A course used to fulfill the Mason Core global understanding (p. 146) requirement may not be simultaneously used to satisfy this college-level requirement. A course used to fulfill this requirement may be used simultaneously to fulfill any other requirements (Mason Core requirements, college-level requirements, or requirements for the major). Additional information on waivers can be found at the Office of Undergraduate Academic Affairs (http://chssundergrad.gmu.edu).

**Mason Core**

Some Mason Core (p. 142) requirements may already be fulfilled by the major requirements listed above. Students are strongly encouraged to consult their advisors to ensure they fulfill all remaining Mason Core (p. 142) requirements.

</table>

1. Most programs include the writing-intensive course designated for the major as part of the major requirements; this course is therefore not counted towards the total required for Mason Core.
2. Minimum 3 credits required.

**Honors**

**Honors in the Major**

**Eligibility**

Majors who have completed 75 credits (a minimum of 15 credits in art history, with 6 credits taken at Mason) with an overall GPA of 3.50 and a GPA of 3.80 in art history are eligible to apply to graduate with honors in art history. Eligible students should apply to the undergraduate director by November 15 or April 15 with a statement of application including the names of two references from Mason art history faculty members. Transfer students should also submit transcripts. Not all applicants who meet the minimum requirements are guaranteed acceptance into honors in the major.

**Honors Requirements**

Students pursuing honors in the major complete ARTH 492 Honors Directed Readings and ARTH 493 Honors Directed Research, linked individualized courses that culminate in a research paper. Students must have completed at least one course in the field (or with the professor) chosen for these honors courses. ARTH 492 Honors Directed Readings should be taken before ARTH 493 Honors Directed Research, but they may be taken concurrently. To graduate with honors in the major, students must earn a minimum GPA of 3.50 in honors courses and a minimum GPA of 3.50 in art history courses applied to the degree. The two honors courses (6 credits) may be applied toward the requirement of 33- to 34-credits in art history, but they cannot replace the 6 required credits in the following:

**Accelerated Master’s**

The accelerated master’s program listed below specifies the BA in art history as a feeder degree for its program. It is important to note, however, that many accelerated master’s programs are available for any bachelor’s degree at Mason, including this one. See the full list of degrees (http://catalog.gmu.edu/programs/#filter=filter_24) with accelerated programs at George Mason. In addition, as a student with a BA in art history you may be particularly interested in the accelerated MA in art history (p. 401).

**Bachelor’s Degree (selected)/ Interdisciplinary Studies, Accelerated MAIS (Religious Studies Concentration)**

**Overview**

Highly-qualified undergraduates in selected majors (see below) may apply to the accelerated master’s degree in interdisciplinary studies with a concentration in religious studies. If accepted, and depending on their undergraduate major, students will be able to earn a bachelor’s degree in their chosen major and a master’s in interdisciplinary studies with a concentration in religious studies after satisfactory completion of 150
credits, sometimes within five years. See AP.6.7 Bachelor’s/Accelerated Master’s Degrees (p. 93).

Students in an accelerated degree program must fulfill all university requirements for the master’s degree. For policies governing all graduate degrees, see AP.6 Graduate Policies (p. 90).

Selected Majors

- Art history (p. 394)
- Philosophy (p. 442)
- Conflict analysis and resolution (p. 936)
- Global affairs (p. 523)
- History (p. 402)
- Religious studies (p. 491)
- Russian and Eurasian studies (p. 568)
- Sociology (p. 507)
- Anthropology (p. 497)

If the student has not majored in religious studies (p. 491), it is preferred, though not required, that the student have a minor in religious studies (p. 496).

Application Requirements

Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in the Admissions (p. 68). For information specific to the accelerated MAIS, see Application Requirements and Deadlines (http://mais.gmu.edu/programs/la-mais-isin/application).

Accelerated Option Requirements

While undergraduate students, accelerated master’s students complete two graduate courses as indicated on their Accelerated Master’s Program Application with a minimum grade of B in each course. Once admitted to the accelerated master’s pathway, students must maintain a minimum cumulative GPA of 3.25 in all coursework. Upon completion and conferral of the undergraduate degree in the semester indicated in the application, they submit the Bachelor’s/Accelerated Master’s Transition Form and are admitted to graduate status.

Code | Title | Credits
--- | --- | ---
RELI 600 | Interdisciplinary Pathways in the Study of Religion | 6
RELI 630 | Theories and Methods in the Study of Religion | 6
RELI 632 | Interreligious Dialogue | 6
RELI 633 | Issues in Religious Ethics | 6
RELI 636 | Religion and the Natural Environment | 6
RELI 637 | Religion and Secularity in State and Society | 6

Total Credits 6

As graduate students, accelerated master’s students have an advanced standing. They must meet all master’s degree requirements except for the two courses (6 credits) they completed as undergraduates. Students must begin their master’s program the semester immediately following conferral of the undergraduate degree.

Reserve Graduate Credit

Students may take up to 6 additional graduate credits as reserve graduate credit. These credits do not apply to the undergraduate degree. To apply these credits to the master’s degree, students should use the Bachelor’s/Accelerated Master’s Transition Form.

Total Credits 6

The ability to take courses, including ones not listed above, for reserve graduate credit is available to all high achieving undergraduates with the permission of the department. Permission is normally granted only to qualified Mason seniors within 15 hours of graduation. See AP.1.4.4 Graduate Course Enrollment by Undergraduates (p. 79).

Art History Minor

Banner Code: AH

Academic Advising

B359 Robinson Hall
Fairfax Campus

Website: historyarthistory.gmu.edu/programs/la-minor-hist-arth

This minor covers a broad spectrum of periods, cultures, and themes, with an emphasis on historical context.

Admissions & Policies

Policies

Eight credits of coursework must be unique to the minor and students must complete all coursework with a minimum GPA of 2.00. A maximum of 6 credits of ARTH 398 Study Abroad in the History of Art may be applied to the minor with permission of department.

For policies governing all minors, see AP.5.3.4 Minors (p. 90).

Requirements

Minor Requirements

Total credits: 18

Students should be aware of the specific policies associated with this program, located on the Admissions & Policies (p. 399) tab.
Students are strongly encouraged to participate in a study abroad program. ARTH 394 The Museum (Mason Core) (p. 142) is not required for the minor but is strongly encouraged.

Art History, MA

Banner Code: LA-MA-AH

Academic Advising

B359 Robinson Hall
Fairfax Campus

Website: historyarthistory.gmu.edu/programs/la-ma-ah

Art history MA students combine traditional research with the application of new media, while accessing the opportunities offered through the cultural resources of the Washington, D.C. area. The program emphasizes new media skills, museum studies, and pre-professional internship training. Students study a broad range of art-historical periods, theory, and research methods. Faculty specialize in periods from ancient to contemporary, and in areas covering Europe, North and South America, Asia, and the Middle East. Graduates are well-prepared for art museum and gallery professional work, where a master’s degree is now routinely required, or for further study in doctoral programs.

Admissions & Policies

Admissions

Application Requirements

Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in the Admissions (p. 68) section of this catalog. For information specific to the MA in Art History, see Application Requirements and Deadlines (http://historyarthistory.gmu.edu/programs/la-ma-ah/application).

Policies

For policies governing all graduate degrees, see Graduate Policies (p. 90).

This program does not permit a reduction of credit based on a previously-conferred graduate degree.

Requirements

Degree Requirements

Total credits: 30

Students should be aware of the specific policies associated with this program, located on the Admissions & Policies (p. 400) tab.

</tbody>
</table>

1 Students who choose to write a thesis complete 12 elective credits; others complete 15.

2 Students may choose electives in AVT, ANTH, or CULT with prior written permission of the graduate director.

Research Language Proficiency

Students must demonstrate reading ability in one relevant research language that must be approved by the graduate director. To meet this requirement, students must either achieve a satisfactory score on a proficiency exam or present coursework equivalent to a grade of B or
better in an intermediate-level foreign language course (202 or higher at George Mason).

**Written Comprehensive Exam**

Students who do not pass may retake the exam once, following the original process. The second exam must be taken within 12 months of the first exam.

**Optional Thesis**

Students who choose to write a thesis should be aware of the policies governing theses as stated in AP.6.9.3 Master’s Thesis (p. 95) policies. They must follow the thesis enrollment policy (p. 95) of the university and once enrolled in ARTH 799 Master’s Thesis, maintain continuous enrollment.

**Accelerated Master’s**

**Bachelor’s Degree (any)/Art History, Accelerated MA**

**Application Requirements**

Highly qualified undergraduates in any major who have taken at least two 300-level art history courses with a minimum grade of B+ in each may apply to the accelerated master’s degree in art history. If accepted, students will be able to earn a bachelor’s degree in their chosen major and a master’s degree in art history after satisfactory completion of 144 credits, sometimes within five years. See AP.6.7 Bachelor’s/Accelerated Master’s Degree (p. 93) for policies related to this program.

Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in the Admissions (p. 68). For information specific to the accelerated MA in art history, see Application Requirements and Deadlines on the departmental web site.

**Accelerated Option Requirements**

Applicants accepted to the accelerated MA program must have completed 90 credits including two 300-level ARTH courses with a minimum grade of B+ in each.

While undergraduate students, accelerated master’s students complete two graduate courses (two ARTH 599 Special Topics in Art History and the Decorative Arts courses on different topics or one ARTH 599 Special Topics in Art History and the Decorative Arts and one ARTH 699 Topics in Art History course) as indicated on their Accelerated Master’s Program Application with a minimum grade of B in each course. Once admitted to the accelerated master’s pathway, students must maintain a minimum cumulative GPA of 3.25 in all coursework and earn a grade of B or better (3.00 or higher) in coursework applied to their major. On completion and conferral of the undergraduate degree in the semester indicated in the application, they submit the Bachelor’s/Accelerated Master’s Transition Form and are admitted to graduate status.

As graduate students, accelerated master’s students have an advanced standing. They must meet all master’s degree requirements except for the two courses (6 credits) they completed as undergraduates. Students must begin their master’s program the semester immediately following conferral of the undergraduate degree.

**Reserve Graduate Credit**

Students may take up to 6 additional graduate credits as reserve graduate credit. These credits do not apply to the undergraduate degree. To apply these credits to the master’s degree, students should use the Bachelor’s/Accelerated Master’s Transition Form.

The ability to take courses, including ones not listed above, for reserve graduate credit is available to all high achieving undergraduates with the permission of the department. Permission is normally granted only to qualified Mason seniors within 15 hours of graduation. See AP.1.4.4 Graduate Course Enrollment by Undergraduates (p. 79).

**Digital Public Humanities Graduate Certificate**

**Banner Code: LA-CERG-DPH**

**Academic Advising**

B359 Robinson Hall
Fairfax Campus
Website: historyarthistory.gmu.edu/programs/la-cerg-dph

The graduate certificate in digital public humanities is a fully online program that trains students in a wide range of digital tools that are in increasingly high demand in humanities careers. Students will use these tools in developing their own digital projects, thus enhancing their professional portfolio. Students will also gain professional experience through an internship with the Smithsonian Institution, focused on applying skills learned from coursework. Internships will be coordinated remotely, allowing students to work from their locations.

**Admissions & Policies**

**Admissions**

Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in the Graduate Admissions (p. 68). For information specific to the graduate certificate in cognitive neuroscience, see Application Requirements and Deadlines (http://historyarthistory.gmu.edu/programs/la-cerg-dph/application).

**Policies**

Students pursuing this certificate must complete 15 credits of history graduate courses with a minimum grade of 3.00 in each course.

For policies governing all certificates, see AP.6.8 Requirements for Graduate Certificates (p. 94).

**Requirements**

**Certificate Requirements**

Total credits: 15
This certificate may be pursued on a part-time basis only.

Students should be aware of the specific policies associated with this program, located on the Admissions & Policies (p. 401) tab.

History, BA

Banner Code: LA-BA-HIST

B359 Robinson Hall
Fairfax Campus

Website: historyarthistory.gmu.edu/programs/la-ba-hist

The bachelor of arts in history looks at the range of human experience: how people have lived in the past, how they live and coexist in the present, and the links between the two. Students learn to interpret the past by examining a variety of original sources: newspapers, letters and diaries, literature, government records, images, films, oral interviews, and more. Majors hone their skills in collecting, interpreting, and communicating information. Majors move on to careers in government, law, and management, as well as teaching and graduate study.

Admissions & Policies

Policies

Students pursuing this degree must complete 36 credits within the major with at least 18 credits at the 300 and 400 levels. Additional credits of history in excess of 36 may be presented as elective credits to be counted toward graduation. Students must have a minimum GPA of 2.00 in courses applied to the major.

HIST 300 Introduction to Historical Method (Mason Core) (p. 142) and HIST 499 RS: Senior Seminar in History (Mason Core) (p. 142) may not be used to satisfy the geographic distribution requirements in U.S. history, European history, and global, Latin American, African, Asian, or Middle Eastern history. No more than 3 credits of ARTH coursework may apply to the History BA. For policies governing all undergraduate degrees, see AP5 Undergraduate Policies (p. 87).

Requirements

Degree Requirements

Total credits: minimum 120

Students should be aware of the specific policies associated with this program, located on the Admissions & Policies (p. 402) tab.

Before registering, students should see an advisor to help plan their history program to meet Mason Core (p. 142) and college-level requirements. The advisor also can help students choose electives or a minor.

</tbody>
</table>

Total Credits 12

1 Students should choose courses in history at the 300 or 400 levels to meet this requirement if they need credits to complete the 18-credit, upper-level history requirement. In addition to HIST courses, history majors may use one 300-level ARTH course and HNRS 240 Reading the Past (Topic Varies) to fulfill this requirement.

### Electives in the Major

Students may also meet the elective requirement by completing an optional concentration.

### Major with Concentration

#### Available Concentrations

- Concentration in Digital History (HISD) (p. 404)
- Concentration in Public History (HISP) (p. 405)
• Concentration in Global History (HISG) (p. 406)
• Concentration in U.S. History (HISU) (p. 408)
• Individualized Concentration (IND) (p. 409)

**Concentration in Digital History (HISD)**

In this concentration, students explore and develop skills in using digital methods for the research, analysis, and presentation of history. Students interested in graduate education or careers in the digital humanities and new media or in working with digital methods in museums, archives, and other public history institutions should consider this concentration.

**Core Courses**

<table>
<thead>

### Concentration in Global History (HISG)

In this concentration, students explore the interconnected histories of major world regions beyond the United States and Europe. Students interested in graduate education in global history or careers in government or business or with non-governmental organizations or other employers operating in the international arena should consider this concentration. Students in the global history concentration are especially encouraged to study abroad as part of their undergraduate program.

Optional foreign language skills development course in history

- HIST 386 Topics in History

Select four electives in history

Total Credits: 36

1 Depending on topic.
2 Working individually with their instructor for an upper-level HIST course, students may pursue historical reading or other work to develop skills in an appropriate foreign language in which they have already met the CHSS requirement for intermediate-level proficiency.
Students should choose courses in history at the 300- or 400-levels to meet this requirement if they need to complete the 18-credit, upper-level history requirement. In addition to HIST courses, students may apply HNRS 240 Reading the Past (Topic Varies) and/or one 300-level ARTH course not counted above toward this requirement. In total, no more than 3 credits of ARTH may be applied to the history BA.

**Concentration in U.S. History (HISU)**

In this concentration, students focus in-depth on the history of the United States while developing research and writing skills and completing at least one course in applied history. Students interested in law, government, and other career paths or in graduate education in U.S. history should consider this concentration.

**Core Courses**

Total Credits 6
Global, Latin American, African, Asian, or Middle Eastern History

Students in the concentration in U.S. History are encouraged to take at least one course with a broadly global perspective such as HIST 394 Globalization and History. Approved courses in history used to fulfill the Mason Core requirement in global understanding and the college-level requirement in non-Western culture may be used to fulfill this requirement.

</tbody>
</table>

Individualized Concentration (IND)

Students who wish to design their own concentration must submit a one-page proposal and create a curriculum plan to be approved by the program director. This option may be particularly appropriate for students who want to focus on U.S. history or European history without emphasis on digital or public history methods.

All students in the individualized concentration will be required to complete HIST 300 Introduction to Historical Method (Mason Core) (p. 142), HIST 499 RS: Senior Seminar in History (Mason Core) (p. 142), and 15-18 credits of breadth requirements modeled on the geographic distribution coursework in the history BA without concentration. For their remaining 12-15 credits in history, students will work with the program director to plan coursework that explores their chosen concentration across time periods and geographical lines as appropriate.

Writing-Intensive Requirement

The university requires all students to complete at least one course designated as “writing intensive” in their majors at the 300 level or above. Students majoring in history may fulfill this requirement by successfully completing:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>HIST 300</td>
<td>Introduction to Historical Method (Mason Core) (p. 142)</td>
<td>3</td>
</tr>
<tr>
<td>or HIST 499</td>
<td>RS: Senior Seminar in History (Mason Core) (p. 142)</td>
<td></td>
</tr>
</tbody>
</table>

Upper Level Requirement

Students seeking a bachelor’s degree must apply at least 45 credits of upper-level courses (numbered 300 or above) toward graduation requirements.

Additional Electives

Any remaining credits may be completed with elective courses to bring the degree total to 120.

College Level Requirements for the BA Degree

In addition to the Mason Core (p. 142) program, students pursuing a BA degree must complete the coursework below. Except where expressly prohibited, a course used to fulfill a college level requirement may also be used simultaneously to satisfy other requirements (Mason Core (p. 142) requirements or requirements for the major).

Philosophy or Religious Studies

<table>
<thead>
<tr>
<th>Code</th>

<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>PHIL</td>
<td></td>
<td>3</td>
</tr>
<tr>
<td>RELI</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

Select 3 credits from the following:

- PHIL (p. 2044)
- RELI (p. 2144)
Note that the following courses may not be used to fulfill this requirement:

- PHIL 323 Classical Western Political Theory
- PHIL 324 Modern Western Political Theory
- PHIL 327 Contemporary Western Political Theory
- PHIL 393 Humanities College to Career
- PHIL 460 Senior Seminar in Philosophy, Politics, and Economics

Additionally, PHIL 253 Philosophy and Literature (Mason Core) (p. 142) and RELI 235 Religion and Literature (Mason Core) (p. 142) cannot be used to fulfill both the philosophy/religious studies requirement and the Mason Core literature (p. 147) requirement.

Social and Behavioral Sciences

Select 3 credits of social and behavioral sciences from the following (additional to the Mason Core social and behavioral sciences requirement) ¹

<table>
<thead>
<tr>
<th>Code</th>

</table>

Or choose from the following GGS courses:

- GGS 101 Major World Regions (Mason Core) (p. 142)
- GGS 103 Human Geography (Mason Core) (p. 142)
- GGS 110 Introduction to Geoinformation Technologies
- GGS 301 Political Geography
- GGS 303 Geography of Resource Conservation (Mason Core) (p. 142)
- GGS 304 Population Geography (Mason Core) (p. 142)
- GGS 305 Economic Geography
- GGS 306 Urban Geography
- GGS 315 Geography of the United States
- GGS 316 Geography of Latin America
- GGS 320 Geography of Europe
- GGS 325 Geography of North Africa and the Middle East
- GGS 330 Geography of the Soviet Succession States
- GGS 357 Urban Planning
- GGS 380 Geography of Virginia

¹ The two courses used to fulfill the combined college and Mason Core (p. 142) requirements must be from different disciplines in the social and behavioral sciences.

² HIST 100 History of Western Civilization (Mason Core) (p. 142) and HIST 125 Introduction to World History (Mason Core) (p. 142) may not be used to fulfill this requirement.

Foreign Language

Intermediate-level proficiency in one foreign language, fulfilled by: ¹

- Completing a course in a foreign language numbered 202 (or higher level courses taught in the language) (p. 424)
- Or achieving a satisfactory score on an approved proficiency test
- Or completing the following ASL three course sequence:
  - EDSE 115 American Sign Language (ASL) I
  - EDSE 116 American Sign Language (ASL) II
  - EDSE 219 American Sign Language (ASL) III

¹ Students who are already proficient in a second language may be eligible for a waiver of this requirement. Additional information on waivers can be found at the Office of Undergraduate Academic Affairs (http://chssundergrad.gmu.edu).

Non-Western Culture

Select 3 credits of an approved course in the study of a non-Western culture (additional to the Mason Core requirement in global understanding)

1. A course used to fulfill the Mason Core global understanding (p. 146) requirement may not be simultaneously used to satisfy this college-level requirement. A course used to fulfill this requirement may be used simultaneously to fulfill any other requirements (Mason Core requirements, college-level requirements, or requirements for the major). Additional information on waivers can be found at the Office of Undergraduate Academic Affairs (http://chssundergrad.gmu.edu).

Honors

Honors in the Major

History majors who have completed 75 credits (a minimum of 15 in history, 6 of which must have been taken at Mason) with an overall GPA of 3.50 and a GPA of 3.50 in history courses are eligible to apply to graduate with honors in history. Applicants must have completed or be enrolled in HIST 300 Introduction to Historical Method (Mason Core) (p. 142). The statement of application should include references from at least one Mason history faculty member. If a major part of the student’s work includes transfer credit, transcripts may be required.

Not all applicants who meet the minimum requirements are guaranteed acceptance into honors in the major.

Students pursuing honors in the major will take a two-semester course sequence: HIST 490 Honors Directed Readings and HIST 491 Honors Directed Research. HIST 490 Honors Directed Readings will focus on the design of a major research project and HIST 491 Honors Directed Research will focus on completing that project. To graduate with honors in the major, students must earn a minimum GPA of 3.50 in the honors courses and a minimum GPA of 3.50 in history courses applied to the degree. A grade of B or higher in HIST 490 Honors Directed Readings is required to proceed to HIST 491 Honors Directed Research. The two honors courses (6 credits) may be applied to the requirement of 36 credits in history and successful completion of HIST 491 Honors Directed Research satisfies the seminar course requirement in place of HIST 499 RS: Senior Seminar in History (Mason Core) (p. 142).

Accelerated Master’s

The accelerated master’s programs in the list below specify the BA in history as a feeder degree for their programs. It is important to note, however, that many accelerated master’s programs are available for any bachelor’s degree at Mason, including this one. See the full list of degrees (http://catalog.gmu.edu/programs/#filter=filter_24) with accelerated programs at George Mason.

History, BA/History, Accelerated MA Overview

Highly-qualified Mason undergraduates may apply to the accelerated master’s degree program and obtain both a BA (p. 402) and a MA in history (p. 416) after satisfactory completion of 144 credits. The BA (p. 402) and MA (p. 416) earned separately require 120 and 30 credits respectively. If accepted into the program, they must have completed 90 credits including HIST 300 Introduction to Historical Method (Mason Core) (p. 142) with a minimum grade of B+ before they can enter the program.

Interested students should contact the Director of Undergraduate Programs for details about the application process.

For more detailed information, see AP.6.7 Bachelor’s/Accelerated Master’s Degrees (p. 93). For policies governing all graduate degrees, see AP.6 Graduate Policies (p. 90).

Application Requirements

Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in Graduate Admissions (p. 68). For information specific to the accelerated MA in history, see Application Requirements and Deadlines (http://historyarthistory.gmu.edu/programs/la-ma-acel-hist/application) on the departmental web site.

Accelerated Option Requirements

Applicants accepted to the accelerated MA program must have completed 90 credits including HIST 300 Introduction to Historical Method (Mason Core) (p. 142) with a minimum grade of B+ as a condition to entry into the program.

While undergraduate students, accelerated master’s students complete two graduate courses (HIST 610 The Study and Writing of History and one additional 3 credit HIST course at the 500-level or 600-level),
as indicated on their Accelerated Master’s Program Application, with a minimum grade of B in each course. These credits cannot replace HIST 499 RS: Senior Seminar in History (Mason Core) (p. 142). Once admitted to the accelerated master’s pathway, students must maintain a minimum cumulative GPA of 3.25 in all coursework and earn a B or better (3.00 or higher) in coursework applied to their major. On completion and conferral of the undergraduate degree in the semester indicated in the application, they submit the Bachelor’s/Accelerated Master’s Transition Form and are admitted to graduate status.

As graduate students, accelerated master’s students have an advanced standing. They must meet all master’s degree requirements except for the two courses (6 credits) they completed as undergraduates. Students must begin their master’s program the semester immediately following conferral of the undergraduate degree.

Reserve Graduate Credit

Students may take up to 6 additional credits of HIST courses at the 500-level or 600-level as reserve graduate credit. These credits do not apply to the undergraduate degree. To apply these credits to the master’s degree, students should use the Bachelor’s/Accelerated Master’s Transition Form.

The ability to take courses, including ones not listed above, for reserve graduate credit is available to all high achieving undergraduates with the permission of the department. Permission is normally granted only to qualified Mason seniors within 15 hours of graduation. See AP 1.4.4 Graduate Course Enrollment by Undergraduates (p. 79).

History, BA / Curriculum and Instruction, Accelerated MEd (Secondary Education History and Social Science Concentration)

Overview

Highly-qualified undergraduates may be admitted to the bachelor’s/accelerated master’s option and obtain both a BA in History (p. 402) and an MEd in Curriculum and Instruction (p. 170) (concentration in secondary education history and social science) in an accelerated time-frame after satisfactory completion of 149 credits. See AP 6.7 Bachelor’s/Accelerated Master’s Degree (p. 93) for policies related to this program.

This accelerated option is offered jointly by the Department of History and Art History (p. 392) and the Graduate School of Education (p. 162).

Students in an accelerated degree program must fulfill all university requirements for the master’s degree. For policies governing all graduate degrees, see AP 6 Graduate Policies (p. 90).

Application Requirements

Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in the Admissions Policies (p. 68). For information specific to this accelerated master’s program, see Application Requirements and Deadlines (https://cehd.gmu.edu/bachelors-accelerated-masters-program) on the College of Education and Human Development web site.

Accelerated Option Requirements

Students complete the following courses in their senior year:

Bachelor’s Degree (selected)/Interdisciplinary Studies, Accelerated MAIS (Religious Studies Concentration)

Overview

Highly-qualified undergraduates in selected majors (see below) may apply to the accelerated master’s degree in interdisciplinary studies with a concentration in religious studies. If accepted, and depending on their undergraduate major, students will be able to earn a bachelor’s degree in their chosen major and a master’s in interdisciplinary studies with a concentration in religious studies after satisfactory completion of 150 credits, sometimes within five years. See AP 6.7 Bachelor’s/Accelerated Master’s Degrees (p. 93).

Students in an accelerated degree program must fulfill all university requirements for the master’s degree. For policies governing all graduate degrees, see AP 6 Graduate Policies (p. 90).

Selected Majors

- Art history (p. 394)
- Philosophy (p. 442)
- Conflict analysis and resolution (p. 936)
- Global affairs (p. 523)
- History (p. 402)
- Religious studies (p. 491)
- Russian and Eurasian studies (p. 568)
- Sociology (p. 507)
- Anthropology (p. 497)

If the student has not majored in religious studies (p. 491), it is preferred, though not required, that the student have a minor in religious study (p. 496).

Application Requirements

Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in the Admissions (p. 68). For information specific to the accelerated MAIS, see Application Requirements and Deadlines (http://mais.gmu.edu/programs/la-mais-isin/application).

Accelerated Option Requirements

While undergraduate students, accelerated master’s students complete two graduate courses as indicated on their Accelerated Master’s Program Application with a minimum grade of B in each course. Once admitted to the accelerated master’s pathway, students must maintain a minimum cumulative GPA of 3.25 in all coursework. Upon completion and conferral of the undergraduate degree in the semester indicated in the application, they submit the Bachelor’s/Accelerated Master’s Transition Form and are admitted to graduate status.
INTERDISCIPLINARY PATHWAYS IN THE STUDY OF RELIGION

Overview

Highly-qualified undergraduates in select majors (listed below) may apply to the accelerated master’s degree in interdisciplinary studies with a concentration in social justice and human rights (p. 542). If accepted, and depending on their undergraduate major, students will be able to earn an undergraduate degree in their chosen major and a master’s in interdisciplinary studies with a concentration in social justice and human rights after satisfactory completion of 150 credits, sometimes within five years.

For more detailed information, see AP.6.7 Bachelor’s/Accelerated Master’s Degrees (p. 93). For policies governing all graduate degrees, see AP.6 Graduate Policies (p. 90).

SELECTED MAJORS

Anthropology (p. 497), Environmental and Sustainability Studies (p. 576), Sociology (p. 507), English (p. 370), History (p. 394), Philosophy (p. 442), Conflict Analysis and Resolution (p. 938), Psychology (p. 461), Government and International Politics (p. 972), Integrative Studies (p. 593), and Communication (p. 314).

APPLICATION REQUIREMENTS

Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in Graduate Admissions (p. 69). For information specific to the accelerated MAIS, see Application Requirements and Deadlines (http://mais.gmu.edu/programs/la-mais-isin/application) on the departmental web site.

ACCELERATED OPTION REQUIREMENTS

While undergraduate students, accelerated master’s students complete INTS 540 Contemporary Issues in Social Justice Human Rights and one course chosen from the list of electives for the MAIS concentration in social justice and human rights as indicated on their Accelerated Master’s Program Application with a minimum grade of B in each course. Once admitted to the accelerated master’s pathway, students must maintain a minimum cumulative GPA of 3.25 in all course work. Upon completion and conferral of the undergraduate degree in the semester indicated in the application, the Bachelor’s/ Accelerated Master’s Transition Form and are admitted to graduate status.

As graduate students, accelerated master’s students have an advanced standing. They must meet all master’s degree requirements except for the two courses (6 credits) they completed as undergraduates. Students must begin their master’s program the semester immediately following conferral of the undergraduate degree.

RESERVE GRADUATE CREDIT

Students may take up to 6 additional graduate credits as reserve graduate credit. These credits do not apply to the undergraduate degree. To apply these credits to the master’s degree, students should use the Bachelor’s/Accelerated Master’s Transition Form.

History Minor

Banner Code: HIST

Academic Advising
B359 Robinson Hall
Fairfax Campus
Website: historyarthistory.gmu.edu/programs/la-minor-hist-hist

The history minor allows majors in other disciplines to round out their education by completing a three-course concentration in the history of a world region and taking three additional history courses of their own choosing. History minors have opportunities to conduct independent research, engage in globally relevant activities through coursework and language study at Mason and abroad, and prepare for their future careers through internships and other college-to-career activities.

Admissions & Policies

Policies
Eight credits of coursework must be unique to the minor and students must complete all coursework with a minimum GPA of 2.00. Of the 18 credits applied to the minor, 12 credits must be at the 300 or 400-level.

For policies governing all minors, see AP 5.3.4 Minors (p. 90).

Requirements

Minor Requirements
Total credits: 18

Students should be aware of the specific policies associated with this program, located on the Admissions & Policies (p. 415) tab.

Core Courses

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>

</thead>
</table>

Select three courses (9 credits) concentrated in a region or topic. (p. 402) 9

Total Credits 9
Students choose courses to meet this requirement that are concentrated in a region or topic. The region or topic should relate, if possible, to their major. Lists of courses, by region, can be found in the BA in history without concentration degree requirements (p. 402). Students should review their plan with the director of the minor.

**Electives**

In addition to HIST (p. 1818) courses, students may use HNRS 240 Reading the Past (Topic Varies) to fulfill this requirement.

**History, MA**

**Banner Code:** LA-MA-HIST

**Academic Advising**

B359 Robinson Hall
Fairfax Campus

Website: historyarthistory.gmu.edu/programs/la-ma-hist

The faculty in the master of arts History program are at the forefront of traditional historical study, digital approaches to the past, and applied history. Students select from a variety of course topics while also selecting an area of historical specialization that accommodates their interests and furthers their career objectives. Students come to the program with diverse career objectives, and the program is designed with that diversity in mind. Students take classes in which they discuss history alongside future academics, public historians, teachers, military officers, non-profit professionals, government officials, entrepreneurs, and future academics.

**Admissions & Policies**

**Admissions**

Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in Graduate Admissions (p. 68). For specific information, see Application Requirements and Deadlines (http://historyarthistory.gmu.edu/programs/application/LA-MA-HIST) on the departmental website.

**Policies**

For policies governing all graduate degrees, see Graduate Policies (p. 90).

**Reduction of Credit**

The program does not permit a reduction of credit based on a previously conferred graduate degree. Students may apply no more than 6 credits earned through study abroad courses toward their degree.

**Requirements**

**Degree Requirements**

Total credits: 30 or 36

Students should be aware of the specific policies associated with this program, located on the Admissions & Policies (p. 416) tab.

Students pursuing this degree must complete the requirements for one of the concentrations below. The concentrations in higher education and teaching require 36 credits, all others require 30 credits.

**Concentrations**

- Concentration in Predoctoral History (AH1, EH1, WH1) (p. 416)
- Concentration in Applied History (AH2, EH2, WH2) (p. 417)
- Concentration in Applied History with New Media and Information Technology Emphasis (AH4, EH4, WH4) (p. 419)
- Concentration in Enrichment (AH3, EH3, WH3) (p. 420)
- Concentration in Higher Education (HEDU) (p. 421)
- Concentration in Teaching (HS4) (p. 422)

**Concentration in Predoctoral History (AH1, EH1, WH1)**

This concentration is for students planning to pursue doctoral studies. Students choose one of three geographic specializations and a chronological or thematic minor field within that specialization. Students complete coursework and a research seminar in their geographic specialization and an additional independent project or thesis in their minor field.

Concentration in Higher Education (HEDU)

The concentration in higher education is intended for students who want to teach history at community college. It includes coursework in both history and education, including a course on college teaching. Students are required to take at least one history course in each of three areas (U.S., European, and world history), and they are encouraged to take two courses in each area to prepare them to teach the U.S., western civilization, and world history survey courses most commonly offered at the community college level.

Concentration in Teaching (HS4)

This concentration offers students interested in a career in secondary education the option to devote part of their History MA to graduate coursework that can be applied toward the requirements for licensure in the Commonwealth of Virginia. Students who have an interest in obtaining licensure to teach should meet with a pre-Education advisor in the College Of Education and Human Development at the beginning of their program to create a plan for completion of the required content-coursework prerequisites (Endorsements). You can view information here: https://cehd.gmu.edu/endorse/ or contact the Pre-Education Advising Coordinator at endorse@gmu.edu. Students seeking licensure must also enroll in the Secondary Education Licensure Graduate Certificate, students will be eligible for recommendation for an initial teaching license in Secondary Education History and Social Science.

Accelerated Master’s

History, BA/History, Accelerated MA

Overview

Highly-qualified Mason undergraduates may apply to the accelerated master’s degree program and obtain both a BA (p. 402) and a MA in history (p. 416) after satisfactory completion of 144 credits. The BA (p. 402) and MA (p. 416) earned separately require 120 and 30 credits respectively. If accepted into the program, they must have completed 90 credits including HIST 300 Introduction to Historical Method (Mason Core) (p. 142) with a minimum grade of B+ before they can enter the program.

Interested students should contact the Director of Undergraduate Programs for details about the application process.

For more detailed information, see AP.6.7 Bachelor’s/Accelerated Master’s Degrees (p. 93). For policies governing all graduate degrees, see AP.6 Graduate Policies (p. 90).

Application Requirements

Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in Graduate Admissions (p. 68). For information specific to the accelerated MA in history, see Application Requirements and Deadlines (http://historyarthistory.gmu.edu/programs/la-ma-accel-hist/application) on the departmental web site.

Accelerated Option Requirements

Applicants accepted to the accelerated MA program must have completed 90 credits including HIST 300 Introduction to Historical Method (Mason Core) (p. 142) with a minimum grade of B+ as a condition to entry into the program.

While undergraduate students, accelerated master’s students complete two graduate courses (HIST 610 The Study and Writing of History and one additional 3 credit HIST course at the 500-level or 600-level), as indicated on their Accelerated Master’s Program Application, with a minimum grade of B in each course. These credits cannot replace HIST 499 RS: Senior Seminar in History (Mason Core) (p. 142). Once admitted to the accelerated master’s pathway, students must maintain a minimum cumulative GPA of 3.25 in all coursework and earn a B or better (3.00 or higher) in coursework applied to their major. On completion and conferral of the undergraduate degree in the semester...
indicated in the application, they submit the Bachelor’s/Accelerated Master’s Transition Form and are admitted to graduate status.

As graduate students, accelerated master’s students have an advanced standing. They must meet all master’s degree requirements except for the two courses (6 credits) they completed as undergraduates. Students must begin their master’s program the semester immediately following conferral of the undergraduate degree.

**Reserve Graduate Credit**

Students may take up to 6 additional credits of HIST courses at the 500-level or 600-level as reserve graduate credit. These credits do not apply to the undergraduate degree. To apply these credits to the master’s degree, students should use the Bachelor’s/Accelerated Master’s Transition Form.

The ability to take courses, including ones not listed above, for reserve graduate credit is available to all high achieving undergraduates with the permission of the department. Permission is normally granted only to qualified Mason seniors within 15 hours of graduation. See AP1.4.4 Graduate Course Enrollment by Undergraduates (p. 79).

**History, PhD**

**Banner Code: LA-PHD-HIST**

**Academic Advising**

B359 Robinson Hall
Fairfax Campus

Website: historyarthistory.gmu.edu/programs/la-phd-hist

The History, PhD prepares students for careers in college teaching, digital media, publishing, educational administration, public history, and historical research. Students gain expertise in conventional historical methods and web-based technologies. Major fields include U.S. history, European history, and world history. Minor fields are chosen by the student and may include such areas as public history, constitutional studies, and new media and information technology.

The PhD program allows students to develop programs of study to fit with a variety of career goals and interests - preparation to teach and research at the community college, college, or university level; work in the fields of digital humanities, new media and technology; work in the fields of public and applied history, such as museums, archives, preservation, and editing; and professional development.

**Admissions & Policies**

**Admissions**

Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in Graduate Admissions (p. 68). For specific information see Application Requirements and Deadlines (http://historyarthistory.gmu.edu/programs/application/LA-PHD-HIST) on the departmental web site.

**Policies**

For policies governing all graduate degrees, see Graduate Policies (p. 90).

**Reduction of Credit**

For students entering the doctoral program with a master’s degree, the number of required credits may be reduced by a maximum of 30 credits, subject to approval of the program faculty and the dean. Requests for reduction of credit are reviewed only after acceptance to the doctoral program.

**Requirements**

**Degree Requirements**

Total credits: 72

Students should be aware of the specific policies associated with this program, located on the Admissions & Policies (p. 423) tab.

Students will be terminated from the program if they receive more than one unsatisfactory grade (C or F). No more than 6 credits earned through study abroad courses may be applied towards the degree.

**Core Courses**

1 Minor fields may include areas such as public history, digital history, cultural history, women’s and gender history, the Atlantic World.

**Doctoral Research Skills**

Students must demonstrate basic competency in computers. Students whose research requires knowledge of a foreign language must also demonstrate a reading knowledge of one foreign language. The department sets specific research skills requirements for students, depending on their field of study.
Comprehensive Exam

Students need to pass a comprehensive exam that consists of a written field exam for each minor field and an oral exam for the major field.

Advancement to Candidacy

To advance to candidacy, students must complete all course work required on their approved program of study. Students must also successfully complete and pass an oral comprehensive exam in a major field and written examinations in two minor fields. In addition, students must have a dissertation committee appointed by the Dean's Office as well as an approved proposal. Evidence of the approved proposal must be on file in the Dean's Office before a student can be advanced to candidacy.

Dissertation

Once enrolled in HIST 998 Doctoral Dissertation Proposal, students in this degree program must maintain continuous registration in HIST 998 Doctoral Dissertation Proposal or HIST 999 Doctoral Dissertation Research each semester (excluding summers) until the dissertation is submitted to and accepted by the University Libraries. Once enrolled in HIST 999 Doctoral Dissertation Research, students must follow the university's continuous registration policy as specified in AP.6.10.6 Dissertation Research (p. 98). Students who defend in the summer must be registered for at least 1 credit of HIST 999 Doctoral Dissertation Research.

Students who complete less than 6 credits of HIST 810 History Doctoral Colloquium must take additional credits of HIST 998 Doctoral Dissertation Proposal or HIST 999 Doctoral Dissertation Research to reach the 72 credits required for the program.

Students may apply to this degree a minimum of 3 and a maximum of 6 credits of HIST 998 Doctoral Dissertation Proposal and a minimum of 15 credits of HIST 999 Doctoral Dissertation Research.

Foreign Languages with a Second Major

Majors in foreign language are encouraged to complete a second major in another field. Students who want to pursue a second undergraduate major should plan a program of study in consultation with advisors from both degrees and be familiar with the relevant policies on more than one major. See the Academic Policies (p. 89) section of the catalog.

Minors

Language majors are encouraged to complete a minor in another field.

The department offers minors in Arabic, Chinese, French, German Studies, Latin, Russian, Spanish, Classical Studies, Italian Studies, Japanese Studies, and Korean Studies. They are available to students in any major at Mason. Except for Classical Studies, all the minors have as a prerequisite the completion of 202 (or equivalent) in the relevant language.
Bachelor's/Accelerated Master's Programs
The department offers highly qualified undergraduates concentrating in Spanish the opportunity to apply to an accelerated master's degree program in Foreign Languages with a concentration in Spanish or a concentration in Spanish/bilingual-multicultural education (p. 433). If accepted, students will be able to earn an undergraduate degree and a graduate degree in Foreign Languages after satisfactory completion of 144-150 credits, generally within five years.

Graduate Programs
The department offers a distinctive interdisciplinary master's degree in foreign languages designed to meet the needs and interests of prospective and practicing teachers and other professionals. It also prepares students for doctoral study at other institutions. Within the master's degree, students choose one of four concentrations: French, Spanish, French and Spanish, and Spanish/bilingual-multicultural education.

Funding
The department has a limited number of teaching assistantships for highly qualified graduate students with excellent language preparation. Students develop valuable language teaching experience by working with faculty experts in language teaching pedagogy.

Arabic Minor
Banner Code: ARBC

Academic Advising
336 Aquia Building
Fairfax Campus

Email: language@gmu.edu
Website: mcl.gmu.edu/programs/la-minor-mcl-arab

The minor has an emphasis on developing strong language skills: oral communication and the reading of texts. Students are also introduced to important works of Arabic literature and culture. A minor in Arabic can easily and effectively be combined with majors in other disciplines. It is especially valuable in combination with global affairs, international relations, security, journalism, philosophy, and religion.

Admissions & Policies

Policies
Eight credits of coursework must be unique to the minor. Students must complete 18 credits at the 300-level or above with a minimum grade of 2.00 in each course. For policies governing all minors, see AP5.3.4 Minors (p. 90).

Requirements

Minor Requirements
Total credits: 18

Students should be aware of the specific policies associated with this program, located on the Admissions & Policies (p. 425) tab.

Relevant courses offered by other department may be allowed with Chinese program director’s approval.

### Classical Studies Minor

**Banner Code:** CLA

**Academic Advising**

336 Aquia Building  
Fairfax Campus  
Email: language@gmu.edu  
Website: mcl.gmu.edu/programs/LA-MINOR-MCL-CLA/requirements

The minor is designed for students who wish to become familiar with Classical cultures and broaden their knowledge of the foundations of Western civilization. It is especially relevant to students who are studying other areas of the humanities such as English, languages, comparative literature, history, art history, philosophy, or religious studies. The requirements of the minor provide flexibility so students can choose courses that are relevant to their primary interests.

### Admissions & Policies

#### Policies

Eight credits of coursework must be unique to the minor and students must complete all coursework with a minimum grade of 2.00. For policies governing all minors, see AP.5.3.4 Minors (p. 90).

### Requirements

#### Minor Requirements

Total credits: 18

Students should be aware of the specific policies associated with this program, located on the Admissions & Policies (p. 427) tab.

**Foreign Languages, BA**

**Banner Code:** LA-BA-FRLN

336 Aquia Building
Fairfax Campus

Email: language@gmu.edu
Website: mcl.gmu.edu/programs/LA-BA-FRLN

The BA in Foreign Languages prepares students for teaching, graduate study in languages and cultures, research, professional work, as well as service in government, nonprofits, or business. Our graduates are particularly valued for their multilingual and cross-cultural knowledge. Majors are encouraged to complete a minor or a second major in another field. Concentrations are offered in Arabic, Chinese, French, Korean, and Spanish. Minors are offered in Arabic, Chinese, Classical Studies, French, German Studies, Italian Studies, Japanese Studies, Korean Studies, Latin, Russian and Spanish.

Double majors in foreign language and another subject should plan a program of study with advisors from both disciplines and follow the steps outlined in AP.5.3.3 Second Bachelor’s Degree (p. 89).

**Admissions & Policies**

**Policies**

Students pursuing this degree must complete 30-33 credits within the major, with a minimum GPA of 2.00

For policies governing all undergraduate degrees, see AP.5 Undergraduate Policies (p. 87).

**Requirements**

**Degree Requirements**

Total credits: minimum 120

Students should be aware of the specific policies associated with this program, located on the Admissions & Policies (p. 428) tab.

**Concentrations in the Major**

In addition to the other college and university requirements for a degree, provided in the tabs below, students pursuing this degree complete a 30-33 credit concentration chosen from the following:

- Concentration in Arabic (ARBC) (p. 428)
- Concentration in Chinese (CHIN) (p. 429)
- Concentration in French (FRN) (p. 429)
- Concentration in Korean (KORE) (p. 429)
- Concentration in Spanish (SPN) (p. 430)

**Concentration in Arabic (ARBC)**

The concentration in Arabic has an emphasis on developing strong language skills, including literacy and oral communication, along with an in-depth understanding of modern Arabic culture and society. Students concentrating in Arabic are expected to gain fluency in Modern Standard Arabic and a working knowledge of at least one Arabic dialect. Additionally, students will graduate with a strong background in Arab intellectual history, literature, and culture.

Students pursuing the concentration in Arabic must complete a minimum of 30 credits in Arabic at the 300 level and above, each with a minimum grade of C. Only two courses (6 credits) taught in English may be applied to the major. Students are highly encouraged to participate in study abroad.

A minor in Arabic is also offered, which can easily and effectively be combined with majors in other disciplines, such as global affairs, international relations, government, journalism, philosophy, and religion.

**Electives**

Select two courses from the following: 6

- ARAB 325 Major Arab Writers/Stories (Mason Core) (p. 142)
- ARAB 360 Topics in Arabic Cultural Production
- ARAB 470 Special Topics in Modern Arabic Studies
- Anth (p. 1212) 1
- ARTH (p. 1240) 1
- ENGH (p. 1637) 1
- GOVT (p. 1774) 1
- HIST (p. 1818) 1
- PHIL (p. 2044) 1
- RELI (p. 2144) 1
Concentration in Chinese (CHIN)
The concentration in Chinese prepares students for research and professional work in government and private enterprise, teaching careers at the secondary school level, and graduate study in Chinese. Language majors with the Chinese concentration are encouraged to complete a minor or, if possible, a second major in another field.

Students pursuing the concentration in Chinese must complete a minimum of 30 credits in Chinese at the 300 level and above, each with a minimum grade of C. Students are expected to complete a balanced program that includes courses in language, culture, and civilization, and literature. Only two courses (6 credits) taught in English may be applied to the major. Students are highly encouraged to participate in study abroad.

A minor in Chinese (p. 426) is also offered, which can easily and effectively be combined with majors in other disciplines, such as global affairs, international relations, government, journalism, philosophy, and religion.

Concentration in French (FRN)
Students pursuing the concentration in French must complete a minimum of 33 credits in French at the 300 level and above, each with a minimum grade of C. No more than two courses (6 credits) conducted in English may be used to fulfill requirements for the concentration. These may be chosen from FREN 325 Major French Writers (Topic Varies) (Mason Core) (p. 142) or FREN 329 Problems of Western Civilization in French Literature (Mason Core) (p. 142) or a FRLN or non-MCL course at the 300- or 400-level with approval. Students are expected to complete a balanced program that includes courses in language, culture and civilization, and literature.

Concentration in Korean (KORE)
The major in Korean prepares students to perform professional work in the field of translation, international relations, local and federal government, transnational enterprise, cultural industry and teaching careers in Korea or at local public schools and to pursue graduate studies in Korean or Korean studies. The concentration in Korean has an emphasis on developing solid Korean language proficiency skills, technical translation skills, and in-depth understanding of both South and North Korean society and culture.

Students majoring in Korean need to complete a minimum of 30 credits in Korean at the 300 level and above, each with a minimum grade of C. Students are expected to take well-balanced courses including language, culture, literature and translation. Only two courses (6 credits) taught in English are applied to the major requirements. Students are strongly recommended to participate in study abroad.

The major in Korean can ideally be combined with majors or minors in other disciplines, such as global affairs, international relations, government, journalism, conflict analysis and resolution, philosophy, religion, and education.

### Concentration in Spanish (SPN)
With more than 400 million people speaking Spanish worldwide - nearly 40 million in the US - and the growing influence of Hispanic cultures around the globe, knowledge of Spanish and the Spanish-speaking world has never been more important. The Spanish courses and degree programs provide students with the opportunity for language development and interdisciplinary study of the cultures, film, history, linguistics and literature of the 20 Spanish-speaking countries, including the United States. Students can also receive Spanish credit through participation study-abroad programs.

Students pursuing the concentration in Spanish must complete a minimum of 33 credits in Spanish courses at the 300-level and above, each with a minimum grade of C. Only one course taught in English (3 credits) may be applied toward the concentration.

### Core Courses

Total Credits: 33

### Writing-Intensive Requirement
The university requires all students to complete at least one course designated "writing intensive" in their majors at the 300 level or above. Students majoring in foreign language may fulfill this requirement by successfully completing CHIN 480 Fourth-Year Chinese I, FREN 309 Reading and Writing Skills Development, or SPAN 370 Spanish Writing and Stylistics.

### Upper Level Requirement
Students seeking a bachelor's degree must apply at least 45 credits of upper-level courses (numbered 300 or above) toward graduation requirements.

### Additional Electives
Any remaining credits may be completed with elective courses to bring the degree total to 120.

### College Level Requirements for the BA Degree
In addition to the Mason Core (p. 142) program, students pursuing a BA degree must complete the coursework below. Except where expressly prohibited, a course used to fulfill a college level requirement may also be used simultaneously to satisfy other requirements (Mason Core (p. 142) requirements or requirements for the major).

### Philosophy or Religious Studies
Select 3 credits from the following:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>

</tr>
</thead>
<tbody>
<tr>
<td>PHIL (p. 2044)</td>
<td>3</td>
<td></td>
</tr>
<tr>
<td>RELI (p. 2144)</td>
<td>3</td>
<td></td>
</tr>
</tbody>
</table>

Note that the following courses may not be used to fulfill this requirement:

- PHIL 323 Classical Western Political Theory
- PHIL 324 Modern Western Political Theory
- PHIL 327 Contemporary Western Political Theory
- PHIL 393 Humanities College to Career
- PHIL 460 Senior Seminar in Philosophy, Politics, and Economics

Additionally, PHIL 253 Philosophy and Literature (Mason Core) (p. 142) and RELI 235 Religion and Literature (Mason Core) (p. 142) cannot be used to fulfill both the philosophy/religious studies requirement and the Mason Core literature (p. 147) requirement.
**Social and Behavioral Sciences**

<table>
<thead>
<tr>

Or choose from the following GGS courses:

- GGS 101 Major World Regions (Mason Core) (p. 142)
- GGS 103 Human Geography (Mason Core) (p. 142)
- GGS 110 Introduction to Geoinformation Technologies
- GGS 301 Political Geography
- GGS 303 Geography of Resource Conservation (Mason Core) (p. 142)
- GGS 304 Population Geography (Mason Core) (p. 142)
- GGS 305 Economic Geography
- GGS 306 Urban Geography
- GGS 315 Geography of the United States
- GGS 316 Geography of Latin America
- GGS 320 Geography of Europe
- GGS 325 Geography of North Africa and the Middle East
- GGS 330 Geography of the Soviet Succession States
- GGS 357 Urban Planning
- GGS 380 Geography of Virginia

¹ The two courses used to fulfill the combined college and Mason Core (p. 142) requirements must be from different disciplines in the social and behavioral sciences.

² HIST 100 History of Western Civilization (Mason Core) (p. 142) and HIST 125 Introduction to World History (Mason Core) (p. 142) may not be used to fulfill this requirement.

**Foreign Language**

<table>

1 A course used to fulfill the Mason Core global understanding (p. 146) requirement may not be simultaneously used to satisfy this college-level requirement. A course used to fulfill this requirement may be used simultaneously to fulfill any other requirements (Mason Core requirements, college-level requirements, or requirements for the major). Additional information on waivers can be found at the Office of Undergraduate Academic Affairs (http://chssundergrad.gmu.edu).
Mason Core
Some Mason Core (p. 142) requirements may already be fulfilled by the major requirements listed above. Students are strongly encouraged to consult their advisors to ensure they fulfill all remaining Mason Core (p. 142) requirements.

1 Most programs include the writing-intensive course designated for the major as part of the major requirements; this course is therefore not counted towards the total required for Mason Core.

2 Minimum 3 credits required.

Accelerated Master's
The accelerated master’s programs in the list below specify the BA in foreign languages with a Spanish concentration as a feeder degree for their programs. It is important to note, however, that many accelerated master's programs are available for any bachelor's degree at Mason, including this one. See the full list of degrees (http://catalog.gmu.edu/programs/#filter=filter_24) with accelerated programs at George Mason.

Foreign Languages, BA (Spanish Concentration)/Foreign Languages, Accelerated MA (Spanish Concentration)
Overview
Highly-qualified Mason undergraduates may apply to the accelerated master’s degree. If accepted, students may earn both a bachelor's degree in foreign languages with a concentration in Spanish (p. 428) and a master's degree in foreign languages with a concentration in Spanish/Bilingual-Multicultural Education Concentration (p. 434) after satisfactory completion of 144 credits.

For more detailed information, see AP6.7 Bachelor's/Accelerated Master's Degrees (p. 93). For policies governing all graduate degrees, see AP6 Graduate Policies (p. 90).

Application Requirements
Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in Graduate Admissions (p. 68). For information specific to the accelerated MA in Foreign Languages (Spanish concentration) (p. 434), see Application Requirements on the departmental website (http://mcl.gmu.edu).

Accelerated Option Requirements
While undergraduate students, accelerated master's students complete two graduate courses (SPAN 510 Methods of Literary and Cultural Studies and SPAN 502 Hispanic Sociolinguistics) as indicated on their Accelerated Master's Program Application with a minimum grade of B in each course. Once admitted to the accelerated master's pathway, students must maintain a minimum cumulative GPA of 3.25 in all course work. On completion and conferral of the undergraduate degree in the semester indicated in the application, they submit the Bachelor's/Accelerated Master's Transition Form and are admitted to graduate status.

As graduate students, accelerated master's students have an advanced standing. They must meet all master's degree requirements except for the two courses (6 credits) they completed as undergraduates. Students must begin their master's program the semester immediately following conferral of the undergraduate degree.

Reserve Graduate Credit
Students may take up to 6 additional graduate credits as reserve graduate credit. These credits do not apply to the undergraduate degree. To apply these credits to the master's degree, students should use the Bachelor's/Accelerated Master's Transition Form.

The ability to take courses, including ones not listed above, for reserve graduate credit is available to all high achieving undergraduates with the permission of the department. Permission is normally granted only to qualified Mason seniors within 15 hours of graduation. See AP1.4.4 Graduate Course Enrollment by Undergraduates (p. 79).

Foreign Languages, BA (Spanish Concentration)/Foreign Languages, Accelerated MA (Spanish/Bilingual-Multicultural Education Concentration)
Overview
Highly-qualified Mason undergraduates may apply to the accelerated master's degree. If accepted, students may earn both a bachelor's degree in foreign languages with a concentration in Spanish (p. 428) and a master's degree in foreign languages with a concentration in Spanish/Bilingual-Multicultural Education Concentration (p. 434) after satisfactory completion of 150 credits.

For more detailed information, see AP6.7 Bachelor's/Accelerated Master's Degrees (p. 93). For policies governing all graduate degrees, see AP6 Graduate Policies (p. 90).

Application Requirements
Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in Graduate Admissions (p. 68). For information specific to the accelerated MA in Foreign Languages (Spanish/Bilingual Multicultural Education concentration) (p. 434), see Application Requirements on the departmental website (http://mcl.gmu.edu).

Admissions & Policies
Admissions
Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in Graduate Admissions (p. 68). For specific information, see Application Requirements and Deadlines (http://mcl.gmu.edu/programs/application/LA-MA-FRLN) on the departmental website.

Policies
For policies governing all graduate degrees, see AP6 Graduate Policies.

Requirements
Degree Requirements
Total credits: 30-42
For policies governing all graduate degrees, see AP6 Graduate Policies (p. 90).
Each concentration has a different number of required credits. In all four concentrations, 6 of the total credits may be earned with a thesis. Regardless of the concentration selected, all students must meet the core and distribution requirements given below and pass a comprehensive exam or write a thesis.

Concentration in French (FRN)
18 credits must be in courses with the subject code FREN.

Total Credits 36

Students who elect to complete a thesis may apply 6 credits of 798 and 799 to fulfill this requirement.

Dual Degree Options

Foreign Languages, MA and Global Affairs, MA Dual Degree

Students interested in pursuing a dual master’s program linking foreign languages or global affairs with another discipline should discuss their interest with the graduate program directors of both programs and review the university policies regarding Individualized Dual Master’s Degree Programs (p. 96).

Students approved to pursue a dual master’s program linking the foreign languages MA with a concentration in French, Spanish, or Spanish bilingual/multicultural education with the global affairs MA can share 12 credits between the two programs. Application to the second master’s program should be pursued with consultation of the directors of both programs. Admission to the second master’s program will require that the student has met the minimum prerequisites for admissions to the second program.

Accelerated Master’s

Foreign Languages, BA (Spanish Concentration)/Foreign Languages, Accelerated MA (Spanish Concentration)

Overview

Highly-qualified Mason undergraduates may apply to the accelerated master’s degree. If accepted, students may earn both a bachelor’s degree (p. 428) and a master’s degree in foreign languages with a concentration in Spanish (p. 434) after satisfactory completion of 144 credits.

For more detailed information, see AP.6.7 Bachelor’s/Accelerated Master’s Degrees (p. 93). For policies governing all graduate degrees, see AP.6 Graduate Policies (p. 90).

Application Requirements

Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in Graduate Admissions (p. 68). For information specific to the accelerated MA in Foreign Languages (Spanish concentration) (p. 434), see Application Requirements on the departmental website (http://mcl.gmu.edu).

Accelerated Option Requirements

While undergraduate students, accelerated master’s students complete two graduate courses (SPAN 510 Methods of Literary and Cultural Studies and SPAN 502 Hispanic Sociolinguistics) as indicated on their Accelerated Master’s Program Application with a minimum grade of B in each course. Once admitted to the accelerated master’s pathway,
students must maintain a minimum cumulative GPA of 3.25 in all course work. On completion and conferral of the undergraduate degree in the semester indicated in the application, they submit the Bachelor’s/Accelerated Master’s Transition Form and are admitted to graduate status.

As graduate students, accelerated master’s students have an advanced standing. They must meet all master’s degree requirements except for the two courses (6 credits) they completed as undergraduates. Students must begin their master’s program the semester immediately following conferral of the undergraduate degree.

**Reserve Graduate Credit**

Students may take up to 6 additional graduate credits as reserve graduate credit. These credits do not apply to the undergraduate degree. To apply these credits to the master’s degree, students should use the Bachelor’s/Accelerated Master’s Transition Form.

The ability to take courses, including ones not listed above, for reserve graduate credit is available to all high achieving undergraduates with the permission of the department. Permission is normally granted only to qualified Mason seniors within 15 hours of graduation. See AP.1.4.4 Graduate Course Enrollment by Undergraduates (p. 79).

**French Minor**

Banner Code: FRN

Academic Advising

336 Aquia Building
Fairfax Campus

Website: mcl.gmu.edu/programs/LA-MINOR-MCL-FRN/

The minor in French provides students with the components of a well-rounded education in French: knowledge of the language (through conversation, composition, and grammar) combined with the study of literature and civilization.

**Admissions & Policies**

**Policies**

Eight credits of coursework must be unique to the minor and students must complete 18 credits at the 300-level or above with a minimum grade of 2.00 in each course. For policies governing all minors, see AP.5.3.4 Minors (p. 90).

**Requirements**

**Minor Requirements**

Total credits: 18

Students should be aware of the specific policies associated with this program, located on the Admissions & Policies (p. 436) tab.

**German Studies Minor**

**Banner Code:** GRMS

**Academic Advising**

336 Aquia Building
Fairfax Campus

Website: mcl.gmu.edu/programs/la-minor-mcl-grm/

The emphasis of the minor is on developing strong language skills: oral communication and the reading of texts. Students are introduced to important works of German literature and to the culture of German-speaking countries.

A German Studies minor can easily and effectively be combined with majors in other disciplines. It is especially valuable in combination with business, computer science, international studies, history, music, philosophy, or another language.

**Admissions & Policies**

**Policies**

Eight credits of coursework must be unique to the minor. Students pursuing this minor must complete 18 credits at the 300-level or above with a minimum grade of 2.00 in each course. For policies governing all minors, see AP.5.3.4 Minors (p. 90).

A maximum of two courses (6 credits) conducted in English can be applied to the minor.

Italian Studies Minor

Banner Code: ITLN

Academic Advising

336 Aquia Building
Fairfax Campus

Website: mcl.gmu.edu/programs/la-minor-mcl-itln

The minor enables students to advance their Italian language skills and to study Italian culture, history, and literature from an interdisciplinary perspective.

Admissions & Policies

Policies

Eight credits of coursework must be unique to the minor and students must earn a minimum grade of 2.00 in all courses applied to the minor. For policies governing all minors, see AP.5.3.4 Minors (p. 90).

Requirements

Minor Requirements

Total credits: 18

Students should be aware of the specific policies associated with this program, located on the Admissions & Policies (p. 438) tab.

Students complete coursework with a language emphasis or a history and culture emphasis. Special topics courses, such as HIST 388 Topics in European History, GOVT 520 Political Theory, and RELI 235 Religion and Literature (Mason Core) (p. 142), when relevant, may be applied to the minor with prior written approval of the coordinator.

Language Emphasis

Select five language courses from the following repeatable courses:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>ITAL 330</td>
<td>Advanced Italian: Language and Culture I</td>
<td>3</td>
</tr>

</table>

Total Credits 18

Japanese Studies Minor

Banner Code: JPNS

Academic Advising

336 Aquia Building
Fairfax Campus

Website: mcl.gmu.edu/programs/la-minor-mcl-jpns/requirements

The minor enables students to advance their Japanese language skills and develop a sound understanding of Japanese culture and history from a global perspective.

Admissions & Policies

Policies

Eight credits of coursework must be unique to the minor and students must earn a minimum grade of 2.00 in all courses applied to the minor. Special topics courses, when relevant, may be applied to the minor with prior written approval of the director. Students who wish to declare this minor need to obtain the signature of the director. For policies governing all minors, see AP.5.3.4 Minors (p. 90).

Requirements

Minor Requirements

Total credits: 18

Students should be aware of the specific policies associated with this program, located on the Admissions & Policies (p. 438) tab.

History and Culture Emphasis

Select three language courses from the following repeatable courses:

<table>
<thead>
<tr>
<th>Code</th>

Latin Minor

Banner Code: LATN

Academic Advising

336 Aquia Building
Fairfax Campus

Website: mcl.gmu.edu/programs/la-minor-mcl-latn/requirements

The minor offers students the opportunity to develop and refine their knowledge of the Latin language by reading classical Latin literature. Students gain an understanding and appreciation of the literature, culture, and intellectual achievements of Roman antiquity that have contributed to the development of Western civilization.

A Latin minor complements majors in literature, language, history, philosophy, and the arts, all of which find their roots in classical antiquity. Majors in the natural and the social sciences are also strengthened by the historical perspective and the advanced training in language and terminology afforded by the minor in Latin.

Admissions & Policies

Policies

Eight credits of coursework must be unique to the minor. Students must complete 18 credits in Latin at the 300-level or above with a minimum grade of 2.00 in each course. For policies governing all minors, see AP.5.3.4 Minors (p. 90).

Requirements

Minor Requirements

Total credits: 18

Students should be aware of the specific policies associated with this program, located on the Admissions & Policies (p. 440) tab.

Website: philosophy.gmu.edu

**Undergraduate Programs**

The department offers a bachelor of arts degree in philosophy, which covers the major issues and areas in philosophy. It is intended to serve the needs of students who wish to pursue graduate studies in philosophy or emphasize philosophy while acquiring a broad liberal arts education. Majors in philosophy take courses in a variety of philosophical traditions and study logic, ethics, and social and political philosophy. With the skills of critical thinking, clear writing, and analytical reasoning that are the hallmark of philosophy majors, students are well-prepared for a wide range of careers including law, government service, or graduate study.

The philosophy program can complement other interests of students when they complete a second major in another field. Students who plan to pursue more than one undergraduate major should work out a program of study in consultation with advisors from both majors and be familiar with the relevant policies for completing more than one major. See Undergraduate Policies.

In addition to the general degree in philosophy, students can choose a concentration in philosophy and law. This concentration offers philosophy majors the opportunity to focus their study of philosophy in a way that prepares them for the study of the law.

**Minors**

The department offers a minor in philosophy (p. 450) and a minor in philosophy and law (p. 451). These minors are available to students in any major. The department, in cooperation with the Schar School of Policy and Government, coordinates the interdisciplinary minor in political philosophy (p. 454).

**Bachelor’s/Accelerated Master’s Program**

The department offers highly qualified undergraduate majors in philosophy the opportunity to apply to an accelerated master’s degree program in philosophy. If accepted, students will be able to earn both the undergraduate and graduate degrees after satisfactory completion of 145 credits, generally within five years.

**Graduate Programs**

The department offers a master of arts degree in traditional and contemporary philosophy as well as specialized concentrations in philosophy and cultural theory and ethics and public affairs. The degree is designed for students who want to further their professional goals or foster their intellectual development. It provides a solid preparation for advanced work in philosophy or other fields such as women and gender studies, cultural studies, or law. The degree provides grounding in the history of philosophy, ethics, metaphysics, epistemology, contemporary continental thought, contemporary analytic philosophy, and philosophy of science.

The focus on traditional and contemporary philosophy of the master’s degree program provides students with a historical and pluralistic approach to philosophical questions. The concentration in ethics and public affairs gives students the opportunity to explore the ethical and philosophical issues that arise in such fields of study and work as business, health care, scientific research, biomedical technology, and public policy. The concentration in philosophy and cultural theory provides students with a distinctive and important theoretical foundation for doctoral work in cultural studies.

Students are encouraged to pursue opportunities beyond the classroom such as study abroad, professional internships, and research with faculty members.

Banner Code: LA-BA-PHIL

B465 Robinson Hall  
Fairfax Campus  
Website: philosophy.gmu.edu/programs/la-ba-phil

The bachelor of arts in philosophy examines how philosophers have answered some of the most enduring questions about human existence, while exploring how those answers continue to inform our thinking in the
Students gain a deeper understanding of philosophy’s relevance to key contemporary issues—such as global warming, social justice and the defense of human rights, or the relationship between science and religion. Students can use this major as preparation for professions such as law or government service, as a pathway to graduate work, or to complement other interests by taking a double major in philosophy and a related field of study.

Admissions & Policies

Policies

Students pursuing this degree must complete at least 33 credits within the major, earning a minimum grade of 2.00 in each course. At least 21 credits must be at the 300 level or above, including at least 3 credits in PHIL 421 Seminar (Mason Core) (p. 142)/PHIL 422 Honors Seminar (Mason Core) (p. 142). If a course counts for the requirement in analytic or continental philosophy, and also for the ethics and political philosophy requirement, then both requirements are fulfilled with that course.

For policies governing all undergraduate degrees, see AP.5 Undergraduate Policies (p. 87).

Requirements

Degree Requirements

Total credits: minimum 120

Students should be aware of the specific policies associated with this program, located on the Admissions & Policies (p. 443) tab.

Total Credits 18

1 When the subject matter is appropriate and with the prior written approval of the undergraduate director, PHIL 391 Special Topics in Philosophy, PHIL 421 Seminar (Mason Core) (p. 142), PHIL 422 Honors Seminar (Mason Core) (p. 142), or PHIL 425 Independent Study may be used to fulfill this requirement.

2 Only with departmental approval.

Optional Concentrations

Students interested in a degree in philosophy with a concentration will complete the coursework for one of the concentrations below.

Available Concentrations

• Concentration in Philosophy and Law (PHLW) (p. 444)
• Concentration in Philosophy, Politics, and Economics (PPE) (p. 444)
Concentration in Philosophy and Law (PHLW)
The concentration in philosophy and law offers philosophy majors the opportunity to focus their study of philosophy in a way that prepares them for the study of the law.

In addition to the specific courses listed below, other relevant courses may be applied to the requirements for this concentration with prior written approval of the undergraduate director.

Concentration in Philosophy, Politics, and Economics (PPE)
This is a high credit concentration for students interested in a program that explores the interdisciplinary connections between philosophy, political science, and economics.

Students pursuing this concentration, similar to all students pursuing a BA in philosophy, must complete at least 33 credits in philosophy earning a minimum grade of 2.00 in each course. No course may be used to fulfill more than one requirement. In addition to the specific courses listed below, other relevant courses may be applied to the requirements for this concentration with prior written approval of the undergraduate director.

Total Credits: 54

1 When the subject matter is appropriate and with the prior written approval of the undergraduate director, PHIL 391 Special Topics in Philosophy, PHIL 421 Seminar (Mason Core) (p. 142), PHIL 422 Honors Seminar (Mason Core) (p. 142), or PHIL 425 Independent Study may be used to fulfill this requirement.

2 Only with departmental approval.

Writing-Intensive Requirement

The university requires all students to complete at least one course designated "writing intensive" in their majors at the 300 level or above. All senior seminars (PHIL 421 Seminar (Mason Core) (p. 142), PHIL 422 Honors Seminar (Mason Core) (p. 142)) in philosophy are writing intensive. Philosophy majors should consult the undergraduate director for other courses that can be taken to fulfill this requirement.

Upper Level Requirement

Students seeking a bachelor's degree must apply at least 45 credits of upper-level courses (numbered 300 or above) toward graduation requirements.

Additional Electives

Any remaining credits may be completed with elective courses to bring the degree total to 120.

College Level Requirements for the BA Degree

In addition to the Mason Core (p. 142) program, students pursuing a BA degree must complete the coursework below. Except where expressly prohibited, a course used to fulfill a college level requirement may also be used simultaneously to satisfy other requirements (Mason Core (p. 142) requirements or requirements for the major).

Philosophy or Religious Studies

1 A course used to fulfill the Mason Core global understanding (p. 146) requirement may not be simultaneously used to satisfy this college-level requirement. A course used to fulfill this requirement may be used simultaneously to fulfill any other requirements (Mason Core requirements, college-level requirements, or requirements for the major). Additional information on waivers can be found at the Office of Undergraduate Academic Affairs (http://chssundergrad.gmu.edu).

### Mason Core

Some Mason Core (p. 142) requirements may already be fulfilled by the major requirements listed above. Students are strongly encouraged to consult their advisors to ensure they fulfill all remaining Mason Core (p. 142) requirements.

1 Most programs include the writing-intensive course designated for the major as part of the major requirements; this course is therefore not counted towards the total required for Mason Core.

2 Minimum 3 credits required.

### Honors

**Honors in the Major**

Highly-qualified students may apply to the honors program in the major. Students can apply in their second semester as a junior, before they have completed 90 credits and should have a minimum GPA of 3.50 in the major. Eligible students should submit a transcript, one letter of
recommendation from a member of the philosophy faculty, and one writing sample, a paper from one of the student's courses in philosophy.

Students pursuing honors in the major complete 6 credits of honors coursework chosen from PHIL 422 Honors Seminar (Mason Core) (p. 142) or PHIL 425 Independent Study. To graduate with honors in philosophy, students must complete these courses with a minimum GPA of 3.50.

**Accelerated Master's**

The accelerated master's programs in the list below specify the BA in philosophy as a feeder degree for their programs. It is important to note, however, that many accelerated master's programs are available for any bachelor's degree at Mason, including this one. See the full list of degrees [http://catalog.gmu.edu/programs/#filter=filter_24](http://catalog.gmu.edu/programs/#filter=filter_24) with accelerated programs at George Mason.

**Philosophy, BA/Philosophy, Accelerated MA**

**Overview**

Highly qualified Mason philosophy majors may apply to the accelerated master's degree program. If accepted, students will be able to earn a BA (p. 442) and a MA in philosophy (p. 451) after satisfactory completion of as few as 145 credits, sometimes within five years.

For more detailed information, see AP.6 Bachelor’s/Accelerated Master’s Degrees (p. 93). For policies governing all graduate degrees, see AP.6 Graduate Policies (p. 90).

**Application Requirements**

Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in Graduate Admissions (p. 68). For information specific to the accelerated MA in philosophy (p. 451), see Application Requirements and Deadlines [http://philosophy.gmu.edu/programs/apply/MA-ACEL-PHIL](http://philosophy.gmu.edu/programs/apply/MA-ACEL-PHIL) on the departmental web site.

**Accelerated Option Requirements**

While undergraduate students, accelerated master's students complete six credits of PHIL courses at the 600-level (chosen in consultation with the graduate program director and indicated on the Accelerated Master's Program Application) with a minimum grade of B in each course. Once admitted to the accelerated master’s pathway, students must maintain a minimum cumulative GPA of 3.25 in all course work. On completion and conferral of the undergraduate degree in the semester indicated in the application, they submit the Bachelor's/Accelerated Master's Transition Form and are admitted to graduate status.

As graduate students, accelerated master's students have an advanced standing. They must meet all master's degree requirements, taking 25 graduate credits beyond the two courses (6 credits) they completed as undergraduates. Students must begin their master's program the semester immediately following conferral of the undergraduate degree.

**Reserve Graduate Credit**

Students may take up to 6 additional credits of PHIL coursework at the 600-level as reserve graduate credit. These credits do not apply to the undergraduate degree. To apply these credits to the master's degree, students should use the Bachelor's/Accelerated Master's Transition Form.

The ability to take courses, including ones not listed above, for reserve graduate credit is available to all high achieving undergraduates with the permission of the department. Permission is normally granted only to qualified Mason seniors within 1.5 hours of graduation. See AP.1.4.4 Graduation Course Enrollment by Undergraduates (p. 79).

**Bachelor's Degree (selected)/Interdisciplinary Studies, Accelerated MAIS (Women and Gender Studies Concentration)**

**Overview**

Highly-qualified undergraduates in select majors may apply to the accelerated master's degree in interdisciplinary studies with a concentration in women and gender studies (p. 542). If accepted, and depending on their undergraduate major, students will be able to earn a bachelor’s degree in their chosen major and a master's degree in interdisciplinary studies with a concentration in women and gender studies after satisfactory completion of 150 credits, sometime within five years.

For more detailed information, see AP.6.7 Bachelor’s/Accelerated Master's Degrees (p. 93). For policies governing all graduate degrees, see AP.6 Graduate Policies (p. 90).

**Selected Majors**

Anthropology (p. 497), Sociology (p. 507), English (p. 370), History (p. 394), Philosophy (p. 442), Conflict Analysis and Resolution (p. 938), Psychology (p. 461), Government and International Politics (p. 972), and Communication (p. 314).

**Application Requirements**

Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in Graduate Admissions (p. 68). For information specific to the accelerated MAIS, see the departmental web site [http://mais.gmu.edu/programs/la-mais-isin/application](http://mais.gmu.edu/programs/la-mais-isin/application).

**Accelerated Option Requirements**

While undergraduate students, accelerated master's students complete two graduate courses as indicated on their Accelerated Master's Program Application with a minimum grade of B in each course. Once admitted to the accelerated master's pathway, students must maintain a minimum cumulative GPA of 3.25 in all course work. Upon completion and conferral of the undergraduate degree in the semester indicated in the application, they submit the Bachelor’s/Accelerated Master's Transition Form and are admitted to graduate status.

Total Credits 6

The ability to take courses, including ones not listed above, for reserve graduate credit is available to all high achieving undergraduates with the permission of the department. Permission is normally granted only to qualified Mason seniors within 15 hours of graduation. See AP.1.4.4 Graduate Course Enrollment by Undergraduates (p. 79).

Bachelor’s Degree (selected)/ Interdisciplinary Studies, Accelerated MAIS (Religious Studies Concentration)

Overview

Highly-qualified undergraduates in selected majors (see below) may apply to the accelerated master’s degree in interdisciplinary studies with a concentration in religious studies. If accepted, and depending on their undergraduate major, students will be able to earn a bachelor’s degree in their chosen major and a master’s in interdisciplinary studies with a concentration in religious studies after satisfactory completion of 150 credits, sometimes within five years. See AP.6.7 Bachelor’s/Accelerated Master’s Degrees (p. 93).

Students in an accelerated degree program must fulfill all university requirements for the master’s degree. For policies governing all graduate degrees, see AP.6 Graduate Policies (p. 90).

Selected Majors

- Art history (p. 394)
- Philosophy (p. 442)
- Conflict analysis and resolution (p. 936)
- Global affairs (p. 523)
- History (p. 402)
- Religious studies (p. 491)
- Russian and Eurasian studies (p. 568)
- Sociology (p. 507)
- Anthropology (p. 497)

If the student has not majored in religious studies (p. 491), it is preferred, though not required, that the student have a minor in religious studies (p. 496).

Application Requirements

Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in the Admissions (p. 68). For information specific to the accelerated MAIS, see Application Requirements and Deadlines (http://mais.gmu.edu/programs/la-mais-sisin/application).

Accelerated Option Requirements

While undergraduate students, accelerated master’s students complete two graduate courses as indicated on their Accelerated Master’s Program Application with a minimum grade of B in each course. Once admitted to the accelerated master’s pathway, students must maintain a minimum cumulative GPA of 3.25 in all coursework. Upon completion and conferral of the undergraduate degree in the semester indicated in the application, they submit the Bachelor’s/Accelerated Master’s Transition Form and are admitted to graduate status.

Bachelor's Degree (selected)/Interdisciplinary Studies, Accelerated MAIS (Social Justice and Human Rights Concentration)

Overview
Highly-qualified undergraduates in select majors (listed below) may apply to the accelerated master's degree in interdisciplinary studies with a concentration in social justice and human rights (p. 542). If accepted, and depending on their undergraduate major, students will be able to earn an undergraduate degree in their chosen major and a master's in interdisciplinary studies with a concentration in social justice and human rights after satisfactory completion of 150 credits, sometimes within five years.

For more detailed information, see AP.6.7 Bachelor’s/Accelerated Master’s Degrees (p. 93). For policies governing all graduate degrees, see AP.6 Graduate Policies (p. 90).

Selected Majors
Anthropology (p. 497), Environmental and Sustainability Studies (p. 576), Sociology (p. 507), English (p. 370), History (p. 394), Philosophy (p. 442), Conflict Analysis and Resolution (p. 938), Psychology (p. 461), Government and International Politics (p. 972), Integrative Studies (p. 593), and Communication (p. 314).

Application Requirements
Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in Graduate Admissions (p. 68). For information specific to the accelerated MAIS, see Application Requirements and Deadlines (http://mais.gmu.edu/programs/la-mais-isin/application) on the departmental web site.

Accelerated Option Requirements
While undergraduate students, accelerated master’s students complete INTS 540 Contemporary Issues in Social Justice Human Rights and one course chosen from the list of electives for the MAIS concentration in social justice and human rights as indicated on their Accelerated Master’s Program Application with a minimum grade of B in each course. Once admitted to the accelerated master’s pathway, students must maintain a minimum cumulative GPA of 3.25 in all course work. Upon completion and conferral of the undergraduate degree in the semester indicated in the application, they submit the Bachelor’s/Accelerated Master’s Transition Form and are admitted to graduate status.

As graduate students, accelerated master’s students have an advanced standing. They must meet all master’s degree requirements except for the two courses (6 credits) they completed as undergraduates. Students must begin their master’s program the semester immediately following conferral of the undergraduate degree.

Reserve Graduate Credit
Students may take up to 6 additional graduate credits as reserve graduate credit (chosen from the list of electives for the MAIS concentration in social justice and human rights). These credits do not apply to the undergraduate degree. The ability to take courses for reserve graduate credit is available to all high achieving undergraduates with the permission of the program. Permission to take a graduate course for reserve graduate credit is normally granted only to Mason seniors within 15 hours of graduation. See AP.1.4.4 Graduate Course Enrollment by Undergraduates (p. 79).

Admissions & Policies

Policies
Eight credits of coursework must be unique to the minor and students must earn a minimum grade of 2.00 in all courses applied to the minor. No course may be used to fulfill more than one requirement.

For policies governing all minors, see AP.5.3.4 Minors (p. 90).

Requirements

Minor Requirements
Total credits: 18

Students should be aware of the specific policies associated with this program, located on the Admissions & Policies (p. 450) tab.

Total Credits 3
Select five electives in philosophy. At least 9 of the elective credits must be at the 300 level or above. (p. 2044)

Total Credits 15

One elective course may be chosen from other coursework in philosophy with prior written approval of the undergraduate director.

Philosophy, MA

Banner Code: LA-MA-PHIL

Admissions & Policies

Admissions

Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in Graduate Admissions (p. 68). For information specific to the MA in philosophy, see Application Requirements and Deadlines (http://philosophy.gmu.edu/programs/LA-MA-PHIL/application).

Policies

For policies governing all graduate degrees, see AP.6 Graduate Policies (p. 90).

Requirements

Degree Requirements

Total credits: 31

Students pursuing this degree must successfully complete 31 credits, which may include a thesis. They may choose a course of study that focuses on traditional and contemporary philosophy or choose to complete one of three concentrations. Students need to identify an advisor on entering the program and meet regularly with that advisor during their course of study.
For policies governing all graduate degrees, see AP.6 Graduate Policies (p. 90).

**MA with a Focus on Traditional and Contemporary Philosophy**

The focus in traditional and contemporary philosophy is for students who want to deepen their understanding of philosophical issues and for students who are preparing to pursue doctoral studies in philosophy or related fields, e.g. political theory, gender studies.

Students may apply up to 9 credits from other departments toward the degree with focus on traditional and contemporary philosophy with prior written approval of their advisor.

**Code** | **Title** | **Credits**
--- | --- | ---
**Proseminar**<br>PHIL 600 | Proseminar in Philosophy | 1

**Ancient or Medieval Philosophy**

Select one course from the following: 3

- PHIL 603: Aristotle: Selected Works
- PHIL 681: Figures and Topics in Ancient Philosophy
- PHIL 721: Advanced Seminar in Philosophy

**Modern Philosophy**

Select one course from the following: 3

- PHIL 608: Hegel's Phenomenology of the Spirit
- PHIL 682: Figures and Topics in Early Modern Philosophy
- PHIL 721: Advanced Seminar in Philosophy

**Contemporary Philosophy**

Select one course from the following: 3

- PHIL 615: Postmodernist Thought
- PHIL 616: Phenomenology
- PHIL 683: Contemporary Philosophical Figures
- PHIL 694: Special Topics in Contemporary Philosophy
- PHIL 721: Advanced Seminar in Philosophy

**Advanced Seminar**

Select one from the following: 3

- PHIL 720: Nietzsche and his Readers
- PHIL 721: Advanced Seminar in Philosophy
- PHIL 733: Current Issues in Cognitive Science

**Electives in Philosophy**

Select four to six electives in philosophy 3 12-18

**Optional Thesis**

Three or six credits of<br>PHIL 799: Thesis 4

Total Credits: 31

---

1. This course should be completed in the first fall semester in which the student is enrolled in the MA program.
2. May be taken when the topic is relevant and with approval of advisor.
3. Students who choose to write a thesis (3 or 6 credits) will take correspondingly fewer electives.
4. Students who choose to write a thesis (3 or 6 credits) will take correspondingly fewer electives. Students are encouraged to use courses from around the university in disciplines relevant to their areas of interest, subject to the prior written approval of their academic advisor.
5. Students must follow the thesis enrollment policy of the university and once enrolled in PHIL 799 Thesis, maintain continuous enrollment as specified in Academic Policies.

**Concentration in Ethics and Public Affairs (ETPA)**

The concentration in ethics and public affairs is designed for professionals who want to combine the study of ethics and the analysis of social and public policies in a variety of settings, including business, health care, biomedical technology, law, or government.

**Code** | **Title** | **Credits**
--- | --- | ---
**Proseminar**<br>PHIL 600 | Proseminar in Philosophy | 1

**History of Philosophy** 2

- PHIL 640: History of Ethical Theory | 3

**Ethics**

Select three courses from the following: 3 9

- PHIL 642: Biomedical Ethics
- PHIL 643: Environmental Ethics
- PHIL 644: Business and Organizational Ethics
- PHIL 645: Research Ethics

**Electives**

Select two to four electives from the following or from other relevant courses: 4 6-12

- PUAD 700: Ethics and Public Administration
- EVPP 635: Environment and Society

**Optional Thesis**

Three or six credits of<br>PHIL 799: Thesis 5

Total Credits: 31

---

1. This course should be completed in the first fall semester in which the student is enrolled in the MA program.
2. Depending on the topic, PHIL 681 Figures and Topics in Ancient Philosophy, PHIL 682 Figures and Topics in Early Modern Philosophy, or PHIL 721 Advanced Seminar in Philosophy may be applied to this concentration with prior written permission of the graduate director.
3. Other courses may be used to fulfill this requirement where appropriate and with prior written approval of the student’s academic advisor.
4. Students who choose to write a thesis (3 or 6 credits) will take correspondingly fewer electives. Students are encouraged to use courses from around the university in disciplines relevant to their areas of interest, subject to the prior written approval of their academic advisor.
5. Students must follow the thesis enrollment policy of the university and once enrolled in PHIL 799 Thesis, maintain continuous enrollment as specified in Academic Policies.

**Concentration in Philosophy and Cultural Theory (PHCT)**

The concentration in philosophy and cultural theory is especially for students interested in pursuing a doctorate in cultural studies.
Students may apply up to 9 credits from other departments toward this concentration with prior written approval of their advisor.

| PHIL 799 | Thesis ⁴                                              | 6       |

Total Credits 31

1. This course should be completed in the first fall semester in which the student is enrolled in the MA program.
2. May be taken when the topic is relevant and with approval of advisor.
3. Students who choose to write a thesis (3 or 6 credits) will take correspondingly fewer electives.
4. Students must follow the thesis enrollment policy of the university and once enrolled in PHIL 799 Thesis, maintain continuous enrollment as specified in Academic Policies.

**Dual Degree Options**

**Philosophy, MA and Interdisciplinary Studies, MAIS Dual Degree**

Students interested in pursuing a dual master's program linking philosophy and another discipline should discuss their interest with the graduate program directors of both programs and review the university policies regarding Individualized Dual Master's Degree Programs. Students approved to pursue dual master's study linking the MA philosophy degree and the Interdisciplinary Studies, MAIS with a concentration in women and gender studies will complete WMST 630 Feminist Theories across the Disciplines/PHIL 658 Feminist Theory and 3 additional credits of WMST courses approved by the Department of Philosophy to apply to the philosophy degree as elective credit. Six credits of approved PHIL credits will apply to the MAIS degree as elective credit. Application to the second master's program should be pursued with consultation of the directors of both programs. Admission to the second master's program will require that the student has met the minimum prerequisites for admission to the second program. If a student lacks the minimum prerequisites and seeks to be admitted to a second master’s program, the director of the second program may identify ways in which the prerequisite can be completed prior to admission.

**Accelerated Master's**

**Philosophy, BA/Philosophy, Accelerated MA**

**Overview**

Highly qualified Mason philosophy majors may apply to the accelerated master's degree program. If accepted, students will be able to earn a BA (p. 442) and a MA in philosophy (p. 451) after satisfactory completion of as few as 145 credits, sometimes within five years.

For more detailed information, see AP6.7 Bachelor's/Accelerated Master's Degrees (p. 93). For policies governing all graduate degrees, see AP6 Graduate Policies (p. 90).

**Application Requirements**

Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in Graduate Admissions (p. 68). For information specific to the accelerated MA in philosophy (p. 451), see Application Requirements and Deadlines (http://philosophy.gmu.edu/programs/application/LA-MA-ACEL-PHIL) on the departmental web site.

**Accelerated Option Requirements**

While undergraduate students, accelerated master’s students complete six credits of PHIL courses at the 600-level (chosen in consultation with the graduate program director and indicated on the Accelerated Master’s Program Application) with a minimum grade of B in each course. Once admitted to the accelerated master’s pathway, students must maintain a minimum cumulative GPA of 3.25 in all course work. On completion and conferral of the undergraduate degree in the semester indicated in the application, they submit the Bachelor’s/Accelerated Master’s Transition Form and are admitted to graduate status.
As graduate students, accelerated master’s students have an advanced standing. They must meet all master’s degree requirements, taking 25 graduate credits beyond the two courses (6 credits) they completed as undergraduates. Students must begin their master’s program the semester immediately following conferral of the undergraduate degree.

**Reserve Graduate Credit**

Students may take up to 6 additional credits of PHIL coursework at the 600-level as reserve graduate credit. These credits do not apply to the undergraduate degree. To apply these credits to the master’s degree, students should use the Bachelor’s/Accelerated Master’s Transition Form.

The ability to take courses, including ones not listed above, for reserve graduate credit is available to all high achieving undergraduates with the permission of the department. Permission is normally granted only to qualified Mason seniors within 15 hours of graduation. See AP.1.4.4 Graduate Course Enrollment by Undergraduates (p. 79).

**Political Philosophy Minor**

**Banner Code:** PPHL

**Academic Advising**

B465 Robinson Hall
Fairfax Campus

Website: philosophy.gmu.edu/programs/la-minor-la-pphl

The minor provides students with an intensive study of political philosophy and political theory. Students take courses in the history of political philosophy; the moral evaluation of political institutions; the ethical, social, and political issues raised by globalization; and the conceptual foundations of democracy and human rights. Through this coursework, students are able to study this field from a variety of interdisciplinary perspectives. They develop a deeper philosophical perspective on political institutions and have a solid foundation for further graduate study in philosophy, government, or policy studies.

**Faculty**

Cherubin, De Nys, Mandaville, Miller (Director)

**Admissions & Policies**

**Policies**

Eight credits of coursework must be unique to the minor and students must complete all coursework with a minimum GPA of 2.00. For policies governing all minors, see AP.5.3.4 Minors (p. 90).

**Requirements**

**Minor Requirements**

Total credits: 15

Students should be aware of the specific policies associated with this program, located on the Admissions & Policies (p. 454) tab.

1 Special topics courses and independent studies courses, when relevant, may also be used to fulfill elective credits with prior written approval of the director.

**Department of Psychology**

2086 David King Hall
Fairfax Campus

Phone: 703-993-1384
Website: psychology.gmu.edu

**Undergraduate Programs**

The department offers a bachelor of arts degree and a bachelor of science degree in psychology. All psychology majors complete a broad range of courses from social and abnormal psychology to cognitive and biopsychology. Students can also choose from special topics courses such as forensic psychology and romantic relationships.

In addition to the general degree in psychology, students can choose a concentration in clinical psychology, cognitive and behavioral neuroscience, developmental psychology, education psychology, forensic psychology, health psychology, human factors and applied cognition, or work and organizational psychology. These concentrations may be of interest to students who are planning to attend graduate school.

Students in psychology may have the opportunity to do research with a faculty member or do a service learning course, which allows them to put into practice what they've learned in the classroom.

Students interested in graduate study should be aware that undergraduate research experience and letters of recommendation are major factors for admission to graduate study. Such students should distribute courses across a number of areas in psychology and work...
closely with one or more professors on individual projects during their junior and senior years.

**Minors**

The department offers minors in psychology, brain, body, and behavior, clinical psychology, developmental psychology, forensic psychology, health psychology, and industrial/organizational psychology. These minors are available to students in any major in the university.

**Bachelor’s/Accelerated Master’s Program**

The department offers highly-qualified undergraduate majors the opportunity to apply to an accelerated master’s degree program in psychology with a concentration in cognitive and behavioral neuroscience (p. 483). If accepted, students will be able to earn both an undergraduate degree and the master’s degree with a concentration in cognitive and behavioral neuroscience after satisfactory completion of 146 credits, generally within five years.

**Graduate Programs**

The graduate programs in psychology are distinguished by an emphasis on basic research and the application of research to solving practical problems in families, schools, industry, government, and health care settings.

The department offers master’s and doctoral degrees with concentrations in applied developmental psychology, cognitive and behavioral neuroscience, human factors/applied cognition, and industrial/organizational psychology. It also offers a doctoral degree with a concentration in clinical psychology.

**Funding**

The department offers teaching and research assistantships, which are awarded on a competitive basis. Other sources of funding such as grants, loans, and employment on campus are also available. Students awarded assistantships must register for a minimum of six credits a semester and show satisfactory progress toward their degree.

**Certificates**

The department offers graduate certificates in applied psychology, with concentrations in transportation human factors and usability, and cognitive neuroscience. These have been designed to meet the needs of students who desire to upgrade their skills and earn a certificate as evidence of their skill attainment. Students may take these as stand-alone certificates or pursue them concurrently with a graduate degree program. Part of the certificate course work may be able to be applied to the degree. Students must apply and be accepted to a graduate certificate program.

The certificate programs are open to all students who hold a bachelor’s degree from an accredited university and meet the admissions requirements for the master’s degree in psychology with a concentration in human factors and applied cognition.

**Non-Degree Status**

Applicants who have not been admitted to a graduate degree program or a certificate program may apply for non-degree status. Non-degree students must meet the same admission requirements as degree-seeking students. Non-degree status is not intended as a way to qualify for admission as a degree-seeking student.

While it may be possible to transfer the credits earned in non-degree status to a degree program, such transfers are not automatic. They require the approval of the graduate director and the dean. If approved, a maximum of 12 credits earned in non-degree status may be applied to a degree program. Non-degree students who intend to transfer their credits to a degree program should discuss this with the appropriate program director.

**Faculty**

**Department Faculty**

George Mason's online Master of Professional Studies in Applied Industrial and Organizational Psychology provides instruction in research-backed methods and understanding of data and analytics. It is intended to give HR professionals and business professionals the skills they need to foster a culture where each employee feels empowered and motivated to contribute new ideas, effect change, and do their best work every day. Students learn how to assess and evaluate candidates to determine their fit for the company and specific positions, identify employees' individual motivations, establish meaningful evaluations and reward systems, and improve training and performance programs. Main areas of study focus on understanding and applying concepts in: research and data analytic methods, evidence-based practices, and client communication skills.

**Admissions & Policies**

**Admissions**

The online master's in organizational psychology program accepts applications on a rolling basis and is currently accepting applications. You can apply here (https://apply-now.force.com/?acctid=0013200001GuY7C).

**Policies**

For policies governing all graduate degrees, see AP 6 Graduate Policies (p. 90).

**Requirements**

**Degree Requirements**

Total credits: 30

Cognitive Neuroscience Graduate Certificate

Banner Code: LA-CERG-CNEU

Academic Advising
2086 David King Hall
Fairfax Campus
Email: psycgrad@gmu.edu
Website: psychology.gmu.edu/programs/la-cerg-cneu

The Department of Psychology offers a graduate certificate in cognitive neuroscience under the auspices of the program in Human Factors/ Applied Cognition.

Admissions & Policies

Admissions

Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in Graduate Admissions (p. 68). For information specific to the graduate certificate in cognitive neuroscience, see Application Requirements and Deadlines (http://psychology.gmu.edu/programs/LA-CERG-CNEU/application).
Requirements

Certificate Requirements

Total credits: 18

This certificate may be pursued on a full- or part-time basis.

For policies governing all graduate certificates, see AP.6.8 Requirements for Graduate Certificates (p. 94).

Developmental Psychology Minor

Banner Code: DVLP

Academic Advising

2086 David King Hall
Fairfax Campus

Email: ugpsyc@gmu.edu
Website: psychology.gmu.edu/programs/la-minor-psyc-dvlp

This minor is designed to provide students with an understanding of the ways in which humans change over time. Coursework provides for a broad foundation in psychology across the lifespan while also allowing for students to focus on a developmental period (e.g. childhood).

Admissions & Policies

Policies

Eight credits of coursework must be unique to the minor and students must complete all coursework with a minimum GPA of 2.00. For policies governing all minors, see AP.5.3.4 Minors (p. 90).

Requirements

Minor Requirements

Total credits: 18

Students should be aware of the specific policies associated with this program, located on the Admissions & Policies (p. 459) tab.

Forensic Psychology Minor

Banner Code: FPSY

Academic Advising

2086 David King Hall
Fairfax Campus

Email: ugpsyc@gmu.edu
Website: psychology.gmu.edu/programs/la-minor-psyc-fpsy

This minor is designed to supplement the study of psychology, criminology, or other justice-related areas with an overview of the
intersection of psychology and the criminal justice system. The minor focuses specifically on mental illness in the criminal justice system, the psychological experiences of victims, psychological science in the courtroom, and psychological factors related to criminal behavior.

### Admissions & Policies

#### Policies

Eight credits of coursework must be unique to the minor and students must complete all coursework with a minimum GPA of 2.00. For policies governing all minors, see AP.5.3.4 Minors (p. 90).

### Requirements

### Health Psychology Minor

Banner Code: HPSY

#### Academic Advising

2086 David King Hall
Fairfax Campus

Email: ugpsych@gmu.edu
Website: psychology.gmu.edu/programs/la-minor-psyc-hpsy

This minor is designed to help students better understand psychological factors that influence overall health. The courses provide instruction on factors that have the potential to impact both physical and psychological health. These include the roles of cognitive processes, health beliefs and behaviors, emotions, psychosocial circumstances and personality traits, all factors that may influence overall health and well-being.

### Admissions & Policies

#### Policies

Eight credits of coursework must be unique to the minor and students must complete all coursework with a minimum GPA of 2.00. For policies governing all minors, see AP.5.3.4 Minors (p. 90).

### Requirements

**Psychology, BA**

Banner Code: LA-BA-PSYC

2086 David King Hall
Fairfax Campus

Email: ugpsyc@gmu.edu
Website: psychology.gmu.edu/programs/la-ba-psyc

Students study behavior as it relates to health and well-being, child and adolescent development, education, social situations, the workplace, and the use of technology. Due to Mason's proximity to Washington, D.C. the department is especially active in research that informs public policy and national defense. Students who graduate from this program go on to work in a wide range of fields and positions, including human resources, data analysis, user interface design, and social media and marketing.

The BA in Psychology focuses on liberal arts and general education courses, including a foreign language requirement, within the psychology field.

**Admissions & Policies**

**Policies**

Students pursuing this degree must complete 37 credits within the major, with 24 credits at the 300 and 400 level.

For policies governing all undergraduate degrees, see AP5 Undergraduate Policies (p. 87).

**Requirements**

**Degree Requirements**

Total credits: minimum 120

Students should be aware of the specific policies associated with this program, located on the Admissions & Policies (p. 461) tab.

Students may choose to complete a concentration in forensic psychology, human factors and applied cognition, work and organizational psychology, clinical psychology, developmental psychology, educational psychology, or health psychology. Courses required for a concentration may simultaneously satisfy other degree requirements. The concentrations in forensic psychology, human factors...
and applied cognition, and work and organizational psychology meet the applied psychology requirement.

Students who have limited technology skills are encouraged to take IT 104 Introduction to Computing (Mason Core) (p. 142).

Core Courses in the Major

Basic Courses in Psychology

Students must have a minimum GPA of 2.00 in these courses with a minimum grade of 1.67 (C-) in each one. Courses taken to fulfill these requirements may simultaneously satisfy a concentration.

</tr>
</tbody>
</table>

Total Credits 6-7

1 PSYC 427 may count for both the Applied Psychology and the Professional Development requirements.

Concentrations Meeting Applied Psychology Requirement

Concentration in Forensic Psychology (FPSY)

Students pursuing the BA with concentration in forensic psychology take 15 credits. Students must earn a minimum GPA of 2.00 in all coursework applied to the concentration.

Students who successfully complete the Psychology Department Honors Program (PSYC 490 Psychology Honors I, PSYC 491 Psychology Honors II, and PSYC 492 RS: Psychology Honors III) with an honors thesis/project focused on forensic psychology may, with approval of their thesis committees and the associate chair for undergraduate studies, substitute their honors work for one course in the concentration.

<table>
<thead>

<td></td>
</tr>
</tbody>
</table>

Students are strongly encouraged to complete PSYC 300 Statistics in Psychology and PSYC 301 Research Methods in Psychology by their junior year. PSYC 300 Statistics in Psychology is a prerequisite to several courses, and a background in research methods facilitates understanding empirical research discussed in all psychology courses.

2 It is strongly recommended that students fulfill the Mason Core (p. 142) natural science requirement by completing BIOL 103 Introductory Biology I (Mason Core) (p. 142) and BIOL 107 Intro Biology II Lecture (Mason Core) (p. 142)/BIOL 106 Introductory Biology II Laboratory (Mason Core) (p. 142) because these courses are prerequisites to the requirement of PSYC 372 Biopsychology or PSYC 375 Brain and Sensory Processes and PSYC 376 Brain and Behavior.

3 Only students who receive transfer credit for PSYC 372 Biopsychology may use it in place of PSYC 375 Brain and Sensory Processes as the prerequisite for PSYC 376 Brain and Behavior. Students taking PSYC 372 Biopsychology at Mason may not use it in place of PSYC 375 Brain and Sensory Processes.

4 PSYC 427 Community Engagement for Social Change (Mason Core) (p. 142) and PSYC 430 Clinical Practicum in Psychology may count for both the Professional Development and the Applied Psychology requirements.

Concentration in Cognitive and Behavioral Neuroscience (CBNR)
This concentration focuses on laboratory experience in cognitive and behavioral neuroscience and more in-depth courses of interest that will broaden the students' knowledge in understanding brain and behavior.

Students pursuing the BA with this concentration take 15 credits. Students must earn a minimum GPA of 3.00 in all coursework applied to the concentration.

Students who successfully complete the Psychology Department Honors Program (PSYC 490 Psychology Honors I, PSYC 491 Psychology Honors II, and PSYC 492 RS: Psychology Honors III) with an honors thesis/project focused on cognitive and behavioral neuroscience may, with approval of their thesis committees and the associate chair for undergraduate studies, substitute their honors work for one course in the concentration.

1 With permission of a CBN faculty member.
2 When approved by the undergraduate associate chair and topic is Neuronal Bases of Learning and Memory, Drugs and the Brain, or Brain in Books and Film.
3 When approved by undergraduate associate chair and topic is Music and the Brain, Neuronal Aspects of Cognitive Development, Animal Cognition, or Psychology of Stress and Health.

Concentration in Developmental Psychology (DVLP)
The concentration in developmental psychology may be of interest to students who are planning to attend graduate school in developmental psychology or a related field, such as human development and family studies, school psychology, or clinical child psychology. Students who are considering a career in school psychology or education may also find this concentration advantageous.

Students pursuing the BA with this concentration take 12 credits. Students must earn a minimum GPA of 2.00 in all coursework applied to the concentration.

Students who successfully complete the Psychology Department Honors Program (PSYC 490 Psychology Honors I, PSYC 491 Psychology Honors II, and PSYC 492 RS: Psychology Honors III) with an honors thesis/project focused on developmental psychology may, with approval of their thesis committees and the associate chair for undergraduate studies, substitute their honors work for one course in the concentration.

Concentration in Health Psychology (HPSY)
Students pursuing the BA with concentration in health psychology take 12 credits. Students must earn a minimum GPA of 2.00 in all coursework applied to the concentration.

Students who successfully complete the Psychology Department Honors Program (PSYC 490 Psychology Honors I, PSYC 491 Psychology Honors II, and PSYC 492 RS: Psychology Honors III) with an honors thesis/project focused on health or well-being may, with approval of their thesis committees and the associate chair for undergraduate studies, substitute their honors work for one course in the concentration.

Electives in the Major
Students complete the 37 required credits with electives in psychology (PSYC) with the following restrictions.

- A maximum of 6 credits of PSYC 327 Psychology in the Community and PSYC 328 Psychology in the Community Laboratory may be applied to required psychology credits.
- A maximum of 6 credits of PSYC 260 Basic Research Methods in Psychology, PSYC 350 Directed Reading and Research in Psychology, and PSYC 460 Independent Study in Psychology may be applied to required psychology credits.
- No more than 9 credits of PSYC 327 Psychology in the Community, PSYC 328 Psychology in the Community Laboratory, PSYC 260 Basic Research Methods in Psychology, PSYC 350 Directed Reading and Research in Psychology, and PSYC 460 Independent Study in Psychology can be taken without written permission of the department chair.
- No more than 6 credits of D may be applied toward this requirement.

PSYC 465 Pioneering Ideas in Psychology is strongly recommended for all students who plan to attend graduate school in psychology.

Writing-Intensive Requirement
The university requires all students to complete at least one course designated "writing intensive" in their majors at the 300 level or above. Students majoring in psychology may fulfill this requirement by successfully completing PSYC 301 Research Methods in Psychology, PSYC 304 Principles of Learning, or PSYC 309 Sensation, Perception, and Information Processing. Students who receive transfer credit for a research methods course must take PSYC 304 Principles of Learning or PSYC 309 Sensation, Perception, and Information Processing unless the transfer course has been approved as writing intensive.

Additional Electives
Any remaining credits may be completed with elective courses to bring the degree total to 120.

Upper Level Requirement
Students seeking a bachelor’s degree must apply at least 45 credits of upper-level courses (numbered 300 or above) toward graduation requirements.

College Level Requirements for the BA Degree
In addition to the Mason Core (p. 142) program, students pursuing a BA degree must complete the coursework below. Except where expressly prohibited, a course used to fulfill a college level requirement may also be used simultaneously to satisfy other requirements (Mason Core (p. 142) requirements or requirements for the major).

The two courses used to fulfill the combined college and Mason Core requirements must be from different disciplines in the social and behavioral sciences.

HIST 100 History of Western Civilization (Mason Core) (p. 142) and HIST 125 Introduction to World History (Mason Core) (p. 142) may not be used to fulfill this requirement.

### Foreign Language

**Code** | **Title** | **Credits**  
--- | --- | ---  
Intermediate-level proficiency in one foreign language, fulfilled by:

- Completing a course in a foreign language numbered 202 (or higher level courses taught in the language) (p. 424)
- Or achieving a satisfactory score on an approved proficiency test
- Or completing the following ASL three course sequence:
  - EDSE 115 American Sign Language (ASL) I
  - EDSE 116 American Sign Language (ASL) II
  - EDSE 219 American Sign Language (ASL) III

Students who are already proficient in a second language may be eligible for a waiver of this requirement. Additional information on waivers can be found at the Office of Undergraduate Academic Affairs (http://chssundergrad.gmu.edu).

### Non-Western Culture

Select 3 credits of an approved course in the study of a non-Western culture (additional to the Mason Core requirement in global understanding)

---

1. A course used to fulfill the Mason Core global understanding (p. 146) requirement may not be simultaneously used to satisfy this college-level requirement. A course used to fulfill this requirement may be used simultaneously to fulfill any other requirements (Mason Core requirements, college-level requirements, or requirements for the major). Additional information on waivers can be found at the Office of Undergraduate Academic Affairs (http://chssundergrad.gmu.edu).

### Mason Core

Some Mason Core (p. 142) requirements may already be fulfilled by the major requirements listed above. Students are strongly encouraged to consult their advisors to ensure they fulfill all remaining Mason Core (p. 142) requirements.

Total Credits: 40

---

1. Most programs include the writing-intensive course designated for the major as part of the major requirements; this course is therefore not counted towards the total required for Mason Core.

2. Minimum 3 credits required.

### Honors

### Honors in the Major

Highly-qualified students may apply to graduate with honors in the major. To be eligible for admission, psychology majors must have completed
at least 50 credits and have a minimum cumulative GPA of 3.25 and a minimum GPA of 3.40 in psychology courses.

If accepted, students must take a sequence of three courses, which culminates in the successful completion and presentation of an independent honors thesis.

To graduate with honors, students must earn a minimum GPA of 3.50 in their honors courses and maintain a minimum cumulative GPA of 3.25 and a minimum GPA of 3.40 in psychology courses.

### Accelerated Master's

The accelerated master's programs in the list below specify the BA in psychology as a feeder degree for their programs. It is important to note, however, that many accelerated master's programs are available for any bachelor's degree at Mason, including this one. See the full list of degrees (http://catalog.gmu.edu/programs/#filter=filter_24) with accelerated programs at George Mason.

### Bachelor's Degree (selected)/Interdisciplinary Studies, Accelerated MAIS (Social Justice and Human Rights Concentration)

**Overview**

Highly-qualified undergraduates in select majors (listed below) may apply to the accelerated master's degree in interdisciplinary studies with a concentration in social justice and human rights (p. 542). If accepted, and depending on their undergraduate major, students will be able to earn an undergraduate degree in their chosen major and a master's in interdisciplinary studies with a concentration in social justice and human rights after satisfactory completion of 150 credits, sometimes within five years.

For more detailed information, see AP6.7 Bachelor's/Accelerated Master's Degrees (p. 93). For policies governing all graduate degrees, see AP6 Graduate Policies (p. 90).

**Selected Majors**

Anthropology (p. 497), Environmental and Sustainability Studies (p. 576), Sociology (p. 507), English (p. 370), History (p. 394), Philosophy (p. 442), Conflict Analysis and Resolution (p. 938), Psychology (p. 461), Government and International Politics (p. 972), Integrative Studies (p. 593), and Communication (p. 314).

**Application Requirements**

Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in Graduate Admissions (p. 68). For information specific to the accelerated MAIS, see Application Requirements and Deadlines (http://mais.gmu.edu/programs/la-mais-isin/application) on the departmental web site.

**Accelerated Option Requirements**

While undergraduate students, accelerated master's students complete INTS 540 Contemporary Issues in Social Justice Human Rights and one course chosen from the list of electives for the MAIS concentration in social justice and human rights as indicated on their Accelerated Master’s Program Application with a minimum grade of B in each course. Once admitted to the accelerated master’s pathway, students must maintain a minimum cumulative GPA of 3.25 in all course work. Upon completion and conferral of the undergraduate degree in the semester indicated in the application, they submit the Bachelor's/ Accelerated Master's Transition Form and are admitted to graduate status.

As graduate students, accelerated master's students have an advanced standing. They must meet all master's degree requirements except for the two courses (6 credits) they completed as undergraduates. Students must begin their master's program the semester immediately following conferral of the undergraduate degree.

### Reserve Graduate Credit

Students may take up to 6 additional graduate credits as reserve graduate credit (chosen from the list of electives for the MAIS concentration in social justice and human rights). These credits do not apply to the undergraduate degree. The ability to take courses for reserve graduate credit is available to all high achieving undergraduates with the permission of the program. Permission to take a graduate course for reserve graduate credit is normally granted only to Mason seniors within 15 hours of graduation. See AP1.4.4 Graduate Course Enrollment by Undergraduates (p. 79).

### Bachelor's Degree (selected)/Interdisciplinary Studies, Accelerated MAIS (Women and Gender Studies Concentration)

**Overview**

Highly-qualified undergraduates in select majors may apply to the accelerated master's degree in interdisciplinary studies with a concentration in women and gender studies (p. 542). If accepted, and depending on their undergraduate major, students will be able to earn a bachelor's degree in their chosen major and a master's degree in interdisciplinary studies with a concentration in women and gender studies after satisfactory completion of 150 credits, sometime within five years.

For more detailed information, see AP6.7 Bachelor's/Accelerated Master's Degrees (p. 93). For policies governing all graduate degrees, see AP6 Graduate Policies (p. 90).

**Selected Majors**

Anthropology (p. 497), Sociology (p. 507), English (p. 370), History (p. 394), Philosophy (p. 442), Conflict Analysis and Resolution (p. 938), Psychology (p. 461), Government and International Politics (p. 972), Integrative Studies (p. 593), and Communication (p. 314).

**Application Requirements**

Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in Graduate Admissions (p. 68). For information
specific to the accelerated MAIS, see the departmental web site (http://mais.gmu.edu/programs/la-mais-isin/application).

Accelerated Option Requirements
While undergraduate students, accelerated master’s students complete two graduate courses as indicated on their Accelerated Master’s Program Application with a minimum grade of B in each course. Once admitted to the accelerated master’s pathway, students must maintain a minimum cumulative GPA of 3.25 in all course work. Upon completion and conferral of the undergraduate degree in the semester indicated in the application, they submit the Bachelor’s/Accelerated Master’s Transition Form and are admitted to graduate status.

Reserve Graduate Credit
Students may take up to 6 additional graduate credits as reserve graduate credit. These credits do not apply to the undergraduate degree. To apply these credits to the master’s degree, students should use the Bachelor’s/Accelerated Master’s Transition Form.

The ability to take courses, including ones not listed above, for reserve graduate credit is available to all high achieving undergraduates with the permission of the department. Permission is normally granted only to qualified Mason seniors within 15 hours of graduation. See AP1.4.4 Graduate Course Enrollment by Undergraduates (p. 79).

Psychology, BA or BS/Psychology, Accelerated MA (Cognitive and Behavioral Neuroscience Concentration)
Overview
Highly qualified Mason undergraduate psychology majors may apply to the accelerated master’s degree with a concentration in cognitive and behavioral neuroscience. If accepted, students will be able to earn a BA (p. 461) or BS in psychology (p. 469) and a MA in psychology (p. 479) with a concentration in cognitive and behavioral neuroscience after satisfactory completion of 146 credits.

For more detailed information, see AP6.7 Bachelor’s/Accelerated Master’s Degrees (p. 93). For policies governing all graduate degrees, see AP6 Graduate Policies (p. 90).

Application Requirements
Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in Graduate Admissions (p. 68). For information specific to this program, see Application Requirements and Deadlines (http://psychology.gmu.edu/programs/application/LA-MA-ACEL-PSYC) on the departmental web site.

Accelerated Option Requirements
It is strongly recommended that students complete at least one semester of lab research before applying to the Accelerated Master’s Program.

While undergraduate students, accelerated master’s students complete six credits of graduate courses (chosen from PSYC 531 Mammalian Neurobiology, PSYC 555 Neuroimaging, PSYC 558 Neuronal Bases of Learning and Memory, PSYC 559 Behavioral Chemistry, and approved sections of PSYC 592 Special Topics) as indicated on their Accelerated Master’s Program Application with a minimum grade of B in each course. Once admitted to the accelerated master’s pathway, students must maintain a minimum cumulative GPA of 3.25 in all coursework. On completion and conferral of the undergraduate degree in the semester indicated in the application, they submit the Bachelor’s/Accelerated Master’s Transition Form and are admitted to graduate status.

As graduate students, accelerated master’s students have an advanced standing. They must meet all master’s degree requirements except for the two courses (6 credits) they completed as undergraduates. Students must begin their master’s program the semester immediately following conferral of the undergraduate degree.

Reserve Graduate Credit
Students may take up to 6 additional graduate credits as reserve graduate credit (chosen from PSYC 531 Mammalian Neurobiology, PSYC 555 Neuroimaging, PSYC 558 Neuronal Bases of Learning and Memory, PSYC 559 Behavioral Chemistry, and approved sections of PSYC 592 Special Topics) as indicated on their Accelerated Master’s Program Application with a minimum grade of B in each course. Once admitted to the accelerated master’s pathway, students must maintain a minimum cumulative GPA of 3.25 in all coursework. On completion and conferral of the undergraduate degree in the semester indicated in the application, they submit the Bachelor’s/Accelerated Master’s Transition Form and are admitted to graduate status.

As graduate students, accelerated master’s students have an advanced standing. They must meet all master’s degree requirements except for the two courses (6 credits) they completed as undergraduates. Students must begin their master’s program the semester immediately following conferral of the undergraduate degree.

Psychology, BS
Banner Code: LA-BS-PSYC
2086 David King Hall
Fairfax Campus
Email: ugpsyc@gmu.edu
Website: psychology.gmu.edu/programs/la-bs-psyc
Students study behavior as it relates to health and well-being, child and adolescent development, education, social situations, the workplace, and the use of technology. Due to Mason’s close proximity to Washington, D.C. the department is especially active in research that informs public policy and national defense. Students who graduate from this program go on to work in a wide range of fields and positions, including human resources, data analysis, user interface design, and social media and marketing.

The BS in Psychology focuses on math and science within the psychology field.

Admissions & Policies

Policies

Students pursuing this degree must complete at least 39 credits in psychology and 35 credits in supporting courses. Of the 39 credits earned through basic psychology courses, applied psychology courses and electives, 24 credits must be at the 300 and 400 level.

For policies governing all undergraduate degrees, see AP5 Undergraduate Policies (p. 87).

Requirements

Degree Requirements

Total credits: minimum 120

Students should be aware of the specific policies associated with this program, located on the Admissions & Policies (p. 470) tab.

Students may choose to complete a concentration in clinical psychology, developmental psychology, educational psychology, forensic psychology, health psychology, human factors and applied cognition, or work and organizational psychology. Courses required for a concentration may simultaneously satisfy other degree requirements. The concentrations in forensic psychology, human factors and applied cognition, and work and organizational psychology meet the applied psychology requirement.

Students who have limited technology skills are encouraged to take IT 104 Introduction to Computing (Mason Core) (p. 142).

Core Courses in the Major

Basic Courses in Psychology

Students must have a minimum GPA of 2.00 in these courses with a minimum grade of 1.67 (C-) in each one. Courses taken to fulfill these requirements may simultaneously satisfy a concentration.

Total Credits 27-36

1 Students are strongly encouraged to complete PSYC 300 Statistics in Psychology and PSYC 301 Research Methods in Psychology by their junior year. PSYC 300 Statistics in Psychology is a prerequisite to several courses, and a background in research methods facilitates understanding empirical research discussed in all psychology courses.

2 The course chosen to fulfill this requirement cannot be the same course used to fulfill the technical writing requirement below. PSYC 320 may count for both the Psychology Lab and the Applied Psychology requirements.

3 Students who have a strong interest in biopsychology or cognitive neuroscience are encouraged to take PSYC 375 Brain and Sensory Processes/PSYC 376 Brain and Behavior rather than PSYC 372 Biopsychology. Only students who receive transfer credit for PSYC 372 Biopsychology may use it in place of PSYC 375 Brain and Sensory Processes as the prerequisite for PSYC 376 Brain and Behavior. Students taking PSYC 372 Biopsychology at Mason may not use it in place of PSYC 375 Brain and Sensory Processes.

4 PSYC 427 Community Engagement for Social Change (Mason Core) (p. 142) and PSYC 430 Clinical Practicum in Psychology may count for both the Professional Development and the Applied Psychology requirements.
Applied Psychology Courses or Optional Concentration
Alternatively, students may earn a concentration in forensic psychology, human factors and applied cognition, or work and organizational psychology to satisfy this requirement.

Total Credits: 6-7

Students pursuing the BS without concentration select two courses from the following:

Note course prerequisite of PSYC 317 Cognitive Psychology.

Select three courses from the following: 9-10

PSYC 317 Cognitive Psychology
PSYC 340 Human Factors Psychology
PSYC 382 Psychology of Crime Victims
PSYC 440 Forensic Psychology: Science and Pseudoscience
PSYC 441 Criminal Behavior: Psychological and Neurological Aspects
CRIM 100 Introduction to Criminal Justice (Mason Core) (p. 142)
PSYC 461 Special Topics

Concentration in Forensic Psychology (FPSY)
Students pursuing the BS with concentration in forensic psychology take 15 credits. Students must earn a minimum GPA of 2.00 in all coursework applied to the concentration.

Students who successfully complete the Psychology Department Honors Program (PSYC 490 Psychology Honors I, PSYC 491 Psychology Honors II, and PSYC 492 RS: Psychology Honors III) with an honors thesis/project focused on forensic psychology may, with approval of their thesis committees and the associate chair for undergraduate studies, substitute their honors work for one course in the concentration.

1 Only when topic is related to clinical psychology approved by the psychology department.

Concentration in Cognitive and Behavioral Neuroscience (CBNR)

This concentration focuses on laboratory experience in cognitive and behavioral neuroscience and more in-depth courses of interest that will broaden the students’ knowledge in understanding brain and behavior.

Students pursuing the BS with this concentration take 12 credits. Students must earn a minimum GPA of 3.00 in all coursework applied to the concentration.

Students who successfully complete the Psychology Department Honors Program (PSYC 490 Psychology Honors I, PSYC 491 Psychology Honors II, and PSYC 492 RS: Psychology Honors III) with an honors thesis/project focused on cognitive and behavioral neuroscience may, with approval of their thesis committees and the associate chair for undergraduate studies, substitute their honors work for one course in the concentration.

Concentration in Developmental Psychology (DVLP)

The concentration in developmental psychology may be of interest to students who are planning to attend graduate school in developmental psychology or a related field, such as human development and family studies, school psychology, or clinical child psychology. Students who are considering a career in school psychology or education may also find this concentration advantageous.

Students pursuing the BS with this concentration take 12 credits. Students must earn a minimum GPA of 2.00 in all coursework applied to the concentration.

Students who successfully complete the Psychology Department Honors Program (PSYC 490 Psychology Honors I, PSYC 491 Psychology Honors II, and PSYC 492 RS: Psychology Honors III) with an honors thesis/project focused on developmental psychology may, with approval of their thesis committees and the associate chair for undergraduate studies, substitute their honors work for one course in the concentration.

1 Only when topic is related to health and well-being and approved by the psychology department.

Electives in the Major
Students complete the 39 required credits with electives in psychology (PSYC) (p. 2074) with the following restrictions.

- A maximum of 6 credits of PSYC 327 Psychology in the Community and PSYC 328 Psychology in the Community Laboratory may be applied to required psychology credits.
- A maximum of 6 credits of PSYC 260 Basic Research Methods in Psychology, PSYC 350 Directed Reading and Research in Psychology, and PSYC 460 Independent Study in Psychology may be applied to required psychology credits.
- No more than 9 credits of PSYC 327 Psychology in the Community, PSYC 328 Psychology in the Community Laboratory, PSYC 260 Basic Research Methods in Psychology, PSYC 350 Directed Reading and Research in Psychology, and PSYC 460 Independent Study in Psychology can be taken without written permission of the department chair.
- No more than 6 credits of D may be applied toward this requirement.

PSYC 465 Pioneering Ideas in Psychology is strongly recommended for all students who plan to attend graduate school in psychology.

If an approved psychology course is used to meet the technical writing requirement, it may also be applied as a psychology elective.

Supporting Courses
These courses broaden the requirements to include humanities and strengthen the science, quantitative and writing components of the degree. Students who successfully complete the Honors College curriculum are required to complete only the quantitative reasoning and natural science support requirements described below. All other supporting requirements are considered met by successful completion of the Honors College curriculum.

</table>

Any non-psychology course that has been approved to meet the Mason Core requirement in social and behavioral science

One Additional Course in Humanities or Social and Behavioral Science

Students majoring in psychology may fulfill this requirement by successfully completing PSYC 301 Research Methods in Psychology, PSYC 304 Principles of Learning, or PSYC 309 Sensation, Perception, and Information Processing. Students who receive transfer credit for a research methods course must take PSYC 304 Principles of Learning, or PSYC 309 Sensation, Perception, and Information Processing unless the transfer course has been approved as writing intensive.

Upper Level Requirement
Students seeking a bachelor's degree must apply at least 45 credits of upper-level courses (numbered 300 or above) toward graduation requirements.

Additional Electives
Any remaining credits may be completed with elective courses to bring the degree total to 120.

College Level Requirements for the BA Degree
In addition to the Mason Core (p. 142) program, students pursuing a BA degree must complete the coursework below. Except where expressly prohibited, a course used to fulfill a college level requirement may also be used simultaneously to satisfy other requirements (Mason Core (p. 142) requirements or requirements for the major).

Philosophy or Religious Studies
Select 3 credits from the following:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>PHIL</td>
<td>(p. 2044)</td>
<td>1</td>
</tr>
<tr>
<td>RELI</td>
<td>(p. 2144)</td>
<td>1</td>
</tr>
</tbody>
</table>

Note that the following courses may not be used to fulfill this requirement:

• PHIL 323 Classical Western Political Theory
• PHIL 324 Modern Western Political Theory
• PHIL 327 Contemporary Western Political Theory
• PHIL 393 Humanities College to Career
• PHIL 460 Senior Seminar in Philosophy, Politics, and Economics

Additionally, PHIL 253 Philosophy and Literature (Mason Core) (p. 142) and RELI 235 Religion and Literature (Mason Core) (p. 142) cannot be used to fulfill both the philosophy/religious studies requirement and the Mason Core literature (p. 147) requirement.

Social and Behavioral Sciences
Select 3 credits of social and behavioral sciences from the following (additional to the Mason Core social and behavioral sciences requirement):

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>ANTH</td>
<td>(p. 1212)</td>
<td>1</td>
</tr>
<tr>
<td>CRIM</td>
<td>(p. 1514)</td>
<td>1</td>
</tr>
<tr>

<td>(p. 1896)</td>
<td>1</td>
</tr>
<tr>
<td>PSYC</td>
<td>(p. 2074)</td>
<td>1</td>
</tr>
<tr>
<td>SOCI</td>
<td>(p. 2167)</td>
<td>1</td>
</tr>
</tbody>
</table>

Or choose from the following GGS courses:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>GGS 101</td>
<td>Major World Regions (Mason Core) (p. 142)</td>
<td>1</td>
</tr>
</tbody>
</table>

Writing-Intensive Requirement
The university requires all students to complete at least one course designated "writing intensive" in their majors at the 300 level or above.
<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>GGS 103</td>
<td>Human Geography (Mason Core) (p. 142)</td>
<td></td>
</tr>
<tr>
<td>GGS 110</td>
<td>Introduction to Geoinformation Technologies</td>
<td></td>
</tr>
<tr>
<td>GGS 301</td>
<td>Political Geography</td>
<td></td>
</tr>
<tr>
<td>GGS 303</td>
<td>Geography of Resource Conservation (Mason Core) (p. 142)</td>
<td></td>
</tr>
<tr>
<td>GGS 304</td>
<td>Population Geography (Mason Core) (p. 142)</td>
<td></td>
</tr>
<tr>
<td>GGS 305</td>
<td>Economic Geography</td>
<td></td>
</tr>
<tr>

</tr>
<tr>
<td>GGS 337</td>
<td>Urban Planning</td>
<td></td>
</tr>
<tr>
<td>GGS 380</td>
<td>Geography of Virginia</td>
<td></td>
</tr>
</tbody>
</table>

1 The two courses used to fulfill the combined college and Mason Core (p. 142) requirements must be from different disciplines in the social and behavioral sciences.

2 HIST 100 History of Western Civilization (Mason Core) (p. 142) and HIST 125 Introduction to World History (Mason Core) (p. 142) may not be used to fulfill this requirement.

**Foreign Language**

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>

1. A course used to fulfill the Mason Core global understanding requirement may not be simultaneously used to satisfy this college-level requirement. A course used to fulfill this requirement may be used simultaneously to fulfill any other requirements (Mason Core requirements, college-level requirements, or requirements for the major). Additional information on waivers can be found at the Office of Undergraduate Academic Affairs (http://chssundergrad.gmu.edu).

**Mason Core**

Some Mason Core (p. 142) requirements may already be fulfilled by the major requirements listed above. Students are strongly encouraged to consult their advisors to ensure they fulfill all remaining Mason Core (p. 142) requirements.

Honors

Honors in the Major

Highly-qualified students may apply to graduate with honors in the major. To be eligible for admission, psychology majors must have completed at least 50 credits and have a minimum cumulative GPA of 3.25 and a minimum GPA of 3.40 in psychology courses.

If accepted, students must take a sequence of three courses, which culminates in the successful completion and presentation of an independent honors thesis.

To graduate with honors, students must earn a minimum GPA of 3.50 in their honors courses and maintain a minimum cumulative GPA of 3.25 and a minimum GPA of 3.40 in psychology courses.

Accelerated Master's

The accelerated master's programs in the list below specify the BS in psychology as a feeder degree for their programs. It is important to note, however, that many accelerated master's programs are available for any bachelor's degree at Mason, including this one. See the full list of degrees (http://catalog.gmu.edu/programs/#filter=filter_24) with accelerated programs at George Mason.

Bachelor's Degree (selected)/Interdisciplinary Studies, Accelerated MAIS (Social Justice and Human Rights Concentration)

Overview

Highly-qualified undergraduates in select majors (listed below) may apply to the accelerated master's degree in interdisciplinary studies with a concentration in social justice and human rights (p. 542). If accepted, and depending on their undergraduate major, students will be able to earn an undergraduate degree in their chosen major and a master's in interdisciplinary studies with a concentration in social justice and human rights after satisfactory completion of 150 credits, sometimes within five years.

For more detailed information, see AP.6.7 Bachelor's/Accelerated Master's Degrees (p. 93). For policies governing all graduate degrees, see AP.6 Graduate Policies (p. 90).

Selected Majors

Anthropology (p. 497), Environmental and Sustainability Studies (p. 576), Sociology (p. 507), English (p. 370), History (p. 394), Philosophy (p. 442), Conflict Analysis and Resolution (p. 938), Psychology (p. 461), Government and International Politics (p. 972), Integrative Studies (p. 593), and Communication (p. 314).

Application Requirements

Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in Graduate Admissions (p. 68). For information specific to the accelerated MAIS, see Application Requirements and Deadlines (http://mais.gmu.edu/programs/la-mais-isin/application) on the departmental web site.

Accelerated Option Requirements

While undergraduate students, accelerated master's students complete INTS 540 Contemporary Issues in Social Justice Human Rights and one course chosen from the list of electives for the MAIS concentration in social justice and human rights as indicated on their Accelerated Master's Program Application with a minimum grade of B in each course. Once admitted to the accelerated master's pathway, students must maintain a minimum cumulative GPA of 3.25 in all course work. Upon completion and conferral of the undergraduate degree in the semester indicated in the application, they submit the Bachelor's/Accelerated Master's Transition Form and are admitted to graduate status.

As graduate students, accelerated master's students have an advanced standing. They must meet all master's degree requirements except for the two courses (6 credits) they completed as undergraduates. Students must begin their master's program the semester immediately following conferral of the undergraduate degree.

Reserve Graduate Credit

Students may take up to 6 additional graduate credits as reserve graduate credit (chosen from the list of electives for the MAIS concentration in social justice and human rights). These credits do not apply to the undergraduate degree. The ability to take courses for reserve graduate credit is available to all high achieving undergraduates with the permission of the program. Permission to take a graduate course for reserve graduate credit is normally granted only to Mason seniors within 15 hours of graduation. See AP.1.4.4 Graduate Course Enrollment by Undergraduates (p. 79).

Bachelor's Degree (selected)/Interdisciplinary Studies, Accelerated MAIS (Women and Gender Studies Concentration)

Overview
Highly-qualified undergraduates in select majors may apply to the accelerated master's degree in interdisciplinary studies with a concentration in women and gender studies (p. 542). If accepted, and depending on their undergraduate major, students will be able to earn a bachelor's degree in their chosen major and a master's degree in interdisciplinary studies with a concentration in women and gender studies after satisfactory completion of 150 credits, sometime within five years.

For more detailed information, see AP6.7 Bachelor's/Accelerated Master's Degrees (p. 93). For policies governing all graduate degrees, see AP6 Graduate Policies (p. 90).

Selected Majors
Anthropology (p. 497), Sociology (p. 507), English (p. 370), History (p. 394), Philosophy (p. 442), Conflict Analysis and Resolution (p. 938), Psychology (p. 461), Government and International Politics (p. 972), and Communication (p. 314).

Application Requirements
Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in Graduate Admissions (p. 68). For information specific to the accelerated MAIS, see the departmental web site (http://mais.gmu.edu/programs/la-mais-isin/application).

Accelerated Option Requirements
While undergraduate students, accelerated master's students complete two graduate courses as indicated on their Accelerated Master's Program Application with a minimum grade of B in each course. Once admitted to the accelerated master's pathway, students must maintain a minimum cumulative GPA of 3.25 in all course work. Upon completion and conferral of the undergraduate degree in the semester indicated in the application, they submit the Bachelor's/Accelerated Master's Transition Form and are admitted to graduate status.

</table>

As graduate students, accelerated master's students have an advanced standing. They must meet all master's degree requirements except for the two courses (6 credits) they completed as undergraduates. Students must begin their master's program the semester immediately following conferral of the undergraduate degree.

Reserve Graduate Credit
Students may take up to 6 additional graduate credits as reserve graduate credit. These credits do not apply to the undergraduate degree.

To apply these credits to the master's degree, students should use the Bachelor's/Accelerated Master's Transition Form.

The ability to take courses, including ones not listed above, for reserve graduate credit is available to all high achieving undergraduates with the permission of the department. Permission is normally granted only to qualified Mason seniors within 15 hours of graduation. See AP1.4.4 Graduate Course Enrollment by Undergraduates (p. 79).

Psychology, BA or BS/Psychology, Accelerated MA (Cognitive and Behavioral Neuroscience Concentration)

Overview
Highly qualified Mason undergraduate psychology majors may apply to the accelerated master's degree with a concentration in cognitive and behavioral neuroscience. If accepted, students will be able to earn a BA (p. 461) or BS in psychology (p. 469) and a MA in psychology (p. 479) with a concentration in cognitive and behavioral neuroscience after satisfactory completion of 146 credits.

For more detailed information, see AP6.7 Bachelor's/Accelerated Master's Degrees (p. 93). For policies governing all graduate degrees, see AP6 Graduate Policies (p. 90).

Application Requirements
Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in Graduate Admissions (p. 68). For information specific to this program, see Application Requirements and Deadlines (http://psychology.gmu.edu/programs/application/LA-MA-ACEL-PSYC) on the departmental web site.

Accelerated Option Requirements
It is strongly recommended that students complete at least one semester of lab research before applying to the Accelerated Master's Program.

While undergraduate students, accelerated master’s students complete six credits of graduate courses (chosen from PSYC 531 Mammalian Neurobiology, PSYC 555 Neuroimaging, PSYC 558 Neuronal Bases of Learning and Memory, PSYC 559 Behavioral Chemistry, and approved sections of PSYC 592 Special Topics) as indicated on their Accelerated Master’s Program Application with a minimum grade of B in each course. Once admitted to the accelerated master’s pathway, students must maintain a minimum cumulative GPA of 3.25 in all course work. Upon completion and conferral of the undergraduate degree in the semester indicated in the application, they submit the Bachelor’s/Accelerated Master’s Transition Form and are admitted to graduate status.

As graduate students, accelerated master’s students have an advanced standing. They must meet all master’s degree requirements except for the two courses (6 credits) they completed as undergraduates. Students...
must begin their master’s program the semester immediately following conferral of the undergraduate degree.

**Reserve Graduate Credit**

Students may take up to 6 additional graduate credits as reserve graduate credit (chosen from PSYC 531 Mammalian Neurobiology, PSYC 555 Neuroimaging, PSYC 558 Neuronal Bases of Learning and Memory, PSYC 559 Behavioral Chemistry, and approved sections of PSYC 592 Special Topics. These credits do not apply to the undergraduate degree. To apply these credits to the master’s degree, students should use the Bachelor’s/Accelerated Master’s Transition Form.

The ability to take courses, including ones not listed above, for reserve graduate credit is available to all high achieving undergraduates with the permission of the department. Permission is normally granted only to qualified Mason seniors within 15 hours of graduation. See AP.1.4.4 Graduate Course Enrollment by Undergraduates (p. 79) for more information.

**Psychology Minor**

**Banner Code:** PSYC

**Academic Advising**

2086 David King Hall
Fairfax Campus

Email: ugpsyc@gmu.edu
Website: http://psychology.gmu.edu/programs/la-minor-psyc-psyc

Coursework in psychology can enhance many different majors, and the minor in psychology is available to students in any major at Mason. For a list of suggested courses for students who are majoring in specific disciplines that interact especially well with psychology, contact the Undergraduate Psychology Office (http://psychology.gmu.edu/contact).

**Admissions & Policies**

**Policies**

Eight credits of coursework must be unique to the minor and students must complete all coursework with a minimum GPA of 2.00. For policies governing all minors, see AP.5.3.4 Minors (p. 90).

**Requirements**

**Minor Requirements**

Total credits: 18

Students should be aware of the specific policies associated with this program, located on the Admissions & Policies (p. 479) tab.

1 No more than three credits of PSYC 260, PSYC 350, and PSYC 460 (in total) may be used as elective credit toward the minor. Students who take PSYC 375 and PSYC 376 in the physiological area above will only take 3 elective credits.

**Psychology, MA (CHSS)**

**Banner Code:** LA-MA-PSYC

**Academic Advising**

2086 David King Hall
Fairfax Campus

Email: psycgrad@gmu.edu
Website: psychology.gmu.edu/programs/la-ma-psyc

The MA in psychology is distinguished by its emphasis on basic research and the application of research to solve practical problems in families, industry, government, and health care settings. Because of the program's proximity to Washington D.C., students have access to many employment and continuing education opportunities in research, academia, and consulting within government, public, and private settings.

The psychology MA offers the following concentrations:

- applied developmental psychology
- cognitive and behavioral neuroscience
Psychology, MA (CHSS)

- human factors/applied cognition
- industrial/organizational psychology

While the department does not offer a master’s degree in clinical or counseling psychology, a master's degree in psychology with a concentration in clinical psychology is available for students who have been admitted to the doctoral program concentration in clinical psychology.

Admissions & Policies

Admissions

Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in Graduate Admissions (p. 68). For information specific to the MA in psychology, see Application Requirements and Deadlines (http://psychology.gmu.edu/programs/LA-MA-PSYC/application).

Provisional Admission

Students who are admitted provisionally are required to take 12 credits in psychology and earn a minimum GPA of 3.25 in those courses to qualify for removal of the provisional qualifier. Programs may add other conditions to provisional admission. Individualized study courses cannot be used toward the 12 credits.

Policies

For policies governing all graduate degrees, see Graduate Policies (p. 90).

In addition to satisfying the requirements for all master’s degrees, students pursuing a master’s degree in psychology must successfully complete 30-46 credits of required course work. They complete this coursework in one of six concentrations.

A maximum of 6 credits of thesis proposal and thesis research (PSYC 798 Thesis Proposal, PSYC 799 Master’s Thesis) may be applied to the master’s degree. A maximum of 9 credits of thesis courses (PSYC 798 Thesis Proposal, PSYC 799 Master’s Thesis), Directed Reading and Research (PSYC 597 Directed Reading and Research), and Practicum (PSYC 792 Psychology Practicum) may be applied to the degree.

Requirements

Degree Requirements

Total credits: 30-32

Students should be aware of the specific policies associated with this program, located on the Admissions & Policies (p. 480) tab.

Choose one concentration and complete the requirements therein.

For policies governing all graduate degrees, see AP.6 Graduate Policies (p. 90).

Concentration in Applied Developmental Psychology (APD)

The concentration in applied developmental psychology focuses on child development. It provides basic knowledge about normal development, skills for assessing developmental level, and techniques for planning and evaluating programs that foster optimal development. Graduates are prepared for employment at agencies concerned with educational and health programs for children, enrichment programs for infants and preschoolers, and education programs for parents.

Thesis Research or Practicum Experience

Thesis

The thesis includes a combination of PSYC 798 Thesis Proposal/PSYC 799 Master’s Thesis. Per the University Catalog, at least 3 hours must be PSYC 799 Master’s Thesis; these 3 hours must be taken the first semester in which PSYC 799 Master’s Thesis is registered. Thus, this is generally a combination of 1 credit of PSYC 798 Thesis Proposal and 3 of PSYC 799 Master’s Thesis.
Students should be aware of the policies governing theses. They must follow the thesis enrollment policy of the university and once enrolled in PSYC 799 Master’s Thesis, maintain continuous enrollment. See Academic Policies.

Elective credit can be taken via content courses, further practicum, directed reading, or research credits, or further thesis credits (i.e. more than 4 credits). Electives may also come from other departments although these often require permission of the instructor.

### Concentration in Clinical Psychology (CLN)

The clinical psychology concentration trains students to have flexibility to fill the evolving functions of clinical psychologists, including research, direct provision of clinical services, supervision, program development and evaluation, and consultation.

The clinical psychology MA concentration is not a terminal degree. Students who have been admitted to the doctoral program with a concentration in clinical psychology may apply to receive the MA in psychology on completion of 30 credits of course work. Students must also be in good standing in the program, as determined by the director of clinical training.

### Concentration in Cognitive and Behavioral Neuroscience (CBNR)

The concentration in cognitive and behavioral neuroscience focuses on studying biological substrates of behavior. Core and affiliated faculty study areas as diverse as neural control of behavioral development; animal models of learning and memory and their disorders (such as Alzheimer’s); human brain systems involved in cognition, perception, human error, decision making, and movement; the relation of neural activity to human performance; and cognitive aging. A focus of the program is on translational neuroscience-complementary study of neural systems in humans and animals, including application of animal research to human behavior.

1 Requires advisor’s approval.

Electives
Students complete the 32 credits required for this degree through additional coursework in statistics or specialized content.

Accelerated Master’s

Psychology, BA or BS/Psychology, Accelerated MA (Cognitive and Behavioral Neuroscience Concentration)

Overview
Highly qualified Mason undergraduate psychology majors may apply to the accelerated master’s degree with a concentration in cognitive and behavioral neuroscience. If accepted, students will be able to earn a BA (p. 461) or BS in psychology (p. 469) and a MA in psychology (p. 479) with a concentration in cognitive and behavioral neuroscience after satisfactory completion of 146 credits.

For more detailed information, see AP6.7 Bachelor’s/Accelerated Master’s Degrees (p. 93). For policies governing all graduate degrees, see AP6 Graduate Policies (p. 90).

Application Requirements
Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in Graduate Admissions (p. 68). For information specific to this program, see Application Requirements and Deadlines (http://psychology.gmu.edu/programs/application/LA-MA-ACEL-PSYC) on the departmental web site.

Accelerated Option Requirements

It is strongly recommended that students complete at least one semester of lab research before applying to the Accelerated Master’s Program.

While undergraduate students, accelerated master’s students complete six credits of graduate courses (chosen from PSYC 531 Mammalian Neurobiology, PSYC 555 Neuroimaging, PSYC 558 Neuronal Bases of Learning and Memory, PSYC 559 Behavioral Chemistry, and approved sections of PSYC 592 Special Topics) as indicated on their Accelerated Master’s Program Application with a minimum grade of B in each course. Once admitted to the accelerated master’s pathway, students must maintain a minimum cumulative GPA of 3.25 in all coursework. On completion and conferral of the undergraduate degree in the semester indicated in the application, they submit the Bachelor’s/Accelerated Master’s Transition Form and are admitted to graduate status.

As graduate students, accelerated master’s students have an advanced standing. They must meet all master’s degree requirements except for
the two courses (6 credits) they completed as undergraduates. Students must begin their master’s program the semester immediately following conferral of the undergraduate degree.

**Reserve Graduate Credit**

Students may take up to 6 additional graduate credits as reserve graduate credit (chosen from PSYC 531 Mammalian Neurobiology, PSYC 555 Neuroimaging, PSYC 558 Neuronal Bases of Learning and Memory, PSYC 559 Behavioral Chemistry, and approved sections of PSYC 592 Special Topics. These credits do not apply to the undergraduate degree. To apply these credits to the master’s degree, students should use the Bachelor’s/Accelerated Master’s Transition Form.

The ability to take courses, including ones not listed above, for reserve graduate credit is available to all high achieving undergraduates with the permission of the department. Permission is normally granted only to qualified Mason seniors within 15 hours of graduation. See AP.1.4.4 Graduate Course Enrollment by Undergraduates (p. 79) for more information.

**Psychology, PhD**

**Banner Code: LA-PHD-PSYC**

**Academic Advising**

2086 David King Hall
Fairfax Campus

Email: psycgrad@gmu.edu
Website: psychology.gmu.edu/programs/la-phd-psy

The PhD in psychology provides knowledge of the basic content areas in psychology and practical experience in applying this knowledge to solve human problems in relationships, work, and education. Core course requirements cover subject matter identified by the profession as essential to doctoral training. This includes biological, social, cognitive, and individual bases of behavior, as well as the history of psychology. The program offers the following concentrations: applied developmental psychology, clinical psychology, cognitive and behavioral neuroscience, human factors/applied cognition, and industrial/organizational psychology.

**Admissions & Policies**

**Admissions**

Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in Graduate Admissions (p. 68).

For specific information, see Application Requirements and Deadlines (http://psychology.gmu.edu/programs/application/LA-PHD-PSYC).

**Policies**

For policies governing all graduate degrees, see Graduate Policies (p. 90).

**Reduction of Credit**

For students entering the doctoral program with a master’s degree, the number of credits required may be reduced by a maximum of 30 credits subject to the approval of the program faculty and the dean. Requests for reduction of credit are reviewed by a committee only after acceptance to the PhD program.

**Grading**

Students in the doctoral program are evaluated on the basis of grades, comprehensive exams, research, and communication skills. In doctoral courses, A and B are the only acceptable grades. Students in the doctoral program must successfully complete comprehensive exams administered each year.

**Requirements**

**Degree Requirements**

Total credits: 72-76

Students should be aware of the specific policies associated with this program, located on the Admissions & Policies (p. 484) tab.

In addition to satisfying the requirements for all doctoral degrees, students must successfully complete 72–76 credits of required course work chosen in one of five concentrations. Each concentration consists of four educational components: core courses, upper-level specialty courses, supervised practica, and dissertation.

**Psychology Concentrations**

- Concentration in Applied Developmental Psychology (APD) (p. 484)
- Concentration in Clinical Psychology (CLN) (p. 486)
- Concentration in Cognitive and Behavioral Neuroscience (CBNR) (p. 487)
- Concentration in Human Factors/Applied Cognition (HF) (p. 488)
- Concentration in Industrial/Organizational Psychology (IO) (p. 489)

**Concentration in Applied Developmental Psychology (APD)**

**Overview**

The applied developmental psychology concentration is concerned with enhancing developmental processes and preventing developmental disorders in individuals and families across the life span. It uses the knowledge base and methodologies of developmental science to assist the development of individuals who vary in cultural and ethnic backgrounds; economic and social opportunities; physical, social, emotional, and cognitive abilities; and conditions of living (e.g., families, neighborhoods, communities, and physical settings). The program’s emphasis is on child development (infancy, early childhood, middle childhood, and adolescence), and students may focus their studies on the cognitive, social, emotional, language, personality, or physiological aspects of development.

The applied developmental concentration has two goals: to train students to teach and do research on basic and applied issues in child development for employment in such settings as universities, research institutes, and organizations, and to train students to do applied work in developmental psychology (consultation, program evaluation, assessment and evaluation, developmental interventions, and parent training) in such settings as schools, hospitals, courts, child care facilities, and other organizations. Applied developmental psychology doctoral students have the option of also completing course requirements for the MA concentration in school psychology.
Students pursuing this concentration must complete 72 credits comprised of doctoral course work and at least 12 credits of dissertation research. The number of credits required may be reduced for a prior master's degree as described above.

Select electives to complete the 72 credits for the degree 72

**Advancement to Candidacy**

To advance to candidacy, students must complete all courses required by the program. Students must also successfully complete and pass written and oral comprehensive exams.
Dissertation Research

The dissertation requirement is designed to demonstrate the student’s ability to apply psychological principles to research problems. Once enrolled in PSYC 999 Doctoral Dissertation, students must follow the university’s continuous registration policy as specified in AP.6.10.6 Dissertation Research (p. 98). Students who defend in the summer must be registered for at least 1 credit of PSYC 999 Doctoral Dissertation.

Students complete a minimum of 3 credits of PSYC 998 Doctoral Dissertation Proposal and 3 credits of PSYC 999 Doctoral Dissertation. They must apply a minimum of 12 dissertation credits (PSYC 998 Doctoral Dissertation Proposal and PSYC 999 Doctoral Dissertation combined) to the degree. Because of the continuous registration policy, students may be required to register for additional credits of these courses.

Concentration in Clinical Psychology (CLN)

Overview

The clinical psychology concentration is committed to the clinical science model. Our goal is to train clinical psychologists who are capable of integrating research and applied clinical activities. The program is unique in approaching clinical psychology from social psychological and contextual perspectives. A social psychological approach uses theory and research from social psychology to understand emotional, cognitive, behavioral, and interpersonal functioning. A contextual perspective stresses the impact of social and cultural factors on the individual and vice versa. Most of the faculty members employ cognitive-behavioral and interpersonal approaches to research and clinical practice, but students also receive exposure to humanistic, existential, and psychodynamic perspectives.

Students pursuing this concentration must complete 76 graduate credits comprised of doctoral course work and at least 12 credits of dissertation research. The number of credits required may be reduced for a prior master’s degree as described above.

Concentration in Cognitive and Behavioral Neuroscience (CBNR)

Overview
This cognitive and behavioral neuroscience concentration focuses on studying biological substrates of behavior. Core and affiliated faculty study areas as diverse as neural control of behavioral development; animal models of learning and memory and their disorders (such as Alzheimer’s); human brain systems involved in cognition, perception, human error, decision making, and movement; the relation of neural activity to human performance; and cognitive aging. A focus of the program is on translational neuroscience-complementary study of neural systems in humans and animals, including application of animal research to human behavior.

The program’s core facilities have well-equipped behavioral testing and histological/histochemical facilities. The program’s strong links to the Krasnow Institute for Advanced Study and the Center for Biomedical Genomics and Informatics allows opportunities for collaborative work as diverse as tissue slice preparations and molecular genetics. The doctoral program prepares students for research-based careers in academics, government, or industry.

Students pursuing this concentration must complete 72 graduate credits comprised of course work and at least 12 credits of dissertation research. The number of credits required may be reduced for a prior master’s degree as described above.

Concentration in Human Factors/Applied Cognition (HF)

Overview

The human factors and applied cognition concentration covers basic theoretical and empirical issues and emphasizes research that applies cognitive science to real-world problems. The program builds bridges between human factors engineering and cognitive psychology. Many applications of cognitive science are in the domain of human factors, and many doctoral students who complete our program go on to be human factors professionals.

Students pursuing this concentration must complete 72 graduate credits comprised of course work and at least 12 credits of dissertation research. The number of credits required may be reduced for a prior master’s degree (up to 30 credits).

Concentration in Industrial/Organizational Psychology (IO)

Overview

The industrial/organizational psychology concentration focuses on multiple aspects of behavior in organizational settings, including personnel selection, quantitative analysis, teams, leadership, work and family issues, and organizational health issues. Mason's graduate work in this area emphasizes research as the key to knowledge in both academic and applied settings. The program fosters a peer-oriented environment whereby students collaborate on numerous projects in addition to working with faculty members, in many different areas of industrial/organizational psychology.

Students pursuing this concentration must complete 72 graduate credits comprised of course work and at least 12 credits of dissertation research. The number of credits required may be reduced for a prior master's degree as described above.

Total Credits 9

1 Students taking 12 credits of specialized content may take an additional 3 credits of PSYC 897 Directed Reading and Research.

**Electives**

Students complete the remaining credits required for this degree through additional course work in professional development or dissertation.

**Advancement to Candidacy**

To advance to candidacy, students must complete all core courses required by the program. Students must also successfully complete and pass written and oral comprehensive exams.

**Dissertation Research**

The dissertation requirement is designed to demonstrate the student’s ability to apply psychological principles to research problems. Once enrolled in PSYC 999 Doctoral Dissertation, students must follow the university’s continuous registration policy as specified in AP6.10.6 Dissertation Research (p. 98). Students who defend in the summer must be registered for at least 1 credit of PSYC 999 Doctoral Dissertation.

Students complete a minimum of 3 credits of PSYC 998 Doctoral Dissertation Proposal and 3 credits of PSYC 999 Doctoral Dissertation. They must apply a minimum of 12 dissertation credits (PSYC 998 Doctoral Dissertation Proposal and PSYC 999 Doctoral Dissertation combined) to the degree. Because of the continuous registration policy, students may be required to register for additional credits of these courses.

**Department of Religious Studies**

Phone: 703-993-1290
Website: religious.gmu.edu

**Undergraduate Program**

The department offers a bachelor of arts degree in religious studies for students who are interested in learning more about the world’s religious traditions. Majors explore the many dimensions of religion and study religion's spiritual, historical, cultural, and social aspects.

**Areas of Study**

Areas of study offered by the department include Asian religious traditions, Near (Middle) East religious traditions (Judaism, Islam, and Christianity), and comparative aspects of religion. Though the required coursework, majors in religious studies develop skills in reading and interpreting sacred texts. They explore the cultural and social dimensions of religion along with a consideration of religious values and ethics, from comparative and cross-cultural perspectives with relation to global issues.

**Courses**

The courses in the undergraduate program are writing intensive. They enable students to study and analyze religious ideas and symbols and give them the skills they need to present well-argued papers.

**Minors**

Students majoring in religious studies are encouraged to do one of the many minors offered by the college. See Minors and Interdisciplinary Minors (p. 305) on the College of Humanities and Social Sciences page.

The department also offers minors in religious studies and Judaic studies, both of which are available to students in all majors in the university.

**Graduate Program**

The department sponsors the concentration in religious studies in the interdisciplinary studies, MAIS (p. 542). This concentration is designed for students who are interested in exploring the world’s major religions at the graduate level. Students study the development and interaction of the global religious traditions that influence human identity, behavior, culture, and values. They investigate the effects that historical crises and
the forces of change have on religion, placing contemporary religious pluralism and inter-religious dialog in a global context.

Judaic Studies Minor
Banner Code: JS

Academic Advising
B465 Robinson Hall
Fairfax Campus
Website: mcl.gmu.edu/programs/la-minor-mcl-itln

The minor is designed for students interested in the culture, history, and politics of Jewish communities across the world.

Admissions & Policies

Policies
Eight credits of coursework must be unique to the minor and students must complete all coursework with a minimum GPA of 2.00. For policies governing all minors, see AP5.3.4 Minors (p. 90).

Requirements

Minor Requirements
Total credits: 15

Students should be aware of the specific policies associated with this program, located on the Admissions & Policies (p. 491) tab.

1 Special topics courses and independent studies courses, when relevant, may be used to fulfill this requirement with prior written approval of the undergraduate director.

Religious Studies, BA

Banner Code: LA-BA-RELI

B465 Robinson Hall
Fairfax Campus
Website: religious.gmu.edu/programs/la-ba-reli

Religious studies provides students an understanding of the traditions of religions across the globe. Areas of study offered by the department include Asian religious traditions, Near (Middle) East religious traditions (Judaism, Islam, and Christianity), and comparative aspects of religion. Students develop skills in reading and interpreting sacred texts. They explore the cultural and social dimensions of religion along with a consideration of religious values and ethics from comparative and cross-cultural perspectives, and with relation to global issues. Students go on to work in the government, service, or nonprofit sectors, as well as pursue graduate work in the humanities.

Admissions & Policies

Policies
Students in this major complete at least 33 credits within the major, earning a minimum grade of 2.00 in each course. No course applied to the major in religious studies may be used to fulfill more than one requirement.

For policies governing all undergraduate degrees, see AP5 Undergraduate Policies (p. 87).
Requirements

Degree Requirements

Total credits: minimum 120

Students should be aware of the specific policies associated with this program, located on the Admissions & Policies (p. 491) tab.

</tbody>
</table>

Total Credits 3

Electives in the Major

Select two electives in consultation with an advisor. 1 6

Total Credits 6

1 Choose from courses in religious studies, related disciplines (including anthropology, art history, and history), or a scriptural language (such as Arabic, Biblical Hebrew, Chinese, Classical Greek, Latin, or Sanskrit). Up to 6 credits of a scriptural language may be used to fulfill this requirement and the requirement of 12 credits in religious studies at 300 and 400 level.

Writing-Intensive Requirement

The university requires all students to complete at least one course designated "writing intensive" in their majors. Students majoring in religious studies fulfill this requirement by successfully completing RELI 420 Seminar.

Upper Level Requirement

Students seeking a bachelor’s degree must apply at least 45 credits of upper-level courses (numbered 300 or above) toward graduation requirements.

Additional Electives

Any remaining credits may be completed with elective courses to bring the degree total to 120.

College Level Requirements for the BA Degree

In addition to the Mason Core (p. 142) program, students pursuing a BA degree must complete the coursework below. Except where expressly prohibited, a course used to fulfill a college level requirement may also be used simultaneously to satisfy other requirements (Mason Core (p. 142) requirements or requirements for the major).

Philosophy or Religious Studies

Select 3 credits from the following:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>PHIL (p. 2044)</td>
<td></td>
<td>3</td>
</tr>
<tr>
<td>RELI (p. 2144)</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

1 Note that the following courses may not be used to fulfill this requirement:

- PHIL 323 Classical Western Political Theory
- PHIL 324 Modern Western Political Theory
- PHIL 327 Contemporary Western Political Theory
- PHIL 393 Humanities College to Career
- PHIL 460 Senior Seminar in Philosophy, Politics, and Economics

Additionally, PHIL 253 Philosophy and Literature (Mason Core) (p. 142) and RELI 235 Religion and Literature (Mason Core) (p. 142) cannot be used to fulfill both the philosophy/religious studies requirement and the Mason Core literature (p. 147) requirement.

Social and Behavioral Sciences

Select 3 credits of social and behavioral sciences from the following (additional to the Mason Core social and behavioral sciences requirement) 1

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>ANTH (p. 1212)</td>
<td></td>
<td>3</td>
</tr>
</tbody>
</table>
**Non-Western Culture**

Select 3 credits of an approved course in the study of a non-Western culture (additional to the Mason Core requirement in global understanding)

<table>
<thead>
<tr>

1 A course used to fulfill the Mason Core global understanding (p. 146) requirement may not be simultaneously used to satisfy this college-level requirement. A course used to fulfill this requirement may be used simultaneously to fulfill any other requirements (Mason Core requirements, college-level requirements, or requirements for the major). Additional information on waivers can be found at the Office of Undergraduate Academic Affairs (http://chssundergrad.gmu.edu).

**Mason Core**

Some Mason Core (p. 142) requirements may already be fulfilled by the major requirements listed above. Students are strongly encouraged to consult their advisors to ensure they fulfill all remaining Mason Core (p. 142) requirements.
### Accelerated Master's

The accelerated master's program below specifies the BA in religious studies as a feeder degree for its program. It is important to note, however, that many accelerated master's programs are available for any bachelor's degree at Mason, including this one. See the full list of degrees (http://catalog.gmu.edu/programs/#filter=filter_24) with accelerated programs at George Mason.

### Bachelor's Degree (selected)/Interdisciplinary Studies, Accelerated MAIS (Religious Studies Concentration)

**Overview**

Highly-qualified undergraduates in selected majors (see below) may apply to the accelerated master's degree in interdisciplinary studies with a concentration in religious studies. If accepted, and depending on their undergraduate major, students will be able to earn a bachelor's degree in their chosen major and a master's in interdisciplinary studies with a concentration in religious studies after satisfactory completion of 150 credits, sometimes within five years. See AP6.7 Bachelor's/Accelerated Master's Degrees (p. 93).

Students in an accelerated degree program must fulfill all university requirements for the master's degree. For policies governing all graduate degrees, see AP6 Graduate Policies (p. 90).

**Selected Majors**

- Art history (p. 394)
- Philosophy (p. 442)
- Conflict analysis and resolution (p. 936)
- Global affairs (p. 523)

### Code Title Credits

**Foundation Requirements**

- Written Communication (ENGH 101) (p. 142) 3
- Oral Communication (p. 142) 3
- Quantitative Reasoning (p. 143) 3
- Information Technology and Computing (p. 143) 3

**Exploration Requirements**

- Arts (p. 144) 3
- Global Understanding (p. 146) 3
- Literature (p. 147) 3
- Natural Science (p. 148) 7
- Social and Behavioral Sciences (p. 150) 3
- Western Civilization/World History (p. 151) 3

**Integration Requirements**

- Written Communications (ENGH 302) (p. 142) 3
- Writing-Intensive (p. 151) 1
- Synthesis/Capstone (p. 153) 2

**Total Credits** 40

---

1. Most programs include the writing-intensive course designated for the major as part of the major requirements; this course is therefore not counted towards the total required for Mason Core.

2. Minimum 3 credits required.

---

Application Requirements

Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in the Admissions (p. 68). For information specific to the accelerated MAIS, see Application Requirements and Deadlines (http://mais.gmu.edu/programs/la-mais-isin/application).

Accelerated Option Requirements

While undergraduate students, accelerated master's students complete two graduate courses as indicated on their Accelerated Master's Program Application with a minimum grade of B in each course. Once admitted to the accelerated master's pathway, students must maintain a minimum cumulative GPA of 3.25 in all coursework. Upon completion and conferral of the undergraduate degree in the semester indicated in the application, they submit the Bachelor's/Accelerated Master's Transition Form and are admitted to graduate status.

**Code Title Credits**

Select two from the following: 6

- RELI 600 Interdisciplinary Pathways in the Study of Religion
- RELI 630 Theories and Methods in the Study of Religion
- RELI 632 Interreligious Dialogue
- RELI 633 Issues in Religious Ethics
- RELI 636 Religion and the Natural Environment
- RELI 637 Religion and Secularity in State and Society

**Total Credits** 6

As graduate students, accelerated master's students have an advanced standing. They must meet all master's degree requirements except for the two courses (6 credits) they completed as undergraduates. Students must begin their master's program the semester immediately following conferral of the undergraduate degree.

**Reserve Graduate Credit**

Students may take up to 6 additional graduate credits as reserve graduate credit. These credits do not apply to the undergraduate degree. To apply these credits to the master's degree, students should use the Bachelor's/Accelerated Master's Transition Form.

**Code Title Credits**

Select 6 credits from the following: 6

- RELI 600 Interdisciplinary Pathways in the Study of Religion
- RELI 630 Theories and Methods in the Study of Religion
- RELI 632 Interreligious Dialogue
Religious Studies Minor

RELI 633 Issues in Religious Ethics
RELI 636 Religion and the Natural Environment
RELI 637 Religion and Secularity in State and Society

Total Credits 6

The ability to take courses, including ones not listed above, for reserve graduate credit is available to all high achieving undergraduates with the permission of the department. Permission is normally granted only to qualified Mason seniors within 15 hours of graduation. See AP 1.4.4 Graduate Course Enrollment by Undergraduates (p. 79).

Religious Studies Minor

Banner Code: RELI

Academic Advising
B465 Robinson Hall
Fairfax Campus
Website: religious.gmu.edu/programs/la-minor-reli-reli

The minor introduces students to the world’s religious traditions. Within the minor, students may focus on the religious traditions of Asia, those of the Near (Middle) East, or comparative aspects of religion.

Admissions & Policies

Policies
Eight credits of coursework must be unique to the minor and students must earn a minimum grade of 2.00 in each course applied to the minor. For policies governing all minors, see AP 5.3.4 Minors (p. 90).

Requirements

Minor Requirements
Total credits: 18

Students should be aware of the specific policies associated with this program, located on the Admissions & Policies (p. 496) tab.

Department of Sociology and Anthropology

B305 Robinson Hall
Fairfax Campus
Phone: 703-993-1440
Website: soan.gmu.edu

Undergraduate Programs

Anthropology
The department offers a bachelor of arts degree in anthropology. The program draws broadly from the social sciences, humanities, and natural sciences, making it a strong undergraduate major that provides a sound interdisciplinary preparation for a variety of careers.

Bachelor’s/Accelerated Master’s Program
The department offers highly-qualified majors in anthropology the opportunity to apply to an accelerated master’s degree program in anthropology (p. 506). If accepted, students will be able to earn both the undergraduate and graduate degrees after satisfactory completion of 144 credits, generally within five years.

Sociology
The department offers a bachelor of arts degree in sociology. Sociology majors study how social movements emerge from the collective efforts of individuals and the role that social forces play in defining racial identities and gender roles. They take courses in the theories that explain social phenomena and develop strong research skills, learning how to conduct surveys, interviews, systematic observation as well as how to evaluate sources.

With the strong research skills, critical thinking, and effective writing that are the hallmark of sociology graduates, they are prepared for a variety of career paths from teaching, human service, and human resource occupations to work in the criminal justice system, marketing, and social research. The sociology major is also excellent preparation for students considering law school or graduate training in the social and behavioral sciences.

Bachelor’s/Accelerated Master’s Program
The department offers highly-qualified majors in sociology the opportunity to apply to an accelerated master’s degree program in sociology (p. 516). If accepted, students will be able to earn both the undergraduate and graduate degrees after satisfactory completion of 147 credits, generally within five years.

Minors
The department offers minors in anthropology and sociology available to students in any major. The department coordinates the interdisciplinary minor in immigration studies and the faculty participate in many other minors in the college.

Graduate Programs

Anthropology
The department offers a master of arts degree in anthropology. Students can choose one of three emphases: advanced training in sociocultural
anthropology; culture, health and bioethics; or transnational and
global issues. They can choose from many courses that are richly
interdisciplinary covering such diverse topics as nationalism and
transnationalism; bioethics; social movements, ethnicity and identity;
conflict and violence; migration, displacement, and refugees; regional
ethnography; and political economy and globalization. Departmental
specializations include the following regions: Africa, Asia, Central and
South America, Europe, the Middle East, and the United States. Course
work progresses from core courses to more advanced courses and
culminates in a thesis.

Sociology
The department offers master's and doctoral degrees in sociology.
Students pursuing a master's degree in sociology take required courses
in theory and methods and a host of electives. Students may choose
to focus their electives in one of two specializations: institutions and
inequalities or sociology of globalization.

The doctoral degree in sociology provides rigorous training in public
and applied social research, including skills in research design, data
analysis, and substantive areas that are pertinent to various sectors in
the Washington, D.C., area. Graduates have the theoretical, analytical, and
professional skills that prepare them for academic positions in teaching
or research. They are also well-qualified for nonacademic positions in
the many settings that rely on the expertise of sociologists including
human service agencies, marketing research firms, educational systems,
nonprofit foundations, and law enforcement agencies.

Funding
The department has a limited number of teaching assistantships, which
are awarded on a competitive basis. Other sources of funding such as
grants, loans, and employment on campus are also available. Students
awarded assistantships must register for a minimum of six credits a
semester and show satisfactory progress toward their degree.

Faculty

Department Faculty
Emeritus Faculty
Anthropology: Black, Dumont, Golomb, Haines, Seligmann, Williams
Sociology: Borkman, Guagnano, Rosenblum

Professors
Anthropology: Schiller
Sociology: Best, Davis, Dennis, Jacobs, Kurtz, Scimecca, Wite

Associate Professors
Anthropology: Bickford, Trencher
Sociology: Bockman, Dale, Hanrahan, Kim

Assistant Professors
Anthropology: Hughes Rinker, Klaus, Mantz, Sadana, Takahashi, Temple

Term Associate Professor

Anthropology: Gerber, Hodges, Lowry
Sociology: Mitcho, Nambiar, Pearlman, Smith

Affiliate Faculty
Anthropology: Avruch, Blum, Usher
Sociology: Goldstone, Johnson, Nambiar, Sandole-Staroste, Smith,
Spalter-Roth

Requirements & Policies

Policies
Non-Degree Status
Applicants who do not wish to pursue a degree may apply for non-
degree status. Non-degree students must meet the same admission
requirements as degree-seeking students (minimum undergraduate
GPA of 3.00, among other criteria). Non-degree students may later apply
for admission to a degree program. Up to nine credits earned in non-
degree status may transferred to the master's degrees in anthropology or
sociology, subject to the approval of the program director and dean.

Anthropology, BA
Banner Code: LA-BA-ANTH
B305 Robinson Hall
Fairfax Campus

Website: soan.gmu.edu/programs/la-ba-anth

Anthropology is the study of human beings and their cultures. Majors
develop an eye for detail and careful observation, critical thinking,
sensitivity to the unfamiliar, skills in research and writing, and an ability
to describe and understand culture. The programs in archaeology
and biological anthropology give hands-on research experience with
faculty through fieldwork in bioarchaeology, archaeology, and museum-
based data collection. The programs in cultural anthropology connect
anthropological research to current social challenges such as health and
disease, urbanization, and geopolitics. It is a strong undergraduate major
that provides sound interdisciplinary preparation for a variety of careers.
Admissions & Policies

Policies

Students pursuing this degree must complete 36 credits within the major, with a minimum GPA of 2.00.

For policies governing all undergraduate degrees, see AP 5 Undergraduate Policies (p. 89).

Requirements

Degree Requirements

Total credits: minimum 120

Students should be aware of the specific policies associated with this program, located on the Admissions & Policies (p. 498) tab.

Students are advised to consult with an advisor to learn how they can fulfill Mason Core (p. 142) requirements in global understanding, information technology, and synthesis, as well as the college-level requirement in non-Western culture.

Writing-Intensive Requirement

The university requires all students to complete at least one course designated "writing intensive" in their majors at the 300 level or above. Students majoring in anthropology may fulfill this requirement by successfully completing ANTH 490 Theories, Methods, and Issues II.

Additional Electives

Any remaining credits may be completed with electives to bring the degree total to 120.

Upper Level Requirement

Students seeking a bachelor's degree must apply at least 45 credits of upper-level courses (numbered 300 or above) toward graduation requirements.

College Level Requirements for the BA Degree

In addition to the Mason Core (p. 142) program, students pursuing a BA degree must complete the coursework below. Except where expressly prohibited, a course used to fulfill a college level requirement may also be used simultaneously to satisfy other requirements (Mason Core (p. 142) requirements or requirements for the major).

Philosophy or Religious Studies

Select 3 credits from the following:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>PHIL (p. 2044)</td>
<td></td>
<td>3</td>
</tr>
<tr>
<td>RELI (p. 2144)</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

Note that the following courses may not be used to fulfill this requirement:

- PHIL 323 Classical Western Political Theory
- PHIL 324 Modern Western Political Theory
- PHIL 327 Contemporary Western Political Theory
- PHIL 393 Humanities College to Career
- PHIL 460 Senior Seminar in Philosophy, Politics, and Economics

Additionally, PHIL 253 Philosophy and Literature (Mason Core) (p. 142) and RELI 235 Religion and Literature (Mason Core) (p. 142) cannot be used to fulfill both the philosophy/religious studies requirement and the Mason Core literature (p. 147) requirement.

Social and Behavioral Sciences

Select 3 credits of social and behavioral sciences from the following (additional to the Mason Core social and behavioral sciences requirement)¹

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>ANTH (p. 1212)</td>
<td></td>

</tr>
</tbody>
</table>

¹ The two courses used to fulfill the combined college and Mason Core (p. 142) requirements must be from different disciplines in the social and behavioral sciences.
² HIST 100 History of Western Civilization (Mason Core) (p. 142) and HIST 125 Introduction to World History (Mason Core) (p. 142) may not be used to fulfill this requirement.
Intermediate-level proficiency in one foreign language, fulfilled by:

- Completing a course in a foreign language numbered 202 (or higher level courses taught in the language) (p. 424)
- Or achieving a satisfactory score on an approved proficiency test
- Or completing the following ASL three course sequence:
  - EDSE 115 American Sign Language (ASL) I
  - EDSE 116 American Sign Language (ASL) II
  - EDSE 219 American Sign Language (ASL) III

Students who are already proficient in a second language may be eligible for a waiver of this requirement. Additional information on waivers can be found at the Office of Undergraduate Academic Affairs (http://chssundergrad.gmu.edu).

**Non-Western Culture**
Select 3 credits of an approved course in the study of a non-Western culture (additional to the Mason Core requirement in global understanding)

### Total Credits

- **40 Credits**

### Honors

**Honors in the Major**

Highly-qualified students majoring in anthropology may apply to graduate with honors in the major.

**Eligibility**

To be eligible, students must have completed at least 60 credits, taken ENGH 302 Advanced Composition (Mason Core) (p. 142) for the social sciences, completed 15 credits of anthropology (including ANTH 114 Introduction to Cultural Anthropology (Mason Core)
(p. 142)), and have a minimum cumulative GPA of 3.30 and a minimum grade of B+ in anthropology courses.

Requirements
If accepted, students complete two honors courses. The first course is an honors section of one of these courses: ANTH 496 Evolutionary Theory, ANTH 450 Qualitative Methods: Nonstatistical Approaches in Culture and Social Research, ANTH 495 Internship or another course chosen in consultation with the honors director. The second course is ANTH 499 Independent Research, in which students complete an honors paper written under the guidance of an anthropology faculty member. All candidates for honors in the major participate in an honors colloquium. To graduate with honors in the major, students must complete the honors coursework with a minimum GPA of 3.50.

Accelerated Master's

The accelerated master’s programs in the list below specify the BA in anthropology as a feeder degree for their programs. Many other accelerated master’s programs are also available for any bachelor’s degree at Mason. See the full list of degrees (http://catalog.gmu.edu/programs/#filter=filter_24) with accelerated programs at Mason.

Anthropology, BA/Anthropology, Accelerated MA

Overview
Highly-qualified Mason anthropology majors may apply to the accelerated master’s degree program. If accepted, students will be able to earn both a BA and a MA in anthropology after satisfactory completion of 144 credits, sometimes within 5 years. Students with both a BA and MA have a competitive advantage when applying to PhD programs in anthropology. See AP.6.7 Bachelor’s/Accelerated Master’s Degrees (p. 93).

Students in an accelerated degree program must fulfill all university requirements for the master’s degree. For policies governing all graduate degrees, see AP6 Graduate Policies (p. 90).

Application Requirements
Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in Graduate Admissions (p. 68). For information specific to the accelerated MA in anthropology, see Application Requirements and Deadlines (http://soan.gmu.edu/programs/LA-MA-ANTH/application).

Accelerated Option Requirements
While undergraduate students, accelerated master’s students complete two graduate courses (chosen from ANTH 535 Anthropology and the Human Condition: Seminar I, ANTH 536 Anthropology and the Human Condition: Seminar II, and ANTH 650 Methods in Anthropology) as indicated on their Accelerated Master’s Program Application with a minimum grade of B in each course. Once admitted to the accelerated master’s pathway, students must maintain a minimum cumulative GPA of 3.25 in all course work. On completion and conferment of the undergraduate degree in the semester indicated in the application, they submit the Bachelor’s/Accelerated Master’s Transition Form and are admitted to graduate status.

As graduate students, accelerated master’s students have an advanced standing. They must meet all master’s degree requirements except for the two courses (6 credits) they completed as undergraduates. Students must begin their master’s program the semester immediately following conferment of the undergraduate degree.

Reserve Graduate Credit
Students may take up to 6 additional graduate credits as reserve graduate credit (chosen from ANTH 635 Regional Ethnography, ANTH 650 Methods in Anthropology, or ANTH 699 Contemporary Issues in Sociocultural Anthropology). These credits do not apply to the undergraduate degree. To apply these credits to the master’s degree, students should use the Bachelor’s/Accelerated Master’s Transition Form.

The ability to take courses, including ones not listed above, for reserve graduate credit is available to all high achieving undergraduates with the permission of the department. Permission is normally granted only to qualified Mason seniors within 15 hours of graduation. See AP.1.4.4 Graduate Course Enrollment by Undergraduates (p. 79).

Bachelor's Degree (selected)/Interdisciplinary Studies, Accelerated MAIS (Women and Gender Studies Concentration)

Overview
Highly-qualified undergraduates in select majors may apply to the accelerated master's degree in interdisciplinary studies with a concentration in women and gender studies (p. 542). If accepted, and depending on their undergraduate major, students will be able to earn a bachelor’s degree in their chosen major and a master’s degree in interdisciplinary studies with a concentration in women and gender studies after satisfactory completion of 150 credits, sometime within five years.

For more detailed information, see AP.6.7 Bachelor’s/Accelerated Master’s Degrees (p. 93). For policies governing all graduate degrees, see AP6 Graduate Policies (p. 90).

Selected Majors
Anthropology (p. 497), Sociology (p. 507), English (p. 370), History (p. 394), Philosophy (p. 442), Conflict Analysis and Resolution (p. 938), Psychology (p. 461), Government and International Politics (p. 972), and Communication (p. 314).

Application Requirements
Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in Graduate Admissions (p. 68). For information specific to the accelerated MAIS, see the departmental web site (http://mais.gmu.edu/programs/la-mais-isin/application).

Accelerated Option Requirements
While undergraduate students, accelerated master’s students complete two graduate courses as indicated on their Accelerated Master’s Program Application with a minimum grade of B in each course. Once admitted to the accelerated master’s pathway, students must maintain a minimum cumulative GPA of 3.25 in all course work. Upon completion and conferment of the undergraduate degree in the semester indicated in the application, they submit the Bachelor’s/Accelerated Master’s Transition Form and are admitted to graduate status.
### Reserve Graduate Credit

Students may take up to 6 additional graduate credits as reserve graduate credit. These credits do not apply to the undergraduate degree. To apply these credits to the master's degree, students should use the Bachelor's/Accelerated Master's Transition Form.

Total Credits: 6

As graduate students, accelerated master's students have an advanced standing. They must meet all master's degree requirements except for the two courses (6 credits) they completed as undergraduates. Students must begin their master's program the semester immediately following conferral of the undergraduate degree.

### Bachelor's Degree (selected)/Interdisciplinary Studies, Accelerated MAIS (Religious Studies Concentration)

**Overview**

Highly-qualified undergraduates in selected majors (see below) may apply to the accelerated master's degree in interdisciplinary studies with a concentration in religious studies. If accepted, and depending on their undergraduate major, students will be able to earn a bachelor's degree in their chosen major and a master's in interdisciplinary studies with a concentration in religious studies after satisfactory completion of 150 credits, sometimes within five years. See AP.6.7 Bachelor's/Accelerated Master's Degrees (p. 93).

Students in an accelerated degree program must fulfill all university requirements for the master's degree. For policies governing all graduate degrees, see AP.6 Graduate Policies (p. 90).

### Selected Majors

- Art history (p. 394)
- Philosophy (p. 442)
- Conflict analysis and resolution (p. 936)
- Global affairs (p. 523)
- History (p. 402)

- Religious studies (p. 491)
- Russian and Eurasian studies (p. 568)
- Sociology (p. 507)
- Anthropology (p. 497)

If the student has not majored in religious studies (p. 491), it is preferred, though not required, that the student have a minor in religious studie (p. 496).

### Application Requirements

Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in the Admissions (p. 68). For information specific to the accelerated MAIS, see Application Requirements and Deadlines (http://mais.gmu.edu/programs/la-mais-isin/application).

Bachelor's Degree (selected)/Interdisciplinary Studies, Accelerated MAIS (Social Justice and Human Rights Concentration)

Overview

Highly-qualified undergraduates in select majors (listed below) may apply to the accelerated master's degree in interdisciplinary studies with a concentration in social justice and human rights (p. 542). If accepted, and depending on their undergraduate major, students will be able to earn an undergraduate degree in their chosen major and a master's in interdisciplinary studies with a concentration in social justice and human rights after satisfactory completion of 150 credits, sometimes within five years.

For more detailed information, see AP.6.7 Bachelor's/Accelerated Master's Degrees (p. 93). For policies governing all graduate degrees, see AP.6 Graduate Policies (p. 90).

Selected Majors

Anthropology (p. 497), Environmental and Sustainability Studies (p. 576), Sociology (p. 507), English (p. 370), History (p. 394), Philosophy (p. 442), Conflict Analysis and Resolution (p. 938), Psychology (p. 461), Government and International Politics (p. 972), Integrative Studies (p. 593), and Communication (p. 314).

Application Requirements

Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in Graduate Admissions (p. 68). For information specific to the accelerated MAIS, see Application Requirements and Deadlines (http://mais.gmu.edu/programs/la-mais-isin/application) on the departmental web site.

Accelerated Option Requirements

While undergraduate students, accelerated master's students complete INTS 540 Contemporary Issues in Social Justice Human Rights and one course chosen from the list of electives for the MAIS concentration in social justice and human rights as indicated on their Accelerated Master's Program Application with a minimum grade of B in each course. Once admitted to the accelerated master's pathway, students must maintain a minimum cumulative GPA of 3.25 in all course work. Upon completion and conferral of the undergraduate degree in the semester indicated in the application, they submit the Bachelor's/ Accelerated Master's Transition Form and are admitted to graduate status.

As graduate students, accelerated master's students have an advanced standing. They must meet all master's degree requirements except for the two courses (6 credits) they completed as undergraduates. Students must begin their master's program the semester immediately following conferral of the undergraduate degree.

Reserve Graduate Credit

Students may take up to 6 additional graduate credits as reserve graduate credit (chosen from the list of electives for the MAIS concentration in social justice and human rights). These credits do not apply to the undergraduate degree. The ability to take courses for reserve graduate credit is available to all high achieving undergraduates with the permission of the program. Permission to take a graduate course for reserve graduate credit is normally granted only to Mason seniors within 15 hours of graduation. Anthropology Minor

Banner Code: ANTH

Academic Advising

B305 Robinson Hall
Fairfax Campus
Website: soan.gmu.edu/programs/la-minor-soan-anth

A minor in anthropology enriches many majors with its holistic and cross-cultural perspective. It is a good fit for students majoring in biology, communication, English, history, psychology, sociology, and others. This minor will be useful for anyone contemplating an international career or a future profession involving culturally-diverse populations.

Admissions & Policies

Eight credits of coursework must be unique to the minor and students must complete all coursework with a minimum GPA of 2.00. For policies governing all minors, see AP.5.3.4 Minors (p. 90).

Requirements

Minor Requirements

Total credits: 18

Students should be aware of the specific policies associated with this program, located on the Admissions & Policies (p. 504) tab.

Anthropology, MA

Banner Code: LA-MA-ANTH

Academic Advising

B305 Robinson Hall
Fairfax Campus

Website: soan.gmu.edu/programs/la-ma-ANTH

Anthropology, MA students learn the history of critical inquiry in the discipline of anthropology and how to approach and develop a topic of research. Students are trained in fieldwork and ethnographic methods appropriate for their goals and are guided through the research and writing methods central to completion of a thesis or project. In the process, students learn about the ethics of conducting research. Students may focus on cultural anthropology or bioarchaeology. The program prepares students for careers in government, the private sector, non-governmental organizations, museums, and numerous other fields, or to pursue a doctorate in the field.

Admissions & Policies

Admissions

Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in Admissions (p. 68). For specific information, see Application Requirements and Deadlines (http://soan.gmu.edu/programs/application/LA-MA-ANTH).

Policies

For policies governing all graduate degrees, see Graduate Policies (p. 90).

Reduction of Credit

Students with previously conferred graduate degrees may request a reduction of credit. Reductions of credit may not exceed six elective credits and no reductions will be given for required core courses. Evaluation of a previously conferred graduate degree for reduction of credit is not automatic and students must request this review in their first semester of matriculation in the master’s program.

Satisfactory Progress

According to university policy, students may be terminated if they fail to achieve satisfactory progress toward their degree. Students in the program are judged as having failed to achieve satisfactory progress toward their degree for the following reasons:

- two consecutive semesters in which academic warnings appear on their transcript
- failure to successfully complete ANTH 535 Anthropology and the Human Condition: Seminar I, ANTH 536 Anthropology and the Human Condition: Seminar II, and ANTH 650 Methods in Anthropology within 4 semesters of first enrolling as degree-seeking students in the MA in anthropology program
- failure to enroll in graduate coursework in anthropology for 2 consecutive semesters, unless there are compelling reasons for not having done so

Like all academic policies, these provisions take effect with the publication of this catalog and apply to all graduate students in the MA in anthropology regardless of their catalog year.

Requirements

Degree Requirements

Total credits: 30

Students should be aware of the specific policies associated with this program, located on the Admissions & Policies (p. 505) tab.

Total Credits 15

Students can choose to focus their electives around an emphasis in these four areas: advanced training in sociocultural anthropology; culture,
health and bioethics; museums and anthropology; or transnational and global issues. Up to six credits may be from other disciplines with the prior written approval of the graduate director.

Students may take ANTH 690 Internship as elective credit. An internship can serve as a primary field research site for the thesis.

**Thesis or Research Project**

Students should be aware of the policies governing theses. They must follow the thesis enrollment policy (p. 95) of the university and once enrolled in ANTH 799 Master’s Thesis, maintain continuous enrollment.

For information specific to the accelerated MA in anthropology, see Application Requirements and Deadlines (http://soan.gmu.edu/programs/MA-ANTH/application).

**Accelerated Option Requirements**

While undergraduate students, accelerated master’s students complete two graduate courses (chosen from ANTH 535 Anthropology and the Human Condition: Seminar I, ANTH 536 Anthropology and the Human Condition: Seminar II, and ANTH 650 Methods in Anthropology) as indicated on their Accelerated Master’s Program Application with a minimum grade of B in each course. Once admitted to the accelerated master’s pathway, students must maintain a minimum cumulative GPA of 3.25 in all course work. On completion and conferral of the undergraduate degree in the semester indicated in the application, they submit the Bachelor’s/Accelerated Master’s Transition Form and are admitted to graduate status.

As graduate students, accelerated master’s students have an advanced standing. They must meet all master’s degree requirements except for the two courses (6 credits) they completed as undergraduates. Students must begin their master’s program the semester immediately following conferral of the undergraduate degree.

**Reserve Graduate Credit**

Students may take up to 6 additional graduate credits as reserve graduate credit (chosen from ANTH 635 Regional Ethnography, ANTH 650 Methods in Anthropology, or ANTH 699 Contemporary Issues in Sociocultural Anthropology). These credits do not apply to the undergraduate degree. To apply these credits to the master’s degree, students should use the Bachelor’s/Accelerated Master’s Transition Form.

The ability to take courses, including ones not listed above, for reserve graduate credit is available to all high achieving undergraduates with the permission of the department. Permission is normally granted only to qualified Mason seniors within 15 hours of graduation. See AP 1.4.4 Graduate Course Enrollment by Undergraduates (p. 79).

**Immigration Studies Minor**

Banner Code: IMMS

**Academic Advising**

B305 Robinson Hall
Fairfax Campus
Phone: 703-993-1178
Website: soan.gmu.edu/programs/LA-MINOR-LA-IMMS

The minor combines perspectives from the humanities and social sciences to provide an interdisciplinary and comparative understanding of the immigrant experience, ethnic identity, assimilation, ethnic exclusion and conflict, and refugee situations.

**Faculty**

Cleaveland, Haines, Ihara, Leeman, Rabin, Ritchie, Seligmann, Shutika, Trencher (director)

**Admissions & Policies**

**Policies**

Eight credits of coursework must be unique to the minor and students must complete all coursework with a minimum GPA of 2.00. For policies governing all minors, see AP 5.3.4 Minors (p. 90).

**Requirements**

**Minor Requirements**

Total credits: 15

Students should be aware of the specific policies associated with this program, located on the Admissions & Policies (p. 506) tab.

Sociology, BA

Banner Code: LA-BA-SOCI

B305 Robinson Hall
Fairfax Campus

Website: soan.gmu.edu/programs/la-ba-soci

Sociology involves the systematic study of social structures, cultural patterns, and human relationships. It combines rigorous methods with theory and observation, yielding insights that challenge commonly held assumptions about the social world. Sociology also informs the practice of social and public service, aiding efforts to address important social problems. Sociology majors pursue a varied set of career paths, ranging from teaching, human service and human resource occupations, to positions in the criminal justice system, marketing, and social research. The major is excellent preparation for students considering law school or graduate training in the social and behavioral sciences.

Admissions & Policies

Policies

Students pursuing this degree must complete 34 credits of sociology courses with a minimum GPA of 2.00. No more than 6 credits of courses with unsatisfactory grades (C- or D) may be applied toward the degree.

For policies governing all undergraduate degrees, see AP 5 Undergraduate Policies (p. 87).

Requirements

Degree Requirements

Total credits: minimum 120

Students should be aware of the specific policies associated with this program, located on the Admissions & Policies (p. 507) tab.

Core Courses in the Major

The introductory course must be completed with a minimum grade of 2.00.

</tbody>
</table>

**Total Credits:** 15

---

1. SOCI 101 Introductory Sociology (Mason Core) (p. 142) does not count toward this requirement. A maximum of 6 credits of SOCI 120 Globalization and Society (Mason Core) (p. 142), SOCI 208 Introduction to Race and Ethnicity, and SOCI 215 Gender and Society can be counted toward the major.

Students are strongly encouraged to focus four of their elective courses (12 credits) in one of the concentrations which follow, chosen to suit their interests and career objectives. Students who choose a concentration will complete one remaining elective.

### Optional Concentrations in the Major

Students can focus 12 of their 15 elective credits to complete one of the following 12-credit concentrations.

- **Concentration in Childhood and Youth (CYC)** (p. 508)
- **Concentration in Deviance, Crime, and Social Control (DCSC)** (p. 508)
- **Concentration in Global Sociology (GSOC)** (p. 508)
- **Concentration in Inequality and Social Change (INSC)** (p. 509)

Students who graduate with honors in sociology may apply 3 credits of honors coursework to their selected concentration where appropriate and with prior written approval of the undergraduate director.

### Concentration in Childhood and Youth (CYC)

This concentration focuses on the changing social realities, experiences, and identities of children and youth as they are formed in different social and historical contexts. It emphasizes children in peer groups, youth subcultural activities, youth and children and the media, schools, families, social movements, social policy, and the welfare state. This concentration is appropriate for students interested in working directly with children and youth or in organizations serving them in a broad range of fields, such as educational counseling, teaching, policy, advocacy or clinical work, family and community services, social work, early child development, and juvenile justice.

### Concentration in Deviance, Crime, and Social Control (DCSC)

This concentration focuses on the social, legal, and political systems that underpin social control in Western societies and beyond. The emphasis is on how norms, values, and common sense regulate human action and the social forces that produce deviant behavior and societal responses to it. This concentration is appropriate for students interested in the criminal justice system and the law.

Depending on topic.

### Concentration in Global Sociology (GSOC)

This concentration focuses on global interconnectedness and its effect on the nature of societies around the world. It emphasizes new technologies and social processes, migration, transnational communities, global cities, and social movements working across state borders. This concentration is appropriate for students interested in pursuing internationally oriented careers in social change, political reform, and international development.

Total Credits 12

1 Depending on topic.

Concentration in Inequality and Social Change (INSC)
The focus is on inequalities, such as those of race, class, and sex, and on the manner in which such inequalities become structurally rooted in a society. The emphasis is on understanding the rise of the struggle for human rights, democracy, and various social movements that have sought to reverse these inequalities through protests, demonstrations, counterorganizations, and the ballot. This concentration is appropriate for students who seek careers in social justice organizations, social services, or teaching, and those who wish to participate in social and political movements.

Total Credits 12

1 Depending on topic.

Writing-Intensive Requirement
The university requires all students to complete at least one course designated "writing intensive" in their majors at the 300 level or above. Students majoring in sociology may fulfill this requirement by successfully completing SOCI 412 Contemporary Sociological Theory.

Upper Level Requirement
Students seeking a bachelor's degree must apply at least 45 credits of upper-level courses (numbered 300 or above) toward graduation requirements.

Additional Electives
Any remaining credits may be completed with elective courses to bring the degree total to 120.

College Level Requirements for the BA Degree
In addition to the Mason Core (p. 142) program, students pursuing a BA degree must complete the coursework below. Except where expressly prohibited, a course used to fulfill a college level requirement may also be used simultaneously to satisfy other requirements (Mason Core (p. 142) requirements or requirements for the major).

Philosophy or Religious Studies

Select 3 credits from the following:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>PHIL (p. 2044)</td>
<td>1</td>
<td></td>
</tr>
<tr>
<td>RELI (p. 2144)</td>
<td>1</td>
<td></td>
</tr>
</tbody>
</table>

1 Note that the following courses may not be used to fulfill this requirement:

- PHIL 323 Classical Western Political Theory
- PHIL 324 Modern Western Political Theory
- PHIL 327 Contemporary Western Political Theory
- PHIL 393 Humanities College to Career
- PHIL 460 Senior Seminar in Philosophy, Politics, and Economics

Additionally, PHIL 253 Philosophy and Literature (Mason Core) (p. 142) and RELI 235 Religion and Literature (Mason Core) (p. 142) cannot be used to fulfill both the philosophy/religious studies requirement and the Mason Core literature (p. 147) requirement.

Social and Behavioral Sciences

Select 3 credits of social and behavioral sciences from the following (additional to the Mason Core social and behavioral sciences requirement)

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>ANTH (p. 1212)</td>
<td></td>
<td></td>
</tr>
<tr>
<td>CRIM (p. 1514)</td>
<td></td>
<td></td>
</tr>
<tr>
<td>ECON (p. 1564)</td>
<td></td>
<td></td>
</tr>
<tr>
<td>GOVT (p. 1774)</td>
<td></td>
<td></td>
</tr>
<tr>

1 A course used to fulfill the Mason Core global understanding (p. 146) requirement may not be simultaneously used to satisfy this college-level requirement. A course used to fulfill this requirement may be used simultaneously to fulfill any other requirements (Mason Core requirements, college-level requirements, or requirements for the major). Additional information on waivers can be found at the Office of Undergraduate Academic Affairs (http://chssundergrad.gmu.edu).

### Mason Core

Some Mason Core (p. 142) requirements may already be fulfilled by the major requirements listed above. Students are strongly encouraged to consult their advisors to ensure they fulfill all remaining Mason Core (p. 142) requirements.

1 Most programs include the writing-intensive course designated for the major as part of the major requirements; this course is therefore not counted towards the total required for Mason Core.

2 Minimum 3 credits required.
Honors in the Major

Highly qualified students majoring in sociology may apply to graduate with honors in the major. To be eligible, students must have completed at least 75 credits, taken ENGH 302 Advanced Composition (Mason Core) (p. 142) for the social sciences, completed 21 credits of sociology, and have a minimum cumulative GPA of 3.30 and a minimum grade of B+ in sociology courses. Applicants must have completed SOCI 303 Methods and Logic of Inquiry and SOCI 311 Classical Sociological Theory with a minimum grade of B in each.

If accepted, to graduate with honors in sociology, students must complete SOCI 480 Honors Seminar in Sociology I and SOCI 481 RS: Honors Seminar in Sociology II with a minimum grade of B+ in each of these courses and have an overall GPA of 3.50 in sociology courses presented for graduation. SOCI 481 RS: Honors Seminar in Sociology II includes completion of an honors thesis, which will be presented at a sociology colloquium.

Accelerated Master's

The accelerated master's programs in the list below specify the BA in sociology as a feeder degree for their programs. It is important to note, however, that many accelerated master's programs are available for any bachelor's degree at Mason, including this one. See the full list of degrees (http://catalog.gmu.edu/programs/#filter=filter_24) with accelerated programs at George Mason.

Bachelor's Degree (selected)/Interdisciplinary Studies, Accelerated MAIS (Religious Studies Concentration)

Overview

Highly-qualified undergraduates in selected majors (see below) may apply to the accelerated master's degree in interdisciplinary studies with a concentration in religious studies. If accepted, and depending on their undergraduate major, students will be able to earn a bachelor's degree in their chosen major and a master's in interdisciplinary studies with a concentration in religious studies after satisfactory completion of 150 credits, sometimes within five years. See AP 6.7 Bachelor's/Accelerated Master's Degrees (p. 93).

Students in an accelerated degree program must fulfill all university requirements for the master's degree. For policies governing all graduate degrees, see AP 6 Graduate Policies (p. 90).

Selected Majors

- Art history (p. 394)
- Philosophy (p. 442)
- Conflict analysis and resolution (p. 936)
- Global affairs (p. 523)
- History (p. 402)
- Religious studies (p. 491)
- Russian and Eurasian studies (p. 568)
- Sociology (p. 507)
- Anthropology (p. 497)

If the student has not majored in religious studies (p. 491), it is preferred, though not required, that the student have a minor in religious studie (p. 496).

Application Requirements

Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in the Admissions (p. 68). For information specific to the accelerated MAIS, see Application Requirements and Deadlines (http://mais.gmu.edu/programs/la-mais-isin/application).

Accelerated Option Requirements

While undergraduate students, accelerated master's students complete two graduate courses as indicated on their Accelerated Master's Program Application with a minimum grade of B in each course. Once admitted to the accelerated master's pathway, students must maintain a minimum cumulative GPA of 3.25 in all coursework. Upon completion and conferral of the undergraduate degree in the semester indicated in the application, they submit the Bachelor's/Accelerated Master's Transition Form and are admitted to graduate status.

As graduate students, accelerated master's students have an advanced standing. They must meet all master's degree requirements except for the two courses (6 credits) they completed as undergraduates. Students must begin their master's program the semester immediately following conferral of the undergraduate degree.

Reserve Graduate Credit

Students may take up to 6 additional graduate credits as reserve graduate credit. These credits do not apply to the undergraduate degree. To apply these credits to the master's degree, students should use the Bachelor's/Accelerated Master's Transition Form.

Total Credits 6
The ability to take courses, including ones not listed above, for reserve graduate credit is available to all high achieving undergraduates with the permission of the department. Permission is normally granted only to qualified Mason seniors within 15 hours of graduation. See AP.1.4.4 Graduate Course Enrollment by Undergraduates (p. 79).

**Bachelor's Degree (selected)/Interdisciplinary Studies, Accelerated MAIS (Social Justice and Human Rights Concentration)**

**Overview**

Highly-qualified undergraduates in select majors (listed below) may apply to the accelerated master's degree in interdisciplinary studies with a concentration in social justice and human rights (p. 542). If accepted, and depending on their undergraduate major, students will be able to earn an undergraduate degree in their chosen major and a master’s in interdisciplinary studies with a concentration in social justice and human rights after satisfactory completion of 150 credits, sometimes within five years.

For more detailed information, see AP.6.7 Bachelor’s/Accelerated Master’s Degrees (p. 93). For policies governing all graduate degrees, see AP.6 Graduate Policies (p. 90).

**Selected Majors**

Anthropology (p. 497), Environmental and Sustainability Studies (p. 576), Sociology (p. 507), English (p. 370), History (p. 394), Philosophy (p. 442), Conflict Analysis and Resolution (p. 938), Psychology (p. 461), Government and International Politics (p. 972), Integrative Studies (p. 593), and Communication (p. 314).

**Application Requirements**

Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in Graduate Admissions (p. 68). For information specific to the accelerated MAIS, see Application Requirements and Deadlines (http://mais.gmu.edu/programs/la-mais-isin/application) on the departmental web site.

**Accelerated Option Requirements**

While undergraduate students, accelerated master’s students complete INTS 540 Contemporary Issues in Social Justice Human Rights and one course chosen from the list of electives for the MAIS concentration in social justice and human rights as indicated on their Accelerated Master’s Program Application with a minimum grade of B in each course. Once admitted to the accelerated master’s pathway, students must maintain a minimum cumulative GPA of 3.25 in all course work. Upon completion and conferral of the undergraduate degree in the semester indicated in the application, they submit the Bachelor’s/Accelerated Master’s Transition Form and are admitted to graduate status.

As graduate students, accelerated master’s students have an advanced standing. They must meet all master’s degree requirements except for the two courses (6 credits) they completed as undergraduates. Students must begin their master’s program the semester immediately following conferral of the undergraduate degree.

**Reserve Graduate Credit**

Students may take up to 6 additional graduate credits as reserve graduate credit (chosen from the list of electives for the MAIS concentration in social justice and human rights). These credits do not apply to the undergraduate degree. The ability to take courses for reserve graduate credit is available to all high achieving undergraduates with the permission of the program. Permission to take a graduate course for reserve graduate credit is normally granted only to Mason seniors within 15 hours of graduation. ### Sociology Minor

**Banner Code:** SOCI

**Academic Advising**

B305 Robinson Hall
Fairfax Campus

Website: soan.gmu.edu/programs/la-minor-soan-soci

A minor in sociology is an excellent complement for students intending careers in health-related fields, the non-profit sector, government, higher education, human resource management, city and regional planning, or public policy.

#### Admissions & Policies

**Policies**

Eight credits of coursework must be unique to the minor and students must complete all coursework with a minimum GPA of 2.00. For policies governing all minors, see AP.5.3.4 Minors (p. 90).

**Requirements**

**Minor Requirements**

Total credits: 18

Students should be aware of the specific policies associated with this program, located on the Admissions & Policies (p. 514) tab.
Core Courses

Students must complete each of these courses with a minimum grade of 2.00.

Sociology, MA

Banner Code: LA-MA-SOCI

Academic Advising

B305 Robinson Hall
Fairfax Campus

Website: soan.gmu.edu/programs/la-ma-soci

Students pursing an master of arts in sociology may choose a specialization in either institutions and inequalities, or the sociology of globalization. Under the larger framework of these specializations, students may pursue studies in a wide range of areas of sociological inquiry. Faculty in the program specialize in culture (including music, art, new media, and consumption); family, youth and aging; gender; globalization; immigration and migration; political economy, development and economic sociology; political sociology and social movements; race/ethnicity; religion; sociological theory; and urban sociology. The program is strongly connected to nonprofit and community groups, providing ample opportunity for research, internships, and employment.

Admissions & Policies

Application Requirements

Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in Graduate Admissions (p. 68). ### Thesis or MA Capstone Paper

**Thesis**

A master’s thesis demonstrates the student’s capacity to carry out independent research. The thesis consists of a substantial sociological research or theoretical project that will contribute to the advancement of knowledge in sociology.

Students must follow the thesis enrollment policy of the university and once enrolled in SOCI 799 Thesis, maintain continuous enrollment as specified in AP.6.9.3 Master’s Thesis (p. 95).

<table>

### Accelerated Master’s

#### Sociology, BA/Sociology, Accelerated MA

Overview

Highly-qualified Mason sociology majors may apply to the accelerated master’s degree program. If accepted, students will be able to earn both a BA and an MA in sociology following satisfactory completion of 147 credits, sometimes within five years. See AP.6.7 Bachelor’s/Accelerated Master’s Degrees (p. 93).

Students in an accelerated degree program must fulfill all university requirements for the master’s degree. For policies governing all graduate degrees, see AP.6 Graduate Policies (p. 90).

**Application Requirements**

Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in Graduate Admissions (p. 68). For information specific to the accelerated MA in sociology, see Application Requirements and Deadlines (http://soan.gmu.edu/programs/LA-MA-ACEL-SOCI/application).

**Accelerated Option Requirements**

While undergraduate students, accelerated master’s students complete two graduate SOCI courses at the 500 and 600 level (chosen in consultation with the graduate program director and indicated on their Accelerated Master’s Program Application) with a minimum grade of B in each course. Once admitted to the accelerated master’s pathway, students must maintain a minimum cumulative GPA of 3.25 in all coursework. On completion and conferral of the undergraduate degree in the semester indicated in the application, they submit the Bachelor’s/Accelerated Master’s Transition Form and are admitted to graduate status.

As graduate students, accelerated master’s students have an advanced standing. They must meet all master’s degree requirements except for the two courses (6 credits) they completed as undergraduates. Students must begin their master’s program the semester immediately following conferral of the undergraduate degree.

**Reserve Graduate Credit**

Students may take up to 6 additional graduate credits of SOCI (p. 2167) courses as reserve graduate credit. These credits do not apply to the undergraduate degree. To apply these credits to the master’s degree, students should use the Bachelor’s/Accelerated Master’s Transition Form.

The ability to take courses, including ones not listed above, for reserve graduate credit is available to all high achieving undergraduates with the permission of the department. Permission is normally granted only to qualified Mason seniors within 15 hours of graduation. See AP.1.4.4 Graduate Course Enrollment by Undergraduates (p. 79).
Sociology, PhD
Banner Code: LA-PHD-SOCI

Academic Advising
B305 Robinson Hall
Fairfax Campus
Website: soan.gmu.edu/programs/la-phd-soci

The sociology doctoral degree provides rigorous training in public and applied social research, including skills in research design, data analysis, and substantive areas that are pertinent to various sectors in the Washington, D.C. area. Graduates have the theoretical, analytical, and professional skills that prepare them for academic positions in teaching or research. They are also well-qualified for nonacademic positions in the many settings that rely on the expertise of sociologists including human service agencies, marketing research firms, educational systems, nonprofit foundations, and law enforcement agencies.

Admissions & Policies

Admissions
Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in Graduate Admissions (p. 68). For specific information, see Application Requirements and Deadlines (http://soan.gmu.edu/programs/application/LA-PHD-SOCI) on the departmental web site.

Policies
Reduction of Credit
Students who enter the program with a master's degree may be allowed a reduction of credit up to 30 credits subject to the approval of the graduate director and the dean.

Requirements

Degree Requirements
Total credits: 72

Students should be aware of the specific policies associated with this program, located on the Admissions & Policies (p. 517) tab.

Following completion of all required course work and passing a candidacy exam, students are advanced to candidacy by the dean and complete a dissertation, an original and independent research project.

Three Courses in a Specialization

Students specialize in either institutions and inequalities or sociology of globalization. Depending on the topic, special topics courses SOCI 633 Special Topics in Sociology and SOCI 833 Special Topics in Sociology (or others) may be applied to the specialization with prior written approval of the director. Up to two courses may be from outside sociology, chosen in consultation with (and with approval of) the student’s advisor or the graduate director.

Total Credits 12

Electives may include up to two courses from outside sociology, chosen in consultation with and approval of the graduate director.

Dissertation

Once enrolled in SOCI 999 Doctoral Dissertation, students must maintain continuous registration each semester (excluding summers) until the dissertation is submitted to and accepted by the University Libraries. Once enrolled in SOCI 999 Doctoral Dissertation, students must follow the university’s continuous registration policy as specified in AP6.10.6 Dissertation Research (p. 98). Students who defend in the summer must be registered for at least 1 credit of SOCI 999 Doctoral Dissertation.

Students complete a minimum of 3 credits of SOCI 998 Doctoral Dissertation Proposal and 3 credits of SOCI 999 Doctoral Dissertation. They may apply a maximum of 12 dissertation credits (SOCI 998 Doctoral Dissertation Proposal and SOCI 999 Doctoral Dissertation combined) to the degree. Because of the continuous registration policy, students may be required to register for additional credits of SOCI 999 Doctoral Dissertation. Because students cannot register for credits of SOCI 999 Doctoral Dissertation until they have advanced to PhD candidacy, they may choose (but are not required) to register for additional credits of SOCI 998 Doctoral Dissertation Proposal.

African and African American Studies Program

Enterprise Hall 332
Fairfax Campus

Phone: 703-993-4414
Website: aaas.gmu.edu

The African and African American Studies Program offers an interdisciplinary minor open to students in all majors.

Students who pursue this minor examine the cultural, historical, economic, and political dimensions of people of African descent in America, the Caribbean, Africa, and throughout the Diaspora. Students learn theories and methodologies that are used to examine the complex dynamics of race, class, gender, and ethnicity in America. Through the coursework for this program, students develop critical and analytical approaches to societal issues because they are addressed through a variety of academic disciplines.

The African and African American Studies Program offers an interdisciplinary minor open to students in all majors.

Students who pursue this minor examine the cultural, historical, economic, and political dimensions of people of African descent in America, the Caribbean, Africa, and throughout the Diaspora. Students learn theories and methodologies that are used to examine the complex dynamics of race, class, gender, and ethnicity in America. Through the coursework for this program, students develop critical and analytical approaches to societal issues because they are addressed through a variety of academic disciplines.

Students are encouraged to do an internship as part of the minor to further enhance their education and provide them with valuable preparation for the workforce.

African American Studies Research and Resource Center

The goal of the African American Studies Research and Resource Center (Paul Robeson Room) is to facilitate new ways for George Mason University students to learn about the African Diaspora. As part of their academic and community involvements, students often need to address
issues related to African and African American Studies. The center offers them opportunities for hands-on experience with African and African American life. It has been instrumental in assisting students, faculty, staff, and the community in finding resources to accomplish this goal.

The center sponsors a lecture series and a scholar-in-residence program and offers research and resources support for the Mason community.

Cultural Studies Program

333 Enterprise Hall
Fairfax Campus
Phone: 703-993-2851
The Cultural Studies Program is distinctive in several respects. While similar programs at other universities are based in a department, the program at Mason has a truly interdisciplinary foundation, drawing on faculty members from 14 different departments across the university. The program explicitly links the social sciences and the humanities by combining their methods of interpretation to explore the production, distribution, and consumption of cultural objects in their social contexts. With particular focus on theory and method in crafting this linkage, the program addresses contemporary issues of nationality, class, race, and gender and opens the scope of scholarly inquiry to all forms of culture, past and present.

Undergraduate Programs
Cultural studies does not have an undergraduate program, but supports the interdisciplinary undergraduate program in global affairs as well as a special topics course in cultural studies. CULT 320 Globalization and Culture is a core requirement for students majoring in global affairs. CULT 390 Topics in Cultural Studies is a course whose content will change from offering to offering and may be of special interest to global affairs majors.

Graduate Programs
The doctoral program in cultural studies trains students for scholarship and teaching. The core curriculum includes an introduction to cultural studies and a methods course, as well as courses on political economy, gender and sexuality, critical race studies, science and technology, social institutions, and visual and performance culture.

All students develop field specializations in two areas of cultural studies. The particular strengths of the program are visual culture, media, and new media studies; political economy and globalization; and gender and sexuality studies.

Related Master’s Degrees
Applicants to the doctoral degree in cultural studies must already hold a master’s degree. Students interested in pursuing the PhD in cultural studies at Mason who do not meet this requirement might wish to consider one of the related master’s degrees at Mason (anthropology, English, history, foreign languages, philosophy, and sociology). The required master’s degree may be taken from any institution of the student’s choice.

Funding
The program offers teaching assistantships and fellowships, which are awarded on a competitive basis. Other sources of funding such as grants, loans, and employment on campus are also available. Students awarded assistantships must register for a minimum of six credits a semester and show satisfactory progress toward their degree.

• Cultural Studies, PhD

Cultural Studies, PhD
Banner Code: LA-PHD-CULT
Academic Advising
320 Enterprise Hall
Fairfax Campus
Email: cultural@gmu.edu
Website: culturalstudies.gmu.edu/programs/la-phd-cult

The PhD in Cultural Studies combines theory and method with practice and concrete case studies. Students’ research projects are individualized, as should be the case when research is not confined to the objects and methods of a single discipline. The program’s emphasis is in the development of intellectual mastery and professional competence, while training students for scholarship and teaching. Most graduates go on to careers as university professors. Others pursue careers in cultural advocacy, museum work, and related areas.

Admissions & Policies
Admissions
Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in Graduate Admissions (p. 68). Applicants must already have earned a master’s degree in a relevant field. For further information specific to the PhD in cultural studies, see Application Requirements and Deadlines (https://culturalstudies.gmu.edu/programs/la-phd-cult/application).

Policies
For policies governing all graduate degrees, see Graduate Policies (p. 90).

Reduction of Credit
Students must have a master’s degree before being admitted to the PhD. Most students receive a reduction of study of 30 credits based on their previous master’s degree.

Academic Performance Standards
Students are required to maintain a minimum cumulative GPA of 3.33 for all coursework, with no unsatisfactory grades. Students who fail to meet this standard at any point will be given a warning and one semester to raise their GPA to the 3.33 minimum. Students who fail to meet this minimum standard for two consecutive or non-consecutive semesters will be terminated from the program.

1 Students must take CULT 808 Student/Faculty Colloquium in Cultural Studies a minimum of 3 times

Field Requirements

Under the guidance of faculty advisory committees, students define two fields that point topically and theoretically toward teaching interests, dissertation research, and related forms of professional development. If doctoral level coursework is not available in a given area, students may take one independent study (CULT 870 Independent Study) to support the development of the field.

<table>

<td></td>
</tr>
</tbody>
</table>

Students choose the specific course from program or departmental graduate offerings (600 level or above) under the guidance of their faculty advisory committee.

A course chosen to fulfill the credits for a field requirement, if relevant, may be used to meet the methodology requirement with permission of the faculty advisory committee. Students who do not take a relevant and approved methodology course in partial fulfillment of a field requirement need to take a methodology course (3 credits) to fulfill this requirement. They will have a degree total of 81 credits.

Proficiency in a Foreign Language

Students are required to demonstrate proficiency in at least one foreign language before being permitted to defend the doctoral dissertation proposal.

Electives

<table>
<thead>
<tr>
<th>Code</th>

</tr>
</tbody>
</table>

Advancement to Candidacy

To advance to candidacy, students must successfully complete all course work required on their approved program of study and demonstrate proficiency in a foreign language. Students must also successfully complete two written field statements and pass an oral comprehensive exam based on them.

Dissertation

Once enrolled in CULT 998 Doctoral Dissertation Proposal, students in this degree program must maintain continuous registration in CULT 998 Doctoral Dissertation Proposal or CULT 999 Doctoral Dissertation each semester (excluding summers) until the dissertation is submitted to and accepted by the University Libraries. Once enrolled in CULT 999 Doctoral Dissertation, students must follow the university’s continuous registration policy. Students who defend in the summer must be registered for at least 1 credit of CULT 999 Doctoral Dissertation.

Students must complete a minimum of 3 credits of CULT 999 Doctoral Dissertation. They may apply a maximum of 12 dissertation credits (CULT 998 Doctoral Dissertation Proposal and CULT 999 Doctoral Dissertation combined) to the degree.
Global Affairs Program

Lisa Breglia, Director

Phone: 703-993-9185
Website: globalaffairs.gmu.edu

Undergraduate Program
Global Affairs is an interdisciplinary major that introduces students to the processes of globalization that affect all societies. Students gain a sophisticated understanding of complex issues such as terrorism, refugee crises, global inequality, and health and environmental challenges. Core courses in the major provide a knowledge foundation of the political, economic, cultural, and environmental processes in our global and globalizing world. The choice of a thematic or regional concentration helps students tailor the degree to their particular interests and career goals. Students in this program are encouraged to participate in study abroad opportunities and internships. They can complement their major with a second major or a minor.

Global Affairs with a Second Major or Minor
Students can complement their major in global affairs with a second major. Students interested in this option are encouraged to discuss their plans with advisors in both majors. See the section AP.5.3.7 Credit for More than One Undergraduate Major in Undergraduate Policies (p. 90).

Students majoring in global affairs are encouraged to complement their major with one of the many minors offered by the college.

Minor
The undergraduate program in global affairs offers a minor in global affairs, which is available to students in any major in the university except those majoring in global affairs.

Graduate Program
The master’s degree in global affairs is an interdisciplinary program that offers students the opportunity to engage in advanced study of a broad range of international global issues.

Bachelor’s/Accelerated Master’s Program
Highly qualified undergraduates in any major are invited to apply to the accelerated master’s degree program in global affairs (p. 539). If accepted, students will be able to earn an undergraduate degree in their chosen major and a graduate degree in global affairs after satisfactory completion of 144 credits, generally within five years.

Website: globalaffairs.gmu.edu/programs/la-minor-la-apns

This interdisciplinary minor is for students whose interests focus on the humanities and social sciences and Asia’s role in global systems and the cultural mosaic of human experience.

Asia is the birthplace of many great religious and cultural traditions. It is a region in rapid and profound transformation. With half of the world’s population and half of its land mass, Asia is destined to play an increasingly important role in the global economy and world politics. This minor will give students a better understanding of an important region of the world, broaden their perspective, and provide an edge in seeking jobs in various government agencies, international organizations, private businesses, law firms, and non-profit organizations that deal with Asia. It prepares students for graduate studies in the humanities or social sciences. This minor complements many majors including history, anthropology, communication, economics, and government and politics.

Faculty
Chang, Cuong, DeCaroli, Hinton, H. Nguyen, Lin, Paden, Platt, Ro, Son (director), Wan, Zhang

Admissions & Policies

Policies
Eight credits of coursework must be unique to the minor and nine of the 18 credits required must be at the 300 and 400 level. Three credits of Chinese, Korean, or Japanese at the intermediate level (200-level) or above may be applied to the minor.

For policies governing all minors, see AP.5.3.4 Minors (p. 90).
Requirements

Minor Requirements

Total credits: 18

Students should be aware of the specific policies associated with this program, located on the Admissions & Policies tab.

It is recommended that students interested in this minor take language courses in Chinese (p. 1380), Korean (p. 1893), or Japanese (p. 1887).

Global affairs is an interdisciplinary major that introduces students to the processes of globalization that affect all societies. Students gain a sophisticated understanding of complex issues such as terrorism, refugee crises, global inequality, and health and environmental challenges. Core courses in the major provide a knowledge foundation of the political, economic, cultural, and environmental processes in our global and globalizing world. The choice of a thematic or regional concentration helps students tailor the degree to their particular interests and career goals. Students in this program are encouraged to participate in study abroad opportunities and internships. They can complement their major with a second major or a minor.

This is a Green Leaf program (p. 107).

Admissions & Policies

Policies

Students pursuing this degree must complete 36-39 credits within the major, with a minimum cumulative GPA of 2.00. Students completing the Smithsonian-Mason semester program will have a total of 40-43 credits. Students must have a minimum grade of C in each of the core courses and a minimum grade of C- in each of the courses used to fulfill the concentration and the language requirement for global affairs majors. Students who major in global affairs may not also earn the minor in global systems.

Global affairs majors may fulfill the Mason Core Capstone requirement by successfully completing GLOA 400.

For policies governing all undergraduate degrees, see AP 5 Undergraduate Policies (p. 87).

Requirements

Language Study Beyond Intermediate Proficiency

To fulfill this requirement, students can continue the study of one language beyond the intermediate proficiency level (required for all BA degrees in the college) or choose to study other languages. After a student has demonstrated intermediate proficiency in one language, the remainder of the requirement may be fulfilled by taking any courses taught in a foreign language, at any level. Students are required to complete:

<table>

Total Credits 6-9

Concentrations in the Major

Students select one concentration and complete the requirements therein. Courses applied to a global affairs concentration must come from at least two different departments. Concentration courses must be unique to the concentration: they cannot be simultaneously used to fulfill any Mason Core (p. 142) or college requirement for the bachelor’s degree. They cannot be applied to any other major, minor, concentration, or certificate.

In addition to the courses listed with each concentration, other relevant courses, including special topics courses, study abroad, and internships (maximum 3 credits), may be applied to a concentration with prior written approval from the director.

Available Concentrations

- Concentration in the Environment (EVT) (p. 524)
- Concentration in Global Economy and Management (GEM) (p. 525)
- Concentration in Global Governance (GLGV) (p. 525)
- Concentration in Global Inequalities and Responses (GIR) (p. 526)
- Concentration in Human Security (HMSC) (p. 526)
- Concentration in International Development (IDEV) (p. 526)
- Concentration in Media, Communication, and Culture (MCC) (p. 527)
- Concentration in Africa (AFR) (p. 527)
- Concentration in Asia (ASA) (p. 527)
- Concentration in Europe (EU) (p. 528)
- Concentration in Latin America (LA) (p. 528)
- Concentration in Middle East and North Africa (MNA) (p. 529)
- Concentration in North America (NA) (p. 529)
- Concentration in Russia and Central Asia (RCA) (p. 530)
- Individualized Concentration (IND) (p. 530)

Concentration in the Environment (EVT)
Students may complete this concentration through 12 credits of regular coursework or through the Smithsonian-Mason Semester Program (15-16 credits).

Smithsonian-Mason Semester Program
Students complete 16 credits offered through the Mason Center for Conservation Studies in cooperation with the Smithsonian National Zoo Smithsonian Conservation Biology Institute. Students may choose to
focus their study on "Conservation, Biodiversity and Society", "Wildlife Ecology and Conservation", or "Endangered Species Conservation". Students take the courses in the selected focus area together in one semester, living on site at the institute in Front Royal, VA. Students who apply this coursework to the concentration cannot also apply it to the minor in Conservation Studies.

Concentration in Global Governance (GLGV)

In this concentration students explore how national governments, international organizations, and non-governmental organizations interact to identify, understand, and address global issues. Coursework covers such topics as transnational challenges, theories of international relations, global institutions, international law and ethics, international security, and conflict. Students are expected to garner theoretical and practical understanding of the ways in which national and transnational actors approach global problems.

Concentration in Global Inequalities and Responses (GIR)
This concentration addresses global social issues and the steps actors such as non-profits, social movements, and international organizations take to address these issues. Courses cover human rights, refugee crises, gender violence, racial discrimination, and economic inequality from both historical and contemporary perspectives and in different parts of the world. Students are expected to acquire the skills to analyze complex social problems and to be able to formulate effective strategies to address these.

Concentration in Human Security (HMSC)
This concentration is designed to conceptualize security beyond the boundaries of national security and to promote a more comprehensive understanding of “human security” in its multiple facets, including: food and health (famine and infectious disease), environmental security (natural disasters and climate change), and economic security (development). Coursework addresses these and other themes and draws on government, sociology, criminology, environmental science and policy, and other fields. Students are expected to garner an understanding of the sources of insecurity in today’s world.

**Concentration in Media, Communication, and Culture (MCC)**

In this concentration, students examine historic trends and recent changes in media and communication technologies as well as their cultural contexts. Coursework includes critical analysis of media content, comparison of global media infrastructures and systems of political communication, discussion of the foundations of intercultural communication, and more. Students are expected to gain an understanding of the role of media and communication in shaping and responding to global issues of concern.

**Concentration in Africa (AFR)**

This concentration focuses on the societies of Africa, their history, culture, economics, and politics, including the pre-colonial, colonial, and post-colonial experiences. Course options include African diaspora experiences. Upon completion of this concentration, students will have an in-depth understanding of Africa as an international actor, African contributions (past and present) to global society, the political and economic challenges facing the continent today, and African solutions to problems such as civil wars and inequality.

**Concentration in Asia (ASA)**

This concentration emphasizes Asia’s increasingly significant role in contemporary global issues as well as its historical contexts. The courses in this concentration cover the economic, social, and political issues that confront the Asia-Pacific region (that is, East and Southeast Asian countries). Students interested in anthropology, history, art history, government, and religious studies should consider this concentration.

### Concentration in Europe (EU)

This concentration is designed to equip students with a deep and broad understanding of politics, history, culture, religion, and the arts in Europe as well as Europe’s lasting legacies across the globe. Coursework includes broad surveys on government, geography, literature, and economics as well as special topics courses on the Renaissance, World Wars I and II, and nationalism in Eastern Europe. Upon completion of this concentration, students will have the ability to think critically about how historical processes and current events in Europe not only impact Europeans, but also the global community at large.

### Concentration in Latin America (LA)

This concentration is designed to provide students with an overview of Latin America and its diaspora. Course options include broad surveys of Latin American history, art, literature, music, culture, and politics, as well as courses that provide in-depth exploration of topics such as colonialism, economic development, political movements, race and ethnicity, migration, and aesthetic trends. Upon completion of this concentration, students will have an in-depth understanding of Latin America as an international actor, Latin American contributions (past and present) to global society, and the political and economic challenges faced by the region.

Total Credits 12

Concentration in Middle East and North Africa (MNA)
This concentration provides students with a contemporary and historical perspective on the politics, economics, and religious diversity of the Middle East and North Africa. Coursework includes broad surveys as well as courses on specific topics such as the Arab-Israeli conflict, francophone literature from North Africa, politics and Islam, and art and archeology of the ancient Near East. Upon completion of this concentration, students are expected to have an in-depth understanding of the current state of the Middle East and North Africa and how this state has developed historically.

Concentration in North America (NA)
In this concentration, students explore the multifaceted development of the United States and its relationship with its North American neighbors. Coursework includes historical examinations of pre-American culture, as well as in-depth surveys of political, economic, cultural, and artistic developments in United States. Upon completion of this concentration, students will have the ability to critically assess how the US has influenced and been influenced by European and non-European societies and traditions, knowledge of the development of American government and its consequences within and beyond North America, and an appreciation of the role of arts and literature in American culture.

Concentration in Russia and Central Asia (RCA)
This concentration provides students contemporary and historical perspectives on the political, economic, and cultural climates and trends in Russia and Central Asia. Upon completion of this concentration, students will not only have the skills to critically assess the impacts of Soviet-era legacies on newly independent political systems, economies in transition, and re-emerging cultural traditions, but also knowledge of pre-Soviet sociocultural and political environments in Russia and Central Asia.

Total Credits  12

Individualized Concentration (IND)
Students who wish to design their own concentration must submit a one-page proposal and create a curriculum plan to be approved by the director.

Writing-Intensive Requirement
The university requires all students to complete at least one course designated "writing intensive" in their majors at the 300 level or above. Students majoring in global affairs may fulfill this requirement by successfully completing EVPP 337 Environmental Policy Making in Developing Countries.

Upper Level Requirement
Students seeking a bachelor's degree must apply at least 45 credits of upper-level courses (numbered 300 or above) toward graduation requirements.

Additional Electives
Any remaining credits may be completed with elective courses to bring the degree total to 120.

College Level Requirements in the BA Degree
In addition to the Mason Core (p. 142) program, students pursuing a BA degree must complete the coursework below. Except where expressly prohibited, a course used to fulfill a college level requirement may also be used simultaneously to satisfy other requirements (Mason Core (p. 142) requirements or requirements for the major).

Philosophy or Religious Studies
Code Title Credits

</tbody>
</table>

Note that the following courses may not be used to fulfill this requirement:
- PHIL 323 Classical Western Political Theory
- PHIL 324 Modern Western Political Theory
- PHIL 327 Contemporary Western Political Theory
- PHIL 393 Humanities College to Career
- PHIL 460 Senior Seminar in Philosophy, Politics, and Economics

Additionally, PHIL 253 Philosophy and Literature (Mason Core) (p. 142) and RELI 235 Religion and Literature (Mason Core) (p. 142) cannot be used to fulfill both the philosophy/religious studies requirement and the Mason Core literature (p. 147) requirement.

Social and Behavioral Sciences

Honors
Honors in the Major
Highly qualified students may pursue advanced work leading to graduation with honors in the major. Global affairs majors who have completed 75 credits with an overall GPA of 3.50 and a GPA of 3.50 in courses for the major are eligible to apply to graduate with honors.

Students pursuing honors in the major must complete the two-course honors sequence, GLOA 491 Honors Seminar in Global Affairs and GLOA 492 Honors Research Project in Global Affairs, with a minimum GPA of 3.50 in the sequence. Not all applicants who meet the minimum requirements are guaranteed acceptance.

Accelerated Master's
The accelerated master’s programs listed below specify the BA in global affairs as a feeder degree for their programs. It is important to note, however, that many accelerated master’s programs are available for any bachelor’s degree at Mason, including this one. See the full list of degrees (http://catalog.gmu.edu/programs/#filter=filter_24) with accelerated programs at George Mason. In addition, as a student with a BA in global affairs you may be particularly interested in the accelerated (p. 539) MA in global affairs (p. 539).

Bachelor's Degree (any)/Middle East and Islamic Studies, Accelerated MA
Overview
Highly-qualified undergraduates pursuing a BA may apply to the accelerated master’s degree in Middle East and Islamic studies. If accepted, and depending on their undergraduate major, students will be able to earn a bachelor’s degree in their chosen major and a master’s degree in Middle East and Islamic studies after satisfactory completion of 144 credits, sometimes within five years. See AP.6.7 Bachelor’s/ Accelerated Master’s Degrees (p. 93).

Students in an accelerated degree program must fulfill all university requirements for the master’s degree. For policies governing all graduate degrees, see AP.6 Graduate Policies (p. 90).

Application Requirements
Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in Graduate Admissions (p. 68). For information specific to the accelerated MA in Middle East and Islamic studies, see Application Requirements and Deadlines (http://meis.gmu.edu/programs/la-ma-acel-ma).

Accelerated Option Requirements
While undergraduate students, accelerated master’s students complete two graduate courses as indicated on their Accelerated Master’s Program Application with a minimum grade of B in each course. Once admitted to the accelerated master’s pathway, students must maintain a minimum cumulative GPA of 3.25 in all course work. Upon completion and conferral of the undergraduate degree in the semester indicated in the application, they submit the Bachelor’s/Accelerated Master’s Transition Form and are admitted to graduate status.

Total Credits 6

As graduate students, accelerated master’s students have an advanced standing. They must meet all master’s degree requirements except for the two courses (6 credits) they completed as undergraduates. Students must begin their master’s program the semester immediately following conferral of the undergraduate degree.

Reserve Graduate Credit
Students may take up to 6 additional graduate credits as reserve graduate credit. These credits do not apply to the undergraduate degree. To apply these credits to the master’s degree, students should use the Bachelor’s/Accelerated Master’s Transition Form.

Total Credits 6
The ability to take courses, including ones not listed above, for reserve graduate credit is available to all high achieving undergraduates with the permission of the department. Permission is normally granted only to qualified Mason seniors within 15 hours of graduation. Permission is normally granted only to qualified Mason seniors within 15 hours of graduation. See AP.1.4.4 Graduate Course Enrollment by Undergraduates (p. 79).

**Bachelor’s Degree (selected)/Interdisciplinary Studies, Accelerated MAIS (Religious Studies Concentration)**

**Overview**
Highly-qualified undergraduates in selected majors (see below) may apply to the accelerated master’s degree in interdisciplinary studies with a concentration in religious studies. If accepted, and depending on their undergraduate major, students will be able to earn a bachelor’s degree in their chosen major and a master’s in interdisciplinary studies with a concentration in religious studies after satisfactory completion of 150 credits, sometimes within five years. See AP.6.7 Bachelor’s/Accelerated Master’s Degrees (p. 93).

Students in an accelerated degree program must fulfill all university requirements for the master’s degree. For policies governing all graduate degrees, see AP.6 Graduate Policies (p. 90).

**Selected Majors**
- Art history (p. 394)
- Philosophy (p. 442)
- Conflict analysis and resolution (p. 936)
- Global affairs (p. 523)
- History (p. 402)
- Religious studies (p. 491)
- Russian and Eurasian studies (p. 568)
- Sociology (p. 507)
- Anthropology (p. 497)

If the student has not majored in religious studies (p. 491), it is preferred, though not required, that the student have a minor in religious studies (p. 496).

**Application Requirements**
Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in the Admissions (p. 68). For information specific to the accelerated MAIS, see Application Requirements and Deadlines (http://mais.gmu.edu/programs/la-mais-isin/application).

**Accelerated Option Requirements**
While undergraduate students, accelerated master’s students complete two graduate courses as indicated on their Accelerated Master’s Program Application with a minimum grade of B in each course. Once admitted to the accelerated master’s pathway, students must maintain a minimum cumulative GPA of 3.25 in all coursework. Upon completion and conferral of the undergraduate degree in the semester indicated in the application, they submit the Bachelor’s/Accelerated Master’s Transition Form and are admitted to graduate status.

Permission is normally granted only to qualified Mason seniors within 15 hours of graduation. See AP.1.4.4 Graduate Course Enrollment by Undergraduates (p. 79).

**Bachelor’s Degree (selected)/Environmental Science and Policy, Accelerated MS**

**Overview**
This degree option allows highly qualified George Mason University students to earn an Environmental Science and Policy, MS (p. 696) in less time than if they had first graduated with an environmentally-focused Green Leaf-designated (p. 107) BA or BS degree and then applied to the MS program sequentially.
For more detailed information, see AP6.7 Bachelor's/Accelerated Master’s Degrees (p. 93). For policies governing all graduate programs, see AP6 Graduate Policies (p. 90).

### Admission Requirements

Students with an overall GPA of at least 3.20 who are pursuing any Green Leaf-designated (p. 107) major or minor may apply for provisional acceptance into this accelerated master’s program after completing two semesters of chemistry (including CHEM 211 General Chemistry I (Mason Core) (p. 142) and CHEM 212 General Chemistry II (Mason Core) (p. 142) and three semesters of biology, including a course in ecology, or the equivalent, for example:

</tbody>
</table>

By the beginning of the undergraduate's senior year, they should first submit a Graduate Application for Accelerated Master’s Program form (obtained from the Office of Academic and Student Affairs (https://cos.gmu.edu/about/contact-us)). Secondly, in their senior year accelerated master’s students must complete the two graduate courses indicated on their Accelerated Master’s Program Application with a minimum grade of 3.00 in each course. They must maintain a minimum GPA of 3.00 in all coursework and in coursework applied to their major. Upon completion and conferral of the undergraduate degree in a Green Leaf-designated (p. 107) program, in the semester indicated in the application, they must additionally submit the Bachelor’s/Accelerated Master’s Transition form (found on the Office of the University Registrar website (http://registrar.gmu.edu/forms)) and will subsequently be admitted into graduate status.

By at least the beginning of their senior year, they should seek out a faculty member in the Department of Environmental Science and Policy (p. 688) who is willing to serve as their advisor. This advisor will aid the student in choosing the appropriate graduate courses to take and help to prepare the student for graduate studies. Admission into a research-oriented master’s concentration is dependent upon securing the agreement of a faculty advisor. Faculty from a variety of departments and colleges at George Mason (called “program faculty”) can serve as master’s advisors. Potential students are encouraged to speak with the

### Global Affairs Minor

**Banner Code:** GLOA

**Academic Advising**

D215 Buchanan Hall  
Fairfax Campus  

Email: gloa@gmu.edu  
Website: globalaffairs.gmu.edu/programs/la-minor-la-gloa

This minor provides students with a global perspective that can enhance many different majors. The minor is not available to students majoring in global affairs (p. 523) or minoring in global systems (p. 971).

This is a Green Leaf Program (p. 107).
Global Affairs, MA

Banner Code: LA-MA-GLOA

Academic Advising
D215 Buchanan Hall
Fairfax Campus

Email: globalma@gmu.edu
Website: globalaffairs.gmu.edu/programs/la-ma-gloa

The Global Affairs, MA is an interdisciplinary program offering students the opportunity to engage in advanced study of a broad range of global issues. Students complete a core curriculum that provides the knowledge and skills to think and act globally. Students also pursue specializations that include relevant courses from academic departments across the university. All students in the program take part in a residency abroad, typically two weeks in duration, and complete a capstone seminar. Graduates enter the workforce or move forward in their already-established international and domestic careers in the public sector, nongovernmental organizations, and business.

This is a Green Leaf program (p. 107).

Admissions & Policies

Policies
Eight credits of coursework must be unique to the minor and students must complete all coursework with a minimum GPA of 2.00. For policies governing all minors, see AP.5.3.4 Minors (p. 90).

Requirements

Minor Requirements
Total credits: 15
This is a Green Leaf program.

Students should be aware of the specific policies associated with this program, located on the Admissions & Policies (p. 536) tab.

Admissions & Policies

Admissions
Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in Graduate Admissions (p. 68). For specific information, see Application Requirements and Deadlines (http://globalaffairs.gmu.edu/programs/application/LA-MA-GLOA) on the departmental website.

Policies
For policies governing all graduate degrees, see AP6 Graduate Policies (p. 90).

Students who wish to pursue study abroad in addition to the required core course GLOA 710 Seminar Abroad must receive prior approval and may not use more than 3 credits earned while abroad towards their specialization. Students must maintain a 3.00 cumulative grade point average with no more than two grades below B.

Requirements

Degree Requirements
Total credits: 30
This is a Green Leaf program.

Students should be aware of the specific policies associated with this program, located on the Admissions & Policies (p. 536) tab.

Specialization

Students choose to specialize in one of eight fields by completing 12 credits in that field selected from the courses listed. The specialization is developed in consultation with an advisor. Students who wish to design their own specialization must submit a one-page proposal and receive written approval from the director. Specialization courses must come from at least two academic disciplines.

### Dual Degree Options

Foreign Languages, MA and Global Affairs, MA Dual Degree

Students interested in pursuing a dual master’s program linking foreign languages or global affairs with another discipline should discuss their interest with the graduate program directors of both programs and review the university policies regarding Individualized Dual Master’s Degree Programs (p. 96).

Students approved to pursue a dual master’s program linking the foreign languages MA with a concentration in French, Spanish, or Spanish bilingual/multicultural education with the global affairs MA can share 12 credits between the two programs. Application to the second master’s program should be pursued with consultation of the directors of both programs. Admission to the second master’s program will require that the student has met the minimum prerequisites for admissions to the second program.
### Accelerated Master's

#### Bachelor's Degree (any)/Global Affairs, Accelerated MA

**Overview**

Highly qualified undergraduates in any major may apply to the accelerated master’s degree in global affairs. If accepted, and depending on their undergraduate major, students will be able to earn a bachelor’s degree in their chosen major and a master’s degree in global affairs after satisfactory completion of 144 credits, sometimes within five years.

For more detailed information, see AP 6.7 Bachelor’s/Accelerated Master’s Degrees (p. 93). For policies governing all graduate degrees, see AP 6 Graduate Policies (p. 90).

**Application Requirements**

Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in Graduate Admissions (p. 68). For specific information, see Application Requirements and Deadlines (http://globalaffairs.gmu.edu/programs/application/LA-MA-GLOA) on the departmental website.

**Accelerated Option Requirements**

While undergraduate students, accelerated master’s students complete GLOA 600 Global Competencies and either GLOA 605 Interdisciplinary Research Methods or GLOA 610 Economic Globalization and Development with a minimum grade of 3.00 in each course. Once admitted to the accelerated master’s pathway, students must maintain a minimum cumulative GPA of 3.25 in all course work. Upon completion and conferral of the undergraduate degree in the semester indicated in the application, they submit the Bachelor’s/Accelerated Master’s Transition Form and are admitted to graduate status.

As graduate students, accelerated master’s students have an advanced standing. They must meet all master’s degree requirements except for the two courses (6 credits) they completed as undergraduates. Students must begin their master’s program the semester immediately following conferral of the undergraduate degree.

**Reserve Graduate Credit**

Students may take up to 6 additional graduate credits (GLOA 605 Interdisciplinary Research Methods or GLOA 610 Economic Globalization and Development and GLOA 620 Human Systems) as reserve graduate credit. These credits do not apply to the undergraduate degree. To apply these credits to the master’s degree, students should use the Bachelor’s/Accelerated Master’s Transition Form. The ability to take courses, including ones not listed above, for reserve graduate credit is available to all high achieving undergraduates with the permission of the department. Permission is normally granted only to qualified Mason seniors within 15 hours of graduation. See AP 1.4.4 Graduate Course Enrollment by Undergraduates (p. 79).

### Higher Education Program

316 Enterprise Hall
Fairfax Campus

Phone: 703-993-2310
Website: highered.gmu.edu

The Higher Education Program prepares students for positions of leadership in teaching, research, and administration at community colleges, four-year colleges, and universities around the globe. The interdisciplinary curriculum focuses on leadership, the scholarship of teaching and learning, administration, and assessment. The program also prepares students for positions in academic and student affairs as well as in associations, government agencies, and industries whose activities relate to or impact higher education.

**MA in Higher Education and Student Development**

The program prepares students for positions in higher education administration, student development, non-profit higher education associations, and government organizations. Today’s higher education professionals are required to address both the needs of incoming traditionally aged students, as well as those of older students returning for a degree and special populations. The wide range of student backgrounds in the current complex context requires a holistic approach to college student development.

**Doctor of Philosophy in Education with Specialization in Higher Education**

The doctor of philosophy in education with a specialization in higher education is offered jointly by the Higher Education Program and the College of Education and Human Development. This doctoral program prepares students for faculty positions and positions of leadership in administration and student services through core required coursework in higher education and through a secondary concentration that can further disciplinary expertise.

See the Education, PhD (p. 196) for more information.

**Certificates**

The program offers graduate certificates in college teaching with a concentration in higher education pedagogy and in higher education administration. Students may take these as stand-alone certificates or pursue them concurrently with a graduate degree program. Part of the certificate course work may be applied to the degree subject to the approval of the director of the graduate degree program. Students must apply and be accepted to a graduate certificate program.

### Faculty

**Program Faculty**

**Core Faculty**

Lester (interim director), Schrum, Swan

**Affiliate Faculty**

Anthony, Brown Leonard, Cicchetti, Farris, Foster, Holmes, Hughes, Jorgenson, Lortenson, Lucas, Okahana, Owen, Park, Scher, Stearns

The certificate in College Teaching is designed for graduate students who are planning a career in undergraduate education. The program offers courses that enhance pedagogical skills and explore pedagogical assessment or scholarship with the use of technology in instruction.

This certificate program qualifies for Title IV Federal Financial Aid. For more information about program graduation rates, the median debt of students who completed the program, and other important information, please visit our disclosure information page (https://irr2.gmu.edu/gedt/College_Teaching/Gedt.html).

Admissions & Policies

Admissions
Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in Graduate Admissions (p. 68).

Requirements

Certificate Requirements
Total credits: 18

This certificate may be pursued on a full-or part-time basis.

Students should be aware of the specific policies associated with this program, located on the Admissions & Policies tab.

Students pursuing this graduate certificate must choose either a concentration in English pedagogy or a concentration in higher education pedagogy.

Higher Education and Student Development, MA

Banner Code: LA-MA-HESD

Academic Advising

316 Enterprise Hall
Fairfax Campus
Email: hepadmin@gmu.edu

Website: highered.gmu.edu/programs/la-ma-hesd

The program prepares students for positions in higher education administration, student development, non-profit higher education associations, and government organizations. Today’s higher education professionals are required to address both the needs of incoming traditionally aged students, as well as those of older students returning for a degree and special populations. The wide range of student backgrounds in the current complex context requires a holistic approach to college student development.

This master of arts degree in Higher Education and Student Development will prepare future higher education leaders who understand higher education in the digital age, student development, multicultural and diverse populations, program development, professionalism, and learning assessment. This multidisciplinary program offers both thesis and project capstone options and is full and part-time student friendly. Alumni hold positions in areas such as career development, academic advising, assessment, facilities management, admissions, and residence life.

Admissions & Policies

Admissions
Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in Graduate Admissions (p. 68). For specific information, see Application Requirements and Deadlines on the departmental website.

Policies
For policies governing all graduate degrees, see AP 6 Graduate Policies (p. 90).

Transfer Credit

Courses applied to the degree are subject to the following restrictions: a maximum of 6 credits may be taken through the Consortium of Universities of the Washington Metropolitan Area; a maximum of 15 credits may be transfer credits; a maximum of 6 of the transfer credits may be from other accredited institutions.

Transfer credits include credits taken before first enrolling as an admitted degree-seeking student (at another institution, in another Mason graduate program, or in Mason non-degree status) or credits taken at another institution after admission to the degree program through study abroad or study elsewhere (which requires prior written approval of the director and the dean). Additional information may be found in AP 6.5.3 Transfer of Credit (p. 92).

Total Credits 12

1 A thesis is a rigorous scholarly inquiry that requires the collection of original data and is presented in a traditional, formal, written format. It is informed by experience gained from the research apprenticeship. The guideline and deadlines for thesis submission are set by the University and administered by the University Dissertation and Thesis Service.

Portfolio Option

Students who select the portfolio option will also complete three electives (9 credits) approved by the advisor.

<table>
<thead>

</tbody>
</table>

Total Credits 12

The degree requires coursework from a home department and selected courses from other disciplines. Students complete their degrees with a project or thesis.

Concentrations

Students pursuing a master's degree program in interdisciplinary studies can choose established concentrations in these areas:

- Computational Social Science
- Energy and Sustainability
- Folklore Studies
- Higher Education
- Religious Studies
- Social Entrepreneurship
- Social Justice and Human Rights
- War and the Military in Society
- Women and Gender Studies

For a variety of reasons, traditional graduate programs are not able to meet the specific educational goals of some students. They can choose an individualized concentration. With the help of a faculty advisor, they design an individualized program of study that includes courses from several academic disciplines.

Programs

Interdisciplinary Studies, MAIS

Banner Code: LA-MAIS-ISIN

Academic Advising

408 Enterprise Hall
Fairfax Campus

Email: mais@gmu.edu
Website: mais.gmu.edu/programs/LA-MAIS-ISIN

The master of arts degree program in interdisciplinary studies (MAIS) is designed for students who seek a degree that integrates knowledge from several disciplines. It addresses the rapidly evolving demand for unique graduate study by promoting advanced scholarship that transcends traditional disciplinary boundaries. Students can pursue one of the following structured interdisciplinary concentrations and also have the opportunity to design an individualized concentration to meet the special needs of their careers.

The MAIS in Interdisciplinary Studies with a concentration in Energy and Sustainability is a Green Leaf program (p. 107).
Admissions & Policies

Admissions

Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in Graduate Admissions (p. 68). For information specific to the MA in Interdisciplinary Studies, see Application Requirements and Deadlines (http://mais.gmu.edu/programs/LA-MAIS-ISIN/application).

Applicants must show a capacity for original thought in cross-disciplinary research. There may be additional skills required of students applying to specific concentrations. Students will be admitted to the Individualized Studies concentration only if the applicant identifies a Mason Faculty member appropriate for the intended course of study who is willing to serve as the student's advisor.

Policies

For policies governing all graduate degrees, see AP6 Graduate Policies (p. 90).

Credit Restrictions

Courses applied to the degree are subject to the following restrictions:

- a maximum of 6 credits may be earned through independent study or directed readings and research courses
- a maximum of 6 credits may be taken through the Consortium of Universities of the Washington Metropolitan Area
- a maximum of 15 credits may be transfer credits
- a maximum of 6 of the transfer credits may be from other accredited institutions

Transfer credits include credits taken before first enrolling as an admitted degree-seeking student (at another institution, in another Mason graduate program, or in Mason nondegree status) or credits taken at another institution after admission to the degree program through study abroad or study elsewhere (which requires prior written approval of the director and the dean). Additional information may be found in Academic Policies (p. 77).

Requirements

Degree Requirements

Total credits: 36

This is a Green Leaf program.

Students should be aware of the specific policies associated with this program, located on the Admissions & Policies (p. 543) tab.

Students pursuing this degree must successfully complete 36 credits of graduate coursework in one of the concentrations which follow. Students must submit a curriculum worksheet that has been approved by their concentration head and the director. All students complete their work in the program with a project or thesis.

Concentration in Computational Social Science (CSS)

Computational social science (CSS) is a relatively new interdisciplinary science in which social science questions are investigated with modern computational tools. Computational social scientists investigate complex social phenomena such as economic markets, traffic control, and political systems by simulating the interactions of the many actors in such systems on computers. They hope to gain insights which will lead to better management of the behavior of the larger social systems, i.e., prevention of market crashes, smoothed traffic flow, or maintenance of political stability. The intractability of many social problems calls for the new approaches provided by computational social science.

CSS is a highly interdisciplinary field that requires teams to plan and complete projects, be they undertaken by government, industry, or non-profit entities. Project managers of such teams, overseeing all elements of project design and execution, tend to hold PhDs. The MAIS concentration will train students to be members of these project teams, able to meaningfully contribute to background research and to project design, execution, and communication.

Prior background should include a bachelor's degree in one of the social sciences, in computer science, in engineering, or in a relevant discipline, as well as undergraduate courses in these and related areas. Bachelor's degrees in other areas are also eligible, but the student may be required to take additional courses in social science, mathematics, or computer science as prerequisites to admission.

</tr>
</tbody>
</table>

Total Credits: 18

1 The required CSS courses provide an understanding of the conceptual, technical, and practical foundations of computational social science.

2 The electives provide an understanding of the technical foundations and current work in at least two subfields of computational social science.

Research Course

The research course provides students with exposure to the most current ongoing research in the field and allows them to further develop their computational research expertise.
**Evaluative**

The electives allow students to acquire a substantive specialization as well as additional training in social and computational science. Because of the broad spectrum of social science phenomena, methodologies, and student backgrounds, there is a large pool of potential courses. Electives may include any Mason master's-level course in computational social science, social science, computer science, statistics, or other quantitative methods such as data visualization, information technology, and geographic information science. Electives should be selected in conjunction with and approval of the student’s advisor and the Director of CSS Graduate Studies. If the student does not have prior coursework in multivariate statistical analysis, the electives should include at least one such course relevant for the student’s chosen specialization.

Students who elect to complete a 4-credit thesis take 9 elective credits. Students who complete a 1-credit project take 12 elective credits.

**Concentration in Energy and Sustainability (EAS)**

This concentration is designed for students interested in careers in energy and sustainability-related positions in the public, private, or non-profit sectors, including law, national and international policy, media, government, and business. As one of the University’s Green Leaf academic programs, the concentration in energy and sustainability focuses on finding ways to meet present needs for energy and material goods without compromising the ability of future generations to meet their needs. A sustainability education lies at the intersection of environmental science, engineering, economics, business, public policy, social justice, and many other areas. Energy required to fuel all of these endeavors is a crucial component of sustainability.

### Electives

Students who wish to take MAIS 798 Interdisciplinary Studies Project for their capstone research experience will take one course (3 credits) of electives from courses listed below or other relevant course chosen in consultation with an advisor. They may also fulfill this requirement with experiential learning. Students who wish to take MAIS 799 Interdisciplinary Studies Thesis will not take an elective course or pursue experiential learning credits.

Total Credits 3

When the topic involves environmental or sustainability policy.

When the topic involves environmental or sustainability issues.

Students may fulfill their elective credits with experiential learning. Experiential learning opportunities can include internships, service-learning, consulting projects, and field studies or research (including overseas). Because the intention is to develop and apply newly acquired skills, students may not use work done previously or their current employment to fulfill this requirement. All experiential learning projects must be approved by the social entrepreneurship concentration head the semester before registering for the course.

Concentration in Folklore Studies (FLKS)
This concentration explores the processes of tradition that move through multiple expressive forms, such as folktales, folk beliefs, folk medicine, folk art, folksong, and literature. A discipline based on ethnographic fieldwork, folklore offers students a chance to work in communities and collect living traditional materials that are critical to human identity and values. Interdisciplinary by nature, folklore thrives on local particularities and compelling global connections. Internships in the many Washington, D.C., metropolitan area folklore organizations are central to students’ experiences. This course of study prepares students for careers in cultural agencies, governmental organizations, teaching institutions, and advanced study in the humanities.

Students pursuing this concentration must complete at least 6 credits of courses from outside the English Department.

1 Courses may be repeated.
2 When topic is Pathways to Folklore Scholarship.
3 When topic is Field School for Cultural Documentation.

Specialization
Students choose an area of specialization which must be approved by a faculty advisor. Specialization topics include public folklore (museums, archives, arts and humanities councils, and nonprofit organizations); folklore (ethnicity and immigration); folklore and literature; folklore and the teaching of writing and literature; folklore and history; and folklore and conflict resolution. Students can also opt for open specialization, with courses chosen in consultation with advisor. Possibilities include folklore and editing, applied storytelling, folklore and mythology, folklore and art history, folklore and gender studies, and folklore and communication.

Electives
Electives require the prior written approval of a faculty advisor. Students who elect to do a 1 credit project take 6 elective credits. Students who do a 4 credit thesis take 3 elective credits.

Concentration in Religious Studies (RELI)
The concentration in religious studies is particularly relevant for students who are interested in careers in law, national and international government, print and media journalism, library sciences, archives and museums, public and social service, teaching, advanced graduate studies, and religious communities and institutions. The Washington, DC metropolitan area is rich in the presence of many major religious traditions and their places of worship.

The core courses introduce students to the study of religion as a unique and rigorous intellectual discipline. Students learn to evaluate a variety of perspectives on religion and gain a clear understanding of the dimension of the sacred in all aspects of human life including those commonly designated "secular". Students discover how religious perceptions of the sacred respond to an evolving world and relate to and influence cultures, institutions, and values.

Students also examine the effects of historical crises and the forces of change on religions including contemporary religious pluralism and inter-religious dialogue. Students gain a deeper knowledge of specific
traditions and a more profound understanding of values and worldviews from the viewpoint of cultural diversity and religious pluralism.

Concentration in Social Entrepreneurship (SOCE)

The concentration in social entrepreneurship will equip students with the subject matter expertise, strategic knowledge, technical support, and social networks needed to create, operate, develop, and accelerate startups; bring ideas to scale; and improve an existing program’s effectiveness. These future leaders will learn about sustainability, ethical leadership, strategic management, and working effectively within complex networks made up of divergent groups of stakeholders. All students will complete a capstone research project and an experiential learning requirement that deliver practical knowledge and real-world experience. This degree is suitable for students seeking careers in government, business, or the non-profit sector.

### Concentration in Social Justice and Human Rights (SJHR)

The social justice and human rights concentration is designed to cultivate a deep theoretical understanding of the social, political, cultural, historical, and economic implications of a wide array of social injustices and human rights issues. Students are engaged in the applied process of imagining and actualizing holistic and complex strategies for creating and sustaining a more equitable, just, and humane world.

**Concentration in War and the Military in Society (WMS)**

The concentration in war and the military in society equips students with skills and knowledge to evaluate, analyze, and solve problems related to the use of organized violence, including questions of national security and national strategy, international relations, defense policymaking, and domestic, fiscal, legal, and social policy surrounding the instruments of national defense. Students will engage in interdisciplinary coursework that provides a variety of methods and tools to frame and analyze these questions, using historical and contemporary case studies to better understand the dilemmas and opportunities facing policymakers and
military professionals in their efforts to think strategically about a variety of challenges.

All students will complete a capstone research project that provides an opportunity to do deep research into an historic or contemporary case. In addition, students may also complete an experiential learning requirement that combines practical knowledge and real-world experience to engage in problems connected to war and society.

**Interdisciplinary Perspectives on War and the Military in Society (27-30 Credits)**

Students take 9-10 courses from 2 or more interdisciplinary perspectives below to complement the skills and subject matter expertise they have already acquired through formal education and professional experience, or other courses to enhance their portfolio that are chosen in consultation with the concentration head. Students who do a project (1 credit) in lieu of a thesis (4 credits) for their capstone will take an additional 3-credit course.

**Historical Perspectives**

These courses draw upon conflicts from two thousand years of human experience, from ancient Rome to contemporary issues in civil-military relations. The historical perspective focuses upon the past and the way that problems related to war and society have changed over time.

Concentration in Women and Gender Studies (WGST)

The concentration in women and gender studies promotes advanced scholarship that transcends traditional boundaries. Students combine required coursework in women and gender studies with courses in a discipline of interest such as history, literature, sociology, anthropology, health, education, philosophy, social work, conflict analysis and resolution, or the arts. The program accommodates both full-time and part-time students.

Of the coursework required for this concentration as described below, at least 24 credits must be in courses related to the study of women and gender and 12 credits in courses in a field focus. All courses related to the study of women and gender must be approved by the head of the concentration in women and gender studies. Students must earn a grade of B- or higher in the core courses.

Students interested in pursuing a dual master’s program linking the MAIS degree and a master’s degree in another discipline should discuss their interest with the graduate program directors of both programs and review the university policies regarding Individualized Dual Master’s Degree Programs. Students approved to pursue dual master’s study linking the MAIS degree with a concentration in women and gender studies and the MA philosophy degree will complete WMST 630 Feminist Theories across the Disciplines/PHIL 658 Feminist Theory and 3 additional credits of WMST courses to apply to the philosophy degree as elective credit. Six credits of approved PHIL credits will apply to the MAIS degree as elective credit.

Students may take additional courses from these areas and count them toward their elective credits.

When topic is Black Psychology, Gender, Cultures and Health in the US, Race, Gender, Class, and Sport, or Policing Black Bodies.

When topic is Gender, Race, Reform 1800-1920 or Gender and Racial Ideology in Jim Crow.

When topic is Gender, Sexuality and Disability.

Electives

Students take 15-18 credits in elective courses that address the study of women and gender and that are not part of the core focus. Three of these credits must be in a WMST course from the list below.

WMST 505 Social Dynamics of Family Violence
WMST 506 Gender and Violence in Social Institutions
WMST 507 Transnational Sexualities
WMST 508 Gender, Sexuality, and Human Rights
WMST 509 Gender, Sexuality, and International Migration
WMST 550 Current Topics in Women and Gender Studies
WMST 600 Special Topics
WMST 602 Queer Theory
WMST 611 Feminist Research Practice (not required but highly recommended)
WMST 695 Internship

Total Credits 15-18

1 Students may take other WMST course chosen in consultation with the concentration head. Students may also take relevant courses from other disciplines chosen in consultation with the concentration head.

Proposal

Students take one course from each of the following areas.

WMST 610 Feminist Approaches to Social Research
WMST 640 Transnational and Global Feminisms

Total Credits 3

1 Students take one course from each of the following areas.

**Total Credits**: 1-4

### Individualized Concentration (IND)

This concentration is for students who wish to design a graduate program to meet the special needs of their careers and life plans. Students usually choose this option because traditional graduate programs do not meet their specific goals. Students, with help from their faculty advisor, design a unique program of study that includes courses from several academic departments.

Students have access to most graduate courses offered by Mason but must meet all course prerequisites. Each student must submit a curriculum worksheet approved by the student’s advisor and director during the first semester enrolled. Any subsequent amendments must have the approval of the student’s advisor and the director.

### Dual Degree Options

#### Philosophy, MA and Interdisciplinary Studies, MAIS Dual Degree

Students interested in pursuing a dual master’s program linking philosophy and another discipline should discuss their interest with the graduate program directors of both programs and review the university policies regarding Individualized Dual Master’s Degree Programs. Students approved to pursue dual master’s study linking the MA philosophy degree and the Interdisciplinary Studies, MAIS with a concentration in women and gender studies will complete WMST 630 Feminist Theories across the Disciplines/PHIL 658 Feminist Theory and 3 additional credits of WMST courses approved by the Department of Philosophy to apply to the philosophy degree as elective credit. Six credits of approved PHIL credits will apply to the MAIS degree as elective credit. Application to the second master’s program should be pursued with consultation of the directors of both programs. Admission to the second master’s program will require that the student has met the minimum prerequisites for admission to the second program. If a student lacks the minimum prerequisites and seeks to be admitted to a second master’s program, the director of the second program may identify ways in which the prerequisite can be completed prior to admission.

### Accelerated Master's

#### Bachelor's Degree (selected)/Interdisciplinary Studies, Accelerated MAIS (Religious Studies Concentration)

**Overview**

Highly-qualified undergraduates in selected majors (see below) may apply to the accelerated master’s degree in interdisciplinary studies with a concentration in religious studies. If accepted, and depending on their undergraduate major, students will be able to earn a bachelor’s degree in their chosen major and a master's in interdisciplinary studies with a concentration in religious studies after satisfactory completion of 150 credits, sometimes within five years. See AP.6.7 Bachelor's/Accelerated Master’s Degrees (p. 93).

Students in an accelerated degree program must fulfill all university requirements for the master’s degree. For policies governing all graduate degrees, see AP6 Graduate Policies (p. 90).

**Selected Majors**

- Art history (p. 394)
- Philosophy (p. 442)
- Conflict analysis and resolution (p. 936)
- Global affairs (p. 523)
- History (p. 402)
- Religious studies (p. 491)
- Russian and Eurasian studies (p. 568)
Interdisciplinary Pathways in the Study of Religion and the Natural Environment

If the student has not majored in religious studies (p. 491), it is preferred, though not required, that the student have a minor in religious studies (p. 496).

Application Requirements

Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in the Admissions (p. 68). For information specific to the accelerated MAIS, see Application Requirements and Deadlines (http://mais.gmu.edu/programs/LA-MAIS-ISIN/application).

Accelerated Option Requirements

While undergraduate students, accelerated master's students complete two graduate courses as indicated on their Accelerated Master's Program Application with a minimum grade of B in each course. Once admitted to the accelerated master’s pathway, students must maintain a minimum cumulative GPA of 3.25 in all coursework. Upon completion and conferral of the undergraduate degree in the semester indicated in the application, they submit the Bachelor’s/Accelerated Master’s Transition Form and are admitted to graduate status.

Select two from the following:

As graduate students, accelerated master’s students have an advanced standing. They must meet all master’s degree requirements except for the two courses (6 credits) they completed as undergraduates. Students must begin their master’s program the semester immediately following conferral of the undergraduate degree.

Reserve Graduate Credit

Students may take up to 6 additional graduate credits as reserve graduate credit. These credits do not apply to the undergraduate degree. To apply these credits to the master’s degree, students should use the Bachelor’s/Accelerated Master’s Transition Form.

Select 6 credits from the following:

As graduate students, accelerated master’s students have an advanced standing. They must meet all master’s degree requirements except for the two courses (6 credits) they completed as undergraduates. Students must begin their master’s program the semester immediately following conferral of the undergraduate degree.

Bachelor's Degree (any)/Interdisciplinary Studies, Accelerated MAIS (Social Entrepreneurship Concentration)

Overview

Highly-qualified undergraduates in any major may apply to the accelerated master’s degree in interdisciplinary studies. If accepted, and depending on their undergraduate major, students will be able to earn a bachelor’s degree in their chosen major and a master’s degree in interdisciplinary studies with a concentration in social entrepreneurship after satisfactory completion of 150 credits, sometimes within five years. For more detailed information, see AP.6.7 Bachelor’s/Accelerated Master’s Degrees (p. 93).

Students in an accelerated degree program must fulfill all university requirements for the master’s degree. For policies governing all graduate degrees, see AP.6 Graduate Policies (p. 90).

Application Requirements

Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in Graduate Admissions (p. 68). For information specific to this program, see Application Requirements and Deadlines (http://mais.gmu.edu/programs/LA-MAIS-ISIN/application) on the departmental website.

Accelerated Option Requirements

While undergraduate students, accelerated master’s students complete INTS 550 Social Innovation In Action and INTS 535 Leadership in a Changing Environment or one course chosen from the list of electives for the MAIS concentration in social entrepreneurship as indicated on their Accelerated Master’s Program Application, with a minimum grade of 3.00 in each course. Once admitted to the accelerated master’s pathway, students must maintain a minimum cumulative GPA of 3.25 in all coursework. Upon completion and conferral of the undergraduate degree in the semester indicated in the application, they submit the Bachelor’s/Accelerated Master’s Transition Form and are admitted to graduate status.

As graduate students, accelerated master’s students have an advanced standing. They must meet all master’s degree requirements except for the two courses (6 credits) they completed as undergraduates. Students must begin their master’s program the semester immediately following conferral of the undergraduate degree.

Recommended Majors

The accelerated MAIS in Social Entrepreneurship is appropriate for a number of undergraduate majors including but not limited to:
• Business and Sustainability
• Childhood Studies
• Community Health
• Conflict Analysis and Resolution
• Environmental and Sustainability Studies
• Global Affairs
• Government
• Integrative Studies (e.g., Social Innovation; Leadership & Organizational Development)
• Management
• Psychology
• Public Administration
• Social Work
• Sociology

Reserve Graduate Credit
Students may take up to 6 additional graduate credits as reserve graduate credit (chosen from the list of electives for the MAIS concentration in social entrepreneurship). These credits do not apply to the undergraduate degree. The ability to take courses for reserve graduate credit is available to all high achieving undergraduates with the permission of the department. Permission is normally granted only to qualified Mason seniors within 15 hours of graduation. See AP.1.4.4 Graduate Course Enrollment by Undergraduates (p. 79) for more information.

Bachelor's Degree (selected)/Interdisciplinary Studies, Accelerated MAIS (Social Justice and Human Rights Concentration)

Overview
Highly-qualified undergraduates in select majors (listed below) may apply to the accelerated master's degree in interdisciplinary studies with a concentration in social justice and human rights (p. 542). If accepted, and depending on their undergraduate major, students will be able to earn an undergraduate degree in their chosen major and a master’s in interdisciplinary studies with a concentration in social justice and human rights after satisfactory completion of 150 credits, sometimes within five years.

For more detailed information, see AP6.7 Bachelor’s/Accelerated Master’s Degrees (p. 93). For policies governing all graduate degrees, see AP6 Graduate Policies (p. 90).

Selected Majors
Anthropology (p. 497), Environmental and Sustainability Studies (p. 576), Sociology (p. 507), English (p. 370), History (p. 394), Philosophy (p. 442), Conflict Analysis and Resolution (p. 938), Psychology (p. 461), Government and International Politics (p. 972), Integrative Studies (p. 593), and Communication (p. 314).

Application Requirements
Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in Graduate Admissions (p. 68). For information specific to the accelerated MAIS, see Application Requirements and Deadlines (http://mais.gmu.edu/programs/la-mais-isin/application) on the departmental web site.

Accelerated Option Requirements
While undergraduate students, accelerated master’s students complete INTS 540 Contemporary Issues in Social Justice Human Rights and one course chosen from the list of electives for the MAIS concentration in social justice and human rights as indicated on their Accelerated Master’s Program Application with a minimum grade of B in each course. Once admitted to the accelerated master’s pathway, students must maintain a minimum cumulative GPA of 3.25 in all course work. Upon completion and conferral of the undergraduate degree in the semester indicated in the application, they submit the Bachelor’s/Accelerated Master’s Transition Form and are admitted to graduate status.

As graduate students, accelerated master’s students have an advanced standing. They must meet all master’s degree requirements except for the two courses (6 credits) they completed as undergraduates. Students must begin their master’s program the semester immediately following conferral of the undergraduate degree.

Reserve Graduate Credit
Students may take up to 6 additional graduate credits as reserve graduate credit (chosen from the list of electives for the MAIS concentration in social justice and human rights). These credits do not apply to the undergraduate degree. The ability to take courses for reserve graduate credit is available to all high achieving undergraduates with the permission of the program. Permission to take a graduate course for reserve graduate credit is normally granted only to Mason seniors within 15 hours of graduation. See AP.1.4.4 Graduate Course Enrollment by Undergraduates (p. 79).

Bachelor's Degree (selected)/Interdisciplinary Studies, Accelerated MAIS (Women and Gender Studies Concentration)

Overview
Highly-qualified undergraduates in select majors may apply to the accelerated master's degree in interdisciplinary studies with a concentration in women and gender studies (p. 542). If accepted, and depending on their undergraduate major, students will be able to earn a bachelor’s degree in their chosen major and a master’s degree in interdisciplinary studies with a concentration in women and gender
the permission of the department. Permission is normally granted only to qualified Mason seniors within 15 hours of graduation. See AP.1.4.4 Graduate Course Enrollment by Undergraduates (p. 79).

**Bachelor's Degree (any)/Interdisciplinary Studies, Accelerated MAIS (Energy and Sustainability Concentration)**

**Overview**

Highly-qualified undergraduates in any major may apply to the accelerated master's degree in interdisciplinary studies. If accepted, and depending on their undergraduate major, students will be able to earn a bachelor's degree in their chosen major and a master's degree in interdisciplinary studies with a concentration in energy and sustainability after satisfactory completion of 150 credits, sometimes within five years. For more detailed information, see AP.6.7 Bachelor’s/Accelerated Master’s Degrees (p. 93).

Students in an accelerated degree program must fulfill all university requirements for the master's degree. For policies governing all graduate degrees, see AP6 Graduate Policies (p. 90).

**Application Requirements**

Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in Graduate Admissions (p. 68). For information specific to the accelerated MAIS, see the departmental web site (http://mais.gmu.edu/programs/la-mais-isin/application).

**Accelerated Option Requirements**

While undergraduate students, accelerated master’s students complete two graduate courses as indicated on their Accelerated Master's Program Application with a minimum grade of B in each course. Once admitted to the accelerated master’s pathway, students must maintain a minimum cumulative GPA of 3.25 in all course work. Upon completion and conferral of the undergraduate degree in the semester indicated in the application, they submit the Bachelor’s/Accelerated Master’s Transition Form and are admitted to graduate status.

The ability to take courses, including ones not listed above, for reserve graduate credit is available to all high achieving undergraduates with
Recommended Majors
Anthropology, chemistry, economics, environmental and sustainability studies, integrative studies, global affairs, mathematics, physics, sociology, and relevant concentrations in the Bachelor of Individualized Study (BIS) degree.

Reserve Graduate Credit
Students may take up to 6 additional graduate credits as reserve graduate credit. These credits do not apply to the undergraduate degree. To apply these credits to the master’s degree, students should use the Bachelor’s/Accelerated Master’s Transition Form.

Total Credits: 6

The ability to take courses, including ones not listed above, for reserve graduate credit is available to all high achieving undergraduates with the permission of the department. Permission is normally granted only to qualified Mason seniors within 15 hours of graduation. See AP1.4.4 Graduate Course Enrollment by Undergraduates (p. 79) for more information.

Bachelor’s Degree (any)/Interdisciplinary Studies, Accelerated MAIS (Folklore Studies Concentration)

Overview
Highly-qualified undergraduates in any major may apply to the accelerated master’s degree in interdisciplinary studies. If accepted, and depending on their undergraduate major, students will be able to earn a bachelor’s degree in their chosen major and a master’s degree in interdisciplinary studies with a concentration in folklore studies after satisfactory completion of 150 credits, sometimes within five years. For more detailed information, see AP6.7 Bachelor’s/Accelerated Master’s Degrees (https://catalog.gmu.edu/policies/academic/graduate-policies/#ap-6-7).

Students in an accelerated degree program must fulfill all university requirements for the master’s degree. For policies governing all graduate degrees, see AP6 Graduate Policies (https://catalog.gmu.edu/policies/academic/graduate-policies).

Application Requirements
Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in Graduate Admissions (https://catalog.gmu.edu/admissions/graduate-policies). For information specific to this program, see Application Requirements and Deadlines (http://mais.gmu.edu/programs/LA-MAIS-ISIN/application) on the departmental website.

Accelerated Option Requirements
While undergraduate students, accelerated master’s students complete six credits of ENGH 591 Topics in Folklore Studies with a minimum grade of B in each course. Once admitted to the accelerated master’s pathway, students must maintain a minimum cumulative GPA of 3.25 in all coursework. Upon completion and conferral of the undergraduate degree in the semester indicated in the application, they submit the Bachelor’s/Accelerated Master’s Transition Form and are admitted to graduate status.

As graduate students, accelerated master’s students have an advanced standing. They must meet all master’s degree requirements except for the two courses (6 credits) they completed as undergraduates. Students must begin their master’s program the semester immediately following conferral of the undergraduate degree.

Reserve Graduate Credit
Students may take up to 6 additional graduate credits as reserve graduate credit. These credits do not apply to the undergraduate degree. To apply these credits to the master’s degree, students should use the Bachelor’s/Accelerated Master’s Transition Form.

Total Credits: 6

The ability to take courses, including ones not listed above, for reserve graduate credit is available to all high achieving undergraduates with the permission of the department. Permission is normally granted only to qualified Mason seniors within 15 hours of graduation. See AP1.4.4 Graduate Course Enrollment by Undergraduates (https://catalog.gmu.edu/policies/academic/registration-attendance/#ap-1-4-4) for more information.

Bachelor’s Degree (any)/Interdisciplinary Studies, Accelerated MAIS (War and the Military in Society Concentration)

Overview
Highly-qualified undergraduates in any major may apply to the accelerated master’s degree in interdisciplinary studies. If accepted, and depending on their undergraduate major, students will be able to earn a bachelor’s degree in their chosen major and a master’s degree in interdisciplinary studies with a concentration in war and the military in society after satisfactory completion of 150 credits, sometimes within five years. For more detailed information, see AP6.7 Bachelor’s/ Accelerated Master’s Degrees (p. 93).

Students in an accelerated degree program must fulfill all university requirements for the master’s degree. For policies governing all graduate degrees, see AP6 Graduate Policies (p. 90).
Application Requirements
Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in Graduate Admissions (p. 68). For information specific to this program, see Application Requirements and Deadlines (http://mais.gmu.edu/programs/LA-MAIS-ISIN/application) on the departmental website.

Accelerated Option Requirements
While undergraduate students, accelerated master’s students complete one course from the historical perspectives list and one course from any of the other perspectives that fulfill the war and the military in society concentration requirements, as indicated on their Accelerated Master’s Program Application, with a minimum grade of 3.00 in each course. Once admitted to the accelerated master’s pathway, students must maintain a minimum cumulative GPA of 3.25 in all coursework. Upon completion and conferral of the undergraduate degree in the semester indicated in the application, they submit the Bachelor’s/Accelerated Master’s Transition Form and are admitted to graduate status.

As graduate students, accelerated master’s students have an advanced standing. They must meet all master’s degree requirements except for the two courses (6 credits) they completed as undergraduates. Students must begin their master’s program the semester immediately following conferral of the undergraduate degree.

Recommended Majors
The accelerated MAIS in war and the military in society is appropriate for a number of undergraduate majors including but not limited to:

• Conflict Analysis and Resolution
• Criminology, Law and Society
• Economics
• Global Affairs
• Government and International Politics
• History
• Integrative Studies (concentrations in international studies, social justice and human rights, and women and gender studies)

Reserve Graduate Credit
Students may take up to 6 additional graduate credits as reserve graduate credit (chosen from the list of electives for the MAIS concentration in war and the military in society). These credits do not apply to the undergraduate degree. The ability to take courses for reserve graduate credit is available to all high achieving undergraduates with the permission of the department. Permission is normally granted only to qualified Mason seniors within 15 hours of graduation. See AP1.4.4 Graduate Course Enrollment by Undergraduates (p. 79) for more information.

Programs

• Latin American Studies Minor
• Latin American Studies, BA

Latin American Studies, BA
Banner Code: LA-BA-LAS
Email: las@gmu.edu
Website: las.gmu.edu/programs/LA-BA-LAS

This program is no longer accepting applications for new students.

The BA in Latin American studies looks at contemporary Latin America and its progress through a long and turbulent history of conquest, resistance, and cultural mixing. The result is a rich and unique blend of African, indigenous, and European cultures. Majors develop a broad expertise in the region while also pursuing an individualized program of study that suits their interests. Students improve their language skills and take courses in many disciplines, including anthropology, dance, economics, folklore, geography, government, history, and literature. All students have opportunities for research, global engagement, public service, and career preparation.

Admissions & Policies

Policies

Students pursuing this degree must complete 33 credits within the major, with a minimum GPA of 2.00.

For policies governing all undergraduate degrees, see AP5 Undergraduate Policies (p. 87).

Requirements

This program is no longer accepting applications for new students.

Degree Requirements
Total credits: minimum 120

Students should be aware of the specific policies associated with this program, located on the Admissions & Policies (p. 558) tab.
### Core Courses in the Major

#### Required Introductory Course

<table>
<thead>

</thead>
<tbody>
<tr>
<td>HIST 271</td>
<td>Survey of Latin American History (Mason Core) (p. 142)</td>
<td>3</td>
</tr>
<tr>
<td>HIST 272</td>
<td>Survey of Latin American History (Mason Core) (p. 142)</td>
<td>3</td>
</tr>
</tbody>
</table>

**Total Credits:** 6

#### Social Science Courses Related to Latin America

Select two courses from the following:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>ANTH 302</td>
<td>Peoples and Cultures of Latin America (Mason Core) (p. 142)</td>

<td>Economic Development of Latin America (Mason Core) (p. 142)</td>
<td>3</td>
</tr>
<tr>
<td>GGS 316</td>
<td>Geography of Latin America</td>
<td></td>
</tr>
<tr>
<td>GOVT 331</td>
<td>Government and Politics of Latin America</td>
<td></td>
</tr>
</tbody>
</table>

**Total Credits:** 6

#### Humanities Course Related to Latin America

Select one course from the following:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>ENGH 315</td>
<td>Folklore and Folklife</td>
<td>3</td>
</tr>
<tr>
<td>SPAN 322</td>
<td>Introduction to Latin American Culture (Mason Core) (p. 142)</td>
<td></td>
</tr>
<tr>
<td>SPAN 325</td>
<td>Major Hispanic Writers (Mason Core) (p. 142)</td>
<td></td>
</tr>
</tbody>
</table>

**Total Credits:** 3

#### Seminar Course

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>LAS 499</td>
<td>Research Seminar in Latin American Studies (Mason Core) (p. 142)</td>
<td>3</td>
</tr>
</tbody>
</table>

**Total Credits:** 3

### Language Requirement

All Latin American studies majors must demonstrate reading, speaking, or writing knowledge of Spanish or Portuguese by exam or achieving a minimum grade of 2.00 in a 300-level course in the language selected. Upper-level Latin American literature or culture courses taught in Spanish or Portuguese may be used to satisfy the electives requirement.

### Electives in Latin American Studies

Select four electives in Latin American studies

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td></td>
<td>12</td>
</tr>
</tbody>
</table>

**Total Credits:** 12

Students may satisfy the electives requirement with any course that contains a significant emphasis on Latin America or the culture, politics, sociology, or history of Latinos living in the United States. In addition, students are strongly encouraged to use an internship (LAS 490) or a study-abroad program to fulfill some of these credits. The electives must be approved by the director of the program. Upper-level Latin American literature or culture courses taught in Spanish or Portuguese may be used to satisfy the electives requirement.

### Writing-Intensive Requirement

The university requires all students to complete at least one course designated "writing intensive" in their major at the 300 level or above. Students majoring in Latin American studies should consult with the director for a course to fulfill this requirement.

### Upper Level Requirement

Students seeking a bachelor's degree must apply at least 45 credits of upper-level courses (numbered 300 or above) toward graduation requirements.

### Additional Electives

Any remaining credits may be completed with elective courses to bring the degree total to 120.

### College Level Requirements for the BA Degree

In addition to the Mason Core (p. 142) program, students pursuing a BA degree must complete the coursework below. Except where expressly prohibited, a course used to fulfill a college level requirement may also be used simultaneously to satisfy other requirements (Mason Core requirements or requirements for the major).

#### Philosophy or Religious Studies

Select 3 credits from the following:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>PHIL</td>
<td>Classical Western Political Theory</td>
<td>3</td>
</tr>
<tr>
<td>PHIL</td>
<td>Modern Western Political Theory</td>
<td></td>
</tr>
<tr>
<td>PHIL</td>
<td>Contemporary Western Political Theory</td>
<td></td>
</tr>
<tr>
<td>PHIL</td>
<td>Humanities College to Career</td>
<td></td>
</tr>
<tr>
<td>PHIL</td>
<td>Senior Seminar in Philosophy, Politics, and Economics</td>
<td></td>
</tr>
<tr>
<td>RELI</td>
<td>Religion and Literature (Mason Core) (p. 142)</td>
<td></td>
</tr>
</tbody>
</table>

Note that the following courses may not be used to fulfill this requirement:

- PHIL 323
- PHIL 324
- PHIL 327
- PHIL 393
- PHIL 460
- PHIL 253 Philosophy and Literature (Mason Core) (p. 142)
- RELI 235 Religion and Literature (Mason Core) (p. 142)

Additionally, PHIL 253 Philosophy and Literature (Mason Core) (p. 142) and RELI 235 Religion and Literature (Mason Core) (p. 142) cannot be used to fulfill both the philosophy/religious studies requirement and the Mason Core literature (p. 147) requirement.

#### Social and Behavioral Sciences

Select 3 credits of social and behavioral sciences from the following (additional to the Mason Core social and behavioral sciences requirement)

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>ANTH</td>
<td>(p. 1212)</td>
<td></td>
</tr>
<tr>
<td>CRIM</td>
<td>(p. 1514)</td>
<td></td>
</tr>
<tr>
<td>ECON</td>
<td>(p. 1564)</td>
<td></td>
</tr>
</tbody>
</table>

1. Students may satisfy the electives requirement with any course that contains a significant emphasis on Latin America or the culture, politics, sociology, or history of Latinos living in the United States. In addition, students are strongly encouraged to use an internship (LAS 490) or a study-abroad program to fulfill some of these credits. The electives must be approved by the director of the program. Upper-level Latin American literature or culture courses taught in Spanish or Portuguese may be used to satisfy the electives requirement.

2. Note that the following courses may not be used to fulfill this requirement:

   - PHIL 323
   - PHIL 324
   - PHIL 327
   - PHIL 393
   - PHIL 460
   - PHIL 253 Philosophy and Literature (Mason Core) (p. 142)
   - RELI 235 Religion and Literature (Mason Core) (p. 142)

3. Additionally, PHIL 253 Philosophy and Literature (Mason Core) (p. 142) and RELI 235 Religion and Literature (Mason Core) (p. 142) cannot be used to fulfill both the philosophy/religious studies requirement and the Mason Core literature (p. 147) requirement.
Or choose from the following GGS courses:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>GGS 101</td>
<td>Major World Regions (Mason Core) (p. 142)</td>
<td></td>
</tr>
<tr>
<td>GGS 103</td>
<td>Human Geography (Mason Core) (p. 142)</td>
<td></td>
</tr>
<tr>
<td>GGS 110</td>
<td>Introduction to Geoinformation Technologies</td>
<td></td>
</tr>
<tr>
<td>GGS 301</td>
<td>Political Geography</td>
<td></td>
</tr>
<tr>
<td>GGS 303</td>
<td>Geography of Resource Conservation (Mason Core) (p. 142)</td>
<td></td>
</tr>
<tr>
<td>GGS 304</td>
<td>Population Geography (Mason Core) (p. 142)</td>
<td></td>
</tr>
<tr>
<td>GGS 305</td>
<td>Economic Geography</td>
<td></td>
</tr>
<tr>
<td>GGS 306</td>
<td>Urban Geography</td>
<td></td>
</tr>
<tr>
<td>GGS 315</td>
<td>Geography of the United States</td>
<td></td>
</tr>
<tr>
<td>GGS 316</td>
<td>Geography of Latin America</td>
<td></td>
</tr>
<tr>
<td>GGS 320</td>
<td>Geography of Europe</td>
<td></td>
</tr>
<tr>
<td>GGS 325</td>
<td>Geography of North Africa and the Middle East</td>
<td></td>
</tr>
<tr>
<td>GGS 330</td>
<td>Geography of the Soviet Succession States</td>
<td></td>
</tr>
<tr>
<td>GGS 357</td>
<td>Urban Planning</td>
<td></td>
</tr>
<tr>
<td>GGS 380</td>
<td>Geography of Virginia</td>
<td></td>
</tr>
</tbody>
</table>

The two courses used to fulfill the combined college and Mason Core (p. 142) requirements must be from different disciplines in the social and behavioral sciences.

HIST 100 History of Western Civilization (Mason Core) (p. 142) and HIST 125 Introduction to World History (Mason Core) (p. 142) may not be used to fulfill this requirement.

Foreign Language

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>Intermediate-level proficiency in one foreign language, fulfilled by: ¹</td>
<td></td>
</tr>
<tr>
<td></td>
<td>Completing a course in a foreign language numbered 202 (or higher level courses taught in the language) (p. 424)</td>
<td></td>
</tr>
<tr>
<td></td>
<td>Or achieving a satisfactory score on an approved proficiency test</td>
<td></td>
</tr>
<tr>
<td></td>
<td>Or completing the following ASL three course sequence:</td>
<td></td>
</tr>
<tr>
<td></td>
<td>EDSE 115 American Sign Language (ASL) I</td>
<td></td>
</tr>
<tr>
<td></td>
<td>EDSE 116 American Sign Language (ASL) II</td>
<td></td>
</tr>
<tr>
<td></td>
<td>EDSE 219 American Sign Language (ASL) III</td>
<td></td>
</tr>
</tbody>
</table>

¹ Students who are already proficient in a second language may be eligible for a waiver of this requirement. Additional information on waivers can be found at the Office of Undergraduate Academic Affairs (http://chssundergrad.gmu.edu).

Non-Western Culture

Select 3 credits of an approved course in the study of a non-Western culture (additional to the Mason Core requirement in global understanding)

<table>
<thead>
<tr>

1 A course used to fulfill the Mason Core global understanding (p. 146) requirement may not be simultaneously used to satisfy this college-level requirement. A course used to fulfill this requirement may be used simultaneously to fulfill any other requirements (Mason Core requirements, college-level requirements, or requirements for the major). Additional information on waivers can be found at the Office of Undergraduate Academic Affairs (http://chssundergrad.gmu.edu).

**Mason Core**

Some Mason Core (p. 142) requirements may already be fulfilled by the major requirements listed above. Students are strongly encouraged to consult their advisors to ensure they fulfill all remaining Mason Core (p. 142) requirements.
Latin American Studies Minor

Foundation Requirements

- Written Communication (ENGH 101) (p. 142) 3
- Oral Communication (p. 142) 3
- Quantitative Reasoning (p. 143) 3
- Information Technology and Computing (p. 143) 3

Exploration Requirements

- Arts (p. 144) 3
- Global Understanding (p. 146) 3
- Literature (p. 147) 3
- Natural Science (p. 148) 7
- Social and Behavioral Sciences (p. 150) 3
- Western Civilization/World History (p. 151) 3

Integration Requirements

- Written Communications (ENGH 302) (p. 142) 3
- Writing-Intensive (p. 151) 3
- Synthesis/Capstone (p. 153) 3

Total Credits: 40

1. Most programs include the writing-intensive course designated for the major as part of the major requirements; this course is therefore not counted towards the total required for Mason Core.
2. Minimum 3 credits required.

Honors

This program is no longer accepting applications for new students.

Honors in the Major

Latin American studies majors who have completed 75 credits (a minimum of 15 in Latin American studies, 6 of which must have been taken at Mason) with an overall minimum GPA of 3.50 and a minimum GPA of 3.50 in the major may apply to pursue advanced work leading to graduation with honors in the major. The application consists of a transcript, a recommendation from one member of the LAS faculty, and a brief description of a proposed research project.

Once accepted into the program, students pursuing honors in the major complete a two-course sequence LAS 491 and LAS 499 Research Seminar in Latin American Studies (Mason Core) (p. 142) (an honors section), which must be taken in successive semesters. In this sequence, students complete an advanced research project under the guidance of a faculty member. To graduate with honors in the major, students must earn a minimum GPA of 3.50 in the honors courses.

Latin American Studies Minor

Banner Code: LAS

Academic Advising

Email: las@gmu.edu
Website: las.gmu.edu/programs/la-minor-la-las/requirements/

Latin American studies focuses on the diverse and connected regions, societies, and cultures of Latin America. Students find that combining this minor with a major in another discipline is particularly attractive to employers. Latin American studies enhances a major in Spanish or anthropology for a career in teaching or human rights work; a major in communication for a career in journalism; and a major in business for a career in the U.S. Foreign Service, other government agencies, or international commerce.

Admissions & Policies

Policies

Eight credits of coursework must be unique to the minor and students must complete all coursework with a minimum GPA of 2.00. For policies governing all minors, see AP.S.3.4 Minors (p. 90).

Requirements

Minor Requirements

Total credits: 18

Students should be aware of the specific policies associated with this program, located on the Admissions & Policies (p. 562) tab.

Total Credits: 15

1. Students may satisfy the electives with any course that contains a significant emphasis on Latin America or the culture, politics, sociology, or history of Latinos living in the United States. Students choose electives from courses offered by at least three different departments in consultation with the program director. Upper-level Latin American literature or culture courses taught in Spanish or Portuguese may be used to satisfy the requirement.

Middle East and Islamic Studies Program

Email: meis@gmu.edu
Website: meis.gmu.edu
The interdisciplinary program in Middle East and Islamic Studies offers a distinctive and innovative approach to the study of the Middle East, of Islam, and of Muslim societies across the globe. The program seeks to situate the study of the Middle East and Islam within a globalized world. Students develop a broad understanding of the region, its history and its contemporary complexities with respect to society, politics, culture, and economy.

The Middle East and Islamic Studies Program comprises four distinct curricula; a master's program in Middle East and Islamic studies (MEIS), a graduate certificate program, and two undergraduate minor programs (Middle East studies and Islamic studies). Because these programs are interdisciplinary, undergraduate and graduate students may take courses from a range of disciplines to fulfill minor, graduate degree or certificate requirements. Undergraduate students should consult the specific listing, Middle East Studies minor (p. 564) or Islamic Studies minor (p. 563) for more details. Graduate students should consult with the MEIS director.

Undergraduate Program

Minors
The Middle East and Islamic Studies Program offers two minors for undergraduates.

The Middle East Studies minor provides students with a firm grounding in the history, politics, and culture of this important region. Students develop an understanding of the diverse dynamics and complex forces that shape modern Middle East realities.

The Islamic Studies minor introduces students to the diverse and dynamic experience of Muslims globally and locally. Through interdisciplinary course offerings, students acquire an understanding of Islamic religious traditions, history, politics, society and culture. A three-credit course is also required in a language spoken in a Muslim majority country (Arabic, Persian, Turkish).

Graduate Program

Master's Degree
The program offers a master's degree in Middle East and Islamic studies. Students study historical and contemporary topics - as well as theory and methodology - from regional and global perspectives. The unique interdisciplinary nature of the program provides students with a thorough foundation in the major debates and issues in the study of the Middle East, of Islam, and of Muslim societies across the globe.

Graduate Certificate
The graduate certificate in Middle East and Islamic studies allows students to examine the complex issues involved in understanding the Middle East and the broader Islamic world from a variety of perspectives. Students study both contemporary and historical developments in these regions; they take courses in various disciplines, including political science, history, and religious studies, and have the opportunity to take elective courses in an even broader set of disciplines, including sociology, anthropology, literature, and art history.

Bachelor's/ Accelerated Master's Program
Highly qualified undergraduates in any major may apply to the accelerated master's degree program in Middle East and Islamic studies (p. 567). If accepted, students will be able to earn an undergraduate degree in their chosen major and a graduate degree in Middle East and Islamic studies after satisfactory completion of 144 credits, generally within five years. Credit limits and course requirements require advanced planning and consultation with the student’s undergraduate advisor and MEIS director.

Ali Vural Ak Center for Global Islamic Studies
web: islamicstudiescenter.gmu.edu (http://islamicstudiescenter.gmu.edu)
The Ali Vural Ak Center for Global Islamic Studies is an interdisciplinary research center whose goal is to provide a sound and nuanced understanding of Muslim societies and the Islamic faith, its role in world history and patterns of globalization. The center regularly sponsors lectures and conferences, runs major research projects and hosts international scholars. The center supports the academic curriculum through its on-campus and off-campus activities.

Middle East Studies
web: meis.gmu.edu (http://meis.gmu.edu)
The interdisciplinary Middle East Studies program at George Mason provides students with a firm grounding in the history, politics, and culture of this important region. Under the guidance of internationally recognized faculty, students develop an understanding of the diverse dynamics and complex forces that shape modern Middle East realities. Students have the opportunity to examine new Middle East diasporas and transnational communities in the West, as well as the role of the Middle East in a changing geopolitical environment marked by the rise of China, India and the re-emergence of Russia.

The minor is designed for students interested in the societies, cultures, history, and politics of the Islamic world. It offers students the
opportunity to study the many societies that have significant Muslim populations. These societies are not just in the Middle East. They stretch from North Africa to Southeast Asia and beyond, including Europe as well as North America. To fulfill the requirements for the minor, students take a wide variety of courses from a range of departments. These courses provide students with a broad and well-rounded understanding of Islam.

The minor will enhance students’ opportunities for future study and employment, especially in the Washington, D.C. area.

1 One course in a relevant language may be used as an elective. Other courses including ANTH 399 Issues in Anthropology or CONF 399 Special Topics in Conflict Analysis and Resolution, when topic is relevant to the Middle East, may be used as electives with the prior written approval of the director.

Middle East and Islamic Studies, MA

Banner Code: LA-MA-MEIS

Academic Advising

D215 Buchanan Hall
Fairfax Campus

Email: meis@gmu.edu
Website: meis.gmu.edu/programs/la-ma-meis

The master of arts in Middle East and Islamic Studies introduces students to the major methodological and theoretical issues and debates in the study of the Islamic tradition and of Middle Eastern societies. The program situates the study of the Middle East and Islam within a globalized world. The curriculum covers topics of recent scholarly significance including political Islam, the political economy of business-government networks, the relationship between "resource wars" and the "war on terrorism," new diasporas and transnational Muslim communities in the "West," and the changed geopolitical environments of Muslim and Middle Eastern countries. The degree prepares students for a variety of post-graduate opportunities in academia, government, and an expanding job market for people with this expertise.

Admissions & Policies

Admissions

Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in Graduate Admissions (p. 68). For specific information, see Application Requirements and Deadlines (https://meis.gmu.edu/programs/la-ma-meis/application) on the departmental website.

Policies

For policies governing all graduate degrees, see AP.6 Graduate Policies (p. 90).

Total Credits 15

Language Proficiency
Prior to graduating, students must demonstrate professional competency in one of five major languages of the Middle East and Muslim world: Arabic, Persian, Turkish, Hebrew, or Urdu.

A waiver for this requirement may be received either through 1) documentation verifying primary language of instruction at either the high school or university level in respective foreign language; transcripts showing coursework at the advanced level in respective foreign language or 2) an examination with an appropriate faculty/examiner designated by the director in consultation with the program's steering committee.

Electives

In addition to the following list, electives may include special topics courses when relevant, directed readings and research, study abroad courses, internships, and other courses with the approval of the program director. Students who choose to complete a research project or write a thesis take 3 or 6 fewer elective credits.

Thesis

Students who choose to write a thesis should be aware of the policies governing theses as stated in AP.6.9.3 Master’s Thesis (p. 95). They must follow the thesis enrollment policy of the university and once enrolled in MEIS 799 Thesis Research and Writing in Middle East and Islamic Studies, maintain continuous enrollment.

Students choosing to complete a thesis take 6 fewer credits of electives.
Accelerated Master’s

Bachelor’s Degree (any)/Middle East and Islamic Studies, Accelerated MA

Overview
Highly-qualified undergraduates pursuing a BA may apply to the accelerated master’s degree in Middle East and Islamic studies. If accepted, and depending on their undergraduate major, students will be able to earn a bachelor’s degree in their chosen major and a master’s degree in Middle East and Islamic studies after satisfactory completion of 144 credits, sometimes within five years. See AP.6.7 Bachelor’s/Accelerated Master’s Degrees (p. 93).

Students in an accelerated degree program must fulfill all university requirements for the master’s degree. For policies governing all graduate degrees, see AP.6 Graduate Policies (p. 90).

Application Requirements
Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in Graduate Admissions (p. 68). For information specific to the accelerated MA in Middle East and Islamic studies, see Application Requirements and Deadlines (http://meis.gmu.edu/programs/la-acel-meis).

Accelerated Option Requirements
While undergraduate students, accelerated master’s students complete two graduate courses as indicated on their Accelerated Master’s Program Application with a minimum grade of B in each course. Once admitted to the accelerated master’s pathway, students must maintain a minimum cumulative GPA of 3.25 in all course work. Upon completion and conferral of the undergraduate degree in the semester indicated in the application, they submit the Bachelor’s/Accelerated Master’s Transition Form and are admitted to graduate status.

As graduate students, accelerated master’s students have an advanced standing. They must meet all master’s degree requirements except for the two courses (6 credits) they completed as undergraduates. Students must begin their master’s program the semester immediately following conferral of the undergraduate degree.

Reserve Graduate Credit
Students may take up to 6 additional graduate credits as reserve graduate credit. These credits do not apply to the undergraduate degree. To apply these credits to the master’s degree, students should use the Bachelor’s/Accelerated Master’s Transition Form.

<table>

The ability to take courses, including ones not listed above, for reserve graduate credit is available to all high achieving undergraduates with the permission of the department. Permission is normally granted only to qualified Mason seniors within 15 hours of graduation. Permission is normally granted only to qualified Mason seniors within 15 hours of graduation. See AP.1.4.4 Graduate Course Enrollment by Undergraduates (p. 79).

Middle East and Islamic Studies Graduate Certificate

Banner Code: LA-CERG-MEIS

Academic Advising
347 Research Hall
Fairfax Campus
Email: mes@gmu.edu
Website: meis.gmu.edu/programs/LA-CERG-MEIS

The graduate certificate allows students to examine the complex issues involved in understanding the Middle East and the broader Islamic world from a variety of perspectives. Students study both contemporary and historical developments in these regions; they take core courses in various disciplines, including political science, history, and religious studies, and have the opportunity to take elective courses in an even broader set of disciplines, including sociology, anthropology, literature, and art history.

Admissions & Policies

Admissions
Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in Graduate Admissions (p. 68). For information specific to the graduate certificate in Middle East and Islamic Studies,
see Application Requirements and Deadlines (http://meis.gmu.edu/programs/la-cerg-meis/application).

Requirements

Certificate Requirements

Total credits: 18

This certificate may be pursued on a full- or part-time basis.

Russian and Eurasian Studies Program

Phone: 703-993-1233
Website: russianstudies.gmu.edu

The Russian and Eurasian Studies program brings together experienced Mason faculty who will guide your exploration of this region's culture, gender, class, ethnicity, economy, government, and politics. All majors have the opportunity to study abroad in Moscow or St. Petersburg. They acquire the language skills needed to function successfully in social settings and a variety of careers.

The bachelor of arts degree in Russian and Eurasian studies allows students to choose a concentration in one of three areas:

• Russian language and culture
• Russia studies
• Eurasia studies

Faculty

Program Faculty

Barnes (History and Art History), Bockman (Global Affairs), Boettke (Economics), Guglielmi (Modern and Classical Languages), Katz (Schar School of Policy and Government), Kelly (History and Art History), Korostelina (School for Conflict Analysis and Resolution), Levine (Modern and Classical Languages, director), McGlinchey (Schar School of Policy and Government)

Programs

Russian and Eurasian Studies, BA

Banner Code: LA-BA-REST

Website: russianstudies.gmu.edu/programs/LA-BA-REST

Russian and Eurasian studies majors study the Russian language, spoken worldwide by some 250 million people, while also acquiring a foundational knowledge of the history, culture, literature, politics, sociology, economics, and geography of the region. This degree program is flexible, enabling students to focus their interests in one of three concentrations: Russia studies, Russian language and culture, and Eurasia studies. Russian and Eurasian studies prepares students for a wide range of career options in the private sector, government, and education. All students have opportunities for research, global-engagement, public service, and career preparation.
Admissions & Policies

Policies

Students pursuing this degree must complete 33 credits in one of the concentrations available with a minimum GPA of 2.00.

For policies governing all undergraduate degrees, see AP.5 Undergraduate Policies (p. 87).

Requirements

Degree Requirements

Total credits: minimum 120

Students should be aware of the specific policies associated with this program, located on the Admissions & Policies (p. 569) tab.

Students pursuing this degree complete the requirements for one of the available concentrations.

Concentrations in the Major

Available Concentrations

- Concentration in Eurasia Studies (EURS) (p. 569)
- Concentration in Russia Studies (RUSS) (p. 569)
- Concentration in Russian Language and Culture (RULC) (p. 571)

Concentration in Eurasia Studies (EURS)
The Eurasia studies concentration is designed to provide students with interdisciplinary training in the study of Eurasia, with special focus on Central Asia and secondarily on Russia/the Soviet Union and Eastern Europe. Students will develop a high degree of competence in the history, politics, and culture of Eurasia and a basic competence in a relevant language.

Russian or Other Eurasian-Related Language

<table>
<thead>
<tr>

</thead>
<tbody>
<tr>
<td></td>
<td>Select two courses of Russian or other Eurasian-related language</td>
<td>6</td>
</tr>
<tr>
<td></td>
<td>Total Credits</td>
<td>6</td>
</tr>
</tbody>
</table>

Courses used to meet this requirement may be in the same language that is used to meet the college language requirement, in which case the student needs to complete 6 credits beyond intermediate proficiency (beyond courses numbered 210 at Mason). With the approval of the director, courses used to meet this requirement may be in a Eurasian-related language that was not used to meet the college language requirement at a level approved by the director.

Social Science Courses at the 300- and 400-Level

<tr>
<td></td>
<td>Total Credits</td>
<td>6</td>
</tr>
</tbody>
</table>

Courses used to fulfill this requirement must focus primarily on Central Asia and Eurasia and may be in any social science discipline (ANTH, ECON, GGS, GOVT, SOCI).

Concentration in Russia Studies (RUSS)
The Russia studies concentration is designed to provide students with in-depth interdisciplinary training in Russia and the Soviet Union. Students will develop a high degree of competence in Russian history.

History Courses at the 300- and 400-Level

<table>
<thead>
<tr>

<td>6</td>
</tr>
</tbody>
</table>

Courses used to fulfill this requirement must be related to Eurasia.

Courses at the 300- and 400-Level

Students choose from courses that focus predominantly on Eurasia. The courses used to meet this requirement may be in any field of study including special topics courses and other courses that deal primarily with the geographic areas covered in the Russian and Eurasian studies major. To use a special topics course or other course with variable content to meet this requirement, students should seek the advanced written approval of the director. (Special topics courses may be repeated for credit when the topic is different.) The following courses when the topic is relevant, among others, may be used to meet this requirement.

<table>
<thead>
<tr>

</tr>
</tbody>
</table>

Social Sciences

Students choose from courses dealing with Russia. Any other topically appropriate course in a social science discipline (ANTH, ECON, GGS, GOVT, SOCI) may be used to fulfill this requirement with the prior written approval of the director.

Writing-Intensive Requirement

The university requires all students to complete at least one course designated "writing intensive" in their majors at the 300 level or above. Students majoring in Russian and Eurasian studies may fulfill this requirement by successfully completing RUSS 302 Russian Conversation and Composition, RUSS 325 Major Russian Writers (Mason Core) (p. 142), or RUSS 407 Russian Drama and Theater.

Upper Level Requirement

Students seeking a bachelor's degree must apply at least 45 credits of upper-level courses (numbered 300 or above) toward graduation requirements.

Additional Electives

Any remaining credits may be completed with elective courses to bring the degree total to 120.

College Level Requirements for the BA Degree

In addition to the Mason Core (p. 142) program, students pursuing a BA degree must complete the coursework below. Except where expressly prohibited, a course used to fulfill a college level requirement may also be used simultaneously to satisfy other requirements (Mason Core requirements or requirements for the major).

Philosophy or Religious Studies

Select 3 credits from the following:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>PHIL (p. 2044)</td>
<td></td>
<td>3</td>
</tr>
<tr>
<td>RELI (p. 2144)</td>
<td></td>
<td>3</td>
</tr>
</tbody>
</table>

1 Note that the following courses may not be used to fulfill this requirement:
- PHIL 323 Classical Western Political Theory
- PHIL 324 Modern Western Political Theory
- PHIL 327 Contemporary Western Political Theory
- PHIL 393 Humanities College to Career
- PHIL 460 Senior Seminar in Philosophy, Politics, and Economics

Additionally, PHIL 253 Philosophy and Literature (Mason Core) (p. 142) and RELI 235 Religion and Literature (Mason Core) (p. 142) cannot be used to fulfill both the philosophy/religious studies requirement and the Mason Core literature (p. 147) requirement.

Social and Behavioral Sciences

Select 3 credits of social and behavioral sciences from the following (additional to the Mason Core social and behavioral sciences requirement)

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>ANTH (p. 1212)</td>
<td></td>
<td>3</td>
</tr>
<tr>
<td>CRIM (p. 1514)</td>
<td></td>
<td>3</td>
</tr>
</tbody>
</table>
ECON (p. 1564)
GOVT (p. 1774)
HIST (p. 1818)
LING (p. 1896)
PSYC (p. 2074)
SOCI (p. 2167)

Or choose from the following GGS courses:

- GGS 101 Major World Regions (Mason Core) (p. 142)
- GGS 103 Human Geography (Mason Core) (p. 142)
- GGS 110 Introduction to Geoinformation Technologies
- GGS 301 Political Geography
- GGS 303 Geography of Resource Conservation (Mason Core) (p. 142)
- GGS 304 Population Geography (Mason Core) (p. 142)
- GGS 305 Economic Geography
- GGS 306 Urban Geography
- GGS 315 Geography of the United States
- GGS 316 Geography of Latin America
- GGS 320 Geography of Europe
- GGS 325 Geography of North Africa and the Middle East
- GGS 330 Geography of the Soviet Succession States
- GGS 357 Urban Planning
- GGS 380 Geography of Virginia

1 The two courses used to fulfill the combined college and Mason Core (p. 142) requirements must be from different disciplines in the social and behavioral sciences.

2 HIST 100 History of Western Civilization (Mason Core) (p. 142) and HIST 125 Introduction to World History (Mason Core) (p. 142) may not be used to fulfill this requirement.

Non-Western Culture
Select 3 credits of an approved course in the study of a non-Western culture (additional to the Mason Core requirement in global understanding)

<table>
<thead>

Foreign Language Code Title Credits

Intermediate-level proficiency in one foreign language, fulfilled by:

- Completing a course in a foreign language numbered 202 (or higher level courses taught in the language) (p. 424)
- Or achieving a satisfactory score on an approved proficiency test
- Or completing the following ASL three course sequence:

  - EDSE 115 American Sign Language (ASL) I
  - EDSE 116 American Sign Language (ASL) II
  - EDSE 219 American Sign Language (ASL) III

1 Students who are already proficient in a second language may be eligible for a waiver of this requirement. Additional information on waivers can be found at the Office of Undergraduate Academic Affairs (http://chssundergrad.gmu.edu).

1 A course used to fulfill the Mason Core global understanding (p. 146) requirement may not be simultaneously used to satisfy this college-level requirement. A course used to fulfill this requirement may be used simultaneously to fulfill any other requirements (Mason Core requirements, college-level requirements, or requirements for the major). Additional information on waivers can be found at the Office of Undergraduate Academic Affairs (http://chssundergrad.gmu.edu).

**Mason Core**

Some Mason Core (p. 142) requirements may already be fulfilled by the major requirements listed above. Students are strongly encouraged to consult their advisors to ensure they fulfill all remaining Mason Core (p. 142) requirements.
### School of Integrative Studies

**Phone:** 703-993-1436  
**Website:** integrative.gmu.edu

### About the School

The School of Integrative Studies (SIS) offers a distinctive experience that addresses contemporary social, global, and environmental challenges. Students connect academic interests with hands-on learning to prepare for a life and career with meaning and impact. Based in the College of Humanities and Social Sciences, SIS focuses on critical and creative thinking, engaged scholarship and diversity in thought. Graduates will lead the way as a new brand of professionals whose understanding of the liberal arts and commitment to a just world can build the cross-sector approaches necessary to solve pressing global, social, and environmental problems.

An integrative, interdisciplinary learning environment, SIS offers the benefits of small, discussion-based courses while providing access to the academic resources of a large public research university. Drawing on its award-winning faculty, SIS provides students with transformative experiential learning opportunities including internships, field and international study, and independent research and service. Both the structure and curriculum of SIS prepare graduates who are engaged, well-rounded scholars who consistently assume leadership roles in the fields of business, law, government, healthcare, education, and the non-profit sector, among others.

### Undergraduate Programs

The School of Integrative Studies offers a bachelor of arts degree in integrative studies, and a bachelor of arts in environmental and sustainability studies (joint degree with Environmental Science and Policy in the College of Science). The school also houses the Bachelor of Individualized Study Program.

The integrative studies curriculum is based on intensive, interdisciplinary learning communities, coordinated with traditional academic programs. The result is an integrated program of study that emphasizes collaboration, experiential learning, and self-reflection. All students complete their degree programs with an interdisciplinary concentration.

The environmental and sustainability studies degree provides students with theoretical and practical knowledge of three aspects of environmental and sustainability studies: people, prosperity, and planet. In addition to required core courses, students develop more in-depth knowledge in one of six concentrations. This degree prepares students for employment and graduate study in fields related to social justice, business and public policy, and environmental protection as they relate to the environment and sustainability.

The bachelor of individualized study (BIS) program is a degree completion program for adult learners. BIS offers students transfer credit options and a distinctive educational opportunity to integrate other college-level learning, such as professional or military experience, into university coursework. Students create interdisciplinary concentrations to meet their own educational needs including to advance professionally, to prepare for graduate or professional programs, or to plan a path toward a career change.

### Transfer Students

The School of Integrative Studies welcomes transfer students from other four-year institutions or community colleges, as well as from other academic units within Mason. Academic advisors work with students to utilize transfer credits and create a plan for timely completion of the bachelor’s degree. All transfer students are required to take INTS 391 Understanding Integrative Studies within their first two semesters and meet with an academic advisor as soon as possible.

### Minor Programs

The School of Integrative Studies offers minors in childhood studies, wellbeing, leadership, multimedia, nonprofit studies, social innovation, and social justice. All are available to students in any major in the university.

The Sustainability Studies Minor (p. 713) is offered jointly by the Department of Environmental Science and Policy and the School of Integrative Studies.

### Centers

The School of Integrative Studies houses Social Action and Integrative Learning (SAIL), which serves all students and faculty in the university.

Childhood Studies Minor

Banner Code: CHDS

Academic Advising
402 Enterprise Hall
Fairfax Campus

Email: sisinfo@gmu.edu
Website: integrative.gmu.edu/programs/la-minor-nc-chds

The interdisciplinary minor is designed for students who have a child-related focus in their major and for those who want to explore the topic of childhood. This minor focuses on the study of issues concerning children and their representations, including their experiences in society within historical and contemporary cultures and global contexts. The curriculum fosters thinking about childhood theory, research, policy and the practical applications of this knowledge to decisions regarding children and youth. The minor provides enough flexibility for students to choose relevant courses in keeping with their primary interests.

Faculty
Dunne, Garner (director)

Admissions & Policies

Policies
Eight credits of coursework must be unique to the minor and students must earn a minimum grade of 2.00 in all courses applied to the minor. For policies governing all minors, see AP.5.3.4 Minors (p. 90).

Requirements

Minor Requirements
Total credits: 16

Students should be aware of the specific policies associated with this program, located on the Admissions & Policies (p. 575) tab.

Conservation Studies Minor (CHSS)

Banner Code: CNST

Academic Advising

Sharon Spradling, Academic Program Coordinator and Advisor
Email: sspradli@gmu.edu
Website: smconservation.gmu.edu

This minor is designed for undergraduate students who wish to augment their primary academic program with conservation studies taught in an experiential manner. There are three semester-long options by which students can complete the minor including topics such as: "Conservation, Biodiversity and Society", "Wildlife Ecology and Conservation", or "Endangered Species Conservation". These semesters are grounded in natural science and offer a collection of interdisciplinary courses that combine public policy, sociology, conflict resolution, and global awareness with hands-on experience. Students are in residence at the Smithsonian Conservation Biology Institute in Front Royal, Virginia, and are taught by Mason faculty, Smithsonian scientists and practitioners.

The minor is available only to students who enroll in any of the Smithsonian Mason Semesters, semester-long residential programs held at the Smithsonian Conservation Biology Institute in Front Royal, VA. The semesters are offered jointly by the College of Humanities and Social Sciences and the College of Science under the auspices of the Smithsonian-Mason School of Conservation.

This is a Green Leaf program (p. 107).

Admissions & Policies

Admissions

The minor is available only to students who enroll in either of the Smithsonian Mason Semesters, semester-long residential programs held at the Smithsonian Conservation Biology Institute in Front Royal, VA.

Policies

Eight credits of coursework must be unique to the minor and students pursuing this minor must complete one of the options with a minimum grade of 2.00 in each course. For policies governing all minors, see AP.5.3.4 Minors (p. 90).

Environmental and Sustainability Studies, BA (CHSS)

Banner Code: LA-BA-EVSS

402 Enterprise Hall
Fairfax Campus
Website: ess.gmu.edu

The BA in Environmental and Sustainability Studies is a joint program between the College of Humanities and Social Sciences (p. 305) and the College of Science (p. 613).

This degree provides students with theoretical and practical knowledge of three aspects of environmental and sustainability studies: people, prosperity, and planet. In addition to required core courses, students develop more in-depth knowledge in their choice of concentration. This degree prepares students for employment and graduate study in fields
related to social justice, business and public policy, and environmental protection as they relate to the environment and sustainability.

This is a Green Leaf program (p. 107).

**Admissions & Policies**

**Admissions**

University-wide admissions policies can be found in the Undergraduate Admissions Policies (p. 65) section of this catalog.

To apply for this program, please complete the George Mason University Admissions Application (https://www2.gmu.edu/admissions-aid/apply-now).

**Policies**

Students pursuing this degree must complete a minimum of 60 credits within the major, with a minimum grade of 2.00 in each course.

For policies governing all undergraduate degrees, see AP5 Undergraduate Policies (p. 87).

**Requirements**

**Degree Requirements**

Total credits: minimum 120

This is a Green Leaf program.

Students should be aware of the specific policies associated with this program, located on the Admissions & Policies (p. 577) tab.

Of the credits required for this degree, 14 credits simultaneously fulfill core requirements for the major and Mason Core requirements, and, depending on the concentration and electives chosen, up to 9 credits may simultaneously fulfill Mason Core requirements and college BA requirements.

**Core Courses in the Major**

Core requirements may satisfy Mason Core requirements in natural science (EVPP 110 The Ecosphere: An Introduction to Environmental Science I (Mason Core) (p. 142), EVPP 111 The Ecosphere: An Introduction to Environmental Science II (Mason Core) (p. 142)) and the college BA requirement for social and behavioral science (GOVT 361 Introduction to Environmental Policy).

¹ Satisfies the college BA requirement for social and behavioral science.

**Concentration in the Major**

**Available Concentrations**

- Concentration in Business and Sustainability (BUSU) (p. 578)
- Concentration in Climate Change and Society (CCSO) (p. 578)
- Concentration in Conservation and Sustainability (CSUS) (p. 578)
- Concentration in Environmental Policy and Economics (EVPE) (p. 579)
- Concentration in Equity and Environmental Justice (EQEJ) (p. 579)
- Concentration in Sustainable Food and Agriculture (SFG) (p. 580)
Concentration in Business and Sustainability (BUSU)
The requirements for this concentration, depending on the electives chosen, may satisfy the college BA requirement in philosophy and religious studies (PHIL 243 Global Environmental Ethics (Mason Core) (p. 142), PHIL 305 Business Ethics).

Students who have already taken and received credit for MGMT 303 Principles of Management or OM 303 Operations Management shall substitute MGMT 303 Principles of Management for MBUS 301 Managing People and Organizations in a Global Economy and OM 303 Operations Management for MBUS 306 Managing Projects and Operations. Both courses cannot be taken for credit. Students who have taken and received credit for both ACCT 203 Survey of Accounting and FNAN 303 Financial Management shall substitute the combination for MBUS 300 Accounting in a Global Economy. All three courses cannot be taken for credit.

For this concentration, students may substitute OM 211 Honors Statistical Analysis for Management for SOCI 313 Statistics for the Behavioral Sciences (Mason Core) (p. 142) (core requirement for degree). Students cannot receive credit for more than one of these.

Total Credits: 8

Writing-Intensive Requirement

The university requires all students to complete at least one course designated as "writing intensive" in their major at the 300 level or above. Students majoring in environmental and sustainability studies should consult an advisor to learn how to fulfill this requirement.

Upper Level Requirement

Students seeking a bachelor's degree must apply at least 45 credits of upper-level courses (numbered 300 or above) toward graduation requirements.

Additional Electives

Any remaining credits may be completed with elective courses to bring the degree total to 120.

College Level Requirements for the BA Degree

In addition to the Mason Core (p. 142) program, students pursuing a BA degree must complete the coursework below. Except where expressly prohibited, a course used to fulfill a college level requirement may also be used simultaneously to satisfy other requirements (Mason Core (p. 142) requirements or requirements for the major).

Philosophy or Religious Studies

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>PHIL (p. 2044)</td>
<td></td>
<td>3</td>
</tr>
</tbody>
</table>

Note that the following courses may not be used to fulfill this requirement:

- PHIL 323 Classical Western Political Theory
- PHIL 324 Modern Western Political Theory
- PHIL 327 Contemporary Western Political Theory
- PHIL 393 Humanities College to Career
- PHIL 460 Senior Seminar in Philosophy, Politics, and Economics

Additionally, PHIL 253 Philosophy and Literature (Mason Core) (p. 142) and RELI 235 Religion and Literature (Mason Core) (p. 142) cannot be used to fulfill both the philosophy/religious studies requirement and the Mason Core literature (p. 147) requirement.

Social and Behavioral Sciences

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>ANTH (p. 1212)</td>
<td></td>
<td>3</td>
</tr>
</tbody>
</table>

Select 3 credits of social and behavioral sciences from the following (additional to the Mason Core social and behavioral sciences requirement)

- CRIM (p. 1514)
- ECON (p. 1564)
- GOVT (p. 1774)
- HIST (p. 1818)
- LING (p. 1896)
- PSYC (p. 2074)
- SOCI (p. 2167)

Or choose from the following GGS courses:

- GGS 101 Major World Regions (Mason Core) (p. 142)
- GGS 102 Social and Cultural Geography (Mason Core) (p. 142)
- GGS 103 Human Geography (Mason Core) (p. 142)
GGS 110 Introduction to Geoinformation Technologies
GGS 301 Political Geography
GGS 303 Geography of Resource Conservation (Mason Core) (p. 142)
GGS 304 Population Geography (Mason Core) (p. 142)
GGS 305 Economic Geography
GGS 306 Urban Geography
GGS 315 Geography of the United States
GGS 316 Geography of Latin America
GGS 320 Geography of Europe
GGS 325 Geography of North Africa and the Middle East
GGS 330 Geography of the Soviet Succession States
GGS 357 Urban Planning
GGS 380 Geography of Virginia

1. The two courses used to fulfill the combined college and Mason Core (p. 142) requirements must be from different disciplines in the social and behavioral sciences.

2. HIST 100 History of Western Civilization (Mason Core) (p. 142) and HIST 125 Introduction to World History (Mason Core) (p. 142) may not be used to fulfill this requirement.

### Foreign Language

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td></td>
<td>Intermediate-level proficiency in one foreign language, fulfilled by: ¹</td>
</tr>
<tr>
<td></td>
<td></td>
<td>Completing a course in a foreign language numbered 202 (or higher level courses taught in the language) (p. 424)</td>
</tr>
<tr>
<td></td>
<td></td>
<td>Or achieving a satisfactory score on an approved proficiency test</td>
</tr>
<tr>
<td></td>
<td></td>
<td>Or completing the following ASL three course sequence:</td>
</tr>
<tr>
<td></td>
<td>EDSE 115</td>
<td>American Sign Language (ASL) I</td>
</tr>
<tr>
<td></td>
<td>EDSE 116</td>
<td>American Sign Language (ASL) II</td>
</tr>
<tr>
<td></td>
<td>EDSE 219</td>
<td>American Sign Language (ASL) III</td>
</tr>
</tbody>
</table>

¹ Students who are already proficient in a second language may be eligible for a waiver of this requirement. Additional information on waivers can be found at the Office of Undergraduate Academic Affairs (http://chssundergrad.gmu.edu).

### Non-Western Culture

Select 3 credits of an approved course in the study of a non-Western culture (additional to the Mason Core requirement in global understanding)

<table>

1 A course used to fulfill the Mason Core global understanding (p. 146) requirement may not be simultaneously used to satisfy this college-level requirement. A course used to fulfill this requirement may be used simultaneously to fulfill any other requirements (Mason Core requirements, college-level requirements, or requirements for the major). Additional information on waivers can be found at the Office of Undergraduate Academic Affairs (http://chssundergrad.gmu.edu).

**Mason Core**

Some Mason Core (p. 142) requirements may already be fulfilled by the major requirements listed above. Students are strongly encouraged to consult their advisors to ensure they fulfill all remaining Mason Core (p. 142) requirements.

1 A course used to fulfill the Mason Core global understanding (p. 146) requirement may not be simultaneously used to satisfy this college-level requirement. A course used to fulfill this requirement may be used simultaneously to fulfill any other requirements (Mason Core requirements, college-level requirements, or requirements for the major). Additional information on waivers can be found at the Office of Undergraduate Academic Affairs (http://chssundergrad.gmu.edu).
Accelerated Option Requirements

While undergraduate students, accelerated master’s students complete INTS 540 Contemporary Issues in Social Justice Human Rights and one course chosen from the list of electives for the MAIS concentration in social justice and human rights as indicated on their Accelerated Master’s Program Application with a minimum grade of B in each course. Once admitted to the accelerated master’s pathway, students must maintain a minimum cumulative GPA of 3.25 in all course work. Upon completion and conferral of the undergraduate degree in the semester indicated in the application, they submit the Bachelor’s/ Accelerated Master’s Transition Form and are admitted to graduate status.

As graduate students, accelerated master’s students have an advanced standing. They must meet all master’s degree requirements except for the two courses (6 credits) they completed as undergraduates. Students must begin their master’s program the semester immediately following conferral of the undergraduate degree.

Reserve Graduate Credit

Students may take up to 6 additional graduate credits as reserve graduate credit (chosen from the list of electives for the MAIS concentration in social justice and human rights). These credits do not apply to the undergraduate degree. The ability to take courses for reserve graduate credit is available to all high achieving undergraduates with permission to take a graduate course for reserve graduate credit is normally granted only to Mason seniors within 15 hours of graduation. See AP.1.4.4 Graduate Course Enrollment by Undergraduates (p. 79).

Total Credits 6

Bachelor’s Degree (selected)/ Environmental Science and Policy, Accelerated MS

Overview

This degree option allows highly qualified George Mason University students to earn an Environmental Science and Policy, MS (p. 696) in less time than if they had first graduated with an environmentally-focused Green Leaf-designated (p. 107) BA or BS degree and then applied to the MS program sequentially.

For more detailed information, see AP.6.7 Bachelor’s/Accelerated Master’s Degrees (p. 93). For policies governing all graduate programs, see AP.6 Graduate Policies (p. 90).

Admission Requirements

Students with an overall GPA of at least 3.20 who are pursuing any Green Leaf-designated (p. 107) major or minor may apply for provisional acceptance into this accelerated master’s program after completing two semesters of chemistry (including CHEM 211 General Chemistry I (Mason Core) (p. 142) and CHEM 212 General Chemistry II (Mason Core) (p. 142) and three semesters of biology, including a course in ecology, or the equivalent, for example:
For information specific to the accelerated Environmental Science and Policy, MS (p. 696), see Graduate Admissions on the department’s website (http://esp.gmu.edu/academic-programs/graduate/admissions).

Reserve Graduate Credits

Students admitted to this program may take graduate courses after completing 90 undergraduate credits, and up to 6 credits of appropriate environmentally-focused graduate coursework may be used in partial satisfaction of the requirements for the undergraduate degree. If students earn at least a 3.00 GPA in these classes, they are granted advanced standing in the master’s program and must then complete an additional 27 credits to receive the master’s degree.

To apply these credits to the master’s degree, students must request that the credits be moved from the undergraduate degree to the graduate degree using the Bachelor’s/Accelerated Master’s Transition form found on the Office of the University Registrar website (http://registrar.gmu.edu/forms) (as noted above).

Students may take up to 6 additional environmentally-focused graduate credits as reserve graduate credit. These credits do not apply to the undergraduate degree but will reduce the subsequent master’s degree credits accordingly (e.g., with 6 credits counted towards undergraduate degree plus the maximum 6 reserve credits, an MS could be completed with 21 post-bachelor’s credits). The ability to take courses for reserve graduate credit is available to all high achieving undergraduates with the permission of the department.

Human Development and Family Science, BA (CHSS)

Banner Code: E1-BA-HDFS

Academic Advising

Phone: 703-993-5856
Email: HDFS@gmu.edu
Website: hdfs.gmu.edu/

This degree prepares its graduates to use family-centered and strengths-based approaches to support the health and well-being of individuals and families in diverse communities. Graduates will have a strong interdisciplinary foundation in the HDFS field and competencies in 10 areas as established by the National Council on Family Relations, including:

- internal dynamics of relationships and families
- human growth and development
- family-and community-based program planning, implementation, and evaluation
- social policies and laws affecting families
- family diversity
- research methodology
- professional ethics as related to the HDFS field

The HDFS curriculum prepares students to effectively engage with families across the lifespan and in a variety of service settings and
professions, from early childhood education and care to family law and policy advocacy. We offer students 5 concentrations, including:

- child development, education, and services
- adolescent development and services
- adult development and aging
- family health and well-being
- family research, policy, and advocacy

Our program prepares students to critically analyze complex family issues, advocate for families in schools, communities, and in the policy arena, and address social-structural factors contributing to and influencing family functioning, health, and well-being (e.g., poverty and wealth inequality, immigration and illegalization, family homelessness, incarceration, family violence, and discrimination and structural violence such as racism, nationalism, or heterosexism). Students are required to complete a 6-credit internship and integrate research training with service fieldwork. Such an experience is a critical component of HDFS student development and will further prepare our students for graduate education and diverse careers in the human development and family science field.

The HDFS program is a joint academic degree program sponsored by the College of Education and Human Development (CEHD) (p. 161) and the College of Humanities and Social Sciences (CHSS) (p. 305).

Human Development and Family Science Minor (CHSS)

Banner Code: HDFS

Academic Advising

Email: HDFS@gmu.edu
Website: hdfs.gmu.edu/human-development-family-science/minor

This highly relevant and contemporary minor is a 15-credit interdisciplinary program designed especially for students who are interested in how individuals develop and how to improve the quality of life for families and communities. You’ll explore the psychological, social, cultural, and biological development of individuals from conception through adulthood and aging, within the contexts of their families, communities, and the broader society.

The minor is an excellent complement to many majors at Mason. And, because it is offered as a collaboration between the College of Education and Human Development (CEHD) and the College of Humanities and Social Sciences (CHSS), you’ll have the opportunity to learn from outstanding faculty from both colleges who are dedicated to teaching and involved in cutting-edge research.

Admissions & Policies

Policies

Eight credits of coursework must be unique to the minor and students must complete all coursework with a minimum GPA of 2.00. For policies governing all minors, see AP .5.3.4 Minors (p. 90).

To reflect the interdisciplinary nature of the HDFS minor, two courses must have prefixes from disciplines outside of your major area of study (e.g., for PSYC majors, two courses must come from CEHD prefixes: ATEP (p. 1288), ECED (p. 1556), EDUC (p. 1577), HEAL (p. 1794), PHED (p. 2052); for ECED majors, two courses must come from CHSS prefixes: ANTH (p. 1212), INTS (p. 1862), PSYC (p. 2074), SOCI (p. 2167)).

Individualized Study, BIS

Banner Code: LA-BIS-INDV

300 Enterprise Hall
Credit for Nontraditional Modes of Learning

The BIS program allows students to receive college credit for learning acquired through a variety of nontraditional methods indicated below. The maximum allowable credits are indicated for each category.

- Nationally recognized exam programs such as the College Level Examination Program (CLEP) when the particular exam has been approved for Mason credit. See CLEP Examination for an approved list. A maximum of 45 maximum credits can be earned through exams. After matriculation, students are limited to taking and applying credits for the CLEP exam in "Information Systems and Computer Applications". Students with a qualifying score on this exam will be awarded credit for IT 104T. Students receiving credit for IT 104T must still meet the university information technology ethics requirement (see Mason Core section of this catalog). Credit for other CLEP exams awarded after matriculation may not be applied.
- Certain university approved industry, government, or military training credits if such credits are indexed and recommended as college-level credit by the American Council on Education (ACE). To be eligible for Mason credit, training and course specifics must exactly match what is in the ACE guide and be approved for Mason credit. The specific credits must also be approved by the program director and the dean. A maximum of 45 credits can be earned through ACE-approved training. A maximum of 60 total combined credits can be accepted for exams and ACE-approved training. For example, if 45 credits are accepted by ACE-approved training, a maximum of 15 credits can be accepted for exams. Students may not take these courses for credit once they have matriculated at Mason.
- Experiential learning demonstrated by portfolios subject to approval by the program director and the dean (30 maximum credits).
- College-level credit earned at institutions accredited by bodies other than recognized regional accrediting organizations subject to approval by the program director and the dean. These credits can only be considered if the institution is listed in Accredited Institutions of Postsecondary Education published by ACE (30 maximum credits) and only if they are taken before the student matriculates at Mason. Students may not pursue credit for options 1, 2, and 4 once they have matriculated at Mason. They must complete the third option within their first 30 credits after declaring the BIS major. Although the types of credit noted above may be applied to a bachelor of individualized study degree, if a BIS student changes majors, credit awarded in these ways cannot be used toward other majors. These nontraditional credits are not transferable to other degree programs at Mason.

Requirements

Degree Requirements
Total credits: minimum 120

Students should be aware of the specific policies associated with this program, located on the Admissions & Policies tab.

Students pursuing a bachelor of individualized study degree must complete four required courses and one concentration.

Core Courses in the Major
Students must complete each of the three core courses with a minimum grade of 2.00.
In BIS 390 The Research Process (or BIS 391 The Research Process for Honors for students pursuing honors in the major), students develop a project proposal. An approved proposal from BIS 390 The Research Process or BIS 391 The Research Process for Honors is a prerequisite to enroll in BIS 490 RS: Senior Project (Mason Core) (p. 142).

In BIS 490 RS: Senior Project (Mason Core) (p. 142), students complete a senior capstone project that varies according to the individual program of study. It may be an investigative or creative project, and must be appropriate to the student’s interdisciplinary concentration. This course requires significant writing and fulfills the Mason Core synthesis requirement. It is a research intensive course designated RS by OSCAR. The project is evaluated by the BIS 490 RS: Senior Project (Mason Core) (p. 142) instructor in consultation with the student’s faculty mentor and others as determined by the BIS director.

BIS 490 RS: Senior Project (Mason Core) (p. 142) is taken when no more than 6 credits remain in the concentration.

</tr>
</tbody>
</table>

**Total Credits**: 10

**Concentrations in the Major**

Students must complete one concentration of 24-42 credits. Of the credits applied to the concentration, at least 15 credits must be at the 300 level or above and a maximum of 6 credits can have grades of C- or D (grades below 2.00). The total credits applied to the concentration must represent a minimum GPA of 2.00.

Courses applied to a concentration may not also be used to fulfill Mason Core requirements.

**Individualized Concentration (IND)**

Students may do an individualized concentration to meet their own academic needs and interests. The concentration is developed in close consultation with BIS staff and a faculty mentor. Students may incorporate into their individualized concentrations up to 9 credits of previously earned college course work or previously earned nontraditional credit from other institutions. In addition to the 3 core courses, students complete between 24 and 36 credits, depending on the topic and the student’s preparation.

<table>

</thead>
<tbody>
<tr>
<td></td>
<td>Select 24 to 36 credits from a minimum of two disciplines</td>
<td>24-36</td>
</tr>
</tbody>
</table>

**Total Credits**: 24-36

Students are encouraged to include BIS 304 Introduction to BIS in the concentration. Students are also encouraged to include BIS 489 Directed Readings and Research and complete it before taking BIS 490 RS: Senior Project (Mason Core) (p. 142).

**Concentration in Early Childhood Education Studies (ECES)**

This concentration offers students holding a Northern Virginia Community College associate’s degree in applied science in early childhood development the opportunity to obtain a BIS in early childhood education studies and a minor in business or other relevant minor. This concentration does not lead to teacher licensure in early childhood education.

To receive this concentration, students complete a minimum of 34 credits (the concentration requirements plus self-selected minor) beyond the associate’s degree in addition to the four core BIS courses, electives, and Mason Core requirements needed to reach at least 120 credits.

**Admission Requirements**

Students are eligible for this concentration if they have an associate’s degree in applied science in early childhood development. Unlike the individualized concentration, there is no age restriction regarding admission into this BIS concentration.

**Mason Core**

BIS students complete a modified Mason Core (p. 142) program of 36 credits. The Mason Core requirements may include courses not listed here; consult the BIS program for more information. Courses used to meet the Mason Core requirements cannot be used to meet a requirement for a concentration.

Students pursuing the concentration in early childhood education studies meet Mason Core requirements as specified in the advising agreement between NVCC and Mason.

2 Except for PHIL 173 Logic and Critical Thinking, PHIL 376 Symbolic Logic
Additional Electives
Any remaining credits may be completed with electives to bring the degree total to 120.

Honors

Honors in the Major
Highly-qualified students may apply to graduate with honors in the major. Students should apply the semester before they intend to enroll in BIS 390 The Research Process. If accepted, students must complete BIS 391 The Research Process for Honors in place of BIS 390 The Research Process, in addition to an individualized section of BIS 490 RS: Senior Project (Mason Core) (p. 142). To graduate with honors in the major, students must complete these two courses with a minimum GPA of 3.50, maintain a minimum cumulative GPA of 3.75, and successfully present their research during the Senior Project presentations (by earning a grade of 2.0 or better in BIS 490 RS: Senior Project (Mason Core) (p. 142)).

Accelerated Master's
The accelerated master's programs in the list below specify the individualized study BIS as a feeder degree for their programs. It is important to note, however, that many accelerated master's programs are available for any bachelor's degree at Mason, including this one. See the full list of degrees (http://catalog.gmu.edu/programs/#filter=filter_24) with accelerated programs at Mason.

Individualized Study, BIS/Applied Information Technology, Accelerated MS Overview
Highly-qualified students in the Individualized Study, BIS (p. 588) have the option of obtaining an accelerated Applied Information Technology, MS (p. 1118).

For more detailed information, see AP6.7 Bachelor's/Accelerated Master's Degrees (p. 93). For policies governing all graduate degrees, see AP6 Graduate Policies (p. 90).

Application Requirements
Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in Graduate Admissions (p. 68). Mason undergraduate students in the BIS Program can apply in the semester in which they will have completed 90 or more credits (including 15 Mason resident credits) applicable toward the BIS. Students must have an overall GPA of at least 3.30 to apply to the program.

 Reserve Graduate Credit
Students may take up to 6 additional graduate credits as reserve graduate credit. These credits do not apply to the undergraduate degree. The ability to take courses for reserve graduate credit is available to all high achieving undergraduates with the permission of the department. Permission to take a graduate course for reserve graduate credit is normally granted only to Mason seniors within 15 hours of graduation.

To apply these credits to the master's degree, students must request that the credits be moved from the undergraduate degree to the graduate degree using the Bachelor's/Accelerated Master's Transition Form (http://registrar.gmu.edu/forms).

Accelerated Option Requirements
Students in the accelerated master's option must maintain a minimum 3.30 GPA in the undergraduate segment until they have satisfied all requirements for the BIS degree. On completion and conferral of the undergraduate degree they submit the Bachelor's/Accelerated Master's Transition Form (http://registrar.gmu.edu/forms) and are admitted to graduate status.

As graduate students, accelerated master's students have an advanced standing. Students must complete all credits that satisfy requirements of the BIS program and those of the MSAIT program, with two courses overlapping from the courses necessary to earn the BIS with a concentration IND (individualized), applied information technology emphasis as listed below.

Individualized Study, BIS/Applied Information Technology, Accelerated MS Overview
Highly-qualified students in the Individualized Study, BIS (p. 588) have the option of obtaining an accelerated Telecommunications, MS (p. 1111).

For more detailed information, see AP6.7 Bachelor's/Accelerated Master's Degrees (p. 93). For policies governing all graduate degrees, see AP6 Graduate Policies (p. 90).

 Admission Requirements
Students in the Individualized Study, BIS (p. 588) program may apply for this option if they have earned 90 undergraduate credits (including 15 Mason resident credits) with an overall GPA of at least 3.25. Criteria for admission are identical to criteria for admission to the Telecommunications, MS (p. 1111) program.

Accelerated Option Requirements
Students must complete all requirements for the BIS and MS programs, with 6 credits overlap.

Students select TCOM courses from the list below to meet the requirements of the accelerated program. Six credits of TCOM courses will be applied to meet the requirements of both the BIS and MS TCOM programs. An additional three credits of TCOM courses is required for the BIS Individualized Concentration (IND) with emphasis on telecommunication. Note that accelerated students can only take the courses in the list below if they passed the listed prerequisite course with a B or higher.

BIS Concentration
Total credits: 34-46

Students who are pursuing the Individualized Study, BIS (p. 588), Individualized concentration (IND) with an emphasis on telecommunications must take:
Select an additional 500-level TCOM course(s) from the list below

</tbody>
</table>

Note:
Accelerated students who have passed IT 341 Data Communications and Network Principles with a grade of B or higher will not be required to take TCOM 530 in the Telecommunications, MS core. Other TCOM courses may be approved on a case-by-case basis.

See each course for individual prerequisite requirements.

### Degree Conferral

Students must apply the semester before they expect to complete the BIS requirements to have the BS degree conferred. In addition, at the beginning of the student’s final undergraduate semester, students must complete a Bachelor’s/Accelerated Master’s Transition form that is submitted to the Office of the University Registrar and the VSE Graduate Admissions Office. At the completion of MS requirements, a master’s degree is conferred.

### Integrative Studies, BA

**Banner Code:** LA-BA-INTS

**Academic Advising**

402 Enterprise Hall
Fairfax Campus

Email: sisinfo@gmu.edu
Website: integrative.gmu.edu/programs/la-ba-ints

The bachelor of arts in Integrative Studies brings together research, theory and practice across numerous disciplines. Integrative studies majors select a multidisciplinary concentration or work with student services staff to develop their own concentration, uniquely suited to their academic and career goals. Integrative studies majors explore new topics and experiences while gaining the knowledge and skills needed to enter the workforce. Required coursework is offered in small classes with ample room for discussion, collaborative learning, and experiential learning, including in-community projects, volunteer opportunities, field work, internships and work with faculty on research that directly engages current social and global challenges.

### Admissions & Policies

#### Policies

Students must fulfill all Requirements for Bachelor’s Degrees (p. 87) including the Mason Core (p. 142). Integrative studies students may fulfill lower level Mason Core requirements through approved integrative studies (INTS) coursework. Students pursuing a BA in integrative studies must complete a minimum of 30 credits of (INTS) coursework, with at least 15 credits at the 300 and 400 levels. These 30 INTS credits fulfill the writing intensive and synthesis Mason Core requirements.

Students must complete ENGH 302 Advanced Composition (Mason Core) (p. 142). A maximum of 15 credits of INTS 399 Study Abroad can be applied to the major. Students must have a minimum GPA of 2.00 in courses applied to the major. Before registering, students should see an advisor to help plan their degree program to meet Mason requirements. The advisor also can help students choose electives or a minor.

For policies governing all undergraduate degrees, see AP .5 Undergraduate Policies (p. 87).

### Requirements

#### Degree Requirements

Total credits: minimum 120

Students should be aware of the specific policies associated with this program, located on the Admissions & Policies (p. 593) tab.

Integrative studies students complete INTS 391 Understanding Integrative Studies and choose a concentration from the options below. Before registering, students should see an advisor to help plan their degree program to meet Mason requirements. The advisor also can help students choose electives or a minor.

#### Required Course

<table>

</thead>
<tbody>
<tr>
<td>INTS 391</td>
<td>Understanding Integrative Studies</td>
<td>3</td>
</tr>
</tbody>
</table>

#### Concentration in the Major

A concentration is the equivalent of a major in a traditional degree program. Students choose from an established multidisciplinary concentration below or create with faculty an individualized program of study to fit their interests and needs. Concentration coursework combines integrative studies (INTS) classes with coursework from other Mason units (departments, schools, and colleges). While fulfilling the concentration requirements, students are also responsible for completing a minimum of 30 credits of INTS coursework. Any INTS courses required...
for the concentration will apply. Students must present a minimum GPA of 2.00 in courses applied to the concentration.

**Available Concentrations**
- Childhood Studies (CHDS) (p. 594)
- International Studies (INST) (p. 594)
- Leadership and Organizational Development (LODV) (p. 595)
- Legal Studies (LGLS) (p. 596)
- Liberal Arts for the Teaching Professions (LATP) (p. 597)
- Social Innovation (SINN) (p. 597)
- Social Justice and Human Rights (SJHR) (p. 597)
- Social Science for Education (SSED) (p. 599)
- Women and Gender Studies Concentration (WGST) (p. 599)
- Individualized Concentration (IND) (p. 600)

**Childhood Studies (CHDS)**

Students complete the following coursework:

**Seven Required Courses (minimum of 23 credits)**

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>

Integrative Studies, BA (Social Science for Education Concentration)/Curriculum and Instruction, Accelerated MEd (Secondary Education History and Social Science Concentration)

**Overview**

Highly-qualified Mason undergraduates may be admitted to the bachelor’s/accelerated master’s option and obtain both a BA in Integrative Studies (p. 593) (concentration in social science for education) and an MEd in Curriculum and Instruction (p. 170) (concentration in secondary education history and social science) in an accelerated time-frame after satisfactory completion of 149 credits. See AP.6.7 Bachelor’s/Accelerated Master’s Degree (p. 93) for policies related to this program.

This accelerated option is offered jointly by the School of Integrative Studies (p. 574) and the Graduate School of Education (p. 162).

Students in an accelerated degree program must fulfill all university requirements for the master’s degree. For policies governing all graduate degrees, see AP.6 Graduate Policies (p. 90).

**Application Requirements**

Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in Graduate Admissions Policies (p. 68). For information specific to this accelerated master’s program, see Application Requirements and Deadlines (https://cehd.gmu.edu/bachelors-accelerated-masters-program).

**Accelerated Option Requirements**

Students complete the following courses in their senior year:

<table>
<thead>
<tr>
<th>Senior</th>
<th>Fall Semester</th>
<th>Credits</th>
<th>Spring Semester</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>

</tr>
</tbody>
</table>

While undergraduate students, accelerated master’s students are able to apply two of the courses listed above to both the bachelor’s and master’s degrees. These courses are considered advanced standing for the MEd. A minimum grade of B must be earned to be eligible to count as advanced standing. The other two courses are taken as reserve graduate credit and do not apply to the undergraduate degree. Early in their final undergraduate semester, students must submit the Bachelor’s/Accelerated Master’s Transition Form to the CEHD Admissions Office and specify which of the four courses are to be designated as advanced standing and reserve graduate credit.

**Integrative Studies, BA**

The accelerated master’s programs in the list below specify the BA in integrative studies as a feeder degree for their programs. It is important to note, however, that many accelerated master’s programs are available for any bachelor’s degree at Mason, including this one. See the full list of degrees (http://catalog.gmu.edu/programs/#filter=filter_24) with accelerated programs at George Mason.

---

**Individualized Concentration (IND)**

With approval of the executive director, students may construct an individualized concentration.

Total Credits 30

**Additional Electives**

Any remaining credits may be completed with electives to bring the degree total to 120.

---

**Accelerated Master’s**

The accelerated master’s programs in the list below specify the BA in integrative studies as a feeder degree for their programs. It is important to note, however, that many accelerated master’s programs are available for any bachelor’s degree at Mason, including this one. See the full list of degrees (http://catalog.gmu.edu/programs/#filter=filter_24) with accelerated programs at George Mason.
Bachelor's Degree (selected)/
Interdisciplinary Studies, Accelerated
MAIS (Social Justice and Human Rights
Concentration)

Overview
Highly-qualified undergraduates in select majors (listed below) may apply
to the accelerated master's degree in interdisciplinary studies with a
concentration in social justice and human rights (p. 542). If accepted,
and depending on their undergraduate major, students will be able to
earn an undergraduate degree in their chosen major and a master's in
interdisciplinary studies with a concentration in social justice and human
rights after satisfactory completion of 150 credits, sometimes within five
years.

For more detailed information, see AP6.7 Bachelor's/Accelerated
Master's Degrees (p. 93). For policies governing all graduate degrees,
see AP6 Graduate Policies (p. 90).

Selected Majors
Anthropology (p. 497), Environmental and Sustainability Studies
(p. 576), Sociology (p. 507), English (p. 370), History
(p. 394), Philosophy (p. 442), Conflict Analysis and Resolution
(p. 938), Psychology (p. 461), Government and International Politics
(p. 972), Integrative Studies (p. 593), and Communication (p. 314).

Application Requirements
Applicants to all graduate programs at George Mason University must
meet the admission standards and application requirements for graduate
study as specified in Graduate Admissions (p. 68). For information
specific to the accelerated MAIS, see Application Requirements and
Deadlines (http://mais.gmu.edu/programs/la-mais-isin/application) on
the departmental web site.

Accelerated Option Requirements
While undergraduate students, accelerated master's students
complete INTS 540 Contemporary Issues in Social Justice Human
Rights and one course chosen from the list of electives for the MAIS
concentration in social justice and human rights as indicated on their
Accelerated Master's Program Application with a minimum grade of
B in each course. Once admitted to the accelerated master's pathway,
students must maintain a minimum cumulative GPA of 3.25 in all course
work. Upon completion and conferral of the undergraduate degree in
the semester indicated in the application, they submit the Bachelor's/
Accelerated Master's Transition Form and are admitted to graduate
status.

As graduate students, accelerated master's students have an advanced
standing. They must meet all master's degree requirements except for
the two courses (6 credits) they completed as undergraduates. Students
must begin their master's program the semester immediately following
conferral of the undergraduate degree.

Reserve Graduate Credit
Students may take up to 6 additional graduate credits as reserve
graduate credit (chosen from the list of electives for the MAIS
concentration in social justice and human rights). These credits do not
apply to the undergraduate degree. The ability to take courses for reserve
graduate credit is available to all high achieving undergraduates with
the permission of the program. Permission to take a graduate course
for reserve graduate credit is normally granted only to Mason seniors
within 15 hours of graduation. See AP1.4.4 Graduate Course Enrollment
by Undergraduates (p. 79).

Integrative Studies, BS

Banner Code: LA-BS-INTS

Academic Advising
402 Enterprise Hall
Fairfax Campus
Email: sisinfo@gmu.edu
Website: integrative.gmu.edu/programs/la-bs-ints

The bachelor of science in Integrative Studies brings together research,
theory and practice across numerous disciplines. Integrative studies
majors select a multidisciplinary concentration or work with student
services staff to develop their own concentration, uniquely suited to
their academic and career goals. Integrative studies majors explore new
topics and experiences while gaining the knowledge and skills needed
to enter the workforce. Required coursework is offered in small classes
with ample room for discussion, collaborative learning, and experiential
learning, including in-community projects, volunteer opportunities, field
work, internships and work with faculty on research that directly engages
current social and global challenges.

The BS in Integrative Studies with a concentration in Applied Global
Conservation is a Green Leaf Program (p. 107).

Admissions & Policies

Policies
Students must fulfill all Requirements for Bachelor's Degrees
(p. 87) including the Mason Core (p. 142). Integrative studies students
may fulfill lower level Mason Core requirements through approved
integrative studies (INTS) coursework. Students pursuing a BS in
integrative studies must complete a minimum of 30 credits of (INTS)
coursework, with at least 15 credits at the 300 and 400 levels. These
30 INTS credits fulfill the writing intensive and synthesis Mason Core
requirements.

Students must complete ENGH 302 Advanced Composition (Mason
Core) (p. 142). A maximum of 15 credits of INTS 399 Study Abroad can
be applied to the major. Students must have a minimum GPA of 2.00 in
courses applied to the major. Before registering, students should see an
advisor to help plan their degree program to meet Mason requirements.
The advisor also can help students choose electives or a minor.

For policies governing all undergraduate degrees, see AP5 Undergraduate
Policies (p. 87).
Requirements

Degree Requirements
Total credits: minimum 120

This is a Green Leaf program.

Students should be aware of the specific policies associated with this program, located on the Admissions & Policies (p. 601) tab.

Integrative studies students complete INTS 391 Understanding Integrative Studies and choose a concentration from the options below. Before registering, students should see an advisor to help plan their degree program to meet Mason requirements. The advisor also can help students choose electives or a minor.

Required Course

Concentration in the Major
A concentration is the equivalent of a major in a traditional degree program. Students choose from an established multidisciplinary concentration below or create with faculty an individualized program of study to fit their interests and needs. Concentration coursework combines integrative studies (INTS) classes with coursework from other Mason units (departments, schools, and colleges). While fulfilling the concentration requirements, students are also responsible for completing a minimum of 30 credits of INTS coursework. Any INTS courses required for the concentration will apply. Students must present a minimum GPA of 2.00 in courses applied to the concentration.

Concentrations
- Applied Global Conservation (AGCN) (p. 602)
- Life Sciences (LIFS) (p. 603)
- Individualized Concentration (IND) (p. 605)

Applied Global Conservation (AGCN)
Total credits: 41-45

Smithsonian-Mason Semester Program
Students complete one of the options offered through the Mason Center for Conservation Studies in cooperation with the Smithsonian Conservation Biology Institute. In this integrated series of courses, taken together in one semester, students live on site at the institute in Front Royal, VA. Students who apply this coursework to the concentration cannot also apply it to the minor in Conservation Studies.

### Additional Electives

Any remaining credits may be completed with electives to bring the degree total to 120.

### Accelerated Master’s

The accelerated master’s program listed below specifies the BS in integrative studies as a feeder degree for its program. It is important to note, however, that many accelerated master’s programs are available for any bachelor’s degree at Mason, including this one. See the full list of degrees (http://catalog.gmu.edu/programs/#filter=filter_24) with accelerated programs at George Mason.

#### Bachelor's Degree (selected)/Interdisciplinary Studies, Accelerated MAIS (Social Justice and Human Rights Concentration)

**Overview**

Highly-qualified undergraduates in select majors (listed below) may apply to the accelerated master’s degree in interdisciplinary studies with a concentration in social justice and human rights (p. 542). If accepted, and depending on their undergraduate major, students will be able to earn an undergraduate degree in their chosen major and a master’s in interdisciplinary studies with a concentration in social justice and human rights after satisfactory completion of 150 credits, sometimes within five years.

For more detailed information, see AP.6.7 Bachelor’s/Accelerated Master’s Degrees (p. 93). For policies governing all graduate degrees, see AP6 Graduate Policies (p. 90).

#### Selected Majors

Anthropology (p. 497), Environmental and Sustainability Studies (p. 576), Sociology (p. 507), English (p. 370), History (p. 394), Philosophy (p. 442), Conflict Analysis and Resolution (p. 938), Psychology (p. 461), Government and International Politics (p. 972), Integrative Studies (p. 593), and Communication (p. 314).

#### Academic Advising

402 Enterprise Hall
Fairfax Campus
Website: integrative.gmu.edu/programs/la-minor-nc-lshp

This minor prepares students for transformative leadership in campus, local, national, and global contexts. Interdisciplinary and integrative classes examine leadership from multiple perspectives and disciplines, offering an understanding of socially-responsible leadership with an emphasis on community action. Through the required coursework and experiential learning, students critically examine diverse theories, research, and perspectives on leadership and are encouraged to explore topics such as social change and globalization, creative conflict resolution, the nature of power, oppression and influence, innovation, and systemic leadership. Civic engagement and multicultural competence are viewed as necessary requirements for leadership.

This minor is open to students in all academic programs, schools, and majors.

#### Faculty

Holder, Lennon, Lucas, Owen (director), Wagner
Admissions & Policies

Policies

Eight credits of coursework must be unique to the minor and students must complete all coursework with a minimum GPA of 2.00. For policies governing all minors, see AP.5.3.4 Minors (p. 90).

Requirements

Minor Requirements

Total credits: minimum of 15

Students should be aware of the specific policies associated with this program, located on the Admissions & Policies (p. 606) tab.

Multimedia Minor

Banner Code: MM

Academic Advising

402 Enterprise Hall
Fairfax Campus

Email: sisinfo@gmu.edu
Website: integrative.gmu.edu/programs/la-minor-nc-mm

In this minor, students learn how to create original work and communicate with others through the fusion of images, text, sound, and video. Students analyze and incorporate into their productions contemporary design principles and current software applications. As part of this process, students are encouraged to focus on how multimedia technologies, which offer new tools for investigating and disseminating ideas, can enhance undergraduate research and writing. These skills, now important in most academic disciplines, are also increasingly valuable not only in the specialized information technology industries, but also in business, education, and politics.

Faculty

Chung, Higgins, Martin, K. Scott, L. Smith (director), Weinberger, White

Admissions & Policies

Policies

Eight credits of coursework must be unique to the minor and students must complete all coursework with a minimum GPA of 2.00.

For policies governing all minors, see AP.5.3.4 Minors (p. 90).

Nonprofit Studies Minor

Banner Code: NPS

Academic Advising

402 Enterprise Hall
Fairfax Campus

Email: sisinfo@gmu.edu
Website: integrative.gmu.edu/programs/la-minor-ncc-nps

Nonprofit organizations significantly contribute to the provision of human services, access to the arts, education, recreation and health care, and protection of the environment. Effective nonprofit organizations provide direct services, influence public policy and build a civil society. The minor is designed to introduce students to the theoretical foundations and practical skills needed to be successful in this sector. Through heavy emphasis on experiential learning with the many excellent nonprofit organizations in our region, students learn to apply theory within the context of today’s complex and rapidly changing environment.

Social Innovation Minor

Banner Code: SINN

Academic Advising
402 Enterprise Hall
Fairfax Campus

Website: integrative.gmu.edu/programs/la-minor-nc-sinn

Many approaches to addressing social and environmental issues start from a single professional perspective. Engineers, for example, will pursue a technical solution whereas a businessperson might employ an entrepreneurial approach. While professional avenues like these are powerful, a novel method is emerging known as social innovation. Social innovators develop solutions by integrating across the professional sectors of government, business, and nonprofit in ways that open new opportunities for addressing social and environmental challenges. This interdisciplinary minor in social innovation is designed to introduce students to the foundations of social innovation and the practical techniques social innovators employ to create solutions that balance people, profit, and the planet (i.e. the triple-bottom line). Through an emphasis on experiential learning in team-based innovation projects, students will integrate theory and practice as they develop the knowledge and skills of social innovators.

Social Justice Minor

Banner Code: SOCJ

Academic Advising
402 Enterprise Hall
Fairfax Campus

Email: sisinfo@gmu.edu
Website: integrative.gmu.edu/programs/la-minor-ncc-socj

The minor engages students in both a critical examination of various forms of injustice (such as poverty, racism, and speciesism, and environmental degradation) and an exploration of strategies for creating and sustaining an equitable and just world. The minor is interdisciplinary in nature, drawing on disciplines as distinct as critical race studies, critical animal studies, and environmental science. It is designed particularly to help students consider the intersectional nature of all types of exploitation and their related movements for liberation.

Admissions & Policies

Policies
Eight credits of coursework must be unique to the minor and students must complete all coursework with a minimum GPA of 2.00. For policies governing all minors, see AP.5.3.4 Minors (p. 90).

The minor provides students with a well-grounded understanding of the nature of human consciousness, including both the historical foundations and modern research findings. Through the required coursework, students develop an ability to implement personal practices that foster deeper self-awareness, the regulation of stress factors in his or her life, and an emerging sense of meaning for his or her life. Students will learn to creatively and effectively apply principles from the exploration of consciousness and transformation to his or her own field of study.

Smithsonian-Mason School of Conservation

Smithsonian Conservation Biology Institute
1500 Remount Road
Front Royal, VA 22630
Phone: 540-635-0115 (direct)
Website: smconservation.gmu.edu
The Smithsonian Institution and George Mason University partnered to establish the Smithsonian-Mason School of Conservation (SMSC) to provide innovative education for current and future generations of global conservation professionals, leaders, and practitioners.

SMSC offers a range of residential, hands-on, interdisciplinary programs in conservation biology for undergraduate and graduate students and professionals on the grounds of SCBI in Front Royal, Virginia. Highly qualified world experts, including Smithsonian scientists, Mason faculty, and colleagues from other U.S. and international conservation organizations, provide students with direct connections to the most current teaching, research techniques, and work in the field.

Undergraduate Program

The Smithsonian-Mason Semester offers undergraduate programs in which students can earn a Conservation Studies Minor (CHSS), or apply credits to certain Mason degrees. There are currently three 16 credit programs: "Conservation, Biodiversity and Society", "Wildlife Ecology and Conservation", and "Endangered Species Conservation". See the Programs of Study section of this catalog for details on the minor and the Courses section for details on the courses (select the course prefix CONS). Grounded in natural science, this interdisciplinary semester brings public policy, sociology, conflict resolution, and global awareness to the learning environment. Students majoring in the Integrative Studies, BS, Biology, BS, Environmental Science, BS, Environmental and Sustainability Studies, BA (CHSS), Applied Science, BAS, and Global Affairs, BA can fulfill major requirements and/ or Mason Core requirements with Smithsonian-Mason Semester (CONS) credits subject to college approval.

Graduate Program

Smithsonian-Mason School of Conservation graduate courses offer in-depth explorations of advanced and highly specialized topics in applied conservation studies. Courses cover a diverse selection of topics focusing on biodiversity conservation, ranging from adaptive management to statistics in ecology and conservation, to non-invasive genetic techniques. All current courses take place as intensive one or two-week sessions and participants are in residence on the SMSC grounds in Front Royal, VA.

Although the Smithsonian-Mason School of Conservation does not presently offer a graduate degree, coursework may be applied to George Mason University’s Environmental Science and Policy, MS concentration in Conservation Science and Policy. In many cases, graduate students will have the unique opportunity to learn alongside conservation professionals currently working in the field. The unparalleled resources at the facilities draw researchers and practitioners from around the world, and this offers a rare opportunity for students and professionals to interact to mutual benefit in a hands-on situation and to receive informal mentoring from experienced practitioners.

Women and Gender Studies Program

Phone: 703-993-2896
Website: wmst.gmu.edu

By choosing to pursue work in women and gender studies, students at all levels engage in an interdisciplinary exploration of gender in social, political, cultural, and economic life; gender in history; women and the media; feminist theory; the relationship between sex and gender; the impact of sex, race, class, disability, and sexual orientation on people’s lives; and the ways in which gender stereotypes influence the self in relationship to others. Students in many courses have the opportunity to investigate these issues in a cross-cultural and global perspective.

Undergraduate Programs

The Women and Gender Studies Program offers two interdisciplinary minors. The minor in women and gender studies and the minor in LGBTQ studies are open to students from any major. Students have the opportunity to earn credit toward the minor while doing an internship that helps prepare them for the work place, a service learning course that combines work in a specific course with a service project, or research on gender issues on Mason’s campus. Students pursuing these minors can take advantage of the many activities and resources provided by the Women and Gender Studies Center.

The program also sponsors the concentration in women and gender studies in the BA in integrative studies (p. 593).

Graduate Programs

The program sponsors the concentration in women and gender studies in the master’s degree in interdisciplinary studies (p. 542) (MAIS). This concentration promotes advanced scholarship that transcends traditional boundaries. Students combine required coursework in women and gender studies with courses in a discipline of interest such as history, literature, sociology, anthropology, health, education, philosophy, social work, conflict analysis and resolution, or the arts.

The program also offers a graduate certificate in women and gender studies (p. 613). Students may take this as a stand-alone certificate or pursue it concurrently with any graduate degree program. A portion of the certificate coursework may be applied to the degree with the approval of the director of the graduate degree and dean. Students must apply and be accepted to a graduate certificate program.

Women and Gender Studies Center

The academic program in women and gender studies is integrated with the Women and Gender Studies Center. The center organizes a wide variety of lectures, conferences, workshops, and other public events
Throughout the year. The center houses a library and functions as a community space for students and faculty.

Fairfax Campus

Email: wmst@gmu.edu
Website: wmst.gmu.edu/programs/la-minor-wgst-wgst/

The minor is for students who are interested in gender, sexuality, and feminist perspectives. While it is an especially good complement to a major in the humanities, social sciences, health and human services, or natural sciences, it is open to students in any major in the university.

The interdisciplinary minor consists of two required courses and four electives. Students interested in feminist and gender issues choose their elective courses from a broad range of offerings.

Admissions & Policies

Policies

Eight credits of coursework must be unique to the minor and students must complete all coursework with a minimum GPA of 2.00. For policies governing all minors, see the Undergraduate Policies (p. 87) section of this catalog.

Requirements

Minor Requirements

Total credits: 18

Students should be aware of the specific policies associated with this program, located on the Admissions & Policies (p. 612) tab.

The graduate certificate may be taken alone or in conjunction with another graduate program. Courses applied to the certificate may be applied to a degree program, subject to approval of the director of the respective program.

Admissions & Policies

Admissions

Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in Graduate Admissions (p. 68). For information specific to the graduate certificate in women and gender studies, see Application Requirements and Deadlines (http://wmst.gmu.edu/programs/LA-CERG-WGST/application).

Policies

In accordance with university policy, students may transfer up to 3 graduate credits earned at another accredited institution to the certificate program with the approval of the director of the program and the dean. They may transfer up to 9 graduate credits earned at Mason in nondegree status toward the certificate, subject to approval of the director and the dean in accordance with university policy.

For policies governing all graduate certificates, see AP6.8 Requirements for Graduate Certificates (p. 94).

Requirements

Certificate Requirements

Total credits: 15

This certificate may be pursued on a full-or part-time basis.

Students should be aware of the specific policies associated with this program, located on the Admissions & Policies (p. 613) tab.

1 Students choose from relevant courses subject to the approval of the director. These courses may be from departments across the university that address the study of women and gender, courses in the Women and Gender Studies Program, and appropriate directed readings or independent study courses.

Capstone Portfolio

Students synthesize their work in the certificate program by reflecting on how issues, ideas, and theories raised in the core courses inform their understanding of gender issues within their area of interest. The portfolio includes three to five items produced in previous course work and a 7-10 page essay discussing them. The portfolio may include course papers, performance videos, photos of exhibits, music, or other items as agreed on by the student and advisor. The portfolio must be approved by the graduate advisor and submitted to the Women and Gender Studies Program, where it will be presented, displayed, and archived.

- Padmanabhan Seshaiyer, Associate Dean for Academic Affairs
- Martha Wescoat-Andes, Associate Dean for Administration

College Code: SC

The College of Science (COS) serves as the nexus for research and education in the natural, mathematical, and computational sciences at George Mason University. The central mission of COS is to create and disseminate scientific knowledge, provide outstanding scholarship in concert with excellent teaching, and develop the human and technical resources required to address the current and future needs of society.
Through its innovative and multifaceted educational and research mission, COS offers exciting opportunities to undergraduate and graduate students, scientists, educators, and other professionals in Northern Virginia and the national capital region.

In addition to the wide variety of undergraduate degree programs offered by its departments, COS also offers many innovative graduate degrees and interdisciplinary minors. The research strength of COS provides an essential resource to graduate and undergraduate students whose involvement in research is strongly encouraged. Many undergraduates go on to graduate school and to pursue careers in public service, nonprofit organizations, and the private sector. Graduate students engage in more specialized study at the master’s and doctoral levels, preparing them for first or second careers or job advancement and providing personal enrichment.

Faculty members are committed to teaching grounded in scholarship and research. They strive to make students rigorous thinkers and clear communicators while encouraging experimentation with new approaches and ideas. Students are thus prepared for their role as informed citizens in a complex, global society and are able to adapt to an ever-changing world.

**Requirements & Policies**

**College Policies**

Students in COS are governed by the policies and procedures of the university. Areas where the college provides additional guidance will be found in the Undergraduate Education and Graduate Education sections below.

**Accommodations for Disabled Students**

Students with documented disabilities should contact the Office of Disability Services (http://ds.gmu.edu) (703-993-2474) to learn more about accommodations that may be available to them.

**Undergraduate Education**

The college offers numerous certificates, Bachelor of Arts, and Bachelor of Science degrees. These undergraduate degrees consist of coursework in the Mason Core (p. 142), in a major area of study, and in elective courses. To earn a bachelor’s degree, students must at a minimum:

- Complete 120 credits, of which at least 45 must be in upper-level courses (numbered 300 and above).
- Complete at least one course designated as "writing intensive" (at the 300 or 400-level).
- All entering students who have not yet satisfied the Mason Core (p. 142) requirement in ‘Quantitative Reasoning’ are required to take the Math Placement Test (http://math.gmu.edu/placement_test.php) prior to enrollment.
- Students should also consult AP5 Undergraduate Policies (p. 87) for information concerning university-wide requirements for undergraduate degrees.

All students are responsible for meeting with their academic advisor and reviewing their transcripts and degree audits regularly to ensure that they are correct and meet all requirements. Transfer students are encouraged to meet with their academic advisor prior to registering for classes in order to review their transcripts and course equivalencies. In some cases, students may need to earn more than 120 credits to complete all of the requirements.

More information regarding the undergraduate programs administered by COS is available on the college’s website (http://cos.gmu.edu).

**College-level Degree Requirements**

The baccalaureate degree is designed to provide a broad knowledge of the world, develop in students the ability to think conceptually and critically, acquaint them with many different methods of inquiry, and provide skills to continue intellectual growth throughout life.

**Bachelor of Arts**

The Bachelor of Arts (BA) degree provides students with a breadth of knowledge as well as the necessary skills to make in-depth study of a major truly meaningful. In addition to the Requirements for Bachelor’s Degrees (p. 89) and the Mason Core (p. 142), students pursuing a BA degree must also complete the College Requirements for the BA Degree, and the degree program’s requirements, both listed in the specific degree program’s page.

**Bachelor of Science**

The Bachelor of Science (BS) degree provides students with a more intensive approach to the technical core knowledge and concepts in their major field of study. Therefore, this curriculum has a reduced number of courses in humanities and social sciences in comparison with the BA degree in order to allow students to achieve greater depth in their majors. Students pursuing a BS degree must complete the Requirements for Bachelor’s Degrees (p. 89), including the Mason Core (p. 142), and the requirements for their major. Requirements for each BS major are listed on the specific degree program’s page.

**Minors**

Students may elect to take a minor in addition to their major field of study. For policies governing all minors, see AP5.3.4 Minors (p. 90). Students interested in earning a minor should complete the Minor Declaration form (http://registrar.gmu.edu/forms).

**Teacher Licensure**

Degree programs that help to prepare students for teaching careers are available in the following COS programs:

- Biology, BA (p. 643)
- Biology, BS (p. 648)
- Chemistry, BA (p. 662)
- Chemistry, BS (p. 667)
- Earth Science, BS (p. 627)
- Mathematics, BA (p. 743)
- Mathematics, BS (p. 748)
- Physics, BS (p. 764)

Students who wish to become teachers and who plan to seek teacher licensure should also consult the College of Education and Human Development (p. 161) and attend an information session early in their undergraduate career. For more information, visit the Graduate School of Education’s website (http://gse.gmu.edu).

**Undergraduate Policies**

Students should become familiar with the university’s general academic policies in addition to those specific to each department. Please see AP5 Undergraduate Policies (p. 87).
Students with questions regarding exceptions to undergraduate academic policies and college-level requirements should contact the college’s Office of Academic and Student Affairs (https://cos.gmu.edu/about/contact-us) (email: ugradCOS@gmu.edu). Additional information and forms are available online from the college’s Undergraduate Student Affairs (http://cosundergrad.gmu.edu) webpage.

Registration

Students are personally responsible for correctly registering for courses and paying all tuition and fees by the official university registration and payment deadlines. Instructors do not have the authority to add students to courses. All students should verify the accuracy of their enrollment before the end of the official add period. Calendars are available on the Office of the University Registrar’s website (http://registrar.gmu.edu/calendars).

Academic Load

Students should review the university policies regarding academic load in AP.1.2 Academic Load (p. 77).

In order to be considered for an overload, students must fulfill all of the following criteria:

- Be in good academic standing,
- Have completed the prior semester with a GPA of 2.75 or higher,
- Have a cumulative GPA of 2.75 or higher,
- No grades of ‘C’ or lower in the previous semester,
- Have demonstrated in prior semesters at George Mason the ability to handle an increased and demanding course load while maintaining high performance, and
- Have no remaining incompletes ('IN') from a previous semester

Freshmen and transfer students in their first semesters are not given permission for overloads as they have yet to establish an academic record at Mason.

If approved for an overload, the student is responsible for adding the additional class(es) and paying for the related tuition and fees by the official university deadlines. Calendars are available on the Office of the University Registrar’s website (http://registrar.gmu.edu/calendars).

Excluded Courses

COS students are limited to 3 credits of coursework in Recreation (RECR) (p. 2132) activity courses which may be taken to satisfy degree requirements and applied as general elective credits toward a COS degree.

Military Science courses MLSC 400 Leadership and Management and MLSC 402 Leadership and Ethics can be used for credit toward a COS degree, but credit from other MLSC courses may not be applied toward COS degrees.

Once matriculated at Mason, students may not take CLEP exams and apply credits from those exams toward COS degrees. Students may apply credits from CLEP exams to COS degrees only if those credits were awarded and reported prior to admission.

University Consortium Registration

Students should review the university policies in AP.1.4 Special Registration Procedures (p. 77), including the University Consortium listing.

In addition, students who have failed a course at Mason are not permitted to take the equivalent course through the consortium under any circumstances. All consortium registration requests must be submitted to the Office of Academic and Student Affairs (https://cos.gmu.edu/about/contact-us) at least three weeks prior to the first day of classes for the relevant semester at Mason.

Permission to Study Elsewhere

Once enrolled in degree status at Mason, students with less than 60 hours of earned transfer credits (excluding any credits earned through the Consortium of Universities of the Washington Metropolitan Area (https://www.consortium.org) or through Mason Abroad (http://studyabroad.gmu.edu)) may take no more than 9 credits of coursework in COS disciplines at another institution.

Students with 60 or more hours of transfer credits are prohibited from taking additional coursework in COS disciplines at another institution. Students may request special permission for additional credits beyond these listed limits for summer registration if their permanent residence is more than 50 miles from Mason’s Fairfax campus. See AP.1.4.2 Permission to Study Elsewhere (p. 79) for more information.

Study Abroad

In order to be considered for study through Mason Abroad (http://studyabroad.gmu.edu), students must plan well in advance and receive prior written permission from the college’s associate dean for student affairs. Students must also meet all of the following criteria:

- Meet all eligibility criteria for their program as specified by Mason Abroad (http://studyabroad.gmu.edu), including minimum GPA requirements,
- Completed the immediately preceding semester at Mason with a GPA of 2.00 or higher, and
- Completed the necessary forms and obtained all required signatures and course equivalencies.

Mason Abroad (http://studyabroad.gmu.edu) may have higher academic standards and students must meet all eligibility requirements.

Students in danger of probation, suspension, or dismissal should plan very carefully before requesting to study abroad. Students who are not in good academic standing will not be permitted to study abroad.

Leave of Absence

Please consult AP.1.8 Undergraduate Leave of Absence (p. 81) regarding the leave of absence policy.

Withdrawals

Courses for which a withdrawal is approved receive a grade of ‘W’.

Students are responsible for all courses in which they remain officially enrolled once the drop period has ended. Please review the applicable academic calendar (http://registrar.gmu.edu/calendars) for pertinent dates.

Instructors do not have the authority to withdraw students from classes. Withdrawals require the approval of the college’s associate dean for student affairs, are typically allowed only for full semesters at a time (all enrolled courses), and are only permitted for non-academic reasons. Withdrawals cannot be approved for academic reasons. When submitting a withdrawal request, students must provide verifiable, third-party documentation for the reason for the withdrawal. Requests for
withdrawals should be submitted as early in the semester as possible, and never after the last day of classes.

Credits graded 'W' do not affect a student's GPA, but do count as attempted hours. The total attempted hours and cumulative GPA determine a student's academic standing. If the cumulative GPA is below 2.00, withdrawals may affect whether a student will be on warning, probation, suspension, or dismissal. Students should be familiar with AP.5.2.3 Student Retention Categories (p. 88).

**Academic Clemency**

Students should review the university policies regarding academic clemency in AP.5.2.9 Academic Clemency (p. 89).

In extraordinary cases, students who (a) have been absent from Mason for a minimum of three consecutive calendar years, and (b) are currently in their first semester back at the university may request that the college's associate dean for student affairs consider allowing clemency from up to 16 hours of coursework from previous semesters.

To be considered for this clemency, students must meet all of the following criteria:

- Be absent from Mason for a minimum of three consecutive calendar years,
- Provide a detailed explanation for why they were unsuccessful in those courses and how they have made changes to ensure their academic progress upon their return,
- Submit their request within 12 months of the first day of the re-enrollment term,
- In order to make this request, students should
  a. Enroll in at least 6 hours during their first 12 months back at Mason and
  b. Earn a minimum GPA of 2.50 each semester back prior to making the clemency request, with no grade below 2.00.

If these minimum academic requirements are not met during the first semester of return, then clemency will not be allowed under any circumstances.

**Appeals Process**

Students may appeal departmental decisions concerning academic actions to COS Office of Academic and Student Affairs (https://cos.gmu.edu/about/contact-us). They may further appeal the decisions of COS Office of Academic and Student Affairs (https://cos.gmu.edu/about/contact-us) to the Dean's Council, a committee composed of college deans and faculty members. These levels of appeal are subject to the limits below concerning the final level of appeal for each type of academic action. Students who feel that the college appeal process was conducted unfairly may appeal to the Office of the Provost as specified in Student Rights and Responsibilities (p. 101).

Grade appeals should first be made to the department or program, following the process specified in AP.3.9 Grade Appeals (p. 85). If they are resolved within the department or program, that is the final level of appeal. The departmental decision may be appealed to the college's associate dean for student affairs only on the basis of procedural irregularity. Such appeals should be made through the COS Office of Academic and Student Affairs (https://cos.gmu.edu/about/contact-us). If the grade appeal is not resolved within the department or program, the chair makes a recommendation to the college's associate dean for student affairs, who makes the final determination. The decision of the associate dean is not subject to review or further appeal.

Departments set the requirements for the majors and minors that they administer. Substitutions and waivers of requirements require the approval of COS Office of Academic and Student Affairs (https://cos.gmu.edu/about/contact-us). When a department denies a substitution or waiver of a requirement, this decision may be appealed to the COS Office of Academic and Student Affairs (https://cos.gmu.edu/about/contact-us) on the basis of procedural irregularity only, and is the final level of approval.

The Dean's Council is the final level of appeal for course overloads, consortium registration, study elsewhere, and withdrawals after the drop deadline within the semester.

The college's associate dean for student affairs is the final level of appeal for COS college-level requirements, retroactive adds, withdrawals, graduation, and return from suspension and dismissal.

There is no waiver or appeal of satisfactory performance standards (minimum grades or grade point average, GPA) that have been set by the department or program faculty for the courses in their major or minor.

Students should file all appeals in a timely manner, usually within the semester in which the original decision is rendered, but no later than the final day of classes in the following semester.

**Grievances**

Grievances should be directed in writing to the college's associate dean for student affairs. The COS Office of Academic and Student Affairs (https://cos.gmu.edu/about/contact-us) may also provide guidance to students on how to resolve their concerns.

**Transfer Students**

Admitted and enrolled transfer students who have completed an AA, AS, or AA&S degree from the Virginia Community College System (VCCS) and have been offered admission to Mason by the Office of Admissions (https://www2.gmu.edu/admissions-aid) may be eligible for a waiver of all of Mason's lower level Mason Core (p. 142) requirements in accordance with the Guaranteed Admission Agreement. Students eligible for this waiver are still required by the university to complete ENGH 302 Advanced Composition (Mason Core) (p. 142) and a synthesis course. Transfer students who have been offered admission under the terms of the Guaranteed Admission Agreement and are pursuing a degree in the college are considered to have met all college requirements except for proficiency in a foreign language (required of BA students).

Students with a bachelor's degree from an accredited institution who are pursuing a BA degree in COS are also considered to have met all college requirements except for proficiency in a foreign language.

**Graduate Education**

COS offers numerous graduate certificates, master's programs, and doctoral programs; the requirements for each can be found in the program's description in this catalog. More information regarding the college's graduate programs is available on the college's website (https://cos.gmu.edu/academics/graduate-academics).

**Graduate Admission**

Admissions decisions are made by the faculty committee in the respective graduate program. Denial of admission is not subject to
appeal. Further information can be found in Graduate Admission Policies (p. 68).

**Provisional and Conditional Admission**
Provisionally admitted students are not eligible to participate in any consortium coursework, studying at another institution, or study abroad programs until the conditions of the provisional contract have been met. Transfer of credit requests for coursework taken in non-degree status at Mason or another institution will not be considered until the provisional contract has been fulfilled. Further information on provisional admission can be found in Graduate Admissions Policies (p. 68).

Details on conditional admission, the need for additional requirements to be met before enrollment, can be found in Graduate Admission Policies (https://catalog.gmu.edu/admissions/graduate-policies/#text).

**Non-degree Enrollment**
COS gladly admits qualified students for non-degree studies. Some of the factors that are considered by COS while making non-degree admissions decisions include: previous academic performance, professional experience, and academic fit. To apply, applicants are to complete the non-degree George Mason University Graduate Application (https://www2.gmu.edu/admissions-aid/apply-now) and provide official transcripts from all institutions attended. Further information can be found in Non-degree Enrollment (p. 74) and on the Office of Admissions’ website (http://admissions.gmu.edu/nonDegree).

Upon admission to graduate non-degree studies, students are considered graduate students and are charged tuition accordingly (regardless of the course’s level). COS permits up to 12 credits of relevant graduate coursework earned in non-degree status to be considered for transfer into many of its graduate programs.

**Reduction of Credits**
Students accepted into a master’s or doctoral program who have earned a degree in a relevant field from a regionally accredited institution may be eligible for a credit reduction. Students must request a reduction of credit from the graduate program director of their graduate program; reductions must be approved by both the graduate program director and the college’s associate dean for student affairs. Further details and related restrictions can be found in AP6.5.2 Reduction of Credits (p. 91).

**Transfer of Credit**
Graduate credit earned prior to admission may be eligible to apply toward a graduate certificate or degree program. Details and related restrictions can be found in AP6.5.3 Transfer of Credit (p. 92). Additionally, courses with grades of ‘P’ or ‘S’ are not accepted for transfer unless the official transcript indicates that the grade is equivalent to a 3.00 (‘B’) or better. Some programs have more stringent standards regarding a transfer of credit; students should contact their graduate program for specific information.

**Credit from Other Institutions (Permission to Study Elsewhere)**
Students enrolled in a degree program may take graduate courses at another regionally accredited institution and apply these credits to a master’s or doctoral degree with prior approval. Details and related restrictions can be found in AP6.5.4 Permission to Study Elsewhere (p. 92). Students enrolling in courses at other institutions with different drop/add timetables must still abide by Mason’s drop/add deadlines in terms of acquiring necessary approvals.

**Academic Load**
Graduate students can enroll in up to 12 credits each semester; non-degree graduate students can enroll in up to 10 credits each semester. Students should review the university’s policies in AP1.2 Academic Load (p. 77).

**University Consortium**
Students should review university policies regarding the University Consortium under AP1.4.9 University Consortium (p. 80).

In addition, in order to register for a consortium course, students must have an overall GPA of at least 3.00 and be in good academic standing. Students with grades of ‘IN’ on their record or who earned grades of ‘C’ or ‘F’ in the most recent semester are not eligible to register for a consortium course. Students who have received a grade less than 3.00 in a consortium course are not permitted to enroll in additional consortium courses. Newly admitted graduate students are not permitted to enroll in consortium courses during their first semester of graduate study. Students who wish to enroll in consortium courses during their second semester of study must wait until the grades for the previous semester have been posted.

**Dissertation Committee**
The college follows university policies regarding dissertation committees. Please see AP6.10.5 Dissertation Committee (p. 97). Please note that some programs within COS may have a more stringent policy.

**Dissertation (998/999) Registration**
Most programs within the college follow university policies regarding dissertation registration; please see AP6.10.6 Dissertation Registration (998, 999) (p. 98). Some departments may require additional requirements.

**Time Limit for Doctoral Students**
The college follows university policies regarding doctoral time limits. Please see AP6.10.1 Time Limit (p. 97). If your catalog term was before this current catalog, please visit the archived catalogs page (http://catalog.gmu.edu/archives) and find your catalog term’s policy on time limits.

Requests for extension of time limits must be submitted in writing to the college’s associate dean for student affairs. The request should explain the extenuating circumstances that prevented timely completion of the degree, corrective action that has been taken to address those circumstances, and a time line for completing the work within the limits of the extension. The request should include a letter from the student’s graduate program director indicating the program’s support for the extension and confirmation that the work can be completed within the limits of the extension.

**Graduate Appeals of Termination**
All graduate students should be familiar with the university’s polices on termination; please see AP6.6.2 Academic Termination (p. 92). Students who meet the criteria for academic termination may submit a written appeal to the college’s associate dean for student affairs. Appeals should include all relevant information on the basis for appeal, as well as any appropriate documentation and a letter of support from the graduate program.
Appeals of termination are reviewed by the college’s associate dean for student affairs with input from appropriate faculty within the student’s department. The ruling represents the college’s final decision.

**Academic Units**

- Department of Atmospheric, Oceanic and Earth Sciences
- Department of Biology
- Department of Chemistry and Biochemistry
- Department of Computational and Data Sciences
- Department of Environmental Science and Policy
- Department of Geography and Geoinformation Science
- Department of Mathematical Sciences
- Department of Physics and Astronomy
- Forensic Science Program
- Interdisciplinary Program in Neuroscience
- School of Systems Biology

**Programs**

- Advanced Biomedical Sciences Graduate Certificate
- Pre-Medical Undergraduate Certificate
- Scientific Leadership and Practice Minor

**Note:**

See individual academic units (p. 618) within the college for additional program offerings.

**Advanced Biomedical Sciences Graduate Certificate**

**Banner Code:** SC-CERG-ABS

**Academic Advising**

308 Bull Run Hall
Science and Technology Campus

Website: cos.gmu.edu/georgesquared/

The Advanced Biomedical Sciences (ABS) graduate certificate is a program offered jointly by George Mason University and Georgetown University Medical Center (GUMC) (http://gumc.georgetown.edu). This program is designed for students who have all of their core coursework and extracurricular prerequisites for medical, dental or other health-related fields, but otherwise have a comparatively limited science background (non-science majors with only the pre-health curricular core, for example), modest grades in the sciences as undergraduates, and/or also need to improve their Medical College Admission Test, Dental Admission Test, or other pre-professional scores. This is a 9-month full-time program that begins each fall semester. Most classes are held at George Mason University’s Science and Technology Campus in Manassas, Virginia with cadaveric anatomy labs held at GUMC.

The graduate certificate may be pursued on a full-time basis in either a lecture-based format or a hybrid format using recorded lectures and a discussion-based classroom experience. The program is premium-priced with no tuition distinction between the in-state or out-of-state residency status.

This certificate program qualifies for Title IV Federal Financial Aid. For more information about program graduation rates, the median debt of students who completed the program, and other important information, please visit our disclosure information page. (https://irr2.gmu.edu/gedt/Advanced_Biomedical_Sciences/Gedt.html)

**Affiliated Faculty**

Banerjee, Partha; Castilla, Marina; Djakiew, Daniel; Downey, Ryan; Johnson, Michael; Mulroney, Susan; Myers, Adam; Notario, Vicente; Whitney, Jennifer

**Admissions & Policies**

**Admissions**

University-wide admissions policies can be found in Graduate Admissions Policies (p. 68).

To apply for this program, please complete the George Mason University Admissions Application (https://www2.gmu.edu/admissions-aid/apply-now).

Applicants are expected to have a bachelor’s degree from a regionally accredited university, the desire to pursue a career in medicine, dentistry, or other health-related career; completion of all of the prerequisite courses for medical or dental school (one year each of biology, chemistry, organic chemistry, physics and math), and overall credentials suitable for acceptance to graduate programs in the College of Science at George Mason University and the Georgetown University Graduate School of Arts and Sciences.

**Policies**

For policies governing all graduate programs, see AP 6 Graduate Policies (p. 90).

**Requirements**

**Certificate Requirements**

Total credits: 20

This certificate may be pursued on a full-time basis only.

Students should refer to the Admissions & Policies (p. 618) tab for specific policies related to this certificate.

Pre-Medical Undergraduate Certificate

Banner Code: SC-CERB-PMCL

Donna M. Fox, Ph.D.
Phone: 703-993-9532

The Pre-Medical Undergraduate Certificate is a premium program offered to enlisted members of the U.S. military who are chosen specifically from a federal program referred to as EMDP2 (Enlisted to Medical Degree Preparatory Program). This is a post-baccalaureate program aimed at active duty military enlisted members who have earned a bachelor’s degree from a regionally accredited institution with a minimum cumulative GPA of 3.0, who have experience working in a health-related position in the military, and who meet all other requirements specified by the Uniformed Services University of the Health Sciences (USU) (https://www.usuhs.mil), and who are interested in matriculating at the Uniformed Services University (military medical school) or another US accredited medical school. Only those individuals who are supported by EMDP2 are eligible to enroll in the Pre-Medical Undergraduate Certificate.

The Pre-Medical Undergraduate Certificate will provide a one-year undergraduate program that will allow qualified individuals to complete undergraduate pre-medical admissions requirements as currently specified by the American Association of Medical Colleges (AAMC).

This is a full-time program offered during the day and located at the Science and Technology Campus of George Mason University. Students are selected by the US military and are admitted as a cohort in the fall semester only.

Admissions & Policies

Admissions

University-wide admissions policies can be found in the Undergraduate Admissions Policies (p. 65) section of this catalog.

Applicants must be active duty military and selected by the EMDP2. Students are expected to have a bachelor’s degree from a regionally accredited university and the desire to pursue a career in military medicine.

Applicants who do not meet the admissions requirements for this certificate may be interested in learning about the Career Changer’s Biological Sciences Undergraduate Certificate (p. 655).

Policies

For policies governing all undergraduate programs, see AP.5 Undergraduate Policies (p. 87).

Certificate Requirements

Total credits: minimum 38

This certificate may be pursued on a full-time basis only.

Students should refer to the Admissions & Policies (p. 619) tab for specific policies related to this certificate.

Scientific Leadership and Practice Minor

Banner Code: SCLP

Academic Advising

Phone: 703-993-4594
Email: aacos@gmu.edu

This minor has been designed to build scientific communication, engagement, and leadership practices so that students are (i) equipped to communicate effectively about the science they undertake and the challenges they face in ways that are meaningful in relation to their field of study, and (ii) equipped with the skills to participate and lead others in scientific ventures.

Admissions & Policies

Policies

Eight credits of coursework must be unique to the minor. For policies governing all minors, see AP.5.3.4 Minors (p. 90).

Requirements

Minor Requirements

Total credits: 16-20
Students should refer to the Admissions & Policies tab for specific policies related to this program.

**Department of Atmospheric, Oceanic and Earth Sciences**

Phone: 703-993-5394  
Website: aoes.gmu.edu

Scientists and students in the Department of Atmospheric, Oceanic, and Earth Sciences (AOES) are working to better understand our planet in myriad ways, from improving numerical model predictions of next year’s atmospheric temperature to explaining geological strata laid down in previous eras, from monitoring water transport through the atmosphere to modeling water movement at the bottom of the ocean.

AOES is home to active research programs and to a doctoral program in Climate Dynamics (p. 623), a master’s degree in Earth Systems Science (p. 633), undergraduate degrees in Atmospheric Science (p. 621), Earth Science (p. 627), and Geology (p. 634), and undergraduate minors in Atmospheric Science (p. 623), Earth Science (p. 632), Ocean and Estuarine Science (p. 639), and Paleontology (p. 640). The department has close ties to the Center for Ocean-Land-Atmosphere Studies (COLA) (http://cola.gmu.edu).

The undergraduate program in atmospheric sciences gives students a strong quantitative undergraduate education in atmospheric, climate, and related sciences to understand the basic principles behind current and emerging issues in weather, climate variability, and climate change. Students completing the atmospheric sciences degree will be prepared for a full range of career paths including forecast and analysis, operations and research support in meteorology, atmospheric sciences, and climate. The curriculum meets the American Meteorological Society’s (https://www.ametsoc.org/ams) recommendations for a bachelor’s degree in atmospheric sciences.

Admissions & Policies

Admissions

University-wide admissions policies can be found in the Undergraduate Admissions Policies (p. 65) section of this catalog.

To apply for this program, please complete the George Mason University Admissions Application (https://www2.gmu.edu/admissions-aid/apply-now).

Policies

Students must fulfill all Requirements for Bachelor’s Degrees (p. 89), including the Mason Core (p. 142).

The university’s writing intensive requirement for the major will be met upon successful completion of CLIM 408 Senior Research.

For policies governing all undergraduate degrees, see AP.5 Undergraduate Policies (p. 87).

Requirements

Degree Requirements

Total credits: minimum 120

Students should refer to the Admissions & Policies (p. 621) tab for specific policies related to this program.

A GPA of at least 2.00 is required for all core courses, with an overall GPA of at least 2.50.

Options

Students in the atmospheric sciences major will select one of the following options in addition to the required courses above. These options reflect faculty expertise and provide two areas of research emphasis. The options will help in creating educated professionals who have the requisite training to support future weather and climate research, enabling the graduate’s potential for providing substantial societal benefits.

Meteorology Option

This option is designed for students who are primarily interested in weather and weather forecasting. The required classes in this option emphasize atmospheric phenomena, especially those that have the greatest impact on society.

Total Credits 9

Mason Core and Elective Credits

In order to meet a minimum of 120 credits, this degree requires an additional 48-49 credits (dependent upon the course chosen for the Computer Science requirement), which may be applied toward any remaining Mason Core (p. 142) requirements (outlined below), Requirements for Bachelor’s Degrees (p. 89), and electives. Students are strongly encouraged to consult with their advisors to ensure that they fulfill all requirements.

Mason Core

Some Mason Core (p. 142) requirements may already be fulfilled by the major requirements listed above. Students are strongly encouraged to consult their advisors to ensure they fulfill all remaining Mason Core (p. 142) requirements.

Dr. Cristiana Stan, Undergraduate Coordinator and Associate Professor
Research Hall, Room 267
Fairfax Campus
Phone: 703-993-5391
Email: cstan@gmu.edu
Website: cos.gmu.edu/aoes/academics/undergraduate-programs/

Topics of study in this minor include weather forecasting, climate change, and the predictability of coupled ocean-atmosphere-land-variations. Students in physics, math, engineering, and computational sciences may be particularly attracted to this minor because it provides a compelling application of the fundamental methods of analysis learned in their major. Such students are ideal candidates for research in atmospheric science and climate dynamics; the minor will facilitate entry into graduate studies in these fields.

Students in Earth science, geography and geoinformation science, and environmental science may find this minor useful because the atmosphere is an important influence on geography, ecosystems, geological strata, and plays an important role in global change.

This is a Green Leaf program (p. 107).

Admissions & Policies

Policies

Eight credits of coursework must be unique to the minor. For policies governing all minors, see AP5.3.4 Minors (p. 90).

Climate Dynamics, PhD

Banner Code: SC-PHD-CLIM

Dr. Barry Klinger, Graduate Coordinator

116 Research Hall
Fairfax Campus
Phone: 703-993-9227
Email: bklinger@gmu.edu
Website: cos.gmu.edu/aoes/academics/climate-dynamics-graduate-program/

The mission of this program is to train the next generation of scientists in climate dynamics and related fields. Through a comprehensive grounding in coursework, our students learn about how the atmosphere, ocean, and land surface work together to determine the climate. In collaboration with internationally-known scientists, students conduct independent work to further our understanding of climate, how it varies, and how much of it we can predict. Tools in the program include cutting-edge climate models, superb computing facilities, sophisticated statistical techniques, and comprehensive data sets. Our graduates have gone on to work at top laboratories and universities.

Understanding climate variability and predictability poses difficult mathematical, computational, and observational questions that have generated increasing intellectual excitement in recent years. Climate variability has important ramifications for society, from planning for
Climate Dynamics, PhD

next year’s electrical demand and forecasting agricultural production to answering complex questions involving long-term change in global climate, sea level, and biodiversity. While it is impossible to predict day-to-day weather more than a few weeks in advance, progress in predicting El Niño supports the idea that seasonal averages of temperature, rainfall, and other factors may be at least partly predictable months or even years in advance. Likewise, there is a strong scientific basis for predicting long-term changes in global climate due to changing greenhouse gas concentrations.

Climate dynamics faculty members have a blend of expertise in dynamics, statistics, and computational methods. They are heavily involved with national and international collaborations. Faculty members and students work closely with scientists at the Center for Ocean-Land-Atmosphere Studies (COLA) (http://cola.gmu.edu/cola.html), a national leader in climate modeling.

Faculty research focuses on the areas of climate prediction and predictability, climate variability, coupled ocean-atmosphere-land dynamics, and dynamical systems and retrospective analysis. Recent research topics include predictability of weather and climate; modeling of the complex climate system; El Niño dynamics; monsoons; atmosphere-ocean interaction; land-climate interaction; decadal climate variability; ocean circulation theory; and climate change.

This has been designated a Green Leaf program (p. 107).

Admissions & Policies

Admissions

University-wide admissions policies can be found in the Graduate Admissions Policies (p. 68) section of this catalog.

To apply for this program, please complete the George Mason University Admissions Application (https://www2.gmu.edu/admissions-aid/apply-now).

Applicants should have demonstrated a high aptitude for quantitative reasoning, applied mathematics, and physical science. Applicants should have an undergraduate degree from a regionally accredited institution with a GPA of at least 3.00 in undergraduate work, and a GRE verbal plus quantitative score of 301 (1,100 on the old scale). To apply, prospective students should submit a completed George Mason University Admissions Application (https://www2.gmu.edu/admissions-aid/apply-now), a current résumé, three letters of recommendation, an expanded goals statement, and two copies of official transcripts from each college and graduate institution attended. An official report of scores obtained on the GRE-GEN should also be officially reported by ETS (https://www.ets.org). The GRE requirement for admission to the doctoral programs can be waived if the student holds a master’s degree from a regionally accredited U.S. institution. TOEFL scores are required of all international applicants who have not completed a master’s degree in the United States.

Policies

For policies governing all graduate programs, see AP 6 Graduate Policies (p. 90).

Reduction of Credit

For students entering the doctoral program with a master’s degree in a related field from a regionally accredited institution, the number of required credits may be reduced up to 30 credits, subject to approval of the program faculty and the college’s associate dean for student affairs. See AP 6.5.2 Reduction of Credits (p. 91) for more information.

Requirements

Degree Requirements

Total credits: 72

This is a Green Leaf program.

Eligibility for Qualifying Exams

Satisfactory progress in the program is demonstrated by adequate research progress (as attested by the advisor) and by the student attaining a B- or higher in all CLIM courses and on the final exams of the “Core Climate” courses (CLIM 610 Introduction to the Physical Climate System, CLIM 614 Land-Climate Interactions, CLIM 711 Introduction to Atmospheric Dynamics, CLIM 712 Physical and Dynamical Oceanography, and CLIM 751 Predictability and Prediction of Weather and Climate).
Oceanography). If any of these conditions are not met, the director of the Climate Dynamics program convenes a faculty committee to recommend whether the student should continue in the program. The director makes the final decision based upon input from the committee. A student who is allowed to continue in the program may, in a later semester, retake any Core Climate final exam in which the student’s score was below B-.

To be eligible for CLIM 997 Doctoral Qualification, students must have received a B- or higher on the final exam of each of the four Core Climate courses. Students who have taken the equivalent of any of these courses must take the Core course’s final exam even if they do not take the course.

**Qualifying Exams**

Students take a qualifying exam by enrolling in CLIM 997 Doctoral Qualification. Students pass the exam by demonstrating an ability to analyze scientific problems, identify an open scientific question in climate dynamics, and outline a methodology to answer the question.

Students take CLIM 997 Doctoral Qualification in their second spring semester in the program. Students who enter in the spring have the option of taking it in their 2nd or 3rd spring semester.

**Advancement to Candidacy**

A grade of A or B in CLIM 997 Doctoral Qualification allows a student to begin work on a Climate Dynamics doctoral dissertation by enrolling in CLIM 998 Doctoral Dissertation Proposal. Once a dissertation committee approves the dissertation proposal and the student completes all non-dissertation program requirements, the student is formally advanced to doctoral candidacy.

**Dissertation Research and Defense**

After approval of the dissertation proposal, students are formally advanced to doctoral candidacy and produce the dissertation while taking CLIM 999 Doctoral Dissertation. The degree’s requirements will be fulfilled upon completion of the required coursework and approval of a dissertation that makes an original and significant contribution to the field.

No more than 24 combined credits from CLIM 998 Doctoral Dissertation Proposal and CLIM 999 Doctoral Dissertation may be applied toward satisfying doctoral degree requirements, with no more than 21 credits of CLIM 998 Doctoral Dissertation Proposal.

**Climate Science, MS (pending SCHEV approval)**

**Banner Code:** SC-MS-CLIS

**Dr. Barry Klinger, Graduate Coordinator**

109 Research Hall
Fairfax Campus
Phone: 703-993-9227

Email: bklinger@gmu.edu
Website: cos.gmu.edu/aoes/

**Note:** As of catalog publication in April, the program described below has been approved by the Board of Visitors and sent to the State Council of Higher Education in Virginia (SCHEV) for consideration as a new degree program. The university cannot accept applications or enroll students in this program until SCHEV approval has been granted.

The understanding of climate science is essential to the interpretation of modern climate variations and the measurement of their impact. Climate data must be analyzed and interpreted in order to formulate useful responses and plan actions to meet specific climate challenges. The MS in Climate Science educates students to be climate professionals who can analyze and model advanced climate data. Students in the program learn to solve quantitative problems about atmospheric properties and variability, fluid dynamics, and the role of the ocean and land surface in climate. Students choose a concentration in either Climate Modeling or Climate Data to gain specific skills to understand and predict climate variations.

The program encourages applications from students with diverse backgrounds in physical science, mathematics, and engineering. Students with atmospheric science or meteorology degrees can deepen their understanding, enhance relevant computer skills, and gain insight into climate as a multi-component system. Students with physics, math, or other degrees will find that climate provides compelling applications of their mathematical and computational skills. All students will be taught by faculty of the Atmospheric, Oceanic, and Earth Sciences Department (https://catalog.gmu.edu/colleges-schools/science/atmospheric-oceanic-earth-sciences) and the Center for Ocean-Land-Atmosphere Studies (http://cola.gmu.edu), which includes scientists doing pioneering work in climate dynamics, climate modeling, predictability, and statistical analysis of climate data.

**Admissions & Policies**

**Note:** As of catalog publication in April, the program described below has been approved by the Board of Visitors and sent to the State Council of Higher Education in Virginia (SCHEV) for consideration as a new degree program. The university cannot accept applications or enroll students in this program until SCHEV approval has been granted.

**Admissions**

University-wide admissions policies can be found in the Graduate Admissions Policies (p. 68) section of this catalog.

To apply for this program, please complete the George Mason University Admissions Application (https://www2.gmu.edu/admissions-aid/apply-now).

Admission requirements include:

- An earned baccalaureate degree from a regionally accredited institution of higher education, or international equivalent, verified from official transcripts.
- A minimum 3.00 GPA on a 4.00 scale in baccalaureate study.
- Complete the online application and submit all required materials.

Program admission decisions give preference to students with an undergraduate degree in physical science, mathematics, or engineering.
Students with other undergraduate degrees should consult with the program’s administration regarding the suitability of their undergraduate preparation.

### Requirements

**Note:** As of catalog publication in April, the program described below has been approved by the Board of Visitors and sent to the State Council of Higher Education in Virginia (SCHEV) for consideration as a new degree program. The university cannot accept applications or enroll students in this program until SCHEV approval has been granted.

### Degree Requirements

Total Credits: 30

Students must complete the Core Climate Courses, Seminar Course, and Thesis and Elective Courses sections, and in addition, choose one concentration:

Unrestricted, graduate-level elective courses may be chosen from the following prefixes: Climate Dynamics (CLIM) (https://catalog.gmu.edu/courses/clim), Mathematics (MATH) (https://catalog.gmu.edu/courses/math), Computational and Data Sciences (CDS) (https://catalog.gmu.edu/courses/cds), Computational Science and Informatics (CSI) (https://catalog.gmu.edu/courses/csi), Computational Social Science (CSS) (https://catalog.gmu.edu/courses/css), Geography and Geoinformation Science (GGS) (https://catalog.gmu.edu/courses/ggs), or chosen from the Climate- Relevant elective list (below).

Other courses can be approved by the graduate coordinator.
Earth Science, BS

Banner Code: SC-BS-ESCI

Dr. Stacey Verardo, Undergraduate Coordinator and Professor

3451 Exploratory Hall
Fairfax Campus

Phone: 703-993-1045
Email: sverardo@gmu.edu
Website: cos.gmu.edu/aoes/academics/undergraduate-programs/

This degree is intended for students interested in studying the Earth and its processes. Students receive a broad background in the Earth sciences and select one of five specialty concentrations. The concentrations in Earth Surface Processes, Environmental Geoscience, Geology, and Paleontology are solely offered by the Department of Atmospheric, Oceanic and Earth Sciences (p. 620). The concentration in Oceanography and Estuarine science is offered jointly with the Department of Environmental Science and Policy (p. 687), where specific advising is also available.

This is a Green Leaf program (p. 107).

**Teacher Licensure**

Students who wish to become teachers and plan to seek teacher licensure should consider the following options:

- Curriculum and Instruction Undergraduate Certificate (p. 166)
- Earth Science, BS/Curriculum and Instruction, Accelerated MEd (Secondary Education Earth Science concentration) (p. 631)

Interested students should attend an information session early in their undergraduate career. For more information, visit the Graduate School of Education’s website (http://gse.gmu.edu).

**Admissions & Policies**

**Admissions**

University-wide admissions policies can be found in the Undergraduate Admissions Policies (p. 65) section of this catalog.

To apply for this program, please complete the George Mason University Admissions Application (https://www2.gmu.edu/admissions-aid/apply-now).

**Policies**

Students must fulfill all Requirements for Bachelor’s Degrees (p. 89), including the Mason Core (p. 142).

For policies governing all undergraduate degrees, see AP.5 Undergraduate Policies (p. 87).

**Writing Intensive Requirement**

GEOL 317 Geomorphology fulfills the writing intensive requirement for this major, with the exception of:

- The Environmental Geoscience Concentration, whereby GEOL 305 Environmental Geology fulfills the writing intensive requirement.
• The Paleontology Concentration, whereby GEOL 334 Vertebrate Paleontology fulfills the writing intensive requirement.

Requirements

Degree Requirements

Total credits: minimum 120

This is a Green Leaf program.

Students should refer to the Admissions & Policies (p. 627) tab for specific policies related to this program.

Students must complete all coursework with a minimum GPA of 2.00.

Concentration in Environmental Geoscience (EVGS)

This concentration provides the tools for applying geologic information (on soils, rocks, water, weather, and landscapes) to contemporary environmental problems (including: pollution, waste management, resource extraction, natural hazards, land-use, habitat restoration, species preservation, and human health). Environmental geoscience
studies the physical environment in which biological interactions take place, whereby aiding the understanding of ecology. Students choosing this concentration must complete the following coursework:

<table>

Total Credits 34

Concentration in Oceanography and Estuarine Science (OEST)

This concentration provides students with a comprehensive knowledge of oceanography. Additional coursework in physical and chemical oceanography give insight into the aquatic environment and its link to both ecosystems and climate. Within the concentration, students can choose an Open Ocean or Coastal Ocean option. The curriculum will emphasize local and regional case studies, in particular the Chesapeake Bay. The program will provide students with the basic training required to allow them to obtain entry level positions in oceanographic and estuarine career tracks or an appropriate graduate degree program. Students choosing this concentration must complete the following coursework:

<table>

Additional recommended course:

RECR 161 Scuba Diving: Basic 2

1 When topic is Coral Reef Ecology
2 When topic is Exploring Underwater Ecology.

Concentration in Paleontology (PLEO)

This concentration focuses on a broad understanding of Earth's history and the evolution of life on Earth as revealed through the fossil record. Fundamental concepts, methods and techniques of historical geology and paleontological data and analysis are also examined. This concentration may not be taken in conjunction with the Paleontology Minor (https://catalog.gmu.edu/colleges-schools/science/atmospheric-oceanic-earth-sciences/paleontology-minor). Students choosing this concentration must complete the following coursework:

<table>
<thead>
<tr>
<th>Code</th>

Total Credits: 36-39

1 Fulfills writing intensive requirement for this concentration only.

Mason Core and Elective Credits

In order to meet a minimum of 120 credits, this degree requires additional credits (specific credit counts by concentration are shown below), which may be applied toward any remaining Mason Core (p. 142) requirements, Requirements for Bachelor's Degrees (p. 89), and elective courses. Students are strongly encouraged to consult with their advisors to ensure that they fulfill all requirements.

- EP concentration: 43-49 credits
- EVGS concentration: 38-45 credits
- GEOL concentration: 45-46 credits
- OEST concentration: 45-48 credits
- PLEO concentration: 40-44 credits

Mason Core

Some Mason Core (p. 142) requirements may already be fulfilled by the major requirements listed above. Students are strongly encouraged to consult their advisors to ensure they fulfill all remaining Mason Core (p. 142) requirements.

Total Credits: 40
Honors

Honors in the Major
Earth science and geology majors who have completed 16 credits of math and science, including GEOL 302 Mineralogy with a GPA of 3.00 or higher are eligible to enter the departmental honors program. Transfer students who have an incoming GPA of 3.10 or higher in math and science and a grade of 'B' or better in GEOL 302 Mineralogy are also eligible. To graduate with honors in Earth Science, students are required to maintain a minimum GPA of 3.00 in math and science courses and complete one of the two following sets of courses with an average GPA of 3.50 or better:

<table>
<thead>
<tr>

Accelerated Master's

Bachelor's Degree (selected)/Environmental Science and Policy, Accelerated MS

Overview
This degree option allows highly qualified George Mason University students to earn an Environmental Science and Policy, MS (p. 696) in less time than if they had first graduated with an environmentally-focused Green Leaf-designated (p. 107) BA or BS degree and then applied to the MS program sequentially.

For more detailed information, see AP6.7 Bachelor's/Accelerated Master's Degrees (p. 93). For policies governing all graduate programs, see AP6 Graduate Policies (p. 90).

Admission Requirements
Students with an overall GPA of at least 3.20 who are pursuing any Green Leaf-designated (p. 107) major or minor may apply for provisional acceptance into this accelerated master's program after completing two semesters of chemistry (including CHEM 211 General Chemistry I (Mason Core) (p. 142) and CHEM 212 General Chemistry II (Mason Core) (p. 142) and three semesters of biology, including a course in ecology, or the equivalent, for example:

</tr>
</tbody>
</table>

By the beginning of the undergraduate's senior year, they should first submit a Graduate Application for Accelerated Master's Program form (obtained from the Office of Academic and Student Affairs (https://cos.gmu.edu/about/contact-us)). Secondly, in their senior year accelerated master's students must complete the two graduate courses indicated on their Accelerated Master's Program Application with a minimum grade of 3.00 in each course. They must maintain a minimum GPA of 3.00 in all coursework and in coursework applied to their major. Upon completion and conferral of the undergraduate degree in a Green Leaf-designated (p. 107) program, in the semester indicated in the application, they must additionally submit the Bachelor's/Accelerated Master's Transition form (found on the Office of the University Registrar website (http://registrar.gmu.edu/forms)) and will subsequently be admitted into graduate status.

By at least the beginning of their senior year, they should seek out a faculty member in the Department of Environmental Science and Policy (p. 688) who is willing to serve as their advisor. This advisor will aid the student in choosing the appropriate graduate courses to take and help to prepare the student for graduate studies. Admission into a research-oriented master's concentration is dependent upon securing the agreement of a faculty advisor. Faculty from a variety of departments and colleges at George Mason (called "program faculty") can serve as master's advisors. Potential students are encouraged to speak with the graduate program coordinator in the department to obtain guidance on this issue.

Application Requirements
Applicants to all graduate programs at Mason must meet the admission standards and application requirements for graduate study as specified in the Graduate Admission Policies (p. 68) section of this catalog, excluding the GRE exam requirement (which is not required for those enrolled in the accelerated program). This includes three letters of recommendation (at least one from a former professor or someone with a PhD), a recent resume, a statement of interest/research goals and interests (including information on the candidate's proposed MS research), and a letter from their advisor stating that the advisor agrees
to take on the candidate as an MS student, how the candidate would be a good fit for them and why candidate's research topic would be suitable.

For information specific to the accelerated Environmental Science and Policy, MS (p. 696), see Graduate Admissions on the department’s website (http://esp.gmu.edu/academic-programs/graduate/admissions).

Reserve Graduate Credits
Students admitted to this program may take graduate courses after completing 90 undergraduate credits, and up to 6 credits of appropriate environmentally-focused graduate coursework may be used in partial satisfaction of the requirements for the undergraduate degree. If students earn at least a 3.00 GPA in these classes, they are granted advanced standing in the master’s program and must then complete an additional 27 credits to receive the master’s degree.

To apply these credits to the master’s degree, students must request that the credits be moved from the undergraduate degree to the graduate degree using the Bachelor’s/Accelerated Master’s Transition form found on the Office of the University Registrar website (http://registrar.gmu.edu/forms) (as noted above).

Students may take up to 6 additional environmentally-focused graduate credits as reserve graduate credit. These credits do not apply to the undergraduate degree but will reduce the subsequent master’s degree credits accordingly (e.g., with 6 credits counted towards undergraduate degree plus the maximum 6 reserve credits, an MS could be completed with 21 post-bachelor’s credits). The ability to take courses for reserve graduate credit is available to all high achieving undergraduates with the permission of the department.

Earth Science, BS/Curriculum and Instruction, Accelerated MEd (Secondary Education Earth Science concentration)

Overview
Highly-qualified undergraduates may be admitted to the bachelor’s/accelerated master’s option and obtain both a BS in Earth Science (p. 627) and an MEd in Curriculum and Instruction (p. 170) (concentration in secondary education earth science) in an accelerated time-frame after satisfactory completion of 149 credits. See AP.6.7 Bachelor’s/Accelerated Master’s Degree (p. 93) for policies related to this program.

This accelerated option is offered jointly by the Department of Atmospheric, Oceanic and Earth Sciences (p. 620) and the Graduate School of Education (p. 162).

Students in an accelerated degree program must fulfill all university requirements for the master’s degree. For policies governing all graduate degrees, see AP6 Graduate Policies (p. 90).

Application Requirements
Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in Graduate Admissions Policies (p. 68). For information specific to this accelerated master’s program, see Application Requirements and Deadlines (https://cehd.gmu.edu/bachelors-accelerated-masters-program).

Accelerated Option Requirements
Requirements
Students complete the following courses in their senior year:

<table>
<thead>
<tr>
<th>Semester</th>
<th>Course</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>Senior Fall</td>
<td>EDCI 573</td>
<td>3</td>
</tr>
<tr>
<td>Spring</td>
<td>EDCI 673</td>
<td>3</td>
</tr>
<tr>
<td>Senior Fall</td>
<td>EDUC 672</td>
<td>3</td>
</tr>
<tr>
<td>Spring</td>
<td>EDRD 619</td>
<td>3</td>
</tr>
</tbody>
</table>

Total Credits: 12

While undergraduate students, accelerated master’s students are able to apply two of the courses listed above to both the bachelor’s and master’s degrees. These courses are considered advanced standing for the MEd. A minimum grade of B must be earned to be eligible to count as advanced standing. The other two courses are taken as reserve graduate credit and do not apply to the undergraduate degree. Early in their final undergraduate semester, students must submit the Bachelor’s/Accelerated Master’s Transition Form to the CEHD Admissions Office and specify which of the four courses are to be designated as advanced standing and reserve graduate credit.

Earth Science Minor
Banner Code: ESCI

Dr. Stacey Verardo, Undergraduate Coordinator and Professor
3451 Exploratory Hall
Fairfax Campus
Phone: 703-993-1045
Email: sverardo@gmu.edu
Website: cos.gmu.edu/aoes/academics/undergraduate-programs/

Students taking this minor complete coursework in the solid Earth, oceanography, and the atmosphere. This minor pairs well with other degrees in the sciences such as chemistry or biology.

This has been designated a Green Leaf program (p. 107).

Admissions & Policies

Policies
Eight credits of coursework must be unique to the minor.

For policies governing all minors, see AP.5.3.4 Minors (p. 90).

Students may not receive both the Geology Minor (p. 639) and the Earth Science Minor.

Requirements

Minor Requirements
Total credits: 18-19

This is a Green Leaf program.
Students should refer to the Admissions & Policies tab for specific policies related to this program.

Students must successfully complete the following coursework with a minimum GPA of 2.00.

### Core Courses

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>GEOL 101</td>
<td>Introductory Geology I (Mason Core) (p. 142)</td>

### Earth Systems Science, MS (AOES)

**Banner Code:** SC-MS-ESSC

**Geoff Gilleaudeau, Assistant Professor**

3452 Exploratory Hall
Fairfax Campus

Phone: 703-993-3289
Email: ggilleau@gmu.edu
Website: cos.gmu.edu/aoes/academics/earth-science-graduate-program/

This is a shared program between the Department of Atmospheric, Oceanic, and Earth Sciences (p. 620) and the Department of Geography and Geoinformation Science (p. 715).

The program addresses the growing demand for trained professionals in the Earth sciences. The degree emphasizes a research-oriented, global systems approach to studying the Earth and its systems—the atmosphere, the hydrosphere, and the lithosphere, including their interrelationships and interactions with the biosphere. Emphasis is on the observation, measurement, and analysis of Earth's systems.

Most student research projects and theses will relate to geologic and geographic topics, however studies of related topics in Earth science are welcome. Students completing the program are qualified to pursue careers that require knowledge of the basics of Earth systems science and the requisite tools, specifically pertaining to the area of Earth science that they choose to investigate. Students are encouraged to undertake a master's thesis but may choose a research project. In the latter case, students must pass a comprehensive exam.

### Admissions & Policies

#### Admissions

University-wide admissions policies can be found in Graduate Admissions Policies (p. 68).

To apply for this program, please complete the George Mason University Admissions Application (https://www2.gmu.edu/admissions-aid/apply-now).

#### Eligibility

Applicants should have earned a BS degree in atmospheric, Earth, environmental, geographical, ocean, or physical science. Previous coursework should include two semesters each of calculus, chemistry, and physics, and one semester of statistics. Applicants should have a minimum GPA of 3.00 in their undergraduate degree.

#### Application Requirements

Official transcripts from each college and graduate institution attended, a current résumé, and a goals statement are required. Applicants also need three letters of recommendation and an official report of scores obtained on the GRE-GEN. The GRE requirement for admission may be waived if the student holds a master’s degree from a regionally accredited U.S. institution. TOEFL scores are required of all international applicants.

#### Policies

For policies governing all graduate programs, see AP6 Graduate Policies (p. 90).

### Requirements

#### Degree Requirements

**Total credits:** 30

Students should refer to the Admissions & Policies tab for specific policies related to this program.

Candidates must complete 10 credits of GGS courses and 10 credits of GEOL/CLIM courses toward their requirements. (*Culminating Experience* credits do not count towards this requirement).

#### Earth Science Core

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>Select one course from each of the following groups: 9</td>
<td></td>
</tr>
</tbody>
</table>

**Atmosphere:**

- CLIM 710
- CLIM 714
- GEOL 532 Paleoclimatology
- GGS 670 Introduction to Atmosphere and Weather
- PHYS 575 Atmospheric Physics I

**Hydrosphere:**

- CLIM 512 Physical Oceanography
- CLIM 712 Physical and Dynamical Oceanography
- GEOL 513 Hydrogeology
The Geology, BA program aims to provide students with both high-quality conceptual knowledge and hands-on training in geology in preparation for careers within the earth-science field or for graduate studies in geology. This is a Green Leaf program (p. 107).

Admissions & Policies

Admissions

University-wide admissions policies can be found in the Undergraduate Admissions Policies (p. 65) section of this catalog.

To apply for this program, please complete the George Mason University Admissions Application (https://www2.gmu.edu/admissions-aid/apply-now).

Policies

Students must fulfill all Requirements for Bachelor's Degrees (p. 89) including the Mason Core (p. 142).

GEOL 317 Geomorphology fulfills the writing intensive requirement for this major.

For policies governing all undergraduate degrees, see AP .5 Undergraduate Policies (p. 87).

Requirements

Degree Requirements

Total credits: minimum 120
This is a Green Leaf program.

Students should refer to the Admissions & Policies (p. 634) tab for specific policies related to this program.

Candidates for a degree in geology must complete all courses with a minimum GPA of 2.50.

### Geology Core

</thead>
</table>

Students must take 9 credits of degree-related coursework in a coherent program designed in coordination with advisor and approved by department chair

Total Credits 9

### Mason Core and Elective Credits

In order to meet a minimum of 120 credits, this degree requires an additional 58-59 credits, which may be applied toward any remaining Mason Core (p. 142) requirements (outlined below), Requirements for Bachelor’s Degrees (p. 89), College Requirements for the BA Degree (outlined below), and elective courses. Students are strongly encouraged to consult with their advisors to ensure that they fulfil all requirements.

### Mason Core

Some Mason Core (p. 142) requirements may already be fulfilled by the major requirements listed above. Students are strongly encouraged to consult their advisors to ensure they fulfill all remaining Mason Core (p. 142) requirements.

### Mathematics

Select one from the following:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>

<td>Linear Mathematical Modeling (Mason Core) (p. 142)</td>
<td>3-4</td>
</tr>
<tr>
<td>MATH 113</td>
<td>Analytic Geometry and Calculus I (Mason Core) (p. 142)</td>
<td>3-4</td>
</tr>
</tbody>
</table>

Total Credits 3-4

1 Most programs include the writing-intensive course designated for the major as part of the major requirements; this course is therefore not counted towards the total required for Mason Core.

2 Minimum 3 credits required.

### College Requirements for the BA Degree

In addition to the program requirements and the Mason Core (p. 142) requirements, students pursuing a BA degree must complete the coursework below. Except where expressly prohibited, a course used to fulfill this college-level requirement may also be used simultaneously to satisfy other requirements such as Mason Core (p. 142) requirements,
other college-level requirements, or requirements for the major. In some cases, the requirements listed below may be superseded by requirements of the degree program and the Mason Core (p. 142).

**Philosophy or Religious Studies**

1 PHIL 323 Classical Western Political Theory and PHIL 324 Modern Western Political Theory may not be used to fulfill this requirement.

**Social and Behavioral Sciences**

Choose one approved Mason Core: Social and Behavioral Sciences (p. 150) course in addition to the Mason Core (p. 142)-required course for a total of 6 credits. The two courses used to fulfill the combined college-level and university requirements must be from different disciplines.

This requirement may be fulfilled by completing any course in ANTH (p. 1212), CRIM (p. 1514), ECON (p. 1564), GOVT (p. 1774), HIST (p. 1818) 1, LING (p. 1896), PSYC (p. 2074), or SOCI (p. 2167), and the following GGS (p. 1732) courses:

<table>
<thead>
<tr>
<th>Code</th>

</table>

Total Credits 3

1 HIST 100 History of Western Civilization (Mason Core) (p. 142) and HIST 125 Introduction to World History (Mason Core) (p. 142) may not be used to fulfill this requirement.

**Natural Science**

Choose one credit in addition to the Mason Core: Natural Science (p. 148) requirement for a total of 8 credits. This combined college-level and university requirement must be fulfilled by completing two of any approved Mason Core: Natural Science (p. 148) courses that include a laboratory experience 1.

<table>

</table>

1 Students may be eligible for a waiver of this requirement if they are already proficient in a second language or if they have received a satisfactory score on an approved proficiency test. Additional information on waivers can be found via the college's Office of Academic and Student Affairs (https://cos.gmu.edu/uaa).

**Non-Western Culture**

Choose one approved Non-Western Culture Requirement 1 course in addition to the course used to fulfill the Mason Core: Global Understanding (p. 146) requirement. A course used to fulfill the Mason Core: Global Understanding (p. 146) requirement may not be simultaneously used to satisfy this college-level requirement. However, a course used to fulfill this requirement may be used simultaneously to fulfill any other requirements (Mason Core (p. 142) requirements, college-level requirements, or requirements for the major).

1 Students who can document attendance at a native school in a non-western country for at least four years may request a waiver from this requirement through the CHSS Undergraduate Academic Affairs Office (http://chssundergrad.gmu.edu).

Honors

Honors in the Major

Earth science and geology majors who have completed 16 credits of math and science, including GEOL 302 Mineralogy with a GPA of 3.00 or higher are eligible to enter the departmental honors program. Transfer students who have an incoming GPA of 3.10 or higher in math and science and a grade of ‘B’ or better in GEOL 302 Mineralogy are also eligible. To graduate with honors in Earth Science, students are required to maintain a minimum GPA of 3.00 in math and science courses and complete one of the two following sets of courses with an average GPA of 3.50 or better:

<table>
<thead>
<tr>

Accelerated Master’s

Bachelor's Degree (selected)/ Environmental Science and Policy, Accelerated MS

Overview

This degree option allows highly qualified George Mason University students to earn an Environmental Science and Policy, MS (p. 696) in less time than if they had first graduated with an environmentally-focused Green Leaf-designated (p. 107) BA or BS degree and then applied to the MS program sequentially.

For more detailed information, see AP6.7 Bachelor’s/Accelerated Master’s Degrees (p. 93). For policies governing all graduate programs, see AP6 Graduate Policies (p. 90).

Admission Requirements

Students with an overall GPA of at least 3.20 who are pursuing any Green Leaf-designated (p. 107) major or minor may apply for provisional acceptance into this accelerated master’s program after completing two semesters of chemistry (including CHEM 211 General Chemistry I (Mason Core) (p. 142) and CHEM 212 General Chemistry II (Mason Core) (p. 142) and three semesters of biology, including a course in ecology, or the equivalent, for example:

</tr>
</tbody>
</table>

6 credits of BIOL or CONS electives

By the beginning of the undergraduate’s senior year, they should first submit a Graduate Application for Accelerated Master’s Program form (obtained from the Office of Academic and Student Affairs (https://cos.gmu.edu/about/contact-us)). Secondly, in their senior year accelerated master’s students must complete the two graduate courses indicated on their Accelerated Master’s Program Application with a minimum grade of 3.00 in each course. They must maintain a minimum GPA of 3.00 in all coursework and in coursework applied to their major. Upon completion and conferral of the undergraduate degree in a Green Leaf-designated (p. 107) program, in the semester indicated in the application, they must additionally submit the Bachelor’s/Accelerated Master’s Transition form (found on the Office of the University Registrar website (http://registrar.gmu.edu/forms)) and will subsequently be admitted into graduate status.

By at least the beginning of their senior year, they should seek out a faculty member in the Department of Environmental Science and Policy (p. 688) who is willing to serve as their advisor. This advisor will aid the student in choosing the appropriate graduate courses to take and help to prepare the student for graduate studies. Admission into a research-oriented master’s concentration is dependent upon securing the agreement of a faculty advisor. Faculty from a variety of departments and colleges at George Mason (called “program faculty”) can serve as master’s advisors. Potential students are encouraged to speak with the
graduate program coordinator in the department to obtain guidance on this issue.

Application Requirements

Applicants to all graduate programs at Mason must meet the admission standards and application requirements for graduate study as specified in the Graduate Admission Policies (p. 68) section of this catalog, excluding the GRE exam requirement (which is not required for those enrolled in the accelerated program). This includes three letters of recommendation (at least one from a former professor or someone with a PhD), a recent resume, a statement of interest/research goals and interests (including information on the candidate's proposed MS research), and a letter from their advisor stating that the advisor agrees to take on the candidate as an MS student, how the candidate would be a good fit for them and why candidate's research topic would be suitable.

For information specific to the accelerated Environmental Science and Policy, MS (p. 696), see Graduate Admissions on the department's website (http://esp.gmu.edu/academic-programs/graduate/admissions).

Reserve Graduate Credits

Students admitted to this program may take graduate courses after completing 90 undergraduate credits, and up to 6 credits of appropriate environmentally-focused graduate coursework may be used in partial satisfaction of the requirements for the undergraduate degree. If students earn at least a 3.00 GPA in these classes, they are granted advanced standing in the master's program and must then complete an additional 27 credits to receive the master's degree.

To apply these credits to the master's degree, students must request that the credits be moved from the undergraduate degree to the graduate degree using the Bachelor's/Accelerated Master's Transition form found on the Office of the University Registrar website (http://registrar.gmu.edu/forms) (as noted above).

Students may take up to 6 additional environmentally-focused graduate credits as reserve graduate credit. These credits do not apply to the undergraduate degree but will reduce the subsequent master's degree credits accordingly (e.g., with 6 credits counted towards undergraduate degree plus the maximum 6 reserve credits, an MS could be completed with 21 post-bachelor's credits). The ability to take courses for reserve graduate credit is available to all high achieving undergraduates with the permission of the department.

Geology Minor

Banner Code: GEOL

Dr. Stacey Verardo, Undergraduate Coordinator and Professor

3451 Exploratory Hall
Fairfax Campus

Phone: 703-993-1045
Email: sverardo@gmu.edu
Website: cos.gmu.edu/aoes/academics/undergraduate-programs/

Students take coursework in physical geology, historical geology, and mineralogy as the fundamental courses in this minor. This minor pairs well with other degrees in the sciences such as chemistry or biology.

This is a Green Leaf program (p. 107).

Admissions & Policies

Policies

Eight credits of coursework must be unique to the minor. For policies governing all minors, see AP.5.3.4 Minors (p. 90).

Students may not receive both the Geology Minor and the Earth Science Minor (p. 632).

Requirements

Minor Requirements

Total credits: 20

This is a Green Leaf program.

Students should refer to the Admissions & Policies (p. 639) tab for specific policies related to this program.

Students must successfully complete the following coursework with a minimum GPA of 2.00.

Geology Courses

This minor is designed for students interested in oceans and coastlines. The fundamental courses include topics in oceanography, physical
oceanography, coastal morphology and process, marine geology, chemical oceanography, and marine ecology.

Admissions & Policies

Policies

Eight credits of coursework must be unique to the minor.

For policies governing all minors, see AP.5.3.4 Minors (p. 90).

Requirements

Minor Requirements

Total credits: 18-22

Students should refer to the Admissions & Policies (p. 640) tab for specific policies related to this program.

Students must successfully complete the following coursework with a minimum GPA of 2.00.

</tbody>
</table>

Total Credits 9-12

1 Courses taken to satisfy the core requirements above cannot be repeated to count toward the additional courses requirement.

2 If chosen, students must take both the lecture and lab for a total of 4 credits.

Notes

RECR 161 Scuba Diving: Basic is strongly recommended, but is not required.

Paleontology Minor

Banner Code: PLEO

Dr. Stacey Verardo, Undergraduate Coordinator and Professor

3451 Exploratory Hall
Fairfax Campus

Phone: 703-993-1045
Email: sverardo@gmu.edu

Website: cos.gmu.edu/aoes/academics/undergraduate-programs/

Students interested in the evolution of life on Earth can take this minor in association with degrees from any field of study across the university. Fundamental courses include historical geology, invertebrate paleontology and vertebrate paleontology.

This has been designated a Green Leaf program (p. 107).

Admissions & Policies

Policies

Eight credits of coursework must be unique to the minor. For policies governing all minors, see AP.5.3.4 Minors (p. 90).
Requirements

Minor Requirements
Total credits: 18-21

This is a Green Leaf program.

Students should refer to the Admissions & Policies (p. 640) tab for specific policies related to this program.

Students must successfully complete the following coursework with a minimum GPA of 2.00.

Required Core

Department of Biology

Larry Rockwood, Chair
Phone: 703-993-1050
Website: biology.gmu.edu

Administration

- Larry Rockwood, Chair
- Geraldine Grant, Assistant Chair
- Charles Madden, Assistant Chair
- Deborah Poyales, Director of Undergraduate Studies
- Anne Verhoeven, Director of Medical Laboratory Sciences

The faculty in the Department of Biology is known for teaching excellence. Drs. Madden, Kocache, Forkner, Tondi, and Rockwood have all received teaching awards within the past several years, the latest being a university award presented to Dr. Kocache in May of 2017. Biology is the largest program in the College of Science; there are more than 1,300 students in the major and the department grants degrees to almost 300 students per year. All Biology teaching laboratories and almost all faculty and staff offices are found in Exploratory Hall, a modern beautiful building. The department consists of 23 faculty and 7 staff and the Biology curriculum is further enriched by over 40 faculty members from other departments and schools. As a result, Biology offers a broad spectrum of coursework in the biological sciences to both biology majors and to students in other departments, schools, and colleges.

Undergraduate Programs

The bachelor's degree programs in biology provide a sound liberal arts education with substantial experience in quantitative and analytical thought, along with preparation for a related profession. In addition to ensuring the strong background necessary for graduate study in the many fields of biological science, the broad range of courses available at Mason allow students to develop careers in many areas, including secondary school teaching, environmental management, microbiology, molecular biology, biotechnology, genetics, and natural history. Alternatively, students may prepare for postgraduate studies in medicine, dentistry, veterinary medicine, wildlife management, fisheries biology, or marine science.

The department also offers the Medical Laboratory Science, BS (p. 656), please visit the program's catalog entry for details.
Additional information can be found at the Department of Biology's website (http://biology.gmu.edu) or by visiting the department in Exploratory Hall, Suite 1200.

**Graduate Programs**
The Biology, MS (p. 794) is offered by the School of Systems Biology (p. 786). The Department of Biology supports the concentration in Evolutionary Biology within the MS degree. Students interested in this concentration should consult the Department of Biology’s website (http://biology.gmu.edu) for a list of faculty and their research interests.

**Student Clubs**
A variety of biologically-oriented student clubs are available for students. Each club has its own website; for more information visit the Department of Biology’s website (http://biology.gmu.edu).

**Faculty**

#### Term Associate Professors
Laemmerzahl, Luther, Madden, Tondi, Verhoeven

#### Term Assistant Professors
Crerar, Davis, Fondufe, Masterson, Olmo, Scherer, Schwebach

#### Term Instructor
Tomson

#### Adjunct Faculty

#### Affiliate Faculty

#### Affiliated Faculty
Andalibi, Lee, Nix, Lewis, Freeman, Gilmore, Lessard-Pilon, McNeil, Deluycker, Lipsky, Perilla, Verardo, Fox

**Requirements & Policies**

### Requirements

#### Advising
All biology majors are strongly encouraged to see an academic advisor regularly to help in planning their schedule so that they can graduate on time. Biology majors should see an advisor for permission to register prior to their first semester, again after completing 60 credits, and lastly after completing 90 credits.

Medical Laboratory Science, BS (p. 656) majors must see the director of the medical laboratory science program to obtain permission to register each semester.

Students returning from suspension are required to meet with the director of undergraduate studies or designee prior to being allowed to register.

For more information on advising or to set up an appointment, visit the Department of Biology’s website (http://biology.gmu.edu).

### Residency Requirement for Transfer Students
Students majoring in biology are required to complete 16 credits in the major at the 300 and 400 levels at Mason in addition to meeting the university residency requirement of at least 30 credits at Mason.

### Policies

#### Policy on Using Biology Program Laboratories
Only authorized experiments and exercises may be carried out in any research or teaching laboratory and must be done under the supervision of a university faculty or staff member. No unauthorized work is allowed in any laboratory.

#### Policy on Using Organisms in Classes
Direct observations of actual organisms are considered an essential part of learning biology at all levels. Direct observations of organisms may involve the use of living or preserved specimens, dissections of organisms or parts of organisms, and microscopic examination of organisms or parts of organisms. All use of live animals conforms to National Institutes of Health guidelines for the use and care of laboratory animals. Activities specified above may be a required part of a course and thus serve as a basis for grading in the course. Any questions about the administration of this policy should be directed to the course coordinator or instructor.

#### Writing-Intensive Requirement
Mason requires all students to complete at least one course designated as “writing intensive” in their majors at the 300-level or above. Students majoring in biology fulfill this requirement by successfully completing BIOL 308 Foundations of Ecology and Evolution. Medical laboratory science majors fulfill the requirement by completing MLAB 300 Science Writing.

### Minor in Biology
Information about this minor can be found in the Biology Minor (p. 654)’s catalog entry.
Premedical, Predental, Prepharmacy, and Preveterinary Students
Web: prehealth.gmu.edu (http://prehealth.gmu.edu)

Many students planning to enter medical, dental, pharmacy, veterinary, optometry, or other health professional schools choose to pursue a major in biology. These students should consult the health professions advising web site on required coursework and overall preparation.

Teacher Licensure
Students who wish to become teachers should pursue either the Biology, BA (p. 643) or the Biology, BS (p. 648) in addition to obtaining teaching certificates through the College of Education and Human Development (p. 161). For more information, visit the Graduate School of Education’s website (https://gse.gmu.edu).

Biology for Non-majors
Students who are not majoring in science or mathematics and wish to fulfill their natural science requirement may enroll in the biology classes listed in the Mason Core Natural Science (p. 142) section. Chemistry, physics, and mathematics majors should consult with their faculty advisor to determine which biology courses to take.

Academic Advising
1200 Exploratory Hall
Fairfax Campus
Website: biology.gmu.edu/academics/degree-programs/

The Biology, BA provides a sound liberal arts education with substantial experience in quantitative and analytical thought, along with preparation for related professions. The program provides the strong background necessary for not only for graduate study in the life sciences, but also enables students to develop careers in a wide variety of disciplines, including teaching, environmental management, microbiology, molecular biology, biotechnology, genetics, wildlife management, fisheries biology, and marine science. Furthermore, our curriculum prepares students for careers in the health sciences including medicine, dentistry, veterinary science, and related allied health disciplines.

Admissions & Policies

Admissions
University-wide admissions policies can be found in the Undergraduate Admissions Policies (p. 65) section of this catalog.

To apply for this program, please complete the George Mason University Admissions Application (https://www2.gmu.edu/admissions-aid/apply-now).

Policies
Students must fulfill all Requirements for Bachelor’s Degrees (p. 89), including the Mason Core (p. 142). Students in this bachelor’s program must also complete the additional College Requirements for the BA Degree (see Requirements (p. 644)).

The writing intensive requirement is fulfilled by BIOL 308 Foundations of Ecology and Evolution. Transfer students who have transferred in BIOL 308 Foundations of Ecology and Evolution but did not meet the writing intensive requirement may take MLAB 300 Science Writing to meet the writing intensive requirement.

Important information and departmental policies are listed with the Department of Biology (p. 641).

For policies governing all undergraduate programs, see AP5 Undergraduate Policies (p. 87).

Important Program Requirements
Students must complete the degree requirements with:

- A minimum GPA of 2.00 in the BIOL courses listed in the degree program
- A minimum GPA of 2.00 in the supporting courses listed in the degree program

Additionally:

- Students may apply no more than 4 credits of BIOL 103 Introductory Biology I (Mason Core) (p. 142) or BIOL 107 Intro Biology II Lecture (Mason Core) (p. 142) and BIOL 106 Introductory Biology II Laboratory (Mason Core) (p. 142) toward elective credit (or equivalent transfer credit at the 100 to 200-level) if taken before the successful completion of BIOL 213 Cell Structure and Function (Mason Core) (p. 142).
- Biology majors must earn a minimum grade of ‘C’ in all of the biology core courses. A grade of ‘C’ or better must be earned in BIOL 213 Cell Structure and Function (Mason Core) (p. 142) in order to advance to other core requirements.
- Students who take BIOL 213 Cell Structure and Function (Mason Core) (p. 142) once, but a second time only with permission of the Department of Biology (p. 641).
- Students may not count BIOL 124 Human Anatomy and Physiology and/or BIOL 125 Human Anatomy and Physiology toward any biology major requirement.
- Students who take BIOL 300 BioDiversity may not count BIOL 303 Animal Biology and/or BIOL 304 Plant Biology toward any biology major requirement.
- BIOL 308 Foundations of Ecology and Evolution meets the writing intensive requirement for this major. Transfer students who have transferred in BIOL 308 Foundations of Ecology and Evolution but did not meet the writing intensive requirement may take MLAB 300 Science Writing to meet the writing intensive requirement.
- BIOL 493 Honors Research in Biology, BIOL 495 Directed Studies in Biology, and BIOL 497 Special Problems in Biology do not satisfy the requirements of the BA degree which state that students must complete at least one upper division course that
includes a laboratory. The courses do, however, count as non-laboratory electives. The total limit for BIOL 493 Honors Research in Biology, BIOL 495 Directed Studies in Biology and BIOL 497 Special Problems in Biology combined is 3 credits toward 32 credits for the BA.

**Teacher Licensure**

Students majoring in biology who wish to pursue a career teaching secondary school may consider applying for the Curriculum and Instruction Undergraduate Certificate [p. 166] offered by the College of Education and Human Development [p. 161] as an option in seeking an initial Virginia teaching license.

Other routes to licensure include the Biology, BA or BS/Curriculum and Instruction, Accelerated MED [p. 183] (Secondary Education Biology Concentration) or select traditional Master’s programs. Please contact the undergraduate advisor in the College of Education and Human Development [p. 161] for more information.

**Requirements**

**Degree Requirements**

Total credits: minimum 120

Students should refer to the Admissions & Policies (p. 643) tab for specific policies related to this program.

Mason Core and Elective Requirements

In order to meet a minimum of 120 credits, this degree requires an additional 63-68 credits, which may be applied toward any remaining Mason Core (p. 142) requirements (outlined below), Requirements for Bachelor's Degrees (p. 87) (refer to AP5.3.2), College Requirements for the BA Degree (outlined below), and elective courses. Students are strongly encouraged to consult with their advisors to ensure that they fulfill all requirements.

Mason Core

Some Mason Core (p. 142) requirements may already be fulfilled by the major requirements listed above. Students are strongly encouraged to consult their advisors to ensure they fulfill all remaining Mason Core (p. 142) requirements.

1. Most programs include the writing-intensive course designated for the major as part of the major requirements; this course is therefore not counted towards the total required for Mason Core.
2. Minimum 3 credits required.

College Requirements for the BA Degree

In addition to the program requirements and the Mason Core (p. 142) requirements, students pursuing a BA degree must complete the coursework below. Except where expressly prohibited, a course used to fulfill this college-level requirement may also be used simultaneously to satisfy other requirements such as Mason Core (p. 142) requirements, other college-level requirements, or requirements for the major. In some cases, the requirements listed below may be superseded by requirements of the degree program and the Mason Core (p. 142).

1 BIOL 124 Human Anatomy and Physiology and BIOL 125 Human
Anatomy and Physiology may not be used to fulfill this requirement.

Foreign Language
Intermediate-level proficiency in one foreign language is required1. This
requirement may be fulfilled by completing a course in a foreign
language numbered 202, 209, or 210 (or higher-level courses taught in the
language).

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
</table>
| Select a foreign language course numbered 202, 209, 210, or
higher if a waiver isn't applicable | 0-3     |

1 Students may be eligible for a waiver of this requirement if they are
already proficient in a second language or if they have received a
satisfactory score on an approved proficiency test. Additional
information on waivers can be found via the college's Office of
Academic and Student Affairs (https://cos.gmu.edu/uaa).

Non-Western Culture
Choose one approved Non-Western Culture Requirement1 course in
addition to the course used to fulfill the Mason Core: Global
Understanding (p. 146) requirement. A course used to fulfill the Mason
Core: Global Understanding (p. 146) requirement may not be
simultaneously used to satisfy this college-level requirement. However,
a course used to fulfill this requirement may be used simultaneously to
fulfill any other requirements (Mason Core (p. 142) requirements, college-
level requirements, or requirements for the major).

1 Students who can document attendance at a native school in a non-western country for at least four years may request a waiver from this requirement through the CHSS Undergraduate Academic Affairs Office (http://chssundergrad.gmu.edu).

**Honors**

### Honors in the Major

**Admissions**

Minimum requirements for invitation:

- GPA in biology courses must be 3.33 or better
- GPA in supporting requirements (math and other science) must be 3.00 or better
- Grade of ‘B’ or better in BIOL 213 Cell Structure and Function (Mason Core) (p. 142)

Students should apply for admission to the Honors Program during their first or second year at the university. Contact the Department of Biology (p. 641) for information on applying.

### Retention Requirements

Students in honors biology must maintain a biology GPA of 3.33 or better and a supporting GPA of 3.00 or better from the time they have accumulated 30 hours and thereafter. Students who fall below this standard will be given a one semester probationary period in which to bring their GPA back up to the minimum standard.

### Requirements to Graduate with Biology Honors

Students are required to take 6 to 8 credits in honors courses in BIOL including three semesters of BIOL 494 Honors Seminar in Biology or two semesters of BIOL 494 Honors Seminar in Biology and one semester of BIOL 493 Honors Research in Biology. BIOL 498 Research
Seminar may count toward one of the semester requirements of BIOL 494 Honors Seminar in Biology. The GPA requirements are as follows:

- Minimum 3.33 GPA in honors biology courses
- Minimum 3.33 GPA in biology requirements
- Minimum 3.00 GPA in supporting requirements
- Minimum 3.00 GPA overall

**Accelerated Master's**

**Biology, BA or BS/Curriculum and Instruction, Accelerated MEd (Secondary Education Biology concentration)**

**Overview**

Highly-qualified undergraduates may be admitted to the bachelor's/accelerated master's program and obtain a BA (p. 643) or BS in Biology (p. 648) (degree without concentration) and an MEd in Curriculum and Instruction (concentration in secondary education biology) (p. 170) in an accelerated time-frame after satisfactory completion of 149 credits. See AP.6.7 Bachelor's/Accelerated Master's Degree (p. 93) for policies related to this program.

This accelerated option is offered jointly by the Biology Undergraduate Program (p. 641) and the Graduate School of Education (p. 162).

Students in an accelerated degree program must fulfill all university requirements for the master's degree. For policies governing all graduate degrees, see AP.6 Graduate Policies (p. 90).

**Application Requirements**

Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in Graduate Admissions Policies (p. 68). For information specific to this accelerated master's program, see Application Requirements and Deadlines (https://cehd.gmu.edu/bachelors-accelerated-masters-program).

**Accelerated Option Requirements**

Students must complete the following courses in their senior year:

<table>
<thead>
<tr>
<th>Senior</th>
<th>Fall Semester</th>
<th>Credits</th>
<th>Spring Semester</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>EDCI 573</td>
<td>3</td>
<td>EDCI 673</td>
<td>3</td>
<td></td>
</tr>
<tr>
<td>EDUC 672</td>
<td>3</td>
<td>EDRD 619</td>
<td>3</td>
<td></td>
</tr>
<tr>
<td><strong>Total Credits 12</strong></td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

While undergraduate students, accelerated master's students are able to apply two of the courses listed above to both the bachelor's and master's degrees. These courses are considered advanced standing for the MEd. A minimum grade of B must be earned to be eligible to count as advanced standing. The other two courses are taken as reserve graduate credit and do not apply to the undergraduate degree. Early in their final undergraduate semester, students must submit the Bachelor's/Accelerated Master's Transition Form to the CEHD Admissions Office and specify which of the four courses are to be designated as advanced standing and reserve graduate credit.

**Biology, BS**

Banner Code: SC-BS-BIOL

**Academic Advising**

1200 Exploratory Hall
Fairfax Campus

Website: biology.gmu.edu/academics/degree-programs/

The Biology, BS provides a sound liberal arts education with substantial experience in quantitative and analytical thought, along with preparation for related professions. The program provides the strong background necessary for not only for graduate study in the life sciences, but also enables students to develop careers in a wide variety of disciplines, including teaching, environmental management, microbiology, molecular biology, biotechnology, genetics, wildlife management, fisheries biology, and marine science. Furthermore, our curriculum prepares students for careers in the health sciences including medicine, dentistry, veterinary science, and related allied health disciplines.

**Admissions & Policies**

**Admissions**

University-wide admissions policies can be found in Undergraduate Admissions Policies (p. 65).

To apply for this program, please complete the George Mason University Admissions Application (https://www2.gmu.edu/admissions-aid/apply-now).

**Policies**

Students must fulfill all Requirements for Bachelor's Degrees (p. 89), including the Mason Core (p. 142).

Important information and departmental policies are listed in the Department of Biology (p. 641).

BIOL 308 Foundations of Ecology and Evolution meets the writing intensive requirement for this major. Transfer students who have transferred in BIOL 308 Foundations of Ecology and Evolution but did not meet the writing intensive requirement may take MLAB 300 Science Writing to meet the writing intensive requirement.

For policies governing all undergraduate degrees, see AP.5 Undergraduate Policies (p. 87).

**Important Program Requirements**

- Students may apply no more than 8 credits of BIOL 103 Introductory Biology I (Mason Core) (p. 142) or BIOL 107 Intro Biology II Lecture (Mason Core) (p. 142) and BIOL 106 Introductory Biology II Laboratory (Mason Core) (p. 142) toward elective credit (or equivalent transfer credit at the 100 to 200-level) if taken before successful completion of BIOL 213 Cell Structure and Function (Mason Core) (p. 142).
- Biology majors must earn a minimum grade of 'C' in all biology core courses. A grade of 'C' or better must be earned in BIOL 213 Cell
Structure and Function (Mason Core) (p. 142) in order to advance to other core requirements.

- Students may repeat BIOL 213 Cell Structure and Function (Mason Core) (p. 142) once, but a second time only with permission from the Department of Biology.
- Students may **not** count BIOL 124 Human Anatomy and Physiology and/or BIOL 125 Human Anatomy and Physiology toward any biology major requirement.
- Students who take BIOL 300 BioDiversity may **not** count BIOL 303 Animal Biology and/or BIOL 304 Plant Biology toward any biology major requirement.
- 44 credits must be in biology coursework.
- BIOL 493 Honors Research in Biology, BIOL 495 Directed Studies in Biology, and BIOL 497 Special Problems in Biology do not satisfy the requirements of the BS degree which state that students must complete at least two upper division courses that include a laboratory. The courses do, however, count as non-laboratory electives. The total limit for BIOL 493 Honors Research in Biology, BIOL 495 Directed Studies in Biology, and BIOL 497 Special Problems in Biology combined is 6 credits toward the 44 credits required for the BS.

Several optional concentrations are available; details on each can be found in the Requirements tab.

**Teacher Licensure**

Students majoring in biology who wish to pursue a career teaching secondary school may consider applying for the Curriculum and Instruction Undergraduate Certificate (p. 166) offered by the College of Education and Human Development (p. 161) as an option in seeking an initial Virginia teaching license.

Other routes to licensure include the Biology, BA or BS/Curriculum and Instruction, Accelerated MEd (p. 183) (Secondary Education Biology Concentration) or select traditional Master’s programs. Please contact the College of Education and Human Development (p. 161) for more information.

### Requirements

#### Degree Requirements

Total credits: minimum 120

Students should refer to the Admissions & Policies (p. 648) tab for specific policies related to this program.

Students must complete their biology coursework and the supporting requirements which follow with a minimum GPA of 2.00.

All students must complete the Core Courses listed below. Students then elect to complete the BS degree either with a concentration or without a concentration.

</tbody>
</table>

Additional Science Courses

Students are encouraged to consult with a biology faculty advisor to determine which option (A, B, or C) best meets their career goals. Select one from the following options:

Option A:
- CHEM 314 Organic Chemistry II
- CHEM 318 Organic Chemistry Lab II

Option B:
- One 3 credit chemistry course at the 300 or 400-level (not CHEM 314) (p. 1367)

Option C:
- GEOL 101 Introductory Geology I (Mason Core) (p. 142)
- GEOL 102 Introductory Geology II (Mason Core) (p. 142) (Natural Science courses)

Total Credits: 26-31

Note:
Students expecting to enter a professional school are strongly encouraged to complete MATH 113 Analytic Geometry and Calculus I (Mason Core) (p. 142).

Concentration in Bioinformatics (BNF)

The highly interdisciplinary field of bioinformatics has emerged as a powerful modern science. There is a great demand for undergraduate and graduate-level trained individuals with a background in bioinformatics in industry as well as in academia.

Additional Science Courses

Select one from the following options: 3-8

Option A:
- CHEM 314 Organic Chemistry II
- CHEM 318 Organic Chemistry Lab II

Option B:
- One 3 credit chemistry course at the 300 or 400-level (p. 1367)

Option C:
- GEOL 101 Introductory Geology I (Mason Core) (p. 142)
Concentration in Biopsychology (BP)

The biopsychology concentration consists of a selection of courses designed to address the needs and interest of students who wish to study biology in more depth while simultaneously exploring psychology and neurobiology. This concentration will help prepare students for the MCAT section related to psychology and provide veterinary students with a background in animal learning/behavior.

Additional Chemistry Courses

Select one from the following options:

Option A: CHEM 314 Organic Chemistry II & CHEM 318 Organic Chemistry Lab II

Option B: CHEM 314 Organic Chemistry II

Total Credits 26-30

1 Students are encouraged to consult with a biology advisor to determine which option (A, B, or C) best meets their career goals.
2 CHEM 314 Organic Chemistry II alone does not fulfill this requirement.

Concentration in Biotechnology and Molecular Biology (BTMB)

The biotechnology and molecular biology concentration consists of a selection of courses that provide essential skills to students who seek employment in the field or wish to include an applied component in their undergraduate training in biology.

Total Credits 26-30

1 Students are encouraged to consult with a biology faculty advisor to determine which option best meets their career goals.
2 CHEM 314 Organic Chemistry II alone does not fulfill this requirement.
CHEM 318 Organic Chemistry Lab II 2

Total Credits 28

1 Registration for BIOL 417 Selected Topics in Molecular and Cellular Biology, BIOL 418 Current Topics in Microbiology, or BIOL 497 Special Problems in Biology is subject to approval by the Director of Undergraduate Studies and the Chair of the Department of Biology.

Concentration in Environmental and Conservation Biology (ESCB)

This concentration is offered to students seeking a biology degree that focuses on ecology and organismal biology and prepares them for graduate work or employment in environmental and conservation fields, such as natural resources management, fisheries, forestry, water quality management, aquatic and wetland ecology, and conservation biology. The concentration is staffed and supported by the Department of Environmental Science and Policy (p. 687).

Code Title Credits
Environmental and Conservation Biology
BIOL 318 Conservation Biology 3
BIOL 377 Applied Ecology 3

Biology Electives
Select 17 credits from the following: 1
BIOL 309 Introduction to Oceanography
BIOL 314 Introduction to Research Design and Analysis
BIOL 326 Animal Physiology
BIOL 331 Invertebrate Zoology
BIOL 332 Insect Biology
BIOL 344 Plant Diversity and Evolution
BIOL 345 Plant Ecology
BIOL 350 Freshwater Ecosystems
BIOL 355 Ecological Engineering and Ecosystem Restoration
BIOL 378 Applied Ecology Laboratory
BIOL 379 RS: Ecological Sustainability (Mason Core) (p. 142)
BIOL 437 Ornithology
BIOL 438 Mammalogy
BIOL 439 Herpetology
BIOL 440 Field Biology
BIOL 446 Ecological and Evolutionary Physiology
BIOL 449 Marine Ecology
BIOL 450 Marine Conservation
BIOL 454 Marine Mammal Biology and Conservation
BIOL 455 Marine Mammal Biology and Conservation Field Course
BIOL 457 Reproductive Strategies
BIOL 459 Fungi and Ecosystems
BIOL 468 Vertebrate Natural History
BIOL 472 Introductory Animal Behavior & BIOL 473 and Introductory Laboratory in Animal Behavior
BIOL 480 The Diversity of Fishes

Total Credits 26-31

1 Of which, two courses must be selected from the list above and must have either: 2 laboratory courses or 1 laboratory course and 1 field course (consult with an advisor for guidance).
2 Students are encouraged to consult with a biology faculty advisor to determine which option best meets their career goals.
3 CHEM 314 Organic Chemistry II alone does not fulfill this requirement.
4 Registration in BIOL 497 Special Problems in Biology is subject to approval by the Director of Undergraduate Studies and the Chairman of the Department of Biology.

Concentration in Microbiology (MIB)

This concentration offers lecture and laboratory courses in microbiology to prepare students for employment or advanced study in microbial genetics, physiology, diversity, and related fields.

Code Title Credits
Microbiology Courses
BIOL 305 Biology of Microorganisms 3
BIOL 306 Biology of Microorganisms Laboratory 1

**Mason Core and Elective Credits**

In order to meet a minimum of 120 credits, this degree requires additional credits (specific credit counts by concentration are shown below), which may be applied toward any remaining Mason Core (p. 142) requirements (outlined below), Requirements for Bachelor’s Degrees, and electives. Students are strongly encouraged to consult with their advisors to ensure that they fulfill all requirements.

- • Without concentration: 38-46 credits
- • BNF concentration: 36-46 credits
- • BP concentration: 39-46 credits
- • BTMB concentration: 41-44 credits
- • ESCB concentration: 38-46 credits
- • MIB concentration: 41-44 credits

**Mason Core**

Some Mason Core (p. 142) requirements may already be fulfilled by the major requirements listed above. Students are strongly encouraged to consult with their advisors to ensure they fulfill all remaining Mason Core (p. 142) requirements.

</tr>
</tbody>
</table>

1 Most programs include the writing-intensive course designated for the major as part of the major requirements; this course is therefore not counted towards the total required for Mason Core.

2 Minimum 3 credits required.

**Honors in the Major**

**Admissions**

Minimum requirements for invitation:

- • GPA in biology courses must be 3.33 or better
- • GPA in supporting requirements (math and other science) must be 3.00 or better
- • Grade of ‘B’ or better in BIOL 213 Cell Structure and Function (Mason Core) (p. 142)

Students should apply for admission to the Honors Program during their first or second year at the university. Contact the Department of Biology (p. 641) for information on applying.

**Retention Requirements**

Students in honors biology must maintain a biology GPA of 3.33 or better and a supporting GPA of 3.00 or better from the time they have accumulated 30 hours and thereafter. Students who fall below this standard will be given a one semester probationary period in which to bring their GPA back up to the minimum standard.

**Requirements to Graduate with Biology Honors**

Students are required to take 6 to 8 credits in honors courses in BIOL including three semesters of BIOL 494 Honors Seminar in Biology or two semesters of BIOL 494 Honors Seminar in Biology and one semester of BIOL 493 Honors Research in Biology. BIOL 498 Research Seminar may count towards one of the semester requirements of BIOL 494 Honors Seminar in Biology. The GPA requirements are as follows:

- • Minimum 3.33 GPA in honors biology courses
- • Minimum 3.33 GPA in biology requirements
- • Minimum 3.00 GPA in supporting requirements
- • Minimum 3.00 GPA overall

**Accelerated Master’s**

**Biology, BA or BS/Curriculum and Instruction, Accelerated MEd (Secondary Education Biology concentration)**

**Overview**

Highly-qualified undergraduates may be admitted to the bachelor’s/accelerated master’s program and obtain a BA (p. 643) or BS in Biology (p. 648) (degree without concentration) and an MEd in Curriculum and Instruction (concentration in secondary education biology) (p. 170) in an accelerated time-frame after satisfactory completion of 149 credits. See AP6.7 Bachelor’s/Accelerated Master’s Degree (p. 93) for policies related to this program.

This accelerated option is offered jointly by the Biology Undergraduate Program (p. 641) and the Graduate School of Education (p. 162).

Students in an accelerated degree program must fulfill all university requirements for the master’s degree. For policies governing all graduate degrees, see AP6 Graduate Policies (p. 90).

**Application Requirements**

Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in Graduate Admissions Policies (p. 68). For information specific to this accelerated master’s program,
see Application Requirements and Deadlines (https://cehd.gmu.edu/bachelors-accelerated-masters-program).

**Accelerated Option Requirements**

Students must complete the following courses in their senior year:

<table>
<thead>
<tr>
<th>Senior</th>
<th>Fall Semester</th>
<th>Credits</th>
<th>Spring Semester</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>EDCI 573</td>
<td>3</td>
<td>EDCI 673</td>
<td>3</td>
<td></td>
</tr>
<tr>
<td>EDUC 672</td>
<td>3</td>
<td>EDRD 619</td>
<td>3</td>
<td></td>
</tr>
</tbody>
</table>

Total Credits 12

While undergraduate students, accelerated master's students are able to apply two of the courses listed above to both the bachelor's and master's degrees. These courses are considered advanced standing for the MEd. A minimum grade of B must be earned to be eligible to count as advanced standing. The other two courses are taken as reserve graduate credit and do not apply to the undergraduate degree. Early in their final undergraduate semester, students must submit the Bachelor's/Accelerated Master’s Transition Form to the CEHD Admissions Office and specify which of the four courses are to be designated as advanced standing and reserve graduate credit.

**Biology, BS/Biology, Accelerated MS**

**Overview**

Qualified undergraduates may be admitted into an accelerated master’s program and obtain both a Biology, BS (p. 648) and a Biology, MS (p. 794) within an accelerated time frame. Students admitted to this program may take graduate courses after completing 90 undergraduate credits, and up to 6 credits of graduate work may be used in partial satisfaction of the requirements for the undergraduate degree. If students earn at least a 3.00 GPA in these classes, they are granted advanced standing in the master’s program and must then complete an additional 24 credits to receive the master’s degree. All other master’s degree requirements must be met, including a minimum of 18 credits taken for the master’s after the bachelor’s degree is complete.

For more detailed information, see AP6.7 Bachelor’s/Accelerated Master’s Degrees (p. 93). For policies governing all graduate programs, see AP6 Graduate Policies (p. 90).

**Application Requirements**

Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in the Graduate Admission Policies (p. 68) section of this catalog. Application information for this accelerated master’s program can be found on the School of Systems Biology’s website (https://www2.gmu.edu/admissions-aid/how-apply/accelerated-masters).

Successful applicants will have an overall undergraduate GPA of at least 3.10. Additionally, they will have completed the following courses with a GPA of 3.00 or higher:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>

<td>3</td>
</tr>
<tr>
<td>CHEM 315</td>
<td>Organic Chemistry Lab I</td>
<td>2</td>
</tr>
</tbody>
</table>

Three letters of recommendation, including one from a prospective thesis or project advisor, are required.

**Accelerated Option Requirements**

At the beginning of the student’s final undergraduate semester, students must submit a bachelor’s/accelerated master’s transition form (available from the Office of the University Registrar (http://registrar.gmu.edu)) to the College of Science’s Office of Academic and Student Affairs (https://cos.gmu.edu/about/contact-us). Students must begin their master’s program in the semester immediately following conferral of the bachelor’s degree.

Students must maintain an overall GPA of 3.00 or higher in graduate coursework and should consult with their faculty advisor to coordinate their academic goals.

After completing 120 credits and all requirements for the bachelor’s degree and filing the Graduation Intent Form, students are awarded a bachelor’s degree. Accelerated master’s students must then submit scores on the GRE to have the provisional qualifier removed. Ordinarily, students should receive a minimum combined score of 303 on the verbal and quantitative portions of the general test.

**Reserve Graduate Credit**

While still in undergraduate status, a maximum of 6 additional graduate credits may be taken as reserve graduate credit and applied to the master’s program. Reserve graduate credits do not apply to the undergraduate degree.

**Biology Minor**

**Banner Code:** BIOL

**Academic Advising**

1200 Exploratory Hall
Fairfax Campus

Website: biology.gmu.edu/academics/degree-programs/

**Admissions & Policies**

**Policies**

Eight credits of coursework must be unique to the minor. For policies governing all minors, see AP5.3.4 Minors (p. 90).

Candidates for the minor in biology must complete required coursework with a minimum GPA of 2.00 or better and must earn a grade of ‘C’ or better in BIOL 213 Cell Structure and Function (Mason Core) (p. 142).
Requirements

Minor Requirements

Total credits: 19-21

Students should refer to the Admissions & Policies (p. 655) tab for specific policies related to this program.

Career Changer’s Biological Sciences Undergraduate Certificate

Banner Code: SC-CERB-CCBS

Academic Advising

1200 Exploratory Hall
Fairfax Campus

Website: biology.gmu.edu/academics/degree-programs/

Post-baccalaureate students are invited to enroll in this unique certificate opportunity. By completing this certificate, students will be qualified to apply for most graduate programs in the biological sciences including medical, dental, optometry, podiatry, pharmacy, and veterinary schools. However, undergraduate coursework requirements for admission into graduate and professional schools can vary; it is prudent to check the coursework requirements for each individual school.

This certificate may be pursued on a part-time or full-time basis.

Admissions & Policies

Admissions

University-wide admissions policies can be found in the Undergraduate Admissions Policies (p. 65) section of this catalog.

To apply for this program, please complete the George Mason University Admissions Application (https://www2.gmu.edu/admissions-aid/apply-now).

Additionally, admission into this certificate requires:

• The desire to pursue a career in biological sciences or the health professions (research, medicine, dentistry, teaching, law, etc.)
• A conferred bachelor’s degree from a regionally accredited institution with a GPA of 3.00 or higher

• A completed George Mason University Admissions Application (https://www2.gmu.edu/admissions-aid/apply-now) along with a the appropriate application fee
• Two sets of official transcripts from each institution attended

Standardized test scores are not required.

Policies

For policies governing all undergraduate programs, see AP .5 Undergraduate Policies (p. 87).

Some courses can be waived if previously taken during undergraduate training. Substitutions will be recommended where appropriate.

Certificate Fees

In addition to tuition and the usual laboratory and College of Science (p. 613) fees, a fee of $500 per semester will be assessed to defray the costs of the outside speakers and the additional administrative work associated with this certificate.

Notes

• Each student must see an advisor in the Department of Biology (p. 641) prior to registration each semester.
• The program will normally take four semesters to complete for a full-time student.
• It is recommended that students interested in healthcare professions do the following:
  • Register for the HEALTHPROFESSIONSADVISOR listserv (http://prehealth.gmu.edu/listserv);
  • Attend at least one group advising session conducted by the Health Professions Advisor (http://prehealth.gmu.edu); and
  • Consider participating in Health Professions Advising (http://prehealth.gmu.edu) activities designed for students in a relevant application cycle

Requirements

Certificate Requirements

Total credits: 63-64

This certificate may be pursued on a full-or part-time basis.

Students should refer to the Admissions & Policies (p. 655) tab for specific policies related to this program.

To earn this certificate, a student must pass all of the courses listed below with a grade no lower than ‘B’ and achieve a GPA of at least 3.40.

The BS in Medical Laboratory Science prepares students for careers in hospitals and clinics as well as in biotechnology and industrial laboratories. Medical Laboratory Science (MLS) is a profession of highly knowledgeable and skilled individuals who perform clinical laboratory tests on blood, other body fluids, or tissue samples. This is a critical part of health care, as the results obtained by these laboratory tests are vital tools for physicians in the diagnosis, treatment, and prevention of disease.

People trained as medical laboratory scientists may work in a variety of settings. Many work in clinical laboratories in large medical centers, hospitals, or clinics. Some do research in industrial, public health, or medical laboratories. Others teach in hospitals, colleges, or universities. An MLS may practice as a generalist, using knowledge in several of the scientific disciplines, or may specialize in one scientific area in larger hospitals. A successful MLS is an individual who enjoys studying the biological, chemical, and physical sciences. He or she may also find personal satisfaction and intellectual reward in applying scientific methods to the diagnosis and evaluation of disease.

**Admissions & Policies**

**Admissions**

University-wide admissions policies can be found in the Undergraduate Admissions Policies (p. 65) section of this catalog.

To apply for this program, please complete the George Mason University Admissions Application (https://www2.gmu.edu/admissions-aid/apply-now).

**Policies**

Students must fulfill all Requirements for Bachelor’s Degrees (p. 87) including the Mason Core (p. 142)\(^1\).

MLAB 300 Science Writing fulfills this major’s writing intensive requirement.

Important information and departmental policies are available with the Department of Biology (p. 642).

This program requires the equivalent of three years of full-time pre-professional study at the college level preceding a senior year of professional education in an affiliated program of medical laboratory science. Affiliated schools (see below) are accredited by the National Accrediting Agency for Clinical Laboratory Sciences (NAACLS) (http://www.naacls.org/Home.aspx). Quest Diagnostics (http://
www.questdiagnostics.com/home.html) in Chantilly, Virginia also provides professional education for this program.

1 Note: Because of the extensive pre-professional education requirements stipulated by NAACLS, students majoring in medical laboratory science are exempt from the Mason Core ’Arts’ requirement.

**Important Program Requirements**

- Students must complete MLAB 200 Introduction to Medical Laboratory Science and present their biology coursework and supporting requirements with a minimum GPA of 2.00.
- A grade of 'C' or better must be earned in BIOL 213 Cell Structure and Function (Mason Core) (p. 142) in order to advance to other major requirements. Students may repeat BIOL 213 Cell Structure and Function (Mason Core) (p. 142) once and a second time only with permission of the Department of Biology.
- Medical laboratory science majors must earn a minimum of 'C' in all biology core courses.

**Major in Medical Laboratory Science as a Second Bachelor's Degree**

While the standard program for medical laboratory sciences is three years on campus followed by a fourth year at a clinical affiliate (3+1), many students elect to complete a bachelor's degree before entering the clinical program (4+1). Students who have completed the Biology, BS (p. 648) or Chemistry, BS (p. 667) at Mason and then undertake a fifth year at a clinical affiliate may be eligible for a second bachelor's degree with a major in medical laboratory science. Students wishing to receive the second degree must apply before entering their fifth year. For further information, contact a laboratory sciences advisor.

**Applying to Medical Laboratory Sciences Schools**

Responsibility for applying to schools of medical laboratory sciences and gaining admission rests with the student; however, guidance is provided by the medical laboratory sciences program director. Admission to medical laboratory sciences schools is selective, so candidates should strive for strong academic standing (2.5 science GPA or higher). Students who fail to gain admission to a NAACLS-approved school are unable to complete this degree program. Such students may transfer to Biology, BA (p. 643) or the Biology, BS (p. 648) without loss of credits.

Application to medical laboratory sciences schools should be initiated about a year before the desired entrance date. This fact, coupled with the large number of required courses in the pre-professional curriculum, makes it imperative that students in the program consult regularly with their faculty advisor. All medical laboratory sciences majors and prospective majors are urged to enroll in MLAB 200 Introduction to Medical Laboratory Science as early as possible. This course provides information on the profession, as well as the educational demands placed on candidates.

**Senior Year**

Students should be aware that the senior year spent off campus requires the following special interpretation of university policies:

- Students may present no more than 6 credits of 'D' grades in biology and chemistry courses required in three years of pre-professional study.
- No unsatisfactory grades (less than 'C') may be presented for courses in the senior year of professional study.

- Transfer students must present at least 16 credits of 300 to 400-level biology or chemistry coursework taken at Mason.
- Transfer students entering with more than 45 transfer credits are often unable to complete the pre-professional phase of their program in the usual three years of full-time study.

Senior students are registered at the university through special procedures. For details, consult the program director.

**Affiliated NAACLS-Approved Schools**

This program requires the equivalent of three full years of professional study at the college level preceding a senior year of professional education in an affiliated school of medical laboratory sciences. All affiliated schools are accredited by the NAACLS:

- Augusta Health- School of Clinical Laboratory Science (https://www.augustahealth.com/cls)
- George Washington University- School of Medicine and Health Sciences: The Medical Laboratory Sciences Program (http://smhs.gwu.edu/medical-laboratory-sciences)
- INOVA Fairfax Hospital- Medical Laboratory Science Program (https://www.inova.org/education/medical-laboratory-science)
- Sentara Rockingham Memorial Hospital- School of Medical Laboratory Science (https://www.sentara.com/harrisonburg-virginia/hospitalslocations/locations/school-of-medical-laboratory-science.aspx)

**Requirements**

**Degree Requirements**

Total credits: minimum 120

Students should refer to the Admissions & Policies (p. 656) tab for specific policies related to this program.

Students must complete the requirements outlined below, choosing one Professional Study/Concentration option:

- Not choosing a concentration ("Professional Study: Generalist Option") will provide students generalist training. Upon graduation, the board certification test may be taken and would allow graduates to practice in any area of a hospital or laboratory.
- Choosing a concentration will allow students to complete their clinical rotations in that specific area. Upon graduation, the Molecular Biology or Microbiology (depending upon the concentration chosen) board certification test may be taken.

Professional Study: Histotechnology Concentration (HISO)

Senior students are registered at the university through special procedures. For details, consult the medical laboratory science program director.

The senior year spent off campus requires the following special interpretation of university policies:

- Transfer students must present at least 16 credits of 300 to 400-level biology or chemistry coursework taken at Mason.
MLAB 401 Topics

The following topics will be covered under MLAB 401 Orientation to the Problems and Practices of the Clinical Laboratory:

1. Introduction to CLS and Laboratory Operations

This course is a brief introduction to the Clinical Laboratory Science professions and Laboratory Operations. Topics include: Introduction to Laboratory Operations, Pre-analytics and Specimen Types, Quality Management Concepts, Quality Control, Laboratory Professions, Professional Ethics, Laboratory Mathematics, Proper use of Laboratory Equipment, Introduction to Laboratory Instrumentation.

2. Board Exam Preparation

This course is a structured review and practice in preparation for the American Society for Clinical Pathology (https://www.ascp.org/content) Technologist in Molecular Biology Board of Certification Exam. Practice tests and questions from a variety of published and authoritative sources are used to reinforce the content of the Technologist in Molecular Biology program.

MLAB 405 Topics

The following topics are covered under MLAB 405 Clinical Microbiology:

1. Introduction to Clinical Microbiology

This course is a brief introduction to the discipline of Clinical Microbiology, and laboratory diagnostic techniques. Topics include: Overview of Microbiology Theory, Methods and Applications, Instrumentation, Staining, and Media, Immunology, Serology, and Molecular Diagnostics.

2. Medical Virology

This course is a survey of the characteristics, pathogenicity, and laboratory diagnosis of important human viruses. Topics include viral taxonomy and classical virology. Special emphasis is placed on the epidemiology and the laboratory's role in influenza pandemics.

3. Medical Mycology

This course is a comprehensive presentation of medically important fungi. Emphasis is placed on clinical presentation and laboratory identification of pathogenic species and opportunistic pathogens. Topics include general mycology methods, yeasts, susceptibility testing, molds (Hyaline, Mucor, Dematiaceous), Dermatophytes, Systemic infections, and Pneumocystis.

4. Medical Parasitology

This course is a comprehensive presentation of human parasites. Emphasis is placed on clinical presentation and laboratory identification. Topics include Flagellates, Ciliates, Coccidians, Malaria and Babesia, Other Blood Born and Tissue Born parasites, Nematodes, Cestodes, Trematodes, and Arthropods.

5. Molecular Detection of Infectious Disease

This course examines the advances in using molecular methods to detect human infectious disease. Careful attention is given to the comparison of molecular technologies with traditional microbiology methods. Topics include molecular methods and applications, including PCR, sequencing, TMA, and PEGE, specimens of choice, sample preparation, Quality Control, primer selection, Molecular methods in selecting antimicrobial agents, molecular epidemiology, and target organisms: fungi, bacteria, parasites, and viruses.

6. Medical Bacteriology

This course is a comprehensive presentation of bacteria isolated in the clinical laboratory. Emphasis is placed on the laboratory identification of isolates from a variety of specimen sources, and pathogenic species. Topics include Instrumentation and MALDI, Gram Positive Cocci, Gram Positive Baccili, Enterics, non-fermenters, Moraxella, Neisseria, Pasteurella, Haemophilus and HACEK, Campylobacter, Helicobacter, Legionella, CDC Select Agents, Chlamydia, Mycoplasm, Ureaplastm, Spirochetes, Anaerobes, Antibiotics and Susceptibility testing, and Acid Fast Bacilli.

7. Microbiology Clinical Correlations

Designed as the capstone for the Technologist in Microbiology program, this course takes a body system view of the pathogenicity of infectious disease. Attention is given to integrating clinical presentation and case history to laboratory investigation and diagnosis. Topics include UTI/Genital, Food Borne/GI, Cystic Fibrosis, Blood, CSF, Body Fluids, and Wounds.

MLAB 407 Topics

The following topics will be covered under MLAB 407 Clinical Molecular Biology:

1. Introduction to Clinical Molecular Biology

This course presents the fundamentals of nucleic acid testing in the clinical laboratory and the underlying human genetics. Topics include: Fundamentals of Nucleic Acid Biochemistry, Common Techniques in Molecular Biology (Extraction, Resolution and Detection of Nucleic Acids, Analysis and Characterization, Amplification, Chromosomal Structure and Mutations, Gene Mutations, and DNA Sequencing).

2. Advanced Methods in Clinical Molecular Biology

This course applies the fundamentals of nucleic acid testing to advanced methods commonly used in the contemporary clinical and research laboratory. Topics include: PCR, Transcription-Based Amplification, Probe Amplification, Branched DNA, Hybrid Capture, Amplification: Signal, Cleavage-Based, Cycling Probe, Sequencing: Direct, Next Gen, Pyrosequencing, Bisulfite, RNA Sequencing, Bioinformatics, Human Genome Project.

3. Molecular Detection of Infectious Disease

This course examines the advances in using molecular methods to detect human infectious disease. Careful attention is given to the comparison of molecular technologies with traditional microbiology methods. Topics include: Molecular methods and applications, including PCR, sequencing, TMA, and PEGE, specimens of choice, sample preparation, Quality Control, primer selection, Molecular methods in selecting antimicrobial agents, molecular epidemiology, and target organisms: fungi, bacteria, parasites, and viruses.

4. Human Molecular and Chromosomal Applications and Pathology

This course presents advanced methods in nucleic acid testing to human medico-legal, forensic, and pathology applications. Topics include: Polymorphisms, RFLP, Paternity Testing, Linkage, Single Nucleotide Polymorphisms, Bone Marrow Engraftment, Mitochondrial DNA Polymorphisms and Disorders, Chromosomal Abnormalities, Patterns of Inheritance, Single Gene Disorders, Lysosomal Storage Disorders, Cystic Fibrosis, Trinucleotide Repeats, Genomic Imprinting, Array CGH, Molecular Oncology, HLA and Transplantation.

Mason Core and Electives

In order to meet a minimum of 120 credits, this degree requires an additional 32-36 credits, which may be applied toward any remaining Mason Core (p. 142) requirements (outlined below). Requirements
for Bachelor's Degrees (p. 89), and electives. Students are strongly encouraged to consult with their advisors to ensure that they fulfill all requirements.

Mason Core
Some Mason Core (p. 142) requirements may already be fulfilled by the major requirements listed above. Students are strongly encouraged to consult their advisors to ensure they fulfill all remaining Mason Core (p. 142) requirements.

Administration
- Gerald Weatherspoon, Chair
- Megan Erb, Associate Chair
- Suzanne Slayden, Undergraduate Coordinator
- Benoit Van Aken, Graduate Coordinator

Undergraduate Programs
The Department of Chemistry and Biochemistry offers undergraduate programs leading to the BA (https://catalog.gmu.edu/colleges-schools/science/chemistry-biochemistry/chemistry-ba) and BS (https://catalog.gmu.edu/colleges-schools/science/chemistry-biochemistry/chemistry-bs) degree in Chemistry, with optional concentrations in Analytical Chemistry, Biochemistry, and Environmental Chemistry, as well as a five-year BS/Accelerated MS degree (https://catalog.gmu.edu/colleges-schools/science/chemistry-biochemistry/chemistry-bs/#acceleratedmasterstextcontainer). Our comprehensive undergraduate education in chemistry is designed to prepare students for professional careers in chemistry and for advanced studies in chemistry and chemistry-related areas such as environmental science, material science, biochemistry, medicinal chemistry, geochemistry, chemical waste management, pharmacy, forensic chemistry, and chemical engineering. Students planning medical, dental, or veterinary careers may meet the requirements of these professional schools by majoring in chemistry.

Pre-Medical, Pre-Dental, Pre-Pharmacy, and Pre-Veterinary Students
Web: prehealth.gmu.edu (http://prehealth.gmu.edu)

Many students planning medical, dental, pharmacy, veterinary, optometry, or other health professional careers choose to pursue a major in chemistry. These students should consult the health professions advising web site on required coursework and overall preparation.

Pre-Pharmacy Society
Mason students who are interested in pursuing careers in pharmacy are encouraged to participate in the Pre-Pharmacy Society. This student organization organizes supplemental programming focused toward pharmacy as a career.

Chemistry Club
The Chemistry Club provides a social and informational network for students. It serves the Department of Chemistry and Biochemistry by sponsoring informational programs and allowing students to work at university events.

Graduate Programs
The department's graduate programs (MS (https://catalog.gmu.edu/colleges-schools/science/chemistry-biochemistry/chemistry-ms) and PhD (https://catalog.gmu.edu/colleges-schools/science/chemistry-biochemistry/chemistry-biochemistry-phd)) provide advanced training for students who are recent college graduates, professionals in teaching, or technical workers in local research organizations. Students select a specialization from the fields of analytical, biological, environmental, inorganic, organic, physical, or computational chemistry. The graduate chemistry courses for these programs are usually offered during the late afternoon or evening hours for the convenience of students who are employed full-time. Graduate fellowships and teaching/research assistantships are available to the most qualified students.

The department offers a Chemistry MS (https://catalog.gmu.edu/colleges-schools/science/chemistry-biochemistry/chemistry-ms) with a research project (thesis option) or an all coursework program (non-thesis option). Within the MS, students may pursue a concentration in biochemistry. The PhD in all branches of chemistry is available through the Chemistry and Biochemistry, PhD. Students may also pursue Chemistry-related PhD research through the Environmental Science and Public Policy, PhD and the Biosciences, PhD. An area of emphasis in computational chemistry is available through the Computational Sciences and Informatics, PhD, offered in conjunction with the Department of Computational and Data Sciences.

Requirements & Policies

Requirements

Writing Intensive Requirement
Mason requires all undergraduate students to complete at least one course designated as "writing intensive" in their majors at the 300 level or above. Students majoring in chemistry fulfill this requirement by successfully completing CHEM 336 Physical Chemistry Lab I or CHEM 465 Biochemistry Lab.

Teacher Licensure
Students who wish to become teachers should consult the College of Education and Human Development (p. 161) and attend an information session early in their studies. For more information, visit the Graduate School of Education's website (http://gse.gmu.edu).

Academic Advising
Phone: 703-993-1071
Email: sslayden@gmu.edu
Website: cos.gmu.edu/chemistry/undergraduate-programs/

This program, when coordinated with the necessary courses in education, meets requirements for teacher licensure. It also meets requirements for entrance to medical and other professional schools.

Teacher Licensure
Students who wish to become teachers and plan to seek teacher licensure should consider the following options:

- Chemistry, BA or BS/Curriculum and Instruction, Accelerated MEd (Secondary Education Chemistry concentration) (p. 666)
- Curriculum and Instruction Undergraduate Certificate (p. 166)

Interested students should attend an information session early in their studies. For more information, visit the Graduate School of Education's website (http://gse.gmu.edu).

Admissions & Policies

Admissions
University-wide admissions policies can be found in the Undergraduate Admissions Policies (p. 65) section of this catalog.

To apply for this program, please complete the George Mason University Admissions Application (https://www2.gmu.edu/admissions-aid/apply-now).

Policies
Students must fulfill all Requirements for Bachelor's Degrees (p. 89), including the Mason Core (p. 142). As outlined in the Requirements (p. 662) section, students in this bachelor's program must also complete the additional College Requirements for the BA Degree.

CHEM 336 Physical Chemistry Lab I or CHEM 465 Biochemistry Lab will fulfill the writing intensive requirement.

For policies governing all undergraduate programs, see AP.5 Undergraduate Policies (p. 87).

Termination from the Major
To ensure the academic integrity of the Chemistry and Biochemistry undergraduate major program, students are expected to maintain a satisfactory level of academic performance.

No chemistry, math, or science course that is required for the major may be attempted more than three times. Students who do not successfully complete such a course with a grade of C or better by the third attempt may be terminated from the major.

Students who have been terminated from the chemistry major may not register for a chemistry course without the permission of the Department of Chemistry and Biochemistry.

A student may not declare a major in chemistry if the student has previously met the termination criteria for the major at any time, regardless of what the student's major was at the time the courses were taken.

Requirements

Degree Requirements
Total credits: minimum 120

Students should refer to the Admissions & Policies (p. 662) tab for specific policies related to this program.
Students must complete the chemistry program requirements with a minimum GPA of 2.30 and present no more than two courses with a grade of ‘D’ (1.00) in CHEM coursework at graduation.

**BA without Concentration**

Students who do not select the optional concentration complete the curriculum requirements listed below.

### Chemistry Courses

### Concentration in Biochemistry (BC)

The concentration in biochemistry is designed for students interested in studying chemistry at its interface with the biological sciences. Those interested in health science careers can obtain an excellent science background through this concentration.

Students majoring in chemistry with a concentration in biochemistry will complete the coursework below.

Total Credits 4

Mason Core and Elective Credits

In order to meet a minimum of 120 credits, this degree requires additional credits (specific credit counts by concentration are shown below), which may be applied toward any remaining Mason Core (p. 142) requirements (outlined below), Requirements for Bachelor’s Degrees (p. 89), College Requirements for the BA Degree (outlined below), and elective courses. Students are strongly encouraged to consult with their advisors to ensure that they fulfill all requirements.

- Without concentration: 64 credits
- BC concentration: 58 credits

Mason Core

Some Mason Core (p. 142) requirements may already be fulfilled by the major requirements listed above. Students are strongly encouraged to consult their advisors to ensure they fulfill all remaining Mason Core (p. 142) requirements.

**Foundation Requirements**

- Written Communication (ENGH 101) (p. 142)
- Oral Communication (p. 142)
- Quantitative Reasoning (p. 143)
- Information Technology and Computing (p. 143)

**Exploration Requirements**

- Arts (p. 144)
- Global Understanding (p. 146)
- Literature (p. 147)
- Natural Science (p. 148)
- Social and Behavioral Sciences (p. 150)
- Western Civilization/World History (p. 151)

**Integration Requirements**

- Written Communications (ENGH 302) (p. 142)
- Writing-Intensive (p. 151) 1
- Synthesis/Capstone (p. 153) 2

Total Credits 40

1. Most programs include the writing-intensive course designated for the major as part of the major requirements; this course is therefore not counted towards the total required for Mason Core.
2. Minimum 3 credits required.

Philosophy or Religious Studies

<table>
<thead>
<tr>

</tbody>
</table>

1. PHIL 323 Classical Western Political Theory and PHIL 324 Modern Western Political Theory may not be used to fulfill this requirement.

Social and Behavioral Sciences

Choose one approved Mason Core: Social and Behavioral Sciences (p. 150) course in addition to the Mason Core (p. 142)-required course for a total of 6 credits. The two courses used to fulfill the combined college-level and university requirements must be from different disciplines.

This requirement may be fulfilled by completing any course in ANTH (p. 1212), CRIM (p. 1514), ECON (p. 1564), GOVT (p. 1774), HIST (p. 1818), LING (p. 1896), PSYC (p. 2074), or SOCI (p. 2167), and the following GGS (p. 1732) courses:

<table>

</tbody>
</table>

Total Credits 3

1. HIST 100 History of Western Civilization (Mason Core) (p. 142) and HIST 125 Introduction to World History (Mason Core) (p. 142) may not be used to fulfill this requirement.

Natural Science

Choose one credit in addition to the Mason Core: Natural Science (p. 148) requirement for a total of 8 credits. This combined college-level and university requirement must be fulfilled by completing two of any approved Mason Core: Natural Science (p. 148) courses that include a laboratory experience 1.

College Requirements for the BA Degree

In addition to the program requirements and the Mason Core (p. 142) requirements, students pursuing a BA degree must complete the coursework below. Except where expressly prohibited, a course used to fulfill this college-level requirement may also be used simultaneously to satisfy other requirements such as Mason Core (p. 142) requirements, other college-level requirements, or requirements for the major. In some cases, the requirements listed below may be superseded by requirements of the degree program and the Mason Core (p. 142).
Select an additional Mason Core Natural Science course 1

1 BIOL 124 Human Anatomy and Physiology and BIOL 125 Human Anatomy and Physiology may not be used to fulfill this requirement.

### Foreign Language

Intermediate-level proficiency in one foreign language is required 1.

This requirement may be fulfilled by completing a course in a foreign language numbered 202, 209, or 210 (or higher-level courses taught in the language).

Select a foreign language course numbered 202, 209, 210, or higher if a waiver isn't applicable 0-3

Students may be eligible for a waiver of this requirement if they are already proficient in a second language or if they have received a satisfactory score on an approved proficiency test. Additional information on waivers can be found via the college's Office of Academic and Student Affairs (https://cos.gmu.edu/uaa).

### Non-Western Culture

Choose one approved Non-Western Culture Requirement 1 course in addition to the course used to fulfill the Mason Core: Global Understanding (p. 146) requirement. A course used to fulfill the Mason Core: Global Understanding (p. 146) requirement may not be simultaneously used to satisfy this college-level requirement. However, a course used to fulfill this requirement may be used simultaneously to fulfill any other requirements (Mason Core (p. 142) requirements, college-level requirements, or requirements for the major).

Select 3 credits from approved Non-Western Culture courses if a waiver isn't applicable: 0-3

1 Students who can document attendance at a native school in a non-western country for at least four years may request a waiver from this requirement through the CHSS Undergraduate Academic Affairs Office (http://chssundergrad.gmu.edu).

Honors

Honors in the Major
Chemistry majors who have completed prerequisites for CHEM 455 Honors Research in Chemistry and CHEM 456 Honors Research in Chemistry and have maintained an overall GPA of at least 3.00 in mathematics and science courses are eligible to enter the departmental honors program. To graduate with honors in chemistry, a student is required to maintain a minimum GPA of 3.00 in mathematics and science courses and successfully complete the two semesters of CHEM 455 Honors Research in Chemistry and CHEM 456 Honors Research in Chemistry with a minimum GPA of 3.50.

In order to apply for Chemistry Honors, please complete the application (https://cos.gmu.edu/chemistry/wp-content/uploads/sites/7/2015/08/form-honors-program-application-2016.pdf) and submit it to the undergraduate coordinator.

Accelerated Master's

Chemistry, BA or BS/Curriculum and Instruction, Accelerated MEd (Secondary Education Chemistry concentration)

Overview
Highly-qualified undergraduates may be admitted to the bachelor's/accelerated master's option and obtain a BA (p. 662) or BS in Chemistry (p. 667) (degree without concentration) and an MEd in Curriculum and Instruction (p. 170) (concentration in secondary education chemistry) in an accelerated time frame after completion of 149 credits. See AP.6.7 Bachelor's/Accelerated Master's Degree (p. 93) for policies related to this program.

This accelerated option is offered jointly by the Department of Chemistry and Biochemistry (p. 661) and the Graduate School of Education (p. 162).

Students in an accelerated degree program must fulfill all university requirements for the master’s degree. For policies governing all graduate degrees, see AP6 Graduate Policies (p. 90).
Application Requirements
Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in Graduate Admissions Policies (p. 68). For information specific to this accelerated master’s program, see Application Requirements and Deadlines (https://cehd.gmu.edu/bachelors-accelerated-masters-program).

Accelerated Option Requirements
Students complete the following courses in their senior year:

<table>
<thead>
<tr>
<th>Senior Fall Semester</th>
<th>Credits</th>
<th>Spring Semester</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>EDCI 573</td>

<td>6</td>
</tr>
</tbody>
</table>

Total Credits 12

While undergraduate students, accelerated master’s students are able to apply two of the courses listed above to both the bachelor’s and master’s degrees. These courses are considered advanced standing for the MEd. A minimum grade of B must be earned to be eligible to count as advanced standing. The other two courses are taken as reserve graduate credit and do not apply to the undergraduate degree. Early in their final undergraduate semester, students must submit the Bachelor’s/Accelerated Master’s Transition Form to the CEHD Admissions Office and specify which of the four courses are to be designated as advanced standing and reserve graduate credit.

Chemistry, BS
Banner Code: SC-BS-CHEM

Academic Advising
Phone: 703-993-1071
Email: sslayden@gmu.edu
Website: cos.gmu.edu/chemistry/undergraduate-programs/

This program is approved by the American Chemical Society (https://www.acs.org/content/acs/en.html). Upon completion, students who choose either the BS in Chemistry with no concentration or with the Analytical Chemistry concentration are certified to the society. Students that have a keen interest in sustainability should choose the Environmental Chemistry concentration. Students planning professional careers in chemistry should choose this degree.

Teacher Licensure
Students who wish to become teachers and plan to seek teacher licensure should consider the following options:

- Chemistry, BA or BS/Curriculum and Instruction, Accelerated MEd (Secondary Education Chemistry concentration) (p. 671)
- Curriculum and Instruction Undergraduate Certificate (p. 166)

Interested students should attend an information session early in their undergraduate career. For more information, visit the Graduate School of Education’s website (http://gse.gmu.edu).

Admissions & Policies

Admissions
University-wide admissions policies can be found in the Undergraduate Admissions Policies (p. 65) section of this catalog.

To apply for this program, please complete the George Mason University Admissions Application (https://www2.gmu.edu/admissions-aid/apply-now).

Policies
Students must fulfill all Requirements for Bachelor’s Degrees (p. 89), including the Mason Core (p. 142).

CHEM 336 Physical Chemistry Lab I or CHEM 465 Biochemistry Lab will fulfill the writing intensive requirement for students majoring in chemistry.

Termination from the Major
To ensure the academic integrity of the Chemistry and Biochemistry undergraduate major program, students are expected to maintain a satisfactory level of academic performance.

No chemistry, math, or science course that is required for the major may be attempted more than three times. Students who do not successfully complete such a course with a grade of C or better by the third attempt may be terminated from the major.

Students who have been terminated from the Chemistry major may not register for a chemistry course without the permission of the Department of Chemistry and Biochemistry.

A student may not declare a major in chemistry if the student has previously met the termination criteria for the major at any time, regardless of what the student’s major was at the time the courses were taken.

Requirements

Degree Requirements
Total credits: minimum 120

Students should refer to the Admissions & Policies (p. 667) tab for specific policies related to this program.

Students majoring in chemistry must complete the chemistry program requirements with a minimum GPA of 2.30 and present no more than two courses with a grade of ‘D’ (1.00) in CHEM coursework at graduation.

BS without Concentration
Students who do not select an optional concentration complete the curriculum requirements listed below.

### Concentration in Environmental Chemistry (EVCH)

Students who choose this concentration will have a broad knowledge of chemistry and a firm foundation in the environmental sciences covering atmospheric, aquatic, and soil. The major prepares students to work in the public or private sector as environmental chemists as well as to pursue an advanced degree.

Total Credits 6-8

1 The discipline sequences may be interchanged only with approval by the program coordinator.

The remaining credits are fulfilled by Mason Core requirements or general electives.

### Concentration in Analytical Chemistry (ANAC)

The Analytical Chemistry concentration is designed to introduce and train students in modern aspects of analytical chemistry. Students who choose this program will be well prepared to run sophisticated analytical instruments in industry and research laboratories and to pursue an advanced degree specializing in analytical chemistry.

</tbody>
</table>

Total Credits 6

The remaining hours are used to fulfill the Mason Core requirements and general elective courses.

CDS 130 Computing for Scientists (Mason Core) (p. 142) is required to fulfill the Mason Core IT requirement.

Concentration in Biochemistry (BC)

Students planning professional careers in biochemistry, the pharmaceutical industry, medicine, biotechnology, or related fields with a chemistry emphasis should choose this program instead of the Chemistry, BS without a concentration. This concentration provides students with a focus on biochemistry while retaining a strong chemistry foundation. Students are allowed to tailor the concentration to their interests with 9 credits of biology or chemistry elective credits.

Chemistry Courses

Select 9 credits of approved science electives chosen from CHEM or BIOL courses numbered 302-499

MATH 114 Analytic Geometry and Calculus II 4

Total Credits 8

Biology Courses

Select 9 credits of approved science electives chosen from CHEM or BIOL courses numbered 302-499

Mason Core and Elective Credits

In order to meet a minimum of 120 credits, this degree requires additional credits (specific credit counts by concentration are shown below), which may be applied toward any remaining Mason Core (p. 142) requirements (outlined below), Requirements for Bachelor’s Degrees (p. 89), and electives. Students are strongly encouraged to consult with their advisors to ensure that they fulfill all requirements.

- Without concentration: 49 credits
- Environmental concentration: 33-35 credits
- Analytical concentration: 43 credits
- Biochemistry concentration: 48 credits

Mason Core

Some Mason Core (p. 142) requirements may already be fulfilled by the major requirements listed above. Students are strongly encouraged to
consult their advisors to ensure they fulfill all remaining Mason Core (p. 142) requirements.

1 Most programs include the writing-intensive course designated for the major as part of the major requirements; this course is therefore not counted towards the total required for Mason Core.

2 Minimum 3 credits required.

**Honors**

**Honors in the Major**

Chemistry majors who have completed prerequisites for CHEM 455 Honors Research in Chemistry and CHEM 456 Honors Research in Chemistry and have maintained an overall GPA of at least 3.00 in mathematics and science courses are eligible to enter the departmental honors program. To graduate with honors in chemistry, a student is required to maintain a minimum GPA of 3.00 in mathematics and science courses and successfully complete the two semesters of CHEM 455 Honors Research in Chemistry and CHEM 456 Honors Research in Chemistry with a minimum GPA of 3.50.

In order to apply for Chemistry Honors, please complete the application (https://cos.gmu.edu/chemistry/wp-content/uploads/sites/7/2015/08/form-honors-program-application-2016.pdf) and submit it to the undergraduate coordinator.

**Accelerated Master’s**

**Chemistry, BA or BS/Curriculum and Instruction, Accelerated MEd (Secondary Education Chemistry concentration) Overview**

Highly-qualified undergraduates may be admitted to the bachelor’s/accelerated master’s option and obtain a BA (p. 662) or BS in Chemistry (p. 667) (degree without concentration) and an MEd in Curriculum and instruction (p. 170) (concentration in secondary education chemistry) in an accelerated time frame after completion of 149 credits. See AP6.7 Bachelor’s/Accelerated Master’s Degree (p. 93) for policies related to this program.

This accelerated option is offered jointly by the Department of Chemistry and Biochemistry (p. 661) and the Graduate School of Education (p. 162).

Students in an accelerated degree program must fulfill all university requirements for the master’s degree. For policies governing all graduate degrees, see AP6 Graduate Policies (p. 90).

**Application Requirements**

Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in Graduate Admissions Policies (p. 68). For information specific to this accelerated master’s program, see Application Requirements and Deadlines (https://cehd.gmu.edu/bachelors-accelerated-masters-program).

**Accelerated Option Requirements**

Students complete the following courses in their senior year:

<table>

<td><strong>12</strong></td>
</tr>
</tbody>
</table>

While undergraduate students, accelerated master’s students are able to apply two of the courses listed above to both the bachelor’s and master’s degrees. These courses are considered advanced standing for the MEd. A minimum grade of B must be earned to be eligible to count as advanced standing. The other two courses are taken as reserve graduate credit and do not apply to the undergraduate degree. Early in their final undergraduate semester, students must submit the Bachelor’s/Accelerated Master’s Transition Form to the CEHD Admissions Office and specify which of the four courses are to be designated as advanced standing and reserve graduate credit.

**Chemistry, BS/Chemistry, Accelerated MS Overview**

This bachelor’s/accelerated master’s degree program allows academically strong undergraduates with a commitment to research to obtain both the Chemistry, BS (p. 667) and the Chemistry, MS (p. 672) degrees within an accelerated timeframe. Upon completion of this 144 credit program, students will be exceptionally well prepared for entry into a professional school or a PhD program in chemistry or a related discipline. Students are eligible to enter this program and enroll in graduate courses after successfully completing 90 undergraduate credits, inclusive of prerequisites, toward the Chemistry, BS (p. 667) degree. This flexibility makes it possible for students to complete graduate coursework during their final year.

For more detailed information, see AP6.7 Bachelor’s/Accelerated Master’s Degrees (p. 93). For policies governing all graduate degrees, see AP6 Graduate Policies (p. 90).
Application Requirements
Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in the Graduate Admission Policies (p. 68) section of this catalog. Application information for this accelerated master’s program can be found here (https://www2.gmu.edu/admissions-aid/how-apply/accelerated-masters).

Successful applicants will have an overall undergraduate GPA of at least 3.00. Additionally, they will have completed 36 credits of CHEM courses with a GPA of at least 3.00.

Accelerated Option Requirements
At the beginning of the student’s final undergraduate semester, students must submit a bachelor's/accelerated master's transition form (available from the Office of the University Registrar (http://registrar.gmu.edu)) to the College of Science’s Office of Academic and Student Affairs (https://cos.gmu.edu/about/contact-us). Students must begin their master’s program in the semester immediately following conferral of the bachelor's degree.

Students must maintain an overall GPA of 3.00 or higher in graduate coursework and should consult with their faculty advisor to coordinate their academic goals within the chemistry and biochemistry concentrations.

Reserve Graduate Credit
While still in undergraduate status, a maximum of 6 additional graduate credits may be taken as reserve graduate credit and applied to the master’s program. Reserve graduate credits do not apply to the undergraduate degree.

Chemistry Minor
Banner Code: CHEM

Academic Advising
Phone: 703-993-1071
Email: sslayden@gmu.edu
Website: cos.gmu.edu/chemistry/undergraduate-programs/

This minor provides a firm foundation in chemical science. It is designed to be as flexible as possible so students can choose courses to complement their interests in areas such as biochemistry or environmental chemistry.

Requirements

Minor Requirements
Total credits: 16

Students should refer to the Admissions & Policies (p. 672) tab for specific policies related to this program.

Academic Advising
Email: chemistry@gmu.edu
Website: cbgrad.gmu.edu/aboutthems.pdf

This master’s degree provides advanced training for recent college graduates, professionals in teaching, and technical workers in research organizations who have an interest in chemistry or biochemistry. With a Thesis Option Master’s in Chemistry, the serious student will perform original research and write an M.S. thesis under the direction of a faculty member. This option is for students planning to continue with a Ph.D., or to work in industry, academia, or a national laboratory. The Non thesis Option is often used by those going on to a professional degree, or to teach chemistry at the secondary school level.

Admissions & Policies

Admissions
University-wide admissions policies can be found in the Graduate Admissions Policies (p. 68) section of this catalog.

To apply for this program, please complete the George Mason University Admissions Application (https://www2.gmu.edu/admissions-aid/apply-now).

To be considered for admission to degree status, students must have a bachelor’s degree in chemistry, biochemistry, or a related field from a regionally accredited institution and must meet general admission requirements for graduate study as specified in Graduate Admission Policies (p. 68). Admission is based on a departmental evaluation of the applicant’s background as evidenced by transcripts, résumés, and letters of recommendation. GRE scores are not required for admission into this program.

Policies
CHEM 500 Selected Topics in Modern Chemistry may not be applied toward the MS degree.

CHEM courses numbered 502 through 510 may be applied toward the degree only with prior written approval of the department.
For policies governing all graduate programs, see AP6 Graduate Policies (p. 90).

Requirements

Degree Requirements

Total credits: 30

Students should refer to the Admissions & Policies (p. 672) tab for specific policies related to this program.

Thesis Option

The Thesis Option is designed for students planning to pursue a doctoral degree or a career involving research in the chemical, biochemical, environmental, or pharmaceutical industries.

Students must choose a research laboratory advisor during their first semester in the program and begin working on their thesis project no later than the second semester. The thesis is based on research that must be preapproved by the thesis or advisory committee, which is appointed prior to the first semester of registration in CHEM 799 Master’s Thesis. Students must complete CHEM 799 Master’s Thesis and present a seminar, followed by an oral defense.

Non Thesis Option

The Non Thesis Option is designed for those seeking to go on to professional school, teach chemistry in secondary schools, or pursue other careers in which advanced work in chemistry is necessary or advantageous.

Students selecting this option are not required to complete a laboratory-based thesis. Instead, they must complete a research project or gain teaching experience in undergraduate chemistry labs, as described below.

Any combination of CHEM 670 Teaching Practicum and CHEM 796 Directed Reading and Research may be used to fulfill this requirement. However, CHEM 796 Directed Reading and Research may only be used to fulfill this requirement with prior written approval of the department and must be used to complete a laboratory or library-based research project, or must otherwise enhance the student’s teaching skills.

### Accelerated Option Requirements

At the beginning of the student’s final undergraduate semester, students must submit a bachelor’s/accelerated master’s transition form (available from the Office of the University Registrar (http://registrar.gmu.edu)) to the College of Science’s Office of Academic and Student Affairs (https://cos.gmu.edu/about/contact-us). Students must begin their master’s program in the semester immediately following conferral of the bachelor’s degree.

Students must maintain an overall GPA of 3.00 or higher in graduate coursework and should consult with their faculty advisor to coordinate their academic goals within the chemistry and biochemistry concentrations.

### Reserve Graduate Credit

While still in undergraduate status, a maximum of 6 additional graduate credits may be taken as reserve graduate credit and applied to the master’s program. Reserve graduate credits do not apply to the undergraduate degree.

### Chemistry and Biochemistry, PhD

**Banner Code:** SC-PHD-CBCM

**Academic Advising**

- Email: chemistry@gmu.edu
- Website: cbgrad.gmu.edu/aboutthephd.pdf

The program is intended to prepare students for advanced work in the chemical sciences and related areas. Graduates with the PhD in this field can seek employment in research and development, process control, or higher education. In addition to these traditional science career paths, graduates are also positioned to pursue careers in non-traditional areas such as the intellectual property and regulatory fields. The program is designed to provide students with a firm foundation in advanced coursework, which is followed by an independent research project...
completed under the guidance of a faculty advisor. The culmination of the program is a dissertation representing original research that is publishable in a peer-reviewed scientific journal.

**Admissions & Policies**

**Admissions**

University-wide admissions policies can be found in the Graduate Admissions Policies (p. 68) section of this catalog.

To apply for this program, please complete the George Mason University Admissions Application (https://www2.gmu.edu/admissions-aid/apply-now).

The program is intended for students who have completed an undergraduate program of study in chemistry, biochemistry, or a related field. Applicants are expected to have a BS degree with a minimum GPA of 3.00, and acceptable GRE and TOEFL scores (if applicable). The GRE requirement is waived for students with a master's degree from a regionally accredited US institution.

Applicants with a BS degree in other fields of study who have at least three years of chemistry or biochemistry coursework may be accepted provisionally and may be required to successfully complete selected remedial courses, some of which may not be applicable toward the PhD requirements. Interested students should submit a completed application, three letters of reference, official reports of GRE and TOEFL scores, and a personal/goals statement outlining their general research interests and career plans.

**Policies**

For policies governing all graduate programs, see AP6 Graduate Policies (p. 90).

**Academic Advising**

Upon acceptance into the Chemistry and Biochemistry, PhD, a student will be assigned an academic advisor. Prior to registering for classes, students are required to meet with their academic advisor who will provide guidance in selecting courses that are consistent with the student's area of interest. Once a student has selected a research/dissertation advisor, that person then assumes the role of providing academic advisement to the student.

**Reduction of Credits**

For students entering the doctoral program with a master's degree in a related field from a regionally accredited institution, the number of required credits may be reduced up to 30 credits, subject to approval of the program faculty and the associate dean for student affairs. See AP6.5.2 Reduction of Credits (p. 91) for more information.

**Requirements**

**Degree Requirements**

Total credits: 72

Students should refer to the Admissions & Policies (p. 675) tab for specific policies related to this program.

</tr>
</tbody>
</table>

**Electives**

Select 39 credits of approved elective courses in consultation with the student's advisor

Total Credits 48

**Dissertation Committee and Supervisor**

By the end of the first year, a student in the program is expected to have selected a dissertation/research supervisor and to have formed the dissertation committee. This committee will consist of at least four graduate faculty members (including the dissertation supervisor), with at least two members from the Department of Chemistry and Biochemistry. At least one member must be from outside the department. Qualified individuals who are not members of the graduate faculty, including faculty at other universities or government laboratories, may serve on the committee with the approval of the department chair and the college's associate dean.

**Candidacy Examinations**

The student must successfully complete separate written and oral candidacy examinations prepared and administered by the dissertation committee. All six sections (analytical, biochemistry, environmental, inorganic, organic, and physical chemistry) of the written candidacy examinations will be offered twice a year, typically during the week prior to the start of the fall and spring semesters. A student, in consultation with the approval of the research director, will schedule exams at least 30 days prior to the examination date. Grades of “High Pass”, “Pass”, or “Unsatisfactory” will be awarded for each of the exams. If a student receives a grade of “Unsatisfactory” in a given section of the exam, he/she will be allowed to retake that section of the exam during the next exam cycle. A student must satisfactorily pass all sections of the exam by the end of the third year from the date of enrollment in the PhD program.

**Dissertation Proposal and Advancement to Candidacy**

Prior to completing the sixth semester in the program, a student is expected to have advanced to candidacy. The student’s committee will determine whether a candidate is ready to begin preparation of the research proposal and approve enrollment in CHEM 998 Doctoral Dissertation Proposal based upon their familiarity with the student’s progress.

In order to advance to candidacy, a student is required to fulfill the following requirements:

- The student will prepare and submit a research proposal (based on the thesis research) for approval by the dissertation committee.
- The student must pass a written qualifying exam prepared by the dissertation committee. The exam can be based on the student’s research and/or completed coursework, with the composition of the exam being determined by the student’s dissertation committee.
• The final stage is an oral defense of the student’s research proposal. Questions at the proposal defense may also be drawn from material covered in the written qualifying exam.

Dissertation Research

No more than 24 combined credits from CHEM 998 Doctoral Dissertation Proposal and CHEM 999 Doctoral Dissertation Research may be applied toward satisfying doctoral degree requirements, with no more than 12 credits of CHEM 998 Doctoral Dissertation Proposal.

<table>
<thead>
<tr>

<td>24</td>
</tr>
</tbody>
</table>

Exit Seminar

Each PhD candidate presents his or her research in a seminar in the Department of Chemistry and Biochemistry (a departmental seminar), which takes place in the same semester as the final defense of the dissertation (below).

Dissertation Research and Defense

With the approval of the dissertation committee, the student will enroll in CHEM 998 Doctoral Dissertation Proposal and CHEM 999 Doctoral Dissertation Research. The dissertation research should represent a significant contribution to the appropriate scientific field(s), and it should be deemed to represent a body of work that is publishable in a refereed scientific journal. The dissertation must be presented and defended in a public forum consisting of the dissertation committee and other interested members of the George Mason University community.

Department of Computational and Data Sciences

Karen Underwood, Academic Programs Administrator

Phone: 703-993-9298
Email: cds@gmu.edu
Website: cds.gmu.edu

Administration

• Jason Kinser, Chair
• Eduardo Lopez, Graduate Coordinator CSI, COMP, Data Science Certificate
• Andrew Crooks, Graduate Coordinator CSS
• Joseph Marr, Undergraduate Coordinator

The mission of the Department of Computational and Data Sciences (CDS) is comprised of two objectives:

The first is the systematic development and application of computational techniques for modeling and simulation of scientific and social phenomena or social processes.

The second objective is the systematic development and application of techniques for mining, managing, and analyzing large sets of data.

The resulting interdisciplinary approach leads to understanding, interpretation, and prediction of phenomena that traditional theory or experiment cannot provide alone. CDS’s mission aims toward excellence in faculty and graduate student state-of-the-art research activities, as well as providing modern approaches to student education at both the graduate and undergraduate levels. The educational and research directions pursued in CDS are focused to reflect the interests of neighboring federal laboratories, scientific institutions, and high-technology firms to provide the students opportunities for continued or new employment. Graduate courses are also designed to accommodate part-time students, with most courses meeting once a week in the late afternoon or early evening.

The research and teaching activities associated with CDS’s programs are a reflection of the present central role of computation in the arenas of “big data” and of modeling and simulation.

Undergraduate Programs

This department offers the Computational and Data Sciences, BS (p. 684) and the Computational and Data Sciences Minor (p. 686). An accelerated master’s option is also available for undergraduate students interested in the Computational Science, MS (p. 677).

Many opportunities exist for undergraduate students to get involved with research. Students should consult with faculty working on research topics of interest to them based on their exploration of the departmental website.

Graduate Programs

This department offers the Data Science Graduate Certificate (p. 686), the Computational Social Science Graduate Certificate (p. 681), the Computational Science, MS (p. 677), the Computational Sciences and Informatics, PhD (p. 679), and the Computational Social Science, PhD (p. 682). An accelerated master’s option is also available for undergraduate students interested in the Computational Science, MS (p. 677). The department also supports the Computational Social Science Concentration in the Interdisciplinary Studies, MAIS (p. 542). These graduate programs are strongly supported by the extensive research activities of the faculty, including their collaborations with scientists and engineers at regional government laboratories.

Website: cos.gmu.edu/cds/ms-in-computational-science/

The Master of Science in Computational Science addresses the growing demand for trained computational scientists and engineers, and data scientists. It combines a solid foundation in computational science skills with courses in a variety of scientific and engineering computer-intensive areas where modeling and simulation, data analysis, and high performance computing play a central role.

Working with an advisor, a student may choose to pursue an area of emphasis. The areas of emphasis are:

• Computer Modeling and Simulation: Intended for students who wish to learn computational solution techniques for modeling and simulation of scientific and engineering phenomena.
• Data Science: Intended for students who wish to learn computational methods for acquiring, extracting, and analyzing large-scale data obtained by observations, experiments, modeling, and database searches.

Students may also combine areas of emphasis to create their own customized curriculum under the guidance of the graduate coordinator.

Most of the courses are offered in the late afternoon or early evening to accommodate students with full-time employment outside of the university.

Admissions & Policies

Admissions

University-wide admissions policies can be found in the Graduate Admissions Policies (p. 68) section of this catalog.

To apply for this program, please complete the George Mason University Admissions Application (https://www2.gmu.edu/admissions-aid/apply-now).

Eligibility

Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in the Graduate Admissions Policies (p. 68) section of this catalog. Applicants to the Computational Science, MS should have academic backgrounds in the following appropriate fields: physical or biological sciences, engineering, mathematics, or computer science. They should have an undergraduate degree from a regionally accredited institution with a GPA of at least 3.00 in their last 60 credits of study. In addition, applicants should have taken at least one course in differential equations and have facility in using a high-level computer programming language.

Application Requirements

To apply, prospective students should complete the George Mason University Admissions Application (https://www2.gmu.edu/admissions-aid/apply-now), supply two copies of official transcripts from each university attended, a current résumé, and an expanded goals statement. Applicants should also provide two letters of recommendation and an official report of scores on the GRE-GEN. The GRE-SUB is recommended if it is given in the student’s undergraduate major. The GRE requirement will be waived if the student holds a bachelor’s or a master’s degree from a regionally accredited U.S. institution in the appropriate fields listed above. Acceptable TOEFL scores (as determined by university policy) are required of all international applicants; for more information visit Admission of International Students (p. 71). The ETS code for Mason is 5827.

Policies

For policies governing all graduate degrees, see AP6 Graduate Policies (p. 90).

</tr>
</tbody>
</table>

Total Credits  21

Students must maintain an overall GPA of 3.00 or higher in graduate coursework and should consult with their faculty advisor to coordinate their academic goals within the modeling and simulation or data science emphases of the Computational Science, MS (p. 677).

Gre-general scores are waived for graduates of BS degrees from any program in the College of Science or the Volgenau School of Engineering at George Mason University.

### Reserve Graduate Credit

While in undergraduate status, a student may take a maximum of six graduate credits as reserve graduate credits and apply those credits to a master's program. Reserve graduate credits are not counted toward the 120 credits required in the undergraduate degree.

### Mechanical Engineering, BS/

Computational Science, Accelerated MS

**Overview**

This option enables enthusiastic, highly qualified, undergraduates to obtain the Mechanical Engineering, BS (https://catalog.gmu.edu/colleges-schools/engineering/mechanical/mechanical-engineering-bs) and the Computational Science, MS (p. 677) within the accelerated time frame of five years. The program requires 144 credits total, allowing students to undertake graduate coursework during their final year in the bachelor's degree. Upon completion of this 144 credit BS/MS combined program, students are exceptionally well prepared for undertaking doctoral studies or entering the professional workforce.
program, students are exceptionally well prepared for undertaking doctoral studies or entering the professional workforce.

For more detailed information, see AP6.7 Bachelor’s/Accelerated Master’s Degrees (p. 93). For policies governing all graduate degrees, see AP6 Graduate Policies (p. 90).

Application Requirements
Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in the Graduate Admission Policies (p. 68) section of this catalog. Application information for this Accelerated Master’s program can be found on the Department of Computational and Data Sciences (http://cos.gmu.edu/cds/academic-programs) website. Applicants must have an overall undergraduate GPA of at least 3.00 and have completed at least 90 credits. Additionally, applicants will have completed the following courses with a GPA of 3.00 or better:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>CS 112</td>
<td>Introduction to Computer Programming (Mason Core) (p. 142)</td>

</tr>
</tbody>
</table>

Students must maintain an overall GPA of 3.00 or higher in graduate coursework and should consult with their faculty advisor to coordinate their academic goals within the modeling and simulation or data science emphases of the Computational Science, MS (p. 677).

GRE-general scores are waived for graduates of BS degrees from any program in the College of Science or the Volgenau School of Engineering at George Mason University.

Reserve Graduate Credit
While in undergraduate status, a student may take a maximum of six graduate credits as reserve graduate credits and apply those credits to a master’s program. Reserve graduate credits are not counted toward the 120 credits required in the undergraduate degree.

Computational Sciences and Informatics, PhD
Banner Code: SC-PHD-CSI

Eduardo Lopez
221 Research Hall
Fairfax Campus
Phone: 703-993-5916
Email: elope22@gmu.edu
Website: cos.gmu.edu/cds/phd-in-computational-sciences-and-informatics/

Founded in 1992, the program addresses the role of computation in science, mathematics, and engineering, and is designed around the emphases of Computer Modeling and Simulation and of Data Science. Computational science, focused on modeling and simulation, is defined as the systematic development and application of computing systems and computational solution techniques for modeling and simulation of scientific and engineering phenomena. Informatics, focused on data science, is defined as the systematic development and application of computing systems and computational solution techniques for analyzing data obtained through experiments, modeling, database searches, and instrumentation. The resulting interdisciplinary approach leads to an understanding that traditional theory or experimentation alone cannot provide. The close relationship of the PhD to the research and development activities in federal laboratories, scientific institutions, and high-technology firms affords students opportunities for continued or new employment. Scheduled courses and sequences accommodate part-time students, with most courses meeting once a week in the late afternoon or early evening. The research and teaching activities associated with the program reflect the recognized role of computation and data analysis as part of a triad with theory and experiment, leading to a better understanding of nature. The program is designed to be completed in four to five years.

Admissions & Policies

Admissions
University-wide admissions policies can be found in the Graduate Admissions Policies (p. 68) section of this catalog.

To apply for this program, please complete the George Mason University Admissions Application (https://www2.gmu.edu/admissions-aid/apply-now).

Eligibility
Students interested in applying for admission should have a bachelor’s degree in computational science, any natural science, mathematics, engineering, or computer science with a minimum GPA of 3.00 in their last 60 credits of study. Applicants to the PhD program should have a mathematics background up to and including differential equations and should also have knowledge of a computer programming language such as C, C++, Fortran, Python, etc.

Application Requirements
The GRE is required, unless the applicant holds a master’s degree from a regionally-accredited school in the United States. An acceptable TOEFL score (as determined by the university) is required for international students; for more information visit the Admission of International Students (https://catalog.gmu.edu/admissions/international-students) section of the catalog. The ETS code for Mason is 5827.

Students should submit a completed George Mason University Admissions Application (https://www2.gmu.edu/admissions-aid/apply-now) along with three letters of recommendation, an expanded goals statement, and application fee in addition to the items listed above.

Application deadlines can be found on the Office of Admissions website (https://admissions.gmu.edu/grad/application-deadlines-and-requirements/?academicUnit=SC&ga=1.13682175.956654242.1443444993). Applications requesting financial support must be received by February 1.
for the fall semester. Applications from local applicants may be accepted after these general deadlines.

For additional information, please contact the CSI graduate coordinator.

Policies
For policies governing all graduate degrees, see AP6 Graduate Policies (p. 90).

Reduction of Credit
For students entering the doctoral program with a master's degree in a related field from a regionally accredited institution, the required coursework may be reduced up to 24 credits, subject to approval of the graduate coordinator and the college's associate dean. Research-based courses and seminar courses are not eligible for reduction.

Transfer of Credit
Students who have prior graduate coursework that has not been applied to any degree may request to have a maximum of 30 of those graduate credits transferred, with approval of the graduate coordinator, the college's associate dean, and in accord with university policy. Research-based courses and seminar courses are not eligible for transfer.

Requirements

Degree Requirements
Total: 72 credits

Students should refer to the Admissions & Policies (p. 679) tab for specific policies related to this program.

General Core Courses

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>Select two courses (6 credits) from the following:</td>
<td></td>
<td></td>
</tr>
<tr>
<td>CSI 690</td>
<td>Numerical Methods</td>
<td></td>
</tr>
<tr>
<td>CSI 695</td>
<td>Scientific Databases</td>
<td></td>
</tr>
<tr>
<td>CSI 702</td>
<td>High-Performance Computing</td>
<td></td>
</tr>
<tr>
<td>CSI 703</td>
<td>Scientific and Statistical Visualization</td>
<td></td>
</tr>
<tr>
<td>Total Credits</td>
<td>6</td>
<td></td>
</tr>
</tbody>
</table>

Areas of Emphasis Courses
From the list below, students are advised to select six courses that correspond to areas of emphasis in:

- **Computer Modeling and Simulation:** Including applications to the natural sciences
- **Data Science:** Including computational learning, statistics, and data analytics

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>Select six courses (18 credits) from the following:</td>
<td></td>
<td></td>
</tr>
<tr>
<td>CSI 500</td>
<td>Computational Science Tools</td>
<td></td>
</tr>
<tr>
<td>CSI 501</td>
<td>Introduction to Scientific Programming</td>
<td></td>
</tr>
<tr>
<td>CSI 672</td>

</tr>
<tr>
<td>Total Credits</td>
<td>18</td>
<td></td>
</tr>
</tbody>
</table>

1 When choosing courses, avoid courses previously taken to fulfill the 'General Core Courses' requirement and only choose one 500-level course.

Colloquium/Seminar
The department offers weekly colloquia and seminar series to ensure that students are exposed to the latest developments at area research institutions. One credit may be chosen from:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>CSI 898</td>
<td>Research Colloquium in Computational Sciences and Informatics</td>
<td>1</td>
</tr>
<tr>
<td>or CSI 991</td>
<td>Seminar in Scientific Computing</td>
<td></td>
</tr>
<tr>
<td>Total Credits</td>
<td>1</td>
<td></td>
</tr>
</tbody>
</table>
Electives
Electives should be chosen to bring the total number of credits to 72. Courses must be approved by the student’s advisor and the graduate coordinator. Additionally:

- A maximum of 2 credits of CSI 898 Research Colloquium in Computational Sciences and Informatics and/or CSI 991 Seminar in Scientific Computing may be applied as electives.
- A maximum of two 500-level courses may be applied between both the ‘Areas of Emphasis Courses’ requirement and the ‘Electives’ requirement.
- CSI 796 Directed Reading and Research and CSI 996 Doctoral Reading and Research are the only allowable research-based courses that can be used as electives.
- The following courses may not be used as electives: CSI 798 Research Project, CSI 799 Master’s Thesis, CSI 998 Doctoral Dissertation Proposal, and CSI 999 Doctoral Dissertation.
- Students may pursue interdisciplinary research that supplements the ‘Areas of Emphasis Courses’ and ‘Electives’ requirements with each other and also with bioinformatics, climate dynamics, computational chemistry, computational social science, geoinformation sciences, and several other autonomous PhD program areas within the College of Science.

Doctoral Research
No more than 24 combined credits from CSI 998 Doctoral Dissertation Proposal and CSI 999 Doctoral Dissertation may be applied toward satisfying doctoral degree requirements, with a minimum of 6 credits of CSI 999 Doctoral Dissertation.

Students become eligible to register for CSI 998 Doctoral Dissertation Proposal upon having an approved dissertation committee. Upon advancement to candidacy, students will be eligible to register for CSI 999 Doctoral Dissertation.

<table>

<td></td>
</tr>
</tbody>
</table>

Total Credits 24

Candidacy Examination
The student must successfully complete separate written, computational, and oral candidacy examinations prepared and administered by the student’s dissertation committee.

Dissertation Proposal and Advancement to Candidacy
Students advance to doctoral candidacy by fulfilling the following requirements:

- The student must successfully complete all coursework and candidacy examinations as stated above.
- The student prepares a dissertation proposal describing in detail the planned dissertation research. The proposal must be approved by the dissertation committee.
- Following successful completion of the research proposal and candidacy exams, the committee will recommend the student for advancement to doctoral candidacy to the graduate coordinator and the college’s associate dean.

Dissertation Research and Defense
After advancing to candidacy, the student will work on a doctoral dissertation while enrolled in CSI 999 Doctoral Dissertation. The dissertation is a written piece of original contribution that demonstrates a doctoral candidate’s mastery of the subject matter. A student is expected to produce new and original research worthy of publication in peer-reviewed journals. After the dissertation is completed, the committee will review the dissertation and examine the student in a public oral dissertation defense.

Computational Social Science Graduate Certificate
Banner Code: SC-CERG-CSS
Karen Underwood, Academic Programs Administrator
373 Research Hall
Fairfax Campus
Phone: 703-993-9298
Email: cssgrad@gmu.edu
Website: cos.gmu.edu/cds/graduate-certificate-in-computational-social-science/

This program is designed for students who seek training in computer simulation and related computational methods for analyzing social systems and processes. The program is open to all students with graduate standing at George Mason University and all students who hold a bachelor’s degree from a regionally accredited university. The Computational Social Science (CSS) certificate allows students with social science or computational backgrounds to acquire new knowledge and modeling skills to improve their qualifications and attractiveness to employers in government, academia, or industry. The core courses provide a common foundation; additional elective courses allow for a variety of student interests across diverse social domains.

This graduate certificate may be pursued on a part-time or full-time basis.

Admissions & Policies

Admissions
University-wide admissions policies can be found in the Graduate Admissions Policies (p. 68) section of this catalog.

To apply for this program, please complete the George Mason University Admissions Application (https://www2.gmu.edu/admissions-aid/apply-now).

Applicants should have an undergraduate degree from a regionally accredited institution with a GPA of at least 3.00. To apply, prospective students should forward a completed George Mason University Admissions Application (https://www2.gmu.edu/admissions-aid/apply-now), one copy of official transcripts from each college and graduate institution attended, and a current résumé. TOEFL scores are required of all international applicants. International applicants should see information regarding the admission of international students (p. 71).

Students intending to obtain the CSS certificate must apply to the CSS certificate program before beginning any CSS coursework intended...
to satisfy requirements. They must also have their coursework plan approved by the director.

**Policies**

For policies governing all graduate degrees, see AP 6 Graduate Policies (p. 90).

**Requirements**

**Certificate Requirements**

Total credits: 15

This certificate may be pursued on a full- or part-time basis.

Students should refer to the Admissions & Policies (p. 681) tab for specific policies related to this program.

1 These courses should be selected in conjunction with, and approved by, the student’s advisor. Students may include a maximum of 3 credits of programming courses to meet the elective requirements. Procedural, object-oriented languages, or other approved programming approaches may be used with permission of the director. Some courses on computational techniques, modeling, or statistics, such as visualization, graphics, and statistical and database packages may also be used to meet the requirements with prior approval of the director.

**Computational Social Science, PhD**

**Banner Code:** SC-PHD-CSS

Karen Underwood, Academic Programs Administrator

373 Research Hall
Fairfax Campus

Phone: 703-993-9298
Email: cssgrad@gmu.edu

Website: cos.gmu.edu/cds/phd-in-computational-social-science/

The core objective of the program is to train graduate students to be professional computational social scientists in academia, government, or business. The program offers a unique and innovative interdisciplinary academic environment for systematically exploring, discovering, and developing skills to successfully follow careers in one of the areas of computational social science.

**Admissions & Policies**

**Admissions**

University-wide admissions policies can be found in Graduate Admissions Policies (p. 68).

To apply for this program, please complete the George Mason University Admissions Application (https://www2.gmu.edu/admissions-aid/apply-now).

**Eligibility**

Applicants should have as background a bachelor’s degree in one of the social sciences; computer science, engineering, or a relevant discipline; and undergraduate courses in these and related areas. Bachelor’s degrees in the physical or biological sciences are also eligible, but applicants may be advised to take additional courses in social science or computer science as prerequisites to admission. Minimal requirements also include one undergraduate course in calculus and knowledge of a computer programming language, preferably object-based.

**Application Requirements**

Applicants should have an undergraduate degree from a regionally-accredited institution, with a GPA of at least 3.25. To apply, prospective students should complete the George Mason University Admissions Application (https://www2.gmu.edu/admissions-aid/apply-now), copies of official transcripts from each college and graduate institution attended, a current résumé, an expanded goals statement not to exceed 2,000 words, and the names of two Mason faculty members who may be suitable advisors. Applicants should also include three letters of recommendation from faculty members or individuals with direct knowledge of the student’s academic or professional capabilities. The letters must arrive directly from the senders. Applicants should also submit an official report of scores obtained on the GRE-GEN. TOEFL scores are required for all international applicants.

**Policies**

For policies governing all graduate degrees, see AP 6 Graduate Policies (p. 90).

**Reduction of Credit**

Students entering the doctoral program with a master’s degree in a related discipline may request that the required credits for the doctoral degree be reduced by a maximum of 30 credits with approval of the director of graduate studies and the associate dean and in accordance with university policy. More information can be found in AP 6.5.2 Reduction of Credits (https://catalog.gmu.edu/policies/academic/graduate-policies/#ap-6-5-2).
Transfer of Credit
Students who have prior graduate coursework that has not been applied to another degree may request to have a maximum of 24 of these graduate credits transferred, with approval of the director of graduate studies and the associate dean and in accord with university policy. More information can be found in AP 6.5.3 Transfer of Credit (https://catalog.gmu.edu/policies/academic/graduate-policies/#ap-6-5-3).

Academic Advising
During the first year, each student will form a graduate studies committee, called the first-year committee, consisting of the student’s advisor plus two or three appropriately qualified individuals. The committee assists the student in designing a specific plan of study and evaluating the student’s progress by the end of the first year. During the second year, the student forms a doctoral committee, with membership approved by the CSS program director. The committee will advise the student on preparing for the doctoral candidacy exams and preparing, developing, and defending the doctoral dissertation.

 Select 6 credits from the following: 6
| CSS 625 | Complexity Theory in the Social Sciences |         |
| CSS 645 | Spatial Agent-Based Models of Human-Environment Interactions | |
| CSS 692 | Social Network Analysis                  |         |

Total Credits 6

Discipline-based Courses

Select 15 credits of discipline-based social science courses in a specific area such as anthropology, economics, geography, history, linguistics, political science, or sociology, as approved by the student’s advisor, to provide domain-specific knowledge.

Total Credits 15

Electives

Select 15 credits of electives or independent research, as approved by the student’s advisor, to provide further substantive or methodological specialization as needed.

Total Credits 15

Students with a strong background in computing, for example, a prior MS in computer science, but weaker social science training will be required to use all or most of these electives in a substantive social science. Conversely, students with a strong background in social science, for example, a BS in economics, will be required to use most or all of these electives in computing courses.

Candidacy Examination
The candidacy exam is taken after students have completed all core requirements and a majority of additional coursework (18 plus 15 credits), which typically corresponds to the fifth semester in the program. The purpose of the candidacy exam is to assess the student’s substantive and methodological knowledge in CSS as a whole and in the chosen focus area, the ability to integrate materials from different courses, and the potential for a successful dissertation. The exam consists of written and oral parts.

Dissertation Proposal
Upon passing the candidacy examination, each student shall prepare and, within a year, defend a dissertation proposal, written in the form of an extramural research grant proposal. The student shall develop the dissertation proposal in consultation with the dissertation committee. With successful defense of the proposal, a student becomes a PhD candidate.

Dissertation Research
Dissertation research credits are required in order to demonstrate doctoral-level originality and research excellence:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
</table>
 Select 24 credits from the following: 24
| CSS 998 | Doctoral Dissertation Proposal  |         |
| CSS 999 | Doctoral Dissertation                  |         |

Total Credits 24

Example Dissertation Areas
Areas for dissertation research include, but are not limited to, the following:

- Agent-based computational economics: trade, finance, decision making under risk
-Computational political economy: voting, institutions, norms, inequality
-Computational linguistics: generative grammars, parsing, classifiers, inference
-Social network analysis: connectivity, structure, evolution of the Internet, social media, cyber warfare
-Computational anthropology: emergence of hierarchy, settlement patterns
-Computational political science: systems of government, conflict and war, cooperation
-Computational sociology: segregation, collective action, leadership, trust
• Complexity theory: power laws, potential theory, criticality, bifurcation
• Computational methodology: multiagent systems, evolutionary computation
• Agent-based computational geography: land use change, humanitarian assistance, urban modeling

**Doctoral Dissertation Defense**
The PhD dissertation is the detailed written report of an original and significant research contribution to computational social science. It is defended before the dissertation committee in a forum open to fellow students and interested faculty and staff. The dissertation committee recommends that the graduate faculty of George Mason University accept the student candidate for the PhD degree upon a successful defense and completion of any final revisions.

**Computational and Data Sciences, BS**

**Banner Code:** SC-BS-CDS

**Joseph Marr, Undergraduate Coordinator**

225 Research Hall
Fairfax Campus

Phone: 703-993-5017
Email: jmarr2@gmu.edu
Website: cos.gmu.edu/cds/bs-in-computational-and-data-sciences/

The aim of this degree is to provide students with technical skills and knowledge for rigorously investigating physical and social phenomena. The BS is a transformative approach that integrates science at George Mason University based on the combination of real-world computer science skills, data acquisition and analysis, scientific modeling, applied mathematics, and simulation. As an interdisciplinary STEM-designated program, this degree addresses the current central role of computation in the areas of "big data," modeling, and simulation. Graduates of the program will possess the computational, scientific, and mathematical skills necessary for participating effectively as members of the scientific simulation and data analysis groups that are of increasing importance in the federal and public sectors, and in high technology firms. Additionally, graduates of the program will be well prepared to pursue graduate studies.

**Admissions & Policies**

**Admissions**

University-wide admissions policies can be found in the Undergraduate Admissions Policies (p. 65) section of this catalog.

To apply for this program, please complete the George Mason University Admissions Application (https://www2.gmu.edu/admissions-aid/apply-now).

**Policies**

Students must fulfill all Requirements for Bachelor’s Degrees (p. 89), including the Mason Core (p. 142).

The university’s writing intensive requirement for the major will be met upon successful completion of CDS 302 Scientific Data and Databases.

For policies governing all undergraduate programs, see AP 5 Undergraduate Policies (p. 87).

**Requirements**

**Degree Requirements**

Total credits: minimum 120

Students should refer to the Admissions & Policies (p. 684) tab for specific policies related to this program.

Oral Communication (p. 142) 3  
Quantitative Reasoning (p. 143) 3  
Information Technology and Computing (p. 143) 3  

Exploration Requirements

Arts (p. 144) 3  
Global Understanding (p. 146) 3  
Literature (p. 147) 3  
Natural Science (p. 148) 7  
Social and Behavioral Sciences (p. 150) 3  
Western Civilization/World History (p. 151) 3  

Integration Requirements

Written Communications (ENGH 302) (p. 142) 3  
Writing-Intensive (p. 151) 3  
Synthesis/Capstone (p. 153) 3  

Total Credits 40

1. Most programs include the writing-intensive course designated for the major as part of the major requirements; this course is therefore not counted towards the total required for Mason Core.
2. Minimum 3 credits required.

Accelerated Master’s

Computational and Data Sciences, BS/Computational Science, Accelerated MS

Overview

This option enables enthusiastic, highly qualified, undergraduates to obtain the Computational and Data Sciences, BS (p. 684) and the Computational Science, MS (p. 677) within the accelerated time frame of five years. The program requires 144 credits total, allowing students to undertake graduate coursework during their final year in the bachelor's degree. Upon completion of this 144 credit BS/MS combined program, students are exceptionally well prepared for undertaking doctoral studies or entering the professional workforce.

For more detailed information, see AP.6.7 Bachelor’s/Accelerated Master’s Degrees (p. 93). For policies governing all graduate degrees, see AP6 Graduate Policies (p. 90).

Application Requirements

Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in the Graduate Admission Policies (p. 68) section of this catalog. Application information for this Accelerated Master’s program can be found on the Department of Computational and Data Sciences (http://cos.gmu.edu/cds/academic-programs) website.

Applicants must have an overall undergraduate GPA of at least 3.00 and have completed at least 90 credits. Additionally, applicants will have completed the following courses with a GPA of 3.00 or better:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>

<td>Introduction to Scientific Programming</td>
<td></td>
</tr>
</tbody>
</table>
Computational and Data Sciences Minor

CDS 301 Scientific Information and Data Visualization 3
CDS 302 Scientific Data and Databases 3
CDS 303 Scientific Data Mining 3
CDS 411 Modeling and Simulation II 3
Select one from the following: 3
- CDS 461 Molecular Dynamics and Monte Carlo Simulations
- CDS 490 Directed Study and Research
- CSI 500 Computational Science Tools

Total Credits 21

Students must maintain an overall GPA of 3.00 or higher in graduate coursework and should consult with their faculty advisor to coordinate their academic goals within the modeling and simulation or data science emphases of the Computational Science, MS (p. 677).

Reserve Graduate Credit
While in undergraduate status, a student may take a maximum of six graduate credits as reserve graduate credits and apply those credits to a master’s program. Reserve graduate credits are not counted toward the 120 credits required in the undergraduate degree.

Admissions & Policies

Policies
At least 8 credits must be unique to this minor and may not be used to fulfill requirements of the student’s major, concentration, or another minor or undergraduate certificate. Students must complete at least 6 credits in their minor at George Mason and achieve a minimum GPA of 2.00 in courses applied to the minor.

For policies governing all minors, see AP.5.3.4 Minors (p. 90).

Requirements

Minor Requirements
Total credits: 15

Students should refer to the Admissions & Policies (p. 686) tab for specific policies related to this program.

Students should note that many of the required courses have prerequisites. Nonetheless, this minor is within efficient reach of most students majoring in science, mathematics, engineering, or computer science. It is very likely that students with these backgrounds will already have the prerequisites completed.

Data Science Graduate Certificate

Banner Code: SC-CERG-DSCI

Eduardo Lopez, Graduate Coordinator
221 Research Hall
Fairfax Campus
Phone: 703-993-5916

The minor provides an attractive option for students majoring in science, technology, engineering, or mathematics (STEM) who wish to augment their major degree program with additional courses in modeling, simulation, data science, and scientific computing. The combination of computer science, numerical methods, science, and computational and data sciences (CDS) synthesis courses will significantly enhance the practical knowledge and computational skills of the students when compared with the major field alone. Students will acquire the knowledge, skills, and techniques commonly used across scientific disciplines, which will allow them to apply their George Mason University education in a practical way in industrial, government, and academic settings. Computational and data sciences skills are highly sought after in today’s marketplace.

For additional information, please contact the CDS undergraduate coordinator/advisor.

1 GRE-general scores are waived for graduates of BS degrees from any program in the College of Science or the Volgenau School of Engineering at George Mason University.
This certificate program focuses on mastering a variety of basic computational skills to manage and analyze data. The certificate is designed primarily for professionals in technical fields who seek to upgrade their expertise in data science. This program is also available as an option for prospective or currently enrolled master’s degree students.

The coursework in this program provides an accelerated introduction to concepts in the modern analysis of data. Topics include computer packages, graphics, databases, data analytics, and their applications.

This certificate may be pursued on a part-time basis or full-time basis.

### Admissions & Policies

#### Admissions

Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in the Graduate Admission Policies (p. 68) section of this catalog. Applicants to this certificate should have an academic background in science, engineering, mathematics, or computer science. They should have an undergraduate degree from a regionally accredited institution, with a GPA of at least 3.00 in their last 60 credits of study. In addition, applicants should have facility in using a high-level computer programming language.

To apply, prospective students should complete the George Mason University Admissions Application, supply two copies of official transcripts from each college and graduate institution attended, and a current résumé. TOEFL scores are required for all international applicants.

#### Policies

For policies governing all graduate degrees, see AP6 Graduate Policies (p. 90).

#### Requirements

### Certificate Requirements

Total credits: 15

This certificate may be pursued on a full- or part-time basis.

Students should refer to the Admissions & Policies (p. 687) tab for specific policies related to this program.

Website: esp.gmu.edu

#### Administration

- A. Alonso Aguirre, Chair
- R. Chris Jones, Interim Graduate Director
- Joris L. van der Ham, Undergraduate and Graduate Coordinator

The research and development of multiple disciplines have contributed to remarkable gains in human and animal health, conservation and sustainability. However, dense human populations, unstable governments, habitat loss and fragmentation, over-exploitation of wild aquatic and terrestrial animals and plants, human-wildlife conflict, invasive species, biodiversity loss, emerging infectious diseases, environmental contaminants, and climate change have produced interacting challenges that call for broader-based and more integrated teaching, research and intervention. The Department of Environmental Science and Policy (ESP) at George Mason University believes that addressing these challenges requires diverse knowledge and expertise in natural science, social science, and public policy. Our faculty and programs reflect the need for a transdisciplinary approach to environmental science, policy and conservation.

In addition to faculty who are involved in cutting edge research, ESP has one of the largest graduate programs in the university conducting groundbreaking studies in the environmental field. The department also has increasing number of undergraduates conducting their own individual research projects or gaining experience by helping with established studies.

The proximity of George Mason to Washington, DC, gives ESP the unique opportunity to partner with governmental agencies, environmental and conservation groups and environmental-focused companies. Students can even be involved in practical study and training at the Smithsonian-Mason School of Conservation (http://smconservation.gmu.edu) (SMSC) and the Potomac Environmental Research Education Center (https://cos.gmu.edu/perec) (PEREC).

Research conducted in ESP ranges from terrestrial and marine mammal conservation to molecular and microbial ecology; from corporate
environmental management and policy to the environmental perceptions and practices of indigenous peoples.

- Sustainable Enterprise Minor

**Note:**
Department of Environmental Science and Policy also works closely with and provides administrative input to the Biology, BS (p. 648) Environmental and Conservation Biology Concentration (ESCB).

**Conservation Biology Minor**

**Banner Code:** CBIO

**Joris L. van der Ham, Undergraduate Advisor**

Email: jvanderh@gmu.edu
Website: esp.gmu.edu

This minor is intended for non-biology majors with an interest in wildlife and habitat conservation issues. The minor may particularly suit Environmental Science, BS (p. 690), Environmental and Sustainability Studies, BA (p. 706), and Earth Science, BS (p. 627) majors, as well as School of Integrative Studies (p. 574) students wishing to increase their understanding and qualifications in the field of conservation biology. The minor may also be of interest to non-science majors, for example, students taking leisure studies classes with an interest in ecotourism.

**Admissions & Policies**

**Policies**
Eight credits of coursework must be unique to the minor and not counted toward the student's major. For policies governing all minors, see AP 5.3.4 Minors (p. 90).

For policies governing all undergraduate programs, see AP 5 Undergraduate Policies (p. 87).

**Requirements**

**Minor Requirements**

Total credits: 19

Students should refer to the Admissions & Policies (p. 688) tab for specific policies related to this program.

Students must complete the following courses with a minimum GPA of 2.00.

Many courses below have prerequisites that need to be met; see advisor for details.
Core Biology Courses

<table>

Select one from the following:

- EVPP 318 Conservation Biology
- BIOL 318 Conservation Biology
- INTS 401 Conservation Biology (Mason Core) (p. 142)

Total Credits: 3-6

3 of 6 credits count toward the minor Core Biology requirement. The remaining 3 credits may apply toward minor electives.

Electives

Select at least 6 credits from the following:

- EVPP 336 Human Dimensions of the Environment
- EVPP 361 Introduction to Environmental Policy
- EVPP 377 Applied Ecology
- EVPP 419 Marine Mammal Biology and Conservation
- EVPP 420 Marine Mammal Biology and Conservation Field Course
- EVPP 421 Marine Conservation
- EVPP 440 Field Environmental Science
- EVPP 490 Special Topics in Environmental Science and Policy
- INTS 401 Conservation Biology (Mason Core) (p. 142)

Total Credits: 3-6

Admissions & Policies

Admissions

The minor is available only to students who enroll in any of the Smithsonian Mason Semesters (https://smconservation.gmu.edu), semester-long residential programs held at the Smithsonian Conservation Biology Institute (https://nationalzoo.si.edu/conservation) in Front Royal, VA. The semesters are offered jointly by the College of Humanities and Social Sciences and the College of Science under the auspices of the Smithsonian-Mason School of Conservation (http://smconservation.gmu.edu).

This is a Green Leaf program (p. 107).

Policies

Eight credits of coursework must be unique to the minor and students pursuing this minor must complete one of the options with a minimum grade of 2.00 in each course. For policies governing all minors, see AP .5.3.4 Minors (p. 90).

Requirements

Minor Requirements

Total credits: 15-16

This is a Green Leaf program.

Students should be aware of the specific policies associated with this program, located on the Admissions & Policies tab.

Environmental Policy Minor

Banner Code: EVP

Joris L. van der Ham, Undergraduate Coordinator

Email: jvanderh@gmu.edu
Website: esp.gmu.edu

Students pursuing the Environmental Policy Minor will study aspects of human interactions with the natural world. This minor will provide students with a broad overview of ecology, the environmental consequences of human action, and conceptual and practical sustainability efforts. This includes relationships between social and biological sciences and environmental law. The minor complements majors in natural science but is also suitable for non-science majors.

This is a Green Leaf program (p. 107).

Admissions & Policies

Policies

Eight credits of coursework must be unique to the minor. For policies governing all minors, see AP 5.3.4 Minors (p. 90).

For policies governing all undergraduate programs, see AP 5 Undergraduate Policies (p. 87).

Total Credits: 9

1 Other appropriate courses may be approved by the coordinator of the minor.

2 Relevant topics only.
The Environmental Science, BS provides students with rigorous training in the fundamental science of the environment and in the application of key scientific principles to the analysis of environmental processes and problems. Subsequently, the program introduces students to the development of practical responses to those problems. The program covers ecological systems, environmental policy, fundamental techniques of environmental science and engineering, protection and improvement of environmental quality, and public and private decision-making processes. Graduates of the program are prepared to undertake careers in a variety of environmental science fields, and are also qualified to pursue advanced scientific/professional education.

This is a Green Leaf program (p. 107).

Concentrations
Students select a concentration in:

- Conservation
- Ecological Science
- Environmental Health
- Human and Ecosystem Response to Climate Change
- Marine, Estuarine and Freshwater Ecology
- Wildlife

Admissions & Policies

Admissions
University-wide admissions policies can be found in the Undergraduate Admissions Policies (p. 65) section of this catalog.

To apply for this program, please complete the George Mason University Admissions Application (https://www2.gmu.edu/admissions-aid/apply-now).

Policies
Students must fulfill all Requirements for Bachelor's Degrees (p. 89), including the Mason Core (p. 142).

Students can fulfill the writing intensive requirement for this major by taking EVPP 337 Environmental Policy Making in Developing Countries.

For policies governing all undergraduate programs, see AP.5 Undergraduate Policies (p. 87).

Requirements

Degree Requirements
Total credits: minimum 120

This is a Green Leaf program.

Students should refer to the Admissions & Policies (p. 691) tab for specific policies related to this program.

Please note that all CONS courses are offered through the Smithsonian-Mason Semester (https://catalog.gmu.edu/colleges-schools/humanities-social-sciences/smithsonian-mason-conservation/#text).

Core Requirements

All students complete the following core courses:

Environmental Science

Mason Core and Elective Credits

In order to meet a minimum of 120 credits, this degree requires additional credits (specific credit counts by concentration are shown below), which may be applied toward any remaining Mason Core (p. 142) requirements (outlined below), Requirements for Bachelor’s Degrees (p. 89), and elective courses. Students are strongly encouraged to consult with their advisors to ensure that they fulfill all requirements.

- CNSV Concentration: 31-38 credits
- ESCI Concentration: 31-38 credits
- EVHL Concentration: 31-38 credits
- HERC Concentration: 31-38 credits
- MECF Concentration: 31-38 credits
- WILD Concentration: 29-38 credits

Mason Core

Some Mason Core (p. 142) requirements may already be fulfilled by the major requirements listed above. Students are strongly encouraged to consult their advisors to ensure they fulfill all remaining Mason Core (p. 142) requirements.

<table>
<thead>
<tr>

**Exploration Requirements**

Arts (p. 144) 3
Global Understanding (p. 146) 3
Literature (p. 147) 3
Natural Science (p. 148) 7
Social and Behavioral Sciences (p. 150) 3
Western Civilization/World History (p. 151) 3

**Integration Requirements**

Written Communications (ENGH 302) (p. 142) 3
Writing-Intensive (p. 151) 1 3
Synthesis/Capstone (p. 153) 2 3

Total Credits 40

1 Most programs include the writing-intensive course designated for the major as part of the major requirements; this course is therefore not counted towards the total required for Mason Core.
2 Minimum 3 credits required.

---

**Accelerated Master’s**

**Bachelor’s Degree (selected)/Environmental Science and Policy, Accelerated MS**

**Overview**

This degree option allows highly qualified George Mason University students to earn an Environmental Science and Policy, MS (p. 696) in less time than if they had first graduated with an environmentally-focused Green Leaf-designated (p. 107) BA or BS degree and then applied to the MS program sequentially.

For more detailed information, see AP6.7 Bachelor’s/Accelerated Master’s Degrees (p. 93). For policies governing all graduate programs, see AP6 Graduate Policies (p. 90).

**Admission Requirements**

Students with an overall GPA of at least 3.20 who are pursuing any Green Leaf-designated (p. 107) major or minor may apply for provisional acceptance into this accelerated master’s program after completing two semesters of chemistry (including CHEM 211 General Chemistry I (Mason Core) (p. 142) and CHEM 212 General Chemistry II (Mason Core) (p. 142) and three semesters of biology, including a course in ecology, or the equivalent, for example:

</tbody>
</table>

By the beginning of the undergraduate’s senior year, they should first submit a Graduate Application for Accelerated Master’s Program form (obtained from the Office of Academic and Student Affairs (https://cos.gmu.edu/about/contact-us). Secondly, in their senior year accelerated master’s students must complete the two graduate courses indicated on their Accelerated Master’s Program Application with a minimum grade of 3.00 in each course. They must maintain a minimum GPA of 3.00 in all coursework and in coursework applied to their major. Upon completion and conferral of the undergraduate degree in a Green Leaf-designated (p. 107) program, in the semester indicated in the application, they must additionally submit the Bachelor’s/Accelerated Master’s Transition form (found on the Office of the University Registrar website (http://registrar.gmu.edu/forms)) and will subsequently be admitted into graduate status.

By at least the beginning of their senior year, they should seek out a faculty member in the Department of Environmental Science and Policy (p. 688) who is willing to serve as their advisor. This advisor will aid the student in choosing the appropriate graduate courses to take and help to prepare the student for graduate studies. Admission into a research-oriented master’s concentration is dependent upon securing the agreement of a faculty advisor. Faculty from a variety of departments and colleges at George Mason (called “program faculty”) can serve as master’s advisors. Potential students are encouraged to speak with the graduate program coordinator in the department to obtain guidance on this issue.

**Application Requirements**

Applicants to all graduate programs at Mason must meet the admission standards and application requirements for graduate study as specified in the Graduate Admission Policies (p. 68) section of this catalog, excluding the GRE exam requirement (which is not required for those enrolled in the accelerated program). This includes three letters of recommendation (at least one from a former professor or someone with a PhD), a recent resume, a statement of interest/research goals and interests (including information on the candidate’s proposed MS research), and a letter from their advisor stating that the advisor agrees to take on the candidate as an MS student, how the candidate would be a good fit for them and why candidate’s research topic would be suitable.

For information specific to the accelerated Environmental Science and Policy, MS (p. 696), see Graduate Admissions on the department’s website (http://esp.gmu.edu/academic-programs/graduate/admissions).

**Reserve Graduate Credits**

Students admitted to this program may take graduate courses after completing 90 undergraduate credits, and up to 6 credits of appropriate environmentally-focused graduate coursework may be used in partial satisfaction of the requirements for the undergraduate degree. If students...
Environmental Science Minor

Banner Code: EVSC

Joris L. van der Ham, Undergraduate Coordinator
Email: jvanderh@gmu.edu
Website: esp.gmu.edu

Students pursuing the Environmental Science Minor will identify and study the interactions between organic and inorganic elements in a wide variety of ecosystems. This insight will provide students with a broad overview of the workings of the natural world and develop an increased awareness of major environmental issues affecting modern society.

The minor complements majors in natural science but is also suitable for non-science majors. This minor is not intended to be taken in conjunction with majors that focus on environmental science, including the Earth Science, BS (p. 627) (concentration in Environmental Geoscience) or the Environmental Science, BS (p. 690).

Admissions & Policies

Eight credits of coursework must be unique to the minor. For policies governing all minors, see AP.5.3.4 Minors (p. 90).

For policies governing all undergraduate programs, see AP.5 Undergraduate Policies (p. 87).

Requirements

Minor Requirements
Total credits: 19-23

Students should refer to the Admissions & Policies (p. 696) tab for specific policies related to this program.

Environmental Science and Policy, MS

Banner Code: SC-MS-EVSP

Joris van der Ham
Email: jvanderh@gmu.edu
Website: esp.gmu.edu

This master’s program meets the increasing need for trained environmental professionals who can address the problems of land and water management, land use and urbanization, wetland loss, microbial ecology, bioremediation, conservation biology, and ecosystem preservation. These professionals will also contribute to the analysis and resolution of global problems, such as deforestation, insufficient world food supplies, acid deposition, population growth and public health, global climate change/warming, and depletion of the stratospheric ozone. Areas of specific departmental focus include ecosystems; conservation; environmental biocomplexity; molecular ecology; sustainability science; environmental policy and management; and human/environmental interactions.

Environmental problems are defined in the real world and do not necessarily conform to traditional academic disciplines. As such, solutions require creative combinations of diverse interests and subjects. Effective training requires rigorous, problem-focused interdisciplinary
action in a setting in which research is an essential element supporting instruction.

This has been designated a Green Leaf program (p. 107).

**Concentrations**
The following concentrations are available in the master's program:

- Aquatic Ecology (AQEC)
- Conservation Science and Policy (COSP)
- Earth Surface Processes and Environmental Geochemistry (ESEG)
- Environmental Biocomplexity (EVBC)
- Environmental Science and Policy (EVSP)
- Environmental Science Communication (ESCM)
- Environment and Management (EVM)

**Admissions & Policies**

**Admissions**
University-wide admissions policies can be found in Graduate Admissions Policies (p. 68). Additionally, information on the admission of international students can be found in Admission of International Students (p. 71).

To apply for this program, please complete the George Mason University Admissions Application (https://www2.gmu.edu/admissions-aid/apply-now).

**Eligibility**
Applicants should hold a bachelor's degree from a regionally-accredited institution with a GPA of 3.00 in natural or Earth sciences, engineering, resource planning, environmental studies, or a field that leads to an environmental focus.

Applicants should have taken at least two semesters of chemistry and three semesters of biology, including a course in ecology. Applicants who lack this coursework should contact the graduate coordinator's office for advice. Successful completion of a two-semester sequence of introductory graduate-level environmental chemistry and biology courses can be used to satisfy the biology and chemistry prerequisites for admission. These introductory courses would be in addition to the requirements for the degree.

**Application Requirements**
Applicants should submit the following:

- Completed George Mason University George Mason University Admissions Application (https://www2.gmu.edu/admissions-aid/apply-now).
- Three letters of recommendation, including at least one from a former professor or, if not available, from someone with a PhD.
- The GRE is required. Successful applicants usually have achieved a minimum score of 235/336 (70%) for verbal and quantitative combined.
- Statement of interest indicating: desired concentration, potential areas of environmental focus/research interest, interactions with potential faculty advisors, and career goals.
- Contact a potential George Mason faculty advisor (appropriate for research interests). An endorsement letter from the potential advisor must be sent to the Department of Environmental Science and Policy (p. 687)'s graduate office; the availability of an advisor in the student's area of interest is a prerequisite for admission.

**Policies**
For policies governing all graduate programs, see AP6 Graduate Policies (p. 90).

**Course Selections**
Some program requirements may be fulfilled by completing courses from a variety of academic units at Mason. A student's course selections should reflect a coherent individual program focus, which is stated and briefly described in the program of study. Course selections should also support the research component of the student's degree program (if applicable) and should be developed in close consultation with the supervisory committee. The supervisory committee approves a coursework program (the program of study) individually for each student.

In special cases, the graduate program director may permit the substitution of an alternative course in place of a required one.

**Supervisory Committee**
Students must form a supervisory committee and submit a program of study to the graduate coordinator for approval within the first 9 credits of coursework or by the end of the second semester, whichever comes first.

The supervisory committee consists of the advisor and at least two other members, chosen in consultation with the advisor, and must conform to AP6.9 Requirements for Master's Degrees (p. 94).

**Requirements**

**Degree Requirements**
Total credits: 33

This is a Green Leaf program.

Students should refer to Admissions & Policies (p. 697) for specific policies related to this program.

Students in all of the concentrations will complete the concentration's requirements, the research requirement, the seminar requirement, and electives as outlined below (for a total of 33 credits).

**Aquatic Ecology Concentration (AQEC)**
This concentration will provide students with a well-grounded master's in the study of aquatic environments such as lakes, streams, watersheds, and estuaries. Emphasis is placed on food webs, biogeochemical cycles, water quality, habitat characteristics, and life histories of aquatic organisms. Students will become proficient with research tools including literature review, field and laboratory methods, and analytical tools as well as applications to management issues.

Total Credits 6

Additional Requirements
See the Additional Requirements section below for details on the research requirement, the seminar requirement, and elective.

Conservation Science and Policy Concentration (COSP)
This concentration is designed to foster an interdisciplinary, research-oriented degree focusing on the conservation of threatened species and habitats, integrating biological sciences and the human dimensions of conservation practice.

Students may take courses offered by the Department of Environmental Science and Policy (p. 687) and other departments, including CONS courses which are offered through the Smithsonian Mason School of Conservation (p. 610). This unique partnership with the Smithsonian-Mason School of Conservation (SMSC) in Front Royal, Virginia offers students hands-on education in cutting-edge conservation science and human dimensions through residential, intensive classes. SMSC is renowned for its conservation research and training of conservation practitioners around the world and instructors for these classes are drawn from SMSC's conservation scientists and other experts from around the world.

**Additional Requirements**

See the Additional Requirements section below for details on the research requirement, the seminar requirement, and electives.
Environmental Biocomplexity Concentration (EVBC)

This concentration is designed for students desiring a master’s with an environmental biocomplexity theme encompassing the disciplines of population genetics, microbial ecology, and/or molecular systematics.

Students are encouraged to complete at least 1 credit of directed studies (EVPP 693 Directed Studies in Environmental Science and Public Policy) as a laboratory rotation to enhance their mastery of experimental techniques.

Natural Sciences

Select from the following courses with topics that can be drawn from offerings in ecology, biogeochemistry, biochemistry, population genetics, molecular biology, molecular systematics, molecular evolution, microbial ecology, microbial diversity, quantitative genetics, and population biology.

Additional Requirements

See the Additional Requirements section below for details on the research requirement, the seminar requirement, and electives.

Environmental Science and Policy Concentration (EVSP)

The Environmental Science and Policy concentration is the largest within the master’s and serves as a home for a broad array of research foci. It encourages an independent and creative approach to the development of curricula that reside in the general field of environmental science and policy.

The concentration’s requirements may be fulfilled by completing courses from a variety of academic units at Mason as outlined below.

Natural Sciences

Select from the following courses in biology, geology, geography, chemistry, or environmental engineering.

<table>
<thead>
<tr>

**Environment and Management Concentration (EVM)**

This concentration combines the managerial and administrative skills developed in a traditional master of public administration degree program with the scientific knowledge and understanding normally found in a master of science degree. It is especially meant for individuals working in or aspiring to work as managers in the environmental field in government or private industry.

**Natural Science**

Total Credits  6

**Additional Requirements for all Concentrations:**

**Research Requirement**

The research requirement may be satisfied in one of two ways: a research project or a formal thesis.

The depth and sophistication of the research differs between the two options. The thesis normally involves original research with independent acquisition and interpretation of data, with the goal of peer-reviewed publication. Projects are generally less extensive and can include a broader range of activities.

**Project Option**

Students fulfilling the research requirement with the project option register for EVPP 798 Master’s Research Project in Environmental Science and Public Policy and are required to take a comprehensive examination covering knowledge mastered throughout the program of study. This examination includes both a written and an oral component and is administered by the student’s supervisory committee.
Thesis Option

Students fulfilling the research requirement with the thesis option register for EVPP 799 Master’s Thesis in Environmental Science and Public Policy, present their results in a public seminar, and defend their thesis before their supervisory committee. Students will be graded "Satisfactory/No Credit" on the research requirement.

Seminar Requirement

An appropriate course topic must be taken in order to fulfill this requirement.

Electives

If necessary, students take additional electives to bring the degree total to 33 credits. These courses must be approved by the student's supervisory committee and outlined on the student's program of study.

Accelerated Master's

Bachelor's Degree (selected)/Environmental Science and Policy, Accelerated MS

Overview

This degree option allows highly qualified George Mason University students to earn an Environmental Science and Policy MS (p. 696) in less time than if they had first graduated with an environmentally-focused Green Leaf-designated (p. 107) BA or BS degree and then applied to the MS program sequentially.

For more detailed information, see AP.6.7 Bachelor’s/Accelerated Master’s Degrees (p. 93). For policies governing all graduate programs, see AP.6 Graduate Policies (p. 90).

Admission Requirements

Students with an overall GPA of at least 3.20 who are pursuing any Green Leaf-designated (p. 107) major or minor may apply for provisional acceptance into this accelerated master’s program after completing two semesters of chemistry (including CHEM 211 General Chemistry I (Mason Core) (p. 142) and CHEM 212 General Chemistry II (Mason Core) (p. 142) and three semesters of biology, including a course in ecology, or the equivalent, for example:

6 credits of BIOL or CONS electives

By the beginning of the undergraduate's senior year, they should first submit a Graduate Application for Accelerated Master's Program form (obtained from the Office of Academic and Student Affairs (https://cos.gmu.edu/about/contact-us)). Secondly, in their senior year accelerated master's students must complete the two graduate courses indicated on their Accelerated Master's Program Application with a minimum grade of 3.00 in each course. They must maintain a minimum GPA of 3.00 in all coursework and in coursework applied to their major. Upon completion and conferral of the undergraduate degree in a Green Leaf-designated (p. 107) program, in the semester indicated in the application, they must additionally submit the Bachelor's/Accelerated Master's Transition form (found on the Office of the University Registrar website (http://registrar.gmu.edu/forms)) and will subsequently be admitted into graduate status.

By at least the beginning of their senior year, they should seek out a faculty member in the Department of Environmental Science and Policy (p. 688) who is willing to serve as their advisor. This advisor will aid the student in choosing the appropriate graduate courses to take and help to prepare the student for graduate studies. Admission into a research-oriented master's concentration is dependent upon securing the agreement of a faculty advisor. Faculty from a variety of departments and colleges at George Mason (called "program faculty") can serve as master’s advisors. Potential students are encouraged to speak with the graduate program coordinator in the department to obtain guidance on this issue.

Application Requirements

Applicants to all graduate programs at Mason must meet the admission standards and application requirements for graduate study as specified in the Graduate Admission Policies (p. 68) section of this catalog, excluding the GRE exam requirement (which is not required for those enrolled in the accelerated program). This includes three letters of recommendation (at least one from a former professor or someone with a PhD), a recent resume, a statement of interest/research goals and interests (including information on the candidate's proposed MS research), and a letter from their advisor stating that the advisor agrees
to take on the candidate as an MS student, how the candidate would be a good fit for them and why candidate's research topic would be suitable.

For information specific to the accelerated Environmental Science and Policy, MS (p. 696), see Graduate Admissions on the department's website (http://esp.gmu.edu/academic-programs/graduate/admissions).

**Reserve Graduate Credits**

Students admitted to this program may take graduate courses after completing 90 undergraduate credits, and up to 6 credits of appropriate environmentally-focused graduate coursework may be used in partial satisfaction of the requirements for the undergraduate degree. If students earn at least a 3.00 GPA in these classes, they are granted advanced standing in the master's program and must then complete an additional 27 credits to receive the master's degree.

To apply these credits to the master’s degree, students must request that the credits be moved from the undergraduate degree to the graduate degree using the Bachelor’s/Accelerated Master’s Transition form found on the Office of the University Registrar website (http://registrar.gmu.edu/forms) (as noted above).

Students may take up to 6 additional environmentally-focused graduate credits as reserve graduate credit. These credits do not apply to the undergraduate degree but will reduce the subsequent master’s degree credits accordingly (e.g., with 6 credits counted towards undergraduate degree plus the maximum 6 reserve credits, an MS could be completed with 21 post-bachelor’s credits). The ability to take courses for reserve graduate credit is available to all high achieving undergraduates with the permission of the department.

### Environmental Science and Public Policy, PhD

**Banner Code:** SC-PHD-EVPP

**Joris van der Ham**

Email: jvanderh@gmu.edu  
Website: esp.gmu.edu

Our graduates contribute to the solution of complex environmental problems, which require the development of knowledge and skills in the collection, analysis, and interpretation of scientific data, as well as in the integration of scientific understanding into the public policy process. This interdisciplinary program draws on faculty and expertise from the Department of Environmental Science and Policy’s core faculty, as well as faculty from across the university. This includes the Department of Biology (p. 641), the Department of Atmospheric, Oceanic and Earth Sciences (p. 620), the School of Systems Biology (p. 786), the Department of Chemistry and Biochemistry (p. 661), the Department of Economics (p. 345), the Department of Geography and Geoinformation Science (p. 715), and the Department of Sociology and Anthropology (p. 496), as well as the Schar School of Policy and Government (p. 961), the School of Integrative Studies (p. 574), the Volgenau School of Engineering (p. 1011), and the College of Education and Human Development (p. 161) in addition to others.

This has been designated a Green Leaf program (p. 107).

**Admissions & Policies**

### Admissions

University-wide admissions policies can be found in the Graduate Admissions Policies (p. 68) section of this catalog. Additionally, information on the admission of international students can be found in the Admission of International Students (p. 71) section of this catalog.

To apply for this program, please complete the George Mason University Admissions Application (https://www2.gmu.edu/admissions-aid/apply-now).

**Eligibility and Application Requirements**

Applicants should have a bachelor’s degree with an overall GPA of at least 3.00. They should have taken at least two semesters of chemistry and three semesters of biology, including a course in ecology.

Applicants to the PhD program should have an advanced degree (e.g. MA, MS, veterinary, or law) in a relevant field or exceptional undergraduate academic and research accomplishments.

Applicants should submit the following:

- Scores on the verbal and quantitative sections of the GRE for applicants that do not hold an advanced degree (e.g. MA, MS, veterinary, or law) or higher from a regionally accredited institution in the USA.
- Three letters of recommendation, with at least two from individuals with doctorates.
- Current résumé.
- Substantial statement of interest that includes a description of the specific area of proposed dissertation research, the potential focus (environmental science or environmental public policy), contacts that have been made with potential faculty advisors, and an explanation of career and research goals.
- Letter of endorsement from a prospective advisor to include how your research interests coincide with that of your advisor.

All students must obtain the consent of a faculty member willing to serve as an advisor prior to being fully admitted to the program. Admission decisions are based on the student’s qualifications and the availability of a faculty advisor. An advisor may be changed by mutual consent of student and advisor, or by petition to the graduate program director and the associate dean for student affairs in the College of Science (p. 613). Applicants with questions should contact the ESP Graduate Programs Office (703-993-3187).

### Science, Ecology, and Social Science Background

**Science Background**

Applicants who lack college-level coursework in biology and chemistry (two semesters of each) will be expected to complete a two semester sequence of introductory graduate-level environmental chemistry and biology courses as follows:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>

<td>6</td>
</tr>
</tbody>
</table>

**Admissions & Policies**

### Admissions

University-wide admissions policies can be found in the Graduate Admissions Policies (p. 68) section of this catalog. Additionally, information on the admission of international students can be found in the Admission of International Students (p. 71) section of this catalog.

To apply for this program, please complete the George Mason University Admissions Application (https://www2.gmu.edu/admissions-aid/apply-now).

**Eligibility and Application Requirements**

Applicants should have a bachelor’s degree with an overall GPA of at least 3.00. They should have taken at least two semesters of chemistry and three semesters of biology, including a course in ecology.

Applicants to the PhD program should have an advanced degree (e.g. MA, MS, veterinary, or law) in a relevant field or exceptional undergraduate academic and research accomplishments.

Applicants should submit the following:

- Scores on the verbal and quantitative sections of the GRE for applicants that do not hold an advanced degree (e.g. MA, MS, veterinary, or law) or higher from a regionally accredited institution in the USA.
- Three letters of recommendation, with at least two from individuals with doctorates.
- Current résumé.
- Substantial statement of interest that includes a description of the specific area of proposed dissertation research, the potential focus (environmental science or environmental public policy), contacts that have been made with potential faculty advisors, and an explanation of career and research goals.
- Letter of endorsement from a prospective advisor to include how your research interests coincide with that of your advisor.

All students must obtain the consent of a faculty member willing to serve as an advisor prior to being fully admitted to the program. Admission decisions are based on the student’s qualifications and the availability of a faculty advisor. An advisor may be changed by mutual consent of student and advisor, or by petition to the graduate program director and the associate dean for student affairs in the College of Science (p. 613). Applicants with questions should contact the ESP Graduate Programs Office (703-993-3187).

### Science, Ecology, and Social Science Background

**Science Background**

Applicants who lack college-level coursework in biology and chemistry (two semesters of each) will be expected to complete a two semester sequence of introductory graduate-level environmental chemistry and biology courses as follows:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>EVPP 506</td>
<td>Science of the Environment I</td>
<td>3</td>
</tr>
<tr>
<td>EVPP 507</td>
<td>Science of the Environment II</td>
<td>3</td>
</tr>
<tr>
<td><strong>Total Credits</strong></td>
<td></td>
<td>6</td>
</tr>
</tbody>
</table>
These introductory courses cannot be added to the graduate program of study; they will be additional credits to the degree's 72 credit total.

**Ecology Background**
Students without previous coursework in general ecology will be required to take the following introductory course, which may be included in the graduate program of study.

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>EVPP 607</td>
<td>Fundamentals of Ecology</td>
<td>3</td>
</tr>
</tbody>

**Social Science Background**
Students with little previous coursework in the social sciences will be required to take the following introductory course, which may be included in the graduate program of study.

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>EVPP 608</td>
<td>Introduction to Environmental Social Science</td>
<td>3</td>
</tr>
</tbody>
</table>

**Policies**
For policies governing all graduate programs, see AP.6 Graduate Policies (p. 90).

**Reduction of Credits**
For students entering the doctoral program with a master's degree in an academically related field from a regionally-accredited institution, the number of required credits may be reduced up to 30 credits, subject to approval of the program faculty and the college's associate dean for student affairs. See AP.6.5.2 Reduction of Credits (p. 91) for more information.

**Requirements**

**Degree Requirements**
Total credits: 72

This is a Green Leaf program.

Students should refer to the Admissions & Policies (p. 704) tab for specific policies related to this program.

**Doctoral Coursework**
Students are required to complete a coursework proposal by the end of their second semester. The coursework proposal must be approved by the student’s advisor and the graduate program director. In keeping with the general philosophy inherent in a PhD degree, students adopt an individual program that focuses on a specific area of research. The student’s coursework must provide the knowledge base from which an original research project in their specific areas of interest can be successfully completed.

**Natural Sciences**

<tbody>
<tr>
<td></td>
<td>If necessary after doctoral coursework and dissertation research, students take additional electives to bring the total number of credits to 72.</td>
<td>2-14</td>
</tr>
</tbody>
</table>

**Dissertation Committee**
Before the end of the fourth semester of coursework, in consultation with their advisor, the student forms a dissertation committee of at least four members. Three of the committee members must be from the Mason graduate faculty. The fourth member may be from Mason or may be from outside the university provided that they hold a terminal degree in an
appropriate field. The dissertation committee must be approved by the college’s associate dean for student affairs.

Program of Study
After reviewing the student’s coursework proposal, progress to date, and area of research, the committee makes final recommendations concerning coursework that will be codified in the program of study to be signed by all committee members and the graduate program director. Students are advised to work closely with their advisor and committee to develop the coursework program in order to facilitate the process of course selection. During the duration of graduate study, a student must meet with the full dissertation committee at least once a year.

Qualifying Exams
On completion of all or nearly all coursework, students may request to take the qualifying or candidacy exam. The qualifying exam has both written and oral components. The written portion consists of questions submitted by each member of the dissertation committee. Successful completion of the written exam should be followed by the oral portion within one month. The qualifying exam may be repeated once at the discretion of the student’s committee.

Advancement to Candidacy
Upon approval of the program of study, completion of all or nearly all coursework, successful completion of the qualifying exam, and the approval of the dissertation proposal by the dissertation committee, the student is recommended for advancement to candidacy by the graduate program director. Students must advance to candidacy within five years of admission to the program.

Dissertation Research
Students must complete a dissertation. This may be accomplished by taking EVPP 999 Doctoral Dissertation Research alone, or in combination with EVPP 998 Doctoral Dissertation Proposal. However, at least six of these credits must be taken as EVPP 999 Doctoral Dissertation Research. Students working on dissertation research must register for a minimum of 3 credits of EVPP 999 Doctoral Dissertation Research per semester (excluding summers) until they have completed the minimum number of dissertation research credits. Then, they must register for 1 credit of EVPP 999 Doctoral Dissertation Research until the dissertation is complete and has been officially submitted to the library.

The dissertation is an original written work, demonstrating mastery of subject matter, methodologies, and conceptual foundations on a specific problem in the general field of environmental science and public policy. The dissertation generally involves collection and analysis of original data or the substantially new analysis and reinterpretation of existing data.

<table>

</tr>
</tbody>
</table>

Dissertation Research and Defense
Before students may enroll in EVPP 999 Doctoral Dissertation Research, they must have advanced to candidacy and have a dissertation proposal approved by the dissertation committee, graduate program director, department chairperson, and the dean of the College of Science. Students must present the completed dissertation in a public seminar and defend the work before the dissertation committee and others who wish to attend. Awarding of the degree is contingent on approval of the dissertation by the dissertation committee, graduate program director, department chairperson, and the dean of the College of Science. The dissertation and defense must be completed a total of nine years from the date of first enrollment in the doctoral program.

Environmental and Sustainability Studies, BA (COS)
Banner Code: LA-BA-EVSS

Joris L. van der Ham, Undergraduate Coordinator
Email: jvanderh@gmu.edu
Website: esp.gmu.edu

The BA in Environmental and Sustainability Studies is a joint program between the College of Humanities and Social Sciences (p. 309) and the College of Science (p. 613).

This degree provides students with theoretical and practical knowledge of three aspects of environmental and sustainability studies: people, prosperity, and planet. In addition to required core courses, students develop more in-depth knowledge in their choice of concentration. This degree prepares students for employment and graduate study in fields related to social justice, business and public policy, and environmental protection as they relate to the environment and sustainability.

This is a Green Leaf program (p. 107).

Admissions & Policies

Admissions
University-wide admissions policies can be found in the Undergraduate Admissions Policies (p. 65) section of this catalog.

To apply for this program, please complete the George Mason University Admissions Application (https://www2.gmu.edu/admissions-aid/apply-now).

Policies
Students pursuing this degree must complete a minimum of 60 credits within the major, with a minimum grade of 2.00 in each course.

For policies governing all undergraduate degrees, see AP5 Undergraduate Policies (p. 87).

Requirements

Degree Requirements
Total credits: minimum 120

This is a Green Leaf program.

Students should be aware of the specific policies associated with this program, located on the Admissions & Policies (p. 577) tab.
Of the credits required for this degree, 14 credits simultaneously fulfill core requirements for the major and Mason Core requirements, and, depending on the concentration and electives chosen, up to 9 credits may simultaneously fulfill Mason Core requirements and college BA requirements.

Core Courses in the Major

Core requirements may satisfy Mason Core requirements in natural science (EVPP 110 The Ecosphere: An Introduction to Environmental Science I (Mason Core) (p. 142), EVPP 111 The Ecosphere: An Introduction to Environmental Science II (Mason Core) (p. 142)) and the college BA requirement for social and behavioral science (GOVT 361 Introduction to Environmental Policy).

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>EVPP 377</td>
<td>Applied Ecology</td>
<td>3</td>
</tr>
</tbody>
</table>

And three courses from one of the following groups: 11-12

- EVPP 110 & EVPP 111 & EVPP 336: The Ecosphere: An Introduction to Environmental Science I (Mason Core) (p. 142) and The Ecosphere: An Introduction to Environmental Science II (Mason Core) (p. 142) and Human Dimensions of the Environment
- EVPP 110 & EVPP 112 & EVPP 113 & EVPP 336: The Ecosphere: An Introduction to Environmental Science I (Mason Core) (p. 142) and Ecosphere: Introduction to Environmental Science II-Lecture and Ecosphere: Introduction to Environmental Science II–Lab and Human Dimensions of the Environment
- EVPP 210 & EVPP 301 & EVPP 302: Environmental Biology: Molecules and Cells and Environmental Science: Biological Diversity and Ecosystems and Environmental Science: Biomes and Human Dimensions

Individual and Group Behavior

- INTS 334: Environmental Justice (Mason Core) (p. 142) 4

Business and Public Policy

- ECON 105: Environmental Economics for the Citizen (Mason Core) (p. 142) 3
- or ECON 100: Economics for the Citizen (Mason Core) (p. 142)
- EVPP 322: Business and Sustainability 3

Statistics

- Select one course from the following: 3-4
  - SOCI 313: Statistics for the Behavioral Sciences (Mason Core) (p. 142)
  - BIOL 214: Biostatistics for Biology Majors
  - STAT 250: Introductory Statistics I (Mason Core) (p. 142)

Integration, Analysis, Innovation

- INTS 210: Sustainable World (Mason Core) (p. 142) 4
- EVPP 480: Sustainability in Action (Mason Core) (p. 142) 4

Select one from the following:

- INTS 390: International Internship (minimum of 3 credits required)
- INTS 490: Internship (minimum of 3 credits required)

Total Credits 41-43

1 Satisfies the college BA requirement for social and behavioral science.

Concentration in the Major

Available Concentrations

- Concentration in Business and Sustainability (BUSU) (p. 707)
- Concentration in Climate Change and Society (CCSO) (p. 708)
- Concentration in Conservation and Sustainability (CSUS) (p. 708)
- Concentration in Environmental Policy and Economics (EVPE) (p. 709)
- Concentration in Equity and Environmental Justice (EQEJ) (p. 709)
- Concentration in Sustainable Food and Agriculture (SFG) (p. 709)

Concentration in Business and Sustainability (BUSU)

The requirements for this concentration, depending on the electives chosen, may satisfy the college BA requirement in philosophy and religious studies (PHIL 243 Global Environmental Ethics (Mason Core) (p. 142), PHIL 305 Business Ethics).

Students who have already taken and received credit for MGMT 303 Principles of Management or OM 303 Operations Management Management shall substitute MGMT 303 Principles of Management for MBUS 301 Managing People and Organizations in a Global Economy and OM 303 Operations Management for MBUS 306 Managing Projects and Operations. Both courses cannot be taken for credit. Students who have taken and received credit for both ACCT 203 Survey of Accounting and FNAN 303 Financial Management shall substitute the combination for MBUS 300 Accounting in a Global Economy. All three courses cannot be taken for credit.

For this concentration, students may substitute OM 211 Honors Statistical Analysis for Management for SOCI 313 Statistics for the Behavioral Sciences (Mason Core) (p. 142) (core requirement for degree). Students cannot receive credit for more than one of these.

Core Courses

Total Credits 9
George Mason University

### Concentration in Environmental Policy and Economics (EVPE)
The requirements for this concentration satisfy the Mason Core requirement in social and behavioral science (ECON 104 Contemporary Macroeconomic Principles (Mason Core) (p. 142)) and, depending on the elective chosen, may fulfill the college BA requirement in non-Western culture (ECON 362 African Economic Development (Mason Core) (p. 142)).

#### Required Courses
Completion of these courses will satisfy the Mason Core social and behavioral science requirement.

Total Credits: 8

Writing-Intensive Requirement

The university requires all students to complete at least one course designated as “writing intensive” in their major at the 300 level or above. Students majoring in environmental and sustainability studies should consult an advisor to learn how to fulfill this requirement.

Upper Level Requirement

Students seeking a bachelor’s degree must apply at least 45 credits of upper-level courses (numbered 300 or above) toward graduation requirements.

Additional Electives

Any remaining credits may be completed with elective courses to bring the degree total to 120.

Mason Core

Some Mason Core (p. 142) requirements may already be fulfilled by the major requirements listed above. Students are strongly encouraged to consult their advisors to ensure they fulfill all remaining Mason Core (p. 142) requirements.

<table>

1 Note that the following courses may not be used to fulfill this requirement:

- PHIL 323 Classical Western Political Theory
- PHIL 324 Modern Western Political Theory
- PHIL 327 Contemporary Western Political Theory
- PHIL 393 Humanities College to Career
- PHIL 460 Senior Seminar in Philosophy, Politics, and Economics

Additionally, PHIL 253 Philosophy and Literature (Mason Core) (p. 142) and RELI 235 Religion and Literature (Mason Core) (p. 142) cannot be used to fulfill both the philosophy/religious studies requirement and the Mason Core literature (p. 147) requirement.

Social and Behavioral Sciences

Select 3 credits of social and behavioral sciences from the following (additional to the Mason Core social and behavioral sciences requirement) 1

<table>
<thead>
<tr>

Or choose from the following GGS courses:

- GGS 101 Major World Regions (Mason Core) (p. 142)
- GGS 103 Human Geography (Mason Core) (p. 142)
- GGS 110 Introduction to Geoinformation Technologies
- GGS 301 Political Geography
The two courses used to fulfill the combined college and Mason Core requirements must be from different disciplines in the social and behavioral sciences.

HIST 100 History of Western Civilization (Mason Core) (p. 142) and HIST 125 Introduction to World History (Mason Core) (p. 142) may not be used to fulfill this requirement.

1 A course used to fulfill the Mason Core global understanding requirement may not be simultaneously used to satisfy this college-level requirement. A course used to fulfill this requirement may be used simultaneously to fulfill any other requirements (Mason Core requirements, college-level requirements, or requirements for the major). Additional information on waivers can be found at the Office of Undergraduate Academic Affairs (http://chssundergrad.gmu.edu).

Accelerated Master’s

Bachelor’s Degree (selected)/Interdisciplinary Studies, Accelerated MAIS (Social Justice and Human Rights Concentration)

Overview
Highly-qualified undergraduates in select majors (listed below) may apply to the accelerated master’s degree in interdisciplinary studies with a concentration in social justice and human rights (p. 542). If accepted, and depending on their undergraduate major, students will be able to earn an undergraduate degree in their chosen major and a master’s in interdisciplinary studies with a concentration in social justice and human rights after satisfactory completion of 150 credits, sometimes within five years.

For more detailed information, see AP.6.7 Bachelor’s/Accelerated Master’s Degrees (p. 93). For policies governing all graduate degrees, see AP.6 Graduate Policies (p. 90).
Selected Majors
Anthropology (p. 497), Environmental and Sustainability Studies (p. 576), Sociology (p. 507), English (p. 370), History (p. 394), Philosophy (p. 442), Conflict Analysis and Resolution (p. 938), Psychology (p. 461), Government and International Politics (p. 972), Integrative Studies (p. 593), and Communication (p. 314).

Application Requirements
Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in Graduate Admissions (p. 68). For information specific to the accelerated MAIS, see Application Requirements and Deadlines (http://mais.gmu.edu/programs/la-mais-isin/application) on the departmental web site.

Accelerated Option Requirements
While undergraduate students, accelerated master’s students complete INTS 540 Contemporary Issues in Social Justice Human Rights and one course chosen from the list of electives for the MAIS concentration in social justice and human rights as indicated on their Accelerated Master’s Program Application with a minimum grade of B in each course. Once admitted to the accelerated master’s pathway, students must maintain a minimum cumulative GPA of 3.25 in all course work. Upon completion and conferral of the undergraduate degree in the semester indicated in the application, they submit the Bachelor’s/ Accelerated Master’s Transition Form and are admitted to graduate status.

As graduate students, accelerated master’s students have an advanced standing. They must meet all master’s degree requirements except for the two courses (6 credits) they completed as undergraduates. Students must begin their master’s program the semester immediately following conferral of the undergraduate degree.

Reserve Graduate Credit
Students may take up to 6 additional graduate credits as reserve graduate credit (chosen from the list of electives for the MAIS concentration in social justice and human rights). These credits do not apply to the undergraduate degree. The ability to take courses for reserve graduate credit is available to all high achieving undergraduates with the permission of the program. Permission to take a graduate course for reserve graduate credit is normally granted only to Mason seniors within 15 hours of graduation. See AP1.4.4 Graduate Course Enrollment by Undergraduates (p. 79).

Sustainability Studies Minor
Banner Code: SSTS
Joris L. van der Ham, Undergraduate Coordinator
Email: jvanderh@gmu.edu
Website: esp.gmu.edu

The core principle of sustainability is the desire to meet the basic material needs of the current generation without compromising the ability of future generations to meet their needs. In order to achieve this goal, we must recognize and address the conflicts and trade-offs involved in balancing environmental integrity, social equity, and economic stability. Such complex work necessarily involves contributions from a wide range of disciplines and it also requires a re-examination of the relationship between human value systems, cultural practices, and the associated long-term implications for the ecosystem.

This is a Green Leaf program (p. 107).

Admissions & Policies
Policies
Eight credits of coursework must be unique to the minor. For policies governing all minors, see AP5.3.4 Minors (p. 90).

For policies governing all undergraduate programs, see AP5 Undergraduate Policies (p. 87).

Requirements
Minor Requirements
Total credits: 16
This is a Green Leaf program.

Students should refer to the Admissions & Policies (p. 713) tab for specific policies related to this program.

Candidates for the minor must complete coursework with a minimum GPA of 2.00.

Sustainable enterprises are businesses that are financially prosperous and seek to benefit the environment and society. They measure success in terms of a "triple bottom line" that focuses on 3 P’s:

• **Prosperity** - Business profitability/value
• **Planet** - Ecological integrity
• **People** - Social equity

Sustainable enterprises balance all 3 P’s simultaneously, and view solutions to environmental and social problems as investments and business opportunities. Therefore, developing sustainable business strategies requires innovation and the identification of solutions that frequently "leapfrog" existing products, technologies, and best management practices.

The minor emphasizes the private sector as a critical player in helping to solve pressing environmental and social problems, while capitalizing on market mechanisms and competitive opportunities. Students who obtain the Sustainable Enterprise Minor will obtain a business understanding of sustainability innovation, ethical foundations, and regulatory framework to pursue private sector triple bottom line strategies.

This is a Green Leaf program (p. 107).

### Admissions & Policies

**Policies**

Eight credits of coursework must be unique to the minor. For policies governing all minors, see AP.5.3.4 Minors (p. 90).
For policies governing all undergraduate programs, see AP 5 Undergraduate Policies (p. 87).

## Requirements

### Minor Requirements

Total credits: 17-20

This is a Green Leaf program.

Students should refer to the Admissions & Policies (p. 714) tab for specific policies related to this program.

Students must successfully complete the following courses with a minimum GPA of 2.00.

### Core Courses

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>EVPP 322</td>
<td>Business and Sustainability</td>
<td>3</td>
</tr>
<tr>
<td>EVPP 480</td>
<td>Sustainability in Action (Mason Core) (p. 142)</td>
<td>4</td>
</tr>
</tbody>
</table>

Total Credits: 7

### Electives

#### Environmental Policy and Economics

Select at least 3 credits from the following: 3

- EVPP 361 Introduction to Environmental Policy
- EVPP 362 Intermediate Environmental Policy
- EVPP 432 Energy Policy
- EVPP 490 Special Topics in Environmental Science and Policy (if the topic is applicable consult an advisor for guidance)
- ECON 335 Environmental Economics

#### Business and Innovation

Select at least 3-4 credits from the following: 3-4

- MBUS 300 Accounting in a Global Economy
- MBUS 301 Managing People and Organizations in a Global Economy
- MBUS 305 Introduction to International Business (Mason Core) (p. 142)
- MBUS 306 Managing Projects and Operations
- PSYC 335 Psychology of Creativity and Innovation

#### Social Responsibility and Ethics

Select 3 credits from the following: 3

- PHIL 305 Business Ethics
- PHIL 343 Topics in Environmental Philosophy (Mason Core) (p. 142) (if the topic is applicable consult an advisor for guidance)

Total Credits: 9-10

---

1. School of Business students should consult with their advisors regarding MBUS coursework.

### Internship

The plan of work for this internship must be approved by the undergraduate coordinator.

Students who are currently employed may request that the internship requirement be waived on the basis of their job experience. Instead of the internship, these students will be required to complete a 3-credit independent study with the minor’s director or another faculty member. This alternative will entail independent research by applying sustainable enterprise principles and practices in an analysis of the student’s work place, and will culminate in a final project.

### Department of Geography and Geoinformation Science

Phone: 703-993-1210
703-993-1212
Email: ggs@gmu.edu
Website: ggs.gmu.edu

Located in the heart of Fairfax, just a few miles from Washington DC, the Department of Geography and Geoinformation Science (GGS) offers an outstanding environment to study and perform cutting-edge research in remote sensing, geography, geoinformatics, Earth systems science, and their various sub-disciplines.

With a variety of educational offerings, ranging from undergraduate programs to graduate certificates and M.S. and Ph.D. programs, a strong and broad research agenda, and superb name recognition within the leading agencies and companies in our field, our department is a premier choice for academic education.

### Undergraduate Programs

The Department of Geography and Geoinformation Science offers a Geography, BA (p. 726) and a Geography, BS (p. 733). The department also offers accelerated master’s program opportunities for the Geographic and Cartographic Sciences, MS (https://catalog.gmu.edu/colleges-schools/science/geography-geoinformation-science/geographic-cartographic-sciences-ms) and the Geoinformatics and Geospatial Intelligence, MS (https://catalog.gmu.edu/colleges-schools/science/geography-geoinformation-science/geoinformatics-geospatial-intelligence-ms). Additionally, the department offers the GeoManagement Undergraduate Certificate (p. 722).

### Undergraduate Certificates

The GeoManagement Undergraduate Certificate (p. 722) accommodates students who are pursuing a degree in the Department of Geography and Geoinformation Science who also wish to acquire more knowledge on how to manage people and organizations dealing with GIS in a global economy. By understanding marketing terms, financial matters, and also having a good understanding of how to manage people, students will be well prepared to face challenges in multidisciplinary GIS-oriented environments. All courses are available online.
Minors
For students pursuing any major in the university, the department offers a Geography Minor (p. 736) (fully available online), a Geographic Information Systems Minor (p. 723) (research and scholarship intensive), as well as an Urban Informatics Minor (http://catalog.gmu.edu/colleges-schools/science/geography-geoinformation-science/urban-informatics-minor).

Graduate Degrees
Graduate programs are distinguished by an emphasis on cutting-edge research and their applications toward solving practical problems in human and environmental realms. Degree options include three master’s degrees and one doctoral program.

Graduate Certificates
For students wishing to pursue graduate-level specialization and skill advancement in specific, focused application areas the department offers the following graduate-level certificates: Data Journalism Graduate Certificate (p. 717), Environmental GIS and Biodiversity Conservation Graduate Certificate (p. 721), Geographic Information Science Graduate Certificate (p. 722), G (p. 722)espatial Intelligence Graduate Certificate (p. 739), and Remote Sensing and Image Processing Graduate Certificate (p. 740). Students may take these as stand-alone certificates or, under certain circumstances, pursue them concurrently with another graduate degree program. Certificate coursework may be applicable toward other graduate degree requirements. In order to gain admission into a graduate certificate program, students must hold a bachelor’s degree from a regionally accredited institution and must apply for and be admitted into the corresponding program.

Master’s Programs
The Earth Systems Science, MS (p. 718) (offered jointly with the Department of Atmospheric, Oceanic and Earth Sciences (p. 620)) provides a global systems approach to the study of the atmosphere, hydrosphere and lithosphere. The degree’s emphasis is on the observation and quantitative analysis of earth systems. The Geographic and Cartographic Sciences, MS (p. 724) focuses on techniques to compile, display and analyze spatial data. The Geoinformatics and Geospatial Intelligence, MS (p. 737) focuses primarily on computational approaches that support the synthesis and analysis of diverse data types in order to identify and monitor complex events and phenomena that manifest themselves over space and time.

Earth Systems and Geoinformation Sciences, PhD
The Earth Systems and Geoinformation Sciences, PhD (p. 719) combines and extends the three scientific avenues mapped by our master’s programs to provide a thorough and interdisciplinary approach to doctoral studies.

Distance Education
While all courses and programs listed are offered in traditional face-to-face on campus teaching, the department offers select programs through fully online modules. These online programs include an online version of our Geography Minor (p. 736), Geography BA (https://catalog.gmu.edu/colleges-schools/science/geography-geoinformation-science/geography-ba), Geography BS (https://catalog.gmu.edu/colleges-schools/science/geography-geoinformation-science/geography-bs), GeoManagement Undergraduate Certificate (p. 722), and an online version of the Geospatial Intelligence Graduate Certificate (p. 739).

Courses Available Online
Individual courses which are currently available online (in addition to their traditional delivery modes) are:

<table>

Faculty

Department Faculty
Professors
Agouris (dean), Di, Haack, Houser, Pfoser (chair), Qu, Stefanidis, Wong, C. Yang

Associate Professors
Croitoru (online coordinator), Fuhrmann, Leslie, Rice, D. Sun, R. Yang (graduate coordinator)

Assistant Professors
Burtch (undergraduate coordinator), Komwa, Rosenfeld, Wessels, Züfle

Research or Contract Professors
Batarseh, Gkountouna, Li, M. Sun

Adjunct Faculty
Dillon, Grymes, Komwa, McGlone, Resmini, Ward

Requirements & Policies

Requirements
Writing-Intensive Requirement
The university requires all students to complete at least one course designated as "writing intensive" in their majors at the 300 level or above.
Students majoring in geography fulfill this requirement by successfully completing GGS 415 Seminar in Geography.

**Policies**

Students are governed by the university’s policies (p. 77).

**GGS Lab Use**

Access to GGS lab space is contingent upon active student status and registration in GGS courses. Labs are key card accessible and only authorized students may use the labs for academic work.

**Non-degree Status**

Applicants who have not been admitted to a specific graduate degree or certificate program and still wish to attend courses may apply for non-degree studies. This is intended for students who do not seek a specific degree. These students must apply for non-degree status and be admitted through a process comparable to the one followed by degree-seeking students.

While it may be possible to transfer some of the credits earned in non-degree status to a degree program, such transfers are not automatic. Non-degree students who intend to transfer their credits to a degree program should discuss this in a timely manner with the appropriate department coordinator. Further information can be found in the Non-degree Enrollment (p. 74) section of this catalog.

**Programs**

- Data Journalism Graduate Certificate
- Earth Systems Science, MS (GGS)
- Earth Systems and Geoinformation Sciences, PhD
- Environmental GIS and Biodiversity Conservation Graduate Certificate
- GeoManagement Undergraduate Certificate
- Geographic Information Science Graduate Certificate
- Geographic Information Systems Minor
- Geographic and Cartographic Sciences, MS
- Geography Minor
- Geography, BA
- Geography, BS
- Geoinformatics and Geospatial Intelligence, MS
- Geospatial Intelligence Graduate Certificate
- Remote Sensing and Image Processing Graduate Certificate
- Urban Informatics Minor

**Data Journalism Graduate Certificate**

Banner Code: SC-CERG-DJNL

**Academic Advising**

4400 University Drive, MSN 6C3
Fairfax, VA 22030

Phone: 703-993-1210
Email: ggs@gmu.edu
Website: cos.gmu.edu/ggs/academic-programs/graduate-certificate-in-data-journalism/

This certificate is designed for students and professionals wishing to advance their knowledge and careers in the emerging field of Data Journalism. Data-driven journalism is about obtaining, reporting on, curating, and publishing (storifying) data in the public interest. Maps and data infographics are some of the best ways to publish data in order to inform the public and raise awareness.

Principles of journalism, methods and tools for information visualization, social media analysis, and scientific data communication topics are visited in this program.

This certificate may be pursued on a part-time and full-time basis.

**Admissions & Policies**

**Admissions**

University-wide admissions policies can be found in the Graduate Admissions Policies (p. 68) section of this catalog. TOEFL scores are required of all international applicants who do not hold at least a bachelor’s degree from a regionally accredited institution within the U.S. (some exceptions apply).

To apply for this program, please complete the George Mason University Admissions Application (https://www2.gmu.edu/admissions-aid/apply-now).

**Policies**

For policies governing all graduate programs, see AP.6 Graduate Policies (p. 90).

**Requirements**

**Certificate Requirements**

Total credits: 15

This certificate may be pursued on a full-or part-time basis.

Students should refer to the Admissions & Policies (p. 717) tab for specific policies related to this program.

Earth Systems Science, MS (GGS)

Banner Code: SC-MS-ESSC

Academic Advising

4400 University Drive, MSN 6C3
Fairfax, VA 22030
Phone: 703-993-1210
Email: ggs@gmu.edu
Website: cos.gmu.edu/ggs/academic-programs/ms-in-earth-systems-science/

This is a shared program between the Department of Atmospheric, Oceanic, and Earth Sciences (p. 620) and the Department of Geography and Geoinformation Science (p. 715).

The program addresses the growing demand for trained professionals in the Earth sciences. The degree emphasizes a research-oriented, global systems approach to studying the Earth and its systems—the atmosphere, the hydrosphere, and the lithosphere, including their interrelationships and interactions with the biosphere. Emphasis is on the observation, measurement, and analysis of Earth's systems.

Most student research projects and theses will relate to geologic and geographic topics, however studies of related topics in Earth science are welcome. Students completing the program are qualified to pursue careers that require knowledge of the basics of Earth systems science and the requisite tools, specifically pertaining to the area of Earth science that they choose to investigate. Students are encouraged to undertake a master's thesis but may choose a research project. In the latter case, students must pass a comprehensive exam.

Admissions & Policies

Admissions

University-wide admissions policies can be found in Graduate Admissions Policies (p. 68).

To apply for this program, please complete the George Mason University Admissions Application (https://www2.gmu.edu/admissions-aid/apply-now).

Eligibility

Applicants should have earned a BS degree in atmospheric, Earth, environmental, geological, geographical, ocean, or physical science. Previous coursework should include two semesters each of calculus, chemistry, and physics, and one semester of statistics. Applicants should have a minimum GPA of 3.00 in their undergraduate degree.

Application Requirements

Official transcripts from each college and graduate institution attended, a current résumé, and a goals statement are required. Applicants also need three letters of recommendation and an official report of scores obtained on the GRE-GEN. The GRE requirement for admission may be waived if the student holds a master's degree from a regionally accredited U.S. institution. TOEFL scores are required of all international applicants.

Policies

For policies governing all graduate programs, see AP.6 Graduate Policies (p. 90).

Requirements

Total credits: 30

Students should refer to the Admissions & Policies tab for specific policies related to this program.

Candidates must complete 10 credits of GGS courses and 10 credits of GEOL/CLIM courses toward their requirements. ("Culminating Experience" credits do not count towards this requirement).

Earth Science Core

Select one course from each of the following groups:

<table>

Earth Systems and Geoinformation Sciences, PhD

Banner Code: SC-PHD-ESGS

Academic Advising
4400 University Drive, MSN 6C3
Fairfax, VA 22030
Phone: 703-993-1210
Email: ggs@gmu.edu
Website: cos.gmu.edu/ggs/academic-programs/phd-esgs-2/

The Earth Systems and Geoinformation Sciences (ESGS) doctoral program is based upon the integration of the scientific disciplines in geosystems, geography, geosciences, and geoinformatics. Students receive broad-based training in systematic geosciences and geography, as well as technical courses in computation and geoinformation sciences. The ESGS doctoral program represents a gateway to an academic career for some students; for others, it facilitates career advancement in the public sector or private industry. Graduates are equipped to participate in interdisciplinary research, which is the norm in today's research arena.

Admissions & Policies

Admissions

University-wide admissions policies can be found in Graduate Admissions Policies (p. 68).

To apply for this program, please complete the George Mason University Admissions Application (https://www2.gmu.edu/admissions-aid/apply-now).

Eligibility

This program is intended for graduates who hold a MS or MA degree in atmospheric science, climatology, meteorology, Earth science, geology, environmental science, remote sensing, hydrology, oceanography, geography, or a related field. Highly-qualified students with a BS or BA in applicable fields are also encouraged to apply. Knowledge of mathematics through calculus is preferred. Interested applicants should contact the program degree coordinator or the GGS director of academic programs for more specific advice.

Application Requirements

To apply, prospective students should complete the George Mason University Admissions Application (https://www2.gmu.edu/admissions-aid/apply-now). Official transcripts from each college and graduate institution attended, a current résumé, and an expanded goals statement will be required.

Applicants will also need three letters of recommendation and an official report of scores obtained on the GRE-GEN. The GRE requirement for admission to the doctoral program may be waived if the student holds a master's degree from a regionally accredited U.S. institution. TOEFL scores are required of all international applicants. GRE-GEN scores are required of students wishing to be considered for the Office of the Provost's Presidential Scholarship. A minimum combined math and
verbal GRE score of 270/340 are needed to qualify for the Presidential Scholarship.

**Policies**

For policies governing all graduate programs, see AP 6.6 Graduate Policies (p. 90).

**Reduction of Credits**

For students entering the doctoral program with a master’s degree in a related field from a regionally accredited institution, the number of required credits may be reduced up to 30 credits, subject to approval of the program faculty and the associate dean for student affairs. See AP 6.5.2 Reduction of Credits (p. 91) for more information.

**Secondary Program Options**

Students enrolled in this doctoral program have the option of adding a secondary graduate certificate or master’s program (p. 717). Depending upon the secondary program chosen, many courses may be applicable to both programs. Before adding a secondary program, students are advised to carefully review AP 6.8 Requirements for Graduate Certificate (p. 94) or AP 6.9 Requirements for Master’s Degrees (p. 94) and AP 6.10 Requirements for Doctoral Degrees (p. 96). Faculty advisors should be contacted for further guidance and for secondary program suggestions.

**Requirements**

**Degree Requirements**

Total credits: 72

Students should refer to the Admissions & Policies (p. 719) tab for specific policies related to this program.

**Core Courses**

Students are required to choose from the following courses in the core areas below. Of the cores, students must complete at least one course in five of the cores and two courses in at least three of those five cores.

<table>

**Electives**

In consultation with the advisor, students select credits necessary to reach 72 total credits

At least half of the elective credits taken at Mason must be from GGS courses.

**Dissertation Research**

Students take 12-24 credits, with at least 6 credits in GGS 999 Dissertation. After reaching candidacy, students must stay continuously enrolled GGS 999 Dissertation until defending their dissertation.

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>

</tr>
<tr>
<td>GGS 998</td>
<td>Dissertation Proposal</td>
<td></td>
</tr>
<tr>
<td>GGS 999</td>
<td>Dissertation</td>
<td></td>
</tr>
</tbody>
</table>

**Dissertation Committee**

All students will be assigned a temporary academic advisor when they first enroll in the program. No later than the end of the second year,
each student should identify a dissertation advisor and form a doctoral committee. The committee will be chaired by a GGS tenure or tenure-track professor and be composed of at least four members. GGS tenure or tenure-track faculty should be at least 50% and have larger committee membership than any other Mason department/academic unit or external organization. At least one member should be a tenure or tenure-track faculty member from another Mason department or program outside of GGS. All members of the committee must be Mason Graduate Faculty and approved by the department’s chair.

**Candidacy Examination**

After completing all required courses, each student must take a candidacy exam administered by the dissertation committee. The exam will have written and oral components. Its purpose is to determine whether the student has acquired adequate general knowledge in the selected subject area, as well as much more detailed knowledge of the specific research topic planned for the dissertation.

**Dissertation Proposal and Advancement to Candidacy**

After students have completed all required courses and passed the candidacy exam, they should prepare an acceptable dissertation proposal. After the dissertation proposal is approved and the appropriate paperwork is completed, the student will be advanced to candidacy.

**Doctoral Dissertation**

The degree will be awarded upon completion of the required coursework and successful defense of a PhD dissertation that makes an original and significant contribution to the field.

**Environmental GIS and Biodiversity Conservation Graduate Certificate**

Banner Code: SC-CERG-EGBC

Nathan R. Burtch, Undergraduate Coordinator

Fairfax Campus

Phone: 703-993-1207

Email: sfuhrman@gmu.edu

Website: cos.gmu.edu/ggs/academic-programs/graduate-certificate-in-environmental-gis-and-biodiversity-conservation/

As biodiversity is the life support system of our planet, it is important to prepare students for careers that require knowledge of both ecology and public policy. This certificate focuses in the fields of conservation biology, land use policy, conservation planning, and modern tools and approaches used in GIS to prepare students to tackle complex environmental challenges in a changing world.

This certificate is suitable for traditional students as well as for student-professionals (such as environmental scientists, managers, practitioners in government, and experts in non-governmental organizations) who wish to acquire further knowledge to advance their careers.

This certificate may be pursued on a part-time or full-time basis.

**Admissions & Policies**

**Admissions**

University-wide admissions policies can be found in the Graduate Admissions Policies (p. 68) section of this catalog.

To apply for this program, please complete the George Mason University Admissions Application (https://www2.gmu.edu/admissions-aid/apply-now).

Applicants for this certificate should hold a BA or BS in a related discipline from a regionally accredited institution.

**Policies**

For policies governing all graduate programs, see AP6 Graduate Policies (p. 90).

**Requirements**

**Certificate Requirements**

Total credits: 18

This certificate may be pursued on a full- or part-time basis.

Refer to the Admissions & Policies (p. 721) for policies specific to this program.

Website: cos.gmu.edu/ggs/academic-programs/undergraduate-certificate-in-geomanagement/

Considering our global environment, professionals working on large-scale GIS projects often find it only natural to couple management and marketing topics with geography. This certificate accommodates students who are pursuing a degree in the Department of Geography and Geoinformation Science (p. 715) who also wish to acquire more knowledge on how to manage people and organizations dealing with GIS in a global economy. By understanding marketing terms, financial matters, and also having a good understanding of how to manage people, students will be well prepared to face challenges in multidisciplinary GIS-oriented environments.

All courses are available online; further information can be found with Mason Online (http://masononline.gmu.edu).

This certificate may be pursued on a full-time or part-time basis.

Admissions

Admissions

University-wide admissions policies can be found in Undergraduate Admissions Policies (p. 65).

To apply for this program, please complete the George Mason University Admissions Application (https://www2.gmu.edu/admissions-aid/apply-now).

Policies

For policies governing all undergraduate programs, see AP.5 Undergraduate Policies (p. 87).

Requirements

Certificate Requirements

Total credits: 24-25

This certificate may be pursued on a full-or part-time basis.

Students should refer to the Admissions & Policies (p. 722) tab for specific policies related to this program.

Management

Students in this certificate can take the following MBUS courses for certificate credit without sophomore standing (listed as a course prerequisite):

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>

Geographic Information Science Graduate Certificate

Banner Code: SC-CERG-GISC

Academic Advising

4400 University Drive, MSN 6C3
Fairfax, VA 22030
Phone: 703-993-1210
Email: ggs@gmu.edu
Website: cos.gmu.edu/ggs/academic-programs/graduate-certificate-in-geographic-information-sciences/

This graduate certificate prepares students for employment in federal, state, and local government positions that require GIS skills. The certificate has been found suitable for the needs of business and industry, including those corporations that serve as contractors to governments in the United States and overseas.

The Geographic Information Science Graduate Certificate may be pursued on a part-time or full-time basis.
Admissions & Policies

Admissions

University-wide admissions policies can be found in the Graduate Admissions Policies (p. 68) section of this catalog.

To apply for this program, please complete the George Mason University Admissions Application (https://www2.gmu.edu/admissions-aid/apply-now).

Applicants to this certificate program must submit a current résumé. GRE scores and letters of recommendation are not required but will strengthen an application, if available. TOEFL scores are required of all international applicants.

All applicants should have a working knowledge of, or prior education or training in, computer technology. Knowledge of GIS, remote sensing technology, and cartography are preferred. Students from any discipline are welcome to apply.

Policies

For policies governing all graduate programs, see AP 6 Graduate Policies (p. 90).

Premium Tuition Rate

This professional certificate program charges students at a differential (premium) tuition rate. This rate applies to all students who enroll in this certificate program, regardless of in-state or out-of-state status. The differential tuition will be used to fund continuing improvements in the departmental computational facilities used to support the certificate program.

Requirements

Certificate Requirements

Total credits: 15

This certificate may be pursued on a full-or part-time basis.

Students should refer to the Admissions & Policies (p. 723) tab for specific policies related to this program.

Geographic Information Systems Minor

Banner Code: GIS

Nathan R. Burtch, Undergraduate Coordinator

2413 Exploratory Hall

Fairfax Campus

Phone: 703-993-1207
Email: ggs@gmu.edu
Website: cos.gmu.edu/ggs/academic-programs/minor-in-geographic-information-systems/

The Geographic Information Systems Minor is designed to prepare students with the basic training necessary to enter the rapidly expanding field of geographic information science. The curriculum in the minor is multidisciplinary in content and interdisciplinary in approach, drawing on a variety of geographic and computational science components. A Geographic Information System (GIS) is an integrative approach to help solving complex spatial problems in most professional fields and at different scales. GIS has irrevocably altered the way we capture, store, analyze, and visualize spatial information. Although it has its roots in cartography and the graphical display of information, its breadth spans from geographic data acquisition, geospatial database construction and management, spatial analysis, and geovisualization. Public and private sector organizations work with an overwhelming amount of spatial data in their day-to-day operations. With so much spatial information, GIS has become essential to the effective operation of both public and private organizations.

Employment opportunities are limitless for students who are proficient in this interdisciplinary field. GIS professionals work in places like government agencies, utility companies, marketing firms, non-profit organizations, and publishing companies. Federal government agencies
such as NGA, FEMA, USGS, DOD, EPA, and NASA routinely recruit individuals with strong GIS backgrounds.

Admissions & Policies

Policies

Eight credits of coursework must be unique to the minor. For policies governing all minors, see AP 5.3.4 Minors (p. 90).

Requirements

Minor Requirements

Total credits: 18-20

Students should refer to the Admissions & Policies (p. 724) tab for specific policies related to this program.

All coursework must be completed with a minimum GPA of 2.00.

Geographic and Cartographic Sciences, MS

Banner Code: SC-MS-GECA

Academic Advising

4400 University Drive, MSN 6C3
Fairfax, VA 22030

Phone: 703-993-1210
Email: ggs@gmu.edu
Website: cos.gmu.edu/ggs/academic-programs/ms-in-geographic-and-cartographic-sciences/

The Geographic and Cartographic Sciences, MS (GECA) focuses on the growing demand for scientists and professionals in the field of geographic information science, who use geographical approaches and tools such as geographic information systems (GIS), remote sensing, cartography, and geovisualization to address and solve geographic problems. This expertise is useful to a wide variety of employers in the federal, state, and local government sectors, as well as in business, industry, and non-profit organizations. The degree’s coursework concentrates on the collection, analysis, and display of geographic data, in concert with the use of emerging geospatial technologies to address problems in the human and environmental geographic domains. Students in this program benefit from a large and diverse local employment market, as well as a network of more than 700 program alumni (1978-present) who live and work in the local area.

Research Facilities

The Department of Geography and Geoinformation Science (p. 715) has extensive research and teaching facilities, including several labs equipped with GIS, remote sensing, cartographic, and analytical software from leading industry vendors and open source groups. Specialized instructional space for geographic information science is housed in newly renovated labs in Exploratory Hall on the Fairfax Campus.

Admissions

University-wide admissions policies can be found in Graduate Admissions Policies (p. 68).

To apply for this program, please complete the George Mason University Admissions Application (https://www2.gmu.edu/admissions-aid/apply-now).

Eligibility and Application Requirements

Applicants for this master’s should have a bachelor’s degree in geography, cartography, or a closely related field. Applicants without an undergraduate degree in geography may be required to take one course in each of the following: physical geography, human geography, and cartography. All applicants must have a course in statistics. The program also requires GRE test scores, three letters of recommendation, transcripts of all college coursework, and a statement of interest in
the degree. The GRE requirement will be waived if the student holds a master’s degree from a regionally-accredited U.S. institution. TOEFL scores are required for all foreign applicants. Credit from courses taken at other departments and other universities may be applied to the program with prior approval.

Policies
For policies governing all graduate programs, see AP.6 Graduate Policies (p. 90)

Secondary Program Options
Students enrolled in this master’s program have the option of adding a secondary graduate certificate program (p. 717). Depending upon the secondary program chosen, many courses may be applicable to both the certificate and the master’s. Before adding a secondary program, students are advised to carefully review the Requirements for Graduate Certificates (p. 94) and the Requirements for Master’s Degrees (p. 94) in AP.6 Graduate Policies (p. 90). Faculty advisors should be contacted for further guidance and for graduate certificate program suggestions.

Requirements

Degree Requirements
Total credits: 30 or 37

Students should refer to the Admissions & Policies (p. 724) tab for specific policies related to this program.

Students must complete either 30 graduate credits (with a thesis) or 37 graduate credits (without a thesis). If the non-thesis option is selected, students are required to pass a comprehensive exam.

</table>

Total Credits 25

1 Electives should be selected in consultation with an advisor. With departmental approval, up to 9 credits from closely related disciplines may be applied to the degree.

Accelerated Master’s Geography, BA/Geographic and Cartographic Sciences, Accelerated MS Overview
Offered by the Department of Geography and Geoinformation Sciences (GGS) in the College of Science, this bachelor’s/accelerated master’s degree program enables highly qualified undergraduates to obtain the Geography, BA (p. 726) and the Geographic and Cartographic Sciences, MS (https://catalog.gmu.edu/colleges-schools/science/geography-geoinformation-science/geographic-cartographic-sciences-ms) degrees within an accelerated timeframe. The program strategy enables students to undertake graduate coursework during their final year in the bachelor’s degree. This 144 credit program (thesis option) or 151 credit program (comprehensive exam option) prepares students for professional careers where geoinformation management, geographic analysis, and geospatial visualization are of importance.

Students in this accelerated degree program must fulfill all university requirements for the Geography, BA (p. 726) and the Geographic and Cartographic Sciences, MS (https://catalog.gmu.edu/colleges-schools/science/geography-geoinformation-science/geographic-cartographic-sciences-ms). While the information below is largely comprehensive, students are strongly encouraged to also review AP.6.7 Bachelor’s/Accelerated Master’s Degrees (p. 93).

Application Requirements
Students with an overall GPA of at least 3.0 may apply for provisional acceptance into this accelerated master’s program after completing at least 90 undergraduate credits. Additionally, they must have completed the following courses with a GPA of 3.0 or better: GGS 102 Physical Geography (Mason Core) (p. 142) or GGS 121 Dynamic Atmosphere and Hydrosphere (Mason Core) (p. 142) or GGS 122 Dynamic Geosphere and Ecosphere, GGS 103 Human Geography (Mason Core) (p. 142), GGS 110 Introduction to Geoinformation Technologies, GGS 300 Quantitative Methods for Geographical Analysis, GGS 310 Introduction to Digital Cartography, and GGS 311 Introduction to Geographic Information Systems.

Applicants to all graduate programs at Mason must meet the admission standards and application requirements for graduate study as specified in the Admissions section of this catalog. However, this accelerated master’s does not require GRE test scores.

While being undergraduate students, accelerated master’s students must complete the two graduate courses indicated on their Accelerated Master’s Program Application (obtained from the Office of Academic and Student Affairs) with a minimum grade of 3.0 in each course. They must
maintain a minimum GPA of 3.0 in all coursework and in coursework applied to their major.

At the beginning of their final undergraduate semester, they must submit the Bachelor’s/Accelerated Master’s Transition Form (found on the Office of the University Registrar website). Students must begin their master’s program in the semester immediately following the term of undergraduate degree conferral. Students should consult with their faculty advisor in the Department of Geography and Geoinformation Science and the Office of Academic and Student Affairs to obtain further guidance.

Accelerated Option Requirements

Students admitted to this program may start taking graduate courses after completing 90 undergraduate credits. Up to 6 credits of graduate coursework may be applied to both undergraduate degree and the master’s degree. If students earn at least a 3.0 in these classes, they are granted advanced standing in the master’s program and must then complete 24 (thesis option) or 31 (comprehensive exam option) additional credits to receive the master’s degree. All other master’s degree requirements must be met.

Reserve Graduate Credit

During the bachelor’s degree status, students may take up to 6 graduate credits as reserve graduate credit. These credits do not apply to the undergraduate degree, but will reduce the subsequent master’s degree credits accordingly (e.g., with 6 credits counted towards undergraduate degree plus the maximum 6 reserve credits, the master’s degree can be completed with 18 (thesis option) or 25 (comprehensive exam option) graduate credits). The ability to take courses for reserve graduate credit is available to all high achieving undergraduates with the permission of the department. To apply the reserved credits to the master’s degree, students must request their transfer from the undergraduate degree to the graduate degree via the Bachelor’s/Accelerated Master’s Transition Form found on the Office of the University Registrar website.

Geography, BS/Geographic and Cartographic Sciences, Accelerated MS

Overview

Offered by the Department of Geography and Geoinformation Sciences (GGS) in the College of Science, this bachelor’s/accelerated master’s degree program enables highly qualified undergraduates to obtain the Geography, BS (p. 733) and the Geographic and Cartographic Sciences, MS (p. 724) degrees within an accelerated timeframe. The program strategy enables students to undertake graduate coursework during their final year in the bachelor’s degree. This 144 credit program (thesis option) or 151 credit program (comprehensive exam option) prepares students for professional careers where geoinformation management, geographic analysis, and geospatial visualization are of importance.

Students in this accelerated degree program must fulfill all university requirements for the Geography, BS (p. 733) and the Geographic and Cartographic Sciences, MS (p. 724). While the information below is largely comprehensive, students are strongly encouraged to also review AP 6.7 Bachelor’s/Accelerated Master’s Degrees (p. 93).

Application Requirements

Students with an overall GPA of at least 3.0 may apply for provisional acceptance into this accelerated master’s program after completing at least 90 undergraduate credits. Additionally, they must have completed the following courses with a GPA of 3.0 or better: GGS 102 Physical

Accelerated Option Requirements

Students admitted to this program may start taking graduate courses after completing 90 undergraduate credits. Up to 6 credits of graduate coursework may be applied to both undergraduate degree and the master’s degree. If students earn at least a 3.0 in these classes, they are granted advanced standing in the master’s program and must then complete 24 (thesis option) or 31 (comprehensive exam option) additional credits to receive the master’s degree. All other master’s degree requirements must be met.

Reserve Graduate Credit

During the bachelor’s degree status, students may take up to 6 graduate credits as reserve graduate credit. These credits do not apply to the undergraduate degree, but will reduce the subsequent master’s degree credits accordingly (e.g., with 6 credits counted towards undergraduate degree plus the maximum 6 reserve credits, the master’s degree can be completed with 18 (thesis option) or 25 (comprehensive exam option) graduate credits). The ability to take courses for reserve graduate credit is available to all high achieving undergraduates with the permission of the department. To apply the reserved credits to the master’s degree, students must request their transfer from the undergraduate degree to the graduate degree via the Bachelor’s/Accelerated Master’s Transition Form found on the Office of the University Registrar website.
The Geography, BA is designed to offer students the opportunity to study the integrated social and environmental processes that continuously shape and reshape the world we live in. This major provides students with broad training across the core subdisciplines of geography (human, physical, and GIScience), while also offering the requisite flexibility for those students seeking a multidisciplinary educational experience. Students will find numerous opportunities for employment in both the private and public sectors, as well as in academia. Given their interdisciplinary approach and uniquely spatial perspective, geographers are well suited to address important local, regional, and global challenges in today’s world.

The Department of Geography and Geoinformation Science fosters a supportive, active learning environment in which students are encouraged to work closely with both faculty and peers. The curriculum in this major provides students with the synthesis skills and broad base of knowledge that prepares them to be successful in an ever-evolving job market. For students who wish to pursue their interest in geography with a more technical curriculum, the department also offers a Geography, BS.

Admissions & Policies

Admissions

University-wide admissions policies can be found in the Undergraduate Admissions Policies section of this catalog.

To apply for this program, please complete the George Mason University Admissions Application (https://www2.gmu.edu/admissions-aid/apply-now).

Policies

Students must fulfill all Requirements for Bachelor’s Degrees (p. 87) including the Mason Core (p. 142). As outlined in the Requirements tab, students in this bachelor’s program must also complete the additional College Requirements for the BA Degree.

GGS 415 Seminar in Geography fulfills the writing intensive requirement.

For policies governing all undergraduate programs, see AP.5 Undergraduate Policies (p. 87).

Requirements

Degree Requirements

Total credits: minimum 120

Students should refer to the Admissions & Policies tab for specific policies related to this program.

Candidates for a degree in geography must complete the approved GGS geography courses with a minimum GPA of 2.00.

Students must complete the Core, Systematic and Regional Geography, and GGS electives, then select one concentration or an additional program, and lastly complete the College Requirements for the BA Degree and the Mason Core and Elective Credits.

Environmental Geography Concentration (EGEO)

The Environmental Geography concentration for the BA in Geography provides a unique opportunity for majors to take a broader, integrative science approach to studies of the environment. In collaboration with the Department of Environmental Science and Policy (p. 687), BA in Geography majors have the opportunity to focus their studies on geographic approaches to climatology and global changes, environmental issues, policy matters, and sustainability topics.

Total Credits 15-16

1 Course cannot be selected if previously selected as a core or methods course.

Health Geography Concentration (HGEO)

The field of Health Geography addresses the role of place, location dynamics and geography in health, well-being, and disease. Public health patterns can vary significantly by physical and social characteristics of places both within and between regions, states, or countries. In collaboration with the Department of Global and Community Health (p. 246), BA in Geography majors get introduced to local and global health issues and develop their skill set in spatial and statistical analysis of diverse health outcomes in populations.

Some courses may have prerequisite requirements:

Geoanthropology Concentration (GEA)

Anthropology, a social science, focuses on human activities—past, present, and future. Geography, positioned in the social science and STEM field, studies the physical features of the Earth and its atmosphere, and human activities as they affect and are affected by these, including the distribution of populations and resources, land use, urbanization and other topics. Just as anthropologists use insights from other disciplines to understand humans, geographers cross disciplinary boundaries to collect, store, analyze, model and visualize data. Such broad and inclusive disciplines and definitions yield a large number of possible themes in Geoanthropology. This concentration enables BA in Geography majors, versed in systematic techniques and regional geography, to become better versed in the theoretical constructs of anthropology that situate the environment as part of a global cultural system.

Total Credits 15

Mason Core and Elective Credits

In order to meet a minimum of 120 credits, this degree requires an additional 66-69 credits, which may be applied toward any remaining Mason Core (p. 142) requirements (outlined below), Requirements for Bachelor’s Degrees (p. 89), College Requirements for the BA Degree (outlined below), and electives. Students are strongly encouraged to consult with their advisors to ensure that they fulfill all requirements.

Mason Core

Some Mason Core (p. 142) requirements may already be fulfilled by the major requirements listed above. Students are strongly encouraged to consult their advisors to ensure they fulfill all remaining Mason Core (p. 142) requirements.
Foundation Requirements

</table>

Total Credits 40

1. Most programs include the writing-intensive course designated for the major as part of the major requirements; this course is therefore not counted towards the total required for Mason Core.

2. Minimum 3 credits required.

College Requirements for the BA Degree

In addition to the program requirements and the Mason Core (p. 142) requirements, students pursuing a BA degree must complete the coursework below. Except where expressly prohibited, a course used to fulfill this college-level requirement may also be used simultaneously to satisfy other requirements such as Mason Core (p. 142) requirements, other college-level requirements, or requirements for the major. In some cases, the requirements listed below may be superseded by requirements of the degree program and the Mason Core (p. 142).

</tr>
</tbody>
</table>

1. Students may be eligible for a waiver of this requirement if they are already proficient in a second language or if they have received a satisfactory score on an approved proficiency test. Additional information on waivers can be found via the college’s Office of Academic and Student Affairs (https://cos.gmu.edu/uaa).

Non-Western Culture

Choose one approved Non-Western Culture Requirement course in addition to the course used to fulfill the Mason Core: Global Understanding (p. 146) requirement. A course used to fulfill the Mason
Core: Global Understanding (p. 146) requirement may not be simultaneously used to satisfy this college-level requirement. However, a course used to fulfill this requirement may be used simultaneously to fulfill any other requirements (Mason Core (p. 142) requirements, college-level requirements, or requirements for the major).

Cartographic Sciences, MS (https://catalog.gmu.edu/colleges-schools/science/geography-geoinformation-science/geographic-cartographic-sciences-ms) degrees within an accelerated timeframe. The program strategy enables students to undertake graduate coursework during their final year in the bachelor's degree. This 144 credit program (thesis option) or 151 credit program (comprehensive exam option) prepares students for professional careers where geoinformation management, geographic analysis, and geospatial visualization are of importance.

Students in this accelerated degree program must fulfill all university requirements for the Geography, BA (p. 726) and the Geographic and Cartographic Sciences, MS (https://catalog.gmu.edu/colleges-schools/science/geography-geoinformation-science/geographic-cartographic-sciences-ms). While the information below is largely comprehensive, students are strongly encouraged to also review AP6.7 Bachelor's/Accelerated Master's Degrees (p. 93).

**Application Requirements**

Students with an overall GPA of at least 3.0 may apply for provisional acceptance into this accelerated master’s program after completing at least 90 undergraduate credits. Additionally, they must have completed the following courses with a GPA of 3.0 or better: GGS 103 Human Geography (Mason Core) (p. 142) or GGS 110 Geology (Mason Core) (p. 142). Students with an overall GPA of at least 3.0 may apply for provisional acceptance into this accelerated master's program after completing at least 90 undergraduate credits. Up to 6 credits of graduate coursework may be applied to both undergraduate degree and the master's degree. If students earn at least a 3.0 in these classes, they are granted advanced standing in the master's program and must maintain a minimum GPA of 3.0 in all coursework and in coursework applied to their major.

At the beginning of their final undergraduate semester, they must submit the Bachelor's/Accelerated Master's Transition Form (found on the Office of the University Registrar website). Students must begin their master's program in the semester immediately following the term of undergraduate degree conferral. Students should consult with their faculty advisor in the Department of Geography and Geoinformation Science and the Office of Academic and Student Affairs to obtain further guidance.

**Accelerated Option Requirements**

Students admitted to this program may start taking graduate courses after completing 90 undergraduate credits. Up to 6 credits of graduate coursework may be applied to both undergraduate degree and the master's degree. If students earn at least a 3.0 in these classes, they are granted advanced standing in the master's program and must then complete 24 (thesis option) or 31 (comprehensive exam option) additional credits to receive the master's degree. All other master's degree requirements must be met.

---

### Accelerated Master’s

**Geography, BA/Geographic and Cartographic Sciences, Accelerated MS**

**Overview**

Offered by the Department of Geography and Geoinformation Sciences (GGS) in the College of Science, this bachelor's/accelerated master’s degree program enables highly qualified undergraduates to obtain the Geography, BA (p. 726) and the Geographic and Cartographic Sciences, MS (https://catalog.gmu.edu/colleges-schools/science/geography-geoinformation-science/geographic-cartographic-sciences-ms) degrees within an accelerated timeframe. The program strategy enables students to undertake graduate coursework during their final year in the bachelor's degree. This 144 credit program (thesis option) or 151 credit program (comprehensive exam option) prepares students for professional careers where geoinformation management, geographic analysis, and geospatial visualization are of importance.

Students in this accelerated degree program must fulfill all university requirements for the Geography, BA (p. 726) and the Geographic and Cartographic Sciences, MS (https://catalog.gmu.edu/colleges-schools/science/geography-geoinformation-science/geographic-cartographic-sciences-ms). While the information below is largely comprehensive, students are strongly encouraged to also review AP6.7 Bachelor's/Accelerated Master's Degrees (p. 93).

**Application Requirements**

Students with an overall GPA of at least 3.0 may apply for provisional acceptance into this accelerated master’s program after completing at least 90 undergraduate credits. Additionally, they must have completed the following courses with a GPA of 3.0 or better: GGS 103 Human Geography (Mason Core) (p. 142) or GGS 110 Geology (Mason Core) (p. 142). Students with an overall GPA of at least 3.0 may apply for provisional acceptance into this accelerated master's program after completing at least 90 undergraduate credits. Up to 6 credits of graduate coursework may be applied to both undergraduate degree and the master's degree. If students earn at least a 3.0 in these classes, they are granted advanced standing in the master's program and must maintain a minimum GPA of 3.0 in all coursework and in coursework applied to their major.

At the beginning of their final undergraduate semester, they must submit the Bachelor's/Accelerated Master's Transition Form (found on the Office of the University Registrar website). Students must begin their master's program in the semester immediately following the term of undergraduate degree conferral. Students should consult with their faculty advisor in the Department of Geography and Geoinformation Science and the Office of Academic and Student Affairs to obtain further guidance.

**Accelerated Option Requirements**

Students admitted to this program may start taking graduate courses after completing 90 undergraduate credits. Up to 6 credits of graduate coursework may be applied to both undergraduate degree and the master's degree. If students earn at least a 3.0 in these classes, they are granted advanced standing in the master's program and must then complete 24 (thesis option) or 31 (comprehensive exam option) additional credits to receive the master's degree. All other master's degree requirements must be met.
## Reserve Graduate Credit

During the bachelor’s degree status, students may take up to 6 graduate credits as reserve graduate credit. These credits do not apply to the undergraduate degree, but will reduce the subsequent master’s degree credits accordingly (e.g., with 6 credits counted towards undergraduate degree plus the maximum 6 reserve credits, the master’s degree can be completed with 18 (thesis option) or 25 (comprehensive exam option) graduate credits). The ability to take courses for reserve graduate credit is available to all high achieving undergraduates with the permission of the department. To apply the reserved credits to the master’s degree, students must request their transfer from the undergraduate degree to the graduate degree via the Bachelor’s/Accelerated Master’s Transition Form found on the Office of the University Registrar website.

## Geography, BS

**Banner Code: SC-BS-GEOG**

**Nathan R. Burtch, Undergraduate Coordinator**

2413 Exploratory Hall

Fairfax Campus

Phone: 703-993-1207

Email: ggs@gmu.edu

Website: cos.gmu.edu/ggs/academic-programs/bs-in-geography/

The Geography, BS is designed to offer students the opportunity to study the integrated social and environmental processes that continuously shape and reshape the world we live in. This major provides students with broad training across the core subdisciplines of geography (human, physical, and GIScience), emphasizing application and technique-driven coursework, in addition to a rigorous science and mathematics curriculum. Students will find numerous opportunities for employment in both the private and public sectors, as well as in academia. Given their interdisciplinary approach and uniquely spatial perspective, geographers are well suited to address important local, regional, and global challenges in today’s world.

The Department of Geography and Geoinformation Science fosters a supportive, active learning environment in which students are encouraged to work closely with both faculty and peers. The curriculum in this major provides students with the analytical, technical, and practical training that prepares them to be successful in an ever-evolving job market. For students who wish to pursue their interest in geography via a more flexible degree program, the department also offers a Geography, BA (p. 726).

## Admissions & Policies

### Admissions

University-wide admissions policies can be found in the Undergraduate Admissions Policies (p. 65) section of this catalog.

To apply for this program, please complete the George Mason University Admissions Application (https://www2.gmu.edu/admissions-aid/apply-now).

### Policies

Students must fulfill all Requirements for Bachelor’s Degrees (p. 87) including the Mason Core (p. 142).

GGS 415 Seminar in Geography fulfills the writing intensive requirement.

For policies governing all undergraduate programs, see AP5 Undergraduate Policies (p. 87).

### Requirements

#### Degree Requirements

Total credits: minimum 120

Students should refer to the Admissions & Policies (p. 733) tab for specific policies related to this program.

#### Geography

Candidates for the Geography, BS degree must complete the following Core, Breadth and Experience, and Geography Elective courses with a minimum GPA of 2.00:

##### Core Courses

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>GGS 102 or GGS 121</td>
<td>Physical Geography (Mason Core) (p. 142)</td>

1. Most programs include the writing-intensive course designated for the major as part of the major requirements; this course is therefore not counted towards the total required for Mason Core.
2. Minimum 3 credits required.

### Accelerated Master's

#### Geography, BS/Geographic and Cartographic Sciences, Accelerated MS

**Overview**

Offered by the Department of Geography and Geoinformation Sciences (GGS) in the College of Science, this bachelor’s/accelerated master’s degree program enables highly qualified undergraduates to obtain the Geography, BS (p. 733) and the Geographic and Cartographic Sciences, MS (p. 724) degrees within an accelerated timeframe. The program strategy enables students to undertake graduate coursework during their final year in the bachelor's degree. This 144 credit program (thesis option) or 151 credit program (comprehensive exam option) prepares students for professional careers where geoinformation management, geographic analysis, and geospatial visualization are of importance.
Students in this accelerated degree program must fulfill all university requirements for the Geography, BS (p. 733) and the Geographic and Cartographic Sciences, MS (p. 724). While the information below is largely comprehensive, students are strongly encouraged to also review AP 6.7 Bachelor's/Accelerated Master's Degrees (p. 93).

Application Requirements

Students with an overall GPA of at least 3.0 may apply for provisional acceptance into this accelerated master's program after completing at least 90 undergraduate credits. Additionally, they must have completed the following courses with a GPA of 3.0 or better: GGS 102 Physical Geography (Mason Core) (p. 142) or GGS 121 Dynamic Atmosphere and Hydrosphere (Mason Core) (p. 142) or GGS 122 Dynamic Geosphere and Ecosphere, GGS 103 Human Geography (Mason Core) (p. 142), GGS 110 Introduction to Geoinformation Technologies, GGS 300 Quantitative Methods for Geographical Analysis, GGS 310 Introduction to Digital Cartography, GGS 311 Introduction to Geographic Information Systems, GGS 412 Air Photography Interpretation, MATH 113 Analytic Geometry and Calculus I (Mason Core) (p. 142), and MATH 114 Analytic Geometry and Calculus II or IT 207 Applied IT Programming or STAT 250 Introductory Statistics I (Mason Core) (p. 142).

Applicants to all graduate programs at Mason must meet the admission standards and application requirements for graduate study as specified in the Admissions section of this catalog. However, this accelerated master’s does not require GRE test scores.

While being undergraduate students, accelerated master’s students must complete the two graduate courses indicated on their Accelerated Master’s Program Application (obtained from the Office of Academic and Student Affairs) with a minimum grade of 3.0 in each course. They must maintain a minimum GPA of 3.0 in all coursework and in coursework applied to their major.

At the beginning of their final undergraduate semester, they must submit the Bachelor’s/Accelerated Master’s Transition Form (found on the Office of the University Registrar website). Students must begin their master’s program in the semester immediately following the term of undergraduate degree conferral. Students should consult with their faculty advisor in the Department of Geography and Geoinformation Science and the Office of Academic and Student Affairs to obtain further guidance.

Accelerated Option Requirements

Students admitted to this program may start taking graduate courses after completing 90 undergraduate credits. Up to 6 credits of graduate coursework may be applied to both undergraduate degree and the master’s degree. If students earn at least a 3.0 in these classes, they are granted advanced standing in the master’s program and must then complete 24 (thesis option) or 31 (comprehensive exam option) additional credits to receive the master’s degree. All other master’s degree requirements must be met.

Reserve Graduate Credit

During the bachelor’s degree status, students may take up to 6 graduate credits as reserve graduate credit. These credits do not apply to the undergraduate degree, but will reduce the subsequent master’s degree credits accordingly (e.g., with 6 credits counted towards undergraduate degree plus the maximum 6 reserve credits, the master’s degree can be completed with 18 (thesis option) or 25 (comprehensive exam option) graduate credits). The ability to take courses for reserve graduate credit is available to all high achieving undergraduates with the permission of the department. To apply the reserved credits to the master’s degree, students must request their transfer from the undergraduate degree to the graduate degree via the Bachelor’s/Accelerated Master’s Transition Form found on the Office of the University Registrar website.

Geography, BS/Geoinformatics and Geospatial Intelligence, Accelerated MS

Overview

Offered by the Department of Geography and Geoinformation Sciences (GGS) in the College of Science, this bachelor’s/accelerated master’s degree program enables highly qualified undergraduates to obtain the Geography, BS (p. 733) and the Geoinformatics and Geospatial Intelligence, MS (p. 737) degrees within an accelerated timeframe. The program strategy enables students to undertake graduate coursework during their final year in the bachelor’s degree. This 147 credit program prepares students for professional careers where geoinformation management, geographic analysis, and geointelligence and geovisualization are of importance.

Students in this accelerated degree program must fulfill all university requirements for the Geography, BS (p. 733) and the Geoinformatics and Geospatial Intelligence, MS (p. 737). While the information below is largely comprehensive, students are strongly encouraged to also review AP 6.7 Bachelor’s/Accelerated Master’s Degrees (p. 93).

Application Requirements

Students with an overall GPA of at least 3.0 may apply for provisional acceptance into this accelerated master’s program after completing at least 90 undergraduate credits. Additionally, they must have completed the following courses with a GPA of 3.0 or better: GGS 102 Physical Geography (Mason Core) (p. 142) or GGS 121 Dynamic Atmosphere and Hydrosphere (Mason Core) (p. 142), GGS 110 Introduction to Geoinformation Technologies, GGS 300 Quantitative Methods for Geographical Analysis, GGS 310 Introduction to Digital Cartography, GGS 311 Introduction to Geographic Information Systems, GGS 412 Air Photography Interpretation, MATH 113 Analytic Geometry and Calculus I (Mason Core) (p. 142), and MATH 114 Analytic Geometry and Calculus II or IT 207 Applied IT Programming or STAT 250 Introductory Statistics I (Mason Core) (p. 142).

Applicants to all graduate programs at Mason must meet the admission standards and application requirements for graduate study as specified in the Admissions section of this catalog. However, this accelerated master’s does not require GRE test scores.

While being undergraduate students, accelerated master’s students must complete the two graduate courses indicated on their Accelerated Master’s Program Application (obtained from the Office of Academic and Student Affairs) with a minimum grade of 3.0 in each course. They must maintain a minimum GPA of 3.0 in all coursework and in coursework applied to their major.

At the beginning of their final undergraduate semester, they must submit the Bachelor’s/Accelerated Master’s Transition Form (found on the Office of the University Registrar website). Students must begin their master’s program in the semester immediately following the term of undergraduate degree conferral. Students should consult with their faculty advisor in the Department of Geography and Geoinformation Science and the Office of Academic and Student Affairs to obtain further guidance.
Accelerated Option Requirements

Students admitted to this program may start taking graduate courses after completing 90 undergraduate credits. Up to 6 credits of graduate coursework may be applied to both undergraduate degree and the master's degree. If students earn at least a 3.0 in these classes, they are granted advanced standing in the master's program and must then complete 27 additional credits to receive the master's degree. All other master's degree requirements must be met.

Reserve Graduate Credit

During the bachelor's degree status, students may take up to 6 graduate credits as reserve graduate credit. These credits do not apply to the undergraduate degree, but will reduce the subsequent master's degree credits accordingly (e.g., with 6 credits counted towards undergraduate degree plus the maximum 6 reserve credits, the master's degree can be completed with 21 graduate credits). The ability to take courses for reserve graduate credit is available to all high achieving undergraduates with the permission of the department. To apply the reserved credits to the master's degree, students must request their transfer from the undergraduate degree to the graduate degree via the Bachelor's/Accelerated Master's Transition Form found on the Office of the University Registrar website.

Geography Minor

Banner Code: GEOG

Nathan R. Burtch, Undergraduate Coordinator

2413 Exploratory Hall

Phone: 703-993-1207
Email: ggs@gmu.edu
Website: cos.gmu.edu/ggs/academic-programs/minor-in-geography/

A minor in geography is a natural complement to an array of careers, including engineering, government and international politics, environmental science, transportation, business, marketing, and public health. Any Mason undergraduate student is eligible to earn a minor in geography by completing 18-20 credits as outlined in the Requirements tab above; many qualifying courses also fulfill Mason Core (p. 142) requirements.

If desired, this minor can be pursued fully online; details can be found with Mason Online (http://masononline.gmu.edu).

Admissions & Policies

Policies

Eight credits of coursework must be unique to the minor. For policies governing all minors, see AP5.3.4 Minors (p. 90).

Students must complete all coursework with a minimum GPA of 2.00.

For policies governing all undergraduate programs, see AP5 Undergraduate Policies (p. 87).

Requirements

Minor Requirements

Total credits: 18-20

Students should refer to the Admissions & Policies (p. 736) tab for specific policies related to this program.

Website: cos.gmu.edu/ggs/academic-programs/ms-in-geoinformatics-and-geospatial-intelligence/

The program addresses the emerging demand for scientists trained in the collection, organization, analysis, and dissemination of information about physical features, man-made structures, moving objects, people, and events that are geo-referenced or geo-located. This program focuses primarily on the computational approaches that support the synthesis and analysis of diverse types of data in order to identify and monitor complex events and phenomena that manifest over space and time. While geospatial intelligence has a strong Department of Defense connotation, the principles behind it have a significant dual use potential, addressing the needs of a broader audience, ranging for example from intelligent navigation in urban spaces to emergency response systems for natural and man-made disasters.

The MS is designed to expose students to fundamental theoretical principles and practical applications involving:

- Geographic Information Science
- Digital image analysis as it applies to geoinformatics and geospatial intelligence
- Computational principles for geoinformatics and intelligence

Admissions & Policies

Admissions
University-wide admissions policies can be found in Graduate Admissions Policies (p. 68).

To apply for this program, please complete the George Mason University Admissions Application (https://www2.gmu.edu/admissions-aid/apply-now).

Eligibility and Application Requirements
Applicants for this master's should hold a BA or BS degree in a discipline related to the program’s theme from a regionally accredited university, with a minimum GPA of 3.00, including courses in differential and integral calculus. A working knowledge of a computer programming language is a plus. When the background of an individual student does not meet the program’s requirements, remedial or preparatory courses tailored to student’s needs may be recommended. To apply, prospective students should complete the George Mason University Admissions Application (https://www2.gmu.edu/admissions-aid/apply-now). Official transcripts from each college and graduate institution attended, a current résumé, and a goals statement will be required.

Applicants will also need three letters of recommendation and an official report of scores obtained on the GRE-GEN. The GRE requirement for admission may be waived if the student holds a master's degree from a regionally accredited US institution. TOEFL scores are required of all international applicants.

Policies
For policies governing all graduate programs, see AP.6 Graduate Policies (p. 90).

Secondary Program Options
Students enrolled in this master's program have the option of adding a secondary graduate certificate program. Depending upon the secondary program chosen, many courses may be applicable to both the certificate and the master’s. Before adding a secondary program, students are advised to carefully review AP.6.8 Requirements for Graduate Certificates (p. 94) and AP.6.9 Requirements for Master's Degrees (p. 94). Faculty advisors should be contacted for further guidance and for graduate certificate program suggestions.

Requirements

Degree Requirements
Total credits: 33
Students should refer to the Admissions & Policies (p. 737) tab for specific policies related to this program.

Total Credits 9

---

**Application Requirements**

Students with an overall GPA of at least 3.0 may apply for provisional acceptance into this accelerated master’s program after completing at least 90 undergraduate credits. Additionally, they must have completed the following courses with a GPA of 3.0 or better: GGS 102 Physical Geography (Mason Core) (p. 142), GGS 121 Dynamic Atmosphere and Hydrosphere (Mason Core) (p. 142), GGS 103 Human Geography (Mason Core) (p. 142), GGS 110 Introduction to Geoinformation Technologies, GGS 300 Quantitative Methods for Geographical Analysis, GGS 310 Introduction to Digital Cartography, GGS 311 Introduction to Geographic Information Systems, GGS 412 Air Photography Interpretation, MATH 113 Analytic Geometry and Calculus I (Mason Core) (p. 142), MATH 114 Analytic Geometry and Calculus II or IT 207 Applied IT Programming or STAT 250 Introductory Statistics I (Mason Core) (p. 142).

Applicants to all graduate programs at Mason must meet the admission standards and application requirements for graduate study as specified in the Admissions section of this catalog. However, this accelerated master’s does not require GRE test scores.

While being undergraduate students, accelerated master’s students must complete the two graduate courses indicated on their Accelerated Master’s Program Application (obtained from the Office of Academic and Student Affairs) with a minimum grade of 3.0 in each course. They must maintain a minimum GPA of 3.0 in all coursework and in coursework applied to their major.

At the beginning of their final undergraduate semester, they must submit the Bachelor’s/Accelerated Master’s Transition Form (found on the Office of the University Registrar website). Students must begin their master’s program in the semester immediately following the term of undergraduate degree conferral. Students should consult with their faculty advisor in the Department of Geography and Geoinformation Science and the Office of Academic and Student Affairs to obtain further guidance.

**Accelerated Option Requirements**

Students admitted to this program may start taking graduate courses after completing 90 undergraduate credits. Up to 6 credits of graduate coursework may be applied to both undergraduate degree and the master’s degree. If students earn at least a 3.0 in these classes, they are granted advanced standing in the master’s program and must then complete 27 additional credits to receive the master’s degree. All other master’s degree requirements must be met.

**Reserve Graduate Credit**

During the bachelor’s degree status, students may take up to 6 graduate credits as reserve graduate credit. These credits do not apply to the undergraduate degree, but will reduce the subsequent master’s degree credits accordingly (e.g., with 6 credits counted towards undergraduate degree plus the maximum 6 reserve credits, the master’s degree can be completed with 21 graduate credits). The ability to take courses for reserve graduate credit is available to all high achieving undergraduates with the permission of the department. To apply the reserved credits to the master’s degree, students must request their transfer from the undergraduate degree to the graduate degree via the Bachelor’s/Accelerated Master’s Transition Form found on the Office of the University Registrar website.
Geospatial Intelligence Graduate Certificate

Banner Code: SC-CERG-GI

Academic Advising
4400 University Drive, MSN 6C3
Fairfax, VA 22030
Phone: 703-993-1210
Email: ggs@gmu.edu
Website: https://cos.gmu.edu/ggs/academic-programs/graduate-certificate-in-geospatial-intelligence/

This graduate certificate is for persons employed in geospatial intelligence applications (i.e., federal agency and/or corporate or association personnel) or those interested in entering this field. Our program offers fundamental knowledge on geospatial intelligence and the ability to apply this knowledge to a diverse range of constantly evolving geospatial intelligence situations. This graduate certificate has been accredited by the United States Geospatial Intelligence Foundation.

The majority of courses required for this certificate are also available online. For more information visit Mason Online (http://masononline.gmu.edu).

The graduate certificate in geospatial intelligence may be pursued on a part-time or full-time basis, and qualifies for Title IV Federal Financial Aid. For more information about program graduation rates, the median debt of students who completed the program, and other important information, please visit our disclosure information page (https://irr2.gmu.edu/gedt/Geospatial_Intelligence/Gedt.html).

Admissions & Policies

Admissions

University-wide admissions policies can be found in the Graduate Admissions Policies (p. 68) section of this catalog.

Applicants to this graduate certificate program should hold a BA or BS degree in a discipline related to the certificate’s theme from a regionally-accredited university with a minimum GPA of 3.00. To apply, prospective students should complete the George Mason University Admissions Application (https://www2.gmu.edu/admissions-aid/apply-now). In addition, applicants to this certificate program must submit a current résumé, and GRE scores. Letters of recommendation are not required but will considerably strengthen an application, if available. TOEFL scores are required of all international applicants.

Applicants should have undergraduate backgrounds that include courses in differential and integral calculus, and they should possess working knowledge of a computer programming language. Depending on the background of the individual student, the coordinator may recommend remedial or preparatory courses tailored to the student’s needs.

Policies

For policies governing all graduate programs, see AP.6 Graduate Policies (p. 90).

Premium Tuition Rate

This professional certificate program charges students at a differential (premium) tuition rate. This rate applies to all students who enroll in this certificate program, regardless of in-state or out-of-state status. The differential tuition will be used to fund continuing improvements in the departmental computational facilities used to support the certificate program.

Transfer of Credit

Students may transfer no more than 3 credits into the certificate program with the approval of the academic director.

Requirements

Certificate Requirements

Total credits: 18

This certificate may be pursued on a full-or part-time basis.

Students should refer to the Admissions & Policies (p. 739) tab for specific policies related to this program.

Core Courses

The mandatory core courses reflect the three key science emphases of this program: geospatial image analysis, spatial analysis, and information technology.

Remote Sensing and Image Processing Graduate Certificate

Banner Code: SC-CERG-RSIP

Academic Advising

4400 University Drive, MSN 6C3
Fairfax, VA 22030
Phone: 703-993-1210
Email: ggs@gmu.edu
Website: cos.gmu.edu/ggs/academic-programs/graduate-certificate-in-remote-sensing-and-image-processing/

This certificate program focuses on the skills needed to take advantage of the enormous increase in the availability and use of remotely sensed data related to the Earth. Ideal candidates for this certificate are those who have a background in Earth and environmental sciences and are working in or planning to enter into the field of remote sensing, Earth observing, or image processing.

The Remote Sensing and Image Processing Graduate Certificate may be pursued on a part-time or full-time basis.

Admissions & Policies

Admissions

University-wide admissions policies can be found in the Graduate Admissions Policies (p. 68) section of this catalog.

To apply for this program, please complete the George Mason University Admissions Application (https://www2.gmu.edu/admissions-aid/apply-now).

Applicants to this certificate program must submit a current résumé. TOEFL scores are required of all international applicants who do not hold at least a bachelor’s degree from a regionally-accredited institution within the US (some exceptions apply).

Applicants should hold a BA or BS degree in a discipline related to the science and applications of remote sensing from a regionally accredited university, with a minimum GPA of 3.00. Applicants should have some prior education or training in remote sensing or image processing.

Students with a background in one of the physical sciences (physics, chemistry, atmospheric science, hydrology, or geology), geography, or environmental science will be particularly well-suited to undertake this program. Applicants should have an undergraduate background that includes courses in differential and integral calculus, and they should possess working knowledge of a computer programming language.

Policies

For policies governing all graduate programs, see AP.6 Graduate Policies (p. 90).

Premium Tuition Rate

This professional certificate program charges students at a differential (premium) tuition rate. This rate applies to all students who enroll in this certificate program, regardless of in-state or out-of-state status. The differential tuition will be used to fund continuing improvements in the departmental computational facilities used to support the certificate program.

Department of Mathematical Sciences

Phone: 703-993-1460
Email: dwalnut@gmu.edu
Website: math.gmu.edu

Administration

- David Walnut, Chair
- John Kulesza, Associate Chair
- Igor Griva, Undergraduate Coordinator
- Flavia Colonna, Graduate Coordinator
The Department of Mathematical Sciences offers undergraduate and graduate degree programs in mathematics for students with various interests and career goals. Students may pursue the standard program or a program focused on actuarial mathematics, applied mathematics, mathematics education, or mathematical statistics. Students may complement other interests by taking a double major in mathematics and a related field, such as chemistry, economics, physics, computer science, or engineering.

Math Tutoring Center
The department manages the Math Tutoring Center (http://math.gmu.edu/tutor-center.php?_ga=1.265621830.873783809.1452007880), which offers free tutoring for first- and second-year math courses. Tutoring is given by advanced mathematics students and is available on a drop-in basis with daytime and evening hours throughout the semester.

Math Learning Center
For a fee, the Math Learning Center (http://math.gmu.edu/math-learning-center.php) offers self-paced and classroom noncredit tutorial programs for students who do not place into the math course they need. Special tutors and tutorial software are available to those enrolled in the program. Successful completion of the relevant program enables students to enroll in MATH 105 Precalculus Mathematics, MATH 108 Introductory Calculus with Business Applications (Mason Core) (p. 142), MATH 110 Introductory Probability (Mason Core) (p. 142), MATH 111 Linear Mathematical Modeling (Mason Core) (p. 142), or MATH 125 Discrete Mathematics I (Mason Core) (p. 142).

Certificate in College Teaching
A student enrolled in the Mathematics, MS (p. 754) or Mathematics, PhD (p. 756) who is primarily interested in pursuing a career in undergraduate education at the college level is encouraged to consider enrolling in the College Teaching Graduate Certificate (p. 540) offered through the College of Humanities and Social Sciences (p. 305).

Credit can be earned for HE 685 Practicum by working one semester as a graduate teaching assistant in the Department of Mathematical Sciences (p. 740).

Faculty

Department Faculty

Professors
Anderson, Colonna (graduate coordinator), Emelianenko, Goldin, Kulesza (associate chair), Lawrence, Morris, Sachs, Sander, Saperstone, Sauer (COS distinguished scholar), Seshaiyer, Singman, Soltan, Walnut (chair), Wanner

Associate Professors
Antil, Aagnarsson, Epstein, Griva (undergraduate coordinator), Lamba, Lawton

Assistant Professors
Carchedi, Bulancea, De la Pena, Eckley, Fox, Lukyanenko, Holzer, Nelson, Rebuhn-Glanz (R-G), Whelan

Instructors
Andreani, Boyette, Coleson, Crossin, Granfield, Sausville

Affiliates
Nash
Emeriti
Cabell, Levy, Lin, Polyak, Saperstone, Shapiro

Requirements & Policies

Policies

Writing-Intensive Requirement
Mason policy requires all students to complete at least one course designated as "writing intensive" in their major. Students majoring in mathematics fulfill this requirement by successfully completing MATH 290 Introduction to Advanced Mathematics.

Teacher Licensure
Students who wish to become teachers should consult the College of Education and Human Development (p. 161) section of this catalog and attend an information session early in their studies. For more information, visit the Graduate School of Education (http://gse.gmu.edu).

Information on Undergraduate MATH Courses

Admissions & Policies

For Mathematics Majors (p. 741)
• For Mathematics Majors (p. 741)
• For Non-mathematics Majors (p. 741)
• For Both Mathematics and Non-mathematics Majors (p. 742)

For Mathematics Majors

The following cannot be used as substitutes for any requirements of the major in mathematics:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>MATH 104</td>
<td>Trigonometry and Transcendental Functions</td>
<td>2</td>
</tr>

<tr>
<td>MATH 271</td>
<td>Mathematics for the Elementary School Teachers I</td>
<td>3</td>
</tr>
<tr>
<td>MATH 272</td>
<td>Mathematics for the Elementary School Teachers II</td>
<td>3</td>
</tr>
</tbody>
</table>

For Non-mathematics Majors

• MATH 108 Introductory Calculus with Business Applications (Mason Core) (p. 142), MATH 110 Introductory Probability (Mason Core) (p. 142), and MATH 111 Linear Mathematical Modeling (Mason Core) (p. 142) are designed for students in the social and behavioral sciences.
• Liberal arts majors are advised to take MATH 106 Quantitative Reasoning (Mason Core) (p. 142), MATH 110 Introductory...
Probability (Mason Core) (p. 142), or MATH 111 Linear Mathematical Modeling (Mason Core) (p. 142).

- Students in the natural sciences who plan to do graduate work are advised to add courses from:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>MATH 313</td>
<td>Introduction to Applied Analysis</td>
<td>3</td>
</tr>
<tr>
<td>MATH 314</td>
<td>Introduction to Applied Mathematics</td>
<td>3</td>
</tr>
<tr>
<td>MATH 351</td>
<td>Probability</td>
<td>3</td>
</tr>
<tr>
<td>MATH 352</td>
<td>Statistics</td>
<td>3</td>
</tr>
<tr>
<td>MATH 441</td>
<td>Deterministic Operations Research</td>
<td>3</td>
</tr>
<tr>
<td>MATH 442</td>
<td>Stochastic Operations Research</td>
<td>3</td>
</tr>
<tr>
<td>MATH 446</td>
<td>Numerical Analysis I</td>
<td>3</td>
</tr>
<tr>
<td>MATH 447</td>
<td>Numerical Analysis II</td>
<td>3</td>
</tr>
</tbody>
</table>

For Both Mathematics and Non-mathematics Majors

- MATH 104 Trigonometry and Transcendental Functions, MATH 105 Precalculus Mathematics, MATH 108 Introductory Calculus with Business Applications (Mason Core) (p. 142), MATH 112 Discrete Mathematics for IT, MATH 113 Analytic Geometry and Calculus I (Mason Core) (p. 142), MATH 125 Discrete Mathematics I (Mason Core) (p. 142) have a qualifying score on the Math Placement Test (http://math.gmu.edu/placement_test.php) as a prerequisite. The Math Placement Test (http://math.gmu.edu/placement_test.php) is given frequently, for the schedule, inquire at the department office or check the Department of Mathematical Sciences website (http://math.gmu.edu).

- The sequence MATH 123 Calculus with Algebra/Trigonometry, Part A and MATH 124 Calculus with Algebra/Trigonometry, Part B (Mason Core) (p. 142) is an option for students who need MATH 113 Analytic Geometry and Calculus I (Mason Core) (p. 142) but believe they are not prepared for that course. In these two 3-credit courses, students will learn fundamental algebra and calculus so that upon completion of the sequence, students will be prepared for MATH 114 Analytic Geometry and Calculus II.

- Students who do not achieve the necessary test score needed to take a math course may go to the Math Learning Center (http://math.gmu.edu/math-learning-center.php), or they may study and retake the test on their own. A student who does not complete the relevant program in the Math Learning Center (http://math.gmu.edu/math-placement_test.php) or does not achieve the necessary score on the Math Placement Test (http://math.gmu.edu/math-placement_test.php) will not be able to enroll in the class. Depending on their test scores, students who do not place into MATH 113 Analytic Geometry and Calculus I (Mason Core) (p. 142) will be advised to take MATH 104 Trigonometry and Transcendental Functions or MATH 105 Precalculus Mathematics or visit the Math Learning Center (http://math.gmu.edu/math-learning-center.php) to prepare for MATH 114 Analytic Geometry and Calculus II.

- Students who do not achieve the necessary test score needed to take a math course may go to the Math Learning Center (http://math.gmu.edu/math-learning-center.php), or they may study and retake the test on their own. A student who does not complete the relevant program in the Math Learning Center (http://math.gmu.edu/math-placement_test.php) or does not achieve the necessary score on the Math Placement Test (http://math.gmu.edu/math-placement_test.php) will not be able to enroll in the class. Depending on their test scores, students who do not place into MATH 113 Analytic Geometry and Calculus I (Mason Core) (p. 142) will be advised to take MATH 104 Trigonometry and Transcendental Functions or MATH 105 Precalculus Mathematics or visit the Math Learning Center (http://math.gmu.edu/math-learning-center.php) to prepare for MATH 114 Analytic Geometry and Calculus II.

- MATH 104 Trigonometry and Transcendental Functions and MATH 105 Precalculus Mathematics do not fulfill the Mason Core (p. 142) ‘Quantitative Reasoning’ requirement.

- Students may not receive credit for both MATH 214 Elementary Differential Equations and MATH 216 Theory of Differential Equations; both MATH 213 Analytic Geometry and Calculus III and MATH 215 Analytic Geometry and Calculus III (Honors); both MATH 351 Probability and STAT 344 Probability and Statistics for Engineers and Scientists I; and both MATH 352 Statistics and STAT 354 Probability and Statistics for Engineers and Scientists II.

- After receiving a grade of ‘C’ or better in one of the courses listed below on the left, students may not receive credit for the corresponding course on the right:

<table>
<thead>
<tr>
<th>Course</th>
<th>May Not Receive Credit for</th>
</tr>
</thead>
<tbody>
<tr>
<td>MATH 113 or MATH 123</td>
<td>MATH 105 or MATH 108</td>
</tr>
<tr>
<td>MATH 351 or STAT 344</td>
<td>MATH 110</td>
</tr>
<tr>
<td>MATH 441</td>
<td>MATH 111</td>
</tr>
<tr>
<td>MATH 125</td>
<td>MATH 112</td>
</tr>

Douglas Eckley
Exploratory Hall, Room 4451
Fairfax Campus
Phone: 703-993-1682
Email: deckley2@gmu.edu
Website: math.gmu.edu/graduate/cert-in-actuarial.php

The Actuarial Sciences Graduate Certificate is designed to serve students and professionals who are interested in pursuing careers as actuaries. The course content provides students with specific training related to the following exams administered by the Society of Actuaries (SOA):

- Financial Mathematics Exam
- Long-Term Actuarial Mathematics Exam
- Short-Term Actuarial Mathematics Exam
- Statistics for Risk Modeling Exam
- Investment and Financial Markets Exam

The courses also provide a solid foundation for the corresponding Casualty Actuary Society (CAS) exams. Passing the first professional exam, i.e. the SOA Probability Exam, is equivalent to meeting the prerequisites for the certificate courses in the area of probability and statistics.

The Actuarial Sciences Graduate Certificate may only be pursued on a part-time basis.
Admissions

University-wide admissions policies can be found in the Graduate Admissions Policies (p. 68) section of this catalog.

To apply for this program, please complete the George Mason University Admissions Application (https://www2.gmu.edu/admissions-aid/apply-now).

Interested applicants must submit three letters of recommendation. GRE scores are not required.

Students intending to pursue the Actuarial Sciences Graduate Certificate must have three semesters of calculus, a course in linear algebra (equivalent to MATH 203 Linear Algebra), a calculus-based course in probability (equivalent to MATH 351 Probability), and statistics (equivalent to MATH 352 Statistics). Passing the first professional exam, i.e. the SOA Probability Exam, is also sufficient preparation for the certificate program.

Policies

For policies governing all graduate programs, see AP6 Graduate Policies (p. 90).

Requirements

Certificate Requirements

Total credits: 18

This certificate may be pursued on a part-time basis only.

Preparation for the SOA Exams

The graduate certificate coursework provides preparation for the SOA exams as follows:

MATH 551 Regression and Time Series and MATH 553 Advanced Mathematical Statistics in Actuarial Sciences combined: Statistics for Risk Modeling Exam

MATH 554 Financial Mathematics: Financial Mathematics Exam

MATH 555 Actuarial Modeling I: Long-Term Actuarial Mathematics Exam

MATH 557 Financial Derivatives: Investment and Financial Markets Exam

MATH 653 Construction and Evaluation of Actuarial Models I: Short-Term Actuarial Mathematics Exam

The SOA exams overlap significantly with the Casualty Actuarial Society (“CAS”) exams.

Counting Actuarial Courses for Other Mathematics Degrees

A student enrolled in the Actuarial Sciences Graduate Certificate and another graduate degree program in mathematics can count actuarial mathematics courses toward the master’s or doctoral degree according to the following rules:

- None of the core actuarial mathematics courses can count toward the Mathematics, PhD (https://catalog.gmu.edu-colleges-schools-science/mathematical-sciences/mathematics-phd)
- None of the actuarial mathematics courses MATH 551 Regression and Time Series, MATH 554 Financial Mathematics and MATH 655 Pension Valuation can count toward the Mathematics, MS (https://catalog.gmu.edu-colleges-schools-science/mathematical-sciences/mathematics-ms)
- The two actuarial mathematics courses MATH 555 Actuarial Modeling I and MATH 653 Construction and Evaluation of Actuarial Models I can count toward the Mathematics, MS (https://catalog.gmu.edu-colleges-schools-science/mathematical-sciences/mathematics-ms) provided that all other courses counted toward that degree are MATH courses. An exception can be made if the student wishes to count only one of these two courses toward the Statistics, MS (https://catalog.gmu.edu-colleges-schools-engineering/statistics-statistical-sciences) as an approved non-STAT elective course and can count MATH 555 Actuarial Modeling I as a STAT elective when designing a curriculum for this degree. The full curriculum should be designed in consultation with the student’s Statistics Department (p. 1136) advisor.

Counting Actuarial Courses toward the Statistical Science, MS Degree

A student enrolled in this certificate and in the Statistical Science, MS (https://catalog.gmu.edu-colleges-schools-engineering/statistics-statistical-sciences-ms) can count MATH 555 Actuarial Modeling I as an approved non-STAT elective course and can count MATH 653 Construction and Evaluation of Actuarial Models I as a STAT elective when designing a curriculum for this degree. The full curriculum should be designed in consultation with the student’s Statistics Department (p. 1136) advisor.

Mathematics, BA

Academic Advising

4411 Exploratory Hall
Fairfax Campus

Phone: 703-993-1482
Email: danders1@gmu.edu
Website: math.gmu.edu/degree-programs.php
This bachelor’s program provides exciting opportunities for students interested in mathematics.

**Teacher Licensure**
Students who wish to become teachers and plan to seek teacher licensure should consider the following options:

- Curriculum and Instruction Undergraduate Certificate (p. 166)
- Mathematics, BA or BS/Curriculum and Instruction, Accelerated MEd (Secondary Education Mathematics concentration) (p. 747)

Interested students should attend an information session early in their studies. For more information, visit the Graduate School of Education’s website (http://gse.gmu.edu).

**Admissions & Policies**

**Admissions**
University-wide admissions policies can be found in the Undergraduate Admissions Policies (p. 65) section of this catalog.

To apply for this program, please complete the George Mason University Admissions Application (https://www2.gmu.edu/admissions-aid/apply-now).

**Policies**
Students must fulfill all Requirements for Bachelor’s Degrees (p. 89), including the Mason Core (p. 142). As outlined in the Requirements tab, students in this bachelor’s program must also complete the additional College Requirements for the BA Degree.

MATH 290 Introduction to Advanced Mathematics meets the writing intensive requirement for this major.

For policies governing all undergraduate programs, see AP .5 Undergraduate Policies (p. 87).

Graduating seniors are required to have an exit interview.

**Course Recommendations and Policies**
Students intending to enter graduate school in mathematics are strongly advised to take MATH 315 Advanced Calculus I and MATH 321 Abstract Algebra.

Students may not receive credit for both MATH 214 Elementary Differential Equations and MATH 216 Theory of Differential Equations; both MATH 213 Analytic Geometry and Calculus III and MATH 215 Analytic Geometry and Calculus III (Honors); both MATH 351 Probability and STAT 344 Probability and Statistics for Engineers and Scientists I; and both MATH 352 Statistics and STAT 354 Probability and Statistics for Engineers and Scientists II.

After receiving a grade of ‘C’ or better in one of the courses listed below on the left, students may not receive credit for the corresponding course on the right:

<table>
<thead>
<tr>
<th>Course</th>
<th>May Not Receive Credit for</th>
</tr>
</thead>
<tbody>
<tr>
<td>MATH 113 or MATH 123</td>
<td>MATH 105 or MATH 108</td>
</tr>
<tr>
<td>MATH 351 or STAT 344</td>
<td>MATH 110</td>
</tr>
</tbody>
</table>

**Requirements**

**Degree Requirements**
Total credits: minimum 120

Students should refer to the Admissions & Policies (p. 744) tab for specific policies related to this program.

A maximum of 6 credits of grades below 2.00 in coursework designated MATH or STAT may be applied toward the major.

**Required Courses**

</tbody>
</table>

Total Credits: 26

1. Fulfills the writing intensive requirement.

In addition to completing the core courses above, students must complete 12 additional traditional mathematics credits in MATH courses numbered above 300.

<table>
<thead>
<tr>

<td></td>
</tr>
</tbody>
</table>

Total Credits: 12

1. Excluding MATH 400 History of Math (Topic Varies) (Mason Core) (p. 142)

**Mason Core and Elective Credits**

In order to meet a minimum of 120 credits, this degree requires an additional 82 credits which may be applied toward any remaining Mason Core (p. 142) requirements (outlined below), Requirements for Bachelor’s Degrees (p. 89), College Requirements for the BA Degree (outlined below), and elective courses. Students are strongly encouraged to consult with their advisors to ensure that they fulfill all requirements.

**Mason Core**

Some Mason Core (p. 142) requirements may already be fulfilled by the major requirements listed above. Students are strongly encouraged to consult their advisors to ensure they fulfill all remaining Mason Core (p. 142) requirements.

</tbody>
</table>

**Total Credits**: 40

1. Most programs include the writing-intensive course designated for the major as part of the major requirements; this course is therefore not counted towards the total required for Mason Core.

2. Minimum 3 credits required.

### College Requirements for the BA Degree

In addition to the program requirements and the Mason Core (p. 142) requirements, students pursuing a BA degree must complete the coursework below. Except where expressly prohibited, a course used to fulfill this college-level requirement may also be used simultaneously to satisfy other requirements such as Mason Core (p. 142) requirements, other college-level requirements, or requirements for the major. In some cases, the requirements listed below may be superseded by requirements of the degree program and the Mason Core (p. 142).

#### Philosophy or Religious Studies

<table>
<thead>
<tr>

<td>RELI (p. 2144)</td>
<td></td>
</tr>
</tbody>
</table>

1. PHIL 323 Classical Western Political Theory and PHIL 324 Modern Western Political Theory may not be used to fulfill this requirement.

#### Social and Behavioral Sciences

Choose one approved Mason Core: Social and Behavioral Sciences (p. 150) course in addition to the Mason Core (p. 142) required course for a total of 6 credits. The two courses used to fulfill the combined college-level and university requirements must be from different disciplines.

This requirement may be fulfilled by completing any course in ANTH (p. 1212), CRIM (p. 1514), ECON (p. 1564), GOVT (p. 1774), HIST (p. 1818) 1, LING (p. 1896), PSYC (p. 2074), or SOCI (p. 2167), and the following GGS (p. 1732)courses:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>

</thead>
<tbody>
<tr>
<td></td>
<td>Select any course from the disciplines above or select from</td>
<td></td>
</tr>
<tr>
<td></td>
<td>the following GGS courses:</td>
<td>3</td>
</tr>
</tbody>
</table>

#### Natural Science

Choose one credit in addition to the Mason Core: Natural Science (p. 148) requirement for a total of 8 credits. This combined college-level and university requirement must be fulfilled by completing two of any approved Mason Core: Natural Science (p. 148) courses that include a laboratory experience 1.

<table>
<thead>
<tr>

1 Students who can document attendance at a native school in a non-western country for at least four years may request a waiver from this requirement through the CHSS Undergraduate Academic Affairs Office (http://chssundergrad.gmu.edu).

Honors

Honors in the Major

Eligibility

Mathematics majors who have maintained a GPA of at least 3.50 in mathematics courses and a GPA of 3.50 in all courses taken at George Mason University may apply to the departmental honors program upon completion of two MATH courses at the 300+ level (excluding MATH 400 History of Math (Topic Varies) (Mason Core) (p. 142)), at least one of which has MATH 290 Introduction to Advanced Mathematics as a prerequisite. Admission to the program will be monitored by the undergraduate committee.

Honors Requirements

To graduate with honors in mathematics, a student is required to maintain a minimum GPA of 3.50 in mathematics courses and successfully complete MATH 405 Honors Thesis in Mathematics I and MATH 406 RS: Honors Thesis in Mathematics II with an average GPA of at least 3.50 in these two courses.

Accelerated Master's

Mathematics, BA or BS/Mathematics, Accelerated MS

Overview

This degree program allows academically strong Mathematics, BA (p. 743) and Mathematics, BS (p. 748) students to obtain their bachelor’s and a Mathematics, MS (p. 754) by successfully completing 144 credits. Well-prepared students may be admitted to this program after the completion of 90 undergraduate credits. Upon completion and conferral of the bachelor's degree and with satisfactory graduate-level performance (3.00 GPA) in graduate courses, students are given advanced standing in the Mathematics, MS (p. 754) program and complete an additional 24 credits to receive the master’s degree.

For more detailed information, see AP.6 Bachelor's/Accelerated Master's Degrees (p. 93). For policies governing all graduate degrees, see AP.6 Graduate Policies (p. 90).

Application Requirements

Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in Graduate Admission Policies (p. 68). Application information for this accelerated master's program can be found on the Department of Mathematical Sciences website (http://math.gmu.edu).

Successful applicants will have an overall undergraduate GPA of at least 3.00. Additionally, they will have completed the following courses with a GPA of 3.00 or higher: MATH 315 Advanced Calculus I, MATH 321 Abstract Algebra, and MATH 322 Advanced Linear Algebra.

Accelerated Option Requirements

At the beginning of the student’s final undergraduate semester, students must submit a bachelor’s/accelerated master’s transition form (available from the Office of the University Registrar (http://registrar.gmu.edu)) to the College of Science’s Office of Academic and Student Affairs (https://cos.gmu.edu/about/contact-us). Students must begin their master’s program in the semester immediately following conferral of the bachelor’s degree.

Students must maintain an overall GPA of 3.00 or higher in graduate coursework.

 Reserve Graduate Credit

While still in undergraduate status, a maximum of 6 additional graduate credits may be taken as reserve graduate credit and applied to the master's program. Reserve graduate credits do not apply to the
undergraduate degree. See AP.1.4.4 Graduate Course Enrollment by Undergraduates (p. 79).

Mathematics, BA or BS/Curriculum and Instruction, Accelerated MEd, (Secondary Education Mathematics concentration)

Overview
Highly-qualified undergraduates may be admitted to the bachelor’s/accelerated master’s program and obtain a BA (p. 743) or BS in Mathematics (p. 748) and an MEd in Curriculum and Instruction (p. 170) (concentration in secondary education mathematics) in an accelerated time-frame after satisfactory completion of 149 credits. See AP.6.7 Bachelor’s/Accelerated Master’s Degree (p. 93) for policies related to this program.

This accelerated option is offered jointly by the Department of Mathematical Sciences (p. 740) and the Graduate School of Education (p. 162).

Students in an accelerated degree program must fulfill all university requirements for the master’s degree. For policies governing all graduate degrees, see AP.6 Graduate Policies (p. 90).

Application Requirements
Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in Graduate Admissions Policies (p. 68). For information specific to this accelerated master’s program, see Application Requirements and Deadlines (https://cehd.gmu.edu/bachelors-accelerated-masters-program).

Accelerated Option Requirements
Students complete the following courses in their senior year:

<table>
<thead>
<tr>
<th>Senior</th>

<td>3</td>
</tr>
</tbody>
</table>

Total Credits 12

Alternative course options are available for students who begin their program in the spring. Students should contact the coordinator for the Bachelor’s/Accelerated Master’s Degree program in the College of Education and Human Development.

While undergraduate students, accelerated master’s students are able to apply two of the courses listed above to both the bachelor’s and master’s degrees. These courses are considered advanced standing for the MEd. A minimum grade of B must be earned to be eligible to count as advanced standing. The other two courses are taken as reserve graduate credit and do not apply to the undergraduate degree. Early in their final undergraduate semester, students must submit the Bachelor’s/Accelerated Master’s Transition Form to the CEHD Admissions Office and specify which of the four courses are to be designated as advanced standing and reserve graduate credit.

Mathematics, BS

Academic Advising
4411 Exploratory Hall
Fairfax Campus
Phone: 703-993-1482
Email: danders1@gmu.edu
Website: math.gmu.edu/degree-programs.php

This program provides exciting opportunities for students interested in mathematics. Students are encouraged to select an optional concentration in Actuarial Mathematics (ACTM), Applied Mathematics (AMT), or Mathematical Statistics (MTHS). Students who do not select a concentration study traditional mathematics.

Teacher Licensure
Students who wish to become teachers and plan to seek teacher licensure should consider the following options:

- Curriculum and Instruction Undergraduate Certificate (p. 166)
- Mathematics, BA or BS/Curriculum and Instruction, Accelerated MEd (Secondary Education Mathematics concentration) (p. 751)

Interested students should attend an information session early in their studies. For more information, visit the Graduate School of Education’s website (http://gse.gmu.edu).

Admissions & Policies

Admissions
University-wide admissions policies can be found in the Undergraduate Admissions Policies (p. 65) section of this catalog.

To apply for this program, please complete the George Mason University Admissions Application (https://www2.gmu.edu/admissions-aid/apply-now).

Policies
Students must fulfill all Requirements for Bachelor’s Degrees (p. 89), including the Mason Core (p. 142).

MATH 290 Introduction to Advanced Mathematics meets the writing intensive requirement for this major.

For policies governing all undergraduate programs, see AP.5 Undergraduate Policies (p. 87).

Graduating seniors are required to have an exit interview.

Language Proficiency Recommendation
The department recommends proficiency in French, German, or Russian.

Course Recommendations and Policies
A maximum of 6 credits of grades below 2.00 in coursework designated MATH or STAT may be applied toward the major.
Students intending to enter graduate school in mathematics are strongly advised to take MATH 315 Advanced Calculus I and MATH 321 Abstract Algebra.

Students may not receive credit for both MATH 214 Elementary Differential Equations and MATH 216 Theory of Differential Equations; both MATH 213 Analytic Geometry and Calculus III and MATH 215 Analytic Geometry and Calculus III (Honors); both MATH 351 Probability and STAT 344 Probability and Statistics for Engineers and Scientists I; and both MATH 352 Statistics and STAT 354 Probability and Statistics for Engineers and Scientists II.

After receiving a grade of 'C' or better in one of the courses listed below on the left, students may not receive credit for the corresponding course on the right:

<table>
<thead>
<tr>
<th>Course</th>
<th>May Not Receive Credit for</th>
</tr>
</thead>
<tbody>
<tr>
<td>MATH 113 or MATH 123</td>
<td>MATH 105 or MATH 108</td>
</tr>
<tr>
<td>MATH 351 or STAT 344</td>
<td>MATH 110</td>
</tr>
<tr>
<td>MATH 441</td>
<td>MATH 111</td>
</tr>
<tr>
<td>MATH 125</td>
<td>MATH 112</td>
</tr>
</tbody>
</table>

### Degree Requirements

Total credits: minimum 120

Students should refer to the Admissions & Policies (p. 748) tab for specific policies related to this program.

In addition to the mathematics core, science, and computational skills requirements, students may select an optional concentration in Actuarial Mathematics (ACTM), Applied Mathematics (AMT) or Mathematical Statistics (MTHS).

### Mathematics Core

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>MATH 113</td>
<td>Analytic Geometry and Calculus I (Mason Core) (p. 142)</td>
<td>4</td>
</tr>
<tr>
<td>MATH 114</td>
<td>Analytic Geometry and Calculus II</td>
<td>4</td>
</tr>
<tr>
<td>MATH 203</td>
<td>Linear Algebra</td>
<td>3</td>
</tr>
<tr>
<td>MATH 213</td>
<td>Analytic Geometry and Calculus III</td>
<td>3</td>
</tr>
<tr>
<td>MATH 214</td>
<td>Elementary Differential Equations</td>
<td>3</td>
</tr>
<tr>
<td>MATH 215</td>
<td>Analytic Geometry and Calculus III (Honors)</td>
<td>3</td>
</tr>
<tr>
<td>MATH 216</td>
<td>Theory of Differential Equations</td>
<td>3</td>
</tr>
<tr>
<td>MATH 290</td>
<td>Introduction to Advanced Mathematics</td>
<td>3</td>
</tr>
<tr>
<td>MATH 322</td>
<td>Advanced Linear Algebra</td>
<td>3</td>
</tr>
</tbody>
</table>

Total Credits: 23

1. Fulfills the writing intensive requirement.

### Science

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
</table>

Select a one-year sequence of a laboratory science from the following courses:

**Biology Sequence:**

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>BIOL 213</td>
<td>Cell Structure and Function (Mason Core) (p. 142)</td>
<td>4-9</td>
</tr>
</tbody>
</table>

Choose one from the following:

- BIOL 300 | BioDiversity |
- BIOL 308 | Foundations of Ecology and Evolution |
- BIOL 311 | General Genetics |

**Chemistry Sequence:**

- CHEM 211 & CHEM 213 | General Chemistry I (Mason Core) (p. 142) and General Chemistry Laboratory I (Mason Core) (p. 142) |
- CHEM 212 & CHEM 214 | General Chemistry II (Mason Core) (p. 142) and General Chemistry Laboratory II (Mason Core) (p. 142) |

**Geology Sequence:**

- GEOL 101 | Introductory Geology I (Mason Core) (p. 142) |
- GEOL 102 | Introductory Geology II (Mason Core) (p. 142) |

**Physics Sequence:**

- PHYS 160 & PHYS 161 | University Physics I (Mason Core) (p. 142) and University Physics I Laboratory (Mason Core) (p. 142) |
- PHYS 260 & PHYS 261 | University Physics II (Mason Core) (p. 142) and University Physics II Laboratory (Mason Core) (p. 142) |

Total Credits: 8-9

### Computational Skills

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>CS 112</td>
<td>Introduction to Computer Programming (Mason Core) (p. 142)</td>
<td>4</td>
</tr>
</tbody>
</table>

Total Credits: 4

### BS without Concentration

In addition to the mathematics core, science, and computational skills requirements listed above, students who are not choosing a concentration must complete the following coursework:

**Traditional Mathematics**

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>MATH 125</td>
<td>Discrete Mathematics I (Mason Core) (p. 142)</td>
<td>3</td>
</tr>
<tr>
<td>MATH 315</td>
<td>Advanced Calculus I</td>
<td>3</td>
</tr>
<tr>
<td>MATH 316</td>
<td>Advanced Calculus II</td>
<td>3</td>
</tr>
<tr>
<td>MATH 321</td>
<td>Abstract Algebra</td>
<td>3</td>
</tr>
<tr>
<td>MATH 431</td>
<td>Topology</td>
<td>3</td>
</tr>
</tbody>
</table>

Select 12 additional credits of MATH courses numbered above 300 (p. 1923) 1

**Additional Science**

Select additional science credits from one of the following three options:

- A second sequence from the choices under "Science" above
- 6 credits from more advanced courses in biology, chemistry, geology, or physics 2

Total Credits: 12

---

1. Fulfills the writing intensive requirement.

2. Additional credits from advanced courses in biology, chemistry, geology, or physics.
Concentration in Actuarial Mathematics (ACTM)

This concentration provides exciting opportunities for students interested in studying actuarial mathematics. Expertise in this field leads directly into a career as a practicing actuary with an insurance company, consulting firm, or in government employment.

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>MATH 125</td>
<td>Discrete Mathematics I (Mason Core) (p. 142)</td>

</tr>
<tr>
<td>or ECON 310</td>
<td>Money and Banking</td>
<td>3</td>
</tr>
<tr>
<td>or FNAN 321</td>
<td>Financial Institutions</td>
<td>3</td>
</tr>
<tr>
<td>STAT 362</td>
<td>Introduction to Computer Statistical Packages</td>
<td>3</td>
</tr>
</tbody>
</table>

Select two from the following: 6

- MATH 441 Deterministic Operations Research
- MATH 442 Stochastic Operations Research
- MATH 446 Numerical Analysis I
- MATH 453 Advanced Mathematical Statistics

Total Credits 39

1 For mathematics majors, the Department of Economics has agreed to waive the ECON 104 Contemporary Macroeconomic Principles (Mason Core) (p. 142) prerequisite

Concentration in Applied Mathematics (AMT)

This concentration provides exciting opportunities for students interested in taking additional classes on applied mathematics. The concentration prepares numerical analysts able to deal with real world applications in science and engineering.

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>MATH 125</td>
<td>Discrete Mathematics I (Mason Core) (p. 142)</td>
<td>3</td>
</tr>
<tr>
<td>MATH 315</td>
<td>Advanced Calculus I</td>
<td>3</td>
</tr>
</tbody>
</table>

Total Credits 39

1 Excluding MATH 400 History of Math (Topic Varies) (Mason Core) (p. 142)

Concentration in Mathematical Statistics (MTHS)

This concentration provides exciting opportunities for students interested in taking additional classes on statistics and data analysis. The concentration prepares data analysts able to deal with real world applications in science and engineering.

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>MATH 125</td>

</tr>
</tbody>
</table>

Select two from the following: 6

- STAT 455 Experimental Design
- STAT 463 Introduction to Exploratory Data Analysis
- STAT 474 Introduction to Survey Sampling

Additional Science Courses

Select additional science credits from one of the following options: 49

- A second sequence from the choices under "Science" above
- 6 credits from more advanced courses in biology, chemistry, geology, or physics
- The 4-credit option of PHYS 262 and PHYS 263

Total Credits 31-36
Mason Core and Elective Credits
In order to meet a minimum of 120 credits, this degree requires additional credits (specific credit counts by concentration are shown below), which may be applied toward any remaining Mason Core requirements (outlined below), Requirements for Bachelor's Degrees (p. 89), and elective courses. Students are strongly encouraged to consult with their advisors to ensure that they fulfill all requirements.

- Without concentration: 51-57 credits
- ACTM concentration: 45-46 credits
- AMT concentration: 51-57 credits
- MTHS concentration: 48-54 credits

Mason Core
Some Mason Core (p. 142) requirements may already be fulfilled by the major requirements listed above. Students are strongly encouraged to consult their advisors to ensure they fulfill all remaining Mason Core (p. 142) requirements.

Honors in the Major
Eligibility
Mathematics majors who have maintained a GPA of at least 3.50 in mathematics courses and a GPA of 3.50 in all courses taken at George Mason University may apply to the departmental honors program upon completion of two MATH courses at the 300+ level (excluding MATH 400 History of Math (Topic Varies) (Mason Core) (p. 142)), at least one of which has MATH 290 Introduction to Advanced Mathematics as a prerequisite. Admission to the program will be monitored by the undergraduate committee.

Honors Requirements
To graduate with honors in mathematics, a student is required to maintain a minimum GPA of 3.50 in mathematics courses and successfully complete MATH 405 Honors Thesis in Mathematics I and MATH 406 RS: Honors Thesis in Mathematics II with an average GPA of at least 3.50 in these two courses.

Accelerated Master's
Mathematics, BA or BS/Curriculum and Instruction, Accelerated MEd, (Secondary Education Mathematics concentration)
Overview
Highly-qualified undergraduates may be admitted to the bachelor's/accelerated master's program and obtain a BA (p. 743) or BS in Mathematics (p. 748) and an MEd in Curriculum and Instruction (p. 170) (concentration in secondary education mathematics) in an accelerated time-frame after satisfactory completion of 149 credits. See AP 6.7 Bachelor's/Accelerated Master's Degree (p. 93) for policies related to this program.

This accelerated option is offered jointly by the Department of Mathematical Sciences (p. 740) and the Graduate School of Education (p. 162).

Students in an accelerated degree program must fulfill all university requirements for the master's degree. For policies governing all graduate degrees, see AP 6 Graduate Policies (p. 90).

Application Requirements
Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in Graduate Admissions Policies (p. 68). For information specific to this accelerated master's program, see Application Requirements and Deadlines (https://cehd.gmu.edu/bachelors-accelerated-masters-program).

Accelerated Option Requirements
Students complete the following courses in their senior year:

<table>
<thead>
<tr>
<th>Senior</th>
<th>Fall Semester</th>

</tr>
</tbody>
</table>

Alternative course options are available for students who begin their program in the spring. Students should contact the coordinator for the Bachelor's/Accelerated Master's Degree program in the College of Education and Human Development.
While undergraduate students, accelerated master’s students are able to apply two of the courses listed above to both the bachelor’s and master’s degrees. These courses are considered advanced standing for the MEd. A minimum grade of B must be earned to be eligible to count as advanced standing. The other two courses are taken as reserve graduate credit and do not apply to the undergraduate degree. Early in their final undergraduate semester, students must submit the Bachelor’s/Accelerated Master’s Transition Form to the CERHD Admissions Office and specify which of the four courses are to be designated as advanced standing and reserve graduate credit.

Mathematics, BA or BS/Mathematics, Accelerated MS

Overview
This degree program allows academically strong Mathematics, BA (p. 743) and Mathematics, BS (p. 748) students to obtain their bachelor’s and a Mathematics, MS (p. 754) by successfully completing 144 credits. Well-prepared students may be admitted to this program after the completion of 90 undergraduate credits. Upon completion and conferral of the bachelor’s degree and with satisfactory graduate-level performance (3.00 GPA) in graduate courses, students are given advanced standing in the Mathematics, MS (p. 754) program and complete an additional 24 credits to receive the master’s degree.

For more detailed information, see AP.6.7 Bachelor’s/Accelerated Master’s Degrees (p. 93). For policies governing all graduate degrees, see AP.6 Graduate Policies (p. 90).

Application Requirements
Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in Graduate Admission Policies (p. 68). Application information for this accelerated master’s program can be found on the Department of Mathematical Sciences website (http://math.gmu.edu).

Successful applicants will have an overall undergraduate GPA of at least 3.00. Additionally, they will have completed the following courses with a GPA of 3.00 or higher: MATH 315 Advanced Calculus I, MATH 321 Abstract Algebra, and MATH 322 Advanced Linear Algebra.

Accelerated Option Requirements
At the beginning of the student’s final undergraduate semester, students must submit a bachelor’s/accelerated master’s transition form (available from the Office of the University Registrar (http://registrar.gmu.edu)) to the College of Science’s Office of Academic and Student Affairs (https://cos.gmu.edu/about/contact-us). Students must begin their master’s program in the semester immediately following conferral of the bachelor’s degree.

Students must maintain an overall GPA of 3.00 or higher in graduate coursework.

Reserve Graduate Credit
While still in undergraduate status, a maximum of 6 additional graduate credits may be taken as reserve graduate credit and applied to the master’s program. Reserve graduate credits do not apply to the undergraduate degree. See AP.1.4.4 Graduate Course Enrollment by Undergraduates (p. 79).

BS (selected)/Statistical Science, Accelerated MS

Overview
Highly-qualified students in BS programs have the option of applying to the accelerated Statistical Science, MS (p. 1141) program.

For more detailed information, see AP.6.7 Bachelor’s/Accelerated Master’s Degrees (p. 93). For policies governing all graduate degrees, see AP.6 Graduate Policies (p. 90).

Admission Requirements
No specific undergraduate BS degree is required. Students enrolled in any BS degree may apply to the accelerated Statistical Science, MS (p. 1141) program if such an accelerated Statistical Science, MS pathway is allowable from the student’s BS program, which will be determined by the academic advisors of both the BS and MS programs; and if they have earned 90 undergraduate credits with an overall GPA of 3.00. Students must have successfully completed the following Mason courses each with a grade of C or better prior to admission to the accelerated program:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>MATH 213</td>
<td>Analytic Geometry and Calculus III</td>
<td>3</td>
</tr>
<tr>
<td>MATH 203</td>
<td>Linear Algebra</td>
<td>3</td>
</tr>
<tr>
<td>or MATH 321</td>
<td>Abstract Algebra</td>
<td></td>
</tr>
<tr>
<td>STAT 250</td>
<td>Introductory Statistics I (Mason Core)</td>
<td>3</td>
</tr>
<tr>
<td>or STAT 344</td>
<td>Probability and Statistics for Engineers and Scientists I</td>
<td></td>
</tr>
<tr>
<td>STAT 346</td>
<td>Probability for Engineers</td>
<td>3</td>
</tr>
<tr>
<td>or MATH 351</td>
<td>Probability</td>
<td></td>
</tr>
<tr>
<td>STAT 362</td>
<td>Introduction to Computer Statistical Packages</td>
<td>3</td>
</tr>
</tbody>
</table>

Accelerated Option Requirements
Students must complete all credits satisfying degree requirements for the BS and MS programs, with 6 credits overlap chosen from the following courses: STAT 515 Applied Statistics and Visualization for Analytics, STAT 544 Applied Probability, STAT 554 Applied Statistics I, STAT 560 Biostatistical Methods, and STAT 574 Survey Sampling I. (Credit may not be received for both STAT 474 and STAT 574; nor for both STAT 460 and STAT 560.) The graduate courses selected for overlap must be approved by the academic advisors of both the BS and MS programs. All graduate course prerequisites must be completed prior to enrollment. Each graduate course must be completed with a grade of B or better to apply toward the MS degree.

While still in undergraduate status, a maximum of 6 additional graduate credits may be taken as reserve graduate credit and applied to the master’s program. Reserve graduate credits do not apply to the undergraduate degree.

Degree Conferral
Students must apply the semester before they expect to complete the BS requirements to have the BS degree conferred. In addition, at the beginning of the student’s final undergraduate semester, students must complete a Bachelor’s/Accelerated Master’s Transition Form that is submitted to the Office of the University Registrar and Graduate
Recruitment and Enrollment Services. At the completion of MS requirements, a master’s degree is conferred.

Website: math.gmu.edu/graduate/ms-in-mathematics.php

This program provides exciting opportunities for students interested in studying advanced mathematics.

Assistantships

A limited number of merit-based teaching assistantships are available for students taking at least 6 graduate credits each semester. Other sources of support, such as research assistantships, are available as funding permits. Graduate students also have the opportunity to work in the Math Tutoring Center (http://math.gmu.edu/tutor-center.php) and the Math Learning Center (http://math.gmu.edu/math-learning-center.php).

Admissions & Policies

Admissions

University-wide admissions policies can be found in Graduate Admissions Policies (p. 68).

To apply for this program, please complete the George Mason University Admissions Application (https://www2.gmu.edu/admissions-aid/apply-now).

Applicants interested in this program must submit three letters of recommendation. GRE scores are not required.

Students must have taken an upper-division course in advanced calculus (equivalent to MATH 315 Advanced Calculus I), an abstract algebra course (equivalent to MATH 321 Abstract Algebra) and an upper-division course in linear algebra (equivalent to MATH 322 Advanced Linear Algebra). Students should have some computer knowledge.

Policies

For policies governing all graduate programs, see AP.6 Graduate Policies (p. 90).

MATH 500 through MATH 614 cannot be used for credit, with the exception of MATH 555 Actuarial Modeling I and MATH 556 Actuarial Modeling II.

Requirements

Degree Requirements

Total credits: 30

Students should refer to the Admissions & Policies (p. 754) tab for specific policies related to this program.

1. All four courses must be approved by the student's advisor.
Courses not listed as MATH courses must be approved by the graduate committee.
Different rules apply if the student wishes to count graduate actuarial courses toward his or her degree (consult the graduate coordinator).

Research and Creative Component

A student may fulfill the research and creative component in one of three ways: Thesis Option (p. 754), Paper Presentation Option (p. 755), or Preliminary Exams for the PhD (p. 755).

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>

</thead>
<tbody>
<tr>
<td></td>
<td>Select one of the Research and Creative Component options outlined below</td>
<td>6</td>
</tr>
<tr>
<td></td>
<td>Total Credits</td>
<td>6</td>
</tr>
</tbody>
</table>

Thesis Option

In preparation for this option, the student must form a committee comprising a chair and two other faculty members. The chair and at least one other member must be from the Department of Mathematical Sciences (p. 740), one member may be from a related field.

The student completes a thesis under the direction of the committee chair. The thesis work is typically completed while students are registered for 6 credits of MATH 799 MS Thesis. A thesis proposal and thesis are submitted in accordance with AP.6 Graduate Policies (p. 90). The student must give an oral defense of the thesis to the committee and the George Mason University community at large. Students are expected to respond to questions on the thesis and related material. The committee determines whether the defense is satisfactory.
Paper Presentation Option
In preparation for this option, the student must form a committee comprising a chair and two other faculty members. The chair and at least one other member must be from the Department of Mathematical Sciences (p. 740), one member may be from a related field. The student gives an oral presentation of a paper (or series of papers or book chapter) chosen in consultation with the chair of the committee and approved by the full committee. The chosen material must be distinct from work completed in fulfillment of course requirements. The oral presentation is given to the committee and the Mason community at large. Students are expected to respond to questions on the paper and related material. The committee determines whether the defense is satisfactory.

Preliminary Exams for the PhD
The research and creative component can also be fulfilled by passing three preliminary written examinations, as required for the Mathematics, PhD (p. 756) degree.

Dual Degree Options
Mathematics and Statistical Science Dual-Degree MS
This program allows students to earn an MS in Mathematics (p. 754) and an MS in Statistical Science (p. 1141) by completing 48 credits of coursework in both areas instead of the 60 that would be required if the degrees were sought independently.

Admission Requirements
Applicants must satisfy admission requirements for both the MS in Mathematics (p. 754) and the MS in Statistical Science (p. 1141) programs. A joint faculty committee from the Department of Mathematical Sciences (p. 740) and the Department of Statistics (p. 1136) make final admission decisions into the dual-degree program.

Total Credits 21

Notes:
- Students in either the BS/Accelerated MS in Mathematics (p. 755) program or the BS(selected)/Accelerated MS in Statistical Science (p. 1144) program cannot get a reduction of 6 credits toward this dual degree. Students who want to proceed to a PhD degree will only be able to waive the number of credits specified in the associated PhD degree requirements, even though they will have 48 credits at the MS level.
- If a student decides not to complete the required 48 credits, a single MS degree will not be granted unless the student fulfills the requirements for either the MS in Mathematics (p. 754) or the MS in Statistical Science (p. 1141).
- Once a student receives one of the MS degrees from either department, the student will no longer be eligible for the reduction in credit (i.e., will need to complete 30 credits) if the student later decides to earn the other MS degree.

Accelerated Master's
Mathematics, BA or BS/Mathematics, Accelerated MS

Overview
This degree program allows academically strong Mathematics, BA (p. 743) and Mathematics, BS (p. 748) students to obtain their bachelor's and a Mathematics, MS (p. 754) by successfully completing 144 credits. Well-prepared students may be admitted to this program after the completion of 90 undergraduate credits. Upon completion and conferral of the bachelor's degree and with satisfactory graduate-level performance (3.00 GPA) in graduate courses, students are given advanced standing in the Mathematics, MS (p. 754) program and complete an additional 24 credits to receive the master's degree.

For more detailed information, see AP.6.7 Bachelor's/Accelerated Master's Degrees (p. 93). For policies governing all graduate degrees, see AP6 Graduate Policies (p. 90).

Application Requirements
Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in Graduate Admission Policies (p. 68). Application information for this accelerated master's program can be found on the Department of Mathematical Sciences website (http://math.gmu.edu).
Successful applicants will have an overall undergraduate GPA of at least 3.00. Additionally, they will have completed the following courses with a GPA of 3.00 or higher: MATH 315 Advanced Calculus I, MATH 321 Abstract Algebra, and MATH 322 Advanced Linear Algebra.

Accelerated Option Requirements

At the beginning of the student's final undergraduate semester, students must submit a bachelor's/accelerated master's transition form (available from the Office of the University Registrar (http://registrar.gmu.edu)) to the College of Science's Office of Academic and Student Affairs (https://cos.gmu.edu/about/contact-us). Students must begin their master's program in the semester immediately following conferral of the bachelor's degree.

Students must maintain an overall GPA of 3.00 or higher in graduate coursework.

Reserve Graduate Credit

While still in undergraduate status, a maximum of 6 additional graduate credits may be taken as reserve graduate credit and applied to the master's program. Reserve graduate credits do not apply to the undergraduate degree. See AP 1.4.4 Graduate Course Enrollment by Undergraduates (p. 79).

Mathematics, PhD

Fairfax Campus

Phone: 703-993-1465
Email: fcolonna@gmu.edu
Website: math.gmu.edu/graduate/phd-in-mathematics.php

The doctoral program provides exciting opportunities for students interested in studying advanced mathematics and conducting independent research.

This program begins with graduate coursework and advanced seminars and culminates in a dissertation consisting of original research in mathematics. The PhD is designed to train students as research mathematicians for careers in academia, government, and private industry.

Fellowships and Assistantships

The Department of Mathematical Sciences (p. 740) offers a limited number of merit-based teaching assistantships. Other sources of support, such as research fellowships and assistantships, are available as funding permits. Graduate students also have the opportunity to work in the Math Tutoring Center (http://math.gmu.edu/tutor-center.php) and the Math Learning Center (http://math.gmu.edu/math-learning-center.php).

Admissions & Policies

Admissions

University-wide admissions policies can be found in the Graduate Admissions Policies (p. 68) section of this catalog.

To apply for this program, please complete the George Mason University Admissions Application (https://www2.gmu.edu/admissions-aid/apply-now).

Eligibility

It is expected that all applicants have a recent bachelor's degree in mathematics or an equivalent amount of undergraduate mathematics preparation, with a GPA of at least 3.00 in their last 60 credits of study. Students without this background who have had an upper-division course in linear algebra (equivalent to MATH 322 Advanced Linear Algebra), an upper-division course in advanced calculus (equivalent to MATH 315 Advanced Calculus I), and an upper-division course in group theory (equivalent to MATH 321 Abstract Algebra) are encouraged to apply to the Mathematics, MS (p. 754). Such students may subsequently apply to the PhD when all background issues have been addressed. It is recommended that all applicants have some familiarity with mathematical software.

Application Requirements

To apply, prospective students should provide the completed George Mason University Admissions Application (https://www2.gmu.edu/admissions-aid/apply-now), two copies of official transcripts from each college and graduate institution attended, three letters of recommendation, and a goals statement. GRE scores are recommended but not required.

TOEFL scores are required for all international applicants; find additional information in the Admission of International Students (p. 71) section of this catalog.

Policies

For policies governing all graduate programs, see AP 6 Graduate Policies (p. 90).

Reduction of Credits

For students entering the doctoral program with a master's degree in a related field from a regionally accredited institution, the number of required credits may be reduced up to 30 credits, subject to approval of the program faculty and the college's associate dean for student affairs. See AP 6.5.2 Reduction of Credits (p. 91) for more information.

Transfer of Credit

Graduate mathematics courses taken elsewhere without being applied to degree conferral may be counted toward the degree as transfer credit. See AP 6.5.3 Transfer of Credit (p. 92) for additional information.

Requirements

Degree Requirements

Total credits: 72
Students should refer to the Admissions & Policies (p. 756) tab for specific policies related to this program.

Core Courses
Students must earn a grade of 'B' or better in each core course that counts toward the core requirement.

Preliminary Written Exam
Students are required to pass three preliminary written exams after completing the core courses, usually by the end of their second year. These exams are based on material presented in three of the five core courses (the student may choose which topics to exclude). These exams are offered twice a year and students may take each exam up to three times. A grade of “pass” on three preliminary written exams is sufficient to satisfy the creative component of the master’s degree in mathematics.

Dissertation Advisor and Examination Committee
After passing the preliminary written exam, the student chooses a dissertation advisor and a three person examination committee. In consultation with the advisor and committee, the student chooses a major and a minor area of study (the major and minor areas are presumed to be in two different branches of mathematics). The department also aims to deliver and instill a broad-based understanding of general physics and astronomy principles and practices to the wider university community through our Mason Core (p. 142) (general education) courses. Our student-centric curriculum and instruction use a mixture of traditional and current pedagogical techniques informed by on-going educational research. It is our goal to help students to develop versatility and creativity through repeated analytical practices and problem-solving training in their coursework and faculty-led research projects.

Qualifying Examinations
Students are required to take a qualifying exam after passing the preliminary written exam. The qualifying exam will have oral and written components. In consultation with the advisor and committee, the student chooses a major and a minor area of study (the major and minor areas are presumed to be in two different branches of mathematics). The qualifying exam covers the equivalent of approximately four courses of material from the major area and three courses from the minor area.

Dissertation Proposal and Advancement to Candidacy
Approximately one semester after passing the qualifying exam, each doctoral student prepares a written dissertation proposal while taking MATH 998 Doctoral Dissertation Proposal. The proposal must be approved by the dissertation committee, which consists of the three qualifying exam committee members, plus a fourth member from outside the Department of Mathematical Sciences (p. 740). After successfully completing this requirement, the student advances to doctoral candidacy.

Doctoral Dissertation
After advancing to candidacy, the student will work on a doctoral dissertation while enrolled in MATH 999 Doctoral Dissertation. The dissertation is a written piece of original mathematics that demonstrates a doctoral candidate’s mastery of the subject matter. A student is expected to produce new and original research worthy of publication in a peer-reviewed journal. After the dissertation is completed, the committee will review the dissertation and examine the student in a public oral thesis defense.

Department of Physics and Astronomy

Phone: 703-993-1280
Email: physics@gmu.edu
Website: physics.gmu.edu

The department provides rigorous training for physics and astronomy students and prepares them to be successful, confident, and versatile in their ability to apply physics and astronomy principles within any chosen field. The department also aims to deliver and instill a broad-based understanding of general physics and astronomy principles and practices to the wider university community through our Mason Core (p. 142) (general education) courses. Our student-centric curriculum and instruction use a mixture of traditional and current pedagogical techniques informed by on-going educational research. It is our goal to help students to develop versatility and creativity through repeated analytical practices and problem-solving training in their coursework and faculty-led research projects.
Research in the department focuses on pushing the frontiers of physics and astronomy in a broad range of topics using theoretical, experimental, observational, and computational approaches. The department maintains many active collaborations with scientists across different disciplines within the university community and with other national and international institutions. The department believes strongly in incorporating both graduate as well as undergraduate students in our research programs. It is our goal to see students arriving with an enthusiasm and curiosity for physics and astronomy and leaving as true scientists ready to conduct their own scientific investigations.

Undergraduate Programs
The department offers the Physics, BS (p. 764) and the Astronomy, BS (p. 762). Also available are the Physics Minor (p. 768), the Astronomy Minor (p. 763), and the Renewable Energy Interdisciplinary Minor (p. 771).

Undergraduate Research Opportunities
The department offers many opportunities for undergraduate students to become involved with research. Students should consult with faculty working on research topics of interest to them, based on their exploration of the department’s website (http://physics.gmu.edu).

Bachelor’s/Accelerated Master’s Degree
Information regarding this program can be found in the Physics, BS/ Accelerated Masters section of this catalog.

Graduate Programs
This department offers the Applied and Engineering Physics, MS (p. 759). The department also supports the Energy and Sustainability concentration in the Interdisciplinary Studies, MAIS (p. 542). Additionally, the department offers a Physics, PhD (p. 769). These graduate programs are strongly supported by the extensive research activities of the faculty, including many collaborations with scientists and engineers at regional government laboratories.

Requirements & Policies

Requirements

Writing Intensive Requirement
George Mason requires all undergraduate students to complete at least one course designated as "writing intensive" in their majors at the 300-level or above. Students majoring in physics fulfill this requirement by successfully completing PHYS 407 Senior Laboratory in Modern Physics (Mason Core) (p. 142) or ASTR 402 RS: Methods of Observational Astronomy (Mason Core) (p. 142) depending upon their concentration (see program requirements (https://catalog.gmu.edu/colleges-schools/science/physics-astronomy/physics-bs)). Astronomy majors fulfill the requirement by completing ASTR 402 RS: Methods of Observational Astronomy (Mason Core) (p. 142).

Teacher Licensure
Students who wish to become teachers should consult the College of Education and Human Development (p. 161) section of this catalog and attend an information session early in their undergraduate career. For more information, visit the Graduate School of Education’s website (https://gse.gmu.edu).

Physics for Non-majors
Recommended for biology, geology, and premedical students, and mathematics students who seek a BA degree:
PHYS 243 College Physics I (Mason Core) (p. 142), PHYS 244 College Physics I Lab (Mason Core) (p. 142), PHYS 245 College Physics II (Mason Core) (p. 142), and PHYS 246 College Physics II Lab (Mason Core) (p. 142)

Recommended for non-science majors:
PHYS 101, PHYS 102, PHYS 103 Physics and Everyday Phenomena I (Mason Core) (p. 142), and PHYS 104 Physics and Everyday Phenomena II (Mason Core) (p. 142)

The following courses constitute a calculus-based sequence in general physics to be taken by physics and engineering majors, chemistry, computer science, and mathematics students who are pursuing a BS degree:
PHYS 160 University Physics I (Mason Core) (p. 142), PHYS 161 University Physics I Laboratory (Mason Core) (p. 142), PHYS 260 University Physics II (Mason Core) (p. 142), PHYS 261 University Physics II Laboratory (Mason Core) (p. 142) or PHYS 265 Intermediate University Physics Laboratory, PHYS 262 University Physics III (Mason Core) (p. 142), and PHYS 263 University Physics III Laboratory (Mason Core) (p. 142)

Students may receive credit for only one of the following three sequences:

<table>

Website: physics.gmu.edu

This degree contains elements of traditional physics programs and the application of physics to a diversity of critical societal problems. The program is divided into three areas of emphasis; see Requirements (p. 759) for details.

Many courses are offered during late afternoon or evening hours to allow students with full-time employment to easily attend. Students employed at area high-technology organizations may take up to 6 credits (out of 30) for work done on the job under the guidance of a faculty member. This employment-related research may be conducted under an optional 3-credit research project or an optional 6-credit master's thesis. Master's students who are not employed full time may apply for financial aid or a limited number of research assistantships.

Admissions & Policies

Admissions

University-wide admissions policies can be found in the Graduate Admissions Policies (p. 68) section of this catalog.

To apply for this program, please complete the George Mason University Admissions Application (https://www2.gmu.edu/admissions-aid/apply-now).

Individuals holding a baccalaureate degree in physics or a related field from a regionally accredited institution and who have earned a GPA of 3.00 (out of 4.00) in their last 60 credits are invited to apply for admission. If the baccalaureate degree is in a field other than physics, applicants should have taken several courses beyond the introductory physics courses, such as junior-level classical mechanics, electricity and magnetism, or electronics. Applicants may be required to make up one or two deficiencies, based on a graduate physics advisor’s assessment, and be provisionally admitted into the program. Three letters of recommendation must be submitted, preferably from former professors. The general GRE and the GRE subject test in physics are recommended for applicants who received their baccalaureate degrees within the past five years.

Policies

For policies governing all graduate programs, see AP.6 Graduate Policies (p. 90).

Requirements

Degree Requirements

Total credits: 30

Students should refer to the Admissions & Policies (p. 759) tab for specific policies related to this program. Select one emphasis and complete all the requirements therein.

Plan of Study

Before the end of their first semester, each student must submit to the graduate coordinator's office a plan of study that has been approved by their academic advisor. The selected courses must be cohesive and lead to comprehensive knowledge in one area; it cannot be a set of disjointed courses. Any deviations from this plan must be approved by the student's academic advisor. A final, signed version of the plan must be submitted to the graduate coordinator at the start of the semester in which the student plans to graduate.

Select one emphasis and complete all the requirements therein.

Standard Emphasis

This emphasis is intended for students who may wish to pursue further graduate study in physics or astrophysics or pursue graduate study following the Standard Physics concentration of the Physics PhD.

2. **CHEM** (p. 1367)
3. **CLIM** (p. 1407)
4. **CSI** (p. 1436)
5. **MATH** (p. 1923)
6. **STAT** (p. 2220)
7. **PHYS** (p. 2055)

**General Electives**

Select 9 credits of graduate-level science and engineering courses approved by an academic advisor.

Total Credits: 30

1. These must be regular courses and not directed reading, research, or thesis credits.
2. Students may take PHYS 796 Directed Reading and Research and up to 6 credits of PHYS 798 Research Project as general electives. PHYS 798 Research Project is conducted under the supervision of a faculty research advisor and may be based on work done as an intern. Up to 6 credits of PHYS 799 Master’s Thesis may be taken as general electives by students pursuing the thesis option and may also be based on work done as an intern.
**Thesis Option**
In preparation for this option, the student must form a committee comprising a chair and two other faculty members.

The student completes a thesis under the direction of the committee chair. The thesis work is typically completed while students are registered for 6 credits of PHYS 799 Master’s Thesis. A thesis proposal and thesis are submitted in accordance with AP6 Graduate Policies (p. 90). The student must give an oral defense of the thesis to the committee and the George Mason community at large. Students are expected to respond to questions on the thesis and related material. The committee determines whether the defense is satisfactory.

**Accelerated Master’s**

**Physics, BS/Applied and Engineering Physics, Accelerated MS**

**Overview**
This program allows academically strong undergraduates with a demonstrable commitment to research to obtain the Physics, BS (p. 764) and Applied and Engineering Physics, MS (p. 759) degrees by successfully completing 144 credits. Upon completion, students are well-prepared for entry into a professional school or a PhD program in physics or a related discipline.

Admitted students take selected graduate courses during their senior year and are able to use up to 6 graduate credits in partial satisfaction of requirements for the undergraduate degree. Upon completion and conferral of the bachelor’s degree and with satisfactory performance (grade of ‘B’ or better) in each of the graduate courses, students are given advanced standing in the master’s program and complete an additional 24 credits to receive the master’s degree.

For more detailed information, see AP6.7 Bachelor’s/Accelerated Master’s Degrees (p. 93). For policies governing all graduate degrees, see AP6 Graduate Policies (p. 90).

**Application Requirements**
Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in the Graduate Admission Policies (p. 68) section of this catalog.

Successful applicants will have completed at least 90 credits toward their undergraduate degree and 45 credits in physics major coursework. The physics major GPA must be at least 3.50. One or more recommendation letters from one or more research supervisors are also required. Interested applicants should submit a letter to the undergraduate physics coordinator requesting admission along with the aforementioned recommendation letter(s). Contact the physics undergraduate or graduate coordinator for further details.

**Accelerated Option Requirements**
At the beginning of the student’s final undergraduate semester, students must submit a bachelor’s/accelerated master’s transition form (http://registrar.gmu.edu/forms) to the College of Science’s Office of Academic and Student Affairs (https://cos.gmu.edu/about/contact-us). Students must begin their master’s program in the semester immediately following conferral of the bachelor’s degree.

Students must maintain an overall GPA of 3.00 or higher in graduate coursework.

**Reserve Graduate Credit**
While still in undergraduate status, a maximum of 6 additional graduate credits may be taken as reserve graduate credit and applied to the master’s program. Reserve graduate credits do not apply to the undergraduate degree.

**Mechanical Engineering, BS/Applied and Engineering Physics, Accelerated MS**

**Overview**
This program allows academically strong undergraduates with a demonstrable commitment to research to obtain the Mechanical Engineering, BS (https://catalog.gmu.edu/colleges-schools/engineering/mechanical/mechanical-engineering-bs) and Applied and Engineering Physics, MS (p. 759) degrees by successfully completing 145 credits. Upon completion, students are well-prepared for entering into the professional workforce, or a PhD program in physics or a related engineering discipline.

Admitted students take selected graduate courses during their senior year and are able to use up to 6 graduate credits in partial satisfaction of requirements for the undergraduate degree. Upon completion and conferral of the bachelor’s degree and with satisfactory performance (grade of ‘B’ or better) in each of the graduate courses, students are given advanced standing in the master’s program and complete an additional 24 credits to receive the master’s degree.

For more detailed information, see AP6.7 Bachelor’s/Accelerated Master’s Degrees (p. 93). For policies governing all graduate degrees, see AP6 Graduate Policies (p. 90).

**Application Requirements**
Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in the Graduate Admission Policies (p. 68) section of this catalog.

Successful applicants majoring in Mechanical Engineering will have completed at least 90 credits toward their undergraduate degree with an overall GPA of at least 3.00, and the following courses with a GPA of 3.00 or better:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>

<td>3</td>
</tr>
</tbody>
</table>

One or more recommendation letters from one or more research supervisors are also required. Interested applicants majoring in Mechanical Engineering, BS (https://catalog.gmu.edu/colleges-schools/engineering/mechanical/mechanical-engineering-bs) should submit a letter to the undergraduate Mechanical Engineering coordinator and the Physics Graduate Coordinator, respectively, requesting admission.
along with the aforementioned recommendation letter(s). Contact the Mechanical Engineering undergraduate and the Physics graduate coordinator for further details.

**Accelerated Option Requirements**

At the beginning of the student's final undergraduate semester, students must submit a bachelor's/accelerated master's transition form (http://registrar.gmu.edu/forms) to the College of Science's Office of Academic and Student Affairs (https://cos.gmu.edu/about/contact-us). Students must begin their master's program in the semester immediately following conferral of the bachelor's degree.

Students must maintain an overall GPA of 3.00 or higher in graduate coursework.

**Reserve Graduate Credit**

While still in undergraduate status, a maximum of 6 additional graduate credits may be taken as reserve graduate credit and applied to the master's program. Reserve graduate credits do not apply to the undergraduate degree.

**Astronomy, BS**

Banner Code: SC-BS-ASTR

**Undergraduate Astronomy Advisor**

203 Planetary Hall
Fairfax Campus

Phone: 703-993-5356
Email: uadvastr@gmu.edu
Website: physics.gmu.edu

The program prepares students for graduate school, a career in research or teaching, or employment in industry, business, or education fields where analytical skills and a scientific background are advantageous. Students who are considering a double major should talk to the undergraduate coordinator.

**Admissions & Policies**

**Admissions**

University-wide admissions policies can be found in Undergraduate Admissions Policies (p. 65).

To apply for this program, please complete the George Mason University Admissions Application (https://www2.gmu.edu/admissions-aid/apply-now).

**Policies**

Students must fulfill all Requirements for Bachelor’s Degrees (p. 89) including the Mason Core (p. 142).

At least 18 credits used to fulfill an Astronomy, BS cannot be used to fulfill another major or minor. Some course substitutions are allowed for double majors, subject to approval from the Department of Physics and Astronomy (p. 757).

By taking ASTR 402 RS: Methods of Observational Astronomy (Mason Core) (p. 142), astronomy majors satisfy the university's writing-intensive requirement.

For policies governing all undergraduate programs, see AP.5 Undergraduate Policies (p. 87).

**Requirements**

**Degree Requirements**

Total credits: minimum 120

Students should refer to the Admissions & Policies (p. 762) tab for specific policies related to this program.

Students must complete a total of 55 credits in physics and astronomy and 14 credits in mathematics with a minimum GPA of 2.00.

**Required Astronomy Courses**

1. Most programs include the writing-intensive course designated for the major as part of the major requirements; this course is therefore not counted towards the total required for Mason Core.

Mason Core and Elective Credits

In order to meet a minimum of 120 credits, this degree requires an additional 51 credits, which may be applied toward any remaining Mason Core (p. 142) requirements (outlined below), Requirements for Bachelor’s Degrees (p. 89), and electives. Students are strongly encouraged to consult with their advisors to ensure that they fulfill all requirements.

Mason Core

Some Mason Core (p. 142) requirements may already be fulfilled by the major requirements listed above. Students are strongly encouraged to consult their advisors to ensure they fulfill all remaining Mason Core (p. 142) requirements.

2. Minimum 3 credits required.

Honors

Honors in the Major

Eligibility

Astronomy majors who have completed the prerequisites for ASTR 405 Honors Thesis in Astronomy I, have a GPA of at least 3.50 in ASTR and PHYS courses taken at Mason, and have a GPA of at least 3.50 in all courses taken at Mason may apply for admission to the astronomy honors program. Please visit the department for details.

Honors Requirements

To graduate with honors in astronomy, a student must maintain a GPA of at least 3.50 in their ASTR/PHYS courses. Students accepted into the honors program must complete ASTR 405 Honors Thesis in Astronomy I and ASTR 406 Honors Thesis in Astronomy II with a GPA of at least 3.50 and a grade of 'A' or better in ASTR 405 Honors Thesis in Astronomy I and ASTR 406 Honors Thesis in Astronomy II. Students in ASTR 405 Honors Thesis in Astronomy I/ASTR 406 Honors Thesis in Astronomy II will complete a research project and write a thesis working under the supervision of a faculty member. At the end of ASTR 406 Honors Thesis in Astronomy II, the student will write a substantial thesis paper and make a presentation of results to their honors committee.

Astronomy Minor

Banner Code: ASTR

Undergraduate Astronomy Advisor

Planetary Hall, Room 203
Fairfax Campus

Phone: 703-993-5356
Email: uadvastr@gmu.edu
Website: physics.gmu.edu

The minor expands upon a student’s understanding of both astronomy beyond the introductory level and of fundamental principles and further develops analytical skills. The minor is an attractive option for students majoring in science, technology, engineering, or mathematics (STEM).
Admissions & Policies

Policies

Eight credits of coursework must be unique to the minor. For policies governing all minors, see AP5.3.4 Minors (p. 90).

Requirements

Minor Requirements

Total credits: 19 - 22

Students should refer to the Admissions & Policies (p. 764) tab for specific policies related to this program.

The minor requires completion of all coursework with a minimum GPA of 2.00.

Core Courses

<table>
<thead>

Physics, BS

Banner Code: SC-BSPHYS

Undergraduate Physics Advisor

203 Planetary Hall
Fairfax Campus

Phone: 703-993-5356
Email: uadvphys@gmu.edu
Website: physics.gmu.edu

The Physics, BS program prepares students for graduate school and careers in education, business, or industry.

Teacher Licensure

Students who wish to become teachers and plan to seek teacher licensure should consider the following options:

- Curriculum and Instruction Undergraduate Certificate (p. 166)
- Physics, BS/Curriculum and Instruction, Accelerated MEd (Secondary Education Physics concentration) (p. 767)

Interested students should attend an information session early in their undergraduate career. For more information, visit the Graduate School of Education's website (http://gse.gmu.edu).

Admissions & Policies

Admissions

University-wide admissions policies can be found in the Undergraduate Admissions Policies (p. 65) section of this catalog.

To apply for this program, please complete the George Mason University Admissions Application (https://www2.gmu.edu/admissions-aid/apply-now).

Policies

Students must fulfill all Requirements for Bachelor's Degrees (p. 89) including the Mason Core (p. 142).

The intensive writing requirement is fulfilled by taking PHYS 407 Senior Laboratory in Modern Physics (Mason Core) (p. 142) or ASTR 402 RS: Methods of Observational Astronomy (Mason Core) (p. 142), which are also capstone courses for the major.

For policies governing all undergraduate programs, see AP5 Undergraduate Policies (p. 87).
Double Majors

Students considering a double major with physics should discuss this option with the respective undergraduate coordinators.

Note that at least 18 credits used to fulfill the Physics, BS cannot be used to fulfill another major or minor. Some course substitutions are allowed for double majors, but these should be discussed with a physics advisor in advance.

Alternative Introductory Sequence

Normally, students who intend to major in physics should take the physics introductory sequence:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>PHYS 160</td>
<td>University Physics I (Mason Core) (p. 142)</td>
<td>3</td>
</tr>
<tr>
<td>PHYS 161</td>
<td>University Physics I Laboratory (Mason Core) (p. 142)</td>
<td>1</td>
</tr>
<tr>
<td>PHYS 260</td>
<td>University Physics II (Mason Core) (p. 142)</td>
<td>3</td>
</tr>
<tr>
<td>PHYS 261</td>
<td>University Physics II Laboratory (Mason Core) (p. 142)</td>
<td>1</td>
</tr>
</tbody>
</table>

Students who decide to major in physics after completing PHYS 243 College Physics I (Mason Core) (p. 142), PHYS 244 College Physics I Lab (Mason Core) (p. 142), PHYS 245 College Physics II (Mason Core) (p. 142) and PHYS 246 College Physics II Lab (Mason Core) (p. 142) are welcome, but are required to obtain written permission from the Department of Physics and Astronomy (p. 757) before a change of major can be approved.

Requirements

Degree Requirements

Total credits: minimum 120

Students should refer to the Admissions & Policies (p. 764) tab for specific policies related to this program.

Students must complete a total of 75 credits in the major (69 credits if completing a second major), including at least 11 credits in mathematics, with a minimum GPA of 2.00.

Students must complete the coursework described below and either select a concentration or select the "BS without Concentration" option:

Physics Core Courses

Honors

Honors in the Major
Physics majors who have maintained an overall GPA of at least 3.50 in physics courses and a GPA of 3.50 in all courses taken at George Mason University may apply to the physics honors program when they complete the first semester of their junior year.

To graduate with honors in physics, a student is required to maintain a minimum GPA of 3.00 in physics courses and successfully complete PHYS 405 Honors Thesis in Physics I and PHYS 406 Honors Thesis in Physics II with a GPA of at least 3.50 and a grade of at least ‘A’ in PHYS 406 Honors Thesis in Physics II. Please visit the department for details.

Accelerated Master’s

Physics, BS/Curriculum and Instruction, Accelerated MEd (Secondary Education Physics concentration)

Overview
Highly-qualified undergraduates may be admitted to the bachelor’s/accelerated master’s program and obtain both a BS in Physics (p. 764) and an MEd in Curriculum and Instruction (p. 170), Secondary Education Physics Concentration in an accelerated timeframe after satisfactory completion of 149 credits. See AP6.7 Bachelor’s/Accelerated Master’s Degrees (p. 93) for policies related to this program.

This accelerated option is offered jointly by the department of Physics and Astronomy (p. 757) and the Graduate School of Education (p. 162).

Students in an accelerated degree program must fulfill all university requirements for the master’s degree. For policies governing all graduate degrees, see AP6 Graduate Policies (p. 90).

Application Requirements
Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in Graduate Admissions Policies (p. 68). For information specific to this accelerated master’s program, see Application Requirements and Deadlines (https://cehd.gmu.edu/bachelors-accelerated-masters-program).

Accelerated Option Requirements
Students complete the following courses in their senior year:

<table>
<thead>
<tr>

While undergraduate students, accelerated master’s students are able to apply two of the courses listed above to both the bachelor’s and master’s degrees. These courses are considered advanced standing for the MEd. A minimum grade of B must be earned to be eligible to count as advanced standing. The other two courses are taken as reserve graduate credit and do not apply to the undergraduate degree. Early in their final undergraduate semester, students must submit the Bachelor’s/Accelerated Master’s Transition Form to the CEHD Admissions Office and specify which of the four courses are to be designated as advanced standing and reserve graduate credit.

**Physics Minor**

**Banner Code:** PHYS

**Undergraduate Physics Advisor**

203 Planetary Hall
Fairfax Campus

Phone: 703-993-5356
Email: physics.gmu.edu

The Physics Minor will expand your understanding of physics beyond the introductory level and help to deepen your understanding of fundamental principles and further develop your analytical skills. The minor will be an attractive option for students majoring in science, technology, engineering, or mathematics (STEM).

**Admissions & Policies**

**Policies**

Eight credits of coursework must be unique to the minor with a minimum GPA of 2.00. For policies governing all minors, see AP.6.3.4 Minors (p. 90).

**Requirements**

**Minor Requirements**

Total credits: 17

Students should refer to the Admissions & Policies (p. 768) tab for specific policies related to this program.

Email: gadvphys@gmu.edu
Website: physics.gmu.edu

The degree program contains a Standard Concentration for traditional physics programs that focus on Astrophysics, Condensed Matter Theory, Dynamical Systems/Biological Physics, High Energy Physics, Materials Physics, Space Sciences, and an Engineering Physics Concentration that combines the disciplines of physics, mathematics, and engineering. The doctoral students accepted into each concentration of the physics PhD program take a required set of core courses for the given concentration (see Requirements tab).

By working with the dissertation committee, a student in the Standard Concentration may choose to specialize in an emphasis area such as Astrophysics, Atomic Molecular and Optical Physics, Condensed Matter Experiment, Condensed Matter Theory, Dynamical Systems/Biological Physics, High Energy Physics, Materials Physics, Space Sciences, or others according to his or her particular interests. A student in the Engineering Physics Concentration may choose to specialize in Applied Mechanics (Fluids and Solids), or other applied and engineering physics areas. By the end of their first year, all students should pair with a faculty advisor who will guide them toward doctoral candidacy.

Admissions & Policies

Admissions

University-wide admissions policies can be found in the Graduate Admissions Policies (p. 68) section of this catalog.

To apply for this program, please complete the George Mason University Admissions Application (https://www2.gmu.edu/admissions-aid/apply-now).

Those holding a baccalaureate degree in physics, astronomy, or engineering from a regionally accredited institution, who earned a GPA of 3.00 (out of 4.00) or higher in their last 60 credits, and have received acceptable scores on the GRE-GEN are invited to apply for admission. Three letters of recommendation must be submitted, preferably from former professors. The GRE subject test in physics is highly recommended for all interested applicants in the standard concentration who received their baccalaureate degrees within the past five years. The GRE requirement can be waived if the student has received a master's degree from a regionally accredited U.S. institution.

A degree-seeking graduate applicant with a baccalaureate degree who has not met all admission requirements may be offered provisional admission if sufficient evidence is presented to suggest that the applicant has the ability to pursue graduate work. For more details concerning admission requirements to George Mason University please refer to Graduate Admission Policies (p. 68).

Policies

For policies governing all graduate programs, see AP6 Graduate Policies (p. 90).

Reduction of Credits

For students entering the doctoral program with a master's degree in a related field from a regionally accredited institution, the number of required credits may be reduced up to 30 credits, subject to approval of the program faculty and the college's associate dean. See AP6.5.2 Reduction of Credits (p. 91) for more information.

Requirements

Degree Requirements

Total credits: 72

Students should refer to the Admissions & Policies (p. 769) tab for specific policies related to this program.

Students must first choose one concentration, then continue with the additional sections:

Any graduate-level course chosen from PHYS/ASTR courses 3

Total Credits 27

2 PHYS 796 Directed Reading and Research/ASTR 796 Directed Reading and Research may be repeated as needed.

3 General elective courses may be chosen from PHYS/ASTR courses, and/or other related disciplines as approved by the student’s advisor or dissertation committee.

Qualifying Examination

All students must successfully pass the four individual sections required for each concentration of a qualifying examination. For the Standard Concentration, the four topics on the qualifying exam are covered in the four core courses (PHYS 684 Quantum Mechanics I, PHYS 685 Classical Electrodynamics I, PHYS 705 Classical Mechanics, and PHYS 711 Statistical Mechanics). For the Engineering Physics Concentration, the four topics on the qualifying exam are covered in the four core courses (PHYS 690 Engineering Thermodynamics or PHYS 711 Statistical Mechanics, PHYS 620 Continuum Mechanics or PHYS 705 Classical Mechanics, PHYS 510 Computational Physics I and PHYS 613 Computational Physics II) and in one of the specialty science courses (PHYS 694 Applied Mechanics of Solids or PHYS 695 Applied Fluid Mechanics).

All four sections of the qualifying exam will be offered twice a year, typically in the week before the start of the fall and spring semesters. A student can choose to take a particular section or a combination of sections at one sitting. Grades of “pass” or “unsatisfactory” will be given individually for each of the four sections of the exam. If a student receives a grade of “unsatisfactory” in a given section of the exam, he/she is allowed to re-take that section in the next cycle, but a student must satisfactorily pass all sections of the exam by the end of the third year from the date of enrollment in the PhD program. Students entering the program with equivalent courses taken at another institution can satisfy a core course requirement by taking the associated qualifying exam without taking the course.

At the beginning of each academic year, the program director will appoint members to the qualifying examination committee. This committee is responsible for creating, administering, and grading the qualifying exams offered that year. Additional information and previous qualifying exams can be found on the departmental web page.

Dissertation Committee and Program of Study

Upon successful completion of the qualifying examinations, a dissertation committee should be formed by the student as soon as possible. The chair of this committee must be a graduate faculty member from the Department of Physics and Astronomy. The committee must include at least two additional members from the graduate faculty, one of whom must be from outside the Department of Physics and Astronomy. The composition of the committee must be approved by the program director. The dissertation committee is responsible for directing the student in their chosen field of research. The student should work closely with their committee to select specialty courses and electives that form a cohesive program of study. The student’s program of study must be approved by the dean before advancement to candidacy.

Advancement to Candidacy

Before a student may be advanced to doctoral candidacy, he/she needs to complete all required coursework, pass the qualifying examination, have the program of study and dissertation proposal approved by the dean, and be recommended by the dissertation committee. Advancement to doctoral candidacy implies that the student has demonstrated adequate breadth and depth of knowledge in the field of study and is capable of conducting research on the boundaries of knowledge.

Dissertation Research

Note: No more than 24 combined credits from PHYS 998 Doctoral Dissertation Proposal/ASTR 998 Doctoral Dissertation Proposal and PHYS 999 Doctoral Dissertation/ASTR 999 Doctoral Dissertation may be applied toward satisfying the doctoral degree requirements, with no more than 21 credits of PHYS 998 Doctoral Dissertation Proposal/ASTR 998 Doctoral Dissertation Proposal.

</tr>
<tr>
<td>PHYS 999</td>
<td>Doctoral Dissertation</td>
<td>4</td>
</tr>
</tbody>
</table>

Total Credits 24
Doctoral Dissertation
After advancing to doctoral candidacy, the student works with their dissertation committee to develop their preliminary research into a doctoral dissertation. The dissertation research should represent a significant contribution to its scientific field and should be deemed publishable in a refereed scientific journal. The dissertation must be defended in a public forum before the dissertation committee and other interested faculty.

Renewable Energy Interdisciplinary Minor
Banner Code: RNRG
Undergraduate Physics Advisor
203 Planetary Hall
Fairfax Campus

Email: uadvphys@gmu.edu
Website: physics.gmu.edu

This college-wide interdisciplinary minor is designed for students considering a career in the field of renewable energy, or as preparation for graduate work in a wide range of academic disciplines.

Renewable energy, as normally understood, includes a variety of methods of energy generation, such as solar, wind, hydro, tidal, and geothermal, as well as energy storage methods and energy conservation. Jobs related to renewable energy lie in a wide range of areas including engineering, business, marketing, finance, installation, software, legal affairs, and research. Projections suggest that employment opportunities in the renewable energy field will increase dramatically in the near future. The Renewable Energy Interdisciplinary Minor is therefore ideally suited for students with majors in engineering, business, policy, and science.

Admissions & Policies
Policies
Eight credits of coursework must be unique to the minor. For policies governing all minors, see AP.5.3.4 Minors (p. 90).

Requirements
Minor Requirements
Total credits: 17-20

Forensic Science Program

Phone: 703-993-5071
Email: fscience@gmu.edu
Website: forensicscience.gmu.edu

Administration

• Mary Ellen O'Toole, Director

George Mason University is home to one of the premier forensic science programs in the country. Forensic science is the application of scientific principles and techniques to the legal process. It is a blanket term for many fields and disciples, all related to the application of science to the
law. The mission of the Forensic Science Program (FSP) is to provide outstanding scholarship to graduate and undergraduate students, seeking a career in forensic science, with both an in-depth theoretical as well as operational foundation.

As the field of forensic science is growing rapidly and new technology is being developed on a regular basis, our FSP specializes in providing the most current, accepted practices and methodologies in the application of forensic science techniques. The program also provides specialized learning experiences through select internship possibilities and research opportunities.

Our two-pronged theoretical-operational programs, prepare both undergraduate and graduate students with the skills and scientific knowledge to work in entry level and advanced positions. Depending on their degree and areas of interest, students are prepared to work in a wide range of forensic settings: from the laboratory to a homicide scene to the battle field as an intelligence analyst/officer, tasked with using biometrics to identify the next lone wolf or terrorist cell.

The FSP is an interdisciplinary academic program with its own dedicated teaching faculty who all have operational experience in forensic science. The program is administered by the Forensic Science Program Director, and is governed by the Forensic Science Program Committee.

The Bachelor of Science in Forensic Science is a general forensic science degree that covers various fields within forensic science including field and laboratory applications. These topics include areas such as, crime scene investigation, forensic DNA, forensic chemistry, trace evidence, firearms examination, questioned document, fingerprints, arson, and drug analysis.

This degree is intended to provide students with a well-rounded, hands-on forensic science education in order to prepare students for entrance into a graduate-level educational program, and/or entry-level professional careers in public and private forensic laboratories, federal, state, or local government/law enforcement, defense, homeland security and intelligence agencies.

Unique features of this program include innovative curriculum that offers hands-on training with crime scene techniques and crime laboratory methodologies, an outdoor forensic excavation research and training facility, and courses taught by professional and distinguished faculty from various forensic agencies and laboratories.

Admissions & Policies

Admissions

University-wide admissions policies can be found in the Undergraduate Admissions Policies (p. 65) section of this catalog.

To apply for this program, please complete the George Mason University Admissions Application (https://www2.gmu.edu/admissions-aid/apply-now).

Policies

Students must fulfill all Requirements for Bachelor's Degrees (p. 89), including the Mason Core (p. 142).

FRSC 302 Forensic Trace Analysis and FRSC 304 Forensic Chemistry will satisfy the writing intensive requirement.

For policies governing all undergraduate programs, see AP5 Undergraduate Policies (p. 87).

Requirements

Degree Requirements

Total credits: minimum 120

Students should refer to the Admissions & Policies (p. 772) tab for specific policies related to this program.

Students majoring in forensic science must complete their coursework with a minimum GPA of 2.30. No more than three courses with a grade of ‘D’ (1.00) may be applied to the major.

Students are advised to be aware of prerequisites that may be required for each course in the curriculum.

Total Credits: 45-48

### Additional Courses

Select 13 credits from the following: 13

- FRSC 415 Selected Topics in Forensic Science
- BINF 401 Bioinformatics and Computational Biology I
- BINF 402 Bioinformatics and Computational Biology II
- BIOL 305 Biology of Microorganisms
- BIOL 306 Biology of Microorganisms Laboratory
- BIOL 404 Medical Microbiology
- BIOL 405 Microbial Genetics
- BIOL 431 Advanced Human Anatomy and Physiology II
- BIOL 452 Immunology
- BIOL 453 Immunology Laboratory
- BIOL 482 Introduction to Molecular Genetics
- BIOL 484 Cell Signaling and Disease
- CHEM 321 Quantitative Chemical Analysis
- CHEM 331 Physical Chemistry I
- CHEM 332 Physical Chemistry II
- CHEM 336 Physical Chemistry Lab I
- CHEM 337 Physical Chemistry Lab II
- CHEM 422 Instrumental Methods of Chemical Analysis
- CHEM 423 Instrumental Methods of Chemical Analysis Laboratory
- CHEM 427 Aquatic Environmental Chemistry
- CHEM 441 Properties and Bonding of Inorganic Compounds
- CHEM 446 Bioinorganic Chemistry
- CHEM 463 General Biochemistry I
- CHEM 464 General Biochemistry II
- CHEM 465 Biochemistry Lab

Mason Core and Electives

In order to meet a minimum of 120 credits, this degree requires an additional 31-34 credits, which may be applied toward any remaining Mason Core (p. 142) requirements, Requirements for Bachelor's Degrees (p. 87), and elective courses. Students are strongly encouraged to consult with their advisors to ensure that they fulfill all requirements.

### Mason Core

Some Mason Core (p. 142) requirements may already be fulfilled by the major requirements listed above. Students are strongly encouraged to consult their advisors to ensure they fulfill all remaining Mason Core (p. 142) requirements.

### Exploration Requirements

- Arts (p. 144) 3
- Global Understanding (p. 146) 3
- Literature (p. 147) 3
- Natural Science (p. 148) 7
- Social and Behavioral Sciences (p. 150) 3
Western Civilization/World History (p. 151) 3
Integration Requirements
Written Communications (ENGH 302) (p. 142) 3
Writing-Intensive (p. 151) 1 3
Synthesis/Capstone (p. 153) 2 3
Total Credits 40

1 Most programs include the writing-intensive course designated for the major as part of the major requirements; this course is therefore not counted towards the total required for Mason Core.
2 Minimum 3 credits required.

**Accelerated Master's**

**Forensic Science, BS/Forensic Science, Accelerated MS**

**Overview**

Highly qualified Mason undergraduate forensic science majors may apply to the accelerated master's degree with a concentration in either crime scene investigation, forensic biology analysis, forensic chemistry analysis, or forensic/biometric identity analysis. Students who have completed between 75 and 100 credits toward the bachelor's degree are invited to apply. Students are eligible to enter this program and enroll in graduate courses after successfully completing 90 undergraduate credits, inclusive of prerequisites, toward the Forensic (https://catalog.gmu.edu/colleges-schools/science/chemistry-biochemistry/chemistry-bs) Science, BS (https://catalog.gmu.edu/colleges-schools/science/forensic-program/forensic-science-bs) degree. This flexibility makes it possible for students to complete graduate coursework during their final year. If accepted, students will be able to earn the Forensic (https://catalog.gmu.edu/colleges-schools/science/chemistry-biochemistry/chemistry-bs) Science, BS (https://catalog.gmu.edu/colleges-schools/science/forensic-program/forensic-science-bs) and the Forensic Science, MS (https://catalog.gmu.edu/colleges-schools/science/forensic-program/forensic-science-ms) after satisfactory completion of 150 credits.

For more detailed information, see AP6.7 Bachelor’s/Accelerated Master’s Degrees (https://catalog.gmu.edu/policies/academic/graduate-policies/#ap-6-7). For policies governing all graduate degrees, see AP6 Graduate Policies (https://catalog.gmu.edu/policies/academic/graduate-policies).

**Concentration Declaration**

Students must declare their intended concentration upon application. In the event that a student wishes to change their concentration, students may request to change their concentration by submitting a letter to the Forensic Science Program Director detailing the request and providing justification. These requests and possible substitutions/waivers will be considered on a case-by-case basis and only when the appropriate admissions requirements are met.

**Application Requirements**

Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in the Graduate Admissions Policies (https://catalog.gmu.edu/admissions/graduate-policies) section of this catalog.

Application requirements for this accelerated master's program include one letter of recommendation from a Forensic Science Program faculty member or advisor. Additionally, a detailed goal statement is required to include why you are interested in the MS in forensic science degree, career goals and professional aspirations, and proposed area of interest of your final Research Project. The GRE and resume are not required for admission into this program.

Successful applicants will have completed each of the following courses or equivalent with a GPA of 3.00 or higher:

- FRSC 200 Survey of Forensic Science
- FRSC 201 Introduction to Criminalistics
- FRSC 302 Forensic Trace Analysis
- FRSC 303 Forensic Evidence and Ethics
- BIOL 213 Cell Structure and Function (Mason Core) (p. 142)
- CHEM 211 General Chemistry I (Mason Core) (p. 142) and CHEM 213 General Chemistry Laboratory I (Mason Core) (p. 142)
- CHEM 212 General Chemistry II (Mason Core) (p. 142) and CHEM 214 General Chemistry Laboratory II (Mason Core) (p. 142)

While undergraduate students, accelerated master's students complete six credits of graduate courses as indicated on their Accelerated Master's Program Application with a minimum grade of 3.00 in each course. Students must meet with an advisor to approve eligible graduate coursework. Once admitted to the accelerated master's program, students must maintain a minimum cumulative GPA of 3.0 in all coursework. On completion and conferral of the undergraduate degree in the semester indicated in the application, they submit the Bachelor's/Accelerated Master's Transition Form and are admitted to graduate status.

As graduate students, accelerated master's students have an advanced standing. They must meet all master's degree requirements except for the two courses (6 credits) they completed as undergraduates. Students must begin their master's program the semester immediately following conferral of the undergraduate degree.

**Forensic Biology Analysis Concentration Applicants:**

In order to obtain a career as a DNA Analyst, the student should have undergraduate coursework in Statistics, Molecular Biology, Genetics, and Biochemistry.

**Reserve Graduate Credit**

Students may take up to 6 additional graduate credits as reserve graduate credit. These credits do not apply to the undergraduate degree. To apply these credits to the master's degree, students should use the Bachelor's/Accelerated Master's Transition Form.

The ability to take courses, including ones not listed above, for reserve graduate credit is available to all high achieving undergraduates with the permission of the department. Permission is normally granted only to qualified Mason seniors within 15 hours of graduation. See the Graduate Course Enrollment by Undergraduates (https://catalog.gmu.edu/policies/academic/registration-attendance/#text) section of this catalog for more information.

**Premium Tuition**

Students enrolled in this professional MS program are charged at a differential (premium) tuition rate. Therefore, any courses or secondary programs that they may enroll in are subject to the differential tuition rate. The Forensics Graduate Certificate (https://catalog.gmu.edu/colleges-schools/science/forensic-program/forensics-graduate-
Certificate) has the same premium tuition rate, making it the ideal program for concurrent enrollment (if desired).

**Criminal Background Check**
The successful passing of a Virginia Department of Forensic Sciences background check is required prior to gaining access to FRSC 540 Advanced Forensic Chemistry, FRSC 541 Forensic Chemistry Laboratory, FRSC 560 Advanced Forensic DNA Sciences, and FRSC 561 Forensic DNA Laboratory.

**Course Notes**
- FRSC 560 Advanced Forensic DNA Sciences and FRSC 561 Forensic DNA Laboratory
- FRSC 540 Advanced Forensic Chemistry and FRSC 541 Forensic Chemistry Laboratory.

Students shall have completed undergraduate coursework in molecular and/or cell biology, as well as genetics, or students must obtain permission of the instructor prior to taking FRSC 560 Advanced Forensic DNA Sciences and FRSC 561 Forensic DNA Laboratory.

**Forensic Science Minor**

**Banner Code:** FRSC

**Academic Advising**
3400 Exploratory Hall
Fairfax Campus
Phone: 703-993-5071
Email: fscience@gmu.edu
Website: cos.gmu.edu/forensic-science/

This minor addresses the growing national and regional interest in forensic science by introducing students to the technical, scientific, and legal aspects of the field. The minor provides an attractive option for students with majors in the natural sciences, criminology, psychology, or computer science, and the curriculum structure makes it particularly suitable for students with majors in biology and chemistry.

**Admissions & Policies**

**Policies**
At least 8 credits must be applied only to this minor and may not be used to fulfill requirements of the student’s major, concentration, or another minor or undergraduate certificate.

For policies governing all minors, see AP.5.3.4 Minors (p. 90).

**Requirements**

### Minor Requirements

Total credits: 20-21

Students should refer to the Admissions & Policies (p. 775) tab for specific policies related to this program.

Students must complete at least 6 credits in their minor at George Mason University and achieve a minimum GPA of 2.00 in courses applied to the minor.

Please pay attention to the prerequisites for each course in the curriculum below.

# Forensic Science, MS

**Banner Code:** SC-MS-FRSC

## Academic Advising

3400 Exploratory Hall  
Fairfax Campus

Phone: 703-993-5071  
Email: fscience@gmu.edu  
Website: cos.gmu.edu/forensic-science/

The Forensic Science Program offers a master's degree in Forensic Science with four concentrations to best suit the student’s future career goals: Crime Scene Investigation, Forensic Biology Analysis, Forensic Chemistry Analysis, and Forensic/Biometric Identity Analysis. This graduate degree will prepare students for a rewarding career in federal, state and local laboratories, investigative or intelligence agencies, private companies, or allow professionals currently working in the field an opportunity to improve their education and optimize career advancement.

Located in Northern Virginia within the Washington DC Metro area, our students are afforded the opportunity to study in close proximity to a plethora of federal, state and local crime laboratories, investigative and intelligence agencies. These facilities provide unique access to forensic science experts and offer students competitive internships and job opportunities.

Available concentrations include:

- Crime Scene Investigation
- Forensic Biology Analysis
- Forensic Chemistry Analysis
- Forensic/Biometric Identity Analysis

# Admissions & Policies

## Admissions

### Application Requirements

University-wide admissions policies can be found in Graduate Admissions Policies (p. 68).

To apply for this program, please complete the George Mason University Admissions Application (https://www2.gmu.edu/admissions-aid/apply-now).

In addition to fulfilling Mason’s admission requirements for graduate study, applicants must provide:

- Three letters of recommendation from academic references or references in the industry or government who are familiar with the applicant’s academic and/or professional accomplishments.
- Resume
- Detailed goal statement to include why you are interested in coming into Mason’s Forensic Science Master’s program, career goals, and professional aspirations, and proposed area of interest for your final research project.
- Two copies of official transcripts from each institution of higher education attended.
- A Virginia Domicile Classification Form.

TOEFL scores are required of all international applicants who do not hold at least a bachelor’s degree from a regionally-accredited institution within the US (some exceptions apply). The TOEFL score has to at least be a total of 88, with a minimum of 20 in each section.

The GRE is not required for admission into this program. Additional requirements for each specific concentration are listed below.

## Concentration-Specific Requirements

### Forensic Biology Analysis and Forensic Chemistry Analysis Concentrations

A bachelor’s degree in a forensic or natural science.

### Forensic/Biometric Identity Analysis Concentration

A bachelor of science or bachelor of arts degree in a forensic or natural science, computer science, computer electronic or electrical engineering, information systems or information technology (or its equivalent coursework in a relevant field).

### Crime Scene Investigation Concentration

A bachelor of science or bachelor of arts degree in a related field.

## Policies

For policies governing all graduate programs, see AP.6 Graduate Policies (p. 90).

## Premium Tuition

Students enrolled in this professional MS program are charged at a differential (premium) tuition rate. Therefore, any courses or secondary programs that they may enroll in are subject to the differential tuition rate. The Forensics Graduate Certificate (p. 780) has the same premium...
tuition rate, making it the ideal program for concurrent enrollment (if desired).

**Concentration Declaration**

Students must declare their intended concentration upon application. In the event that a student wishes to change their concentration, students may request to change their concentration by submitting a letter to the Forensic Science Program Director detailing the request and providing justification. These requests and possible substitutions/waivers will be considered on a case-by-case basis and only when the appropriate admissions requirements are met.

**Criminal Background Check**

The successful passing of a Virginia Department of Forensic Sciences (http://www.dfs.virginia.gov) background check is required prior to gaining access to FRSC 540 Advanced Forensic Chemistry, FRSC 541 Forensic Chemistry Laboratory, FRSC 560 Advanced Forensic DNA Sciences, and FRSC 561 Forensic DNA Laboratory.

**Course Notes**

**FRSC 560 Advanced Forensic DNA Sciences and FRSC 561 Forensic DNA Laboratory**

Students shall have completed undergraduate coursework in molecular and/or cell biology, as well as genetics, or students must obtain permission of the instructor prior to taking FRSC 560 Advanced Forensic DNA Sciences and FRSC 561 Forensic DNA Laboratory.

**FRSC 540 Advanced Forensic Chemistry and FRSC 541 Forensic Chemistry Laboratory**

Students shall have completed undergraduate coursework in general chemistry including polarity and acid/base chemistry. Students shall also have completed Organic Chemistry and be able to identify functional groups and other chemistry structures that make up a molecule. Exposure to instrumental techniques such as gas chromatography, mass spectrometry and infrared spectroscopy is recommended or permission of instructor.

**Requirements**

**Degree Requirements**

Total credits: 36

Students should refer to the Admissions & Policies (p. 776) tab for specific policies related to this program.

Select one concentration from the following:

**Concentration in Crime Scene Investigation (CSIN)**

This concentration educates students for a career as a crime scene investigator.

Accelerated Master's

Forensic Science, BS/Forensic Science, Accelerated MS Overview

Highly qualified Mason undergraduate forensic science majors may apply to the accelerated master's degree with a concentration in either crime scene investigation, forensic biology analysis, forensic chemistry analysis, or forensic/biometric identity analysis. Students who have completed between 75 and 100 credits toward the bachelor's degree are invited to apply. Students are eligible to enter this program and enroll in graduate courses after successfully completing 90 undergraduate credits, inclusive of prerequisites, toward the Forensic (https://catalog.gmu.edu/colleges-schools/science/chemistry-biochemistry/chemistry-bs) Science, BS (https://catalog.gmu.edu/colleges-schools/science/forensic-program/forensic-science-bs) degree. This flexibility makes it possible for students to complete graduate coursework during their final year. If accepted, students will be able to earn the Forensic (https://catalog.gmu.edu/colleges-schools/science/chemistry-biochemistry/chemistry-bs) Science, BS (https://catalog.gmu.edu/colleges-schools/science/forensic-program/forensic-science-bs) and the Forensic Science, MS (https://catalog.gmu.edu/colleges-schools/science/forensic-program/forensic-science-ms) after satisfactory completion of 150 credits.

For more detailed information, see AP.6.7 Bachelor's/Accelerated Master's Degrees (https://catalog.gmu.edu/policies/academic/graduate-policies/#ap-6-7). For policies governing all graduate degrees, see AP.6 Graduate Policies (https://catalog.gmu.edu/policies/academic/graduate-policies).

Concentration Declaration

Students must declare their intended concentration upon application. In the event that a student wishes to change their concentration, students may request to change their concentration by submitting a letter to the Forensic Science Program Director detailing the request and providing justification. These requests and possible substitutions/waivers will be considered on a case-by-case basis and only when the appropriate admissions requirements are met.

Application Requirements

Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in the Graduate Admissions Policies (https://catalog.gmu.edu/admissions/graduate-policies) section of this catalog.

Application requirements for this accelerated master's program include one letter of recommendation from a Forensic Science Program faculty member or advisor. Additionally, a detailed goal statement is required to include why you are interested in the MS in forensic science degree, career goals and professional aspirations, and proposed area of interest of your final Research Project. The GRE and resume are not required for admission into this program.

Successful applicants will have completed each of the following courses or equivalent with a GPA of 3.00 or higher:

- FRSC 200 Survey of Forensic Science
- FRSC 201 Introduction to Criminalistics
- FRSC 302 Forensic Trace Analysis
- FRSC 303 Forensic Evidence and Ethics
- BIOL 213 Cell Structure and Function (Mason Core) (p. 142)
- CHEM 211 General Chemistry I (Mason Core) (p. 142) and CHEM 213 General Chemistry Laboratory I (Mason Core) (p. 142)
- CHEM 212 General Chemistry II (Mason Core) (p. 142) and CHEM 214 General Chemistry Laboratory II (Mason Core) (p. 142)

While undergraduate students, accelerated master's students complete six credits of graduate courses as indicated on their Accelerated Master's Program Application with a minimum grade of 3.00 in each course. Students must meet with an advisor to approve eligible graduate coursework. Once admitted to the accelerated master's program, students must maintain a minimum cumulative GPA of 3.0 in all coursework. On completion and conferral of the undergraduate degree in the semester indicated in the application, they submit the Bachelor's/Accelerated Master's Transition Form and are admitted to graduate status.

As graduate students, accelerated master's students have an advanced standing. They must meet all master's degree requirements except for the two courses (6 credits) they completed as undergraduates. Students must begin their master's program the semester immediately following conferral of the undergraduate degree.

Forensic Biology Analysis Concentration Applicants:

In order to obtain a career as a DNA Analyst, the student should have undergraduate coursework in Statistics, Molecular Biology, Genetics, and Biochemistry.

Reserve Graduate Credit

Students may take up to 6 additional graduate credits as reserve graduate credit. These credits do not apply to the undergraduate degree. To apply these credits to the master's degree, students should use the Bachelor's/Accelerated Master's Transition Form.

The ability to take courses, including ones not listed above, for reserve graduate credit is available to all high achieving undergraduates with the permission of the department. Permission is normally granted only to qualified Mason seniors within 15 hours of graduation. See the Graduate Course Enrollment by Undergraduates (https://catalog.gmu.edu/policies/academic/registration-attendance/#text) section of this catalog for more information.

Premium Tuition

Students enrolled in this professional MS program are charged at a differential (premium) tuition rate. Therefore, any courses or secondary programs that they may enroll in are subject to the differential tuition rate. The Forensics Graduate Certificate (https://catalog.gmu.edu/colleges-schools/science/forensic-program/forensics-graduate-certificate) has the same premium tuition rate, making it the ideal program for concurrent enrollment (if desired).

Criminal Background Check

The successful passing of a Virginia Department of Forensic Sciences background check is required prior to gaining access to FRSC 540 Advanced Forensic Chemistry, FRSC 541 Forensic Chemistry Laboratory, FRSC 560 Advanced Forensic DNA Sciences, and FRSC 561 Forensic DNA Laboratory.

Course Notes

- FRSC 560 Advanced Forensic DNA Sciences and FRSC 561 Forensic DNA Laboratory

Students shall have completed undergraduate coursework in molecular and/or cell biology, as well as genetics, or students must obtain
permission of the instructor prior to taking FRSC 560 Advanced Forensic DNA Sciences and FRSC 561 Forensic DNA Laboratory.

- FRSC 540 Advanced Forensic Chemistry and FRSC 541 Forensic Chemistry Laboratory.

Students shall have completed undergraduate coursework in general chemistry including polarity and acid/base chemistry. Students shall also have completed Organic Chemistry and be able to identify functional groups and other chemistry structures that make up a molecule. Exposure to instrumental techniques such as gas chromatography, mass spectrometry and infrared spectroscopy is recommended or permission of instructor.

Forensics Graduate Certificate

Website: cos.gmu.edu/forensic-science/

This interdisciplinary graduate certificate program is designed for students seeking training in forensic science, as well as for current professionals employed by the federal government, local law enforcement, and private security corporations. Forensics refers to the application of scientific methodologies to the analysis of crime scenes, the collection of evidence, and the laboratory analysis of that evidence in support of criminal investigations. Related legal aspects are also considered as part of a comprehensive approach to forensics.

At the time of completion, depending on the concentration, students will be able to understand the basic principles of forensics and perform a general crime scene analysis. Available concentrations include: Crime Scene Investigation, Forensic Biometric Identity Analysis, and General Forensic Science; curriculum requirements for each concentration are listed in the Requirements tab.

This certificate may be pursued on a part-time or full-time basis.

This certificate program qualifies for Title IV Federal Financial Aid. For more information about program graduation rates, the median debt of students who completed the program, and other important information, please visit our disclosure information page (https://irr2.gmu.edu/gedt/Forensics/Gedt.html).

Admissions & Policies

Admissions

University-wide admissions policies can be found in the Graduate Admissions Policies (p. 68) section of this catalog.

Applicants to the general forensics concentration should hold a BA or BS degree from a regionally-accredited university with a minimum GPA of 3.00.

To apply, prospective students should submit a completed George Mason University Admissions Application (https://www2.gmu.edu/admissions-aid/apply-now), two copies of official transcripts from all institutions attended, and a current résumé. TOEFL scores are required of all international applicants who do not hold at least a bachelor's degree from a regionally-accredited institution within the US (some exceptions apply).

Pursuing the Forensic Science, MS

Students who wish to continue their studies may apply to the Forensic Science, MS (p. 776). Please see AP.6.9 Requirements for Master’s Degrees (p. 90) and contact an advisor for details.

Policies

For policies governing all graduate programs, see AP.6 Graduate Policies (p. 90).

Premium Tuition

Students enrolled in this professional program are charged at a differential (premium) tuition rate. Therefore, any courses or secondary programs that they may enroll in are subject to the differential tuition rate. The Forensic Science, MS (p. 776) has the same premium tuition rate, making it the ideal program for concurrent enrollment (if desired).

Requirements

Certificate Requirements

Total credits: 18

This certificate may be pursued on a full-or part-time basis.

Students should refer to the Admissions & Policies (p. 780) tab for specific policies related to this program.

Students must complete all core courses and select one concentration.

Interdisciplinary Program in Neuroscience (IPN)

Phone: 703-993-4334
Website: neuroscience.gmu.edu

Administration

- Saleet Jafri, Director
- Nadine Kabbani, Associate Director

The Interdisciplinary Program in Neuroscience (IPN) at George Mason University is grounded in systems biology, biochemistry, bioengineering, and psychology. Research and education within the IPN is coordinated under the efforts of faculty participating from a number of colleges across the university.

The IPN administers the Neuroscience Minor (p. 784), Neuroscience BS (p. 781), and the Neuroscience PhD (p. 785). Participating neuroscience faculty comprise a unique blend of traditional, experimental, and computational scientists with research spanning a spectrum of key topics in neuroscience including: behavior, anatomy, physiology, neuropharmacology, computational modeling, and informatics. Key research initiatives currently underway within the IPN are:

- Plasticity mechanisms underlying neurological development
- Identifying and characterizing protein interactions for the dopamine and nicotinic acetylcholine receptors in the brain
- Biochemical dynamics in disorders of the basal ganglia
- Computational methods for simulation of complex biological systems
- Description and generation of neuronal morphology
- Adaptive control for stabilization of epilepsy
- Role of metals in memory and Alzheimer’s disease

- Biochemical/metabolic simulations at the organism level
- Cellular and sub-cellular models of associative learning
- Experimental and computational models in calcium signaling
- Synaptic plasticity

Faculty

Program Faculty

Professors
Ascoli, Barreto, Blackwell, Cebral, Flinn, Houser, Jafri, Klimov, Lipsky, McCabe, Olds, Sander

Associate Professors
Dumas, Fryxell, Greenwood, Kabbani, Krueger, McDonald, Peixoto, Peterson, Sikdar, So, Thompson

Assistant Professors
Briemlaier, Herin, Joiner, Lewis

Adjunct Faculty
Neckel

Programs

- Neuroscience Minor
- Neuroscience, BS
- Neuroscience, PhD

The INP also co-administers the Neuroethics Concentration in the Interdisciplinary Studies, MAIS (p. 542) and the Neuroscience Concentration in the Biology, MS (p. 794).

Neuroscience, BS

Banner Code: SC-BS-NEUR

Academic Advising

204 Krasnow Institute

Phone: 703-993-4334
Email: neurosci@gmu.edu
Website: neuroscience.gmu.edu

The Bachelor of Science in Neuroscience is an interdisciplinary program emphasizing the relationship between the biology and chemistry of the nervous system and the behavior of an organism. The BS prepares students for graduate-level study in both medical school and doctoral and master’s-level programs in neuroscience and other health-related fields, and work in the neuroscience field.

Admissions & Policies

Admissions

University-wide admissions policies can be found in the Undergraduate Admissions Policies (p. 65) section of this catalog.
To apply for this program, please complete the George Mason University Admissions Application (https://www2.gmu.edu/admissions-aid/apply-now).

**Policies**

Students must fulfill all Requirements for Bachelor’s Degrees (p. 89), including the Mason Core (p. 142).

NEUR 410 Current Topics in Neuroscience or NEUR 411 Seminar in Neuroscience fulfill the writing intensive requirement.

For policies governing all undergraduate programs, see AP5 Undergraduate Policies (p. 87).

**Requirements**

**Degree Requirements**

Total credits: minimum 120

Students should refer to the Admissions & Policies (p. 781) tab for specific policies related to this program.

**Foundation Courses**

**Electives**

Students should consult with an advisor to choose appropriate elective courses, which must be approved by the director of the program. A sample of possible electives is given below. Only courses not already taken in the degree will apply as electives, with the exception of seminar and topics courses; a different topic must be addressed in the second instance of a seminar or topics course. Students may apply no more than 6 credits of courses with a grade of ‘D’ to this requirement.

Students intending to pursue a doctorate in neuroscience or a medical degree are advised to take CHEM 313 Organic Chemistry I and CHEM 315 Organic Chemistry Lab I.

| Total Credits: 24 |

1. Fulfills the writing intensive requirement.

**Mason Core and Elective Credits**

In order to meet a minimum of 120 credits, this degree requires an additional 39-42 credits which may be applied toward any remaining Mason Core (p. 142) requirements (outlined below), Requirements for Bachelor’s Degrees (p. 89), and elective courses. Students are strongly encouraged to consult with their advisors to ensure that they fulfill all requirements.

**Mason Core**

Some Mason Core (p. 142) requirements may already be fulfilled by the major requirements listed above. Students are strongly encouraged to consult their advisors to ensure they fulfill all remaining Mason Core (p. 142) requirements.

1. Most programs include the writing-intensive course designated for the major as part of the major requirements; this course is therefore not counted towards the total required for Mason Core.

2. Minimum 3 credits required.
Honors

Honors in the Major
Highly-qualified students may apply to graduate with honors in the major.

Eligibility
To be eligible for admission, neuroscience majors must have completed at least 60 credits and have a minimum cumulative GPA of 3.25 and a minimum GPA of 3.25 in neuroscience courses.

Honors Requirements
If accepted, students must take a sequence of three courses, which culminates in the successful completion and presentation of an independent honors thesis.

To graduate with honors, students must earn a minimum GPA of 3.50 in their honors courses, maintain a minimum cumulative GPA of 3.25, and complete an honors thesis.

Accelerated Master's

Neuroscience, BS/Biology, MS
Overview
Qualified undergraduates may be admitted into an accelerated master's program and obtain both a Neuroscience, BS (p. 781) and a Biology, MS (https://catalog.gmu.edu/colleges-schools/science/systems-biology/biology-ms) within an accelerated time frame. Students admitted to this program may take graduate courses after completing 90 undergraduate credits, and up to 6 credits of graduate work may be used in partial satisfaction of the requirements for the undergraduate degree. If students earn at least a 3.00 GPA in these classes, they are granted advanced standing in the master's program and must then complete an additional 24 credits to receive the master's degree. All other master's degree requirements must be met, including a minimum of 18 credits taken for the master's after the bachelor's degree is complete.

Application Requirements
Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in the Graduate Admission Policies (https://catalog.gmu.edu/admissions/graduate-policies) section of this catalog. Application information for this accelerated master's program can be found on the School of Systems Biology's website (https://cos.gmu.edu/ssb).

Successful applicants will have an overall undergraduate GPA of at least 3.10. Three letters of recommendation, including one from a prospective thesis or project advisor, are required. Additionally, they will have completed the following courses with a GPA of 3.00 or higher.

Accelerated Option Requirements
At the beginning of the student's final undergraduate semester, students must submit a bachelor's/accelerated master's transition form (available from the Office of the University Registrar (http://registrar.gmu.edu)) to the College of Science's Office of Academic and Student Affairs (https://cos.gmu.edu/about/contact-us). Students must begin their master's program in the semester immediately following conferral of the bachelor's degree.

Students must maintain an overall GPA of 3.00 or higher in graduate coursework and should consult with their faculty advisor to coordinate their academic goals.

After completing 120 credits and all requirements for the bachelor's degree and filing the Graduation Intent Form, students are awarded a bachelor's degree.

Additional Requirements
• Satisfactory performance in undergraduate coursework must be maintained
• Satisfactory graduate-level performance in each approved graduate course taken while in undergraduate status (receiving a grade of B or better (3.0 or higher) in each course).
• Submission of documents to complete the master's application before the published deadline, including a goals statement and a resume. GRE scores are not required.
• Completion of undergraduate degree from George Mason University.
• Confirmation of a graduate faculty advisor.

Neuroscience Minor
Banner Code: NEUR

Academic Advising
204 Krasnow Institute
Fairfax Campus
Phone: 703-993-4334
Email: neurosci@gmu.edu
Website: neuroscience.gmu.edu
Neuroscience is one of the most rapidly growing disciplines in science and society today. Due to its interdisciplinary nature, it draws on skills from anatomy, chemistry, electrical engineering, genetics, math, psychology, economics, and philosophy among others. Students in diverse fields can benefit from neuroscience through this minor.

### Admissions & Policies

#### Policies

Eight credits of coursework must be unique to the minor. For policies governing all minors, see AP.5.3.4 Minors (p. 90).

For policies governing all undergraduate programs, see AP.5 Undergraduate Policies (p. 87).

#### Requirements

**Minor Requirements**

Total credits: 21-22

Students should refer to the Admissions & Policies (p. 785) tab for specific policies related to this program.

Students must complete at least 20 credits of coursework with a minimum GPA of 2.00.

### Biology Courses

### Neuroscience, PhD

**Banner Code:** SC-PHD-NEUR

Nadine Kabbani

Phone: 703-993-4406
Email: nkabbani@gmu.edu

The Neuroscience, PhD program focuses on the study of the brain and addresses the challenge of developing an integrative understanding of cognition and higher brain function. In response to this challenge, the rapidly developing field of neuroscience has produced an exponential increase in the amount of data available to investigators as they develop new theories of brain function and new hypotheses to test. The main objective of the program is to prepare students to participate at the cutting edge of this exciting field in academia, industry, and government. The program provides students with a rich interdisciplinary intellectual environment that fosters the development of the skills they will need to successfully pursue research careers.

Current faculty research focuses on the broad areas of behavior, anatomy, physiology, neuropharmacology, molecular biology, computational modeling, and informatics. External research collaborations exist with federal agencies, private and not-for-profit corporations, and other universities. The scope of research ranges from the subcellular and molecular level (in the context of such phenomena as drug addiction and the biological basis of schizophrenia) to the systems and behavioral level.

Current research projects include plasticity mechanisms supporting development, network formation and information processing, cellular and subcellular models of associative learning, biochemical dynamics in disorders of the basal ganglia, computational methods for simulation of complex biological systems, role of metals in memory and Alzheimer's disease, and dynamical behavior of neurons and networks of neurons, and identifying and characterizing protein interactions for the dopamine and nicotinic acetylcholine receptors in the brain.

### Admissions

University-wide admissions policies can be found in the Graduate Admissions Policies (p. 68) section of this catalog.

To apply for this program, please complete the George Mason University Admissions Application (https://www2.gmu.edu/admissions-aid/apply-now).

Applicants should have a bachelor's degree in a relevant field and undergraduate courses in organic chemistry, cell biology, and calculus. Coursework in biochemistry (e.g. BIOL 483 General Biochemistry), cell biology (e.g. BIOL 484 Cell Signaling and Disease), and molecular genetics (e.g. BIOL 482 Introduction to Molecular Genetics) is highly recommended. Admission requires a minimum GPA of 3.25 in undergraduate work and acceptable GRE scores. In addition, the applicant's goal statement should relate to the research interests of at least one faculty member in the program and include the names of...
two faculty members who may be suitable as advisors or supervisory committee members.

To apply, complete the George Mason University Admissions Application (https://www2.gmu.edu/admissions-aid/apply-now), supply a goal statement, two copies of official transcripts from each college and graduate institution attended, three letters of recommendation from faculty members or individuals who have firsthand knowledge of the applicant's academic or research capabilities, and an official report of scores obtained on the GRE-GEN. The GRE-SUB is optional. TOEFL scores are required of all international applicants.

Policies
For policies governing all graduate programs, see AP.6 Graduate Policies (p. 90).

Reduction of Credits
For students entering the doctoral program with a master's degree in a related field from a regionally accredited institution, the number of required credits may be reduced up to 30 credits, subject to approval of the program faculty and the college's associate dean for student affairs. See AP.6.5.2 Reduction of Credits (p. 91) for more information.

Transfer of Credit
An alternative to the reduction of credit is a transfer of credit. With this option, up to 24 credits of previous, relevant graduate coursework may be transferred into the program, provided those credits have not been applied toward a previous degree.

Requirements
Degree Requirements
Total credits: 72

Students should refer to the Admissions & Policies (p. 785) tab for specific policies related to this program.

Electives

Select 20-21 credits of electives

Total Credits

20-21

Publication
An additional requirement for graduation calls for students to have at least one publication (in print or in press) in a refereed journal.

Doctoral Committee and Proposal
When coursework is nearing completion, the student should form a doctoral committee and start preparing their dissertation proposal. Students in consultation with their advisor identify which faculty are appropriate to be a part of their committee. The dissertation committee administers the qualifying exam and evaluates the dissertation proposal as well as the dissertation itself. At least one of the committee members must be outside of the dissertation advisor's department.

Candidacy Examination and Advancement to Candidacy
The doctoral candidacy examination includes written and oral components. After passing the candidacy exam and receiving committee approval for the dissertation proposal, the student is advanced to doctoral candidacy.

Dissertation Research
Note: No more than 24 combined credits from NEUR 998 Dissertation Proposal and NEUR 999 Doctoral Dissertation may be applied toward satisfying doctoral degree requirements, with no more than 12 credits of NEUR 998 Dissertation Proposal.

Administration

- Iosif Vaisman, Acting Director, BCB PhD Program Director
- Kylene Kehn-Hall, BIOS PhD Program Director
- Don Seto, BCB MS Program Director
- Ancha Baranova, Biology MS Program Director
- Vikas Chandhoke, PSM Program Director
- Andrea Nikoi, Director of HR and Finance

The School of Systems Biology offers undergraduate and graduate degree programs in bioinformatics and computational biology, and graduate degree programs in biology and biosciences. The school also offers research opportunities at the graduate and undergraduate levels. For additional details about current faculty research activities, please visit the school's website.
The School of Systems Biology works closely with and provides faculty and administrative support to the Department of Biology (p. 641), through which the Biology, BA (p. 643) and Biology, BS (p. 648) degrees are offered. An accelerated master’s option is also available.

### Requirements & Policies

#### Policies

Students are governed by the university’s policies (p. 77).

#### Using Laboratories

Only authorized experiments and exercises may be carried out in the school’s research and teaching laboratories and must be done under the supervision of a university faculty or staff member. No unauthorized work is allowed in any laboratory.

#### Using Organisms in Classes

Direct observations of actual organisms are considered an essential part of learning biology at all levels. Direct observations of organisms may involve the use of living or preserved specimens, dissections of organisms or parts of organisms, and microscopic examination of organisms or parts of organisms. All use of live animals conforms to National Institutes of Health guidelines for the use and care of laboratory animals. Activities specified above may be a required part of a course and thus serve as a basis for grading in the course. Any questions about the administration of this policy should be directed to the course coordinator or instructor.

This degree addresses the regional and national need for technically trained managers who will be able to lead teams of bioinformaticians in both the public and private sectors. The degree combines a solid foundation in bioinformatics research, tools, and techniques, with the management skills needed to address the associated legal, ethical, managerial, and business issues. The degree is intended for:

- Students seeking advancement in their current bioinformatics careers that requires an advanced degree in bioinformatics combined with management expertise.
- Students with a general background in biological science or computational methods who are planning to enter the field of bioinformatics as managers and would like to strengthen their bioinformatics and managerial expertise.

Admissions & Policies

Admissions

University-wide admissions policies can be found in the Graduate Admissions Policies (p. 68) section of this catalog.

To apply for this program, please complete the George Mason University Admissions Application (https://www2.gmu.edu/admissions-aid/apply-now).

Eligibility

Applicants should have a bachelor’s degree in biology, computer science, or a related field, with a GPA of at least 3.00 in their last 60 credits of study. Applicants should have taken courses in molecular biology, computer science, calculus, physical chemistry, and statistics. Students with deficiencies in one or more of these areas may be required to take additional courses from the undergraduate curriculum.

Application Requirements

To apply, prospective students should submit the George Mason University Admissions Application (https://www2.gmu.edu/admissions-aid/apply-now), supply two copies of official transcripts from each college and graduate institution attended, a current résumé, and an expanded goals statement. Applicants should also include three letters of recommendation and official scores obtained on the GRE general exam. The GRE requirement will be waived if the student holds a master’s degree from a U.S. institution. TOEFL or IELTS scores are required of all international applicants.

Policies

For policies governing all graduate programs, see AP.6 Graduate Policies (p. 90).

Requirements

Degree Requirements

Total credits: 30

Students should refer to the Admissions & Policies (p. 788) tab for specific policies related to this program.

This Professional Science Master's (https://www.professionalsciencemasters.org) (PSM) degree addresses the growing demand for trained bioinformatics professionals with solid management skills able to assume leadership roles in biotechnology, pharmaceutical and health care sectors. The flexible degree structure allows students to custom design a curriculum that best suits their needs and allows a focus on the biological big data analysis, genomics, or bioinformatics software development and management. Students will receive advanced training in bioinformatics and management through coursework and an external internship. The curriculum was developed with active input from the Program Advisory Board consisting of recognized leaders in the field. Many courses are offered in a distance-learning format, allowing students to participate in class without having to travel to campus.

Admissions & Policies

Admissions
University-wide admissions policies can be found in the Graduate Admissions Policies (p. 68) section of this catalog.

To apply for this program, please complete the George Mason University Admissions Application (https://www2.gmu.edu/admissions-aid/apply-now). 1 When the topic is Research & Development in Biotechnology Companies.

2 The maximum amount of internship credits that can be applied to the degree is 6 credits.

Internship
The internship component is intended to provide students with the opportunity to put into practice all of the skills and knowledge accumulated throughout their studies in this program. Students must arrange an internship with a private company, a governmental agency, a non-governmental organization, or some other entity with an interest in bioinformatics and management. Students must identify a specific person within that outside entity who will be the contact and manager of the internship.

Internship credit is never given for work previously done, or for work that would have been done in any case due to an existing employment relationship.

The internship work must produce one or more products such as: a comprehensive report, a departmental presentation, a research project, or an article. Internship placement and product type must be approved by the student’s faculty advisor.

Further details and procedures for completing the internship can be found with the faculty advisor.

In the field of bioinformatics and computational biology, specialists collect, store, analyze and present complex biological data. Through this work, critical contributions are made to basic biology, disease detection, drug design, modeling biosystems, forensics, agriculture, and environmental sciences through the combination of biological analysis and high-performance computing. This degree addresses the growing national and regional demand for trained computational biologists. It combines a solid foundation in biotechnology with the computational skills required for bioinformatics. The flexibility of the degree structure permits students to custom design their curriculum under an advisor's guidance, making the program especially relevant for students employed in today's diverse biotechnology workplace. Students completing the program are qualified to pursue careers that require knowledge of current bioinformatics methods and applications, and the ability to develop and/or use new bioinformatics software.

Courses are generally offered in the late afternoon or early evening to accommodate students with full-time employment outside the university. Students employed at area biotechnology organizations may take up to 6 credits (out of 31) for bioinformatics work done on the job, under the guidance of a faculty member. This work-related project may be applied as either a 3-credit research project or a 6-credit master's thesis.

All courses are also offered online, allowing students to participate in class without having to travel to campus. Further information can be found on with Mason Online (http://masononline.gmu.edu).

### Admissions & Policies

#### Admissions

University-wide admissions policies can be found in the Graduate Admissions Policies (p. 68) section of this catalog.

To apply for this program, please complete the George Mason University Admissions Application (https://www2.gmu.edu/admissions-aid/apply-now).

#### Eligibility

Applicants should have a bachelor's degree in biology, computer science, or a related field, with a GPA of at least 3.00 in their last 60 credits of study. Applicants should have taken courses in biology, computer science, calculus, physical chemistry, and statistics. Students with deficiencies in one or more of these areas may be required to take additional courses from the undergraduate curriculum.

#### Application Requirements

To apply, prospective students should complete a George Mason University Admissions Application (https://www2.gmu.edu/admissions-aid/apply-now), supply two copies of official transcripts from each college and graduate institution attended, a current résumé, and an expanded goals statement. Applicants should also include three letters of recommendation and official scores obtained on the GRE general exam. The GRE requirement will be waived if the student holds a master's degree from a regionally accredited U.S. institution. TOEFL scores are required for all international applicants.

### Policies

For policies governing all graduate programs, see AP.6 Graduate Policies (p. 90).

#### Requirements

### Degree Requirements

**Total credits: 31**

Students should refer to the Admissions & Policies (p. 791) tab for specific policies related to this program.

Website: ssb.gmu.edu

This graduate certificate addresses the growing national and regional demand for trained computational biologists by combining a solid foundation in biotechnology with computational skills relevant to bioinformatics. With online and in-classroom courses, the flexibility of this certificate's structure permits students to custom design their curriculum under an advisor's guidance, making the graduate certificate especially relevant for students employed in today's diverse Northern Virginia high-technology workplace. Ideal candidates for this certificate are those who have a background in biological and computer sciences, and are currently working in or planning to enter the fields of biotechnology or bioinformatics. The certificate is also highly relevant for students who are interested in advancing their career goals but may not have adequate time available to undertake a graduate degree program. All courses are also offered online, allowing students to participate in class without having to travel to campus. Further information can be found with Mason Online (http://masononline.gmu.edu).

The certificate may be pursued on a part-time or full-time basis.

Admissions & Policies

Admissions

University-wide admissions policies can be found in the Graduate Admissions Policies (p. 68) section of this catalog.

To apply for this program, please complete the George Mason University Admissions Application (https://www2.gmu.edu/admissions-aid/apply-now).

Applicants should hold a BA or BS degree in a discipline related to biological or computer science from a regionally accredited university, with a minimum GPA of 3.00. Applicants should have taken courses in molecular biology, computer science, calculus, physical chemistry, or statistics, and should also possess working knowledge of a computer programming language. To apply, prospective students should complete a George Mason University Admissions Application (https://www2.gmu.edu/admissions-aid/apply-now), supply two copies of official transcripts from each college and graduate institution attended, and a current résumé. TOEFL scores are required of all international applicants.

Policies

For policies governing all graduate programs, see AP6 Graduate Policies (p. 90).

Premium Tuition

The certificate is a professional certification program that charges students at a differential (premium) tuition rate, with an additional $100 per credit added to the standard George Mason University graduate tuition rate for students who enroll in this certificate program, regardless of in-state or out-of-state status. The differential tuition is used to fund continuing improvements in the College of Science's (COS) educational facilities used to support the certificate program.

Students may not pursue this certificate concurrently with any other graduate degree program or certificate program offered by COS. In addition, students may not apply previous credit hours from another certificate, degree, or non-degree studies to this certificate program because of the differential (premium) tuition rate.

Requirements

Certificate Requirements

Total credits: 15

This certificate may be pursued on a full- or part-time basis.

Students should refer to the Admissions & Policies (p. 792) tab for specific policies related to this program.

Science and Technology Campus

Phone: 703-993-8400
Email: binf@gmu.edu
Website: ssb.gmu.edu

In the field of bioinformatics and computational biology, specialists collect, store, analyze, and present complex biological data. Through this work, critical contributions are made to disease detection, drug design, forensics, agriculture, and environmental sciences through the combination of biological analysis and high-performance computing. The main objective of this doctorate is to educate the next generation of computational biologists for careers in academia, industry, and government. The program provides students with interdisciplinary academic training that includes fundamental bioscience courses as well as core and advanced courses in bioinformatics. Courses are designed to be completed in approximately two years. Completion of coursework, the comprehensive exam, and a successful dissertation proposal results in advancement to candidacy status. In the final phase, students focus on research that culminates in a dissertation.

The program is structured to be accessible for full and part-time students. Many of the courses are offered in a distance-learning format, allowing students to participate in class without having to travel to campus; visit Mason Online (http://masononline.gmu.edu) for details.

Admissions & Policies

Admissions

University-wide admissions policies can be found in the Graduate Admissions Policies (p. 68) section of this catalog.

To apply for this program, please complete the George Mason University Admissions Application (https://www2.gmu.edu/admissions-aid/apply-now).

Eligibility

Applicants should have a bachelor's degree in biology, computer science, or a related field, with a minimum GPA of 3.25 in the last earned degree. Applicants should have taken courses in molecular biology, cell biology, biochemistry, genetics, calculus, physical chemistry, computer programming and data structures, and probability and statistics. Students with deficiencies in one or more of these areas may be admitted provisionally and required to take additional courses, some of which may not be applicable to the degree's course total. Students whose undergraduate record does not include basic biochemistry will be required to take a basic course prior to BINF 701 Systems Biology.

Application Requirements

To apply, prospective students should submit the George Mason University Admissions Application (https://www2.gmu.edu/admissions-aid/apply-now), two copies of official transcripts from each college and graduate institution attended, a current résumé, and an expanded goals statement. Applicants should also include three letters of recommendation and an official report of scores obtained on the GRE general exam. Scores should be in the 45th percentile or above. The GRE requirement for admission to the doctoral program will be waived if the student holds a master's degree from a regionally accredited U.S. institution. TOEFL or IELTS scores are required of all international applicants.

Policies

For policies governing all graduate programs, see AP.6 Graduate Policies (p. 90).

Reduction of Credits

For students entering the doctoral program with a master's degree in a related field from a regionally accredited institution, the number of required credits may be reduced up to 30 credits, subject to approval of the program director and the college's associate dean for student affairs. See AP.6.5.2 Reduction of Credits (p. 91) for more information.

Requirements

Degree Requirements

Total Credits 48-60

Doctoral Committee and Advancement to Candidacy

By the end of the semester when coursework is completed, the student must form a doctoral committee made up of a minimum of three graduate faculty members and take a written comprehensive exam. The exam includes written and oral components. Upon passing the comprehensive exam and submitting an acceptable dissertation proposal, the student is advanced to doctoral candidacy to begin the dissertation writing phase.

Dissertation Research

A minimum of 12 and maximum of 24 combined credits from BINF 998 Doctoral Dissertation Proposal and BINF 999 Doctoral Dissertation may be applied toward satisfying doctoral degree requirements. Students must take at least 3 credits of BINF 999 Doctoral Dissertation.
**Doctoral Dissertation**

After advancing to doctoral candidacy, students work on their doctoral dissertation while enrolled in BINF 999 Doctoral Dissertation. The dissertation should represent a significant contribution that is suitable for publication in a refereed scientific journal. The dissertation must be defended in a public forum before the dissertation committee and other interested faculty.
