Data Analyst, IT Project Management, IT Quality Management, IS Audit and Control, Government Contracting, and Consulting.

### Concentration in Marketing (MKTG)

The concentration in Marketing prepares students for a broad range of global and domestic career options in corporations, small businesses, government, and nonprofits. A marketing concentration provides students with a solid foundation in marketing management for understanding the needs of the customer, the value organizations create for their customers, and opportunities and threats in the global marketplace. Students learn marketing concepts and practices related to consumer behavior, marketing research and analytics, and marketing planning and strategy (product development, pricing, distribution, and advertising and promotions). Our graduates work in such diverse fields as advertising and marketing communications, product and brand management, customer relationship management, new product/service development, new market and business development, sales, retail management, marketing research and analytics, and digital and social media marketing.

### Electives
Select 12 credits from the following:
- MKTG 307: Federal Government Marketing
- MKTG 311: Sales Management
- MKTG 313: Advertising and Marketing Communications
**Business Minor**

**Second Concentration in Marketing**

Students declaring a second concentration in Marketing must complete the three required courses and three elective courses for the concentration.

### Concentration in Operations and Supply Chain Management (OSCM)

Operations and Supply Chain Management (OSCM) is the business function devoted to the management of resources and processes used by a firm to produce goods or services. Students with an OSCM concentration learn how to perform strategic and tactical planning, enabling them to efficiently and effectively manage the activities involved in transforming organizational resources into customer value. OSCM students acquire modeling, business analytics, and information technology skills for addressing a range of business problems. OSCM knowledge and skills are applicable to every business, spanning services, manufacturing, consulting, public sector (including government contracting), and not-for-profit organizations. The OSCM concentration is designed to prepare students for a career in the areas of: Supply Chain Management, Government Contracting (including procurement, logistics, and distribution), Project Management, Quality Management, Socially Responsible Operations, Product and Services Design, Process Analysis and Design, and, Planning and Control of Operations.

**Business Minor**

Banner Code: BUS

**Academic Advising**

Phone: 703-993-1880
The business minor provides an introduction to the skills needed for success in the rapidly changing and evolving world of business. Because it is designed for non-business students who seek to learn business essentials to enhance their own area of expertise, the minor provides broad exposure to business concepts and theories. The minor also presents and integrates the major functional areas in business to solve management problems through the use of IT. Strong written and oral communication skills are expected.

**Admissions & Policies**

**Policies**

For policies governing all minors, see AP.5.3.4 Minors (p. 90). The School of Business residency requirement for this minor supersedes the university requirement: at least nine credits must be earned at Mason. At least eight credits of the minor courses must be unique to the Business Minor and not applied toward any other major, minor, or concentration. Students must achieve a grade of C or better in each course that is applied toward the minor.

**Requirements**

**Minor Requirements**

Total credits: 15

**Required Courses**

**Excluded Courses**

These courses may not be taken for credit by School of Business majors. Students who have already taken and received credit for relevant School of Business foundation or core course(s) shall substitute courses as follows and cannot receive credit for the equivalent MBUS course:

- ACCT 203 Survey of Accounting for MBUS 300 Accounting in a Global Economy
- FNAN 301 or FNAN 303 Financial Management for MBUS 308 Corporate Finance and Investments in a Global Economy
- MGMT 303 Principles of Management for MBUS 301 Managing People and Organizations in a Global Economy
- MIS 301 or MIS 303 Introduction to Business Information Systems (Mason Core) (p. 142) for MBUS 302 Managing Information in a Global Economy
- MKTG 301 or MKTG 303 Principles of Marketing for MBUS 303 Marketing in a Global Economy,
- OM 301 or OM 303 Operations Management for MBUS 306 Managing Projects and Operations

Students may transfer a maximum of six credits toward the business minor.

**Business Fundamentals Graduate Certificate (pending SCHEV approval)**

Banner Code: BU-CERG-BUSF

Graduate Program Office

Phone: 703-993-8006
Email: sbusgrad@gmu.edu

**Admissions & Policies**

**Note:** as of catalog publication in April, the program described below has been approved by the Board of Visitors and sent to the State Council of Higher Education in Virginia for consideration as a new degree program. The university cannot accept applications or enroll students in this program until SCHEV approval has been granted.

**Admissions**

All students registering for School of Business graduate courses must have graduate standing. Non-degree student status is not available. Full eligibility and admission requirements can be viewed at the school's website (http://business.gmu.edu/masters-in-accounting/forensic-accounting).

**Policies**

For policies governing all graduate certificates, see AP.6.8 Requirements for Graduate Certificates (p. 94).

Email: techman@gmu.edu

Administration
- Candace Deans, Director, MS in Technology Management Program & Co-Academic Director, MS in Management of Secure Information Systems Programs

The Chief Information Officer Graduate Certificate helps Information Technology professionals gain core competencies necessary for advancement into executive level roles that manage IT resources and strategy within organizations. The program specifically focuses on Enterprise Architecture and IT Governance, Management of Information Security, IT Project Management, Managing IT Investments, Managing IT Operations, and Emerging Technologies.

This certificate may be pursued on a part or full time basis.

Admissions & Policies

Admissions
Applicants are expected to be current students in the MS Technology Management (p. 935) program. This is a 12 credit program and students may use the credits completed as part of their graduate degree requirements in accordance with AP.6.8.1 Students in Master's or Doctoral Programs also Pursuing Graduate Certificates (p. 94).

Entrepreneurship Minor
Banner Code: ENTR
Academic Advising
Phone: 703-993-1880
Email: masonbus@gmu.edu

Administration
- David Gallay, Director of Minor Programs

The Entrepreneurship Minor provides students with an interest in learning more about elements of new venture creation the ability to gain a strong set of entrepreneurship acumen. In combination with the school’s expanding co-curricular entrepreneurship programs, the minor in entrepreneurship will provide an experiential platform to grow student skill sets, networks and professional portfolios.

Admissions & Policies

Policies
Students must complete five courses for a total of 15-18 credits.
Students must earn credit for the two required courses and can pick three courses of electives. At least eight credits must be unique to the minor and not applied toward any other major, minor, or concentration. Students must achieve a grade of C or better in each course that is applied toward the minor. For policies governing all minors, see AP.5.3.4 Minors (p. 90).

The School of Business residency requirement for this minor supersedes the university requirement: at least nine credits must be earned at Mason.
### Required Courses

Business major students should take:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>MGMT 451</td>
<td>Introduction to Entrepreneurship</td>
<td>3</td>
</tr>
<tr>
<td></td>
<td><strong>Total Credits</strong></td>
<td><strong>3</strong></td>
</tr>
</tbody>
</table>

Non-business major students should take one of the following courses:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>MBUS 304</td>
<td>Entrepreneurship: Starting and Managing a New Enterprise</td>

### Executive MBA

Banner Code: BU-MBA-BUEX

**Graduate Program Office**

Phone: 703-993-2136
Website: emba@gmu.edu

**Administration**

- Claus Langfred, Academic Director, Executive MBA Program

The Executive MBA is designed for those with a minimum of 7 years of significant business or military/professional experience. The program’s focus is management decision making, strategic management of business resources, and leadership – all in the context of National Security and Government Contracting firms. Dedicated faculty, an innovative and relevant curriculum for the D.C. area, a student-centered program team, and great colleagues contribute to the learning experience of a lifetime. The program is carefully designed to help students master a broad range of executive-level competencies while cultivating expert business-related knowledge of the National Security business environment. Students complete the program as a cohort, resulting in strong bonds and networking opportunities. The program is completed in 16 months, starting in January and classes are held approximately one Saturday and one Friday per month.

**Diversity in Learning**

Students encounter multiple approaches to learning in the program. Classroom discussions, team projects, individual reading, team presentations, team problem solving, business simulations, business case analyses, coaching, and a D.C. residency all contribute to the creative learning environment delivered by the Mason Executive MBA Program.

**National Security Focus**

With America’s role in the world continually evolving to meet new global challenges, the role of leadership in the security industry has never been more vital. The need for military leaders, government executives and corporate defense contractors who can provide mission critical products and services - and who understand the unique demands of the complex and dynamic national security sector - has never been more critical. Dedicated faculty from the Mason School of Business and adjunct faculty (working faculty working in specialty areas of the security sector) as well as accomplished government, military, and corporate guest speakers, technical experts, and Mason alumni employed in the security industry, are a part of the National Security focus on this program. The dynamic learning environment brings contemporary challenges of the national security industry right into the classroom.

**Admissions & Policies**

**Admissions**

Full eligibility and admission requirements can be viewed at the program’s website. (http://business.gmu.edu/emba/admissions)
Policies

All students registering for School of Business graduate courses must have graduate standing. Non-degree student status is not available.

Requirements

Degree Requirements

Total credits: 48

Modules

Students complete eight 8-week modules. During each eight-week module, students complete two courses (one in-person and one on-line) in an applications-oriented sequence that takes them from developing core management skills through the understanding and application of the tools of business performance to the talents of leadership.

Admissions & Policies

Policies

Academic Policies

Students should become familiar with the university’s general academic policies (p. 77) in addition to those specific to each academic unit.

E-mail

George Mason University uses only Mason e-mail accounts to communicate with enrolled students. Students should activate their Mason e-mail, use it to communicate with their school/department/program and other administrative units, and check it regularly for important information.

Study Elsewhere Policy

A student who has matriculated at Mason may transfer a limited number of hours (9 for undergraduates, 6 for graduates) of coursework in School of Business disciplines from another institution (not including registration through the Consortium of Universities of the Washington Metropolitan Area or coursework completed through the Center for Global Education). Students are permitted to take courses elsewhere under unusual circumstances—these circumstances do not include scheduling or commuting convenience, or financial (lower cost) reasons.

Special instructions for School of Business students: courses that are attempted at a two-year institution may not be used to fulfill upper-level requirements. Any course that a student wished to transfer to fulfill major or graduate-level course requirements in the School of Business must be attempted at an institution accredited by the Association to Advance Collegiate Schools of Business (AACSB).

For additional information, see AP.1.4.2 Permission to Study Elsewhere (p. 79).

Undergraduate Internship Policy

The School of Business recognizes the importance of experiential education in both learning to apply theory to practice and positioning students for success in their careers. Because the School of Business is committed to supporting students’ professional success, the School requires that all student internships for credit be registered with the School of Business as one of the following: ACCT 492, BUS 492, FNAN 492 (https://catalog.gmu.edu/search/?scontext=courses&search=FNAN+492), MGMT 492 (https://catalog.gmu.edu/search/?scontext=courses&search=MGMT+492), MIS 492 (https://catalog.gmu.edu/search/?scontext=courses&search=MIS+492), MKTG 492 (https://catalog.gmu.edu/search/?scontext=courses&search=MKTG+492), OSCM 492 or OM 492 (https://catalog.gmu.edu/search/?scontext=courses&search=OM+492). Students may enroll in a maximum
of 6 credits for these courses. For students in catalog years Fall 2016 and beyond, one internship course may apply to the major, and a second internship course would apply as elective credit. For students in catalog years prior to Fall 2016, a maximum of 6 credits of internship may apply to general electives.

Termination from the Major

A grade of C or higher is required in each of the School of Business listed core courses. Students will not be permitted to make more than three attempts to achieve a C or higher in the following School of Business core courses: ACCT 303 Accounting for Decision Making or ACCT 330 Financial Accounting I, BULE 303 Legal Environment of Business, BUS 303 Develop Professional Skills I: Advanced Elements, FNAN 303 Financial Management, MGMT 303 Principles of Management, MIS 303 Introduction to Business Information Systems (Mason Core) (p. 142), MKTG 303 Principles of Marketing OM 303 Operations Management and OSCM 303 Operations Management.

Once a student has attempted a School of Business Core or Accounting major course twice unsuccessfully, they must meet with an academic advisor in order to receive an override to register for the third attempt. Those who do not successfully complete these core courses within three attempts will be terminated from their major and will not be eligible to receive a degree from the School of Business. Students terminated from the School of Business are prohibited from enrolling in any School of Business course. Students terminated from the School of Business are permitted to declare the business minor only, and are not able to declare any other School of Business minors. Student are limited to three attempts at ACCT 330. Any student who is unable to achieve a C or higher in ACCT 330 on the third attempt will not be able to pursue a Major in Accounting or Finance. For more information about this, see AP.5.2.4 Termination from the Major (p. 88).

University Consortium

Students should review university policies regarding the University Consortium under Special Registration Procedures in the Academic Policies section of this catalog. Students who have attempted or failed a course at Mason are not permitted to take the equivalent course through the consortium under any circumstance. All consortium registration requests must be submitted to the dean’s office at least 3 weeks prior to the first day of classes for the relevant semester at Mason.

Any consortium course that a student wishes to register for to fulfill major or graduate-level course requirements in the School of Business must be attempted at an institution accredited by the Association to Advance Collegiate Schools of Business (AACSB).

Non-Business School Student Credit Limitation

Enrolled undergraduate students who are not declared in a School of Business major are limited to 9 credits of upper-level business coursework within the School of Business. This policy applies to any student who is declared in another major or program at Mason. This policy does not apply to students who have declared a School of Business minor and are earning required credit toward that minor.

Undergraduate Course Overload Policy

The School of Business recommends that undergraduate students attempt no more than 18 credits in an academic semester and no more than 14 credits in a summer term. Students wishing to attempt more than 18 credits must submit a Permission to Overload form to their academic advisor.

To be eligible for a course overload, a student must fulfill all of the following criteria:

- At least a 3.0 cumulative GPA at Mason
- Have completed all courses successfully in his/her previous semester with no Fs or incompletes (IN)
- Complete the Permission to Overload form and obtain an academic advisor’s signature

Freshmen and transfer students in their first semesters are not given permission for overloads as they have yet to establish an academic record at George Mason University.

If approved for an overload, the student is responsible for adding the additional class(es) and paying for the related tuition by the official university deadlines.

Transfer Credit Expiration Policy

Transfer credit is not awarded for any business (management, marketing, finance, accounting, management information systems, operations management, foundations, core, or any other School of Business course), courses completed more than ten years prior to Mason enrollment. This includes any older courses completed at RBC or the VCCS.

Appeals Process

The School of Business strives to maintain policies and procedures that are consistent with those of the University, as well as in the best interest of our students. If you have any questions concerning a particular policy or procedure, contact the Office of Student Success & Academic Services, Room 008 of Enterprise Hall (703-993-1880) or visit the website (http://business.gmu.edu).

Courses Excluded from any School of Business BS Degree

Transfer credit is not awarded for any School of Business courses completed more than ten years prior to Mason enrollment.

School of Business students pursuing a BS degree must complete a minimum of 120 credits, including the Mason Core requirements, business foundations, business core and major requirements. In addition, the following requirements must be met:

- A minimum of 45 credits at the 300- or 400-level.
- A minimum of 30 credits of School of Business core and major courses at Mason.
- At least 9 credits required for the specific major and BUS 498 Capstone Course: Advanced Business Models (Mason Core) (p. 142) taken at Mason.
- A grade of C or higher earned in the business foundations, business core and major requirements.

Students should carefully examine prerequisites for School of Business courses. Students may be removed from a course if they enroll without having fulfilled the prerequisites.

### Mason Core Requirements

Some Mason Core requirements may already be fulfilled by the major requirements listed below. Students are strongly encouraged to consult their advisors to ensure they fulfill all remaining Mason Core requirements.

Total Credits 27-28

1 MATH 108 Introductory Calculus with Business Applications (Mason Core) (p. 142) or MATH 113 Analytic Geometry and Calculus I (Mason Core) (p. 142) satisfies the Mason Core quantitative reasoning requirement.

Business Core
A grade of C or higher is required in each of the School of Business core courses listed below. Students will not be permitted to make more than three attempts to achieve a C or higher in the following School of Business core courses: ACCT 303 Accounting for Decision Making or ACCT 330 Financial Accounting I, BULE 303 Legal Environment of Business, BUS 303 Develop Professional Skills II: Advanced Elements, FNAN 303 Financial Management, MGMT 303 Principles of Management, MIS 303 Introduction to Business Information Systems (Mason Core) (p. 142), MKTG 303 Principles of Marketing and OM 303 Operations Management. Those who do not successfully complete these core courses within three attempts will be terminated from their major and will not be eligible to receive a degree from the School of Business. Students terminated from the School of Business are prohibited from enrolling in any School of Business course. Students terminated from the School of Business are permitted to declare a business minor. For more information about this, see AP 5.2.4 Termination from the Major (p. 88).

Administration
• David Gallay, Director of Minor Programs

Admissions & Policies

Policies

For policies governing all minors, see AP 5.3.4 Minors (p. 90). The School of Business residency requirement for this minor supersedes the university requirement: at least nine credits must be earned at Mason.

At least eight credits of the minor courses must be unique to the Finance Minor and not applied toward any other major, minor, or concentration. Students must achieve a grade of C or better in each course that is applied toward the minor.

Admissions & Policies

Admissions

Eligibility Requirements

All students registering for School of Business graduate courses must have graduate standing. Non-degree student status is not available. Full eligibility and admission requirements can be viewed at the school’s website (http://business.gmu.edu/masters-in-accounting/forensic-accounting).

Policies

For policies governing all graduate certificates, see AP 6.8 Requirements for Graduate Certificates (p. 94).

Students are responsible for familiarization and compliance with the university’s Graduate Policies (p. 90) contained in this catalog. A maximum of 3 graduate credits taken at another institution can be transferred to the graduate certificate. The time limit for completion
is four years from the date of admission to the graduate certificate. Students must have a minimum GPA of 3.0 to complete the certificate.

**Certificate Requirements**

Total credits: 12

This certificate may be pursued on a part-time basis only.

1 Students who completed ACCT 672 Governmental and Nonprofit Accounting or equivalent in their undergraduate or other graduate program must take ACCT 792 Seminar in Accounting instead.

Admissions & Policies

Policies

Academic Policies
Students should become familiar with the university’s general academic policies (p. 77) in addition to those specific to each academic unit.

E-mail
George Mason University uses only Mason e-mail accounts to communicate with enrolled students. Students should activate their Mason e-mail, use it to communicate with their school/department/program and other administrative units, and check it regularly for important information.

Study Elsewhere Policy
A student who has matriculated at Mason may transfer a limited number of hours (9 for undergraduates, 6 for graduates) of coursework in School of Business disciplines from another institution (not including registration through the Consortium of Universities of the Washington Metropolitan Area or coursework completed through the Center for Global Education). Students are permitted to take courses elsewhere under unusual circumstances—these circumstances do not include scheduling or commuting convenience, or financial (lower cost) reasons.

Special instructions for School of Business students: courses that are attempted at a two-year institution may not be used to fulfill upper-level requirements. Any course that a student wished to transfer to fulfill major or graduate-level course requirements in the School of Business must be attempted at an institution accredited by the Association to Advance Collegiate Schools of Business (AACSB).

For additional information, see AP1.4.2 Permission to Study Elsewhere (p. 79).

Undergraduate Internship Policy
The School of Business recognizes the importance of experiential education in both learning to apply theory to practice and positioning students for success in their careers. Because the School of Business is committed to supporting students’ professional success, the School requires that all student internships for credit be registered with the School of Business as one of the following: ACCT 492, BUS 492, FNAN 492 (https://catalog.gmu.edu/search/?scontext=courses&search=FNAN+492), MGMT 492 (https://catalog.gmu.edu/search/?scontext=courses&search=MGMT+492), MIS 492 (https://catalog.gmu.edu/search/?scontext=courses&search=MIS+492), MKTG 492 (https://catalog.gmu.edu/search/?scontext=courses&search=MKTG+492).
Termination from the Major

A grade of C or higher is required in each of the School of Business listed core courses. Students will not be permitted to make more than three attempts to achieve a C or higher in the following School of Business core courses: ACCT 303 Accounting for Decision Making or ACCT 330 Financial Accounting I, BULE 303 Legal Environment of Business, BUS 303 Develop Professional Skills II: Advanced Elements, FNAN 303 Financial Management, MGMT 303 Principles of Management, MIS 303 Introduction to Business Information Systems (Mason Core) (p. 142), MKTG 303 Principles of Marketing OM 303 Operations Management and OSCM 303 Operations Management. Once a student has attempted a School of Business Core or Accounting major course twice unsuccessfully, they must meet with an academic advisor in order to receive an override to register for the third attempt. Those who do not successfully complete these core courses within three attempts will be terminated from their major and will not be eligible to receive a degree from the School of Business. Students terminated from the School of Business are prohibited from enrolling in any School of Business course. Students terminated from the School of Business are permitted to declare the business minor only, and are not able to declare any other School of Business minors. Student are limited to three attempts at ACCT 330. Any student who is unable to achieve a C or higher in ACCT 330 on the third attempt will not be able to pursue a Major in Accounting or Finance. For more information about this, see AP 5.2.4

Termination from the Major (p. 88).

University Consortium

Students should review university policies regarding the University Consortium under Special Registration Procedures in the Academic Policies section of this catalog. Students who have attempted or failed a course at Mason are not permitted to take the equivalent course through the consortium under any circumstance. All consortium registration requests must be submitted to the dean's office at least 3 weeks prior to the first day of classes for the relevant semester at Mason.

Any consortium course that a student wishes to register for to fulfill major or graduate-level course requirements in the School of Business must be attempted at an institution accredited by the Association to Advance Collegiate Schools of Business (AACSB).

Non-Business School Student Credit Limitation

Enrolled undergraduate students who are not declared in a School of Business major are limited to 9 credits of upper-level business coursework within the School of Business. This policy applies to any student who is declared in another major or program at Mason. This policy does not apply to students who have declared a School of Business minor and are earning required credit toward that minor.

Undergraduate Course Overload Policy

The School of Business recommends that undergraduate students attempt no more than 18 credits in an academic semester and no more than 14 credits in a summer term. Students wishing to attempt more than 18 credits must submit a Permission to Overload form to their academic advisor.

To be eligible for a course overload, a student must fulfill all of the following criteria:

- At least a 3.0 cumulative GPA at Mason
- Have completed all courses successfully in his/her previous semester with no Fs or incompletes (IN)
- Complete the Permission to Overload form and obtain an academic advisor's signature

Freshmen and transfer students in their first semesters are not given permission for overloads as they have yet to establish an academic record at George Mason University.

If approved for an overload, the student is responsible for adding the additional class(es) and paying for the related tuition by the official university deadlines.

Transfer Credit Expiration Policy

Transfer credit is not awarded for any business (management, marketing, finance, accounting, management information systems, operations management, foundations, core, or any other School of Business course), courses completed more than ten years prior to Mason enrollment. This includes any older courses completed at RBC or the VCCS.

Appeals Process

The School of Business strives to maintain policies and procedures that are consistent with those of the University, as well as in the best interest of our students. If you have any questions concerning a particular policy or procedure, contact the Office of Student Success & Academic Services, Room 008 of Enterprise Hall (703-993-1880) or visit the website (http://business.gmu.edu).

Courses Excluded from any School of Business BS Degree

Transfer credit is not awarded for any School of Business courses completed more than ten years prior to Mason enrollment.

Requirements

Degree Requirements

Total credits: 120

School of Business students pursuing a BS degree must complete a minimum of 120 credits, including the Mason Core requirements, business foundations, business core and major requirements. In addition, the following requirements must be met:

- A minimum of 45 credits at the 300- or 400-level.
- A minimum of 30 credits of School of Business core and major courses at Mason.
- At least 9 credits required for the specific major and BUS 498 Capstone Course: Advanced Business Models (Mason Core) (p. 142) taken at Mason.
- A grade of C or higher earned in the business foundations, business core and major requirements.

Students should carefully examine prerequisites for School of Business courses. Students may be removed from a course if they enroll without having fulfilled the prerequisites.

Mason Core Requirements

School of Business students must complete the Mason Core requirements, plus 1 additional credit of natural science (the School of Business natural science requirement must be fulfilled by completing two 4-credit laboratory sciences). Some Mason Core requirements may already be fulfilled by the major requirements listed below. Students are strongly encouraged to consult their advisors to ensure they fulfill all remaining Mason Core (p. 142) requirements.

Total Credits  21

1  Excluding MIS 301 or MIS 303 Introduction to Business Information Systems (Mason Core) (p. 142) or OM 301 or OM 303 Operations Management

2  It is strongly recommended that students planning to major in ISOM take MIS 302 Introduction to Programming for Business Applications as part of their program.
Optional Concentrations
Students have considerable flexibility in their choice of electives and may choose from two concentrations of study: one in Operations and Supply Chain Management (OSCM) and the other in Management Information Systems (MIS). Students are strongly urged to discuss their choice of electives and programs of study with their academic advisor and an ISOM faculty member. Concentrations must be declared prior to a student filing an intent to graduate.

Concentration in Operations and Supply Chain Management (OSCM)
If a student has taken any four of the following electives, beyond the ISOM required courses, s/he can declare an OSCM concentration.

Second Majors in Information Systems and Operations Management
Students declaring a second major in Information Systems and Operations Management must complete the three required courses and three elective courses for the major.

Honors

Honors in the Major
The School of Business Information Systems and Operations Management Honors Program provides highly motivated students majoring in ISOM with an enriched academic experience integrating curricular, co-curricular and extra-curricular development. Admission to the Honors Program is by invitation only. Students who have been found responsible for an Honor Code violation are not eligible for the program.

Admission Requirements
- Minimum 3.0 cumulative GPA and 3.5 GPA in the ISOM major.
- Two academic/professional references.
- Once admitted to the program, students with a cumulative GPA below 3.0 will be dropped from the program.

Curricular Requirements
- MIS 303 Introduction to Business Information Systems (Mason Core) (p. 142) earning a grade of A- or better.
- OM 303 Operations Management earning a grade of A- or better.
- A grade of B or better in Business Core curriculum courses:

</tr>
</tbody>
</table>
- One of the two ISOM Honors seminars: MIS 462 Honors Seminar in Management Information Systems (Topic Varies) or OM 462 Honors Seminar in Operations Management (Topic Varies).

Extra-Curricular Requirements
- The student must show a high degree of engagement in MISOMA or another School of Business student organization, preferably in a leadership role.

Requirements for the Honors Designation:
- Honors students must graduate with a minimum 3.00 cumulative GPA and 3.50 GPA in the major.
- Honors students must meet all curricular and extra-curricular requirements mentioned previously at graduation.

International Business Minor
Banner Code: IB

Academic Advising
The minor in International Business for School of Business majors provides an introduction for those students interested in learning more about elements of business unique to international organizations or in pursuing a career in international business. With a strong set of business skills developed through the core undergraduate curriculum and their majors, students in the International Business Minor can further develop their skills in managing and communicating across different cultures, improve their understanding of how specific business disciplines vary in an international setting, and cultivate an appreciation for international monetary issues.

Admissions & Policies

Policies

Students must complete five courses for a total of 15 credits. At least eight credits of the minor courses must be unique to the International Business Minor and not applied toward any other major, minor, or concentration. Students must achieve a grade of C or better in each course that is applied to the minor.

For policies governing all minors, see AP.5.3.4 Minors (p. 90). The School of Business residency requirement for this minor supersedes the university requirement: at least nine credits must be earned at Mason.

¹ A maximum of one ECON or GOVT course may count towards the minor. The other three electives must be School of Business coursework.

Co-Curricular Requirement

Students must complete one of the following in addition to the curriculum requirements:

Global Experience
- Global residency course;
- An international internship abroad;
- A domestic internship with significant international experience;
- An approved study abroad program; or
- Study at a Mason campus or a Mason joint program overseas

OR

Foreign Language
- One language study course; or
- A course taught in foreign literature when taught in a foreign language

IT Strategy and Digital Transformation Graduate Certificate (pending SCHEV approval)

Admissions & Policies

Admissions

Application requirements include:
- Application
- Bachelor’s degree transcript
- Resume
- Goal statement
• Interview
• Minimum of 3-years of professional work experience

All students registering for School of Business graduate courses must have graduate standing. Non-degree student status is not available. Full eligibility and admission requirements can be viewed at the school's website (http://business.gmu.edu/masters-in-accounting/forensic-accounting).

Requirements

Note: as of catalog publication in April, the program described below has been approved by the Board of Visitors and sent to the State Council of Higher Education in Virginia for consideration as a new degree program. The university cannot accept applications or enroll students in this program until SCHEV approval has been granted.

Certificate Requirements

Total credits: 12

This certificate may be pursued on a full-or part-time basis.

Management of Secure Information Systems, MS (School of Business)

Banner Code: BU-MS-MSIS

Graduate Program Office

Phone: 703-993-8006
Email: sbusgrad@gmu.edu

Administration

• Candace Deans, Director, MS in Technology Management Program & Co-Director, MS in Management Secure Information Systems Program

The degree, an interdisciplinary program offered by the Volgenau School of Engineering (p. 1011), the School of Business (p. 888), and the Schar School of Policy and Government (p. 961), prepares professionals for the challenges of modern computerized information systems that have become increasingly complex and vulnerable to cyber-attacks, resulting in a significant number of government regulations. Consequently, those responsible for the safe, secure, and efficient operation of such systems need to grasp their technical aspects and be familiar with both the principles of management and the public policy impact of regulatory and organizational decisions.

Admissions & Policies

Admissions

All students must have graduate standing. Non-degree student status is not available.

Management, BS

Banner Code: BU-BS-MGMT

Academic Advising

Phone: 703-993-1880
Email: masonbus@gmu.edu
Administration

- Masoud Yasai, Chair, Management Area and Director, Faculty Research

The Bachelor of Science in Management prepares students to take leadership, management, and entrepreneurial roles in the public and private sectors. Students learn such skills as strategic thinking, motivating and managing a nationally and internationally diverse workforce, building and leading team efforts, negotiating successfully, and instituting planned change in organizations.

Admissions & Policies

Policies

Academic Policies

Students should become familiar with the university’s general academic policies (p. 77) in addition to those specific to each academic unit.

E-mail

George Mason University uses only Mason e-mail accounts to communicate with enrolled students. Students should activate their Mason e-mail, use it to communicate with their school/department/program and other administrative units, and check it regularly for important information.

Study Elsewhere Policy

A student who has matriculated at Mason may transfer a limited number of hours (9 for undergraduates, 6 for graduates) of coursework in School of Business disciplines from another institution (not including registration through the Consortium of Universities of the Washington Metropolitan Area or coursework completed through the Center for Global Education). Students are permitted to take courses elsewhere under unusual circumstances—these circumstances do not include scheduling or commuting convenience, or financial (lower cost) reasons.

Special instructions for School of Business students: courses that are attempted at a two-year institution may not be used to fulfill upper-level requirements. Any course that a student wished to transfer to fulfill major or graduate-level course requirements in the School of Business must be attempted at an institution accredited by the Association to Advance Collegiate Schools of Business (AACSB).

For additional information, see AP.1.4.2 Permission to Study Elsewhere (p. 79).

Undergraduate Internship Policy

The School of Business recognizes the importance of experiential education in both learning to apply theory to practice and positioning students for success in their careers. Because the School of Business is committed to supporting students’ professional success, the School requires that all student internships for credit be registered with the School of Business as one of the following: ACCT 492, BUS 492, FNAN 492 (https://catalog.gmu.edu/search/?scontext=courses&search=FNAN+492), MGMT 492 (https://catalog.gmu.edu/search/?scontext=courses&search=MGMT+492), MIS 492 (https://catalog.gmu.edu/search/?scontext=courses&search=MIS+492), MKTG 492 (https://catalog.gmu.edu/search/?scontext=courses&search=MKTG+492), OSCM 492 or OM 492 (https://catalog.gmu.edu/search/?scontext=courses&search=OM+492). Students may enroll in a maximum of 6 credits for these courses. For students in catalog years Fall 2016 and beyond, one internship course may apply to the major, and a second internship course would apply as elective credit. For students in catalog years prior to Fall 2016, a maximum of 6 credits of internship may apply to general electives.

Termination from the Major

A grade of C or higher is required in each of the School of Business listed core courses. Students will not be permitted to make more than three attempts to achieve a C or higher in the following School of Business core courses: ACCT 303 Accounting for Decision Making or ACCT 330 Financial Accounting I, BULE 303 Legal Environment of Business, BUS 303 Develop Professional Skills I: Advanced Elements, FNAN 303 Financial Management, MGMT 303 Principles of Management, MIS 303 Introduction to Business Information Systems (Mason Core) (p. 142), MKTG 303 Principles of Marketing OM 303 Operations Management and OSCM 303 Operations Management.

Once a student has attempted a School of Business Core or Accounting major course twice unsuccessfully, they must meet with an academic advisor in order to receive an override to register for the third attempt. Those who do not successfully complete these core courses within three attempts will be terminated from their major and will not be eligible to receive a degree from the School of Business. Students terminated from the School of Business are prohibited from enrolling in any School of Business course. Students terminated from the School of Business are permitted to declare the business minor only, and are not able to declare any other School of Business minors. Students are limited to three attempts at ACCT 330. Any student who is unable to achieve a C or higher in ACCT 330 on the third attempt will not be able to pursue a Major in Accounting or Finance. For more information about this, see AP.5.2.4 Termination from the Major (p. 88).

University Consortium

Students should review university policies regarding the University Consortium under Special Registration Procedures in the Academic Policies section of this catalog. Students who have attempted or failed a course at Mason are not permitted to take the equivalent course through the consortium under any circumstance. All consortium registration requests must be submitted to the dean’s office at least 3 weeks prior to the first day of classes for the relevant semester at Mason.

Any consortium course that a student wishes to register for to fulfill major or graduate-level course requirements in the School of Business must be attempted at an institution accredited by the Association to Advance Collegiate Schools of Business (AACSB).

Non-Business School Student Credit Limitation

Enrolled undergraduate students who are not declared in a School of Business major are limited to 9 credits of upper-level business coursework within the School of Business. This policy applies to any student who is declared in another major or program at Mason. This policy does not apply to students who have declared a School of Business minor and are earning required credit toward that minor.

Undergraduate Course Overload Policy

The School of Business recommends that undergraduate students attempt no more than 18 credits in an academic semester and no more than 14 credits in a summer term. Students wishing to attempt more than 18 credits must submit a Permission to Overload form to their academic advisor.
To be eligible for a course overload, a student must fulfill all of the following criteria:

- At least a 3.0 cumulative GPA at Mason
- Have completed all courses successfully in his/her previous semester with no Fs or incompletes (IN)
- Complete the Permission to Overload form and obtain an academic advisor's signature

Freshmen and transfer students in their first semesters are not given permission for overloads as they have yet to establish an academic record at George Mason University.

If approved for an overload, the student is responsible for adding the additional class(es) and paying for the related tuition by the official university deadlines.

**Transfer Credit Expiration Policy**

Transfer credit is not awarded for any business (management, marketing, finance, accounting, management information systems, operations management, foundations, core, or any other School of Business course), courses completed more than ten years prior to Mason enrollment. This includes any older courses completed at RBC or the VCCS.

**Appeals Process**

The School of Business strives to maintain policies and procedures that are consistent with those of the University, as well as in the best interest of our students. If you have any questions concerning a particular policy or procedure, contact the Office of Student Success & Academic Services, Room 008 of Enterprise Hall (703-993-1880) or visit the website [http://business.gmu.edu](http://business.gmu.edu).

**Courses Excluded from any School of Business BS Degree**

Transfer credit is not awarded for any School of Business courses completed more than ten years prior to Mason enrollment.

**Requirements**

**Degree Requirements**

Total credits: 120
School of Business students pursuing a BS degree must complete a minimum of 120 credits, including the Mason Core requirements, business foundations, business core and major requirements. In addition, the following requirements must be met:

- A minimum of 45 credits at the 300- or 400-level.
- A minimum of 30 credits of School of Business core and major courses at Mason.
- At least 9 credits required for the specific major and BUS 498 Capstone Course: Advanced Business Models (Mason Core) (p. 142) taken at Mason.
- A grade of C or higher earned in the business foundations, business core and major requirements.

Students should carefully examine prerequisites for School of Business courses. Students may be removed from a course if they enroll without having fulfilled the prerequisites.

**Mason Core Requirements**

School of Business students must complete the Mason Core (p. 142) requirements, plus 1 additional credit of natural science (the School of Business natural science requirement must be fulfilled by completing two 4-credit laboratory sciences). Some Mason Core (p. 142) requirements may already be fulfilled by the major requirements listed below. Students are strongly encouraged to consult their advisors to ensure they fulfill all remaining Mason Core (p. 142) requirements.

1. Students will not be permitted to make more than three attempts to achieve a C or higher in this course. Those who do not successfully complete these core courses within three attempts will be terminated from their major and will not be eligible to receive a degree from the School of Business. Students terminated from the School of Business are prohibited from enrolling in any School of Business course. Students terminated from the School of Business are permitted to declare a business minor. For more information about this, see AP.5.2.4 Termination from the Major (p. 88).

**Honors Seminar**

Students with a GPA of at least 3.00 are offered the opportunity to further distinguish their record by participating in MGMT 462 Honors Seminar in Management (Topic Varies), which addresses a key contemporary management issue in an intensive small group format.

To be eligible for enrollment in MGMT 462 Honors Seminar in Management (Topic Varies), students must be a declared management major, have a cumulative GPA of at least 3.00 with a minimum of 75 semester hours of course work, have a minimum GPA of 3.00 in course work completed for the management major, and be recommended by faculty. The class size of the Honors Seminar will be kept small. If the number of interested and qualified students exceeds the number of available spots, management area faculty will select the most qualified students to participate.

**Second Majors in Management**

Students declaring a second major in Management must complete the two required courses and four elective courses for the major.

**Honors**

**Honors in the Major**

The Management Honors Program in the School of Business provides highly motivated students majoring in management with an enriched academic experience integrating curricular, co-curricular and extra-curricular development. Admission to the Honors Program is by invitation only. Students who have been found responsible for an Honor Code violation are not eligible for the program.

**Admission Requirements**

- Minimum 3.0 cumulative GPA and 3.5 GPA in the major
- Submission of a personal statement/essay (topic to be determined)
- Two academic/professional references
- Once admitted to the program, students with a cumulative GPA below a 3.0 will be dropped from the program.

**Curricular Requirements**

- MGMT 303 Principles of Management earning a grade of A- or better.
- A grade of B or better in Business Core curriculum courses:

<table>

FNAN 303 Financial Management 3
MKTG 303 Principles of Marketing 3
MIS 303 Introduction to Business Information Systems (Mason Core) (p. 142) 3
OM 303 Operations Management 3

Co-Curricular or Work Experience Requirements
The student must complete ONE of the following in addition to the curriculum requirements:

• MGMT 462 Honors Seminar in Management (Topic Varies) (Honors seminar traditionally offered each Spring.)
• Study abroad (e.g., Aachen Dual Degree, Oxford Honors, China, South America)
• Internship (Internships where no credit is earned also qualify, if approved by the Management Honors Program administrator.)
• Research paper/Thesis as an independent study (MGMT 499 Independent Study) course (e.g., faculty research, Mason undergraduate apprentice program, QEP)

Extra-Curricular Requirements
The student must show a high degree of engagement in a School of Business student organization, or other on-campus student organization, preferably in a leadership role.

Requirements for students to obtain the honors designation:

• Honors students must graduate with a minimum 3.0 cumulative GPA and 3.5 GPA in the MGMT major.
• Honors students must meet all curricular, co-curricular, and extra-curricular requirements mentioned above at graduation.

Administration
• Victoria Grady, Director, MS in Management Program

The program prepares recent graduates of non-business majors for success in business fields. The program offers the fundamentals of business management in a global environment and is composed of the core discipline areas common to all business graduate programs that are accredited by the Association to Advance Collegiate Schools of Business (AACSBB). It is a full time, daytime program. Students will enter as a cohort and complete all degree requirements within 11 months.

Admissions & Policies

Admissions
Admissions and Eligibility Requirements
All students registering for School of Business graduate courses must have graduate standing. Non degree student status is not available. Admission to the Master of Science in Management is contingent on applicants having completed an undergraduate degree program within 24 months prior to when they would enroll in the program.

Full eligibility and admission requirements can be viewed at our website. (http://business.gmu.edu/masters-in-management/admissions)

Policies
For policies governing all graduate degrees, see AP6 Graduate Policies (p. 90).

BMGT 643 Financial Management in a Global Environment
BMGT 653 Fundamentals of Behavior in Organizations
BMGT 662 Management of Information Technology
BMGT 678 Business Strategy and Firm Leadership

Total Credits: 30
The Bachelor of Science in Marketing prepares students for a broad range of global and domestic career options in corporations, small businesses, government, and nonprofits. A marketing degree provides students with a solid foundation in marketing management for understanding the needs of the customer; the value organizations create for their customers, and opportunities and threats in the global marketplace. Students learn marketing concepts and practices related to consumer behavior, marketing research and analytics, and marketing planning and strategy (product development, pricing, distribution, and advertising and promotions). Our graduates work in such diverse fields as advertising and marketing communications, product and brand management, customer relationship management, new product/service development, new market and business development, sales, retail management, marketing research and analytics, and digital and social media marketing.

Admissions & Policies

Policies

Academic Policies

Students should become familiar with the university’s general academic policies (p. 77) in addition to those specific to each academic unit.

E-mail

George Mason University uses only Mason e-mail accounts to communicate with enrolled students. Students should activate their Mason e-mail, use it to communicate with their school/department/program and other administrative units, and check it regularly for important information.

Study Elsewhere Policy

A student who has matriculated at Mason may transfer a limited number of hours (9 for undergraduates, 6 for graduates) of coursework in School of Business disciplines from another institution (not including registration through the Consortium of Universities of the Washington Metropolitan Area or coursework completed through the Center for Global Education). Students are permitted to take courses elsewhere under unusual circumstances—these circumstances do not include scheduling or commuting convenience, or financial (lower cost) reasons.

Special instructions for School of Business students: courses that are attempted at a two-year institution may not be used to fulfill upper-level requirements. Any course that a student wished to transfer to fulfill major or graduate-level course requirements in the School of Business must be attempted at an institution accredited by the Association to Advance Collegiate Schools of Business (AACSB).

For additional information, see AP.1.4.2 Permission to Study Elsewhere (p. 79).

Undergraduate Internship Policy

The School of Business recognizes the importance of experiential education in both learning to apply theory to practice and positioning students for success in their careers. Because the School of Business is committed to supporting students’ professional success, the School requires that all student internships for credit be registered with the School of Business as one of the following: ACCT 492, BUS 492, FNAN 492 (https://catalog.gmu.edu/search/?scontext=courses&search=FNAN+492), MGMT 492 (https://catalog.gmu.edu/search/?scontext=courses&search=MGMT+492), MIS 492 (https://catalog.gmu.edu/search/?scontext=courses&search=MIS+492), MKTG 492 (https://catalog.gmu.edu/search/?scontext=courses&search=MKTG+492), OSCM 492 or OM 492 (https://catalog.gmu.edu/search/?scontext=courses&search=OM+492). Students may enroll in a maximum of 6 credits for these courses. For students in catalog years Fall 2016 and beyond, one internship course may apply to the major, and a second internship course would apply as elective credit. For students in catalog years prior to Fall 2016, a maximum of 6 credits of internship may apply to general electives.

Termination from the Major

A grade of C or higher is required in each of the School of Business listed core courses. Students will not be permitted to make more than three attempts to achieve a C or higher in the following School of Business core courses: ACCT 303 Accounting for Decision Making or ACCT 330 Financial Accounting I, BULE 303 Legal Environment of Business, BUS 303 Develop Professional Skills II: Advanced Elements, FNAN 303 Financial Management, MGMT 303 Principles of Management, MIS 303 Introduction to Business Information Systems (Mason Core) (p. 142), MKTG 303 Principles of Marketing OM 303 Operations Management and OSCM 303 Operations Management.

Once a student has attempted a School of Business Core or Accounting major course twice unsuccessfully, they must meet with an academic advisor in order to receive an override to register for the third attempt. Those who do not successfully complete these core courses within three attempts will be terminated from their major and will not be eligible to receive a degree from the School of Business. Students terminated from the School of Business are prohibited from enrolling in any School of Business course. Students terminated from the School of Business are permitted to declare the business minor only, and are not able to declare any other School of Business minors. Students are limited to three attempts at ACCT 330. Any student who is unable to achieve a C or higher in ACCT 330 on the third attempt will not be able to pursue a Major in Accounting or Finance. For more information about this, see AP.5.2.4 Termination from the Major (p. 88).

University Consortium

Students should review university policies regarding the University Consortium under Special Registration Procedures in the Academic
Policies section of this catalog. Students who have attempted or failed a course at Mason are not permitted to take the equivalent course through the consortium under any circumstance. All consortium registration requests must be submitted to the dean’s office at least 3 weeks prior to the first day of classes for the relevant semester at Mason.

Any consortium course that a student wishes to register for to fulfill major or graduate-level course requirements in the School of Business must be attempted at an institution accredited by the Association to Advance Collegiate Schools of Business (AACSB).

Non-Business School Student Credit Limitation
Enrolled undergraduate students who are not declared in a School of Business major are limited to 9 credits of upper-level business coursework within the School of Business. This policy applies to any student who is declared in another major or program at Mason. This policy does not apply to students who have declared a School of Business minor and are earning required credit toward that minor.

Undergraduate Course Overload Policy
The School of Business recommends that undergraduate students attempt no more than 18 credits in an academic semester and no more than 14 credits in a summer term. Students wishing to attempt more than 18 credits must submit a Permission to Overload form to their academic advisor.

To be eligible for a course overload, a student must fulfill all of the following criteria:

- At least a 3.0 cumulative GPA at Mason
- Have completed all courses successfully in his/her previous semester with no Fs or incompletes (IN)
- Complete the Permission to Overload form and obtain an academic advisor's signature

Freshmen and transfer students in their first semesters are not given permission for overloads as they have yet to establish an academic record at George Mason University.

If approved for an overload, the student is responsible for adding the additional class(es) and paying for the related tuition by the official university deadlines.

Transfer Credit Expiration Policy
Transfer credit is not awarded for any business (management, marketing, finance, accounting, management information systems, operations management, foundations, core, or any other School of Business course), courses completed more than ten years prior to Mason enrollment. This includes any older courses completed at RBC or the VCCS.

Appeals Process
The School of Business strives to maintain policies and procedures that are consistent with those of the University, as well as in the best interest of our students. If you have any questions concerning a particular policy or procedure, contact the Office of Student Success & Academic Services, Room 008 of Enterprise Hall (703-993-1880) or visit the website (http://business.gmu.edu).

Courses Excluded from any School of Business BS Degree
Transfer credit is not awarded for any School of Business courses completed more than ten years prior to Mason enrollment.

Requirements

Degree Requirements
Total credits: 120

School of Business students pursuing a BS degree must complete a minimum of 120 credits, including the Mason Core requirements, business foundations, business core and major requirements. In addition, the following requirements must be met:

- A minimum of 45 credits at the 300- or 400-level.
- A minimum of 30 credits of School of Business core and major courses at Mason.
- At least 9 credits required for the specific major and BUS 498 Capstone Course: Advanced Business Models (Mason Core) (p. 142) taken at Mason.
- A grade of C or higher earned in the business foundations, business core and major requirements.

Students should carefully examine prerequisites for School of Business courses. Students may be removed from a course if they enroll without having fulfilled the prerequisites.

Mason Core Requirements
School of Business students must complete the Mason Core (p. 142) requirements, plus 1 additional credit of natural science (the School of Business natural science requirement must be fulfilled by completing two 4-credit laboratory sciences). Some Mason Core (p. 142) requirements may already be fulfilled by the major requirements listed below. Students are strongly encouraged to consult their advisors to ensure they fulfill all remaining Mason Core (p. 142) requirements.

Administration

- David Gallay, Director of Minor Programs

The Marketing Minor provides any student who is interested in marketing a solid foundation for understanding the needs of the customer and in the principles of marketing management. This includes understanding new product development, creating marketing communications and promotions, managing customer relationships, and analyzing consumer and market trends. Learning outcomes also include the value organizations create for their customers, and opportunities and threats in the global marketplace.

This minor provides a wide range of marketing classes that can enhance major coursework in other academic disciplines. In the required courses, students learn about the value of the consumer and customer behavior, and explore fundamental marketing principles. In the elective courses, students can tailor their focus with a variety of specialized topics.

Admissions & Policies

Policies

For policies governing all minors, see AP5.3.4 Minors (p. 90). The School of Business residency requirement for this minor supersedes the university requirement: at least nine credits must be earned at Mason.

At least eight credits of the minor courses must be unique to the Business Minor and not applied toward any other major, minor, or concentration. Students must achieve a grade of C or better in each course that is applied toward the minor. This minor is available to all non-Marketing majors at the University with a minimum of sophomore standing.

Administration

• Carolyn Grimsley, Director, MS in Real Estate Development

The MS in Real Estate Development program is designed to provide real estate professionals with the knowledge essential to assume increasingly responsible leadership roles within the development industry. Areas of emphasis include real estate finance, investment analysis, project management, sustainability and economic development. The distinctiveness of the Master’s program in Real Estate Development offered by Mason lies in its multi-disciplinary curriculum, which incorporates coursework from the domains of business, engineering and public policy. Created in consultation with leading real estate development companies, the curriculum has been designed to strengthen the employment potential and upward mobility of industry professionals working in the areas of development, architecture, engineering, public planning, construction management, real estate finance, mortgage lending, property management, real estate law and related fields.

Admissions & Policies

Admissions

Requirements
All students registering for School of Business graduate courses must have graduate standing. Non degree student status is not available.

Full eligibility and admission requirements can be viewed here (http://business.gmu.edu/masters-in-real-estate-development/admissions).

Policies
The 36-hour curriculum includes 18 hours of required courses and 18 hours of electives. Students are responsible for familiarization and compliance with AP6 Graduate Policies (p. 90).

Electives

Select 15 credits of electives

Total Credits

1 Electives may be selected from other REAL courses (see below) and available offerings in appropriate areas including the Schar School of Policy and Government; the School of Business; the Volgenau School of Engineering; the College of Humanities and Social Sciences; the College of Science; and the School for Conflict Analysis & Resolution.

Students wishing to choose a field for emphasis may select, with the approval of a faculty advisor, 3 elective courses within the field that together constitute an emphasis area. They must also then take 3 courses outside the selected emphasis to reach the required elective total of 15. With prior approval of an advisor, students may design their own emphasis. The following are examples of fields for emphasis and courses within each field which may be selected.

Administration

- Candace Deans, Academic Director, MS in Technology Management Program & Co-Academic Director, MS in Management of Secure Information Systems Programs

The MS in Technology Management is designed to provide students with a graduate management education that will help them further their leadership careers in technology and technology-oriented businesses and organizations. With technology innovation and commercialization occurring at an increasing pace and industries becoming more networked and global, business success depends on the successful management of technology. Companies are succeeding with rapid innovation, insightful technology integration, creation of focused technology organizations, and skillful management of complexity. The program addresses how to succeed in this marketplace and emphasizes leadership and management; special considerations of technology innovation, commercialization, introduction, and integration; and methods and approaches of systems thinking.

The program, designed for working professionals, starts in January and lasts for 16 months. Classes are held on the Arlington Campus on Saturdays from 8 a.m. to 5 p.m. The program is 36 credits and includes a capstone project and an international residency. The international residency is approximately 8 days abroad focusing on global topics in technology management.

Admissions & Policies

Admissions

Administration

- Kevin Avruch, Dean
- Julie Shedd, Associate Dean
- Terrence Lyons, PhD Program Director

College Code: CA

The School for Conflict Analysis and Resolution (S-CAR), is committed to the development of theory, research, and practice that interrupt cycles of violence. The school community includes scholars, graduate and undergraduate students, alumni, practitioners, and organizations in the field of peace making and conflict resolution. Building on the strengths of our four research centers, field-based courses, and faculty with expertise from over a dozen disciplines, earning a degree at S-CAR will take you to the epicenter of conflict and prepare you for a meaningful career.

Recognized in 1997 as a Commonwealth Center of Excellence by the Virginia Legislature, S-CAR is committed to serving our students, faculty and staff, our local community, our global mission, and the field of Conflict Analysis and Resolution. S-CAR is a leader in George Mason University's commitment to be a University for the world, leveraging our long history of engagement in research and intervention in real world problems and our strength in preparing our graduates to productively engage in our local and global challenges. S-CAR strives to break down the silos of domestic and international conflict research and practice with teaching, research and practice that cut across levels of conflict.

Our world class faculty has published foundational texts on such topics as culture, social identity, narrative, religion, history and education, gender, and peacebuilding and consciousness. As scholar-practitioners, their projects and teaching engage them around the globe, including in the Middle East, Africa, the Caucasus, and here in the United States.

We offer a full complement of degree programs: Bachelor’s, Master’s, Graduate Certificate, and Doctoral degrees that develop students’ ability to engage with theory and build their own practice.

Undergraduate Programs

Bachelor’s Degrees and Minors
Conflict Analysis and Resolution offers students a BA, BS, and two minors in an interdisciplinary social science field with practical applications. The minors are in Conflict Analysis and Resolution or Sport and Conflict Resolution. The field of conflict analysis and resolution analyzes the sources and dynamics of conflict and the means for resolution toward lasting peace. Conflict resolution students take a series of core courses that provide a background in conflict theory, analysis, and conflict resolution skills. All conflict analysis and resolution majors also choose an area of concentration. There are six concentrations: Building Peace in Divided Societies, Global Engagement, Political and Social Action, Justice and Reconciliation, Interpersonal Dynamics, and Collaborative Leadership. After selecting a concentration, students choose courses from units throughout the university that relate to the concentration and their areas of interest. The major also requires three credits of field experience in the form of an internship, independent research, or study abroad.

Bachelor’s/Accelerated Master’s

Bachelor’s/Accelerated Master’s
The School offers qualified undergraduates the opportunity to apply to the accelerated master’s degree program. If accepted, students will earn both an undergraduate and a graduate degree after satisfactory completion of 147 credits, sometimes within 5 years. More information
about the degree options and application process may be found here (http://scar.gmu.edu/undergraduate/degrees/accelerated-masters).

Graduate Programs

PhD Program
The PhD program in Conflict Analysis and Resolution, the first of its kind in the United States, provides advanced study for students in the fields of conflict and conflict resolution. Students are prepared for careers as researchers, theoreticians, and teachers in higher education, and as policy administrators, analysts, and consultants in the public and the private sectors. The program stresses a close link between knowledge of theory and process in the resolution of conflict. For this, training in the methods of research and analysis is emphasized. In addition, students are expected to obtain a background in a substantive area of conflict, usually related to the topic of the dissertation.

MS Program
The MS in Conflict Analysis and Resolution is a professional program that prepares students for practice and further academic work by integrating conflict analysis and resolution theory, research, and practical techniques. Participants study the theory, methods, and ethical perspectives of the field, and apply this knowledge in laboratory simulations and workshops, internships, and field practice. Graduates work in a variety of settings where conflict resolution is useful and interest groups are in conflict with current and emergent public policy. Examples are businesses, unions, government agencies, religious groups, court systems, educational institutions, community centers, international relief and development organizations, and consulting firms.

Graduate Certificates
S-CAR offers a graduate certificate in Mass Atrocity and Genocide Prevention and a graduate certificate in Conflict Analysis and Resolution. The Conflict Analysis and Resolution certificate offers four concentrations: Advanced Skills; Collaborative Community Action; Prevention and Reconstruction Contexts; and World Religions and Peacebuilding. Each of these 15-credit programs is specifically tailored to provide students with practical knowledge of conflict analysis and resolution relevant to their focused areas of work. Designed for mid-career professionals studying in a cohort environment, the certificate programs integrate conflict analysis and resolution theory, research, and practical technique. These programs use intensive course sessions, lecture, seminar, and applied mentor learning in real and simulated situations to prepare students to use conflict analysis and resolution approaches in their work in a variety of fields.

Emeritus faculty
Cheldelin, Mitchell, Sluzki

Requirements & Policies

Policies
Students should become familiar with the university's general academic policies in addition to those specific to each academic unit. See the Academic Policies (p. 77).

Policies specific to each academic program can be found listed in each program's catalog listing.

Appeal of Decisions
The policies of the School for Conflict Analysis and Resolution are designed to be consistent, equitable, and transparent. Our office strives to be thorough, timely, and open to answer any questions students may have regarding our decisions and/or the process through which they were reached. Students seeking clarification and explanation of the decision should request an appointment with the appropriate Program Director to discuss their concerns.

Students have the right to appeal decisions regarding requests for academic actions. This step can only be taken after a request to meet with the Program Director. Students who wish to pursue an appeal after this meeting should do so only if they can provide sufficient and compelling reasons for their initial claim to be reconsidered. Such reasons include newly available documentation, proof of an irregularity in procedures, proof of inequity or inconsistency, or consequences so serious that further review is warranted. A student's dissatisfaction or disagreement with the decision does not constitute sufficient reason for a decision to be changed. Appeals are first reviewed by the Program Director. If denied, the appeal is forwarded to the Dean. The decision of the Dean is the final decision of the School.

If the appeal is a case involving a school-level policy, the Dean serves as the final point of appeal. If the appeal involves university level policies, students must first complete the school-level appeal process before appealing to the Provost's Office.

Programs

• Conflict Analysis and Resolution Graduate Certificate
• Conflict Analysis and Resolution Minor
• Conflict Analysis and Resolution, BA
Conflict Analysis and Resolution, BA

Banner Code: CA-BA-CONF

The world is becoming increasingly connected and the ability to create and maintain cross-cultural connections is more important than ever. As the effects of violence and conflict are felt throughout the global community, we are seeing more and more opportunities for collaboration, problem solving, and peacebuilding in local communities and across international barriers. To prepare our students to make cross-cultural connections, Bachelor's of Arts in Conflict Analysis and Resolution students must demonstrate intermediate level proficiency in a foreign language.

Concentrations
All conflict analysis and resolution majors choose an area of concentration from the following:

- Building Peace in Divided Societies
- Global Engagement
- Political and Social Action
- Justice and Reconciliation
- Interpersonal Dynamics
- Collaborative Leadership

Advising
School for Conflict Analysis and Resolution advisors help students create an interdisciplinary course of study that meets their interests and career goals. All majors are strongly encouraged to meet regularly with an academic advisor from the School who will help students develop and follow a coherent plan of study and complete the degree in a timely manner.

Admissions & Policies

Policies
For policies governing all undergraduate degrees, see AP.5 Undergraduate Policies (p. 87).

Major Coursework Grade Requirement
Students cannot use more than 12 credits of coursework within the major with a C- or D grade to count towards the Conflict Analysis and Resolution, BA. If a student receives C- or D grades in excess of the allowed number, they may retake courses to meet the major coursework grade requirement for graduation. Students taking a graduate course for undergraduate credit must achieve a grade of B- or higher for graduate course credits to count towards their undergraduate degree.

Transfer Students
For policies governing admission and requirements for students transferring from another college or university, see Undergraduate Admission Policies - Transfer. (p. 67)

Admitted and enrolled transfer students who have completed an AA, AS, or AA&S degree from the Virginia Community College System (VCCS) and have been offered admission to Mason by the Office of Admissions may be eligible for a waiver of all George Mason University’s Mason Core (p. 142) requirements in accordance with the Guaranteed Admission Agreement. Students eligible for this waiver are still required by the university to complete ENGH 302 Advanced Composition (Mason Core) (p. 142) and a synthesis course.

Transfer students who have been offered admission under the terms of the Guaranteed Admission Agreement and are pursuing a BA are considered to have met all school requirements except for proficiency in a foreign language.

Students with a bachelor’s degree from an accredited institution who are pursuing a BA in this school are considered to have met all school requirements except for proficiency in a foreign language.

Requirements

Degree Requirements
Total credits: 120

Students must fulfill all requirements for bachelor’s degrees as stated in Academic Policies including all Mason Core requirements. Students majoring in Conflict Analysis and Resolution must also complete the college-level requirements for foreign language proficiency as well as 51 major requirement credits for the BA degree.

Students pursuing a double major/degree with a program outside of the S-CAR undergraduate program will be expected to fulfill all of the Mason Core and college requirements necessary to complete the second major. Please check with the second major department concerning additional requirements.

Total Credits 27

Field Experience
Students can choose to fulfill this requirement through an internship, service learning, study abroad, or independent study.
Students may not be approved for field experience until they have earned at least 30 credits. It is recommended that students complete at least nine credits of conflict coursework before applying for field experience credit. Prior approval by the Director of Field Experience is required for students to receive credit through any field experience options. Students interested in trips with S-CAR can find information here (https://scar.gmu.edu/academics/undergraduate/study-abroad). Students interested in study abroad through the Global Education Office can find information here (https://studyabroad.gmu.edu). Please contact an S-CAR advisor with questions or for information on the opportunities, policies, and procedures for field experience credit.

### Skills and Practice

This three credit requirement can be fulfilled by taking:

1. an additional 3 credits of field experience, OR
2. a foreign language course at the 250 level or higher, OR
3. one of the 3 credit courses or three of the 1 credit courses listed below.

<table>
<thead>

</tbody>
</table>

**Total Credits: 3**

### Concentrations

There are seven concentrations.

- **Concentration in Interpersonal Dynamics (INTD)** (p. 940)
- **Concentration in Collaborative Leadership (CLDR)** (p. 940)
- **Individualized Concentration (IND)** (p. 941)

To fulfill the concentration requirement students select six concentration courses. Four of those six courses must be taken from within their chosen concentration. The remaining two concentration courses may be taken from any of the concentration course lists. Special topics courses relevant to the concentration and/or courses that provide regional expertise can be substituted with departmental approval. Students are encouraged to check special topics courses each semester and think creatively about which courses support learning in their chosen concentration. At least two of the six concentration courses must be CONF courses. Courses may not double count for the concentration requirement and the skills and practice requirement.

### Concentration in Building Peace in Divided Societies (BPDS)

Focuses on how divided societies with a history of conflict seek to transform relationships and situations of violence and injustice. Examines communities and societies that have experienced conflict and how individuals and groups build peace locally and globally.

</tbody>
</table>

**Total Credits: 12**

### Concentration in Global Engagement (GLBE)

Focuses on studying the dynamics and impact of global conflict resolution. Examines domestic and international dimensions of security, state-to-state conflict, internal wars, terrorism, migration, negotiation, and diplomacy. Explores what can be done to reduce violent conflict and increase peace and security.

<table>

</tbody>
</table>

**Total Credits: 12**

Courses may NOT double count for the concentration requirement and the skills and practice requirement.
**Concentration in Political and Social Action (PSA)**
Focuses on the ways that people organize themselves to effect change in their societies. This concentration explores social action, social organization, social movements, and civil resistance to analyze and investigate the role of constructive conflict.

**Individualized Concentration (IND)**

Students interested in creating their own concentration can work with an advisor to decide upon a set of at least six courses that form a cohesive theme and will fulfill the requirements of the BA in Conflict Analysis and Resolution. Individualized concentrations must be approved by the Director of the Undergraduate Program.

**Foreign Language Proficiency**

Students must demonstrate intermediate-level proficiency in one foreign language. This requirement may be fulfilled by successfully completing a foreign language course numbered 202 or higher. Students may also fulfill this requirement by achieving a satisfactory score on a university approved foreign language proficiency test. Students who are already proficient in a second language may be eligible for a waiver of this requirement.

**Writing-Intensive Requirement**

All Mason students are required to complete at least one course designated as "writing intensive" in their major at the 300-level or above. CONF 302 Culture, Identity, and Conflict has been designated "writing intensive."

**Electives**

Remaining credits needed to bring the degree total to 120 may be fulfilled with general elective courses.¹,²

Total Credits 40

¹ Most programs include the writing-intensive course designated for the major as part of the major requirements; this course is therefore not counted towards the total required for Mason Core.

² Minimum 3 credits required.

**Accelerated Master’s**

**Conflict Analysis and Resolution, BA or BS/Conflict Analysis and Resolution, Accelerated MS**

**Overview**

This accelerated Master’s option is designed for highly qualified and motivated undergraduate students that have completed at least 6 credit hours of CONF coursework at the time of application. If accepted, students may take up to 12 credits of graduate coursework before undergraduate degree conferral and will be able to earn an undergraduate degree and the Conflict Analysis and Resolution, MS (p. 951) after satisfactory completion of at least 147 credits. The time period for the combined program is typically five years. It provides a streamlined MS application process with no additional application fee.

For more detailed information, see AP.6 Bachelor’s/Accelerated Master’s Degrees (p. 93). For policies governing all graduate degrees, see AP.6 Graduate Policies (p. 90).

**Application Requirements**

For specific application requirements and information for the accelerated Conflict Analysis and Resolution, MS (p. 951), see Eligibility, Policies, and Deadlines (http://scar.gmu.edu/undergraduate/degrees/accelerated-masters). Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in Graduate Admissions (p. 68).

Students must have a minimum undergraduate cumulative GPA of 3.25 at the time of application.

**Accelerated Master’s Requirements**

- During the first semester in senior status admitted students may take up to 6 credits (1-2 classes) that will count towards both their undergraduate AND graduate degrees. During the second semester of senior status, students may take up to 6 credits (1-2 classes) that will count towards the graduate degree only.

- Students must begin their master’s program the semester immediately following conferral of the undergraduate degree and will be expected to complete all remaining graduate program requirements within five years.

- See the program website (https://scar.gmu.edu/academics/undergraduate/accelerated-masters) for additional information.
Accelerated MS Requirements

• No grade below a B is permitted for any undergraduate or graduate CONF course taken after application to the accelerated master’s program until completion of the undergraduate program.
• If a student receives a grade below a B in any CONF course after acceptance in the program, they will not be allowed to continue on to the master’s program. Students that have received a grade below a B in a CONF course after acceptance into the program may re-apply to the master’s program after conferral of the undergraduate degree; however, re-application does not guarantee admission.
• At the time of the undergraduate degree conferral, students’ GPAs must meet the standard required for admission to the master’s degree.
• Students may not take more than 12 credits a semester if taking two graduate courses or 15 credits a semester if taking one graduate course.

Accelerated Option Requirements

While undergraduate students, accelerated master’s students complete two graduate courses as indicated on their Accelerated Master’s Program Application with a minimum grade of B in each course. Once admitted to the accelerated master’s pathway, students must maintain a minimum cumulative GPA of 3.25 in all coursework. Upon completion and conferral of the undergraduate degree in the semester indicated in the application, they submit the Bachelor’s/Accelerated Master’s Transition Form and are admitted to graduate status.

Bachelor’s Degree (selected)/Interdisciplinary Studies, Accelerated MAIS (Religious Studies Concentration)

Overview
Highly-qualified undergraduates in selected majors (see below) may apply to the accelerated master’s degree in interdisciplinary studies with a concentration in religious studies. If accepted, and depending on their undergraduate major, students will be able to earn a bachelor’s degree in their chosen major and a master’s in interdisciplinary studies with a concentration in religious studies after satisfactory completion of 150 credits, sometimes within five years. See AP.6.7 Bachelor’s/Accelerated Master’s Degrees (p. 93).

Students in an accelerated degree program must fulfill all university requirements for the master’s degree. For policies governing all graduate degrees, see AP.6 Graduate Policies (p. 90).

Selected Majors

• Art history (p. 394)
• Philosophy (p. 442)
• Conflict analysis and resolution (p. 936)
• Global affairs (p. 523)
• History (p. 402)
• Religious studies (p. 491)
• Russian and Eurasian studies (p. 568)
• Sociology (p. 507)
• Anthropology (p. 497)

If the student has not majored in religious studies (p. 491), it is preferred, though not required, that the student have a minor in religious studies (p. 496).

Application Requirements
Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in the Admissions (p. 68). For information specific to the accelerated MAIS, see Application Requirements and Deadlines (http://mais.gmu.edu/programs/la-mais-isin/application).

Total Credits 6

As graduate students, accelerated master’s students have an advanced standing. They must meet all master’s degree requirements except for the two courses (6 credits) they completed as undergraduates. Students must begin their master’s program the semester immediately following conferral of the undergraduate degree.

Reserve Graduate Credit
Students may take up to 6 additional graduate credits as reserve graduate credit. These credits do not apply to the undergraduate degree. To apply these credits to the master’s degree, students should use the Bachelor’s/Accelerated Master’s Transition Form.

Total Credits 6

The ability to take courses, including ones not listed above, for reserve graduate credit is available to all high achieving undergraduates with the permission of the department. Permission is normally granted only to qualified Mason seniors within 15 hours of graduation. See AP.1.4.4 Graduate Course Enrollment by Undergraduates (p. 79).
Bachelor's Degree (selected)/Interdisciplinary Studies, Accelerated MAIS (Social Justice and Human Rights Concentration)

Overview

Highly-qualified undergraduates in select majors (listed below) may apply to the accelerated master’s degree in interdisciplinary studies with a concentration in social justice and human rights (p. 542). If accepted, and depending on their undergraduate major, students will be able to earn an undergraduate degree in their chosen major and a master’s in interdisciplinary studies with a concentration in social justice and human rights after satisfactory completion of 150 credits, sometimes within five years.

For more detailed information, see AP6.7 Bachelor’s/Accelerated Master’s Degrees (p. 93). For policies governing all graduate degrees, see AP6 Graduate Policies (p. 90).

Selected Majors

Anthropology (p. 497), Environmental and Sustainability Studies (p. 576), Sociology (p. 507), English (p. 370), History (p. 394), Philosophy (p. 442), Conflict Analysis and Resolution (p. 938), Psychology (p. 461), Government and International Politics (p. 972), Integrative Studies (p. 593), and Communication (p. 314).

Application Requirements

Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in Graduate Admissions (p. 68). For information specific to the accelerated MAIS, see Application Requirements and Deadlines (http://mais.gmu.edu/programs/la-mais-isin/application) on the departmental web site.

Accelerated Option Requirements

While undergraduate students, accelerated master’s students complete INTS 540 Contemporary Issues in Social Justice Human Rights and one course chosen from the list of electives for the MAIS concentration in social justice and human rights as indicated on their Accelerated Master’s Program Application with a minimum grade of B in each course. Once admitted to the accelerated master’s pathway, students must maintain a minimum cumulative GPA of 3.25 in all course work. Upon completion and conferral of the undergraduate degree in the semester indicated in the application, they submit the Bachelor’s/Accelerated Master’s Transition Form and are admitted to graduate status.

As graduate students, accelerated master’s students have an advanced standing. They must meet all master’s degree requirements except for the two courses (6 credits) they completed as undergraduates. Students must begin their master’s program the semester immediately following conferral of the undergraduate degree.

Reserve Graduate Credit

Students may take up to 6 additional graduate credits as reserve graduate credit (chosen from the list of electives for the MAIS concentration in social justice and human rights). These credits do not apply to the undergraduate degree. The ability to take courses for reserve graduate credit is available to all high achieving undergraduates with the permission of the program. Permission to take a graduate course for reserve graduate credit is normally granted only to Mason seniors within 15 hours of graduation. See AP1.4.4 Graduate Course Enrollment by Undergraduates (p. 79).

Bachelor's Degree (selected)/Interdisciplinary Studies, Accelerated MAIS (Women and Gender Studies Concentration)

Overview

Highly-qualified undergraduates in select majors may apply to the accelerated master’s degree in interdisciplinary studies with a concentration in women and gender studies (p. 542). If accepted, and depending on their undergraduate major, students will be able to earn a bachelor’s degree in their chosen major and a master’s degree in interdisciplinary studies with a concentration in women and gender studies after satisfactory completion of 150 credits, sometime within five years.

For more detailed information, see AP6.7 Bachelor’s/Accelerated Master’s Degrees (p. 93). For policies governing all graduate degrees, see AP6 Graduate Policies (p. 90).

Selected Majors

Anthropology (p. 497), Sociology (p. 507), English (p. 370), History (p. 394), Philosophy (p. 442), Conflict Analysis and Resolution (p. 938), Psychology (p. 461), Government and International Politics (p. 972), and Communication (p. 314).

Application Requirements

Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in Graduate Admissions (p. 68). Total Credits: 6

The ability to take courses, including ones not listed above, for reserve graduate credit is available to all high achieving undergraduates with the permission of the department. Permission is normally granted only to qualified Mason seniors within 15 hours of graduation. See AP1.4.4 Graduate Course Enrollment by Undergraduates (p. 79).

**Conflict Analysis and Resolution, BS**

**Banner Code:** CA-BS-CONF

Analytical skills and techniques are critical to solving the world’s toughest problems. In order to solve conflict we must first understand it. Critical thinking and research skills are the focus of our Bachelor of Science program and are in demand by employers of all sectors. Students pursuing a Bachelor’s of Science in Conflict Analysis and Resolution develop research skills and have the opportunity to gain experience designing surveys, conducting interviews, analyzing statistics, and organizing data.

All conflict analysis and resolution majors choose an area of concentration:

- Building Peace in Divided Societies
- Global Engagement
- Political and Social Action
- Justice and Reconciliation
- Interpersonal Dynamics
- Collaborative Leadership

**Advising**

Advisors help students create an interdisciplinary course of study that meets their interests and career goals. All majors are strongly encouraged to meet regularly with an academic advisor from the School who will help students develop and follow a coherent plan of study and complete the degree in a timely manner.

**Admissions & Policies**

**Policies**

For policies governing all undergraduate degrees, see AP5 Undergraduate Policies (p. 87).

**Major Coursework Grade Requirement**

Students cannot use more than 12 credits of coursework within the major with a C- or D grade to count towards the Conflict Analysis and Resolution, BS. If a student receives C- or D grades in excess of the allowed number, they may retake courses to meet the major coursework grade requirement for graduation. Students taking a graduate course for undergraduate credit must achieve a grade of B- or higher for graduate course credits to count towards their undergraduate degree.

**Transfer Students**

For policies governing admission and requirements for students transferring from another college or university, see Undergraduate Admission Policies - Transfer. (p. 67)

Admitted and enrolled transfer students who have completed an AA, AS, or AA&S degree from the Virginia Community College System (VCCS) and have been offered admission to Mason by the Office of Admissions may be eligible for a waiver of all George Mason University’s Mason Core (p. 142) requirements in accordance with the Guaranteed Admission Agreement. Students eligible for this waiver are still required by the university to complete ENGH 302 Advanced Composition (Mason Core) (p. 142) and a synthesis course.

**Requirements**

**Degree Requirements**

Total credits: 120

Students must fulfill all requirements for bachelor’s degrees as stated in Academic Policies including all Mason Core requirements. S-CAR majors must complete the 6 credit college-level requirement in research methods as well as 51 major requirement credits for the BS degree.

Students pursuing a double major/degree with a program outside of the S-CAR undergraduate program will be expected to fulfill all of the Mason Core and college requirements necessary to complete the second major. Please check with the second major department concerning additional requirements.

Field Experience

Students can choose to fulfill this requirement through an internship, service learning, study abroad, or independent study.

Students may not be approved for field experience until they have earned at least 30 credits. It is recommended that students complete at least 9 credits of conflict coursework before applying for field experience credit. Prior approval by the Director of Field Experience is required for students to receive credit through any field experience options. Students interested in trips with S-CAR can find information here (https://scar.gmu.edu/field-experience). Students interested in study abroad through the Global Education Office can find information here (http://studyabroad.gmu.edu). Please contact an S-CAR advisor with questions or for information on the opportunities, policies, and procedures for field experience credit.

Skills and Practice

This three credit requirement can be fulfilled by taking

1. an additional 3 credits of field experience, OR
2. a foreign language course at the 250 level or higher, OR
3. one 3 credit course or three 1 credit courses from the following:

Concentrations

There are seven concentrations:

- Concentration in Building Peace in Divided Societies (BPDS) (p. 946)
- Concentration in Global Engagement (GLBE) (p. 946)
- Concentration in Political and Social Action (PSA) (p. 946)
- Concentration in Justice and Reconciliation (JRCN) (p. 946)
- Concentration in Interpersonal Dynamics (INTD) (p. 947)
- Concentration in Collaborative Leadership (CLDR) (p. 947)

To fulfill the concentration requirement students select six concentration courses. Four of those six courses must be taken from within their chosen concentration. The remaining two concentration courses may be taken from any of the concentration course lists. Special topics courses relevant to the concentration and/or courses that provide regional expertise can be substituted with departmental approval. Students are encouraged to check special topics courses each semester and think creatively about the applicability of courses that support learning in their chosen concentration. At least two of the six concentration courses must be CONF courses. Courses may not double count for the concentration requirement and the skills and practice requirement.
**Concentration in Building Peace in Divided Societies (BPDS)**
Focuses on how divided societies with a history of conflict seek to transform relationships and situations of violence and injustice. Examines communities and societies that have experienced conflict and how individuals and groups build peace locally and globally.

Total Credits 12

**Concentration in Global Engagement (GLBE)**
Focuses on studying the dynamics and impact of global conflict resolution. Examines domestic and international dimensions of security, state-to-state conflict, internal wars, terrorism, migration, negotiation, and diplomacy. Explores what can be done to reduce violent conflict and increase peace and security.

Individualized Concentration (IND)
Students interested in creating their own concentration can work with an advisor to decide upon a set of at least six courses that will fulfill the requirements of the BS in Conflict Analysis and Resolution.

Writing-Intensive Requirement
All Mason students are required to complete at least one course designated as "writing intensive" in their major at the 300-level or above. CONF 302 Culture, Identity, and Conflict has been designated "writing intensive."

Electives

<table>
<thead>

1 Up to 3 credits of 100 level Recreation (RECR) courses may be taken as general elective credits.

2 Only Military Science (MLSC) courses at the 400-level can be used for credit for a degree in the School; credit for other MLSC courses may not be applied toward a degree in the School.

Mason Core
Some Mason Core (p. 142) requirements may already be fulfilled by the major requirements listed above. Students are strongly encouraged to consult their advisors to ensure they fulfill all remaining Mason Core (p. 142) requirements.

Total Credits: 3

1 Most programs include the writing-intensive course designated for the major as part of the major requirements; this course is therefore not counted towards the total required for Mason Core.

2 Minimum 3 credits required.

Accelerated Master's
Conflict Analysis and Resolution, BA or BS/Conflict Analysis and Resolution, Accelerated MS
Overview
This accelerated Master's option is designed for highly qualified and motivated undergraduate students that have completed at least 6 credit
hours of CONF coursework at the time of application. If accepted, students may take up to 12 credits of graduate coursework before undergraduate degree conferral and will be able to earn an undergraduate degree and the Conflict Analysis and Resolution, MS (p. 951) after satisfactory completion of at least 147 credits. The time period for the combined program is typically five years. It provides a streamlined MS application process with no additional application fee.

For more detailed information, see AP.6.7 Bachelor's/Accelerated Master’s Degrees (p. 93). For policies governing all graduate degrees, see AP6 Graduate Policies (p. 90).

Application Requirements
For specific application requirements and information for the accelerated Conflict Analysis and Resolution, MS (p. 951), see Eligibility, Policies, and Deadlines (http://scar.gmu.edu/undergraduate/degrees/accelerated-masters). Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in Graduate Admissions (p. 68).

Students must have a minimum undergraduate cumulative GPA of 3.25 at the time of application.

Accelerated Master’s Requirements
• During the first semester in senior status admitted students may take up to 6 credits (1-2 classes) that will count towards both their undergraduate AND graduate degrees. During the second semester of senior status, students may take up to 6 credits (1-2 classes) that will count towards the graduate degree only.
• Students must begin their master’s program the semester immediately following conferral of the undergraduate degree and will be expected to complete all remaining graduate program requirements within five years.
• See the program website (https://scar.gmu.edu/academics/undergraduate/accelerated-masters) for additional information.

Accelerated MS Requirements
• No grade below a B is permitted for any undergraduate or graduate CONF course taken after application to the accelerated master’s program until completion of the undergraduate program.
• If a student receives a grade below a B in any CONF course after acceptance in the program, they will not be allowed to continue on to the master’s program. Students that have received a grade below a B in a CONF course after acceptance into the program may re-apply to the master’s program after conferral of the undergraduate degree; however, re-application does not guarantee admission.
• At the time of the undergraduate degree conferral, students’ GPAs must meet the standard required for admission to the master’s degree.
• Students may not take more than 12 credits a semester if taking two graduate courses or 15 credits a semester if taking one graduate course.

Bachelor’s Degree (selected)/Interdisciplinary Studies, Accelerated MAIS (Religious Studies Concentration)

Overview
Highly-qualified undergraduates in selected majors (see below) may apply to the accelerated master’s degree in interdisciplinary studies with a concentration in religious studies. If accepted, and depending on their undergraduate major, students will be able to earn a bachelor’s degree in their chosen major and a master’s in interdisciplinary studies with a concentration in religious studies after satisfactory completion of 150 credits, sometimes within five years. See AP.6.7 Bachelor’s/Accelerated Master’s Degrees (p. 93).

Students in an accelerated degree program must fulfill all university requirements for the master’s degree. For policies governing all graduate degrees, see AP6 Graduate Policies (p. 90).

Selected Majors
• Art history (p. 394)
• Philosophy (p. 442)
• Conflict analysis and resolution (p. 936)
• Global affairs (p. 523)
• History (p. 402)
• Religious studies (p. 491)
• Russian and Eurasian studies (p. 568)
• Sociology (p. 507)
• Anthropology (p. 497)

If the student has not majored in religious studies (p. 491), it is preferred, though not required, that the student have a minor in religious studies (p. 496).

Application Requirements
Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in the Admissions (p. 68). For information specific to the accelerated MAIS, see Application Requirements and Deadlines (http://mais.gmu.edu/programs/la-mais-isin/application).

Accelerated Option Requirements
While undergraduate students, accelerated master’s students complete two graduate courses as indicated on their Accelerated Master’s Program Application with a minimum grade of B in each course. Once admitted to the accelerated master’s pathway, students must maintain a minimum cumulative GPA of 3.25 in all coursework. Upon completion and conferral of the undergraduate degree in the semester indicated in the application, they submit the Bachelor’s/Accelerated Master’s Transition Form and are admitted to graduate status.

**Total Credits** 6

The ability to take courses, including ones not listed above, for reserve graduate credit is available to all high achieving undergraduates with the permission of the department. Permission is normally granted only to qualified Mason seniors within 15 hours of graduation. See AP.1.4.4 Graduate Course Enrollment by Undergraduates (p. 79).

**Bachelor’s Degree (selected)/Interdisciplinary Studies, Accelerated MAIS (Social Justice and Human Rights Concentration)**

**Overview**

Highly-qualified undergraduates in select majors (listed below) may apply to the accelerated master’s degree in interdisciplinary studies with a concentration in social justice and human rights (p. 542). If accepted, and depending on their undergraduate major, students will be able to earn an undergraduate degree in their chosen major and a master’s in interdisciplinary studies with a concentration in social justice and human rights after satisfactory completion of 150 credits, sometimes within five years.

For more detailed information, see AP.6.7 Bachelor’s/Accelerated Master’s Degrees (p. 93). For policies governing all graduate degrees, see AP.6 Graduate Policies (p. 90).

**Selected Majors**

Anthropology (p. 497), Environmental and Sustainability Studies (p. 576), Sociology (p. 507), English (p. 370), History (p. 394), Philosophy (p. 442), Conflict Analysis and Resolution (p. 938), Psychology (p. 461), Government and International Politics (p. 972), Integrative Studies (p. 593), and Communication (p. 314).

**Application Requirements**

Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in Graduate Admissions (p. 68). For information specific to the accelerated MAIS, see Application Requirements and Deadlines (http://mais.gmu.edu/programs/la-mais-isin/application) on the departmental web site.

**Accelerated Option Requirements**

While undergraduate students, accelerated master’s students complete INTS 540 Contemporary Issues in Social Justice Human Rights and one course chosen from the list of electives for the MAIS concentration in social justice and human rights as indicated on their Accelerated Master’s Program Application with a minimum grade of B in each course. Once admitted to the accelerated master’s pathway, students must maintain a minimum cumulative GPA of 3.25 in all course work. Upon completion and conferral of the undergraduate degree in the semester indicated in the application, they submit the Bachelor’s/Accelerated Master’s Transition Form and are admitted to graduate status.

As graduate students, accelerated master’s students have an advanced standing. They must meet all master’s degree requirements except for the two courses (6 credits) they completed as undergraduates. Students must begin their master’s program the semester immediately following conferral of the undergraduate degree.

**Reserve Graduate Credit**

Students may take up to 6 additional graduate credits as reserve graduate credit (chosen from the list of electives for the MAIS concentration in social justice and human rights). These credits do not apply to the undergraduate degree. The ability to take courses for reserve graduate credit is normally granted only to Mason seniors within 15 hours of graduation. See AP.1.4.4 Graduate Course Enrollment by Undergraduates (p. 79).

**Bachelor’s Degree (selected)/Interdisciplinary Studies, Accelerated MAIS (Women and Gender Studies Concentration)**

**Overview**

Highly-qualified undergraduates in select majors (listed below) may apply to the accelerated master’s degree in interdisciplinary studies with a concentration in women and gender studies (p. 542). If accepted, and depending on their undergraduate major, students will be able to earn a bachelor’s degree in their chosen major and a master’s degree in interdisciplinary studies with a concentration in women and gender studies (p. 576). If accepted, and depending on their undergraduate major, students will be able to earn a bachelor’s degree in their chosen major and a master’s degree in interdisciplinary studies with a concentration in women and gender studies (p. 542). If accepted, and depending on their undergraduate major, students will be able to earn a bachelor’s degree in their chosen major and a master’s degree in interdisciplinary studies with a concentration in women and gender studies (p. 542).
Conflict Analysis and Resolution Minor

Banner Code: CONF

This minor provides students with the theory and skills to examine how and why conflicts occur and what can be done to mitigate their destructive aspects while reinforcing their constructive potential. Courses in the minor highlight relational, social, structural, and cultural factors that influence conflict and its resolution. This minor engages students in understanding the complexity of contemporary issues and problems and can be applied to many fields of study or professional careers.

Advising
Advisors help students create a course of study that meets their interests and career goals. All majors and minors are strongly encouraged to meet regularly with an academic advisor from the School who will help students develop and follow a coherent plan of study and complete the degree in a timely manner.

Admissions & Policies

Admissions
This minor is open to all undergraduate students.

Policies
Students pursuing this minor must complete 15 credits of coursework in conflict analysis and resolution with a minimum GPA of 2.00. Eight credits of coursework must be unique to the minor. For policies governing all minors, see AP.5.3.4 Minors (p. 90).

Conflict Analysis and Resolution, MS

Banner Code: CA-MS-CONF

This professional program prepares students for practice and further academic work by integrating conflict analysis and resolution theory, research, and practical techniques. Participants study the theory, methods, and ethical perspectives of the field, and apply this knowledge in laboratory simulations and workshops, internships, and field practice. Graduates work in a variety of settings where conflict resolution is useful and interest groups are in conflict with current and emergent public policy. Examples are businesses, unions, government agencies, religious groups, court systems, educational institutions, community centers, international relief and development organizations, and consulting firms.

Admissions & Policies

Admissions

Admission Requirements

Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in Graduate Admissions (p. 68). In addition, applicants must submit all undergraduate and graduate transcripts; two letters of recommendation, one of which should be from a faculty member in the applicant's undergraduate or graduate major field; a resume or curriculum vitae; and a 750- to 1,000-word essay on goals and reasons for seeking admission to the program. GRE or other standardized test scores are not required but may be submitted. The TOEFL is required of international students. For more information, see Admission of International Students (p. 71). Students can be admitted to the MS program for either the Fall or Spring semesters.

Background courses in social sciences, as well as prior work experience, are desirable. Prior graduate academic work is evaluated on an individual basis for possible transfer credit and fulfillment of program requirements; however, Mason usually does not reduce the total credits required for the degree. Students may enroll on a full- or part-time basis. The MS Program is available on-campus, online (https://masononline.gmu.edu/programs/conflict-analysis-and-resolution-ms) or in a hybrid format (on-campus and distance learning).

Policies

Mason requires all students to complete the master’s degree within six years of their official admission date.

Consult the S-CAR student handbook for information on registration procedures.

Transfer of Non-Degree Credit

A maximum of 12 credits of S-CAR graduate courses taken at George Mason as a non-degree graduate student, or as part of S-CAR’s graduate certificate program may be transferred into the MS program. How credit will be counted will be determined in consultation with the admitted student’s advisor. A maximum of six credits of non-S-CAR courses taken as non-degree credit can be counted toward the MS program. Courses counted toward another degree cannot be transferred.

Adding an S-CAR Certificate Program

Students may elect to complete an S-CAR Graduate Certificate (p. 937) in addition to the MS program. Graduate certificates are opportunities for students to further tailor their academic program and specialize in a specific area of conflict resolution practice. Certain graduate certificate courses can be used to fulfill MS program requirements. Students should consult with the Certificate Program Director and the Master’s Program Director for policies on counting certificate courses toward the MS degree.

Concentration in Conflict-Sensitive Development and Resilience (CSDR)

This concentration will be geared towards students who wish to work in development and humanitarian assistance fields, bringing in-depth knowledge of conflict dynamics to improving communities’ capacity to adapt to change and be resilient in times of social, economic, and political stress.

Additional courses under development

**Total Credits**: 9

**Professional Opportunities**: Journalism, Media, Communications, Conflict Resolution NGOs, Advocacy NGOs, International NGOs, Film Production

### Individualized Concentration (IND)

Students will also be able to craft their own 9 credit concentration with the approval of MS Program Director.

### Electives

Select 9 credits of elective courses from any 500, 600, or 700 level CONF courses, except required courses. (p. 1488)

**Total Credits**: 9

Students will need to declare their concentration by the start of their second semester of study. Students will need to take 9 credits of courses within the concentration to meet the concentration's distribution requirement.

Because the choice of courses within concentrations can vary significantly according to individual goals or needs, each student should develop a plan of study that should be discussed once each semester with the advisor and updated as appropriate.

With the advisor's approval, each student is eligible to include a maximum of six credits of electives from outside the S-CAR program, including courses in other Mason departments, consortium courses, and transfer courses from other universities.

Students wishing to complete a Master's Thesis or Internship would count these credits towards their elective requirement.

### Internship

The CONF 694 Internship internship course provides students with opportunities to use and develop conflict resolution skills, integrate theory and practice of conflict analysis and resolution, and network with professionals in the field to enhance employment opportunities. The internship requires 160 hours of supervised work per every 3 credits. The goals and objectives of the internship are defined in an application and memorandum of agreement to be signed by the student, the internship site supervisor, and the director of field experience before the internship begins.

Students may either take 3 or 6 credits of CONF 694 Internship.

### Thesis

Students wishing to complete a Master's Thesis are strongly encouraged to take CONF 797 Proposal Development (Proposal Development) the semester before beginning the thesis project. Before registering, students must have identified a Master’s thesis committee chair to supervise the project. Students should contact S-CAR student services to receive the CRN to register for thesis.

### Dual Degree Options

#### Dual Degree Program with the University of Malta

Students have the opportunity to pursue a MS in Conflict Analysis and Resolution from George Mason University and a MA in Conflict Resolution and Mediterranean Security from the University of Malta through an innovative Dual Degree Program. Teaching faculty includes professors from both George Mason University and the University of Malta. All teaching is in English and all classes are held at the Valetta Campus of the University of Malta. The 400-year-old University of Malta Valletta campus incorporates state-of-the-art instructional technology. The entire program is delivered over three intensive semesters on a full time basis starting in late September. Classes are held on a two week intensive block basis for the first two semesters while the third semester is devoted to the completion of a thesis.
Orientation in Malta begins at the end of September. Classes run from the beginning of October through June. Students work on their theses from June until October. University of Malta graduation is in November and Mason graduation is in December. The total duration of the program is 15 months. More information is available at the program website (http://scar.gmu.edu/academics/maltaprogram). US and Canadian students apply through the Mason graduate admissions process and indicate they want to participate in the Malta program. All other students should apply through the University of Malta. (http://www.um.edu.mt/imp)

Conflict Analysis and Resolution, MS and Social Work, MSW Dual Degree

The Department of Social Work (p. 279) and the School for Conflict Analysis and Resolution (p. 936) have joined forces to offer a three year dual-degree program. Students can earn both an MSW (p. 284) and an MS in Conflict Analysis and Resolution (p. 951) while taking advantage of the diversity of the Washington, D.C., metropolitan area and the university’s proximity to the nation’s capital. This is the only dual-degree program of its kind.

Admission Requirements

Applicants must meet the admission standards and application requirements specified in Graduate Admissions (p. 68) and apply using the online Application for Graduate Admission (http://admissions.gmu.edu). The application process is competitive, and applications are considered for the fall semester only.

Students interested in the 3-year dual degree program submit one online Application for Graduate Admission (http://admissions.gmu.edu), select the MSW in Social Work (p. 284) as a primary program, and submit all application support materials to the Office of Graduate Admission in the College of Health and Human Services. Applicants should communicate their interest in completing the dual degree program in their essays, and recommendations should address the dual program interest. Students must be admitted to both programs (fall only) to be admitted to the dual degree program.

For application deadlines and detailed application requirements please refer to the CHHS Admissions website (https://chhs.gmu.edu/admissions/graduate-admissions/standards-requirements-and-deadlines). Interested students should consult the MSW program website (https://socialwork.gmu.edu/program/view/19658), the MSW program (p. 284), and the MSW program director for additional information prior to applying.

Transfer of Credit

Transfer credit is governed AP6.5.3 Transfer of Credit (p. 92) and AP6 Graduate Policies (p. 90). Transfer credits must be approved by the program director and the dean. Students who enroll initially through non-degree studies should seek course advising through the department prior to taking a course and plan to submit their application to the dual degree program as soon as possible.

Please refer to the Transfer of Credit policy for the MSW in Social Work (p. 284) for departmental policy governing courses taken at another institution and the maximum number of credits allowed.

## Electives

Select 12 credits of CONF Electives with approval from S-CAR (p. 1488)

Total Credits: 12

## Accelerated Master's

### Conflict Analysis and Resolution, BA or BS/Conflict Analysis and Resolution, Accelerated MS

**Overview**

This accelerated Master's option is designed for highly qualified and motivated undergraduate students that have completed at least 6 credit hours of CONF coursework at the time of application. If accepted, students may take up to 12 credits of graduate coursework before undergraduate degree conferral and will be able to earn an undergraduate degree and the Conflict Analysis and Resolution, MS (p. 951) after satisfactory completion of at least 147 credits. The time period for the combined program is typically five years. It provides a streamlined MS application process with no additional application fee.

For more detailed information, see AP.6.7 Bachelor's/Accelerated Master's Degrees (p. 93). For policies governing all graduate degrees, see AP.6 Graduate Policies (p. 90).

### Application Requirements

For specific application requirements and information for the accelerated Conflict Analysis and Resolution, MS (p. 951), see Eligibility, Policies, and Deadlines (http://scar.gmu.edu/undergraduate/degrees/accelerated-masters). Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in Graduate Admissions (p. 68).

Students must have a minimum undergraduate cumulative GPA of 3.25 at the time of application.

### Accelerated Master's Requirements

- During the *first semester in senior status* admitted students may take up to 6 credits (1-2 classes) that will count towards both their undergraduate AND graduate degrees. During the *second semester of senior status*, students may take up to 6 credits (1-2 classes) that will count towards the graduate degree only.

- Students must begin their master's program the semester immediately following conferral of the undergraduate degree and will be expected to complete all remaining graduate program requirements within five years.

- See the program website (https://scar.gmu.edu/academics/undergraduate/accelerated-masters) for additional information.

### Accelerated MS Requirements

- No grade below a B is permitted for any undergraduate or graduate CONF course taken after application to the accelerated master’s program until completion of the undergraduate program.

- If a student receives a grade below a B in any CONF course after acceptance in the program, they will not be allowed to continue on to the master's program. Students that have received a grade below a B in a CONF course after acceptance into the program may re-apply to the master’s program after conferral of the undergraduate degree; however, re-application does not guarantee admission.

- At the time of the undergraduate degree conferral, students' GPAs must meet the standard required for admission to the master's degree.

- Students may not take more than 12 credits a semester if taking two graduate courses or 15 credits a semester if taking one graduate course.

## Conflict Analysis and Resolution Graduate Certificate

Banner Code: CA-CERG-CONF
This 15-credit certificate is specifically tailored to provide students with practical knowledge of conflict analysis and resolution relevant to their focused areas of work. Designed for mid-career professionals studying in a cohort environment, the certificate programs integrate conflict analysis and resolution theory, research, and practical technique. These programs use intensive course sessions, lecture, seminar, and applied mentored learning in real and simulated situations to prepare students to use conflict analysis and resolution approaches in their work in a variety of fields. Students choose one of four concentrations.

This certificate may only be pursued on a part-time basis, unless a student is concurrently enrolled in another degree program or takes additional courses over those required for the certificate program. Some courses are offered only in intensive Saturday and Sunday formats or online.

Concentrations

Advanced Skills
The Advanced Skills concentration covers conflict resolution skills in challenging conflicts and considers innovative and emerging practices. This concentration considers the complexity of conflict in a variety of different settings and prepares students to design and implement interventions for difficult conflicts. The concentration emphasizes skill development.

Prevention and Reconstruction Contexts
The Prevention and Stabilization Contexts concentration augments development, defense, security, or humanitarian aid work experience with the theories and skills of conflict analysis and resolution for designing, implementing, and evaluating conflict-sensitive initiatives internationally in areas of potential violence and post-conflict reconstruction and stabilization. Considers cross-sectoral approaches to long-term violence prevention and constructive conflict resolution.

World Religions and Peacebuilding
The World Religions and Peacebuilding concentration considers strategies to reduce global violence and terrorism by incorporating the best moral practices of religious communities into policy planning, diplomacy, civil society building and democratization. Covers strategies to elicit moderate moral religious expression in conflict regions to strengthen civil society and democracy.

Collaborative Community Action
All communities have conflicts, some much more severe than others, often driven by deep racial and ethnic divisions, economic inequity, complex intractable problems, and environmental degradation. Many community conflicts are triggered by changes, whether a new law or new development. These are among the many issues that effective, inclusive, collaborative community processes can help address. This concentration incorporates theory and skills needed to identify concerns and design collaborative processes that employ a wide range of design options ranging from small group dialogue to facilitated consensus building and online engagement to thousand person town meetings.

Admissions & Policies

Admissions Requirements
Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in Graduate Admissions (p. 68). Applicants to this certificate must submit an undergraduate transcript showing completion of an undergraduate degree or equivalent, a cover letter specifying interest in the program, two letters of recommendation, and a curriculum vitae or résumé indicating relevant work experience.

In addition, prior work experience in areas related to the chosen graduate certificate is desirable. GRE or other standardized test scores are not required but may be submitted. The TOEFL is required of international students. For more information, see Admission of International Students (p. 71).

Policies

Class Schedule
Please note that some classes for this graduate certificate are offered only in Saturday and Sunday sessions. Please check the Schedule of Classes for each term to identify course meeting dates, and specific add/drop dates for these partial semester courses.

### Conflict Analysis and Resolution, PhD

**Banner Code: CA-PHD-CONF**

The Conflict Analysis and Resolution doctoral program, the first of its kind in the United States, provides advanced study for students in the field of conflict analysis and conflict resolution. Students are prepared for careers as researchers, theoreticians, and teachers in higher education, and as policy administrators, analysts, and consultants in the public and private sectors.

The program stresses a close link between knowledge of theory and process in the resolution of conflict. For this, training in the methods of research and analysis is emphasized. In addition, students are expected to obtain a background in a substantive area of conflict, usually related to the topic of the dissertation.

### Admissions & Policies

#### Admissions

A master’s or equivalent degree is required for admission to the PhD program.

#### Application Requirements

In addition to meeting all admission requirements for graduate study, applicants must submit:

- all undergraduate and graduate transcripts
- three letters of recommendation, one of which should be from a faculty member in the applicant’s undergraduate or graduate major field
- a 750 to 1,000 word essay on goals and reasons for seeking admission to the program
• a written sample of work that shows the applicant’s potential for completing dissertation research in a doctoral program
• a resume or curriculum vitae.

The Graduate Record Exam (GRE) or other standardized test scores are not required but may be submitted. The Test of English as a Foreign Language (TOEFL) is required of international students.

For more information, see the Admission of International Students (p. 71). Although students may enroll on a full- or part-time basis, entry into the program is in the fall semester only.

Policies
For policies governing all graduate degrees, see AP.6.10 Requirements for Doctoral Degrees (p. 96).

Reduction of Credit
Since a master’s degree or equivalent is required for admission, students will automatically receive a 15 credit reduction of the number of credits required.

Students may have the required number of credits reduced by up to 15 additional credits based on relevant previous coursework. The actual number of applied credits is determined in consultation with the student’s advisor and the program director after a review of courses taken, subsequent to a student’s admission to the program.

Completion Timelines
Students must satisfactorily complete their coursework, comprehensive paper, advance to candidacy, and complete the dissertation within 9 years of admission to the program. Students are expected to have advanced to candidacy within 6 years of admission to the program.

Plan of Study Guidelines
All doctoral students should meet with their faculty advisor before starting classes to develop a plan of study. This plan should show the sequence of courses anticipated. It should be based on a discussion between the student and the advisor about the student’s interest and goals. The plan should ensure that the student completes coursework efficiently and is able to build toward candidacy. The student and the advisor should then meet at least once each semester thereafter to review and amend the plan. The Program Director should receive a copy of each new or revised plan of study.

Transfer of Non-Degree Credit
A maximum of 12 credits of S-CAR graduate courses taken at George Mason as a non-degree graduate student, or as part of S-CAR’s graduate certificate program may be transferred into the PhD program. How credit will be counted will be determined in consultation with the student’s advisor and the Doctoral Program Director. A maximum of 6 credits of non-S-CAR courses taken as non-degree credit can be counted toward the PhD program. Courses counted toward another degree cannot be transferred.

Adding a S-CAR Certificate Program
Students may elect to complete a S-CAR graduate certificate in addition to the PhD program. Graduate certificates are opportunities for students to further tailor their academic program and specialize in a specific area of Conflict Resolution practice. Certain graduate certificate courses can be used to fulfill PhD program requirements. Students should consult with the Certificate Program Director and Doctoral Program Director for policies on counting certificate courses toward the PhD degree.

Total Credits: 18

With the advisor’s approval, each student may include a maximum of 6 credits of electives from outside the S-CAR Program, including courses in other Mason departments, consortium courses, and transfer courses from other universities. The intent is to allow students to have maximum flexibility in selecting courses to build skills and knowledge needed in dissertation work. CONF 897 Directed Reading may be taken to meet the requirement. Only two directed readings classes (6 credits) can be applied toward doctoral elective requirements.
Foreign Language Requirement
At the point of application to fulfill the comprehensive paper, students will indicate to the Director of the Doctoral Program the membership of their dissertation committee. This committee will determine, based on the scope and nature of the student’s research, the specific language requirement a student must meet. This will be conveyed to the Director of the Doctoral Program. This language requirement must be completed prior to graduation.

Comprehensive Paper
Students are eligible to complete the comprehensive paper when they have completed all the requirements of coursework in the doctoral program with the exception of CONF 998 Doctoral Dissertation Proposal and CONF 999 Doctoral Dissertation Research and the language requirement. A student is advanced to candidacy upon successful completion of the comprehensive paper. Papers can be submitted for evaluation twice each year, once in the winter and once in the summer. Students who do not pass initially should form a plan of study with the chair of their dissertation committee and the Director of the Doctoral Program that will prepare them to resubmit. The comprehensive paper may be resubmitted two times for a total of three attempts. After three unsuccessful attempts, the student should consult with the Doctoral and Master’s Directors about the possibility of transferring to the MS program.

Advancement to Candidacy
Upon successfully completing coursework (except dissertation) listed on the Plan of Study and passing the comprehensive paper, students will be advanced to candidacy and will be personally notified of this by the Dean of S-CAR. Students are expected to advance to candidacy within 6 years of admission to the program. Students have a total of 9 years from admission to complete all course requirements, including the dissertation.

Dissertation Research
Students are required to complete 12 combined credits of CONF 998 Doctoral Dissertation Proposal and CONF 999 Doctoral Dissertation Research, including at least 3 credits of CONF 999 Doctoral Dissertation Research. Students must have a signed dissertation proposal in order to register for CONF 999 Doctoral Dissertation Research.

<td>Doctoral Dissertation Research</td>
<td>2</td>
</tr>
</tbody>
</table>

Total Credits 12

1 All CONF 998 courses are graded In Progress until completion of the proposal. At that time, a grade of Satisfactory is issued.
2 All CONF 999 courses are graded In Progress until the dissertation defense is successfully completed. At that time, a grade of Satisfactory is issued.

Dissertation Committee
Students should propose a Dissertation Committee to the Director of the Doctoral Program and the Dean who then formally appoint the committee. This must be done prior to taking the comprehensive exam. The Dissertation Committee must include a chairperson from among S-CAR graduate faculty and at least two other members of the graduate faculty, one of whom must be a non-S-CAR Mason faculty member. The Dean will inform the student, committee members, and Director of the Doctoral Program when the committee has been appointed.

Dissertation Proposal
After the student passes the comprehensive exam and advances to candidacy, the next job of the committee is to approve the candidate’s dissertation proposal. The proposal is the candidate’s description (in some detail) of his/her dissertation project, reflecting the successful work of the comprehensive examination paper. It will include an argument about the hypothesis/theory question being tackled and the specific methods of research to be used. It should be prepared in consultation with the chair of the committee, and must be approved by all committee members. After receiving permission from the full committee, the candidate makes an oral presentation of the dissertation proposal before the committee and the Director of the Doctoral Program that is also open to other S-CAR faculty, fellow students, and other scholars. In scheduling the defense, it is the student’s responsibility to ensure that all members of the committee are available and will be present for the defense.

A signed cover page from that proposal must be filed with the Doctoral Director. Failure to complete the formation of a committee and an approved proposal by the end of the 12-month period will result in the candidate’s dismissal from the doctoral program. (Candidates may appeal to the Dean a further extension of this dissertation preparation period, but such appeals will be allowed only on grounds of documented illness, family emergency, or military deployment). Candidates should consult thesis.gmu.edu (http://thesis.gmu.edu) to ensure the proposal is in the correct format and has been submitted to all the appropriate offices.

Writing the Dissertation and its Defense
The chair of the dissertation committee usually takes most of the responsibility for guiding the overall project and the writing of the dissertation, although all members (and other useful persons) should be consulted as appropriate. It is the committee’s responsibility to ensure a quality piece of work. When advanced to candidacy, the Guide for Preparing Graduate Thesis, Dissertation and Projects tells exactly how to prepare an acceptable dissertation. Please visit thesis.gmu.edu (http://thesis.gmu.edu) to ensure formatting guidelines are met and submission procedures followed.

It is essential that doctoral committee members have sufficient time to read and evaluate dissertation drafts with care prior to the dissertation defense date. The committee may require no more than one month to read the final draft and provide feedback. It is also essential that students have sufficient time after the defense to do final revisions, editing and formatting. If the University determines the deadlines for final library submission deadline is May 1, for example, the defense must take place prior to April 1 and the full draft dissertation must be delivered to the full committee before March 1.

The dissertation is to be orally defended in public, minimally with the entire committee present. The S-CAR faculty and students must receive public notice of the defense at least two weeks prior. Students are welcome to invite family and friends. The University may also send a representative. The public defense helps ensure that the University’s standards are met, and offers an opportunity to learn from the students’ research. After a successful defense, the cover page is signed by the members of the Dissertation Committee, PhD Program Director and Dean; and the dissertation is filed with the University. An additional signed copy should be delivered to the S-CAR Burton Library.
Dissertations must be presented to the library in the proper format or they will not be accepted. Please visit the University Dissertation & Thesis Services web site at thesis.gmu.edu/ for dissertation formatting requirements and submission deadlines. Mason’s Dissertation and Thesis Coordinator may be reached at udts@gmu.edu or 703-993-2222.

Mass Atrocity and Genocide Prevention Graduate Certificate

Banner Code: CA-CERG-MAGP

This 15-credit program is tailored to provide students with practical knowledge of conflict analysis and resolution relevant to Mass Atrocity Prevention, including genocide and mass violence prevention. Designed for mid-career professionals studying in a cohort environment, or graduate students seeking specialized, practical knowledge, the certificate program integrates conflict analysis and resolution theory, research, and practical techniques of preventing mass atrocities. Certificate courses include intensive sessions, lectures, seminars, and applied-mentored learning in real and simulated situations. Students consider strategies to prevent mass atrocities through policy planning, diplomacy, civil society building, democratization, development, education, and “up-streaming” prevention efforts that apply peace-building, dialogue, and conflict resolution approaches designed specifically for highly-escalated conflict contexts where mass atrocities seem likely to appear.

Admissions & Policies

Admissions

Requirements

Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in Graduate Admissions (p. 68). Applicants to this certificate must submit an undergraduate transcript showing completion of an undergraduate degree or equivalent, a cover letter specifying interest in the program, two letters of recommendation, and a curriculum vitae or résumé indicating relevant work experience.

In addition, prior work experience in areas related to the chosen graduate certificate is desirable. GRE or other standardized test scores are not required but may be submitted. The TOEFL is required of international students. For more information, see Admission of International Students (p. 71).

Policies

Class Schedule

Please note that some classes for this graduate certificate are offered only in Saturday and Sunday sessions. Please check the Schedule of Classes for each term to identify course meeting dates, and specific add/drop dates for these partial semester courses.

Sport and Conflict Resolution Minor (SCAR)

Banner Code: SCNR

There has been a real growth in the establishment of non-profit organizations that use ‘sport for development’, sport to bring diverse communities together and also ‘sport for peace’ organizations in high conflict areas of the world. This minor will help prepare students to work for organizations dedicated to using sports for development, community building and peace. It provides students with a cross section of courses in sports management and conflict resolution. Courses in sports management frame the sports industry in a philosophical, ethical, cultural and business context. Conflict resolution courses will introduce students to foundational concepts in the study of human conflict, the analysis of conflict and problem solving techniques for helping to resolve conflict.

This is an interdisciplinary minor offered by the School for Conflict Analysis and Resolution (p. 936) and the School of Recreation, Health, and Tourism. (p. 221)

Admissions & Policies

Admissions

This minor is available to all Mason undergraduate students.

Policies

Eight credits of coursework must be unique to the minor. For policies governing all minors, see AP 5.3.4 Minors (p. 87).

- Ann M. Ludwig, Assistant Dean for Undergraduate Academic Affairs

**College Code**: PP

The Schar School of Policy and Government prepares undergraduate and graduate students to be leaders who advance the public good in the private, public, and nonprofit sectors. Through research and education in policy, government, and international affairs, Schar allows Mason to more effectively serve the region, Commonwealth, nation, and world.

The Schar faculty combines original research with real-world experience to connect theory and practice for the benefit of students and wider constituencies. The School employs approximately 80 full-time faculty members across a wide range of disciplines, including political science, public administration, international relations, economics, management, geography, engineering, sociology, anthropology, and law. Schar is a major research unit of the University, with approximately $2 million per year in sponsored funding. Schar faculty members frequently advise governments, companies, and non-profit organizations, appear in the national and international media, and participate in public debates on critical issues of the day.

Schar offers two undergraduate majors, eight master's degree programs, three doctoral programs, and a range of undergraduate minors and graduate certificates. Collectively, these programs enroll approximately 2000 students. Schar offers classes on Mason's Fairfax and Arlington campuses, and its faculty members have offices on both campuses.

**Undergraduate Programs**

Schar offers two degrees for students interested in political science, government, and international relations: a BA in Government and International Politics and a BS in Public Administration. Majors in Government and International Politics take core courses in American political institutions, the political systems of other countries, and international relations. Students can focus their electives to earn a concentration in American institutions and processes, comparative politics, international political economy, international relations, law, philosophy and governance, political analysis, political behavior and identity politics, public policy, or a higher credit concentration in Philosophy, Politics, and Economics (https://ppe.gmu.edu). Majors in public administration and policy take courses in government, management, policy, and administration. Concentrations are offered in administration and management, economic policy analysis, international political economy, nonprofit management, public policy, and US government institutions.

Students have an opportunity to do internships as part of their degree programs, gaining valuable work experience while earning academic credit.

**Minors**

Schar offers minors in American government, international/comparative studies, international security, legal studies, and public policy and management. In addition, faculty from the School coordinate or participate in the Asia-Pacific and Northeast Asian Studies Minor, Global Systems Minor, Latin American Studies Minor, Middle East Studies Minor, Islamic Studies Minor, and Urban and Suburban Studies Minor. It participates with the Philosophy Department in the Political Philosophy Minor and with the Communications Department in the Political Communication Minor (CHSS). See Minors and Interdisciplinary Minors below.

**Bachelor's/Accelerated Master's Programs**

The School offers qualified undergraduates in any major the opportunity to apply to several accelerated master's degree programs. If accepted, students may earn both an undergraduate and a graduate degree, sometimes within five years. More information about the degree options and application process may be found here (http://schar.gmu.edu/programs/undergraduate-degrees/accelerated-masters-programs).

**Graduate Programs**

Schar offers three doctoral degree programs and eight master's degree programs, as well as numerous graduate certificate programs. Specific information on each program may be found by clicking the “Programs” tab at the top of this page.
The Schar School of Policy and Government and the Antonin Scalia Law School offer a joint JD/MPP degree program in law and public policy studies. For more information, go to the website (http://www.law.gmu.edu/academics/degrees/jd_mpp).

Research Centers
The Schar School of Policy and Government’s research centers focus on a wide range of issues and areas.

Center for Energy Science and Policy
Co-Directors: Richard Kauzlarich, PhD and Paul R. Houser, PhD
This center, a joint initiative of the College of Science and Schar School, provides objective analysis of key issues in the energy field that is grounded in original research. It serves as a center of gravity for the many researchers at George Mason whose work engages them with these issues and connects them with decision-makers in the economy, society, and government.

Center for Global Policy
Director: Jack Goldstone, PhD
This center conducts research on a wide range of global policy issues, including foreign trade, democratization and state-building, and transnational networks. It also analyzes specific policy issues for a variety of government agencies, and develops and serves as the home to several major cross-national databases for global policy.

Center for Microeconomic Policy Research
Director: John Earle, PhD
This center is a forum for policy-relevant research using micro-economic and micro-econometric methods.

Center for Regional Analysis
Director: Terry Clower, PhD
Focusing on economic development in technologically intensive regions, the Center for Regional Analysis (CRA) maintains a corporate technology database for the national capital region. The CRA provides economic forecasting services to government agencies at all levels around the world.

Center for Science and Technology Policy
Co-Directors: David M. Hart, PhD and Connie McNeely, PhD
This center helps facilitate the exchange of information and ideas among the worldwide science, foreign affairs, trade, and technology communities. Areas of emphasis include international trade and science and technology.

Center for Security Policy Studies
Director: Ellen Laipson, MA
Today’s security challenges—from proliferation and terrorism to climate change and cyber security— are beyond the scope of any one nation-state to address. Finding solutions requires international and multi-lateral cooperation among regional and global leaders, both state-based and outside the state, including corporate and non-governmental actors. The purpose of the Center for Security Policy Studies is to strengthen global strategic thinking by current and future policy-makers, so as to improve US and global security in the 21st century.

Center for the Study of International Medical Policies and Practices
Director: Arnauld Nicogossian, MD
This center provides leadership and focus on global medical and public health policies and processes, working collaboratively with health, science, and medical organizations in the public and private sectors, and academic organizations to address pressing global policy concerns.

Center for Transportation Public-Private Partnership Policy
Director: Jonathan L. Gifford, PhD
The Center is devoted to advancing the objective consideration of public-private partnerships for transportation system renewal and expansion through research, education and public service. The Center supports development of U.S. and international case studies of P3 projects and programs, analyses of the impact of P3s, sponsors workshops and conferences, and supports graduate students and faculty.

Michael V. Hayden Center for Intelligence, Policy, and International Security
Director: Larry Pfeiffer, M.A.
The threats to global security have rarely ever been so great in scope and number—in such a complex, complicated world, intelligence has never been more vital. The Michael V. Hayden Center for Intelligence, Policy, and International Security at the Schar School for Policy and Government provides for the full examination of intelligence and its interplay with US national security.

Stephen S. Fuller Institute for Research on the Washington Region’s Economic Future
Director: Stephen S. Fuller, PhD
Through consistent monitoring of regional issues and the economy, the institute is able to identify critical conditions and trends impacting the future vitality of the Washington region’s economy. Regularly communicating these findings and producing timely research on short- and long-term regional policy options ensure local business and government leaders are equipped with the data needed to make informed decisions regarding the region’s future.

Terrorism, Transnational Crime and Corruption Center
Director: Louise I. Shelley, PhD
The Terrorism, Transnational Crime and Corruption Center (TraCCC) is the first center in the United States devoted to understanding the links among terrorism, transnational crime and corruption. The center teaches, researches and formulates policy on these critical issues. TraCCC accomplishes its mission through international research partnerships engaging in fundamental and applied research projects. Research addresses such diverse concerns as national security, economic development and human rights.

Faculty

School Faculty
Professors
Abramson, Acs, Button, Clower, Conant, Conlan, Dinan, Dudley, Dueck, Earle, Fuller, Gifford, Goldstone, Hart, Hughes Hallett, Katz, Malawer, Mandaville, McNeely, Olds, Pfiffner, Regan, Reinert, Rhodes, Root, Rozell, Ruth, Shelley, Singh, Slavov, Sackett, Thatchenkery, Travis, Wan, Wedel
Academic Load

Students should review AP1.2 Academic Load (p. 77).

In order to be considered for a credit overload, students must fulfill all of the following criteria:

- Be in good academic standing
- Have completed the prior semester with a GPA of 2.33 or higher
- Have a cumulative GPA of 2.33 or higher
- Have demonstrated in prior semesters at Mason the ability to handle an increased and demanding course load while maintaining high performance
- Have no remaining incompletes (INs) from a previous semester

Freshmen and transfer students in their first semesters are not given permission for overloads as they have yet to establish an academic record at George Mason University.

If approved for an overload, the student is responsible for adding the additional class(es) and paying for the related tuition by the official university deadlines.

Excluded Courses and Credits

At most 3 credits of 100-level Recreation (RECR) activity courses may be taken for general elective credit for an undergraduate degree in the Schar School of Policy and Government.

Only Military Science (MLSC) courses at the 400-level can be used for credit for a degree in the School; credit for other MLSC courses may not be applied toward a degree in the School.

Once matriculated at Mason, students may not take CLEP exams and apply credits from those exams to degrees in the School. Students may apply credits from CLEP exams to degrees in the School only if those credits were awarded and reported prior to admission.

University Consortium

Students should review university policies regarding the University Consortium under Special Registration Procedures in the Academic Policies section of this catalog. Students who have attempted or failed a course at Mason are not permitted to take the equivalent course through the consortium under any circumstances. All consortium registration requests must be submitted to the Schar Undergraduate Student Services office at least 3 weeks prior to the first day of classes for the relevant semester at Mason.

Permission to Study at Another Regionally-Accredited U.S. Institution

Once enrolled in degree status at Mason, students with fewer than 60 hours of transfer coursework (not including registration through the Consortium of Universities of the Washington Metropolitan Area or coursework completed through Mason Study Abroad) may take up to 8 hours of coursework in Schar disciplines at another institution. See the university Permission to Study Elsewhere policy for additional information.

Study Abroad

In order to be considered for study through Mason Study Abroad, students must plan well in advance and receive prior written permission from the Assistant Dean. Students must also meet all of the following criteria:
• Meet all eligibility requirements for their program as specified by Mason Study Abroad including course prerequisites and minimum GPA.

• Have completed the immediately preceding semester at Mason with a minimum GPA of 2.00.

• Have completed the necessary forms and have obtained all required signatures and course equivalencies.

Students in danger of probation, suspension, or dismissal should plan very carefully before requesting to study abroad. Students who are not in good academic standing will not be permitted to study abroad.

Leave of Absence
All undergraduate students who are planning an absence from George Mason must submit a formal request for Leave of Absence to the Office of the University Registrar. Students do not need to complete the Leave of Absence form if they are participating in a George Mason University sponsored study abroad program or have received permission to study elsewhere.

The maximum time allowed for a Leave of Absence is two years. A new admission application will be required if a Leave of Absence extends beyond two years. If a Leave of Absence was not submitted, a new admission application will be required if a student misses two graded semesters, excluding the summer term. Re-admission is not guaranteed. See Academic Policies for full university policy.

Withdrawals
Students should review the Withdrawal section in the Academic Policies (p. 77) section of this catalog. Courses for which a withdrawal is approved receive a grade of "W."

Students should be aware of the potential consequences of withdrawing on their academic standing. Although credits graded "W" do not affect a student's GPA, they do count towards the total attempted hours. The total attempted hours and cumulative GPA together determine a student's academic standing. These are explained in the Academic Standing section of Academic Policies.

Academic Clemency
Students should review the university policies regarding academic clemency in the Academic Standing section of Academic Policies (p. 77).

To be considered for clemency, students must meet all of the following criteria:

• Be absent from George Mason for a minimum of three consecutive calendar years.

• Provide a detailed explanation for why they were unsuccessful in those courses and how they have made changes to ensure their academic progress upon their return.

• Submit their request within 12 months of the first day of the re-enrollment term.

• Complete at least 6 credits during their first 12 months back at George Mason.

• Earn a minimum GPA of 2.50 each semester back prior to making the clemency request with no individual grade below 2.00.

If the last three minimum academic requirements are not met, clemency will not be allowed under any circumstances.

Appeals Process
Undergraduate students may appeal decisions concerning academic actions to the Schar Office of Undergraduate Student Services. They may appeal decisions of the Office of Undergraduate Student Services to the Associate Dean. Students may appeal decisions of the Associate Dean to the Associate Provost, Undergraduate Academic Affairs and Programs. Students who feel that the School's appeal process was conducted unfairly may appeal to the Provost's Office as specified in the Academic Policies (p. 77) section of this catalog.

The grade appeal process occurs at the Dean's Council level as discussed above.

Students should file all appeals in a timely manner, usually within the semester in which the original decision is rendered, but no later than the final day of classes of the following semester.

Second Bachelor's Degree
Students should review the university policies regarding second bachelor’s degrees in the Undergraduate Admission Policies (p. 65) and in Academic Policies/ Requirements for Undergraduate Programs (p. 87) sections of the catalog. Students pursuing a second bachelor's degree concurrently with their first bachelor's degree at Mason must meet all the additional requirements for the School (see second paragraph of the Policies for Undergraduate Students section) if they differ from the requirements in the School or College of their first major.

Students pursuing a second bachelor's degree in the School after already having received one or more bachelor's degrees are considered to have met all of the Mason Core requirements. Students pursuing a Bachelor of Science degree do not have additional School-level requirements. Students pursuing a Bachelor of Arts degree in the School must complete these additional School-level requirements: one additional 3-credit course each in philosophy or religious studies, in social and behavioral science, and in non-Western culture (for a total of 9 credits). They must also demonstrate proficiency in a foreign language through the intermediate level.

Minors
Students may elect to take up to two minors in addition to their major field of study. For policies governing all minors, see the AP.5.3.4 Minors (p. 87) section of this catalog. Students interested in earning a minor should complete the appropriate section of the Change/Declaration of Academic Program form and submit it to the Office of the University Registrar. See All about Minors for more information.

Concentration Courses and Minors
Students may elect to declare a concentration, which requires four of their major field electives to be from the same designated field. Students should be aware that minors usually require between 15 and 21 credits of study; at least 8 of which must be applied only to that minor and may not be used to fulfill requirements of the student’s major, concentration, an undergraduate certificate, or another minor.

Honors in the Major
Highly qualified students majoring in Government and International Politics and Public Administration may pursue advanced work leading to graduation with honors in the major. Those students selected for participation in this program take a two-course sequence: GOVT 491 Honors Seminar (Mason Core) (p. 142) and GOVT 496 Directed Readings
and Research. To graduate with honors in the major, students must complete these courses with a minimum GPA of 3.50.

**Policies for Graduate Students**

Students should become familiar with the university’s Academic Policies (p. 77) in addition to those specific to each academic unit.

**Graduate Student Appeal and Grievance Procedures**

Graduate student appeal and grievance procedures are based on George Mason University’s honor system. Students are responsible for understanding the provisions of the code described in detail in the Academic Policies (p. 77) section of this catalog and in Schar’s graduate student guides.

Students with grievances should direct them in writing to the Assistant Dean of Admissions and Student Services, who will provide guidance on how to resolve their concerns in accordance with established procedures.

Students may appeal decisions concerning academic actions, including termination. Written appeals must be submitted to the Assistant Dean of Admissions and Student Services. The merit of these appeals will be reviewed by the Dean or Dean’s designate.

Grade appeals are made to the Dean. Students should contact the Associate Dean for Academic Affairs in writing to initiate the process. The Dean's decision is final.

A student who is facing termination from the program for non-academic reasons may appeal the decision to the Dean. This appeal must be in writing and must be received within 30 calendar days of the date on the notice of dismissal or termination. The Dean or Dean’s designate will make a final determination. This determination may not be appealed.

Academic Advising

560 Founders Hall
Arlington Campus

359 Research Hall
Fairfax Campus

Website: schar.gmu.edu

The master of science in biodefense prepares students to become the next generation of biodefense and biosecurity professionals and scholars. This program provides students with a foundation in microbiology and biotechnology combined with a broader security and organizational context.

Admissions & Policies

Admissions

Admission Requirements

Please see the Graduate Admissions (p. 68) for information on graduate admission to George Mason University. Specific information on application requirements and deadlines for the Biodefense master’s program may be found on the Schar admissions web site (http://schar.gmu.edu/admissions).

Completed applications for fall and spring semesters are reviewed on a rolling basis, with late applications considered on a space-available basis. Students may be admitted for nondegree study and apply a limited number of credits toward the master’s degree should they choose to apply to the degree program later, in accordance AP.6.4.1 Change from Nondegree Status (p. 91).

Policies

Academic Policies

Students admitted to a Schar program will be terminated from the Schar school upon receiving one grade of F and are no longer eligible to take courses in the school. Per university regulation, students are terminated from the university after accumulating grades of F in two courses or 9 credits of unsatisfactory grades in graduate courses.

For policies governing all graduate degrees, see AP.6 Graduate Policies (p. 90).

1 Other courses must be approved by the program advisor. Up to six elective credits may be taken outside of Schar.
Accelerated Master's

Bachelor's Degree (any)/Biodefense, Accelerated MS

Overview
Highly qualified undergraduates in any major may apply to the accelerated Biodefense, MS. If accepted, students will be able to earn a bachelor's degree in their chosen major and a Biodefense, MS with a reduced number of overall credits and within a reduced time frame, sometimes within five years.

For more detailed information, see AP.6.7 Bachelor’s/Accelerated Master’s Degrees (p. 93). For policies governing all graduate degrees, see AP.6 Graduate Policies (p. 90).

Admission
Please see the Graduate Admissions (p. 68) for general information on graduate admission to George Mason University. Information specific to the accelerated MS program may be found on the Schar website (http://schar.gmu.edu/programs/undergraduate-degrees/accelerated-masters-programs).

To be considered for this accelerated master's program, applicants must have completed a minimum of 75 credits and have a minimum GPA of 3.50 in all coursework applied to the degree.

Accelerated Option Requirements
While undergraduate students, accelerated master's students complete two graduate courses (six credits) that may be counted toward both the bachelor's and master's degrees. In addition, students may take another two courses (six credits) to be held as reserve graduate credit and count only toward the master's degree. The courses are BIOD 604 Emerging Infectious Diseases I: Bacteria and Toxins, GOVT 500 The Scientific Method and Research Design, BIOD 605 Emerging Infectious Diseases II: Viral Agents and BIOD 620 Global Health Security Policy. Students must maintain a minimum GPA of 3.00 in these courses and in coursework applied to their major.

Upon completion and conferral of the undergraduate degree in the semester indicated in the application, students must submit the Bachelor's/Accelerated Master's Transition Form to apply credits to the master's degree. Students must begin their master's program the semester immediately following conferral of the undergraduate degree (excluding summer).

Biodefense Graduate Certificate

Banner Code: PP-CERG-BIOD

Academic Advising
560 Founders Hall
Arlington Campus
359 Research Hall

Fairfax Campus
Website: schar.gmu.edu

The certificate provides an interdisciplinary introduction to man-made and natural biological threats, including a background in the science and technology of biodefense and the specialized areas of threat assessment, non-proliferation, and medical and public health preparedness. Students already pursuing a master's degree in the school may, after admission to a certificate program, in most cases, earn an additional six credits (two courses) in the Schar School to receive a certificate in addition to the master's degree.

The graduate certificate may be pursued on a part-time or full-time basis.

Admissions & Policies

Admissions
Applicants to all graduate programs must meet the admission standards and application requirements for graduate study as specified in Graduate Admission Policies (p. 68). Participants must be admitted to a certificate program. Admission requirements are the same as those for the master's programs and may be found on the Schar admissions website (http://schar.gmu.edu/admissions).

Policies
For policies governing all graduate certificates, see AP.6.8 Requirements for Graduate Certificates (p. 94).

Termination from Program
Students admitted to a Schar program will be terminated from the program upon receiving one grade of F and are no longer eligible to take courses in the school. Per university regulation, students are terminated from the university after accumulating grades of F in two courses or 9 credits of unsatisfactory grades in graduate courses. See AP.6.6.2 Academic Termination (p. 92).

Requirements

Certificate Requirements
Total credits: 15

This certificate may be pursued on a full- or part-time basis.

Biodefense, PhD

Banner Code: PP-PHD-BIOD

Academic Advising

560 Founders Hall
Arlington Campus
359 Research Hall
Fairfax Campus
Website: schar.gmu.edu

This program is designed to prepare students to serve as scholars and professionals in the fields of biodefense and biosecurity. The program integrates knowledge of natural and man-made biological threats with the skills to develop and analyze policies and strategies for enhancing biosecurity. Other areas of biodefense, including nonproliferation, intelligence and threat assessment, and medical and public health preparedness are integral parts of the program.

Admissions & Policies

Admissions

See Graduate Admissions (p. 68) for general information on graduate admission to George Mason University. See the Schar School of Policy and Government Admissions website (http://schar.gmu.edu/admissions/doctorate-admissions) for application requirements and deadlines. Students are considered for admission for the Fall term only.

Policies

For policies governing all graduate degrees, see AP.6.10 Requirements for Doctoral Degrees (p. 96).

Reduction of Credit

Students who enter the doctoral program with a master's degree or other graduate credit may have their credit reduced by up to 30 credits, subject to the approval of the program director.

Requirements

Degree Requirements

Total credits: 72

Students are strongly encouraged to take the core courses as early as possible because they provide the foundation for the rest of the program. The courses which students plan to take should be approved in a program of study designed by the student and their advisor during the student's first semester. Students may take up to 12 credits of courses outside of the Biodefense Program with prior written approval of their advisor. Consult with the graduate program director or coordinator for a list of BIOD electives and approved non-BIOD electives that may be used to fulfill some of the requirements below.

A complete description of the program policies, procedures, and requirements is in the PhD student and faculty handbook (https://schar.gmu.edu/current-students/phd-student-services/phd-handbook-forms), which is published annually.

**Total Credits** 12

**Electives**

Select 9 to 21 credits of additional electives in consultation with advisor. 9-21

Courses may be offered by Schar or by other units. Schar courses include the following:

- BIOD 610: Advanced Topics in Global Health Security
- BIOD 620: Global Health Security Policy
- BIOD 621: Ethics and International Security
- BIOD 622: Negotiating in the International Arena
- BIOD 705: Intelligence: Theory and Practice
- BIOD 706: Nuclear, Biological, and Chemical Weapons Policy and Security
- BIOD 709: Nonproliferation and Arms Control
- BIOD 710: Health Security Preparedness
- BIOD 722: Examining Terrorist Groups
- BIOD 723: Legal Dimensions of Homeland Security
- BIOD 725: Terrorism and Weapons of Mass Destruction
- BIOD 726: Food Security
- BIOD 751: Biosurveillance
- BIOD 752: The Role of the Military in Homeland Security
- BIOD 760: National Security Technology and Policy
- BIOD 762: Biotechnology and Society
- BIOD 766: Development of Vaccines and Therapeutics
- BIOD 793: Directed Studies in Biodefense
- BIOD 810: Advanced Seminar in Biodefense
- BIOD 890: Doctoral Supervised Internship
- BIOD 899: Directed Research in Biodefense
- GOVT 510: American Government and Politics
- GOVT 641: Global Governance
- GOVT 706: Federalism and Intergovernmental Relations
- GOVT 739: Issues in Comparative and International Politics
- GOVT 741: Advanced Seminar in International Politics
- GOVT 745: International Security
- GOVT 755: Seminar in Politics and Bureaucracy
- GOVT 843: Diplomacy
- PUAD 504: Managing in the International Arena: Theory and Practice
- PUAD 630: Emergency Planning and Preparedness
- PUAD 631: Disaster Response Operations and Recovery
- PUAD 632: Terrorism: Theory and Practice
- PUAD 635: Emergency Preparedness: Interagency Communication and Coordination
- PUAD 701: Cross-Cultural and Ethical Dimensions of International Management
- PUAD 727: Seminar in Risk Assessment and Decision Making
- PUAD 731: Homeland/Transportation Security Administration
- PUAD 738: Issues in International Security
- PUAD 750: Federalism and Intergovernmental Relations
- PHIL 642: Biomedical Ethics
- PUBP 757: Public Policy in Global Health and Medical Practice
- PUBP 758: Global Threats and Medical Policies

**Total Credits** 9-21

**Qualifying Exam**

The purpose of the qualifying exam is to determine if the student is ready to engage in dissertation research. Doctoral students are eligible to take the exam at the conclusion of coursework, provided an approved Degree Plan is on file with Schar. The exam must be completed before the student takes dissertation proposal (BIOD 998 Doctoral Dissertation Proposal).

**Advancement to Candidacy**

Advancement to candidacy for the doctoral degree occurs when a student has met the coursework requirements, passed the comprehensive qualifying examination, presented and successfully defended a dissertation proposal, and has an approved dissertation committee.

**Dissertation Research**

Once enrolled in BIOD 998, students in this degree program must maintain continuous registration in BIOD 998 or BIOD 999 each semester (excluding summers) until the dissertation is submitted to and accepted by the University Libraries. Once enrolled in BIOD 999, students must follow the university's continuous registration policy as specified in AP6.10.6 Dissertation Registration (p. 98). Students who defend in the summer must be registered for at least 1 credit of BIOD 999.

Students may apply to this degree a minimum of 3 and a maximum of 6 credits of BIOD 998 and a minimum of 6 and a maximum of 18 credits of
BIOD 999. They apply a minimum of 12 and a maximum of 24 dissertation credits (BIOD 998 and BIOD 999 combined) to the degree. Because of the continuous registration policy, students may be required to register for additional credits of these courses.

Before registering in BIOD 999, students must offer a successful public defense of the dissertation proposal. Students must present the results of the dissertation research to their dissertation committee in a seminar and defend their dissertation to the university community. Successful completion of a dissertation is contingent on approval of the dissertation committee and the dean.

**Global Health and Security Graduate Certificate**

Banner Code: PP-CERG-GHS

**Academic Advising**

560 Founders Hall
Arlington Campus

359 Research Hall
Fairfax Campus

Website: schar.gmu.edu

The Schar School of Policy and Government offers certificate programs in conjunction with its master’s programs. The certificate in global health and security provides an introduction to the intersection of global public health and security, covering topics such as emerging infectious diseases, biosurveillance, the development of vaccines, and emergency

**Admissions**

Applicants to all graduate programs must meet the admission standards and application requirements for graduate study as specified in the Graduate Admission Policies (p. 90) section of this catalog. Participants must be admitted to a certificate program. Admission requirements are the same as those for the master’s programs and may be found on the Schar admissions web site (http://spgia.gmu.edu/admissions).
response to public health disasters. Students already pursuing a master’s degree in the school may, in most cases, after admission to a certificate program, earn an additional six credits (two courses) in Schar to receive a certificate in addition to the master’s degree.

The graduate certificate in global health and security may be pursued on a part-time or full-time basis.

Admissions & Policies

Admissions

Applicants to all graduate programs must meet the admission standards and application requirements for graduate study as specified in the Graduate Admission Policies (p. 90) section of this catalog. Participants must be admitted to a certificate program. Admission requirements are the same as those for the master’s programs and may be found on the Schar admissions web site (http://spgia.gmu.edu/admissions).

Policies

For policies governing all graduate certificates, see AP.6.8 Requirements for Graduate Certificates (p. 94).

Termination from Program

Students admitted to a Schar program will be terminated from the program upon receiving one grade of F and are no longer eligible to take courses in the school. Per university regulation, students are terminated from the university after accumulating grades of F in two courses or 9 credits of unsatisfactory grades in graduate courses. See the Academic Policies (p. 77) section of the catalog for additional policies pertaining to graduate students.

Global Systems Minor

Banner Code: GLOS

Academic Advising

359 Research Hall
Fairfax Campus

Global systems have become increasingly important to the way we live and work, and a global perspective makes us more aware of how we are connected to others around the world and to the whole of nature.

The interdisciplinary minor in global systems is designed to complement virtually any undergraduate major. It works well for majors in business disciplines, economics, languages, geography, government and international politics, history, and other disciplines that take a global view. Students in professional programs learn to connect their professional concerns to global issues of health care, trade and finance, or technology. Students in the liberal arts gain insights into their disciplines as they learn how the arts, humanities, sciences, and social sciences are affected by global issues such as demographic change, telecommunications, and environmental protection.

Other globally oriented courses may also fulfill or substitute for the requirements of this program with written permission of the coordinator prior to registration.

This is an interdisciplinary minor offered by the Schar School of Policy and Government (p. 961) and the College of Humanities and Social Sciences (p. 305).

Faculty

Lopez-Santana (minor advisor)

Admissions & Policies

Policies

Students must complete all coursework with a minimum GPA of 2.00. At least 9 credits must be at the 300 level or above. Eight credits of coursework must be unique to the minor.

For policies governing all minors, see AP.5.3.4 Minors (p. 90).

Total Credits: 15

1. Other globally-oriented courses may also be applied to this requirement with written approval of the director.

**Government and International Politics, BA**

Banner Code: PP-BA-GVIP

**Academic Advising**

359 Research Hall
Fairfax Campus

Phone: 703-993-1400
Email: gvip@gmu.edu
Website: schar.gmu.edu

**Admissions & Policies**

**Policies**

For policies governing all undergraduate degrees, see AP.5 Undergraduate Policies (p. 87).

**Program Requirements**

Students must fulfill all Requirements for Bachelor’s Degrees (p. 87) including the Mason Core (p. 142). Students pursuing a BA in Government and International Politics must complete additional requirements for the BA degree in the Schar School of Policy and Government.

Students pursuing this degree must complete 43 credits in GOVT and earn a minimum grade of 2.00 in each course applied to the major.

**Requirements**

**Degree Requirements**

Total credits: minimum 120

Students pursuing a BA in Government and International Politics and wishing to narrow their focus may choose to concentrate in one of...
eight government fields or complete a higher credit concentration in Philosophy, Politics, and Economics.

### BA with or without Government Concentration

<table>

</table>

**Senior Seminar**

Select one seminar from the following:

- GOVT 490 Synthesis Seminar (Mason Core) (p. 142) 3
- GOVT 491 Honors Seminar (Mason Core) (p. 142) 1

Total Credits 19

1 This option is for students who have been accepted to pursue honors in the major.

### Government Field Study

Select any eight advanced government field courses, with or without a government concentration

Total Credits 24

Students may complete a government concentration (four courses) in one field, then complete any four more advanced government field courses to satisfy this requirement. Students who do not pursue a government concentration may choose 24 credits from the advanced government field courses listed below (with restriction) for a broader learning experience.

ECON 104 | Contemporary Macroeconomic Principles | 3
(Mason Core) (p. 142)
ECON 306 | Intermediate Microeconomics | 3
ECON 412 | Game Theory and Economics of Institutions | 3

Total Credits: 24

Writing-Intensive Requirement
The university requires all students to complete at least one course designated “writing intensive” in their majors. Students majoring in government and international politics may fulfill this requirement by successfully completing GOVT 490 Synthesis Seminar (Mason Core) (p. 142) or GOVT 491 Honors Seminar (Mason Core) (p. 142) in their major programs.

Schar Requirements in Addition to Mason Core Below
Code | Title | Credits
---|---|---
One course in Philosophy or Religion
One additional course in Social and Behavioral Sciences
One course in Non-Western Culture
Proficiency in a foreign language through the intermediate level

Mason Core
Some Mason Core (p. 142) requirements may already be fulfilled by the major requirements listed above. Students are strongly encouraged to consult their advisors to ensure they fulfill all remaining Mason Core (p. 142) requirements.

Code | Title | Credits
---|---|---
Foundation Requirements
Written Communication (ENGH 101) (p. 142) | 3
Oral Communication (p. 142) | 3
Quantitative Reasoning (p. 143) | 3
Information Technology and Computing (p. 143) | 3

Exploration Requirements

Individualized Concentration (IND)
Create your own concentration consisting of four upper level courses with Director approval. A minimum of two courses in this concentration must be GOVT.

BA with Non-Government Concentration
Concentration in Philosophy, Politics, and Economics (PPE)
Core Courses

</tbody>
</table>
Integration Requirements
Written Communications (ENGH 302) (p. 142)  3
Writing-Intensive (p. 151)  1  3
Synthesis/Capstone (p. 153)  2  3

Total Credits  40

1 Most programs include the writing-intensive course designated for the major as part of the major requirements; this course is therefore not counted toward the total required for Mason Core.
2 Minimum 3 credits required.

Honors

Honors in the Major
Highly qualified students majoring in Government and International Politics and Public Administration may pursue advanced work leading to graduation with honors in the major. Those students selected for participation in this program take a two-course sequence: GOVT 491 Honors Seminar (Mason Core) (p. 142) and GOVT 496 Directed Readings and Research. To graduate with honors in the major, students must complete these courses with a minimum GPA of 3.50.

Accelerated Master’s

Bachelor’s Degree (any)/Biodefense, Accelerated MS
Overview
Highly qualified undergraduates in any major may apply to the accelerated Biodefense, MS. If accepted, students will be able to earn a bachelor’s degree in their chosen major and a Biodefense, MS with a reduced number of overall credits and within a reduced time frame, sometimes within five years.

For more detailed information, see AP 6.7 Bachelor’s/Accelerated Master’s Degrees (p. 93). For policies governing all graduate degrees, see AP 6 Graduate Policies (p. 90).

Admission
Please see the Graduate Admissions (p. 68) for general information on graduate admission to George Mason University. Specific information on application requirements and deadlines may be found on the Schar admissions website (http://schar.gmu.edu/admissions).

To be considered for this accelerated master’s program, applicants must have completed a minimum of 75 credits, including at least 12 credits of Government, Economics, and/or Global Affairs courses, and have a minimum GPA of 3.50 in all coursework applied to the degree. The courses are:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>GOVT 540</td>
<td>International Relations</td>
<td>3</td>
</tr>
<tr>

<td>Introductory Data Analysis for Policy and Government</td>
<td>3</td>
</tr>
<tr>
<td>PUBP 504</td>
<td>Grand Strategy</td>
<td>3</td>
</tr>
<tr>
<td>PUBP 506</td>
<td>Ethics and the Use of Force</td>
<td>3</td>
</tr>
</tbody>
</table>

Accelerated Option Requirements
While undergraduate students, accelerated master’s students complete two graduate courses (six credits) that may be counted toward both the bachelor’s and master’s degrees. In addition, students may take another two courses (six credits) to be held as reserve graduate credit and count only toward the master’s degree. The courses are BIOD 604 Emerging Infectious Diseases I: Bacteria and Toxins, GOVT 500 The Scientific Method and Research Design, BIOD 605 Emerging Infectious Diseases II: Viral Agents and BIOD 620 Global Health Security Policy. Students must maintain a minimum GPA of 3.00 in these courses and in coursework applied to their major.

Upon completion and conferral of the undergraduate degree in the semester indicated in the application, students must submit the Bachelor’s/Accelerated Master’s Transition Form to apply credits to the master’s degree. Students must begin their master’s program the semester immediately following conferral of the undergraduate degree (excluding summer).

Bachelor’s Degree (any)/International Security, Accelerated MA
Overview
Highly-qualified undergraduates in any major may apply to the accelerated MA degree program in International Security. If accepted students will be able to earn a bachelor’s degree in their major and an MA in International Security with a reduced number of overall credits and within a reduced time frame, sometimes within five years. More information on bachelor’s/accelerated master’s programs may be found in AP 6.7 Bachelor’s/Accelerated Master’s Degrees (p. 93).

Students in an accelerated degree program must fulfill all university requirements for the master’s degree. See AP 6.9 Requirements for Master’s Degrees. (p. 94)

Admission
Please see Graduate Admission Policies (p. 68) for general information on graduate admission to George Mason University. Specific information on application requirements and deadlines may be found on the Schar admissions website (http://schar.gmu.edu/admissions).

To be considered for this accelerated master’s program, applicants must have completed a minimum of 75 credits, including at least 12 credits of Government, Economics, and/or Global Affairs courses, and have a minimum GPA of 3.50 in all coursework applied to the degree.

Accelerated Option Requirements
While undergraduate students, accelerated master’s students complete two graduate courses (six credits) that may be counted toward both the bachelor’s and master’s degrees. In addition, students may take another two courses (six credits) to be held as reserve graduate credit and count only toward the master’s degree. The courses are:

</tr>
</tbody>
</table>
Students must maintain a minimum GPA of 3.00 in these courses and in coursework applied to their major.

Upon completion and conferral of the undergraduate degree in the semester indicated in the application, students must submit the Bachelor’s/Accelerated Master’s Transition Form to apply credits to the master’s degree. Students must begin their master’s program the semester immediately following conferral of the undergraduate degree (excluding summer).

**Bachelor’s Degree (any)/International Commerce and Policy, Accelerated MA**

**Overview**

Highly-qualified undergraduates in any major may apply to the accelerated MA degree program in International Commerce and Policy. If accepted students will be able to earn a bachelor’s degree in their major and an MA in International Commerce and Policy with a reduced number of overall credits and within a reduced time frame, sometimes within five years. More information on bachelor’s/accelerated master’s programs may be found in AP.6.7 Bachelor’s/Accelerated Master’s Degrees (p. 93).

Students in an accelerated degree program must fulfill all university requirements for the master’s degree. See AP.6.9 Requirements for Master’s Degrees. (p. 94)

**Admission**

Please see Graduate Admission Policies (p. 68) for general information on graduate admission to George Mason University. Specific information on application requirements and deadlines may be found on the Schar admissions website (http://schar.gmu.edu/admissions).

To be considered for this accelerated master’s program, applicants must have completed a minimum of 75 credits, including 12 credits of Government, Economics and/or Global Affairs courses, and have a minimum GPA of 3.50 in all coursework applied to the degree.

**Accelerated Option Requirements**

While undergraduate students, accelerated master’s students complete two graduate courses (six credits) that may be counted toward both the bachelor’s and master’s degrees. In addition, students may take another two courses (six credits) to be held as reserve graduate credit and count only toward the master’s degree. The courses are chosen from GOVT 500 The Scientific Method and Research Design, GOVT 510 American Government and Politics, GOVT 520 Political Theory, GOVT 530 Comparative Politics, GOVT 540 International Relations. Students must maintain a minimum GPA of 3.00 in these courses and in coursework applied to their major.

Upon completion and conferral of the undergraduate degree in the semester indicated in the application, students must submit the Bachelor’s/Accelerated Master’s Transition Form to apply credits to the master’s degree. Students must begin their master’s program the semester immediately following conferral of the undergraduate degree (excluding summer).

**Bachelor’s Degree (any)/Political Science, Accelerated MA**

**Overview**

Highly-qualified undergraduates in any major may apply to the accelerated MA degree in Political Science. If accepted, students will be able to earn a bachelor’s degree in their chosen major and a MA in Political Science with a reduced number of overall credits and within a reduced time frame, sometimes five years. More information on bachelor’s/accelerated master’s programs may be found in AP.6.7 Bachelor’s/Accelerated Master’s Degrees (p. 93).

Students in an accelerated degree program must fulfill all university requirements for the master’s degree. See AP.6.9 Requirements for Master’s Degrees. (p. 94)

**Admission**

See Graduate Admission Policies (p. 68) for general information on graduate admission to George Mason University. Specific information on application requirements and deadlines for the Political Science master’s program may be found on the Schar website (http://schar.gmu.edu/programs/undergraduate-degrees/accelerated-masters-programs).

To be considered for this accelerated master’s program, applicants must have completed a minimum of 75 credits, including 12 GOVT credits, and have a minimum GPA of 3.50 in all coursework applied to the degree.

**Accelerated Option Requirements**

While undergraduate students, accelerated master’s students complete two graduate courses (six credits) that may be counted toward both the bachelor’s and master’s degrees. In addition, students may take another two courses (six credits) to be held as reserve graduate credit and count only toward the master’s degree. The courses are chosen from ITRN 500 Global Political Economy, ITRN 504 Microeconomics and Trade Policy, ITRN 503 Macroeconomic Policy in the Global Economy and ITRN 605 Technology, Culture and Commerce. Students must maintain a minimum GPA of 3.00 in these courses and in coursework applied to their major.

Upon completion and conferral of the undergraduate degree in the semester indicated in the application, students must submit the Bachelor’s/Accelerated Master’s Transition Form to apply credits to the master’s degree. Students must begin their master’s program the semester immediately following conferral of the undergraduate degree (excluding summer).

**Bachelor’s Degree (any)/Public Administration, Accelerated MPA**

**Overview**

Highly-qualified undergraduates in any major may apply to the accelerated master’s degree in public administration. If accepted, students will be able to earn a bachelor’s degree in their chosen major and a master’s degree in public administration with a reduced number of overall credits and within a reduced time frame, sometimes within five years. See AP.6.7 Bachelor’s/Accelerated Master’s Degrees (p. 93).

Students in an accelerated degree program must fulfill all university requirements for the master’s degree. For policies governing all graduate degrees, see AP.6 Graduate Policies (p. 90).

**Admission**

Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in Graduate Admissions (p. 68). Information specific to the accelerated MPA program may be found on the Schar website (http://schar.gmu.edu/programs/undergraduate-degrees/accelerated-masters-programs).
To be considered for this accelerated master's program, applicants must have completed a minimum of 75 credits, including 12 GOVT credits, and have a minimum GPA of 3.50 in all coursework applied to the degree.

**Accelerated Option Requirements**

While undergraduate students, accelerated master's students complete two graduate courses (six credits) that may be counted toward both the bachelor's and master's degrees. In addition, students may take another two courses (six credits) to be held as reserve graduate credit and count only toward the master's degree. The courses are PUAD 502 Administration in Public and Nonprofit Organizations, POGO 511 Introductory Data Analysis for Policy and Government, PUAD 520 Organization Theory and Management Behavior and PUAD 540 Public Policy Process. Students must maintain a minimum GPA of 3.00 in these courses and in coursework applied to their major.

Upon completion and conferral of the undergraduate degree in the semester indicated in the application, students must submit the Bachelor's/Accelerated Master's Transition Form to apply credits to the master's degree. Students must begin their master's program the semester immediately following conferral of the undergraduate degree (excluding summer).

**Bachelor's Degree (any)/Public Policy, Accelerated MPP**

**Overview**

Highly-qualified undergraduates in any major may apply to the accelerated Master of Public Policy (MPP) program. If accepted students will be able to earn a bachelor's degree in their chosen major and the Master of Public Policy with a reduced number of overall credits and within a reduced time frame, sometimes within five years. More information on bachelor's/accelerated master's programs may be found in AP.6.7 Bachelor's/Accelerated Master's Degrees (https://catalog.gmu.edu/policies/academic/graduate-policies/#ap-6-7).

Students in an accelerated degree program must fulfill all university requirements for the master's degree. See AP.6.9 Requirements for Master's Degrees. (https://catalog.gmu.edu/policies/academic/graduate-policies/#ap-6-9)

**Admission**

Please see Graduate Admission Policies (p. 68) for general information on graduate admission to George Mason University. Information specific to the accelerated Master of Public Policy program may be found on the Schar website (http://schar.gmu.edu/programs/undergraduate-degrees/accelerated-masters-programs).

To be considered for this accelerated master's program, applicants must have completed a minimum of 75 credits, including 12 credits of Government and/or Economics courses, and have a minimum GPA of 3.50 in all coursework applied to the degree.

**Accelerated Option Requirements**

While undergraduate students, accelerated master's students complete two graduate courses (six credits) that may be counted toward both the bachelor's and master's degrees. In addition, students may take another two courses (six credits) from the following list to be held as reserve graduate credit and count only toward the master's degree. The student must have a minimum GPA of 3.00 in each course. Students must maintain a minimum GPA of 3.00 in these courses and in coursework applied to their major.

**International Commerce and Policy, MA**

**Banner Code: PP-MA-ICP**

**Academic Advising**

560 Founders Hall
Arlington Campus

359 Research Hall
Fairfax Campus

Website: schar.gmu.edu

The International Commerce and Policy, MA program (ICP) is an interdisciplinary course of study to help students from around the world prepare for jobs in the new economy. Unlike traditional international affairs programs, the degree is focused on such international economic issues as global trade and investment. The MA in international commerce and policy differs from an MBA program by providing training in the political, social, and technological aspects of the global economy. In today's world, it is critical for all participants in global markets to understand the multifaceted environment in which they work.

**Faculty**

The core faculty is augmented by adjunct faculty members who bring a wealth of practical knowledge and experience, as well as strong academic qualifications to the program. Adjuncts are drawn from the U.S. Commerce and State Departments, the Office of the U.S. Trade Representative, and the International Trade Commission, among other government agencies, as well as from the private sector, the think tank community, and trade associations.

**Courses**

Courses are offered primarily in the late afternoon and evening to fit the schedules of busy professionals. In addition to classroom study, the program emphasizes experiential learning by supporting student internships, cooperative education, and research activities with private- and public-sector employers, and sponsoring a variety of study-abroad experiences.
Admissions & Policies

Admissions

Applications

Please see Graduate Admission Policies (p. 68) for general information on graduate admission to George Mason University. Specific information on application requirements and deadlines may be found on the Schar admissions website (http://schar.gmu.edu/admissions).

Students from all academic backgrounds are welcome to apply; however, some knowledge of economics, preferably through at least two undergraduate economics courses, is encouraged. While many students may have prior educational and work-related training in business and economics, others see the ICP Program as a bridge from government, education, and other non-business occupations to careers in the global economy.

Completed applications for fall and spring semesters are reviewed on a rolling basis, with late applications considered on a space-available basis. Students may be admitted for nondegree study and apply a limited number of credits toward the master's degree should they choose to apply to the degree program later, in accordance with university policy.

Policies

For policies governing all graduate degrees, see AP.6 Graduate Policies (p. 90).

Termination from Program

Students admitted to an Schar graduate program will be terminated from Schar upon receiving one grade of F and are no longer eligible to take courses in Schar. Per university regulation, students are terminated from the university after accumulating grades of F in two courses or 9 credits of unsatisfactory grades in graduate courses.

Program Requirements

The ICP Program requires 36 credits of coursework. All degree candidates must take 21 credits of work in required courses. The remaining 15 credits consist of electives that may include internships, independent studies, and study abroad. Upon entering the program students complete core courses first to prepare for higher-level elective coursework.

1 Courses must be approved by the student's academic advisor.
Accelerated Master's

Bachelor's Degree (any)/International Commerce and Policy, Accelerated MA

Overview
Highly-qualified undergraduates in any major may apply to the accelerated MA degree program in International Commerce and Policy. If accepted students will be able to earn a bachelor's degree in their major and an MA in International Commerce and Policy with a reduced number of overall credits and within a reduced time frame, sometimes within five years. More information on bachelor's/accelerated master's programs may be found in AP6.7 Bachelor's/Accelerated Master's Degrees (p. 93).

Students in an accelerated degree program must fulfill all university requirements for the master’s degree. See AP6.9 Requirements for Master's Degrees. (p. 94)

Admission
Please see Graduate Admission Policies (p. 68) for general information on graduate admission to George Mason University. Specific information on application requirements and deadlines may be found on the Schar admissions website (http://schar.gmu.edu/admissions).

To be considered for this accelerated master’s program, applicants must have completed a minimum of 75 credits, including at least 12 credits of Government, Economics and/or Global Affairs courses, and have a minimum GPA of 3.50 in all coursework applied to the degree.

Accelerated Option Requirements
While undergraduate students, accelerated master's students complete two graduate courses (six credits) that may be counted toward both the bachelor's and master's degrees. In addition, students may take another two courses (six credits) to be held as reserve graduate credit and count only toward the master's degree. The courses are ITRN 500 Global Political Economy, ITRN 504 Microeconomics and Trade Policy, ITRN 503 Macroeconomic Policy in the Global Economy and ITRN 605 Technology, Culture and Commerce. Students must maintain a minimum GPA of 3.00 in these courses and in coursework applied to their major.

Upon completion and conferral of the undergraduate degree in the semester indicated in the application, students must submit the Bachelor's/Accelerated Master's Transition Form to apply credits to the master's degree. Students must begin their master's program the semester immediately following conferral of the undergraduate degree (excluding summer).

Website: schar.gmu.edu

The program trains early to mid-career professionals who seek the analytical and substantive capabilities to address the security challenges of the 21st century. In addition to understanding the traditional military and diplomatic approaches that characterized the state-centric security framework of the last century, the program’s core courses will provide a firm grounding with regard to public-private and international collaborative responses to emerging and unconventional threats, ranging from transnational crime, terrorism, illicit trade, proliferation of emerging technologies and WMD, and corruption to state fragility and ethnic and sectarian conflict.

Admissions & Policies

Admissions
See Graduate Admission Policies (p. 68) for general information on graduate admission to George Mason University. Specific information on application requirements and deadlines for the MA in International Security program may be found on the Schar admissions website (http://schar.gmu.edu/admissions).

Completed applications for fall and spring semesters are reviewed on a rolling basis, with late applications considered on a space-available basis. Students may be admitted for nondegree study and apply a limited number of credits toward the master’s degree should they choose to apply to the degree program later, in accordance with university policy.

Policies
Students admitted to a Schar program will be terminated from Schar upon receiving one grade of F and are no longer eligible to take courses in Schar. Per university regulation, students are terminated from the university after accumulating grades of F in two courses or 9 credits of unsatisfactory grades in graduate courses. For additional information, see Graduate Policies (p. 90).

### Accelerated Master's

**Bachelor's Degree (any)/International Security, Accelerated MA**

**Overview**

Highly-qualified undergraduates in any major may apply to the accelerated MA degree program in International Security. If accepted students will be able to earn a bachelor's degree in their major and an MA in International Security with a reduced number of overall credits and within a reduced time frame, sometimes within five years. More information on bachelor’s/accelerated master’s programs may be found in AP.6.7 Bachelor’s/Accelerated Master’s Degrees (p. 93).

Students in an accelerated degree program must fulfill all university requirements for the master’s degree. See AP.6.9 Requirements for Master’s Degrees. (p. 94)

**Admission**

Please see Graduate Admission Policies (p. 68) for general information on graduate admission to George Mason University. Specific information on application requirements and deadlines may be found on the Schar admissions website (http://schar.gmu.edu/admissions).

To be considered for this accelerated master’s program, applicants must have completed a minimum of 75 credits, including at least 12 credits of Government, Economics and/or Global Affairs courses, and have a minimum GPA of 3.50 in all coursework applied to the degree.

**Accelerated Option Requirements**

While undergraduate students, accelerated master’s students complete two graduate courses (six credits) that may be counted toward both the bachelor’s and master’s degrees. In addition, students may take another two courses (six credits) to be held as reserve graduate credit and count only toward the master’s degree. The courses are:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>GOVT 540</td>
<td>International Relations</td>
<td>3</td>
</tr>
<tr>
<td>POGO 511</td>
<td>Introductory Data Analysis for Policy and Government</td>
<td>3</td>
</tr>
<tr>
<td>PUBP 504</td>
<td>Grand Strategy</td>
<td>3</td>
</tr>
<tr>
<td>PUBP 506</td>
<td>Ethics and the Use of Force</td>
<td>3</td>
</tr>
</tbody>
</table>

Students must maintain a minimum GPA of 3.00 in these courses and in coursework applied to their major.

Upon completion and conferral of the undergraduate degree in the semester indicated in the application, students must submit the Bachelor’s/Accelerated Master’s Transition Form to apply credits to the master’s degree. Students must begin their master’s program the semester immediately following conferral of the undergraduate degree (excluding summer).

**International Security Minor**

Banner Code: INLS

**Academic Advising**

359 Research Hall
International/Comparative Studies Minor

Banner Code: ICS

Academic Advising
359 Research Hall
Fairfax Campus

In this minor, students learn the key features of government systems as they are applied in different contexts around the world. Students explore the interaction between government, society, and humans' most important challenges with respect to different regions and the international community.

Faculty
Butt (minor advisor)

Admissions & Policies

Policies
Students must complete all coursework with a minimum GPA of 2.00 and 8 credits of coursework must be unique to the minor. For policies governing all minors, see AP 5.3.4 Minors (p. 90).

Requirements

Minor Requirements
Total credits: 18

Students must complete all coursework with a minimum grade of 2.00 in each course.

National Security and Public Policy Graduate Certificate

Banner Code: PP-CERG-NSP

Academic Advising
560 Founders Hall
Arlington Campus
359 Research Hall
Fairfax Campus

Website: schar.gmu.edu

The Schar School offers certificate programs in conjunction with its master’s programs. Students already pursuing a master’s degree in the school may, in most cases, after admission to a certificate program, earn an additional six credits (two courses) in Schar to receive a certificate in addition to the master’s degree.

The graduate certificate may be pursued on a part-time or full-time basis.

Admissions & Policies

Admissions
Requirements
Applicants to all graduate programs must meet the admission standards and application requirements for graduate study as specified in Graduate Admission Policies (p. 68). Participants must be admitted to a certificate program. Admission requirements are the same as those for the master’s programs and may be found with Schar Admissions (http://schar.gmu.edu/admissions).

Policies
For policies governing all graduate certificates, see AP.6.8 Requirements for Graduate Certificates (p. 94).

Termination from Program
Students admitted to a Schar program will be terminated from the program upon receiving one grade of F and are no longer eligible to take courses in the school. Per university regulation, students are terminated from the university after accumulating grades of F in two courses or 9 credits of unsatisfactory grades in graduate courses. For policies governing all graduate degrees, see Graduate Policies (p. 90).

Requirements

Certificate Requirements
Total credits: 15

This certificate may be pursued on a full-or part-time basis.

### Organization Development and Knowledge Management, MS

**Banner Code:** PP-MS-ODKM

**Academic Advising**

560 Founders Hall  
Arlington Campus  

Website: schar.gmu.edu

The master of science in organization development and knowledge management is an integrated program taught in executive format and designed for professionals who have several years of work experience. Providing conceptual tools and practical guidance to foster organizational change, the program focuses on three related areas: creating and leveraging knowledge through networks of people who communicate and collaborate; understanding and managing change by integrating the diverse roles of people, processes, and technology; and enhancing and facilitating collaboration by building effective relationships in technology-rich environments. A feature of this program
is the group-oriented approach to learning supported by the use of web-based collaborative computer technologies. Students develop the competencies to apply these technologies to make organizations more effective.

The cohort usually completes the program on a part-time basis. Full-time study is also possible by arrangement with the program director.

Students work in teams and complete most of the courses in sequence. The second academic year includes an action learning component, in which participants undertake projects in organizations and apply research methods. Overall, the process and methods of evaluation stress the cumulative development of competencies and the capacity to apply the insights gained. Students are expected to have easy access to a computer and the Internet. Minimum computer specifications can be obtained from the program office.

### Admissions & Policies

#### Admissions

Students are considered for admission for the fall term only.

Please see Graduate Admission Policies (p. 68) for general information on graduate admission to George Mason University. Specific information on application requirements and deadlines may be found on the Schar admissions website (http://schar.gmu.edu/admissions).

#### Policies

Students admitted to a Schar program will be terminated from Schar upon receiving one grade of F and are no longer eligible to take courses in Schar. Per university regulation, students are terminated from the university after accumulating grades of F in two courses or 9 credits of unsatisfactory grades in graduate courses.

See AP 6 Graduate Policies (p. 90) for more information.

### Peace Operations, MS

**Banner Code:** PP-MS-PO

#### Academic Advising

560 Founders Hall
Arlington Campus

This program is no longer accepting applications for new students.

This program is designed for students and practicing professionals engaged in the planning, regulation, management, and conduct of peace operations. Students obtain a working knowledge of the theory, policy, law, research, and practices required to effectively and efficiently participate in or conduct a peace operation. Students also learn to think critically and analytically about the problems and challenges in this field and communicate their analyses clearly and effectively through written and oral presentations.

---

This program is no longer accepting applications for new students.

#### Admissions

Please see Graduate Admission Policies (p. 68) for general information on graduate admission to George Mason University. Specific information on application requirements and deadlines may be found on the Schar admissions website (http://schar.gmu.edu/admissions).

Completed applications for fall and spring semesters are reviewed on a rolling basis, with late applications considered on a space-available basis.

#### Policies

Students admitted to a Schar program will be terminated from Schar upon receiving one grade of F and are no longer eligible to take courses in Schar. Per university regulation, students are terminated from the
university after accumulating grades of F in two courses or 9 credits of unsatisfactory grades in graduate courses.

See AP.6 Graduate Policies (p. 90) for more information.

Political Science, MA

Banner Code: PP-MA-POS

Academic Advising

560 Founders Hall
Arlington Campus
359 Research Hall
Fairfax Campus
Website: schar.gmu.edu

The master of arts in political science program prepares students for advanced work in political science, teaching, and research about government; a career in government and politics; and work in domestic and international nongovernmental organizations.

The program is made up of four core courses in political science and completion of either a concentration in international security or a broader field of specialization in American government and politics, international relations, or comparative politics. Students choosing a specialization have interdisciplinary opportunities to take up to 9 credits in related fields such as history or public policy.

The master’s degree is the first step in an engaging and stimulating career. Students develop a deeper understanding of political ideas and institutions, more sophisticated research skills, a better grasp of the intricacies of governments abroad, and a deeper knowledge of the complexities of international politics. This degree can lead to a career teaching about government; working with legislative bodies, government agencies, and international organizations; or doing research and writing about politics and government.

Admissions & Policies

Admissions

Requirements

See Graduate Admission Policies (p. 68) for general information on graduate admission to George Mason University. Specific information on application requirements and deadlines may be found with Schar Admissions (http://schar.gmu.edu/admissions).

Completed applications for fall and spring semesters are reviewed on a rolling basis, with late applications considered on a space-available basis. Students may be admitted for nondegree study and apply a limited number of credits toward the master’s degree should they choose to apply to the degree program later, in accordance with university policy.
Policies

Termination from Program

Students admitted to an Schar program will be terminated from Schar upon receiving one grade of F and are no longer eligible to take courses in Schar. Per university regulation, students are terminated from the university after accumulating grades of F in two courses or 9 credits of unsatisfactory grades in graduate courses. For policies governing all graduate degrees, see Graduate Policies (p. 90).

Requirements

Degree Requirements

Total credits: 36

Students should develop an education plan with their advisors that lists the courses they plan to take. The plan is approved by the student’s advisor. Students may include courses from other units to complement their field of specialization; they should reflect the ideas, institutions, or processes of contemporary governance.

Students who wish to begin a career in government and politics or to alter their current career path in government and politics are encouraged to take a 3-credit internship in their area of interest. Internships can be arranged through the Schar school.

Bachelor's/Accelerated Master's Degrees may be found in AP.6.7. Bachelor's/accelerated master's programs may be found on the Schar website (http://schar.gmu.edu/undergraduate-degrees/accelerated-masters-programs). Additional information on Master's Degrees. A reduced time frame, sometimes five years. More information on the master's degree. See AP.6.9 Requirements for application requirements and deadlines for the Political Science master's graduate admission to George Mason University. Specific information on admission to the Political Science PhD. See Graduate Admission Policies (p. 68) for general information on graduate admission to George Mason University. Please see the Schar School of Policy and Government Admissions website (http://schar.gmu.edu/admissions/doctorate-admissions) for application requirements and deadlines. Students are considered for admission for the Fall term only.

Accelerated Master's

Bachelor's Degree (any)/Political Science, Accelerated MA

Overview
Highly-qualified undergraduates in any major may apply to the accelerated MA degree in political science. If accepted, students will be able to earn a bachelor’s degree in their chosen major and a MA in Political Science with a reduced number of overall credits and within a reduced time frame, sometimes five years. More information on bachelor's/accelerated master’s programs may be found in AP.6.7 Bachelor's/Accelerated Master’s Degrees (p. 93).

Students in an accelerated degree program must fulfill all university requirements for the master’s degree. See AP.6.9 Requirements for Master’s Degrees. (p. 94)

Admission
See Graduate Admission Policies (p. 68) for general information on graduate admission to George Mason University. Specific information on application requirements and deadlines for the Political Science master's program may be found on the Schar website (http://schar.gmu.edu/programs/undergraduate-degrees/accelerated-masters-programs).

3 Credits of Project or 6 Credits of Thesis
A project or thesis is required for the MA in political science. Students who choose to do a project take 3 credits of GOVT 798 Political Science Research Project linked to an advanced specialty course and produce a final research project. Students who choose to do a thesis should be aware of the policies governing theses. They must follow the enrollment policy of the university and, once enrolled in GOVT 799 Political Science Thesis, must maintain continuous enrollment as specified in AP.6.9.3 Master’s Thesis (p. 95). A thesis director and a committee of two additional faculty members appointed by the school read and approve the thesis. Students should make arrangements for doing a project or thesis with their advisor.

<table>
<thead>
<tr>

</thead>
<tbody>
<tr>
<td></td>
<td>Select up to two electives.</td>
<td>0-6</td>
</tr>
<tr>
<td></td>
<td>Total Credits</td>
<td>0-6</td>
</tr>
</tbody>
</table>

1 The number of electives students have will depend on how many credits they took in the concentration or field of specialization and whether they choose a 3-credit project or a 6-credit thesis. Students choose the remaining credits required for the degree, if any, from other courses in Schar, including an internship, additional courses in the field of specialization, or from course work offered by other units.

Accelerated Option Requirements

While undergraduate students, accelerated master's students complete two graduate courses (six credits) that may be counted toward both the bachelor’s and master's degrees. In addition, students may take another two courses (six credits) to be held as reserve graduate credit and count only toward the master’s degree. The courses are chosen from GOVT 500 The Scientific Method and Research Design, GOVT 510 American Government and Politics, GOVT 520 Political Theory, GOVT 530 Comparative Politics, GOVT 540 International Relations. Students must maintain a minimum GPA of 3.00 in these courses and in coursework applied to their major.

Upon completion and conferral of the undergraduate degree in the semester indicated in the application, students must submit the Bachelor’s/Accelerated Master’s Transition Form to apply credits to the master's degree. Students must begin their master’s program the semester immediately following conferral of the undergraduate degree (excluding summer).

Political Science, PhD

Academic Advising
560 Founders Hall
Arlington Campus
359 Research Hall
Fairfax Campus
Website: schar.gmu.edu

The doctoral degree in political science program is designed to prepare students for teaching and conducting research about government, careers in government and politics, and work in domestic and international nongovernmental organizations. The program allows students to combine their academic education with experience in the kinds of complex domestic and international political organizations they are studying. This model for political science education, patterned after the American Political Science Association's Congressional Fellows Program, is designed to foster scholarship and a firsthand understanding of domestic and international institutions such as think tanks, international bodies, nongovernmental organizations, journals of political opinion, and congressional and executive branch offices.

Admissions & Policies

Admissions

Application Requirements
Please see Graduate Admissions (p. 68) for general information on graduate admission to George Mason University. Please see the Schar School of Policy and Government Admissions website (http://schar.gmu.edu/admissions/doctorate-admissions) for application requirements and deadlines. Students are considered for admission for the Fall term only.
For students who have been admitted with a bachelor's degree, the Faculty Review Committee will review each student's progress after 30 credits of course work to determine whether the student will be allowed to continue their work toward the PhD. For students entering the program with a master's degree, this review will occur after 12 credits in this program. Students who are not allowed to continue to work toward the PhD will be allowed to complete the MA degree.

Policies

Academic Advising

A total of 12 credits of supporting courses may be taken in other departments to fulfill a minority of the credits for any of the requirements below, including the methodology requirement, with prior written approval of the program director. All courses should be planned with an advisor and appear on a program of study, which requires the approval of the program director.

A complete description of the program policies, procedures, and requirements is in the PhD student and faculty handbook (https://schar.gmu.edu/current-students/phd-student-services/phd-handbook-forms), which is published annually.

Reduction of Credit

For students entering the program with a master's or MPA degree, the number of credits required for the doctorate may be reduced by up to 30 credits subject to approval of the doctoral program director.

Advancement to Candidacy
To advance to candidacy, students must complete all course work required by their approved program of study. Students must also successfully complete and pass two comprehensive qualifying exams in major fields. In addition, students must have an approved dissertation committee and must present and successfully defend a dissertation proposal before advancing to candidacy.

Dissertation Research
Once enrolled in GOVT 998 Doctoral Dissertation Proposal, students in this degree program must maintain continuous registration in GOVT 998 Doctoral Dissertation Proposal or GOVT 999 Doctoral Dissertation Research each semester (excluding summers) until the dissertation is submitted to and accepted by the University Libraries. Once enrolled in GOVT 999 Doctoral Dissertation Research, students must follow the university’s continuous registration policy as specified in AP.6.10.6 Dissertation Research (p. 98). Students who defend in the summer must be registered for at least 1 credit of GOVT 999 Doctoral Dissertation Research.

Students may apply to this degree a minimum of 3 and a maximum of 6 credits of GOVT 998 Doctoral Dissertation Proposal and a minimum of 6 credits of GOVT 999 Doctoral Dissertation Research. They apply a minimum of 12 and a maximum of 24 dissertation credits (GOVT 998 Doctoral Dissertation Proposal and GOVT 999 Doctoral Dissertation Research combined) to the degree. Because of the continuous registration policy, students may be required to register for additional credits of these courses.

Students who do fewer than 24 credits of dissertation will complete their degree with additional electives.

Admissions & Policies

Policies
For policies governing all undergraduate degrees, see AP5 Undergraduate Policies (p. 87).

Requirements

Degree Requirements
Total credits: minimum 120

Students must fulfill all Requirements for Bachelor's Degrees (p. 87) including the Mason Core (p. 142). Students pursuing a BS in Public Administration must complete additional requirements for the BS degree in the Schar School of Policy and Government (p. 961).

Students must earn a minimum grade of 2.00 in each course applied to the major, including GOVT courses as well as the supporting courses in other disciplines used to fulfill the requirements below. See an advisor before registering.

Core Courses
The math or statistics core course cannot be used to fulfill the Mason Core requirement in quantitative reasoning.

Total Credits 24

Students may complete a concentration of at least 12 credits in one field to fulfill a concentration. Students who do not wish to pursue a concentration may choose at least 24 credits from any of the advanced public administration courses listed below (with restrictions noted below) for a broader learning experience. Up to three credits of GOVT 496 Directed Readings and Research may be used to fulfill this requirement with prior advisor approval. Up to six credits of GOVT 496 Directed Readings and Research may be used to fulfill this requirement with prior advisor approval. GOVT 490 Synthesis Seminar (Mason Core) (p. 142) or GOVT 491 Honors Seminar (Mason Core) (p. 142) may not be used to fulfill this requirement.

Advanced Public Administration courses

Students pursuing a concentration will complete the degree by taking four courses (minimum of 12 credits) within one concentration, chosen from the lists of advanced field courses shown below, to complete a minimum of 24 credits of field courses.

Concentration Areas

- Concentration in Administration and Management (ADMM) (p. 994)
- Concentration in Public Policy (PUBP) (p. 994)
- Concentration in Nonprofit Management (NPMG) (p. 995)
- Concentration in US Government Institutions (USGI) (p. 995)
- Concentration in Economic Policy Analysis (ECPA) (p. 995)
- Concentration in International Political Economy (IPE) (p. 995)
- Individualized Concentration (IND) (p. 995)

1  A minimum of two courses in this concentration must be advanced public administration field courses.

Writing-Intensive Requirement  
The university requires all students to complete at least one course designated “writing intensive” in their majors. Students majoring in public administration may fulfill this requirement by successfully completing GOVT 490 Synthesis Seminar (Mason Core) (p. 142) or GOVT 491 Honors Seminar (Mason Core) (p. 142) in their major programs.

Mason Core  
Some Mason Core (p. 142) requirements may already be fulfilled by the major requirements listed above. Students are strongly encouraged to consult their advisors to ensure they fulfill all remaining Mason Core (p. 142) requirements.

</table>

1  Most programs include the writing-intensive course designated for the major as part of the major requirements; this course is therefore not counted towards the total required for Mason Core.
2  Minimum 3 credits required.

Honors in the Major  
Highly qualified students majoring in Government and International Politics and Public Administration may pursue advanced work leading to graduation with honors in the major. Those students selected for participation in this program take a two-course sequence: GOVT 491 Honors Seminar (Mason Core) (p. 142) and GOVT 496 Directed Readings and Research. To graduate with honors in the major, students must complete these courses with a minimum GPA of 3.50.

Honors
Accelerated Master's

Bachelor's Degree (any)/Biodefense, Accelerated MS

Overview
Highly qualified undergraduates in any major may apply to the accelerated Biodefense, MS. If accepted, students will be able to earn a bachelor's degree in their chosen major and a Biodefense, MS with a reduced number of overall credits and within a reduced time frame, sometimes within five years.

For more detailed information, see AP.6.7 Bachelor’s/Accelerated Master’s Degrees (p. 93). For policies governing all graduate degrees, see AP6 Graduate Policies (p. 90).

Admission
Please see the Graduate Admissions (p. 68) for general information on graduate admission to George Mason University. Information specific to the accelerated MS program may be found on the Schar website (http://schar.gmu.edu/admissions).

To be considered for this accelerated master's program, applicants must have completed a minimum of 75 credits and have a minimum GPA of 3.50 in all coursework applied to the degree.

Accelerated Option Requirements
While undergraduate students, accelerated master's students complete two graduate courses (six credits) that may be counted toward both the bachelor's and master's degrees. In addition, students may take another two courses (six credits) to be held as reserve graduate credit and count only toward the master's degree. The courses are:

<table>
<thead>
<tr>

<td>Grand Strategy</td>
<td>3</td>
</tr>
<tr>
<td>PUBP 506</td>
<td>Ethics and the Use of Force</td>
<td>3</td>
</tr>
</tbody>
</table>

Students must maintain a minimum GPA of 3.00 in these courses and in coursework applied to their major.

Upon completion and conferral of the undergraduate degree in the semester indicated in the application, students must submit the Bachelor's/Accelerated Master's Transition Form to apply credits to the master’s degree. Students must begin their master’s program the semester immediately following conferral of the undergraduate degree (excluding summer).

Bachelor's Degree (any)/International Commerce and Policy, Accelerated MA

Overview
Highly-qualified undergraduates in any major may apply to the accelerated MA degree program in International Commerce and Policy. If accepted students will be able to earn a bachelor’s degree in their major and an MA in International Security with a reduced number of overall credits and within a reduced time frame, sometimes within five years. More information on bachelor's/accelerated master's programs may be found in AP.6.7 Bachelor's/Accelerated Master's Degrees (p. 93).

Students in an accelerated degree program must fulfill all university requirements for the master’s degree. See AP6.9 Requirements for Master’s Degrees. (p. 94)

Admission
Please see Graduate Admission Policies (p. 68) for general information on graduate admission to George Mason University. Specific information on application requirements and deadlines may be found on the Schar admissions website (http://schar.gmu.edu/admissions).

To be considered for this accelerated master's program, applicants must have completed a minimum of 75 credits, including at least 12 credits of Government, Economics and/or Global Affairs courses, and have a minimum GPA of 3.50 in all coursework applied to the degree.

Accelerated Option Requirements
While undergraduate students, accelerated master's students complete two graduate courses (six credits) that may be counted toward both the bachelor’s and master's degrees. In addition, students may take another two courses (six credits) to be held as reserve graduate credit and count only toward the master's degree. The courses are:

Students must maintain a minimum GPA of 3.00 in these courses and in coursework applied to their major.

Upon completion and conferral of the undergraduate degree in the semester indicated in the application, students must submit the Bachelor's/Accelerated Master's Transition Form to apply credits to the master’s degree. Students must begin their master’s program the semester immediately following conferral of the undergraduate degree (excluding summer).
To be considered for this accelerated master’s program, applicants must have completed a minimum of 75 credits, including at least 12 credits of Government, Economics and/or Global Affairs courses, and have a minimum GPA of 3.50 in all coursework applied to the degree.

**Accelerated Option Requirements**

While undergraduate students, accelerated master’s students complete two graduate courses (six credits) that may be counted toward both the bachelor’s and master’s degrees. In addition, students may take another two courses (six credits) to be held as reserve graduate credit and count only toward the master’s degree. The courses are ITRN 500 Global Political Economy, ITRN 504 Microeconomics and Trade Policy, ITRN 503 Macroeconomic Policy in the Global Economy and ITRN 605 Technology, Culture and Commerce. Students must maintain a minimum GPA of 3.00 in these courses and in coursework applied to their major.

Upon completion and conferral of the undergraduate degree in the semester indicated in the application, students must submit the Bachelor’s/Accelerated Master’s Transition Form to apply credits to the master’s degree. Students must begin their master’s program the semester immediately following conferral of the undergraduate degree (excluding summer).

**Bachelor’s Degree (any)/Political Science, Accelerated MA**

**Overview**

Highly-qualified undergraduates in any major may apply to the accelerated MA degree in political science. If accepted, students will be able to earn a bachelor’s degree in their chosen major and a MA in Political Science with a reduced number of overall credits and within a reduced time frame, sometimes five years. More information on bachelor’s/accelerated master’s programs may be found in AP.6.7 Bachelor’s/Accelerated Master’s Degrees (p. 93).

Students in an accelerated degree program must fulfill all university requirements for the master’s degree. See AP.6.9 Requirements for Master’s Degrees. (p. 94)

**Admission**

See Graduate Admission Policies (p. 68) for general information on graduate admission to George Mason University. Specific information on application requirements and deadlines for the Political Science master’s program may be found on the Schar website (http://schar.gmu.edu/programs/undergraduate-degrees/accelerated-masters-programs).

To be considered for this accelerated master’s program, applicants must have completed a minimum of 75 credits, including 12 GOVT credits, and have a minimum GPA of 3.50 in all coursework applied to the degree.

**Accelerated Option Requirements**

While undergraduate students, accelerated master’s students complete two graduate courses (six credits) that may be counted toward both the bachelor’s and master’s degrees. In addition, students may take another two courses (six credits) to be held as reserve graduate credit and count only toward the master’s degree. The courses are chosen from GOVT 500 The Scientific Method and Research Design, GOVT 510 American Government and Politics, GOVT 520 Political Theory, GOVT 530 Comparative Politics, GOVT 540 International Relations. Students must maintain a minimum GPA of 3.00 in these courses and in coursework applied to their major.

Upon completion and conferral of the undergraduate degree in the semester indicated in the application, students must submit the Bachelor’s/Accelerated Master’s Transition Form to apply credits to the master’s degree. Students must begin their master’s program the semester immediately following conferral of the undergraduate degree (excluding summer).

**Bachelor’s Degree (any)/Public Administration, Accelerated MPA**

**Overview**

Highly-qualified undergraduates in any major may apply to the accelerated master’s degree in public administration. If accepted, students will be able to earn a bachelor’s degree in their chosen major and a master’s degree in public administration with a reduced number of overall credits and within a reduced time frame, sometimes within five years. See AP.6.7 Bachelor’s/Accelerated Master’s Degrees (p. 93).

Students in an accelerated degree program must fulfill all university requirements for the master’s degree. For policies governing all graduate degrees, see AP.6 Graduate Policies (p. 90).

**Admission**

Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in Graduate Admissions (p. 68). Information specific to the accelerated MPA program may be found on the Schar website (http://schar.gmu.edu/programs/undergraduate-degrees/accelerated-masters-programs).

To be considered for this accelerated master’s program, applicants must have completed a minimum of 75 credits, including 12 GOVT credits, and have a minimum GPA of 3.50 in all coursework applied to the degree.

**Accelerated Option Requirements**

While undergraduate students, accelerated master’s students complete two graduate courses (six credits) that may be counted toward both the bachelor’s and master’s degrees. In addition, students may take another two courses (six credits) to be held as reserve graduate credit and count only toward the master’s degree. The courses are PUAD 502 Administration in Public and Nonprofit Organizations, POGO 511 Introductory Data Analysis for Policy and Government, PUAD 520 Organization Theory and Management Behavior and PUAD 540 Public Policy Process. Students must maintain a minimum GPA of 3.00 in these courses and in coursework applied to their major.

Upon completion and conferral of the undergraduate degree in the semester indicated in the application, students must submit the Bachelor’s/Accelerated Master’s Transition Form to apply credits to the master’s degree. Students must begin their master’s program the semester immediately following conferral of the undergraduate degree (excluding summer).

**Bachelor’s Degree (any)/Public Policy, Accelerated MPP**

**Overview**

Highly-qualified undergraduates in any major may apply to the accelerated Master of Public Policy (MPP) program. If accepted students will be able to earn a bachelor’s degree in their chosen major and the Master of Public Policy with a reduced number of overall credits and within a reduced time frame, sometimes within five years. More
information on bachelor’s/accelerated master’s programs may be found in AP:6.7 Bachelor’s/Accelerated Master’s Degrees (https://catalog.gmu.edu/policies/academic/graduate-policies/#ap-6-7).

Students in an accelerated degree program must fulfill all university requirements for the master’s degree. See AP:6.9 Requirements for Master’s Degrees (https://catalog.gmu.edu/policies/academic/graduate-policies/#ap-6-9).

**Admission**

Please see Graduate Admission Policies (p. 68) for general information on graduate admission to George Mason University. Information specific to the accelerated Master of Public Policy program may be found on the Schar website (http://schar.gmu.edu/programs/undergraduate-degrees/accelerated-masters-programs).

To be considered for this accelerated master’s program, applicants must have completed a minimum of 75 credits, including 12 credits of Government and/or Economics courses, and have a minimum GPA of 3.50 in all coursework applied to the degree.

**Accelerated Option Requirements**

While undergraduate students, accelerated master’s students complete two graduate courses (six credits) that may be counted toward both the bachelor’s and master’s degrees. In addition, students may take another two courses (six credits) from the following list to be held as reserve graduate credit and count only toward the master’s degree. The student must have a minimum GPA of 3.00 in each course. Students must maintain a minimum GPA of 3.00 in these courses and in coursework applied to their major.

**Public Administration, MPA**

**Banner Code:** PP-MPA-PUAD

**Academic Advising**

560 Founders Hall
Arlington Campus

359 Research Hall
Fairfax Campus

Website: schar.gmu.edu

The Master of Public Administration (MPA) is designed for people who hold or aspire to hold leadership positions in organizations that participate in the development and implementation of public policy. The mission of the MPA program is to give graduate students the opportunity to build their knowledge of politics, public policy and management and to enhance their analytic, problem solving, and communication skills.

MPA students at Mason have the research and cultural resources of the Washington, D.C. area at their disposal. Government agencies representing all levels in the U.S. federal system are located close to the campus, as are the National Archives, the Library of Congress, and the Smithsonian Institution. Another benefit is the wide range of internship opportunities available in governmental and nonprofit organizations. The MPA Program regularly has internship invitations from national, state, and local government organizations, as well as from nonprofit organizations whose principal work is at the local, state, national, or international levels. Many of these internships are paid positions.

MPA courses are held at the Fairfax and the Arlington campuses during the week and on the weekend in an accelerated format.

**Admissions & Policies**

**Admissions Requirements**

See Graduate Admission Policies (p. 68) for general information on graduate admission to George Mason University. Specific information on application requirements and deadlines may be found with Schar Admissions (http://schar.gmu.edu/admissions).

Completed applications for fall and spring semesters are reviewed on a rolling basis, with late applications considered on a space-available basis. Students may be admitted for nondegree study and apply a limited number of credits toward the master’s degree should they choose to apply to the degree program later, in accordance with university and school policy.

**Policies**

**Termination from Program**

Students admitted to an Schar program will be terminated from Schar upon receiving one grade of F and are no longer eligible to take courses in Schar. Per university regulation, students are terminated from the university after accumulating grades of F in two courses or 9 credits of unsatisfactory grades in graduate courses. For policies governing all graduate degrees, see Graduate Policies (p. 90).

**Program Requirements**

The MPA curriculum is arranged in a sequential manner. PUAD 500-level courses are foundation courses, 600-level courses are intermediate courses, and the 700-level courses are advanced courses. Students must take PUAD 500-level, or foundation courses, during the first two semesters, followed by 600-level classes. The PUAD 700-level courses should be taken during the last semester or two of enrollment in the MPA program.

For example, a full-time student should enroll in PUAD 502 Administration in Public and Nonprofit Organizations and two other 500-level courses, such as POGO 511 Introductory Data Analysis for Policy and Government and PUAD 520 Organization Theory and Management Behavior, during the first semester. In the second semester the student should enroll in PUAD 540 Public Policy Process and two intermediate
courses such as PUAD 662 National Budgeting and a 600-level elective course.

Part-time students taking two courses a semester should take PUAD 502 Administration in Public and Nonprofit Organizations and either POGO 511 Introductory Data Analysis for Policy and Government or PUAD 520 Organization Theory and Management Behavior during the first semester, followed by either POGO 511 Introductory Data Analysis for Policy and Government or PUAD 520 Organization Theory and Management Behavior and PUAD 540 Public Policy Process in the second semester.

Requests for taking a course out of sequence must be made in writing to the student's advisor and must be approved by the advisor before enrollment.

Requirements

Degree Requirements

Total credits: 36-39

The required courses emphasize the development of knowledge about public policy and management, as well as analytical problem-solving and communication skills, and third-party governance. Through these courses, students develop a shared knowledge base and skill set. The elective courses can be used by students to focus their knowledge and skill development within one concentration. Alternatively, the electives can be used to extend the breadth of study with courses drawn from a variety of concentrations or from other departments and schools across the university.

1. Students may take their electives within one of the concentrations which follow. As an alternative, with the approval of their advisor, students may select their electives from several concentrations or fields. Students not pursuing a concentration may select electives from Schar course offerings.

Concentrations

Students may declare only one concentration. PUAD 794 Internship and POGO 796 Directed Readings and Research may be applied to a concentration where content is appropriate and with prior written approval of the student's advisor. Other courses may also be applied to a concentration with prior written approval of the advisor.

Concentrations

• Concentration in Administration of Justice (ADJ) (p. 999)
• Concentration in Emergency Management and Homeland Security (EMHS) (p. 1000)
• Concentration in Environmental Science and Public Policy (EVPP) (p. 1000)
• Concentration in Human Resources Management (HRM) (p. 1000)
• Concentration in International Management (IM) (p. 1001)
• Concentration in Nonprofit Management (NPMG) (p. 1001)
• Concentration in Policy Studies (PS) (p. 1001)
• Concentration in Public Management (PMG) (p. 1001)
• Concentration in Public and Nonprofit Finance (PNF) (p. 1002)
• Concentration in State and Local Government (SLG) (p. 1002)
• Concentration in Third-Party Governance (TPG) (p. 1002)

Accelerated Master’s

Bachelor’s Degree (any)/Public Administration, Accelerated MPA

Overview

Highly-qualified undergraduates in any major may apply to the accelerated master’s degree in public administration. If accepted, students will be able to earn a bachelor’s degree in their chosen major and a master’s degree in public administration with a reduced number of overall credits and within a reduced time frame, sometimes within five years. See AP.6.7 Bachelor’s/Accelerated Master’s Degrees (p. 93).

Students in an accelerated degree program must fulfill all university requirements for the master’s degree. For policies governing all graduate degrees, see AP.6 Graduate Policies (p. 90).

Admission

Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in Graduate Admissions (p. 68). Information specific to the accelerated MPA program may be found on the Schar website (http://schar.gmu.edu/programs/undergraduate-degrees/accelerated-masters-programs).

To be considered for this accelerated master’s program, applicants must have completed a minimum of 75 credits, including 12 GOVT credits, and have a minimum GPA of 3.50 in all coursework applied to the degree.

Accelerated Option Requirements

While undergraduate students, accelerated master’s students complete two graduate courses (six credits) that may be counted toward both the bachelor’s and master’s degrees. In addition, students may take another two courses (six credits) to be held as reserve graduate credit and count only toward the master’s degree. The courses are PUAD 502 Administration in Public and Nonprofit Organizations, POGO 511 Introductory Data Analysis for Policy and Government, PUAD 520 Organization Theory and Management Behavior and PUAD 540 Public Policy Process. Students must maintain a minimum GPA of 3.00 in these courses and in coursework applied to their major.

Upon completion and conferral of the undergraduate degree in the semester indicated in the application, students must submit the Bachelor’s/Accelerated Master’s Transition Form to apply credits to the master’s degree. Students must begin their master’s program the semester immediately following conferral of the undergraduate degree (excluding summer).

Public Management Graduate Certificate

Banner Code: PP-CERG-PMG

Admissions & Policies

Admissions

Applicants to all graduate programs must meet the admission standards and application requirements for graduate study as specified in Graduate Admission Policies (p. 68). Participants must be admitted to a certificate program. Admission requirements are the same as those for the master’s programs and may be found on the Schar admissions website (http://schar.gmu.edu/admissions).

Requirements

Certificate Requirements

Total credits: 15
This certificate may be pursued on a part-time basis only.

Public Policy, MPP

Banner Code: PP-MPP-PUBP

Academic Advising

560 Founders Hall
Arlington Campus
359 Research Hall
Fairfax Campus

Website: schar.gmu.edu

The master of public policy leads to a degree for aspiring or experienced professionals who seek career advancement through cutting-edge education and training in policy analysis and development in increasingly technical and global environments. The program prepares students to be reflective practitioners who develop, implement, manage, analyze, evaluate, and effect innovative change in the public and private sectors through a course of study that emphasizes the fundamentals of policy development; the role of technology, analytic assessment, and modeling for policy evaluation; and the implications of international and global perspectives on policy formation. Courses are offered primarily in late afternoon and evening to fit the schedules of busy professionals.

Admissions & Policies

Admissions

Requirements

See Graduate Admission Policies (p. 68) for general information on graduate admission to George Mason University. Specific information on application requirements and deadlines may be found with Schar Admissions (http://schar.gmu.edu/admissions). Completed applications for fall and spring semesters are reviewed on a rolling basis, with late applications considered on a space-available basis. Students may be admitted for nondegree study and apply a limited number of credits toward the master's degree should they choose to apply to the degree program later, in accordance with university policy.

Policies

Termination from Program

Students admitted to a Schar program will be terminated from Schar upon receiving one grade of F and are no longer eligible to take courses in Schar. Per university regulation, students are terminated from the
Program Requirements

Students must complete 36 to 39 credits of coursework through a combination of core courses, electives, and a professional experience requirement. Appropriate professional experience can be demonstrated through previous employment or a supervised internship. Students will also be exposed to the global nature of public policy activity through the core requirement of international comparative policy assessment.

Accelerated Master's

Bachelor's Degree (any)/Public Policy, Accelerated MPP
Overview
Highly-qualified undergraduates in any major may apply to the accelerated Master of Public Policy (MPP) program. If accepted students will be able to earn a bachelor's degree in their chosen major and the Master of Public Policy with a reduced number of overall credits and within a reduced time frame, sometimes within five years. More information on bachelor's/accelerated master's programs may be found in AP.6.7 Bachelor's/Accelerated Master's Degrees (https://catalog.gmu.edu/policies/academic/graduate-policies/#ap-6-7).

Students in an accelerated degree program must fulfill all university requirements for the master's degree. See AP.6.9 Requirements for Master's Degrees. (https://catalog.gmu.edu/policies/academic/graduate-policies/#ap-6-9)

Admission
Please see Graduate Admission Policies (p. 68) for general information on graduate admission to George Mason University. Information specific to the accelerated Master of Public Policy program may be found on the Schar website (http://schar.gmu.edu/programs/undergraduate-degrees/accelerated-masters-programs).

To be considered for this accelerated master's program, applicants must have completed a minimum of 75 credits, including 12 credits of Government and/or Economics courses, and have a minimum GPA of 3.50 in all coursework applied to the degree.

Accelerated Option Requirements
While undergraduate students, accelerated master's students complete two graduate courses (six credits) that may be counted toward both the bachelor's and master's degrees. In addition, students may take another two courses (six credits) from the following list to be held as reserve graduate credit and count only toward the master's degree. The student must have a minimum GPA of 3.00 in each course. Students must maintain a minimum GPA of 3.00 in these courses and in coursework applied to their major.

Upon completion and conferral of the undergraduate degree in the semester indicated in the application, students must submit the Bachelor's/Accelerated Master's Transition Form to apply credits to the master's degree. Students must begin their master's program the semester immediately following conferral of the undergraduate degree (excluding summer).

Public Policy, PhD
Banner Code: PP-PHD-PUBP

Academic Advising
560 Founders Hall
Arlington Campus
359 Research Hall
Fairfax Campus
Website: schar.gmu.edu

This doctoral degree in public policy is distinctive in its heavy emphasis on the combined influence of technology, culture, and institutions on public policy. Students investigate the increasing tensions created by technologically driven organizational change. This doctoral program prepares its graduates to assume positions of significant responsibility in academia, government, and the private and public sectors. With a focus on analytical and research-based approaches to public policy, our students seek to understand the underlying determinants of public policy.
choices, analyze and improve the implementation of policy, and identify and assess new opportunities to address emerging issues.

To investigate the policy issues associated with substantive policy areas, students develop in-depth understanding of American institutions, values, and culture; competence in research methods and advanced analytical methodologies; and a comparative, international perspective. At the time of admission, each student is assigned a faculty advisor who assists in the design and development of the student’s program.

Admissions & Policies

Admissions

Requirements

The program seeks students with exceptional potential for accumulating, sorting, analyzing, and communicating information and findings effectively. Public policy is inherently complex and value-laden. In the end, high-quality policy analysis requires thoughtful and judicious management of complex and incommensurate information, both quantitative and qualitative. Potential students must be able to manage and integrate both kinds of information and produce persuasive, well-organized, written syntheses and analytical insight.

The ideal applicant has demonstrated capabilities in research and writing, basic mathematical skills roughly equal to one semester of calculus, competence in statistics, some background in economics, and a theoretical and working knowledge of public policy processes. Applicants with strong records who are lacking in one or more of these areas may be admitted to the program and will receive assistance in making up deficiencies.

Applicants must hold a master’s degree from a regionally-accredited institution and have a GPA of 3.00 or higher. Prospective students are encouraged to attend an information session.

See Graduate Admission Policies (p. 68) for general information on graduate admission to George Mason University. See Schar Admissions (http://schar.gmu.edu/admissions) for application requirements and deadlines for the PhD in Public Policy. Students are considered for admission for the Fall term only.

Policies

For policies governing all graduate degrees, see Graduate Policies (p. 90).

Program Requirements

Students are required to complete a minimum of 82 credits of graduate coursework, of which no more than 12 may be dissertation credits. Specific coursework requirements include four foundational core courses, one semester of participation in the research colloquium (public policy seminar), two advanced methodology courses, three courses in an area of program specialization, and three advanced courses tailored to the student’s research needs and interests. Courses are determined in collaboration with the student’s advisor and are drawn widely not only from Schar, but also from other programs at Mason.

At the completion of core skills coursework (Stage One), students must pass a qualifying exam that evaluates mastery of the first year’s material, as well as the ability to integrate that material when addressing important and complex public policy problems and issues. Students must then develop their research areas through specialized coursework, and pass a field exam structured around their specific field of proposed doctoral research (Stages Two and Three). Other requirements include the successful preparation and defense of a doctoral research proposal and the ensuing dissertation (Stage Four).

A complete description of the program policies, procedures, and requirements is in the PhD student and faculty handbook (https://schar.gmu.edu/current-students/phd-student-services/phd-handbook-forms), which is published annually.

Reduction of Credit

Students must have a master’s degree before being admitted to the PhD in public policy. Up to 30 credits from a prior master’s degree may be applied toward the doctoral requirements at the program director’s discretion. The program director determines whether the credits are eligible for reduction of credit and the number of credits to be reduced. Students who receive less than a 30 credit reduction may take additional specialized elective credit in Stage Two.

Prerequisites: Methodological and Substantive Foundations

PhD students are required to have competence in the following three areas, either by taking these courses or by proving competence through a placement exam and/or evidence of previous relevant coursework.

Prerequisite courses will not count as part of the 82 credit requirement.

Stage Two - Policy Fields and Skills

After passing the qualifying exam, students assemble a Field Research Committee. By the end of their third semester, full-time students (fourth semester for part-time) must choose a chair for their Field Committee.

By the start of their fourth semester, full-time students (fifth semester for part-time) must submit to the chair of their Field Committee a plan...
for their Field of Study. The Field of Study Plan will describe a proposed research area, including citations relevant to current research in that Field. The Plan must be approved by both the student’s Field Committee chair and the program director.

Coursework taken in Stage Two includes:

</tr>
</tbody>
</table>

Total Credits: 13-14

1 Other courses may be approved by the program director.

Stage Three - Research Foundations

In Stage Three, students take coursework approved in the Field of Study Plan. Courses in the Field of Study Plan are intended to be taken concurrently with work on the Field Statement and Field Exam. Students may not present a dissertation proposal for approval until they have passed the Field Exam.

Students may choose one of the established fields of study or work with a faculty committee to create their own field of study. The established fields in the doctoral program are: regional development and transportation; technology, science and innovation; entrepreneurship, growth and public policy; U.S. governance; culture and society; organizational and information technology; and global and international systems.

Students must complete all of the following:

<table>

Total Credits: 12

Note: Where appropriate courses are not available from Schar, students may petition the program director for substitute courses to count for their Field of Study Plan.

Science, Technology, and Security Graduate Certificate

Banner Code: PP-CERG-STS

Academic Advising
The Schar School offers certificate programs in conjunction with its master’s programs. Students already pursuing a master’s degree in the school may, in most cases, after admission to a certificate program, earn an additional six credits (two courses) in Schar to receive a certificate in addition to the master’s degree. The certificate in science, technology, and security provides an introduction to the intersection of science and security, covering topics such as the technology of CBRN weapons, proliferation, technical countermeasures, and the role of science and technology in the policy-making process.

The graduate certificate in science, technology, and security may be pursued on a part-time or full-time basis.

### Admissions & Policies

#### Admissions

Applicants to all graduate programs must meet the admission standards and application requirements for graduate study as specified in Graduate Admission Policies (p. 68). Participants must be admitted to a certificate program. Admission requirements are the same as those for the master’s programs and may be found on the Schar admissions website (http://schar.gmu.edu/admissions).

#### Policies

For policies governing all graduate certificates, see AP.6.8 Requirements for Graduate Certificates (p. 94).

#### Termination from Program

Students admitted to a Schar program will be terminated from that program upon receiving one grade of F and are no longer eligible to take courses in the school. Per university regulation, students are terminated from the university after accumulating grades of F in two courses or 9 credits of unsatisfactory grades in graduate courses. For policies governing all graduate degrees, see Graduate Policies (p. 90).

The Schar School offers certificate programs in conjunction with its master’s programs. Students already pursuing a master’s degree in the school may, in most cases, after admission to a certificate program, earn an additional six credits (two courses) in Schar to receive a certificate in addition to the master’s degree. The certificate in terrorism and homeland security is an interdisciplinary introduction to the phenomenon of modern terrorism and its implications for US domestic and foreign policy. It focuses on multidisciplinary analysis and holistic cross-sectorial approaches to long-term prevention of and response to terrorism.

The graduate certificate may only be pursued on a part-time basis.

### Admissions & Policies

#### Admissions

Applicants to all graduate programs must meet the admission standards and application requirements for graduate study as specified in Graduate Admission Policies (p. 68). Transportation Policy, Operations, and Logistics, MA
Banner Code: PP-MA-TPOL

Academic Advising
560 Founders Hall
Arlington Campus
359 Research Hall
Fairfax Campus
Website: schar.gmu.edu

The master of arts in Transportation Policy, Operations, and Logistics (TPOL) program is designed for students and practicing professionals engaged in planning, regulating, managing, and operating transportation facilities and services. Students obtain a working knowledge of the theory, policy, law, research, and practices required to effectively and efficiently supply and operate transportation facilities and services. They also learn to think critically and analytically about the problems and challenges in this field and communicate their analyses clearly and effectively through written and oral presentations.

Admissions & Policies
Admissions
Requirements
See Graduate Admission Policies (p. 68) for general information on graduate admission to George Mason University. Specific information on application requirements and deadlines may be found with Schar Admissions (http://schar.gmu.edu/admissions).

Completed applications for fall and spring semesters are reviewed on a rolling basis, with late applications considered on a space-available basis. Students may be admitted for nondegree study and apply a limited number of credits toward the master’s degree should they choose to apply to the degree program later, in accordance with university policy.

Policies
Termination from Program
Students admitted to an Schar program will be terminated from Schar upon receiving one grade of F and are no longer eligible to take courses in Schar. Per university regulation, students are terminated from the university after accumulating grades of F in two courses or 9 credits of unsatisfactory grades in graduate courses. For policies governing all graduate degrees, see Graduate Policies (p. 90).

College Code: VS

The Volgenau School of Engineering delivers a transformative learning experience to its students by integrating engineering and technology with other areas of scholarship. We produce visionary stewards of society who are prepared to discover solutions to complex global challenges and make the world safer, cleaner, and more prosperous. A faculty of engaged educators lead high-impact research in critical areas, including sustainability, big data, cybersecurity, robotics and artificial intelligence, signals and communications, and healthcare technology. These existing and emerging areas of expertise span departmental and disciplinary boundaries and reflect the breadth of the scholarly activities of our faculty and students.
The Volgenau School of Engineering prepares students to solve complex, multidisciplinary, global challenges by leveraging innovative learning tools, the inventive capacity of our region, and Mason’s global presence. The faculty and administration support the needs of the 21st century learner by providing multiple paths to success, a diverse and inclusive academic community, and real time integration of new data and technology in the classroom.

Undergraduate Programs
Bachelor of Science Programs

Our undergraduate degree programs prepare students to enter directly into professional employment or continue studies at the graduate level. The requirements for the bachelor’s degrees include required and elective courses in mathematics, humanities, Mason Core, and specialty courses applicable to the major. Each program strongly emphasizes English composition and communication.

The Volgenau School offers the following Bachelor of Science programs:

- Applied Computer Science (p. 1050)
- Bioengineering (p. 1032)
- Civil and Infrastructure Engineering (p. 1177)
- Computer Engineering (p. 1087)
- Computer Science (p. 1057)
- Cyber Security Engineering (p. 1016)
- Electrical Engineering (p. 1097)
- Information Technology (p. 1122)
- Mechanical Engineering (p. 1131)
- Statistics (p. 1146)
- Systems Engineering (p. 1164)

Minors

Minors are available in aviation flight training and management, bioengineering, computer science, data analysis, environmental engineering, information technology, mechanical engineering, software engineering, statistics, and systems engineering.

BS/Accelerated MS Programs

Accelerated master’s degree programs offer high-achieving Mason undergraduates the opportunity to complete their bachelor’s and master’s degrees within five years. Qualified candidates take advantage of a streamlined master’s application process with no application fee and the ability to take up to 12 graduate credits at the undergraduate tuition rate.

- Applied Computer Science, BS/Computer Science, Accelerated MS (p. 1054)
- Applied Computer Science, BS/Data Analytics Engineering, Accelerated MS (p. 1054)
- Applied Computer Science, BS/Information Security and Assurance, Accelerated MS (p. 1054)
- Applied Computer Science, BS/Information Systems, Accelerated MS (p. 1054)
- Applied Computer Science, BS/Software Engineering, Accelerated MS (p. 1054)
- BS (selected)/Operations Research, Accelerated MS (p. 1167)
- BS (selected)/Statistical Science, Accelerated MS (p. 1167)
- BS (selected)/Systems Engineering, Accelerated MS (p. 1167)

• Systems Engineering, BS/Telecommunications, Accelerated MS (p. 1167)

**Graduate Programs**

**Master of Science Programs**
The ever-increasing complexity and technical challenges in engineering, computer science, and information technology demand studies beyond the bachelor’s degree.

The Volgenau School offers the following master’s programs:

• Applied Information Technology (p. 1118)
• Bioengineering (p. 1042)
• Biostatistics (p. 1138)
• Civil and Infrastructure Engineering (p. 1182)
• Computer Engineering (p. 1109)
• Computer Science (p. 1065)
• Data Analytics Engineering (p. 1019)
• Digital Forensics and Cyber Analysis (p. 1095) (title change Pending SCHEV Approval)
• Electrical Engineering (p. 1103)
• Geotechnical, Construction, and Structural Engineering (p. 1189)
• Information Security and Assurance (p. 1072)
• Information Systems (p. 1075)
• Management of Secure Information Systems (p. 1031)
• Operations Research (p. 1153)
• Software Engineering (p. 1081)
• Statistical Science (p. 1141)
• Systems Engineering (p. 1170)
• Telecommunications (p. 1111)

**Doctor of Philosophy Programs**

PhD students will gain comprehensive knowledge in their area of study and will be prepared for careers in higher education and scientific research. They are required to demonstrate a comprehensive understanding and complete research that adds significantly to the body of knowledge in engineering, computer science, information technology, or statistics.

The Volgenau School offers seven doctoral programs:

• Bioengineering (p. 1046)
• Civil and Infrastructure Engineering (p. 1186)
• Computer Science (p. 1069)
• Electrical and Computer Engineering (p. 1105)
• Information Technology (p. 1026)
• Statistical Science (p. 1145)
• Systems Engineering and Operations Research (p. 1162)

**Commonwealth Graduate Engineering Program (CGEP)**

CGEP is the premier provider of high-quality post-baccalaureate online engineering education in the Commonwealth of Virginia and is designed for practicing engineers and scientists interested in maintaining and enhancing their skills. Participating universities are: George Mason University, Old Dominion University, University of Virginia, Virginia Commonwealth University, and Virginia Tech. Offerings include master’s degrees and certificate programs.

While each program is offered by one of the five participating universities, the collaboration between universities allows students more flexibility and variety in course offerings. A substantial number of course requirements can be taken at any of the five participating universities to satisfy the degree or certificate program. Prospective students should apply directly to the university offering the degree of interest. Mason has a number of degree and certificate programs available through CGEP. These programs follow all policies stated in this catalog for the program, with the exception of allowing up to 50 percent of the required credits to be completed at other CGEP participating universities. Faculty advisor approval is needed.

Policies for other universities’ programs are determined by those institutions. Please consult with the university offering the program of interest for details.

For more information including the Mason programs available through CGEP, visit their website (http://cgep.virginia.gov).

### Requirements & Policies

#### Undergraduate Requirements

**Degree Requirements**
The following general requirements must be completed by all undergraduate students:

• At least 120 credits of academic work including at least 45 credits of upper-level courses (numbered 300 or above);
• At least 6 credits of English composition, 3 credits of literature, and 3 credits of oral communication (Mason Core courses);
• At least 3 credits of arts, 3 credits of Western civilization or world history, 3 credits of social and behavioral science, and 3 credits of global understanding issues (Mason Core courses);
• At least 24 credits of social science and humanities course work, which is normally satisfied by the 24 credits of Mason Core courses described above;

All requirements are listed in the sections for specific Volgenau School majors. These include university requirements for mathematics, natural science, information technology including ethics, and synthesis. Sample schedules that fulfill degree requirements for individual programs within the Volgenau School are available from the departments.

#### Undergraduate Policies

**Academic Policies**

Students should become familiar with the Academic Policies (p. 77) in the University Catalog in addition to policies specific to each academic unit. The Academic Policies (p. 77) also list additional university requirements for minor programs and double majors.

**Academic Appeal of Policies and Actions**

A student’s instructor, academic advisor and/or department can resolve most academic issues. If, however, an undergraduate student disagrees with a decision at the department level and feels that there may be reasonable grounds for appeal, the student should contact the Volgenau School Undergraduate Student Services Office at 703-993-1511 for guidance in preparing a request to the Associate Dean for Undergraduate Programs or other offices as appropriate. Information about grade appeals is found in AP.3.9 Grade Appeals (p. 85).
**Academic Progression**

Students majoring in Volgenau School programs are expected to have an acceptable plan of study on file, formulated with assistance from their departmental advisor. They are expected to make reasonable progress toward their degree during each semester in which they are enrolled.

Termination from a major—or from all majors in a college—may be imposed as a result of excessive repeating of required courses without achieving the minimum standard, and for other evidence of continued failure to make adequate progress toward declaration or completion of the major. For more information, see AP 5.2.4 Termination from the Major (https://catalog.gmu.edu/policies/academic/undergraduate-policies/#ap-5-2-4)

**Sample Schedules**

Sample schedules that fulfill degree requirements for individual programs within the Volgenau School are available from the departments.

**Change of Major**

1. **Criteria for freshman students in their first semester at Mason**

   Freshman students who have been admitted to any VSE engineering or computer science program may change their major to any other engineering or computer science program before the final drop deadline of their first semester at Mason.

   Freshman students who have been admitted to Information Technology, Statistics, VSE Undeclared, or any non-VSE major must have departmental approval to change their major to a VSE program before the final drop deadline of their first semester at Mason.

   Any change of major requests made after this deadline are bound to the change of major criteria outlined in section 3 and require the completion of at least one semester at Mason.

2. **Criteria for transfer students in their first semester at Mason**

   Transfer students who have been admitted to any VSE engineering program may change their major to any other engineering program before the final drop deadline of their first semester at Mason.

   Transfer students who have been admitted to Computer Science, Information Technology, Statistics, VSE Undeclared, or any non-VSE major must have department approval to change their major to a VSE program before the final drop deadline of their first semester at Mason.

   Any change of major requests made after this deadline are bound to the change of major criteria outlined in section 3 and require the completion of at least one semester at Mason.

3. **Criteria for students who have completed at least one semester at Mason**

   Students who have completed at least one semester at Mason and who are considering changing their major to any VSE engineering program should consult with the Volgenau School of Engineering Coordinator of Undergraduate Advising, 2500 Nguyen Engineering Building. These students must have successfully completed MATH 114, PHYS 160 and PHYS 161 (with a grade of at least C) and should have a minimum Mason GPA of 2.75 in all technical coursework. Technical coursework refers to any math, physics, engineering, statistics and computer science courses completed thus far at Mason and that are applicable to the intended engineering major. At least 6 credits of these technical courses should have been completed successfully at Mason.

   *Students considering changing their major to Bioengineering with a Pre-Health concentration need to meet the above VSE engineering program requirements furthermore with a minimum Mason GPA of 3.00.

   Students considering changing their major to Applied Computer Science, Computer Science, Information Technology, or Statistics should consult with the Volgenau School of Engineering Coordinator of Undergraduate Advising, 2500 Nguyen Engineering Building. These students need to meet the criteria for that program as defined in the change of major section for that program in the catalog. Minimum GPA requirements stated for those programs are based on courses taken at Mason.

   Exceptions to the policy may only be granted at the discretion of the chair or associate chair of the department.

**Undeclared Students in the Volgenau School of Engineering**

Students who are undecided about their specific major may select Volgenau School Undeclared as their major. This should be done as soon as possible after a student enrolls at Mason. Students will be advised to follow an initial semester or two of courses that could be applicable to majors that are of interest to them. This may involve taking courses that help the student better understand different engineering and computing areas, but which may not contribute to the total credits needed for the major they eventually choose.

Students who apply to a VSE major but do not meet major admissions criteria may also be accepted into VSE Undeclared, and become eligible to declare a VSE major after meeting specific requirements as determined by that particular major.

VSE Undeclared students are advised by the Coordinator of Undergraduate Academic Advising in the Student Services Office. Students should seek advising at least once each semester.

**Writing-Intensive Requirement**

The university requires all undergraduate students to successfully complete a course, or a combination of courses, designated “writing intensive” in their majors at the 300 level or above. To determine the writing-intensive course requirements for specific degrees, refer to the major program descriptions in the following department sections.

**Restricted Courses**

Students are encouraged to take advantage of the many excellent courses available to broaden their educational experience or strengthen their background; however, some credits earned may not satisfy any degree requirements. Degree requirements for Volgenau School undergraduate programs may not include credits earned in military science. At most 3 credits of 100-level RECR coursework may be taken to satisfy the degree requirements of those VSE programs that allow general electives. Whenever there is uncertainty, students must consult with an academic advisor in their department.

**Online Education Programs**

In order to increase access to Volgenau School education while meeting the needs of the School’s student population, select degree programs and courses may be completed via online education. All academic policies and procedures apply to online education programs and courses as referred to in the appropriate sections of this catalog. Some instructors may require exams and/or other meetings to take place in a proctored or on-campus environment. Students should contact the instructor concerning these requirements if not explicitly stated on Patriot Web.
Space permitting and if desired, students enrolled in the online sections are also permitted to attend the instructor’s campus-based classroom section if offered during the same semester.

For more information about the Volgenau School programs available online, visit Mason Online (http://masononline.gmu.edu).

**Termination from the Major**

No math, science, or Volgenau School of Engineering course that is required for the major may be attempted more than three times. Those students who do not successfully complete such a course within three attempts will be terminated from the major. Undeclared students in the Volgenau School who do not successfully complete a course required for a Volgenau School major within three attempts will also be terminated.

In addition, students in the Volgenau School with evidence of continued failure to make adequate progress toward declaring or completing a Volgenau School major will also be terminated. Adequate progress is determined by the major program. For more information, see AP.5.2.4 Termination from the Major (https://catalog.gmu.edu/policies/academic/undergraduate-policies/#ap-5-2-4).

Once a student has attempted one of these courses twice unsuccessfully, the third attempt must be no later than the next semester of enrollment, excluding summers. Failure to take the course at that time will result in termination from the major. A third attempt of a Volgenau School of Engineering course requires support by the student’s major department as well as permission by the department offering the course. This permission is not guaranteed. If the student is unable to take the course when required, the student may request an extension to a future semester; extensions require approval of the student’s advisor, their department, and the Associate Dean for Undergraduate Programs. The deadline for extension requests is the add deadline for the semester in which the course is required.

Students who have been terminated from a Volgenau School of Engineering major may not register for a Volgenau School course without permission of the department offering the course. This applies to all undergraduate courses offered by the Volgenau School except IT 104 Introduction to Computing (Mason Core) (p. 142) and STAT 250 Introductory Statistics I (Mason Core) (p. 142).

A student may not declare any major in the Volgenau School of Engineering if the student has previously met the termination criteria for that major at any time, regardless of what the student’s major was at the time the courses were taken.

**Graduate Policies**

**Admission**

Admission decisions are made by the faculty committee or graduate coordinator of the respective graduate program. Denial of admission is not subject to appeal. Applicants denied admission to a program are not permitted to enroll in courses in that graduate program, though they may apply for either non-degree enrollment or admission to another program.

If an applicant is offered graduate admission, the college reserves the right to withdraw that offer of admission if:

- During his or her academic studies, the admitted applicant has a significant drop in academic performance or fails to graduate with a degree prior to the first day of classes for the term admitted.
- There has been a misrepresentation in the application process.
- Prior to the first day of classes for the term admitted, the school learns that the admitted applicant has engaged in behavior that indicates a serious lack of judgment or integrity, irrespective of the outcome of any disciplinary process related to such behavior.
- Students admitted to an accelerated master’s program do not maintain satisfactory progress in his or her undergraduate program, do not receive a minimum grade of 3.00 in the graduate classes taken as an undergraduate, or otherwise does not meet the conditions specified on the application and admission letter.

The university further reserves the right to require the applicant to provide additional information (and/or authorization for the release of information) about any such matter.

**Academic Policies**

Students are responsible for becoming familiar with the Academic Policies (https://catalog.gmu.edu/policies/academic) in the University Catalog in addition to policies specific to the School. A resource for Mason Engineering Graduate Students is maintained online (https://mymasonportal.gmu.edu/webapps/blackboard/content/listContent.jsp?course_id=_336120_1&content_id=_7639878_1&mode=reset) with graduate-specific Volgenau information.

**Academic Progression**

Graduate students must make satisfactory progress toward a degree.

At a minimum, this requires maintaining enrollment in at least one term per academic year and a GPA of 3.0 or higher. Inability to make satisfactory progress toward a degree may result in termination (https://catalog.gmu.edu/policies/academic/graduate-policies). Academic programs of study are entitled to enforce more stringent criteria which may include specific grade requirements in courses, successful completion of doctoral qualifying exams, etc. Please refer to your program for additional information.

**Doctoral Change of Program**

Students in Volgenau School of Engineering doctoral programs are not permitted to change doctoral programs without a new, formal PhD admission application submitted in accordance with the established requirements and deadlines.

**Non-degree**

Non-degree graduate students taking courses in the Volgenau School may not register for classes numbered 700 or higher. All MS degree programs require at least 18 credits to be completed in degree status at Mason to be considered for graduation; as a result, a maximum of 12 credits of non-degree coursework can be transferred to a degree program.

**Readmission**

Graduate students who have been terminated or have resigned from a program in the Volgenau School and want to reapply to the same program must wait five (5) semesters (Fall/Spring) before submitting a new application for admission. A full application for admission as well as all application materials required of that program must be submitted (or resubmitted). GRE scores, if required, cannot be older than five years. Previous admission to a program does not guarantee readmission to the same program. The circumstances of the prior termination or resignation will be a factor in the decision-making process. Graduate credit earned prior to termination may be applied to the degree program as long as the requirements are satisfied for Transfer of Credit (https://catalog.gmu.edu/policies/academic/graduate-policies/#text).
Online Education Programs

In order to increase access to Volgenau School education while meeting the needs of the School’s student population, select degree programs and courses may be completed via online education. All academic policies and procedures apply to online education programs and courses as referred to in the appropriate sections of this catalog. Some instructors may require exams and/or other meetings to take place in a proctored or on-campus environment. Students should contact the instructor concerning these requirements if not explicitly stated on Patriot Web. Space permitting and if desired, students enrolled in the online sections are also permitted to attend the instructor’s campus-based classroom section if offered during the same semester.

For more information about the Volgenau School programs available online, visit Mason Online (http://masononline.gmu.edu).

Termination

University policy on Academic Termination can be found in AP.6.6.2 (https://catalog.gmu.edu/policies/academic/graduate-policies). School specific process and criteria can be found on the Mason Engineering Graduate Student Resource page (https://mymasonportal.gmu.edu/webapps/blackboard/content/listContent.jsp?course_id=_336120_1&content_id=_7639878_1&mode=reset).

Admissions & Policies

Policies

For policies governing all undergraduate degrees, see AP.5 Undergraduate Policies (p. 87).

Advising and Plan of Study

All cyber security engineering students are assigned a faculty advisor. With the advisor’s help and approval, each student is required to complete a plan of study, which constitutes a learning plan for the degree program. The plan of study must be signed by the student’s advisor and the Program Chair and be updated and signed by the advisor at least once a year.

Change of Major

See Change of Major (p. 1013) for more information.

Grade Requirements

Students in the Cyber Security Engineering, BS program must complete all mathematics, science, and VSE courses with a grade of C or better.

Termination from the Major

No math, science, or Volgenau School of Engineering course that is required for the major may be attempted more than three times. Those students who do not successfully complete such a course within three attempts will be terminated from the major. Undeclared students in the Volgenau School who do not successfully complete a course required for a Volgenau School major within three attempts will also be terminated.

In addition, students in the Volgenau School with evidence of continued failure to make adequate progress toward declaring or completing a Volgenau School major will also be terminated. Adequate progress is determined by the major program. For more information, see AP.5.2.4 Termination from the Major (https://catalog.gmu.edu/policies/academic/undergraduate-policies/#ap-5-2-4).

Once a student has attempted one of these courses twice unsuccessfully, the third attempt must be no later than the next semester of enrollment, excluding summers. Failure to take the course at that time will result in termination from the major. A third attempt of a Volgenau School of Engineering course requires support by the student’s major department as well as permission by the department offering the course. This permission is not guaranteed. If the student is unable to take the course when required, the student may request an extension to a future semester; extensions require approval of the student’s advisor, their department, and the Associate Dean for Undergraduate Programs. The deadline for extension requests is the add deadline for the semester in which the course is required.

Students who have been terminated from a Volgenau School of Engineering major may not register for a Volgenau School course without permission of the department offering the course. This applies to all undergraduate courses offered by the Volgenau School except IT 104...
Introduction to Computing (Mason Core) (p. 142) and STAT 250 Introductory Statistics I (Mason Core) (p. 142).

A student may not declare any major in the Volgenau School of Engineering if the student has previously met the termination criteria for that major at any time, regardless of what the student’s major was at the time the courses were taken.

Note:
All students must submit at least 24 credits of social science and humanities coursework, which is normally satisfied by the 24 credits of Mason Core (p. 142) social science and humanities courses listed above and with the oral communication and economics requirement.

Accelerated Master's

Cyber Security Engineering, BS/Computer Engineering, Accelerated MS

Overview

The university offers highly-qualified students in the Cyber Security Engineering, BS (p. 1016) the option of obtaining an accelerated Computer Engineering, MS (p. 1092).

For more detailed information, see AP.6.7 Bachelor's/Accelerated Master's Degrees (https://catalog.gmu.edu/policies/academic/graduate-policies/#ap-6-7). For policies governing all graduate degrees, see AP.6 Graduate Policies (https://catalog.gmu.edu/policies/academic/graduate-policies).

Admission Requirements

Students in the Cyber Security Engineering, BS (p. 1016) program may apply for this option if they have earned 90 undergraduate credits with an overall GPA of at least 3.25. Criteria for admission are identical to criteria for admission to the Computer Engineering, MS (p. 1092) program.

Accelerated Option Requirements

Students must complete all credits that satisfy requirements for the BS and MS programs, with 6 credits overlapping.

Students take 6 credits of 500-level ECE (p. 1611) or CS (p. 1468) courses as part of their technical electives or substitutes for required courses in the Cyber Security Engineering, BS (p. 1016) program.

Specifically, students are encouraged to take two of the following courses:

<table>
<thead>
<tr>
<th>Code</th>

<td>Computer Network Architectures and Protocols</td>
<td>3</td>
</tr>
</tbody>
</table>

Degree Conferral

Students must apply the semester before they expect to complete the BS requirements to have the BS degree conferred. In addition, at the beginning of the student's final undergraduate semester, students must complete a Bachelor's/Accelerated Master's Transition form (https://registrar.gmu.edu/forms) that is submitted to the Office of the University Registrar and the VSE Graduate Admissions Office. At the completion of MS requirements, a master's degree is conferred.

Cyber Security Engineering, BS/Digital Forensics and Cyber Analysis (title change pending SCHEV approval), Accelerated MS

Overview

Highly-qualified students in the Cyber Security Engineering, BS (p. 1016) have the option of obtaining an accelerated Digital Forensics and Cyber Analysis (p. 1095), MS (p. 1095).

For more detailed information, see AP.6.7 Bachelor's/Accelerated Master's Degrees (p. 93). For policies governing all graduate degrees, see AP.6 Graduate Policies (p. 90).

Admission Requirements

Students in the Cyber Security Engineering, BS (p. 1016) program may apply for this option if they have earned 90 undergraduate credits with an overall GPA of at least 3.25. Criteria for admission are identical to criteria for admission to the Digital Forensics and Cyber Analysis, MS (p. 1095) program.

Accelerated Option Requirements

Students must complete all credits that satisfy requirements for the BS and MS programs, with 6 credits overlapping.

Students register for two Digital Forensics and Cyber Analysis core courses (6 credits) in place of two of the three required technical electives, as part of the undergraduate degree requirements. Specifically, students must take:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>CFRS 500</td>
<td>Introduction to Forensic Technology and Analysis</td>
<td>3</td>
</tr>
<tr>
<td>and one of the following:</td>
<td></td>
<td>3</td>
</tr>
<tr>
<td>CFRS 510</td>
<td>Digital Forensics Analysis (satisfies the IT 357 requirement for the INFS concentration in the BS program)</td>
<td></td>
</tr>
<tr>
<td>CFRS 660</td>
<td>Network Forensics (satisfies one NTEL concentration course in the BS program)</td>
<td></td>
</tr>
</tbody>
</table>

Total Credits 6
Note: Students complete all Digital Forensics and Cyber Analysis, MS (p. 1095) core courses and apply the two courses from the above list toward the Digital Forensics and Cyber Analysis, MS (p. 1095) requirements.

Degree Conferral
Students must apply the semester before they expect to complete the BS requirements to have the BS degree conferred. In addition, at the beginning of the student’s final undergraduate semester, students must complete a Bachelor’s/Accelerated Master’s Transition form that is submitted to the Office of the University Registrar and the VSE Graduate Admissions Office. At the completion of MS requirements, a master’s degree is conferred.

Cyber Security Engineering, BS/Systems Engineering, Accelerated MS
Overview
Highly-qualified students in the Cyber Security Engineering, BS (p. 1016) have the option of obtaining an accelerated Systems Engineering, MS (p. 1170).

For more detailed information, see AP.6.7 Bachelor’s/Accelerated Master’s Degrees (p. 90). For policies governing all graduate degrees, see AP.6 Graduate Policies (p. 90).

Admission Requirements
Mason undergraduate students majoring in Cyber Security Engineering, BS (p. 1016) may apply to this option if they have earned 90 undergraduate credits with an overall GPA of at least 3.30 and completed all MATH and PHYS requirements. Criteria for admission are identical to criteria for admission to the Systems Engineering, MS (p. 1170) program.

Accelerated Options Requirement
Students must complete all credits that satisfy requirements for both the BS and MS programs. Up to two courses (6 credit hours) of approved master’s level courses taken as part of the undergraduate degree may be applied to the graduate degree. The courses selected for this purpose must be approved by the academic advisors of both the BS and MS programs and by the SEOR department chair. For the BS programs that allow undergraduate electives from the department of system engineering and operations research, the students may choose the graduate version of such electives to replace the corresponding undergraduate courses.

Degree Conferral
Students must apply the semester before they expect to complete the BS requirements to have the BS degree conferred. In addition, at the beginning of the student’s final undergraduate semester, students must complete a Bachelor’s/Accelerated Master’s Transition form that is submitted to the Office of the University Registrar and the VSE Graduate Admissions Office. At the completion of MS requirements, a master’s degree is conferred.

Data Analytics Engineering, MS
Banner Code: VS-MS-DAEN
Phone: 703-993-6269
Email: datamine@gmu.edu

The MS in Data Analytics Engineering is a Volgenau multidisciplinary degree program, administered by the Department of Statistics, and is designed to provide students with an understanding of the technologies and methodologies necessary for data-driven decision-making. Students study topics such as data mining, information technology, statistical modeling, predictive analytics, optimization, risk analysis, and data visualization. It is aimed at students who wish to become data scientists and analysts in finance, marketing, operations, business/government intelligence and other information intensive groups generating and consuming large amounts of data.
Admissions & Policies

Admissions

Applicants must have completed a baccalaureate degree from a regionally accredited program with a reputation for high academic standards and an earned GPA of 3.00 or better in their 60 highest-level credits. While no specific undergraduate degree is required, a background in engineering, business, computer science, statistics, mathematics, or information technology is desirable, or alternatively strong work experience with data or analytics may be used. At a minimum at least one course each in calculus, statistics, and computer programming is required. DAEN 500 Data Analytics Fundamentals may be required for students without a basic foundation in Data Analytics.

For each of the concentrations there are additional admission requirements. These are listed in the descriptions of the individual concentrations.

In addition to fulfilling Mason’s admission requirements for graduate study, applicants must provide:

- Two letters of recommendation, preferably from academic references or references in industry or government who are familiar with the applicant’s professional or academic accomplishments.
- Resume.
- Detailed statement of career goals and professional aspirations.
- Completed self-evaluation form.
- If the applicant’s native language is not English, proof of English competency with a minimum TOEFL score of 575 for the paper-based exam or 230 for the computer-based exam.

Concentrations

Students can elect a concentration that corresponds to a specialized technical area. Students not interested in a concentration can work with an advisor to select 15 credits of electives from among courses allowed in all the concentrations.

Available Concentrations

- Concentration in Applied Analytics (APAN) (p. 1020)
- Concentration in Bioengineering (BIOE) (p. 1020)
- Concentration in Business Analytics (BUSA) (p. 1021)
- Concentration in Cyber Analytics (CYBA) (p. 1021)
- Concentration in Data Mining (DTM) (p. 1021)
- Concentration in Financial Engineering (FNNE) (p. 1022)
- Concentration in Health Data Analytics (HDAN) (p. 1022)
- Concentration in the Internet of Things (INOT) (p. 1022)
- Concentration in Predictive Analytics (PRAN) (p. 1023)
- Concentration in Statistical Analytics (STLA) (p. 1023)

Concentration in Applied Analytics (APAN)

Focuses on the practical elements of adapting big data approaches to common analytic problems and government operations.

Additional Admission Requirements

Students entering the program should have completed the following George Mason undergraduate courses or their equivalents:

- IT 106 Introduction to IT Problem Solving Using Computer Programming (3)
- MATH 108 Introductory Calculus with Business Applications (Mason Core) (3)
- STAT 250 Introductory Statistics I (Mason Core) (3)

Degree Requirements

Total credits: 30

Core Courses

The following core coursework covers the basic elements of data analytics at the graduate level.

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>

<td>Applied Statistics I</td>
<td>3</td>
</tr>
</tbody>
</table>

Total Credits: 15

Concentration in Bioengineering (BIOE)

Bioengineering, whether it is mapping the human genome or computer aided diagnosis, is an exercise in data analytics.

1 CS 504 Principles of Data Management and Mining (for all concentrations except Data Mining) or CS 584 Theory and Applications of Data Mining (for the Data Mining concentration only)

2 STAT 515 Applied Statistics and Visualization for Analytics (for all concentrations except Statistics for Analytics) or STAT 554 Applied Statistics I (for the Statistics for Analytics concentration only)
Additional Admission Requirements

Students entering the program should have completed the following George Mason undergraduate courses or their equivalents:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>BENG 320</td>
<td>Bioengineering Signals and Systems</td>

Total Credits: 15

Concentration in Cyber Analytics (CYBA)

Deals with the process of acquiring, extracting, integrating, transforming, and modeling data with the goal of deriving useful information that is suitable for presentation in a court of law. Digital forensics is a key component in criminal, civil, intelligence, and counter-terrorism matters. Students will be able to apply data analytics to such areas as digital media, intercepted (network) data, mobile media, unknown code, and leverage that analysis in order to determine, intent, attribution, cause, effect, and context.

Additional Admission Requirements

Students entering the program should have completed the following George Mason undergraduate courses or their equivalents:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>CYSE 211</td>

Select four from the following: 12

- CS 550 Database Systems
- CS 580 Introduction to Artificial Intelligence
- CS 650 Advanced Database Management
- CS 688 Machine Learning
- CS 775 Advanced Pattern Recognition
- CS 782 Advanced Machine Learning
- CS 787 Decision Guidance Systems
- DAEN 698 Data Analytics Research Project
- INF 623 Web Search Engines and Recommender Systems
- INF 740 Database Programming for the World Wide Web
- SYST 664 Bayesian Inference and Decision Theory

Total Credits 15

1 Note: all prerequisites must be met.

Concentration in Financial Engineering (FNNE)
The concentration emphasizes both analytical and practical aspects of financial and econometric data analytics. Students are expected to demonstrate proficiency in several quantitative modeling disciplines. Students are also expected to understand issues relevant to practical aspects of investment and hedging decision making, derivative valuation, and risk analysis. The students will learn the techniques to analyze large financial and economic data to derive meaningful knowledge, which will be useful for developing effective business and risk mitigation strategies and making sound financial, marketing, and investment decisions. The concentration prepares students for careers in business analytics with a focus on practical applications in financial operations, investment, and risk mitigation strategy development.

Additional Admission Requirements
Students entering the program should have completed the following George Mason undergraduate courses or their equivalents:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>CS 112</td>
<td>Introduction to Computer Programming (Mason Core) (p. 142)</td>

</tbody>
</table>

Select two from the following: 6

- DAEN 698 Data Analytics Research Project
- HAP 671 Health Care Databases
- HAP 719 Advanced Statistics in Health Services Research I
- HAP 730 Health Care Decision Analysis or HAP 770 Medical Decision Making and Decision Support Systems
- HAP 819 Advanced Statistics in Health Services Research II
- HAP 823 Comparative Effectiveness Analysis using Observational Data

Total Credits 15

Concentration in the Internet of Things (INOT)
Data Analytics is driven by sensors that collect the staggering amount of data that exist today. The Internet of Things (IoT) is expanding, at a geometric level, the number of devices that collect, forward, and offer data for analysis. IOTA looks at Data Analytics from the perspective of IoT and sensors. Analog and digital sensing design and deployment, hardware options, power consumption, security, sampling and
quantization, Fourier transform, time analysis, and synchronization are topics covered in this concentration.

**Additional Admission Requirements**

Total Credits 15

1 Students may also choose to take DAEN 698 as an elective.

**Concentration in Predictive Analytics (PRAN)**

The ultimate goal of analytics of Big Data is to derive value by suggesting effective actions for the future. Predictive analytics focuses on the methods for deciding on the best course of action, taken into account possible constraints and risks. The concentration will provide students with skills that drive effective decision making and optimization. Students will learn the techniques to analyze both structured and unstructured data to derive meaningful knowledge, which will be useful for developing effective strategies and making optimal decisions.

The concentration emphasizes both analytical and practical aspects of predictive analytics. Students are expected to master the practical aspects of modeling and methods for optimization. Students are also expected to demonstrate proficiency in decision making, design of decision support systems, and risk analysis. The program prepares students for careers in big data analytics with a focus on strategic decision making in practical applications including financial engineering, health care, transportation, and intelligence.

**Additional Admission Requirements**

Total Credits 15

**Concentration in Statistical Analytics (STLA)**

Provides students with skills necessary for gaining insight from data. Enables students to evaluate large data-sets from a rigorous statistical perspective, including theoretical, computational, and analytical techniques. Emphasis will be placed on developing deep analytical talent in the two areas of statistical modeling and data visualization. “Big Data” are well-known to encompass high levels of uncertainty and complex interactions and relationships. To gain knowledge from these data and hence inform decisions, elucidation of the core interactions and relationships must be done in a manner that acknowledges uncertainties in order to both minimize false signals and maximize true discoveries. Statistical modeling does exactly this – it accounts for uncertainty while identifying relationships. Visualization is often a critical component of modeling, but visualization also stands alone as an important tool for presentation of information, decision analysis, and process improvement.

**Additional Admission Requirements**

Students entering the program should have completed the following George Mason undergraduate courses or their equivalents:

<table>
<thead>
<tr>
<th>Code</th>

And four courses from the following: 12
Accelerated Master's

Applied Computer Science, BS/Data Analytics Engineering, Accelerated MS

Overview
Highly-qualified students in the Applied Computer Science, BS (p. 1050) have the option of obtaining an accelerated Data Analytics Engineering, MS (p. 1019).

For more detailed information, see AP.6.7 Bachelor’s/Accelerated Master’s Degrees (p. 93). For policies governing all graduate degrees, see AP.6 Graduate Policies (p. 90).

Admission Requirements
Students in the Applied Computer Science, BS (p. 1050) program may apply to this option if they have earned 90 undergraduate credits with an overall GPA of at least 3.30. Students must have successfully completed:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>CS 310</td>
<td>Data Structures</td>
<td>3</td>
</tr>
<tr>
<td>CS 330</td>
<td>Formal Methods and Models</td>
<td>3</td>
</tr>
<tr>
<td>CS 367</td>
<td>Computer Systems and Programming</td>
<td>4</td>
</tr>
<tr>
<td>Total Credits</td>
<td></td>
<td>10</td>
</tr>
</tbody>
</table>

Accelerated Option Requirements
Students must complete all requirements for the BS and MS programs, with 6 credits overlap.

Students must register for 6 credits of CS 500-level basic courses in place of the corresponding CS 400-level courses required for the undergraduate degree requirements. Specifically, students in all concentrations of the Applied Computer Science, BS program must register for:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>CS 584</td>
<td>Theory and Applications of Data Mining</td>
<td>3</td>
</tr>
<tr>
<td>Total Credits</td>
<td></td>
<td>3</td>
</tr>
</tbody>
</table>

Note:
For students in the Computer Game Design and Geography concentrations of the Applied Computer Science, BS (p. 1050) program, one of the 500 level courses will count as an elective towards their undergraduate degree.

Students are permitted to take additional graduate basic courses in their undergraduate programs. In such cases, those classes cannot be counted toward requirements for the MS.

Degree Conferral
Students must apply the semester before they expect to complete the BS requirements to have the BS degree conferred. In addition, at the beginning of the student’s final undergraduate semester, students must complete a Bachelor’s/Accelerated Master’s Transition form that is submitted to the Office of the University Registrar and the VSE Graduate Admissions Office. At the completion of MS requirements, a master’s degree is conferred.

Bioengineering, BS/Data Analytics Engineering, Accelerated MS

Overview
Highly-qualified students in the Bioengineering, BS (p. 1032) have the option of obtaining an accelerated Data Analytics Engineering, MS (p. 1019) with a concentration in Bioengineering.

Students in an accelerated degree program must fulfill all university requirements for the master’s degree. For policies governing all graduate degrees, see AP.6 Graduate Policies (p. 90).

Admission Requirements
Students in the Bioengineering, BS (p. 1032) program may apply to this option if they have earned 95 undergraduate credits with an overall GPA of at least 3.30. Students must have successfully completed CS 222 Computer Programming for Engineers and BENG 320 Bioengineering Signals and Systems. Criteria for admission are identical to criteria for admission to the Bioengineering concentration of the Data Analytics Engineering, MS (p. 1019) program.

Accelerated Option Requirements
Students must complete all requirements for the BS and MS programs, with 6 credits overlap.

Students register for 6 credits of 500-level basic courses in place of the corresponding BENG 400-level courses required for the undergraduate degree requirements. Specifically, students must register for:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>CS 550</td>
<td>Database Systems</td>
<td>3</td>
</tr>
<tr>
<td>Total Credits</td>
<td></td>
<td>3</td>
</tr>
</tbody>
</table>

Note:
For students in the Computer Game Design and Geography concentrations of the Applied Computer Science, BS (p. 1050) program, one of the following courses:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>BENG 501</td>

Students are permitted to take additional graduate basic courses in their undergraduate programs. In such cases, those classes cannot be counted toward requirements for the MS.

Degree Conferral
Students must apply the semester before they expect to complete the BS requirements to have the BS degree conferred. In addition, at the beginning of the student’s final undergraduate semester, students must complete a Bachelor’s/Accelerated Master’s Transition form that is submitted to the Office of the University Registrar and the VSE Graduate Admissions Office. At the completion of MS requirements, a master’s degree is conferred.

Computer Science, BS/Data Analytics Engineering, Accelerated MS

Overview
Highly-qualified students in the Computer Science, BS (p. 1057) have the option of obtaining an accelerated Data Analytics Engineering, MS (p. 1019).

For more detailed information, see AP.6.7 Bachelor’s/Accelerated Master’s Degrees (p. 93). For policies governing all graduate degrees, see AP6 Graduate Policies (p. 90).

Admission Requirements
Students in the Computer Science, BS (p. 1057) program may apply to this option if they have earned 90 undergraduate credits with an overall GPA of at least 3.30. Students must have successfully completed CS 310 Data Structures, CS 330 Formal Methods and Models, and CS 367 Computer Systems and Programming.

Accelerated Option Requirements
Students must complete all requirements for the BS and MS programs, with 6 credits overlap.

Students register for 6 credits of CS 500-level basic courses in place of the corresponding CS 400-level courses required for the undergraduate degree requirements. Specifically, students must register for:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>CS 584</td>
<td>Theory and Applications of Data Mining</td>
<td>3</td>
</tr>
</tbody>
</table>

Select one of the following courses in place of the corresponding 400-level courses:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>CS 550</td>
<td>Database Systems</td>
<td></td>
</tr>
<tr>
<td>CS 580</td>
<td>Introduction to Artificial Intelligence</td>
<td></td>
</tr>
</tbody>
</table>

Total Credits 6

Note:
Students are permitted to take additional graduate basic courses in their undergraduate programs. In such cases, those classes cannot be counted toward requirements for the MS.

Statistics, BS/Data Analytics Engineering, Accelerated MS

Overview
Highly-qualified students in the Statistics, BS (p. 1146) have the option of applying to the accelerated Data Analytics Engineering, MS (p. 1019) program.

For more detailed information, see AP6.7 Bachelor’s/Accelerated Master’s Degrees (p. 93). For policies governing all graduate degrees, see AP6 Graduate Policies (p. 90).

Admission Requirements
Students in the Statistics, BS (p. 1146) program may apply to the accelerated Data Analytics Engineering, MS (p. 1019) program if they have earned 90 undergraduate credits with an overall GPA of at least 3.30.

Accelerated Option Requirements
Students must complete all requirements for the BS and MS programs, with six credits overlap chosen from the following courses:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>CS 504</td>
<td>Principles of Data Management and Mining</td>
<td></td>
</tr>
<tr>
<td>or CS 584</td>
<td>Theory and Applications of Data Mining</td>
<td>3</td>
</tr>
<tr>
<td>OR 541</td>
<td>Operations Research: Deterministic Models (Credit may not be received for both OR 441 and OR 541.)</td>
<td>3</td>
</tr>
<tr>
<td>or OR 531</td>
<td>Analytics and Decision Analysis</td>
<td></td>
</tr>
<tr>
<td>STAT 515</td>
<td>Applied Statistics and Visualization for Analytics</td>
<td>3</td>
</tr>
<tr>
<td>or STAT 554</td>
<td>Applied Statistics I</td>
<td></td>
</tr>
</tbody>
</table>

All graduate course prerequisites must be completed prior to enrollment. Each 500-level course must be completed with a grade of B or better to apply toward the MS program. The graduate courses selected for overlap must be approved by the academic advisors of both the BS and MS programs. The graduate courses may be counted as Technical Electives toward the Statistics, BS (p. 1146) program requirements, with approval of Statistics Department undergraduate coordinator.

Degree Conferral
Students must apply the semester before they expect to complete the BS requirements to have the BS degree conferred. In addition, at the beginning of the student’s final undergraduate semester, students must complete a Bachelor’s/Accelerated Master’s Transition form that is submitted to the Office of the University Registrar and the VSE Graduate Admissions Office. At the completion of MS requirements, a master’s degree is conferred.
Systems Engineering, BS/Data Analytics Engineering, Accelerated MS

Overview

Qualified undergraduate students in the Systems Engineering, BS (p. 1164) have the option of obtaining an accelerated Data Analytics Engineering, MS (p. 1019).

For more detailed information, see AP.6.7 Bachelor’s/Accelerated Master’s Degrees (p. 93). For policies governing all graduate degrees, see AP.6 Graduate Policies (p. 90).

Admission Requirements

Mason undergraduate students majoring in systems engineering may apply to this option if they have earned 90 undergraduate credits with an overall GPA of at least 3.30.

For the predictive analytics concentration, students must submit evidence of:

- Satisfactory completion of courses in calculus, applied probability and statistics, and a scientific programming language.
- Familiarity with analytical modeling software, such as spreadsheets or math packages.

Accelerated Option Requirements

Students must complete all credits that satisfy requirements for the BS and MS programs, with six credits overlap chosen from the courses in the following table. For BS candidates, these graduate courses replace the corresponding undergraduate courses listed. The undergraduate version of these courses may not be applied toward the MS degree.

<table>
<thead>

</tr>
</tbody>
</table>

OR 541 Operations Research: Deterministic Models will substitute for the OR 531 Analytics and Decision Analysis core requirement in the MS DAE program. Students are not permitted to take OR 531 Analytics and Decision Analysis.

Degree Conferral

Students must apply the semester before they expect to complete the BS requirements to have the BS degree conferred. In addition, at the beginning of the student’s final undergraduate semester, students must complete a Bachelor’s/Accelerated Master’s Transition form that is submitted to the Office of the University Registrar and the VSE Graduate Admissions Office. At the completion of MS requirements, a master’s degree is conferred.

Data Analytics Graduate Certificate

Email: datamine@gmu.edu

Admissions & Policies

Admissions

Applicants should have an undergraduate degree from an accredited institution, with a GPA of at least 3.00 in their last 60 credits of study. While no specific undergraduate degree is required, a background in engineering, business, computer science, math, or information technology is desirable; alternatively, strong work experience with data or analytics may be used. Current graduate students in the Volgenau School of Engineering and the School of Business (p. 888) can elect this certificate with the Graduate Secondary Certificate Program Application from the Office of the University Registrar (http://registrar.gmu.edu).

Requirements

Certificate Requirements

Total credits: 12

This certificate may be pursued on a part-time basis only.

Coursework

Students must achieve a total GPA of at least 3.00, with no more than three credits of a grade of C from the following courses.

Information Technology, PhD

Banner Code: VS-PHD-INFT

2400 Nguyen Engineering Building
Admissions & Policies

Admissions Requirements

Students are selected on the basis of scholarship and potential from among applicants with appropriate degrees from institutions of high standing.

Generally, a background in an information technology-related area, such as engineering, computer science, operations research, mathematics, and physical sciences is required for admission to the doctoral program. However, in some instances, well-qualified students without a clearly related prior degree (i.e., MS in Information Technology Management, MBA) may be offered admission. Most successful applicants already have a Master’s degree, however exceptionally qualified individuals without an MS may be accepted, but will be required to take more courses.

An undergraduate GPA of 3.00 and a graduate GPA of 3.50 are basic requirements for applicants. Applicants are required to submit: an online application for admission, undergraduate and graduate transcripts from previous colleges and universities, GRE test results, three letters of reference (preferably from college instructors), a résumé, a personal goal statement, and to identify research areas of interest. Foreign transcripts must be translated and evaluated (course-by-course preferred) by a member of the NACES Membership. Evaluations can be also be done by George Mason University, at no extra cost to the applicant; however, this typically adds 6-8 weeks to the application processing time. Please review George Mason University’s Policy on International Transcript Submission (p. 71). An applicant’s entire background is examined before an admission decision is made.

To ensure a common ground of fundamentals, students should have a background in such topics as calculus, differential equations, linear algebra, discrete structures, probability, and statistics. In addition, students entering the PhD in Information Technology Program must have a sound working knowledge in computing as demonstrated by examples of programs or applications developed and tested in at least one high level programming language environment. Because much of the coursework within this program requires computational proficiency, experience with a variety of languages and computer hardware is useful as is an understanding of computer architecture. Highly-qualified students who do not present evidence of appropriate coursework may be admitted and then required to take appropriate articulation courses.

Those who wish to be considered for Mason’s Presidential Scholarship, which provides a stipend and tuition support for three years, must be full-time students, with a minimum GPA of 3.5 or higher in their most recently earned degree, and submit GRE scores with a combined math and verbal score of 1200 on exams taken prior to August 1, 2011; combined score of 310 on the new revised GRE scale for exams taken August 1, 2011 and beyond. Scores must have been earned within the last five years. Only one Presidential Scholarship is awarded per PhD program per year.

Policies

The general doctoral requirements (p. 90) of Mason apply to this program.

Reduction of Credit

Students must complete a minimum of 72 graduate credits, which may be reduced by a maximum of 30 credits from an approved and completed master’s degree. Reduction of credit requires the approval of the program director/dean or designee of the school. They determine whether the credits are eligible for reduction of credit and applicable to the degree program and the number of credits to be reduced.

Program Requirements

Information Technology doctoral candidates must earn a minimum of 72 graduate credits. The program is made up of a breadth requirement (assessed via qualifying exams) and specialized coursework (assessed via the comprehensive exam), followed by preparation of a dissertation proposal, an original research project, and final defense. To advance to candidacy, students must complete all coursework, pass the qualifying and comprehensive examinations, and defend a dissertation proposal.

Requirements

Degree Requirements

Total credits: minimum 72

The degree plan outlined here is based on a student who receives a full 30 credit reduction. Students who do not receive a full credit reduction will be required to choose additional credits in consultation with their advisors.

Plan of Study

Students are strongly encouraged to select a concentration area. However, the ability exists to progress with only a plan of study. Students who declare a concentration will have the concentration noted on their transcript. The plan of study is a well-defined set of advanced courses in a focused area. Successful completion of this requirement should enable the student to do basic or applied research in a significant contemporary area in IT.

The 18 credits of graduate-level coursework must fulfill the following requirements:

- Coursework must be independent of the courses students take to prepare for the qualifying exams.
- Courses that cannot be included in any plan of study are any INFS 500-level courses; certain AIT courses; OR 540 Management Science;
STAT 535 Analysis of Experimental Data; and SYST 500 Quantitative Foundations for Systems Engineering. Exceptions must be approved in advance by the senior associate dean.

- At least 12 of the 18 credits must be in courses numbered 700 or higher, and these 12 credits cannot include directed reading, project, or thesis courses.
- A cumulative GPA of 3.50 is required in courses taken in the plan of study.

### Concentrations

Total Credits 18

Breadth Requirement

To satisfy the breadth requirements of the PhD INFT, a student must demonstrate his/her proficiency in the foundational knowledge specific to her/his program of study. This is satisfied through completion of two Fundamental Knowledge courses, and two Qualifying Exams. The Fundamental Knowledge courses and the Qualifying Exams are listed in the study guide maintained by the Volgenau School of Engineering.
(VSE) Graduate Programs administrative office. Selection of the two Fundamental Knowledge courses and the two Qualifying Exams must be approved by the student's PhD advisor and submitted to the VSE Graduate Programs administrative office.

Time limits: Students who enter the program with a 24-30 credit reduction from a prior Master's degree must satisfy all breadth requirements no later than twelve months following the end of their fourth semester in the program. Students who enter the program with a reduction of less than 24 credits must satisfy all breadth requirements no later than twelve months following the end of their sixth semester in the program. In both instances, these time limits include all attempts at the Fundamental Knowledge courses and the Qualifying Exams. Time limits apply to all PhD INFT students, regardless of their part-time or full-time study status. Failure to satisfy all breadth requirements by the specified time is cause for termination from the PhD INFT program.

Fundamental Knowledge course requirement: Students are required to complete two Fundamental Knowledge courses within the first 24 months of their PhD enrollment, regardless of their part-time or full-time status and regardless of credit reductions from previous coursework. Fundamental Knowledge courses are listed in the study guide maintained by the VSE Graduate Programs administrative office. Fundamental Knowledge courses must be approved by the advisor and must be specific to the student's program of study, and must be submitted to the VSE Graduate Programs administrative office. These courses can be used as credit toward the student's plan of study, but will not count toward his/her 700 level minimum requirement.

Students must earn a grade of A- or better in both Fundamental Knowledge courses on their first attempt to satisfy this component of the breadth requirement. Students failing to earn a grade of A- or better on their first attempt in one or both Fundamental Knowledge courses are required to take and pass in one attempt, supplementary Qualifying Exams. Supplementary Qualifying Exams must cover the bodies of fundamental knowledge associated with the Fundamental Knowledge courses in which they earned a grade of less than A-. Supplementary Qualifying Exams are in addition to the two Qualifying Exams required and described above. Students must pass supplementary Qualifying Exams in one attempt only. Failure to satisfy all breadth requirements, including all Qualifying Exams, within the period defined above under Time Limits, is cause for termination from the PhD INFT program.

Qualifying Exam requirement: Students satisfying the Fundamental Knowledge course requirement described above are required to take and pass two Qualifying Exams within the period defined above under Time Limits. Qualifying Exams are listed in the study guide maintained by the VSE Graduate Programs administrative office. Selection of Qualifying Exams must be approved by the PhD advisor; must be specific to the student's program of study; must not duplicate the bodies of knowledge of the student's Fundamental Knowledge courses described above; and must be submitted to the VSE Graduate Programs administrative office.

Qualifying Exams are offered twice a year just before the fall and spring semesters. Each exam is allocated two hours and graded on a pass or fail basis using a double blind procedure. Students must take all required Qualifying Exams in their first attempt. Students failing one or both of their Qualifying Exams on the first attempt are required to retake the Qualifying Exams they did not pass, the next time the Qualifying Exams are offered. Students failing Qualifying Exams may not subsequently satisfy the breadth requirement by completing Fundamental Knowledge courses covering the same bodies of knowledge. Failure to satisfy all breadth requirements, including the Qualifying Exams, within the period defined above under Time Limits, is cause for termination from the PhD INFT program.

Students failing to earn a grade of A- or better in one or both Fundamental Knowledge courses are required to take and pass supplementary Qualifying Exams in the bodies of knowledge covered by the Fundamental Knowledge courses in which they earned a grade of less than A-. Supplementary Qualifying Exams are in addition to the two Qualifying Exams described above. Students must pass supplementary Qualifying Exams in one attempt only. Failure to satisfy all breadth requirements, including all Qualifying Exams, within the period defined above under Time Limits, is cause for termination from the PhD INFT program.

Total Credits: 24

Doctoral Supervisory Committee

On admission to the program, students are assigned a temporary academic advisor. Students are responsible for working with the temporary advisor until they choose a dissertation director and establish a doctoral supervisory committee.

The doctoral supervisory committee includes the dissertation director, who must be a member of the Mason graduate faculty, and at least three other people from the Mason graduate faculty. The dissertation director and chair of a PhD in INFT dissertation committee must have at least a 50% appointment in the Volgenau School. This rule does not apply to a co-director, provided that the chair and other co-director satisfies the “at least 50% rule.” At least three committee members must be from the Volgenau School, and at least two of the departments of the Volgenau School must be represented on this committee.

In addition, industrial representatives and faculty members from departments outside the school are highly desirable, but not required, on the committee. The doctoral supervisory committee administers the comprehensive exam, dissertation proposal presentation, and the dissertation predefense and defense. Permission for the comprehensive exam and dissertation defense are requested from the Volgenau School associate dean on the basis of a written request and plan that has been approved by the supervisory committee.

Comprehensive Exam

The comprehensive exam is an oral exam taken after students have satisfactorily completed all coursework requirements in their approved plan of study. To initiate the exam process, the student meets with the dissertation advisor to prepare a permission form, which has to be approved by the entire dissertation supervisory committee one month prior to the exam, to be forwarded to the associate dean for final approval. The permission form must be submitted with:

1. a one page description of the intended area of research; and
2. a reading list on which the student will be examined.
Dissertation Proposal Presentation

Near the end of the coursework, doctoral students prepare a written dissertation proposal to present to the doctoral supervisory committee. The proposal must be delivered to the doctoral supervisory committee at least two weeks before the presentation. Students should enroll in IT 998 Doctoral Dissertation Proposal to complete this effort (note: students must pass the qualifying exams before enrolling in IT 998 Doctoral Dissertation Proposal). During the term the student expects to present the dissertation proposal to the committee (or perhaps the prior term), the student is should enroll in IT 990 Dissertation Topic Presentation. The dissertation proposal presentation must be at least one week after passing the comprehensive exam. After successfully completing the dissertation-proposal requirement, the student is formally admitted as a candidate for the PhD degree. The application for candidacy is submitted to the associate dean on a standard form.

Dissertation and Final Defense

With the concurrence of the dissertation supervisory committee, students proceed with the doctoral research, during which time they must be continuously enrolled in IT 999 Doctoral Dissertation. When the central portions of the research have been completed to the point that students are able to describe the original contributions of the dissertation effort, they submit the written dissertation to the committee and schedule an oral predefense to the committee. The predefense is to be held no sooner than one month after members of the committee have copies of the dissertation. Once the committee believes the student is ready, a final public oral defense may be scheduled no sooner than one month after the conclusion of the predefense so that the announcement is posted for at least two weeks. The entire dissertation committee and the associate dean must be present at the defense, unless an exception is approved by the associate dean in advance of the defense.

Following satisfactory evaluation of the oral defense of the dissertation by the committee, the student must prepare, with supervision from the dissertation director, a final publishable dissertation that represents a definitive contribution to knowledge in IT. If the candidate successfully defends the dissertation, the dissertation committee recommends that the final form of the dissertation be completed and the Volgenau School faculty and the graduate faculty of Mason accept the candidate for the PhD degree.

If the student fails to successfully defend the dissertation, the student may request a second defense, following the same procedures as for the initial defense. There is no time limit for this request other than general time limits for the doctoral degree. An additional predefense is not required, but students are strongly advised to consult with the committee before scheduling a second defense. If the student fails on the second attempt to defend the dissertation, the student will be terminated from the program.

Management of Secure Information Systems, MS (VSE)

Banner Code: BU-MS-MSIS

Phone: 703-993-1880
Email: cyber@gmu.edu

The Management of Secure Information Systems MS, an executive multidisciplinary program offered by the Volgenau School of Engineering, the School of Business, and the Schar School of Policy and Government; prepares professionals for the challenges of modern computerized information systems that have become increasingly complex and vulnerable to cyber-attacks, resulting in a significant number of government regulations. Consequently, those responsible for the safe, secure, and efficient operation of such systems need to grasp their technical aspects and be familiar with both the principles of management and the public policy impact of regulatory and organizational decisions.

The program is run as a cohort with no electives. The entire program has a duration of 16 months including about seven days of study abroad, which is included in the tuition.

Admissions & Policies

Admissions

All students must have graduate standing. Non-degree student status is not available.

Full eligibility and admission requirements can be viewed online (http://business.gmu.edu/cyber-security-degree/admissions).

Department of Bioengineering

Phone: 703-993-5846
Email: bioeng@gmu.edu
Website: bioengineering.gmu.edu

Bioengineering involves the application of engineering tools and concepts to solve problems in biology or medicine. The impact of engineering on biomedicine is wide ranging, from advanced biomedical imaging technologies to discovering new diagnostic devices and targeted therapeutics. With an aging population, the growing costs of health care, and the impact of novel technology to fundamental understanding in biosciences, the demand for bioengineers is growing. This program provides students with a solid foundation in engineering while offering in-depth exposure to the life sciences. Bioengineering faculty members collaborate with colleagues at George Mason University and nearby institutions including Inova Health Center, and federal laboratories such as the Naval Research Laboratory, the National Institutes of Health Clinical Center, and the National Institute of Standards and Technology. Research areas include:

- biomechanics
- biomedical imaging
- neuroengineering
- computational neuroscience
- microfabricated devices
- nanomedicines
- biomaterials
- tissue engineering

Available Programs

**Bioengineering, BS**
The BS in Bioengineering is a challenging multidisciplinary training program with the goal of enabling graduates to be competitive for an entry-level position in the biomedical industry or to continue their education in graduate school or medical school. The curriculum provides a strong background in the biological and engineering fundamentals of bioengineering as well as upper level courses in areas of biomedical measurements, biomedical systems modeling, and bioinformatics. The department offers six concentrations: Bioengineering Healthcare Informatics, Bioengineering Prehealth, Biomaterial and Nanomedicine, Biomedical Imaging and Devices, Computational Biomedical Engineering, Neurotechnology and Computational Neuroscience. In addition the Bioengineering, BS program offers an Honors Program to outstanding students. Entry is by invitation and based on academic performance achieved at Mason.

**Bioengineering, MS**
The Bioengineering, MS prepares students for research and professional practice in bioengineering and related fields. This program comprises four core areas: biomechanics, biomaterials, biomedical imaging, and neuroengineering while offering three different options. Students can choose to focus their graduate work toward a career in academia (thesis option), or in industry (practicum or coursework option).

**Bioengineering, PhD**
The Bioengineering, PhD is a research-intensive, multifaceted program which is comprised of four different concentrations. Students can choose to focus their graduate work in nanoscale bioengineering, neuroengineering, biomedical imaging or data-driven biomechanical modeling.

**Faculty**

**Professors**
Ascoli, Blackwell, Buschmann (chair), Cebral, Hoemann, Sikdar,

**Associate Professors**
Harris-Love, Ikonomidou, Salvador Morales, Peixoto, Wei

**Assistant Professors**
Agrawal, Bray, Chitnis, Ross, Veneziano

**Affiliated Professors**
Cohen, Cortes, Cressman, Grahling, Katona, Neville, Pancrazio, Pritz, Rangwala, Seshaiyer, Shah, Shehu, Shenai, Shobeiri, Thompson, Vora, Wiener

**Programs**

- Bioengineering Minor
- Bioengineering, BS
- Bioengineering, MS
- Bioengineering, PhD

**Bioengineering, BS**

Academic Advising
Phone: 703-993-4190
Email: cborke@gmu.edu
Website: https://bioengineering.gmu.edu/academics/bachelor-science-bioengineering

Bioengineering, also referred to as biomedical engineering, is the application of engineering tools and approaches to solve problems in biology and medicine. It is a broad and growing field that draws upon rapid advances in technology and computation, as well as, on unprecedented growth in basic biological understanding.
This program provides i) a scientific foundation in math, physics, biology, chemistry and physiology; ii) broad introductions to bioengineering technology platforms of medical imaging, devices, computational biomedical engineering, neurotechnology, biomaterials and nanomedicine followed by a deepening of knowledge in at least one of these areas through a chosen concentration; and iii) translational courses showing how new technologies can be implemented in clinical medicine and be commercialized by industry partners.

Engineering design experiences are built into each year of the curriculum culminating in a senior design project. The impact of engineering, technologies and computer science on biomedicine is immense, and can only be harnessed through integrative multidisciplinary training in Bioengineering. With the growing demand for better health care, the need for bioengineers is expected to be high.

The multidisciplinary training in this field makes graduates competitive for positions in government and in biomedical industry. The BS in Bioengineering also enables students to continue their education in graduate school or medical school.

Accreditation
The bachelor’s program in Bioengineering is accredited by the Engineering Accreditation Commission of ABET, http://www.abet.org.

Program Educational Objectives
Graduates of the Bioengineering bachelor's program are expected within 3-5 years of graduation to:

1. Contribute to the development or application of health-related products or processes that are a benefit to society.
2. Continue their formal education by making demonstrable progress toward an advanced degree or professional development milestone.
3. Communicate and perform effectively as members and/or leaders of multidisciplinary teams.

Concentrations
The concentrations in the BS Bioengineering program are:

- Bioengineering Healthcare Informatics (BHI)
- Bioengineering Prehealth (BMPH)
- Biomaterials and Nanomedicine (BNM)
- Biomedical Imaging and Devices (BMID)
- Computational Biomedical Engineering (CBME)
- Neurotechnology and Computational Neuroscience (NTCN)

Admissions & Policies

Policies
For policies governing all undergraduate degrees, see AP.5 Undergraduate Policies (p. 87).

Advising
All Bioengineering students are required to meet with their departmental academic advisor prior to course registration each semester. Students who are considering bioengineering as their major must meet with the Volgenau School of Engineering Coordinator of Undergraduate Advising in 2500 Nguyen Engineering Building.

Change of Major
See Change of Major (p. 1013) for more information.

Writing-Intensive Requirement
Mason’s writing-intensive requirement is satisfied by BENG 360 Biomedical Imaging, in which faculty provide feedback on student writing assignments.

Termination from the Major
No math, science, or Volgenau School of Engineering course that is required for the major may be attempted more than three times. Those students who do not successfully complete such a course within three attempts will be terminated from the major. Undeclared students in the Volgenau School who do not successfully complete a course required for a Volgenau School major within three attempts will also be terminated.

In addition, students in the Volgenau School with evidence of continued failure to make adequate progress toward declaring or completing a Volgenau School major will also be terminated. Adequate progress is determined by the major program. For more information, see AP.5.2.4 Termination from the Major (https://catalog.gmu.edu/policies/academic/undergraduate-policies/#ap-5-2-4).

Once a student has attempted one of these courses twice unsuccessfully, the third attempt must be no later than the next semester of enrollment, excluding summers. Failure to take the course at that time will result in termination from the major. A third attempt of a Volgenau School of Engineering course requires support by the student’s major department as well as permission by the department offering the course. This permission is not guaranteed. If the student is unable to take the course when required, the student may request an extension to a future semester; extensions require approval of the student’s advisor, their department, and the Associate Dean for Undergraduate Programs. The deadline for extension requests is the add deadline for the semester in which the course is required.

Students who have been terminated from a Volgenau School of Engineering major may not register for a Volgenau School course without permission of the department offering the course. This applies to all undergraduate courses offered by the Volgenau School except IT 104 Introduction to Computing (Mason Core) (p. 142) and STAT 250 Introductory Statistics I (Mason Core) (p. 142).

A student may not declare any major in the Volgenau School of Engineering if the student has previously met the termination criteria for that major at any time, regardless of what the student’s major was at the time the courses were taken.

Requirements

Degree Requirements
Total credits: 122-134

Students must complete each BENG, BIOL, CHEM, CS, ECE, ME course presented as part of the required credits for the degree with a grade of C or better.

### Honors

#### Honors in the Major

The Department of Bioengineering offers an Honors Program that creates a community of outstanding scholars in bioengineering who share a commitment to learning, service, and leadership. The Program is based on the bioengineering curriculum, and is distinct from the University Honors Curriculum.

#### Eligibility

Entry to the Honors Program is by invitation, extended to students with a declared major in Bioengineering who have completed a minimum of 30 credit hours at Mason with a minimum cumulative GPA of 3.50 and a minimum GPA of 3.20 in each prior semester.

#### Honors Requirements

The Honors Program is challenging and designed for the highly motivated student with interests in any of the bioengineering concentrations. Honors students must satisfy requirements in addition to those of the normal BS degree in bioengineering, including:

- Successful completion of BENG 395 RS: Mentored Research in Bioengineering
- Six credits must be earned by taking a combination of BENG 5XX/6XX level courses. With permission of the Department of Bioengineering, 5XX/6XX level courses from other Volgenau School of Engineering programs may be considered.

Once admitted to the Honors Program, students must remain in good standing and maintain a minimum cumulative GPA of 3.50 and a minimum GPA of 3.20 in each semester for all courses counting toward the BS degree in bioengineering, maintain continuous enrollment working towards the degree, and abide by the Mason Honor Code.

### Accelerated Master’s

#### BS (selected)/Statistical Science, Accelerated MS

#### Overview

Highly-qualified students in BS programs have the option of applying to the accelerated Statistical Science, MS (p. 1141) program.
For more detailed information, see AP6.7 Bachelor’s/Accelerated Master’s Degrees (p. 93). For policies governing all graduate degrees, see AP6 Graduate Policies (p. 90).

Admission Requirements
No specific undergraduate BS degree is required. Students enrolled in any BS degree may apply to the accelerated Statistical Science, MS (p. 1141) program if such an accelerated Statistical Science, MS pathway is allowable from the student’s BS program, which will be determined by the academic advisors of both the BS and MS programs; and if they have earned 90 undergraduate credits with an overall GPA of 3.00. Students must have successfully completed the following Mason courses each with a grade of C or better prior to admission to the accelerated program:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>MATH 213</td>
<td>Analytic Geometry and Calculus III</td>
<td>3</td>
</tr>
<tr>
<td>MATH 203</td>
<td>Linear Algebra</td>
<td>3</td>
</tr>
<tr>
<td>or MATH 321</td>
<td>Abstract Algebra</td>
<td></td>
</tr>
<tr>
<td>STAT 250</td>
<td>Introductory Statistics I (Mason Core)</td>
<td>3</td>
</tr>
<tr>
<td>or STAT 344</td>
<td>Probability and Statistics for Engineers and Scientists I</td>
<td></td>
</tr>
<tr>
<td>STAT 346</td>
<td>Probability for Engineers</td>
<td>3</td>
</tr>
<tr>
<td>or MATH 351</td>
<td>Probability</td>
<td></td>
</tr>
<tr>
<td>STAT 362</td>
<td>Introduction to Computer Statistical Packages</td>
<td>3</td>
</tr>
</tbody>
</table>

Accelerated Option Requirements
Students must complete all credits satisfying degree requirements for the BS and MS programs, with 6 credits overlap chosen from the following courses: STAT 515 Applied Statistics and Visualization for Analytics, STAT 544 Applied Probability, STAT 554 Applied Statistics I, STAT 560 Biostatistical Methods, and STAT 574 Survey Sampling I. (Credit may not be received for both STAT 474 and STAT 574; nor for both STAT 460 and STAT 560.) The graduate courses selected for overlap must be approved by the academic advisor of both the BS and MS programs. All graduate course prerequisites must be completed prior to enrollment. Each graduate course must be completed with a grade of B or better to apply toward the MS degree.

While still in undergraduate status, a maximum of 6 additional graduate credits may be taken as reserve graduate credit and applied to the master’s program. Reserve graduate credits do not apply to the undergraduate degree.

Degree Conferral
Students must apply the semester before they expect to complete the BS requirements to have the BS degree conferred. In addition, at the beginning of the student’s final undergraduate semester, students must complete a Bachelor’s/Accelerated Master’s Transition form that is submitted to the Office of the University Registrar and Graduate Recruitment and Enrollment Services. At the completion of MS requirements, a master’s degree is conferred.

Bioengineering, BS/Bioengineering, Accelerated MS
Overview
Highly-qualified students in the Bioengineering, BS (p. 1177) have the option of obtaining an accelerated Bioengineering, MS (https://catalog.gmu.edu/colleges-schools/engineering/bioengineering/bioengineering-bs) if they have earned 90 undergraduate credits with an overall GPA of at least 3.20 and completed all MATH and PHYS requirements. Criteria for admission are identical to criteria for admission to the Bioengineering, MS (https://catalog.gmu.edu/colleges-schools/engineering/bioengineering/bioengineering-ms) program.

For more detailed information, see AP6.7 Bachelor’s/Accelerated Master’s Degrees (p. 90). For policies governing all graduate degrees, see AP6 Graduate Policies (p. 90).

Admission Requirements
Mason undergraduate students majoring in Bioengineering, BS (p. 1177) may apply to this option if they have earned 90 undergraduate credits with an overall GPA of at least 3.20 and completed all MATH and PHYS requirements. Criteria for admission are identical to criteria for admission to the Bioengineering, MS (https://catalog.gmu.edu/colleges-schools/engineering/bioengineering/bioengineering-ms) program.

Accelerated Options Requirement
Students must complete all credits that satisfy requirements for both the BS and MS programs. Up to two courses (6 credits) of approved MS level courses taken as part of the undergraduate degree may be applied to the graduate degree. The courses selected for this purpose must be approved by the academic advisor of both the BS and MS programs and by the Bioengineering department chair. For undergraduate Bioengineering technical electives, the students may choose the graduate version of such elective courses to replace the corresponding undergraduate courses.

Degree Conferral
Students are recommended to meet with the Bioengineering academic advisor one year before and must apply to the program one semester before they expect to complete the BS requirements to have the BS degree conferred. In addition, at the beginning of the student’s final undergraduate semester, students must complete a Bachelor’s/Accelerated Master’s Transition form that is submitted to the Office of the University Registrar and the VSE Graduate Admissions Office. At the completion of MS requirements, a MS degree is conferred.

Bioengineering, BS/Biostatistics, Accelerated MS
Overview
Highly-qualified students in Bioengineering, BS (p. 1032) have the option of obtaining an accelerated Biostatistics, MS (p. 1138). Students in an accelerated degree program must fulfill all university requirements for the master’s degree.

For more detailed information, see AP6.7 Bachelor’s/Accelerated Master’s Degrees (https://catalog.gmu.edu/policies/academic/graduate-policies/#ap-6-7). For policies governing all graduate degrees, see AP6 Graduate Policies (https://catalog.gmu.edu/policies/academic/graduate-policies).

Admission Requirements:
Students enrolled in a BS degree in Bioengineering (p. 1032) may apply to this option if they have earned 90 undergraduate credits with an overall
Applied Statistics I

GPA of 3.00. Students must have successfully completed MATH 213 Analytic Geometry and Calculus III and BENG 320 Bioengineering Signals and Systems. Criteria for admission are identical to criteria for admission to the Biostatistics, MS (p. 1138) program.

Accelerated Option Requirements:

Students must complete all requirements for the BS and MS programs, with 6 credits overlap.

Students register for the following 500-level courses, which will also count towards the technical elective requirements of their undergraduate degree:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>BENG 501</td>
<td>Bioengineering Research Methods</td>
<td>3</td>
</tr>
<tr>
<td>STAT 554</td>
<td>Applied Statistics I</td>
<td>3</td>
</tr>
</tbody>
</table>

Note:

Students are permitted to take additional graduate basic courses in their undergraduate programs. In such cases, those classes cannot be counted toward requirements for the MS.

Degree Conferral:

Students must apply the semester before they expect to complete the BS requirements to have the BS degree conferred. In addition, at the beginning of the student’s final undergraduate semester, students must complete a Bachelor’s/Accelerated Master’s Transition form that is submitted to the Office of the University Registrar and the VSE Graduate Admissions Office. At the completion of MS requirements, a master’s degree is conferred.

Bioengineering, BS/Data Analytics Engineering, Accelerated MS

Overview

Highly-qualified students in the Bioengineering, BS (p. 1032) have the option of obtaining an accelerated Data Analytics Engineering, MS (p. 1019) with a concentration in Bioengineering.

Students in an accelerated degree program must fulfill all university requirements for the master’s degree. For policies governing all graduate degrees, see AP6.7 Graduate Policies (p. 90).

Admission Requirements

Students in the Bioengineering, BS (p. 1032) program may apply to this option if they have earned 95 undergraduate credits with an overall GPA of at least 3.30. Students must have successfully completed CS 222 Computer Programming for Engineers and BENG 320 Bioengineering Signals and Systems. Criteria for admission are identical to criteria for admission to the Bioengineering concentration of the Data Analytics Engineering, M (p. 1019) program.

Accelerated Option Requirements

Students must complete all requirements for the BS and MS programs, with 6 credits overlap.

Students register for 6 credits of 500-level basic courses in place of the corresponding BENG 400-level courses required for the undergraduate degree requirements. Specifically, students must register for:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>BENG 501</td>
<td>Bioengineering Research Methods</td>
<td>3</td>
</tr>
<tr>
<td>CS 504</td>
<td>Principles of Data Management and Mining (in place of BENG 420)</td>
<td>3</td>
</tr>
</tbody>
</table>

Total Credits 6

Note:

Students are permitted to take additional graduate basic courses in their undergraduate programs. In such cases, those classes cannot be counted toward requirements for the MS.

Degree Conferral

Students must apply the semester before they expect to complete the BS requirements to have the BS degree conferred. In addition, at the beginning of the student’s final undergraduate semester, students must complete a Bachelor’s/Accelerated Master’s Transition form that is submitted to the Office of the University Registrar and the VSE Graduate Admissions Office. At the completion of MS requirements, a master’s degree is conferred.

Bioengineering, BS/Operations Research, Accelerated MS

Overview

Highly-qualified students in the Bioengineering, BS (p. 1032) have the option of obtaining an accelerated Operations Research, MS (p. 1153).

For more detailed information, see AP6.7 Bachelor’s/Accelerated Master’s Degrees (p. 90). For policies governing all graduate degrees, see AP6 Graduate Policies (p. 90).

Admission Requirements

Mason undergraduate students majoring in Bioengineering, BS (p. 1032) may apply to this option if they have earned 90 undergraduate credits with an overall GPA of at least 3.30 and completed all MATH and PHYS requirements. Criteria for admission are identical to criteria for admission to the Operations Research, MS (p. 1153) program.

Accelerated Options Requirement

Students must complete all credits that satisfy requirements for both the BS and MS programs. Up to two courses (6 credits) of approved master’s level courses taken as part of the undergraduate degree may be applied to the graduate degree. The courses selected for this purpose must be approved by the academic advisors of both the BS and MS programs and by the SEDR department chair. For the BS programs that allow undergraduate electives from the department of system engineering and operations research, the students may choose the graduate version of such elective courses to replace the corresponding undergraduate courses.

Degree Conferral

Students must apply the semester before they expect to complete the BS requirements to have the BS degree conferred. In addition, at the beginning of the student’s final undergraduate semester, students must complete a Bachelor’s/Accelerated Master’s Transition form that is submitted to the Office of the University Registrar and the VSE Graduate Admissions Office. At the completion of MS requirements, a master’s degree is conferred.
Bioengineering, BS/Systems Engineering, Accelerated MS

Overview
Highly-qualified students in the Bioengineering, BS (p. 1032) have the option of obtaining an accelerated Systems Engineering, MS (p. 1170).

For more detailed information, see AP.6.7 Bachelor's/Accelerated Master's Degrees (p. 90). For policies governing all graduate degrees, see AP.6 Graduate Policies (p. 90).

Admission Requirements
Mason undergraduate students majoring in Bioengineering, BS (p. 1032) may apply to this option if they have earned 90 undergraduate credits with an overall GPA of at least 3.30 and completed all MATH and PHYS requirements. Criteria for admission are identical to criteria for admission to the Systems Engineering, MS (p. 1170) program.

Accelerated Options Requirement
Students must complete all credits that satisfy requirements for both the BS and MS programs. Up to two courses (6 credits) of approved master's level courses taken as part of the undergraduate degree may be applied to the graduate degree. The courses selected for this purpose must be approved by the academic advisors of both the BS and MS programs and by the SEOR department chair. For the BS programs that allow undergraduate electives from the department of system engineering and operations research, the students may choose the graduate version of such elective courses to replace the corresponding undergraduate courses.

Degree Conferral
Students must apply the semester before they expect to complete the BS requirements to have the BS degree conferred. In addition, at the beginning of the student's final undergraduate semester, students must complete a Bachelor's/Accelerated Master's Transition form that is submitted to the Office of the University Registrar and the VSE Graduate Admissions Office. At the completion of MS requirements, a master's degree is conferred.

Bioengineering Minor

Banner Code: BIOE
Website: https://bioengineering.gmu.edu/

The minor in Bioengineering is available to both engineering and non-engineering majors. It provides considerable opportunities in a highly cross-disciplinary field involving the application of engineering concepts and tools to solve problems in biomedicine. The minor in Bioengineering prepares students to gain and reinforce their knowledge of biology and engineering fundamentals, and develop and apply skills to clinically-relevant challenges.

Admissions & Policies

Admissions
Students must have completed MATH 114 Analytic Geometry and Calculus II with a grade of B- or better to be admitted to the minor.

Policies
For policies governing all minors, see AP.5.3.4 Minors (p. 90).

Requirements

</table>
The MS in Bioengineering prepares students for research and professional practice in bioengineering and related fields. The program includes both fundamentals and advanced work to apply engineering techniques to solve problems in biology and medicine. A major distinguishing feature of the curriculum is that it is designed to educate leaders who understand and appreciate how biomedical technology is translated from bench to bedside. Graduates from this program will eventually serve at universities, industry or government in a variety of roles, due to the breadth of this program and its content specific to clinical translation of new technologies.

Admissions & Policies

Admissions

Applicants must have completed a baccalaureate degree in engineering or the sciences from an accredited program and an earned GPA of 3.0 or better in their 60 highest-level credits.

In addition to fulfilling Mason's admission requirements for graduate study, applicants seeking to be admitted must demonstrate or provide the following:

- Demonstrate strong knowledge in ordinary differential equations cell biology and general chemistry as demonstrated by the BS degree, course selection, or project work.
- Additional knowledge in molecular biology, physiology, organic chemistry, linear algebra, and/or statistics is recommended.
- Provide two letters of recommendation, from references who are familiar with the applicant's professional accomplishments.
- Provide a resume and detailed statement of career goals and professional aspirations.
- If their native language is not English, students must take the English Proficiency exam. Test score minimum requirements are available at https://www2.gmu.edu/admissions-aid/how-apply/graduate/standardized-test-information
- Provide official GRE scores.

Requirements

Degree Requirements

Total credits: 30-33

Students complete the Core Bioengineering requirements, and requirements within one selected option: thesis, practicum or coursework.

Core Bioengineering

</tr>
</tbody>
</table>

Total Credits
Students are expected to complete 6 credits of BENG 799 Master’s Thesis towards their degree. Students cannot enroll in BENG 799 Master’s Thesis until the completion of their second semester of coursework. Once enrolled students must maintain continuous registration in thesis research until graduation, excluding summers. Students who defend in the summer must be registered for at least 1 credit of thesis research during that summer term.

Students choose from a restricted list of technical specialization courses to increase technical depth in an area of their interest, under the guidance and with the approval of the student’s advisor. Students must choose six credits from these courses. At least half of the selected classes must be at the 600 or 700 level.

### Committee Selection

Each student must form a master’s committee comprising three individuals. A minimum of two members of the committee must be tenured or tenure-track faculty in the Department of Bioengineering (p. 1032). The other member must be from outside the department.

### Thesis Research Proposal

Each student must prepare a written thesis proposal, and it must be presented before the completion of the second semester. The proposal must be made available to the committee at least two weeks in advance of the presentation. The proposal must be presented to and approved by the committee. The committee determines whether the proposal has merit and can lead to significant contributions to the area and whether the student has the knowledge and skills to complete the proposed work successfully and in a timely manner. If the student fails to defend the proposal, the student may present a proposal a second time, no later than 60 days from the first attempt. Failure in the second attempt results in dismissal from the program.

### Thesis Preparation and Defense

While preparing the thesis, the candidate enrolls in thesis research. The candidate can proceed to a public defense of the thesis once it has been approved by the committee.

The defense must be announced at least two weeks in advance. The thesis draft must be submitted to the library and made publicly available at least two weeks in advance of the defense. The entire committee must be present at the defense. If the candidate fails to defend the thesis, the candidate may request a second defense, following the same procedures as for the initial defense. A candidate who fails a second attempt to defend the thesis is terminated from the program.
Practicum Option

<table>

</tbody>
</table>

Total Credits 6

1 Students are expected to complete 6 credits of BENG 798 Independent Reading and Research in Bioengineering towards their degree. Students cannot enroll in BENG 798 Independent Reading and Research in Bioengineering until the completion of their second semester of coursework. These credits must be taken along with an internship/co-op opportunity. Therefore, a letter from the specific employer must be provided on behalf of the student.

Students choose from a restricted list of technical specialization courses to increase technical depth in an area of their interest, under the guidance and with the approval of the student’s advisor. Students must choose six credits from these courses. At least half of the selected classes must be at the 600 or 700 level.

Committee Selection

Each student must form a master’s committee, comprising two or three individuals. In this case, the committee will help identify the goals of the internship and make sure that they are in line with the MS program’s objectives. The committee will also be responsible to evaluate a final report and presentation to assess the successful completion of the internship. A minimum of one member of the committee must be tenured or tenure-track faculty in the Department of Bioengineering. The other two members must be representatives from the internship program.

Project Preparation and Presentation

During the internship, the candidate enrolls in BENG 798 Independent Reading and Research in Bioengineering (Internship/Co-op) and prepares the project report and presentation. The candidate can proceed to the final presentation of the project once it has been approved by the committee.

The presentation must be announced at least two weeks in advance. The report draft must be submitted to the library and made publicly available at least two weeks in advance of the defense. The entire committee must be present at the presentation. If the candidate fails to defend the project, the candidate may request a second attempt, following the same procedures as for the initial one. A candidate who fails a second attempt is terminated from the program.

Coursework Option

Students choose from a restricted list of technical specialization courses to increase technical depth in an area of their interest, under the guidance and with the approval of the student’s advisor. Students must choose 15 credits from these courses. At least half of the selected classes must be at the 600 or 700 level.

Note: Students who elect to the coursework option will complete a minimum of 33 credit hours.

**Additional Training Requirement**

**Bioengineering Seminar**
All MS students are required to attend a minimum of two departmental seminars per semester. Students will sign an attendance sheet available at the end of each seminar.

**Accelerated Master's**

**Bioengineering, BS/Bioengineering, Accelerated MS**

**Overview**
Highly-qualified students in the Bioengineering, BS (p. 1177) (https://catalog.gmu.edu/colleges-schools/engineering/bioengineering/bioengineering-bs) have the option of obtaining an accelerated Bioengineering, MS (https://catalog.gmu.edu/colleges-schools/engineering/bioengineering/bioengineering-ms).

For more detailed information, see AP.6.7 Bachelor's/Accelerated Master's Degrees (p. 90). For policies governing all graduate degrees, see AP.6 Graduate Policies (p. 90).

**Admission Requirements**
Mason undergraduate students majoring in Bioengineering, BS (p. 1177) may apply to this option if they have earned 90 undergraduate credits with an overall GPA of at least 3.20 and completed all MATH and PHYS requirements. Criteria for admission are identical to criteria for admission to the Bioengineering, MS (https://catalog.gmu.edu/colleges-schools/engineering/bioengineering/bioengineering-ms) program.

**Accelerated Options Requirement**
Students must complete all credits that satisfy requirements for both the BS and MS programs. Up to two courses (6 credits) of approved MS level courses taken as part of the undergraduate degree may be applied to the graduate degree. The courses selected for this purpose must be approved by the academic advisor of both the BS and MS programs and by the Bioengineering department chair. For undergraduate Bioengineering technical electives, the students may choose the graduate version of such elective courses to replace the corresponding undergraduate courses.

**Degree Conferral**
Students are recommended to meet with the Bioengineering academic advisor one year before and must apply to the program one semester before they expect to complete the BS requirements to have the BS degree conferred. In addition, at the beginning of the student’s final undergraduate semester, students must complete a Bachelor's/ Accelerated Master’s Transition form that is submitted to the Office of
the University Registrar and the VSE Graduate Admissions Office. At the completion of MS requirements, a MS degree is conferred.

**Bioengineering, PhD**

Banner Code: VS-PHD-BIOE

**Academic Advising**

Phone: 703-993-4381
Email: kblackw1@gmu.edu
Website: https://bioengineering.gmu.edu/academics/phd-bioengineering

Rapid technologically driven advances in understanding and treating human disease have opened up vast opportunities to advance human health through research that integrates engineering, basic sciences, medical sciences, and knowledge of industry practices. The doctoral program will prepare leaders in bioengineering in this broader, integrative sense of the discipline. A major distinguishing feature of the curriculum is its emphasis on understanding how biomedical technology is translated from bench to bedside. Graduates from this program will eventually serve at universities, industry or government in a variety of roles, including scientific research, technology development, and regulatory affairs.

**Available Concentrations**

Four concentration areas are offered, aligned with current faculty research expertise:

- Biomedical Imaging and Devices
- Computational Biomedical Engineering
- Biomaterials and Nanomedicine
- Neurotechnology and Computational Neuroscience

**Admissions & Policies**

**Admissions**

**Application Requirements**

In addition to fulfilling Mason’s admission requirements for graduate study, applicants should:

- Have a baccalaureate degree in engineering or the sciences from an accredited program with a reputation for high academic standards and an earned GPA of 3.3 or better in their highest-level engineering-related credits.
- Provide official GRE Scores.
- Provide three letters of recommendation, preferably from academic references or references in industry or government who are familiar with the applicant’s aptitude for research.
- Provide a resume and detailed statement of career goals and professional aspirations, including why they want to study at Mason, and two faculty with whom they want to work with.
- Demonstrate interest in combining engineering and the natural sciences with discovery and application in the life science; i.e., via a degree which reflects the desired combination (such as bioengineering, biomedical engineering, biophysics); a degree in engineering or the natural sciences which includes course work in life sciences; a degree in biology which includes course work in mathematics, physics, or engineering; a project or research experience with combined complementary expertise.

- If their native language is not English, students must take the English Proficiency exam. Test score minimum requirements are available at https://www2.gmu.edu/admissions-aid/how-apply/graduate/standardized-test-information

**Policies**

**Reduction of Credit**

Students must complete a minimum of 72 graduate credits, which may be reduced by a maximum of 30 credits from a related master’s degree. Reduction of credit requires the approval of the program director or designee and the dean or designee of the school. They determine how many credits are eligible for the reduction of credit.

For students to remain eligible for the PhD program, they must maintain a "B" average. Grades of "C" or lower in courses cannot be counted towards degree completion.

**Program Requirements**

The bioengineering PhD program requires successful completion of coursework detailed in a plan of study, qualifying examination, dissertation proposal, and final dissertation defense. Additional training requirements include seminar attendance, ethics training, and mentoring and teaching experience. All the general requirements for doctoral degrees at Mason apply to this program as well.

**Requirements**

**Degree Requirements**

Total credits: 72

### Technical Electives

These graduate courses develop additional technical expertise in a student's PhD concentration. Students must choose 12 credits from the following list. At least half of the selected classes must be at the 600-700 level.

#### Bioengineering
- BENG 699  Advanced Topics in Bioengineering
- BENG 725  Computational Motor Control
- BENG 738  Advanced Medical Image Processing
- BENG 745  Biomedical Systems and Microdevices
- BENG 750  Modeling and Simulation of Human Movement

#### Electrical, Computer & Mechanical Engineering
- ECE 511  Computer Architecture
- ECE 528  Introduction to Random Processes in Electrical and Computer Engineering
- ECE 530  Sensor Engineering
- ECE 550  System Engineering Design
- ECE 635  Adaptive Signal Processing
- ME 621  Foundations of Fluid Mechanics

#### Bioinformatics
- BINF 641  Biomolecular Modeling
- BINF 690  Numerical Methods for Bioinformatics
- BINF 701  Systems Biology
- BINF 731  Protein Structure Analysis
- BINF 740  Introduction to Biophysics
- BINF 741  Introduction to Computer Simulations of Biomolecules
- BINF 751  Biochemical and Cellular Systems Modeling
- BINF 760  Machine Learning for Bioinformatics

#### Biology and Chemistry
- BIOL 562  Personalized Medicine
- BIOL 563  Virology
- BIOL 566  Cancer Genomics
- BIOL 572  Human Genetics
- BIOL 583  General Biochemistry
- BIOL 682  Advanced Eukaryotic Cell Biology
- CHEM 563  General Biochemistry I
- CHEM 568  Bioorganic Chemistry
- CHEM 613  Modern Polymer Chemistry
- CHEM 660  Protein Biochemistry

#### Physics
- PHYS 510  Computational Physics I
- PHYS 612  Physics of Modern Imaging
- PHYS 640  Finite Element Analysis of Solids and Fluids
- PHYS 694  Applied Mechanics of Solids
- PHYS 695  Applied Fluid Mechanics

#### Mathematics and Statistics
- MATH 685  Numerical Analysis
In preparing this proposal, the student enrolls in each student must prepare a written dissertation proposal. While preparing this proposal, the student enrolls in BENG 998 Doctoral Dissertation Proposal. The proposal must be made available to the committee at least two weeks in advance of the presentation. The proposal must be presented to and approved by the dissertation committee. The committee determines whether the proposal has merit and can lead to significant contributions to the area and whether the student has the knowledge and skills to complete the proposed work successfully and in a timely manner. Students may present their dissertation proposal only after passing the qualifying exam, and the presentation may not be on the same day as the qualifying exam. If the student fails to defend the proposal, the student may present a dissertation proposal a second time at a later date. Failure in the second attempt results in dismissal from the program. On completing this requirement successfully, the student is advanced to candidacy for the PhD degree.

**Advancement to Candidacy**

Each student must present and defend a written dissertation proposal to advance to candidacy. The student is eligible to advance to candidacy after passing the qualifying exam, and satisfactorily completing the required courses in an approved plan of study filed by the student, and completing a minimum of 6 credits of BENG 998 Doctoral Dissertation Proposal. All students must advance to candidacy within four years after initial enrollment in the program, unless special waiver is granted by the PhD committee for extenuating circumstances. If the student has not demonstrated satisfactory progress to the PhD committee by the end of the 4th year, they can be terminated from the program.

The proposal should at a minimum clearly articulate the research question and the specific aims of the research, provide a critical review of the literature and present the rationale and the significance of the research in addressing a gap in scientific knowledge, describe the research methods and study design in sufficient detail and present preliminary results demonstrating the feasibility of the research.

The proposal must be made available to the committee at least two weeks in advance of the presentation. The committee determines whether the proposal has merit and can lead to significant original contributions to the area.

Following the research presentation, the dissertation committee will ask the students a number of questions in a closed session to evaluate the students understanding of the relevant literature and methods that are broadly related to the chosen area of research, and whether the student has the knowledge and skills to complete the proposed work successfully and in a timely manner. If the dissertation committee feels that the student is not adequately prepared, they may recommend remedial measures, including additional coursework to address any gaps in knowledge, or modification of the aims of the proposal. The student can appear for advancement to candidacy a second time anytime within one year. Failure in the second attempt results in dismissal from the program. On completing this requirement successfully, the student is advanced to candidacy for the PhD degree.

**Dissertation Research**

Students are expected to complete 24 credits of BENG 998 Doctoral Dissertation Proposal and BENG 999 Doctoral Dissertation towards their degree. Students cannot enroll in BENG 998 Doctoral Dissertation Proposal before they have passed the qualifying exam. Students cannot enroll in BENG 999 Doctoral Dissertation before they have advanced to candidacy. Students who advanced to candidacy after the add period for a given semester must wait until the following semester to register for BENG 999 Doctoral Dissertation. Students cannot advance to candidacy and defend their dissertation during the same semester. In special cases, waivers may be granted by the PhD committee. Once enrolled in BENG 999 Doctoral Dissertation, students must maintain continuous registration in BENG 999 Doctoral Dissertation each semester until graduation, excluding summers. Students who defend in the summer...
must be registered for at least 1 credit of BENG 999 Doctoral Dissertation during that summer term.

### Dissertation Committee Selection
Each student must form a dissertation committee, comprising four or five individuals, including the members selected for the qualifying exam. A minimum of two members of the committee must be tenured or tenure-track faculty in the Department of Bioengineering. One member must be from outside the department. The chair of the dissertation committee must be tenured or tenure-track faculty in the Department of Bioengineering. The dissertation director can be a member of the Bioengineering graduate faculty with primary appointment outside of the Department of Bioengineering. The committee and the chair must be approved by the chair of the Department of Bioengineering.

### Dissertation Preparation and Defense
While preparing the dissertation, the candidate enrolls in BENG 999 Doctoral Dissertation. The candidate can proceed to a public defense of the dissertation once their dissertation has been approved by the dissertation committee.

The dissertation must make significant contributions to its area as evidenced by refereed journal and/or conference publications. All students are expected to defend their dissertation within three years after defending their proposal, unless special waiver is granted by the PhD committee for extenuating circumstances.

The defense must be announced at least two weeks in advance. The dissertation draft must be submitted to the library and made publicly available at least two weeks in advance of the defense. The entire dissertation committee must be present at the defense, unless an exception is approved by the director of the PhD in Bioengineering Program in advance of the defense. If the candidate fails to defend the dissertation, the candidate may request a second defense, following the same procedures as for the initial defense. There is no time limit for this request other than general time limits for the doctoral degree. A candidate who fails a second attempt to defend the dissertation is terminated from the program.

### Additional Training Requirements

#### Bioengineering Seminar
All PhD students are required to attend a minimum of 3 departmental seminars per semester. Students will sign an attendance sheet available at the end of each seminar.

#### Ethics Training
Prior to beginning research studies in a Bioengineering laboratory, all PhD students must complete the on-line Collaborative Institutional Training Initiative (CITI) Responsible Conduct of Research course. CITI training modules provide students with an understanding of conflicts of interest, research misconduct, peer review, and authorship.

#### Bioengineering Mentorship
All PhD students are required to participate in mentoring at least one undergraduate Bioengineering senior design team for a duration of 1 year.

PhD students work with the faculty advisor for the senior design team and are expected to apply translational and entrepreneurial concepts towards the mentorship of the team.

### Teaching Requirement
All PhD students are required to participate in teaching activities in consultation with their major advisors. Teaching opportunities include presenting lectures, conducting recitation sessions, serving as a teaching assistant, working as a laboratory assistant, participating in teaching workshops, preparing course materials, and other related activities approved by the student’s advisor.

### Department of Computer Science
PhD program: csphd@gmu.edu
MS programs: csgrad@gmu.edu
Undergraduate programs: csug@gmu.edu
General information: csinfo@gmu.edu
Phone: 703-993-1530
Fax: 703-993-1710
Website: cs.gmu.edu

Computer science is a discipline concerned with the analysis, design, implementation, maintenance, and evolution of computer-based systems used in almost all walks of life. Computer science is at the center of the information revolution in the 21st century. Advanced computation tools and techniques are revolutionizing and transforming the way we work, play, communicate, collaborate, and conduct business. In addition, computational approaches are integral to several scientific and engineering fields such as computational sciences, bioinformatics, and health informatics, to name a few.

Computer scientists must be well-grounded not only in the theory of computing, but also in its application to diverse areas. Computer scientists must be capable of working closely with members of other professions associated with computing. Students who pursue this discipline will learn about programming languages, data structures, algorithms, operating systems, artificial intelligence, robotics, data mining, computer networking, cyber-security, databases and software engineering.

### Faculty

#### Department Faculty

**Professors**

**Associate Professors**
- Ammann, Domeniconi, Duric, Gingold, Li, Lien, Lin, Maddox, Richards, Snyder, P. Wang, X. Wang, White, Zhong

**Assistant Professors**
- Ahnifie, Baldimtsi, Bell, Cheng, Deng, Dimitriadis, Gonzalez Hernandez, Gordon, LaToza, Osterweil, Pathak, Soundararajan, Yu
but create new and interesting problems for computer scientists.

These disciplines do not merely use computing techniques. These disciplines do not merely use computing

This program presents an innovative approach to the integration of computer science with other disciplines that require expertise in programming, computer systems, software requirements and modeling, formal methods, and analysis of algorithms.

For the BS ACS degree, students must complete 120 credits, including the Mason Core (p. 142) requirements. The program requires foundation, core, and concentration courses. These course requirements provide expertise in programming, computer systems, software requirements and modeling, formal methods, and analysis of algorithms.

Students must earn a C or better in any course intended to satisfy a prerequisite for a computer science course. Applied Computer Science majors may not use more than one course with a grade of C- or D toward department requirements.

For the BS ACS degree, students must complete 120 credits, including the Mason Core (p. 142) requirements. The program requires foundation, core, and concentration courses. These course requirements provide expertise in programming, computer systems, software requirements and modeling, formal methods, and analysis of algorithms.

The CS Department may not allow students to retake certain high-demand CS courses in which they have already earned a grade of C or better simply to improve their GPA.

Computer science majors complete the writing-intensive requirement through a sequence of projects and reports in CS 306 Synthesis of Ethics and Law for the Computing Professional (Mason Core) (p. 142) and CS 321 Software Engineering. Faculty members provide feedback on students' expository writing.

No math, science, or Volgenau School of Engineering course that is required for the major may be attempted more than three times. Those students who do not successfully complete such a course within three attempts will be terminated from the major. Undeclared students in the Volgenau School who do not successfully complete a course required for a Volgenau School major within three attempts will also be terminated.

In addition, students in the Volgenau School with evidence of continued failure to make adequate progress toward declaring or completing a Volgenau School major will also be terminated. Adequate progress is determined by the major program. For more information, see AP 5.2.4 Termination from the Major (https://catalog.gmu.edu/policies/academic/undergraduate-policies/#ap-5-2-4).

Once a student has attempted one of these courses twice unsuccessfully, the third attempt must be no later than the next semester of enrollment, excluding summers. Failure to take the course at that time will result in

This program presents an innovative approach to the integration of computer science with other disciplines that require expertise in computing techniques. These disciplines do not merely use computing but create new and interesting problems for computer scientists.

Admissions & Policies

Policies

Advanced Placement, Credit by Exam
A score of 4 on the Advanced Placement (AP) computer science exam qualifies students for credit in CS 112 Introduction to Computer Programming (Mason Core) (p. 142). A score of 4 on the International Baccalaureate (IB) computer science exam qualifies students for credit in CS 112 Introduction to Computer Programming (Mason Core) (p. 142), and a score of 5 or more qualifies students for credit in CS 211 Object-Oriented Programming.

Change of Major
Students requesting a change of major to Applied Computer Science must meet with the Volgenau School of Engineering Coordinator of Undergraduate Advising, 2500 Nguyen Engineering Building. Students requesting a change of major to Applied Computer Science must have a GPA of at least 2.75 in computer science and math courses and successfully completed one of CS 112 (http://catalog.gmu.edu/preview_course_nopop.php?catoid=29&coid=302778) or CS 211 (http://catalog.gmu.edu/preview_course_nopop.php?catoid=29&coid=302780), and one of MATH 113 (http://catalog.gmu.edu/preview_program.php?catoid=29&poid=28176#tt1999), MATH 114 (http://catalog.gmu.edu/preview_course_nopop.php?catoid=29&coid=305053), or MATH 125 (http://catalog.gmu.edu/preview_course_nopop.php?catoid=29&coid=305056), with a grade of B or better at Mason. See Change of Major (p. 1013) for more information.

Grades
Students must earn a C or better in any course intended to satisfy a prerequisite for a computer science course. Applied Computer Science majors may not use more than one course with a grade of C- or D toward department requirements.

Program Requirements
For the BS ACS degree, students must complete 120 credits, including the Mason Core (p. 142) requirements. The program requires foundation, core, and concentration courses. These course requirements provide expertise in programming, computer systems, software requirements and modeling, formal methods, and analysis of algorithms.

Repeating Courses
Students may attempt an undergraduate course taught by the Volgenau School of Engineering twice. A third attempt requires approval of the department offering the course. This policy does not apply to STAT 250 Introductory Statistics I (Mason Core) (p. 142), which follows the normal university policy for repeating undergraduate courses.

The CS Department may not allow students to retake certain high-demand CS courses in which they have already earned a grade of C or better simply to improve their GPA.

Writing-Intensive Requirement
Computer science majors complete the writing-intensive requirement through a sequence of projects and reports in CS 306 Synthesis of Ethics and Law for the Computing Professional (Mason Core) (p. 142) and CS 321 Software Engineering. Faculty members provide feedback on students' expository writing.

Termination from the Major
No math, science, or Volgenau School of Engineering course that is required for the major may be attempted more than three times. Those students who do not successfully complete such a course within three attempts will be terminated from the major. Undeclared students in the Volgenau School who do not successfully complete a course required for a Volgenau School major within three attempts will also be terminated.

In addition, students in the Volgenau School with evidence of continued failure to make adequate progress toward declaring or completing a Volgenau School major will also be terminated. Adequate progress is determined by the major program. For more information, see AP 5.2.4 Termination from the Major (https://catalog.gmu.edu/policies/academic/undergraduate-policies/#ap-5-2-4).

Once a student has attempted one of these courses twice unsuccessfully, the third attempt must be no later than the next semester of enrollment, excluding summers. Failure to take the course at that time will result
in termination from the major. A third attempt of a Volgenau School of Engineering course requires support by the student’s major department as well as permission by the department offering the course. This permission is not guaranteed. If the student is unable to take the course when required, the student may request an extension to a future semester; extensions require approval of the student’s advisor, their department, and the Associate Dean for Undergraduate Programs. The deadline for extension requests is the add deadline for the semester in which the course is required.

Students who have been terminated from a Volgenau School of Engineering major may not register for a Volgenau School course without permission of the department offering the course. This applies to all undergraduate courses offered by the Volgenau School except IT 104 Introduction to Computing (Mason Core) (p. 142) and STAT 250 Introductory Statistics I (Mason Core) (p. 142).

A student may not declare any major in the Volgenau School of Engineering if the student has previously met the termination criteria for that major at any time, regardless of what the student’s major was at the time the courses were taken.

### Requirements

#### Degree Requirements

Total credits: 120

Students must complete all foundation, core, elective, and communication requirements, and the requirements from one selected concentration.

Honors

CS Honors Program
The Department of Computer Science offers a CS Honors Program for students with strong computational foundations and the drive to delve deeper into computing. The program is based on the bachelor of science in computer science and applied computer science curriculum and is distinct from the University Honors College curriculum.

Entry Requirements
Students must be seeking a Bachelor of Science in Computer Science or a Bachelor of Science in Applied Computer Science and must apply for entry into the CS Honors Program after completing 12 credits of CS courses. Applicants must meet the GPA requirements outlined below to enter into the CS Honors Program.

Honors Requirements
CS Honors Program students must fulfill all standard courses required by the Bachelor of Science in Computer Science or Applied Computer Science degree as well as the following additional requirements:

- GPA Requirement: Students must maintain an overall GPA of at least 3.50 and a GPA of at least 3.50 for courses which count towards the BS/CS or BS/ACS major including math, natural sciences, and all CS/SWE courses.
- Research Project Requirement: Students must complete a significant research project prior to graduation. Students should seek out a CS faculty member willing to serve as their research advisor for the project. The project should comprise original work by the student and be demonstrated via two channels:
  a. a written project report that is approved by the student's research advisor and submitted to the department;
  b. a presentation of the project to an audience of students and/or faculty.
- Advanced Course Requirement: At least two Advanced Courses must be completed. A complete list of acceptable advanced courses is maintained by the CS department and is available on the department web site.

Accelerated Master’s

Applied Computer Science, BS/Computer Science, Accelerated MS

Overview
Highly-qualified students in the Applied Computer Science, BS (p. 1050) have the option of obtaining an accelerated Computer Science, MS (p. 1065).

For more detailed information, see AP.6.7 Bachelor’s/Accelerated Master’s Degrees (p. 93). For policies governing all graduate degrees, see AP6 Graduate Policies (p. 90).

Admission Requirements
Students in the Applied Computer Science, BS (p. 1050) program may apply to this option if they have earned 90 undergraduate credits with an overall GPA of at least 3.30. Students must have successfully completed:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>CS 310</td>
<td>Data Structures</td>
<td>3</td>
</tr>
<tr>
<td>CS 330</td>
<td>Formal Methods and Models</td>
<td>3</td>
</tr>
<tr>
<td>CS 367</td>
<td>Computer Systems and Programming</td>
<td>4</td>
</tr>
</tbody>
</table>

Total Credits 10

Accelerated Option Requirements
Students must complete all requirements for the BS and MS programs, with 6 credits overlap.

Students register for 6 credits of CS 500-level basic courses in place of the corresponding CS 400-level courses required for the undergraduate degree requirements. Specifically, students must register for CS 583 Analysis of Algorithms and one of the following courses in place of the corresponding 400-level course:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>CS 540</td>
<td>Language Processors</td>
<td>3</td>
</tr>
<tr>
<td>CS 550</td>
<td>Database Systems</td>
<td>3</td>
</tr>
<tr>
<td>CS 551</td>
<td>Computer Graphics</td>
<td>3</td>
</tr>
<tr>
<td>CS 555</td>
<td>Computer Communications and Networking</td>
<td>3</td>
</tr>
<tr>
<td>CS 571</td>
<td>Operating Systems</td>
<td>3</td>
</tr>
<tr>
<td>CS 580</td>
<td>Introduction to Artificial Intelligence</td>
<td>3</td>
</tr>
<tr>
<td>CS 584</td>
<td>Theory and Applications of Data Mining</td>
<td>3</td>
</tr>
</tbody>
</table>

Note:
Students are permitted to take additional graduate basic courses in their undergraduate programs. In such cases, those classes cannot be counted toward requirements for the MS.

Degree Conferral
Students must apply the semester before they expect to complete the BS requirements to have the BS degree conferred. In addition, at the beginning of the student’s final undergraduate semester, students must complete a Bachelor’s/Accelerated Master’s Transition form that is submitted to the Office of the University Registrar and the VSE Graduate Admissions Office. At the completion of MS requirements, a master’s degree is conferred.

Applied Computer Science, BS/Data Analytics Engineering, Accelerated MS

Overview
Highly-qualified students in the Applied Computer Science, BS (p. 1050) have the option of obtaining an accelerated Data Analytics Engineering, MS (p. 1019).

For more detailed information, see AP.6.7 Bachelor’s/Accelerated Master’s Degrees (p. 93). For policies governing all graduate degrees, see AP6 Graduate Policies (p. 90).

Admission Requirements
Students in the Applied Computer Science, BS (p. 1050) program may apply to this option if they have earned 90 undergraduate credits with an overall GPA of at least 3.30. Students must have successfully completed:
Accelerated Option Requirements

Students must complete all requirements for the BS and MS programs, with 6 credits overlap.

Students must register for 6 credits of CS 500-level basic courses in place of the corresponding CS 400-level courses required for the undergraduate degree requirements. Specifically, students in all concentrations of the Applied Computer Science, BS program must register for:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>CS 584</td>
<td>Theory and Applications of Data Mining</td>
<td>3</td>
</tr>
<tr>
<td></td>
<td>Total Credits</td>
<td>3</td>
</tr>
</tbody>
</table>

Students in the Software Engineering and Bioinformatics concentrations of the Applied Computer Science, BS (p. 1050) program must also register for:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>CS 550</td>
<td>Database Systems</td>
<td>3</td>
</tr>
<tr>
<td></td>
<td>Total Credits</td>
<td>3</td>
</tr>
</tbody>
</table>

Students in the Computer Game Design and Geography concentrations of the Applied Computer Science, BS (p. 1050) program must also register for one of the following courses:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>CS 550</td>
<td>Database Systems</td>
<td>3</td>
</tr>
<tr>
<td>CS 580</td>
<td>Introduction to Artificial Intelligence</td>
<td>3</td>
</tr>
</tbody>
</table>

Note:

For students in the Computer Game Design and Geography concentrations of the Applied Computer Science, BS (p. 1050) program, one of the 500 level courses will count as an elective towards their undergraduate degree.

Students are permitted to take additional graduate basic courses in their undergraduate programs. In such cases, those classes cannot be counted toward requirements for the MS.

Degree Conferral

Students must apply the semester before they expect to complete the BS requirements to have the BS degree conferred. In addition, at the beginning of the student's final undergraduate semester, students must complete a Bachelor's/Accelerated Master's Transition form that is submitted to the Office of the University Registrar and the VSE Graduate Admissions Office. At the completion of MS requirements, a master's degree is conferred.

Applied Computer Science, BS/Information Security and Assurance, Accelerated MS

Overview

Highly-qualified students in the Applied Computer Science, BS (p. 1050) program have the option of obtaining an accelerated Information Security and Assurance, MS (p. 1072) program.

For more detailed information, see AP6.7 Bachelor's/Accelerated Master's Degrees (p. 93). For policies governing all graduate degrees, see AP6 Graduate Policies (p. 90).

Admission Requirements

Students in the Applied Computer Science, BS (p. 1050) program can apply for this option if they have earned 90 undergraduate credits with an overall GPA of at least 3.30. Students must have successfully completed:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>CS 310</td>
<td>Data Structures</td>
<td>3</td>
</tr>
<tr>
<td>CS 330</td>
<td>Formal Methods and Models</td>
<td>3</td>
</tr>
<tr>
<td>CS 367</td>
<td>Computer Systems and Programming</td>
<td>4</td>
</tr>
<tr>
<td></td>
<td>Total Credits</td>
<td>10</td>
</tr>
</tbody>
</table>

Accelerated Option Requirements

Students must complete all requirements for the BS and MS programs, with 6 credits overlapping.

Students register for two 500-level computer science core courses (6 credits) in place of the corresponding 400-level computer science courses, as part of the undergraduate degree requirements. Specifically, students must take:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>CS 583</td>
<td>Analysis of Algorithms</td>
<td>3</td>
</tr>
<tr>
<td></td>
<td>Select one of the following:</td>
<td>3</td>
</tr>
<tr>
<td>CS 540</td>
<td>Language Processors</td>
<td></td>
</tr>
<tr>
<td>CS 550</td>
<td>Database Systems</td>
<td></td>
</tr>
<tr>
<td>CS 551</td>
<td>Computer Graphics</td>
<td></td>
</tr>
<tr>
<td>CS 555</td>
<td>Computer Communications and Networking</td>
<td></td>
</tr>
<tr>
<td>CS 571</td>
<td>Operating Systems</td>
<td></td>
</tr>
<tr>
<td>CS 580</td>
<td>Introduction to Artificial Intelligence</td>
<td></td>
</tr>
<tr>
<td>CS 584</td>
<td>Theory and Applications of Data Mining</td>
<td></td>
</tr>
<tr>
<td></td>
<td>Total Credits</td>
<td>6</td>
</tr>
</tbody>
</table>

Note:

For students in the Computer Game Design and Geography concentrations of the Applied Computer Science, BS (p. 1050) program, one of the 500 level courses will count as an elective towards their undergraduate degree.

Students complete all MS in Information Security and Assurance (p. 1072) core courses and apply the two courses from the above list toward the degree requirements.

Degree Conferral

Students must apply the semester before they expect to complete the BS requirements to have the BS degree conferred. In addition, at the beginning of the student's final undergraduate semester, students must complete a Bachelor's/Accelerated Master's Transition form that is submitted to the Office of the University Registrar and the VSE Graduate
Admissions Office. At the completion of MS requirements, a master’s degree is conferred.

**Applied Computer Science, BS/Information Systems, Accelerated MS**

Overview

Highly-qualified students in the Applied Computer Science, BS (p. 1050) program have the option of obtaining an accelerated Information Systems, MS (p. 1075). See AP.6.7 Bachelor’s/Accelerated Master’s Degrees (p. 93).

Students in an accelerated degree program must fulfill all university requirements for the master’s degree. For policies governing all graduate degrees, see AP6 Graduate Policies (p. 90).

**Admission Requirements**

Students in the Applied Computer Science, BS (p. 1050) program can apply to this option if they have earned 90 undergraduate credits with an overall GPA of at least 3.30. Students must have successfully completed:

<table>
<thead>
<tr>

<td>CS 584</td>
<td>Theory and Applications of Data Mining</td>
<td></td>
</tr>
<tr>
<td><strong>Total Credits</strong></td>
<td></td>
<td><strong>6</strong></td>
</tr>
</tbody>
</table>

Note:

Students complete all MS in Information Systems core courses and apply the two courses from above toward the elective requirements.

**Degree Conferral**

Students must apply the semester before they expect to complete the BS requirements to have the BS degree conferred. In addition, at the beginning of the student’s final undergraduate semester, students must complete a Bachelor’s/Accelerated Master’s Transition form that is submitted to the Office of the University Registrar and the VSE Graduate Admissions Office. At the completion of MS requirements, a master’s degree is conferred.

**Applied Computer Science, BS/Software Engineering, Accelerated MS**

Overview

Highly-qualified students in the Applied Computer Science, BS (p. 1050) program have the option of obtaining an accelerated Software Engineering, MS (p. 1081). See AP.6.7 Bachelor’s/Accelerated Master’s Degrees (p. 93).

Students in an accelerated degree program must fulfill all university requirements for the master’s degree. For policies governing all graduate degrees, see AP6 Graduate Policies (p. 90).

**Admission Requirements**

Students in the Applied Computer Science, BS (p. 1050) program may apply to this option if they have earned 90 undergraduate credits with an overall GPA of at least 3.30. Students must have successfully completed:

<table>
<thead>
<tr>

Admissions Office. At the completion of MS requirements, a master’s
degree is conferred.

Computer Science, BS
Banner Code: VS-BS-CS

Academic Advising
Phone: 703-993-1530
Email: csug@gmu.edu
Website: http://cs.gmu.edu/prospective-students/undergraduate-
programs/bs-in-computer-science/

The objectives of the BS in Computer Science Program relate to the
abilities of the graduates several years after graduation. The objectives
include:

• Foundation for successful careers in industry: Graduates of the
  program will have a broad understanding of the fundamental
  concepts, methodologies, tools, and applications of computer
  science. They will have the educational foundation that leads to
  successful careers in the computing industry.
• Foundation for graduate study: Graduates of the program will have
  the academic preparation for successful completion of rigorous
  graduate programs.
• Professional preparation: Graduates will have effective written and
  oral communication skills, and be able to work collaboratively in a
  professional and ethical manner.

The bachelor’s program in Computer Science is accredited by the

Admissions & Policies

Policies

Advanced Placement, Credit by Exam
A score of 4 on the Advanced Placement (AP) computer science exam
qualifies the student for credit in CS 112 Introduction to Computer
Programming (Mason Core) (p. 142). A score of 4 on the International
Baccalaureate (IB) computer science exam qualifies students for credit
in CS 112 Introduction to Computer Programming (Mason Core) (p. 142),
and a score of 5 or more qualifies students for credit in CS 211 Object-
Oriented Programming.

Change of Major
Students who are considering computer science as their major
must meet with the Volgenau School of Engineering Coordinator of
Undergraduate Advising, 2500 Nguyen Engineering Building. Students
considering a change of major to computer science must have a
GPA of at least 2.75 in all computer science and math courses, and
successfully completed one of CS 112 (http://catalog.gmu.edu/
preview_course_nopop.php?catoid=29&coid=302778) or CS
211 (http://catalog.gmu.edu/preview_course_nopop.php?
catoid=29&coid=302780), and one of MATH 113 (http://catalog.gmu.edu/
preview_course_nopop.php?catoid=29&coid=305052), MATH
114 (http://catalog.gmu.edu/preview_course_nopop.php?
catoid=29&coid=305053) or MATH 125 (http://catalog.gmu.edu/
preview_course_nopop.php?catoid=29&coid=305056), with a grade of B
or better. See Change of Major (p. 1013) for more information.

Computer Science, Computer Engineering Double Major
Computer Science majors can earn a double major in Computer Science
and Computer Engineering if they complete additional credits beyond
the 120 credits required for the Computer Science degree. The additional
credits must be part of an approved plan of study. For more information,
visit the department website.

Cooperative Education
Students may participate in the Mason cooperative education program or
a work-study program in the Washington, D.C. area.

Grades
Students must earn a C or better in any course intended to satisfy a
prerequisite for a computer science course. Computer science majors
may not use more than one course with grade of C- or lower toward
department requirements.

Repeating Courses
Students may attempt an undergraduate course taught by the Volgenau
School of Engineering twice. A third attempt requires approval of the
department offering the course. This policy does not apply to STAT 250
Introductory Statistics I (Mason Core) (p. 142), which follows the normal
university policy for repeating undergraduate courses.

The CS Department may not allow students to retake certain high-
demand CS courses in which they have already earned a grade of C or
better simply to improve their GPA.

Writing-Intensive Requirement
Computer science majors complete the writing-intensive requirement
through a sequence of projects and reports in CS 306 Synthesis
of Ethics and Law for the Computing Professional (Mason Core)
(p. 142) and CS 321 Software Engineering. Faculty members provide
feedback on students’ expository writing.

Termination from the Major
No math, science, or Volgenau School of Engineering course that is
required for the major may be attempted more than three times. Those
students who do not successfully complete such a course within three
attempts will be terminated from the major. Undeclared students in the
Volgenau School who do not successfully complete a course required for
a Volgenau School major within three attempts will also be terminated.

In addition, students in the Volgenau School with evidence of continued
failure to make adequate progress toward declaring or completing a
Volgenau School major will also be terminated. Adequate progress is
determined by the major program. For more information, see AP5.2.4
Termination from the Major (https://catalog.gmu.edu/policies/academic/
dergraduate-policies/#ap-5-2-4).

Once a student has attempted one of these courses twice unsuccessfully,
the third attempt must be no later than the next semester of enrollment,
excluding summers. Failure to take the course at that time will result
in termination from the major. A third attempt of a Volgenau School of
Engineering course requires support by the student’s major department
as well as permission by the department offering the course. This
permission is not guaranteed. If the student is unable to take the
course when required, the student may request an extension to a future
semester; extensions require approval of the student’s advisor, their department, and the Associate Dean for Undergraduate Programs. The deadline for extension requests is the add deadline for the semester in which the course is required.

Students who have been terminated from a Volgenau School of Engineering major may not register for a Volgenau School course without permission of the department offering the course. This applies to all undergraduate courses offered by the Volgenau School except IT 104 Introduction to Computing (Mason Core) (p. 142) and STAT 250 Introductory Statistics I (Mason Core) (p. 142).

A student may not declare any major in the Volgenau School of Engineering if the student has previously met the termination criteria for that major at any time, regardless of what the student’s major was at the time the courses were taken.

Requirements

Total Credits 35

1 Must be taken within the first year as an Applied Computer Science or Computer Science major.

Senior Computer Science

Select one from the following:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>CS 455</td>
<td>Computer Communications and Networking</td>
<td>3</td>
</tr>
<tr>
<td>CS 468</td>
<td>Secure Programming and Systems</td>
<td></td>
</tr>
<tr>
<td>CS 475</td>
<td>Concurrent and Distributed Systems</td>
<td></td>
</tr>
</tbody>
</table>

Select four additional courses from the following: 12

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td>CS 425</td>
<td>Game Programming I</td>
<td></td>
</tr>
<tr>
<td>CS 440</td>
<td>Language Processors and Programming Environments</td>
<td></td>
</tr>
<tr>
<td>CS 450</td>
<td>Database Concepts</td>
<td></td>
</tr>
</tbody>
</table>

Mathematics

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>MATH 113</td>
<td>Analytic Geometry and Calculus I (Mason Core) (p. 142)</td>
<td>4</td>
</tr>
<tr>
<td>MATH 114</td>
<td>Analytic Geometry and Calculus II</td>
<td>4</td>
</tr>
<tr>
<td>MATH 125</td>
<td>Discrete Mathematics I (Mason Core) (p. 142)</td>
<td>3</td>
</tr>
<tr>
<td>MATH 203</td>
<td>Linear Algebra</td>
<td>3</td>
</tr>
<tr>
<td>MATH 213</td>
<td>Analytic Geometry and Calculus III</td>
<td>3</td>
</tr>
</tbody>
</table>

Total Credits 17

Note:

MATH 104 Trigonometry and Transcendental Functions, MATH 105 Precalculus Mathematics, MATH 108 Introductory Calculus with Business Applications (Mason Core) (p. 142), and courses with an IT designation (and any associated cross-listed courses) cannot be counted toward this degree.

Statistics

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>STAT 344</td>
<td>Probability and Statistics for Engineers and Scientists</td>
<td>3</td>
</tr>
</tbody>
</table>

Total Credits 3

1 Those planning to take MATH 352 Statistics may replace STAT 344 Probability and Statistics for Engineers and Scientists I with MATH 351 Probability.
Computer Science-Related Courses

Students may need to choose electives to satisfy prerequisites for the following courses:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>STAT 354</td>
<td>Probability and Statistics for Engineers and Scientists II</td>

</tr>
</tbody>
</table>

Any MATH or CS course numbered above 300 (except MATH 351) ¹

Total Credits: 6

¹ Those planning to take MATH 352 Statistics may replace STAT 344 Probability and Statistics for Engineers and Scientists I with MATH 351 Probability.

Communication

Students need three credits of communication:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>COMM 100</td>
<td>Public Speaking (Mason Core) (p. 142)</td>
<td></td>
</tr>
<tr>
<td>or COMM 101</td>
<td>Fundamentals of Communication (Mason Core) (p. 142)</td>
<td></td>
</tr>
</tbody>
</table>

Natural Science

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>Select 12 credits of natural science</td>
<td>12</td>
<td></td>
</tr>
</tbody>
</table>

Total Credits: 12

The courses should be intended for science and engineering students and must include a two course sequence with laboratories. Some approved combinations have a total of more than 12 hours.

Approved Two-Course Sequences with Laboratories

<table>
<thead>
<tr>
<th>Code</th>

Total Credits: 8
Honors

Honors in the Major
The Department of Computer Science offers a CS Honors Program for students with strong computational foundations and the drive to delve deeper into computing. The program is based on the bachelor of science in computer science and applied computer science curriculum and is distinct from the University Honors College curriculum.

Entry Requirements
Students must be seeking a Bachelor of Science in Computer Science or a Bachelor of Science in Applied Computer Science and must apply for entry into the CS Honors Program after completing 12 credits of CS courses. Applicants must meet the GPA requirements outlined below to enter into the CS Honors Program.

Honors Requirements
CS Honors Program students must fulfill all standard courses required by the Bachelor of Science in Computer Science or Applied Computer Science degree as well as the following additional requirements:

- GPA Requirement: Students must maintain an overall GPA of at least 3.50 and a GPA of at least 3.50 for courses which count towards the BS/CS or BS/ACS major including math, natural sciences, and all CS/SWE courses.
- Research Project Requirement: Students must complete a significant research project prior to graduation. Students should seek out a CS faculty member willing to serve as their research advisor for the project. The project should comprise original work by the student and be demonstrated via two channels:
  a. a written project report that is approved by the student’s research advisor and submitted to the department;
  b. a presentation of the project to an audience of students and/or faculty.
- Advanced Course Requirement: At least two Advanced Courses must be completed. A complete list of acceptable advanced courses is maintained by the CS department and is available on the department web site.

Accelerated Master’s

BS (selected)/Operations Research, Accelerated MS

Overview
Highly-qualified students in BS programs have the option of obtaining an accelerated Operations Research, MS (p. 1153).

Admission Requirements
Mason undergraduate students majoring in both engineering and non-engineering disciplines may apply to this option if 1) such an accelerated Operations Research, MS (p. 1153) pathway is allowable from the student’s BS program, which will be determined by the academic advisors of both the BS and MS programs and by the SEOR department chair; 2) they have earned 90 undergraduate credits with an overall GPA of at least 3.30, and 3) they have completed all MATH and PHYS requirements. Criteria for admission are identical to criteria for admission to the Operations Research, MS (p. 1153) program.

Students must additionally complete MATH 203 prior to applying for the graduate program.

Accelerated Option Requirements
Students must complete all credits that satisfy requirements for both the BS and MS programs. Up to two courses (6 credits) of approved master’s level courses taken as part of the undergraduate degree may be applied to the graduate degree. The courses selected for this purpose must be approved by the academic advisors of both the BS and MS programs and by the SEOR department chair.

For the BS programs that allow undergraduate electives from the department of systems engineering and operations research, the students may choose the graduate version of such elective courses to replace the corresponding undergraduate courses.

Degree Conferral
Students must apply the semester before they expect to complete the BS requirements to have the BS degree conferred. In addition, at the beginning of the student’s final undergraduate semester, students must complete a Bachelor’s/Accelerated Master’s Transition form that is submitted to the Office of the University Registrar and the VSE Graduate Admissions Office. At the completion of MS requirements, a master’s degree is conferred.

BS (selected)/Statistical Science, Accelerated MS

Overview
Highly-qualified students in BS programs have the option of applying to the accelerated Statistical Science, MS (p. 1141) program.

Admission Requirements
No specific undergraduate BS degree is required. Students enrolled in any BS degree may apply to the accelerated Statistical Science, MS (p. 1141) program if such an accelerated Statistical Science, MS pathway is allowable from the student’s BS program, which will be determined by the academic advisors of both the BS and MS programs; and if they have earned 90 undergraduate credits with an overall GPA of 3.00. Students must have successfully completed the following Mason courses each with a grade of C or better prior to admission to the accelerated program:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>MATH 213</td>
<td>Analytic Geometry and Calculus III</td>
<td>3</td>
</tr>
<tr>
<td>MATH 203</td>
<td>Linear Algebra</td>
<td>3</td>
</tr>
<tr>
<td>or MATH 321</td>
<td>Abstract Algebra</td>
<td></td>
</tr>
<tr>
<td>STAT 250</td>
<td>Introductory Statistics I (Mason Core)</td>
<td>3</td>
</tr>
<tr>
<td>STAT 344</td>
<td>Probability and Statistics for Engineers and Scientists I</td>
<td></td>
</tr>
<tr>
<td>STAT 346</td>
<td>Probability for Engineers</td>
<td>3</td>
</tr>
</tbody>
</table>
Accelerated Option Requirements

Students must complete all credits satisfying degree requirements for the BS and MS programs, with 6 credits overlap chosen from the following courses: STAT 515 Applied Statistics and Visualization for Analytics, STAT 544 Applied Probability, STAT 554 Applied Statistics I, STAT 560 Biostatistical Methods, and STAT 574 Survey Sampling I. (Credit may not be received for both STAT 474 and STAT 574; nor for both STAT 460 and STAT 560.) The graduate courses selected for overlap must be approved by the academic advisors of both the BS and MS programs. All graduate course prerequisites must be completed prior to enrollment. Each graduate course must be completed with a grade of B or better to apply toward the MS degree.

While still in undergraduate status, a maximum of 6 additional graduate credits may be taken as reserve graduate credit and applied to the master’s program. Reserve graduate credits do not apply to the undergraduate degree.

Degree Conferral

Students must apply the semester before they expect to complete the BS requirements to have the BS degree conferred. In addition, at the beginning of the student’s final undergraduate semester, students must complete a Bachelor’s/Accelerated Master’s Transition form that is submitted to the Office of the University Registrar and the VSE Graduate Recruitment and Enrollment Services. At the completion of MS requirements, a master's degree is conferred.

BS (selected)/Systems Engineering, Accelerated MS

Overview

Highly-qualified students in the Computer Science, BS (p. 1057) have the option of obtaining an accelerated Computer Science, MS (p. 1065).

For more detailed information, see AP.6.7 Bachelor’s/Accelerated Master’s Degrees (p. 93). For policies governing all graduate degrees, see AP.6 Graduate Policies (p. 90).

Admission Requirements

Mason undergraduate students majoring in both engineering and non-engineering disciplines may apply to this option if 1) such an accelerated Systems Engineering, MS (p. 1170) pathway is allowable from the student’s BS program, which will be determined by the academic advisors of both the BS and MS programs and by the SEOR department chair, 2) they have earned 90 undergraduate credits with an overall GPA of at least 3.30, and 3) they have completed all MATH and PHYS requirements. Criteria for admission are identical to criteria for admission to the Systems Engineering, MS (p. 1170) program.

Accelerated Option Requirements

Students must complete all credits that satisfy requirements for both the BS and MS programs. Up to two courses (6 credits) of approved master’s level courses taken as part of the undergraduate degree may be applied to the graduate degree. The courses selected for this purpose must be approved by the academic advisors of both the BS and MS programs and by the SEOR department chair.

For the BS programs that allow undergraduate electives from the department of systems engineering and operations research, the students may choose the graduate version of such elective courses to replace the corresponding undergraduate courses.

Degree Conferral

Students must apply the semester before they expect to complete the BS requirements to have the BS degree conferred. In addition, at the beginning of the student’s final undergraduate semester, students must complete a Bachelor’s/Accelerated Master’s Transition form that is submitted to the Office of the University Registrar and the VSE Graduate Admissions Office. At the completion of MS requirements, a master’s degree is conferred.

Computer Science, BS/Computer Science, Accelerated MS

Overview

Highly-qualified students in the Computer Science, BS (p. 1057) have the option of obtaining an accelerated Computer Science, MS (p. 1065).

For more detailed information, see AP.6.7 Bachelor’s/Accelerated Master’s Degrees (p. 93). For policies governing all graduate degrees, see AP.6 Graduate Policies (p. 90).

Admission Requirements

Students in the Computer Science, BS (p. 1057) program may apply to this option if they have earned 90 undergraduate credits with an overall GPA of at least 3.30. Students must have successfully completed CS 310 Data Structures, CS 330 Formal Methods and Models and CS 367 Computer Systems and Programming.

Accelerated Option Requirements

Students must complete all requirements for the BS and MS programs, with 6 credits overlap.

Students register for 6 credits of CS 500-level basic courses in place of the corresponding CS 400-level courses required for the undergraduate degree requirements. Specifically, students must register for two of the following courses in place of the corresponding 400-level courses:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>CS 540</td>
<td>Language Processors</td>

</tbody>
</table>

Note: Students are permitted to take additional graduate basic courses in their undergraduate programs. In such cases, those classes cannot be counted toward requirements for the MS.

Degree Conferral
Students must apply the semester before they expect to complete the BS requirements to have the BS degree conferred. In addition, at the beginning of the student’s final undergraduate semester, students must complete a Bachelor’s/Accelerated Master’s Transition form that is submitted to the Office of the University Registrar and the VSE Graduate Admissions Office. At the completion of MS requirements, a master’s degree is conferred.

Computer Science, BS/Information Security and Assurance, Accelerated MS

Overview
Highly-qualified students in the Computer Science, BS (p. 1057) have the option of obtaining an accelerated Information Security and Assurance, MS (p. 1072).

Admission Requirements
Students in the Computer Science, BS (p. 1057) program may apply for this option if they have earned 90 undergraduate credits with an overall GPA of at least 3.30. Students must have successfully completed CS 310 Data Structures, CS 330 Formal Methods and Models and CS 367 Computer Systems and Programming.

Accelerated Option Requirements
Students must complete all requirements for the BS and MS programs, with 6 credits overlap. Students register for 6 credits of CS 500-level basic courses in place of the corresponding CS 400-level courses required for the undergraduate degree requirements. Specifically, students must register for:

<table>
<thead>
<tr>

<tr>
<td>CS 583</td>
<td>Analysis of Algorithms</td>
<td>3</td>
</tr>
<tr>
<td>CS 584</td>
<td>Theory and Applications of Data Mining</td>
<td>3</td>
</tr>
</tbody>
</table>

Note: Students complete all MS in Information Security and Assurance (p. 1072) core courses and apply the two courses from the above list toward the requirements.

Degree Conferral
Students must apply the semester before they expect to complete the BS requirements to have the BS degree conferred. In addition, at the beginning of the student’s final undergraduate semester, students must complete a Bachelor’s/Accelerated Master’s Transition form that is submitted to the Office of the University Registrar and the VSE Graduate Admissions Office. At the completion of MS requirements, a master’s degree is conferred.

Computer Science, BS/Information Systems, Accelerated MS

Overview
Highly-qualified students in the Computer Science, BS (p. 1057) have the option of obtaining an accelerated Information Systems, MS (p. 1075).
For more detailed information, see AP6.7 Bachelor’s/Accelerated Master’s Degrees (p. 93). For policies governing all graduate degrees, see AP6 Graduate Policies (p. 90).

**Admission Requirements**

Students in the Computer Science, BS (p. 1057) program may apply to this option if they have earned 90 undergraduate credits with an overall GPA of at least 3.30. Students must have successfully completed CS 310 Data Structures, CS 330 Formal Methods and Models and CS 367 Computer Systems and Programming.

**Accelerated Option Requirements**

Students must complete all requirements for the BS and MS programs, with 6 credits overlap. Students register for 6 credits of CS 500-level basic courses in place of the corresponding CS 400-level courses required for the undergraduate degree requirements. Specifically, students must register for two of the following courses in place of the corresponding 400-level courses:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>

Website: https://cs.gmu.edu/current-students/undergraduates/minors/

**Admissions & Policies**

**Admissions**

Declaring a CS Minor

Students requesting a Computer Science Minor must have completed CS 112 Introduction to Computer Programming (Mason Core) (p. 142) or CS 211 Object-Oriented Programming with a grade of B or better.
Policies

Grades
No more than 3 credits of D grades may be used to satisfy requirements for the Computer Science Minor.

Program Requirements

The minor in computer science requires completion of at least 19 credits. Students should pay careful attention to prerequisites when selecting courses.

For policies governing all minors, see AP.5.3.4 Minors (p. 90).

Total Credits: 3
The Computer Science graduate program prepares students for research and professional practice in computer science and related technologies. The program includes both fundamentals and advanced work in the areas of artificial intelligence and databases, programming languages and software engineering, systems and networks, theoretical computer science, and visual computing. Graduate classes are divided into basic classes, which have no graduate course prerequisite, and advanced classes, which have a graduate class as a prerequisite. Graduate classes are generally offered in the late afternoon and evening. Financial aid in the form of graduate assistantships may be available for full-time degree-seeking students.

### Requirements

**Degree Requirements**

Total credits: 30

**Required Courses and Plan of Study**

In addition to general university requirements, completion of the MS in CS requires 30 credits of graduate courses.

To ensure that students have uniform preparation for the core courses, all students are required to take CS 530 Mathematical Foundations of Computer Science and CS 531 Computer Systems and Fundamentals of Systems Programming as their first two courses in the program. Students have the opportunity to indicate that they have the requisite knowledge corresponding to CS 530 and CS 531 by passing an exam. The exams are given before classes begin in January and August, and can only be taken once. Students failing either one of the exams must take the equivalent course in their first semester. Students who successfully test out of CS 530 or CS 531 will be required to fulfill the credit requirement with other coursework chosen under advisement.

Courses are grouped in the following five broad areas: Artificial Intelligence and Databases, Programming Languages and Software Engineering, Systems and Networks, Theoretical Computer Science, and Visual Computing. The list of pre-approved courses with their areas follows.

All the following requirements should be satisfied for the MS in CS degree:

- CS 583 Analysis of Algorithms (from the Theoretical Computer Science area) and two additional core courses from two other areas must be successfully completed with a grade of B- or better.
- At least four courses (12 credits) must be chosen from the advanced courses in the list of pre-approved courses from at least three different areas.
- At least six courses, including two advanced courses, must be designated CS.
- At least eight courses must be taken from the list of pre-approved courses. Up to two computer science-related courses that are not on the list of pre-approved courses may be taken with the approval of the Computer Science Department.

### Admissions & Policies

#### Admissions

In addition to fulfilling Mason’s admission requirements for graduate study, applicants must meet the following requirements:

- Hold a baccalaureate degree that includes Data Structures and Algorithms (CS 310 Data Structures) Automata Theory and Formal Languages (CS 330 Formal Methods and Models), and Computer Architecture including Assembly Language (CS 367 Computer Systems and Programming and CS 465 Computer Systems Architecture). Students also must have completed Calculus I and II and a substantial course in discrete mathematics (such as MATH 125 Discrete Mathematics I (Mason Core) (p. 142)). Students with some deficiencies in preparation may be admitted provisionally pending completion of foundation courses in mathematics or computer science. Undergraduate credit earned for this purpose may not be applied toward the graduate degree.
- Earned a cumulative GPA of 3.00 for the last two years of undergraduate work, preferably with a major in a technical field such as computer science, mathematics, physical sciences, engineering, or information systems.
- Submit transcripts of all post secondary education, complete the self-evaluation section of the online application, (This information is used by the admissions committee to assess an applicant’s academic preparation for the MS program. Students with some deficiencies in preparation may be admitted provisionally pending completion of foundation courses required for the program), a goals statement, resume, two letters of recommendation, and an official GRE score (only required for those who have not earned a Bachelor’s degree from a US institution).
- International students must submit their English Proficiency scores.

Phone: 703-993-1530
Email: csgrad@gmu.edu
Website: http://cs.gmu.edu/prospective-students/ms-programs/ms-in-cs/
Plan of Study
Before the end of the second semester, students must have a plan of study approved by their academic advisor. This plan should be kept up to date by regular consultation with the academic advisor. A final signed version of the plan must be included when the student submits a graduation application.

<td></td>
</tr>
<tr>
<td>CS 655</td>
<td>Wireless and Mobile Computing</td>
<td></td>
</tr>
</tbody>
</table>

Thesis (optional):
Students, with the consent of a faculty sponsor and faculty advisor, may also elect a 6-credit thesis (CS 799 Thesis). The thesis must be guided and approved by a committee of three appropriate faculty members and presented at an appropriate forum. If the faculty advisor and the program director agree that the thesis is appropriate for the concentration the students will need to complete the two courses from the category 1 and one course from the category 2 in addition to the thesis to complete the Concentration requirements.

Concentration in Machine Learning (ML)
In addition to the existing program requirements, MS CS degree students must satisfy the following requirements.

Students must take 5 courses from the following categories:
Required:

- CS 584: Theory and Applications of Data Mining (3 credits)
- CS 688: Machine Learning (3 credits)

Choose 2-3 elective courses:

- CS 657: Mining Massive Datasets with MapReduce (3 credits)
- CS 681: Instructable Cognitive Agents (3 credits)
- CS 747: Deep Learning (3 credits)
- CS 782: Advanced Machine Learning (3 credits)

Choose 0-1 related course:

- CS 580: Introduction to Artificial Intelligence (3 credits)
- CS 687: Advanced Artificial Intelligence (3 credits)
- CS 685: Autonomous Robotics (3 credits)
- CS 682: Computer Vision (3 credits)

Thesis (optional):

Students, with the consent of a faculty sponsor and faculty advisor, may also elect a 6-credit thesis (CS 799 Thesis). The thesis must be guided and approved by a committee of three faculty members and presented to the committee. If the faculty advisor and the program director agree that the thesis is appropriate for the concentration the student will need to complete the two courses from category 1 and one course from category 2 in addition to the thesis to complete the concentration requirements.

---

**Accelerated Master’s**

**Applied Computer Science, BS/Computer Science, Accelerated MS**

**Overview**

Highly-qualified students in the Applied Computer Science, BS (p. 1050) have the option of obtaining an accelerated Computer Science, MS (p. 1065).

For more detailed information, see AP.6.7 Bachelor’s/Accelerated Master’s Degrees (p. 93). For policies governing all graduate degrees, see AP.6 Graduate Policies (p. 90).

**Admission Requirements**

Students in the Applied Computer Science, BS (p. 1050) program may apply to this option if they have earned 90 undergraduate credits with an overall GPA of at least 3.30. Students must have successfully completed:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>CS 310</td>
<td>Data Structures</td>
<td>3</td>
</tr>
<tr>
<td>CS 330</td>
<td>Formal Methods and Models</td>
<td>3</td>
</tr>
<tr>
<td>CS 367</td>
<td>Computer Systems and Programming</td>
<td>4</td>
</tr>
<tr>
<td></td>
<td><strong>Total Credits</strong></td>
<td><strong>10</strong></td>
</tr>
</tbody>
</table>

**Accelerated Option Requirements**

Students must complete all requirements for the BS and MS programs, with 6 credits overlap.

Students register for 6 credits of CS 500-level basic courses in place of the corresponding CS 400-level courses required for the undergraduate degree requirements. Specifically, students must register for CS 583 Analysis of Algorithms and one of the following courses in place of the corresponding 400-level course:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>CS 540</td>
<td>Language Processors</td>
<td>3</td>
</tr>
<tr>
<td>CS 550</td>
<td>Database Systems</td>
<td>3</td>
</tr>
<tr>
<td>CS 551</td>
<td>Computer Graphics</td>
<td>3</td>
</tr>
<tr>
<td>CS 555</td>
<td>Computer Communications and Networking</td>
<td>3</td>
</tr>
</tbody>
</table>

**Degree Conferral**

Students must apply the semester before they expect to complete the BS requirements to have the BS degree conferred. In addition, at the beginning of the student’s final undergraduate semester, students must complete a Bachelor’s/Accelerated Master’s Transition form that is submitted to the Office of the University Registrar and the VSE Graduate Admissions Office. At the completion of MS requirements, a master’s degree is conferred.

---

**Computer Science, BS/Computer Science, Accelerated MS**

**Overview**

Highly-qualified students in the Computer Science, BS (p. 1057) have the option of obtaining an accelerated Computer Science, MS (p. 1065).

For more detailed information, see AP.6.7 Bachelor’s/Accelerated Master’s Degrees (p. 93). For policies governing all graduate degrees, see AP.6 Graduate Policies (p. 90).

**Admission Requirements**

Students in the Computer Science, BS (p. 1057) program may apply to this option if they have earned 90 undergraduate credits with an overall GPA of at least 3.30. Students must have successfully completed CS 310 Data Structures, CS 330 Formal Methods and Models and CS 367 Computer Systems and Programming.

**Accelerated Option Requirements**

Students must complete all requirements for the BS and MS programs, with 6 credits overlap.

Students register for 6 credits of CS 500-level basic courses in place of the corresponding CS 400-level courses required for the undergraduate degree requirements. Specifically, students must register for two of the following courses in place of the corresponding 400-level courses:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>CS 540</td>
<td>Language Processors</td>
<td>3</td>
</tr>
<tr>
<td>CS 550</td>

Academic Advising
Phone: 703-993-1530
Email: csphd@gmu.edu
Website: http://cs.gmu.edu/prospective-students/phd-program/

The PhD program in Computer Science prepares students to become technical leaders in their fields of research. We have a world-class faculty with research expertise in a diverse set of computer science areas and our program is nationally ranked. Additionally, we are located in the suburbs of Washington, D.C at the center of one of the largest computer science and information technology corridors in the nation and a major center for science and engineering research and funding. Our PhD graduates have been highly successful both in academic and industrial positions.

The Computer Science PhD program requires coursework, qualifying and comprehensive examinations, and a doctoral dissertation that is first proposed and eventually defended. Mason’s general doctoral requirements (https://catalog.gmu.edu/policies/academic/graduate-policies/#text) apply to this program.

Admissions & Policies

Admissions
All applicants must have an undergraduate degree, and their prior academic work must show a strong academic background in computer science. In addition, the GRE General Test is required from every applicant. Finally, each applicant must provide a resume, brief statement of career goals and personal aspirations, as well as three letters of reference. Each application receives careful consideration from the PhD Admission Committee.

Policies

Program Requirements
The 72 hours of required doctoral-level credits typically consist of 48 credits of regular coursework and 24 credits of dissertation research.

Requirements

Degree Requirements
Total credits: 72

Doctoral Coursework

<tr>
<td></td>
<td>30 credits of graduate level courses in the Computer Science department or a field related to the student’s doctoral research area</td>
<td>30</td>
</tr>
</tbody>
</table>

Total Credits 48

1 Must be selected in consultation with the student’s advisor from a list maintained by the CS department. Independent study courses cannot be used towards the 9 credit hours that must be obtained in advanced graduate courses.
2 Must be selected in consultation with the student’s advisor.

Note:
With careful selection of courses, students may earn an MS degree as part of their PhD studies. CS 600 Theory of Computation, CS 700 Research Methodology in Computer Science and 9 credits of advanced graduate courses taken as part of the coursework for the PhD degree can be applied towards the MS degree, if the selected courses also satisfy the requirements of the MS degree.

Reduction of Credit
Students entering the PhD program with an approved MS degree can receive a waiver for up to 30 credits. In addition, the courses taken as part of the previous MS degree can be used to satisfy the other course requirements of the PhD degree. Reduction of credit and waiver of course requires the approval of the program director or designee and the dean or designee of the school.

Breadth Requirement
Students must demonstrate breadth of knowledge in computer science by obtaining superior grades in four graduate courses, including CS 583 Analysis of Algorithms. Collectively the four courses must span at least three of the following eight areas: Theoretical Computer Science,

The grades obtained in the four selected courses must meet the following requirements:

- Students must obtain an A- or better grade in at least three of the four courses
- In the fourth course, students must obtain a grade of B or better.

A list of courses that can be used to satisfy the breadth requirement is maintained by the CS department.

A course that is used to satisfy the breadth requirement may be repeated at most once (the grade received in the last attempt is considered when evaluating the breadth requirement).

To satisfy the breadth requirement, a student can use the grades (s)he received in the past, provided that at most five years elapsed since the course was taken. The course must have been taken at GMU. Exceptions to this rule are rare and require filing a petition with supplementary documents to the Computer Science department.

An alternative way to satisfy the breadth requirement is to pass the written qualifying exams (http://cs.gmu.edu/current-students/doctoral-students/qualifying-exam-policies-and-procedures). The exams are offered once every semester (usually two weeks before the semester begins).

To qualify, each student must pass exams in four areas, one of which is Foundations of Computer Science. The other three areas are chosen from these eight areas: computer systems, networks, compilers and languages, software construction, software testing, artificial intelligence, database systems, and information security.

The four exams must be attempted in the same semester, and a failed exam may be retaken once only, in the next semester. A student who fails to pass the four exams in two consecutive semesters is deemed to have failed to satisfy the breadth requirement, and is subject to termination.

If the student takes one or more written qualifying exams, the breadth requirement can only be satisfied by passing the qualifying exams (the criterion based on the course performance cannot apply).

**Dissertation Research**

A minimum of 24 credits of CS 998 Doctoral Dissertation Proposal and CS 999 Doctoral Dissertation must be completed, of which at least 12 must be in CS 999 Doctoral Dissertation. Only 24 credits of CS 998 Doctoral Dissertation Proposal and CS 999 Doctoral Dissertation may be applied toward the degree. Students may enroll in CS 998 Doctoral Dissertation Proposal only after passing the qualifying exams, and they may enroll in CS 999 Doctoral Dissertation only after advancing to candidacy.

<td>CS 998</td>
<td>Doctoral Dissertation Proposal</td>
<td>24</td>
</tr>
<tr>
<td>CS 999</td>
<td>Doctoral Dissertation (minimum 12 credits required)</td>
<td></td>
</tr>
</tbody>
</table>

**Comprehensive Exam**

To demonstrate the depth of knowledge in their intended area of research, the students must pass a comprehensive exam. The comprehensive exam is administered by a committee consisting of four members: the research advisor, an additional faculty member selected by the student, and two tenured CS faculty members selected by the PhD program director. One of the members selected by the program director chairs the committee.

The comprehensive exam has both written and oral components. The student is required to initiate the comprehensive exam procedure by submitting a form to the CS department at least four months prior to the target oral exam date. For the written component of the exam, the student prepares a critical review of research literature on a topic in the intended area of research. The report should synthesize the previous research in the target area with particular emphasis on open problems. The report should be 8-10 pages long and should contain a minimum of 20 references. The written report must be received by the committee members at least one month before the oral exam date.

The oral exam includes a presentation by the student based on the written report. The duration of the oral exam is typically two hours with the presentation limited to 20 minutes. The exam is public but only the members of the committee are permitted to ask questions.

The scope of the oral exam is defined by a reading list that includes research articles selected by the student and advisor, as well as the textbooks and articles related to the intended broader research area of the student selected by the other members of the committee and the CS department. The complete reading list, as well as the members of the examination committee will be finalized and communicated to the student by the CS department at least three months before the oral exam date. The comprehensive exam reading list becomes part of the student’s record.

When in both written and oral components at least three out of four committee members find the student’s performance satisfactory, the student passes the comprehensive exam. Otherwise the student is allowed to re-take the exam only once (with both written and components) and no later than the next semester. If the written report is found unsatisfactory by two or more committee members, the oral exam is not administered in that attempt.

The student may form a dissertation committee only after successfully passing the comprehensive exam.

**Milestones and Deadlines**

The students are expected to make steady progress in the program by completing the required course work and research-related milestones within the specified deadlines. Students who fail to meet the deadlines will be dismissed from the program unless there are extenuating circumstances approved by the department.

Successful completion of CS 700 Research Methodology in Computer Science: Within the first two semesters in the program

Successful completion of CS 701 Research Experience in Computer Science: Within the first 18 credits in the program

Determining the research advisor: Within the first 24 credits in the program (cannot be postponed beyond three years)

Satisfy the breadth requirement: Within the first 24 credits in the program (cannot be postponed beyond three years)
Successful completion of both instances of CS 800 Computer Science Colloquium: Within the first 36 credits in the program (cannot be postponed beyond five years)

Taking the comprehensive exam: Within the first 36 credits in the program (cannot be postponed beyond five years). The student must pass the exam in at most two attempts

Advancing to candidacy and graduation: Time limits are determined by the general university rules that apply to the PhD Programs.

Annual Evaluation
All students in the program (except the students in their first year in the PhD program) are required to complete an annual progress report (http://cs.gmu.edu/resources/student-forms). This report must be submitted by the end of September every year to the Administrative Coordinator of the CS PhD program.

The annual reports are reviewed by the members of the faculty to assess the student's progress in the program and feedback is provided to each student.

Dissertation Committee Selection
Each student must form a dissertation committee, comprising four or five individuals. Three members of the committee must be tenured or tenure-track faculty in the Computer Science Department. The fourth member should be a member of the George Mason University graduate faculty who is outside the department. The fifth member may be from outside the university. The chair of the dissertation committee, who must also be the dissertation director, must be tenured or tenure-track faculty in the Volgenau School. The committee must be approved by the chair of the Computer Science Department.

Dissertation Proposal
Each student must prepare a written dissertation proposal. While preparing this proposal, the student enrolls in CS 998 Doctoral Dissertation Proposal. The proposal must be made available to the committee at least two weeks in advance of the presentation. The proposal must be presented to and approved by the dissertation committee. The committee determines whether the proposal has merit and can lead to significant contributions to the area and whether the student has the knowledge and skills to complete the proposed work successfully and in a timely manner. Students may present their dissertation proposal only after passing the comprehensive exam, and the presentation may not be on the same day as the comprehensive exam. If the student fails to defend the proposal, the student may present a dissertation proposal a second time at a later date. Failure in the second attempt results in dismissal from the program. On completing this requirement successfully, the student is advanced to candidacy for the PhD degree.

Dissertation Preparation and Defense
While preparing the dissertation, the candidate enrolls in CS 999 Doctoral Dissertation. When the work is deemed complete, the dissertation is defended. The public defense is preceded by a predefense meeting in which only the candidate, the dissertation committee members, and the director of the PhD in Computer Science Program (or his or her representative) are present. If the committee approves, the candidate may then schedule the final public defense. There should be at least one month between the predefense meeting and the defense, and the defense must be announced at least two weeks in advance. The dissertation must be made available to the committee at least two weeks in advance of the defense. The entire dissertation committee must be present at the defense, unless an exception is approved by the director of the PhD in Computer Science Program in advance of the defense. The dissertation must make significant contributions to its area and be publishable in refereed journals or conferences. If the candidate defends the dissertation successfully, the dissertation committee recommends that the final form of the dissertation be completed under the supervision of the dissertation director and the graduate faculty of Mason accept the candidate for the PhD degree. If the candidate fails to defend the dissertation, the candidate may request a second defense, following the same procedures as for the initial defense. There is no time limit for this request other than general time limits for the doctoral degree and an additional predefense is not required. A candidate who fails a second attempt to defend the dissertation is dismissed from the program.

Information Security and Assurance Graduate Certificate
Banner Code: VS-CERG-ISA

Academic Advising
Phone: 703-993-1530
Email: csgrad@gmu.edu
Website: cs.gmu.edu/prospective-students/ms-programs/graduate-certificates/

This graduate certificate program is intended for students interested in science and methods for ensuring secrecy, integrity, availability, and legitimate use of information systems. The certificate may be pursued concurrently with any of the graduate programs in the Volgenau School.

The graduate certificate may only be pursued on a part-time basis.

Admissions & Policies

Admissions
Applicants must hold a baccalaureate degree from an accredited institution and have earned a GPA of 3.00 or higher in the last 60 credits. In addition, applicants must complete a self-assessment form, which can be obtained from the Computer Science Department. This form provides summary information concerning background and preparation for the program.

Applicants must possess knowledge equivalent to that provided by the following courses:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>INFS 501</td>
<td>Discrete and Logical Structures for Information Systems</td>
<td>3</td>
</tr>
<tr>
<td>SWE 510</td>
<td>Object-Oriented Programming in Java</td>
<td>3</td>
</tr>
<tr>
<td>INFS 515</td>
<td>Computer Organization Course and Operating Systems</td>
<td>3</td>
</tr>
<tr>
<td>INFS 519</td>
<td>Program Design and Data Structures</td>
<td>3</td>
</tr>
</tbody>
</table>

Students must also possess the equivalent knowledge of CS 555 Computer Communications and Networking and CS 571 Operating Systems, or the prerequisite courses required for the selected electives. Students not enrolled in a graduate degree program at Mason should apply for the certificate program through the Office of Graduate
Admission. Students already enrolled in a Mason graduate degree program should apply to the department for admission into the certificate program. Admission into the certificate program does not guarantee acceptance into any MS program.

Requirements

Certificate Requirements

Total credits: 12

This certificate may be pursued on a part-time basis only.

Students must complete four courses with an average grade of B or better for a total of 12 credits of graduate study.

Required Courses

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>ISA 562</td>
<td>Information Security Theory and Practice</td>
<td>3</td>
</tr>
<tr>
<td>ISA 656</td>
<td>Network Security</td>
<td>3</td>
</tr>
</tbody>
</table>

Total Credits 6

Additional Courses

Select two courses from the following:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>ISA courses at the 600 and 700 level (p. 1843)¹</td>
<td>6</td>
<td></td>
</tr>
<tr>
<td>ISA 564</td>
<td>Security Laboratory</td>
<td>3</td>
</tr>
</tbody>
</table>

Total Credits 6

¹ Excluding ISA 697 Topics in Information Security, ISA 796 Directed Readings in Information Security, ISA 797 Advanced Topics in Information Security, and ISA 798 Research Project.

Admissions & Policies

Admissions

Eligibility and Application Requirements

Applicants must hold a four-year (120-credit) baccalaureate degree from an accredited institution and have earned a GPA of 3.00 or better in the last 60 credits. Other requirements are as follows:

• Submit the appropriate application with two letters of recommendation from people directly knowledgeable of the applicant’s professional and academic competence, a one-page goals statement, and a work résumé.

• Complete the self-evaluation section of the online application. This information is used by the admissions committee to assess an applicant’s academic preparation for the MS program. Students with some deficiencies in preparation may be admitted provisionally pending completion of foundation courses required for the program.

• The GRE is only required for those who have not earned a Bachelor’s degree from a US Institution.

• International students must submit their English Proficiency scores.

Policies

Foundation Requirements

To ensure that students have an adequate background in mathematical and computer science, the program requires the following four foundation courses, or their equivalents: INFS 501 Discrete and Logical Structures for Information Systems, INFS 515 Computer Organization Course and Operating Systems, INFS 519 Program Design and Data Structures, and SWE 510 Object-Oriented Programming in Java.

Prospective students are asked to complete a departmental self-evaluation form, indicating whether previously taken courses may satisfy these foundation requirements. On acceptance, students are advised of the necessary foundation courses to be satisfactorily completed to meet this requirement. Foundation courses do not earn credit toward the MS degree; however, they must be successfully completed with a grade of B or better before enrolling in the core curriculum.

Students may test out to indicate that they have the requisite knowledge for those foundations courses. The exams are given before classes begin in January and August, and can only be taken once. Registration is not required; students need only be present at the date, time, and location specified with some form of photographic identification. Detailed information is available on the department web site. Students failing any one of the exams must take the equivalent course before enrolling in the core curriculum courses.
Advising

The department holds orientation meetings each January and August to advise newly admitted and continuing students. Members of the faculty are present to answer questions and offer advice concerning programs of study. Detailed information is available on the department web site.

The department also provides an advising function to students, as outlined in the student advising form available from the department. Each student is assigned a faculty advisor with whom to confer on matters related to degree requirements. A plan of study form for the MS degree should be completed and submitted by the student soon after admission to the program. This serves as a planning guide for the student.

Requirements

Degree Requirements

Total credits: 30

Completion of the degree program requires a minimum of 30 approved graduate credits (10 courses). Students must choose a concentration.

Required Core Courses

These courses provide the necessary background and fundamentals of information systems security and assurance. To continue in the program, students are required to obtain a B- or better grade in the core courses.

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>

</tbody>
</table>

Additional Courses

All students select two remaining courses from any combination of the following: 1

ISA 500, 600, and 700 level courses (p. 1843)

CS 500, 600, and 700 level courses (p. 1468)

Courses from the pre-approved electives list (follows)

ISA 799 | Thesis (must take 6 credits)              | 6       |

Pre-Approved Electives by Program

- Information Systems (INFS) (p. 1073)
- Software Engineering (SWE) (p. 1074)
- Computer Forensics (CFRS) (p. 1074)
- Electrical and Computer Engineering (ECE) (p. 1074)

Information Systems (INFS)

Accelerated Master's

Applied Computer Science, BS/Information Security and Assurance, Accelerated MS

Overview
Highly-qualified students in the Applied Computer Science, BS (p. 1050) program have the option of obtaining an accelerated Information Security and Assurance, MS (p. 1072) program.

For more detailed information, see AP 6.7 Bachelor's/Accelerated Master's Degrees (p. 93). For policies governing all graduate degrees, see AP 6 Graduate Policies (p. 90).

Admission Requirements
Students in the Applied Computer Science, BS (p. 1050) program can apply for this option if they have earned 90 undergraduate credits with an overall GPA of at least 3.30. Students must have successfully completed:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>CS 310</td>
<td>Data Structures</td>
<td>3</td>
</tr>
<tr>
<td>CS 330</td>
<td>Formal Methods and Models</td>
<td>3</td>
</tr>
<tr>
<td>CS 367</td>
<td>Computer Systems and Programming</td>
<td>4</td>
</tr>
</tbody>
</table>

Total Credits 10

Accelerated Option Requirements
Students must complete all requirements for the BS and MS programs, with 6 credits overlapping.

Students register for two 500-level computer science core courses (6 credits) in place of the corresponding 400-level computer science courses, as part of the undergraduate degree requirements. Specifically, students must take:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>CS 583</td>
<td>Analysis of Algorithms</td>
<td>3</td>
</tr>
<tr>
<td>Select one of the following:</td>
<td></td>
<td></td>
</tr>
<tr>
<td>CS 540</td>
<td>Language Processors</td>
<td></td>
</tr>
<tr>
<td>CS 550</td>
<td>Database Systems</td>
<td></td>
</tr>
<tr>
<td>CS 551</td>
<td>Computer Graphics</td>
<td></td>
</tr>
<tr>
<td>CS 555</td>
<td>Computer Communications and Networking</td>
<td></td>
</tr>
<tr>
<td>CS 571</td>
<td>Operating Systems</td>
<td></td>
</tr>
<tr>
<td>CS 580</td>
<td>Introduction to Artificial Intelligence</td>
<td></td>
</tr>
<tr>
<td>CS 584</td>
<td>Theory and Applications of Data Mining</td>
<td></td>
</tr>
</tbody>
</table>

Total Credits 6

Note:
Students complete all MS in Information Security and Assurance (p. 1072) core courses and apply the two courses from the above list toward the degree requirements.

Degree Conferral
Students must apply the semester before they expect to complete the BS requirements to have the BS degree conferred. In addition, at the beginning of the student's final undergraduate semester, students must complete a Bachelor's/Accelerated Master's Transition form that is submitted to the Office of the University Registrar and the VSE Graduate Admissions Office. At the completion of MS requirements, a master's degree is conferred.

Computer Science, BS/Information Security and Assurance, Accelerated MS

Overview
Highly-qualified students in the Computer Science, BS (p. 1057) program have the option of obtaining an accelerated Information Security and Assurance, MS (p. 1072).

For more detailed information, see AP 6.7 Bachelor's/Accelerated Master's Degrees (p. 93). For policies governing all graduate degrees, see AP 6 Graduate Policies (p. 90).

Admission Requirements
Students in the Computer Science, BS (p. 1057) program may apply for this option if they have earned 90 undergraduate credits with an overall GPA of at least 3.30. Students must have successfully completed CS 310 Data Structures, CS 330 Formal Methods and Models and CS 367 Computer Systems and Programming.

Accelerated Option Requirements
Students must complete all requirements for the BS and MS programs, with 6 credits overlap. Students register for 6 credits of CS 500-level basic courses in place of the corresponding CS 400-level courses required.
for the undergraduate degree requirements. Specifically, students must register for two of the following courses in place of the corresponding 400-level courses:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>CS 540</td>
<td>Language Processors</td>
<td>3</td>
</tr>
<tr>
<td>CS 550</td>
<td>Database Systems</td>
<td>3</td>
</tr>
<tr>
<td>CS 551</td>
<td>Computer Graphics</td>
<td>3</td>
</tr>
<tr>
<td>CS 555</td>
<td>Computer Communications and Networking</td>
<td>3</td>
</tr>
<tr>
<td>CS 571</td>
<td>Operating Systems</td>
<td>3</td>
</tr>
<tr>
<td>CS 580</td>
<td>Introduction to Artificial Intelligence</td>
<td>3</td>
</tr>
<tr>
<td>CS 583</td>
<td>Analysis of Algorithms</td>
<td>3</td>
</tr>
<tr>
<td>CS 584</td>
<td>Theory and Applications of Data Mining</td>
<td>3</td>
</tr>
</tbody>
</table>

Note:

Students complete all MS in Information Security and Assurance (p. 1072) core courses and apply the two courses from the above list toward the requirements.

**Degree Conferral**

Students must apply the semester before they expect to complete the BS requirements to have the BS degree conferred. In addition, at the beginning of the student's final undergraduate semester, students must complete a Bachelor's/Accelerated Master's Transition form that is submitted to the Office of the University Registrar and the VSE Graduate Admissions Office. At the completion of MS requirements, a master's degree is conferred.

---

**Information Technology, BS/Information Security and Assurance, Accelerated MS**

**Overview**

Highly-qualified students in the Information Technology, BS (p. 1122) have the option of obtaining an accelerated Information Security and Assurance, MS (p. 1072).

For more detailed information, see AP.6.7 Bachelor's/Accelerated Master's Degrees (p. 93). For policies governing all graduate degrees, see AP.6 Graduate Policies (p. 90).

**Admission Requirements**

Students in the Information Technology, BS (p. 1122) program may apply to this option if they have earned 90 undergraduate credits with an overall GPA of at least 3.30. Criteria for admission are identical to criteria for admission to the Information Security and Assurance, MS (p. 1072) program.

**Accelerated Option Requirements**

Students must complete all credits that satisfy requirements for the BS and MS programs, with 6 credits overlapping with the following courses:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>INFS 612</td>
<td>Principles and Practices of Communication Networks (satisfies IT 441 requirement in the BS program)</td>
<td>3</td>
</tr>
</tbody>
</table>

**Information Systems, MS**

**Banner Code:** VS-MS-ISYS

**Academic Advising**

Phone: 703-993-1530  
Email: csgrad@gmu.edu  
Website: cs.gmu.edu/prospective-students/ms-programs/ms-in-information-systems/

Modern information systems manage data, information and knowledge to support enterprise functions and decision making as well as human social activity over the Internet. Increasingly, these systems are distributed, collaborative, involve big data and hosted in the cloud.

The mission of the MSIS program is to allow students of diverse baccalaureate and professional backgrounds obtain a high-quality MS degree that:

- provides students with the theoretical knowledge and hands-on project experience needed to analyze, design, build, deploy, maintain, manage and promote effective organizational use of modern information systems;
- allows students to further specialize in related areas of big data, data and knowledge engineering, decision support systems, web-based software engineering and information security assurance; and,
- prepares students for careers in information systems in large and small organizations in both industry and government.

Career paths open to graduates include systems analyst, data administrator, database administrator, information architect, systems architect, decision analyst, data warehouse administrator, database application developer, web-based information systems designer and developer, information engineer, knowledge engineer, chief information officer, chief knowledge officer, chief privacy officer and project manager.
Admissions & Policies

Admissions

Eligibility and Application Requirements

Applicants must hold a four-year (120-credit) baccalaureate degree from an accredited institution and have earned a GPA of 3.00 or better in the last 60 credits. They also must meet the following requirements:

- Submit the appropriate application with two letters of recommendation from people directly knowledgeable of the applicant's professional and academic competence, a one-page goals statement, and a work résumé.
- Complete the self-evaluation section of the online application. This information is used by the admissions committee to assess an applicant’s academic preparation for the MS program. Students with some deficiencies in preparation may be admitted provisionally pending completion of foundation courses required for the program.
- The GRE is only required for those who have not earned a Bachelor’s degree from a US Institution.
- International students must submit their English proficiency scores.

Policies

Foundation Requirements

To ensure students have an adequate background in mathematical methods, computer technology, and programming knowledge, the program requires the following foundation courses or their equivalents:

- INFS 501 Discrete and Logical Structures for Information Systems
- INFS 515 Computer Organization Course and Operating Systems
- INFS 519 Program Design and Data Structures
- SWE 510 Object-Oriented Programming in Java

Prospective students are asked to complete a departmental self-evaluation form indicating whether previously taken courses may satisfy these foundation requirements. On acceptance, students are advised of the necessary foundation courses to be satisfactorily completed to meet this requirement. Foundation courses do not earn credit toward the MS degree; however, they must be successfully completed with a grade of B or better before enrolling in the core curriculum.

Students may test out to indicate they have the requisite knowledge for the foundations courses. The exams are given before classes begin in January and August, and can only be taken once. Registration is not required; students need only be present at the date, time, and location specified, and bring some form of photographic identification. Detailed information is available on the department web site. Students failing any of the exams must take the equivalent course before enrolling in the core curriculum.

Advising

The department holds orientation meetings in January and August to advise newly admitted and continuing students. Members of the faculty are present to answer questions and offer advice concerning programs of study. Detailed information is available on the department web site.

The department also provides an advising function to students, as outlined in the student advising form available from the department. Each student is assigned a faculty advisor with whom to confer on matters related to degree requirements. A plan of study form for the MS degree should be completed and submitted by the student soon after admission to the program. This plan serves as a guide for the student.

Requirements

Degree Requirements

Total credits: 30

Core Courses

To provide a common background in the fundamentals of information systems, the following core courses, which constitute the technical body of knowledge for the program, are required of all students. Students with strong academic background in mathematical foundations of computer science may have CS 530 Mathematical Foundations of Computer Science substituted for another elective course at the discretion of the program director.

Total Credits: 15

Electives are organized into the following emphasis areas: database management, data mining, electronic commerce, software engineering, knowledge management, and information security and assurance.

In addition to the core courses taken as part of the MS-ISYS curriculum, students may choose an emphasis within the program by taking six courses from one of the emphasis areas listed below. Students may also choose electives spanning several emphasis areas; they may also plan their electives so as to obtain certificates offered by the department. A list of approved electives is given within emphasis areas and by graduate program. A full list follows. Special courses may be used as electives with prior approval of the student’s academic advisor and the graduate coordinator.

Students, with the consent of a faculty sponsor and faculty advisor, may also elect courses in individualized study, special topics, or a 6-credit thesis (INFS 799 Thesis), which is primarily intended for students planning to pursue a PhD in information technology with a concentration in information systems.

Applied Computer Science, BS/Information Systems, Accelerated MS

Overview
Highly-qualified students in the Applied Computer Science, BS (p. 1050) program have the option of obtaining an accelerated Information Systems, MS (p. 1075). See AP.6.7 Bachelor’s/ Accelerated Master’s Degrees (p. 93).

Students in an accelerated degree program must fulfill all university requirements for the master’s degree. For policies governing all graduate degrees, see AP.6 Graduate Policies (p. 90).

Admission Requirements
Students in the Applied Computer Science, BS (p. 1050) program can apply to this option if they have earned 90 undergraduate credits with an overall GPA of at least 3.30. Students must have successfully completed:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>CS 310</td>
<td>Data Structures</td>
<td>3</td>
</tr>
<tr>
<td>CS 330</td>
<td>Formal Methods and Models</td>
<td>3</td>
</tr>
<tr>
<td>CS 367</td>
<td>Computer Systems and Programming</td>
<td>4</td>
</tr>
<tr>
<td></td>
<td>Total Credits</td>
<td>10</td>
</tr>
</tbody>
</table>

Accelerated Option Requirements

Students must complete all credits that satisfy requirements for the BS and MS programs, with 6 credits overlap.

Students register for two 500-level computer science core courses (6 credits) in place of the corresponding 400-level computer science courses, as part of the undergraduate degree requirements. Specifically, students must take

<table>

<td>Theory and Applications of Data Mining</td>
<td></td>
</tr>
<tr>
<td></td>
<td>Total Credits</td>
<td>6</td>
</tr>
</tbody>
</table>

Note:

Students complete all MS in Information Systems core courses and apply the two courses from above toward the elective requirements.
**Degree Conferral**

Students must apply the semester before they expect to complete the BS requirements to have the BS degree conferred. In addition, at the beginning of the student’s final undergraduate semester, students must complete a Bachelor’s/Accelerated Master’s Transition form that is submitted to the Office of the University Registrar and the VSE Graduate Admissions Office. At the completion of MS requirements, a master’s degree is conferred.

**Computer Science, BS/Information Systems, Accelerated MS**

**Overview**

Highly-qualified students in the Computer Science, BS (p. 1057) have the option of obtaining an accelerated Information Systems, MS (p. 1075).

For more detailed information, see AP.6.7 Bachelor’s/Accelerated Master’s Degrees (p. 93). For policies governing all graduate degrees, see AP.6 Graduate Policies (p. 90).

**Admission Requirements**

Students in the Computer Science, BS (p. 1057) program may apply to this option if they have earned 90 undergraduate credits with an overall GPA of at least 3.30. Students must have successfully completed CS 310 Data Structures, CS 330 Formal Methods and Models and CS 367 Computer Systems and Programming.

**Accelerated Option Requirements**

Students must complete all requirements for the BS and MS programs, with 6 credits overlapping. Students register for 6 credits of CS 500-level basic courses in place of the corresponding CS 400-level courses required for the undergraduate degree requirements. Specifically, students must register for two of the following courses in place of the corresponding 400-level courses:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>CS 540</td>
<td>Language Processors</td>
<td>3</td>
</tr>
<tr>

</tr>
<tr>
<td>CS 583</td>
<td>Analysis of Algorithms</td>
<td>3</td>
</tr>
<tr>
<td>CS 584</td>
<td>Theory and Applications of Data Mining</td>
<td>3</td>
</tr>
</tbody>
</table>

Note:

Students complete all MS in Information Systems (p. 1075) core courses and apply the two courses from above toward the elective requirements.

**Degree Conferral**

Students must apply the semester before they expect to complete the BS requirements to have the BS degree conferred. In addition, at the beginning of the student’s final undergraduate semester, students must complete a Bachelor’s/Accelerated Master’s Transition form that is submitted to the Office of the University Registrar and the VSE Graduate Admissions Office. At the completion of MS requirements, a master’s degree is conferred.

---

**Information Technology, BS/Information Systems, Accelerated MS**

**Overview**

Highly-qualified students in the Information Technology, BS (p. 1122) have the option of obtaining an accelerated Information Systems, MS (p. 1075).

For more detailed information, see AP6.7 Bachelor’s/Accelerated Master’s Degrees (p. 93). For policies governing all graduate degrees, see AP.6 Graduate Policies (p. 90).

**Admission Requirements**

Students in the Information Technology, BS (p. 1122) program may apply to this option if they have earned 90 undergraduate credits with an overall GPA of at least 3.30. Criteria for admission are identical to the criteria for admission to the Information Systems, MS (p. 1075) program.

**Accelerated Option Requirements**

Students must complete all credits that satisfy requirements for the BS and MS programs, with 6 credits overlapping with the following two courses:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>CS 550</td>
<td>Database Systems (satisfies IT 414 requirement in the BS program)</td>
<td>3</td>
</tr>
<tr>
<td>INFS 622</td>
<td>Information Systems Analysis and Design  (satisfies as one DTP concentration course in the BS program)</td>
<td>3</td>
</tr>
</tbody>
</table>

Note:

Students must complete MATH 125 Discrete Mathematics I (Mason Core) (p. 142) as their discrete math requirement and IT 306 Data Structures and Algorithms in Java as part of their concentration requirements in the BS program.

**Degree Conferral**

Students must apply the semester before they expect to complete the BS requirements to have the BS degree conferred. In addition, at the beginning of the student’s final undergraduate semester, students must complete a Bachelor’s/Accelerated Master’s Transition form that is submitted to the Office of the University Registrar and the VSE Graduate Admissions Office. At the completion of MS requirements, a master’s degree is conferred.

Admissions & Policies

Admissions
Declaring a Software Engineering Minor
Students requesting a software engineering minor must have completed CS 112 Introduction to Computer Programming (Mason Core) (p. 142) or CS 211 Object-Oriented Programming with a B or better.

Policies
General
Candidates for the minor in software engineering must complete 19 credits in software engineering with a minimum GPA of 2.00, 8 credits of which must be unique to the minor and not used for the major. For policies governing all minors, see AP.5.3.4 Minors (p. 90).

Grades
No more than 3 credits of D grades may be used to satisfy minor requirements.

Requirements

Software Engineering, MS
Banner Code: VS-MS-SWE

Academic Advising
Phone: 703-993-1530
Email: csgrad@gmu.edu
Website: cs.gmu.edu/prospective-students/ms-programs/ms-in-software-engineering/

The MS in Software Engineering provides specialized knowledge and experience in developing and modifying large, complex software systems. It emphasizes technical and human aspects of software engineering development. Software engineering spans all aspects of developing software, including requirements analysis, design, construction, testing, maintenance, economics, and management. A pragmatic approach to problem solving is the hallmark of a software engineer. Software engineers are concerned with the theoretical and practical aspects of technology, cost, and social impact of software systems that are effective, efficient, and flexible.

Software engineers are in demand in every segment of society affected by computing technology. Potential employers include all software vendors and Internet-based companies, electronic business organizations, businesses that build and sell computers, research and development laboratories, aerospace companies, government contractors, banks, insurance companies, and manufacturing organizations. The MS-SWE program educates future leaders of technical aspects of building and modifying high-quality software systems.

Successful applicants have a broad variety of undergraduate backgrounds, including computer science, science and mathematics, engineering, liberal arts, and business. Many students are working or have worked in the software industry.

The program and courses are revised regularly to stay abreast of the latest developments in software engineering. All classes are scheduled in the late afternoon and early evening to accommodate employed students.

Admissions
Students entering the MS program must have coursework or equivalent knowledge in the following areas: introductory programming in any language; knowledge of an object-oriented programming language such as Java, C++, or C#; data structures and algorithms; machine organization (such as those given in computer system architecture or assembly language courses); and topics in discrete mathematics, including sets, relations, functions, trees, graphs, and inductive proofs.

The level of knowledge required in these areas is equivalent to that taught in undergraduate courses and may be achieved by taking the following foundation courses from Mason:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>INFS 501</td>
<td>Discrete and Logical Structures for Information Systems</td>
<td>3</td>
</tr>
<tr>
<td>INFS 515</td>
<td>Computer Organization Course and Operating Systems</td>
<td>3</td>
</tr>
<tr>
<td>INFS 519</td>
<td>Program Design and Data Structures</td>
<td>3</td>
</tr>
<tr>
<td>SWE 510</td>
<td>Object-Oriented Programming in Java</td>
<td>3</td>
</tr>
</tbody>
</table>

In addition, it is desirable, though not required, that entering students have at least one year of work experience in building or modifying software systems.

Prospective students are asked to complete a departmental self-evaluation form, indicating whether previously taken courses may satisfy these foundation requirements. On acceptance, students are advised of the necessary foundation courses to be satisfactorily completed to meet this requirement. Foundation courses do not earn credit toward the MS degree; however, they must be successfully completed with a grade of B or better before enrolling in the core curriculum.
Students may test out to indicate they have the requisite knowledge for those foundation courses. The exams are given before classes begin in January and August, and can only be taken once. Registration is not required; students need only be present at the date, time, and location specified and bring some form of photographic identification. Detailed information is available on the department web site. Students failing any one of the exams must take the equivalent course before enrolling in the core curriculum courses.

Application Requirements
In addition to general admission requirements of the university, each applicant to the MS program must hold a four-year (120-credit) baccalaureate degree in an appropriate discipline from an accredited institution and have earned a GPA of 3.00 or better in the last 60 credits of undergraduate study. Other requirements are as follows:

- Provide a resume and a one- to two-page statement of educational and work experience in the computing field that includes a statement of career goals in software engineering.
- Complete the self-evaluation section of the online application. This information is used by the admissions committee to assess an applicant’s academic preparation for the MS program. Students with some deficiencies in preparation may be admitted provisionally pending completion of foundation courses required for the program.
- Submit the appropriate application with two letters of recommendation from people directly knowledgeable of the applicant’s professional and academic competence.
- The GRE is only required for those who have not earned a Bachelor’s degree from a US Institution.
- International students must submit their English Proficiency scores.

Acceptance into the MS program is based on an overall assessment of the applicant’s ability to complete the program of study satisfactorily. Well-qualified students with minor deficiencies may be admitted to the program in provisional status, with specified course work to be completed within a specified time.

Policies
Program Requirements
In addition to the general requirements of the university, the MS in Software Engineering requires a minimum of 30 graduate credits. The coursework is divided into three categories: a breadth requirement of 12 credits of core courses, a depth requirement of 9 credits of emphasis courses, and 9 credits of elective courses.

Advising
The department holds orientation meetings each January and August to advise incoming and continuing students. Members of the faculty are present to answer questions and offer advice concerning programs of study. Detailed information is available on the department web site.

The department also provides an advising function to students, as outlined in the student advising form available from the department. Each student is assigned a faculty advisor with whom to confer on matters related to degree requirements. A plan of study form for the MS degree should be completed and submitted by the student soon after admission; this plan serves as a guide for the student.

Software Engineering Related Courses

Students must take three courses from the following list: 9

Software Engineering
- Any SWE courses at the 600-level or above. (p. 2179)

Computer Science
- CS 540 Language Processors
- CS 550 Database Systems 1
- CS 555 Computer Communications and Networking
- CS 571 Operating Systems
- CS 675 Distributed Systems 2

Information Security and Assurance
- ISA 562 Information Security Theory and Practice
- ISA 650 Security Policy
- ISA 673 Operating Systems Security

Information Systems
- INFS 740 Database Programming for the World Wide Web

Operations Research
- OR 542 Operations Research: Stochastic Models

Total Credits 9

1 Credit will not be given for both INFS 614 and CS 550.
2 Credit will not be given for both SWE 622 and CS 675.

Electives
Students may select the remaining courses from the following list. Students may select courses not on this list with approval from the faculty advisor. Students, with the consent of a faculty sponsor and faculty advisor, may also complete a 6-credit thesis, which is primarily intended for students considering pursuing a PhD.

All Information Security and Assurance (ISA) courses at the 600-level or above. (p. 1843)
All Information Systems (INFS) courses at the 600-level or above. (p. 1847)
Any of the following Electrical and Computer Engineering courses:
- ECE 542 Computer Network Architectures and Protocols
- ECE 612 Real-Time Embedded Systems
Any of the following Operations Research courses:
- OR 531 Analytics and Decision Analysis
- OR 541 Operations Research: Deterministic Models
- OR 542 Operations Research: Stochastic Models
Any of the following Statistics courses:
- STAT 544 Applied Probability
- STAT 554 Applied Statistics I
Any of the following Systems Engineering courses:
- SYST 560 Introduction to Air Traffic Control
- SYST 659 Topics in Systems Engineering
- SYST 680 Principles of Command, Control, Communications, Computing, and Intelligence (C4I)
Any of the following Psychology courses:
- PSYC 530 Cognitive Engineering: Cognitive Science Applied to Human Factors
- PSYC 734 Seminar in Human Factors and Applied Cognition

Accelerated Option Requirements
Students must complete all credits that satisfy requirements for the BS and MS programs, with 6 credits overlap.

Students register for two 500-level computer science core courses (6 credits) in place of the corresponding 400-level computer science courses, as part of the undergraduate degree requirements. Specifically, students must take:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>

<td></td>
</tr>
</tbody>
</table>

Total Credits: 6

Note:
Students complete all Software Engineering, MS (p. 1081) core courses and apply the two courses from the above list toward the elective requirements.

Degree Conferral
Students must apply the semester before they expect to complete the BS requirements to have the BS degree conferred. In addition, at the beginning of the student’s final undergraduate semester, students must complete a Bachelor’s/Accelerated Master’s Transition form that is submitted to the Office of the University Registrar and the VSE Graduate Admissions Office. At the completion of MS requirements, a master’s degree is conferred.

Computer Science, BS/Software Engineering, Accelerated MS

Overview
Highly-qualified students in the Computer Science, BS (p. 1057) have the option of obtaining an accelerated Software Engineering, MS (p. 1081). For more detailed information, see AP.6.7 Bachelor’s/Accelerated Master’s Degrees (p. 93). For policies governing all graduate degrees, see AP.6 Graduate Policies (p. 90).

Admission Requirements
Students in the Computer Science, BS (p. 1057) program may apply to this option if they have earned 90 undergraduate credits with an overall GPA of at least 3.30. Students must have successfully completed:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>CS 310</td>
<td>Data Structures</td>
<td>3</td>
</tr>
<tr>
<td>CS 330</td>
<td>Formal Methods and Models</td>
<td>3</td>
</tr>
<tr>
<td>CS 367</td>
<td>Computer Systems and Programming</td>
<td>4</td>
</tr>
</tbody>
</table>

Total Credits: 10

Accelerated Option Requirements
Students must complete all requirements for the BS and MS programs, with 6 credits overlap. Students register for 6 credits of CS 500-level basic courses in place of the corresponding CS 400-level courses required for the undergraduate degree requirements. Specifically, students must...
register for two of the following courses in place of the corresponding 400-level courses:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>CS 540</td>
<td>Language Processors</td>
<td>3</td>
</tr>
<tr>
<td>CS 550</td>
<td>Database Systems</td>
<td>3</td>
</tr>
<tr>
<td>CS 551</td>
<td>Computer Graphics</td>
<td>3</td>
</tr>
<tr>
<td>CS 555</td>
<td>Computer Communications and Networking</td>
<td>3</td>
</tr>
<tr>
<td>CS 571</td>
<td>Operating Systems</td>
<td>3</td>
</tr>
<tr>
<td>CS 580</td>
<td>Introduction to Artificial Intelligence</td>

</tr>
<tr>
<td>CS 583</td>
<td>Analysis of Algorithms</td>
<td>3</td>
</tr>
<tr>
<td>CS 584</td>
<td>Theory and Applications of Data Mining</td>
<td>3</td>
</tr>
</tbody>
</table>

Note:
Students complete all MS in Software Engineering (p. 1081) core courses and apply the two courses from the above list toward the elective requirements.

**Degree Conferral**
Students must apply the semester before they expect to complete the BS requirements to have the BS degree conferred. In addition, at the beginning of the student’s final undergraduate semester, students must complete a Bachelor’s/Accelerated Master’s Transition form that is submitted to the Office of the University Registrar and the VSE Graduate Admissions Office. At the completion of MS requirements, a master’s degree is conferred.

**Information Technology, BS/Software Engineering, Accelerated MS**

**Overview**
Highly-qualified students in the Information Technology, BS (p. 1122) have the option of obtaining an accelerated Software Engineering, MS (p. 1081).

For more detailed information, see AP 6.7 Bachelor’s/Accelerated Master’s Degrees (p. 93). For policies governing all graduate degrees, see AP 6 Graduate Policies (p. 90).

**Admission Requirements**
Students in the Information Technology, BS (p. 1122) program may apply to this option if they have earned 90 undergraduate credits with an overall GPA of at least 3.30. Criteria for admission are identical to criteria for admission to the Software Engineering, MS (p. 1081) Program.

**Accelerated Option Requirements**
Students must complete all credits that satisfy requirements for the BS and MS programs, with 6 credits overlapping with the following two courses:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>INFS 501</td>
<td>Discrete and Logical Structures for Information Systems</td>
<td>3</td>
</tr>
<tr>
<td>SWE 510</td>
<td>Object-Oriented Programming in Java</td>

</tr>
<tr>
<td>INFS 515</td>
<td>Computer Organization Course and Operating Systems</td>
<td>3</td>
</tr>
<tr>
<td>INFS 519</td>
<td>Program Design and Data Structures</td>
<td>3</td>
</tr>
</tbody>
</table>

Note:
Students must complete MATH 125 Discrete Mathematics I (Mason Core) (p. 142) as their discrete math requirement and IT 306 Data Structures and Algorithms in Java as part of their concentration requirements in the BS program.

**Software Engineering Graduate Certificate**

**Banner Code:** VS-CERG-SWE

**Academic Advising**
Phone: 703-993-1530
Email: csgrad@gmu.edu
Website: cs.gmu.edu/prospective-students/ms-programs/graduate-certificates/

This graduate certificate program provides knowledge, tools, and techniques to those who are working in or planning to work in software engineering but do not want to complete requirements for a master’s degree in the field. The certificate may be pursued concurrently with any of the graduate degree programs in the Volgenau School.

The graduate certificate may be pursued on a part-time or full-time basis.

**Admissions & Policies**

**Admissions**

**General Concentration**
Applicants must hold a baccalaureate degree from an accredited institution and have earned a GPA of 3.00 or higher in the last 60 credits. In addition, applicants must complete a self-assessment form, which can be obtained from the Computer Science Department. This form provides summary information concerning background and preparation for the program.

Applicants must possess knowledge equivalent to the following undergraduate courses: structured programming in a modern programming language, data structures, discrete mathematics, and machine organization. The level of knowledge may also be achieved by taking the following foundation courses at Mason:
In addition, it is desirable, but not necessary, for applicants to have at least one year of appropriate work experience in building or modifying software systems.

Applicants must submit a one- to two-page statement of educational and work experience in the computing field that includes a statement of career goals in software engineering. Students not enrolled in a graduate degree program at Mason should apply for the certificate program through the Office of Graduate Admission. Students already enrolled in a Mason graduate degree program should apply to the department for admission into the certificate program. Admission into the certificate program does not guarantee acceptance into any MS program.

**Web-Based Software Engineering Concentration**

Applicants must hold a baccalaureate degree from an accredited institution and have earned a GPA of 3.00 or better in the last 60 credits. Applicants must complete a self-assessment form, which can be obtained from the department or the department web site. The form provides information concerning background and preparation for the program.

Applicants must possess knowledge equivalent to that provided by the following courses:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>INFS 501</td>
<td>Discrete and Logical Structures for Information Systems</td>
<td>3</td>
</tr>
<tr>
<td>SWE 510</td>
<td>Object-Oriented Programming in Java</td>
<td>3</td>
</tr>
<tr>
<td>INFS 515</td>
<td>Computer Organization Course and Operating Systems</td>
<td>3</td>
</tr>
<tr>
<td>INFS 519</td>
<td>Program Design and Data Structures</td>
<td>3</td>
</tr>
</tbody>
</table>

Students not enrolled in a graduate degree program at Mason should apply for the certificate program through the Office of Graduate Admission. Students already enrolled in a Mason graduate degree program should apply to the department for admission into the certificate program. Admission into the certificate program does not guarantee admission to any MS program.

**Policies**

Students must complete four courses with an average grade of B or higher for a total of 12 credits of graduate study.

**Certificate Requirements**

Total credits: 12

This certificate may be pursued on a full- or part-time basis.

**Requirements**

Students must complete all requirements within a concentration.

**Concentration in General (GEN)**

Select three courses from the following:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>SWE 619</td>
<td>Object-Oriented Software Specification and Construction</td>
<td>3</td>

Department of Electrical and Computer Engineering

Phone: 703-993-1569
Email: ece@gmu.edu
Website: ece.gmu.edu

Undergraduate Programs
The undergraduate education mission of the ECE Department is to provide a quality education for electrical engineering and computer engineering students to support the needs of Virginia and the nation.

Program Educational Objectives for the BS ELEN and BS CPE
Graduates of the Electrical Engineering and the Computer Engineering programs are expected within three to five years of graduation to have:

- Established themselves as successful and productive engineering professionals or engaged in advanced study such as a graduate degree program.
- Worked effectively in team environments and individually.
- Fulfilled their responsibilities in the areas of ethics, continuing professional development, and effective communications.

Graduate Programs
Graduate programs leading to MS and PhD degrees prepare students for careers in industry, government, and academia. Graduate certificate programs provide well-defined targets for students who want to advance or update their knowledge in selected areas. The ECE Department offers the PhD in Electrical and Computer Engineering and master's degrees in computer engineering, electrical engineering, telecommunications, and digital forensics and cyber analysis, and certificates in communications, forensics, networking, and signal processing.

The ECE Department is committed to high standards of teaching and research excellence in communications, computer networks, bioengineering, digital systems design, microprocessor and embedded systems, distributed computing, high performance computing, signal and image processing, control systems, robotics, intelligent systems, systems integration, space-based systems, and nanoelectronics. Graduate students are offered a progressive environment with ample opportunities for the type of advanced research needed to confront the complex realities of the 21st century.

Courses in the department's graduate programs are offered during the evening or late afternoon hours to accommodate students who are employed full time. For those who enter a program on a full-time basis, some financial aid may be available in various forms, such as teaching assistantships or research assistantships.

Faculty

Professors
Ephraim, Gaj, Hayes (Chair), Ioannou, Jabbari, Levis, Li, Manitius, Mark, Mulpuri, Tian

Associate professors
Berry, Homayoun, Huang, Jones, Kaps, Kurtay (Associate Chair), Lorie, Nelson, Osgood, Pachowicz, Paris, Peixoto, Sasan, Wage, Zeng

Assistant professors
Chen, Lofaro, Nowzari, Pandula, Zhang

Research professors
Elder, Katona

Adjunct professors
Abgariah, Allen, Beatty, Bisson, Boci, Cohen, Cotae, Deavers, Douglas, Emdadi, Fowler, Gibson, Greenhill, Hassan, Hosford, Hrnjej, Hyde, Irvine, Kaur, Khan, Larkin, Lin, Maiden, Mangra, McFadden, Mehrrota, Narenji, Rothwell, Sabzevari, Sachdev, Schaefer, Sheppard, Steele, Shy, Talman, Tran, Williams, Wu, Yun

Emeritus faculty
Allnutt, Baraniecki, Beale, Black, Ceperley, Chang, Cook, Gertler, Griffiths (Dean Emeritus), Schaefer, Sutton, Tabak, Van Trees

Programs
- Advanced Networking Protocols for Telecommunications Graduate Certificate
- Computer Engineering, BS
- Computer Engineering, MS
- Digital Forensics and Cyber Analysis, MS (title pending SCHEV approval)
- Electrical Engineering, BS
- Electrical Engineering, MS
- Electrical and Computer Engineering, PhD
- Signal Processing Graduate Certificate
- Small Satellite Engineering Graduate Certificate
- Systems Engineering Graduate Certificate (ECE)
- Telecommunications Forensics and Security Graduate Certificate
- Telecommunications, MS
- Wireless Communications Graduate Certificate

Advanced Networking Protocols for Telecommunications Graduate Certificate
Banner Code: VS-CERG-ANPT
Academic Advising
MSN 2B5
This graduate certificate provides an in-depth understanding of advanced protocols used in a variety of telecommunications networks.

The graduate certificate may be pursued on a part-time or full-time basis.

### Requirements

#### Certificate Requirements

Total credits: 15

This certificate may be pursued on a full- or part-time basis.

**Core Courses**

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>

<tr>
<td>TCOM 662</td>
<td>Advanced Secure Networking</td>
<td></td>
</tr>
</tbody>
</table>

**Total Credits**

6

1 May not be taken twice for credit. If a student takes TCOM 515 Interior Protocol Routing: Lecture and Laboratory Course and TCOM 535 The TCP/IP Suite of Internet Protocols in the core element, the course(s) may not be taken again in the elective element.

### Computer Engineering, BS

**Banner Code:** VS-BS-CPE

**Academic Advising**

MSN 1G5  
4400 University Drive  
Fairfax, VA 22030  
Phone: 703-993-1569  
Email: ece@gmu.edu

Website: https://ece.gmu.edu/undergraduate-studies/bachelors-programs/bs-computer-engineering

The field of computer engineering can be described as an amalgam of hardware and software design. Computer engineers are involved in research, design, development, production, and operation of a wide variety of digital systems, from integrated circuits through microcontrollers, multi-core processors, FPGA-based accelerators, to bigdata and cloud computing platforms. Reflecting the industry trend to integrate hardware and software development, the computer engineering program is built around computer-aided design tools that can simulate and assist in the design of new digital systems, such as those found in smartphones, tablets, robots, autonomous vehicles, drones, spacecraft, computer networks, smart factories, defense systems, and the internet-of-things. Advanced languages, such as VHDL and Python, and software tools, such as those used for FPGA- and ASIC-design and simulation, can be used to model hardware and software functionality from the system and architecture level down to the gate and transistor levels. Design, optimization, verification, and testing methodology involving these tools are taught in the program.

The Department of Electrical and Computer Engineering is staffed by 33 full-time professors and several part-time professors.

The bachelor’s program in Computer Engineering is accredited by the Engineering Accreditation Commission of ABET, http://www.abet.org.

### Career Opportunities

Career opportunities exist in engineering design and development such as hardware/software co-design and integration, embedded system programming, mobile system and application development, robot and drone design, and cloud and big data computing. Other opportunities include engineering management, consultancy, technical sales, and patent law. The program provides a strong preparation for graduate study.

### Specializations

The curriculum provides a strong background in the fundamentals of computer engineering. A number of technical elective specializations are offered, ranging from primarily hardware-oriented to those that are more software-oriented. These include robotics and embedded systems, computer networks, Internet of Things, and Hardware and System Security. The curriculum includes 9 credits of senior technical electives, and 3 credits of senior advanced design project, which may be used for specialization in one of these technical areas.

### Additional Information

The requirements for the degree may be satisfied on a full-time or part-time basis. Cooperative education provides students the opportunity to integrate paid career-related work experience with classroom learning. Academic credit towards the completion of major requirements cannot be given for co-op experience. In addition to the usual financial aid available through the Office of Student Financial Aid, computer engineering majors are encouraged to apply for scholarships provided by various professional societies and industrial organizations in their field.
Admissions & Policies

Policies
For policies governing all undergraduate degrees, see AP:5 Undergraduate Policies (p. 87).

Writing-Intensive Requirement
Mason’s writing-intensive requirement is satisfied by the following two courses: ECE 333 Linear Electronics I and ECE 491 Engineering Seminar in which faculty provide writing instruction and feedback on student technical writing assignments. Drafts and revisions are required.

Change of Major
See Change of Major (p. 1013) for more information.

Double Major and Minor Programs for Computer Engineering and Electrical Engineering
Computer Engineering majors and Electrical Engineering majors can earn degrees with double majors in a number of disciplines. Computer Engineering and Computer Science are frequently combined. Electrical Engineering has been combined with Computer Engineering, Mechanical Engineering, Computer Science, Physics, or Math. Details are available in the department brochures or at the Volgenau School website (http://volgenau.gmu.edu). There are several minors available for students in the ECE Department including the Mechanical Engineering minor (p. 1139), Bioengineering minor and others as listed in the catalog.

Grade Requirements
All computer engineering students are strongly encouraged to see their major faculty advisor each semester before course registration.

Students must complete each ECE, ENGR, BENG, CS, MATH, PHYS and STAT course presented as part of the required 126 credits for the degree with a grade of C or better.

Students must also complete any course required by the program that is a prerequisite to another course applicable to the degree with a grade of C or better.

Termination from the Major
No math, science, or Volgenau School of Engineering course that is required for the major may be attempted more than three times. Those students who do not successfully complete such a course within three attempts will be terminated from the major. Undeclared students in the Volgenau School who do not successfully complete a course required for a Volgenau School major within three attempts will also be terminated.

In addition, students in the Volgenau School with evidence of continued failure to make adequate progress toward declaring or completing a Volgenau School major will also be terminated. Adequate progress is determined by the major program. For more information, see AP:5.2.4 Termination from the Major (https://catalog.gmu.edu/policies/academic/undergraduate-policies/#ap-5-2-4).

Once a student has attempted one of these courses twice unsuccessfully, the third attempt must be no later than the next semester of enrollment, excluding summers. Failure to take the course at that time will result in termination from the major. A third attempt of a Volgenau School of Engineering course requires support by the student’s major department as well as permission by the department offering the course. This permission is not guaranteed. If the student is unable to take the course when required, the student may request an extension to a future semester; extensions require approval of the student’s advisor, their department, and the Associate Dean for Undergraduate Programs. The deadline for extension requests is the add deadline for the semester in which the course is required.

Students who have been terminated from a Volgenau School of Engineering major may not register for a Volgenau School course without permission of the department offering the course. This applies to all undergraduate courses offered by the Volgenau School except IT 104 Introduction to Computing (Mason Core) (p. 142) and STAT 250 Introductory Statistics I (Mason Core) (p. 142).

A student may not declare any major in the Volgenau School of Engineering if the student has previously met the termination criteria for that major at any time, regardless of what the student’s major was at the time the courses were taken.

### Concentrations

Concentrations are available in the computer engineering baccalaureate program. Completion of specific courses leads to one of these designations on the student’s transcript on graduation. Concentration requirements may also meet some or all of the Technical Elective requirements.

**Available Concentrations:**
- Computer Networks (CNWK) (p. 1089)
- Embedded Systems (EMSY) (p. 1090)
- Hardware and System Security (HSYS) (p. 1090)
- Internet of Things (INOT) (p. 1090)
- Robotics (ROB) (p. 1090)

Total Credits: 9

### Additional Mason Core

Students must complete all Mason Core (p. 142) requirements not fulfilled by major requirements. Mason Core courses should be selected from the department’s list of approved courses. The Synthesis Mason Core requirement is satisfied by ECE 492 Senior Advanced Design Project I (Mason Core) (p. 142) plus ECE 493 RS: Senior Advanced Design Project II (Mason Core) (p. 142). All students must submit at least 24 credits of social science and humanities coursework, which is normally satisfied by the 24 credits of Mason Core social science and humanities courses listed here and in previous sections.

1. Lower-level.

### Accelerated Master’s

#### BS (selected)/Operations Research, Accelerated MS

**Overview**

Highly-qualified students in BS programs have the option of obtaining an accelerated Operations Research, MS (p. 1153).

For more detailed information, see AP.6.7 Bachelor’s/Accelerated Master’s Degrees (p. 93). For policies governing all graduate degrees, see AP.6 Graduate Policies (p. 90).

**Admission Requirements**

Mason undergraduate students majoring in both engineering and non-engineering disciplines may apply to this option if 1) such an accelerated Operations Research, MS (p. 1153) pathway is allowable from the student’s BS program, which will be determined by the academic advisors of both the BS and MS programs and by the SEOR department chair, 2) they have earned 90 undergraduate credits with an overall GPA of at least 3.30, and 3) they have completed all MATH and PHYS requirements. Criteria for admission are identical to criteria for admission to the Operations Research, MS (p. 1153) program.
Students must additionally complete MATH 203 prior to applying for the graduate program.

**Accelerated Option Requirements**

Students must complete all credits that satisfy requirements for both the BS and MS programs. Up to two courses (6 credits) of approved master's level courses taken as part of the undergraduate degree may be applied to the graduate degree. The courses selected for this purpose must be approved by the academic advisors of both the BS and MS programs and by the SEOR department chair.

For the BS programs that allow undergraduate electives from the department of systems engineering and operations research, the students may choose the graduate version of such elective courses to replace the corresponding undergraduate courses.

**Degree Conferral**

Students must apply the semester before they expect to complete the BS requirements to have the BS degree conferred. In addition, at the beginning of the student's final undergraduate semester, students must complete a Bachelor's/Accelerated Master's Transition form that is submitted to the Office of the University Registrar and the VSE Graduate Admissions Office. At the completion of MS requirements, a master's degree is conferred.

**BS (selected)/Statistical Science, Accelerated MS**

**Overview**

Highly-qualified students in BS programs have the option of applying to the accelerated Statistical Science, MS (p. 1141) program.

For more detailed information, see AP.6 Bachelor's/Accelerated Master's Degrees (p. 93). For policies governing all graduate degrees, see AP6 Graduate Policies (p. 90).

**Admission Requirements**

No specific undergraduate BS degree is required. Students enrolled in any BS degree may apply to the accelerated Statistical Science, MS (p. 1141) program if such an accelerated Statistical Science, MS pathway is allowable from the student's BS program, which will be determined by the academic advisors of both the BS and MS programs; and if they have earned 90 undergraduate credits with an overall GPA of 3.00. Students must have successfully completed the following Mason courses each with a grade of C or better prior to admission to the accelerated program:

- **MATH 213** Analytic Geometry and Calculus III 3
- **MATH 203** Linear Algebra 3
  - or **MATH 321** Abstract Algebra 3
- **STAT 250** Introductory Statistics I (Mason Core) (p. 142) 3
  - or **STAT 344** Probability and Statistics for Engineers and Scientists I
- **STAT 346** Probability for Engineers 3
  - or **MATH 351** Probability 3
- **STAT 362** Introduction to Computer Statistical Packages 3

**Accelerated Option Requirements**

Students must complete all credits satisfying degree requirements for the BS and MS programs, with 6 credits overlap chosen from the following courses: STAT 515 Applied Statistics and Visualization for Analytics, STAT 544 Applied Probability, STAT 554 Applied Statistics I, STAT 560 Biostatistical Methods, and STAT 574 Survey Sampling I. (Credit may not be received for both STAT 474 and STAT 574; nor for both STAT 460 and STAT 560.) The graduate courses selected for overlap must be approved by the academic advisors of both the BS and MS programs. All graduate course prerequisites must be completed prior to enrollment. Each graduate course must be completed with a grade of B or better to apply toward the MS degree.

While still in undergraduate status, a maximum of 6 additional graduate credits may be taken as reserve graduate credit and applied to the master's program. Reserve graduate credits do not apply to the undergraduate degree.

**Degree Conferral**

Students must apply the semester before they expect to complete the BS requirements to have the BS degree conferred. In addition, at the beginning of the student's final undergraduate semester, students must complete a Bachelor's/Accelerated Master's Transition form that is submitted to the Office of the University Registrar and the VSE Graduate Recruitment and Enrollment Services. At the completion of MS requirements, a master's degree is conferred.

**BS (selected)/Systems Engineering, Accelerated MS**

**Overview**

Highly-qualified students in BS programs have the option of obtaining an accelerated Systems Engineering, MS (p. 1170).

For more detailed information, see AP.6.7 Bachelor's/Accelerated Master's Degrees (p. 93). For policies governing all graduate degrees, see AP6 Graduate Policies (p. 90).

**Admission Requirements**

Mason undergraduate students majoring in both engineering and non-engineering disciplines may apply to this option if 1) such an accelerated Systems Engineering, MS (p. 1170) pathway is allowable from the student's BS program, which will be determined by the academic advisors of both the BS and MS programs and by the SEOR department chair, 2) they have earned 90 undergraduate credits with an overall GPA of at least 3.30, and 3) they have completed all MATH and PHYS requirements. Criteria for admission are identical to criteria for admission to the Systems Engineering, MS (p. 1170) program.

**Accelerated Option Requirements**

Students must complete all credits that satisfy requirements for both the BS and MS programs. Up to two courses (6 credits) of approved master's level courses taken as part of the undergraduate degree may be applied to the graduate degree. The courses selected for this purpose must be approved by the academic advisors of both the BS and MS programs and by the SEOR department chair.

For the BS programs that allow undergraduate electives from the department of systems engineering and operations research, the students may choose the graduate version of such elective courses to replace the corresponding undergraduate courses.
Degree Conferral
Students must apply the semester before they expect to complete the BS requirements to have the BS degree conferred. In addition, at the beginning of the student’s final undergraduate semester, students must complete a Bachelor’s/Accelerated Master’s Transition form that is submitted to the Office of the University Registrar and the VSE Graduate Admissions Office. At the completion of MS requirements, a master’s degree is conferred.

Computer Engineering, BS/Computer Engineering, Accelerated MS
Overview
The university offers highly-qualified students in the Computer Engineering, BS (p. 1087) the option of obtaining an accelerated Computer Engineering, MS (p. 1092).

For more detailed information, see AP.6.7 Bachelor’s/Accelerated Master’s Degrees (p. 93). For policies governing all graduate degrees, see AP6 Graduate Policies (p. 90).

Admission Requirements
Students in the Computer Engineering, BS (p. 1087) program may apply to this option if they have earned 90 undergraduate credits with an overall GPA of 3.25. Criteria for admission are identical to criteria for admission to the Computer Engineering, MS (p. 1092) program.

Accelerated Option Requirements
Students must complete all credits that satisfy the requirements for the BS and MS programs, with 6 credits overlap.

Students take 6 credits of 500-level courses as part of their technical electives or substitutes for required courses as part of their 126-credit undergraduate program. The specific courses that may be taken and applied to the accelerated program will be specified by the ECE Department.

Students admitted to the accelerated program must maintain an overall GPA of at least 3.25 during the entire BS/MS program and present a GPA of at least 3.25 for the 24 credits of graduate work submitted for the MS degree.

Students may take additional graduate-level courses as part of their BS technical electives with advisor approval. These additional graduate-level courses will not count toward the MS degree.

Degree Conferral
Students must apply the semester before they expect to complete the BS requirements to have the BS degree conferred. In addition, at the beginning of the student’s final undergraduate semester, students must complete a Bachelor’s/Accelerated Master’s Transition form that is submitted to the Office of the University Registrar and the VSE Graduate Admissions Office. At the completion of MS requirements, a master’s degree is conferred.

Computer Engineering, MS
Banner Code: VS-MS-CPE

Admissions & Policies
Admissions
Categories of Admission
Students may be admitted into one of the following categories: degree, provisional, or nondegree. Provisional admission is reserved for domestic students whose past performance provides reasonable, but not strong, evidence of ability to pursue graduate work. To advance to degree status, a provisional student must achieve a 3.00 GPA after 12 credits, remove all undergraduate deficiencies by completing the corresponding courses with grades of B or better, and receive a B or better in two core courses specific to the student’s selected program and specialization.

The nondegree category is used primarily by students who want to take courses but not necessarily pursue a degree. Nondegree students seeking to enter degree programs must formally apply for admission.

Requirements
To be considered for admission to the master’s program, applicants should have a baccalaureate degree in electrical engineering, computer engineering, or a closely-related discipline from an accredited program with a reputation for high academic standards, and have earned a GPA of B or better during the last 60 credits. Other requirements are as follows:

- Two letters of recommendation, preferably from academic references or references in industry or government who hold advanced degrees and are familiar with the applicant’s professional accomplishments
- Resume and detailed statement of career goals and aspirations
• For students who have not earned a bachelor's degree from a U.S. university, satisfactory performance on the GRE
• For applicants who have not earned an academic degree in an English-speaking country (as defined here (p. 71)), a satisfactory score on any of the English proficiency examinations accepted by Mason, namely, TOEFL, IELTS, or PTE. Satisfactory scores are specific to Volgenau School of Engineering and are listed here (https://catalog.gmu.edu/admissions/international-students/#text).

Non-ECE Students
Students with BS or MS degrees in ECE-related disciplines (for example, computer science, mathematics, mechanical engineering, physics, or electrical engineering technology) are encouraged to apply for admission. They may initially be admitted into the provisional category and advance to degree status by satisfying requirements described in the Admissions Categories section. Such students may also be advised to take some courses from the undergraduate electrical or computer engineering curriculum, according to their intended specialization and specific backgrounds.

Policies

Student Advising
Newly-admitted graduate students must consult with the ECE graduate coordinator before they register for classes. Students should make an appointment by calling the ECE office. Students are expected to select a specialization from those available in each MS degree program. Students then are assigned an academic advisor from that specialization.

GPA Requirements
A maximum of 6 credits of courses with grades of C or B- may be applied toward the degree. The student must present a GPA of at least 3.00 for all courses submitted for the degree.

Program Requirements
Students must complete a minimum of 30 graduate credits beyond the bachelor’s degree. This work must represent a cohesive set of courses leading to comprehensive knowledge in one specialized area of computer engineering; it cannot be a set of disjointed courses.

Plan of Study
Before completing 6 credit hours of coursework, each student must submit to the department a plan of study that has been approved by the academic advisor. This plan should be kept up to date by regular consultation with the academic advisor. A final, signed version of the plan must be turned in when the student submits a graduation application.

</tr>
</tbody>
</table>

Total Credits  9

1 Not including ECE 798 Research Project or ECE 799 Master's Thesis
2 Requires a grade of B or better in each.

Electives
Electives should be chosen either from the list of pre-approved electives strongly suggested for a given specialization area or from the list of elective courses common for all specialization areas. Elective courses from the latter list must be approved by the student’s advisor prior to the registration for a given course.

The plan of study usually has no fewer than 15 credits of courses designated ECE.

Lists of courses appropriate for specialization areas, such as digital systems design, microprocessor and embedded systems, digital signal processing, computer networks, and network and system security, are available on the ECE website. A self-defined specialization must include components of hardware and software development and the corresponding plan of study should comprise courses from ECE and the Computer Science Departments.

Seminar Requirement
Graduate students are expected to participate actively in the exchange of knowledge and ideas in their discipline. Towards this objective, all degree candidates must attend a minimum of 6 graduate seminars approved for the degree program. Approved seminars are publicized on the departmental webpage.

To demonstrate completion of the seminar requirement, students must register for ECE 795 Engineering Seminar in their final semester. The department office will verify that the seminar requirement has been met and submit a grade of S (satisfactory) upon completion of the requirement. Students who have not met the seminar requirement in their final semester must continue to register for ECE 795 Engineering Seminar in subsequent semesters until the requirement is met.

Thesis/Scholarly Paper Option
To complete the program, students may select one of the following options:

Thesis Option
Students who select this option must complete:
The thesis is particularly recommended for those students who wish to develop and document their research skills or contemplate subsequent enrollment in a PhD program. The thesis involves a research effort, which is conducted under the guidance of a faculty advisor. In some cases, permission may be granted to complete a portion of the work at the student’s place of employment. The final written thesis and oral defense are approved by the student’s advisory committee.

For the Electrical Engineering program (p. 1103), this committee consists of at least three full-time faculty members, including two from the student’s major specialization, and one from outside the specialization. For the Computer Engineering Program (p. 1092), this committee consists of at least three full-time faculty members, including two affiliated with the MS in Computer Engineering (p. 1092) Program, one of whom must be from the ECE Department. This thesis students may not register for ECE 798 Research Project. Students must register for at least 3 credits of thesis for their first thesis semester. Following their first thesis semester, they must register for at least 1 credit of thesis each fall and spring semester until graduation.

**Scholarly Paper Option**

Students who select to complete their degree program with a scholarly paper must:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>ECE 797</td>
<td>Scholarly Paper</td>
<td></td>
</tr>
<tr>
<td>Complete</td>
<td>30 credits of coursework</td>
<td></td>
</tr>
<tr>
<td>Enroll in</td>
<td>0 credits</td>
<td></td>
</tr>
<tr>
<td>Write a</td>
<td>30 credits of coursework</td>
<td></td>
</tr>
</tbody>
</table>

An acceptable scholarly paper must be technically sound, adhere to accepted formatting standards for technical reports, and contain a significant literature review evidenced by a comprehensive list of cited references.

A list of courses requiring projects that can be used to satisfy the scholarly paper requirement will be published on the department website. Scholarly papers must be individual written project reports — not group projects. To qualify as a scholarly paper an oral presentation of the project is required. A passing grade for the project, reflecting both the written report and the oral presentation, satisfies the scholarly paper requirement.

A successful scholarly paper will be recorded by awarding a satisfactory (S) grade for ECE 797 Scholarly Paper. Students are eligible to attempt the scholarly paper and register for ECE 797 Scholarly Paper after completion of 18 hours of coursework. Students choosing the scholarly paper option are not eligible for graduation until they have received a final, passing grade for ECE 797 Scholarly Paper.

---

**Accelerated Master’s**

**Computer Engineering, BS/Computer Engineering, Accelerated MS**

**Overview**

The university offers highly-qualified students in the Computer Engineering, BS (p. 1087) the option of obtaining an accelerated Computer Engineering, MS (p. 1092).

For more detailed information, see AP6.7 Bachelor’s/Accelerated Master’s Degrees (p. 93). For policies governing all graduate degrees, see AP6 Graduate Policies (p. 90).

**Admission Requirements**

Students in the Computer Engineering, BS (p. 1087) program may apply to this option if they have earned 90 undergraduate credits with an overall GPA of 3.25. Criteria for admission are identical to criteria for admission to the Computer Engineering, MS (p. 1092) program.

**Accelerated Option Requirements**

Students must complete all credits that satisfy the requirements for the BS and MS programs, with 6 credits overlap.

Students take 6 credits of 500-level courses as part of their technical electives or substitutes for required courses as part of their 126-credit undergraduate program. The specific courses that may be taken and applied to the accelerated program will be specified by the ECE Department.

Students admitted to the accelerated program must maintain an overall GPA of at least 3.25 during the entire BS/MS program and present a GPA of at least 3.25 for the 24 credits of graduate work submitted for the MS degree.

Students may take additional graduate-level courses as part of their BS technical electives with advisor approval. These additional graduate-level courses will not count toward the MS degree.

**Degree Conferral**

Students must apply the semester before they expect to complete the BS requirements to have the BS degree conferred. In addition, at the beginning of the student’s final undergraduate semester, students must complete a Bachelor’s/Accelerated Master’s Transition form that is submitted to the Office of the University Registrar and the VSE Graduate Admissions Office. At the completion of MS requirements, a master’s degree is conferred.

**Cyber Security Engineering, BS/Computer Engineering, Accelerated MS**

**Overview**

The university offers highly-qualified students in the Cyber Security Engineering, BS (p. 1016) the option of obtaining an accelerated Computer Engineering, MS (p. 1092).

For more detailed information, see AP6.7 Bachelor’s/Accelerated Master’s Degrees (https://catalog.gmu.edu/policies/academic/graduate-policies/#ap-6-7). For policies governing all graduate degrees, see AP6.
Graduate Policies (https://catalog.gmu.edu/policies/academic/graduate-policies).

Admission Requirements
Students in the Cyber Security Engineering, BS (p. 1016) program may apply for this option if they have earned 90 undergraduate credits with an overall GPA of at least 3.25. Criteria for admission are identical to criteria for admission to the Computer Engineering, MS (p. 1092) program.

Accelerated Option Requirements
Students must complete all credits that satisfy the requirements for the BS and MS programs, with 6 credits overlapping.

Students take 6 credits of 500-level ECE (p. 1611) or CS (p. 1468) courses as part of their technical electives or substitutes for required courses in the Cyber Security Engineering, BS (p. 1016) program.

Specifically, students are encouraged to take two of the following courses:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>CS 571</td>
<td>Operating Systems</td>
<td>3</td>

<tr>
<td>ECE 511</td>
<td>Computer Architecture</td>
<td>3</td>
</tr>
<tr>
<td>ECE 542</td>
<td>Computer Network Architectures and Protocols</td>
<td>3</td>
</tr>
</tbody>
</table>

Degree Conferral
Students must apply the semester before they expect to complete the BS requirements to have the BS degree conferred. In addition, at the beginning of the student’s final undergraduate semester, students must complete a Bachelor’s/Accelerated Master’s Transition form (https://registrar.gmu.edu/forms) that is submitted to the Office of the University Registrar and the VSE Graduate Admissions Office. At the completion of MS requirements, a master’s degree is conferred.

MSN 2B5
4400 University Dr
Fairfax, VA 22030

Phone: 703-993-3810
Email: cfrs@gmu.edu
Website: cfrs.gmu.edu

Note: As of catalog publication in April, the title for this program (formerly known as Computer Forensics, MS) has been approved by the Board of Visitors and sent to the State Council of Higher Education in Virginia.

Admissions & Policies

Admissions
Students who hold a bachelor’s degree from an accredited college or university in engineering, math, science, computer science, business (with a quantitative background), economics, or other analytical disciplines, or students who have equivalent work experience indicating analytical aptitude, may apply. Depending on their background, some applicants may be required to complete 3 to 12 credits of preliminary course work before they are allowed to enroll in any of the core or specialty courses in the program. A minimum undergraduate GPA of 3.00 is required for acceptance.

Requirements

(formerly VS-MS-CFRS)

Note: As of catalog publication in April, the title for this program (formerly known as Computer Forensics, MS) has been approved by the Board of Visitors and sent to the State Council of Higher Education in Virginia.

Degree Requirements

Total credits: 30

Students must complete a minimum of 30 graduate credits beyond the bachelor’s degree with a GPA of 3.00 or higher, with no more than 6 credit hours of C grades. The plan of study includes an 21-credit required core component which includes a mandatory capstone course, and the choice of either a concentration or a 9-credit elective component as shown below.

Digital forensics is a discipline addressing the collection, processing, and analysis of digital data for the purpose of verifying/validating the existence of an event of investigative, intelligence, cyber, or business interest. The data can be from physical media, a mobile device, real-time network traffic, the Internet of Things (IoT), unknown code, memory, and many other sources. Digital forensics is interdisciplinary by nature and our program includes computer engineering, computer science, information technology, law, and ethics. Digital forensics is a key component in criminal, corporate, civil, cyber defense, incident response, intelligence, and counter-terrorism matters. In the last several years, with a proliferation of digital storage, transmission, and processing of sensitive information, there has been an increase in the aberrant use of digital devices. This aberrant behavior includes but is not limited to: digital extortion, intrusions, economic espionage, child exploitation, cybercrime, fraud, terrorism, and identity theft. In response to this, digital forensics has become an important profession serving both public and private sectors. The MS in Digital Forensics/Cyber Analysis will prepare graduates for a wide variety of careers to include law enforcement, various other branches of government, incident response, and all facets of cyber security by combining academic education with real world practical techniques and by offering advanced training in analyzing digital evidence, intrusion forensics, reverse engineering, network analysis, and legal and ethical issues.
CORS 660 | Network Forensics | 3
CORS 661 | Digital Media Forensics | 3
CORS 663 | Operations of Intrusion Detection for Forensics | 3
or CORS 664 | Incident Response Forensics | 3
CORS 760 | Legal and Ethical Issues in IT 2 | 3
or CORS 770 | Fraud and Forensics in Accounting | 3
CORS 790 | Advanced Computer Forensics | 3

Total Credits | 21

1. It is required that CORS 500 Introduction to Forensic Technology and Analysis be taken for those with little to no experience in digital forensics.
2. Both CORS 760 Legal and Ethical Issues in IT and CORS 770 Fraud and Forensics in Accounting may be taken but only one may be used in the core component.

### MS with Concentration in Penetration Testing/Reverse Engineering (PTRE)

Focused on the practical aspects of penetration testing and reverse engineering. Students are expected to master tools, techniques, and methodologies of penetration testing and reverse engineering.

<table>
<thead>
<tr>

<td>3</td>
</tr>
</tbody>
</table>

Total Credits | 9

1. Both CORS 760 Legal and Ethical Issues in IT and CORS 770 Fraud and Forensics in Accounting may be taken, but only one may be used in the core component.

Other courses may be appropriate as electives in the degree program, but they must be approved prior to registration.

### Accelerated Master's

#### Cyber Security Engineering, BS/Digital Forensics and Cyber Analysis (title change pending SCHEV approval), Accelerated MS

**Overview**

Highly-qualified students in the Cyber Security Engineering, BS (p. 1016) have the option of obtaining an accelerated Digital Forensics and Cyber Analysis (p. 1095), MS (p. 1095).

For more detailed information, see AP.6.7 Bachelor's/Accelerated Master's Degrees (p. 93). For policies governing all graduate degrees, see AP.6 Graduate Policies (p. 90).

**Admission Requirements**

Students in the Cyber Security Engineering, BS (p. 1016) program may apply for this option if they have earned 90 undergraduate credits with an overall GPA of at least 3.25. Criteria for admission are identical to criteria for admission to the Digital Forensics and Cyber Analysis, MS (p. 1095) program.

**Accelerated Option Requirements**

Students must complete all credits that satisfy requirements for the BS and MS programs, with 6 credits overlapping.

Students register for two Digital Forensics and Cyber Analysis core courses (6 credits) in place of two of the three required technical
electives, as part of the undergraduate degree requirements. Specifically, students must take:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>CFRS 500</td>
<td>Introduction to Forensic Technology and Analysis</td>
<td>3</td>
</tr>
<tr>
<td></td>
<td>and one of the following:</td>
<td></td>
</tr>
<tr>
<td>CFRS 510</td>
<td>Digital Forensics Analysis (satisfies the IT 357 requirement for the INFS concentration in the BS program)</td>
<td>3</td>
</tr>
<tr>
<td>CFRS 660</td>
<td>Network Forensics (satisfies one NTEL concentration course in the BS program)</td>
<td></td>
</tr>
</tbody>
</table>

Total Credits: 6

Note: Students complete all Digital Forensics and Cyber Analysis, MS (p. 1095) core courses and apply the two courses from the above list toward the Digital Forensics and Cyber Analysis, MS (p. 1095) requirements.

**Degree Conferral**

Students must apply the semester before they expect to complete the BS requirements to have the BS degree conferred. In addition, at the beginning of the student’s final undergraduate semester, students must complete a Bachelor’s/Accelerated Master’s Transition form that is submitted to the Office of the University Registrar and the VSE Graduate Admissions Office. At the completion of MS requirements, a master’s degree is conferred.

**Information Technology, BS/Digital Forensics and Cyber Analysis (title change pending SCHEV approval), Accelerated MS**

**Overview**

Highly-qualified students in the Information Technology, BS (p. 1122) have the option of obtaining an accelerated Digital Forensics and Cyber Analysis, MS (p. 1095).

For more detailed information, see AP6.7 Bachelor’s/Accelerated Master’s Degrees (p. 93). For policies governing all graduate degrees, see AP6 Graduate Policies (p. 90).

**Admission Requirements**

Students in the Information Technology, BS (p. 1122) program may apply for this option if they have earned 90 undergraduate credits with an overall GPA of at least 3.25. Criteria for admission are identical to criteria for admission to the Digital Forensics and Cyber Analysis, MS (p. 1095) program.

**Accelerated Option Requirements**

Students must complete all credits that satisfy requirements for the BS and MS programs, with 6 credits overlapping with two of the following three courses:

<table>

Email: ece@gmu.edu
Website: https://ece.gmu.edu/undergraduate-studies/bachelors-programs/bs-electrical-engineering

Electrical engineering is a major field of modern technology. Electrical engineers are involved in research, development, design, production, and operation of a wide variety of devices and systems, including reliable, secure, and high-speed communication networks, autonomous vehicles, robots, multi-agent systems, nanoscale integrated circuits as well as sensors that are essential to the internet-of-things. Other technologies in electrical engineering include smartphones, tablets and other modern computing platforms, as well as wearable technology such as health-monitoring wristbands, biomedical systems such as prosthetic devices, and brain-machine interfaces.

The Department of Electrical and Computer Engineering is staffed by 33 full-time professors and several part-time professors.

The bachelor’s program in Electrical Engineering is accredited by the Engineering Accreditation Commission of ABET, http://www.abet.org.

**Career Opportunities**

Career opportunities exist in engineering research and development, system design, system integration, engineering management, engineering consultancy, technical sales, and patent law, among others. The program provides a strong preparation for graduate study.

**Specializations**

The curriculum provides a strong background in the fundamentals of electrical engineering and senior-level courses in the areas of electronics, networks, communications and signal processing, bioengineering, computer engineering, and controls and robotics. Further, the curriculum includes 9 credits of senior technical electives, 2 credits of advanced engineering labs, and 3 credits of senior advanced design project, which may be used for further specialization in one of these areas.

**Additional Information**

Degree requirements may be satisfied on a full-time or part-time basis. Cooperative education provides students with the opportunity to
integrate paid career-related work experience with classroom learning. Academic credit towards the completion of major requirements is not given for co-op experience. In addition to the usual financial aid available through the Office of Student Financial Aid, electrical engineering majors are encouraged to apply for scholarships provided by various professional societies and industrial organizations in their field.

Admissions & Policies

Policies

For policies governing all undergraduate degrees, see AP.5 Undergraduate Policies (p. 87).

Writing-Intensive Requirement

Mason's writing-intensive requirement is satisfied by the following two courses: ECE 333 Linear Electronics I and ECE 491 Engineering Seminar in which faculty provide writing instruction and feedback on student technical writing assignments. Drafts and revisions are required.

Change of Major

See Change of Major (p. 1013) for more information.

Double Major and Minor Programs for Electrical Engineering and Computer Engineering

Electrical Engineering majors and Computer Engineering majors can earn degrees with double majors in a number of disciplines. Computer Engineering and Computer Science are frequently combined. Electrical Engineering has been combined with Computer Engineering, Computer Science, Mechanical Engineering, Physics or Math. Details are available in the department brochures or at the Volgenau School website volgenau.gmu.edu. There are several minors available for students in the ECE Department including the Mechanical Engineering minor, Bioengineering minor, and others as listed in the catalog.

Grade Requirements

All electrical engineering students are strongly encouraged to see their major faculty advisor before course registration each semester.

Students must complete each ECE, ENGR, BENG, CS, MATH, PHYS, and STAT course presented as part of the required 121 credits for the degree with a grade of C or better.

Students must also complete any course required by the program that is a prerequisite to another course applicable to the degree with a grade of C or better.

Termination from the Major

No math, science, or Volgenau School of Engineering course that is required for the major may be attempted more than three times. Those students who do not successfully complete such a course within three attempts will be terminated from the major. Undeclared students in the Volgenau School who do not successfully complete a course required for a Volgenau School major within three attempts will also be terminated.

In addition, students in the Volgenau School with evidence of continued failure to make adequate progress toward declaring or completing a Volgenau School major will also be terminated. Adequate progress is determined by the major program. For more information, see AP.5.2.4 Termination from the Major (https://catalog.gmu.edu/policies/academic/undergraduate-policies/#ap-5-2-4).

Once a student has attempted one of these courses twice unsuccessfully, the third attempt must be no later than the next semester of enrollment, excluding summers. Failure to take the course at that time will result in termination from the major. A third attempt of a Volgenau School of Engineering course requires support by the student's major department as well as permission by the department offering the course. This permission is not guaranteed. If the student is unable to take the course when required, the student may request an extension to a future semester; extensions require approval of the student's advisor, their department, and the Associate Dean for Undergraduate Programs. The deadline for extension requests is the add deadline for the semester in which the course is required.

Students who have been terminated from a Volgenau School of Engineering major may not register for a Volgenau School course without permission of the department offering the course. This applies to all undergraduate courses offered by the Volgenau School except IT 104 Introduction to Computing (Mason Core) (p. 142) and STAT 250 Introductory Statistics I (Mason Core) (p. 142).

A student may not declare any major in the Volgenau School of Engineering if the student has previously met the termination criteria for that major at any time, regardless of what the student's major was at the time the courses were taken.

Students who would like to complete a more challenging senior design project have the option of enrolling in ECE 392 Engineering Design Studio to gain a semester head start in the design process.

**Technical Electives**

Three technical elective courses totaling 9 credit hours must be selected from the list below. Up to 3 credits of ECE 499 Special Topics in Electrical and Computer Engineering courses may be taken as technical electives. ECE 447 Single-Chip Microcomputers and ECE 448 FPGA and ASIC Design with VHDL, which are 4-credit courses with built-in labs, can be used to fulfill one technical elective and one advanced lab requirement. Some graduate courses and courses outside the ECE department may be taken to fulfill the technical elective requirement with the permission of the department. The decision to approve more than 3 credits of ECE 499 Special Topics in Electrical and Computer Engineering, non-ECE courses as well as graduate courses as technical electives is at the discretion of the department based on a review of the course content and the student's academic record.

COMM 100  | Public Speaking (Mason Core)  (p. 142)  | 3
COMM 101  | Fundamentals of Communication (Mason Core)  (p. 142)  | 3
ECON 103  | Contemporary Microeconomic Principles (Mason Core)  (p. 142)  | 3

Total Credits  9

**Additional Mason Core**

Students must complete all Mason Core (p. 142) requirements not fulfilled by major requirements. Mason Core courses should be selected from the department’s list of approved courses. The Synthesis Mason Core requirement is satisfied by ECE 492 Senior Advanced Design Project I (Mason Core)  (p. 142) and ECE 493 RS: Senior Advanced Design Project II (Mason Core)  (p. 142). All students must submit at least 24 credits of social science and humanities coursework, which is normally satisfied by the 24 credits of Mason Core social science and humanities courses listed here and in previous sections.

**Concentrations**

Concentrations are available in the electrical engineering baccalaureate program. Completion of specific science courses and senior-level courses leads to one of these designations on the student’s transcript on graduation. Concentration requirements may also meet some or all of the Advanced Engineering Lab and Technical Elective requirements.

**Available Concentrations**

- Concentration in Communications and Signal Processing (CSP)  (p. 1100)
- Concentration in Computer Engineering (CPE)  (p. 1100)
- Concentration in Control Systems (CON)  (p. 1101)
- Concentration in Electronics (ELE)  (p. 1101)

**Concentration in Communications and Signal Processing (CSP)**

**Code**  | **Title**  | **Credits**
---|---|---
ECE 220  | Continuous-Time Signals and Systems  | 3
ECE 460  | Communication and Information Theory  | 4
ECE 461  | Communication Engineering Laboratory  | 3
or ECE 467  | Network Implementation Laboratory  | 3

Select three from the following:  9

- ECE 410  Applications of Discrete-Time Signal Processing  
- CYSE 425  Secure RF Communications  
- ECE 462  Data and Computer Communications  
- ECE 463  Digital Communications Systems

Total Credits 13-15

Accelerated Master’s

BS (selected)/Operations Research, Accelerated MS

Overview
Highly-qualified students in BS programs have the option of obtaining an accelerated Operations Research, MS (p. 1153). Students must additionally complete MATH 203 prior to applying for the graduate program.

Accelerated Option Requirements
Students must complete all credits that satisfy requirements for both the BS and MS programs. Up to two courses (6 credits) of approved master’s level courses taken as part of the undergraduate degree may be applied to the graduate degree. The courses selected for this purpose must be approved by the academic advisors of both the BS and MS programs and by the SEOR department chair.

Degree Conferral
Students must apply the semester before they expect to complete the BS requirements to have the BS degree conferred. In addition, at the beginning of the student’s final undergraduate semester, students must complete a Bachelor’s/Accelerated Master’s Transition form that is submitted to the Office of the University Registrar and the VSE Graduate Admissions Office. At the completion of MS requirements, a master’s degree is conferred.

BS (selected)/Statistical Science, Accelerated MS

Overview
Highly-qualified students in BS programs have the option of applying to the accelerated Statistical Science, MS (p. 1141) program.

Admission Requirements
No specific undergraduate BS degree is required. Students enrolled in any BS degree may apply to the accelerated Statistical Science, MS (p. 1141) program if such an accelerated Statistical Science, MS pathway is allowable from the student’s BS program, which will be determined by the academic advisors of both the BS and MS programs; and if they have earned 90 undergraduate credits with an overall GPA of 3.00. Students must have successfully completed the following Mason courses each with a grade of C or better prior to admission to the accelerated program:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>MATH 213</td>
<td>Analytic Geometry and Calculus III</td>
<td>3</td>
</tr>
<tr>
<td>MATH 203</td>
<td>Linear Algebra</td>
<td>3</td>
</tr>
<tr>
<td>or MATH 321</td>
<td>Abstract Algebra</td>
<td></td>
</tr>
<tr>
<td>STAT 250</td>
<td>Introductory Statistics I (Mason Core) (p. 142)</td>
<td>3</td>
</tr>
</tbody>
</table>
Accelerated Option Requirements

Students must complete all credits satisfying degree requirements for the BS and MS programs, with 6 credits overlap chosen from the following courses: STAT 515 Applied Statistics and Visualization for Analytics, STAT 544 Applied Probability, STAT 554 Applied Statistics I, STAT 560 Biostatistical Methods, and STAT 574 Survey Sampling I. (Credit may not be received for both STAT 474 and STAT 574; nor for both STAT 460 and STAT 560.) The graduate courses selected for overlap must be approved by the academic advisors of both the BS and MS programs. All graduate course prerequisites must be completed prior to enrollment. Each graduate course must be completed with a grade of B or better to apply toward the MS degree.

While still in undergraduate status, a maximum of 6 additional graduate credits may be taken as reserve graduate credit and applied to the master’s program. Reserve graduate credits do not apply to the undergraduate degree.

Degree Conferral

Students must apply the semester before they expect to complete the BS requirements to have the BS degree conferred. In addition, at the beginning of the student’s final undergraduate semester, students must complete a Bachelor’s/Accelerated Master’s Transition form that is submitted to the Office of the University Registrar and the VSE Graduate Admissions Office. At the completion of MS requirements, a master’s degree is conferred.

Electrical Engineering, BS/Electrical Engineering, Accelerated MS

Overview

Highly-qualified students in the Electrical Engineering, BS (p. 1097) have the option of obtaining an accelerated Electrical Engineering, MS (p. 1103).

For more detailed information, see AP.6.7 Bachelor’s/Accelerated Master’s Degrees (p. 93). For policies governing all graduate degrees, see AP.6 Graduate Policies (p. 90).

Admission Requirements

Students in the Electrical Engineering, BS (p. 1097) program may apply to this option if they have earned 90 undergraduate credits with an overall GPA of 3.25. Criteria for admission are identical to criteria for admission to the Electrical Engineering, MS (p. 1103) program.

Accelerated Option Requirements

Students must complete all credits that satisfy requirements for both the BS and MS programs, with 6 credits overlap.

Students take 6 credits of 500-level courses as part of their technical electives or substitutes for required courses as part of their 121-credit undergraduate program. The specific courses that may be taken and applied to the accelerated program will be specified by the ECE Department.

Students admitted to the accelerated program must maintain an overall GPA of at least 3.25 during the entire BS/MS program and present a GPA of at least 3.25 for the 24 credits of graduate work submitted for the MS degree.

Students may take additional graduate-level courses as part of their BS technical electives with advisor approval. These additional graduate-level courses will not count toward the MS degree.

Degree Conferral

Students must apply the semester before they expect to complete the BS requirements to have the BS degree conferred. In addition, at the beginning of the student’s final undergraduate semester, students must complete a Bachelor’s/Accelerated Master’s Transition form that is submitted to the Office of the University Registrar and the VSE Graduate Admissions Office. At the completion of MS requirements, a master’s degree is conferred.
Electrical Engineering, BS/Telecommunications, Accelerated MS

Overview

Highly-qualified students in the Electrical Engineering, BS (p. 1097) have the option of obtaining an accelerated Telecommunications, MS (p. 1111).

For more detailed information, see AP6.7 Bachelor’s/Accelerated Master’s Degrees (p. 93). For policies governing all graduate degrees, see AP6 Graduate Policies (p. 90).

Admission Requirements

Students can apply for the program during the semester in which they expect to complete 90 undergraduate credits applicable toward the BS degree. An overall GPA of at least 3.10 at the time of application is required. Criteria for admission are identical to criteria for admission to the MS in Telecommunications Program. Application is made using the accelerated graduate program application forms, and all usual requirements must be met. The accelerated program application form specifies the overlapping courses and details the 3.10 undergraduate GPA.

Accelerated Option Requirements

Students must complete 145 credits that satisfy all the requirements for the BS and MS degrees, with 6 credits overlap. Students take 6 credits of 500-level courses as part of their technical electives or substitutes for required courses as part of their 121-credit undergraduate program. Students may take additional graduate-level courses as part of their BS technical electives with advisor approval. These additional graduate-level courses will not count toward the MS degree. Students admitted to the accelerated program must maintain an overall GPA of at least 3.00 during the MS program and present a GPA of at least 3.00 for the 24 credits of graduate work submitted for the MS degree.

Degree Conferral

Students must apply to have the BS conferred the semester before they expect to complete the BS requirements. At the completion of the MS requirements, the MS degree will be awarded.

Electrical Engineering, MS

Email: ece@gmu.edu
Website: https://ece.gmu.edu/graduate-studies/masters-programs/ms-electrical-engineering

Electrical Engineering is the discipline that drives our increasingly-connected society. Electrical engineers design systems, devices, and algorithms that contribute innovative solutions across a broad spectrum of applications. The Electrical Engineering program offers the following specialization areas: communications and networking, signal processing, controls and robotics, nanoelectronics, space-based systems, and bioengineering. The graduates of our program develop reliable, secure, and high-speed communication networks and systems; apply modern signal processing algorithms to extract information from images, audio, video, sonar, and radio signals; apply control theory and robotics foundations to applications such as autonomous vehicles, humanoid robots, and multi-agent systems; design nanoscale devices for the highly integrated circuits that drive the Internet of Things, health-monitoring devices, smartphones, tablets, and modern-day computer systems; develop prosthetic devices, brain-machine interfaces, and systems to ameliorate neurological disorders. Students in this program will develop theoretical foundations, analytical capabilities, and practical hands-on skills in their chosen field of specialization. They will also develop the oral and written communication skills necessary to articulate their ideas and succeed as entrepreneurs, practicing engineers, or technical managers in high-tech companies.

Admissions & Policies

Admissions

Categories of Admission

Students may be admitted into one of the following categories: degree, provisional, or nondegree. Provisional admission is reserved for domestic students whose past performance provides reasonable, but not strong, evidence of ability to pursue graduate work. To advance to degree status, a provisional student must achieve a 3.00 GPA after 12 credits, remove all undergraduate deficiencies by completing the corresponding courses with grades of B or better, and receive a B or better in two core courses specific to the student’s selected program and specialization. The nondegree category is used primarily by students who want to take courses but not necessarily pursue a degree. Nondegree students seeking to enter degree programs must formally apply for admission.

Requirements

To be considered for admission to the master’s program, applicants should have a baccalaureate degree in electrical engineering, computer engineering, or a closely-related discipline from an accredited program with a reputation for high academic standards, and have earned a GPA of B or better during the last 60 credits. Other requirements are as follows:

- Two letters of recommendation, preferably from academic references or references in industry or government who hold advanced degrees and are familiar with the applicant’s professional accomplishments
- Resume and detailed statement of career goals and aspirations
- For students who have not earned a bachelor’s degree from a U.S. university, satisfactory performance on the GRE
- For applicants who have not earned an academic degree in an English-speaking country (as defined in the GMU Catalog), a satisfactory score on any of the English proficiency examinations accepted by Mason, namely, TOEFL, IELTS, or PTE. Satisfactory scores are specific to Volgenau School of Engineering and are listed

Non-ECE Students
Students with BS or MS degrees in ECE-related disciplines (for example, computer science, mathematics, mechanical engineering, physics, or electrical engineering technology) are encouraged to apply for admission. They may initially be admitted into the provisional category and advance to degree status by satisfying requirements described in the Admissions Categories section. Such students may also be advised to take some courses from the undergraduate electrical or computer engineering curriculum, according to their intended specialization and specific backgrounds.

Policies
Student Advising
Newly-admitted graduate students must consult with the ECE graduate coordinator before they register for classes. Students should make an appointment by calling the ECE office. Students are expected to select a specialization from those available in each MS degree program. Students then are assigned an academic advisor from that specialization.

GPA Requirements
A maximum of 6 credits of courses with grades of C or B- may be applied toward the degree. The student must present a GPA of at least 3.00 for all courses submitted for the degree.

Requirements
Degree Requirements
Total credits: 30

Students must complete a minimum of 30 graduate credits beyond the bachelor’s degree. This work must represent a cohesive set of courses leading to comprehensive knowledge in one area; it cannot be a set of disjointed courses. The plan of study for the degree must include the following:

Plan of Study
Before completing 6 credit hours of coursework, each student must submit to the department a plan of study that has been approved by the academic advisor. This plan should be kept up to date by regular consultation with the academic advisor. A final, signed version of the plan must be turned in when the student submits a graduation application.

</thead>
<tbody>
<tr>
<td>Three courses at the 600 level or above. ¹</td>
<td>9</td>
<td></td>
</tr>
</tbody>
</table>

Total Credits 9

¹ Students must earn a B or better in each course. Must be a coherent set of courses, not including ECE 798 Research Project or ECE 799 Master’s Thesis. For guidance for selecting a coherent set of courses, students are referred to the courses listed for each of the program’s specialization areas listed on the ECE website. A maximum of 6 credits of non-ECE courses may be used, subject to prior department approval.

Seminar Requirement
Graduate students are expected to participate actively in the exchange of knowledge and ideas in their discipline. Towards this objective, all degree candidates must attend a minimum of 6 graduate seminars approved for the degree program. Approved seminars are publicized on the departmental webpage.

To demonstrate completion of the seminar requirement, students must register for ECE 795 Engineering Seminar in their final semester. The department office will verify that the seminar requirement has been met and submit a grade of S (satisfactory) upon completion of the requirement. Students who have not met the seminar requirement in their final semester must continue to register for ECE 795 Engineering Seminar in subsequent semesters until the requirement is met.

Thesis/Scholarly Paper Option
To complete the program, students may select one of the following options:

Thesis Option
Students who select this option must complete:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>ECE 799</td>
<td>Master’s Thesis</td>
<td>6</td>
</tr>

<td>24</td>
</tr>
<tr>
<td>Total Credits</td>
<td></td>
<td>30</td>
</tr>
</tbody>
</table>

The thesis is particularly recommended for those students who wish to develop and document their research skills or contemplate subsequent enrollment in a PhD program. The thesis involves a research effort, which is conducted under the guidance of a faculty advisor. In some cases, permission may be granted to complete a portion of the work at the student’s place of employment. The final written thesis and oral defense are approved by the student’s advisory committee.

For the Electrical Engineering program (p. 1103), this committee consists of at least three full-time faculty members, including two from the student’s major specialization, and one from outside the specialization. For the Computer Engineering Program (p. 1092), this committee consists of at least three full-time faculty members, including two affiliated with the MS in Computer Engineering (p. 1092) Program, one of whom must be from the ECE Department. Thesis students may not register for ECE 798 Research Project. Students must register for at
least 3 credits of thesis for their first thesis semester. Following their first thesis semester, they must register for at least 1 credit of thesis each fall and spring semester until graduation.

**Scholarly Paper Option**
Students who select to complete their degree program with a scholarly paper must:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>Complete 30 credits of coursework</td>
<td>30</td>
<td></td>
</tr>
<tr>
<td>ECE 797 Scholarly Paper</td>
<td>0</td>
<td></td>
</tr>
<tr>
<td>Enroll in a 600-level or above course requiring a research project</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Write a Scholarly Paper project report and present findings as part of the course requirements</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Total Credits</td>
<td>30</td>
<td></td>
</tr>
</tbody>
</table>

An acceptable scholarly paper must be technically sound, adhere to accepted formatting standards for technical reports, and contain a significant literature review evidenced by a comprehensive list of cited references.

A list of courses requiring projects that can be used to satisfy the scholarly paper requirement will be published on the department website. Scholarly papers must be individual written project reports — not group projects. To qualify as a scholarly paper an oral presentation of the project is required. A passing grade for the project, reflecting both the written report and the oral presentation, satisfies the scholarly paper requirement.

A successful scholarly paper will be recorded by awarding a satisfactory (S) grade for ECE 797 Scholarly Paper. Students are eligible to attempt the scholarly paper and register for ECE 797 Scholarly Paper after completion of 18 hours of coursework. Students choosing the scholarly paper option are not eligible for graduation until they have received a final, passing grade for ECE 797 Scholarly Paper.

**Accelerated Master’s**

**Electrical Engineering, BS/Electrical Engineering, Accelerated MS**

**Overview**
Highly-qualified students in the Electrical Engineering, BS (p. 1097) have the option of obtaining an accelerated Electrical Engineering, MS (p. 1103).

For more detailed information, see AP6.7 Bachelor’s/Accelerated Master’s Degrees (p. 93). For policies governing all graduate degrees, see AP6 Graduate Policies (p. 90).

**Admission Requirements**
Students in the Electrical Engineering, BS (p. 1097) program may apply to this option if they have earned 90 undergraduate credits with an overall GPA of 3.25. Criteria for admission are identical to criteria for admission to the Electrical Engineering, MS (p. 1103) program.

**Accelerated Option Requirements**
Students must complete all credits that satisfy the requirements for the BS and MS programs, with 6 credits overlap.

Students take 6 credits of 500-level courses as part of their technical electives or substitutes for required courses as part of their 121-credit undergraduate program. The specific courses that may be taken and applied to the accelerated program will be specified by the ECE Department.

Students admitted to the accelerated program must maintain an overall GPA of at least 3.25 during the entire BS/MS program and present a GPA of at least 3.25 for the 24 credits of graduate work submitted for the MS degree.

Students may take additional graduate-level courses as part of their BS technical electives with advisor approval. These additional graduate-level courses will not count toward the MS degree.

**Degree Conferral**
Students must apply the semester before they expect to complete the BS requirements to have the BS degree conferred. In addition, at the beginning of the student’s final undergraduate semester, students must complete a Bachelor’s/Accelerated Master’s Transition form that is submitted to the Office of the University Registrar and the VSE Graduate Admissions Office. At the completion of MS requirements, a master’s degree is conferred.

**Electrical and Computer Engineering, PhD**

**Banner Code: VS-PHD-ECE**

**Academic Advising**
MSN 1G5
4400 University Drive
Fairfax, VA 22030
Phone: 703-993-1570
Email: eecephd@gmu.edu
Website: ece.gmu.edu/graduate-studies/phd-programs/ece-phd-program

The PhD program in Electrical and Computer Engineering educates students to do original research on ECE topics and to become technical leaders in their fields. It has a strong and growing reputation, as graduates from the department have become professors at other universities and researchers in various industrial and government research centers. Students may choose a research emphasis in areas such as communications, networking, computer engineering, control and robotics, signal processing, micro/nano-electronics, and bioengineering. The ECE PhD program requires coursework, a qualifying exam, a teaching assignment, a dissertation proposal and research competency exam, a research seminar, dissertation research, and a dissertation defense. Mason’s general doctoral requirements apply to this program.

**Admissions & Policies**

**Admissions**
All general Mason and specific Volgenau School admission requirements apply. Applicants must submit official transcripts, a resume, a goals statement, three letters of recommendation and official GRE General Test results. The GRE requirement is waived for Mason ECE master’s graduates with a 3.0 or greater GPA. Applicants whose native language is
not English must demonstrate proficiency by taking the TOEFL or IELTS exam. The minimum score required for admission is 575 on the TOEFL paper-based exam, 230 on the TOEFL computer-based exam, 88 on the TOEFL internet-based exam (with a minimum of 20 in each section), or 6.5 on the IELTS exam. Application materials are reviewed by the ECE PhD committee, which makes a recommendation to the ECE department chair.

Policies

Reduction of Credit

Students must complete a minimum of 72 graduate credits, which may be reduced by a maximum of 30 credits from a completed master’s degree. Reduction of credit requires the approval of the program director or designee and the dean or designee of the school. They determine whether the credits are eligible for reduction of credit and applicable to the degree program and the number of credits to be reduced.

Program Requirements

The 72 hours of required doctoral-level credits typically consist of 48 credits of regular coursework and 24 credits of dissertation research. More than half of the 72 credits applied to the doctoral degree must be earned at Mason. The degree plan outlined in Degree Requirements is based on a student who receives a full 30 credit reduction. Students who do not receive a full credit reduction should choose additional credits in consultation with their advisor.

Requirements

Degree Requirements

Total credits: 72

Doctoral Coursework

Courses that constitute a student’s plan of study will be chosen in consultation with the student’s advisor and/or dissertation committee, to include:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>Select 18-30 credits</td>
<td>18-30</td>
</tr>
<tr>
<td>Total Credits</td>
<td></td>
<td>18-30</td>
</tr>
</tbody>
</table>

- 3 credits at the 600-level outside the department in a subject considered foundational for the area of emphasis. Typical examples are advanced mathematics or statistics courses for those pursuing an emphasis in communications, signal processing or control, physics courses for those desiring an emphasis in micro/nano-electronics, computer science courses for those pursuing the computer engineering emphasis, and biology courses for those pursuing a bioengineering emphasis. Because such courses are usually not taken for master’s degrees, this requirement can rarely be satisfied with a course taken previously.

- 6 credits within the department but outside the area of emphasis. This requirement may be satisfied with courses taken during previous studies, subject to approval.

- A maximum of 6 credits may be at the 500-level.

- A maximum of 6 credits of individualized reading courses at any level. Note that ECE 798 Research Project is primarily a master’s level course and is not intended to be part of the PhD coursework.

1 For courses taken elsewhere, the equivalent levels are to be determined by the PhD advisor, subject to approval by the ECE Department chair.

Qualifying Exams

The ECE PhD Qualifying Exam tests students’ knowledge of fundamental concepts and assesses their basic research skills. The exam consists of two parts: an in-class written technical qualifying exam and a research qualifying exam (RQE).

Technical Qualifying Exam

The Technical Qualifying Exam (TQE) that tests knowledge of fundamental concepts in a particular technical area. Students select one of four areas for their TQE:

1. Control Theory
2. Digital Design and Computer Organization
3. Electronics and Circuits
4. Signals and Systems

The TQE is offered once a year in January before the start of the Spring semester. Students entering the program with a BS or an MS are required to take the TQE the first time it is offered after they have entered the program. A student who fails the exam will have a second and final chance to pass the exam in the following year. A student who obtains a marginal passing grade in the first attempt of the TQE will be required to take an oral exam in the same area within the subsequent four weeks.

The oral exam will be administered by two ECE faculty members. A student who passes the oral exam will satisfy the TQE requirement. A student who demonstrates marginal performance in the oral exam will be required to take the written exam for the second and final time when it is offered in the following year. A student who fails the oral exam will be dismissed from the program. A student who fails the written TQE twice will be dismissed from the program.

Outstanding students may be exempt from the TQE if they obtain at least an A in two designated courses taken within the twelve months proceeding the first attempt at the TQE, or within the twelve months after the student has failed the TQE in the first attempt. The designated courses are as follows: Area A - ECE 521 Linear Systems and Control and ECE 528 Introduction to Random Processes in Electrical and Computer Engineering; Area B - ECE 545 Digital System Design with VHDL or ECE 590 Selected Topics in Engineering and ECE 511 Computer Architecture; Area C - Any two of ECE 584 Semiconductor Device Fundamentals, ECE 586 Digital Integrated Circuits, ECE 587 Design of Analog Integrated Circuits or ECE 684 MOS Device Electronics; Area D - ECE 521 Linear Systems and Control or ECE 535 Digital Signal Processing and ECE 528 Introduction to Random Processes in Electrical and Computer Engineering.

Research Qualifying Exam

The purpose of the Research Qualifying Exam (RQE) is to assess whether students can define a research problem, critically review the literature related to the problem, apply appropriate research methods to study the problem, and interpret and communicate their results. The RQE requires students to complete a short research project and to document their results in a written report and an oral presentation. The RQE topic is defined by a faculty advisor in consultation with the student. A committee of three faculty members (the advisor plus two additional members) evaluates the written report and the oral presentation. During the presentation the student is expected to answer questions about their project and about fundamental concepts related to the research.
Students who enter the program with an MS degree are encouraged to start working on their RQE as soon as they enter the PhD program and no later than the start of their second semester in the program regardless of their performance on the TQE. These students are required to present their paper in the RQE exam no later than the end of their second semester in the program. Students who enter the program with a BS degree are required to take the exam prior to completing 30 credits in the program regardless of their performance on the TQE.

Evaluation
The written research paper and the presentation will be evaluated using the following four criteria. Students must receive at least a “competent” raking (three on a scale of one to five) on each of the following four evaluation criteria to pass the RQE:

- Ability to articulate the research problem and its significance.
- Ability to critically review the literature.
- Understanding of research methods.
- Ability to communicate and interpret research results.

After a student has passed the TQE and has taken the RQE, the ECE PhD Committee reviews the exam results, the student’s transcript, and a letter of recommendation from the student’s advisor. Based on this information, the PhD Committee determines whether the student is qualified for the PhD program. A qualified student will proceed to choose a thesis advisor.

Dissertation Research
A maximum of 24 credits of ECE 998 Doctoral Dissertation Proposal and ECE 999 Doctoral Dissertation may be applied to the degree. Students who choose to take fewer than 24 credits of ECE 998 Doctoral Dissertation Proposal and ECE 999 Doctoral Dissertation may earn the remaining credits from approved course work. Students cannot enroll in ECE 999 Doctoral Dissertation before they have advanced to candidacy. Students advanced to candidacy after the add period for a given semester must wait until the following semester to register for ECE 999 Doctoral Dissertation. Students cannot advance to candidacy and defend their dissertation during the same semester. Once enrolled in ECE 999 Doctoral Dissertation, students must maintain continuous registration in ECE 999 Doctoral Dissertation each semester until graduation, excluding summers. Students who defend in the summer must be registered for at least 1 credit of ECE 999 Doctoral Dissertation during that summer term.

</tbody>
</table>

Total Credits 12-24

Advisor, Dissertation Director, and Dissertation Committee
The process of finding a dissertation topic and dissertation director is governed by the university’s policies, as described in the Requirements for Doctoral Degrees in the Academic Policies section of the catalog. Upon admission to the program, each student is assigned an ECE faculty member as an academic advisor. After the student passes the qualifying exam, the student proposes and the ECE department chair appoints a dissertation director who must be a Mason graduate faculty member with a full-time appointment. The dissertation director becomes the student’s academic advisor. Normally, the dissertation director is a member of ECE department; however, a member of another department may be appointed if warranted by the dissertation research topic. A dissertation committee should be formed within a year after the student has passed the qualifying exam. The dissertation committee consists of the dissertation director who acts as chair plus three or four additional members. All dissertation committees must include at least three members of the Mason graduate faculty, at least two of whom must be from the ECE Department. At least one member of the dissertation committee must be from outside the discipline of electrical and computer engineering. The outside member may be faculty from another Mason department or, if justified by the research topic, a qualified scientist or engineer from outside the university. All committee members must have a doctoral level degree. The dissertation committee must be approved by the ECE department chair. The dissertation director, as academic advisor, and the ECE Department chair must approve all decisions concerning a student’s course requirements and dissertation.

Dissertation Proposal, Research Competency Exam, Advancement to Candidacy
The student prepares a written dissertation proposal outlining the proposed research and submits it to the dissertation committee for approval. After completing coursework requirements and preparing a proposal, the student takes a research competency exam to demonstrate their preparation for dissertation research. The exam consists of a presentation of the dissertation proposal followed by an oral exam. The exam is administered by the student’s dissertation committee. The purpose of the oral exam is to verify that the student is familiar with the relevant material related to their research. The student is advanced to candidacy when he or she passes the oral exam and the dissertation committee approves the proposal.

Dissertation Research and Defense
Students conduct dissertation research under the guidance of their dissertation director, with regular consultation with other members of the dissertation committee. During this period, students must present their research results at least once in the form of a department seminar. The dissertation must represent an achievement in research, must be a significant contribution to its field, and should be deemed publishable in refereed journals or at highly selective conferences. On completion of the dissertation the student may be asked, at the discretion of the dissertation committee, to present a predefense in the presence of the committee members. The dissertation committee and the department chair approve the student’s application for a public defense of the doctoral dissertation. A copy of the dissertation must be placed in the University Libraries four weeks prior to the public defense. After a successful public defense and completion of the final form of the dissertation, the dissertation committee recommends the candidate for the degree of doctor of philosophy.

Teaching Requirement
To acquire teaching experience, each PhD student is required to participate in the department’s teaching activity. The requirement is typically satisfied by working as a recitation instructor for one semester, presenting several lectures within a course, or performing other teaching work approved by the department.
Signal Processing Graduate Certificate

Banner Code: VS-CERG-SIGP

Academic Advising

MSN 1G5
4400 University Drive
Fairfax, VA 22030

Phone: 703-993-1569
Email: ece@gmu.edu
Website: ece.gmu.edu/graduate-certificates/certificate-program-signal-processing

The Department of Electrical and Computer Engineering, in conjunction with the Department of Statistics, offers the Certificate in Signal Processing, which provides graduate students with an opportunity to reach a demonstrated level of competence in signal processing. Course work for the graduate certificate can be used for credit toward the MS in Statistical Science as well as the MS in Electrical or Computer Engineering. However, the certificate’s primary purpose is to provide a well-defined body of information for students who want to advance or update their knowledge in this fast-moving field, but who do not necessarily wish to complete requirements for the MS degree. The certificate may be pursued concurrently with any of the graduate degree programs in the Volgenau School.

The graduate certificate may only be pursued on a part-time basis.

Admissions & Policies

Admissions

The graduate certificate is open to all students who hold BS degrees in scientific and engineering disciplines from accredited universities and hold graduate status (either degree or non-degree) in the Volgenau School.

Policies

Program Requirements

The certificate is awarded on completion of five graduate courses (15 credits) in signal processing. A cumulative GPA of 3.00 is required, and one course with a grade of C at most may be applied toward the certificate. The certificate courses comprise two foundation courses taken by all students and three elective courses.

Requirements

Certificate Requirements

Total credits: 15

This certificate may be pursued on a part-time basis only.

Admissions & Policies

Admissions
Architecture-Based Systems Integration Concentration
A bachelor’s degree is required for admission to a certificate program.

C4I & Cyber Concentration
The certificate with this concentration is available to students who hold bachelor’s degrees in engineering and scientific disciplines or are in graduate status in such programs. Admission requirements are identical to those for the Systems Engineering, MS (p. 1170).

Communications and Networking Concentration
The certificate with this concentration in communications and networking is open to all students who hold BS degrees in scientific and engineering disciplines from accredited universities.

Engineering Resilient Enterprise Systems Concentration
The certificate with this concentration is available to any student who holds a bachelor's degree in an engineering or scientific discipline or has graduate status in such a program. Admission requirements are identical to those for the Systems Engineering, MS (p. 1170), except that the math requirements include only MATH 113 Analytic Geometry and Calculus I (Mason Core) (p. 142), MATH 114 Analytic Geometry and Calculus II, and a probability and statistics course.

Financial Systems Concentration
The certificate with this concentration will be open to all students who hold a BS degree in scientific and engineering disciplines from an accredited university program, with a GPA minimum established by VSE for all MS programs. Students who are already enrolled in a master’s program must submit an application form to enroll in this certificate with concentration program.

Tactical Computer Operations Concentration
Students applying to the certificate with this concentration must hold a bachelor’s degree in either computer science or computer engineering. Prospective students without these specific degrees will need to have a technical bachelor’s degree and show academic competence in the areas of: C (C++, C#, Objective C), Assembler, discrete mathematics, and computer networking. An undergraduate grade point average (GPA) of 3.0 or better (4.0 scale) is required. The Graduate Record Exam (GRE) is not required.

Policies
The Systems Engineering Graduate Certificate may be pursued on a part-time basis only.

For policies governing all graduate certificates, see AP.6.8 Requirements for Graduate Certificates (p. 94).

Requirements
Total credits: 12-15
This certificate may be pursued on a part-time basis only.

Concentration in Architecture-Based Systems Integration (ABSI)
Administered by the Department of Systems Engineering and Operations Research (https://seor.gmu.edu)

Coursework
The following four courses must be completed with a grade of B or better:

Code | Title | Credits
--- | --- | ---
SYST 520 | System Engineering Design | 3
SYST 618 | Model-based Systems Engineering | 3
SYST 620 | Discrete Event Systems | 3
SYST 621 | Systems Architecture Design | 3

Total Credits | 12

Certificate coursework within the Systems Engineering MS
In addition to the ABSI concentration courses, students must take the following six courses within the Systems Engineering, MS (p. 1170):

Code | Title | Credits
--- | --- | ---
SYST 505 | Systems Engineering Principles | 3
SYST 510 | Systems Definition and Cost Modeling | 3
SYST 530 | Systems Engineering Management I | 3
SYST 611 | System Methodology and Modeling | 3
SYST 699 | Masters Project | 3
Select one approved elective from the ABSI concentration | 3

Total Credits | 18

1 Students who have work experience in systems engineering should consult with their advisor on replacing SYST 505 Systems Engineering Principles with a higher-level SYST course.

Concentration in C4I & Cyber (C4IC)
Administered by the Department of Systems Engineering and Operations Research (https://seor.gmu.edu)

This certificate with concentration may be pursued on a part-time basis only.

The certificate with concentration requires 12 credits (4 courses). Students must complete the following with an average grade of B or better.

Coursework

Code | Title | Credits
--- | --- | ---
SYST 680 | Principles of Command, Control, Communications, Computing, and Intelligence (C4I) | 3
or ECE 670 | Principles of Command, Control, Communications, Computing, and Intelligence (C4I) |
**OR 542** Operations Research: Stochastic Models 3

or **ECE 528** Introduction to Random Processes in Electrical and Computer Engineering

Select two from the following: 6

**ECE 542** Computer Network Architectures and Protocols

**ECE 630** Statistical Communication Theory

**ECE 642** Design and Analysis of Computer Communication Networks

**OR 635** Discrete System Simulation

**SYST 584** Heterogeneous Data Fusion

**SYST 664** Bayesian Inference and Decision Theory

**SYST 683** Modeling, Simulation, and Gaming

Total Credits 12

**Completing the certificate with the C4I concentration within the Systems Engineering Master's Program**

In addition to the four courses above, students must complete the following six courses:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>SYST 505</td>
<td>Systems Engineering Principles</td>
<td>3</td>
</tr>

Total Credits 18

**Concentration in Communications and Networking (CONE)**

Administered by the Department of Electrical and Computer Engineering (https://ece.gmu.edu/welcome-gmu-ece-department).

The certificate with a concentration in Communications and Networking is awarded on completion of five graduate courses (15 credits) in communications and networking. A cumulative GPA of 3.00 is required and one course with a grade of C at most may be applied toward the certificate. The certificate courses comprise two required foundation courses and three electives.

<table>
<thead>

Telecommunications, MS
Banner Code: VS-MS-TCOM

Academic Advising

MSN 2B5
4400 University Drive
Fairfax, VA 22030
Phone: 703-993-3810
Email: tcom@gmu.edu
Website: telecom.gmu.edu

The innovative, interdisciplinary MS in Telecommunications program provides a blend of cutting-edge engineering-oriented courses in wireless and fiber communications systems, networks, computers, and Internet protocols, combined with courses on telecommunications policy, legal, business, and international aspects. The interdisciplinary program is designed for students who wish to enter the field of telecommunications or are working in the field and want to advance their knowledge of telecommunications. It concentrates on practical applications of telecommunications rather than on a theoretical approach, and focuses on the engineering and IT aspects of telecommunications, in combination with the interdisciplinary knowledge offered by selected courses in telecommunications business and policy. More than 30 new engineering and IT courses have been designed especially for this program, including four certificate programs that may be incorporated into, and taken concurrently with, the MS in telecommunications.

Program Structure

A novelty of the program is its structure, which consists of four emphasis areas. This structure allows students to identify more clearly the various specialties in telecommunications technology. Students enjoy considerable flexibility because they are able to design their master’s programs to fit their technical preferences, including the option of taking courses in other programs at Mason. A majority of the course material comes from the Electrical and Computer Engineering (ECE) Department and the Systems Engineering and Operations Research (SEOR) Department. Courses offered by ECE focus on network technologies, such as fiber optics, and Internet protocols; network applications, such as networked multicore computer systems, client-server architectures, and network management; and wireless communications, such as digital communications, satellite communications, mobile communications, and GPS. Unique courses in the telecommunications program, such as Border Gateway Protocols, Interior Gateway Protocols, MPLS, GPS, and Advanced Link Design, complement courses given in ECE programs. In addition to the many new telecommunications courses developed for this program, ECE already offers a number of other graduate courses.
in communications as part of the graduate electrical engineering and computer engineering programs. Those courses may also be taken for credit under the MS in Telecommunications Program, provided students have the prerequisite background. Courses related to systems engineering, project management, and business of telecommunications (including the design and optimization of large, complex communication networks) are offered by SEOR. Both SEOR fields, systems engineering and operations research, play significant roles in all aspects of the design, operation, and business of telecommunications, and this knowledge is important for students of telecommunications. The blend of in-depth knowledge of specific elements of telecommunications technology, combined with knowledge of broader issues in telecommunications, is increasingly necessary for people who intend to work in a management or decision-making position within the telecommunications industry, telecommunications-related businesses, or government institutions dealing with telecommunications. The MS in Telecommunications provides that blend.

Admissions & Policies

Admissions Requirements
Specific application deadlines and requirements (https://admissions.gmu.edu/grad/application-deadlines-and-requirements/?academicUnit=VS&_ga=1.107632321.273102085.1480697294) are available through the Office of Graduate Admissions.

The program is open to students who hold a BS or BA degree from an accredited college or university in engineering, math, science, computer science, business (with a quantitative background), economics, or other analytical disciplines, and students who have equivalent work experience indicating analytical aptitude. Depending on their background, some applicants may be required to complete 3 to 6 credits of preliminary course work before they are allowed to enroll in any of the core courses or emphasis courses in the program. Applicants who have not studied mathematics beyond the equivalent of algebra II/trigonometry at high school or introductory calculus classes (such as those offered in business or database management programs) will be required to take TCOM 530 Data Communications Fundamentals, the foundation course that prepares students for TCOM 521 Systems Engineering for Telecommunications Management, prior to being allowed to take TCOM 500 Modern Telecommunications. A minimum undergraduate GPA of 3.00 is usually required.

Students may be admitted to the MS program as degree seeking students, or they may be admitted for nondegree study within the program, which allows them to take individual courses. Students in the nondegree program may apply to the degree program, provided their GPA within the MS in Telecommunications Program is 3.00 or above. Up to 12 credits earned in nondegree study may be transferred into the degree program, provided each of the courses to be transferred in was passed with a grade of B or above.

Policies

Program Format
The program consists of 9 credits of mandatory engineering and technology core courses (TCOM 500 Modern Telecommunications, TCOM 530 Data Communications Fundamentals and TCOM 521 Systems Engineering for Telecommunications Management); 6 credits of electives drawn from an interdisciplinary group of core courses (TCOM 547 Project Management in Telecommunications, or TCOM 750 Coordinating Seminar), and a basic switching lecture and laboratory course (TCOM 514 Basic Switching: Lecture and Laboratory Course) or an Internet protocol routing lecture and laboratory course (TCOM 515 Internet Protocol Routing: Lecture and Laboratory Course); and four areas of emphasis. Students who enter the program with an undergraduate degree that shows evidence of successfully completing LAN and WAN technologies may substitute TCOM 535 The TCP/IP Suite of Internet Protocols for TCOM 530 Data Communications Fundamentals in their mandatory core program, respectively.

Students must complete 30 credits of coursework through a combination of core and emphasis courses. The core consists of 15 credits, with the remaining 15 credits earned in areas of emphasis. The emphases are sub-areas of telecommunications that provide necessary depth.

Students are usually expected to take courses from at least two emphasis areas. Up to 6 credits from the core program may be carried forward into the emphases, thus permitting up to 6 credits of electives to be taken inside or outside the prime emphasis area chosen by the student. TCOM 530 Data Communications Fundamentals may be carried forward into emphasis area 1, 2, or 3; TCOM 521 Systems Engineering for Telecommunications Management may be carried forward into emphasis area 4. Double counting is not permitted, but the courses carried forward into a given emphasis may permit that area’s credit requirement to be satisfied, thus allowing elective courses to be taken outside that area. Usually, a minimum of 6 credits is needed to satisfy one emphasis area.

Program Requirements
Students must complete a minimum of 30 graduate credits with a GPA of 3.00 or higher. Students must earn a B (3.00) or above in core courses TCOM 500 Modern Telecommunications, TCOM 521 Systems Engineering for Telecommunications Management and TCOM 530 Data Communications Fundamentals. Up to 6 credits of a combination of C grades may be carried within the program from the remaining core courses or from the emphasis courses, provided the overall GPA is 3.00 or higher.

Telecommunications Certificates
Three 15-credit certificates are offered by the MS in TCOM Program. Students may pursue these certificates as stand-alone programs or as part of their degree program. For the former, they are required to submit a graduate program application indicating their desire to enroll in the appropriate graduate certificate program. For the latter, because they are already enrolled in a degree program, they need only add the appropriate graduate certificate to their graduate program status at least one semester prior to the award of the certificate. The courses within the certificates are drawn directly from the MS in TCOM Program. If a student initially signs up for only a certificate program, it is possible to transfer into the degree program later, transferring up to 12 credits into the degree program. Students must therefore ensure they have transferred into the degree program prior to starting course work beyond 12 credits in the certificate program to ensure that all credits from the certificate program may transfer into the degree program. Students who transfer from a certificate program into the degree program may earn the certificate and the degree on satisfactory completion of the respective requirements. Applicable courses may count for the certificate and the degree programs.

Students may transfer in one 3-credit course from another program or institution toward their TCOM certificate, provided the course in question
was passed with a B grade or higher. Students are permitted to carry one C grade within their certificate program, provided the overall GPA is 3.00 or above.

### Area of Emphasis ³

Total Credits 15

Total Credits 30

¹ Students must receive prior permission to substitute TCOM 535 The TCP/IP Suite of Internet Protocols for TCOM 530 Data Communications Fundamentals.

² Both TCOM 514 Basic Switching: Lecture and Laboratory Course and TCOM 515 Internet Protocol Routing: Lecture and Laboratory Course may be taken for credit, but only one may be used to satisfy a core elective requirement.

³ See below for list of courses that fulfill each area of emphasis.

### Areas of Emphasis

A minimum of 15 credits is required. Students usually take 15 credits from at least two of the four emphasis areas, or they may elect to take all 15 credits from the systems engineering of telecommunications area (emphasis 4). Students electing to carry forward a core course (TCOM 530 Data Communications Fundamentals or TCOM 521 Systems Engineering for Telecommunications Management) into an appropriate emphasis area have the option of taking an elective course in that area or an alternate area to bring the total number of credits in the emphasis area to 15.

An area of emphasis can be completed by courses listed under the emphasis or considered applicable to that area for a total of at least 6 credits. Some emphasis courses are in more than one area; for example, TCOM 535 The TCP/IP Suite of Internet Protocols is in emphasis 1, network technologies, and emphasis 2, network applications.

Basic courses in each emphasis have been specially designed for the telecommunications program. These courses do not require completion of prerequisites from other MS programs in the Volgenau School. Other courses, which are marked with asterisks, are from other MS programs in the Volgenau School and represent viable options for students who have appropriate prerequisites in some technical areas. Although these courses assume certain prerequisites from their specific MS programs, advanced students who already know the prerequisite material can seek instructor permission to enroll in those courses.

Alternatives to completing each emphasis area by using appropriate combinations of courses not listed under a given module may be admissible subject to prior approval by the program director. In addition, independent study, reading, and research courses may be taken in all five areas. These courses permit students to make use of their work experiences to undertake non-classroom courses for credit within the program.

Mason has negotiated an articulation agreement with the University of Virginia that allows up to 12 credits of the Informational Systems Management Certificate Program from the University of Virginia to be transferred into emphasis area 4 of the TCOM Program. In addition, graduate students from the National Defense University (NDU) may transfer up to 9 credits from NDU’s Information Security Certificate Program.

Courses listed below from other graduate programs in the Volgenau School listed can be taken for credit in this program if the student has the appropriate prerequisites. Other courses from other programs may be taken for credit, with prior approval.

Emphasis 4, Systems Engineering of Telecommunications

This area of emphasis can be taken as one of two emphases or as one 15-credit emphasis. No more than two SYST courses can be taken within this area.

Accelerated Master’s

Electrical Engineering, BS/Telecommunications, Accelerated MS

Overview

Highly-qualified students in the Electrical Engineering, BS (p. 1097) have the option of obtaining an accelerated Telecommunications, MS (p. 1111).

For more detailed information, see AP.6.7 Bachelor’s/Accelerated Master’s Degrees (p. 93). For policies governing all graduate degrees, see AP.6 Graduate Policies (p. 90).

Admission Requirements

Students can apply for the program during the semester in which they expect to complete 90 undergraduate credits applicable toward the BS degree. An overall GPA of at least 3.10 at the time of application is required. Criteria for admission are identical to criteria for admission to the MS in Telecommunications Program. Application is made using the accelerated graduate program application forms, and all usual requirements must be met. The accelerated program application form specifies the overlapping courses and details the 3.10 undergraduate GPA.

Accelerated Option Requirements

Students must complete 145 credits that satisfy all the requirements for the BS and MS degrees, with 6 credits overlap. Students take 6 credits of 500-level courses as part of their technical electives or substitutes for required courses as part of their 121-credit undergraduate program. Students may take additional graduate-level courses as part of their BS technical electives with advisor approval. These additional graduate-level courses will not count toward the MS degree. Students admitted to the accelerated program must maintain an overall GPA of at least 3.00 during the MS program and present a GPA of at least 3.00 for the 24 credits of graduate work submitted for the MS degree.

Total Credits 6
Degree Conferral
Students must apply to have the BS conferred the semester before they expect to complete the BS requirements. At the completion of the MS requirements, the MS degree will be awarded.

Individualized Study, BIS/Telecommunications, Accelerated MS Overview
Highly-qualified students in the Individualized Study, BIS (p. 588) have the option of obtaining an accelerated Telecommunications, MS (p. 1111).

For more detailed information, see AP.6.7 Bachelor's/Accelerated Master's Degrees (p. 93). For policies governing all graduate degrees, see AP.6 Graduate Policies (p. 90).

Admission Requirements
Students in the Individualized Study, BIS (p. 588) program may apply for this option if they have earned 90 undergraduate credits (including 15 Mason resident credits) with an overall GPA of at least 3.25. Criteria for admission are identical to criteria for admission to the Telecommunications, MS (p. 1111) program.

Accelerated Option Requirements
Students must complete all requirements for the BS and MS programs, with 6 credits overlap.

Students select TCOM courses from the list below to meet the requirements of the accelerated program. Six credits of TCOM courses will be applied to meet the requirements of both the BS and MS TCOM programs. An additional three credits of TCOM courses is required for the BIS Individualized Concentration (IND) with emphasis on telecommunication. Note that accelerated students can only take the courses in the list below if they passed the listed prerequisite course with a B or higher.

BIS Concentration
Total credits: 34-46

Students who are pursuing the Individualized Study, BIS (p. 588), Individualized concentration (IND) with an emphasis on telecommunications must take:

<table>

Note:
Accelerated students who have passed IT 341 Data Communications and Network Principles with a grade of B or higher will not be required to take TCOM 530 in the Telecommunications, MS core. Other TCOM courses may be approved on a case-by-case basis.

See each course for individual prerequisite requirements.

Degree Conferral
Students must apply the semester before they expect to complete the BS requirements to have the BS degree conferred. In addition, at the beginning of the student's final undergraduate semester, students must complete a Bachelor's/Accelerated Master's Transition form that is submitted to the Office of the University Registrar and the VSE Graduate Admissions Office. At the completion of MS requirements, a master's degree is conferred.

Information Technology, BS/Telecommunications, Accelerated MS Overview
Highly-qualified students in the Information Technology, BS (p. 1122) have the option of obtaining an accelerated Telecommunications, MS (p. 1111).

For more detailed information, see AP.6.7 Bachelor's/Accelerated Master's Degrees (p. 93). For policies governing all graduate degrees, see AP.6 Graduate Policies (p. 90).

Admission Requirements
Students in the Information Technology, BS (p. 1122) program may apply for this option if they have earned 90 undergraduate credits with an overall GPA of at least 3.25. Criteria for admission are identical to criteria for admission to the Telecommunications, MS (p. 1111) program.

Accelerated Option Requirements
Students must complete all credits that satisfy requirements for the BS and MS programs.

<table>

Note:
Accelerated students who have passed IT 341 Data Communications and Network Principles with a grade of B or higher will not be required to take TCOM 530 in the Telecommunications, MS core. Other TCOM courses may be approved on a case-by-case basis.
Systems Engineering, BS/Telecommunications, Accelerated MS

Overview
Highly-qualified students in the Systems Engineering, BS (p. 1164) have the option of obtaining an accelerated Telecommunications, MS (p. 1111).

For more detailed information, see AP 6.7 Bachelor’s/Accelerated Master’s Degrees (p. 93). For policies governing all graduate degrees, see AP 6 Graduate Policies (p. 90).

Admission Requirements
Students in the Systems Engineering, BS (p. 1164) program who preferably have chosen to take the systems engineering of telecommunications elective sequence may apply to this option if they have earned 90 undergraduate credits with an overall GPA of at least 3.30 and completed all MATH and PHYS requirements. Other students will be considered on their individual merit. Criteria for admission are identical to criteria for admission to the Telecommunications, MS (p. 1111) program.

Accelerated Option Requirements
Students must complete all credits that satisfy requirements for the BS and MS programs, with 6 credits overlap selected from the following courses:

<table>
<thead>
<tr>

Concentration in Integration and Testing (INTT)

The concentration may only be pursued on a part-time basis only.

The certificate with Integration and Testing concentration is awarded on successful completion of five graduate courses (15 credits) from the list of required courses. A cumulative GPA of 3.00 is required, at most one course with a grade of C may be applied toward the certificate, and no more than one, 3-credit graduate course in the appropriate discipline may be transferred into the certificate from an appropriately accredited program at another institute of higher learning.

Department of Information Sciences and Technology

Phone: 703-993-3565
Website: ist.gmu.edu

Information Sciences and Technology offers undergraduate and graduate programs to develop expertise in applying information technology to support business applications. The programs emphasize problem-solving, communication, technical, and leadership skills.

Undergraduate

The BS in Information Technology program aims to meet the existing and emerging needs of industry by educating students in current principles and practices in the application of information technology. The program focuses on equipping graduates with effective skills for interacting at the management level as well as the technical level. Graduates are hired in positions that focus on the application of IT in an increasing
number of emerging sub-disciplines, including network administration and telecommunications, information security, web development and multimedia, database technology and programming, and health information technology.

Graduate

The MS in Applied Information Technology is the very best graduate education in IT for high-potential leaders, especially those working on IT solutions that affect the federal government, industry or non-profit. Its objective is to graduate individuals of competence and character who can lead multidisciplinary teams in the design, justification, development, management, and sustainment of mega-systems from data to decision in the private and federal sectors. The MS in AIT provides a high quality curricula for students seeking to pursue their careers in the leading IT areas including Cyber Security, Big Data Analytics, Knowledge Mining, Data Analytics in Social Media, and Cyber-Human Interaction.

At the doctoral level, the department offers a concentration in the Volgenau School’s PhD in IT (p. 1026) program.

Applied Information Technology, MS

Banner Code: VS-MS-AIT

Academic Advising

5400 Nguyen Engineering Building
Fairfax Campus
The MS in Applied Information Technology (AIT) is the very best graduate education in IT for high-potential leaders, especially those working on IT solutions that affect the federal government, industry or non-profit. Its objective is to graduate individuals of competence and character who can lead multidisciplinary teams in the design, justification, development, management, and sustainment of mega-systems from data to decision in the private and federal sectors. The MS in AIT provides a high quality curricula for students seeking to pursue their careers in the leading IT areas including Cyber Security, Big Data Analytics, Knowledge Mining, Data Analytics in Social Media, and Cyber-Human Interaction. Faculty include professors from the Volgenau School, the School of Business, and the College of Humanities and Social Sciences, plus industry leaders with unique reputations in the subject area as adjunct professors and guest lecturers. The faculty expose students to the pragmatic issues of IT, not just the theory.

Admissions & Policies

Admissions

Applicants must have completed a baccalaureate degree from an accredited program with a reputation for high academic standards and an earned GPA of 3.00 or better in their 60 highest-level credits. They must be experienced in the fundamentals of IT and quantitative methods. In addition, applicants must:

- Provide two letters of recommendation, preferably from academic references or references in industry or government who are familiar with the applicant’s professional accomplishments.
- Provide a resume and detailed statement of career goals and professional aspirations.
- Have achieved a satisfactory score on the TOEFL examination for non-native English speakers.

Requirements

Degree Requirements

Total credits: 30-36 credits

Completion of the MS program requires a minimum of 30 approved graduate credits (10 courses). To provide a common background in the fundamentals of information sciences and technology, all students are required to complete four core courses. In addition to the core courses, students must choose a concentration within the program by taking six courses from one of the concentration areas listed below.

Students in all concentrations may take other VSE graduate-level courses not listed below as part of their MS technical electives subject to advisor approval.

1 Students in this concentration may also take other IST graduate-level courses not listed below as part of their MS technical electives, subject to approval of the advisor.

**Accelerated Master’s**

**Individualized Study, BIS/Applied Information Technology, Accelerated MS Overview**

Highly-qualified students in the Individualized Study, BIS (p. 588) have the option of obtaining an accelerated Applied Information Technology, MS (p. 1118).

For more detailed information, see AP 6.7 Bachelor’s/Accelerated Master’s Degrees (p. 93). For policies governing all graduate degrees, see AP 6 Graduate Policies (p. 90).

**Application Requirements**

Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in Graduate Admissions (p. 68). Mason undergraduate students in the BIS Program can apply in the semester in which they will have completed 90 or more credits (including 15 Mason resident credits) applicable toward the BIS. Students must have an overall GPA of at least 3.30 to apply to the program.

**Reserve Graduate Credit**

Students may take up to 6 additional graduate credits as reserve graduate credit. These credits do not apply to the undergraduate degree. The ability to take courses for reserve graduate credit is available to all high achieving undergraduates with the permission of the department.
Permission to take a graduate course for reserve graduate credit is normally granted only to Mason seniors within 15 hours of graduation.

To apply these credits to the master’s degree, students must request that the credits be moved from the undergraduate degree to the graduate degree using the Bachelor’s/Accelerated Master’s Transition Form (http://registrar.gmu.edu/forms).

**Accelerated Option Requirements**

Students in the accelerated master’s option must maintain a minimum 3.30 GPA in the undergraduate segment until they have satisfied all requirements for the BIS degree. On completion and conferral of the undergraduate degree they submit the Bachelor’s/Accelerated Master’s Transition Form (http://registrar.gmu.edu/forms) and are admitted to graduate status.

As graduate students, accelerated master’s students have an advanced standing. Students must complete all credits that satisfy requirements of the BIS program and those of the MSAIT program, with two courses overlapping from the courses necessary to earn the BIS with a concentration IND (individualized), applied information technology emphasis as listed below.

For more detailed information, see AP.6.7 Bachelor’s/Accelerated Master’s Degrees (p. 93). For policies governing all graduate degrees, see AP.6 Graduate Policies (p. 90).

**Admission Requirements**

Students in the Information Technology, BS (p. 1122) program may apply to this option if they have earned 90 undergraduate credits with an overall GPA of at least 3.30. Criteria for admission are identical to criteria for admission to the Applied Information Technology, MS (p. 1118) program.

**Accelerated Option Requirements**

Students must complete all credits that satisfy requirements for the BS and MS programs, with 6 credits overlap.

Students register for 6 credits of AIT 500-level core courses in place of the corresponding IT 300-level courses required for the undergraduate degree requirements.

Students must register for two of the following courses in place of the corresponding 300-level courses:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>AIT 512</td>
<td>Algorithms and Data Structures Essentials (satisfies the IT 306 requirement in the BS program)</td>
<td>3</td>
</tr>
</tbody>
</table>

Students may take additional graduate-level courses as part of their BS technical electives with advisor approval. These additional graduate-level courses will not count toward the MS degree. See AP.1.4.4 Graduate Course Enrollment by Undergraduates (p. 79).

**Degree Conferral**

Students must apply the semester before they expect to complete the BS requirements to have the BS degree conferred. In addition, at the beginning of the student’s final undergraduate semester, students must complete a Bachelor’s/Accelerated Master’s Transition form that is submitted to the Office of the University Registrar and the VSE Graduate Admissions Office. At the completion of MS requirements, a master’s degree is conferred.

**Information Sciences Graduate Certificate**

**Banner Code**: VS-CERG-ISCI

5400 Nguyen Engineering Building
Fairfax Campus

Phone: 703-993-3565
Email: msait@gmu.edu
Website: ist.gmu.edu

The Information Sciences Graduate Certificate with a concentration in Intelligence Technologies offers courses in four key elements of intelligence analysis. Designed for professionals who work for, or in support of, intelligence community agencies, it provides additional academic preparation for post-bachelor’s students who may not wish to complete a full master’s program, as well as for master’s graduates who wish to take the area-specific courses a concentration provides.

**Admissions & Policies**

**Admissions**

A bachelor's degree is required for admission to a certificate program.

**Requirements**

**Total credits: 12**

This certificate may be pursued on a full-or part-time basis.

**Concentration in Intelligence Technologies (NTLT)**

Administered by the Department of Information Sciences and Technology (http://ist.gmu.edu/programs/graduate-programs).
The bachelor’s program in Information Technology is accredited by the Computing Accreditation Commission of ABET, http://www.abet.org.

Admissions & Policies

Admissions
Students who meet Mason's general eligibility requirements may apply for admission to the IT major. Admission is based on the appropriateness of the student’s academic objectives and the likelihood of the student benefiting from the program. Preference in admission is given to students who have four years of high school mathematics, including precalculus.

Policies
For policies governing all undergraduate degrees, see AP5 Undergraduate Policies (p. 87).

Change of Major
Mason students considering a change of major to Information Technology must have a minimum GPA of 3.00 in completed courses from the following list: IT 102 Discrete Structures or MATH 125 Discrete Mathematics I (Mason Core) (p. 142), IT 104 Introduction to Computing (Mason Core) (p. 142) or IT 191 Review of Computing Fundamentals, IT 105 IT Architecture Fundamentals, IT 106 Introduction to IT Problem Solving Using Computer Programming or IT 196 Review of IT Problem Solving Using Computer Programming or IT 109 Introduction to Computer Programming or CS 112 Introduction to Computer Programming (Mason Core) (p. 142), IT 206 Object Oriented Techniques for IT Problem Solving or IT 209 Introduction to Object Oriented Programming or CS 211 Object-Oriented Programming, IT 216 Systems Analysis and Design, IT 207 Applied IT Programming, IT 213 Multimedia and Web Design or IT 193 Review of Multimedia and Web Design, IT 214 Database Fundamentals or IT 194 Review of Database Fundamentals, and IT 223 Information Security Fundamentals, and a grade of C or better in IT 106 Introduction to IT Problem Solving Using Computer Programming or IT 109 Introduction to Computer Programming or IT 196 Review of IT Problem Solving Using Computer Programming or both CS 112 Introduction to Computer Programming (Mason Core) (p. 142) and CS 211 Object-Oriented Programming.

Note: IT courses at the 300 and 400 level are restricted to students who have declared an Information Technology major; minor, or undergraduate certificate, and to students in the BAS or BIS program. IT 293 Applied IT: Junior Transition and IT 343 IT Project Management are restricted to students who have declared the Information Technology, BS major.

Advanced Study
Mason offers students the ability to complete both BS and MS degrees in a shorter time through an Accelerated Masters (MS) program. Choosing to pursue an accelerated MS may affect a student's choice of courses in the BS program. Students should consult with an advisor for assistance.

Grades
Students must have a C or better in any course that satisfies a prerequisite for an IT course. To graduate with the BS in Information Technology, students must have a GPA of 2.75 or better across the IT foundation, core, capstone, and concentration courses. Additionally, students must have a C or better in their foundation, core, capstone, and concentration courses.

Information Technology, BS

Banner Code: VS-BS-INFT

Academic Advising
5400 Nguyen Engineering Building
Fairfax Campus
101 Bull Run Hall
Science and Technology Campus

Phone: 703-993-3565
Email: bsit@gmu.edu
Website: http://ist.gmu.edu/programs/undergraduate-programs/

The Information Technology, BS prepares students to apply IT to support business processes. The degree produces graduates with strong problem-solving, writing, and communication skills who successfully compete for technical employment and are prepared for advanced study. The objectives of the Information Technology, BS program relate to the abilities of the graduates several years after graduation. Graduates of the program are expected within three to five years of graduation to have:

- Been employed in a position in which they have successfully used their information technology skills (including: problem solving, analytic, presentation and personal skills) as evidenced by achieving improved organizational objectives;
- Progressed through increasing levels of responsibility in the workplace;
- Demonstrated ethical, social and professional responsibility consistent with professional societies;
- Worked effectively in teams, whether as a participant or as a leader;
- Grown through self-study, continuing education and professional development relevant to their profession.

The program can be successfully completed in eight full-time semesters with an average of 15 credits each semester. It is also possible for students to complete the degree on a part-time basis. The 120-credit degree requirement consists of Mason Core (p. 142) requirements, IT foundation and core courses, and courses required for the chosen IT concentration. At least 30 credits toward the BS degree must be earned at Mason, and at least 45 credits must be at or above the 300 level. Upper division courses in the program are taught at the Science and Technology campus, where many Department of Information Sciences and Technology faculty offices are located.
concentration courses. Furthermore, students must have a B or better in gateway courses for the respective concentration.

Course Repeat Policy
In addition to the University’s Undergraduate Course Repeat Policy, the following courses listed have additional repeat restrictions:

- A student who has taken IT 106 twice may not take IT 109 for their third attempt, nor will they be permitted to start over with three attempts of IT 109 in lieu of taking IT 106.
- A student who has taken IT 109 twice may not take IT 106 for their third attempt, nor will they be permitted to start over with three attempts of IT 106 in lieu of taking IT 109.
- A student who has taken IT 206 twice may not take IT 209 for their third attempt, nor will they be permitted to start over with three attempts of IT 209 in lieu of taking IT 206.
- A student who has taken IT 209 twice may not take IT 206 for their third attempt, nor will they be permitted to start over with three attempts of IT 206 in lieu of taking IT 209.
- A student who has taken IT 102 Discrete Structures twice may not take MATH 125 Discrete Mathematics I (Mason Core) for their third attempt, nor will they be permitted to start over with three attempts of MATH 125 in lieu of taking IT 102.
- A student who has taken MATH 125 twice may not take IT 102 for their third attempt, nor will they be permitted to start over with three attempts of IT 102 in lieu of taking MATH 125.

Termination from the Major
No math, science, or Volgenau School of Engineering course that is required for the major may be attempted more than three times. Those students who do not successfully complete such a course within three attempts will be terminated from the major. Undeclared students in the Volgenau School who do not successfully complete a course required for a Volgenau School major within three attempts will also be terminated.

In addition, students in the Volgenau School with evidence of continued failure to make adequate progress toward declaring or completing a Volgenau School major will also be terminated. Adequate progress is determined by the major program. For more information, see AP 5.2.4 Termination from the Major (https://catalog.gmu.edu/policies/academic/undergraduate-policies/#ap-5-2-4).

Once a student has attempted one of these courses twice unsuccessfully, the third attempt must be no later than the next semester of enrollment, excluding summers. Failure to take the course at that time will result in termination from the major. A third attempt of a Volgenau School of Engineering course requires support by the student’s major department as well as permission by the department offering the course. This permission is not guaranteed. If the student is unable to take the course when required, the student may request an extension to a future semester; extensions require approval of the student’s advisor, their department, and the Associate Dean for Undergraduate Programs. The deadline for extension requests is the add deadline for the semester in which the course is required.

A student may not declare any major in the Volgenau School of Engineering if the student has previously met the termination criteria for that major at any time, regardless of what the student’s major was at the time the courses were taken.

</tbody>
</table>

To fulfill the requirements for a concentration, students need 15 credits made up of four courses from their chosen concentration and a fifth course chosen from any of the five concentrations. Students may choose to have two concentrations. To be eligible, the student must have a B or better in the gateway course for each concentration. If two concentrations are declared, the student must take four courses in each concentration, for a total of eight different concentration courses.

### Concentrations

- Database Technology and Programming (DTP) (p. 1124)
- Health Information Technology (HIT) (p. 1124)
- Cyber Security (CYBR) (p. 1124)
- Network and Telecommunications (NTEL) (p. 1124)
- Web Development (WDEV) (p. 1125)

### Database Technology and Programming (DTP)

Select additional coursework to bring the total number of credits to 120

Total Credits 8-9

Accelerated Master’s

Information Technology, BS/Information Security and Assurance, Accelerated MS

Overview

Highly-qualified students in the Information Technology, BS (p. 1122) have the option of obtaining an accelerated Information Security and Assurance, MS (p. 1072).

For more detailed information, see AP6.7 Bachelor’s/Accelerated Master’s Degrees (p. 93). For policies governing all graduate degrees, see AP6 Graduate Policies (p. 90).

Admission Requirements

Students in the Information Technology, BS (p. 1122) program may apply to this option if they have earned 90 undergraduate credits with an overall GPA of at least 3.30. Criteria for admission are identical to criteria for admission to the Information Security and Assurance, MS (p. 1072) program.

Accelerated Option Requirements

Students must complete all credits that satisfy requirements for the BS and MS programs, with 6 credits overlapping with the two following courses:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>INFS 612</td>
<td>Principles and Practices of Communication Networks (satisfies IT 441 requirement in the BS program)</td>
<td>3</td>
</tr>
<tr>
<td>ISA 562</td>
<td>Information Security Theory and Practice (satisfies IT 462 requirement in the BS program)</td>
<td>3</td>
</tr>
</tbody>
</table>

Note:

Students must complete MATH 125 Discrete Mathematics I (Mason Core) (p. 142) as their discrete math requirement and IT 306 Data Structures and Algorithms in Java as part of their concentration requirements in the BS program.

Degree Conferral

Students must apply the semester before they expect to complete the BS requirements to have the BS degree conferred. In addition, at the beginning of the student’s final undergraduate semester, students must complete a Bachelor’s/Accelerated Master’s Transition form that is submitted to the Office of the University Registrar and the VSE Graduate Admissions Office. At the completion of MS requirements, a master’s degree is conferred.
Information Technology, BS/Information Systems, Accelerated MS

Overview
Highly-qualified students in the Information Technology, BS (p. 1122) have the option of obtaining an accelerated Information Systems, MS (p. 1075).

For more detailed information, see AP.6.7 Bachelor’s/Accelerated Master’s Degrees (p. 93). For policies governing all graduate degrees, see AP.6 Graduate Policies (p. 90).

Admission Requirements
Students in the Information Technology, BS (p. 1122) program may apply to this option if they have earned 90 undergraduate credits with an overall GPA of at least 3.30. Criteria for admission are identical to the criteria for admission to the Information Systems, MS (p. 1075) program.

Accelerated Option Requirements
Students must complete all credits that satisfy requirements for the BS and MS programs, with 6 credits overlapping with the following two courses:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>CS 550</td>
<td>Database Systems (satisfies IT 414 requirement in the BS program)</td>
<td>3</td>
</tr>
<tr>
<td>INFS 622</td>
<td>Information Systems Analysis and Design (satisfies as one DTP concentration course in the BS program)</td>
<td>3</td>
</tr>
</tbody>
</table>

Note:
Students must complete MATH 125 Discrete Mathematics I (Mason Core) (p. 142) as their discrete math requirement and IT 306 Data Structures and Algorithms in Java as part of their concentration requirements in the BS program.

Degree Conferral
Students must apply the semester before they expect to complete the BS requirements to have the BS degree conferred. In addition, at the beginning of the student’s final undergraduate semester, students must complete a Bachelor’s/Accelerated Master’s Transition form that is submitted to the Office of the University Registrar and the VSE Graduate Admissions Office. At the completion of MS requirements, a master’s degree is conferred.

Information Technology, BS/Software Engineering, Accelerated MS

Overview
Highly-qualified students in the Information Technology, BS (p. 1122) have the option of obtaining an accelerated Software Engineering, MS (p. 1081).

For more detailed information, see AP.6.7 Bachelor’s/Accelerated Master’s Degrees (p. 93). For policies governing all graduate degrees, see AP.6 Graduate Policies (p. 90).

Admission Requirements
Students in the Information Technology, BS (p. 1122) program may apply to this option if they have earned 90 undergraduate credits with an overall GPA of at least 3.30. Criteria for admission are identical to criteria for admission to the Software Engineering, MS (p. 1081) Program.

Accelerated Option Requirements
Students must complete all credits that satisfy requirements for the BS and MS programs, with 6 credits overlapping with the following two courses:

<table>
<thead>
<tr>

<td>Database Systems (satisfies IT 414 requirement in the BS program)</td>
<td>3</td>
</tr>
<tr>
<td>SWE 619</td>
<td>Object-Oriented Software Specification and Construction (satisfies as one DTP concentration course in the BS program)</td>
<td>3</td>
</tr>
</tbody>
</table>

Note:
Students must complete MATH 125 Discrete Mathematics I (Mason Core) (p. 142) as their discrete math requirement and IT 306 Data Structures and Algorithms in Java as part of their concentration requirements in the BS program.

Degree Conferral
Students must apply the semester before they expect to complete the BS requirements to have the BS degree conferred. In addition, at the beginning of the student’s final undergraduate semester, students must complete a Bachelor’s/Accelerated Master’s Transition form that is submitted to the Office of the University Registrar and the VSE Graduate Admissions Office. At the completion of MS requirements, a master’s degree is conferred.

Information Technology, BS/Digital Forensics and Cyber Analysis (title change pending SCHEV approval), Accelerated MS

Overview
Highly-qualified students in the Information Technology, BS (p. 1122) have the option of obtaining an accelerated Digital Forensics and Cyber Analysis, MS (p. 1095).

For more detailed information, see AP.6.7 Bachelor’s/Accelerated Master’s Degrees (p. 93). For policies governing all graduate degrees, see AP.6 Graduate Policies (p. 90).

Admission Requirements
Students in the Information Technology, BS (p. 1122) program may apply for this option if they have earned 90 undergraduate credits with an overall GPA of at least 3.25. Criteria for admission are identical to criteria for admission to the Digital Forensics and Cyber Analysis, MS (p. 1095) program.

Accelerated Option Requirements
Students must complete all credits that satisfy requirements for the BS and MS programs, with 6 credits overlapping with two of the following three courses:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>CFRS 500</td>
<td>Introduction to Forensic Technology and Analysis</td>
<td>3</td>
</tr>
</tbody>
</table>
### Degree Conferral

Students must apply the semester before they expect to complete the BS requirements to have the BS degree conferred. In addition, at the beginning of the student’s final undergraduate semester, students must complete a Bachelor’s/Accelerated Master’s Transition form that is submitted to the Office of the University Registrar and the VSE Graduate Admissions Office. At the completion of MS requirements, a master’s degree is conferred.

### Information Technology, BS/Applied Information Technology, Accelerated MS

**Overview**

Highly-qualified students in the Information Technology, BS (p. 1122) have the option of obtaining an accelerated Applied Information Technology, MS (p. 1118).

For more detailed information, see AP.6.7 Bachelor’s/Accelerated Master’s Degrees (p. 93). For policies governing all graduate degrees, see AP 6 Graduate Policies (p. 90).

**Admission Requirements**

Students in the Information Technology, BS (p. 1122) program may apply to this option if they have earned 90 undergraduate credits with an overall GPA of at least 3.30. Criteria for admission are identical to criteria for admission to the Telecommunications, MS (p. 1111) program.

**Accelerated Option Requirements**

Students must complete all credits that satisfy requirements for the BS and MS programs.

</tbody>
</table>

**Note:**

Students in the accelerated option who have passed IT 341 Data Communications and Network Principles with a grade of B or higher will not be required to take TCOM 530 Data Communications Fundamentals, which is listed in the MS TCOM core. Alternative sections of TCOM courses to satisfy requirements in the AIT undergraduate program may be made with the approval of the undergraduate academic advisor.

**Degree Conferral**

Students who are enrolled in the accelerated option must apply the semester before they expect to complete the BS requirements to have the BS degree conferred. In addition, at the beginning of the student’s final undergraduate semester, students must complete a Bachelor’s/Accelerated Master’s Transition form that is submitted to the Office of the University Registrar and the VSE Graduate Admissions Office. At the completion of MS requirements, a master’s degree is conferred.
Admissions Office. At the completion of MS requirements, a master's degree is conferred.

**Information Technology Minor**

**Banner Code:** INFT

**Academic Advising**

5400 Nguyen Engineering Building
Fairfax Campus
101 Bull Run Hall
Science and Technology Campus

Phone: 703-993-3565
Email: bsit@gmu.edu
Website: ist.gmu.edu/programs/undergraduate-programs/

The minor is designed primarily for students who desire to augment the knowledge gained through their major-related courses with a foundation of information technology (IT) topics and their application within organizations to achieve organizational objectives. Completing this minor provides students with the necessary skills to improve their attractiveness to employers in our technology-driven society. The minor requires a minimum of 18 credits, including 12 credits of core courses. Beyond these requirements, students must select two additional technical focus courses (6 credits) of which one course must be at the upper 300- or 400-level. Minimum 2.5 GPA is needed in completed 100- and 200-level IT core and foundation courses, and a minimum C in IT 106 or IT 109 is required in order to declare the IT minor. Minimum "C" grade in all IT courses is required to earn the IT minor. Students pursuing the IT minor should consult with an advisor to select their additional courses.

### Admissions & Policies

#### Admissions

**Declaration of Minor**

In order to declare the IT Minor, students must earn a minimum 2.5 GPA in completed 100- and 200-level IT core courses required for the minor (from IT 102 or MATH 125, IT 104, IT 105, IT 106 or IT 109, and any technical focus courses being applied to the IT minor), and a minimum C in IT 106 Introduction to IT Problem Solving Using Computer Programming or IT 109 Introduction to Computer Programming. Grades in approved course substitutions taken at Mason will be included.

Note: IT courses at the 300 and 400 level are restricted to students who have declared an Information Technology major, minor, or undergraduate certificate, and to students in the BAS or BIS program. IT 293 Applied IT: Junior Transition and IT 343 IT Project Management are restricted to students who have declared an Information Technology major. Students who have declared an Information Technology Minor will not be permitted to take IT 293 or IT 343.

#### Policies

**Grades**

Students must have a C or better in any course that satisfies a prerequisite for an IT course. To graduate with the Information Technology Minor, students must have a GPA of 2.00 or better across all courses applied to the Information Technology Minor. Additionally, if a technical focus course requires a minimum B in a specified course, students will be held to meeting this prerequisite.

For policies governing all minors, see the Undergraduate Policies (p. 87) section of this catalog.

Students pursuing only the undergraduate certificate in information technology will not maintain full-time status which requires a minimum of 12 credits per semester.

### Requirements

#### Certificate Requirements

Total credits: 24-28

This certificate may be pursued on a part-time basis only.

#### Requirements

Students must complete all requirements within a concentration.

#### Concentration in General (GEN)

The Information Technology certificate is designed primarily for those students who have earned a bachelor’s degree or current undergraduate students who desire deeper knowledge than what can be accomplished through the IT minor. It allows students to augment the knowledge gained through their major-related courses with a foundation of information technology (IT) topics and their application within organizations to achieve organizational objectives. Completing this undergraduate certificate provides students with the necessary skills to improve their attractiveness to employers in our technology-driven society. The General Concentration requires a minimum of 24 credits, including 15 credits of required courses. Beyond these requirements, students must select three additional IT courses (9 credits, at least 3 upper division credits). Students pursuing the IT undergraduate certificate should consult with an advisor to select their additional courses.

Concentration in Entrepreneurship (ENTR)

The Information Technology certificate with Entrepreneurship concentration prepares IT and engineering students for successful careers as entrepreneurs in the area of information technology. Specifically, they will acquire a unique body of knowledge related to innovation, both on the information technology/engineering/inventive side and on the entrepreneurial side, which will give them a competitive advantage in the difficult market where only very few new companies are able to survive and grow.

This certificate and concentration are designed for students who are working on or possess an undergraduate degree in information technology, computer science, engineering or a related domain and want to focus on IT innovation and entrepreneurship. The Concentration in Entrepreneurship requires a minimum of 28 credits, including 9 credits of required courses, 12 elective credits, and 7 capstone credits.

Students enrolled in this certificate and concentration must be part of an entrepreneurship team (E-Team) with the goal of creating an IT venture. The E-Teams will be mentored by faculty associated with the certificate. Students who will create, or be a core team member of, a start-up company that has cumulated revenues and funding of $10,000 during their enrollment in the certificate will graduate with a Certificate of Excellence in IT Entrepreneurship.

1 Section on IT Entrepreneurship.
Mechanical engineering is the broadest of the engineering disciplines, and traces its origins to antiquity. The discipline of mechanical engineering involves anything that moves or uses energy. There are two major stems in mechanical engineering: mechanical systems and thermal fluid systems. Mechanical engineers design, build, and analyze complex devices, systems, and processes that involve the conversion of energy from one form to another, the production of work, and the transport of energy and mass from one location to another.

Today, the scope of the mechanical engineering discipline is ever-expanding. Mechanical engineers work in industries that include, but are not limited to, the aerospace, bio-pharmaceutical, civil, computer and cyber, biomedical, industrial, materials and manufacturing industries. They provide innovative solutions for contemporary problems and address problems yet identified. For example, 3-D printed components are readily being used in manufactured components, as part of medical implants and devices and even in structural applications. The mechanical performance of the components will likely vary dramatically from the ideal laboratory environment in which they were produced. Mechanical engineers are needed to characterize these aggressive environments in which they may be used, design test matrices to study their performance, and determine environmentally-based mechanical properties needed for design.

The Mechanical Engineering, BS is designed to support the goal of educating leaders for the future – men and women capable of meeting the needs of society. The curriculum is designed to provide its graduates with the technical skills and competencies to analyze and design both mechanical and thermal systems, and to give them an in-depth experience in one of these two areas. With a solid foundation in these discipline-specific areas, graduates of the program will be well-prepared to enter any of the industries identified above. All students will take core courses in both content areas through their junior year. During their senior year, they will have the opportunity to focus their program of study with a design elective and three technical electives. These electives can be arranged to focus on areas such as advanced manufacturing, aerospace, bioengineering, robotics, or sustainable energy.

Website: mechanical.gmu.edu

Today, the role of mechanical engineer is ever expanding in order to find innovative solutions for contemporary problems, and to address problems yet to be identified. To meet the growing demands of worldwide energy needs spurred by population growth and dwindling supplies of fossil fuels, for instance, mechanical engineers seek innovations in nuclear energy, bio-fuels, wind, and tidal energies to build an energy portfolio that exploits these seemingly limitless resources. From product design, which spans from biomedical devices to turbo-machinery, to manufacturing, which develops machines and systems needed to process raw materials into these products, an awareness of the benefits of advanced materials for sensing and monitoring the health of these systems and an awareness of the stealth threats to manufacturing brought on by an ever present cyber threat are in the minds of the mechanical engineers. Now more mechanical engineers oversee the operations and management of large systems along with the fiscal and human resources needed to run them.

James Michener once said, “Scientists dream about doing great things. Engineers do them.” Mechanical engineers use science to advance technologies and to develop products for the benefit of society, in a discipline which dates back to the earliest of times in civilization. The major in mechanical engineering has three program education objectives, namely:

• Graduates have demonstrated success as a mechanical engineer or their chosen career field;
• Graduates have advanced their educational pursuits through graduate education, professional registration, or similar means;
• Graduates have advanced their careers by engaging in professional society participation and community service outreach.

The bachelor’s program in Mechanical Engineering is accredited by the Engineering Accreditation Commission of ABET, http://www.abet.org.
Admissions & Policies

Policies

For policies governing all undergraduate degrees, see AP.5 Undergraduate Policies (p. 87).

Change of Major

See Change of Major (p. 1013) for more information.

Grade Requirements and Advising

Degree requirements include 121 credits distributed in three main areas: mechanical engineering, mathematics and basic science, and humanities and social sciences. Students must complete all math, science and Volgenau School of Engineering courses presented as part of the required 121 credits for the degree with a grade of C or better.

Students are required to see their faculty advisor at least once each year to plan their curriculum.

Termination from the Major

No math, science, or Volgenau School of Engineering course that is required for the major may be attempted more than three times. Those students who do not successfully complete such a course within three attempts will be terminated from the major. Undeclared students in the Volgenau School who do not successfully complete a course required for a Volgenau School major within three attempts will also be terminated.

In addition, students in the Volgenau School with evidence of continued failure to make adequate progress toward declaring or completing a Volgenau School major will also be terminated. Adequate progress is determined by the major program. For more information, see AP.5.2.4 Termination from the Major (https://catalog.gmu.edu/policies/academic/undergraduate-policies/#ap-5-2-4).

Once a student has attempted one of these courses twice unsuccessfully, the third attempt must be no later than the next semester of enrollment, excluding summers. Failure to take the course at that time will result in termination from the major. A third attempt of a Volgenau School of Engineering course requires support by the student’s major department as well as permission by the department offering the course. This permission is not guaranteed. If the student is unable to take the course when required, the student may request an extension to a future semester; extensions require approval of the student’s advisor, their department, and the Associate Dean for Undergraduate Programs. The deadline for extension requests is the add deadline for the semester in which the course is required.

Students who have been terminated from a Volgenau School of Engineering major may not register for a Volgenau School course without permission of the department offering the course. This applies to all undergraduate courses offered by the Volgenau School except IT 104 Introduction to Computing (Mason Core) (p. 142) and STAT 250 Introductory Statistics I (Mason Core) (p. 142).

A student may not declare any major in the Volgenau School of Engineering if the student has previously met the termination criteria for that major at any time, regardless of what the student’s major was at the time the courses were taken.

Total Credits 18

1 Both lower and upper level requirement.

Writing Intensive Requirement

Mason’s writing-intensive requirement is satisfied by ME 444 Mechanical Design II (Mason Core) (p. 142).

Capstone Experience Requirement

Mason’s synthesis requirement for mechanical engineering majors is satisfied by ME 444 Mechanical Design II (Mason Core) (p. 142).

Accelerated Master’s

Mechanical Engineering, BS/Applied and Engineering Physics, Accelerated MS

Overview

This program allows academically strong undergraduates with a demonstrable commitment to research to obtain the Mechanical Engineering, BS (https://catalog.gmu.edu/colleges-schools/engineering/mechanical/mechanical-engineering-bs) and Applied and Engineering Physics, MS (p. 759) degrees by successfully completing 145 credits. Upon completion, students are well-prepared for entering into the professional workforce, or a PhD program in physics or a related engineering discipline.

Admitted students take selected graduate courses during their senior year and are able to use up to 6 graduate credits in partial satisfaction of requirements for the undergraduate degree. Upon completion and conferral of the bachelor’s degree and with satisfactory performance (grade of ‘B’ or better) in each of the graduate courses, students are given advanced standing in the master’s program and complete an additional 24 credits to receive the master’s degree.
For more detailed information, see AP6.7 Bachelor’s/Accelerated Master’s Degrees (p. 93). For policies governing all graduate degrees, see AP6 Graduate Policies (p. 90).

**Application Requirements**

Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in the Graduate Admission Policies (p. 68) section of this catalog.

Successful applicants majoring in Mechanical Engineering will have completed at least 90 credits toward their undergraduate degree with an overall GPA of at least 3.00, and the following courses with a GPA of 3.00 or better:

</tbody>
</table>

One or more recommendation letters from one or more research supervisors are also required. Interested applicants majoring in Mechanical Engineering, BS (https://catalog.gmu.edu/colleges-schools/engineering/mechanical/mechanical-engineering-bs) should submit a letter to the undergraduate Mechanical Engineering coordinator and the Physics Graduate Coordinator, respectively, requesting admission along with the aforementioned recommendation letter(s). Contact the Mechanical Engineering undergraduate and the Physics graduate coordinator for further details.

**Accelerated Option Requirements**

At the beginning of the student’s final undergraduate semester, students must submit a bachelor’s/accelerated master’s transition form (http://registrar.gmu.edu/forms) to the College of Science’s Office of Academic and Student Affairs (https://cos.gmu.edu/about/contact-us). Students must begin their master’s program in the semester immediately following conferral of the bachelor’s degree.

Students must maintain an overall GPA of 3.00 or higher in graduate coursework.

**Reserve Graduate Credit**

While still in undergraduate status, a student may take a maximum of six additional graduate credits as reserve graduate credits and apply those credits to a master’s program. Reserve graduate credits are not counted toward the 120 credits required in the undergraduate degree.

**Mechanical Engineering, BS/Computational Science, Accelerated MS**

This option enables enthusiastic, highly qualified, undergraduates to obtain the Mechanical Engineering, BS (https://catalog.gmu.edu/colleges-schools/engineering/mechanical/mechanical-engineering-bs) and the Computational Science, MS (p. 677) within the accelerated time frame of five years. The program requires 144 credits total, allowing students to undertake graduate coursework during their final year in the bachelor’s degree. Upon completion of this 144 credit BS/MS combined program, students are exceptionally well prepared for undertaking doctoral studies or entering the professional workforce.

For more detailed information, see AP6.7 Bachelor’s/Accelerated Master’s Degrees (p. 93). For policies governing all graduate degrees, see AP6 Graduate Policies (p. 90).

**Application Requirements**

Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in the Graduate Admission Policies (p. 68) section of this catalog. Application information for this Accelerated Master’s program can be found on the Department of Computational and Data Sciences (http://cos.gmu.edu/cds/academic-programs) website. Applicants must have an overall undergraduate GPA of at least 3.00 and have completed at least 90 credits. Additionally, applicants will have completed the following courses with a GPA of 3.00 or better:

<table>

Total Credits 22

Students must maintain an overall GPA of 3.00 or higher in graduate coursework and should consult with their faculty advisor to coordinate their academic goals within the modeling and simulation or data science emphases of the Computational Science, MS (p. 677).

1. GRE-general scores are waived for graduates of BS degrees from any program in the College of Science or the Volgenau School of Engineering at George Mason University.

**Reserve Graduate Credit**

While in undergraduate status, a student may take a maximum of six graduate credits as reserve graduate credits and apply those credits to a master’s program. Reserve graduate credits are not counted toward the 120 credits required in the undergraduate degree.

**Mechanical Engineering, BS/Operations Research, Accelerated MS**

Overview

Highly-qualified students in the Mechanical Engineering, BS (p. 1177) have the option of obtaining an accelerated Operations Research, MS (p. 1153).

For more detailed information, see AP6.7 Bachelor’s/Accelerated Master’s Degrees (p. 90). For policies governing all graduate degrees, see AP6 Graduate Policies (p. 90).
Admission Requirements
Mason undergraduate students majoring in Mechanical Engineering, BS (p. 1177) may apply to this option if they have earned 90 undergraduate credits with an overall GPA of at least 3.30 and completed all MATH and PHYS requirements. Criteria for admission are identical to criteria for admission to the Operations Research, MS (p. 1153) program.

Students must additionally complete MATH 203 Linear Algebra prior to applying for the graduate program.

Accelerated Options Requirement
Students must complete all credits that satisfy requirements for both the BS and MS programs. Up to two courses (6 credits) of approved master’s level courses taken as part of the undergraduate degree may be applied to the graduate degree. The courses selected for this purpose must be approved by the academic advisors of both the BS and MS programs and by the SEOR department chair. For the BS programs that allow undergraduate electives from the department of system engineering and operations research, the students may chose the graduate version of such elective courses to replace the corresponding undergraduate courses.

Degree Conferral
Students must apply the semester before they expect to complete the BS requirements to have the BS degree conferred. In addition, at the beginning of the student’s final undergraduate semester, students must complete a Bachelor’s/Accelerated Master’s Transition form that is submitted to the Office of the University Registrar and the VSE Graduate Admissions Office. At the completion of MS requirements, a master’s degree is conferred.

Mechanical Engineering Minor

Email: mechengr@gmu.edu
Website: mechanical.gmu.edu

Mechanical Engineering is the broadest of the engineering disciplines, concerned with anything that moves or uses energy. There are two major stems in mechanical engineering: mechanical systems and thermal fluid systems. Mechanical engineers design, build, and analyze complex devices, systems and processes that involve the conversion of energy from one form to another, the production of work, and the transport of energy and mass from one location to another. This minor provides a foundation in mechanical engineering and is most appropriate for students with a strong mathematics and science background, such as a major in another engineering or science field. The minor is administered by the Volgenau School Dean’s office.

Admissions & Policies
Admissions
To be admitted to the minor, students must have completed MATH 114 Analytic Geometry and Calculus II and PHYS 160 University Physics I (Mason Core) (p. 142)/PHYS 161 University Physics I Laboratory (Mason Core) (p. 142) with a grade of C or better.

Policies
The minor in mechanical engineering consists of a minimum of 20-21 credit hours of coursework. All students must complete 14 credit hours of core courses. They must also complete two additional elective courses. All courses must be completed with a grade of C or better.

Eight credits of coursework must be unique to the minor. For policies governing all minors, see AP5.3.4 Minors (p. 90).

For policies governing all undergraduate programs, see AP5 Undergraduate Policies (p. 87).

Department of Statistics

Phone: 703-993-3645
Email: statistics@gmu.edu
Website: statistics.gmu.edu

Statistical methods and methods for data analysis are crucial for all disciplines in which data are present. As collection of data grows in all sectors of employment, the Department of Statistics prepares students to meet the challenges of data collection, data reduction, interpretation, and analysis.

Department Offerings

Courses

The department offers a variety of introductory courses and more advanced course work in specialized statistical methodology and applications. The focus of the department’s offerings is applied, computational, and theoretical, with special emphasis on biostatistics, graphics and visualization, federal statistics, and data analytics.

Undergraduate Programs

The Department of Statistics offers an undergraduate Statistics, BS (p. 1146), as well as a Data Analysis Minor (p. 1140) and a Statistics Minor (p. 1150). A variety of advanced undergraduate courses are also available for inclusion in other degree programs.

Graduate Programs

The department also administers three master’s degree programs: Statistical Science, MS, (p. 1141) Biostatistics, MS (p. 1138) and Data Analytics Engineering, MS. (p. 1019) The Data Analytics Engineering, MS (p. 1019) is a multidisciplinary program with courses and concentrations offered by many participating departments in the Volgenau School of Engineering.

Two dual master’s degree programs, the Mathematics and Statistical Science Dual-Degree, MS (p. 1142) and the Operations Research and Statistical Science Dual-Degree, MS (p. 1142) are offered in conjunction with the Mathematical Sciences (p. 740) and Systems Engineering and Operations Research (p. 1151) departments respectively.

Finally, the Statistical Science, PhD (p. 1145) represents the highest academic attainment for a statistician and, as such, requires in-depth knowledge of modern statistical theory and practice.

Applied Statistics Graduate Certificate

Banner Code: VS-CERG-ASTA

Phone: 703-993-4835
Email: statistics@gmu.edu
This graduate certificate trains students in data analysis and statistical methodology. Also, it provides a clear record of additional instruction in statistics for future graduate programs or employers.

The General Concentration is intended to complement PhD and MS programs outside the Department of Statistics. It is also intended to be responsive to the needs of those who teach or work in government/industry and want to increase their knowledge of statistics. The certificate emphasizes the application of statistical tools, not theory. As such, there are no required prerequisite math courses, although one semester of calculus is strongly recommended.

The Federal Statistics Concentration is targeted at upgrading the skills of current practitioners. The federal statistical system is a complex data collection and analysis system that requires a wide variety of multidisciplinary skills for its maintenance. The federal statistics certificate is intended to respond to the need for broad training in statistics, survey methods, and data analysis, including graphics and data visualization. The program is extremely flexible and can be tailored to the needs of students within the federal statistical sector. It is also intended to be responsive to the needs of those in state and local governments, and those in the private sector involved in the collection, interpretation, or statistical analysis of federal data.

Admissions & Policies

Admissions

General Concentration
Applicants should have an undergraduate degree from an accredited institution, with a minimum overall GPA of at least 3.00 (on a 4.00 scale). No specific undergraduate degree is required. Applicants are expected to have basic computer literacy. Successful completion of an undergraduate course in statistics is required for admission. One semester of calculus is strongly recommended.

Federal Statistics Concentration
Potential candidates must hold a bachelor's degree and have taken at least two courses in calculus and one course in calculus-based probability and statistics. These minimal course requirements are normally satisfied by students who have successfully completed courses equivalent to the following Mason courses: MATH 113 Analytic Geometry and Calculus I (Mason Core) (p. 142), MATH 114 Analytic Geometry and Calculus II, and STAT 344 Probability and Statistics for Engineers and Scientists I. Candidates must also be computer literate.

Certificate Requirements
Total credits: 12

This certificate may be pursued on a part-time basis only.

Total Credits 12

¹ STAT 535 is the prerequisite for all other courses besides STAT 574 and STAT 674. A student with sufficient background in statistics may seek a waiver of the STAT 535 prerequisite from the appropriate course instructor.

Enrollment in STAT 574 requires special permission from the course instructor.

Concentration in Federal Statistics (FSS)
Some courses may have prerequisites beyond minimal admission requirements for which students must qualify or seek a waiver from the course instructor.

Total Credits 9

¹ All of these certificate courses may be used for credit toward the Statistical Science, MS (p. 1141).

Electives
The MS in Biostatistics will allow students to specialize in the design and analysis of health-related and biological studies, while maintaining the rigor and technical training of the Statistical Science master’s program.

In this degree, students will take a statistics core and a "bio" core, involving courses in public health, biology, and clinical medicine (including ethics). It also involves a research core which allows students to solve real data problems in the biological or health area and collaborate with other scientists in an interdisciplinary team. Finally, students will choose from electives in bioinformatics, global and community health, or targeted statistics courses.

This graduate degree prepares students for analyzing difficult data specific to biology and health. The program, with its research core, will also be sufficiently rigorous for students who wish to pursue a PhD in Biostatistics.

Admissions & Policies

Admissions
In addition to satisfying general admission requirements for graduate study, all applicants are expected to have basic computer literacy. They also must hold a bachelor's degree from an accredited institution in a field that includes coursework in multivariable calculus, matrix or linear algebra, statistics, and calculus-based probability. Applicants with degrees in such fields as mathematics, statistics, and some engineering programs usually meet these requirements. For applicants with degrees in other fields, these requirements are normally satisfied if students have successfully completed courses equivalent to the listed Mason courses.

Note that coursework taken to correct deficiencies in undergraduate preparation is not counted toward the degree.

Requirements

Degree Requirements
Total credits: 30
In addition to meeting general requirements that apply to master's degrees at Mason, all students must complete the 21-credit core requirements for the degree. A grade of "B-" or better is required in all 500-level statistics core courses. Students build on these core requirements by choosing 9 credits of electives.

Core Courses
Statistics Core
The Statistics core provides the basic probability, statistical analysis techniques, and statistical modeling tools that all biostatisticians must know, and provides a basis for higher level elective coursework.

Bio Core
The Bio core is designed to provide the biological background necessary for biostatisticians. These courses offer preparation in the areas of public health and epidemiology (GCH 712 Introduction to Epidemiology), bioengineering (BENG 501 Bioengineering Research Methods, BENG 538 Medical Imaging) as well as bioinformatics (BINF 630 Bioinformatics Methods). In addition, this portion of the core curriculum ensures that students are trained in the statistical techniques required for clinical medicine, and includes material on ethics in research (STAT 560 Biostatistical Methods).

Research Core
The Research core has been designed to assist students in the development of the requisite skills for careers in consulting or research. These courses will allow students to consult directly with biologists and medical and public health scientists on real data problems and provide opportunities to write reports and give oral presentations.
Electives
The electives labeled STAT are specifically chosen from the department's master's-level electives to include techniques that are particularly important for biostatisticians.

Accelerated Master’s

Bioengineering, BS/Biostatistics, Accelerated MS

Overview:
Highly-qualified students in Bioengineering, BS (p. 1032) have the option of obtaining an accelerated Biostatistics, MS (p. 1138). Students in an accelerated degree program must fulfill all university requirements for the master's degree.

For more detailed information, see AP6.7 Bachelor’s/Accelerated Master’s Degrees (https://catalog.gmu.edu/policies/academic/graduate-policies/#ap-6-7). For policies governing all graduate degrees, see AP6 Graduate Policies (https://catalog.gmu.edu/policies/academic/graduate-policies).

Admission Requirements:
Students enrolled in a BS degree in Bioengineering (p. 1032) may apply to this option if they have earned 90 undergraduate credits with an overall GPA of 3.00. Students must have successfully completed MATH 213 Analytic Geometry and Calculus III and BENG 320 Bioengineering Signals and Systems. Criteria for admission are identical to criteria for admission to the Biostatistics, MS (p. 1138) program.

Accelerated Option Requirements:
Students must complete all requirements for the BS and MS programs, with 6 credits overlap.

Students register for the following 500-level courses, which will also count towards the technical elective requirements of their undergraduate degree:

- BENG 501 Bioengineering Research Methods 3
- STAT 554 Applied Statistics I 3

Note:
Students are permitted to take additional graduate basic courses in their undergraduate programs. In such cases, those classes cannot be counted toward requirements for the MS.

Degree Conferral:
Students must apply the semester before they expect to complete the BS requirements to have the BS degree conferred. In addition, at the beginning of the student’s final undergraduate semester, students must complete a Bachelor’s/Accelerated Master’s Transition form (https://registrar.gmu.edu/forms) that is submitted to the Office of the University Registrar and the VSE Graduate Admissions Office. At the completion of MS requirements, a master’s degree is conferred.

Statistics, BS/Biostatistics, Accelerated MS

Overview:
Highly-qualified students in Statistics, BS (p. 1146) have the option of obtaining an accelerated Biostatistics, MS (p. 1138). Students in an accelerated degree program must fulfill all university requirements for the master's degree.

For more detailed information, see AP6.7 Bachelor’s/Accelerated Master’s Degrees (https://catalog.gmu.edu/policies/academic/graduate-policies/#ap-6-7). For policies governing all graduate degrees, see AP6 Graduate Policies (https://catalog.gmu.edu/policies/academic/graduate-policies).

Admission Requirements:
Students enrolled in a BS degree in Statistics may apply to this option if they have earned 90 undergraduate credits with an overall GPA of 3.00.

Accelerated Option Requirements:
Students must complete all requirements for the BS and MS programs, with 6 credits overlap.

Students must complete all credits that satisfy requirements for the BS and MS programs, with 6 credits overlapping with grades of B or better in two 500-level STAT selected from STAT 544 (https://catalog.gmu.edu/search/?P=STAT%20544) Applied Probability, STAT 554 (https://catalog.gmu.edu/search/?P=STAT%20554) Applied Statistics I, and STAT 560, Biostatistical methods.

Degree Conferral:
Students must apply the semester before they expect to complete the BS requirements to have the BS degree conferred. In addition, at
the beginning of the student’s final undergraduate semester, students must complete a Bachelor’s/Accelerated Master’s Transition form that is submitted to the Office of the University Registrar and Graduate Recruitment and Enrollment Services. At the completion of MS requirements, a master's degree is conferred.

**Data Analysis Minor**

Banner Code: DATA

Phone: 703-993-3645
Email: statistics@gmu.edu
Website: statistics.gmu.edu

The minor provides students with a background in data analysis and statistical methodology. It is intended to complement undergraduate degree programs such as computer science, economics, environmental engineering, geography, mathematics, nursing, psychology, public administration, sociology, and systems engineering.

**Admissions & Policies**

**Policies**

For policies governing all minors, see AP.5.3.4 Minors (p. 90).

**Program Requirements**

The minor requires 15 credits: a core sequence of 6 credits, plus 9 credits of electives. Grades of C or better are required in all courses. At least 3 of the 9 elective credits must be in STAT (p. 2220) or CDS (p. 1453) courses numbered above 300. At least 8 credits must be in courses not required by the student's major.

**Minor Requirements**

Total credits: 15

**Core Sequence Credits**

Select one sequence from the following: \(^1\)

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>STAT 250</td>
<td>Introductory Statistics I (Mason Core) (p. 142)</td>
<td>3</td>
</tr>
<tr>
<td>STAT 350</td>
<td>Introductory Statistics II</td>

Statistical Science, MS

Admissions & Policies

Admissions

In addition to satisfying general admission requirements for graduate study, all applicants are expected to have basic computer literacy and some experience using statistical software (such as SAS and R). They also must hold a bachelor's degree from an accredited institution in a field that includes coursework in multivariable calculus, matrix or linear algebra, statistics, calculus-based probability, and statistical software. These requirements are normally satisfied if students have successfully completed courses equivalent to the following Mason courses:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>MATH 113</td>
<td>Analytic Geometry and Calculus I (Mason Core)</td>
<td>4</td>
</tr>
<tr>
<td>MATH 114</td>
<td>Analytic Geometry and Calculus II</td>
<td>4</td>
</tr>
<tr>
<td>MATH 213</td>
<td>Analytic Geometry and Calculus III</td>
<td>3</td>
</tr>
<tr>
<td>MATH 203</td>
<td>Linear Algebra</td>
<td>3</td>
</tr>
<tr>
<td>or MATH 321</td>
<td>Abstract Algebra</td>
<td></td>
</tr>
<tr>
<td>STAT 250</td>
<td>Introductory Statistics I (Mason Core)</td>
<td>3</td>
</tr>
<tr>
<td>or STAT 344</td>
<td>Probability and Statistics for Engineers and Scientists I</td>
<td></td>
</tr>
<tr>
<td>STAT 346</td>
<td>Probability for Engineers</td>
<td>3</td>

</tr>
<tr>
<td>STAT 362</td>
<td>Introduction to Computer Statistical Packages</td>
<td>3</td>
</tr>
</tbody>
</table>

Coursework taken to correct deficiencies in undergraduate preparation is not counted toward the degree.

Specific application deadlines and requirements are available through the Office of Graduate Admissions.

Requirements

Degree Requirements

Total credits: 30

In addition to meeting general requirements that apply to master’s degrees at Mason, all students must complete the 15-credit core requirements for the degree. Grades of B- or better are required in three of the core courses: STAT 544 (Applied Probability), STAT 554 (Applied Statistics I), and STAT 654 Applied Statistics II. Students build on these core requirements by choosing 9 credits of methodology courses and 6 credits of electives.

Students select either the professional or research option, depending on career ambitions. The professional option provides MS degree qualifications to those seeking an expanded knowledge base in modern statistical theory and practice but do not wish to pursue a research career. The research option is for students planning to continue with a PhD degree, or begin/continue careers in statistical methodology research.

Professional Option

The professional option focuses on completing coursework in modern statistical theory and practice. 30 credits are required for the degree: 15 credits of core courses (taken by all MS students), 9 credits of methodology courses, and 6 credits of electives.

Students who select the professional option may elect to complete a master’s research project resulting in a technical report. This report is not an original research report but a scholarly essay on a topic of current interest in the statistical science discipline. The technical report is usually about 20 to 25 pages long and demonstrates the student’s ability to read and synthesize current technical literature into a scholarly essay. The report is evaluated by the student’s adviser, taking into account the comprehensiveness of the coverage of the scientific literature, the accuracy of presentation and interpretation, and the literary style. Students are notified of their evaluations, and they may be required to revise their report to further develop their skills in preparing reports on technical subjects. The report is usually written in the context of 3 credits of STAT 798 Master’s Research Project, which count as elective credits. Students opting not to complete a research project must take 30 credits of coursework.

Research Option

The research option requires 30 credits, including 6 credits that must be in independent research (thesis). Research is done under the guidance of a faculty member. Research may be carried out at Mason or, if appropriate, at nearby facilities. For example, students may pursue research at their place of employment on topics of interest to their employer, provided the research meets the standards of the university. The thesis is usually written in the context of 6 credits of STAT 799 Master’s Thesis, which count as elective credits. The remaining 24 credits include the 15 core credits and 9 methodology credits.

In addition to satisfying general university requirements for a master’s degree, candidates who select the research option must submit a thesis based on the research to the student’s thesis committee, which must give preliminary approval. The composition and appointment of this committee follows graduate program policies.

Candidates also must pass a final oral exam that concentrates on, but is not limited to, the area on which the thesis is written. The exam is administered by the student’s thesis committee, and all interested members of the graduate faculty are invited to attend and participate in the questioning. The thesis committee makes the final decision on whether the candidate passes or fails.

Core Courses

The core coursework covers the basic elements of statistics at the graduate level. STAT 544 Applied Probability covers the major
The statistical inference framework for statistical theory and practice. STAT 652 Statistical Inference provides basic statistical theory. After completing this course, students have the theoretical basis from which statistical methods are derived.

STAT 554 Applied Statistics I is a survey of statistical methods that have become the backbone of statistical practice. Focus in this course is on techniques that quantify random behavior. STAT 654 Applied Statistics II provides an overview of principles of statistical modeling.

The final core course is STAT 634 Case Studies in Data Analysis, which is a writing intensive course that serves as a capstone experience. Students synthesize methods and ideas acquired in their coursework in a statistical consulting environment.

**Notes:**

- Credit toward the MS in Statistical Science will not be given for both STAT 515 Applied Statistics and Visualization for Analytics and STAT 663 Statistical Graphics and Data Exploration I.
- Credit toward the MS in Statistical Science will not be given for both MATH 654 Construction and Evaluation of Actuarial Models II and STAT 668 Survival Analysis.
- A student concurrently enrolled in the Actuarial Sciences Graduate Certificate (p. 742) and the MS in Statistical Science may count MATH 555 Actuarial Modeling I and MATH 556 Actuarial Modeling II as elective courses and may count MATH 653 Construction and Evaluation of Actuarial Models I and MATH 654 Construction and Evaluation of Actuarial Models II as methodology courses. The Graduate Certificate in Actuarial Sciences (p. 742) must be completed prior to or concurrently with the MS in Statistical Science. Otherwise, at most two of MATH 555 Actuarial Modeling I, MATH 556 Actuarial Modeling II, MATH 653 Construction and Evaluation of Actuarial Models I, and MATH 654 Construction and Evaluation of Actuarial Models II can be counted toward the MS in Statistical Science as elective courses; none can be applied as methodology courses.

**Mathematics and Statistical Science Dual-Degree MS**

This program allows students to earn an MS in Mathematics (p. 754) and an MS in Statistical Science (p. 1141) by completing 48 credits of coursework in both areas instead of the 60 that would be required if the degrees were sought independently.

**Admission Requirements**

Applicants must satisfy admission requirements for both the MS in Mathematics (p. 754) and the MS in Statistical Science (p. 1141) programs. A joint faculty committee from the Department of Mathematical Sciences (p. 740) and the Department of Statistics (p. 1136) make final admission decisions into the dual-degree program.

Operations Research and Statistical Science Dual-Degree MS

This program allows students to earn an MS in Operations Research (p. 1153) and an MS in Statistical Science (p. 1141) by completing 48 credits of coursework in both areas instead of the 60 that would be required if the degrees were sought independently.

Admission Requirements

Applicants must satisfy admission requirements for the MS in Operations Research (p. 1153) Program and the MS in Statistical Science (p. 1141) Program. A joint faculty committee from the Statistics and Systems Engineering and Operations Research Departments make final admission decisions into the dual-degree program.

Elective Credits in OR Courses

Select 12 elective credits in OR courses at the 600 level, including at least one deterministic methods course and at least one stochastic methods course:

Deterministic Methods Courses:
- OR 641: Linear Programming
- OR 642: Integer Programming
- OR 643: Network Modeling
- OR 644: Nonlinear Programming

Stochastic Methods Courses:
- OR 645: Stochastic Processes
- OR 647: Queuing Theory
- OR 674: Dynamic Programming
- OR 675: Reliability Analysis
- SYST 664: Bayesian Inference and Decision Theory

Total Credits: 12

Elective Credits in STAT Courses

Select 9 elective credits from any STAT courses numbered 540-775

Total Credits: 9

Notes:

- Students currently enrolled in one of the MS programs must declare pursuit of the dual MS within one year of matriculation into the first MS program.
- A maximum of 6 credits across the two disciplines may be in independent research (thesis). The requirements for independent research are the same as detailed for the associated MS program.
- Students in either the BS (selected)/Operations Research, Accelerated MS program (p. 1156) or the BS (selected)/Statistical Science, Accelerated MS program (p. 1144) cannot get a reduction of 6 credits toward this dual degree. Students who want to proceed to a PhD degree will only be able to waive the number of credits specified in the associated PhD degree requirements, even though they will have 48 credits at the MS level.
- If a student decides not to complete the required 48 credits, a single MS degree will not be granted unless the student fulfills the requirements for the MS in Operations Research (p. 1153) or the MS in Statistical Science (p. 1141).
- Once a student receives one of the MS degrees from either department, the student will no longer be eligible for the reduction in credit (i.e., will need to complete 30 credits) if the student later decides to earn the other MS degree.
Accelerated Master's

BS (selected)/Statistical Science, Accelerated MS

Overview
Highly-qualified students in BS programs have the option of applying to the accelerated Statistical Science, MS (p. 1141) program.

For more detailed information, see AP.6 Bachelor's/Accelerated Master's Degrees (p. 93). For policies governing all graduate degrees, see AP6 Graduate Policies (p. 90).

Admission Requirements
No specific undergraduate BS degree is required. Students enrolled in any BS degree may apply to the accelerated Statistical Science, MS (p. 1141) program if such an accelerated Statistical Science, MS pathway is allowable from the student's BS program, which will be determined by the academic advisors of both the BS and MS programs; and if they have earned 90 undergraduate credits with an overall GPA of 3.00. Students must have successfully completed the following Mason courses each with a grade of C or better prior to admission to the accelerated program:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>MATH 213</td>
<td>Analytic Geometry and Calculus III</td>
<td>3</td>
</tr>
<tr>
<td>MATH 203</td>
<td>Linear Algebra</td>
<td>3</td>
</tr>
<tr>
<td>or MATH 321</td>
<td>Abstract Algebra</td>
<td></td>
</tr>
<tr>
<td>STAT 250</td>
<td>Introductory Statistics I (Mason Core)</td>
<td>3</td>
</tr>
<tr>
<td>or STAT 344</td>
<td>Probability and Statistics for Engineers and Scientists I</td>
<td></td>
</tr>
<tr>
<td>STAT 346</td>
<td>Probability for Engineers</td>
<td>3</td>
</tr>
<tr>
<td>or MATH 351</td>
<td>Probability</td>
<td></td>
</tr>
<tr>
<td>STAT 362</td>
<td>Introduction to Computer Statistical Packages</td>
<td>3</td>
</tr>
</tbody>
</table>

Accelerated Option Requirements
Students must complete all credits satisfying degree requirements for the BS and MS programs, with 6 credits overlap chosen from the following courses: STAT 515 Applied Statistics and Visualization for Analytics, STAT 544 Applied Probability, STAT 554 Applied Statistics I, STAT 560 Biostatistical Methods, and STAT 574 Survey Sampling I. (Credit may not be received for both STAT 474 and STAT 574; nor for both STAT 460 and STAT 560.) The graduate courses selected for overlap must be approved by the academic advisors of both the BS and MS programs. All graduate course prerequisites must be completed prior to enrollment. Each graduate course must be completed with a grade of B or better to apply toward the MS degree.

While still in undergraduate status, a maximum of 6 additional graduate credits may be taken as reserve graduate credit and applied to the master's program. Reserve graduate credits do not apply to the undergraduate degree.

Degree Conferral
Students must apply the semester before they expect to complete the BS requirements to have the BS degree conferred. In addition, at the beginning of the student's final undergraduate semester, students must complete a Bachelor's/Accelerated Master's Transition form that is submitted to the Office of the University Registrar and Graduate Recruitment and Enrollment Services. At the completion of MS requirements, a master's degree is conferred.

Statistics, BS/Statistical Science, Accelerated MS

Overview
Highly-qualified students in the Statistics, BS program have the option of applying to the accelerated Statistical Science, MS (p. 1141) program if they have earned 90 undergraduate credits with an overall GPA of 3.00. Students must have successfully completed the following Mason courses each with a grade of C or better prior to admission to the accelerated program:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>MATH 114</td>
<td>Analytic Geometry and Calculus II</td>
<td>4</td>
</tr>
<tr>
<td>MATH 203</td>
<td>Linear Algebra</td>
<td>3</td>
</tr>
<tr>
<td>STAT 334</td>
<td>Introduction to Probability Models and Simulation</td>
<td>3</td>
</tr>
<tr>
<td>or STAT 346</td>
<td>Probability for Engineers</td>
<td></td>
</tr>
<tr>
<td>STAT 354</td>
<td>Probability and Statistics for Engineers and Scientists II</td>
<td>3</td>
</tr>
<tr>
<td>or STAT 360</td>
<td>Introduction to Statistical Practice II</td>
<td></td>
</tr>
<tr>
<td>STAT 362</td>
<td>Introduction to Computer Statistical Packages</td>
<td>3</td>
</tr>
</tbody>
</table>

Accelerated Option Requirements
Students must complete all credits satisfying degree requirements for the BS and Ms programs, with 6 credits overlap chosen from the following courses: STAT 515 Applied Statistics and Visualization for Analytics, STAT 544 Applied Probability, STAT 554 Applied Statistics I, STAT 560 Biostatistical Methods, and STAT 574 Survey Sampling I. All graduate course prerequisites must be completed prior to enrollment. Each graduate course must be completed with a grade of B or better to apply toward the MS degree. For Statistics, BS candidates:

- STAT 560 Biostatistical Methods replaces the corresponding undergraduate version STAT 460 Introduction to Biostatistics as a Statistical Elective. Credit may not be received for both STAT 460 and STAT 560.
- STAT 574 Survey Sampling I replaces the corresponding undergraduate version STAT 474 Introduction to Survey Sampling as a Statistical Elective. Credit may not be received for both STAT 474 and STAT 574.
- STAT 515 Applied Statistics and Visualization for Analytics, STAT 544 Applied Probability, and STAT 554 Applied Statistics I may be counted as Technical Electives toward the BS program requirements.

While still in undergraduate status, a maximum of 6 additional graduate credits may be taken as reserve graduate credit and applied to the
master’s program. Reserve graduate credits do not apply to the undergraduate degree.

Degree Conferral
Students must apply the semester before they expect to complete the BS requirements to have the BS degree conferred. In addition, at the beginning of the student’s final undergraduate semester, students must complete a Bachelor’s/Accelerated Master’s Transition form that is submitted to the Office of the University Registrar and the VSE Graduate Admissions and Recruitment Office. At the completion of MS requirements, a master’s degree is conferred.

Statistical Science, PhD
Banner Code: VS-PHD-STAT
Phone: 703-993-3645
Email: statistics@gmu.edu
Website: statistics.gmu.edu

The PhD in Statistical Science represents the highest academic attainment for a statistician and, as such, requires in-depth knowledge of modern statistical theory and practice. The degree program is a hybrid of mathematical theory, computation, and data analysis; and students are expected to be proficient in all three. Current research areas of key department faculty in the program include biostatistics, statistical genetics, statistical graphics, data confidentiality, networking analysis, and data analytics.

Admissions & Policies

Admissions
Students should have a master’s degree in a mathematically-intensive discipline with a minimum 3.50 GPA. Students entering with a master’s degree are expected to have completed coursework equivalent to STAT 544 Applied Probability, STAT 554 Applied Statistics I, STAT 652 Statistical Inference, and STAT 654 Applied Statistics II with exceptional performance. The program also requires a course in advanced calculus, MATH 315 Advanced Calculus I or equivalent, with a B or better. In exceptional circumstances, talented students with a mathematically-intensive undergraduate degree may be admitted.

Specific application deadlines and requirements (https://admissions.gmu.edu/grad/application-deadlines-and-requirements/?academicUnit=VS&ga=1.107632321.273102085.1480697294) are available through the Office of Graduate Admissions.

Policies

Reduction of Credit
Students must complete a minimum of 72 graduate credits, which may be reduced by a maximum of 24 credits with a master’s degree in statistics, mathematics, or similar discipline, or by 30 credits with a Master’s degree from the George Mason University Department of Statistics. Reduction of credit requires the approval of the program director or designee and the dean or designee of the school. They determine whether the credits are eligible for reduction of credit and applicable to the degree program and the number of credits to be reduced.

Requirements

Degree Requirements
Total credits: 72

The 72 hours of required doctoral-level credits typically consist of 48 credits of regular coursework and 24 credits of dissertation research. The following degree plan is based on a student who receives a 24 credit reduction. Students who receive more or less than a 24 credit reduction should consult with their advisor.

Doctoral Coursework
Students are required to complete 24 credits of advanced emphasis coursework, including four core courses:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>STAT 778</td>
<td>Algorithms and Simulation for Statistics in C</td>
<td>3</td>
</tr>

<td>Mathematical Statistics I</td>
<td>3</td>
</tr>
<tr>
<td>STAT 973</td>
<td>Mathematical Statistics II</td>
<td>3</td>
</tr>
<tr>
<td></td>
<td>The remaining four courses are selected and approved by the doctoral supervisory committee and the PhD Program Director and should be numbered 600 or above.</td>
<td>12</td>
</tr>
</tbody>
</table>

Total Credits 24

Qualifying Exam
Written qualifying exams will be taken in the following areas:
- Applied Probability
- Applied Statistics
- Statistical Inference

Qualifying exams are offered in August and January. Students are required to take the qualifying exams within one year of admission. Supported students entering with a Master’s degree are required to take the qualifying exams within one semester of admission. Students who do not pass all three exams in two consecutive exam periods are terminated from the program.

Dissertation Research
In order to advance to candidacy, students must complete all coursework, pass the qualifying and comprehensive examinations, and defend a dissertation proposal.

<table>
<thead>
<tr>

<td>Doctoral Dissertation Proposal</td>
<td></td>
</tr>
<tr>
<td>STAT 999</td>
<td>Doctoral Dissertation (must complete a minimum of 12 credits)</td>
<td></td>
</tr>
</tbody>
</table>

Total Credits 24
Doctoral Committee Selection
Following successfully passing the qualifying exams, students should select a dissertation director and a doctoral studies committee. The chair of the doctoral studies committee must be a member of the graduate faculty with a regular appointment in the Department of Statistics, and will typically be the dissertation director. The doctoral studies committee consists of a chair, two members of the graduate faculty who hold regular appointments in the Department of Statistics, and an external member. The doctoral studies committee must be approved by the director of the doctoral program in statistical science.

Advancement to Candidacy
Admission to candidacy is acquired on completion of an oral comprehensive exam administered by the doctoral supervisory committee, covering the four core courses and four advanced emphasis courses, and a dissertation proposal. A student who fails the oral comprehensive exam may take it a second time, within six months. If the student fails a second time, the student is terminated from the program. A student must wait at least six weeks after passing the oral comprehensive exam before the dissertation proposal. A student who fails the dissertation proposal may take it a second time, within six months. If the student fails a second time, the student is terminated from the program.

Doctoral Defense
The dissertation defense serves as the student's final examination and is conducted by the doctoral supervisory committee. Both the comprehensive exam and final exam are scheduled on approval of a written request to the department chair.

Statistics, BS
Banner Code: VS-BS-STIC

The Bachelor of Science in Statistics is designed to provide a framework for students to develop connections between statistical concepts and theories and their applications to statistical practice. It will prepare statisticians who can use modern statistical techniques to design studies, collect data, analyze and visualize high dimensional data sets, and draw valid conclusions in an increasingly data-centric world. In this program, students will meld the time-tested concepts and theories of statistics with modern methods of analysis, in order to interpret the data that is collected in nearly every discipline and every sector of industry and government.

The BS in Statistics requires a total of 120 credit hours, including major core requirements, concentration requirements, and Mason Core requirements. The program’s major core curriculum provides students with a firm foundation in statistics, mathematics, and computing. Selection of a concentration allows a student to specialize in applied, theoretical, or computational aspects of statistical practice.

Students will select one of three concentrations: Applied Statistics, Mathematical Statistics, or Statistical Analytics. The Applied Statistics concentration focuses on developing proficiency in analytical methods applicable to a specific discipline of the student's choosing. This is accomplished through the requirement to complete a minor in a field that makes substantial use of data analysis. The Mathematical Statistics concentration is designed for students interested in mastering the theoretical underpinnings of statistics and probability; this concentration is recommended for students who intend to continue graduate studies in statistics or whose main focus is on research. The Statistical Analytics concentration blends the disciplines of computer science and statistics in a very modern way and is designed for students interested in applying concepts from statistics and computer science to the analysis of massive data sets.

Graduates of this program can look forward to careers in local, state, and federal government, and in the many industries that conduct scientific research, collect, and analyze data. They will enter the workforce with the ability to impact science, public policy, technology, and industry in a positive way through their expertise in data collection, analysis, synthesis, and interpretation, each with the highest ethical standards. Graduates will also be well prepared to continue their studies in graduate schools if they so desire.

Admissions & Policies

Policies
Advanced Placement, Credit by Exam
A score of 5 on the Advanced Placement (AP) statistics exam qualifies students for credit in STAT 260.

Change of Major
Students considering changing their major to Statistics should consult with the Volgenau School of Engineering Coordinator of Undergraduate Advising, 2500 Nguyen Engineering Building. These students must have a cumulative GPA of at least 2.75 and completed MATH 114 with a grade of C or better. See Change of Major (p. 1013) for more information.

Grades
Students must earn a C or better in Major Core requirement courses as well as in courses required to satisfy prerequisites.

Termination from the Major
No math, science, or Volgenau School of Engineering course that is required for the major may be attempted more than three times. Those students who do not successfully complete such a course within three attempts will be terminated from the major. Undeclared students in the Volgenau School who do not successfully complete a course required for a Volgenau School major within three attempts will also be terminated.

In addition, students in the Volgenau School with evidence of continued failure to make adequate progress toward declaring or completing a Volgenau School major will also be terminated. Adequate progress is determined by the major program. For more information, see AP5.2.4 Termination from the Major (https://catalog.gmu.edu/policies/academic/undergraduate-policies/#ap5-2-4).

Once a student has attempted one of these courses twice unsuccessfully, the third attempt must be no later than the next semester of enrollment, excluding summers. Failure to take the course at that time will result in termination from the major. A third attempt of a Volgenau School of Engineering course requires support by the student’s major department as well as permission by the department offering the course. This permission is not guaranteed. If the student is unable to take the course when required, the student may request an extension to a future semester; extensions require approval of the student’s advisor, their
department, and the Associate Dean for Undergraduate Programs. The
deadline for extension requests is the add deadline for the semester in
which the course is required.

Students who have been terminated from a Volgenau School of
Engineering major may not register for a Volgenau School course without
permission of the department offering the course. This applies to all
undergraduate courses offered by the Volgenau School except IT 104
Introduction to Computing (Mason Core) (p. 142) and STAT 250
Introductory Statistics I (Mason Core) (p. 142).

A student may not declare any major in the Volgenau School of
Engineering if the student has previously met the termination criteria for
that major at any time, regardless of what the student's major was at the
time the courses were taken.

Statistics, BS/Biostatistics, Accelerated MS

Overview:
Highly-qualified students in Statistics, BS (p. 1146) have the option of obtaining an accelerated Biostatistics, MS (p. 1138). Students in an accelerated degree program must fulfill all university requirements for the master’s degree.
For more detailed information, see AP6.7 Bachelor’s/Accelerated Master’s Degrees (https://catalog.gmu.edu/policies/academic/graduate-policies/#ap-6-7). For policies governing all graduate degrees, see AP6 Graduate Policies (https://catalog.gmu.edu/policies/academic/graduate-policies).

Admission Requirements:
Students enrolled in a BS degree in Statistics may apply to this option if they have earned 90 undergraduate credits with an overall GPA of 3.00.

Accelerated Option Requirements:
Students must complete all requirements for the BS and MS programs, with 6 credits overlap.
Students must complete all credits that satisfy requirements for the BS and MS programs, with 6 credits overlapping with grades of B or better in two 500-level STAT selected from STAT 544 (https://catalog.gmu.edu/search/?P=STAT%20544) Applied Probability, STAT 554 (https://catalog.gmu.edu/search/?P=STAT%20554) Applied Statistics I, and STAT 560, Biostatistical methods.

Degree Conferral:
Students must apply the semester before they expect to complete the BS requirements to have the BS degree conferred. In addition, at
the beginning of the student’s final undergraduate semester, students must complete a Bachelor’s/Accelerated Master’s Transition form that is submitted to the Office of the University Registrar and Graduate Recruitment and Enrollment Services. At the completion of MS requirements, a master’s degree is conferred.

Statistics, BS/Data Analytics Engineering, Accelerated MS

Overview

Highly-qualified students in the Statistics, BS (p. 1146) program have the option of applying to the accelerated Data Analytics Engineering, MS (p. 1019) program.

For more detailed information, see AP.6.7 Bachelor’s/Accelerated Master’s Degrees (p. 93). For policies governing all graduate degrees, see AP6 Graduate Policies (p. 90).

Admission Requirements

Students in the Statistics, BS (p. 1146) program may apply to the accelerated Data Analytics Engineering, MS (p. 1019) program if they have earned 90 undergraduate credits with an overall GPA of at least 3.30.

Accelerated Option Requirements

Students must complete all credits that satisfy requirements for the BS and MS programs, with six credits overlap chosen from the following courses:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>CS 504</td>
<td>Principles of Data Management and Mining</td>
<td>3</td>
</tr>
<tr>
<td>or CS 584</td>
<td>Theory and Applications of Data Mining</td>
<td></td>
</tr>
<tr>
<td>OR 541</td>
<td>Operations Research: Deterministic Models (Credit may not be received for both OR 441 and OR 541.)</td>
<td>3</td>
</tr>
<tr>
<td>or OR 531</td>
<td>Analytics and Decision Analysis</td>
<td></td>
</tr>
<tr>
<td>STAT 515</td>
<td>Applied Statistics and Visualization for Analytics</td>
<td>3</td>
</tr>
<tr>
<td>or STAT 554</td>
<td>Applied Statistics I</td>
<td></td>
</tr>
</tbody>
</table>

All graduate course prerequisites must be completed prior to enrollment. Each 500-level course must be completed with a grade of B or better to apply toward the MS program. The graduate courses selected for overlap must be approved by the academic advisors of both the BS and MS programs. The graduate courses may be counted as Technical Electives toward the Statistics, BS (p. 1146) program requirements, with approval of Statistics Department undergraduate coordinator.

Degree Conferral

Students must apply the semester before they expect to complete the BS requirements to have the BS degree conferred. In addition, at the beginning of the student’s final undergraduate semester, students must complete a Bachelor’s/Accelerated Master’s Transition form (https://registrar.gmu.edu/forms) that is submitted to the Office of the University Registrar and the VSE Graduate Admissions and Recruitment office. At the completion of MS requirements, a master’s degree is conferred.

Statistics, BS/Operations Research, Accelerated MS

Overview

Highly-qualified students in the Statistics, BS (p. 1146) have the option of obtaining an accelerated Operations Research, MS (p. 1153).

For more detailed information, see AP.6.7 Bachelor’s/Accelerated Master’s Degrees (p. 90). For policies governing all graduate degrees, see AP6 Graduate Policies (p. 90).

Admission Requirements

Mason undergraduate students majoring in Statistics, BS (p. 1146) may apply to this option if they have earned 90 undergraduate credits with an overall GPA of at least 3.30 and completed all MATH and PHYS requirements. Criteria for admission are identical to criteria for admission to the Operations Research, MS (p. 1153) program.

Accelerated Options Requirement

Students must complete all credits that satisfy requirements for both the BS and MS programs. Up to two courses (6 credit hours) of approved master’s level courses taken as part of the undergraduate degree may be applied to the graduate degree. The courses selected for this purpose must be approved by the academic advisors of both the BS and MS programs and by the SEOR department chair. For the BS programs that allow undergraduate electives from the department of system engineering and operations research, the students may choose the graduate version of such electives to replace the corresponding undergraduate courses.

Degree Conferral

Students must apply the semester before they expect to complete the BS requirements to have the BS degree conferred. In addition, at the beginning of the student’s final undergraduate semester, students must complete a Bachelor’s/Accelerated Master’s Transition form that is submitted to the Office of the University Registrar and the VSE Graduate Admissions Office. At the completion of MS requirements, a master’s degree is conferred.

Statistics, BS/Systems Engineering, Accelerated MS

Overview

Highly-qualified students in the Statistics, BS (p. 1146) have the option of obtaining an accelerated Systems Engineering, MS (p. 1170).

For more detailed information, see AP.6.7 Bachelor’s/Accelerated Master’s Degrees (p. 90). For policies governing all graduate degrees, see AP6 Graduate Policies (p. 90).

Admission Requirements

Mason undergraduate students majoring in Statistics, BS (p. 1146) may apply to this option if they have earned 90 undergraduate credits with an overall GPA of at least 3.30 and completed all MATH and PHYS requirements. Criteria for admission are identical to criteria for admission to the Systems Engineering, MS (p. 1170) program.

Accelerated Options Requirement

Students must complete all credits that satisfy requirements for both the BS and MS programs. Up to two courses (6 credit hours) of approved master’s level courses taken as part of the undergraduate
degree may be applied to the graduate degree. The courses selected for this purpose must be approved by the academic advisors of both the BS and MS programs and by the SEOR department chair. For the BS programs that allow undergraduate electives from the department of system engineering and operations research, the students may choose the graduate version of such electives to replace the corresponding undergraduate courses.

**Degree Conferral**

Students must apply the semester before they expect to complete the BS requirements to have the BS degree conferred. In addition, at the beginning of the student’s final undergraduate semester, students must complete a Bachelor’s/Accelerated Master’s Transition form that is submitted to the Office of the University Registrar and the VSE Graduate Admissions Office. At the completion of MS requirements, a master’s degree is conferred.

**Statistics, BS/Statistical Science, Accelerated MS**

**Overview**

Highly-qualified students in the Statistics, BS program have the option of applying to the accelerated Statistical Science, MS (p. 1141) program.

For more detailed information, see AP.6.7 Bachelor’s/Accelerated Master’s Degrees (p. 93). For policies governing all graduate degrees, see AP6 Graduate Policies (p. 90).

**Admission Requirements**

Students in the Statistics, BS program may apply to the accelerated Statistical Science, MS (p. 1141) program if they have earned 90 undergraduate credits with an overall GPA of 3.00. Students must have successfully completed the following Mason courses each with a grade of C or better prior to admission to the accelerated program:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>MATH 114</td>
<td>Analytic Geometry and Calculus II</td>
<td>4</td>
</tr>
<tr>
<td>MATH 203</td>
<td>Linear Algebra</td>
<td>3</td>
</tr>
<tr>
<td>STAT 334</td>
<td>Introduction to Probability Models and Simulation</td>
<td>3</td>
</tr>
<tr>
<td>or STAT 346</td>
<td>Probability for Engineers</td>
<td></td>
</tr>
<tr>
<td>STAT 354</td>
<td>Probability and Statistics for Engineers and Scientists II</td>
<td>3</td>
</tr>
<tr>
<td>or STAT 360</td>
<td>Introduction to Statistical Practice II</td>
<td></td>
</tr>
<tr>
<td>STAT 362</td>
<td>Introduction to Computer Statistical Packages</td>
<td>3</td>
</tr>
</tbody>
</table>

**Accelerated Option Requirements**

Students must complete all credits satisfying degree requirements for the BS and MS programs, with 6 credits overlap chosen from the following courses: STAT 515 Applied Statistics and Visualization for Analytics, STAT 544 Applied Probability, STAT 554 Applied Statistics I, STAT 560 Biostatistical Methods, and STAT 574 Survey Sampling I. All graduate course prerequisites must be completed prior to enrollment. Each graduate course must be completed with a grade of B or better to apply toward the MS degree. For Statistics, BS candidates:

- STAT 560 Biostatistical Methods replaces the corresponding undergraduate version STAT 460 Introduction to Biostatistics as a Statistical Elective. Credit may not be received for both STAT 460 and STAT 560.
- STAT 574 Survey Sampling I replaces the corresponding undergraduate version STAT 474 Introduction to Survey Sampling as a Statistical Elective. Credit may not be received for both STAT 474 and STAT 574.
- STAT 515 Applied Statistics and Visualization for Analytics, STAT 544 Applied Probability, and STAT 554 Applied Statistics I may be counted as Technical Electives toward the BS program requirements.

While still in undergraduate status, a maximum of 6 additional graduate credits may be taken as reserve graduate credit and applied to the master’s program. Reserve graduate credits do not apply to the undergraduate degree.

**Degree Conferral**

Students must apply the semester before they expect to complete the BS requirements to have the BS degree conferred. In addition, at the beginning of the student’s final undergraduate semester, students must complete a Bachelor’s/Accelerated Master’s Transition form that is submitted to the Office of the University Registrar and the VSE Graduate Admissions and Recruitment Office. At the completion of MS requirements, a master’s degree is conferred.

**Statistics Minor**

Banner Code: STIC

Phone: 703-993-3645
Email: statistics@gmu.edu
Website: statistics.gmu.edu

The minor in Statistics provides students with a background in the theory and application of statistical methodology. It is intended to complement undergraduate degree programs in the Volgenau School and the College of Science, especially those programs that require MATH 113 Analytic Geometry and Calculus I (Mason Core) (p. 142), MATH 114 Analytic Geometry and Calculus II, and STAT 344 Probability and Statistics for Engineers and Scientists I as a part of the major requirements.

**Admissions & Policies**

**Admissions**

To be admitted to the minor, students must have completed MATH 113 Analytic Geometry and Calculus I (Mason Core) (p. 142) and MATH 114 Analytic Geometry and Calculus II with a grade of C or better.

**Policies**

The minor in Statistics requires 15 credit hours of coursework. Grades of C or better are required in all courses. At least 8 credits must be in courses not required by the student’s major. For policies governing all minors, see AP5.3.4 Minors (p. 90).

**Requirements**

**Minor Requirements**

Total credits: 15
The Systems Engineering and Operations Research (SEOR) Department offers a bachelor's degree in systems engineering, a minor in systems engineering, a minor in aviation flight training and management, a master's degree in systems engineering, a master's degree in operations research, and a doctoral degree in systems engineering and operations research. The department also offers a concentration in predictive analytics and a concentration in financial engineering within the school-wide master's degree in data analytics engineering. In addition, the department offers four systems engineering certificates at the master's level: architecture-based systems integration, C4I and cyber (command, control, communications, computing, intelligence, and cyber), engineering resilient enterprise systems, and financial systems; the department offers three operations research certificates: computational modeling, military operations research, and predictive data analytics. The department also offers a dual master's degree in operations research and master's degree in statistical science jointly with the Statistics Department.

There is much overlap between systems engineering and operations research. The department encourages students of either discipline to elect courses in the other. For more information, go to the department's website (http://seor.gmu.edu).

### Systems Engineering

Systems engineers determine the most effective ways to use all of a system's components: people, machines, materials, information, and energy. The engineers plan, design, implement, and manage integrated systems, working to ensure performance, safety, reliability, and maintainability. They also work to ensure that systems are delivered on time at a reasonable cost. Examples of systems include the national air transportation system, computer networks, autonomous vehicles, intelligent robots, the electric power grid, healthcare systems, and financial trading systems. Whereas other engineering disciplines concentrate on individual aspects of a system, such as electronics, ergonomics, or software, systems engineers focus on the system as a whole and the interaction of the underlying parts. Systems engineering, perhaps more than any other engineering discipline, is involved with the human and organizational aspects of developing the desired system. Systems engineering is the people-oriented engineering profession.

### Operations Research

Operations research is the professional field that uses analytical and data-based methods in engineering to support management decision making, often focusing on how best to allocate limited resources. Operations researchers do for organizations what physicists do for the physical world: they try to find order in apparent chaos by identifying the structure in complex situations and understanding how the components of organizations interact. The goal is to explain and predict the effects of actions taken on these systems and to use the information to make informed management decisions. Much of this work is developing and manipulating mathematical and computer models of organizational systems, frequently making use of big data to build and run the models.

Website: http://seor.gmu.edu/bsse/aviationminor.html

Students completing the minor will take classes for Pilot Ground School and Flight Training leading up to a solo flight. In addition, students will study aspects of aviation from systems engineering of air traffic control, design of airports, human factors and psychology, and financial planning and management. Students will be trained for required government licensing exams such as the Federal Aviation Administration (FAA) Knowledge Test and FAA Flight tests. Special fees to cover flight training costs will apply. Students are responsible for meeting all eligibility requirements.

Admissions & Policies

Policies
For policies governing all minors, see AP.5.3.4 Minors (p. 90).

Admissions & Policies

Admissions
Computational Modeling Concentration
For admission to the certificate with a Computational Modeling concentration, applicants must meet minimum entrance requirements for the MS in operations research (p. 1153), the MS in statistical science (p. 1141), or the PhD in computational sciences and informatics (p. 679).
Military Operations Research Concentration
Admissions requirements for the certificate with a Military Operations Research concentration are identical to those for the Operations Research, MS (p. 1153).

Predictive Data Analytics Concentration
The certificate with Predictive Analytics concentration will be open to all students who hold a BS degree in scientific and engineering disciplines from an accredited university program, with a GPA minimum established by VSE for all MS programs. Students who are already enrolled in a master’s program must submit an application form to enroll in this certificate with concentration program; all others must apply for graduate admission to this certificate with concentration program.

Policies
For policies governing all graduate certificates, see AP.6.8 Requirements for Graduate Certificates (p. 94).

Courses taken for the Computational Modeling certificate can count toward a master’s degree in operations research or statistics or a PhD in computational sciences and informatics (p. 679). One must be concurrently enrolled in the program for courses to count toward the certificate and the other degree.

Requirements
Total credits: 12-15
This certificate may be pursued on a part-time basis only.

Certificate Requirements
Students must complete all requirements within a concentration.

Website: seor.gmu.edu/grad.html

The MS prepares students for research and professional practice associated with the formulation and analysis of mathematical models for decision making and their computer implementation. Major components include optimization, queuing and network modeling, computer simulation and modeling, applied and computational probability, and application of these components to realistic and relevant operational analysis problems. Students are expected to become proficient in these areas, as well as in supporting areas of information technology necessary to implement operations research methods.

The program includes core courses and electives selected by the student with the aid of a faculty advisor. To obtain the MS degree, students complete an approved plan of study that contains a minimum of 30 graduate credits. Students may take courses through the Commonwealth Graduate Engineering Program. Appropriate courses may be transferred, with advisor approval, into this Mason degree program.
Admissions & Policies

Admissions
To be admitted to the program, students must hold a baccalaureate degree from an accredited institution in engineering, mathematics, computer science, physical sciences, economics, or a related field. They also must have completed courses in:

Total Credits 6

Additional Electives

Code Title Credits
Select up to three additional electives from the list of allowable electives with written concurrence of the advisor 9

| Additional Electives: |
| Code | Title | |
| | | |

Total Credits 9

1 At least two of these electives must be taken from SEOR course offerings, and one of these must be OR 600-level or higher. The remaining course should be taken in an area appropriate to the student’s interests, such as operations research, systems engineering, computer science, information systems, statistics, data analytics, electrical and computer engineering, economics, mathematics or supply chain management. The allowable elective for MS students includes:

A. Within VSE:
- Any OR course ≥600 (p. 2024)
- Any SYST course > 500 (p. 2232)
- Any STAT course ≥ 554 (p. 2220)
- Any CS course ≥ 500 (p. 1468)
- Any ECE course> 500 but not 528 (p. 1611)
- Any CEIE course > 500 but not 601 (p. 1383)

B. External to VSE (subject to approval by the Department Chair):
- Any MATH course > 601 and permitted for Math majors (p. 1923);
- Any CSI course > 610 (p. 1436)
- Any ECON course ≥ 611 (p. 1564)

Concentrations

Students may construct concentration areas by choosing electives from among special groupings. The six concentrations available are data analytics, decision analysis, financial engineering, military operations research, optimization, and stochastic modeling. In addition to the required core courses (12 credits) and project course (3 credits), the remaining 15 credit hours consist of methods and elective courses associated with the concentration areas as outlined below. Students can also devise their own grouping of electives subject to prior approval of their advisor.
**Available Concentrations**

- Concentration in Data Analytics (DNIC) (p. 1155)
- Concentration in Decision Analysis (DA) (p. 1155)
- Concentration in Financial Engineering (FNNE) (p. 1155)
- Concentration in Military Operations Research (MOR) (p. 1155)
- Concentration in Optimization (OPT) (p. 1155)
- Concentration in Stochastic Models (STM) (p. 1155)

1 If the student has already taken OR 645 Stochastic Processes this can be substituted for an elective course with written concurrence of the student’s advisor.
Dual Degree Options

Operations Research and Statistical Science Dual-Degree MS

This program allows students to earn an MS in Operations Research (p. 1153) and an MS in Statistical Science (p. 1141) by completing 48 credits of coursework in both areas instead of the 60 that would be required if the degrees were sought independently.

Admission Requirements

Applicants must satisfy admission requirements for the MS in Operations Research (p. 1153) Program and the MS in Statistical Science (p. 1141) Program. A joint faculty committee from the Statistics and Systems Engineering and Operations Research Departments make final admission decisions into the dual-degree program.

Elective Credits in STAT Courses

Select 9 elective credits from any STAT courses numbered 540-775

Total Credits: 9

Notes

- Students currently enrolled in one of the MS programs must declare pursuit of the dual MS within one year of matriculation into the first MS program.
- A maximum of 6 credits across the two disciplines may be in independent research (thesis). The requirements for independent research are the same as detailed for the associated MS program.
- Students in either the BS (selected)/Operations Research, Accelerated MS program (p. 1156) or the BS (selected)/Statistical Science, Accelerated MS program (p. 1144) cannot get a reduction of 6 credits toward this dual degree. Students who want to proceed to a PhD degree will only be able to waive the number of credits specified in the associated PhD degree requirements, even though they will have 48 credits at the MS level.
- If a student decides not to complete the required 48 credits, a single MS degree will not be granted unless the student fulfills the requirements for the MS in Operations Research (p. 1153) or the MS in Statistical Science (p. 1141).
- Once a student receives one of the MS degrees from either department, the student will no longer be eligible for the reduction in credit (i.e., will need to complete 30 credits) if the student later decides to earn the other MS degree.

Accelerated Master’s

Bioengineering, BS/Operations Research, Accelerated MS

Overview

Highly-qualified students in the Bioengineering, BS (p. 1032) have the option of obtaining an accelerated Operations Research, MS (p. 1153).

For more detailed information, see AP.6.7 Bachelor’s/Accelerated Master’s Degrees (p. 90). For policies governing all graduate degrees, see AP.6 Graduate Policies (p. 90).

Admission Requirements

Mason undergraduate students majoring in Bioengineering, BS (p. 1032) may apply to this option if they have earned 90 undergraduate credits with an overall GPA of at least 3.30 and completed all MATH and PHYS requirements. Criteria for admission are identical to criteria for admission to the Operations Research, MS (p. 1153) program.

Accelerated Options Requirement

Students must complete all credits that satisfy requirements for both the BS and MS programs. Up to two courses (6 credits) of approved master’s level courses taken as part of the undergraduate degree may be applied to the graduate degree. The courses selected for this purpose must be approved by the academic advisors of both the BS and MS programs and by the SEOR department chair. For the BS programs that allow undergraduate electives from the department of system engineering and operations research, the students may chose the graduate version
of such elective courses to replace the corresponding undergraduate courses.

Degree Conferral
Students must apply the semester before they expect to complete the BS requirements to have the BS degree conferred. In addition, at the beginning of the student’s final undergraduate semester, students must complete a Bachelor’s/Accelerated Master’s Transition form that is submitted to the Office of the University Registrar and the VSE Graduate Admissions Office. At the completion of MS requirements, a master’s degree is conferred.

Civil and Infrastructure Engineering, BS/Operations Research, Accelerated MS
Overview
Highly-qualified students in the Civil and Infrastructure Engineering, BS (p. 1177) have the option of obtaining an accelerated Operations Research, MS (p. 1153).

For more detailed information, see AP.6.7 Bachelor’s/Accelerated Master’s Degrees (p. 90). For policies governing all graduate degrees, see AP.6 Graduate Policies (p. 90).

Admission Requirements
Mason undergraduate students majoring in Civil and Infrastructure Engineering, BS (p. 1177) may apply to this option if they have earned 90 undergraduate credits with an overall GPA of at least 3.30 and completed all MATH and PHYS requirements. Criteria for admission are identical to criteria for admission to the Operations Research, MS (p. 1153) program.

Students must additionally complete MATH 203 Linear Algebra prior to applying for the graduate program.

Accelerated Options Requirement
Students must complete all credits that satisfy requirements for both the BS and MS programs. Up to two courses (6 credit hours) of approved master’s level courses taken as part of the undergraduate degree may be applied to the graduate degree. The courses selected for this purpose must be approved by the academic advisors of both the BS and MS programs and by the SEOR department chair. For the BS programs that allow undergraduate electives from the department of system engineering and operations research, the students may choose the graduate version of such electives to replace the corresponding undergraduate courses.

Degree Conferral
Students must apply the semester before they expect to complete the BS requirements to have the BS degree conferred. In addition, at the beginning of the student’s final undergraduate semester, students must complete a Bachelor’s/Accelerated Master’s Transition form that is submitted to the Office of the University Registrar and the VSE Graduate Admissions Office. At the completion of MS requirements, a master’s degree is conferred.

Cyber Security Engineering, BS/Operations Research, Accelerated MS
Overview
Highly-qualified students in the Cyber Security Engineering, BS (p. 1016) have the option of obtaining an accelerated Operations Research, MS (p. 1153).

For more detailed information, see AP.6.7 Bachelor’s/Accelerated Master’s Degrees (p. 90). For policies governing all graduate degrees, see AP.6 Graduate Policies (p. 90).

Admission Requirements
Mason undergraduate students majoring in Cyber Security Engineering, BS (p. 1016) may apply to this option if they have earned 90 undergraduate credits with an overall GPA of at least 3.30 and completed all MATH and PHYS requirements. Criteria for admission are identical to criteria for admission to the Operations Research, MS (p. 1153) program.

Accelerated Options Requirement
Students must complete all credits that satisfy requirements for both the BS and MS programs. Up to two courses (6 credit hours) of approved master’s level courses taken as part of the undergraduate degree may be applied to the graduate degree. The courses selected for this purpose must be approved by the academic advisors of both the BS and MS programs and by the SEOR department chair. For the BS programs that allow undergraduate electives from the department of system engineering and operations research, the students may choose the graduate version of such electives to replace the corresponding undergraduate courses.

Degree Conferral
Students must apply the semester before they expect to complete the BS requirements to have the BS degree conferred. In addition, at the beginning of the student’s final undergraduate semester, students must complete a Bachelor’s/Accelerated Master’s Transition form that is submitted to the Office of the University Registrar and the VSE Graduate Admissions Office. At the completion of MS requirements, a master’s degree is conferred.

Mechanical Engineering, BS/Operations Research, Accelerated MS
Overview
Highly-qualified students in the Mechanical Engineering, BS (p. 1177) have the option of obtaining an accelerated Operations Research, MS (p. 1153).

For more detailed information, see AP.6.7 Bachelor’s/Accelerated Master’s Degrees (p. 90). For policies governing all graduate degrees, see AP.6 Graduate Policies (p. 90).

Admission Requirements
Mason undergraduate students majoring in Mechanical Engineering, BS (p. 1177) may apply to this option if they have earned 90 undergraduate credits with an overall GPA of at least 3.30 and completed all MATH and PHYS requirements. Criteria for admission are identical to criteria for admission to the Operations Research, MS (p. 1153) program.
Students must additionally complete MATH 203 Linear Algebra prior to applying for the graduate program.

**Accelerated Options Requirement**

Students must complete all credits that satisfy requirements for both the BS and MS programs. Up to two courses (6 credits) of approved master’s level courses taken as part of the undergraduate degree may be applied to the graduate degree. The courses selected for this purpose must be approved by the academic advisors of both the BS and MS programs and by the SEOR department chair. For the BS programs that allow undergraduate electives from the department of system engineering and operations research, the students may choose the graduate version of such elective courses to replace the corresponding undergraduate courses.

**Degree Conferral**

Students must apply the semester before they expect to complete the BS requirements to have the BS degree conferred. In addition, at the beginning of the student’s final undergraduate semester, students must complete a Bachelor’s/Accelerated Master’s Transition form that is submitted to the Office of the University Registrar and the VSE Graduate Admissions Office. At the completion of MS requirements, a master’s degree is conferred.

**Statistics, BS/Operations Research, Accelerated MS**

**Overview**

Highly-qualified students in the Statistics, BS (p. 1146) have the option of obtaining an accelerated Operations Research, MS (p. 1153).

For more detailed information, see AP.6.7 Bachelor’s/Accelerated Master’s Degrees (p. 90). For policies governing all graduate degrees, see AP.6 Graduate Policies (p. 90).

**Admission Requirements**

Mason undergraduate students majoring in Statistics, BS (p. 1146) may apply to this option if they have earned 90 undergraduate credits with an overall GPA of at least 3.30 and completed all MATH and PHYS requirements. Criteria for admission are identical to criteria for admission to the Operations Research, MS program (p. 1153).

**Accelerated Options Requirement**

Students must complete all credits that satisfy requirements for both the BS and MS programs. Up to two courses (6 credit hours) of approved master’s level courses taken as part of the undergraduate degree may be applied to the graduate degree. The courses selected for this purpose must be approved by the academic advisors of both the BS and MS programs and by the SEOR department chair. For the BS programs that allow undergraduate electives from the department of system engineering and operations research, the students may choose the graduate version of such electives to replace the corresponding undergraduate courses.

**Degree Conferral**

Students must apply the semester before they expect to complete the BS requirements to have the BS degree conferred. In addition, at the beginning of the student’s final undergraduate semester, students must complete a Bachelor’s/Accelerated Master’s Transition form that is submitted to the Office of the University Registrar and the VSE Graduate Admissions Office. At the completion of MS requirements, a master’s degree is conferred.

**Systems Engineering BS/Operations Research, Accelerated MS**

**Overview**

Qualified undergraduate students may apply for a five-year accelerated BS/MS program leading to a Bachelor of Science in Systems Engineering (p. 1164) and an MS degree in Operations Research (p. 1153).

For more detailed information, see AP6.7 Bachelor’s/Accelerated Master’s Degrees (p. 93). For policies governing all graduate degrees, see AP6 Graduate Policies (p. 90).

**Admission Requirements**

Mason undergraduate students majoring in systems engineering may apply to this option if they have earned 90 undergraduate credits with an overall GPA of at least 3.30 and completed all MATH and PHYS requirements. Criteria for admission are identical to criteria for admission to the Operations Research, MS program (p. 1153).

**Accelerated Option Requirements**

Up to two courses (six credit hours) of master’s level courses may be applied to both the undergraduate and the graduate degrees. These two courses may be chosen from the list of graduate courses in the following table. For Systems Engineering, BS students, these graduate courses replace the corresponding undergraduate courses listed in the table. The undergraduate version of these courses may not be applied toward the Operations Research, MS.

<table>
<thead>

</tbody>
</table>

For more detailed information, see AP6.7 Bachelor’s/Accelerated Master’s Degrees (p. 93). For policies governing all graduate degrees, see AP6 Graduate Policies (p. 90).
SYST 488 SYST 588 These courses apply only to certain concentrations in the graduate program; credit may not be received for both courses.

Any other 500-level course may be applied to both the undergraduate and graduate degrees with approval of the advisor and SEOR department chair.

Degree Conferral

Students must apply the semester before they expect to complete the BS requirements to have the BS degree conferred. In addition, at the beginning of the student’s final undergraduate semester, students must complete a Bachelor’s/Accelerated Master’s Transition form that is submitted to the Office of the University Registrar and Graduate Recruitment and Enrollment Services. At the completion of MS requirements, a master's degree is conferred.

BS (selected)/Operations Research, Accelerated MS

Overview

Highly-qualified students in BS programs have the option of obtaining an accelerated Operations Research, MS (p. 1153).

For more detailed information, see AP6.7 Bachelor’s/Accelerated Master’s Degrees (p. 93). For policies governing all graduate degrees, see AP6 Graduate Policies (p. 90).

Admission Requirements

Mason undergraduate students majoring in both engineering and non-engineering disciplines may apply to this option if 1) such an accelerated Operations Research, MS (p. 1153) pathway is allowable from the student’s BS program, which will be determined by the academic advisors of both the BS and MS programs and by the SEOR department chair, 2) they have earned 90 undergraduate credits with an overall GPA of at least 3.30, and 3) they have completed all MATH and PHYS requirements. Criteria for admission are identical to criteria for admission to the Operations Research, MS (p. 1153) program.

Students must additionally complete MATH 203 prior to applying for the graduate program.

Accelerated Option Requirements

Students must complete all credits that satisfy requirements for both the BS and MS programs. Up to two courses (6 credits) of approved master’s level courses taken as part of the undergraduate degree may be applied to the graduate degree. The courses selected for this purpose must be approved by the academic advisors of both the BS and MS programs and by the SEOR department chair.

For the BS programs that allow undergraduate electives from the department of systems engineering and operations research, the students may choose the graduate version of such elective courses to replace the corresponding undergraduate courses.

Degree Conferral

Students must apply the semester before they expect to complete the BS requirements to have the BS degree conferred. In addition, at the beginning of the student’s final undergraduate semester, students must complete a Bachelor’s/Accelerated Master’s Transition form that is submitted to the Office of the University Registrar and the VSE Graduate Admissions Office. At the completion of MS requirements, a master's degree is conferred.

Admissions & Policies

Admissions

Architecture-Based Systems Integration Concentration
A bachelor's degree is required for admission to a certificate program.

C4I & Cyber Concentration
The certificate with this concentration is available to students who hold bachelor's degrees in engineering and scientific disciplines or are in graduate status in such programs. Admission requirements are identical to those for the Systems Engineering, MS (p. 1170).
Communications and Networking Concentration
The certificate with this concentration in communications and networking is open to all students who hold BS degrees in scientific and engineering disciplines from accredited universities.

Engineering Resilient Enterprise Systems Concentration
The certificate with this concentration is available to any student who holds a bachelor's degree in an engineering or scientific discipline or has graduate status in such a program. Admission requirements are identical to those for the Systems Engineering, MS (p. 1170), except that the math requirements include only MATH 113 Analytic Geometry and Calculus I (Mason Core) (p. 142), MATH 114 Analytic Geometry and Calculus II, and a probability and statistics course.

Financial Systems Concentration
The certificate with this concentration will be open to all students who hold a BS degree in scientific and engineering disciplines from an accredited university program, with a GPA minimum established by VSE for all MS programs. Students who are already enrolled in a master's program must submit an application form to enroll in this certificate with concentration program; all others must apply for graduate admission to this certificate with concentration program.

Tactical Computer Operations Concentration
Students applying to the certificate with this concentration must hold a bachelor's degree in either computer science or computer engineering. Prospective students without these specific degrees will need to have a technical bachelor's degree and show academic competence in the areas of: C (C++, C#, Objective C), Assembler, discrete mathematics, and computer networking. An undergraduate grade point average (GPA) of 3.0 or better (4.0 scale) is required. The Graduate Record Exam (GRE) is not required.

Policies
The Systems Engineering Graduate Certificate may be pursued on a part-time basis only.

For policies governing all graduate certificates, see AP.6.8 Requirements for Graduate Certificates (p. 94).

Requirements
Certificate Requirements
Total credits: 12-15
This certificate may be pursued on a part-time basis only.

Concentration in Architecture-Based Systems Integration (ABSI)
Administered by the Department of Systems Engineering and Operations Research (https://seor.gmu.edu)

Coursework
The following four courses must be completed with a grade of B or better:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>SYST 520</td>
<td>System Engineering Design</td>
<td>3</td>
</tr>
<tr>
<td>SYST 618</td>
<td>Model-based Systems Engineering</td>
<td>3</td>
</tr>
<tr>
<td>SYST 620</td>
<td>Discrete Event Systems</td>
<td>3</td>
</tr>
<tr>
<td>SYST 621</td>
<td>Systems Architecture Design</td>
<td>3</td>
</tr>
</tbody>
</table>

Total Credits 12

Certificate coursework within the Systems Engineering MS
In addition to the ABSI concentration courses, students must take the following six courses within the Systems Engineering, MS (p. 1170):

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>SYST 505</td>
<td>Systems Engineering Principles</td>
<td>3</td>
</tr>
<tr>
<td>SYST 510</td>
<td>Systems Definition and Cost Modeling</td>
<td>3</td>
</tr>
<tr>
<td>SYST 530</td>
<td>Systems Engineering Management I</td>
<td>3</td>
</tr>
<tr>
<td>SYST 611</td>
<td>System Methodology and Modeling</td>
<td>3</td>
</tr>
<tr>
<td>SYST 699</td>
<td>Masters Project</td>
<td>3</td>
</tr>
<tr>
<td></td>
<td>Select one approved elective from the ABSI concentration</td>
<td>3</td>
</tr>
</tbody>
</table>

Total Credits 18

1 Students who have work experience in systems engineering should consult with their advisor on replacing SYST 505 Systems Engineering Principles with a higher-level SYST course.

Concentration in C4I & Cyber (C4IC)
Administered by the Department of Systems Engineering and Operations Research (https://seor.gmu.edu)

This certificate with concentration may be pursued on a part-time basis only.

The certificate with concentration requires 12 credits (4 courses). Students must complete the following with an average grade of B or better:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>SYST 680</td>
<td>Principles of Command, Control, Communications, Computing, and Intelligence (C4I)</td>
<td>3</td>
</tr>
<tr>
<td>OR 542</td>
<td>Operations Research: Stochastic Models</td>
<td>3</td>
</tr>
<tr>

</tr>
<tr>
<td>SYST 664</td>
<td>Bayesian Inference and Decision Theory</td>
<td></td>
</tr>
<tr>
<td>SYST 683</td>
<td>Modeling, Simulation, and Gaming</td>
<td></td>
</tr>
</tbody>
</table>

Select two from the following:

Total Credits 12

Completing the certificate with the C4I concentration within the Systems Engineering Master's Program
In addition to the four courses above, students must complete the following six courses:
Concentration in Communications and Networking (CONE)

Administered by the Department of Electrical and Computer Engineering (https://ece.gmu.edu/welcome-gmu-ece-department).

The certificate with a concentration in Communications and Networking is awarded on completion of five graduate courses (15 credits) in communications and networking. A cumulative GPA of 3.00 is required and one course with a grade of C at most may be applied toward the certificate. The certificate courses comprise two required foundation courses and three electives.

**Coursework**

<table>

</tbody>
</table>
This doctoral program offers a unique integration of systems engineering and operations research. This integration gives students a strong analytical and computational capability on the one hand and an overarching systems perspective that is well-grounded in application on the other. No other department in the nation offers a PhD degree program that covers systems engineering and operations research in this integrated manner. The program prepares students for leadership positions in research and development in government, industry, research organization, and academia.

### Admissions & Policies

#### Admissions

All general Mason and specific Volgenau School admissions requirements apply. Candidates for the PhD program typically must hold an MS degree from an accredited institution of higher education in systems engineering, operations research or related areas in engineering, mathematics, and computer science with a minimum graduate GPA of 3.50 and a minimum undergraduate GPA of 3.00. In addition, well-qualified candidates holding a BS degree in these areas may apply directly to the PhD program.

All applicants should have a strong background in engineering mathematics, which includes three semesters of calculus, differential equations, linear algebra, and probability. In addition, students entering the doctoral program must have a sound working knowledge in computing.

The admission process involves submitting the application for admission, undergraduate and graduate transcripts from previous colleges and universities attended, GRE test results, three letters of reference, a résumé and a statement of career goals and aspirations, and a self-assessment of past background. Translations of international credentials must be provided, if they are not in English; in some cases, applicants will be required to have documents evaluated by an external agency. A satisfactory score on the TOEFL examination is required for non-native English speakers. All of an applicant’s background is examined before an admission decision is made.

#### Policies

**Program Requirements**

The program includes: course requirements; a qualifying exam that tests fundamental concepts in systems engineering and operations research; a comprehensive exam that tests the research competency of the student; dissertation proposal defense; dissertation research; and dissertation predefense and defense. All general Mason and specific Volgenau School requirements apply to this program.

PhD dissertations are extremely time intensive, and successful completion requires full time focus. It is expected that students who have reached candidacy (that is, successfully presented their dissertation proposal) will spend full time on their research for at least one academic year.
year and will attend the majority of the SEOR departmental seminars throughout that period.

Reduction of Credit
The doctoral program is a 72 credit hour program; however, students entering with a Master’s degree in a related discipline will be given a reduction of credit up to 24 hours. Reduction of credit requires the approval of the program director or designee and the dean or designee of the school. They determine whether the credits are eligible for reduction of credit and applicable to the degree program and the number of credits to be reduced.

The 72 hours of required doctoral-level credits typically consist of 48 credits of coursework and 24 credits of dissertation research. Students who receive a reduction of credit will complete a minimum of 48 credits as outlined in Degree Requirements; students entering without an MS will need at least 24 additional credits of coursework.

All decisions concerning the student's course requirements and plan of study must be approved by the dissertation committee chair, as well as by the department's doctoral coordinator.

Requirements

Degree Requirements
Total credits: 72

Doctoral Coursework
A GPA of 3.50 is required, and no grade of C is allowed in these 24 credits. Students lacking prerequisites for their courses or lacking the coursework to complete the qualifying exams or their dissertation may be required to take additional courses.

</tr>
</tbody>
</table>

OR 541 Operations Research: Deterministic Models 3
OR 542 Operations Research: Stochastic Models 3
Select 12 additional credits from one of two alternatives (systems engineering or operations research) 12

Total Credits 24

1 Consult the SEOR Department for the list of allowable courses.

Note
With appropriate selection of courses, students may obtain the MS degree in systems engineering or operations research by completing 6 additional credits, including 3 approved credits from the advanced emphasis courses (which may also apply towards the PhD degree advanced emphasis requirements) and 3 credits of either SYST 699 Masters Project or OR 699 Masters Project. Consult the SEOR Department for further detail. Credits taken in the courses SYST 699 Masters Project or OR 699 Masters Project may not be applied towards the PhD degree program requirements.

Qualifying Exams
The exams are primarily for testing the students’ familiarity with fundamental concepts. Each student must take the following four exams within two years of enrolling in the program:

• Systems Engineering Principles
• Systems Engineering Design
• Deterministic Models
• Stochastic Models

A student who passes three of the four exams in the first attempt must retake and pass the failed exam within one year. A student who passes fewer than three exams in the first attempt must retake and pass an entire set of four exams within one year. After two unsuccessful attempts, a student is dismissed from the PhD program.

Dissertation Research
Choose 24 credits from the following:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>Select 24 credits from the following:</td>
<td>24</td>
<td></td>
</tr>
<tr>
<td>SEOR 998</td>
<td>Doctoral Dissertation Proposal</td>
<td></td>
</tr>
<tr>
<td>SEOR 999</td>
<td>Doctoral Dissertation (must complete a minimum of 12 credits)</td>
<td></td>
</tr>
</tbody>
</table>

Total Credits 24

Doctoral Supervisory Committee
Students should select a dissertation director and a doctoral supervisory committee as soon as possible. It is recommended that the committee be formed by the end of the second or third semester of study. The dissertation director must be a member of the SEOR graduate faculty or a member of the Mason graduate faculty with approval from the SEOR department chair. The doctoral supervisory committee must include at least three members from the SEOR department-approved graduate faculty, and at least one non-SEOR member from the Mason graduate faculty. The composition of the doctoral supervisory committee is to be approved by the doctoral coordinator. At least four members of the committee must be members of the Mason graduate faculty.
Comprehensive Exam
The comprehensive exam is taken after the student has satisfactorily completed all the advanced emphasis course work requirements in the approved plan of study filed by the student. The examiners will include the supervisory committee plus any outside examiners considered appropriate. However, the supervisory committee determines whether the student passes or not. The comprehensive exam consists of a written examination of 8 hours in length and an oral examination. The committee will determine if the student has a mastery of the advanced emphasis coursework. If a student fails the comprehensive exam, the student may request a re-examination within 60 days of receiving notice of the exam result. The request should be made in writing to the doctoral coordinator. If the student fails the re-examination or does not request a re-examination within 60 days, the student will be dismissed from the PhD program. In such a case, with recommendation of the supervisory committee and approval of the SEOR Chair, the student may apply his/her coursework towards a Master’s degree.

Dissertation Proposal
After passing the comprehensive exam, each doctoral student prepares a written dissertation proposal, which is presented to the doctoral supervisory committee. After successfully completing this requirement, the student is formally admitted as a candidate for the PhD degree.

Dissertation Defense
When the central portions of the research have been completed to the point where the student is able to describe the original contributions of the dissertation effort, a candidate submits the written dissertation to the supervisory committee and schedules an oral predefense with the committee. The predefense is attended by the supervisory committee. The supervisory committee must approve the work or the student must schedule a second predefense.

Once the committee believes the student is ready, a final public oral defense may be scheduled no sooner than one month after the conclusion of the predefense, with an announcement posted for at least two weeks. The defense must be attended by the supervisory committee and the department’s doctoral coordinator, unless an exception has been approved in advance by the doctoral coordinator. Following a satisfactory evaluation of the oral defense of the dissertation by the supervisory committee, the student must prepare, with supervision from the dissertation director, a final publishable dissertation that represents a definitive contribution to knowledge in systems engineering and operations research. This document must meet format guidelines specified by the Guide for Preparing Graduate Theses, Dissertations, and Projects. If the student fails to successfully defend the dissertation, the student may request a second defense, following the same procedures as for the initial defense. There is no time limit for this request, other than the general time limits for the doctoral degree. An additional predefense is not required, but the student is strongly advised to consult with the committee before scheduling a second defense. If the student fails on the second attempt to defend the dissertation, the student will be dismissed from the PhD program.

The program leading to the BS in Systems Engineering prepares students for a professional career in systems engineering. The program reflects the systems engineer’s unique perspective, which considers all aspects of a system throughout its lifetime. Mason’s systems engineering program is interdisciplinary, drawing from engineering, computer science, operations research, psychology, and economics. The core systems engineering courses tie these diverse threads to provide a global understanding of how individual engineering disciplines fit into the development of complex, large-scale systems. Students gain depth in a technical area by selecting a sequence of technical electives that constitute an emphasis. Students choose their own emphasis with the help of their advisor. A year-long senior design project provides hands-on experience in applying various systems engineering methods and tools. In the first two years, students obtain a basic foundation in mathematics, natural sciences, computing, writing, humanities, arts, and social sciences. The systems engineering program builds on this foundation, teaching theoretical knowledge, practical skills, and the ability to apply systems thinking to problems. Teamwork, collaborative learning, analytical skills, practical problem solving, and oral and written communication are strongly stressed.

Mission
The mission of the undergraduate program is to equip students with the ability to participate productively in the many professional activities associated with engineering a trustworthy system that satisfies client needs. The term “system” is interpreted broadly to include information, telecommunication, defense, health delivery, transportation, energy or manufacturing systems, as well as corporate processes.

Objectives
The program educational objectives of the Systems Engineering program are what we expect our students to attain within three to five years of graduation. Graduates earning the Bachelor of Science degree in Systems Engineering at George Mason University will:

- Use critical thinking, quantitative methods, and systems thinking to contribute to solutions for global societal challenges.
- Apply systems engineering methods, processes, models and tools to the engineering of complex systems.
- Advance the objectives of their organizations, profession, and society in a rapidly changing world.

Accreditation
The bachelor’s program in Systems Engineering is accredited by the Engineering Accreditation Commission of ABET, http://www.abet.org. The requirements for the degree may be satisfied through part-time enrollment.

Admissions & Policies

Policies
Change of Major
See Change of Major (p. 1013) for more information.
Grade Requirements

Students in the Systems Engineering, BS program must complete all mathematics, science, and VSE courses with a grade of C or better.

Termination from the Major

No math, science, or Volgenau School of Engineering course that is required for the major may be attempted more than three times. Those students who do not successfully complete such a course within three attempts will be terminated from the major. Undeclared students in the Volgenau School who do not successfully complete a course required for a Volgenau School major within three attempts will also be terminated.

In addition, students in the Volgenau School with evidence of continued failure to make adequate progress toward declaring or completing a Volgenau School major will also be terminated. Adequate progress is determined by the major program. For more information, see AP.5.2.4 Termination from the Major (https://catalog.gmu.edu/policies/academic/undergraduate-policies/#ap-5-2-4).

Once a student has attempted one of these courses twice unsuccessfully, the third attempt must be no later than the next semester of enrollment, excluding summers. Failure to take the course at that time will result in termination from the major. A third attempt of a Volgenau School of Engineering course requires support by the student’s major department as well as permission by the department offering the course. This permission is not guaranteed. If the student is unable to take the course when required, the student may request an extension to a future semester; extensions require approval of the student’s advisor, their department, and the Associate Dean for Undergraduate Programs. The deadline for extension requests is the add deadline for the semester in which the course is required.

Students who have been terminated from a Volgenau School of Engineering major may not register for a Volgenau School course without permission of the department offering the course. This applies to all undergraduate courses offered by the Volgenau School except IT 104 Introduction to Computing (Mason Core) (p. 142) and STAT 250 Introductory Statistics I (Mason Core) (p. 142).

A student may not declare any major in the Volgenau School of Engineering if the student has previously met the termination criteria for that major at any time, regardless of what the student’s major was at the time the courses were taken.

Synthesis Requirement

Mason’s synthesis requirement for systems engineering majors is satisfied by successful completion of SYST 495 Senior Design Project II (Mason Core) (p. 142). Students who do not pass SYST 495 Senior Design Project II (Mason Core) (p. 142) with a C or better must retake both SYST 490 Senior Design Project I and SYST 495 Senior Design Project II (Mason Core) (p. 142).

Writing-Intensive Requirement

Mason’s writing-intensive requirement for systems engineering majors is satisfied by successful completion of SYST 489 Senior Seminar.

Advising and Plan of Study

All systems engineering students are assigned a faculty advisor. With the advisor’s help and approval, each student is required to complete a plan of study. This plan of study, which is available from the SEOR office, constitutes a learning plan for the degree program and must be signed by the student’s advisor and the Department Chair. The plan of study must be updated and signed by the advisor at least once per year.

Accelerated Master’s

BS (selected)/Statistical Science, Accelerated MS

Overview

Highly-qualified students in BS programs have the option of applying to the accelerated Statistical Science, MS (p. 1141) program.

For more detailed information, see AP.6.7 Bachelor’s/Accelerated Master’s Degrees (p. 93). For policies governing all graduate degrees, see AP6 Graduate Policies (p. 90).

Admission Requirements

No specific undergraduate BS degree is required. Students enrolled in any BS degree may apply to the accelerated Statistical Science, MS (p. 1141) program if such an accelerated Statistical Science, MS pathway is allowable from the student’s BS program, which will be determined by the academic advisors of both the BS and MS programs; and if they have earned 90 undergraduate credits with an overall GPA of 3.00. Students must have successfully completed the following Mason courses each with a grade of C or better prior to admission to the accelerated program:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>MATH 213</td>
<td>Analytic Geometry and Calculus III</td>
<td>3</td>
</tr>
<tr>
<td>MATH 203</td>
<td>Linear Algebra</td>
<td>3</td>
</tr>
<tr>
<td>or MATH 321</td>
<td>Abstract Algebra</td>
<td></td>
</tr>
<tr>
<td>STAT 250</td>
<td>Introductory Statistics I (Mason Core) (p. 142)</td>
<td>3</td>
</tr>
<tr>
<td>or STAT 344</td>
<td>Probability and Statistics for Engineers and Scientists I</td>
<td></td>
</tr>
<tr>
<td>STAT 346</td>
<td>Probability for Engineers</td>
<td>3</td>
</tr>
<tr>
<td>or MATH 351</td>
<td>Probability</td>
<td></td>
</tr>
<tr>
<td>STAT 362</td>
<td>Introduction to Computer Statistical Packages</td>
<td>3</td>
</tr>
</tbody>
</table>

Accelerated Option Requirements

Students must complete all credits satisfying degree requirements for the BS and MS programs, with 6 credits overlap chosen from the following courses: STAT 515 Applied Statistics and Visualization for Analytics, STAT 544 Applied Probability, STAT 554 Applied Statistics I, STAT 560
Biostatistical Methods, and STAT 574 Survey Sampling I. (Credit may not be received for both STAT 474 and STAT 574; nor for both STAT 460 and STAT 560.) The graduate courses selected for overlap must be approved by the academic advisors of both the BS and MS programs. All graduate course prerequisites must be completed prior to enrollment. Each graduate course must be completed with a grade of B or better to apply toward the MS degree.

While still in undergraduate status, a maximum of 6 additional graduate credits may be taken as reserve graduate credit and applied to the master's program. Reserve graduate credits do not apply to the undergraduate degree.

**Degree Conferral**
Students must apply the semester before they expect to complete the BS requirements to have the BS degree conferred. In addition, at the beginning of the student's final undergraduate semester, students must complete a Bachelor's/Accelerated Master's Transition form that is submitted to the Office of the University Registrar and Graduate Recruitment and Enrollment Services. At the completion of MS requirements, a master's degree is conferred.

**Systems Engineering, BS/Data Analytics Engineering, Accelerated MS**
Overview
Qualified undergraduate students in the Systems Engineering, BS (p. 1164) have the option of obtaining an accelerated Data Analytics Engineering, MS (p. 1019).

For more detailed information, see AP.6.7 Bachelor's/Accelerated Master's Degrees (p. 93). For policies governing all graduate degrees, see AP.6 Graduate Policies (p. 90).

**Admission Requirements**
Mason undergraduate students majoring in systems engineering may apply to this option if they have earned 90 undergraduate credits with an overall GPA of at least 3.30.

For the predictive analytics concentration, students must submit evidence of:
- Satisfactory completion of courses in calculus, applied probability and statistics, and a scientific programming language.
- Familiarity with analytical modeling software, such as spreadsheets or math packages.

**Accelerated Option Requirements**
Students must complete all credits that satisfy requirements for the BS and MS programs, with six credits overlap chosen from the courses in the following table. For BS candidates, these graduate courses replace the corresponding undergraduate courses listed. The undergraduate version of these courses may not be applied toward the MS degree.

<table>
<thead>
<tr>
<th>Undergraduate</th>
<th>Graduate</th>
<th>Credit may not be received for both courses.</th>
</tr>
</thead>
<tbody>
<tr>
<td>SYST 473</td>
<td>SYST 573</td>
<td></td>
</tr>
<tr>
<td>OR 441</td>
<td>OR 541</td>
<td></td>
</tr>
</tbody>
</table>

For the predictive analytics and financial engineering concentration, any other 500-level course may be applied to both the undergraduate and graduate degrees with approval of the advisor and SEOR department chair.

OR 541 Operations Research: Deterministic Models will substitute for the OR 531 Analytics and Decision Analysis core requirement in the MS DAE program. Students are not permitted to take OR 531 Analytics and Decision Analysis.

**Degree Conferral**
Students must apply the semester before they expect to complete the BS requirements to have the BS degree conferred. In addition, at the beginning of the student’s final undergraduate semester, students must complete a Bachelor’s/Accelerated Master’s Transition form that is submitted to the Office of the University Registrar and the VSE Graduate Admissions Office. At the completion of MS requirements, a master’s degree is conferred.

**Systems Engineering BS/Operations Research, Accelerated MS**
Overview
Qualified undergraduate students may apply for a five-year accelerated BS/MS program leading to a Bachelor of Science in Systems Engineering (p. 1164) and an MS degree in Operations Research (p. 1153).

For more detailed information, see AP.6.7 Bachelor’s/Accelerated Master’s Degrees (p. 93). For policies governing all graduate degrees, see AP.6 Graduate Policies (p. 90).

**Admission Requirements**
Mason undergraduate students majoring in systems engineering may apply to this option if they have earned 90 undergraduate credits with an overall GPA of at least 3.30 and completed all MATH and PHYS requirements. Criteria for admission are identical to criteria for admission to the Operations Research, MS program (p. 1153).

**Accelerated Option Requirements**
Up to two courses (six credit hours) of master’s level courses may be applied to both the undergraduate and the graduate degrees. These two courses may be chosen from the list of graduate courses in the following table. For Systems Engineering, BS students, these graduate courses replace the corresponding undergraduate courses listed in the table. The
undergraduate version of these courses may not be applied toward the Operations Research, MS.

<table>

</tr>
</tbody>
</table>

Any other 500-level course may be applied to both the undergraduate and graduate degrees with approval of the advisor and SEOR department chair.

**Degree Conferral**

Students must apply the semester before they expect to complete the BS requirements to have the BS degree conferred. In addition, at the beginning of the student's final undergraduate semester, students must complete a Bachelor's/Accelerated Master's Transition form that is submitted to the Office of the University Registrar and Graduate Recruitment and Enrollment Services. At the completion of MS requirements, a master's degree is conferred.

**Systems Engineering BS/Systems Engineering, Accelerated MS**

**Overview**

Qualified undergraduate students may apply for a five-year accelerated BS/MS program leading to a Bachelor of Science in Systems Engineering (p. 1164) and an MS degree in Systems Engineering (p. 1170).

For more detailed information, see AP6.7 Bachelor's/Accelerated Master's Degrees (p. 93). For policies governing all graduate degrees, see AP6 Graduate Policies (p. 90).

**Admission Requirements**

Mason undergraduate students majoring in systems engineering may apply to this option if they have earned 90 undergraduate credits with an overall GPA of at least 3.30 and completed all MATH and PHYS requirements. Criteria for admission are identical to criteria for admission to the Systems Engineering, MS program.

**Accelerated Option Requirements**

Up to two courses (six credit hours) of master’s level courses may be applied to both the undergraduate and the graduate degrees. These two courses may be chosen from the list of graduate courses in the following table. For Systems Engineering, BS students, these graduate courses replace the corresponding undergraduate courses listed in the table. The undergraduate version of these courses may not be applied toward the Systems Engineering, MS.

Any other 500-level course may be applied to both the undergraduate and graduate degrees with approval of the advisor and SEOR department chair.
Degree Conferral
Students must apply the semester before they expect to complete the BS requirements to have the BS degree conferred. In addition, at the beginning of the student’s final undergraduate semester, students must complete a Bachelor’s/Accelerated Master’s Transition form that is submitted to the Office of the University Registrar and Graduate Recruitment and Enrollment Services. At the completion of MS requirements, a master’s degree is conferred.

Systems Engineering, BS/Telecommunications, Accelerated MS
Overview
Highly-qualified students in the Systems Engineering, BS (p. 1164) have the option of obtaining an accelerated Telecommunications, MS (p. 1111).

For more detailed information, see AP 6.7 Bachelor’s/Accelerated Master’s Degrees (p. 93). For policies governing all graduate degrees, see AP 6 Graduate Policies (p. 90).

Admission Requirements
Students in the Systems Engineering, BS (p. 1164) program who preferably have chosen to take the systems engineering of telecommunications elective sequence may apply to this option if they have earned 90 undergraduate credits with an overall GPA of at least 3.30 and completed all MATH and PHYS requirements. Other students will be considered on their individual merit. Criteria for admission are identical to criteria for admission to the Telecommunications, MS (p. 1111) program.

Accelerated Option Requirements
Students must complete all credits that satisfy requirements for the BS and MS programs, with 6 credits overlap selected from the following courses:

Prerequisites
Some of the courses listed above have additional prerequisites. Students should pay careful attention to prerequisites when selecting courses.

Systems Engineering, MS
Banner Code: VS-MS-SYST

Academic Advising
Admissions & Policies

Admissions

Foundation and Admission Requirements

Each applicant for the MS program should meet the following entrance requirements:

1. Have a baccalaureate degree from an accredited institution in engineering, mathematics, computer science, physical sciences, economics, or a related field.
2. Have completed courses in multivariate calculus, matrix algebra, differential equations, applied probability and statistics, and a computer language.
3. Provide evidence of satisfactory educational achievement in at least one of the following forms: a GPA of at least 3.00 as an undergraduate or an acceptable GPA in graduate courses. International students must also achieve satisfactory scores on the Graduate Record Examination (GRE).
4. Have achieved a satisfactory score on the TOEFL examination for non-native English speakers.
5. Have two letters of recommendation submitted by former professors or supervisors.

Policies

Advising & Plan of Study

All entering systems engineering students must attend an orientation meeting. Each student is assigned a faculty advisor upon acceptance. Students must meet with their advisors during their first semester and design an approved plan of study. Students are encouraged to seek out their advisor when questions arise and when their plan of study needs to be revised. Any changes to the plan of study must be approved by the faculty advisor. A copy of the plan of study must remain on file with the department.

Requirements

Degree Requirements

Total credits: 30-33

To obtain the Master of Science degree, students must complete a minimum of 30 semester hours of graduate level courses that consists of five core courses, three concentration courses, an elective, and a systems engineering project.

Students must have a working background in engineering mathematics and computer systems. A student lacking these foundations may be required to take one or more foundation courses. The department offers SYST 500 Quantitative Foundations for Systems Engineering as an intensive review of undergraduate engineering mathematics, including matrix algebra, calculus, differential equations, probability and statistics. Students who have not completed a two-semester calculus sequence and matrix algebra will be required to complete these courses prior to taking SYST 500 Quantitative Foundations for Systems Engineering.

Approved basic methods and concentration courses for the eight concentration areas are listed below. Students are expected to select a set of concentration courses that constitute a clearly defined focus. These courses must be approved by the student’s advisor. Each student is required to have a current plan of study on file with the Systems Engineering and Operations Research Department.

Candidates for the MS must have a minimum GPA of 3.00 in course work applied to the degree, which may include no more than 6 credits of C. The GPA calculation excludes all transfer courses and Mason nondegree studies credits not formally approved for the degree.

**Total Credits**: 3

1 Students must complete one basic methods course. The choice of basic methods course may depend on the student’s concentration and must be selected from the list above.

**Concentrations**

Students must complete 3 courses (9 credits) from their area of emphasis. Students may select one of the following eight areas of concentration, or may create their own emphasis area with the approval of their advisor and the Department Chair.

- Advanced Transportation Systems (ATS) (p. 1172)
- Architecture-Based Systems Integration (ABSI) (p. 1172)
- Command, Control, Communications, Computing, and Intelligence (C4I) (p. 1173)
- Energy Systems (NRGS) (p. 1173)
- Financial Systems Engineering (FNSE) (p. 1173)
- Systems Engineering and Data Analytics (SEDA) (p. 1173)
- Systems Engineering of Software-Intensive Systems (SESI) (p. 1173)
- Systems Management (SMG) (p. 1174)

**Concentration in Advanced Transportation Systems (ATS)**

The air transportation system is among the most complex networked systems. This concentration is designed to provide students with the skills to address the next generation of challenges of the air transportation system. Topics addressed include congestion and safety of the national air space, economic and human factors, impact of technology innovation, and public policy. The program emphasizes design, modeling, and analysis to support decision making for government and the aviation industry.

**Concentration in Architecture-Based Systems Integration (ABSI)**

There is much interest today in the engineering of systems that comprise other component systems, where each of the component systems serves organizational and human purposes. These systems families are often categorized as systems of systems, federations of systems, or coalitions of systems. The design of architectures is a major ingredient in the design of systems families. Furthermore, it provides the conceptual basis for achieving system integration. This concentration covers the formulation of the system integration problem, definition of architecture frameworks, use of structured analysis and object-oriented methodologies for the design of architectures, modeling and simulation for the evaluation of architectures, and approaches to integration. Both defense and industrial applications are considered.

Concentration in Command, Control, Communications, Computing, and Intelligence (C4I)

C4I systems are concerned with gathering, retrieving, analyzing, and disseminating time-sensitive information to achieve mission-critical objectives. These systems support military operations across the spectrum of conflict, intelligence operations, transportation monitoring, emergency response, drug interdiction, and law enforcement, among others. C4I systems include the equipment, people, and procedures necessary to accomplish the mission. The equipment may include a variety of sensors, communications systems, and information processing and decision-support systems.

The program focuses on the analysis, design, development, and management of C4I systems. Topics addressed include C4I architectures and software, communications, decision support, modeling and simulation, and sensor data fusion.

Concentration in Energy Systems (NRGS)

With the rising economic and environmental costs to power homes, businesses and the transportation systems that move people and goods from place to place, innovative solutions are required to meet the world's expanding energy needs. Students completing the energy systems concentration will build upon a foundation in systems engineering design by incorporating physical principles of thermal fluid energy transfer into system models. Students will develop the tools to model and analyze generation, transmission, and utilization systems in steady and dynamic operation. Students will optimize these systems by considering physical principles, economics, local policy and security concerns. Graduates will be able to apply their expertise to work with: traditional power generation facilities; renewable energy integration; national, local, and smart grids; mechanical and electrical energy storage systems; utilization of energy in building and transportation systems.

Concentration in Financial Systems Engineering (FNSE)

Financial engineering is a cross-disciplinary field which relies on mathematical finance, numerical methods, and computer simulations to make trading, hedging, and investment decisions, as well as facilitating the risk management of those decisions. While mathematics is indispensable in financial engineering, the concentration will try best to focus on the concepts and ideas of finance, while limiting the math within a scope acceptable to most students in engineering.

Concentration in Systems Engineering and Data Analytics (SEDA)

Systems engineers must address a broad range of issues relevant to the design, implementation, analysis, and management of systems. This concentration provides methodological tools that can be applied to the systems engineering process. Areas of focus include decision support systems, distributed intelligent systems, knowledge-based planning systems, network systems, probabilistic reasoning systems, sensor fusion systems, and optimization methods.

Concentration in Systems Engineering of Software-Intensive Systems (SESI)

This concentration addresses the software component of the systems engineering life cycle. It specifically covers the allocation of system requirements to software. Practitioners are concerned with the theoretical and practical aspects of technology, cost, and the social effect of computer systems that are reliable, maintainable, secure, efficient, and cost effective. The program emphasizes the integration of hardware, software, and firmware, and the management of these complex computer systems over their life cycle through systems engineering methods, tools, and processes.

Concentration in Systems Management (SMG)
The management aspect of systems engineering involves tracking and control of system development through the major phases of the system lifecycle, identifying and resolving problems to minimize their effect on cost, schedule, or performance, and iteratively improving product and process. This concentration emphasizes the theory and practice of systems management and prepares students for careers in management.

Project or Thesis
Students must complete three credit hours of SYST 699 Masters Project. Students in this course work in teams on an approved applied project. A project report is submitted at the end of the semester, and a final project presentation is made to the entire faculty of the SEOR Department.

Online MS in Systems Engineering
The graduate program leading to the Master of Science in Systems Engineering can be completed entirely online. The delivery mode for the online program is asynchronous, but many courses are also offered in synchronous mode. Students may also plan a program with some courses taken online and some in the classroom. The following courses are offered online at least once a year:

- SYST 510 Systems Definition and Cost Modeling
- SYST 520 System Engineering Design
- SYST 530 Systems Engineering Management I
- SYST 542 Decision Support Systems Engineering
- SYST 573 Decision and Risk Analysis
- SYST 611 System Methodology and Modeling
- SYST 618 Model-based Systems Engineering
- SYST 620 Discrete Event Systems
- SYST 621 Systems Architecture Design

Accelerated Master’s

Bioengineering, BS/Systems Engineering, Accelerated MS
Overview
Highly-qualified students in the Bioengineering, BS (p. 1032) have the option of obtaining an accelerated Systems Engineering, MS (p. 1170).

For more detailed information, see AP6.7 Bachelor’s/Accelerated Master’s Degrees (p. 90). For policies governing all graduate degrees, see AP6 Graduate Policies (p. 90).

Admission Requirements
Mason undergraduate students majoring in Bioengineering, BS (p. 1032) may apply to this option if they have earned 90 undergraduate credits with an overall GPA of at least 3.30 and completed all MATH and PHYS requirements. Criteria for admission are identical to criteria for admission to the Systems Engineering, MS (p. 1170) program.

Accelerated Options Requirement
Students must complete all credits that satisfy requirements for both the BS and MS programs. Up to two courses (6 credits) of approved master’s level courses taken as part of the undergraduate degree may be applied to the graduate degree. The courses selected for this purpose must be approved by the academic advisors of both the BS and MS programs and by the SEOR department chair. For the BS programs that allow undergraduate electives from the department of system engineering and operations research, the students may chose the graduate version of such elective courses to replace the corresponding undergraduate courses.

Degree Conferral
Students must apply the semester before they expect to complete the BS requirements to have the BS degree conferred. In addition, at the beginning of the student’s final undergraduate semester, students must complete a Bachelor’s/Accelerated Master’s Transition form that is submitted to the Office of the University Registrar and the VSE Graduate Admissions Office. At the completion of MS requirements, a master’s degree is conferred.

Civil and Infrastructure Engineering, BS/Systems Engineering, Accelerated MS
Overview
Highly-qualified students in the Civil and Infrastructure Engineering, BS (p. 1177) have the option of obtaining an accelerated Systems Engineering, MS (p. 1170).

For more detailed information, see AP6.7 Bachelor’s/Accelerated Master’s Degrees (p. 90). For policies governing all graduate degrees, see AP6 Graduate Policies (p. 90).

Admission Requirements
Mason undergraduate students majoring in Civil and Infrastructure Engineering, BS (p. 1177) may apply to this option if they have earned 90 undergraduate credits with an overall GPA of at least 3.30 and completed all MATH and PHYS requirements. Criteria for admission are identical to criteria for admission to the Systems Engineering, MS (p. 1170) program.
Accelerated Options Requirement

Students must complete all credits that satisfy requirements for both the BS and MS programs. Up to two courses (6 credits) of approved master’s level courses taken as part of the undergraduate degree may be applied to the graduate degree. The courses selected for this purpose must be approved by the academic advisors of both the BS and MS programs and by the SEOR department chair. For the BS programs that allow undergraduate electives from the department of system engineering and operations research, the students may choose the graduate version of such elective courses to replace the corresponding undergraduate courses.

Degree Conferral

Students must apply the semester before they expect to complete the BS requirements to have the BS degree conferred. In addition, at the beginning of the student’s final undergraduate semester, students must complete a Bachelor’s/Accelerated Master’s Transition form that is submitted to the Office of the University Registrar and the VSE Graduate Admissions Office. At the completion of MS requirements, a master’s degree is conferred.

Cyber Security Engineering, BS/Systems Engineering, Accelerated MS

Overview

Highly-qualified students in the Cyber Security Engineering, BS (p. 1016) have the option of obtaining an accelerated Systems Engineering, MS (p. 1170).

For more detailed information, see AP6.7 Bachelor’s/Accelerated Master’s Degrees (p. 90). For policies governing all graduate degrees, see AP6 Graduate Policies (p. 90).

Admission Requirements

Mason undergraduate students majoring in Cyber Security Engineering, BS (p. 1016) may apply to this option if they have earned 90 undergraduate credits with an overall GPA of at least 3.30 and completed all MATH and PHYS requirements. Criteria for admission are identical to criteria for admission to the Systems Engineering, MS (p. 1170) program.

Accelerated Options Requirement

Students must complete all credits that satisfy requirements for both the BS and MS programs. Up to two courses (6 credit hours) of approved master’s level courses taken as part of the undergraduate degree may be applied to the graduate degree. The courses selected for this purpose must be approved by the academic advisors of both the BS and MS programs and by the SEOR department chair. For the BS programs that allow undergraduate electives from the department of system engineering and operations research, the students may choose the graduate version of such elective courses to replace the corresponding undergraduate courses.

Degree Conferral

Students must apply the semester before they expect to complete the BS requirements to have the BS degree conferred. In addition, at the beginning of the student’s final undergraduate semester, students must complete a Bachelor’s/Accelerated Master’s Transition form that is submitted to the Office of the University Registrar and the VSE Graduate Admissions Office. At the completion of MS requirements, a master’s degree is conferred.

Mechanical Engineering, BS/Systems Engineering, Accelerated MS

Overview

Highly-qualified students in the Mechanical Engineering, BS (p. 1177) have the option of obtaining an accelerated Systems Engineering, MS (p. 1170).

For more detailed information, see AP6.7 Bachelor’s/Accelerated Master’s Degrees (p. 90). For policies governing all graduate degrees, see AP6 Graduate Policies (p. 90).

Admission Requirements

Mason undergraduate students majoring in Mechanical Engineering, BS (p. 1177) may apply to this option if they have earned 90 undergraduate credits with an overall GPA of at least 3.30 and completed all MATH and PHYS requirements. Criteria for admission are identical to criteria for admission to the Systems Engineering, MS (p. 1170) program.

Accelerated Options Requirement

Students must complete all credits that satisfy requirements for both the BS and MS programs. Up to two courses (6 credits) of approved master’s level courses taken as part of the undergraduate degree may be applied to the graduate degree. The courses selected for this purpose must be approved by the academic advisors of both the BS and MS programs and by the SEOR department chair. For the BS programs that allow undergraduate electives from the department of system engineering and operations research, the students may choose the graduate version of such elective courses to replace the corresponding undergraduate courses.

Degree Conferral

Students must apply the semester before they expect to complete the BS requirements to have the BS degree conferred. In addition, at the beginning of the student’s final undergraduate semester, students must complete a Bachelor’s/Accelerated Master’s Transition form that is submitted to the Office of the University Registrar and the VSE Graduate Admissions Office. At the completion of MS requirements, a master’s degree is conferred.

Statistics, BS/Systems Engineering, Accelerated MS

Overview

Highly-qualified students in the Statistics, BS (p. 1146) have the option of obtaining an accelerated Systems Engineering, MS (p. 1170).

For more detailed information, see AP6.7 Bachelor’s/Accelerated Master’s Degrees (p. 90). For policies governing all graduate degrees, see AP6 Graduate Policies (p. 90).

Admission Requirements

Mason undergraduate students majoring in Statistics, BS (p. 1146) may apply to this option if they have earned 90 undergraduate credits with an overall GPA of at least 3.30 and completed all MATH and PHYS requirements. Criteria for admission are identical to criteria for admission to the Systems Engineering, MS (p. 1170) program.

Accelerated Options Requirement

Students must complete all credits that satisfy requirements for both the BS and MS programs. Up to two courses (6 credit hours) of
approved master’s level courses taken as part of the undergraduate degree may be applied to the graduate degree. The courses selected for this purpose must be approved by the academic advisors of both the BS and MS programs and by the SEOR department chair. For the BS programs that allow undergraduate electives from the department of system engineering and operations research, the students may choose the graduate version of such electives to replace the corresponding undergraduate courses.

Degree Conferral
Students must apply the semester before they expect to complete the BS requirements to have the BS degree conferred. In addition, at the beginning of the student’s final undergraduate semester, students must complete a Bachelor’s/Accelerated Master’s Transition form that is submitted to the Office of the University Registrar and the VSE Graduate Admissions Office. At the completion of MS requirements, a master’s degree is conferred.

Systems Engineering BS/Systems Engineering, Accelerated MS
Overview
Qualified undergraduate students may apply for a five-year accelerated BS/MS program leading to a Bachelor of Science in Systems Engineering (p. 1164) and an MS degree in Systems Engineering (p. 1170).

For more detailed information, see AP.6.7 Bachelor's/Accelerated Master’s Degrees (p. 93). For policies governing all graduate degrees, see AP.6 Graduate Policies (p. 90).

Admission Requirements
Mason undergraduate students majoring in systems engineering may apply to this option if they have earned 90 undergraduate credits with an overall GPA of at least 3.30 and completed all MATH and PHYS requirements. Criteria for admission are identical to criteria for admission to the Systems Engineering, MS program.

Accelerated Option Requirements
Up to two courses (six credit hours) of master’s level courses may be applied to both the undergraduate and the graduate degrees. These two courses may be chosen from the list of graduate courses in the following table. For Systems Engineering, BS students, these graduate courses replace the corresponding undergraduate courses listed in the table. The undergraduate version of these courses may not be applied toward the Systems Engineering, MS program.

<table>
<thead>
<tr>
<th>Undergraduate</th>
<th>Graduate</th>

<td>Credit may not be received for both courses.</td>
</tr>
</tbody>
</table>

Any other 500-level course may be applied to both the undergraduate and graduate degrees with approval of the advisor and SEOR department chair.

Degree Conferral
Students must apply the semester before they expect to complete the BS requirements to have the BS degree conferred. In addition, at the beginning of the student’s final undergraduate semester, students must complete a Bachelor’s/Accelerated Master’s Transition form that is submitted to the Office of the University Registrar and Graduate Recruitment and Enrollment Services. At the completion of MS requirements, a master’s degree is conferred.

BS (selected)/Systems Engineering, Accelerated MS
Overview
Highly-qualified students in BS programs have the option of obtaining an accelerated Systems Engineering, MS (p. 1170).

For more detailed information, see AP.6.7 Bachelor's/Accelerated Master’s Degrees (p. 93). For policies governing all graduate degrees, see AP.6 Graduate Policies (p. 90).

Admission Requirements
Mason undergraduate students majoring in both engineering and non-engineering disciplines may apply to this option if 1) such an accelerated Systems Engineering, MS (p. 1170) pathway is allowable from the student’s BS program, which will be determined by the academic advisors of both the BS and MS programs and by the SEOR department chair, 2) they have earned 90 undergraduate credits with an overall GPA of at least 3.30, and 3) they have completed all MATH and PHYS requirements. Criteria for admission are identical to criteria for admission to the Systems Engineering, MS (p. 1170) program.

Accelerated Option Requirements
Students must complete all credits that satisfy requirements for both the BS and MS programs. Up to two courses (6 credits) of approved master’s level courses taken as part of the undergraduate degree may be applied
to the graduate degree. The courses selected for this purpose must be approved by the academic advisors of both the BS and MS programs and by the SEOR department chair.

For the BS programs that allow undergraduate electives from the department of systems engineering and operations research, the students may choose the graduate version of such elective courses to replace the corresponding undergraduate courses.

Degree Conferral
Students must apply the semester before they expect to complete the BS requirements to have the BS degree conferred. In addition, at the beginning of the student’s final undergraduate semester, students must complete a Bachelor’s/Accelerated Master’s Transition form that is submitted to the Office of the University Registrar and the VSE Graduate Admissions Office. At the completion of MS requirements, a master’s degree is conferred.

Sid and Reva Dewberry Department of Civil, Environmental, and Infrastructure Engineering

Sam Salem, Chair

Phone: 703-993-1675
Website: civil.gmu.edu

The Sid and Reva Dewberry Department of Civil, Environmental, and Infrastructure Engineering (CEIE) offers BS, MS, MEng, and PhD degrees. These degree programs focus on the physical and organizational infrastructure essential to the functioning of society.

Civil and infrastructure engineering is the study of land, transportation, water resources, environment, structures, geotechnology, and construction from a civil engineering perspective and within a complex technological, social, political, economic, and environmental context. The focus is on how these systems are successfully conceived, developed, designed, built, operated, maintained, and renewed in the built environment. This applies to major metropolitan areas in developed countries, such as Washington, D.C. and its integrated suburbs, and extends to infrastructure issues in developing nations which often involve very different issues.

An urban society thrives and prospers when adequate, appropriate, reliable, robust, secure, and cost-effective infrastructure systems are provided. The investment in existing infrastructure and other urban systems in the United States and abroad is enormous. The investment required to maintain, operate, renew, and manage the evolution of these infrastructure systems in the future is even greater. The need for highly educated and creative professionals to confront and solve these continuing vital problems is pressing. Examples of infrastructure systems include water supply and distribution; streets, roads, and highways; wastewater management; transit; storm water management; public utilities; energy supply and distribution; telecommunications; buildings, facilities and structures; and solid waste management.

Lisa Nolder, Associate Director for Undergraduate Programs

Phone: 703-993-1675
Email: snolder@gmu.edu
Website: http://civil.gmu.edu/undergraduate

The bachelor’s degree program provides essential underpinnings in the theory and design methods of civil and infrastructure engineering for engineering practice. Students benefit from exposure to practical civil, environmental, and infrastructure engineering problems and their solutions in the classroom, lab, and field. The educational objectives of the Civil and Infrastructure Engineering program describe expectations for graduates approximately three to five years after obtaining their degree. Graduates of the program will be professionals who:

• Engage in the engineering practice of planning, designing, constructing, operating and maintaining sustainable infrastructure;
• Participate in public discussions concerning infrastructure in the urban, suburban, and exurban setting by providing professional guidance;
• Stay current through continuing education opportunities, professional conferences, graduate school, and other self-learning experiences; have the ability to obtain and maintain professional licensing.

Civil engineering students can look forward to a career in local, state, and federal government organizations, and in architectural and engineering firms that specialize in land development, transportation, water resources, environment, structures, geotechnical, construction, and other related fields. The program also prepares students for continuing graduate studies for sophisticated practice, research, and teaching.

The bachelor’s program in civil and infrastructure engineering is accredited by the Engineering Accreditation Commission of ABET, http://www.abet.org.

This is a Green Leaf program (p. 107).

Admissions & Policies

Policies

For policies governing all undergraduate degrees, see AP 5 Undergraduate Policies (p. 87).

Change of Major

See Change of Major (p. 1013) for more information.

Program Requirements

Degree requirements include 120 credits distributed in three major areas: mathematics and basic science, humanities and social sciences, and civil engineering analysis and design. Students must complete all math, science and Volgenau School of Engineering courses presented as part of the required 120 credits for the degree with a grade of C or better.

The prerequisite structure for these courses is extensive. Sample schedules, available from the department, provide a comprehensive listing of major and Mason Core requirements and serve as a guide to the progression of the courses to satisfy all prerequisites.

Students are required to see their faculty advisor at least once each year to plan their curriculum, and to develop an approved plan of study, which constitutes a learning plan for the degree program.

Termination from the Major

No math, science, or Volgenau School of Engineering course that is required for the major may be attempted more than three times. Those students who do not successfully complete such a course within three attempts will be terminated from the major. Undeclared students in the Volgenau School who do not successfully complete a course required for a Volgenau School major within three attempts will also be terminated.

In addition, students in the Volgenau School with evidence of continued failure to make adequate progress toward declaring or completing a Volgenau School major will also be terminated. Adequate progress is determined by the major program. For more information, see AP 5.2.4 Termination from the Major (https://catalog.gmu.edu/policies/academic/undergraduate-policies/#ap-5-2-4).

Once a student has attempted one of these courses twice unsuccessfully, the third attempt must be no later than the next semester of enrollment, excluding summers. Failure to take the course at that time will result in termination from the major. A third attempt of a Volgenau School of Engineering course requires support by the student’s major department as well as permission by the department offering the course. This permission is not guaranteed. If the student is unable to take the course when required, the student may request an extension to a future semester; extensions require approval of the student’s advisor, their department, and the Associate Dean for Undergraduate Programs. The deadline for extension requests is the add deadline for the semester in which the course is required.

Students who have been terminated from a Volgenau School of Engineering major may not register for a Volgenau School course without permission of the department offering the course. This applies to all undergraduate courses offered by the Volgenau School except IT 104 Introduction to Computing (Mason Core) (p. 142) and STAT 250 Introductory Statistics I (Mason Core) (p. 142).

A student may not declare any major in the Volgenau School of Engineering if the student has previously met the termination criteria for that major at any time, regardless of what the student’s major was at the time the courses were taken.

### Writing-Intensive Requirement

The university’s writing-intensive requirement for civil and infrastructure engineering majors is satisfied by the successful completion of CEIE 301 Engineering and Economic Models in Civil Engineering.

### Additional Mason Core

Students must complete all Mason Core (p. 142) requirements not fulfilled by major requirements with one modification. CIE students are required to take 6 credits of written communication, 3 credits of literature, and courses in two of the following three areas: arts, global understanding, and western civilization/world history. This exemption...
Civil and Infrastructure Engineering, BS

means that CIE students meet the Volgenau School of Engineering’s requirement for humanities and social science courses by taking 21 credits rather than 24. The two additional Mason Core (p. 142) areas to be satisfied must be approved by the CEIE faculty advisor with the goal of best meeting the Mason Core (p. 142) needs of the student. All other Mason Core (p. 142) requirements must be met.

Honors

Honors in the Major

The Sid and Reva Dewberry Department of Civil, Environmental and Infrastructure Engineering offers an Honors Program in Civil and Infrastructure Engineering that creates a community of outstanding scholars in civil engineering who share a commitment to learning, service, and leadership. The Program is crafted around the civil and infrastructure curriculum, and is distinct from the University Honors Curriculum. Entry to the Honors Program is by invitation, extended to students with a minimum high school GPA of 3.80.

Requirements

The Honors Program is challenging, designed for the highly motivated student, and consists of 120 credits. Honors students must satisfy requirements in addition to those of the normal BS CIE degree, including:

- An advanced communication course, COMM 320 Business and Professional Communication or COMM 637 Risk Communication, which may serve as a substitute for one CEIE (4xx) level senior technical elective.
- A minimum of 6 credits of CEIE graduate (5xx/6xx) level courses (these courses may substitute for CEIE (4xx) level senior technical electives by approval of the Department Chair). Students must submit a Graduate Course for Undergraduate Credit Form for approval to the course instructor and Department Chair.

Once admitted to the Honors Program, students must remain in good standing and maintain a minimum cumulative GPA of 3.50 and a minimum GPA of 3.20 in each semester for all courses counting toward the BS CIE degree, maintain continuous enrollment working toward the BS CIE degree, and abide by the Mason Honor Code.

Accelerated Master’s

Civil and Infrastructure Engineering, BS/Civil and Infrastructure Engineering, Accelerated MS

Overview

Highly-qualified students in the Civil and Infrastructure Engineering, BS (p. 1177) have the option of obtaining an accelerated Civil and Infrastructure Engineering, MS (p. 1182).

For more detailed information, see AP6.7 Bachelor’s/Accelerated Master’s Degrees (p. 93). For policies governing all graduate degrees, see AP6 Graduate Policies (p. 90).

Admission Requirements

Students in the Civil and Infrastructure Engineering, BS (p. 1177) program may apply to this option if they have earned 90 undergraduate credits with an overall GPA of at least 3.30. All other criteria for admission are identical to criteria for admission into the Civil and Infrastructure Engineering, MS (p. 1182) program.

Accelerated Option Requirements

Students must complete all credits that satisfy requirements for both the BS and MS programs. Students register for 6 credits of overlapping graduate level courses in place of undergraduate technical elective courses. The courses selected for this purpose must be approved by the academic advisor.

Degree Requirements

Students must apply the semester before they expect to complete the BS requirements to have the BS degree conferred. In addition, at the beginning of the student’s final undergraduate semester, students must complete a Bachelor’s/Accelerated Master’s Transition form that is submitted to the Office of the University Registrar and the VSE Graduate Admissions Office. At the completion of MS requirements, a master’s degree is conferred.

Bachelor’s Degree (selected)/Environmental Science and Policy, Accelerated MS

Overview

This degree option allows highly qualified George Mason University students to earn an Environmental Science and Policy, MS (p. 696) in less time than if they had first graduated with an environmentally-focused Green Leaf-designated (p. 107) BA or BS degree and then applied to the MS program sequentially.

For more detailed information, see AP6.7 Bachelor’s/Accelerated Master’s Degrees (p. 93). For policies governing all graduate programs, see AP6 Graduate Policies (p. 90).

Admission Requirements

Students with an overall GPA of at least 3.20 who are pursuing any Green Leaf-designated (p. 107) major or minor may apply for provisional acceptance into this accelerated master’s program after completing two semesters of chemistry (including CHEM 211 General Chemistry I (Mason Core) (p. 142) and CHEM 212 General Chemistry II (Mason Core)
By the beginning of the undergraduate’s senior year, they should first submit a Graduate Application for Accelerated Master's Program form (obtained from the Office of Academic and Student Affairs (https://cos.gmu.edu/about/contact-us)). Secondly, in their senior year accelerated master’s students must complete the two graduate courses indicated on their Accelerated Master’s Program Application with a minimum grade of 3.00 in each course. They must maintain a minimum GPA of 3.00 in all coursework and in coursework applied to their major. Upon completion and conferral of the undergraduate degree in a Green Leaf-designated (p. 107) program, in the semester indicated in the application, they must additionally submit the Bachelor’s/Accelerated Master’s Transition form (found on the Office of the University Registrar website (http://registrar.gmu.edu/forms)) and will subsequently be admitted into graduate status.

By at least the beginning of their senior year, they should seek out a faculty member in the Department of Environmental Science and Policy (p. 688) who is willing to serve as their advisor. This advisor will aid the student in choosing the appropriate graduate courses to take and help to prepare the student for graduate studies. Admission into a research-oriented master’s concentration is dependent upon securing the agreement of a faculty advisor. Faculty from a variety of departments and colleges at George Mason (called “program faculty”) can serve as master’s advisors. Potential students are encouraged to speak with the graduate program coordinator in the department to obtain guidance on this issue.

### Application Requirements

Applicants to all graduate programs at Mason must meet the admission standards and application requirements for graduate study as specified in the Graduate Admission Policies (p. 68) section of this catalog, excluding the GRE exam requirement (which is not required for those enrolled in the accelerated program). This includes three letters of recommendation (at least one from a former professor or someone with a PhD), a recent resume, a statement of interest/research goals and interests (including information on the candidate’s proposed MS research), and a letter from their advisor stating that the advisor agrees to take on the candidate as an MS student, how the candidate would be a good fit for them and why candidate’s research topic would be suitable.

For information specific to the accelerated Environmental Science and Policy, MS (p. 696), see Graduate Admissions on the department’s website (http://esp.gmu.edu/academic-programs/graduate/admissions).

### Reserve Graduate Credits

Students admitted to this program may take graduate courses after completing 90 undergraduate credits, and up to 6 credits of appropriate environmentally-focused graduate coursework may be used in partial satisfaction of the requirements for the undergraduate degree. If students earn at least a 3.00 GPA in these classes, they are granted advanced standing in the master’s program and must then complete an additional 27 credits to receive the master’s degree.

To apply these credits to the master’s degree, students must request that the credits be moved from the undergraduate degree to the graduate degree using the Bachelor's/Accelerated Master’s Transition form found on the Office of the University Registrar website (http://registrar.gmu.edu/forms) (as noted above).

Students may take up to 6 additional environmentally-focused graduate credits as reserve graduate credit. These credits do not apply to the undergraduate degree but will reduce the subsequent master’s degree credits accordingly (e.g., with 6 credits counted towards undergraduate degree plus the maximum 6 reserve credits, an MS could be completed with 21 post-bachelor’s credits). The ability to take courses for reserve graduate credit is available to all high achieving undergraduates with the permission of the department.

### Civil and Infrastructure Engineering, BS/Operations Research, Accelerated MS Overview

Highly-qualified students in the Civil and Infrastructure Engineering, BS (p. 1177) have the option of obtaining an accelerated Operations Research, MS (p. 1153).

For more detailed information, see AP6.7 Bachelor's/Accelerated Master’s Degrees (p. 90). For policies governing all graduate degrees, see AP6 Graduate Policies (p. 90).

### Admission Requirements

Mason undergraduate students majoring in Civil and Infrastructure Engineering, BS (p. 1177) may apply to this option if they have earned 90 undergraduate credits with an overall GPA of at least 3.30 and completed all MATH and PHYS requirements. Criteria for admission are identical to criteria for admission to the Operations Research, MS (p. 1153) program.

Students must additionally complete MATH 203 Linear Algebra prior to applying for the graduate program.

### Accelerated Options Requirement

Students must complete all credits that satisfy requirements for both the BS and MS programs. Up to two courses (6 credits) of approved master’s level courses taken as part of the undergraduate degree may be applied to the graduate degree. The courses selected for this purpose must be approved by the academic advisors of both the BS and MS programs and by the SEOR department chair. For the BS programs that allow

6 credits of BIOL or CONS electives
undergraduate electives from the department of system engineering and operations research, the students may choose the graduate version of such elective courses to replace the corresponding undergraduate courses.

Degree Conferral
Students must apply the semester before they expect to complete the BS requirements to have the BS degree conferred. In addition, at the beginning of the student’s final undergraduate semester, students must complete a Bachelor's/Accelerated Master’s Transition form that is submitted to the Office of the University Registrar and the VSE Graduate Admissions Office. At the completion of MS requirements, a master’s degree is conferred.

Civil and Infrastructure Engineering, BS/Systems Engineering, Accelerated MS
Overview
Highly-qualified students in the Civil and Infrastructure Engineering, BS (p. 1177) have the option of obtaining an accelerated Systems Engineering, MS (p. 1170).

For more detailed information, see AP6.7 Bachelor's/Accelerated Master's Degrees (p. 90). For policies governing all graduate degrees, see AP6 Graduate Policies (p. 90).

Admission Requirements
Mason undergraduate students majoring in Civil and Infrastructure Engineering, BS (p. 1177) may apply to this option if they have earned 90 undergraduate credits with an overall GPA of at least 3.30 and completed all MATH and PHYS requirements. Criteria for admission are identical to criteria for admission to the Systems Engineering, MS (p. 1170) program.

Accelerated Options Requirement
Students must complete all credits that satisfy requirements for both the BS and MS programs. Up to two courses (6 credits) of approved master’s level courses taken as part of the undergraduate degree may be applied to the graduate degree. The courses selected for this purpose must be approved by the academic advisors of both the BS and MS programs and by the SEOR department chair. For the BS programs that allow undergraduate electives from the department of system engineering and operations research, the students may choose the graduate version of such elective courses to replace the corresponding undergraduate courses.

Degree Conferral
Students must apply the semester before they expect to complete the BS requirements to have the BS degree conferred. In addition, at the beginning of the student’s final undergraduate semester, students must complete a Bachelor's/Accelerated Master’s Transition form that is submitted to the Office of the University Registrar and the VSE Graduate Admissions Office. At the completion of MS requirements, a master’s degree is conferred.

Civil and Infrastructure Engineering, MS
Banner Code: VS-MS-CEIE

Academic Advising

This MS is designed for students who have completed a bachelor's degree in civil engineering, although students with related undergraduate degrees may be considered for provisional admission. The MS educates students in the theory and practice of civil engineering science and design, with a technical concentration. The master's degree is increasingly expected for high level practice in civil engineering, and prepares graduates to practice in civil engineering for federal, state, or local government; engineering design firms; construction firms; public utilities; non-governmental organizations; and local and regional planning firms, among others. The MS degree serves as a foundation for subsequent study in a doctoral program in civil engineering, as well as for graduate studies in architecture, law, business, economics, finance, and public policy and administration.

Both part-time and full-time study is available. Full-time students typically complete the degree in one and a half, to two years.

Admissions & Policies

Admissions
To be considered for admission to the program, a candidate must:

• Satisfy general University and Volgenau School requirements for admission to a graduate program,
• Have earned a baccalaureate degree in engineering or a related science,
• Provide two letters of reference, submitted by former professors or supervisors,
• Provide a goals statement and professional résumé.

Acceptance to the degree program is based on an assessment of the applicant’s capacity to pursue graduate studies successfully. Consideration is given to the undergraduate record, any previous graduate work, professional work experience, and reference letters.

Requirements

Degree Requirements
Total credits: 30

All MS students must develop a faculty-approved plan of study with a minimum of 30 graduate credits. These credits include two core courses (CEIE 601 Infrastructure Modeling and CEIE 605 Risk and Uncertainty in Civil Engineering), specific requirements of a concentration declared by the student, and seminar requirement (CEIE 795 Civil and Infrastructure Engineering Seminar).

Plan of Study
Students are responsible for developing and receiving advisor approval on a plan of study no later than the end of their second semester of study. Courses taken without prior approval by the faculty advisor may not be accepted for credit toward the degree. No more than three courses used for credit toward the MS may be cross-listed as undergraduate courses.
None may repeat material completed as part of the student’s previous studies. Most MS courses are offered on a three-semester rotation.

**Core Courses**

All MS students must complete the following two core courses within the first 12 credit hours of their MS studies. These courses provide a common background for understanding the breadth and complexity of civil and infrastructure engineering and for analyzing and solving engineering problems.

¹ Cross-lists with an undergraduate course

Note:

Electives outside of the chosen concentration can only be taken or substituted with the approval of the faculty advisor.

Project or Thesis Option

As part of the plan of study, students may elect to pursue research credits.

Research Project

Students complete CEIE 798 Research Project in Civil Engineering, during which they prepare and present a scholarly paper. The scholarly paper is a technical report on an independent study, laboratory or computer experimentation, or literature search on a current civil and infrastructure engineering topic selected under the guidance of a faculty advisor. CEIE 798 Research Project in Civil Engineering credits count toward the 30 credit hours required for the MS degree.

<table>

<td>Research Project in Civil Engineering (3 credits)</td>
<td></td>
</tr>
</tbody>
</table>

Total Credits 3

Master’s Thesis

Students complete CEIE 799 Master’s Thesis which counts toward the 30 credit hours required for the MS degree. The MS thesis should reflect a significant, independent research effort that advances engineering science, and is worthy of publication. The work is conducted under the guidance of a faculty thesis advisor, and the final written thesis and oral defense are defended before a three-member faculty committee.

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>

</tr>
</thead>
<tbody>
<tr>
<td>CEIE 799</td>
<td>Master’s Thesis (6 credits)</td>
<td></td>
</tr>
</tbody>
</table>

At least 9 credits of electives

Option 2: Project:

- CEIE 798 Research Project in Civil Engineering (3 credits)

Total Credits 3
In addition, students must make a satisfactory presentation of the thesis in the CEIE graduate seminar. The thesis is recommended for those students who wish to develop and document their research skills, or contemplate subsequent enrollment in a PhD program. Students are advised of the university’s continuous registration requirement for thesis and dissertation research credits. Upon first enrolling in CEIE 799 Master’s Thesis, the student must continue registration for each fall and spring semester until the thesis is successfully completed. CEIE 799 Master’s Thesis credits count toward the 30 credit hours required for the MS degree.

**Total Credits** 1-6

### Seminar Requirement

All degree candidates must attend a minimum of five graduate seminars approved by the CEIE Department for the degree program. Students must enroll in CEIE 795 Civil and Infrastructure Engineering Seminar and receive a satisfactory (S) grade by their final semester. This course is used to verify the seminar attendance requirement and is repeatable. Continuous enrollment every semester is encouraged for attendance tracking and for dissemination of seminar information but is not required.

### Accelerated Master’s

#### Civil and Infrastructure Engineering, BS/ Civil and Infrastructure Engineering, Accelerated MS

**Overview**

Highly qualified students in the Civil and Infrastructure Engineering, BS (p. 1177) have the option of obtaining an accelerated Civil and Infrastructure Engineering, MS (p. 1182).

For more detailed information, see AP6.7 Bachelor’s/Accelerated Master’s Degrees (p. 93). For policies governing all graduate degrees, see AP6 Graduate Policies (p. 90).

**Admission Requirements**

Students in the Civil and Infrastructure Engineering, BS (p. 1177) program may apply to this option if they have earned 90 undergraduate credits with an overall GPA of at least 3.30. All other criteria for admission are identical to criteria for admission into the Civil and Infrastructure Engineering, MS (p. 1182) program.

**Accelerated Option Requirements**

Students must complete all credits that satisfy requirements for both the BS and MS programs. Students register for 6 credits of overlapping graduate level courses in place of undergraduate technical elective courses. The courses selected for this purpose must be approved by the academic advisor.

### Degree Requirements

Students must apply the semester before they expect to complete the BS requirements to have the BS degree conferred. In addition, at the beginning of the student’s final undergraduate semester, students must complete a Bachelor’s/Accelerated Master’s Transition form that is submitted to the Office of the University Registrar and the VSE Graduate Admissions Office. At the completion of MS requirements, a master’s degree is conferred.

#### Civil and Infrastructure Engineering, PhD

**Banner Code:** VS-PHD-CEIE

**Academic Advising**

Phone: 703-993-1675  
Email: ceiegrad@gmu.edu  
Website: civil.gmu.edu/graduate/doctor-of-philosophy

The Doctor of Philosophy in Civil and Infrastructure Engineering was created to prepare students for advanced leadership positions in research and development in the public or private sector, academics, or government. Students may elect to study in the areas of: construction engineering and management, environmental and water resources engineering, geotechnical engineering, structural engineering, or transportation engineering. Admitted students will complete both required and applicable course work in their technical interest area based on a plan of study prepared with a doctoral advisor. They will take qualifying exams that assess student’s breadth of knowledge at the graduate level and competency to conduct research. They will form a doctoral committee and prepare and defend a dissertation proposal leading to PhD candidacy. Finally, they will conduct original scholarly research and prepare, then defend a doctoral dissertation. Both part-time and full-time study is available.

### Admissions & Policies

**Admissions Requirements**

All general George Mason University and specific Volgenau School admission requirements (including deadlines) apply. In addition, all applicants, including Mason undergraduates, must submit the following:

- Official transcript of undergraduate and graduate course work,
- For applicants whose official language is not English, official TOEFL scores which meet the minimum requirements set by the Volgenau School,
- Three letters of recommendation from individuals knowledgeable about the applicant’s professional or academic work (at least two of the letters should be from individuals with doctorates),
- Recent professional résumé,
- Substantial statement of interest that includes a description of the specific area of proposed dissertation research, contacts the student has made with potential faculty advisors, and an explanation of career and research goals.

Admission decisions will be based on the student’s qualifications and the availability of a faculty advisor in their proposed area of research.
The application materials will be reviewed by the department doctoral committee and decisions made with input from appropriate faculty members.

Financial support for outstanding applicants is available in the form of fellowships as well as research and teaching assistantships. For best consideration, applicants are encouraged to apply early and to contact potential faculty advisors to express interest in support.

**Policies**

**Reduction of Credit**

Students must complete a minimum of 72 graduate credits, which may be reduced by a maximum of 30 credits from a completed master’s degree in civil engineering or other related fields. Reduction of credit requires the approval of the program director or designee and the dean or designee of the school. They determine whether the credits are eligible for reduction of credit and applicable to the degree program and the number of credits to be reduced.

**Program Requirements**

The PhD in Civil and Infrastructure Engineering requires 72 graduate credits. Admitted students are expected to hold a Bachelor of Science in Civil Engineering or a degree in a closely-related engineering or science field.

The degree plan outlined in Degree Requirements is based on a student who receives a full 30 credit reduction. Students who do not receive a full credit reduction should choose additional credits in consultation with their advisor.

**Requirements**

**Degree Requirements**

Total credits: 72

**Doctoral Coursework**

A minimum GPA of 3.50 is required and no C grades are allowed for the coursework earned beyond the MS. A detailed plan of study will be prepared for each student upon acceptance into the program and in consultation with the faculty advisor, which outlines all course requirements to include:

**Required Courses**

Total Credits 12  

1 No more than three courses used for credit toward the PhD may be cross-listed as undergraduate courses. None may repeat material completed as part of the student’s previous studies.

**Qualifying Exam**

The PhD qualifying exam is offered twice a year prior to the start of the fall and spring semesters. The qualifying exam is intended to test students’ breadth of knowledge at the MS level in their research area and to evaluate readiness for research. Students entering with a MS degree are required to attempt the qualifying exam within 18 months of admission to the program. Students entering without a MS degree must attempt the qualifying exam within two years of admission to the program.

The qualifying exam consists of one written exam and one oral exam in the student’s primary research area. The available examination areas include:

- Area A: Construction Engineering and Management
- Area B: Environmental Engineering
- Area C: Geotechnical Engineering
- Area D: Structural Engineering
- Area E: Transportation Engineering
- Area F: Water Resources Engineering

The requirements of the written exam (deadlines for exam request, list of topics, allowed aid sheets, calculator policy etc.) are posted on the department’s website. The oral exam is conducted by an examining committee of three CEIE graduate faculty, of whom two must be in the student’s research area. Students give a five minute research presentation, and answer questions from the examination committee about the written exam, the research presentation and other related topics.

Students who receive an overall passing grade form a dissertation committee and register for CEIE 998 Doctoral Dissertation Proposal. Students who receive an overall failing grade may petition to repeat the exam. If granted, the second attempt, which includes both the written and the oral exam, must be completed within one calendar year. The petition to repeat the exam must be received within one month of the first exam attempt. No more than two exam attempts are permitted. Students who do not receive an overall passing grade are terminated from the program.

**Dissertation Research**

Students become eligible for CEIE 998 Doctoral Dissertation Proposal upon passing the qualifying exam (preceding section). Upon admission to candidacy, which requires satisfactory preparation and defense of a dissertation proposal, students may register for CEIE 999 Doctoral Dissertation.

Select 12-24 credits from the following: 1
Dissertation Research and Defense

On successful completion of the dissertation proposal, students are to conduct original research under the guidance of their dissertation director and dissertation committee members. Students are not to schedule their dissertation defense sooner than two semesters after a successful proposal defense. The dissertation must represent achievement in research, must be a significant contribution to the field of civil engineering, and should be deemed publishable in refereed journals. When the majority of the research has been completed, the candidate is to submit a written draft of the dissertation to the doctoral dissertation committee and schedule an oral defense to be attended by the doctoral dissertation committee. The CEIE department and the CEIE Graduate Coordinator must be notified of the defense at least two weeks prior to the defense to allow time to advertise it broadly.

On successful completion of the oral defense, students must submit a final dissertation that meets the guidelines specified by the Guide for Preparing Graduate Theses, Dissertations, and Projects. If the student fails to defend the dissertation successfully, the student may request a second defense following the same procedures as the initial defense. This request has no time limit, other than the general time limits for the doctoral degree as per Mason policy. The student is strongly advised to consult with the committee before scheduling the second defense. If the student fails on the second attempt to defend the dissertation, the student may be dismissed from the PhD program. Following a successful public defense and completion of the final form of the dissertation, the dissertation committee recommends the candidate for the degree of Doctor of Philosophy.

Teaching Opportunities

All PhD students are encouraged to participate in teaching activities in consultation with their major advisors. Teaching opportunities include presenting lectures, conducting recitation sessions, serving as a teaching assistant, working as a laboratory assistant, participating in teaching workshops, preparing course materials, and other related activities approved by the student’s advisor.

Environmental Engineering Minor

Banner Code: EENG

Lisa Nolder, Associate Director for Undergraduate Programs

Phone: 703-993-1675
Email: snolder@gmu.edu
Website: civil.gmu.edu/undergraduate/minors

Students with engineering majors in CEIE (p. 1177), BIOE (p. 1032), SEOR (p. 1164), and non-engineering majors in Biology (p. 643), Chemistry (p. 662), Environmental Science and Policy (p. 688), Geography and Geoinformation Science (p. 717), and Geology (p. 634) are especially encouraged to consider this offering. The minor prepares students through additional coursework for subsequent graduate studies in water and environmental engineering at Mason or elsewhere, and for employment in environmental engineering, although the minor by itself does not constitute an engineering qualification.

---

**Admissions & Policies**

This program is no longer accepting applications for new students.

The Master of Engineering (MEng) program in combined Geotechnical, Construction, and Structural Engineering (GeoConStruct) was designed in collaboration with leading engineers in practice to develop a course of study that recognizes that geotechnical engineering, construction engineering, and structural engineering are practiced together and should be taught together in an integrated manner. Its purpose is to educate engineers for practice, for excellence in design and execution now, laying the groundwork for practice demands 25 years from now. It is a program that balances theory and practice, building on the foundation of an undergraduate degree in civil engineering.

The MEng is practice-focused and entirely course-based. Students who wish to undertake a degree requiring a project or a research thesis should consider the MS in Civil and Infrastructure Engineering (p. 1182) with concentration in geotechnical or construction or structural engineering. All courses offered for the MEng program are open to MS students.

---

**Admissions Requirements**

To be considered for admission to the MEng program, a candidate must:

- Satisfy general University and Volgenau School requirements for admission to a graduate program,
- Have earned a baccalaureate degree in engineering or a related science,
- Provide two letters of recommendation from individuals knowledgeable about the applicant’s academic or professional work,
- Provide a goals statement and professional résumé.

Acceptance to the degree program is based on an assessment of the applicant’s capacity to pursue graduate study successfully. Students are assumed to have completed an undergraduate degree in civil engineering. Consideration is given to the undergraduate record, any previous graduate work, professional work experience, and reference letters. Students with minor admission deficiencies or with undergraduate degrees in related fields, such as geology or another branch of engineering, may be provisionally admitted subject to completing an articulation program of civil engineering undergraduate courses. Courses required for articulation are not creditable towards the MEng degree.

**Research Assistantships & Fellowships**

Research Assistantships and Fellowships are typically not awarded to students pursuing the MEng Program because it is entirely a course-based degree, rather than a research degree. Students interested in Teaching Assistantships (usually reserved for full-time graduate study) should indicate their interest on their application and also contact the department after an admissions decision is made.

Applied Science, BAS

Banner Code: UN-BAS-APLS

Administration

- Janette Kenner Muir, Academic Director and Associate Provost for Academic Initiatives and Services
- Marcy R. L. Glover, Curriculum Coordinator
- Krystal Dains, Coordinator, Volgenau School of Engineering concentrations
- Jane Walker, Coordinator, School of Conflict Analysis and Resolution concentration

The Bachelor of Applied Science (BAS) is an undergraduate liberal arts degree program for adult learners. It is designed primarily to deepen student knowledge in an academic area and foster critical thinking, analytic reasoning, and an ability to synthesize information.

The BAS articulates well with specialized Applied Associate Science (AAS) degree programs, providing a streamlined path to completion of traditional academic requirements leading to the baccalaureate degree. It meets students' professional and personal goals while developing a depth of knowledge and proficiency of skill that translates well to the workplace. However, it is not organized in the same way as a traditional baccalaureate degree. Students planning graduate study should consult with an academic advisor prior to undertaking this degree program.

Admissions & Policies

Admissions

As a prerequisite to enrollment in the BAS, students must have received an Associate of Applied Science (AAS) degree from an accredited two-year institution in an approved area of specialization. Students should review specific Admissions details on the program's website. (http://bas.gmu.edu)

Policies

For policies governing all undergraduate degrees, see AP .5 Undergraduate Policies (p. 87).

Program Requirements

BAS students must fulfill all requirements for bachelor’s degrees including Mason Core (p. 142) requirements, to include 45 credits of upper-level coursework. All Mason Core (p. 142) requirements must be met with either George Mason courses or transferrable equivalents.

The minimum credit requirement for a bachelor’s degree is 120 credits; however, while there is some variation between concentration areas, fulfilling all Mason Core (p. 142) requirements and an academic concentration is likely to require most BAS students to complete at least 63-66 credits at George Mason, which may lead to over 120 credits of coursework in order to receive the degree.

Admitted BAS students will be academically advised by the appropriate BAS Program concentration Advisor to plan their course of study including completion of the Mason Core (p. 142), the BAS concentration, and any remaining requirements. See t (http://bas.gmu.edu)he website (http://bas.gmu.edu) for more information.

The degree plan outlined is based on a student who transfers in a minimum of 30 credits from a completed AAS degree. Some of these...
Credits may count only towards the elective requirement within the BAS degree.

Specific concentrations may have additional policies indicated below.

**Requirements**

**Degree Requirements**

Total credits: 120-126

Concentrations are intended to provide focus for the BAS curriculum in an area relevant to the student’s AAS degree while allowing for the breadth of study associated with a liberal arts baccalaureate degree. Please note that determination of current transfer work for these concentrations may impact course requirements.

In addition to satisfying all Mason Core (p. 142) requirements, students must satisfy the requirements for one of the seven concentrations.

**Concentrations**

- Concentration in Applied Conflict Analysis and Resolution (ACAR) (p. 1191)
- Concentration in Conservation Studies (CNST) (p. 1191)
- Concentration in Cyber Security (CYBS) (p. 1192)
- Concentration in Defense Information Systems Technology (DIST) (p. 1192)
- Concentration in Health, Wellness and Social Services (HWSS) (p. 1193)
- Concentration in Human Development and Family Science (HDFS) (p. 1194)
- Concentration in Legal Studies (LGLS) (p. 1194)
- Concentration in Managerial Leadership (MGL) (p. 1194)
- Concentration in Technology and Innovation (TCNV) (p. 1195)

**Concentration in Applied Conflict Analysis and Resolution (ACAR)**

This concentration is in collaboration with the School for Conflict Analysis and Resolution (p. 936).

- CONF 425 Mediating Conflict
- or foreign language completed at the 202 level.
- CONF 490 RS: Integration (Mason Core) (p. 142) 3

**Electives**

In consultation with their advisor, students are required to take 18 credits of concentration coursework; at least 9 credits must be from the CONF department. The concentration list can be found in the catalog or on our website.

Total Credits 42

**Electives (variable)**

All BAS students are required to complete a minimum of 120 credit hours of coursework. Students will work with their advisor to determine how to fulfill their outstanding credit hours to ensure they have met all major and university requirements. The number of elective credits that a BAS student may have available will vary by concentration and the amount of applicable transfer coursework the student has been awarded.

**Concentration in Conservation Studies (CNST)**

This concentration is in collaboration with the School of Integrative Studies and the Smithsonian-Mason School of Conservation. This degree is ideal for students who have earned an AAS in Veterinary Technology. One semester of study at the Smithsonian-Mason School of Conservation is required for completion of degree requirements.

**Total Credits**

42

1. All courses for this concentration are available in an online format with most offered as asynchronous delivery.

2. The Information Sciences and Technology department offers 1-credit, self-paced, online review courses; ending with an in-class final exam. Students who register for a 1-credit course and successfully pass will receive credit (not a waiver) for the corresponding 3-credit course. Students who are not successful must take the respective course at Mason to meet their degree requirements.

Review courses are available as follows:

- for IT 213 Multimedia and Web Design: IT 193 Review of Multimedia and Web Design
- for IT 214 Database Fundamentals: IT 194 Review of Database Fundamentals

**Electives (variable)**

All BAS students are required to complete a minimum of 120 credit hours of coursework. Students will work with their advisor to determine how to fulfill their outstanding credit hours to ensure they have met all major and university requirements. The number of elective credits that a BAS student may have available will vary by concentration and the amount of applicable transfer coursework the student has been awarded.
A-Z COURSES

For more detailed information on courses, see please go to AP 2 Course Information (p. 82).

See Courses at Mason (http://catalog.gmu.edu/course-search) for additional schedule details.

Course information accurate at time of publication in April 2019. For the most updated version, view course details on Patriot Web prior to registering.

Academic English (AE)

000 Level Courses

AE 000: AE Pre-Registration. 0 credits.
Offered by INTO Mason (p. 130). May not be repeated for credit.

Registration Restrictions:
Enrollment is limited to English Language level students.

Schedule Type: Lecture

Grading:
This course is graded on the Not Gradeable (NG) scale. (p. 84)

AE 002: Core Foundations. 10 credits.
Focuses on reading and writing in daily life. Develops basic writing (forming accurate simple sentences) and basic reading (identifying main ideas and explicit details in very short functional texts) on familiar, personally relevant topics. Introduces vocabulary and grammar at the CEFR A1+ level. Designed for non-native English speakers at a mid-beginning level in written skills. Offered by INTO Mason (p. 130). May be repeated within the degree for a maximum 20 credits.

Registration Restrictions:
Enrollment is limited to English Language level students.

Schedule Type: Lecture
