The Department of Electrical and Computer Engineering, in conjunction with the Department of Systems Engineering and Operations Research, offers the certificate in small satellite engineering. This graduate certificate provides a broad understanding of small satellite mission and operations and of technologies for spacecraft design and engineering, satellite bus, hardware and software systems, and communications. A two-semester hands-on project course is included to exercise a transition of theory into engineering practice in satellite and ground station engineering. Coursework for the graduate certificate can be used for credit toward the MS in Electrical or Computer Engineering. However, the certificate’s primary purpose is to provide a well-defined body of information for students who want to advance or update their knowledge in small satellite technologies, but who do not necessarily wish to complete requirements for the MS degree. The certificate may be pursued concurrently with any of the graduate degree programs in the Volgenau School of Engineering.

Admissions & Policies

Admissions
The graduate certificate is open to all students who hold BS degrees in scientific and engineering disciplines from accredited universities and can hold graduate status (either degree or non-degree) in the Volgenau School.

Policies
The certificate is awarded on completion of four required graduate courses (12 credits) in space systems. A cumulative GPA of 3.00 is required, and at most one course with a grade of C may be applied toward the certificate.

For policies governing all graduate certificates, see AP.6.8 Requirements for Graduate Certificates.

Requirements

Certificate Requirements
Total credits: 12

This certificate may be pursued on a part-time basis only.

Systems Engineering Graduate Certificate (ECE)

Banner Code: VS-CERG-SYST

Architecture-Based Systems Integration
2100 Nguyen Engineering Building
Fairfax Campus
Phone: 703-993-1670
Email: seor@gmu.edu
Concentration in Financial Systems (FNSY)
The certificate with this concentration will be open to all students who hold a BS degree in scientific and engineering disciplines from an accredited university program, with a minimum GPA of 3.0. Students who are already enrolled in a master’s program must submit a secondary certificate form to enroll in this certificate with concentration program; all others must apply for graduate admission to this certificate with concentration program.

Concentration in Tactical Computer Operations (TCO)
Students applying to the certificate with this concentration must hold a bachelor’s degree in either computer science or computer engineering. Prospective students without these specific degrees will need to have a technical bachelor’s degree and show academic competence in the areas of: C (C++, C#, Objective C), Assembler, discrete mathematics, and computer networking. An undergraduate grade point average (GPA) of 3.0 or better (4.0 scale) is required.

Policies
The Systems Engineering Graduate Certificate may be pursued on a part-time basis only.

For policies governing all graduate certificates, see AP.6.8 Requirements for Graduate Certificates.

Requirements

Certificate Requirements
Total credits: 12-15
This certificate may be pursued on a part-time basis only.

Concentration in Architecture-Based Systems Integration (ABSI)
A bachelor’s degree is required for admission to a certificate program.

Concentration in C4I & Cyber (C4IC)
The certificate with this concentration is available to students who hold bachelor’s degrees in engineering and scientific disciplines or are in graduate status in such programs.

Concentration in Communications and Networking (CONE)
The certificate with this concentration in communications and networking is open to all students who hold BS degrees in scientific and engineering disciplines from accredited universities.

Concentration in Engineering Resilient Enterprise Systems (ERES)
The certificate with this concentration is available to any student who holds a bachelor’s degree in an engineering or scientific discipline or has graduate status in such a program. Math requirements include MATH 113 Analytic Geometry and Calculus I (Mason Core), MATH 114 Analytic Geometry and Calculus II, or their equivalents, and a probability and statistics course.
Select one approved elective from the ABSI concentration  3

Total Credits  18

1 Students who have work experience in systems engineering should consult with their advisor on replacing SYST 505 Systems Engineering Principles with a higher-level SYST course.

Concentration in C4I & Cyber (C4IC)
Administered by the Department of Systems Engineering and Operations Research (https://seor.gmu.edu/)

The certificate with concentration requires 12 credits (4 courses). Students must complete the following with an average grade of B or better:

**Coursework**

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>SYST 680</td>
<td>Principles of Command, Control, Communications, Computing, and Intelligence (C4I)</td>

</tr>
</tbody>
</table>

Total Credits  6

Concentration in Communications and Networking (CONE)
Administered by the Department of Electrical and Computer Engineering (https://ece.gmu.edu/welcome-gmu-ece-department/).

The certificate with a concentration in Communications and Networking is awarded on completion of five graduate courses (15 credits) in communications and networking. A cumulative GPA of 3.00 is required and one course with a grade of C at most may be applied toward the certificate. The certificate courses comprise two required foundation courses and three electives.

**Coursework**

<table>
<thead>
<tr>

Telecommunications Forensics and Security Graduate Certificate
Banner Code: VS-CERG-TFAS
3100 Nguyen Engineering Building
Fairfax Campus
Phone: 703-993-3810
Email: tcom@gmu.edu
Website: volgenau.gmu.edu/program/view/20548

Telecommunications Forensics and Security certificate program offers courses on analyzing digital evidence, intrusion forensics and network analysis. This graduate certificate program is designed for those who are working in or planning to work in digital forensics and cyber analysis but do not want to complete requirements for a master’s degree in the field. The certificate may be pursued on a part-time or full-time basis. The certificate may also be pursued concurrently with any of the graduate degree programs in the Volgenau School.
Admissions & Policies

Policies
For all policies governing Graduate Certificates, please see AP.6.8 Requirements for Graduate Certificates.

Telecommunications, MS

Banner Code: VS-MS-TCOM

Academic Advising
MSN 2B5
4400 University Drive
Fairfax, VA 22030
Phone: 703-993-3810
Email: tcom@gmu.edu

Website: telecom.gmu.edu

The Master of Science in Telecommunications offers a blend of cutting-edge practice-oriented courses in cloud computing, network engineering, wireless communications and network security. This industry-oriented program is designed for students who wish to enter the field of telecommunications or are working in the field and want to advance their knowledge of telecommunications. The program concentrates on practical applications of telecommunications, rather than on a theoretical approach, while providing a thorough education in the necessary engineering principles. Hands-on laboratory courses provide students with practical skills and knowledge needed to hit the ground running after graduation. This program also offers two certificate programs that may be incorporated into, and taken concurrently with, the MS in Telecommunications.

Admissions & Policies

Admissions

Requirements
Specific application deadlines and requirements (https://admissions.gmu.edu/grad/application-deadlines-and-requirements/?academicUnit=VS&amp;ga=1.107632321.273102085.1480697294/) are available through the Office of Graduate Admissions.

The program is open to students who hold a BS or BA degree from an accredited college or university in engineering, math, science, computer science, business (with a quantitative background), economics, or other analytical disciplines, and students who have equivalent work experience indicating analytical aptitude. Depending on their background, some applicants may be required to complete 3 to 6 credits of preliminary coursework before they are allowed to enroll in any of the core courses or elective courses in the program. A minimum undergraduate GPA of 3.00 is usually required.

Students may be admitted to the MS program as degree seeking students, or they may be admitted for non-degree study within the program, which allows them to take individual courses. Students in the non-degree program may apply to the degree program, provided their GPA within the MS in Telecommunications Program is 3.00 or above. Up to 12 credits earned in non-degree study may be transferred into the degree program, provided each of the courses to be transferred in was passed with a grade of B or above.

Policies

GPA Requirements
A maximum of 6 credits of courses with grades of C or B- may be applied toward the degree. The student must present a GPA of at least 3.00 for all courses submitted for the degree.

Plan of Study
Before completing 9 credit hours of coursework, each student must submit to the TCOM office a plan of study that has been approved by the academic advisor. This plan should be kept up to date by regular consultation with the academic advisor. A final, signed version of the plan must be turned in when the student submits a graduation application.
Telecommunications Certificates
Two 15-credit Telecommunications certificates are offered by the department. Students may pursue these certificates as stand-alone programs through the normal admissions process or as a secondary certificate to their MS degree. Certificate courses are drawn directly from the MS in TCOM curriculum. If a student has successfully completed and conferred one of these certificates prior to acceptance to the MS, it is possible to transfer up to 12 credits (B or better) into the MS. Please note that no more than 12 credits of coursework can be brought in to the MS.

- Advanced Networking Protocols for Telecommunications Graduate Certificate
- Telecommunications Forensics and Security Graduate Certificate

Requirements

Degree Requirements
Total credits: 30

Students must complete a minimum of 30 graduate credits beyond the bachelor's degree. The plan of study includes a 21-credit required core component and a 9-credit elective component. Electives should be chosen either from the list of elective courses or from one of the two concentration options.

Accelerated Master's

Electrical Engineering, BS/Telecommunications, Accelerated MS

Overview

Highly-qualified students in the Electrical Engineering, BS have the option of obtaining an accelerated Telecommunications, MS.

For more detailed information, see AP.6.7 Bachelor's/Accelerated Master's Degrees. For policies governing all graduate degrees, see AP6 Graduate Policies.
Admission Requirements

Students can apply for the program during the semester in which they expect to complete 75 undergraduate credits applicable toward the BS degree. An overall GPA of at least 3.00 at the time of application is required. Criteria for admission are identical to criteria for admission to the MS in Telecommunications Program. Application is made using the accelerated graduate program application forms, and all usual requirements must be met. The accelerated program application form specifies the overlapping courses and details the 3.00 undergraduate GPA.

Accelerated Option Requirements

Students must complete 145 credits that satisfy all the requirements for the BS and MS degrees, with 6 credits overlap. Students take 6 credits of 500-level courses as part of their technical electives or substitutes for required courses as part of their 121-credit undergraduate program. Students may take additional graduate-level courses as part of their BS technical electives with advisor approval. These additional graduate-level courses will not count toward the MS degree.

Degree Conferral

Students must apply to have the BS conferred the semester before they expect to complete the BS requirements. At the completion of the MS requirements, the MS degree will be awarded.

Individualized Study, BIS/Telecommunications, Accelerated MS Overview

Highly-qualified students in the Individualized Study, BIS have the option of obtaining an accelerated Telecommunications, MS.

For more detailed information, see AP6.7 Bachelor's/Accelerated Master's Degrees. For policies governing all graduate degrees, see AP6 Graduate Policies.

Admission Requirements

Students in the Individualized Study, BIS program may apply for this option if they have earned 90 undergraduate credits (including 15 Mason resident credits) with an overall GPA of at least 3.25. Criteria for admission are identical to criteria for admission to the Telecommunications, MS program.

Accelerated Option Requirements

Students must complete all requirements for the BIS and MS programs, with 6 credits overlap.

Students select TCOM courses from the list below to meet the requirements of the accelerated program. Six credits of TCOM courses will be applied to meet the requirements of both the BIS and MS TCOM programs. An additional three credits of TCOM courses is required for the BIS Individualized Concentration (IND) with emphasis on telecommunication. Note that accelerated students can only take the courses in the list below if they passed the listed prerequisite course with a B or higher.

BIS Concentration

Total credits: 34-46

Students who are pursuing the Individualized Study, BIS, Individualized concentration (IND) with an emphasis on telecommunications must take:

<table>

Note:

Accelerated students who have passed IT 341 Data Communications and Network Principles with a grade of B or higher will not be required to take TCOM 530 in the Telecommunications, MS core. Other TCOM courses may be approved on a case-by-case basis.

See each course for individual prerequisite requirements.

Degree Conferral

Students must apply the semester before they expect to complete the BS requirements to have the BS degree conferred. In addition, at the beginning of the student's final undergraduate semester, students must complete a Bachelor's/Accelerated Master's Transition form that is submitted to the Office of the University Registrar and the VSE Graduate Admissions Office. At the completion of MS requirements, a master's degree is conferred.
Information Technology, BS/Telecommunications, Accelerated MS

Overview
Highly-qualified students in the Information Technology, BS have the option of obtaining an accelerated Telecommunications, MS.

For more detailed information, see AP6.7 Bachelor’s/Accelerated Master’s Degrees. For policies governing all graduate degrees, see AP6 Graduate Policies.

Admission Requirements
Students in the Information Technology, BS program may apply for this option if they have earned 75 undergraduate credits with an overall GPA of at least 3.00. Criteria for admission are identical to criteria for admission to the Telecommunications, MS program.

Accelerated Option Requirements
Students must complete all credits that satisfy requirements for the BS and MS programs.

Total Credits 6

Note:
Students in the accelerated option who have passed IT 341 Data Communications and Network Principles with a grade of B or higher will not be required to take TCOM 535 The TCP/IP Suite of Internet Protocols, which is listed in the MS TCOM core. Alternative sections of TCOM courses to satisfy requirements in the AIT undergraduate program may be made with the approval of the undergraduate academic advisor.

Degree Conferral
Students must apply the semester before they expect to complete the BS requirements to have the BS degree conferred. In addition, at the beginning of the student’s final undergraduate semester, students must complete a Bachelor’s/Accelerated Master’s Transition form that is submitted to the Office of the University Registrar and the VSE Graduate Admissions Office. At the completion of MS requirements, a master’s degree is conferred.

Systems Engineering, BS/Telecommunications, Accelerated MS

Overview
Highly-qualified students in the Systems Engineering, BS have the option of obtaining an accelerated Telecommunications, MS.

For more detailed information, see AP6.7 Bachelor’s/Accelerated Master’s Degrees. For policies governing all graduate degrees, see AP6 Graduate Policies.

Admission Requirements
Students in the Systems Engineering, BS program who preferably have chosen to take the systems engineering of telecommunications elective sequence may apply to this option if they have earned 75 undergraduate credits with an overall GPA of at least 3.00 and completed all MATH and PHYS requirements. Other students will be considered on their individual merit. Criteria for admission are identical to criteria for admission to the Telecommunications, MS program.

Accelerated Option Requirements
Students must complete all credits that satisfy requirements for the BS and MS programs, with 6 credits overlap selected from the following courses:

In addition, at the beginning of the student’s final undergraduate semester, students must complete a Bachelor’s/Accelerated Master’s Transition form that is submitted to the Office of the University Registrar and the VSE Graduate Admissions Office. At the completion of MS requirements, a master’s degree is conferred.

Department of Information Sciences and Technology
Phone: 703-993-3565
Website: ist.gmu.edu

Information Sciences and Technology offers undergraduate and graduate programs to develop expertise in applying information technology to support business applications. The programs emphasize problem-solving, communication, technical, and leadership skills.

Undergraduate
The BS in Information Technology program aims to meet the existing and emerging needs of industry by educating students in current principles and practices in the application of information technology (IT). The program focuses on equipping graduates with effective skills for interacting at the management level as well as the technical level. Graduates are hired in positions that focus on the application of IT in an increasing number of emerging sub-disciplines, including network administration and telecommunications, information security, web development and multimedia, database technology and programming, and health information technology.

Graduate
The MS in Applied Information Technology is the very best graduate education in IT for high-potential leaders, especially those working on IT
solutions that affect the federal government, industry or non-profit. Its objective is to graduate individuals of competence and character who can lead multidisciplinary teams in the design, justification, development, management, and sustainment of mega-systems from data to decision in the private and federal sectors. The MS in AIT provides a high quality curricula for students seeking to pursue their careers in the leading IT areas including Cyber Security, Big Data Analytics, Knowledge Mining, Data Analytics in Social Media, and Cyber-Human Interaction.

At the doctoral level, the department offers a concentration in the Volgenau School’s PhD in IT program.

Faculty

Professors
Bruno, Caraballo, Gantz (Retired Emeritus), Johri, Islam (Associate Chair for Undergraduate Studies)

Associate Professors
Albanese, Boicu, Ceesay, Foxwell, Rafatirad, Rezazad, Rytkova (Associate Chair for Graduate Studies), Sanghera, Sun, Uzuner, Wang

Assistant Professors
Ahmadi, Hashmi, Hashemi, Marasco, Morikawa, Motti, Purohit, Shuman, Zhao

Instructors
Farrell, Garrison, Lyons

Adjunct Professors

Admissions & Policies

Admissions
A bachelor’s degree is required for admission to the certificate.

Policies

The MS in Applied Information Technology (AIT) is the very best graduate education in IT for high-potential leaders, especially those working on IT solutions that affect the federal government, industry or non-profit. Its objective is to graduate individuals of competence and character who can lead multidisciplinary teams in the design, justification, development, management, and sustainment of mega-systems from data to decision in the private and federal sectors. The MS in AIT provides a high quality curricula for students seeking to pursue their careers in the leading IT areas including Cyber Security, Big Data Analytics, Knowledge Mining, Data Analytics in Social Media, and Cyber-Human Interaction. Faculty include professors from the Volgenau School, the School of Business, and the College of Humanities and Social Sciences, plus industry leaders with unique reputations in the subject area as adjunct professors and guest lecturers. The faculty expose students to the pragmatic issues of IT, not just the theory.

Admissions & Policies

Admissions

Applicants must have completed a baccalaureate degree from an accredited program with a reputation for high academic standards and an earned GPA of 3.00 or better in their 60 highest-level credits. They must be experienced in the fundamentals of IT and quantitative methods. In addition, applicants must:

- Provide two letters of recommendation, preferably from academic references or references in industry or government who are familiar with the applicant’s professional accomplishments.
- Provide a resume and detailed statement of career goals and professional aspirations.
- Have achieved a satisfactory score on the TOEFL examination for non-native English speakers.

A high-achieving Mason Engineering alum who has shown exemplary work in an undergraduate degree, may consider our Fast-Track graduate admission process which requires fewer supplementary admission materials.

Requirements

Degree Requirements

Total credits: 30

Completion of the MS program requires a minimum of 30 approved graduate credits (10 courses). To provide a common background in the fundamentals of information sciences and technology, all students are required to complete four core courses. In addition to the core courses, students must choose a concentration within the program by taking six courses from one of the concentration areas listed below.

Students in all concentrations may take other VSE graduate-level courses not listed below as part of their MS technical electives subject to prior advisor approval.

Accelerated Master's

Individualized Study, BIS/Applied Information Technology, Accelerated MS

Overview
Highly-qualified students in the Individualized Study, BIS have the option of obtaining an accelerated Applied Information Technology, MS.

For more detailed information, see AP.6.7 Bachelor's/Accelerated Master's Degrees. For policies governing all graduate degrees, see AP.6 Graduate Policies.

Application Requirements
Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in Graduate Admissions. Mason undergraduate students in the BIS Program can apply in the semester in which they will have completed 90 or more credits (including 15 Mason resident credits) applicable toward the BIS. Students must have an overall GPA of at least 3.30 to apply to the program.

Reserve Graduate Credit
Students may take up to 6 additional graduate credits as reserve graduate credit. These credits do not apply to the undergraduate degree. The ability to take courses for reserve graduate credit is available to all high achieving undergraduates with the permission of the department. Permission to take a graduate course for reserve graduate credit is normally granted only to Mason seniors within 15 hours of graduation.
To apply these credits to the master's degree, students must request that the credits be moved from the undergraduate degree to the graduate degree using the Bachelor's/Accelerated Master's Transition Form (http://registrar.gmu.edu/forms/).

Accelerated Option Requirements

Students in the accelerated master's option must maintain a minimum 3.30 GPA in the undergraduate segment until they have satisfied all requirements for the BIS degree. On completion and conferral of the undergraduate degree they submit the Bachelor's/Accelerated Master's Transition Form (http://registrar.gmu.edu/forms/) and are admitted to graduate status.

As graduate students, accelerated master's students have an advanced standing. Students must complete all credits that satisfy requirements of the BS program and those of the MSAIT program, with two courses overlapping from the courses necessary to earn the BIS with a concentration IND (individualized), applied information technology emphasis as listed below.

Information Technology, BS/Applied Information Technology, Accelerated MS Overview

Highly-qualified students in the Information Technology, BS have the option of obtaining an accelerated Applied Information Technology, MS.

For more detailed information, see AP 6.7 Bachelor's/Accelerated Master's Degrees. For policies governing all graduate degrees, see AP 6 Graduate Policies.

Admission Requirements

Students in the Information Technology, BS program may apply to this option if they have earned 90 undergraduate credits with an overall GPA of at least 3.30. Criteria for admission are identical to criteria for admission to the Applied Information Technology, MS program.

Accelerated Option Requirements

Students must complete all credits that satisfy requirements for the BS and MS programs, with 6 credits overlap.

Students register for 6 credits of AIT 500-level core courses in place of the corresponding IT 300-level courses required for the undergraduate degree requirements.

Students must register for two of the following courses in place of the corresponding 300-level courses:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>AIT 512</td>
<td>Algorithms and Data Structures Essentials (satisfies the IT 306 requirement in the BS program)</td>
<td>3</td>
</tr>
<tr>
<td>AIT 524</td>
<td>Database Management Systems (satisfies the IT 314 requirement in the BS program)</td>
<td>3</td>
</tr>
</tbody>
</table>

Students may take additional graduate-level courses as part of their BS technical electives with advisor approval. These additional graduate-level courses will not count toward the MS degree. See AP 1.4.4 Graduate Course Enrollment by Undergraduates.

Degree Conferral

Students must apply the semester before they expect to complete the BS requirements to have the BS degree conferred. In addition, at the beginning of the student's final undergraduate semester, students must complete a Bachelor's/Accelerated Master's Transition form that is submitted to the Office of the University Registrar and the VSE Graduate Admissions Office. At the completion of MS requirements, a master's degree is conferred.

Digital Media and Web Design Minor (VSE)

Website: ist.gmu.edu

The Information Sciences Graduate Certificate with a concentration in Intelligence Technologies offers courses in four key elements of intelligence analysis. Designed for professionals who work for, or in support of, intelligence community agencies, it provides additional academic preparation for post-bachelor's students who may not wish to complete a full master's program, as well as for master's graduates who wish to take the area-specific courses a concentration provides.

Admissions & Policies

Admissions

A bachelor's degree is required for admission to a certificate program.

Policies

For policies governing all graduate certificates, see AP.6.8 Requirements for Graduate Certificates.

Requirements

Total credits: 12

This certificate may be pursued on a full- or part-time basis.

Concentration in Intelligence Technologies (NTLT)

Administered by the Department of Information Sciences and Technology (http://ist.gmu.edu/programs/graduate-programs/).

The minor is designed primarily for students who desire to augment the knowledge gained through their major-related courses with a foundation of information technology (IT) topics and their application within organizations to achieve organizational objectives. Completing this minor provides students with the necessary skills to improve their attractiveness to employers in our technology-driven society. The
Information Technology Minor

The Information Technology Minor requires a minimum of 18 credits, including 12 credits of core courses. Beyond these requirements, students must select two additional technical focus courses (6 credits) of which one course must be at the upper 300- or 400-level. Minimum 2.5 GPA is needed in completed 100- and 200-level IT core and foundation courses, and a minimum C in IT 106 or IT 109 is required in order to declare the IT minor. Minimum "C" grade in all IT courses is required to earn the IT minor. Students pursuing the IT minor should consult with an advisor to select their additional courses.

Admissions & Policies

Admissions

Declaration of Minor

In order to declare the IT Minor, students must earn a minimum 2.5 GPA in completed 100- and 200-level IT core courses required for the minor (from IT 102 or MATH 125, IT 104, IT 105, IT 106 or IT 109, and any technical focus courses being applied to the IT minor), and a minimum C in IT 106 Introduction to IT Problem Solving Using Computer Programming or IT 109 Introduction to Computer Programming. Grades in approved course substitutions taken at Mason will be included.

Note: IT courses at the 300 and 400 level are restricted to students who have declared an Information Technology major, minor, or undergraduate certificate, and to students in the BAS or BIS program. IT 293 Applied IT: Junior Transition and IT 343 IT Project Management are restricted to students who have declared an Information Technology major. Students who have declared an Information Technology Minor will not be permitted to take IT 293 or IT 343.

Policies

Grades

Students must have a C or better in any course that satisfies a prerequisite for an IT course. To graduate with the Information Technology Minor, students must have a GPA of 2.00 or better across all courses applied to the Information Technology minor. Additionally, if a technical focus course requires a minimum B in a specified course, students will be held to meeting this prerequisite. Eight credits of coursework must be unique to the minor.

For policies governing all minors, see the Undergraduate Policies section of this catalog.

Website: ist.gmu.edu/programs/undergraduate-programs/

This certificate is designed primarily for those students who have earned a bachelor's degree or current undergraduate students who desire deeper knowledge than what can be accomplished through the IT minor. It allows students to augment the knowledge gained through their major-related courses with a foundation of information technology (IT) topics and their application within organizations to achieve organizational objectives. Completing this undergraduate certificate provides students with the necessary skills to improve their attractiveness to employers in our technology-driven society. The General Concentration requires a minimum of 24 credits, including 15 credits of required courses. Beyond these requirements, students must select three additional IT courses (9 credits, at least 3 upper division credits). Students pursuing the IT undergraduate certificate should consult with an advisor to select their additional courses.

Requirements

Certificate Requirements
Total credits: 24-28

This certificate may be pursued on a part-time basis only.

Requirements
Students must complete all requirements within a concentration.

Concentration in General (GEN)
The Information Technology certificate is designed primarily for those students who have earned a bachelor's degree or current undergraduate students who desire deeper knowledge than what can be accomplished through the IT minor. It allows students to augment the knowledge gained through their major-related courses with a foundation of information technology (IT) topics and their application within organizations to achieve organizational objectives. Completing this undergraduate certificate provides students with the necessary skills to improve their attractiveness to employers in our technology-driven society. The General Concentration requires a minimum of 24 credits, including 15 credits of required courses. Beyond these requirements, students must select three additional IT courses (9 credits, at least 3 upper division credits). Students pursuing the IT undergraduate certificate should consult with an advisor to select their additional courses.

Requirements

Code   Title                                      Credits
IT 102  Discrete Structures                      3
or MATH 125 Discrete Mathematics I (Mason Core) 3
IT 104  Introduction to Computing                3
IT 105  IT Architecture Fundamentals             3
IT 106  Introduction to IT Problem Solving Using Computer Programming 3
Select one from the following:                  3
IT 206  Object Oriented Techniques for IT Problem Solving 3
IT 207  Applied IT Programming                   3
IT 213  Multimedia and Web Design                3
IT 214  Database Fundamentals                    3

IT 314  Database Programming                       3
IT 315  Mobile Development                         3
IT 322  Health Data Challenges                     3
IT 324  Health Information Technology Fundamentals 3
IT 328  Health Information Emerging Technologies    3
IT 331  Web I: Web Development                     3
Concentration in Entrepreneurship (ENTR)
The Information Technology certificate with Entrepreneurship concentration prepares IT and engineering students for successful careers as entrepreneurs in the area of information technology. Specifically, they will acquire a unique body of knowledge related to innovation, both on the information technology/engineering/inventive side and on the entrepreneurial side, which will give them a competitive advantage in the difficult market where only very few new companies are able to survive and grow.

This certificate and concentration are designed for students who are working on or possess an undergraduate degree in information technology, computer science, engineering or a related domain and want to focus on IT innovation and entrepreneurship. The Concentration in Entrepreneurship requires a minimum of 28 credits, including 9 credits of required courses, 12 elective credits, and 7 capstone credits.

Students enrolled in this certificate and concentration must be part of an entrepreneurship team (E-Team) with the goal of creating an IT venture. The E-Teams will be mentored by faculty associated with the certificate. Students who will create, or be a core team member of, a start-up company that has cumulated revenues and funding of $10,000 during their enrollment in the certificate will graduate with a Certificate of Excellence in IT Entrepreneurship.

Information Technology, BS
Banner Code: VS-BS-INFT

Academic Advising
5400 Nguyen Engineering Building
Fairfax Campus
101 Bull Run Hall
Science and Technology Campus
Phone: 703-993-3565
Email: bsit@gmu.edu
Website: http://ist.gmu.edu/programs/undergraduate-programs/

The Information Technology, BS prepares students to apply IT to support business processes. The degree produces graduates with strong problem-solving, writing, and communication skills who successfully compete for technical employment and are prepared for advanced study. The objectives of the Information Technology, BS program relate to the abilities of the graduates several years after graduation. Graduates of the program are expected within three to five years of graduation to have:

• Been employed in a position in which they have successfully used their information technology skills (including: problem solving, analytic, presentation and personal skills) as evidenced by achieving improved organizational objectives;
• Progressed through increasing levels of responsibility in the workplace;
• Demonstrated ethical, social and professional responsibility consistent with professional societies;
• Worked effectively in teams, whether as a participant or as a leader;
• Grown through self-study, continuing education and professional development relevant to their profession.

The program can be successfully completed in eight full-time semesters with an average of 15 credits each semester. It is also possible for students to complete the degree on a part-time basis. The 120-credit degree requirement consists of Mason Core requirements, IT foundation and core courses, and courses required for the chosen IT concentration. At least 30 credits toward the BS degree must be earned at Mason, and at least 45 credits must be at or above the 300 level. Upper division courses in the program are taught at the Science and Technology campus, where many Department of Information Sciences and Technology faculty offices are located.

The bachelor’s program in Information Technology is accredited by the Computing Accreditation Commission of ABET, http://www.abet.org.

Admissions & Policies

Admissions

Students who meet Mason’s general eligibility requirements may apply for admission to the IT major. Admission is based on the appropriateness of the student’s academic objectives and the likelihood of the student benefiting from the program. Preference in admission is given to students who have four years of high school mathematics, including precalculus.

Policies

For policies governing all undergraduate degrees, see AP5 Undergraduate Policies.

Change of Major

Mason students considering a change of major to Information Technology must have a minimum GPA of 3.00 in completed courses from the following list: IT 102 Discrete Structures or MATH 125 Discrete Mathematics I (Mason Core), IT 104 Introduction to Computing or IT 191 Review of Computing Fundamentals, IT 105 IT Architecture Fundamentals, IT 106 Introduction to IT Problem Solving Using Computer Programming or IT 196 Review of IT Problem Solving Using Computer Programming or IT 109 Introduction to Computer Programming or CS 112 Introduction to Computer Programming, IT 206 Object-Oriented Techniques for IT Problem Solving or IT 209 Introduction to Object-Oriented Programming or CS 211 Object-Oriented Programming, IT 216 Systems Analysis and Design, IT 217 Applied IT Programming, IT 213 Multimedia and Web Design or IT 193 Review of Multimedia and Web Design, IT 214 Database Fundamentals or IT 194 Review of Database Fundamentals, and IT 223 Information Security Fundamentals, and a grade of C or better in IT 106 Introduction to IT Problem Solving Using Computer Programming or IT 109 Introduction to Computer Programming or IT 196 Review of IT Problem Solving Using Computer Programming or both CS 112 Introduction to Computer Programming and CS 211 Object-Oriented Programming.

Note: IT courses at the 300 and 400 level are restricted to students who have declared an Information Technology major, minor, or undergraduate certificate, and to students in the BAS or BIS program. IT 293 Applied

Advanced Study

Mason offers students the ability to complete both BS and MS degrees in a shorter time through an Accelerated Masters (MS) program. Choosing to pursue an accelerated MS may affect a student’s choice of courses in the BS program. Students should consult with an advisor for assistance.

Grades

Students must have a C or better in any course that satisfies a prerequisite for an IT course. To graduate with the BS in Information Technology, students must have a GPA of 2.75 or better across the IT foundation, core, capstone, and concentration courses. Additionally, students must have a C or better in their foundation, core, capstone, and concentration courses. Furthermore, students must have a B or better in gateway courses for the respective concentration.

Course Repeat Policy

In addition to the University’s Undergraduate Course Repeat Policy, the following courses listed have additional repeat restrictions:

• A student who has taken IT 106 twice may not take IT 109 for their third attempt, nor will they be permitted to start over with three attempts of IT 109 in lieu of taking IT 106.
• A student who has taken IT 109 twice may not take IT 106 for their third attempt, nor will they be permitted to start over with three attempts of IT 106 in lieu of taking IT 109.
• A student who has taken IT 206 twice may not take IT 209 for their third attempt, nor will they be permitted to start over with three attempts of IT 209 in lieu of taking IT 206.
• A student who has taken IT 209 twice may not take IT 206 for their third attempt, nor will they be permitted to start over with three attempts of IT 206 in lieu of taking IT 209.
• A student who has taken IT 102 Discrete Structures twice may not take MATH 125 Discrete Mathematics I (Mason Core) for their third attempt, nor will they be permitted to start over with three attempts of MATH 125 in lieu of taking IT 102.
• A student who has taken MATH 125 twice may not take IT 102 for their third attempt, nor will they be permitted to start over with three attempts of IT 206 in lieu of taking IT 209.
• A student who has taken MATH 125 twice may not take IT 102 for their third attempt, nor will they be permitted to start over with three attempts of IT 109 in lieu of taking IT 102.

Termination from the Major

No math, science, or Volgenau School of Engineering course that is required for the major may be attempted more than three times. Those students who do not successfully complete such a course within three attempts will be terminated from the major. Undeclared students in the Volgenau School who do not successfully complete a course required for a Volgenau School major within three attempts will also be terminated.

In addition, students in the Volgenau School with evidence of continued failure to make adequate progress toward declaring or completing a Volgenau School major will be terminated from the school. Adequate progress is determined by the major program. For more information, see AP5.2.4 Termination from the Major (https://catalog.gmu.edu/policies/academic/undergraduate-policies/#ap-5-2-4).

Once a student has attempted one of these courses twice unsuccessfully, the third attempt must be no later than the next semester of enrollment, excluding summers. Failure to take the course at that time will result in termination from the major. A third attempt of a Volgenau School of
Engineering course requires support by the student’s major department as well as permission by the department offering the course. This permission is not guaranteed. If the student is unable to take the course when required, the student may request an extension to a future semester; extensions require approval of the student’s advisor, their department, and the Associate Dean for Undergraduate Programs. The deadline for extension requests is the add deadline for the semester in which the course is required.

Students who have been terminated from a Volgenau School of Engineering major may not register for a Volgenau School course without permission of the department offering the course. This applies to all undergraduate courses offered by the Volgenau School except IT 104 Introduction to Computing (Mason Core) and STAT 250 Introductory Statistics I (Mason Core).

A student may not declare any major in the Volgenau School of Engineering if the student has previously met the termination criteria for that major at any time, regardless of what the student’s major was at the time the courses were taken.

To fulfill the requirements for a concentration, students need 15 credits made up of four courses from their chosen concentration and a fifth course chosen from any of the six concentrations. Students may choose to have two concentrations. To be eligible, the student must have a B or better in the gateway course for each concentration. If two concentrations are declared, the student must take four courses in each concentration, for a total of eight different concentration courses.

Accelerated Master's

Information Technology, BS/Information Security and Assurance, Accelerated MS
Overview
Highly-qualified students in the Information Technology, BS have the option of obtaining an accelerated Information Security and Assurance, MS.

Admission Requirements
Students in the Information Technology, BS program may apply to this option if they have earned 90 undergraduate credits with an overall GPA of at least 3.30. Criteria for admission are identical to criteria for admission to the Information Security and Assurance, MS program.

Accelerated Option Requirements
Students must complete all credits that satisfy requirements for the BS and MS programs, with up to 6 overlapping credits chosen from the following two courses:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>Database Systems (satisfies IT 414 requirement in the BS program)</td>
<td>3</td>
</tr>
</tbody>
</table>

Note:
Students must complete MATH 125 Discrete Mathematics I (Mason Core) as their discrete math requirement and IT 306 Data Structures and Algorithms in Java as part of their concentration requirements in the BS program.

Degree Conferral
Students must apply the semester before they expect to complete the BS requirements to have the BS degree conferred. In addition, at the beginning of the student’s final undergraduate semester, students must complete a Bachelor’s/Accelerated Master’s Transition form that is submitted to the Office of the University Registrar and the VSE Graduate Admissions Office. At the completion of MS requirements, a master's degree is conferred.

Information Technology, BS/Information Systems, Accelerated MS
Overview
Highly-qualified students in the Information Technology, BS have the option of obtaining an accelerated Information Systems, MS.

Admission Requirements
Students in the Information Technology, BS program may apply to this option if they have earned 90 undergraduate credits with an overall GPA of at least 3.30. Criteria for admission are identical to the criteria for admission to the Information Systems, MS program.

Accelerated Option Requirements
Students must complete all credits that satisfy requirements for the BS and MS programs, with up to 6 overlapping credits chosen from the following two courses:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>CS 550</td>
<td>Database Systems (satisfies IT 414 requirement in the BS program)</td>
<td>3</td>
</tr>
</tbody>
</table>
Note:

Students must complete MATH 125 Discrete Mathematics I (Mason Core) as their discrete math requirement and IT 306 Data Structures and Algorithms in Java as part of their concentration requirements in the BS program.

Degree Conferral
Students must apply the semester before they expect to complete the BS requirements to have the BS degree conferred. In addition, at the beginning of the student’s final undergraduate semester, students must complete a Bachelor's/Accelerated Master’s Transition form that is submitted to the Office of the University Registrar and the VSE Graduate Admissions Office. At the completion of MS requirements, a master’s degree is conferred.

Information Technology, BS/Software Engineering, Accelerated MS

Overview
Highly-qualified students in the Information Technology, BS have the option of obtaining an accelerated Software Engineering, MS.

For more detailed information, see AP.6.7 Bachelor’s/Accelerated Master’s Degrees. For policies governing all graduate degrees, see AP6 Graduate Policies.

Admission Requirements
Students in the Information Technology, BS program may apply to this option if they have earned 90 undergraduate credits with an overall GPA of at least 3.30. Criteria for admission are identical to criteria for admission to the Software Engineering, MS Program.

Accelerated Option Requirements
Students must complete all credits that satisfy requirements for the BS and MS programs, with up to 6 overlapping credits chosen from the following two courses:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>CS 550</td>
<td>Database Systems (satisfies IT 414 requirement in the BS program)</td>
<td>3</td>
</tr>
<tr>
<td>SWE 619</td>
<td>Object-Oriented Software Specification and Construction (satisfies as one DTP concentration course in the BS program)</td>
<td>3</td>
</tr>
</tbody>
</table>

Note:

Students must complete MATH 125 Discrete Mathematics I (Mason Core) as their discrete math requirement and IT 306 Data Structures and Algorithms in Java as part of their concentration requirements in the BS program.

Degree Conferral
Students must apply the semester before they expect to complete the BS requirements to have the BS degree conferred. In addition, at the beginning of the student’s final undergraduate semester, students must complete a Bachelor’s/Accelerated Master’s Transition form that is submitted to the Office of the University Registrar and the VSE Graduate Admissions Office. At the completion of MS requirements, a master’s degree is conferred.

Information Technology, BS/Digital Forensics, Accelerated MS

Overview
Highly-qualified students in the Information Technology, BS have the option of obtaining an accelerated Digital Forensics, MS.

For more detailed information, see AP.6.7 Bachelor’s/Accelerated Master’s Degrees. For policies governing all graduate degrees, see AP6 Graduate Policies.

Admission Requirements
Students in the Information Technology, BS program may apply for this option if they have earned 90 undergraduate credits with an overall GPA of at least 3.25. Criteria for admission are identical to criteria for admission to the Digital Forensics, MS program.

Accelerated Option Requirements
Students must complete all credits that satisfy requirements for the BS and MS programs, with 6 credits overlapping with two of the following three courses:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>CFRS 500</td>
<td>Introduction to Forensic Technology and Analysis</td>
<td>3</td>
</tr>
<tr>
<td>CFRS 510</td>
<td>Digital Forensics Analysis (satisfies the IT 357 requirement for the INFS concentration in the BS program)</td>
<td>3</td>
</tr>
<tr>
<td>CFRS 660</td>
<td>Network Forensics (satisfies as one NTEL concentration course in the BS program)</td>
<td>3</td>
</tr>
</tbody>
</table>

Degree Conferral
Students must apply the semester before they expect to complete the BS requirements to have the BS degree conferred. In addition, at the beginning of the student’s final undergraduate semester, students must complete a Bachelor's/Accelerated Master’s Transition form that is submitted to the Office of the University Registrar and the VSE Graduate Admissions Office. At the completion of MS requirements, a master’s degree is conferred.

Information Technology, BS/Telecommunications, Accelerated MS

Overview
Highly-qualified students in the Information Technology, BS have the option of obtaining an accelerated Telecommunications, MS.

For more detailed information, see AP.6.7 Bachelor’s/Accelerated Master’s Degrees. For policies governing all graduate degrees, see AP6 Graduate Policies.

Admission Requirements
Students in the Information Technology, BS program may apply for this option if they have earned 75 undergraduate credits with an overall GPA of at least 3.00. Criteria for admission are identical to criteria for admission to the Telecommunications, MS program.
Accelerated Option Requirements

Students must complete all credits that satisfy requirements for the BS and MS programs.

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>TCOM 500</td>
<td>Modern Telecommunications (To satisfy the IT 300 BS, AIT requirement)</td>
<td>6</td>
</tr>
<tr>
<td>TCOM 535</td>
<td>The TCP/IP Suite of Internet Protocols (To satisfy the IT 441 BS, AIT requirement)</td>
<td>3</td>
</tr>
<tr>
<td>TCOM 631</td>
<td>Voice Over IP (To satisfy the IT 484 BS, AIT requirement)</td>
<td>3</td>
</tr>
</tbody>
</table>

Total Credits 6

Note:

Students in the accelerated option who have passed IT 341 Data Communications and Network Principles with a grade of B or higher will not be required to take TCOM 535 The TCP/IP Suite of Internet Protocols, which is listed in the MS TCOM core. Alternative sections of TCOM courses to satisfy requirements in the AIT undergraduate program may be made with the approval of the undergraduate academic advisor.

Degree Conferral

Students must apply the semester before they expect to complete the BS requirements to have the BS degree conferred. In addition, at the beginning of the student’s final undergraduate semester, students must complete a Bachelor’s/Accelerated Master’s Transition form that is submitted to the Office of the University Registrar and the VSE Graduate Admissions Office. At the completion of MS requirements, a master’s degree is conferred.

Information Technology, BS/Applied Information Technology, Accelerated MS

Overview

Highly-qualified students in the Information Technology, BS have the option of obtaining an accelerated Applied Information Technology, MS.

For more detailed information, see AP6.7 Bachelor’s/Accelerated Master’s Degrees. For policies governing all graduate degrees, see AP6 Graduate Policies.

Admission Requirements

Students in the Information Technology, BS program may apply to this option if they have earned 90 undergraduate credits with an overall GPA of at least 3.30. Criteria for admission are identical to criteria for admission to the Applied Information Technology, MS program.

Accelerated Option Requirements

Students must complete all credits that satisfy requirements for the BS and MS programs, with 6 credits overlap.

Students register for 6 credits of AIT 500-level core courses in place of the corresponding IT 300-level courses required for the undergraduate degree requirements.

Students must register for two of the following courses in place of the corresponding 300-level courses:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>AIT 512</td>
<td>Algorithms and Data Structures Essentials (satisfies the IT 306 requirement in the BS program)</td>
<td>3</td>
</tr>
<tr>
<td>AIT 524</td>
<td>Database Management Systems (satisfies the IT 314 requirement in the BS program)</td>
<td>3</td>
</tr>
<tr>
<td>AIT 542</td>
<td>Fundamentals of Computing Platforms (satisfies the IT 342 requirement in the BS program)</td>
<td>3</td>
</tr>
</tbody>
</table>

Students may take additional graduate-level courses as part of their BS technical electives with advisor approval. These additional graduate-level courses will not count toward the MS degree. See AP1.4.4 Graduate Course Enrollment by Undergraduates.

Department of Mechanical Engineering

Phone: 703-993-5383
Email: mechengr@gmu.edu
Website: mechanical.gmu.edu/

Mechanical engineering is the broadest of the engineering disciplines, and traces its origins to antiquity. The discipline of mechanical engineering involves anything that moves or uses energy. There are two major stems in mechanical engineering: mechanical systems and thermal fluid systems. Mechanical engineers design, build, and analyze complex devices, systems, and processes that involve the conversion of energy from one form to another, the production of work, and the transport of energy and mass from one location to another.

Today, the scope of the mechanical engineering discipline is ever-expanding. Mechanical engineers work in industries that include, but are not limited to, the aerospace, bio-pharmaceutical, civil, computer and cyber, biomedical, industrial, materials and manufacturing industries. They provide innovative solutions for contemporary problems and address problems yet identified. For example, 3-D printed components are readily being used in manufactured components, as part of medical implants and devices and even in structural applications. The mechanical performance of the components will likely vary dramatically from the ideal laboratory environment in which they were produced. Mechanical engineers are needed to characterize these aggressive environments in which they may be used, design test matrices to study their performance, and determine environmentally-based mechanical properties needed for design.

The Mechanical Engineering, BS is designed to support the goal of educating leaders for the future – men and women capable of meeting the needs of society. The curriculum is designed to provide its graduates with the technical skills and competencies to analyze and design both mechanical and thermal systems, and to give them an in-depth
experience in one of these two areas. With a solid foundation in these discipline-specific areas, graduates of the program will be well-prepared to enter any of the industries identified above. All students will take core courses in both content areas through their junior year. During their senior year, they will have the opportunity to focus their program of study with a design elective and three technical electives. These electives can be arranged to focus on areas such as advanced manufacturing, aerospace, bioengineering, robotics, or sustainable energy.

**Admissions & Policies**

**Admissions**

To be admitted to the minor, students must have completed MATH 114 Analytic Geometry and Calculus II and PHYS 160 University Physics I (Mason Core)/PHYS 161 University Physics I Laboratory (Mason Core) with a grade of C or better.

**Policies**

The minor in mechanical engineering consists of a minimum of 20-21 credit hours of coursework. All students must complete 14 credit hours of core courses. They must also complete two additional elective courses. All courses must be completed with a grade of C or better.

Eight credits of coursework must be unique to the minor. For policies governing all minors, see AP.5.3.4 Minors.

For policies governing all undergraduate programs, see AP.5 Undergraduate Policies.

Mechanical Engineering, BS

Banner Code: VS-BS-ME

Academic Advising
3300 Nguyen Engineering Building
Fairfax Campus
Phone: 703-993-5383
Email: mechengr@gmu.edu
Website: mechanical.gmu.edu

Today, the role of mechanical engineer is ever expanding in order to find innovative solutions for contemporary problems, and to address problems yet to be identified. To meet the growing demands of worldwide energy needs spurred by population growth and dwindling supplies of fossil fuels, for instance, mechanical engineers seek innovations in nuclear energy, bio-fuels, wind, and tidal energies to build an energy portfolio that exploits these seemingly limitless resources. From product design, which spans from biomedical devices to turbo-machinery, to manufacturing, which develops machines and systems needed to process raw materials into these products, an awareness of the benefits of advanced materials for sensing and monitoring the health of these systems and an awareness of the stealth threats to manufacturing brought on by an ever present cyber threat are in the minds of the mechanical engineers. Now more mechanical engineers oversee the operations and management of large systems along with the fiscal and human resources needed to run them.

James Michener once said, “Scientists dream about doing great things. Engineers do them.” Mechanical engineers use science to advance technologies and to develop products for the benefit of society, in a discipline which dates back to the earliest of times in civilization. The major in mechanical engineering has three program education objectives, namely:

- Graduates have demonstrated success as a mechanical engineer or their chosen career field;
- Graduates have advanced their educational pursuits through graduate education, professional registration, or similar means;
- Graduates have advanced their careers by engaging in professional society participation and community service outreach.

The bachelor’s program in Mechanical Engineering is accredited by the Engineering Accreditation Commission of ABET, http://www.abet.org.

Change of Major
See Change of Major for more information.

Grade Requirements and Advising
Degree requirements include 121 credits distributed in three main areas: mechanical engineering, mathematics and basic science, and humanities and social sciences. Students must complete all math, science and Volgenau School of Engineering courses presented as part of the required 121 credits for the degree with a grade of C or better.

Students are required to see their faculty advisor at least once each year to plan their curriculum.

Termination from the Major
No math, science, or Volgenau School of Engineering course that is required for the major may be attempted more than three times. Those students who do not successfully complete such a course within three attempts will be terminated from the major. Undeclared students in the Volgenau School who do not successfully complete a course required for a Volgenau School major within three attempts will also be terminated.

In addition, students in the Volgenau School with evidence of continued failure to make adequate progress toward declaring or completing a Volgenau School major will be terminated from the school. Adequate progress is determined by the major program. For more information, see AP .5.2.4 Termination from the Major (https://catalog.gmu.edu/policies/academic/undergraduate-policies/#ap-5-2-4).

Once a student has attempted one of these courses twice unsuccessfully, the third attempt must be no later than the next semester of enrollment, excluding summers. Failure to take the course at that time will result in termination from the major. A third attempt of a Volgenau School of Engineering course requires support by the student’s major department as well as permission by the department offering the course. This permission is not guaranteed. If the student is unable to take the course when required, the student may request an extension to a future semester; extensions require approval of the student’s advisor, their department, and the Associate Dean for Undergraduate Programs. The deadline for extension requests is the add deadline for the semester in which the course is required.

Students who have been terminated from a Volgenau School of Engineering major may not register for a Volgenau School course without permission of the department offering the course. This applies to all undergraduate courses offered by the Volgenau School except IT 104 Introduction to Computing (Mason Core) and STAT 250 Introductory Statistics I (Mason Core).

A student may not declare any major in the Volgenau School of Engineering if the student has previously met the termination criteria for that major at any time, regardless of what the student’s major was at the time the courses were taken.

Accelerated Master’s

Mechanical Engineering, BS/Applied and Engineering Physics, Accelerated MS

Overview
This program allows academically strong undergraduates with a demonstrable commitment to research to obtain the Mechanical Engineering, BS (https://catalog.gmu.edu/colleges-schools/engineering/mechanical/mechanical-engineering-bs/) and Applied and Engineering Physics, MS degrees by successfully completing 145 credits. Upon completion, students are well-prepared for entering into the professional workforce, or a PhD program in physics or a related engineering discipline.

Admitted students take selected graduate courses during their senior year and are able to use up to 6 graduate credits in partial satisfaction of requirements for the undergraduate degree. Upon completion and conferral of the bachelor’s degree and with satisfactory performance (grade of ‘B’ or better) in each of the graduate courses, students are given advanced standing in the master’s program and complete an additional 24 credits to receive the master’s degree.

For more detailed information, see AP.6.7 Bachelor’s/Accelerated Master’s Degrees. For policies governing all graduate degrees, see AP6 Graduate Policies.

Application Requirements
Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in the Graduate Admission Policies section of this catalog.

Successful applicants majoring in Mechanical Engineering will have completed at least 90 credits toward their undergraduate degree with an overall GPA of at least 3.00, and the following courses with a GPA of 3.00 or better:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>

<td>3</td>
</tr>
</tbody>
</table>

One or more recommendation letters from one or more research supervisors are also required. Interested applicants majoring in Mechanical Engineering, BS (https://catalog.gmu.edu/colleges-schools/engineering/mechanical/mechanical-engineering-bs/) should submit a letter to the undergraduate Mechanical Engineering advisor and the Physics Graduate Coordinator, respectively, requesting admission along with the aforementioned recommendation letter(s). Contact the Mechanical Engineering undergraduate and the Physics graduate advisor for further details.

Accelerated Option Requirements
At the beginning of the student’s final undergraduate semester, students must submit a bachelor’s/accelerated master’s transition form (http://registrar.gmu.edu/forms/) to the College of Science’s Office of Academic and Student Affairs (https://cos.gmu.edu/about/contact-us/). Students must begin their master’s program in the semester immediately following conferral of the bachelor’s degree.

Students must maintain an overall GPA of 3.00 or higher in graduate coursework.

Reserve Graduate Credit
While still in undergraduate status, a maximum of 6 additional graduate credits may be taken as reserve graduate credit and applied to the master’s program. Reserve graduate credits do not apply to the undergraduate degree.

Mechanical Engineering, BS / Bioengineering, Accelerated MS

Overview
Highly-qualified students in the Mechanical Engineering, BS have the option of obtaining an accelerated Bioengineering, MS.

For more detailed information, see AP6.7 Bachelor’s/Accelerated Master’s Degrees. For policies governing all graduate degrees, see AP6 Graduate Policies.

Admission Requirements
Mason undergraduate students majoring in Mechanical Engineering, BS may apply to this option if they have earned 90 undergraduate credits with an overall GPA of at least 3.20, completed all MATH and PHYS requirements, and passed BENG 320 Bioengineering Signals and Systems and BIOL 213 Cell Structure and Function (Mason Core) with the grade of C or better. It is also recommended that students take BENG 214 Physiology for Engineers and are proficient in MATLAB. Criteria for admission are identical to criteria for admission to the Bioengineering, MS program.
Accelerated Options Requirement

Students must complete all credits that satisfy requirements for both the BS and MS programs. Students take 6 credits of approved MS level BENG courses as part of their undergraduate degree that will also be applied to the graduate degree. The courses selected for this purpose must be approved by the academic advisor of both the BS and MS programs and by the Bioengineering department chair.

Specifically, students are encouraged to take two of the following courses to apply towards both their undergraduate and graduate degree.

<table>
<thead>
<tr>

Degree Conferral

Students must have a working background in their selected concentration area. A student lacking these foundations may be required to seek out their advisor when questions arise and when their plan of study needs to be revised.

Advising & Plan of Study

All entering students must attend an orientation meeting. Each student is assigned a faculty advisor upon acceptance. Students must meet with their advisors during their first semester and design an approved plan of study. Students are encouraged to seek out their advisor when questions arise and when their plan of study needs to be revised.

Students must have a working background in their selected concentration area. A student lacking these foundations may be required to take one or more foundation courses.

Mechanical Engineering, BS/Civil and Infrastructure Engineering, Accelerated MS

Overview

Highly-qualified students in the Mechanical Engineering, BS (https://catalog.gmu.edu/colleges-schools/engineering/mechanical/mechanical-engineering-bs/) have the option of obtaining an accelerated Civil and Infrastructure Engineering, MS (https://catalog.gmu.edu/colleges-schools/engineering/civil-environmental-infrastructure/civil-infrastructure-engineering-ms/).

For more detailed information, see AP 6 Bachelor’s/Accelerated Master’s Degrees (https://catalog.gmu.edu/policies/academic/graduate-policies/#ap-6-7). For policies governing all graduate degrees, see AP 6 Graduate Policies (https://catalog.gmu.edu/policies/academic/graduate-policies/).

Application Requirements

Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in the Graduate Admission Policies section of this catalog. Application information for this Accelerated Master’s program can be found on the Department of Computational and Data Sciences (http://cos.gmu.edu/cds/academic-programs/) website. Applicants must have an overall undergraduate GPA of at least 3.00 and have completed at least 90 credits. Additionally, applicants will have completed the following courses with a GPA of 3.00 or better.

Degree Conferral

Students must apply the semester before they expect to complete the BS requirements to have the BS degree conferred. In addition, at the beginning of the student’s final undergraduate semester, students must complete a Bachelor’s/Accelerated Master’s Transition form that is submitted to the Office of the University Registrar and the VSE Graduate Admissions Office. At the completion of MS requirements, a master’s degree is conferred.

Application Requirements

Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in the Graduate Admission Policies section of this catalog. Application information for this Accelerated Master’s program can be found on the Department of Computational and Data Sciences (http://cos.gmu.edu/cds/academic-programs/) website. Applicants must have an overall undergraduate GPA of at least 3.00 and have completed at least 90 credits. Additionally, applicants will have completed the following courses with a GPA of 3.00 or better.

</table>

Students must maintain an overall GPA of 3.00 or higher in graduate coursework and should consult with their faculty advisor to coordinate their academic goals within the modeling and simulation or data science emphases of the Computational Science, MS.

1 GRE-general scores are waived for graduates of BS degrees from any program in the College of Science or the Volgenau School of Engineering at George Mason University.

### Reserve Graduate Credit

While in undergraduate status, a student may take a maximum of six graduate credits as reserve graduate credits and apply those credits to a master’s program. Reserve graduate credits are not counted toward the 120 credits required in the undergraduate degree.

#### Mechanical Engineering, BS/Data Analytics Engineering, Accelerated MS

**Overview**

Highly-qualified students in the Mechanical Engineering, BS program have the option of applying to the accelerated Data Analytics Engineering, MS program.

For more detailed information, see AP.6.7 Bachelor’s/Accelerated Master’s Degrees. For policies governing all graduate degrees, see AP.6 Graduate Policies.

**Admission Requirements**

Students in the Mechanical Engineering, BS program may apply to the accelerated Data Analytics Engineering, MS program if they have earned 90 undergraduate credits with an overall GPA of at least 3.30.

**Accelerated Option Requirements**

Students must complete all credits that satisfy requirements for the BS and MS programs, with six credits overlap chosen from the following courses:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>AIT 580</td>
<td>Analytics: Big Data to Information</td>
<td>3</td>
</tr>
<tr>
<td>CS 504</td>
<td>Principles of Data Management and Mining</td>
<td>3</td>
</tr>
</tbody>
</table>

All graduate course prerequisites must be completed prior to enrollment. Each 500-level course must be completed with a grade of B or better to apply toward the MS program. The graduate courses selected for overlap must be approved by the academic advisors of both the BS and MS programs. The graduate courses may be counted as Technical Electives toward the Mechanical Engineering, BS program requirements, with approval of the Mechanical Engineering Department.

### Degree Conferral

Students must apply the semester before they expect to complete the BS requirements to have the BS degree conferred. In addition, at the beginning of the student’s final undergraduate semester, students must complete a Bachelor’s/Accelerated Master’s Transition form (https://registrar.gmu.edu/forms/) that is submitted to the Office of the University Registrar and the VSE Graduate Admissions and Recruitment office. At the completion of MS requirements, a master’s degree is conferred.

#### Mechanical Engineering, BS/Electrical Engineering, Accelerated MS

**Overview**

The university offers highly-qualified students in the Mechanical Engineering, BS the option of obtaining an accelerated Electrical Engineering, MS.

For more detailed information, see AP.6.7 Bachelor’s/Accelerated Master’s Degrees. For policies governing all graduate degrees, see AP.6 Graduate Policies.

**Admission Requirements**

Students in the Mechanical Engineering, BS program may apply for this option if they have earned 90 undergraduate credits, with an overall GPA of at least 3.25, and passed MATH 203 Linear Algebra and STAT 346 Probability for Engineers, or their equivalents, with the grade C or better. Criteria for admission are identical to criteria for admission to the Electrical Engineering, MS program.

**Accelerated Option Requirements**

Students must complete all credits that satisfy the requirements for the BS and MS programs, with 6 credits overlapping.

Students take 6 credits of 500-level ECE or SYST courses as part of their technical electives or substitutes for required courses in the Mechanical Engineering, BS program.

Specifically, students are encouraged to take two of the following courses:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>ECE 521</td>
<td>Linear Systems and Control</td>

</tr>
</tbody>
</table>

**Degree Conferral**

Students must apply the semester before they expect to complete the BS requirements to have the BS degree conferred. In addition, at the beginning of the student’s final undergraduate semester, students must complete a Bachelor’s/Accelerated Master’s Transition form that is submitted to the Office of the University Registrar and the VSE Graduate Admissions Office. At the completion of MS requirements, a master’s degree is conferred.
Mechanical Engineering, BS/Operations Research, Accelerated MS

Overview

Highly-qualified students in the Mechanical Engineering, BS have the option of obtaining an accelerated Operations Research, MS.

For more detailed information, see AP6.7 Bachelor's/Accelerated Master's Degrees. For policies governing all graduate degrees, see AP6 Graduate Policies.

Admission Requirements

Mason undergraduate students majoring in Mechanical Engineering, BS may apply to this option if they have earned 90 undergraduate credits with an overall GPA of at least 3.30 and completed all MATH and PHYS requirements. Criteria for admission are identical to criteria for admission to the Operations Research, MS program.

Students must additionally complete MATH 203 Linear Algebra prior to applying for the graduate program.

Accelerated Options Requirement

Students must complete all credits that satisfy requirements for both the BS and MS programs. Up to two courses (6 credits) of approved master's level courses taken as part of the undergraduate degree may be applied to the graduate degree. The courses selected for this purpose must be approved by the academic advisors of both the BS and MS programs and by the SEOR department chair. For the BS programs that allow undergraduate electives from the department of system engineering and operations research, the students may choose the graduate version of such elective courses to replace the corresponding undergraduate courses.

Degree Conferral

Students must apply the semester before they expect to complete the BS requirements to have the BS degree conferred. In addition, at the beginning of the student's final undergraduate semester, students must complete a Bachelor's/Accelerated Master's Transition form that is submitted to the Office of the University Registrar and the VSE Graduate Admissions Office. At the completion of MS requirements, a master's degree is conferred.

Mechanical Engineering, PhD (pending SCHEV approval)

Banner Code: VS-PHD-ME

Note: as of catalog publication in April, the program described below has been approved by the Board of Visitors and sent to the State Council of Higher Education in Virginia for consideration as a new degree program. The university cannot accept applications or enroll students in this program until SCHEV approval has been granted.

The Mechanical Engineering PhD is designed for students who wish to pursue a career in government, private industry and/or academia that focuses on research and advanced development on topics such as next generation design of commercial and military aircraft, interplanetary spacecraft, new drug delivery systems, and nuclear and solar-based energy systems. To prepare students, the Department of Mechanical Engineering provides a curriculum which includes advanced learning in the fluid and thermal sciences, solid and continuum mechanics, electromagnetic system design, control systems, and in aspects of materials science. Students in the program will typically choose a research emphasis in areas as broad as continuum mechanics, or more specific areas such as solid mechanics, fluid mechanics, thermodynamics, or heat transfer.

Admissions & Policies

Note: as of catalog publication in April, the program described below has been approved by the Board of Visitors and sent to the State Council of Higher Education in Virginia for consideration as a new degree program. The university cannot accept applications or enroll students in this program until SCHEV approval has been granted.

Admissions

This program seeks to attract students with backgrounds in mechanical engineering, aerospace engineering, materials science, applied physics, or other closely related fields.
The applicant must submit official transcripts, a resume, a goals statement and three letters of recommendation. A minimum undergraduate GPA of 3.25/4.0 and a minimum graduate GPA of 3.5/4.0 is expected. A Master of Science in Mechanical Engineering or a related engineering discipline is required. International students must submit additional requirements to complete a graduate studies application, to include an English proficiency exam. Application materials are reviewed by the Mechanical Engineering PhD admissions committee, which makes a recommendation to the Mechanical Engineering department chair.

**Policies**

For policies governing all graduate programs, see AP.6 Graduate Policies (https://catalog.gmu.edu/policies/academic/graduate-policies/).

**Reduction of Credit**

Students must complete a minimum of 72 graduate credits, which may be reduced by a maximum of 30 credits from an approved and completed master's degree. Reduction of credit requires the approval of the program director and the dean or designee of the school. They determine whether the credits are eligible for reduction of credit and applicable to the degree program.

**Program Requirements**

Mechanical Engineering doctoral candidates must earn a minimum of 72 graduate credits. The program is made up of a breadth requirement (assessed via a qualifying exam) followed by preparation of a dissertation proposal, an original research project, and final defense. To advance to candidacy, students must complete all coursework, pass the qualifying exam, and defend a dissertation proposal.

**Requirements**

*Note: as of catalog publication in April, the program described below has been approved by the Board of Visitors and sent to the State Council of Higher Education in Virginia for consideration as a new degree program. The university cannot accept applications or enroll students in this program until SCHEV approval has been granted.*

**Degree Requirements**

Total credits: 72

The degree plan outlined here is based on a student who receives a full 30 credit reduction. Students who do not receive a full credit reduction will be required to choose additional credits in consultation with their advisors.

**Plan of Study**

Courses that constitute a student’s plan of study should be chosen in consultation with the student's advisor and/or dissertation committee.

The student must obtain at least 24 dissertation research credits which will typically be 1 credit of ME 990 Dissertation Topic Presentation, 1-11 credits of ME 998 Doctoral Dissertation Proposal, and a minimum of 12 credits of ME 999 Doctoral Dissertation. To fulfill the 72 graduate credit requirement, students must take an additional 18 credit hours, with at least 12 of these credits taken at the 700 level or higher. These will typically be as follows: (a) 6 credits of 600/700-level courses outside the ME department (typically physics, mathematics, etc.) (b) 6 credits of 700-level courses within the ME department in subjects within the student's area of specialization, (c) 6 credits of 700-level courses within the ME department outside the student's area of specialization. A cumulative GPA of 3.5 or higher is required for courses within the plan of study.

</tbody>
</table>

**Qualifying Exams**

To satisfy the breadth requirement of the PhD degree, students must pass a set of written qualifying exams designed to test fundamental knowledge. Each exam is based on an established reading list. The qualifying exams are not associated with specific courses, although some courses may help students prepare for these exams. The qualifying exams are offered twice a year just before the fall and spring semesters. Each exam is allocated two hours and graded on a pass or fail basis. Students select their exams using a request form submitted to the Mechanical Engineering department.

Students must attempt a set of four exams no later than the first opportunity following the completion of 18 credits. Each student must pass all four exams in two consecutive offerings. Four exams must be attempted in the first offering. The exams attempted on the second offering need not be the same as in the first. A student who fails to pass four qualifying exams in two consecutive semesters is subject to termination from the program.

**Dissertation Research**

The candidate must complete 24 research credits as follows:
Doctoral Supervisory Committee

On admission to the program, students are assigned a temporary academic advisor. Students are responsible for working with the temporary advisor until they are assigned to a dissertation director and establish a doctoral supervisory committee.

The doctoral supervisory committee includes the dissertation director, who must be a member of the Mason graduate faculty, and at least three other people from the Mason graduate faculty. The dissertation director and chair of a PhD in Mechanical Engineering dissertation committee must have at least a 50% appointment in the Volgenau School. This rule does not apply to a co-director, provided that the chair and other co-director satisfies the “at least 50% rule.” At least three committee members must be from the Volgenau School, and at least two of the departments of the Volgenau School must be represented on this committee.

In addition, industrial representatives and faculty members from departments outside the school are highly desirable, but not required, on the committee. The doctoral supervisory committee administers the dissertation proposal presentation, and the dissertation predefense and defense.

Dissertation Proposal

Near the end of the coursework, doctoral students prepare a written dissertation proposal to present to the doctoral supervisory committee. The proposal must be delivered by hard copy to the doctoral supervisory committee at least two weeks before the presentation. Students should enroll in ME 998 Doctoral Dissertation Proposal to complete this effort (note: students must pass the qualifying exams before enrolling in ME 998). During the term the student expects to present the dissertation proposal to the committee (or perhaps the prior term), the student should enroll in ME 990 Dissertation Topic Presentation. After successfully completing the dissertation-proposal requirement, the student is formally admitted as a candidate for the PhD degree. The application for candidacy is submitted by the department on a standard form.

Dissertation and Final Defense

With the concurrence of the dissertation supervisory committee, students proceed with the doctoral research, during which time they must be continuously enrolled in ME 999 Doctoral Dissertation. When the central portions of the research have been completed to the point that students are able to describe the original contributions of the dissertation effort, they submit the written dissertation to the committee and schedule an oral predefense to the committee. The predefense is to be held no sooner than one month after members of the committee have copies of the dissertation. Once the committee agrees the student is ready, a final public oral defense may be scheduled no sooner than one month after the conclusion of the predefense so that the announcement is posted for at least two weeks. The entire dissertation committee must be present at the defense, unless an exception is approved by the Mechanical Engineering department chairperson in advance of the defense.

Following satisfactory evaluation of the oral defense of the dissertation by the committee, the student must prepare, with supervision from the dissertation director, a final publishable dissertation that represents a definitive contribution to knowledge in mechanical engineering. If the candidate successfully defends the dissertation, the dissertation committee recommends that the final form of the dissertation be completed and the Volgenau School faculty and the graduate faculty of Mason accept the candidate for the PhD degree.

If the student fails to successfully defend the dissertation, the student may request a second defense, following the same procedures as for the initial defense. There is no time limit for this request other than general time limits for the doctoral degree. An additional predefense is not required, but students are strongly advised to consult with the committee before scheduling a second defense. If the student fails on the second attempt to defend the dissertation, the student will be terminated from the program.

Department of Statistics

Phone: 703-993-3645
Email: statistics@gmu.edu
Website: statistics.gmu.edu

Statistical methods and methods for data analysis are crucial for all disciplines in which data are present. As collection of data grows in all sectors of employment, the Department of Statistics prepares students to meet the challenges of data collection, data reduction, interpretation, and analysis.

Department Offerings

Courses

The department offers a variety of introductory courses and more advanced course work in specialized statistical methodology and applications. The focus of the department’s offerings is applied, computational, and theoretical, with special emphasis on biostatistics, graphics and visualization, federal statistics, and data analytics.

Undergraduate Programs

The Department of Statistics offers an undergraduate Statistics, BS, as well as a Data Analysis Minor and a Statistics Minor. A variety of advanced undergraduate courses are also available for inclusion in other degree programs.

Graduate Programs

The department also administers three master’s degree programs: Statistical Science, MS, Biostatistics, MS and Data Analytics Engineering, MS. The Data Analytics Engineering, MS is a multidisciplinary program with courses and concentrations offered by many participating departments in the Volgenau School of Engineering.

Two dual master’s degree programs, the Mathematics and Statistical Science Dual-Degree, MS and the Operations Research and Statistical Science Dual-Degree, MS are offered in conjunction with the Mathematical Sciences and Systems Engineering and Operations Research departments respectively.

Finally, the Statistical Science, PhD represents the highest academic attainment for a statistician and, as such, requires in-depth knowledge of modern statistical theory and practice.

Applied Statistics Graduate Certificate
Banner Code: VS-CERG-ASTA

Phone: 703-993-4835
Email: statistics@gmu.edu
Website: statistics.gmu.edu

This graduate certificate trains students in data analysis and statistical methodology. Also, it provides a clear record of additional instruction in statistics for future graduate programs or employers.

The General Concentration is intended to complement PhD and MS programs outside the Department of Statistics. It is also intended to be responsive to the needs of those who teach or work in government/industry and want to increase their knowledge of statistics. The certificate emphasizes the application of statistical tools, not theory. As such, there are no required prerequisite math courses, although one semester of calculus is strongly recommended.

The Federal Statistics Concentration is targeted at upgrading the skills of current practitioners. The federal statistical system is a complex data collection and analysis system that requires a wide variety of multidisciplinary skills for its maintenance. The federal statistics certificate is intended to respond to the need for broad training in statistics, survey methods, and data analysis, including graphics and data visualization. The program is extremely flexible and can be tailored to the needs of students within the federal statistical sector. It is also intended to be responsive to the needs of those in state and local governments, and those in the private sector involved in the collection, interpretation, or statistical analysis of federal data.

Admissions & Policies

Admissions
General Concentration
Applicants should have an undergraduate degree from an accredited institution, with a minimum overall GPA of at least 3.00 (on a 4.00 scale). No specific undergraduate degree is required. Applicants are expected to have basic computer literacy. Successful completion of an undergraduate course in statistics is required for admission. One semester of calculus is strongly recommended.

Federal Statistics Concentration
Potential candidates must hold a bachelor’s degree and have taken at least two courses in calculus and one course in calculus-based probability and statistics. These minimal course requirements are normally satisfied by students who have successfully completed courses equivalent to the following Mason courses: MATH 113 Analytic Geometry and Calculus I (Mason Core), MATH 114 Analytic Geometry and Calculus II, and STAT 344 Probability and Statistics for Engineers and Scientists I. Candidates must also be computer literate.

Policies
For policies governing all graduate certificates, see AP.6.8 Requirements for Graduate Certificates.

Requirements
Certificate Requirements
Total credits: 12
This certificate may be pursued on a part-time basis only.

Total Credits 12

1 STAT 535 is the prerequisite for all other courses besides STAT 574 and STAT 674. A student with sufficient background in statistics may seek a waiver of the STAT 535 prerequisite from the appropriate course instructor.

2 Enrollment in STAT 574 requires special permission from the course instructor.

Concentration in Federal Statistics (FSS)

Some courses may have prerequisites beyond minimal admission requirements for which students must qualify or seek a waiver from the course instructor.

Biostatistics, MS

Banner Code: VS-MS-BSTA

Phone: 703-993-3645
Email: statistics@gmu.edu
Website: statistics.gmu.edu

The MS in Biostatistics will allow students to specialize in the design and analysis of health-related and biological studies, while maintaining the rigor and technical training of the Statistical Science master’s program.

In this degree, students will take a statistics core and a "bio" core, involving courses in public health, biology, and clinical medicine (including ethics). It also involves a research core which allows students to solve real data problems in the biological or health area and collaborate with other scientists in an interdisciplinary team. Finally, students will choose from electives in bioinformatics, global and community health, or targeted statistics courses.

This graduate degree prepares students for analyzing difficult data specific to biology and health. The program, with its research core, will also be sufficiently rigorous for students who wish to pursue a PhD in Biostatistics.

Admissions & Policies

Admissions

In addition to satisfying general admission requirements for graduate study, all applicants are expected to have basic computer literacy. They also must hold a bachelor's degree from an accredited institution in a field that includes coursework in multivariable calculus, matrix or linear algebra, statistics, and calculus-based probability. Applicants with degrees in such fields as mathematics, statistics, and some engineering programs usually meet these requirements. For applicants with degrees in other fields, these requirements are normally satisfied if students have successfully completed courses equivalent to the listed Mason courses.

Note that coursework taken to correct deficiencies in undergraduate preparation is not counted toward the degree.

Specific application deadlines and requirements (https://admissions.gmu.edu/grad/application-deadlines-and-requirements/?academicUnit=VS&amp;ga=1.107632321.273102085.1480697294/) are available through the Office of Graduate Admissions.

Requirements

Degree Requirements

Total credits: 30

In addition to meeting general requirements that apply to master's degrees at Mason, all students must complete the 21-credit core requirements for the degree. A grade of "B-" or better is required in all 500-level statistics core courses. Students build on these core requirements by choosing 9 credits of electives.
Core Courses

Statistics Core
The Statistics core provides the basic probability, statistical analysis techniques, and statistical modeling tools that all biostatisticians must know, and provides a basis for higher level elective coursework.

<table>
<thead>
<tr>

</tr>
</tbody>
</table>

Bio Core
The Bio core is designed to provide the biological background necessary for biostatisticians. These courses offer preparation in the areas of public health and epidemiology (GCH 712 Introduction to Epidemiology), bioengineering (BENG 501 Bioengineering Research Methods, BENG 538 Medical Imaging) as well as bioinformatics (BINF 630 Bioinformatics Methods). In addition, this portion of the core curriculum ensures that students are trained in the statistical techniques required for clinical medicine, and includes material on ethics in research (STAT 560 Biostatistical Methods).

</tr>
</tbody>
</table>

Research Core
The Research core has been designed to assist students in the development of the requisite skills for careers in consulting or research. These courses will allow students to consult directly with biologists and medical and public health scientists on real data problems and provide opportunities to write reports and give oral presentations.

Accelerated Master's

Bioengineering, BS/Biostatistics, Accelerated MS
Overview:
Highly-qualified students in Bioengineering, BS have the option of obtaining an accelerated Biostatistics, MS. Students in an accelerated degree program must fulfill all university requirements for the master's degree.

For more detailed information, see AP.6.7 Bachelor's/Accelerated Master's Degrees (https://catalog.gmu.edu/policies/academic/graduate-policies/#ap-6-7). For policies governing all graduate degrees, see AP.6 Graduate Policies (https://catalog.gmu.edu/policies/academic/graduate-policies/).

Admission Requirements:
Students enrolled in a BS degree in Bioengineering may apply to this option if they have earned 90 undergraduate credits with an overall GPA of 3.00. Students must have successfully completed MATH 213 Analytic Geometry and Calculus III and BENG 320 Bioengineering Signals and Systems. Criteria for admission are identical to criteria for admission to the Biostatistics, MS program.

Accelerated Option Requirements:
Students must complete all requirements for the BS and MS programs, with 6 credits overlap.

Students register for the following 500-level courses, which will also count towards the technical elective requirements of their undergraduate degree:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>BENG 501</td>
<td>Bioengineering Research Methods</td>
<td>3</td>
</tr>
<tr>
<td>STAT 554</td>
<td>Applied Statistics I</td>
<td>3</td>
</tr>
</tbody>
</table>

Note:
Students are permitted to take additional graduate basic courses in their undergraduate programs. In such cases, those classes cannot be counted toward requirements for the MS.
**Degree Conferral:**

Students must apply the semester before they expect to complete the BS requirements to have the BS degree conferred. In addition, at the beginning of the student’s final undergraduate semester, students must complete a Bachelor’s/Accelerated Master’s Transition form (https://registrar.gmu.edu/forms/) that is submitted to the Office of the University Registrar and the VSE Graduate Admissions Office. At the completion of MS requirements, a master’s degree is conferred.

**Statistics, BS/Biostatistics, Accelerated MS**

**Overview:**

Highly-qualified students in Statistics, BS have the option of obtaining an accelerated Biostatistics, MS. Students in an accelerated degree program must fulfill all university requirements for the master’s degree. For more detailed information, see AP.6.7 Bachelor’s/Accelerated Master’s Degrees (https://catalog.gmu.edu/policies/academic/graduate-policies/#ap-6-7). For policies governing all graduate degrees, see AP.6 Graduate Policies (https://catalog.gmu.edu/policies/academic/graduate-policies/).

**Admission Requirements:**

Students enrolled in a BS degree in Statistics may apply to this option if they have earned 90 undergraduate credits with an overall GPA of 3.00.

**Accelerated Option Requirements:**

Students must complete all requirements for the BS and MS programs, with 6 credits overlap.

Students must complete all credits that satisfy requirements for the BS and MS programs, with 6 credits overlapping with grades of B or better in two 500-level STAT selected from STAT 544 (https://catalog.gmu.edu/search/?P=STAT%20544/) Applied Probability, STAT 554 (https://catalog.gmu.edu/search/?P=STAT%20554/) Applied Statistics I, and STAT 560, Biostatistical methods.

**Degree Conferral:**

Students must apply the semester before they expect to complete the BS requirements to have the BS degree conferred. In addition, at the beginning of the student’s final undergraduate semester, students must complete a Bachelor’s/Accelerated Master’s Transition form that is submitted to the Office of the University Registrar and Graduate Recruitment and Enrollment Services. At the completion of MS requirements, a master’s degree is conferred.

**Data Analysis Minor**

Banner Code: DATA

Phone: 703-993-3645  
Email: statistics@gmu.edu  
Website: statistics.gmu.edu

The minor provides students with a background in data analysis and statistical methodology. It is intended to complement undergraduate degree programs such as computer science, economics, environmental engineering, geography, mathematics, nursing, psychology, public administration, sociology, and systems engineering.

---

**Admissions & Policies**

**Policies**

For policies governing all minors, see AP.5.3.4 Minors.

**Digital Technology Credential**

Student can earn the Digital Technology Credential (https://statistics.preprod.gmu.edu/digital-technology-credential/) by enrolling in the Data Analysis Minor.

**Program Requirements**

The minor requires 15 credits: a core sequence of 6 credits, plus 9 credits of electives. Grades of C or better are required in all courses. At least 3 of the 9 elective credits must be in STAT or CDS courses numbered above 300. At least 8 credits must be in courses not required by the student’s major.

**Requirements**

**Minor Requirements**

Total credits: 15

**Core Sequence Credits**

</tbody>
</table>
Statistical science is regarded as one of the oldest and most successful information technology (IT) subjects. It focuses on the conversion of raw data into information. In this graduate program, students are trained in the theory and practice of statistical methodology, particularly as it relates to high-technology applications.

Admissions & Policies

Admissions

In addition to satisfying general admission requirements for graduate study, all applicants are expected to have basic computer literacy and some experience using statistical software (such as SAS and R). They also must hold a bachelor's degree from an accredited institution in a field that includes coursework in multivariable calculus, matrix or linear algebra, statistics, calculus-based probability, and statistical software. These requirements are normally satisfied if students have successfully completed courses equivalent to the following Mason courses:

<table>
<thead>
<tr>
<th>Code</th>

</tr>
</tbody>
</table>

Coursework taken to correct deficiencies in undergraduate preparation is not counted toward the degree.

Specific application deadlines and requirements (https://admissions.gmu.edu/grad/application-deadlines-and-requirements/?academicUnit=VS&_ga=1.107632321.273102085.1480697294/) are available through the Office of Graduate Admissions.

Requirements

Degree Requirements

Total credits: 30

In addition to meeting general requirements that apply to master's degrees at Mason, all students must complete the 15-credit core requirements for the degree. Grades of B- or better are required in three of the core courses: STAT 544 Applied Probability, STAT 544 Applied Probability, and STAT 654 Applied Statistics II. Students build on these core requirements by choosing 9 credits of methodology courses and 6 credits of electives.

Students select either the professional or research option, depending on career ambitions. The professional option provides MS degree qualifications to those seeking an expanded knowledge base in modern statistical theory and practice but do not wish to pursue a research career. The research option is for students planning to continue with a PhD degree, or begin/continue careers in statistical methodology research.
Professional Option

The professional option focuses on completing coursework in modern statistical theory and practice. 30 credits are required for the degree: 15 credits of core courses (taken by all MS students), 9 credits of methodology courses, and 6 credits of electives.

Students who select the professional option may elect to complete a master’s research project resulting in a technical report. This report is not an original research report but a scholarly essay on a topic of current interest in the statistical science discipline. The technical report! is usually about 20 to 25 pages long and demonstrates the student's ability to read and synthesize current technical literature into a scholarly essay. The report is evaluated by the student’s adviser, taking into account the comprehensiveness of the coverage of the scientific literature, the accuracy of presentation and interpretation, and the literary style. Students are notified of their evaluations, and they may be required to revise their report to further develop their skills in preparing reports on technical subjects. The report is usually written in the context of 3 credits of STAT 798 Master's Research Project, which count as elective credits. Students opting not to complete a research project must take 30 credits of coursework.

Research Option

The research option requires 30 credits, including 6 credits that must be in independent research (thesis). Research is done with approval under the guidance of a faculty member. Research may be carried out at Mason or, if appropriate, at nearby facilities. For example, students may pursue research at their place of employment on topics of interest to their employer, provided the research meets the standards of the university. The thesis is usually written in the context of 6 credits of STAT 799 Master’s Thesis, which count as elective credits. The remaining 24 credits include the 15 core credits and 9 methodology credits.

In addition to satisfying general university requirements for a master’s degree, candidates who select the research option must submit a thesis based on the research to the student’s thesis committee, which must give preliminary approval. The composition and appointment of this committee follows graduate program policies.

Candidates also must pass a final oral exam that concentrates on, but is not limited to, the area on which the thesis is written. The exam is administered by the student’s thesis committee, and all interested members of the graduate faculty are invited to attend and participate in the questioning. The thesis committee makes the final decision on whether the candidate passes or fails.

Core Courses

The core coursework covers the basic elements of statistics at the graduate level. STAT 544 Applied Probability covers the major mathematical framework for statistical theory and practice. STAT 652 Statistical Inference provides basic statistical theory. After completing this course, students have the theoretical basis from which statistical methods are derived.

STAT 554 Applied Statistics I is a survey of statistical methods that have become the backbone of statistical practice. Focus in this course is on techniques that quantify random behavior. STAT 654 Applied Statistics II, provides an overview of principles of statistical modeling.

The final core course is STAT 634 Case Studies in Data Analysis, which is a writing intensive course that serves as a capstone experience.

Notes:

- Credit toward the MS in Statistical Science will not be given for both STAT 515 Applied Statistics and Visualization for Analytics and STAT 663 Statistical Graphics and Data Exploration I.
• Credit toward the MS in Statistical Science will not be given for both MATH 654 Construction and Evaluation of Actuarial Models II and STAT 668 Survival Analysis.

• A student concurrently enrolled in the Actuarial Sciences Graduate Certificate and the MS in Statistical Science may count MATH 551 Regression and Time Series and MATH 553 Advanced Mathematical Statistics in Actuarial Sciences as elective courses and may count MATH 555 Actuarial Modeling I and MATH 653 Construction and Evaluation of Actuarial Models I as methodology courses. The Graduate Certificate in Actuarial Sciences must be completed prior to or concurrently with the MS in Statistical Science. Otherwise, at most two of MATH 551 Regression and Time Series, MATH 553 Advanced Mathematical Statistics in Actuarial Sciences, MATH 555 Actuarial Modeling I, and MATH 653 Construction and Evaluation of Actuarial Models I can be counted toward the MS in Statistical Science as elective courses; none can be applied as methodology courses.

Dual Degree Options

Mathematics and Statistical Science Dual-Degree MS

This program allows students to earn an MS in Mathematics and an MS in Statistical Science by completing 48 credits of coursework in both areas instead of the 60 that would be required if the degrees were sought independently.

Admission Requirements

Applicants must satisfy admission requirements for both the MS in Mathematics and the MS in Statistical Science programs. A joint faculty committee from the Department of Mathematical Sciences and the Department of Statistics make final admission decisions into the dual-degree program.

Notes:

• Students in either the BS/Accelerated MS in Mathematics program or the BS(selected)/Accelerated MS in Statistical Science program cannot get a reduction of 6 credits toward this dual degree. Students who want to proceed to a PhD degree will only be able to waive the number of credits specified in the associated PhD degree requirements, even though they will have 48 credits at the MS level.

• If a student decides not to complete the required 48 credits, a single MS degree will not be granted unless the student fulfills the requirements for either the MS in Mathematics or the MS in Statistical Science.

• Once a student receives one of the MS degrees from either department, the student will no longer be eligible for the reduction in credit (i.e., will need to complete 30 credits) if the student later decides to earn the other MS degree.

Notes

- Students currently enrolled in one of the MS programs must declare pursuit of the dual MS within one year of matriculation into the first MS program.
- A maximum of 6 credits across the two disciplines may be in independent research (thesis). The requirements for independent research are the same as detailed for the associated MS program.
- Students in either the BS (selected)/Operations Research, Accelerated MS program or the BS (selected)/Statistical Science, Accelerated MS program cannot get a reduction of 6 credits toward this dual degree. Students who want to proceed to a PhD degree will only be able to waive the number of credits specified in the associated PhD degree requirements, even though they will have 48 credits at the MS level.
- If a student decides not to complete the required 48 credits, a single MS degree will not be granted unless the student fulfills the requirements for the MS in Operations Research or the MS in Statistical Science.
- Once a student receives one of the MS degrees from either department, the student will no longer be eligible for the reduction in credit (i.e., will need to complete 30 credits) if the student later decides to earn the other MS degree.

Accelerated Option Requirements

Students must complete all credits satisfying degree requirements for the BS and MS programs, with 6 credits overlap chosen from the following courses: STAT 515 Applied Statistics and Visualization for Analytics, STAT 544 Applied Probability, STAT 554 Applied Statistics I, STAT 560 Biostatistical Methods, and STAT 574 Survey Sampling I. (Credit may not be received for both STAT 474 and STAT 574; nor for both STAT 460 and STAT 560.) The graduate courses selected for overlap must be approved by the academic advisors of both the BS and MS programs. All graduate course prerequisites must be completed prior to enrollment. Each graduate course must be completed with a grade of B or better to apply toward the MS degree.

While still in undergraduate status, a maximum of 6 additional graduate credits may be taken as reserve graduate credit and applied to the master’s program. Reserve graduate credits do not apply to the undergraduate degree.

Degree Conferral

Students must apply the semester before they expect to complete the BS requirements to have the BS degree conferred. In addition, at the beginning of the student’s final undergraduate semester, students must complete a Bachelor’s/Accelerated Master’s Transition form that is submitted to the Office of the University Registrar and Graduate Recruitment and Enrollment Services. At the completion of MS requirements, a master’s degree is conferred.

Statistics, BS/Statistical Science, Accelerated MS

Overview

Highly-qualified students in the Statistics, BS program have the option of applying to the accelerated Statistical Science, MS program.

For more detailed information, see AP.6.7 Bachelor’s/Accelerated Master’s Degrees. For policies governing all graduate degrees, see AP.6 Graduate Policies.

Admission Requirements

No specific undergraduate BS degree is required. Students enrolled in any BS degree may apply to the accelerated Statistical Science, MS program if such an accelerated Statistical Science, MS pathway is allowable from the student’s BS program, which will be determined by the academic advisors of both the BS and MS programs; and if they have earned 90 undergraduate credits with an overall GPA of 3.00. Students must have successfully completed the following Mason courses each with a grade of C or better prior to admission to the accelerated program:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>MATH 213</td>
<td>Analytic Geometry and Calculus III</td>
<td>3</td>
</tr>
<tr>
<td>MATH 203</td>
<td>Linear Algebra</td>
<td>3</td>
</tr>
<tr>
<td>or MATH 321</td>
<td>Abstract Algebra</td>

</tbody>
</table>

Accelerated Master’s

BS (selected)/Statistical Science, Accelerated MS

Overview

Highly-qualified students in BS programs have the option of applying to the accelerated Statistical Science, MS program.

For more detailed information, see AP.6.7 Bachelor’s/Accelerated Master’s Degrees. For policies governing all graduate degrees, see AP.6 Graduate Policies.

Admission Requirements

No specific undergraduate BS degree is required. Students enrolled in any BS degree may apply to the accelerated Statistical Science, MS program if such an accelerated Statistical Science, MS pathway is allowable from the student’s BS program, which will be determined by the academic advisors of both the BS and MS programs; and if they have earned 90 undergraduate credits with an overall GPA of 3.00. Students must have
successfully completed the following Mason courses each with a grade of C or better prior to admission to the accelerated program:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>MATH 114</td>
<td>Analytic Geometry and Calculus II</td>
<td>4</td>
</tr>
<tr>
<td>MATH 203</td>
<td>Linear Algebra</td>
<td>3</td>
</tr>
<tr>
<td>STAT 334</td>
<td>Introduction to Probability Models and Simulation</td>
<td>3</td>
</tr>
<tr>
<td>or STAT 346</td>
<td>Probability for Engineers</td>
<td></td>
</tr>
<tr>
<td>STAT 354</td>
<td>Probability and Statistics for Engineers and Scientists II</td>
<td>3</td>
</tr>
<tr>
<td>or STAT 360</td>
<td>Introduction to Statistical Practice II</td>
<td></td>
</tr>
<tr>
<td>STAT 362</td>
<td>Introduction to Computer Statistical Packages</td>
<td>3</td>
</tr>
</tbody>
</table>

Accelerated Option Requirements

Students must complete all credits satisfying degree requirements for the BS and MS programs, with 6 credits overlap chosen from the following courses: STAT 515 Applied Statistics and Visualization for Analytics, STAT 544 Applied Probability, STAT 554 Applied Statistics I, STAT 560 Biostatistical Methods, and STAT 574 Survey Sampling I. All graduate course prerequisites must be completed prior to enrollment. Each graduate course must be completed with a grade of B or better to apply toward the MS degree. For Statistics, BS candidates:

- STAT 560 Biostatistical Methods replaces the corresponding undergraduate version STAT 460 Introduction to Biostatistics as a Statistical Elective. Credit may not be received for both STAT 460 and STAT 560.
- STAT 574 Survey Sampling I replaces the corresponding undergraduate version STAT 474 Introduction to Survey Sampling as a Statistical Elective. Credit may not be received for both STAT 474 and STAT 574.
- STAT 515 Applied Statistics and Visualization for Analytics, STAT 544 Applied Probability, and STAT 554 Applied Statistics I may be counted as Technical Electives toward the BS program requirements.

While still in undergraduate status, a maximum of 6 additional graduate credits may be taken as reserve graduate credit and applied to the master’s program. Reserve graduate credits do not apply to the undergraduate degree.

Degree Conferral

Students must apply the semester before they expect to complete the BS requirements to have the BS degree conferred. In addition, at the beginning of the student’s final undergraduate semester, students must complete a Bachelor’s/Accelerated Master’s Transition form that is submitted to the Office of the University Registrar and the VSE Graduate Admissions and Recruitment Office. At the completion of MS requirements, a master’s degree is conferred.

Statistical Science, PhD

Banner Code: VS-PHD-STAT

Phone: 703-993-3645
Email: statistics@gmu.edu
Website: statistics.gmu.edu

The PhD in Statistical Science represents the highest academic attainment for a statistician and, as such, requires in-depth knowledge of modern statistical theory and practice. The degree program is a hybrid of mathematical theory, computation, and data analysis; and students are expected to be proficient in all three. Current research areas of key department faculty in the program include biostatistics, statistical genetics, statistical graphics, data confidentiality, networking analysis, and data analytics.

Admissions & Policies

Admissions

Students should have a master’s degree in a mathematically-intensive discipline with a minimum 3.50 GPA. Students entering with a master’s degree are expected to have completed coursework equivalent to STAT 544 Applied Probability, STAT 554 Applied Statistics I, STAT 652 Statistical Inference, and STAT 654 Applied Statistics II with exceptional performance. The program also requires a course in advanced calculus, MATH 315 Advanced Calculus I or equivalent, with a B or better. In exceptional circumstances, talented students with a mathematically-intensive undergraduate degree may be admitted.

Specific application deadlines and requirements (https://admissions.gmu.edu/grad/application-deadlines-and-requirements/?academicUnit=VS&amp;_ga=1.107632321.273102085.1480697294/) are available through the Office of Graduate Admissions.

Policies

For policies governing all graduate programs, see AP6 Graduate Policies (https://catalog.gmu.edu/policies/graduate-policies/).

Reduction of Credit

Students must complete a minimum of 72 graduate credits, which may be reduced by a maximum of 24 credits with a master’s degree in statistics, mathematics, or similar discipline, or by 30 credits with a Master’s degree from the George Mason University Department of Statistics. Reduction of credit requires the approval of the program director or designee and the dean or designee of the school. They determine whether the credits are eligible for reduction of credit and applicable to the degree program and the number of credits to be reduced.

Requirements

Degree Requirements

Total credits: 72

The 72 hours of required doctoral-level credits typically consist of 48 credits of regular coursework and 24 credits of dissertation research. The following degree plan is based on a student who receives a 24 credit reduction. Students who receive more or less than a 24 credit reduction should consult with their advisor.

Doctoral Coursework

Students are required to complete a minimum of 24 credits of advanced emphasis coursework, including four core courses:
Code | Title | Credits
--- | --- | ---
STAT 778 | Algorithms and Simulation for Statistics in C | 3
STAT 971 | Probability Theory | 3
STAT 972 | Mathematical Statistics I | 3
STAT 973 | Mathematical Statistics II | 3

The remaining four courses are selected and approved by the doctoral supervisory committee and the PhD Program Director and should be numbered 600 or above.  

Total Credits | 24

1 STAT 652 Statistical Inference and STAT 654 Applied Statistics II do not count toward advanced emphasis coursework, if a student has received a 24 credit reduction.

**Qualifying Exams**

Written qualifying exams will be taken in the following areas:

- Applied Probability
- Applied Statistics
- Statistical Inference

Qualifying exams are offered in August and January. Students are required to take the qualifying exams within one year of admission. Supported students entering with a master’s degree are required to take the qualifying exams within one semester of admission. Students who do not pass all three exams in two consecutive exam periods are terminated from the program.

**Dissertation Research**

In order to advance to candidacy, students must complete all coursework, pass the qualifying and comprehensive examinations, and defend a dissertation proposal.

Code | Title | Credits
--- | --- | ---
Select 24 credits from the following: |  | 24
STAT 990 | Dissertation Topic Presentation (required) | 1,2
STAT 998 | Doctoral Dissertation Proposal | 3
STAT 999 | Doctoral Dissertation (must complete a minimum of 12 credits) | 4

Total Credits | 24

**Doctoral Committee Selection**

Following successfully passing the qualifying exams, students should identify a dissertation director who is willing to work with them and together assemble a doctoral studies committee. The chair of the doctoral studies committee must be a member of the graduate faculty with a regular appointment in the Department of Statistics, and will typically be the dissertation director. The doctoral studies committee consists of a chair, two members of the graduate faculty who hold regular appointments in the Department of Statistics, and an external member; see AP.6.10.5 Dissertation Committee. The doctoral studies committee must be approved by the director of the doctoral program in statistical science.

**Advancement to Candidacy**

Admission to candidacy is acquired on completion of an oral comprehensive exam administered by the doctoral supervisory committee, covering the four core courses and four advanced emphasis courses, and a dissertation proposal. A student who fails the oral comprehensive exam may take it a second time, within six months. If the student fails a second time, the student is terminated from the program. A student must wait at least six weeks after passing the oral comprehensive exam before the dissertation proposal. A student who fails the dissertation proposal may take it a second time, within six months. If the student fails a second time, the student is terminated from the program.

**Doctoral Defense**

The dissertation defense serves as the student’s final examination and is conducted by the doctoral supervisory committee. Both the pre-defense and final defense are scheduled on approval of a written request to the department chair; see AP.6.10.8 Doctoral Defense.

**Statistics Minor**

Banner Code: STIC

Phone: 703-993-3645
Email: statistics@gmu.edu
Website: statistics.gmu.edu

The minor in Statistics provides students with a background in the theory and application of statistical methodology. It is intended to complement undergraduate degree programs in the Volgenau School and the College of Science, especially those programs that require MATH 113 Analytic Geometry and Calculus I (Mason Core), MATH 114 Analytic Geometry and Calculus II, and STAT 344 Probability and Statistics for Engineers and Scientists I as a part of the major requirements.

**Admissions & Policies**

**Admissions**

To be admitted to the minor, students must have completed MATH 113 Analytic Geometry and Calculus I (Mason Core) and MATH 114 Analytic Geometry and Calculus II with a grade of C or better.

**Policies**

The minor in Statistics requires 15 credit hours of coursework. Grades of C or better are required in all courses. At least 8 credits must be in courses not required by the student’s major. For policies governing all minors, see AP.5.3.4 Minors.

**Requirements**

**Minor Requirements**

Total credits: 15

The Bachelor of Science in Statistics is designed to provide a framework for students to develop connections between statistical concepts and theories and their applications to statistical practice. It will prepare statisticians who can use modern statistical techniques to design studies, collect data, analyze and visualize high dimensional data sets, and draw valid conclusions in an increasingly data-centric world. In this program, students will meld the time-tested concepts and theories of statistics with modern methods of analysis, in order to interpret the data that is collected in nearly every discipline and every sector of industry and government.

The BS in Statistics requires a total of 120 credit hours, including major core requirements, concentration requirements, and Mason Core requirements. The program’s major core curriculum provides students with a firm foundation in statistics, mathematics, and computing. Selection of a concentration allows a student to specialize in applied, theoretical, or computational aspects of statistical practice.

Students will select one of three concentrations: Applied Statistics, Mathematical Statistics, or Statistical Analytics. The Applied Statistics concentration focuses on developing proficiency in analytical methods applicable to a specific discipline of the student’s choosing. This is accomplished through the requirement to complete a minor in a field that makes substantial use of data analysis. The Mathematical Statistics concentration is designed for students interested in mastering the theoretical underpinnings of statistics and probability; this concentration is recommended for students who intend to continue graduate studies in statistics or whose main focus is on research. The Statistical Analytics concentration blends the disciplines of computer science and statistics in a very modern way and is designed for students interested in applying concepts from statistics and computer science to the analysis of massive data sets.

Graduates of this program can look forward to careers in local, state, and federal government, and in the many industries that conduct scientific research, collect, and analyze data. They will enter the workforce with the ability to impact science, public policy, technology, and industry in a positive way through their expertise in data collection, analysis, synthesis, and interpretation, each with the highest ethical standards. Graduates will also be well prepared to continue their studies in graduate schools if they so desire.

**Admissions & Policies**

**Policies**

**Advanced Placement, Credit by Exam**

A score of 5 on the Advanced Placement (AP) statistics exam qualifies students for credit in STAT 260.

**Change of Major**

Students considering changing their major to Statistics should consult with the Volgenau School of Engineering Coordinator of Undergraduate Advising, 2500 Nguyen Engineering Building. These students must have a cumulative GPA of at least 2.75 and completed MATH 114 with a grade of C or better. See Change of Major for more information.

**Grades**

Students must earn a C or better in Major Core requirement courses as well as in courses required to satisfy prerequisites. Also, students must earn a C or better in at least 6 credits of the courses used to fulfill the 9 credits of Statistics Restricted Electives.

**Termination from the Major**

No math, science, or Volgenau School of Engineering course that is required for the major may be attempted more than three times. Those students who do not successfully complete a course within three attempts will be terminated from the major. Undeclared students in the Volgenau School who do not successfully complete a course required for a Volgenau School major within three attempts will also be terminated.

In addition, students in the Volgenau School with evidence of continued failure to make adequate progress toward declaring or completing a Volgenau School major will be terminated from the school. Adequate progress is determined by the major program. For more information, see AP 5.2.4 Termination from the Major (https://catalog.gmu.edu/policies/academic/undergraduate-policies/#ap-5-2-4).

Once a student has attempted one of these courses twice unsuccessfully, the third attempt must be no later than the next semester of enrollment, excluding summers. Failure to take the course at that time will result in termination from the major. A third attempt of a Volgenau School of Engineering course requires support by the student’s major department as well as permission by the department offering the course. This permission is not guaranteed. If the student is unable to take the course when required, the student may request an extension to a future semester; extensions require approval of the student’s advisor; their
department, and the Associate Dean for Undergraduate Programs. The
deadline for extension requests is the add deadline for the semester in
which the course is required.

Students who have been terminated from a Volgenau School of
Engineering major may not register for a Volgenau School course without
permission of the department offering the course. This applies to all
undergraduate courses offered by the Volgenau School except IT 104
Introduction to Computing (Mason Core) and STAT 250 Introductory
Statistics I (Mason Core).

A student may not declare any major in the Volgenau School of
Engineering if the student has previously met the termination criteria for
that major at any time, regardless of what the student’s major was at the
time the courses were taken.

Concentrations
Select one concentration and complete all requirements.

Concentrations
• Concentration in Applied Statistics (ASTA)
• Concentration in Mathematical Statistics (MTHS)
• Concentration in Statistical Analytics (STLA)

Concentration in Applied Statistics (ASTA)
Focuses on developing proficiency in analytical methods applicable to
a specific discipline of the student’s choosing. This is accomplished
through the requirement to complete a minor in a field that makes substantial use of data analysis.

### Code Title Credits

Students must complete 15 - 21 credits in a pre-approved minor, selected in consultation with the undergraduate coordinator. Courses taken to fulfill the minor requirements that are not used to fulfill Major Core or Restricted Electives requirements are considered unique to the minor. At least 15 credits of the minor coursework, technical electives, general electives, and additional Mason Core courses must be at or above the 300 level.

#### Concentration in Mathematical Statistics (MTHS)

Designed for students interested in mastering the theoretical underpinnings of statistics and probability; this concentration is recommended for students who intend to continue graduate studies in statistics or whose main focus is on research.

### Code Title Credits

### 4-Year Plan

#### Bachelor of Science in Statistics Sample Plan of Study

Detailed four year plans and degree planning checklists can be found at [https://advising.gmu.edu/current-student/majors-at-mason/](https://advising.gmu.edu/current-student/majors-at-mason/).

#### Accelerated Master's

Statistics, BS/Biostatistics, Accelerated MS

**Overview:**

Highly-qualified students in Statistics, BS have the option of obtaining an accelerated Biostatistics, MS. Students in an accelerated degree program must fulfill all university requirements for the master’s degree. For more detailed information, see AP.6.7 Bachelor’s/Accelerated Master’s Degrees ([https://catalog.gmu.edu/policies/academic/graduate-policies/#ap-6-7](https://catalog.gmu.edu/policies/academic/graduate-policies/#ap-6-7)). For policies governing all graduate degrees, see AP.6 Graduate Policies ([https://catalog.gmu.edu/policies/academic/graduate-policies/](https://catalog.gmu.edu/policies/academic/graduate-policies/)).

**Admission Requirements:**

Students enrolled in a BS degree in Statistics may apply to this option if they have earned 90 undergraduate credits with an overall GPA of 3.00.

**Accelerated Option Requirements:**

Students must complete all requirements for the BS and MS programs, with 6 credits overlap.

Students must complete all credits that satisfy requirements for the BS and MS programs, with 6 credits overlapping with grades of B or better in two 500-level STAT selected from STAT 544 ([https://catalog.gmu.edu/search/?P=STAT%20544/](https://catalog.gmu.edu/search/?P=STAT%20544/)) Applied Probability, STAT 554 ([https://catalog.gmu.edu/search/?P=STAT%20554/](https://catalog.gmu.edu/search/?P=STAT%20554/)) Applied Statistics I, and STAT 560, Biostatistical methods.

**Degree Conferral:**

Students must apply the semester before they expect to complete the BS requirements to have the BS degree conferred. In addition, at
the beginning of the student’s final undergraduate semester, students must complete a Bachelor’s/Accelerated Master’s Transition form that is submitted to the Office of the University Registrar and Graduate Recruitment and Enrollment Services. At the completion of MS requirements, a master’s degree is conferred.

Statistics, BS/Data Analytics Engineering, Accelerated MS

Overview
Highly-qualified students in the Statistics, BS program have the option of applying to the accelerated Data Analytics Engineering, MS program.

For more detailed information, see AP6.7 Bachelor’s/Accelerated Master’s Degrees. For policies governing all graduate degrees, see AP6 Graduate Policies.

Admission Requirements
Students in the Statistics, BS program may apply to the accelerated Data Analytics Engineering, MS program if they have earned 90 undergraduate credits with an overall GPA of at least 3.30.

Accelerated Option Requirements
Students must complete all credits that satisfy requirements for the BS and MS programs, with six credits overlap chosen from the following courses:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>CS 504</td>
<td>Principles of Data Management and Mining</td>
<td>3</td>
</tr>
<tr>
<td>or CS 584</td>
<td>Theory and Applications of Data Mining</td>
<td></td>
</tr>
<tr>
<td>OR 541</td>
<td>Operations Research: Deterministic Models</td>
<td>3</td>
</tr>
<tr>
<td>or OR 531</td>
<td>(Credit may not be received for both OR 441 and OR 541.)</td>
<td></td>
</tr>
<tr>
<td>STAT 515</td>
<td>Applied Statistics and Visualization for</td>
<td>3</td>
</tr>
<tr>
<td>or STAT 554</td>
<td>Analytics</td>
<td></td>
</tr>
</tbody>
</table>

All graduate course prerequisites must be completed prior to enrollment. Each 500-level course must be completed with a grade of B or better to apply toward the MS program. The graduate courses selected for overlap must be approved by the academic advisors of both the BS and MS programs. The graduate courses may be counted as Technical Electives toward the Statistics, BS program requirements, with approval of Statistics Department undergraduate coordinator.

Degree Conferral
Students must apply the semester before they expect to complete the BS requirements to have the BS degree conferred. In addition, at the beginning of the student’s final undergraduate semester, students must complete a Bachelor’s/Accelerated Master’s Transition form (https://registrar.gmu.edu/forms/) that is submitted to the Office of the University Registrar and the VSE Graduate Admissions and Recruitment office. At the completion of MS requirements, a master’s degree is conferred.

Statistics, BS/Operations Research, Accelerated MS

Overview
Highly-qualified students in the Statistics, BS have the option of obtaining an accelerated Operations Research, MS.

For more detailed information, see AP6.7 Bachelor’s/Accelerated Master’s Degrees. For policies governing all graduate degrees, see AP6 Graduate Policies.

Admission Requirements
Mason undergraduate students majoring in Statistics, BS may apply to this option if they have earned 90 undergraduate credits with an overall GPA of at least 3.30 and completed all MATH and PHYS requirements. Criteria for admission are identical to criteria for admission to the Operations Research, MS program.

Accelerated Options Requirement
Students must complete all credits that satisfy requirements for both the BS and MS programs. Up to two courses (6 credit hours) of approved master’s level courses taken as part of the undergraduate degree may be applied to the graduate degree. The courses selected for this purpose must be approved by the academic advisors of both the BS and MS programs and by the SEOR department chair. For the BS programs that allow undergraduate electives from the department of system engineering and operations research, the students may choose the graduate version of such electives to replace the corresponding undergraduate courses.

Degree Conferral
Students must apply the semester before they expect to complete the BS requirements to have the BS degree conferred. In addition, at the beginning of the student’s final undergraduate semester, students must complete a Bachelor’s/Accelerated Master’s Transition form that is submitted to the Office of the University Registrar and the VSE Graduate Admissions Office. At the completion of MS requirements, a master’s degree is conferred.

Statistics, BS/Systems Engineering, Accelerated MS

Overview
Highly-qualified students in the Statistics, BS have the option of obtaining an accelerated Systems Engineering, MS.

For more detailed information, see AP6.7 Bachelor’s/Accelerated Master’s Degrees. For policies governing all graduate degrees, see AP6 Graduate Policies.

Admission Requirements
Mason undergraduate students majoring in Statistics, BS may apply to this option if they have earned 90 undergraduate credits with an overall GPA of at least 3.30 and completed all MATH and PHYS requirements. Criteria for admission are identical to criteria for admission to the Systems Engineering, MS program.

Accelerated Options Requirement
Students must complete all credits that satisfy requirements for both the BS and MS programs. Up to two courses (6 credit hours) of approved master’s level courses taken as part of the undergraduate
degree may be applied to the graduate degree. The courses selected for this purpose must be approved by the academic advisors of both the BS and MS programs and by the SEOR department chair. For the BS programs that allow undergraduate electives from the department of system engineering and operations research, the students may choose the graduate version of such electives to replace the corresponding undergraduate courses.

Degree Conferral

Students must apply the semester before they expect to complete the BS requirements to have the BS degree conferred. In addition, at the beginning of the student’s final undergraduate semester, students must complete a Bachelor’s/Accelerated Master’s Transition form that is submitted to the Office of the University Registrar and the VSE Graduate Admissions Office. At the completion of MS requirements, a master’s degree is conferred.

Statistics, BS/Statistical Science, Accelerated MS

Overview

Highly-qualified students in the Statistics, BS program have the option of applying to the accelerated Statistical Science, MS program.

For more detailed information, see AP6.7 Bachelor’s/Accelerated Master’s Degrees. For policies governing all graduate degrees, see AP6 Graduate Policies.

Admission Requirements

Students in the Statistics, BS program may apply to the accelerated Statistical Science, MS program if they have earned 90 undergraduate credits with an overall GPA of 3.00. Students must have successfully completed the following Mason courses each with a grade of C or better prior to admission to the accelerated program:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>MATH 114</td>
<td>Analytic Geometry and Calculus II</td>
<td>4</td>
</tr>
<tr>
<td>MATH 203</td>
<td>Linear Algebra</td>
<td>3</td>
</tr>
<tr>
<td>STAT 334</td>
<td>Introduction to Probability Models and Simulation</td>
<td>3</td>
</tr>
<tr>
<td>or STAT 346</td>
<td>Probability for Engineers</td>
<td>3</td>
</tr>
<tr>
<td>STAT 354</td>
<td>Probability and Statistics for Engineers and Scientists II</td>
<td>3</td>
</tr>
<tr>
<td>or STAT 360</td>
<td>Introduction to Statistical Practice II</td>
<td>3</td>
</tr>
<tr>
<td>STAT 362</td>
<td>Introduction to Computer Statistical Packages</td>
<td>3</td>
</tr>
</tbody>
</table>

Accelerated Option Requirements

Students must complete all credits satisfying degree requirements for the BS and MS programs, with 6 credits overlap chosen from the following courses: STAT 515 Applied Statistics and Visualization for Analytics, STAT 544 Applied Probability, STAT 554 Applied Statistics I, STAT 560 Biostatistical Methods, and STAT 574 Survey Sampling I. All graduate course prerequisites must be completed prior to enrollment. Each graduate course must be completed with a grade of B or better to apply toward the MS degree. For Statistics, BS candidates:

- STAT 560 Biostatistical Methods replaces the corresponding undergraduate version STAT 460 Introduction to Biostatistics as a Statistical Elective. Credit may not be received for both STAT 460 and STAT 560.
- STAT 574 Survey Sampling I replaces the corresponding undergraduate version STAT 474 Introduction to Survey Sampling as a Statistical Elective. Credit may not be received for both STAT 474 and STAT 574.
- STAT 515 Applied Statistics and Visualization for Analytics, STAT 544 Applied Probability, and STAT 554 Applied Statistics I may be counted as Technical Electives toward the BS program requirements.

While still in undergraduate status, a maximum of 6 additional graduate credits may be taken as reserve graduate credit and applied to the master’s program. Reserve graduate credits do not apply to the undergraduate degree.

Degree Conferral

Students must apply the semester before they expect to complete the BS requirements to have the BS degree conferred. In addition, at the beginning of the student’s final undergraduate semester, students must complete a Bachelor’s/Accelerated Master’s Transition form that is submitted to the Office of the University Registrar and the VSE Graduate Admissions and Recruitment Office. At the completion of MS requirements, a master’s degree is conferred.

Department of Systems Engineering and Operations Research

John Shortle, Chair

Phone: 703-993-5689
Email: seor@gmu.edu
Website: seor.gmu.edu

The Systems Engineering and Operations Research (SEOR) Department offers a bachelor’s degree in systems engineering, a minor in systems engineering, a minor in aviation flight training and management, a master’s degree in systems engineering, a master’s degree in operations research, and a doctoral degree in systems engineering and operations research. The department also offers a concentration in predictive analytics and a concentration in financial engineering within the school-wide master’s degree in data analytics engineering. In addition, the department offers six systems engineering certificates at the master’s level: architecture-based systems integration, C4I and cyber (command, control, communications, computing, intelligence, and cyber), engineering resilient enterprise systems, communication and networking, tactical computer operations, and financial systems; the department offers three operations research certificates: computational modeling, military operations research, and predictive data analytics. The department also offers a dual master’s degree in operations research and master’s degree in statistical science jointly with the Statistics Department.

There is much overlap between systems engineering and operations research. The department encourages students of either discipline to elect courses in the other. For more information, go to the department’s website (http://seor.gmu.edu/).

Systems Engineering

Systems engineers determine the most effective ways to use all of a system’s components: people, machines, materials, information, and energy. The engineers plan, design, implement, and manage integrated systems, working to ensure performance, safety, reliability,
and maintainability. They also work to ensure that systems are delivered on time at a reasonable cost. Examples of systems include the national air transportation system, computer networks, autonomous vehicles, intelligent robots, the electric power grid, healthcare systems, and financial trading systems. Whereas other engineering disciplines concentrate on individual aspects of a system, such as electronics, ergonomics, or software, systems engineers focus on the system as a whole and the interaction of the underlying parts. Systems engineering, perhaps more than any other engineering discipline, is involved with the human and organizational aspects of developing the desired system. Systems engineering is the people-oriented engineering profession.

Operations Research
Operations research is the professional field that uses analytical and data-based methods in engineering to support management decision making, often focusing on how best to allocate limited resources. Operations researchers do for organizations what physicists do for the physical world: they try to find order in apparent chaos by identifying the structure in complex situations and understanding how the components of organizations interact. The goal is to explain and predict the effects of actions taken on these systems and to use the information to make informed management decisions. Much of this work is developing and manipulating mathematical and computer models of organizational systems, frequently making use of big data to build and run the models.

Faculty

Professors
Adelman, Brouse, Chang, Chen, Hoffman, Laskey, Nash, Pyster, Shortle (chair), Sofer, Zaidi

Associate Professors
Baldo, Clemons, Costa, Ganesan, Huang, Jones, Loerch, Sherry, Xu

Assistant Professors
El-Amine, Ji, Sokolov

Research and Affiliate Professors
Miller-Hooks, Wagner, Wolman

Adjunct Professors
Arab, Bailey, Barry, Burke, Charbonneau, Comer, Dam, Edson, Ferreiro, Guharay, Hashim, Icore, Keltz, Killam, Laveson, Maxwell, Morris, Mulhearn, Nicholas, Ray, Rothwell, Stimpson, Vermillion, Warren, Wieland, Woodaman, Xie

Emeritus Faculty
Donohue, Palmer

Programs

- Aviation Flight Training and Management Minor
- Operations Research and Engineering Graduate Certificate
- Operations Research, MS
- Systems Engineering Graduate Certificate (SEOR)
- Systems Engineering Minor
- Systems Engineering and Operations Research, PhD
- Systems Engineering, BS
- Systems Engineering, MS

Aviation Flight Training and Management Minor
Banner Code: AVIM

Academic Advising
2100 Nguyen Engineering Building
Fairfax Campus
Phone: 703-993-5689

Website: seor.gmu.edu/program/view/20803

Students completing the minor will take classes for Pilot Ground School and Flight Training leading up to a solo flight. In addition, students will study aspects of aviation from systems engineering of air traffic control, design of airports, human factors and psychology, and financial planning and management. Students will be trained for required government licensing exams such as the Federal Aviation Administration (FAA) Knowledge Test and FAA Flight tests. Special fees to cover flight training costs will apply. Students are responsible for meeting all eligibility requirements.

Admissions & Policies

Policies
Eight credits of coursework must be unique to the minor. For policies governing all minors, see AP.5.3.4 Minors.

**Prerequisites**

Some of the courses listed above have additional prerequisites. Students should pay careful attention to prerequisites when selecting courses.

**Admissions & Policies**

**Admissions**

**Computational Modeling Concentration**

For admission to the certificate with a Computational Modeling concentration, applicants must meet minimum entrance requirements for the MS in operations research, the MS in statistical science, or the PhD in computational sciences and informatics.

**Military Operations Research Concentration**

Admissions requirements for the certificate with a Military Operations Research concentration are identical to those for the Operations Research, MS.

**Predictive Data Analytics Concentration**

The certificate with Predictive Analytics concentration will be open to all students who hold a BS degree in scientific and engineering disciplines from an accredited university program, with a minimum GPA of 3.0. Students who are already enrolled in a master's program must submit a secondary certificate form to enroll in this certificate with concentration program; all others must apply for graduate admission to this certificate with concentration program.

**Policies**

For policies governing all graduate certificates, see AP.6.8 Requirements for Graduate Certificates.

Courses taken for the Computational Modeling certificate can count toward a master's degree in operations research or statistics or a PhD in computational sciences and informatics. One must be concurrently enrolled in the program for courses to count toward the certificate and the other degree.

**Requirements**

**Total credits: 12-15**

This certificate may be pursued on a part-time basis only.

**Certificate Requirements**

Students must complete all requirements within a concentration.

**Concentration in Computational Modeling (CCM)**

Operations Research, MS

Banner Code: VS-MS-OPRS

Academic Advising
2100 Nguyen Engineering Building
Fairfax Campus
Phone: 703-993-5689
Email: seor@gmu.edu
Website: seor.gmu.edu/grad.html

The Master of Science in Operations Research prepares students for research and professional practice associated with the formulation and analysis of mathematical models for decision making and their computer implementation. Major components include optimization, queuing and network modeling, computer simulation and modeling, applied and computational probability, and application of these components to realistic and relevant operational analysis problems. Students are expected to become proficient in these areas, as well as in supporting areas of information technology necessary to implement operations research methods.

The program includes core courses and electives selected by the student with the aid of a faculty advisor. To obtain the MS degree, students complete an approved plan of study that contains a minimum of 30 graduate credits. Students may take courses through the Commonwealth Graduate Engineering Program. Appropriate courses may be transferred, with advisor approval, into this degree program.

Admissions & Policies

Admissions
To be admitted to the program, students must hold a baccalaureate degree from an accredited institution in engineering, mathematics, computer science, physical sciences, economics, or a related field. They also must have completed courses in:

</table>

Total Credits: 12

Project or Thesis (Optional)

Students must complete three credit hours of OR 699 Masters Project. Students in this course work in teams on approved applied project. A project report is submitted at the end of the semester, and a final project presentation is made to the entire faculty of the SEOR Department.

Students with the consent of a faculty adviser and departmental approval, may be approved to complete a thesis.

<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>Select up to three additional electives from the list of allowable electives with written concurrence of the advisor</td>
<td>9</td>
</tr>
</tbody>
</table>

Total Credits 9

1 At least two of these electives must be taken from SEOR course offerings, and one of these must be OR 600-level or higher. The remaining course should be taken in an area appropriate to the student’s interests, such as operations research, systems engineering, computer science, information systems, statistics, data analytics, electrical and computer engineering, economics, mathematics or supply chain management.

The allowable elective for MS students includes:
A. Within VSE:
   o Any OR course ≥600
   o Any SYST course > 500
   o Any STAT course ≥ 554
   o Any CS course ≥ 500
   o Any ECE course ≥ 500 but not 528
   o Any CEIE course > 500 but not 601

B. External to VSE (subject to approval by the Department Chair):
   o Any MATH course > 601 and permitted for Math majors;
   o Any CSI course > 610
   o Any ECON course ≥ 611

Concentrations

Students may construct concentration areas by choosing electives from among special groupings. The six concentrations available are data analytics, decision analysis, financial engineering, military operations research, optimization, and stochastic modeling. In addition to the required core courses (12 credits) and project course (3 credits), the remaining 15 credit hours consist of methods and elective courses associated with the concentration areas as outlined below. Students can also devise their own grouping of electives subject to prior approval of their advisor.

Available Concentrations

• Concentration in Data Analytics (DNIC)
• Concentration in Decision Analysis (DA)
• Concentration in Financial Engineering (FNNE)
• Concentration in Military Operations Research (MOR)
• Concentration in Optimization (OPT)
• Concentration in Stochastic Models (STM)

Total Credits 15

Dual Degree Options

Operations Research and Statistical Science Dual-Degree MS
This program allows students to earn an MS in Operations Research and an MS in Statistical Science by completing 48 credits of coursework in both areas instead of the 60 that would be required if the degrees were sought independently.

Admission Requirements
Applicants must satisfy admission requirements for the MS in Operations Research Program and the MS in Statistical Science Program. A joint faculty committee from the Statistics and Systems Engineering and Operations Research Departments make final admission decisions into the dual-degree program.

MS-OPRS/STAT Dual Degree Requirements

Elective Credits in STAT Courses
Select 9 elective credits from any STAT courses numbered 540-775

Total Credits 9

Notes
- Students currently enrolled in one of the MS programs must declare pursuit of the dual MS within one year of matriculation into the first MS program.
- A maximum of 6 credits across the two disciplines may be in independent research (thesis). The requirements for independent research are the same as detailed for the associated MS program.
- Students in either the BS (selected)/Operations Research, Accelerated MS program or the BS (selected)/Statistical Science, Accelerated MS program cannot get a reduction of 6 credits toward this dual degree. Students who want to proceed to a PhD degree
will only be able to waive the number of credits specified in the associated PhD degree requirements, even though they will have 48 credits at the MS level.

- If a student decides not to complete the required 48 credits, a single MS degree will not be granted unless the student fulfills the requirements for the MS in Operations Research or the MS in Statistical Science.
- Once a student receives one of the MS degrees from either department, the student will no longer be eligible for the reduction in credit (i.e., will need to complete 30 credits) if the student later decides to earn the other MS degree.

### Accelerated Master's

#### Bioengineering, BS/Operations Research, Accelerated MS

**Overview**

Highly-qualified students in the Bioengineering, BS have the option of obtaining an accelerated Operations Research, MS.

For more detailed information, see AP6.7 Bachelor's/Accelerated Master's Degrees. For policies governing all graduate degrees, see AP6 Graduate Policies.

**Admission Requirements**

Mason undergraduate students majoring in Bioengineering, BS may apply to this option if they have earned 90 undergraduate credits with an overall GPA of at least 3.30 and completed all MATH and PHYS requirements. Criteria for admission are identical to criteria for admission to the Operations Research, MS program.

**Accelerated Options Requirement**

Students must complete all credits that satisfy requirements for both the BS and MS programs. Up to two courses (6 credits) of approved master's level courses taken as part of the undergraduate degree may be applied to the graduate degree. The courses selected for this purpose must be approved by the academic advisors of both the BS and MS programs and by the SEOR department chair. For the BS programs that allow undergraduate electives from the department of system engineering and operations research, the students may chose the graduate version of such elective courses to replace the corresponding undergraduate courses.

**Degree Conferral**

Students must apply the semester before they expect to complete the BS requirements to have the BS degree conferred. In addition, at the beginning of the student's final undergraduate semester, students must complete a Bachelor's/Accelerated Master's Transition form that is submitted to the Office of the University Registrar and the VSE Graduate Admissions Office. At the completion of MS requirements, a master's degree is conferred.

#### Computer Engineering, BS/Operations Research, Accelerated MS

**Overview**

Highly-qualified students in the Computer Engineering, BS have the option of obtaining an accelerated Operations Research, MS.

For more detailed information, see AP6.7 Bachelor's/Accelerated Master's Degrees. For policies governing all graduate degrees, see AP6 Graduate Policies.

**Admission Requirements**

Mason undergraduate students majoring in Computer Engineering, BS may apply to this option if they have earned 90 undergraduate credits with an overall GPA of at least 3.30 and completed all MATH, PHYS 160/161, and PHYS 260/261 requirements. Criteria for admission are identical to criteria for admission to the Operations Research, MS program.

Students must additionally complete MATH 203 Linear Algebra prior to applying for the graduate program.

**Accelerated Options Requirement**

Students must complete all credits that satisfy requirements for both the BS and MS programs. Up to two courses (6 credits) of approved master's level courses taken as part of the undergraduate degree may be applied to the graduate degree. At least one of the courses must be from

#### Civil and Infrastructure Engineering, BS/Operations Research, Accelerated MS

**Overview**

Highly-qualified students in the Civil and Infrastructure Engineering, BS have the option of obtaining an accelerated Operations Research, MS.

For more detailed information, see AP6.7 Bachelor's/Accelerated Master's Degrees. For policies governing all graduate degrees, see AP6 Graduate Policies.

**Admission Requirements**

Mason undergraduate students majoring in Civil and Infrastructure Engineering, BS may apply to this option if they have earned 90 undergraduate credits with an overall GPA of at least 3.30 and completed all MATH and PHYS requirements. Criteria for admission are identical to criteria for admission to the Operations Research, MS program.

Students must additionally complete MATH 203 Linear Algebra prior to applying for the graduate program.

**Accelerated Options Requirement**

Students must complete all credits that satisfy requirements for both the BS and MS programs. Up to two courses (6 credits) of approved master's level courses taken as part of the undergraduate degree may be applied to the graduate degree. At least one of the courses must be from
Electrical and Computer Engineering department. The courses selected for this purpose must be approved by the academic advisors of both the BS and MS programs and by the SEOR department chair. For the BS programs that allow undergraduate electives from the department of system engineering and operations research, the students may choose the graduate version of such elective courses to replace the corresponding undergraduate courses.

**Degree Conferral**
Students must apply the semester before they expect to complete the BS requirements to have the BS degree conferred. In addition, at the beginning of the student’s final undergraduate semester, students must complete a Bachelor’s/Accelerated Master’s Transition form that is submitted to the Office of the University Registrar and the VSE Graduate Admissions Office. At the completion of MS requirements, a master’s degree is conferred.

**Cyber Security Engineering, BS/Operations Research, Accelerated MS**

**Overview**
Highly-qualified students in the Cyber Security Engineering, BS have the option of obtaining an accelerated Operations Research, MS.

For more detailed information, see AP6.7 Bachelor’s/Accelerated Master’s Degrees. For policies governing all graduate degrees, see AP6 Graduate Policies.

**Admission Requirements**
Mason undergraduate students majoring in Cyber Security Engineering, BS may apply to this option if they have earned 90 undergraduate credits with an overall GPA of at least 3.30 and completed all MATH and PHYS requirements. Criteria for admission are identical to criteria for admission to the Operations Research, MS program.

**Accelerated Options Requirement**
Students must complete all credits that satisfy requirements for both the BS and MS programs. Up to two courses (6 credits) of approved master’s level courses taken as part of the undergraduate degree may be applied to the graduate degree. At least one of the courses must be from Electrical and Computer Engineering department. The courses selected for this purpose must be approved by the academic advisors of both the BS and MS programs and by the SEOR department chair. For the BS programs that allow undergraduate electives from the department of system engineering and operations research, the students may choose the graduate version of such elective courses to replace the corresponding undergraduate courses.

**Degree Conferral**
Students must apply the semester before they expect to complete the BS requirements to have the BS degree conferred. In addition, at the beginning of the student’s final undergraduate semester, students must complete a Bachelor’s/Accelerated Master’s Transition form that is submitted to the Office of the University Registrar and the VSE Graduate Admissions Office. At the completion of MS requirements, a master’s degree is conferred.

**Electrical Engineering, BS/Operations Research, Accelerated MS**

**Overview**
Highly-qualified students in the Electrical Engineering, BS have the option of obtaining an accelerated Operations Research, MS.

For more detailed information, see AP6.7 Bachelor’s/Accelerated Master’s Degrees. For policies governing all graduate degrees, see AP6 Graduate Policies.

**Admission Requirements**
Mason undergraduate students majoring in Electrical Engineering, BS may apply to this option if they have earned 90 undergraduate credits with an overall GPA of at least 3.30 and completed all MATH, PHYS 160/161, and PHYS 260/261 requirements. Criteria for admission are identical to criteria for admission to the Operations Research, MS program.

Students must additionally complete MATH 203 Linear Algebra prior to applying for the graduate program.

**Accelerated Options Requirement**
Students must complete all credits that satisfy requirements for both the BS and MS programs. Up to two courses (6 credits) of approved master’s level courses taken as part of the undergraduate degree may be applied to the graduate degree. At least one of the courses must be from Electrical and Computer Engineering department. The courses selected for this purpose must be approved by the academic advisors of both the BS and MS programs and by the SEOR department chair. For the BS programs that allow undergraduate electives from the department of system engineering and operations research, the students may choose the graduate version of such elective courses to replace the corresponding undergraduate courses.

**Degree Conferral**
Students must apply the semester before they expect to complete the BS requirements to have the BS degree conferred. In addition, at the beginning of the student’s final undergraduate semester, students must complete a Bachelor’s/Accelerated Master’s Transition form that is submitted to the Office of the University Registrar and the VSE Graduate Admissions Office. At the completion of MS requirements, a master’s degree is conferred.

**Mechanical Engineering, BS/Operations Research, Accelerated MS**

**Overview**
Highly-qualified students in the Mechanical Engineering, BS have the option of obtaining an accelerated Operations Research, MS.

For more detailed information, see AP6.7 Bachelor’s/Accelerated Master’s Degrees. For policies governing all graduate degrees, see AP6 Graduate Policies.

**Admission Requirements**
Mason undergraduate students majoring in Mechanical Engineering, BS may apply to this option if they have earned 90 undergraduate credits with an overall GPA of at least 3.30 and completed all MATH and PHYS
requirements. Criteria for admission are identical to criteria for admission to the Operations Research, MS program.

Students must additionally complete MATH 203 Linear Algebra prior to applying for the graduate program.

**Accelerated Options Requirement**

Students must complete all credits that satisfy requirements for both the BS and MS programs. Up to two courses (6 credits) of approved master’s level courses taken as part of the undergraduate degree may be applied to the graduate degree. The courses selected for this purpose must be approved by the academic advisors of both the BS and MS programs and by the SEOR department chair. For the BS programs that allow undergraduate electives from the department of system engineering and operations research, the students may choose the graduate version of such elective courses to replace the corresponding undergraduate courses.

**Degree Conferral**

Students must apply the semester before they expect to complete the BS requirements to have the BS degree conferred. In addition, at the beginning of the student’s final undergraduate semester, students must complete a Bachelor’s/Accelerated Master’s Transition form that is submitted to the Office of the University Registrar and the VSE Graduate Admissions Office. At the completion of MS requirements, a master’s degree is conferred.

**Statistics, BS/Operations Research, Accelerated MS**

**Overview**

Highly-qualified students in the Statistics, BS have the option of obtaining an accelerated Operations Research, MS.

For more detailed information, see AP6.7 Bachelor’s/Accelerated Master’s Degrees. For policies governing all graduate degrees, see AP6 Graduate Policies.

**Admission Requirements**

Mason undergraduate students majoring in statistics, BS may apply to this option if they have earned 90 undergraduate credits with an overall GPA of at least 3.30 and completed all MATH and PHYS requirements. Criteria for admission are identical to criteria for admission to the Operations Research, MS program.

**Accelerated Options Requirement**

Students must complete all credits that satisfy requirements for both the BS and MS programs. Up to two courses (6 credit hours) of approved master’s level courses taken as part of the undergraduate degree may be applied to the graduate degree. The courses selected for this purpose must be approved by the academic advisors of both the BS and MS programs and by the SEOR department chair. For the BS programs that allow undergraduate electives from the department of system engineering and operations research, the students may choose the graduate version of such electives to replace the corresponding undergraduate courses.

**Degree Conferral**

Students must apply the semester before they expect to complete the BS requirements to have the BS degree conferred. In addition, at the beginning of the student’s final undergraduate semester, students must complete a Bachelor’s/Accelerated Master’s Transition form that is submitted to the Office of the University Registrar and the VSE Graduate Admissions Office. At the completion of MS requirements, a master’s degree is conferred.

**Systems Engineering BS/Operations Research, Accelerated MS**

**Overview**

Qualified undergraduate students may apply for a five-year accelerated BS/MS program leading to a Bachelor of Science in Systems Engineering and an MS degree in Operations Research.

For more detailed information, see AP6.7 Bachelor’s/Accelerated Master’s Degrees. For policies governing all graduate degrees, see AP6 Graduate Policies.

**Admission Requirements**

Mason undergraduate students majoring in systems engineering may apply to this option if they have earned 90 undergraduate credits with an overall GPA of at least 3.30 and completed all MATH and PHYS requirements. Criteria for admission are identical to criteria for admission to the Operations Research, MS program.

**Accelerated Option Requirements**

Up to two courses (six credit hours) of master’s level courses may be applied to both the undergraduate and the graduate degrees. These two courses may be chosen from the list of graduate courses in the following table. For Systems Engineering, BS students, these graduate courses replace the corresponding undergraduate courses listed in the following table. The undergraduate version of these courses may not be applied toward the Operations Research, MS.

Highly-qualified students in BS programs have the option of obtaining an accelerated master's degree upon completing the BS requirements to have the BS degree conferred. In addition, at the beginning of the student’s final undergraduate semester, students must complete a Bachelor's/Accelerated Master's Transition form that is submitted to the Office of the University Registrar and VSE Graduate Admissions Office. At the completion of MS requirements, a master’s degree is conferred.

### Systems Engineering and Operations Research, PhD

**Banner Code:** VS-PHD-SEOR

**Academic Advising**

2100 Nguyen Engineering Building  
Fairfax Campus  
Phone: 703-993-5689  
Email: seor@gmu.edu  
Website: seor.gmu.edu/grad.html

This doctoral program offers a unique integration of systems engineering and operations research. This integration gives students a strong analytical and computational capability on the one hand and an overarching systems perspective that is well-grounded in application on the other. No other department in the nation offers a PhD degree program that covers systems engineering and operations research in this integrated manner. The program prepares students for leadership positions in research and development in government, industry, research organization, and academia.

### Admissions & Policies

**Admissions**

All general Mason and specific Volgenau School admissions requirements apply. Candidates for the PhD program typically must hold an MS degree from an accredited institution of higher education in systems engineering, operations research or related areas in engineering, mathematics, and computer science with a minimum graduate GPA of 3.50 and a minimum undergraduate GPA of 3.00. In addition, well-qualified candidates holding a BS degree in these areas may apply directly to the PhD program.

All applicants should have a strong background in engineering mathematics, which includes three semesters of calculus, differential equations, linear algebra, and probability. In addition, students entering the doctoral program must have a sound working knowledge in computing.

The admission process involves submitting the application for admission, undergraduate and graduate transcripts from previous colleges and universities attended, GRE test results, three letters of reference, a résumé and a statement of career goals and aspirations, and a self-assessment of past background. Translations of international credentials must be provided if they are not in English; in some cases, applicants will be required to have documents evaluated by an external agency. A satisfactory score on the TOEFL examination is required for non-native English speakers. All of an applicant’s background is examined before an admission decision is made.
Policies
For policies governing all graduate programs, see AP.6 Graduate Policies (https://catalog.gmu.edu/policies/academic/graduate-policies/).

Program Requirements
The program includes: course requirements; a qualifying exam that tests fundamental concepts in systems engineering and operations research; a comprehensive exam that tests the research competency of the student; dissertation proposal defense; dissertation research; and dissertation predesign and defense. All general Mason and specific Volgenau School requirements apply to this program.

PhD dissertations are extremely time intensive, and successful completion requires full time focus. It is expected that students who have reached candidacy (that is, successfully presented their dissertation proposal) will spend full time on their research for at least one academic year and will attend the majority of the SEOR departmental seminars throughout that period.

Reduction of Credit
The doctoral program is a 72 credit hour program; however, students entering with a master’s degree in a related discipline may be given a reduction of credit up to 24 hours. Reduction of credit requires the approval of the program director or designee and the dean or designee of the school. They determine whether the credits are eligible for reduction of credit and applicable to the degree program and the number of credits to be reduced.

The 72 hours of required doctoral-level credits typically consist of 48 credits of coursework and 24 credits of dissertation research. Students who receive a reduction of credit will complete a minimum of 48 credits as outlined in Degree Requirements.

All decisions concerning the student’s course requirements and plan of study must be approved by the dissertation committee chair, as well as by the department’s doctoral coordinator.

Requirements

Degree Requirements
Total credits: 72

Doctoral Coursework
A GPA of 3.50 is required, and no grade of C is allowed in Doctoral Coursework. Students lacking prerequisites for their courses or lacking the coursework to complete the qualifying exams or their dissertation may need to take additional courses.

</tbody>
</table>

Total Credits 24

Qualifying Exams
The exams are primarily for testing the students’ familiarity with fundamental concepts. Each student must take the following four exams within two years of enrolling in the program:

- Systems Engineering Principles
- Systems Engineering Design
- Deterministic Models
- Stochastic Models

A student who passes three of the four exams in the first attempt must retake and pass the failed exam within one year. A student who passes fewer than three exams in the first attempt must retake and pass an entire set of four exams within one year. After two unsuccessful attempts, a student is dismissed from the PhD program.

Dissertation Research
Choose 24 credits from the following:

</tbody>
</table>
Doctoral Supervisory Committee

Students should identify a potential dissertation director and approach them to see if they are willing to work together, and identify a doctoral supervisory committee as soon as possible. It is recommended that the committee be formed by the end of the second or third semester of study. The dissertation director must be a member of the SEOR graduate faculty or a member of the Mason graduate faculty with approval from the SEOR department chair. The doctoral supervisory committee must include at least three members from the SEOR department-approved graduate faculty, and at least one non-SEOR member from the Mason graduate faculty. The composition of the doctoral supervisory committee is to be approved by the doctoral coordinator. At least four members of the committee must be members of the Mason graduate faculty.

Comprehensive Exam

The comprehensive exam is taken after the student has satisfactorily completed all the advanced emphasis coursework requirements in the approved plan of study filed by the student. The examiners will include the supervisory committee plus any outside examiners considered appropriate. However, the supervisory committee determines whether the student passes or not. The comprehensive exam consists of a written examination of 8 hours in length and an oral examination. The committee will determine if the student has a mastery of the advanced emphasis coursework. If a student fails the comprehensive exam, the student may request a re-examination within 60 days of receiving notice of the exam result. The request should be made in writing to the doctoral coordinator. If the student fails the re-examination or does not request a re-examination within 60 days, the student may be terminated from the PhD program. In such a case, with recommendation of the supervisory committee and approval of the SEOR Chair, the student may apply his/her coursework towards a master’s degree.

Dissertation Proposal

After passing the comprehensive exam, each doctoral student prepares a written dissertation proposal, which is presented to the doctoral supervisory committee. After successfully completing this requirement, and with the dissertation supervisory committee’s recommendation, the student is formally admitted as a candidate for the PhD degree.

Dissertation Defense

When the central portions of the research have been completed to the point where the student is able to describe the original contributions of the dissertation effort, a candidate submits the written dissertation to the supervisory committee and schedules an oral predefense with the committee. The predefense is attended by the supervisory committee. The supervisory committee must approve the work or the student must schedule a second predefense.

Once the committee believes the student is ready, a final public oral defense may be scheduled no sooner than one month after the conclusion of the predefense, with an announcement posted for at least two weeks. The defense must be attended by the supervisory committee and the department’s doctoral coordinator, unless an exception has been approved in advance by the doctoral coordinator. Following a satisfactory evaluation of the oral defense of the dissertation by the supervisory committee, the student must prepare, with supervision from the dissertation director, a final publishable dissertation that represents a definitive contribution to knowledge in systems engineering and operations research. This document must meet format guidelines specified by the Guide for Preparing Graduate Theses, Dissertations, and Projects. If the student fails to successfully defend the dissertation, the student may request a second defense, following the same procedures as for the initial defense. There is no time limit for this request, other than the general time limits for the doctoral degree. An additional predefense is not required, but the student is strongly advised to consult with the committee before scheduling a second defense. If the student fails on the second attempt to defend the dissertation, the student will be terminated from the PhD program.

Admissions & Policies

Admissions

Concentration in Architecture-Based Systems Integration (ABSI)

A bachelor’s degree is required for admission to a certificate program.
Concentration in C4I & Cyber (C4IC)
The certificate with this concentration is available to students who hold bachelor's degrees in engineering and scientific disciplines or are in graduate status in such programs.

Concentration in Communications and Networking (CONE)
The certificate with this concentration in communications and networking is open to all students who hold BS degrees in scientific and engineering disciplines from accredited universities.

Concentration in Engineering Resilient Enterprise Systems (ERES)
The certificate with this concentration is available to any student who holds a bachelor's degree in an engineering or scientific discipline or has graduate status in such a program. Math requirements include MATH 113 Analytic Geometry and Calculus I (Mason Core), MATH 114 Analytic Geometry and Calculus II, or their equivalents, and a probability and statistics course.

Concentration in Financial Systems (FNSY)
The certificate with this concentration will be open to all students who hold a BS degree in scientific and engineering disciplines from an accredited university program, with a minimum GPA of 3.0. Students who are already enrolled in a master's program must submit a secondary certificate form to enroll in this certificate with concentration program; all others must apply for graduate admission to this certificate with concentration program.

Concentration in Tactical Computer Operations (TCO)
Students applying to the certificate with this concentration must hold a bachelor's degree in either computer science or computer engineering. Prospective students without these specific degrees will need to have a technical bachelor's degree and show academic competence in the areas of: C (C++, C#, Objective C), Assembler, discrete mathematics, and computer networking. An undergraduate grade point average (GPA) of 3.0 or better (4.0 scale) is required.

Policies
The Systems Engineering Graduate Certificate may be pursued on a part-time basis only.

For policies governing all graduate certificates, see AP.6.8 Requirements for Graduate Certificates.

Requirements

Certificate Requirements
Total credits: 12-15

This certificate may be pursued on a part-time basis only.

Concentration in Architecture-Based Systems Integration (ABSI)
Administered by the Department of Systems Engineering and Operations Research (https://seor.gmu.edu/)

Coursework
The following four courses must be completed with a grade of B or better:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>SYST 520</td>
<td>System Engineering Design</td>
<td>3</td>
</tr>
<tr>
<td>SYST 618</td>
<td>Model-based Systems Engineering</td>
<td>3</td>
</tr>
<tr>
<td>SYST 620</td>
<td>Discrete Event Systems</td>
<td>3</td>
</tr>
<tr>
<td>SYST 621</td>
<td>Systems Architecture Design</td>
<td>3</td>
</tr>
<tr>
<td>Total Credits</td>
<td></td>
<td>12</td>
</tr>
</tbody>
</table>

Certificate coursework within the Systems Engineering MS
In addition to the ABSI concentration courses, students must take the following six courses within the Systems Engineering MS:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>SYST 505</td>
<td>Systems Engineering Principles</td>
<td>3</td>
</tr>
<tr>
<td>SYST 510</td>
<td>Systems Definition and Cost Modeling</td>
<td>3</td>
</tr>
<tr>
<td>SYST 530</td>
<td>Systems Engineering Management I</td>
<td>3</td>
</tr>
<tr>

Concentration in Communications and Networking (CONE)
Administered by the Department of Electrical and Computer Engineering (https://ece.gmu.edu/welcome-gmu-ece-department/).

The certificate with a concentration in Communications and Networking is awarded on completion of five graduate courses (15 credits) in communications and networking. A cumulative GPA of 3.00 is required and one course with a grade of C at most may be applied toward the certificate. The certificate courses comprise two required foundation courses and three electives.

Total Credits 9

1 Credit cannot be received for both SYST 469 and SYST 470.

Prerequisites

Some of the courses listed above have additional prerequisites. Students should pay careful attention to prerequisites when selecting courses.

Systems Engineering, BS

Banner Code: VS-BS-SYST

Academic Advising

2100 Nguyen Engineering Building
Fairfax Campus

Phone: 703-993-5689
Email: seor@gmu.edu
Website: http://seor.gmu.edu/undergrad.html

The program leading to the BS in Systems Engineering prepares students for a professional career in systems engineering. The program reflects the systems engineer's unique perspective, which considers all aspects of a system throughout its lifetime. Mason's systems engineering program is interdisciplinary, drawing from engineering, computer science, operations research, psychology, and economics. The core systems engineering courses tie these diverse threads to provide a global understanding of how individual engineering disciplines fit into the development of complex, large-scale systems. Students gain depth in a technical area by selecting a sequence of technical electives that constitute an emphasis. Students choose their own emphasis with the help of their advisor. A year-long senior design project provides hands-on experience in applying various systems engineering methods and tools. In the first two years, students obtain a basic foundation in mathematics, natural sciences, computing, writing, humanities, arts, and social sciences. The systems engineering program builds on this foundation, teaching theoretical knowledge, practical skills, and the ability to apply systems thinking to problems. Teamwork, collaborative learning, analytical skills, practical problem solving, and oral and written communication are strongly stressed.

Mission

The mission of the undergraduate program is to equip students with the ability to participate productively in the many professional activities associated with engineering a trustworthy system that satisfies client needs. The term "system" is interpreted broadly to include information, telecommunication, defense, health delivery, transportation, energy or manufacturing systems, as well as corporate processes.

Objectives

The program educational objectives of the Systems Engineering program are what we expect our students to attain within three to five years of graduation. Graduates earning the Bachelor of Science degree in Systems Engineering at George Mason University will:

- Use critical thinking, quantitative methods, and systems thinking to contribute to solutions for global societal challenges.
- Apply systems engineering methods, processes, models and tools to the engineering of complex systems.
- Advance the objectives of their organizations, profession, and society in a rapidly changing world.

Accreditation

The bachelor's program in Systems Engineering is accredited by the Engineering Accreditation Commission of ABET, http://www.abet.org. The requirements for the degree may be satisfied through part-time enrollment.

Admissions & Policies

Policies

Change of Major

See Change of Major for more information.

Grade Requirements

Students in the Systems Engineering, BS program must complete all mathematics, science, and VSE courses with a grade of C or better.

Termination from the Major

No math, science, or Volgenau School of Engineering course that is required for the major may be attempted more than three times. Those students who do not successfully complete such a course within three attempts will be terminated from the major. Undeclared students in the Volgenau School who do not successfully complete a course required for a Volgenau School major within three attempts will also be terminated.
In addition, students in the Volgenau School with evidence of continued failure to make adequate progress toward declaring or completing a Volgenau School major will be terminated from the school. Adequate progress is determined by the major program. For more information, see AP5.2.4 Termination from the Major (https://catalog.gmu.edu/policies/academic/undergraduate-policies/#ap-5-2-4).

Once a student has attempted one of these courses twice unsuccessfully, the third attempt must be no later than the next semester of enrollment, excluding summers. Failure to take the course at that time will result in termination from the major. A third attempt of a Volgenau School of Engineering course requires support by the student’s major department as well as permission by the department offering the course. This permission is not guaranteed. If the student is unable to take the course when required, the student may request an extension to a future semester; extensions require approval of the student’s advisor, their department, and the Associate Dean for Undergraduate Programs. The deadline for extension requests is the add deadline for the semester in which the course is required.

Students who have been terminated from a Volgenau School of Engineering major may not register for a Volgenau School course without permission of the department offering the course. This applies to all undergraduate courses offered by the Volgenau School except IT 104 Introduction to Computing (Mason Core) and STAT 250 Introductory Statistics I (Mason Core).

A student may not declare any major in the Volgenau School of Engineering if the student has previously met the termination criteria for that major at any time, regardless of what the student’s major was at the time the courses were taken.

Software-Intensive Systems: 9

Synthesis Requirement
Mason’s synthesis requirement for systems engineering majors is satisfied by successful completion of SYST 495 Senior Design Project II (Mason Core). Students who do not pass SYST 495 Senior Design Project II (Mason Core) with a C or better must retake both SYST 490 Senior Design Project I and SYST 495 Senior Design Project II (Mason Core).

Writing-Intensive Requirement
Mason’s writing-intensive requirement for systems engineering majors is satisfied by successful completion of SYST 489 Senior Seminar.

Advising and Plan of Study
All systems engineering students are assigned a faculty advisor. With the advisor’s help and approval, each student is required to complete a plan of study. This plan of study, which is available from the SEOR office, constitutes a learning plan for the degree program and must be signed by the student’s advisor and the Department Chair. The plan of study must be updated and signed by the advisor at least once per year.

4-Year Plan

Bachelor of Science in Systems Engineering Sample Plan of Study
Detailed four year plans and degree planning checklists can be found at https://advising.gmu.edu/current-student/majors-at-mason/.

Accelerated Master’s

BS (selected)/Statistical Science, Accelerated MS

Overview
Highly-qualified students in BS programs have the option of applying to the accelerated Statistical Science, MS program if such an accelerated Statistical Science, MS pathway is allowable from the student’s BS program, which will be determined by the academic advisors of both the BS and MS programs; and if they have earned 90 undergraduate credits with an overall GPA of 3.00. Students must have successfully completed the following Mason courses each with a grade of C or better prior to admission to the accelerated program:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>MATH 213</td>
<td>Analytic Geometry and Calculus III</td>
<td>3</td>
</tr>
<tr>
<td>MATH 203</td>
<td>Linear Algebra</td>
<td>3</td>
</tr>
<tr>
<td>or MATH 321</td>
<td>Abstract Algebra</td>
<td></td>
</tr>
<tr>
<td>STAT 250</td>
<td>Introductory Statistics I (Mason Core)</td>
<td>3</td>
</tr>
<tr>
<td>or STAT 344</td>
<td>Probability and Statistics for Engineers and Scientists I</td>
<td></td>
</tr>
<tr>
<td>STAT 346</td>
<td>Probability for Engineers</td>
<td>3</td>
</tr>
<tr>
<td>or MATH 351</td>
<td>Probability</td>
<td></td>
</tr>
<tr>
<td>STAT 362</td>
<td>Introduction to Computer Statistical Packages</td>
<td>3</td>
</tr>
</tbody>
</table>

Accelerated Option Requirements
Students must complete all credits satisfying degree requirements for the BS and MS programs, with 6 credits overlap chosen from the following courses: STAT 515 Applied Statistics and Visualization for Analytics, STAT 544 Applied Probability, STAT 554 Applied Statistics I, STAT 560 Biostatistical Methods, and STAT 574 Survey Sampling I. (Credit may not be received for both STAT 474 and STAT 574; nor for both STAT 460 and STAT 560.) The graduate courses selected for overlap must be approved by the academic advisors of both the BS and MS programs. All graduate course prerequisites must be completed prior to enrollment. Each graduate course must be completed with a grade of B or better to apply toward the MS degree.

While still in undergraduate status, a maximum of 6 additional graduate credits may be taken as reserve graduate credit and applied to the master’s program. Reserve graduate credits do not apply to the undergraduate degree.

Degree Conferral
Students must apply the semester before they expect to complete the BS requirements to have the BS degree conferred. In addition, at the beginning of the student’s final undergraduate semester, students must complete a Bachelor’s/Accelerated Master’s Transition form that is submitted to the Office of the University Registrar and Graduate
Recruitment and Enrollment Services. At the completion of MS requirements, a master's degree is conferred.

**Systems Engineering, BS/Data Analytics Engineering, Accelerated MS**

**Overview**

Qualified undergraduate students in the Systems Engineering, BS have the option of obtaining an accelerated Data Analytics Engineering, MS.

For more detailed information, see AP.6.7 Bachelor's/Accelerated Master's Degrees. For policies governing all graduate degrees, see AP6 Graduate Policies.

**Admission Requirements**

Mason undergraduate students majoring in systems engineering may apply to this option if they have earned 90 undergraduate credits with an overall GPA of at least 3.30.

For the predictive analytics concentration, students must submit evidence of:

- Satisfactory completion of courses in calculus, applied probability and statistics, and a scientific programming language.
- Familiarity with analytical modeling software, such as spreadsheets or math packages.

**Accelerated Option Requirements**

Students must complete all credits that satisfy requirements for the BS and MS programs, with six credits overlap chosen from the courses in the following table. For BS candidates, these graduate courses replace the corresponding undergraduate courses listed. The undergraduate version of these courses may not be applied toward the MS degree.

<table>

For the predictive analytics and financial engineering concentration, any other 500-level course may be applied to both the undergraduate and graduate degrees with approval of the advisor and SEOR department chair.

OR 541 Operations Research: Deterministic Models will substitute for the OR 531 Analytics and Decision Analysis core requirement in the MS DAE program. Students are not permitted to take OR 531 Analytics and Decision Analysis.

**Degree Conferral**

Students must apply the semester before they expect to complete the BS requirements to have the BS degree conferred. In addition, at the beginning of the student's final undergraduate semester, students must complete a Bachelor's/Accelerated Master's Transition form that is submitted to the Office of the University Registrar and the VSE Graduate Admissions Office. At the completion of MS requirements, a master's degree is conferred.

**Systems Engineering BS/Operations Research, Accelerated MS**

**Overview**

Qualified undergraduate students may apply for a five-year accelerated BS/MS program leading to a Bachelor of Science in Systems Engineering and an MS degree in Operations Research.

For more detailed information, see AP.6.7 Bachelor's/Accelerated Master's Degrees. For policies governing all graduate degrees, see AP6 Graduate Policies.

**Admission Requirements**

Mason undergraduate students majoring in systems engineering may apply to this option if they have earned 90 undergraduate credits with an overall GPA of at least 3.30 and completed all MATH and PHYS requirements. Criteria for admission are identical to criteria for admission to the Operations Research, MS program.

**Accelerated Option Requirements**

Up to two courses (six credit hours) of master's level courses may be applied to both the undergraduate and the graduate degrees. These two courses may be chosen from the list of graduate courses in the following table. For Systems Engineering, BS students, these graduate courses replace the corresponding undergraduate courses listed in the table. The undergraduate version of these courses may not be applied toward the Operations Research, MS program.

**Systems Engineering, BS/Telecommunications, Accelerated MS**

**Overview**

Highly-qualified students in the Systems Engineering, BS have the option of obtaining an accelerated Telecommunications, MS.
For more detailed information, see AP6.7 Bachelor’s/Accelerated Master’s Degrees. For policies governing all graduate degrees, see AP6 Graduate Policies.

**Admission Requirements**

Students in the Systems Engineering, BS program who preferably have chosen to take the systems engineering of telecommunications elective sequence may apply to this option if they have earned 75 undergraduate credits with an overall GPA of at least 3.00 and completed all MATH and PHYS requirements. Other students will be considered on their individual merit. Criteria for admission are identical to criteria for admission to the Telecommunications, MS program.

**Accelerated Option Requirements**

Students must complete all credits that satisfy requirements for the BS and MS programs, with 6 credits overlap selected from the following courses:

**Systems Engineering, MS**

**Banner Code:** VS-MS-SYST

**Academic Advising**

2100 Nguyen Engineering Building
Fairfax Campus

Phone: 703-993-5689
Email: seor@gmu.edu
Website: https://seor.gmu.edu/

Systems Engineering is concerned with analysis of needs and requirements, design, production, deployment, operation, maintenance, refinement, and retirement of reliable systems considering various system constraints. Systems Engineering comprises product, process, and resource management and focuses on architecture, human factors, decision support, performance and evaluation, and management.

Systems engineers are the visionaries who take a global perspective of the system. Whereas discipline-specific engineers deal with system components, the systems engineer is concerned with the integration of these components and the overall success of the system throughout its life cycle. Our educational and research program reflects the systems engineer’s unique perspective on the system life cycle.

Mason’s graduate program in Systems Engineering recognizes the importance of balancing an education in quantitative models and engineering tools with a proper understanding of the systems perspective. Concentration areas include Advanced Transportation Systems (ATS), Architecture-Based Systems Integration (ABSI), Command, Control, Communications, Computing, and Intelligence (C4I), Energy Systems (NRGS), Financial Systems Engineering (FNSE), Systems Engineering and Data Analytics (SEDA), Systems Engineering of Software-Intensive Systems (SESI) and Systems Management (SMG).

The graduate program leading to the Master of Science in Systems Engineering (MSSE) emphasizes both analytical and practical aspects of engineering complex systems. Students are expected to demonstrate proficiency in using qualitative and quantitative tools relevant to systems engineering practice. The program also prepares students for careers in research and development and for pursuing advanced graduate study leading to the PhD degree in Systems Engineering and Operations Research.

**Admissions & Policies**

**Admissions & Foundation and Admission Requirements**

Each applicant for the MS program should meet the following entrance requirements:

1. Have a baccalaureate degree from an accredited institution in engineering, mathematics, computer science, physical sciences, economics, or a related field.
2. Have completed courses in multivariate calculus, matrix algebra, differential equations, applied probability and statistics, and a computer language.
3. Provide evidence of satisfactory educational achievement in at least one of the following forms: a GPA of at least 3.00 as an undergraduate or an acceptable GPA in graduate courses. International students must also achieve satisfactory scores on the Graduate Record Examination (GRE).
4. Have achieved a satisfactory score on the TOEFL examination for non-native English speakers.
5. Have two letters of recommendation submitted by former professors or supervisors.

**Policies**

**Advising & Plan of Study**

All entering systems engineering students should attend an orientation meeting. Each student is assigned a faculty advisor upon acceptance. Students must meet with their advisors during their first semester and design an approved plan of study. Students are encouraged to seek out their advisor when questions arise and when their plan of study needs to be revised. Any changes to the plan of study must be approved by the faculty advisor. A copy of the plan of study must remain on file with the department.
# Degree Requirements

Total credits: 30-33

To obtain the Master of Science degree, students must complete a minimum of 30 semester hours of graduate level courses that consists of five core courses, three concentration courses, an elective, and a systems engineering project.

Students must have a working background in engineering mathematics and computer systems. A student lacking these foundations may be required to take one or more foundation courses. The department offers SYST 500 Quantitative Foundations for Systems Engineering as an intensive review of undergraduate engineering mathematics, including matrix algebra, calculus, differential equations, probability and statistics. Students who have not completed a two-semester calculus sequence and matrix algebra will be required to complete these courses prior to taking SYST 500 Quantitative Foundations for Systems Engineering.

Approved basic methods and concentration courses for the eight concentration areas are listed below. Students are expected to select a set of concentration courses that constitute a clearly defined focus. These courses must be approved by the student's advisor. Each student is required to have a current plan of study on file with the Systems Engineering and Operations Research Department.

Candidates for the MS must have a minimum GPA of 3.00 in course work applied to the degree, which may include no more than 6 credits of C. The GPA calculation excludes all transfer courses and Mason nondegree studies credits not formally approved for the degree.

1. SYST 505 Systems Engineering Principles may be replaced by an approved elective for students who have work experience in systems engineering or who have been enrolled in the undergraduate BSSE program at Mason. SYST 505, if taken, must be taken in the first semester of enrollment in the MSSE program.

### Project or Thesis (Optional)

Students must complete three credit hours of SYST 699 Masters Project. Students in this course work in teams on an approved applied project. A project report is submitted at the end of the semester, and a final project presentation is made to the entire faculty of the SEOR Department.

Students with the consent of a faculty adviser and departmental approval, may be approved to complete a thesis.

1. Students must complete one basic methods course. The choice of basic methods course may depend on the student's concentration and must be selected from the list above.

### Concentrations

Students must complete 3 courses (9 credits) from their area of emphasis. Students may select one of the following eight areas of concentration, or may create their own emphasis area with the approval of their advisor and the Department Chair.

- Advanced Transportation Systems (ATS)
- Architecture-Based Systems Integration (ABSI)
- Command, Control, Communications, Computing, and Intelligence (C4I)
- Energy Systems (NRGS)
- Financial Systems Engineering (FNSE)
- Systems Engineering and Data Analytics (SEDA)
- Systems Engineering of Software-Intensive Systems (SESI)
- Systems Management (SMG)

### Concentration in Advanced Transportation Systems (ATS)

The air transportation system is among the most complex networked systems. This concentration is designed to provide students with the skills to address the next generation of challenges of the air transportation system. Topics addressed include congestion and safety of the national air space, economic and human factors, impact of technology innovation, and public policy. The program emphasizes design, modeling, and analysis to support decision making for government and the aviation industry.

Concentration in Architecture-Based Systems Integration (ABSI)

There is much interest today in the engineering of systems that comprise other component systems, where each of the component systems serves organizational and human purposes. These systems families are often categorized as systems of systems, federations of systems, or coalitions of systems. The design of architectures is a major ingredient in the design of systems families. Furthermore, it provides the conceptual basis for achieving system integration. This concentration covers the formulation of the system integration problem, definition of architecture frameworks, use of structured analysis and object-oriented methodologies for the design of architectures, modeling and simulation for the evaluation of architectures, and approaches to integration. Both defense and industrial applications are considered.

Concentration in Energy Systems (NRGS)

With the rising economic and environmental costs to power homes, businesses and the transportation systems that move people and goods from place to place, innovative solutions are required to meet the world's expanding energy needs. Students completing the energy systems concentration will build upon a foundation in systems engineering design by incorporating physical principles of thermal fluid energy transfer into system models. Students will develop the tools to model and analyze generation, transmission, and utilization systems in steady and dynamic operation. Students will optimize these systems by considering physical principles, economics, local policy and security concerns. Graduates will be able to apply their expertise to work with: traditional power generation facilities; renewable energy integration; national, local, and smart grids; mechanical and electrical energy storage systems; utilization of energy in building and transportation systems.

Concentration in Financial Systems Engineering (FNSE)

Financial engineering is a cross-disciplinary field which relies on mathematical finance, numerical methods, and computer simulations to make trading, hedging, and investment decisions, as well as facilitating the risk management of those decisions. While mathematics is indispensable in financial engineering, the concentration will try best to focus on the concepts and ideas of finance, while limiting the math within a scope acceptable to most students in engineering.
### Systems Engineering, MS

**Concentration in Systems Engineering and Data Analytics (SEDA)**

Systems engineers must address a broad range of issues relevant to the design, implementation, analysis, and management of systems. This concentration provides methodological tools that can be applied to the systems engineering process. Areas of focus include decision support systems, distributed intelligent systems, knowledge-based planning systems, network systems, probabilistic reasoning systems, sensor fusion systems, and optimization methods.

**Concentration in Systems Engineering of Software-Intensive Systems (SESI)**

This concentration addresses the software component of the systems engineering life cycle. It specifically covers the allocation of system requirements to software. Practitioners are concerned with the theoretical and practical aspects of technology, cost, and the social effect of computer systems that are reliable, maintainable, secure, efficient, and cost effective. The program emphasizes the integration of hardware, software, and firmware, and the management of these complex computer systems over their life cycle through systems engineering methods, tools, and processes.

**Concentration in Systems Management (SMG)**

The management aspect of systems engineering involves tracking and control of system development through the major phases of the system lifecycle, identifying and resolving problems to minimize their effect on cost, schedule, or performance, and iteratively improving product and process. This concentration emphasizes the theory and practice of systems management and prepares students for careers in management.

**Online MS in Systems Engineering**

The graduate program leading to the Master of Science in Systems Engineering can be completed entirely online. The delivery mode for the online program is asynchronous, but many courses are also offered in synchronous mode. Students may also plan a program with some courses taken online and some in the classroom. The following courses are offered online at least once a year: SYST 500 Quantitative Foundations for Systems Engineering, SYST 505 Systems Engineering Principles, SYST 510 Systems Definition and Cost Modeling, SYST 520 System Engineering Design, SYST 530 Systems Engineering Management I, SYST 542 Decision Support Systems Engineering, SYST 573 Decision and Risk Analysis, SYST 611 System Methodology and Modeling, SYST 618 Model-based Systems Engineering, SYST 620 Discrete Event Systems, SYST 621 Systems Architecture Design, SYST 630 Systems Engineering Management II, SYST 699 Masters Project, OR 531 Analytics and Decision Analysis, OR 541 Operations Research: Deterministic Models and OR 542 Operations Research: Stochastic Models.

**Accelerated Master's**

**Bioengineering, BS/Systems Engineering, Accelerated MS**

**Overview**

Highly-qualified students in the Bioengineering, BS have the option of obtaining an accelerated Systems Engineering, MS.

For more detailed information, see AP.6.7 Bachelor's/Accelerated Master's Degrees. For policies governing all graduate degrees, see AP6 Graduate Policies.

**Admission Requirements**

Mason undergraduate students majoring in Bioengineering, BS may apply to this option if they have earned 90 undergraduate credits with an overall GPA of at least 3.30 and completed all MATH and PHYS
requirements. Criteria for admission are identical to criteria for admission to the Systems Engineering, MS program.

**Accelerated Options Requirement**

Students must complete all credits that satisfy requirements for both the BS and MS programs. Up to two courses (6 credits) of approved master’s level courses taken as part of the undergraduate degree may be applied to the graduate degree. The courses selected for this purpose must be approved by the academic advisors of both the BS and MS programs and by the SEOR department chair. For the BS programs that allow undergraduate electives from the department of system engineering and operations research, the students may choose the graduate version of such elective courses to replace the corresponding undergraduate courses.

**Degree Conferral**

Students must apply the semester before they expect to complete the BS requirements to have the BS degree conferred. In addition, at the beginning of the student’s final undergraduate semester, students must complete a Bachelor’s/Accelerated Master’s Transition form that is submitted to the Office of the University Registrar and the VSE Graduate Admissions Office. At the completion of MS requirements, a master’s degree is conferred.

**Civil and Infrastructure Engineering, BS/Systems Engineering, Accelerated MS**

**Overview**

Highly-qualified students in the Civil and Infrastructure Engineering, BS have the option of obtaining an accelerated Systems Engineering, MS.

For more detailed information, see AP.6.7 Bachelor’s/Accelerated Master’s Degrees. For policies governing all graduate degrees, see AP6 Graduate Policies.

**Admission Requirements**

Mason undergraduate students majoring in Civil and Infrastructure Engineering, BS may apply to this option if they have earned 90 undergraduate credits with an overall GPA of at least 3.30 and completed all MATH and PHYS requirements. Criteria for admission are identical to criteria for admission to the Systems Engineering, MS program.

**Accelerated Options Requirement**

Students must complete all credits that satisfy requirements for both the BS and MS programs. Up to two courses (6 credits) of approved master’s level courses taken as part of the undergraduate degree may be applied to the graduate degree. The courses selected for this purpose must be approved by the academic advisors of both the BS and MS programs and by the SEOR department chair. **Degree Conferral**

Students must apply the semester before they expect to complete the BS requirements to have the BS degree conferred. In addition, at the beginning of the student’s final undergraduate semester, students must complete a Bachelor’s/Accelerated Master’s Transition form that is submitted to the Office of the University Registrar and the VSE Graduate Admissions Office. At the completion of MS requirements, a master’s degree is conferred.

**Computer Engineering, BS/Systems Engineering, Accelerated MS**

**Overview**

Highly-qualified students in the Computer Engineering, BS have the option of obtaining an accelerated Systems Engineering, MS.

For more detailed information, see AP6.7 Bachelor’s/Accelerated Master’s Degrees. For policies governing all graduate degrees, see AP6 Graduate Policies.

**Admission Requirements**

Mason undergraduate students majoring in Computer Engineering, BS may apply to this option if they have earned 90 undergraduate credits with an overall GPA of at least 3.30 and completed all MATH, PHYS 160/161, and PHYS 260/261 requirements. Criteria for admission are identical to criteria for admission to the Systems Engineering, MS program.

**Accelerated Options Requirement**

Students must complete all credits that satisfy requirements for both the BS and MS programs. Up to two courses (6 credits) of approved master’s level courses taken as part of the undergraduate degree may be applied to the graduate degree. At least one of the courses must be from Electrical and Computer Engineering department. The courses selected for this purpose must be approved by the academic advisors of both the BS and MS programs and by the SEOR department chair. For the BS programs that allow undergraduate electives from the department of system engineering and operations research, the students may choose the graduate version of such elective courses to replace the corresponding undergraduate courses.

**Degree Conferral**

Students must apply the semester before they expect to complete the BS requirements to have the BS degree conferred. In addition, at the beginning of the student’s final undergraduate semester, students must complete a Bachelor’s/Accelerated Master’s Transition form that is submitted to the Office of the University Registrar and the VSE Graduate Admissions Office. At the completion of MS requirements, a master’s degree is conferred.

**Cyber Security Engineering, BS/Systems Engineering, Accelerated MS**

**Overview**

Highly-qualified students in the Cyber Security Engineering, BS have the option of obtaining an accelerated Systems Engineering, MS.

For more detailed information, see AP.6.7 Bachelor’s/Accelerated Master’s Degrees. For policies governing all graduate degrees, see AP6 Graduate Policies.

**Admission Requirements**

Mason undergraduate students majoring in Cyber Security Engineering, BS may apply to this option if they have earned 90 undergraduate credits with an overall GPA of at least 3.30 and completed all MATH and PHYS
requirements. Criteria for admission are identical to criteria for admission to the Systems Engineering, MS program.

Accelerated Options Requirement

Students must complete all credits that satisfy requirements for both the BS and MS programs. Up to two courses (6 credit hours) of approved master's level courses taken as part of the undergraduate degree may be applied to the graduate degree. The courses selected for this purpose must be approved by the academic advisors of both the BS and MS programs and by the SEOR department chair. For the BS programs that allow undergraduate electives from the department of system engineering and operations research, the students may choose the graduate version of such electives to replace the corresponding undergraduate courses.

Degree Conferral

Students must apply the semester before they expect to complete the BS requirements to have the BS degree conferred. In addition, at the beginning of the student's final undergraduate semester, students must complete a Bachelor's/Accelerated Master's Transition form that is submitted to the Office of the University Registrar and the VSE Graduate Admissions Office. At the completion of MS requirements, a master's degree is conferred.

Electrical Engineering, BS/Systems Engineering, Accelerated MS

Overview

Highly-qualified students in the Electrical Engineering, BS have the option of obtaining an accelerated Systems Engineering, MS.

For more detailed information, see AP.6.7 Bachelor's/Accelerated Master's Degrees. For policies governing all graduate degrees, see AP6 Graduate Policies.

Admission Requirements

Mason undergraduate students majoring in Electrical Engineering, BS may apply to this option if they have earned 90 undergraduate credits with an overall GPA of at least 3.30 and completed all MATH, PHYS 160/161, and PHYS 260/261 requirements. Criteria for admission are identical to criteria for admission to the Systems Engineering, MS program.

Accelerated Options Requirement

Students must complete all credits that satisfy requirements for both the BS and MS programs. Up to two courses (6 credits) of approved master's level courses taken as part of the undergraduate degree may be applied to the graduate degree. At least one of the courses must be from Electrical and Computer Engineering department. The courses selected for this purpose must be approved by the academic advisors of both the BS and MS programs and by the SEOR department chair. For the BS programs that allow undergraduate electives from the department of system engineering and operations research, the students may choose the graduate version of such elective courses to replace the corresponding undergraduate courses.

Degree Conferral

Students must apply the semester before they expect to complete the BS requirements to have the BS degree conferred. In addition, at the beginning of the student's final undergraduate semester, students must complete a Bachelor's/Accelerated Master's Transition form that is submitted to the Office of the University Registrar and the VSE Graduate Admissions Office. At the completion of MS requirements, a master's degree is conferred.

Mechanical Engineering, BS/Systems Engineering, Accelerated MS

Overview

Highly-qualified students in the Mechanical Engineering, BS have the option of obtaining an accelerated Systems Engineering, MS.

For more detailed information, see AP6.7 Bachelor's/Accelerated Master's Degrees. For policies governing all graduate degrees, see AP6 Graduate Policies.

Admission Requirements

Mason undergraduate students majoring in Mechanical Engineering, BS may apply to this option if they have earned 90 undergraduate credits with an overall GPA of at least 3.30 and completed all MATH and PHYS requirements. Criteria for admission are identical to criteria for admission to the Systems Engineering, MS program.

Accelerated Options Requirement

Students must complete all credits that satisfy requirements for both the BS and MS programs. Up to two courses (6 credits) of approved master's level courses taken as part of the undergraduate degree may be applied to the graduate degree. The courses selected for this purpose must be approved by the academic advisors of both the BS and MS programs and by the SEOR department chair. For the BS programs that allow undergraduate electives from the department of system engineering and operations research, the students may choose the graduate version of such elective courses to replace the corresponding undergraduate courses.

Degree Conferral

Students must apply the semester before they expect to complete the BS requirements to have the BS degree conferred. In addition, at the beginning of the student's final undergraduate semester, students must complete a Bachelor's/Accelerated Master's Transition form that is submitted to the Office of the University Registrar and the VSE Graduate Admissions Office. At the completion of MS requirements, a master's degree is conferred.

Statistics, BS/Systems Engineering, Accelerated MS

Overview

Highly-qualified students in the Statistics, BS have the option of obtaining an accelerated Systems Engineering, MS.

For more detailed information, see AP6.7 Bachelor's/Accelerated Master's Degrees. For policies governing all graduate degrees, see AP6 Graduate Policies.

Admission Requirements

Mason undergraduate students majoring in Statistics, BS may apply to this option if they have earned 90 undergraduate credits with an overall GPA of at least 3.30 and completed all MATH and PHYS requirements. Criteria for admission are identical to criteria for admission to the Systems Engineering, MS program.
Accelerated Options Requirement

Students must complete all credits that satisfy requirements for both the BS and MS programs. Up to two courses (6 credit hours) of approved master’s level courses taken as part of the undergraduate degree may be applied to the graduate degree. The courses selected for this purpose must be approved by the academic advisors of both the BS and MS programs and by the SEOR department chair. For the BS programs that allow undergraduate electives from the department of system engineering and operations research, the students may choose the graduate version of such electives to replace the corresponding undergraduate courses.

Degree Conferral

Students must apply the semester before they expect to complete the BS requirements to have the BS degree conferred. In addition, at the beginning of the student’s final undergraduate semester, students must complete a Bachelor’s/Accelerated Master’s Transition form that is submitted to the Office of the University Registrar and the VSE Graduate Admissions Office. At the completion of MS requirements, a master’s degree is conferred.

Systems Engineering BS/Systems Engineering, Accelerated MS

Overview

Qualified undergraduate students may apply for a five-year accelerated BS/MS program leading to a Bachelor of Science in Systems Engineering and an MS degree in Systems Engineering.

For more detailed information, see AP.6.7 Bachelor’s/Accelerated Master’s Degrees. For policies governing all graduate degrees, see AP.6 Graduate Policies.

Admission Requirements

Mason undergraduate students majoring in systems engineering may apply to this option if they have earned 90 undergraduate credits with an overall GPA of at least 3.30 and completed all MATH and PHYS requirements. Criteria for admission are identical to criteria for admission to the Systems Engineering, MS program.

Accelerated Option Requirements

Up to two courses (six credit hours) of master’s level courses may be applied to both the undergraduate and the graduate degrees. These two courses may be chosen from the list of graduate courses in the following table. For Systems Engineering, BS students, these graduate courses replace the corresponding undergraduate courses listed in the table. The undergraduate version of these courses may not be applied toward the Systems Engineering, MS program.

<table>
<thead>
<tr>
<th>Undergraduate</th>
<th>Graduate</th>
<th>Credit may not be received for both courses.</th>
</tr>
</thead>
<tbody>
<tr>
<td>SYST 420</td>

<tr>
<td>SYST 473</td>
<td>SYST 573</td>
<td></td>
</tr>
<tr>
<td>OR 441</td>
<td>OR 541</td>
<td></td>
</tr>
</tbody>
</table>

Any other 500-level course may be applied to both the undergraduate and graduate degrees with approval of the advisor and SEOR department chair.

Degree Conferral

Students must apply the semester before they expect to complete the BS requirements to have the BS degree conferred. In addition, at the beginning of the student’s final undergraduate semester, students must complete a Bachelor’s/Accelerated Master’s Transition form that is submitted to the Office of the University Registrar and Graduate Recruitment and Enrollment Services. At the completion of MS requirements, a master’s degree is conferred.

BS (selected)/Systems Engineering, Accelerated MS

Overview

Highly-qualified students in BS programs have the option of obtaining an accelerated Systems Engineering, MS.

For more detailed information, see AP.6.7 Bachelor’s/Accelerated Master’s Degrees. For policies governing all graduate degrees, see AP.6 Graduate Policies.

Admission Requirements

Mason undergraduate students majoring in both engineering and non-engineering disciplines may apply to this option if 1) such an accelerated Systems Engineering, MS pathway is allowable from the student’s BS program, which will be determined by the academic advisors of both the BS and MS programs and by the SEOR department chair, 2) they have earned 90 undergraduate credits with an overall GPA of at least 3.30, and 3) they have completed all MATH and PHYS requirements. Criteria for admission are identical to criteria for admission to the Systems Engineering, MS program.
Accelerated Option Requirements

Students must complete all credits that satisfy requirements for both the BS and MS programs. Up to two courses (6 credits) of approved master’s level courses taken as part of the undergraduate degree may be applied to the graduate degree. The courses selected for this purpose must be approved by the academic advisors of both the BS and MS programs and by the SEOR department chair.

For the BS programs that allow undergraduate electives from the department of systems engineering and operations research, the students may choose the graduate version of such elective courses to replace the corresponding undergraduate courses.

Degree Conferral

Students must apply the semester before they expect to complete the BS requirements to have the BS degree conferred. In addition, at the beginning of the student’s final undergraduate semester, students must complete a Bachelor’s/Accelerated Master’s Transition form that is submitted to the Office of the University Registrar and the VSE Graduate Admissions Office. At the completion of MS requirements, a master’s degree is conferred.

Information Technology, PhD

Banner Code: VS-PHD-INFT

2400 Nguyen Engineering Building
Fairfax Campus

Phone: 703-993-1504
Email: vsephd@gmu.edu

The Information Technology (INFT) PhD is a signature degree of the Volgenau School of Engineering. The program focuses on the science, engineering, and technology of information processing, an area of study ripe for innovation in a world driven more and more by data. The PhD in INFT accommodates rigorous and cross-disciplinary PhD study that does not fit with PhD program requirements of a single VSE department. The PhD in INFT includes several concentrations to provide program focus.

Admissions & Policies

Admissions

Admission is competitive. An undergraduate degree in an information technology-related area, such as engineering, computer science, operations research, mathematics, or the physical sciences is typically required for admission. The undergraduate preparation should include, at a minimum, calculus, differential equations, linear algebra, discrete structures, probability, and statistics, in addition to computational proficiency, including experience with a variety of languages and computer hardware. Additional requirements depend on the proposed study focus.

Most successful applicants complete their master’s degree before admission with a minimum GPA of 3.5. Applicants can also be considered directly from their undergraduate studies with a minimum GPA of 3.25.

Applicants wishing to switch fields from non-information technology-related academic backgrounds, especially those with extensive work experience in information technology, are encouraged to discuss opportunities for study. This path into the Information Technology, PhD program typically requires academic preparation in the formal framework and underpinning theory of information technology. Those applicants are referred to the VSE departments offering the concentrations and courses of greatest interest, prior to application.

Applicants are required to submit: an online application for admission, undergraduate and graduate transcripts from previous colleges and universities, GRE test results, three letters of reference (preferably from college instructors), goals statement and a résumé. Applicants are also required to submit a brief personal goals statement including the proposed research areas of interest. Admission for cross-disciplinary Information Technology, PhD study will depend on alignment with VSE faculty research expertise.

International applicants are referred to the university’s English Proficiency Requirements (https://www2.gmu.edu/admissions-aid/how-apply/international/english-proficiency-requirements/). In addition, international transcripts must be translated and evaluated (course-by-course preferred) by a member of the National Association of Credential Evaluation Services (NACES). Transcripts can be evaluated by George Mason University at no extra cost to the applicant; this typically adds 6-8 weeks to the application processing time. Please review George Mason University’s Policy on International Transcript Submission (https://catalog.gmu.edu/admissions/international-students/). Applications must be completed and submitted before an admission decision is made.

Policies

The general doctoral requirements of Mason apply to this program.

Degree Requirements Overview

Students must complete a minimum of 72 graduate credits. This requirement may be reduced by a maximum of 30 credits from an approved and completed master’s degree. That determination requires the evaluation by, and approval of, the program director or VSE Dean or their designee, and depends on alignment of the master’s degree with the proposed study focus.

Within those 72 credit hours, the program requires:

- Specialized coursework comprised of 48 credits for students with no credit for previous MS coursework. This specialized coursework requirement may be reduced to a minimum of 18 credit hours, depending on the approved credit reduction for previous graduate coursework.
- Breadth requirement, requiring completion of two Fundamental Knowledge courses, and two Qualifying Exams.
- Comprehensive exam (oral) after completion of specialized coursework.
- Development and acceptance of a research proposal plus execution of the research culminating in a public final defense. This research phase of the PhD requires 24 credit hours of:

</tbody>
</table>

- Approval by the dissertation committee of the defense of the dissertation research in written and oral forms.
## Requirements

### Degree Requirements

Total credits: minimum 72

### Plan of Study

Students are strongly encouraged, but are not required to select a concentration by the end of their first year. Concentration areas are based on broad areas of faculty expertise. Students who do not choose an established concentration must be flexible in their research focus, recognizing that not all faculty are available to accept doctoral students.

### Concentrations

#### Available Concentrations
- Digital Forensics (DFOR)
- Information Sciences and Technology (ISTC)
- Information Security and Assurance (ISA)
- Information Systems (ISYS)
- Mechanical Engineering (ME)
- Software Engineering (SWE)

### Specialized Coursework

Each student works with his or her faculty advisor or dissertation director to develop a plan of study. Successful coursework completion includes:

- A cumulative GPA of 3.50 in courses included on the plan of study, and all grades must be a B- or better.
- At least 12 credits on the plan of study must be courses numbered 700 or higher. No 500 level courses are permitted. The suggested courses for each concentration is as follows. Specific courses should be chosen with advisement of your faculty advisor.

### Digital Forensics (DFOR)

Breadth Requirement

To satisfy the breadth requirements of the PhD INFT, a student must demonstrate his/her proficiency in the foundational knowledge specific to her/his program of study. This is satisfied through completion of
two Fundamental Knowledge courses, and two Qualifying Exams. The Fundamental Knowledge courses and the Qualifying Exams are described in the online guide maintained by the Volgenau School of Engineering Office of Graduate Academic Affairs. Selection of the two Fundamental Knowledge courses and the two Qualifying Exams must be approved by the student's PhD advisor and filed with the Volgenau School of Engineering Office of Graduate Academic Affairs.

Students must complete the breadth requirements within the following time limits. Students who enter the program with a 24-30 credit reduction from a prior Master's degree must satisfy all breadth requirements no later than twelve months following the end of their fourth semester in the program. Students who enter the program with a reduction of less than 24 credits must satisfy all breadth requirements no later than twelve months following the end of their sixth semester in the program. In both instances, these time limits include all attempts at the Fundamental Knowledge courses and the Qualifying Exams. Time limits apply to all PhD INFT students, regardless of their part-time or full-time study status. Failure to satisfy all breadth requirements by the specified time is cause for termination from the PhD INFT program.

Fundamental Knowledge Course Requirement:

Students are required to complete two Fundamental Knowledge courses within the first 24 months of their PhD enrollment, regardless of their part-time or full-time study status and regardless of credit reductions from previous coursework. Fundamental Knowledge courses are listed in the study guide maintained by the VSE Office of Graduate Academic Affairs. Fundamental Knowledge courses must be approved by the PhD advisor; must be specific to the student's program of study; and must be submitted to the VSE Office of Graduate Academic Affairs. These courses can be used as credit toward the student's plan of study, but will not count toward his/her 700 level minimum requirement.

Students must earn a grade of A- or better in both Fundamental Knowledge courses on their first attempt to satisfy this component of the breadth requirement. Students failing to earn a grade of A- or better on their first attempt in one or both Fundamental Knowledge courses are required to take and pass in one attempt, supplementary Qualifying Exams, described below.

Qualifying Exam Requirement:

Students are required to take and pass two Qualifying Exams within the time limit defined for the breadth requirement. Qualifying Exams are listed in the study guide maintained by the VSE Office of Graduate Academic Affairs. Selection of Qualifying Exams must be approved by the PhD advisor; must be specific to the student's program of study; must not duplicate the bodies of knowledge of the student's Fundamental Knowledge courses; and must be submitted to the VSE Office of Graduate Academic Affairs.

Qualifying Exams are offered twice a year, just before the fall and spring semesters. Each exam is allocated two hours and graded on a pass or fail basis. Students must take all required Qualifying Exams in their first attempt. Students failing one or both of their Qualifying Exams on the first attempt are required to retake the Qualifying Exams they did not pass the next time the Qualifying Exams are offered. Students failing Qualifying Exams may not subsequently satisfy the breadth requirement by completing Fundamental Knowledge courses.

Students failing to earn a grade of A- or better in one or both Fundamental Knowledge courses are required to take and pass supplementary Qualifying Exams in the bodies of knowledge covered by the Fundamental Knowledge courses in which they earned a grade of less than A-. Supplementary Qualifying Exams are in addition to the two required Qualifying Exams described above. Students must pass supplementary Qualifying Exams in one attempt only.

Failure to satisfy all breadth requirements, within established time limits, regardless of part-time or full-time study status, may be terminated from the PhD INFT program.

Comprehensive Exam

The comprehensive exam is an oral exam taken after students have satisfactorily completed all coursework requirements in their approved plan of study. To initiate the exam process, the student meets with his/her dissertation advisor to prepare an Oral Comprehensive Exam Request form. This Request must be approved by the entire dissertation supervisory committee and forwarded to the associate dean for final approval. The permission form must be submitted with:

- a one page description of the intended area of research; and
- a reading list on which the student will be examined.

The reading list should include articles and/or books that cover the fundamentals, state-of-the-art, and tools needed to perform research in the intended area.

The objective of the comprehensive exam is to allow the dissertation supervisory committee to assess the student's readiness to complete doctoral research in the chosen area of concentration. The duration of the oral exam is typically two hours. Students must pass the comprehensive exam and dissertation proposal defense before advancing to candidacy. The comprehensive exam must be attempted for the first time no later than one year after completing all coursework requirements and starting the IT 998 Doctoral Dissertation Proposal sequence.

Students who fail the exam are permitted to retake it once within six weeks of notification of failure of the first attempt. Failure in the second attempt will result in termination from the program.

Once enrolled in Dissertation Research, students must maintain continuous registration in IT 998 Doctoral Dissertation Proposal until advancement and IT 999 Doctoral Dissertation until the dissertation is complete and has been successfully submitted to the library, excluding summers, unless conferring in August. For more information please see AP6.10.6.

Faculty Advisement

On admission to the program, students are assigned a temporary faculty advisor aligned with the research area that the student identified in his/
her application. The temporary faculty advisor advises on and approves the student’s initial course selection.

Ultimately, all INFT PhD students require a dissertation director who will direct the student’s PhD studies, including the research. This arrangement, by mutual consent, should be agreed upon before the student begins their research. Topics of potential research are determined by the expertise and interests of the faculty. The student is responsible to identify, communicate and offer proof of his/her research skills to the faculty under whom (s)he wishes to work. A student’s engagement, excitement, commitment and initiative are all attributes a potential dissertation director will consider before making the decision to formally commit. The university does not manage this matching process, nor does it compel any faculty member to undertake this role for a student.

Dissertation directors and their students should arrive at an understanding of the dissertation director’s expectations. This must include a clear understanding of the research topic and the courses the student must complete in support of that research. It should also include, at a minimum, a timeline for the overall planned program of study, expectations regarding technical publications and presentations arising from the research, availability of graduate student support, advising style, and the location where the student will conduct the research and when. A successful dissertation depends on shared understanding.

Students have the right to change dissertation directors. Changing dissertation directors slows academic progress, and students are discouraged from changing more than once, since demonstration of satisfactory progress on the PhD is one criterion for continuation in the program. Dissertation directors also have the right to decline or to discontinue supervising students.

**Doctoral Supervisory Committee**

After a student and his/her dissertation director agree to work together and file this information with the VSE Office of Graduate Academic Affairs, the doctoral supervisory committee can be formed. The doctoral supervisory committee includes the dissertation director, who must be a member of the Mason graduate faculty, and at least three other people from the Mason graduate faculty. The dissertation director and chair of a PhD INFT dissertation committee must have at least a 50% appointment in the Volgenau School. This rule does not apply to a codirector. At least three committee members must be from the Volgenau School, and at least two of the departments in the Volgenau School must be represented. Representatives from industry or government with key, related expertise may also be considered as a fifth member. However, all members of the committee must hold a terminal degree.

The doctoral supervisory committee administers the comprehensive exam, the dissertation proposal presentation evaluation, and the dissertation predefense and defense. Permission for the comprehensive exam and dissertation defense are requested from the associate dean of graduate programs within the Volgenau School by submitting the appropriate committee approved forms.

**Dissertation Proposal Presentation**

After successful completion of the Comprehensive Exam, doctoral students prepare a written dissertation proposal to present to the doctoral supervisory committee. Students must continuously enroll in IT 998 Doctoral Dissertation Proposal to complete this effort. While in the IT 998 Doctoral Dissertation Proposal sequence, the student should enroll in IT 990 Dissertation Topic Presentation. The dissertation proposal presentation must be at least one week after passing the comprehensive exam. After successfully completing the dissertation-proposal requirement, the student is formally admitted as a candidate for the PhD degree and must begin to continuously register for IT 999 Doctoral Dissertation. The application for candidacy is submitted to the associate dean of graduate programs on a standard form.

**Dissertation and Final Defense**

With the concurrence of the dissertation supervisory committee and associate dean, students proceed with the doctoral research, during which time they must be continuously enrolled in IT 999 Doctoral Dissertation. When the central portions of the research have been completed to the point that students are able to describe the original contributions of the dissertation effort, they submit the written dissertation to the committee and schedule an oral predefense to the committee. Once the committee believes the student is ready, a final public oral defense may be scheduled allowing a minimum of two weeks for the defense notification as required by the University, AP.6.10.8 (https://catalog.gmu.edu/policies/academic/graduate-policies/#text). The entire dissertation committee and the associate dean must be present at the defense, unless an exception is approved by the associate dean of graduate programs in advance of the defense.

With satisfactory evaluation of the oral defense of the dissertation by the committee, the student must submit to the library a publishable dissertation that represents a definitive contribution to knowledge in INFT. If the candidate successfully defends the dissertation, the dissertation committee recommends that the final form of the dissertation be completed and the Volgenau School faculty and the graduate faculty of Mason accept the candidate for the PhD degree.

If the student fails to successfully defend the dissertation, the student may request a second defense, following the same procedures as for the initial defense. There is no time limit for this request other than general time limits for the doctoral degree. An additional predefense is not required, but students are strongly advised to consult with the committee before scheduling a second defense. If the student fails on the second attempt to defend the dissertation, the student will be terminated from the program.

**Sid and Reva Dewberry Department of Civil, Environmental, and Infrastructure Engineering**

Sam Salem, Chair

Phone: 703-993-1675
Website: civil.gmu.edu

The Sid and Reva Dewberry Department of Civil, Environmental, and Infrastructure Engineering (CEIE) offers BS, MS, MEng, and PhD degrees. These degree programs focus on the physical and organizational infrastructure essential to the functioning of society.

Civil and infrastructure engineering is the study of land, transportation, water resources, environment, structures, geotechnology, and construction from a civil engineering perspective and within a complex technological, social, political, economic, and environmental context. The focus is on how these systems are successfully conceived, developed, designed, built, operated, maintained, and renewed in the built environment. This applies to major metropolitan areas in developed countries, such as Washington, D.C. and its integrated suburbs, and...
extends to infrastructure issues in developing nations which often involve very different issues.

An urban society thrives and prospers when adequate, appropriate, reliable, robust, secure, and cost-effective infrastructure systems are provided. The investment in existing infrastructure and other urban systems in the United States and abroad is enormous. The investment required to maintain, operate, renew, and manage the evolution of these infrastructure systems in the future is even greater. The need for highly educated and creative professionals to confront and solve these continuing vital problems is pressing. Examples of infrastructure systems include water supply and distribution; streets, roads, and highways; wastewater management; transit; storm water management; public utilities; energy supply and distribution; telecommunications; buildings, facilities and structures; and solid waste management.

Faculty

Professors
Goodings, Miller-Hooks, Salem (Chair)

Associate Professors
Ferreira, Kosoglu, Lattanzi, Tanyu, Urgessa, Venigalla, Zhu

Assistant Professors
Bonkok, Esmaeili, Ji, Maggioni, Tian

Instructors
Binning

Adjunct Faculty

Emeritus Faculty
Arciszewski, Bronzini, Houck

Email: snolder@gmu.edu
Website: http://civil.gmu.edu/

The bachelor's degree program provides essential underpinnings in the theory and design methods of civil and infrastructure engineering for engineering practice. Students benefit from exposure to practical civil, environmental, and infrastructure engineering problems and their solutions in the classroom, lab, and field. The educational objectives of the Civil and Infrastructure Engineering program describe expectations for graduates approximately three to five years after obtaining their degree. Graduates of the program will be professionals who:

- Engage in the engineering practice of planning, designing, constructing, operating and maintaining sustainable infrastructure;
- Participate in public discussions concerning infrastructure in the urban, suburban, and exurban setting by providing professional guidance;
- Stay current through continuing education opportunities, professional conferences, graduate school, and other self-learning experiences; have the ability to obtain and maintain professional licensing.

Civil engineering students can look forward to a career in local, state, and federal government organizations, and in architectural and engineering firms that specialize in land development, transportation, water resources, environment, structures, geotechnical, construction, and other related fields. The program also prepares students for continuing graduate studies for sophisticated practice, research, and teaching.

The bachelor's program in civil and infrastructure engineering is accredited by the Engineering Accreditation Commission of ABET, http://www.abet.org.

This is a Green Leaf program.

Admissions & Policies

Policies
For policies governing all undergraduate degrees, see AP5 Undergraduate Policies.

Change of Major
See Change of Major for more information.

Program Requirements
Degree requirements include 121 credits distributed in three main areas: mathematics and basic science, humanities and social sciences, and civil engineering analysis and design. Students must complete all math, science and Volgenau School of Engineering courses presented as part of the required 121 credits for the degree with a grade of C or better.

The prerequisite structure for these courses is extensive. Sample schedules, available from the department, provide a comprehensive listing of major and Mason Core requirements and serve as a guide to the progression of the courses to satisfy all prerequisites.

Students are required to see their academic advisor at least once each year to plan their curriculum, and to develop an approved plan of study, which constitutes a learning plan for the degree program.

Termination from the Major
No math, science, or Volgenau School of Engineering course that is required for the major may be attempted more than three times. Those students who do not successfully complete such a course within three attempts will be terminated from the major. Undeclared students in the
Civil and Infrastructure Engineering, BS

Volgenau School who do not successfully complete a course required for a Volgenau School major within three attempts will also be terminated.

In addition, students in the Volgenau School with evidence of continued failure to make adequate progress toward declaring or completing a Volgenau School major will be terminated from the school. Adequate progress is determined by the major program. For more information, see AP 5.2.4 Termination from the Major (https://catalog.gmu.edu/policies/academic/undergraduate-policies/#ap-5-2-4).

Once a student has attempted one of these courses twice unsuccessfully, the third attempt must be no later than the next semester of enrollment, excluding summers. Failure to take the course at that time will result in termination from the major. A third attempt of a Volgenau School of Engineering course requires support by the student’s major department as well as permission by the department offering the course. This permission is not guaranteed. If the student is unable to take the course when required, the student may request an extension to a future semester; extensions require approval of the student’s advisor, their department, and the Associate Dean for Undergraduate Programs. The deadline for extension requests is the add deadline for the semester in which the course is required.

Students who have been terminated from a Volgenau School of Engineering major may not register for a Volgenau School course without permission of the department offering the course. This applies to all undergraduate courses offered by the Volgenau School except IT 104 Introduction to Computing (Mason Core) and STAT 250 Introductory Statistics I (Mason Core).

A student may not declare any major in the Volgenau School of Engineering if the student has previously met the termination criteria for that major at any time, regardless of what the student’s major was at the time the courses were taken.

Technical Electives

Select 12 credits of CEIE Technical Electives from four different specialty areas from among the following six Civil Engineering specialty areas:

- Construction Engineering:
  - CEIE 471/571 Construction Administration
  - CEIE 476/576 Construction Cost Estimating
  - CEIE 478/578 Construction Planning and Scheduling

- Environmental Engineering:
  - CEIE 450/550 Environmental Engineering Systems
  - CEIE 453/553 Water and Wastewater Treatment Processes

- Geotechnical Engineering:
  - CEIE 432/532 Foundation Design
  - CEIE 435/535 Engineering Geology

- Structural Engineering:
  - CEIE 412/512 Structural Steel Design
  - CEIE 413/513 Reinforced Concrete Design
  - CEIE 414 Structural Modeling for Engineers

- Transportation Engineering:
  - CEIE 461/561 Traffic Engineering
  - CEIE 462/562 Urban Transportation Planning

- Water Resources Engineering:
  - CEIE 440/540 Water Supply and Distribution
  - CEIE 442/542 Open Channel Flow

Select 12 credits of CEIE Technical Elective courses from any CEIE 4XX course

Total Credits 24

1. Taking a 500-level course requires prior approval by the department’s undergraduate program director.
2. One 3 credit course of those remaining credits may be from related advanced science or engineering course offerings. Approval from the student’s academic advisor is required before a non-CEIE course is taken to meet senior technical elective requirements for the degree.

### Writing-Intensive Requirement

The university’s writing-intensive requirement for civil and infrastructure engineering majors is satisfied by the successful completion of CEIE 301 Engineering and Economic Models in Civil Engineering.

### Additional Mason Core

Students must complete all Mason Core requirements not fulfilled by major requirements with one modification. CIE students are required to take 6 credits of written communication, 3 credits of literature, and courses in two of the following three areas: arts, global understanding, and western civilization/world history. This exemption means that CIE students meet the Volgenau School of Engineering’s requirement for humanities and social science courses by taking 21 credits rather than 24. The two additional Mason Core areas to be satisfied must be approved by the CEIE faculty advisor with the goal of best meeting the Mason Core needs of the student. All other Mason Core requirements must be met.

### 4-Year Plan

**Bachelor of Science in Civil & Infrastructure Engineering Sample Study Plan**

Detailed four year plans and degree planning checklists can be found at [https://advising.gmu.edu/current-student/majors-at-mason/](https://advising.gmu.edu/current-student/majors-at-mason/).

### Honors

### Honors in the Major

The Sid and Reva Dewberry Department of Civil, Environmental and Infrastructure Engineering offers an Honors Program in Civil and Infrastructure Engineering that creates a community of outstanding scholars in civil engineering who share a commitment to learning, service, and leadership. The Program is crafted around the civil and infrastructure curriculum, and is distinct from the University Honors Curriculum. Entry to the Honors Program is by invitation, extended to students with a minimum high school GPA of 3.80.

### Requirements

The Honors Program is challenging, designed for the highly motivated student, and consists of 120 credits. Honors students must satisfy requirements in addition to those of the normal BS CIE degree, including:

- An advanced communication course, COMM 320 Business and Professional Communication or COMM 637 Risk Communication, which may serve as a substitute for one CEIE (4xx) level senior technical elective.
- A minimum of 6 credits of CEIE graduate (5xx/6xx) level courses (these courses may substitute for CEIE (4xx) level senior technical electives by approval of the Department Chair). Students must submit
a Graduate Course for Undergraduate Credit Form for approval to the
course instructor and Department Chair.

Once admitted to the Honors Program, students must remain in good
standing and maintain a minimum cumulative GPA of 3.50 and a
minimum GPA of 3.20 in each semester for all courses counting toward
the BS CIE degree, maintain continuous enrollment working toward the
BS CIE degree, and abide by the Mason Honor Code.

Accelerated Master's

Civil and Infrastructure Engineering, BS/
Civil and Infrastructure Engineering,
Accelerated MS

Overview
Highly-qualified students in the Civil and Infrastructure Engineering,
BS have the option of obtaining an accelerated Civil and Infrastructure
Engineering, MS.

For more detailed information, see AP6.7 Bachelor's/Accelerated
Master's Degrees. For policies governing all graduate degrees, see AP6
Graduate Policies.

Admission Requirements
Students in the Civil and Infrastructure Engineering, BS program may
apply to this option if they have earned 90 undergraduate credits with an
overall GPA of at least 3.30. All other criteria for admission are identical
to criteria for admission into the Civil and Infrastructure Engineering,
MS program.

Accelerated Option Requirements
Students must complete all credits that satisfy requirements for both
the BS and MS programs. Students register for 6 credits of overlapping
graduate level courses in place of undergraduate technical elective
courses. The courses selected for this purpose must be approved by the
academic advisor.

Degree Requirements
Students must apply the semester before they expect to complete the
BS requirements to have the BS degree conferred. In addition, at the
beginning of the student’s final undergraduate semester, students must
complete a Bachelor's/Accelerated Master's Transition form that is
submitted to the Office of the University Registrar and the VSE Graduate
Admissions Office. At the completion of MS requirements, a master’s
degree is conferred.

Bachelor's Degree (selected)/
Environmental Science and Policy,
Accelerated MS

Overview
This degree option allows highly qualified George Mason University
students to earn an Environmental Science and Policy, MS in less time
than if they had first graduated with an environmentally-focused Green
Leaf-designated BA or BS degree and then applied to the MS program
sequentially.

For more detailed information, see AP6.7 Bachelor’s/Accelerated
Master's Degrees. For policies governing all graduate programs, see AP6
Graduate Policies.

Admission Requirements
Students with an overall GPA of at least 3.20 who are pursuing any Green
Leaf-designated major or minor may apply for provisional acceptance
into this accelerated master’s program after completing two semesters
of chemistry (including CHEM 211 General Chemistry I (Mason
Core) and CHEM 212 General Chemistry II (Mason Core) and three
semesters of biology, including a course in ecology, or the equivalent, for
example:

<table>

</tbody>
</table>

By the beginning of the undergraduate's senior year, they should first
submit a Graduate Application for Accelerated Master's Program form
(obtained from the Office of Academic and Student Affairs (https://
cos.gmu.edu/about/contact-us/)). Secondly, in their senior year
accelerated master’s students must complete the two graduate courses
indicated on their Accelerated Master’s Program Application with a
minimum grade of 3.00 in each course. They must maintain a minimum
GPA of 3.00 in all coursework and in coursework applied to their major.
Upon completion and conferral of the undergraduate degree in a Green
Leaf-designated program, in the semester indicated in the application,
they must additionally submit the Bachelor’s/Accelerated Master’s
Transition form (found on the Office of the University Registrar website
(http://registrar.gmu.edu/forms/)) and will subsequently be admitted into
graduate status.

By at least the beginning of their senior year, they should seek out
a faculty member in the Department of Environmental Science and
Policy who is willing to serve as their advisor. This advisor will aid the
student in choosing the appropriate graduate courses to take and
help to prepare the student for graduate studies. Admission into a
research-oriented master’s concentration is dependent upon securing
the agreement of a faculty advisor. Faculty from a variety of departments
and colleges at George Mason (called “program faculty”) can serve as
master's advisors. Potential students are encouraged to speak with the
graduate program coordinator in the department to obtain guidance on this issue.

**Application Requirements**

Applicants to all graduate programs at Mason must meet the admission standards and application requirements for graduate study as specified in the Graduate Admission Policies section of this catalog, excluding the GRE exam requirement (which is not required for those enrolled in the accelerated program). This includes three letters of recommendation (at least one from a former professor or someone with a PhD), a recent resume, a statement of interest/research goals and interests (including information on the candidate’s proposed MS research), and a letter from their advisor stating that the advisor agrees to take on the candidate as an MS student, how the candidate would be a good fit for them and why candidate’s research topic would be suitable.

For information specific to the accelerated Environmental Science and Policy, MS, see Graduate Admissions on the department’s website (http://esp.gmu.edu/academic-programs/graduate/admissions/).

**Reserve Graduate Credits**

Students admitted to this program may take graduate courses after completing 90 undergraduate credits, and up to 6 credits of appropriate environmentally-focused graduate coursework may be used in partial satisfaction of the requirements for the undergraduate degree. If students earn at least a 3.00 GPA in these classes, they are granted advanced standing in the master’s program and must then complete an additional 27 credits to receive the master’s degree.

To apply these credits to the master’s degree, students must request that the credits be moved from the undergraduate degree to the graduate degree using the Bachelor’s/Accelerated Master’s Transition form found on the Office of the University Registrar website (http://registrar.gmu.edu/forms/) (as noted above).

Students may take up to 6 additional environmentally-focused graduate credits as reserve graduate credit. These credits do not apply to the undergraduate degree but will reduce the subsequent master’s degree credits accordingly (e.g., with 6 credits counted towards undergraduate degree plus the maximum 6 reserve credits, an MS could be completed with 21 post-bachelor’s credits). The ability to take courses for reserve graduate credit is available to all high achieving undergraduates with the permission of the department.

**Civil and Infrastructure Engineering, BS/Operations Research, Accelerated MS**

Overview

Highly-qualified students in the Civil and Infrastructure Engineering, BS have the option of obtaining an accelerated Operations Research, MS.

For more detailed information, see AP6.7 Bachelor’s/Accelerated Master’s Degrees. For policies governing all graduate degrees, see AP6 Graduate Policies.

**Admission Requirements**

Mason undergraduate students majoring in Civil and Infrastructure Engineering, BS may apply to this option if they have earned 90 undergraduate credits with an overall GPA of at least 3.30 and completed all MATH and PHYS requirements. Criteria for admission are identical to criteria for admission to the Operations Research, MS program.

Students must additionally complete MATH 203 Linear Algebra prior to applying for the graduate program.

**Accelerated Options Requirement**

Students must complete all credits that satisfy requirements for both the BS and MS programs. Up to two courses (6 credits) of approved master’s level courses taken as part of the undergraduate degree may be applied to the graduate degree. The courses selected for this purpose must be approved by the academic advisors of both the BS and MS programs and by the SEOR department chair. For the BS programs that allow undergraduate electives from the department of system engineering and operations research, the students may chose the graduate version of such elective courses to replace the corresponding undergraduate courses.

**Degree Conferral**

Students must apply the semester before they expect to complete the BS requirements to have the BS degree conferred. In addition, at the beginning of the student’s final undergraduate semester, students must complete a Bachelor’s/Accelerated Master’s Transition form that is submitted to the Office of the University Registrar and the VSE Graduate Admissions Office. At the completion of MS requirements, a master’s degree is conferred.

**Civil and Infrastructure Engineering, BS/Systems Engineering, Accelerated MS**

Overview

Highly-qualified students in the Civil and Infrastructure Engineering, BS have the option of obtaining an accelerated Systems Engineering, MS.

For more detailed information, see AP6.7 Bachelor’s/Accelerated Master’s Degrees. For policies governing all graduate degrees, see AP6 Graduate Policies.

**Admission Requirements**

Mason undergraduate students majoring in Civil and Infrastructure Engineering, BS may apply to this option if they have earned 90 undergraduate credits with an overall GPA of at least 3.30 and completed all MATH and PHYS requirements. Criteria for admission are identical to criteria for admission to the Systems Engineering, MS program.

**Accelerated Options Requirement**

Students must complete all credits that satisfy requirements for both the BS and MS programs. Up to two courses (6 credits) of approved master’s level courses taken as part of the undergraduate degree may be applied to the graduate degree. The courses selected for this purpose must be approved by the academic advisors of both the BS and MS programs and by the SEOR department chair. For the BS programs that allow undergraduate electives from the department of system engineering and operations research, the students may chose the graduate version of such elective courses to replace the corresponding undergraduate courses.

**Degree Conferral**

Students must apply the semester before they expect to complete the BS requirements to have the BS degree conferred. In addition, at the beginning of the student’s final undergraduate semester, students must complete a Bachelor’s/Accelerated Master’s Transition form that is submitted to the Office of the University Registrar and the VSE Graduate
Admissions Office. At the completion of MS requirements, a master’s
degree is conferred.

Civil and Infrastructure Engineering,
MS

Website: https://civil.gmu.edu/academics/master-science

This MS is designed for students who have completed a bachelor’s
degree in civil engineering, although domestic students with related
undergraduate degrees may be considered for provisional admission. The
MS educates students in the theory and practice of civil engineering
science and design, with a technical concentration. The master’s degree
is increasingly expected for high level practice in civil engineering, and
prepares graduates to practice in civil engineering for: federal, state,
or local government; engineering design firms; construction firms;
public utilities; non-governmental organizations; and local and regional
planning firms, among others. The MS degree serves as a foundation for
subsequent study in a doctoral program in civil engineering, as well as for
graduate studies in architecture, law, business, economics, finance, and
public policy and administration.

Both part-time and full-time study is available. Full-time students typically
complete the degree in one and a half, to two years.

Admissions & Policies

Admissions

To be considered for admission to the program, a candidate must:

• Satisfy general University and Volgenau School requirements for
  admission to a graduate program,
• Have earned a baccalaureate degree in engineering or a related
  science,
• Provide two letters of reference, submitted by former professors or
  supervisors,
• Provide a goals statement and professional résumé.

Acceptance to the degree program is based on an assessment of
the applicant’s capacity to pursue graduate studies successfully.
Consideration is given to the undergraduate record, any previous
graduate work, professional work experience, and reference letters.

Requirements

Degree Requirements

Total credits: 30

All MS students must develop a faculty-approved plan of study with a
minimum of 30 graduate credits. These credits include two core courses
(CIEE 601 Infrastructure Modeling and CIEE 605 Risk and Uncertainty in
Civil Engineering), specific requirements of a concentration declared by
the student, and seminar requirement (CIEE 795 Civil and Infrastructure
Engineering Seminar).

Plan of Study

Students are responsible for developing and receiving advisor approval
on a plan of study no later than the end of their second semester of study.
Courses taken without prior approval by the faculty advisor may not
be accepted for credit toward the degree. No more than three courses
used for credit toward the MS may be cross-listed as undergraduate
courses. None may repeat material completed as part of the student’s
previous studies. Most MS courses are offered on a two-semester or
three-semester rotation.

Core Courses

All MS students must complete the following two core courses, preferably
within the first 12 credit hours of their MS studies. These courses provide
a common background for understanding the breadth and complexity
of civil and infrastructure engineering and for analyzing and solving
engineering problems.

Note:
For all concentrations, electives outside of the chosen concentration can only be taken or substituted with the approval of the faculty advisor or the department.

Project or Thesis Option
Students, with the consent of a faculty advisor and departmental approval, may be approved to complete a project or thesis.

Research Project
Students complete CEIE 798 Research Project in Civil Engineering, during which they prepare and present a scholarly paper. The scholarly paper is a technical report on an independent study, laboratory or computer experimentation, or literature search on a current civil and infrastructure engineering topic selected with approval of a faculty advisor. CEIE 798 Research Project in Civil Engineering credits count toward elective credit hours required for the MS degree.

</table>

Total Credits: 3

Master’s Thesis
Students complete CEIE 799 Master's Thesis which counts toward the 30 credit hours required for the MS degree. The MS thesis should reflect a significant, independent research effort that advances engineering science, and is worthy of publication. The work is conducted with the approval of a faculty thesis advisor, and the final written thesis and oral defense are defended before a three-member faculty committee. The thesis is recommended for those students who wish to develop and document their research skills, or contemplate subsequent enrollment in a PhD program. Students are advised of the university's continuous registration requirement for thesis and dissertation research credits. Upon first enrolling in CEIE 799 Master’s Thesis, the student must continue registration for each fall and spring semester until the thesis is successfully completed. CEIE 799 Master's Thesis credits count toward elective credit hours required for the MS degree.

</table>

Total Credits: 1-6

Seminar Requirement
All degree candidates must attend a minimum of five graduate seminars approved by the CEIE Department for the degree program. Students must enroll in CEIE 795 Civil and Infrastructure Engineering Seminar and receive a satisfactory (S) grade by their final semester. This course is used to verify the seminar attendance requirement and is repeatable. Continuous enrollment every semester is encouraged for attendance tracking and for dissemination of seminar information but is not required.
Civil and Infrastructure Engineering, BS/Civil and Infrastructure Engineering, Accelerated MS

Overview
Highly-qualified students in the Civil and Infrastructure Engineering, BS have the option of obtaining an accelerated Civil and Infrastructure Engineering, MS.

For more detailed information, see AP.6.7 Bachelor’s/Accelerated Master’s Degrees. For policies governing all graduate degrees, see AP6 Graduate Policies.

Admission Requirements
Students in the Civil and Infrastructure Engineering, BS program may apply to this option if they have earned 90 undergraduate credits with an overall GPA of at least 3.30. All other criteria for admission are identical to criteria for admission into the Civil and Infrastructure Engineering, MS program.

Accelerated Option Requirements
Students must complete all credits that satisfy requirements for both the BS and MS programs. Students register for 6 credits of overlapping graduate level courses in place of undergraduate technical elective courses. The courses selected for this purpose must be approved by the academic advisor.

Degree Requirements
Students must apply the semester before they expect to complete the BS requirements to have the BS degree conferred. In addition, at the beginning of the student’s final undergraduate semester, students must complete a Bachelor’s/Accelerated Master’s Transition form that is submitted to the Office of the University Registrar and the VSE Graduate Admissions Office. At the completion of MS requirements, a master’s degree is conferred.

Civil and Infrastructure Engineering, PhD

Banner Code: VS-PHD-CEIE

Laura Kosoglu, PhD, Associate Department Chair; Director, CEIE Graduate Program; Associate Professor
Phone: 703-993-5319
Email: ceiegard@gmu.edu
Website: https://civil.gmu.edu/academics/phd

The Doctor of Philosophy in Civil and Infrastructure Engineering was created to prepare students for advanced leadership positions in research and development in the public or private sector, academics, or government. Students may elect to study in the areas of: construction engineering and management, environmental and water resources engineering, geotechnical engineering, structural engineering, or transportation engineering. Admitted students will complete both required and applicable coursework in their technical interest area.
based on a plan of study prepared with a doctoral advisor. They will take qualifying exams that assess student's breadth of knowledge at the graduate level and competency to conduct research. They will form a doctoral committee and prepare and defend a dissertation proposal leading to PhD candidacy. Finally, they will conduct original scholarly research and prepare, then defend a doctoral dissertation. Both part-time and full-time study is available.

Admissions & Policies

Admissions
Requirements
All general George Mason University and specific Volgenau School admission requirements (including deadlines) apply. In addition, all applicants, including Mason undergraduates, must submit the following:

- Official transcript of undergraduate and graduate course work,
- For applicants whose official language is not English, official TOEFL scores which meet the minimum requirements set by the Volgenau School,
- Three letters of recommendation from individuals knowledgeable about the applicant’s professional or academic work (at least two of the letters should be from individuals with doctorates),
- Recent professional résumé,
- Substantial statement of interest that includes a description of the specific area of proposed dissertation research, contacts the student has made with potential faculty advisors, and an explanation of career and research goals

Admission decisions will be based on the student’s qualifications, the availability of a faculty advisor, and the faculty advisor’s approval in their proposed area of research. The application materials will be reviewed by the department doctoral committee and decisions made with input from appropriate faculty members.

Financial support for outstanding applicants is available in the form of fellowships as well as research and teaching assistantships. For best consideration, applicants are encouraged to apply early and to contact potential faculty advisors to express interest in support.

Policies

Reduction of Credit
Students must complete a minimum of 72 graduate credits, which may be reduced by a maximum of 30 credits from a completed master’s degree in civil engineering or other related fields. Reduction of credit requires the approval of the program director or designee and the dean or designee of the school. They determine whether the credits are eligible for reduction of credit and applicable to the degree program and the number of credits to be reduced.

Program Requirements
The PhD in Civil and Infrastructure Engineering requires 72 graduate credits. Admitted students are expected to hold at a minimum a Bachelor of Science in Civil Engineering or a degree in a closely-related engineering or science field.

The degree plan outlined in Degree Requirements is based on a student who receives a full 30 credit reduction. Students who do not receive a full credit reduction must choose additional credits in consultation with their advisor.

Requirements

Degree Requirements
Total credits: 72

Doctoral Coursework
A minimum GPA of 3.50 is required and no C grades are allowed for the coursework earned beyond the MS. A detailed plan of study will be prepared for each student upon acceptance into the program and in consultation with the faculty advisor, which outlines all course requirements to include:

Required Courses

</tr>
</tbody>
</table>

Total Credits 12

1 No more than three courses used for credit toward the PhD may be cross-listed as undergraduate courses. None may repeat material completed as part of the student’s previous studies.

Qualifying Exam
The PhD qualifying exam is offered twice a year prior to the start of the fall and spring semesters. The qualifying exam is intended to test students’ breadth of knowledge at the MS level in their research area and to evaluate readiness for research. Students entering with a MS degree are required to attempt the qualifying exam within 18 months of admission to the program. Students entering without a MS degree must attempt the qualifying exam within two years of admission to the program.

The qualifying exam consists of one written exam and one oral exam in the student’s primary research area. The available examination areas include:

- Area A: Construction Engineering and Management
- Area B: Environmental Engineering
- Area C: Geotechnical Engineering
- Area D: Structural Engineering
Dissertation Proposal Preparation and Advancement to Candidacy

After successfully passing the qualifying exams and forming of a dissertation committee, the student may register for CEIE 998 Doctoral Dissertation Proposal research credits and begin preparation of the dissertation research proposal. The student will consult with his or her advisor on the selection of an original scholarly topic and preparation of a formal research proposal. Students are also encouraged to register for the required CEIE 990 Civil and Infrastructure Dissertation Topic Presentation course during this time. Students must schedule a formal proposal defense (also known as the research competency exam) with all members of their chosen committee present. This cannot be done before successful completion of the qualifying exams. Committee members should receive printed copies for the final proposal not less than two weeks prior to the scheduled defense date.

The research competency exam (proposal defense) includes the written proposal and a presentation of the planned dissertation research. The dissertation proposal defense shall not include already completed research. The dissertation proposal defense is the main opportunity for the committee to provide input and for the dissertation committee members to examine the student’s knowledge in higher-level course work and familiarity with existing and emerging research related to the student’s research area. After the student's presentation, and after private deliberation, the committee makes a pass/fail determination that is given to the student by his or her advisor.

Students who pass the research competency exam are admitted to candidacy and become PhD Candidates. Students who do not pass the exam may, in consultation with their advisor, schedule a second exam within 120 days of receiving notice of the first exam result. Students who do not successfully pass the research competency within this period are terminated from the program.

Dissertation Research and Defense

On successful completion of the dissertation proposal, students are to conduct original research under the guidance of their dissertation director and dissertation committee members. Students are not to schedule their dissertation defense sooner than two semesters after advancement to candidacy. The dissertation must represent achievement in research, must be a significant contribution to the field of civil engineering, and should be deemed publishable in refereed journals. When the majority of the research has been completed, the candidate is to submit a written draft of the dissertation to the doctoral dissertation committee and schedule an oral defense to be attended by the doctoral dissertation committee. The CEIE department and the CEIE Graduate Coordinator must be notified of the defense at least two weeks prior to the defense to allow time to advertise it broadly.

On successful completion of the oral defense, students must submit a final dissertation that meets the guidelines specified by the Guide for Preparing Graduate Theses, Dissertations, and Projects. If the student fails to defend the dissertation successfully, the student may request a second defense following the same procedures as the initial defense. This request has no time limit, other than the general time limits for the doctoral degree as per Mason policy. The student is strongly advised to consult with the committee before scheduling the second defense. If the student fails on the second attempt to successfully defend the dissertation, the student will be terminated from the PhD program. Following a successful public defense and completion of the final form of
the dissertation, the dissertation committee recommends the candidate for the degree of Doctor of Philosophy.

**Teaching Opportunities**

All PhD students are encouraged to participate in teaching activities in consultation with their major advisors. Teaching opportunities include presenting lectures, conducting recitation sessions, serving as a teaching assistant, working as a laboratory assistant, participating in teaching workshops, preparing course materials, and other related activities approved by the student's advisor.
A-Z COURSES

For more detailed information on courses, see please go to AP2 Course Information.

See Courses at Mason (http://catalog.gmu.edu/course-search/) for additional schedule details.

Course information accurate at time of publication in April 2019. For the most updated version, view course details on Patriot Web prior to registering.

Academic English (AE)

000 Level Courses

AE 000: AE Pre-Registration. 0 credits.
Offered by INTO Mason. May not be repeated for credit.

Registration Restrictions:
Enrollment is limited to English Language level students.

Schedule Type: Lecture
Grading:
This course is graded on the Not Gradeable (NG) scale.

AE 002: Core Foundations. 10 credits.
Focuses on reading and writing in daily life. Develops basic writing (forming accurate simple sentences) and basic reading (identifying main ideas and explicit details in very short functional texts) on familiar, personally relevant topics. Introduces vocabulary and grammar at the CEFR A1+ level. Designed for non-native English speakers at a mid-beginning level in written skills. Offered by INTO Mason. May be repeated within the degree for a maximum 20 credits.

Registration Restrictions:
Enrollment is limited to English Language level students.

Schedule Type: Lecture
Grading:
This course is graded on the English Language scale.

AE 003: Oral Communication Skills Foundations. 6-8 credits.

**ACCT 372:** *Financial Statement Analysis*. 3 credits.
Detailed overview of financial statement analysis by users of financial statements. Students learn about common features of mandatory and voluntary accounting disclosures, behaviors and interactions among different users of financial statement information. Primary focus is analysis of financial statement information in body of financial statements and footnotes, and implications of those disclosures for firm valuation, fraud prediction, taxation, and governance. A third attempt will require academic advisor approval. Offered by School of Business. Limited to two attempts.

**Registration Restrictions:**
**Required Prerequisites:** (ACCT 301C, L301, 303C, L303, 330C or L330).
C Requires minimum grade of C.
Students with a class of Freshman may **not** enroll.
Non-Degree level students may **not** enroll.
Students with the terminated from BU major attribute may **not** enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale.

**ACCT 390:** *Introduction to Financial Planning and Wealth Management*. 3 credits.
This course provides an introduction to the financial planning process for students interested in a career in financial planning and wealth management. Course topics include education, insurance, and retirement planning. The course also will cover professional responsibilities and regulations governing the financial services industry. A third attempt will require academic advisor approval. Offered by School of Business. Limited to two attempts. Equivalent to FNAN 390.

**Registration Restrictions:**
**Required Prerequisites:** (FNAN 303B or L303) and ((ACCT 303C or L303) or (ACCT 330B or L330)).
B Requires minimum grade of B-.
C Requires minimum grade of C.
Students with a class of Freshman may **not** enroll.
Non-Degree level students may **not** enroll.
Students with the terminated from BU major attribute may **not** enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale.

**400 Level Courses**

**ACCT 408:** *Taxes Insurance and Risk Management*. 3 credits.
This course provides a detailed look at tax issues that investors and businesses face. In addition, the class will focus on risk management strategies from the perspective of the business and individual and a detailed look at insurance and insurance products in full detail. The course also will cover professional responsibilities and regulations governing the financial services industry. Offered by School of Business. Limited to two attempts.

**Registration Restrictions:**
**Required Prerequisites:** ((FNAN 303B, 301B or L303) and (ACCT 303B, 330B, 301B, L303, L330 or L301)).
B Requires minimum grade of B-.
Students with a class of Freshman may **not** enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale.

**ACCT 411:** *Advanced Managerial Accounting*. 3 credits.
Managerial uses of accounting information in planning, controlling, motivating, and decision making. Emphasizes quantitative and behavioral aspects of managerial accounting. A third attempt will require academic advisor approval. Offered by School of Business. Limited to two attempts.

**Registration Restrictions:**
**Required Prerequisite:** (ACCT 311C).
C Requires minimum grade of C.
Students with a class of Freshman or Sophomore may **not** enroll.
Non-Degree level students may **not** enroll.
Students with the terminated from BU major attribute may **not** enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale.

Registration Restrictions:
Required Prerequisite: ACCT 332\(C\).
\(C\) Requires minimum grade of C.

Students with a class of Freshman or Sophomore may not enroll.
Non-Degree level students may not enroll.
Students with the terminated from BU major attribute may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale.

ACCT 441: Estate Planning. 3 credits. Students will learn to plan efficient and effective wealth transfers to meet clients’ goals. A third attempt will require academic advisor approval. Offered by School of Business. Limited to two attempts.

Registration Restrictions:
Required Prerequisite: ACCT 351\(C\).
\(C\) Requires minimum grade of C.

Students with a class of Freshman may not enroll.
Non-Degree level students may not enroll.
Students with the terminated from BU major attribute may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale.

ACCT 411: Advanced Federal Taxation. 3 credits. Federal taxation of corporations, partnerships, fiduciaries, and gratuitous transfers. A third attempt will require academic advisor approval. Offered by School of Business. Limited to two attempts.

Registration Restrictions:
Required Prerequisite: (ACCT 351\(C\)).
\(C\) Requires minimum grade of C.

Students with a class of Freshman or Sophomore may not enroll.
Non-Degree level students may not enroll.
Students with the terminated from BU major attribute may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale.

ACCT 461: Assurance and Audit Services. 3 credits. Introduction to audit and other assurance services’ objectives, theory, and practices. Focuses on developing skills for interpreting business strategies and identifying related business risks, describing internal control solutions to those risks, identifying evidential sources, providing assurance about those risks and controls, and designing strategies to provide assurance services about the reliability of business information. A third attempt will require academic advisor approval. Offered by School of Business. Limited to two attempts.

Specialized Designation: Writing Intensive in Major

Registration Restrictions:
Required Prerequisites: ACCT 331\(C\) and 361\(C\).
\(C\) Requires minimum grade of C.

Students with a class of Freshman or Sophomore may not enroll.
Non-Degree level students may not enroll.
Students with the terminated from BU major attribute may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale.

ACCT 462: Honors Seminar in Accounting. 3 credits. An in-depth study and analysis of contemporary developments and topics of interest in accounting. Enrollment in this course is limited and competitive. Notes: The topics and format will vary. Enrollment in this course is limited and competitive. A third attempt will require academic advisor approval. Offered by School of Business. Limited to two attempts.

Specialized Designation: Mason Impact

Recommended Prerequisite: Accounting major, senior standing, permission of instructor.

Registration Restrictions:
Students with a class of Freshman or Sophomore may not enroll.
Non-Degree level students may not enroll.
Students with the terminated from BU major attribute may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale.

ACCT 465: Advanced Accounting Analytics. 3 credits. This course presents advanced topics in analytics used in the accounting and finance professions. The course focuses on the development of skills required to analyze data captured in enterprise resource planning (ERP) systems – the type of data most often used by accountants – and the exploration and presentation of data for decision making. The topics include a continuation of business process knowledge and advanced skills in data visualization and analysis introduced in ACCT 361. Emerging issues in the accounting and finance professions are also introduced, such as blockchain technology and distributed databases and ledgers. A third attempt will require academic advisor approval. Offered by School of Business. Limited to two attempts.

Registration Restrictions:
Required Prerequisite: ACCT 361\(C\).
ACCT 492: Internship in Accounting. 3 credits.
Opportunity to gain practical, professional experience in conjunction with academic development. An internship is an important part of academic and career preparation. May be used as elective credit, but may not be repeated. Notes: No more than 6 credits of School of Business internship coursework (BUS 492 or ACCT 492) can be applied towards a student’s 120 (BU) degree applicable credits. Students must receive departmental approval in order to register for this course; please contact the School of Business Office of Career Services for internal eligibility requirements. Offered by School of Business. May be repeated within the degree for a maximum 6 credits. Equivalent to BUS 492, FNAN 492, MGMT 492, MIS 492, MKTG 492, OM 492, OSCM 492.

**Recommended Prerequisite:** 75 credit hours

**Registration Restrictions:**
**Required Prerequisites:** (ACCT 330 or L330) or (ACCT 309 or L303).

---

ACCT 499: Independent Study. 1-3 credits.
Research and analysis of selected problems or topics in accounting. Notes: Must be arranged with an instructor, and students must receive written approval from the associate dean for undergraduate programs before registration. Written report required. May be repeated if topics vary. Offered by School of Business. May be repeated within the term for a maximum 6 credits.

**Recommended Prerequisite:** 9 hours in upper-level accounting courses.

**Registration Restrictions:**
Students with a class of Freshman or Sophomore may not enroll.
Non-Degree or Washington Consortium level students may not enroll.

**Schedule Type:** Independent Study

**Grading:**
This course is graded on the Undergraduate Regular scale.
500 Level Courses

Upon completing course students will be knowledgeable about global business and trade as it applies to international financial reporting standards. Students will be capable of recording, analyzing, interpreting, and communicating financial and non-financial information for users of such information in accordance with applicable professional authoritative literature. Offered by School of Business. May not be repeated for credit.

**Recommended Prerequisite:** ACCT 301 or BMGT 613, or equivalent with grade of B- or higher or permission of program director.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.
Enrollment is limited to students with a major in Accounting or Forensic Accounting.
Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.
Enrollment limited to students in a Master of Science degree.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

**ACCT 532: Foundations of Financial Reporting II.** 3 credits.
Upon completing course students will be knowledgeable about global business and trade as it applies to international financial reporting standards. Students explore topics including: current liabilities and contingencies, bonds and long term notes, leases, accounting for income taxes, pensions, shareholder's equity and share based compensation. Offered by School of Business. May not be repeated for credit.

**Recommended Prerequisite:** ACCT 331, ACCT 531, or equivalent and FNAN 301, BMGT 643 or equivalent, both with a grade of B- or higher or permission of program director.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.
Enrollment is limited to students with a major in Accounting or Forensic Accounting.
Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.
Enrollment limited to students in a Master of Science degree.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

**ACCT 551: Foundations of Taxation of Business Entities.** 3 credits.
The objective of this course is to build a sound conceptual and technical foundation for the study of federal income taxation that provides students with the tools necessary to stay current with the ever-changing tax law. Offered by School of Business. May not be repeated for credit.

**Recommended Prerequisite:** Permission of program director.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.
Enrollment is limited to students with a major in Accounting or Forensic Accounting.
Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.
Enrollment limited to students in a Master of Science degree.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

**ACCT 561: Foundations of Assurance Services.** 3 credits.
The course focuses on planning, performing and reporting on an audit of financial statements conducted in accordance with U.S. generally accepted auditing standards (U.S. GAAS). It also introduces the public accounting profession and the services CPAs provide. Offered by School of Business. May not be repeated for credit.

**Recommended Prerequisite:** ACCT 331 or ACCT 531 with a B- or better or permission of MSA Program Director.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.
Enrollment is limited to students with a major in Accounting or Forensic Accounting.
Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.
Enrollment limited to students in a Master of Science degree.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

600 Level Courses

**ACCT 601: Online MSA Orientation Course.** 0 credits.
The main objective of this course is to help students understand program expectations and time commitment and prepare themselves for online communication and technology requirements necessary to successfully complete their online MSA degree. Offered by School of Business. May not be repeated for credit.

**Recommended Prerequisite:** Enrollment in the online MSA program or permission of the MSA academic director.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.
Enrollment is limited to students with a major in Accounting or Forensic Accounting.
Enrollment is limited to Graduate or Undergraduate level students.
Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Seminar

**Grading:**
This course is graded on the Graduate Special scale.

**ACCT 611: Advanced Issues in Managerial Accounting.** 3 credits.
Examines the firm's planning and control decisions that require a more sophisticated approach than the rule-of-thumb procedures advocated for traditional cost accounting problems. Students will work with real-world issues and problems and apply the appropriate analytical model to develop relevant management accounting treatments. Offered by School of Business. May not be repeated for credit.

**Recommended Prerequisite:** ACCT 311 and admission to the MSA program or permission of the program director.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate or Senior Plus.

Students in a Non-Degree Post-Baccalaureate or Non-Degree Undergraduate degrees may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

**ACCT 630: Advanced Financial Accounting.** 3 credits.
This course covers advanced topics in financial accounting like business combinations and preparation of consolidated financial statements. Students are also introduced to specialized accounting issues related to partnerships and segment reporting. Offered by School of Business. May not be repeated for credit.

**Registration Restrictions:**
**Required Prerequisite:** ACCT 332 C.
C Requires minimum grade of C.

Enrollment limited to students with a class of Advanced to Candidacy, Graduate or Senior Plus.

Enrollment is limited to students with a major in Accounting, Business Administration or Forensic Accounting.

Students in a Non-Degree Post-Baccalaureate or Non-Degree Undergraduate degrees may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

**ACCT 633: Advanced Issues in Financial Reporting.** 3 credits.
Students will gain knowledge and skills used in the interpretation of complex corporate financial accounting issues and in the preparation of complex financial statements. Topics include acquisitions, consolidations, derivatives, segment reporting, partnerships, and SEC reporting. Students also will learn to conduct research using the FASB Accounting Standards Codification to resolve ambiguous reporting issues. Offered by School of Business. May not be repeated for credit.

**Recommended Prerequisite:** Permission of MSA Director if not already enrolled in the MSA program.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate or Senior Plus.

Enrollment is limited to students with a major in Accounting or Forensic Accounting.

Students in a Non-Degree Post-Baccalaureate or Non-Degree Undergraduate degrees may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

**ACCT 636: Fraud Examination.** 3 credits.
Introduces strategies and techniques for fraud prevention and detection. Focuses on financial fraud such as bribery, contract rigging and kickbacks, embezzlement, fraudulent financial reporting, payroll fraud, and misappropriation of inventory and other assets. Several real-life cases and examples will be used to illustrate how to detect and prevent fraud. Offered by School of Business. May not be repeated for credit. Equivalent to MBA 744.

**Recommended Prerequisite:** Admission to MSA program or permission of program director.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate or Senior Plus.

Enrollment is limited to students with a major in Accounting or Forensic Accounting.

Students in a Non-Degree Post-Baccalaureate or Non-Degree Undergraduate degrees may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

**ACCT 641: Estate Planning.** 3 credits.
Students will learn to plan efficient and effective wealth transfers to meet clients’ goals. Topics include transfers of property outright or with trusts, wills, and powers of appointment; use of the marital deduction; valuation of assets; and buy-sell agreements. Students will learn differences in planning for citizens and non-citizen as well as traditional and non-traditional families. Offered by School of Business. May not be repeated for credit.

**Recommended Prerequisite:** Admission to MSA program or permission of program director.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate or Senior Plus.

Enrollment is limited to students with a major in Accounting or Forensic Accounting.

Students in a Non-Degree Post-Baccalaureate or Non-Degree Undergraduate degrees may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

**ACCT 651: Advanced Issues in Taxation.** 3 credits.
Examines the application of the federal income tax law to C-corporations, S-corporations, and partnerships. Topics will include the formation, operations, and dissolutions of such entities. Students will read and apply primary tax authorities to client fact patterns and engage in significant
professional research and writing. Offered by School of Business. May not be repeated for credit.

**Recommended Prerequisite:** Admission to the MSA program or permission of the program director. ACCT 351 or equivalent.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy or Graduate.

Enrollment is limited to students with a major, minor, or concentration in Accounting.

Enrollment is limited to Graduate level students.

Students in a Non-Degree Post-Baccalaureate or Non-Degree Undergraduate degrees may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

**ACCT 661:** *Accounting Analytics.* 3 credits.
This course involves the collection, storage, and processing of financial and nonfinancial data used to report information to internal and external users. The focus is on relational database systems to capture the business processes of an organization and the internal controls embedded in those processes. Technical skills including the design and implementation of ERP systems is emphasized. Offered by School of Business. May not be repeated for credit.

**Recommended Prerequisite:** Have not completed ACCT 361 or equivalent, or permission of the Program Director

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy or Graduate.

Students in a Non-Degree Post-Baccalaureate or Non-Degree Undergraduate degrees may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

**ACCT 665:** *Advanced Accounting Analytics.* 3 credits.
This course presents advanced topics in analytics used in business professions. The course focuses on the development of skills required to analyze data captured in enterprise resource planning (ERP) systems – the type of data most often used by business professionals – and the exploration and presentation of data for decision-making. The topics include a continuation of business process knowledge and advanced skills in data visualization and analysis. Emerging issues in business are also introduced, such as blockchain technology and distributed databases and ledgers. Offered by School of Business. May not be repeated for credit.

**Registration Restrictions:**

**Required Prerequisites:** ACCT 661\(^B\) or 361\(^C\).

\(^B\) Requires minimum grade of B-.

\(^C\) Requires minimum grade of C.

Enrollment limited to students with a class of Advanced to Candidacy, Graduate or Senior Plus.

Enrollment is limited to Graduate or Undergraduate level students.

Students in a Non-Degree Post-Baccalaureate or Non-Degree Undergraduate degrees may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

**ACCT 670:** *International Accounting.* 3 credits.
International Accounting is study of entity reported as multinational company or entity whose reporting obligations to stakeholders are located in a different country. Course focuses on effects of financial reporting, managerial planning and control, international taxation, and international financial statement analysis on multinational reporting entity, and as the convergence of U.S. Generally Accepted Accounting Principles and International Financial Reporting Standards. Offered by School of Business. May not be repeated for credit.

**Registration Restrictions:**

**Required Prerequisites:** BUS 200\(^C\), ACCT 303\(^C\), 330\(^C\) or FNAN 303\(^C\).

\(^C\) Requires minimum grade of C.

Enrollment limited to students with a class of Advanced to Candidacy, Graduate or Senior Plus.

Enrollment is limited to Graduate or Undergraduate level students.

Students in a Non-Degree Post-Baccalaureate or Non-Degree Undergraduate degrees may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

**ACCT 671:** *Managing Data Quality and Integrity.* 3 credits.
This course provides students with the current techniques used by business professionals to manage and improve data quality for later analysis and use in managerial decision-making. The course focuses on the development of the skills required to collect and extract data and validate data integrity. The topics covered include data extraction, data transformation, data cleansing, data classification, and data automation. Further, the course introduces students to the topics of data warehousing and advances their knowledge of data mining techniques. Offered by School of Business. May not be repeated for credit.

**Registration Restrictions:**

**Required Prerequisites:** ACCT 661\(^B\), 361\(^C\), MIS 310\(^C\) or ACCT 665\(^B\).

\(^B\) Requires minimum grade of B-.

\(^C\) Requires minimum grade of C.

Enrollment limited to students with a class of Advanced to Candidacy or Graduate.

Students in a Non-Degree Post-Baccalaureate or Non-Degree Undergraduate degrees may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.
ACCT 672: Governmental and Nonprofit Accounting. 3 credits.
Accounting and Reporting for non-business organizations. Emphasizes accounting issues unique to these entities, including non-exchange transactions and lack of ownership interest. Includes accounting and reporting for state and local governments, nongovernment organizations, and the federal government. Offered by School of Business. May not be repeated for credit.

Recommended Prerequisite: Admission to the MSA program or permission of the program director.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy or Graduate.
Enrollment is limited to students with a major in Accounting or Government Accounting.
Enrollment is limited to Graduate level students.
Students in a Non-Degree Post-Baccalaureate or Non-Degree Undergraduate degrees may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale.

ACCT 690: Professional Accounting Colloquium. 3 credits.
The Professional Accounting Colloquium is designed to give graduate accounting students the opportunity to identify, develop, and improve professional skills and attributes critical to success in the accounting profession. Students will gain an understanding of these professional accounting skills and attributes from both a theoretical and applied perspective. Offered by School of Business. May not be repeated for credit.

Recommended Prerequisite: Admission to the MSA program or permission of the program director.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy or Graduate.
Enrollment is limited to students with a major, minor, or concentration in Accounting.
Enrollment is limited to Graduate level students.
Students in a Non-Degree Post-Baccalaureate or Non-Degree Undergraduate degrees may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale.

ACCT 695: Graduate Field Experience. 1-3 credits.
This course provides a framework for approaching, successfully completing, and reflecting upon a professional field experience in accounting. The course is designed for students who will complete semester long internship in the field of accounting either in public accounting or in industry. Offered by School of Business. May be repeated within the degree for a maximum 3 credits.

Recommended Prerequisite: Permission of MSA Program Director.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate or Senior Plus.
Enrollment is limited to students with a major in Accounting or Forensic Accounting.
Enrollment is limited to Graduate or Undergraduate level students.
Students in a Non-Degree Post-Baccalaureate or Non-Degree Undergraduate degrees may not enroll.

Schedule Type: Internship

Grading:
This course is graded on the Graduate Special scale.

ACCT 696: Directed Studies in Accounting. 1-3 credits.
Approval by faculty member and program director required prior to registration. Studies specialized topics in business not otherwise available in the curriculum. Offered by School of Business. May be repeated within the degree for a maximum 3 credits.

Recommended Prerequisite: Admission to the MSA program or permission of the program director.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate or Senior Plus.
Enrollment is limited to Graduate or Undergraduate level students.
Students in a Non-Degree Post-Baccalaureate or Non-Degree Undergraduate degrees may not enroll.

Schedule Type: Independent Study

Grading:
This course is graded on the Graduate Regular scale.

ACCT 697: Special Topics in Accounting. 1-3 credits.
Sections established as necessary to focus on various topical issues that emerge in practice of accounting. Offered by School of Business. May be repeated within the term for a maximum 6 credits.

Specialized Designation: Topic Varies

Recommended Prerequisite: Admission to the MSA program or permission of the program director.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate or Senior Plus.
Enrollment is limited to Graduate or Undergraduate level students.
Students in a Non-Degree Post-Baccalaureate or Non-Degree Undergraduate degrees may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Special scale.
700 Level Courses

ACCT 701: Business Valuation. 3 credits.
Provides hands-on-experience in financial statement analysis and valuation. Takes an accounting-based valuation perspective and offers a comprehensive framework for analyzing financial statements consisting of (a) Business Strategy, (b) Accounting Analysis, (c) Financial Analysis, and (d) Prospective Analysis and Valuation. Offered by School of Business. May not be repeated for credit. Equivalent to MBA 701.

Recommended Prerequisite: Admission to the MSA program or permission of instructor. Grade of B or better in MBA 613.

Registration Restrictions:
Enrollment is limited to Graduate level students.

Students in a Non-Degree Post-Baccalaureate or Non-Degree Undergraduate degrees may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale.

ACCT 708: Taxes and Business Strategy. 3 credits.
Provides a framework for making managerial decisions in a global tax environment. Examines business decisions such as location of facilities, employee compensation, mergers and acquisitions, capital and asset structure, and business form. Focuses on tax planning concepts and the effect of taxes on business decisions. Offered by School of Business. May not be repeated for credit. Equivalent to MBA 708.

Recommended Prerequisite: Admission to the MSA program or permission of instructor. Completion of MBA core requirements.

Registration Restrictions:
Enrollment is limited to Graduate level students.

Students in a Non-Degree Post-Baccalaureate or Non-Degree Undergraduate degrees may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale.

ACCT 738: Advanced Topics in Fraud. 3 credits.
Course will cover advanced topics in forensic accounting. The focus will be on contemporary issues in fraud. Examples of topics include litigation support, money laundering, consumer fraud, bankruptcy, divorce and tax fraud, fraud in e-commerce, insurance fraud and mortgage fraud. The course will provide a comprehensive look at fraud investigation. Offered by School of Business. May not be repeated for credit.

Registration Restrictions:
Required Prerequisites: ACCT 636C or MBA 744C.
C Requires minimum grade of C.

Enrollment is limited to Graduate level students.

Students in a Non-Degree Post-Baccalaureate or Non-Degree Undergraduate degrees may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale.

ACCT 741: Information Technology Auditing. 3 credits.
Introduces methodologies to assess security and control issues concerning accounting and other information systems. Key feature of course is applying computer-assisted audit tools and techniques to test effectiveness of application controls. Offered by School of Business. May not be repeated for credit.

Recommended Prerequisite: Permission of program director if not already admitted to MSA or MBA program.

Registration Restrictions:
Enrollment is limited to students with a major in Accounting or Business Administration.

Enrollment is limited to Graduate level students.

Students in a Non-Degree Post-Baccalaureate or Non-Degree Undergraduate degrees may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale.

ACCT 742: Governance and Ethics. 3 credits.
Focuses on developing understanding of corporate governance issues and ethical decision making. Topics include examination of internal and external international governance issues, and ethical analysis in current business environment. Offered by School of Business. May not be repeated for credit. Equivalent to MBA 742.

Recommended Prerequisite: Permission of program director if not already admitted to MSA or MBA program.

Registration Restrictions:
Enrollment is limited to students with a major in Accounting, Business Administration, Forensic Accounting or Government Accounting.

Enrollment is limited to Graduate level students.

Students in a Non-Degree Post-Baccalaureate or Non-Degree Undergraduate degrees may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale.
**Grading:**
This course is graded on the Graduate Regular scale.

**ACCT 743: Corporate Financial Reporting.** 3 credits.
Addresses contemporary issues in corporate financial reporting. Focuses on role of financial reporting in providing decision-useful information to participants of capital market, and theoretical and empirical assessments of its performance. Offered by School of Business. May not be repeated for credit.

**Recommended Prerequisite:** Permission of program director if not already admitted to MSA or MBA program.

**Registration Restrictions:**
Enrollment is limited to students with a major in Accounting or Business Administration.

Enrollment is limited to Graduate level students.

Students in a Non-Degree Post-Baccalaureate or Non-Degree Undergraduate degrees may **not** enroll.

**Schedule Type:** Seminar

**Grading:**
This course is graded on the Graduate Regular scale.

**ACCT 771: Audit Analytics.** 3 credits.
This course prepares students to enter a rapidly changing audit environment. The course provides students with current techniques used by accounting and finance professionals to improve audit efficiency and effectiveness through data analytics. The topics covered include auditing through information systems, continuous auditing, automated audit procedures, and artificial intelligence to support judgment and decision-making. Emerging issues that impact the audit function are also covered, such as blockchain technologies, information assets and digital currencies. Offered by School of Business. May not be repeated for credit.

**Registration Restrictions:**
**Required Prerequisites:** ACCT 665 B- and 671 B-.
B- Requires minimum grade of B-.

Enrollment limited to students with a class of Advanced to Candidacy, Graduate or Senior Plus.

Students in a Non-Degree Post-Baccalaureate or Non-Degree Undergraduate degrees may **not** enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

**ACCT 772: Federal Accounting and Reporting.** 3 credits.
Designed to give graduate students the opportunity to learn about accounting and reporting issues facing government accounting professionals. The course discusses the differences between the federal sector and other sectors, and the integral use of budgetary accounting versus the more traditional financial accounting. Students will learn about federal reporting at both the agency and government-wide level, be introduced to innovative reporting practices in the federal government and will build critical writing and reporting skills. Offered by School of Business. May not be repeated for credit.

**Registration Restrictions:**
**Required Prerequisites:** ACCT 672 C or 472 C.
C Requires minimum grade of C.

Enrollment is limited to students with a major in Accounting or Government Accounting.

Enrollment is limited to Graduate level students.

Students in a Non-Degree Post-Baccalaureate or Non-Degree Undergraduate degrees may **not** enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

**ACCT 781: Tax Analytics.** 3 credits.
This course prepares accounting students to be effective tax leaders. It focuses on emerging issues in tax analytics using case studies and applied technologies. The topics include extracting and analyzing tax data for risk analysis, tax strategy, transfer pricing, artificial intelligence, and technology automation related to the tax function. Emerging issues that impact the tax profession are also covered, such as blockchain technologies, information assets and digital currencies. Offered by School of Business. May not be repeated for credit.

**Registration Restrictions:**
**Required Prerequisites:** ACCT 665 B- and 671 B-.
B- Requires minimum grade of B-.

Enrollment is limited to students with a major in Accounting Analytics or Accounting.

Enrollment limited to students in a Graduate Certificate or Master of Science degrees.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

**ACCT 792: Seminar in Accounting.** 3 credits.
Selective analysis of topics addressing important issues in contemporary accounting practice. Discussion of two or three major topics. Offered by School of Business. May be repeated within the term for a maximum 6 credits.

**Registration Restrictions:**
Enrollment is limited to Graduate level students.

Students in a Non-Degree Post-Baccalaureate or Non-Degree Undergraduate degrees may **not** enroll.

**Schedule Type:** Seminar

**Grading:**
This course is graded on the Graduate Regular scale.

**ACCT 795: Global Accounting Environment.** 3 credits.
Examines the activities of accounting firms competing in the global business environment. Students will observe these activities in residency and study the decision-making processes of international accounting firms to develop an understanding of the regulatory environment of global accounting. Offered by School of Business. May not be repeated for credit.
Recommended Prerequisite: Admission to the MSA program or permission of the program director.

Registration Restrictions:
Enrollment is limited to students with a major, minor, or concentration in Accounting.

Enrollment is limited to Graduate level students.

Students in a Non-Degree Post-Baccalaureate or Non-Degree Undergraduate degrees may not enroll.

Schedule Type: Lecture
Grading: This course is graded on the Graduate Regular scale.

ACCT 796: Independent Studies/Directed Readings. 1-3 credits.
Research and analysis of selected problems or topics in accounting not otherwise available in curriculum. Notes: Approval of faculty member and program director required. Offered by School of Business. May not be repeated for credit.

Recommended Prerequisite: Permission of Program Director.

Registration Restrictions:
Enrollment is limited to Graduate level students.

Students in a Non-Degree Post-Baccalaureate or Non-Degree Undergraduate degrees may not enroll.

Schedule Type: Independent Study
Grading: This course is graded on the Graduate Regular scale.

AFAM 200: Introduction to African American Studies. 3 credits.
Interdisciplinary introduction to the field of African American studies. Includes comparative analysis of approaches, methodologies, and key concepts related to the study of people of African descent in the United States, continental Africa, and throughout the African diaspora. Lectures and discussion integrate attention to such issues as diversity and multiculturalism from national and global perspectives. Offered by African & Af-American Studies. Limited to three attempts.

Mason Core: Social/Behavioral Sciences

Schedule Type: Lecture
Grading: This course is graded on the Undergraduate Regular scale.

AFAM 390: Special Topics in African and African American Studies. 3 credits.
Study of selected topics related to the study of people of African descent in Africa, the United States, the Caribbean, Latin Americas and throughout the African Diaspora. Notes: May be repeated when topic is different. Offered by African & Af-American Studies. May be repeated within the term for a maximum 12 credits.

Specialized Designation: Topic Varies

Schedule Type: Lecture
Grading: This course is graded on the Undergraduate Regular scale.

400 Level Courses
AFAM 490: Internship. 1-6 credits.
Approved work-study program in cooperation with specific organizations including area museums; NGOs; and local, state, and federal agencies. Students should arrange for an internship in the semester before they wish to enroll. Permission required from program director. Offered by African & Af-American Studies. Limited to three attempts.

Schedule Type: Internship
Grading: This course is graded on the Undergraduate Regular scale.

AFAM 499: Independent Study. 1-3 credits.
Investigation of an area related to African American studies according to individual interest, with emphasis on research. Permission required from program director. Offered by African & Af-American Studies. May be repeated within the term for a maximum 9 credits.

Schedule Type: Independent Study
Grading: This course is graded on the Undergraduate Regular scale.

Anthropology (ANTH)

100 Level Courses
ANTH 114: Introduction to Cultural Anthropology. 3 credits.
Overview of major ideas and approaches to the study of cultures around the world. Surveys kinship, social organization, political economy, religious beliefs, language and other aspects of non-Western cultures. Offered by Sociology & Anthropology. Limited to three attempts.

Mason Core: Social/Behavioral Sciences

Specialized Designation: Non-Western Culture

Schedule Type: Lecture
Grading: This course is graded on the Undergraduate Regular scale.

ANTH 120: Unearthing the Past: Prehistory, Culture and Evolution. 3 credits.
Introduction to archeology and bioanthropology. Explore issues and debates in human biological evolution, prehistory and social change, as well as lab and field methods for understanding archaeological remains. Offered by Sociology & Anthropology. Limited to three attempts.

Mason Core: Social/Behavioral Sciences

Schedule Type: Lecture
Grading: This course is graded on the Undergraduate Regular scale.

ANTH 135: Introduction to Biological Anthropology. 3 credits.
Uses an evolutionary perspective to introduce students to the study of humans and non-human primates as biological organisms. The course will analyze the genetic and environmental bases for modern
human biological variation, understand primate behavior and biological relationships, and reconstruct the fossil record. Discussions about prehistoric skeletal remains will emphasize biological responses to changes in subsistence and social structure. Offered by Sociology & Anthropology. Limited to three attempts.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale.

### 300 Level Courses

**ANTH 300: Civilizations. 3 credits.**
Cross-cultural and transtemporal examination of complex societies and civilizations. Explores developmental schema for rise, articulation, spread, and decline of historic and contemporary civilizations. Offered by Sociology & Anthropology. Limited to three attempts.

**Specialized Designation:** Non-Western Culture

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale.

**ANTH 302: Peoples and Cultures of Latin America. 3 credits.**
Examines Latin American cultures and selected aspects of historical record. Offered by Sociology & Anthropology. Limited to three attempts.

**Mason Core:** Global Understanding

**Specialized Designation:** Non-Western Culture

**Recommended Prerequisite:** ANTH 114, 60 hours, or permission of instructor.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale.

**ANTH 307: Ancient Mesoamerica. 3 credits.**
Examines the peoples and cultures of ancient Mesoamerica, including Olmec, Maya, Teotihuacan, and Aztec societies. Major topics include the rise of civilization, the development of the Mesoamerican cultural tradition, the growth of cities, trade, exchange, writing systems, political organization, religion, conflict, and the archaeological study of this indigenous heritage. Offered by Sociology & Anthropology. Limited to three attempts.

**Mason Core:** Global Understanding

**Specialized Designation:** Non-Western Culture

**Recommended Prerequisite:** ANTH 114, 60 hrs, or permission of instructor.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale.

**ANTH 308: Peoples and Cultures of the Middle East. 3 credits.**
Examines the anthropological literature on peoples and cultures of the Middle East, with particular attention to political and social change over the course of the 20th century. Offered by Sociology & Anthropology. Limited to three attempts.

**Mason Core:** Global Understanding

**Specialized Designation:** Non-Western Culture

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale.

**ANTH 309: Peoples and Cultures of India. 3 credits.**
Examination of South Asia, with emphasis on India. Includes general overview of prehistory and history; impact of colonialism; contemporary Indian culture, including the changing relations of caste and class, family organization, and the roles of women, religion, and ideology; and current trends in economic development and socioeconomic differences in different parts of the country. Offered by Sociology & Anthropology. Limited to three attempts.

**Mason Core:** Global Understanding

**Specialized Designation:** Non-Western Culture

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale.

**ANTH 312: Political Anthropology. 3 credits.**
Examines cultural and ecological contexts of political structures and competition for power in selected societies; and cross-cultural and comparative approaches to study of political conflict, leadership, values, and symbolism. Offered by Sociology & Anthropology. Limited to three attempts.

**Mason Core:** Global Understanding

**Recommended Prerequisite:** ANTH 114, 60 hrs, or permission of instructor.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale.

**ANTH 313: Myth, Magic, and Mind. 3 credits.**
Examines religion as a cultural system. Topics include mythology, ritual, symbolism, and dogma. Emphasizes cross-cultural and predominantly non-Western material. Offered by Sociology & Anthropology. Limited to three attempts.

**Mason Core:** Global Understanding

**Specialized Designation:** Non-Western Culture

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale.

**ANTH 314: Zombies. 3 credits.**
Explores how human beings across cultures have historically expressed social anxieties through references to the one particular manifestation of the undead: zombies, figures representing a state in which human beings are animate and affective in the world around them, but lack
consciousness or free will. Offered by Sociology & Anthropology. Limited to three attempts.

**Specialized Designation:** Non-Western Culture

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale.

**ANTH 320:** Global Africa. 3 credits.
Explores the complex and distance-defying connections shaping Africa and being shaped by Africans on the continent. Emphasizes the diversity and change characterizing peoples who are at the center of world processes. Topics include popular representations of Africa and Africans, colonial and postcolonial histories, gender, money, family, religion, environment, and health. Offered by Sociology & Anthropology. Limited to three attempts.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale.

**Recommended Prerequisite:** ANTH 120, 60 hrs, or permission of instructor.

**ANTH 322:** Pirates, Conquest, and Death: Archaeology and Globalism since 1500. 3 credits.
Examines materials, theories, and methods of archaeology derived from and applied to historical sites, as they complement archival records. Offered by Sociology & Anthropology. Limited to three attempts.

**Recommended Prerequisite:** ANTH 120, 60 credits, or permission of instructor.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale.

**ANTH 324:** Warfare, Violence, and Sacrifice in Antiquity. 3 credits.
Examines origin and nature of conflict in human society with an emphasis on the ancient past. Major topics include the possible role of violence in human evolution, cross-cultural studies of conflict in indigenous society, warfare in early states, and sacrifice as a ritual practice. Offered by Sociology & Anthropology. Limited to three attempts.

**Recommended Prerequisite:** ANTH 120, 60 credits, or permission of instructor.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale.

**ANTH 325:** Field Techniques in Archaeology. 3-6 credits.
Intensive study of archaeological field techniques by directed group projects in site survey, site testing, recording techniques, and stratigraphy through discussions, demonstrations, and hands-on experience. Offered by Sociology & Anthropology. May be repeated within the term for a maximum of 6 credits.

**Recommended Prerequisite:** ANTH 120, 60 hours, or permission of instructor.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale.

**ANTH 330:** Peoples and Cultures of Selected Regions: Non-Western. 3 credits.
Examines cultures of a specific region such as Africa and the Middle East. Focuses primarily on non-Western cultures. Offered by Sociology & Anthropology. Limited to three attempts.

**Specialized Designation:** Non-Western Culture

**Recommended Prerequisite:** ANTH 114, 60 credits, or permission of instructor.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale.

**ANTH 331:** Refugees. 3 credits.
Introduction to causes and consequences of forced dislocation as a global issue. Covers formally recognized refugees, as well as people such as internally displaced persons and asylum seekers who are in refugee-like circumstances. Focuses on understanding the personal experiences of refugees and examining efforts on their behalf at national and international levels. Offered by Sociology & Anthropology. Limited to three attempts.

**Mason Core:** Global Understanding

**Recommended Prerequisite:** ANTH 114, 60 credits, or permission of instructor.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale.

**ANTH 332:** Cross-Cultural Perspectives on Globalization. 3 credits.
Examines the varieties of cultural experience. Several cultures are studied in depth; with attention to local histories, global contexts, and shifting perspectives on the practice of ethnography. Notes: May be used for credit toward the BA in sociology. Offered by Sociology & Anthropology. Limited to three attempts.

**Mason Core:** Global Understanding

**Specialized Designation:** Non-Western Culture

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale.

**ANTH 340:** Comparative Perspectives on Immigration. 3 credits.
Considers the dimensions and meanings of the immigrant experience in the United States, with a focus on the diversity of immigrants and refugees who have arrived during the past 30 years. Emphasis on the social context in which immigration occurs and on the bearing of institutional and cultural influences on patterns of adaptation, assimilation, and exclusion from the host society. Offered by Sociology & Anthropology. Limited to three attempts.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale.
ANTH 345: Ritual and Power in Social Life. 3 credits.
Domains of religion and ritual are conjoined by questions of power: its deployment, distribution, and forms of resistance it engenders. Course investigates connections among religious thought, ritual practice, and social action by drawing on a variety of theoretical orientations in the social sciences including structuralism, semiotics, and performance theory. Offered by Sociology & Anthropology. Limited to three attempts.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale.

ANTH 350: Human Growth and Development. 3 credits.

Recommended Prerequisite: ANTH 135.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale.

ANTH 355: Human Origins. 3 credits.
Explores the fossil evidence for human and primate evolution. Exposes students to evidence for the origins of mammals and primates, and to discussions of human evolution. Uses human fossils as tools to understand evolutionary relationships (phylogenetics), behavior, functional anatomy, and broader adaptation. Offered by Sociology & Anthropology. Limited to three attempts.

Recommended Prerequisite: ANTH 135.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale.

ANTH 357: Bioarchaeology. 3 credits.
Introduces students to the study of human skeletal remains and their associated archaeological artifacts, focusing on using the human skeleton to address behavior, growth, stress, ritual, social complexity, diet, disease, and violence in the past. Uses the human body and associated artifacts to provide a detailed analysis of cultural transitions, expression of socioeconomic inequality, the origins of ritual complexity, violence, and disease. Offered by Sociology & Anthropology. Limited to three attempts.

Recommended Prerequisite: ANTH 135.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale.

ANTH 363: Humans, Disease, and Death. 3 credits.
Explores human health and disease from anthropological and evolutionary perspectives. Examines what a disease is, what causes them, how we have co-evolved with diseases, how disease patterns have changed over human history, and the future of disease. Offered by Sociology & Anthropology. Limited to three attempts.

Mason Core: Social/Behavioral Sciences

Specialized Designation: Mason Impact.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale.

ANTH 365: Scientific Racism and Human Variation. 3 credits.
Explores scientific methods of classification as a reflection of social values. Explains the harms of "race" and eugenics committed under the aegis of science. While critiquing the biological concept of race, considers how the social construction of race becomes part of living bodies through racism. Details modern human variation as a product of evolutionary forces. Offered by Sociology & Anthropology. Limited to three attempts.

Recommended Prerequisite: ANTH 135, 60 hours or permission of instructor.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale.

ANTH 366: Food and Human Evolution. 3 credits.
Explores the relationship between diet and human adaptation from biological, archaeological, cultural, and evolutionary perspectives. Examines how humans are unique in our ability to find and process a wide range of foods. Introduces agriculture as a co-evolutionary strategy between humans and other species. Offered by Sociology & Anthropology. Limited to three attempts.

Specialized Designation: Mason Impact.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale.

ANTH 370: Environment and Culture. 3 credits.
Examines relationships among environment, culture, and human behavior with an emphasis on cultural ecological explanations in mainly non-Western contexts. Offered by Sociology & Anthropology. Limited to three attempts.

Specialized Designation: Green Leaf Focused Course

Recommended Prerequisite: ANTH 114, or 60 hours, or permission of instructor.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale.

ANTH 375: Culture, Power, History. 3 credits.
Use of ethnographic, archaeological, linguistic, and documentary data, in light of anthropological theory, to interpret the past and processes of change among indigenous peoples throughout the world. Offered by Sociology & Anthropology. Limited to three attempts.
ANTH 380: Language and Culture. 3 credits.
Anthropological analyses of language behavior, origins, and change. Emphasizes the interplay of language, culture, anthropology, and linguistics. Offered by Sociology & Anthropology. Limited to three attempts.

Recommended Prerequisite: ANTH 135.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale.

ANTH 379: Andean Archaeology. 3 credits.
Examines 12,000 years of pre-Hispanic cultures of the Andean region of western South America. Focuses on the development and key achievements of some of the most remarkable civilizations of the New World, including the Chavin, Paracas, Cupisnique, Moche, Sicán, Nasca, Chimú, Wari, and Inka. Considers as well the nature, priorities, and accomplishments of scientific Andean archaeology. Offered by Sociology & Anthropology. Limited to three attempts.

Recommended Prerequisite: ANTH 135.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale.

ANTH 382: Urban Anthropology. 3 credits.
Uses tools and resources of sociocultural anthropology to study life in cities in a comparative, global context, including topics such as poverty, discrimination, migration, transnationalism, and urban planning. Case studies draw from different urban environments in Asia, Latin America, Europe, Africa, and North America. Offered by Sociology & Anthropology. Limited to three attempts.

Mason Core: Global Understanding

Recommended Prerequisite: ANTH 114 and 60 credits, or Permission of Instructor.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale.

ANTH 386: Quantitative Methods in Anthropology. 3 credits.
Introduces students to statistical methods used in anthropology. Emphasizes appropriate and creative application of statistical tests to anthropological problems and careful interpretation of results. Explores methods used to compare means, variances, and correlations within and between samples. Provides instruction on methods used in anthropological demography. Builds fluency in the use of statistical software. Offered by Sociology & Anthropology. Limited to three attempts.

Recommended Prerequisite: ANTH 114, 120, 135

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale.

ANTH 387: Quantitative Methods in Anthropology. 3 credits.
Examines the methods and theories applied in zooarchaeology through integrating hands-on assignments working with a comparative collection. Examines how archaeologists can understand human-animal relationships in the past including their role in reconstructing
Paleoenvironments, their contribution to ancient foodways, domestication of animals, and ritual uses of fauna. Offered by Sociology & Anthropology. Limited to three attempts.

**Schedule Type:** Laboratory, Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale.

**ANTH 388: Human Osteology.** 3 credits.
Introduces students to the methods of modern human skeletal analysis in bio- and forensic anthropology. Covers introductory human skeletal and dental gross anatomy and describes analytical techniques spanning including age and sex estimation, osteometry, and paleopathology. Offered by Sociology & Anthropology. Limited to three attempts.

**Recommended Prerequisite:** ANTH 135.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale.

**ANTH 389: Human Osteology Lab.** 2 credits.
Laboratory course associated with ANTH 388. Offered by Sociology & Anthropology. Limited to three attempts.

**Recommended Prerequisite:** ANTH 135.

**Recommended Corequisite:** ANTH 388.

**Schedule Type:** Laboratory

**Grading:**
This course is graded on the Undergraduate Regular scale.

**ANTH 390: History of Anthropological Thought.** 3 credits.
Overview of the major theoretical traditions and schools of thought in anthropology. Notes: Required for Anthropology majors, and for students applying to the Accelerated Master’s program in Anthropology. Offered by Sociology & Anthropology. Limited to three attempts.

**Recommended Prerequisite:** ANTH 114 and 60 credits, including 6 credits of ANTH 300-level (or above) courses, or permission of instructor

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale.

**ANTH 391: Forensic Anthropology.** 3 credits.
Human remains play key roles in medicolegal investigations. Provides an overview of contemporary forensic anthropology including age and sex estimation from human remains, estimation of the time since death, analysis of sharp force, blunt force, and gunshot trauma, mass disaster contexts, and the forensic archaeological recovery of buried remains. Offered by Sociology & Anthropology. Limited to three attempts.

**Recommended Prerequisite:** ANTH 135.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale.

**ANTH 392: Forensic Anthropology Lab.** 2 credits.
This lab class in the companion to ANTH 391. Involves hands-on lab exercises in the learning of methods in modern forensic anthropology, covering age and sex estimation from human remains, estimation of the time since death, analysis of traumatic trauma, individual identification, and archaeological recovery of buried remains. Offered by Sociology & Anthropology. Limited to three attempts.

**Recommended Prerequisite:** ANTH 135.

**Recommended Corequisite:** ANTH 391.

**Schedule Type:** Laboratory

**Grading:**
This course is graded on the Undergraduate Regular scale.

**ANTH 393: Paleopathology.** 3 credits.
Provides an introduction to the field of paleopathology which involves identification of pathological conditions in human skeletal remains, and reconstruction of the natural history and co-evolution of disease with humans. Covers the differential diagnosis and history of infectious pathogens, skeletal trauma, oral diseases, metabolic abnormalities, developmental defects, and more. Offered by Sociology & Anthropology. Limited to three attempts.

**Recommended Prerequisite:** ANTH 135.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale.

Introduction to the anthropology of work, technology, and society, with emphasis on information technology. Covers general conceptual issues of information technology and also involves specific practical exercises with computers, their operating systems, the logic of automated production, databases, and web-based communication. Attention also directed to social and ethical issues raised by contemporary information technology. Offered by Sociology & Anthropology. Limited to three attempts.

**Mason Core:** Info Tech & Computing

**Recommended Prerequisite:** ANTH 114, 60 hours, or permission of instructor.

**Recommended Corequisite:** ANTH 135.

**Specialized Designation:** Non-Western Culture

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale.

**ANTH 396: Issues in Anthropology: Social Sciences.** 3 credits.
Topic of contemporary interest in anthropology, focusing on social science topics of interest. Notes: May be repeated when topic is different. Offered by Sociology & Anthropology. May be repeated within the term for a maximum 18 credits.

**Mason Core:** Social/Behavioral Sciences

**Recommended Prerequisite:** ANTH 114, 60 hours, or permission of instructor.
This course is graded on the Undergraduate Regular scale.

**ANTH 398: Study Abroad. 1-6 credits.**
Field project or study abroad experience leading to the production of a written report. Notes: May be repeated with permission of department. Offered by Sociology & Anthropology. May be repeated within the degree for a maximum 6 credits.

**Recommended Prerequisite:** ANTH 114, 60 hours, or permission of instructor.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale.

**ANTH 399: Issues in Anthropology. 3 credits.**
Topic of contemporary interest in anthropology, changing from semester to semester, and focusing on topics such as sex roles, anthropology and ethics, and primate social organization. Notes: May be repeated for credit when topic is different. Offered by Sociology & Anthropology. May be repeated within the term.

**Recommended Prerequisite:** ANTH 114, 60 hours, and permission of instructor.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale.

### 400 Level Courses

**ANTH 400: Engaging the World: Anthropological Perspectives. 3 credits.**
Examines selected topics with emphasis on the integration of different kinds of knowledge and the balancing of alternative ways of assessing meaning and relevance. Topics usually drawn from issues of global economic processes, civic rights and responsibilities, ethics, museums, public policy, the environment, and migration. Notes: May be repeated when topic is different. Offered by Sociology & Anthropology. May be repeated within the term for a maximum 9 credits.

**Mason Core:** Synthesis

**Recommended Prerequisite:** ANTH 114, 60 credits, or permission of instructor.

**Schedule Type:** Seminar

**Grading:**
This course is graded on the Undergraduate Regular scale.

**ANTH 440: Applied Anthropology. 3 credits.**
Examines the needs and problems of communities and organizations and develops professional skills for a career in applied anthropology. Topics include the history of applied anthropology, research methods and ethics, fields in which applied anthropologists work, career options, and professionalization. Students prepare a career portfolio and other documents common in the workplace for applied anthropologists. Offered by Sociology & Anthropology. Limited to three attempts.

**Recommended Prerequisite:** ANTH 114, 60 hours, or permission of instructor.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale.

**ANTH 450: Qualitative Methods: Nonstatistical Approaches in Culture and Social Research. 3 credits.**
Explores some of the most useful nonquantitative research techniques in social sciences and offers practice in their application. Offered by Sociology & Anthropology. Limited to three attempts.

**Recommended Prerequisite:** 60 credits and 6 credits of ANTH including ANTH 114, or permission of instructor.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale.

**ANTH 488: Gender, Sexuality, and Culture. 3 credits.**
Examines how gender, sexuality, race, and class come together as analytically distinct, yet practically intertwined, systems of meaning and practice. Examples highlight questions of political economy and history while focusing on specific ethnographic or historical readings. Offered by Sociology & Anthropology. Limited to three attempts.

**Recommended Prerequisite:** 60 hours and ANTH 340 or Permission of Instructor.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale.

**ANTH 490: Theories, Methods, and Issues II. 3 credits.**
Second of a two-course sequence that reviews major theoretical traditions and schools of thought in anthropology. Notes: Required for anthropology majors and usually taken as a senior seminar. Offered by Sociology & Anthropology. Limited to three attempts.

**Specialized Designation:** Writing Intensive in Major

**Recommended Prerequisite:** 60 hours and 9 hours of ANTH, including ANTH 390, or permission of instructor.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale.

**ANTH 495: Internship. 1-6 credits.**
Supervised project in applying anthropology in relevant settings including public and historical archaeology, developmental anthropology, museums, non-profit organizations, advocacy, communications, or consulting organizations. Notes: Students must complete 45 hours of work at the internship site for each credit. Offered by Sociology & Anthropology. May be repeated within the degree for a maximum 6 credits.

**Recommended Prerequisite:** ANTH 114, 60 hours and 60 credits, or permission of instructor.

**Schedule Type:** Internship

**Grading:**
This course is graded on the Satisfactory/No Credit scale.

**ANTH 496: Evolutionary Theory. 3 credits.**
Considers evolution as a biological as well as cultural concept. Parallels and contrasts among conceptual approaches allow a critique of the potential of evolution as a unifying biosocial theory. Offered by Sociology & Anthropology. Limited to three attempts.
Recommended Prerequisite: 60 hours and 9 hours of ANTH, including ANTH 390, or Permission of Instructor.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale.

ANTH 499: Independent Research. 1-12 credits.
Individual research on a topic to be organized in advance by student and instructor. Offered by Sociology & Anthropology. May be repeated within the term for a maximum 12 credits.

Schedule Type: Independent Study

Grading:
This course is graded on the Undergraduate Regular scale.

500 Level Courses

ANTH 535: Anthropology and the Human Condition: Seminar I. 3 credits.
Examines some of the major theorists of 19th- and early 20th-century cultural theory. Marx, Freud, Durkheim, and Weber are surveyed as foundational thinkers for reading the works of such 20th-century theorists as Boas, Malinowski, Benedict, and Sapir. Offered by Sociology & Anthropology. May not be repeated for credit.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Seminar

Grading:
This course is graded on the Graduate Regular scale.

ANTH 536: Human Growth and Development. 3 credits.
Examines the fossil evidence for human and primate evolution. Exposes students to evidence for the origins of mammals and primates, and to discussions of human evolution. Uses human fossils as tools to understand evolutionary relationships (phylogenetics), behavior, functional anatomy, and broader adaptation. Offered by Sociology & Anthropology. May not be repeated for credit.

Recommended Prerequisite: ANTH 535.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Seminar

Grading:
This course is graded on the Graduate Regular scale.

ANTH 545: Ritual and Power in Social Life. 3 credits.
Examines some of the major theorists of 19th- and early 20th-century cultural theory. Marx, Freud, Durkheim, and Weber are surveyed as foundational thinkers for reading the works of such 20th-century theorists as Boas, Malinowski, Benedict, and Sapir. Offered by Sociology & Anthropology. May not be repeated for credit.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale.

ANTH 555: Policy and Culture. 3 credits.
Examines the relevance of cultural processes to policymaking and the culture of policymaking organizations. Topics include development, welfare policy, environmental and energy policy, regulation and risk; health care and immigration policy; and the war on drugs. Offered by Sociology & Anthropology. May not be repeated for credit.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Seminar

Grading:
This course is graded on the Graduate Regular scale.

ANTH 556: Human Growth and Development. 3 credits.
Examines the relevance of cultural processes to policymaking and the culture of policymaking organizations. Topics include development, welfare policy, environmental and energy policy, regulation and risk; health care and immigration policy; and the war on drugs. Offered by Sociology & Anthropology. May not be repeated for credit.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale.

ANTH 557: Human Origins. 3 credits.
Examines some of the major theorists of 19th- and early 20th-century cultural theory. Marx, Freud, Durkheim, and Weber are surveyed as foundational thinkers for reading the works of such 20th-century theorists as Boas, Malinowski, Benedict, and Sapir. Offered by Sociology & Anthropology. May not be repeated for credit.
Registration Restrictions: Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading: This course is graded on the Graduate Regular scale.

ANTH 570: Andean Archaeology. 3 credits.
Examines 12,000 years of pre-Hispanic cultures of the Andean region of western South America - that constituted the most remarkable complex civilizations of the New World. Focuses on the development and key achievements of the Chavin, Paracas, Cupisnique, Moche, Sican, Nasca, Chimu, Wari, and Inka cultures, and the nature, priorities, and accomplishments of scientific Andean archaeology. Offered by Sociology & Anthropology. May not be repeated for credit.

Registration Restrictions: Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading: This course is graded on the Graduate Regular scale.

ANTH 576: American Cultures. 3 credits.
Examines U.S. cultures and explores concept of an American culture. Course readings and discussions explore underpinnings of the American experience, document broad historical shifts, and detail the experience of diverse groups of Americans, thus forming the basis for a critical, analytical, and comparative discussion of American life and life in America. Offered by Sociology & Anthropology. May not be repeated for credit.

Registration Restrictions: Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading: This course is graded on the Graduate Regular scale.

ANTH 577: Mortuary Archaeology. 3 credits.
Focuses on the study of burial patterns and death rituals in antiquity by introducing students to the methods of burial excavation, examining the history of mortuary archaeology theory and engagement with processual and postprocessual schools of thought, and examining case studies from around the world to decode the complex symbolisms encoded in burial practices. Offered by Sociology & Anthropology. May not be repeated for credit.

Registration Restrictions: Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading: This course is graded on the Graduate Regular scale.

ANTH 580: Environmental Anthropology. 3 credits.
Covers major theoretical trends and ethnographic works in environmental anthropology, focusing on the frameworks developed and used by environmental anthropologists, including cultural ecology, ecological anthropology, environmentalism, political ecology, new ecology, and science and technology studies. Explores how environmental anthropologists have contributed to broader debates about modernity, globalization, power, kinship, science and technology, and human-environmental relations. Offered by Sociology & Anthropology. May not be repeated for credit.

Specialized Designation: Green Leaf Related Course

Registration Restrictions: Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading: This course is graded on the Graduate Regular scale.
**ANTH 582: Human Osteology. 3 credits.**
Introduces students to the methods of modern human skeletal analysis in bioarchaeological and forensic science. Covers introductory human skeletal and dental gross anatomy and describes analytical techniques spanning including age and sex estimation, osteometry, and paleopathology. Offered by Sociology & Anthropology. May not be repeated for credit.

**Recommended Corequisite:** ANTH 583.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

**ANTH 583: Human Osteology Lab. 2 credits.**
Laboratory course associated with ANTH 582. Offered by Sociology & Anthropology. May not be repeated for credit.

**Recommended Corequisite:** ANTH 582.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Laboratory

**Grading:**
This course is graded on the Graduate Regular scale.

**ANTH 584: Paleopathology. 3 credits.**
Provides an introduction to the field of paleopathology which involves identification of pathological conditions in human skeletal remains, and reconstruction of the natural history and co-evolution of disease with humans. Covers the differential diagnosis and history of infectious pathogens such as tuberculosi and syphillis, skeletal trauma, oral diseases, metabolic abnormalities neoplasms developmental defects joint disease and more. Offered by Sociology & Anthropology. May not be repeated for credit.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

**ANTH 585: Bioarchaeology. 3 credits.**
Explores the cutting-edge methods of bioarchaeological science and reconstructs ancient living worlds from the remarkable information encoded in bones via patterns of demography, disease, diet, trauma, violence, lifestyle, social structures, sex and gender, ethnicity, and identities on a global scale and over the last 10,000 years of history. Offered by Sociology & Anthropology. May not be repeated for credit.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

**ANTH 586: Quantitative Methods in Anthropology. 3 credits.**
Introduces students to statistical methods used in anthropology. Emphasizes appropriate and creative application of statistical tests to anthropological problems and careful interpretation of results. Explores methods used to compare means, variances, and correlations within and between samples. Provides instruction on methods used in anthropological demography. Builds fluency in the use of statistical software. Offered by Sociology & Anthropology. May not be repeated for credit.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

**ANTH 590: Forensic Anthropology. 3 credits.**
Provides an overview of contemporary forensic anthropology. Topics include: age and sex estimation from human remains, estimation of the postmortem interval, analysis of sharp force, blunt force, and gunshot trauma, individual identification, forensic taphonomy, mass disaster contexts, and the forensic archaeological recovery of buried remains. Offered by Sociology & Anthropology. May not be repeated for credit.

**Recommended Corequisite:** ANTH 591.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

**ANTH 591: Forensic Anthropology Lab. 2 credits.**
Laboratory course associated with ANTH 590. Involves hands-on lab exercises in the learning of methods in modern forensic anthropology, covering age and sex estimation from human remains, estimation of postmortem intervals, analyses of traumatic trauma, individual identification, forensic taphonomy, and archaeological recovery of buried remains. Offered by Sociology & Anthropology. May not be repeated for credit.

**Recommended Corequisite:** ANTH 590.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Laboratory

**Grading:**
This course is graded on the Graduate Regular scale.

**ANTH 593: Zooarchaeology. 4 credits.**
Explores the methods and theories applied in zooarchaeology through integrating hands-on assignments working with a comparative collection. Examines how archaeologists can understand human-animal relationships in the past including their role in reconstructing paleoenvironments, their contribution to ancient foodways, domestication of animals, and ritual uses of fauna. Offered by Sociology & Anthropology. May not be repeated for credit.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Laboratory, Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

600 Level Courses

**ANTH 616: Anthropology of the City. 3 credits.**
Examines classic and contemporary works in urban theory, in light of broader scholarly discussions of modernity and globalization. Uses a case-study approach to analyze topics such as: public and private space, citizenship and governance, architecture and design, housing, transportation, formal and informal settlements, and the contest over space and environmental resources in cities around the world. Notes: Course may be offered fall or spring. Offered by Sociology & Anthropology. May not be repeated for credit.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Seminar

**Grading:**
This course is graded on the Graduate Regular scale.

**ANTH 620: Theory: Archaeology and Biological Anthropology. 3 credits.**
Examines theoretical approaches in archaeology, paleoanthropology, and biological anthropology. Offered by Sociology & Anthropology. May not be repeated for credit.

**Recommended Prerequisite:** Course in ARCHAEOLOGY or Permission of Instructor.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

**ANTH 631: Refugees in the Contemporary World. 3 credits.**
Explores major refugee flows since the mid-20th century, emphasizing mechanisms for providing assistance, asylum, and resettlement. Offered by Sociology & Anthropology. May not be repeated for credit.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

**ANTH 635: Regional Ethnography. 3 credits.**
In-depth study of peoples and cultures of a specific world region (Latin America, East Asia, the Pacific, or United States). Content may include cultures defined by diaspora, migration, and other global forces and processes. Notes: May be repeated when topic is different. Offered by Sociology & Anthropology. May be repeated within the degree for a maximum 6 credits.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.
Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Seminar

**Grading:**
This course is graded on the Graduate Regular scale.

**ANTH 640: Applied Anthropology.** 3 credits.
Explores the application of contemporary anthropological ideas, theories, and methods to find solutions to practical problems as defined by various organizations and institutions including business, government, nongovernmental organizations, and various institutions. Offered by Sociology & Anthropology. May not be repeated for credit.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

**ANTH 650: Methods in Anthropology.** 3 credits.
Reviews and examines major research methods commonly employed in cultural anthropological field study, with emphasis on ethnographic research design and the use of standard ethnographic techniques. Includes practice in designing ethnographic research project and using ethnographic methods and techniques in a field setting. Offered by Sociology & Anthropology. May not be repeated for credit.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

**ANTH 670: Regional Studies in Archaeology.** 3 credits.
Regional survey of specific culture area in archaeology to be chosen by student and instructor. Offered by Sociology & Anthropology. May not be repeated for credit.

**Recommended Prerequisite:** Permission of Instructor.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Independent Study

**Grading:**
This course is graded on the Graduate Special scale.

**ANTH 687: Medical Anthropology.** 3 credits.
Explores the wide variety of cultural interpretations of health, illness, and curing. Examines a number of different curing systems, both traditional and modern, and compares them with cosmopolitan biomedicine. Several book-length case studies cover a wide variety of cultural groups, health topics, and theoretical orientations. Offered by Sociology & Anthropology. May not be repeated for credit.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture
Anthropology (ANTH)

Grading:
This course is graded on the Graduate Regular scale.

ANTH 690: Internship. 3-6 credits.
All internships must be approved by faculty advisor to ensure suitability to the student’s course of study. Introduction to applied anthropology through approved work and study at a museum, institute, agency, or other approved site. Offered by Sociology & Anthropology. May be repeated within the term for a maximum 6 credits.

Recommended Prerequisite: Graduate standing, with 3 hours of methods and 12 hours in program, or by permission of instructor.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Internship

Grading:
This course is graded on the Graduate Special scale.

ANTH 698: Study Abroad. 1-6 credits.
Intended for participation in formally organized course offered by Center for Global Education or an overseas institution or engagement in a field project related to the Master’s thesis or project. May be repeated for a maximum of 6 credits. Offered by Sociology & Anthropology. May be repeated within the degree for a maximum 6 credits.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Independent Study

Grading:
This course is graded on the Graduate Regular scale.

ANTH 699: Contemporary Issues in Sociocultural Anthropology. 3 credits.
Explores current issues and debates in sociocultural anthropology. Notes: May be repeated when topic is different. Offered by Sociology & Anthropology. May be repeated within the term for a maximum 6 credits.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Seminar

Grading:
This course is graded on the Graduate Regular scale.

700 Level Courses

ANTH 721: Culture, Power, and Conflict. 3 credits.
Explores power and social conflict through the lens of cultural analysis. Special attention to the role of cultural differences in the structuring of conflict and the deployment of cultural theory in formulating a practice of conflict resolution. Offered by Sociology & Anthropology. May not be repeated for credit.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale.

ANTH 750: Ethnographic Genres. 3 credits.
"Genre" refers to kind, sort, or type. Course surveys the various modes of representation anthropologists use in elaborating participant-observation field work, as well as how these styles refer to and construct ethnographic "others." Explores a set of central philosophical and methodological issues in social-cultural anthropology such as framing, perspective, authority, reflexivity, and politics of style. Offered by Sociology & Anthropology. May not be repeated for credit.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale.

ANTH 796: Master's Research Project. 1-6 credits.
Capstone research project conducted under the supervision of a faculty project director and project evaluation committee. Project should be a substantial contribution to anthropological knowledge and is in lieu of a thesis. Notes: Students must initially enroll for a minimum of 3 credits of ANTH 796 and maintain continuous enrollment in 796 until project is submitted. A maximum of 6 credits of ANTH 796 may be applied to the degree. Offered by Sociology & Anthropology. May be repeated within the degree for a maximum 12 credits.

Recommended Prerequisite: Approval of project proposal.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Independent Study

Grading:
This course is graded on the Satisfactory/No Credit scale.

ANTH 798: Thesis or Project Proposal. 3 credits.
Work on research proposal that forms basis for master’s thesis or project. Offered by Sociology & Anthropology. May be repeated within the degree for a maximum 6 credits.
Recommended Prerequisite: Completion of 15 credits, including all other core courses.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

Schedule Type: Thesis

Grading:
This course is graded on the Satisfactory/No Credit scale.

**ANTH 799: Master's Thesis.** 1-6 credits.
Master's thesis research and writing under direction of thesis committee.
Notes: Students must register for a minimum of three credit hours in their first semester of 799 and maintain continuous enrollment in 799 while writing and submitting a thesis. A maximum of 6 credits of 799 may be applied to the degree. Offered by Sociology & Anthropology. May be repeated within the degree for a maximum 24 credits.

Recommended Prerequisite: Approval of thesis proposal.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

Schedule Type: Thesis

Grading:
This course is graded on the Satisfactory/No Credit scale.

**Applied Information Technology (AIT)**

**500 Level Courses**

**AIT 500: Quantitative Foundations for Information Systems Analysis.** 3 credits.
Provides common background in basic quantitative areas focused on decision making, information processing, and telecommunications. Topics include review of precalculus, introduction to matrix algebra, problems in optimization, and introduction to probability and statistics.
Notes: Does not fulfill any VSITE graduate degree requirement. Offered by Info Sciences & Technology. May not be repeated for credit.

Recommended Prerequisite: MATH 108 or equivalent.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale.

**AIT 502: Programming Essentials.** 3 credits.
Introduces basic procedural and object-oriented programming. Topics include: variables, data types, assignments, conditionals, loops, arrays, input/output, static methods, libraries, recursion, data types, API, classes, access modifiers, instance variables, constructors, instance methods, testing, encapsulations, immutability, interface inheritance, implementation inheritance, exceptions, assertions, analysis of algorithms, order of growth, memory usage, binary search, insertion sort, merge sort, stacks, array implementation of stacks, linked list implementation of stacks, queues, generics, autoboxing, iteration, symbol tables, hash tables, binary search trees, examples and applications.
Offered by Info Sciences & Technology. May not be repeated for credit.

Recommended Prerequisite: Basic information technology knowledge.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Students in a Non-Degree Undergraduate degree may **not** enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale.

**AIT 504: Issues of Cyberspace.** 3 credits.
Student panels explore, report on, and make recommendations regarding major and novel problems presented by the explosive and intrusive growth of 'cyberspace'. Legal, ethical, financial, security, utility and value to users and organizations, feasibility, and desirability aspects are considered. Each semester features a major topic area.
Offered by Info Sciences & Technology. May not be repeated for credit.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

Enrollment limited to students in the Volgenau School of Engineering college.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale.

**AIT 510: Learning Technology: Theory, Application and Design.** 3 credits.
Introduces students to theory, application and design of learning technologies, discussing why technology should be used for learning and education, how it should be applied, and how one can design digital tools to improve learning and education. Use of data, analytics, and emerging applications such as social media will also be discussed.
Offered by Info Sciences & Technology. May not be repeated for credit.

Recommended Prerequisite: (IT 415 or equivalent) and (SYST 469 or equivalent).

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.
Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the Volgenau School of Engineering college.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

**AIT 512: Algorithms and Data Structures Essentials. 3 credits.**
Introduces analysis of algorithms and basic data structures assuming basic programming knowledge. Topics include: collections, sorting, searching, graphs, strings, B-Trees, and analysis of algorithms. Offered by Info Sciences & Technology. May not be repeated for credit.

**Recommended Prerequisite:** AIT 502 with B- or above, or other academic or industry experience with programming.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate or Senior Plus.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

**AIT 521: Software Engineering Essentials. 3 credits.**
Provides an overview of essential topics in software engineering, including problem solving with computers, requirements, software design, software development, testing, verification, validation, usability, and management. Discuss concepts related to building software, including data structures, object-oriented programming, event handling in GUIs, and web application technologies and how these concepts are handled in various languages, but without requiring the students to program. Notes: This course does not count towards MS programs offered in the Computer Science Department and cannot be used to satisfy course requirements for PhD IT students. Offered by Info Sciences & Technology. May not be repeated for credit.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate or Senior Plus.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

**AIT 524: Database Management Systems. 3 credits.**
Relational database management systems. Covers logical and physical database design; query languages and database programming; and examines commercial systems. Computing lab. Notes: This course does not count towards MS programs offered in the Computer Science Department and cannot be used to satisfy course requirements for PhD IT students. Offered by Info Sciences & Technology. May not be repeated for credit.

**Recommended Prerequisite:** Academic or industry experience with database systems.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

**AIT 542: Fundamentals of Computing Platforms. 3 credits.**
Contemporary information systems are platforms inextricably combining operating systems and networks. This graduate course provides an overview of OS and networking elements of information systems, and examines the particular issues relating to the range of platforms, from handheld mobile devices to cloud and supercomputer systems. Offered by Info Sciences & Technology. May not be repeated for credit.

**Recommended Prerequisite:** Academic of industry experience with operating systems and computer networks.

**Registration Restrictions:**
Enrollment limited to students with a class of Graduate or Senior Plus.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

**AIT 580: Analytics: Big Data to Information. 3 credits.**
Course provides an overview of Big Data and its use in commercial, scientific, governmental and other applications. Topics include technical and non-technical disciplines required to collect, process and use enormous amounts of data available from numerous sources. Lectures cover system acquisition, law and policy, and ethical issues. It includes brief discussions of technologies involved in collecting, mining, analyzing and using results. Offered by Info Sciences & Technology. May not be repeated for credit.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment limited to students in the Volgenau School of Engineering college.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.
Enrollment limited to students in the Volgenau School of Engineering college.

**Schedule Type:** Lecture

**Grading:** This course is graded on the Graduate Regular scale.

**AIT 581: Problem Formation and Solving in Big Data.** 3 credits.
The course explores challenges facing analysts exploiting Big Data or Bespoke Data in combination with Big Data, and looks at solutions, mindful of the fact that our intellectual and practical practices are based entirely on the 5000 year old Bespoke Data paradigm, and considering that Big Data practices are too recent to lead to comparable Big Data tools and practices. Notes: Course may be used in other certificate and degree programs. Offered by Info Sciences & Technology. May not be repeated for credit.

**Registration Restrictions:** Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

Enrollment limited to students in the Volgenau School of Engineering college.

**Schedule Type:** Lecture

**Grading:** This course is graded on the Graduate Regular scale.

**AIT 582: Metadata Analytics for Big Data.** 3 credits.
Course explores technical and analytical issues, solutions and gaps in processing large volumes of data by leveraging metadata. The goal is to find "facts of interest" (Intelligence) that represent threats to, or even opportunities for, a given industry or domain (e.g., healthcare, finance or national intelligence/national defense) where there is limited time. Notes: Course may be used in other Certificate or Degree programs. Offered by Info Sciences & Technology. May not be repeated for credit.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

Enrollment limited to students in the Volgenau School of Engineering college.

**Schedule Type:** Lecture

**Grading:** This course is graded on the Graduate Regular scale.

**AIT 590: Topics in Applied Information Technology.** 3 credits.
Topics in the application of information technology. Students are expected to participate actively through class dialogues and the crafting of IT solutions to specific problem areas. Notes: Course cannot be used to satisfy course requirements for PhD IT students. Offered by Info Sciences & Technology. May be repeated within the term for a maximum 6 credits.

**Specialized Designation:** Topic Varies

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree **may not** enroll.

Enrollment limited to students in the Volgenau School of Engineering college.

**Schedule Type:** Lecture

**Grading:** This course is graded on the Graduate Regular scale.

**AIT 597: Developing IT Leaders of Integrity.** 3 credits.
Considers the cultural and organizational influences and focuses on leadership's ethical dimensions. Students identify their core values, study the attributes of effective and toxic leaders, and examine the difference between managing and leading through selected readings, discussions, team projects, in-class activities and guest presentations. Students practice and receive in-class coaching to hone their leadership skills. Notes: Course cannot be used to satisfy course requirements for PhD IT students. Offered by Info Sciences & Technology. May not be repeated for credit.

**Recommended Prerequisite:** Registered student in MS, Applied IT or instructor's permission.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree **may not** enroll.

Enrollment limited to students in the Volgenau School of Engineering college.

**Schedule Type:** Lecture

**Grading:** This course is graded on the Graduate Regular scale.

**600 Level Courses**

**AIT 601: Foundations of Applied Information Technology.** 3 credits.
Introduces students to foundational scholarship in applied information technology. Reviews seminal readings and applications of information technology. Students learn about the interdisciplinary history of the field, are introduced to influential scholars and important topics, and get an overview of key theoretical paradigms in applied information technology. Offered by Info Sciences & Technology. May not be repeated for credit.

**Recommended Prerequisite:** Admission to a graduate program in Applied IT.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Enrollment limited to students in the Volgenau School of Engineering college.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale.

AIT 602: Introduction to Research in Applied Information Technology. 3 credits.
Introduces students to research methods required to conduct original research in applied information technology. Reviews different research approaches and methods, discusses issues of data collection, validity reliability, data analysis, and interpretation. Throughout, seminal research papers will be used as case studies and students will also learn to read and understand research. Offered by Info Sciences & Technology. May not be repeated for credit.

Recommended Prerequisite: Admission to a graduate program in Applied IT.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the Volgenau School of Engineering college.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale.

AIT 614: Big Data Essentials. 3 credits.
Hands-on course discusses emerging technologies for big data analytics and their applications in real-world environments. Students apply learned concepts and best practices using several emerging technology tools simulating development, implementation, and use of big data analytical systems. Topics include RDBMS, SQL, NoSQL, R, MapReduce Programming paradigm, Hadoop, HDFS, HIVE, PIG and others in the Hadoop ecosystem for unstructured data analytics. Offered by Info Sciences & Technology. May not be repeated for credit.

Recommended Prerequisite: AIT 524, or industry experience with database systems.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the Volgenau School of Engineering college.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale.

AIT 622: Determining Needs for Complex Big Data Systems. 3 credits.
Explores the requirements, design, organization, and management of large data analytics ("Big Data") projects, including architecture of data analytics systems, roles of Data Scientists and Data Analytics Project Managers, tools and methods for conducting data analytics research, and data governance, security, curation, privacy, and legal issues. Includes review of case studies from social media, government, and industry, definitions and concepts, and communication requirements. Principles, explained and demonstrated, are applied by students to case study based projects and individual assignments/labs. Offered by Info Sciences & Technology. May not be repeated for credit.

Recommended Prerequisite: Admission to a graduate program in Applied IT or Health Informatics, or permission of the instructor.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the Volgenau School of Engineering college.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale.
AIIT 624: Knowledge Mining from Big-Data. 3 credits.
Introduction to methods and tools related to knowledge mining/representation/visualization, and annotation and retrieval for Big-Data Applications from an applied perspective with the focus on emerging research problems. This course combines survey lectures with in-depth presentation of relevant issues through seminars, and hands-on experience using existing technologies and public data sources. Offered by Info Sciences & Technology. May not be repeated for credit.

Registration Restrictions:
Required Prerequisite: AIT 582^B.
^B-Requires minimum grade of B-.

Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the Volgenau School of Engineering college.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale.

AIIT 631: Advanced Decision Making in IT Ventures. 3 credits.
The course provides students with an understanding of decision making processes and methodologies needed to successfully run IT companies. Topics include: assessment of IT ideas and investments; measuring IT investments performance; forecasting methods; multi-criteria information technology decision making methods; decision support systems; value analysis and benefit/risk methodologies. Offered by Info Sciences & Technology. May not be repeated for credit.

Recommended Prerequisite: IT 496 or equivalent.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the Volgenau School of Engineering college.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale.

AIIT 636: Interpretable Machine Learning. 3 credits.
One of the most common tasks performed by data scientists and data analysts is prediction and machine learning. Machine learning combines advanced topics in statistics, probabilities, linear algebra, and calculus to design mathematical models that learn from data or experience to solve new problems. Computers usually do not explain their predictions which is a barrier to the adoption of machine learning. This course focuses on making the decisions from algorithms more understandable for humans. In other words, making machine learning models and their decisions interpretable. This course covers simple, interpretable models such as decision trees, decision rules and linear regression. It also covers general model-agnostic methods for interpreting black box models like feature importance and model settings. Offered by Info Sciences & Technology. May not be repeated for credit.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale.

AIIT 650: Distributed Systems and Overlay Networking. 3 credits.
This graduate level seminar examines advanced networking research topics and potential applications, including distributed systems, peer-to-peer and overlay net workings, routing, protocols, replication strategies, tree formation, resource sharing, fault tolerance, and network modeling. Offered by Info Sciences & Technology. May not be repeated for credit.

Recommended Prerequisite: Thorough understanding of computer networking, IP and TCP protocols, congestion control, queuing, and addressing and routing mechanisms.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale.

AIIT 660: Cyber Security Fundamentals. 3 credits.
Introduces fundamental security principles and real-world applications of cyber security. Topics covered in the course include access control, common classes of attacks, monitoring, attack and intrusion detection, basic cryptography, computer security models, legal and privacy issues, and risk analysis. The course also provides students with opportunities to gain hands-on experience with several security tools (e.g., protocol analyzers). Offered by Info Sciences & Technology. May not be repeated for credit.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.
**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

**AIT 664: Information: Representation, Processing and Visualization.** 3 credits.
The course explores basic concepts to understand and analyze the design of information systems, and focuses on conceptual understanding of data, information, and knowledge, boundaries in representing and processing information for humans and machines, information theory, and basic techniques to organize, structure, and interact with the information through visualization. Offered by Info Sciences & Technology. May not be repeated for credit.

**Recommended Prerequisite:** AIT 524 or permission of department.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

**AIT 665: Managing Information Technology Programs in the Federal Sector.** 3 credits.
This case-study and research seminar introduces students to the unique complexities of acquisition in the Federal Sector including Congressional and Executive Branch oversight and reporting. Offered by Info Sciences & Technology. May not be repeated for credit.

**Recommended Prerequisite:** Permission of instructor.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Enrollment limited to students in the Volgenau School of Engineering college.**

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

**AIT 670: Cloud Computing Security.** 3 credits.
Offers a survey of security and privacy issues in Cloud Computing systems, along with an overview of current solutions and available technologies. Examines cloud computing models and threat model and security issues related to data and computation outsourcing, and explores practical applications of secure Cloud Computing. Offered by Info Sciences & Technology. May not be repeated for credit.

**Recommended Prerequisite:** AIT 542.

**Registration Restrictions: Required Prerequisite:** AIT 660B.

**B:** Requires minimum grade of B-.

Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Enrollment limited to students in the Volgenau School of Engineering college.**

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

**AIT 671: Information System Infrastructure Lifecycle Management.** 3 credits.
Examines information system infrastructure lifecycle management including the audit process, IT governance and best practices, system and infrastructure control, IT service delivery and support, protection of information assets, physical security, business and disaster recovery. Offered by Info Sciences & Technology. May not be repeated for credit.

**Recommended Prerequisite:** Registration in MS, Applied IT program or permission of Instructor.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Enrollment limited to students in the Volgenau School of Engineering college.**

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

**AIT 672: Identity and Access Management.** 3 credits.
Provides a hands-on in-depth description of the principles, concepts, and technology of Identity Management. Topics include digital identity, credentials, authentication, authentication protocols, trust frameworks, cryptography and digital signatures, identity tokens (smart cards), and smart card-based identity verification and authorization applications. Offered by Info Sciences & Technology. May not be repeated for credit.

**Recommended Prerequisite:** Admission into MS AIT program or permission of instructor.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.
Enrollment limited to students in the Volgenau School of Engineering college.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

**AIT 673: Cyber Incident Handling and Response.** 3 credits.
Examines Computer Emergency Response Team (CERT), including Incident Response, Vulnerability Assessment, Incident Analysis, Malcode Analysis, Forensics and Investigations. Includes exercises in CERT operations and a final Incident Handling project. Offered by Info Sciences & Technology. May not be repeated for credit.

**Recommended Prerequisite:** AIT 670 or permission of instructor.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the Volgenau School of Engineering college.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

**AIT 674: Research, Development and Technology in the Intelligence Community.** 3 credits.
Provides overview of research, development and engineering components of agencies within U.S. Intelligence Community, how they prioritize research and deliver products used in collection, processing, and dissemination of information. Examines different types of technical intelligence and related phenomenologies employed in their collection. Highlights evolution of technologies used in gathering and discusses new and emerging trends in intelligence collection and analysis. Offered by Info Sciences & Technology. May not be repeated for credit.

**Recommended Prerequisite:** AIT 670 or permission of instructor.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the Volgenau School of Engineering college.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

**AIT 675: Overview of the National Intelligence Community.** 3 credits.
Introduces structure and basic operations of the U.S. national intelligence community (IC). Students learn general information about organization, structure and missions of the IC and about the tools and techniques employed by intelligence agencies of the U.S. and other intelligence services. Surveys the range of intelligence problems and challenges, types of data and data collectors employed, and how information is processed, analyzed, and disseminated. Offered by Info Sciences & Technology. May not be repeated for credit.

**Recommended Prerequisite:** Admission into the MS-AIT degree program or permission of instructor.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the Volgenau School of Engineering college.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

**AIT 676: Intelligence Technologies, Research and Development in the Intelligence Community.** 3 credits.
Overview of R & D and engineering components of agencies within U.S. Intelligence. Describes: process by which these agencies prioritize research and deliver products to collect, process and disseminate information; types of technical intelligence and the related phenomenologies employed in their collection; evolution of technologies used in gathering, and; discusses new and emerging trends in intelligence collection and analysis. Offered by Info Sciences & Technology. May not be repeated for credit.

**Recommended Prerequisite:** Admission into the MS-AIT degree program or permission of instructor.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the Volgenau School of Engineering college.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

**AIT 677: Intelligence Analysis Methods.** 3 credits.
Presents various intelligence analysis methods addressing basic topics: substance-blind analysis of evidence and its credentials, chain of custody analysis, combination of evidence, divide and conquer paradigm for analysis, sources of uncertainty, competing hypotheses and analyses. Discusses case studies in various domains following a hands-on approach using educational analysis tools. Offered by Info Sciences & Technology. May not be repeated for credit.

**Recommended Prerequisite:** AIT 524.
**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the Volgenau School of Engineering college.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

**AIT 678:** National Security Challenges. 3 credits.
Presents the process by which decision makers identify and prioritize intelligence problems and allocate collection and analysis resources to their solutions. Discusses nation-state issues such as Russia, China, and Iran, and transnational issues such as terrorism, weapons proliferation, narcotics and smuggling, and cyber conflict and the intelligence shortcomings and needs in regard to these problems. Offered by Info Sciences & Technology. May not be repeated for credit.

**Recommended Prerequisite:** Admission into the MS-AIT degree program or permission of instructor.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the Volgenau School of Engineering college.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

**AIT 680:** Social Media in Homeland Security Operations. 3 credits.
Overview of social media uses by Homeland Security agencies and U.S. adversaries, in both active and passive modes, including recruitment and disinformation. Examines regulations and laws governing social media usage. Explores future technological developments. Offered by Info Sciences & Technology. May not be repeated for credit.

**Recommended Prerequisite:** Registered students in Homeland Security Information Systems and Cyber MS or permission of Instructor.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the Volgenau School of Engineering college.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

**AIT 681:** Secure Software Development. 3 credits.
Provides secure software development approaches for putting software security principles into practice and addressing software-induced security risk by studying software security fundamentals and software security best practices. Offered by Info Sciences & Technology. May not be repeated for credit.

**Recommended Prerequisite:** AIT 542B.
B- Requires minimum grade of B-.

Enrollment limited to students with a class of Advanced to Candidacy, Graduate or Non-Degree.

Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the Volgenau School of Engineering college.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

**AIT 682:** Network and Systems Security. 3 credits.
Introduces the principles and practices of cryptography, network security, and secure software by covering security policies, models, and mechanisms for secrecy, integrity, and availability; basic cryptography and its applications; secret key cryptography; hash functions; basic number theory and public key cryptography; trusted intermediaries, and network security (firewalls, IDS, IPsec, and SSL) etc. Offered by Info Sciences & Technology. May not be repeated for credit.

**Recommended Prerequisite:** AIT 660.
Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate or Non-Degree.

Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the Volgenau School of Engineering college.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale.

AIT 685: Capstone Seminar. 3 credits.
Student team-based experience grounded on solid understanding of the proceeding nine courses mastered in each of the program’s three areas of study. Teams analyze cases of mega-system programs from the 20th Century. Notes: Course cannot be used to satisfy course requirements for PhD IT students. Offered by Info Sciences & Technology. May not be repeated for credit.

Recommended Prerequisite: Completion of all core courses and at least nine credits of concentration courses in the program, or permission of department.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment limited to students in the VS-MS-AIT program.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the Volgenau School of Engineering college.

Schedule Type: Seminar

Grading:
This course is graded on the Graduate Regular scale.

AIT 690: Advanced Topics in Applied Information Technology. 3 credits.
Students participate actively through class dialogues and the crafting of IT solutions to specific problem areas. Notes: Course cannot be used to satisfy course requirements for PhD IT students. Offered by Info Sciences & Technology. May be repeated within the term.

Specialized Designation: Topic Varies

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the Volgenau School of Engineering college.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale.

AIT 697: Leading Organizations Through Change. 3 credits.
Introduces students to the critical tools for leading organizations through sustainable change. Through selected readings, discussions, team projects, in-class activities and guest appearances, students learn how to prepare the organization, plan the details, execute a change process across an organization and measure the plan’s effectiveness and the change it brings to achieve continuous improvement. Students practice and receive in-class coaching to hone their leadership skills. Offered by Info Sciences & Technology. May not be repeated for credit.

Recommended Prerequisite: Graduate Standing in MS, AIT program or permission of instructor.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the Volgenau School of Engineering college.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale.
**AIT 699: Research Project.** 3 credits.
Research project chosen and completed under guidance of graduate faculty member that results in technical report. Offered by Info Sciences & Technology. May not be repeated for credit.

**Recommended Prerequisite:** Open only to students in the MS AIT program with at least 18 credit hours of coursework prior to registration and with advisor approval.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to students with a major, minor, or concentration in Applied Information Technology.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the Volgenau School of Engineering college.

**Schedule Type:** Independent Study

**Grading:**
This course is graded on the Graduate Regular scale.

---

### 700 Level Courses

**AIT 701: Cyber Security: Emerging Threats and Countermeasures.** 3 credits.
The course covers the most modern and challenging cyber threats organization must defend against, and discusses existing solutions and open research problems. Topics include, but are not limited to, advanced persistent threats, attacks on cyber physical systems, ransomware, and identity theft. Through the course, students are challenged to think about innovative solutions to address some of the most pressing open problem. Offered by Info Sciences & Technology. May not be repeated for credit.

**Registration Restrictions:**
Required Prerequisites: AIT 660\(^B\) and 512\(^B\).

\(^B\) Requires minimum grade of B-.

Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the Volgenau School of Engineering college.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

**Recommended Prerequisite:** AIT 501 or permission of department.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the Volgenau School of Engineering college.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

**AIT 711: Rapid Development of Scalable Applications.** 3 credits.

Presents software engineering, programming techniques, security practices, platforms and tools necessary for rapid development of applications. Provides a survey of programming techniques and static code analysis, including security and privacy consideration throughout the application life cycle. Students work in small teams and develop or maintain scalable applications exercising risk based analysis and techniques and practices presented in the course. Offered by Info Sciences & Technology. May not be repeated for credit.

**Registration Restrictions:**
Required Prerequisites: AIT 512\(^B\) and 524\(^B\).

\(^B\) Requires minimum grade of B-.

Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the Volgenau School of Engineering college.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.
AIT 712: Applied Biometric Technologies. 3 credits.
The need for accurate automatic human identification has been increasing as people are becoming more electronically connected. Thus, the use of biometrics has spread rapidly. Identity is very valuable and the ability to establish identity is critical to many transactions. Biometric recognition has been incorporated in several high security applications such as protection of critical resources, fraud prevention and border control. This course concentrates on advantages that biometrics brings to computer security as well as on current challenging issues such as security strength, recognition rates, and privacy. Offered by Info Sciences & Technology. May not be repeated for credit.

Recommended Prerequisite: Basic knowledge of Digital Image Processing

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate or Non-Degree.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale.

AIT 716: Human Computer Interaction. 3 credits.
Covers the foundations of Human Computer Interaction, including: (1) Basic definitions and motivations of HCI, history, theories, interaction paradigms, design principles and models; (2) User-centered design methods, studies, design approaches for interfaces and interaction, quality factors, evaluation methods and techniques for data analysis; (3) Research frontiers of HCI, accessibility, universal design, and ubiquitous computing (mobile and wearable applications). Offered by Info Sciences & Technology. May not be repeated for credit.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate or Non-Degree.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale.

AIT 721: Design of IT Artifacts, Applications and Systems. 3 credits.
This course will introduce students to design principles and design thinking in applied information technology. Students will learn different approaches to design IT applications across a range of domains. Students will learn how to approach design of systems for large organizations and also for individuals. Students will learn about the interdisciplinary nature of design and get introduced to influential designers. Offered by Info Sciences & Technology. May not be repeated for credit.

Recommended Prerequisite: Enrollment in the IST concentration of the PhD in IT program and AIT 501, or permission of department.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the Volgenau School of Engineering college.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale.

AIT 722: Theories and Models in Geo-Social Data Analytics. 3 credits.
This course introduces a broad spectrum of theories, conceptual models, machine learning, and computational modeling that are used in and related to geospatial and social data. Course contents include discussions of, and hands-on exercise with, geo-social data analytics, map-based visualization, community dynamics models, smart cities theories, and GIS-based system development. This course aims to help students grow as IT professionals who can (1) understand critical issues in smart and connected communities (S&CC), (2) combine data-driven approaches in understanding and addressing the problems, and (3) communicate the geographically-embedded social patterns based on data analysis results through visualizations and interactive systems. Offered by Info Sciences & Technology. May not be repeated for credit.

Recommended Prerequisite: Programming (Python or R); Statistics

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate or Non-Degree.

Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale.

AIT 724: Data Analytics in Social Media. 3 credits.
Introduce the necessary theories and the state-of-the art techniques in Web mining, network analysis, information retrieval, and predictive modeling to study emerging problems with social media. These problems include information diffusion, recommendations, behavior analysis, and event analytics in social media. Offered by Info Sciences & Technology. May not be repeated for credit.

Registration Restrictions:
Required Prerequisite: AIT 664B.
B: Requires minimum grade of B-.

Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the Volgenau School of Engineering college.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale.

AIT 726: Natural Language Processing. 3 credits.
This is an advanced course in natural language processing (NLP). It explores deep learning methods in NLP. Topics covered include feedforward neural nets as applied to NLP and deep networks for NLP
applications. Class reviews language structure and studies context free grammars, dependency parsing, semantic role labeling along with applications such as sentiment classification and information extraction. Offered by Info Sciences & Technology. May not be repeated for credit.

**Recommended Prerequisite:** Python programming. Statistics or probability. Machine learning.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate or Non-Degree.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

**AIT 734: Advanced Web Analytics Using Semantics.** 3 credits.
Covers a range of current practices for metadata extraction, knowledge discovery from big complex data, as well as knowledge representation and reasoning. This course discusses Data Modeling issues in Web Information Systems and Internet of Things (IoT) Web Semantics. Current trends and open problems are also covered in this course. Offered by Info Sciences & Technology. May not be repeated for credit.

**Recommended Prerequisite:** AIT 582, 624.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate or Non-Degree.

Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

Enrollment limited to students in the Volgenau School of Engineering college.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

**AIT 736: Applied Machine Learning.** 3 credits.
Machine learning as a field is now incredibly pervasive with several applications such as homeland security face recognition, self-driving car, social media, bioinformatics, etc. This course provides a broad introduction to machine learning and statistical pattern recognition. It introduces interdisciplinary machine learning techniques such as statistics, linear algebra, optimization, and computer science to create automated systems able to make predictions or decisions without human intervention. This class will familiarize students with a broad cross-section of models and algorithms for machine learning, and prepare students for research or industry application of machine learning techniques. The course also provides students with opportunities to gain hands-on experience with several machine learning tools. Offered by Info Sciences & Technology. May not be repeated for credit.

**Recommended Prerequisite:** Basic knowledge of probability theory, statistics, linear algebra and programming.

Enrollment limited to students with a class of Advanced to Candidacy, Graduate or Non-Degree.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

**AIT 790: Advanced Special Topics in Applied Information Technology.** 3 credits.
This course covers doctoral-level topics of interest not routinely covered by existing courses. Course material may be chosen from various areas of applied information technology. Students are expected to participate actively through class dialogues and the crafting of IT solutions to specific problem areas. This course may be repeated for credit when subject differs. Offered by Info Sciences & Technology. May be repeated within the degree for a maximum 6 credits.

**Recommended Prerequisite:** Permission of instructor.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate or Non-Degree.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

**AIT 799: Master’s Thesis.** 1-6 credits.
Research project chosen and completed under guidance of graduate faculty member that results in a thesis manuscript and a presentation accepted by a committee of three faculty members. Offered by Info Sciences & Technology. May be repeated within the degree for a maximum 6 credits.

**Recommended Prerequisite:** Open only to students in the MS AIT program with at least 18 credit hours of coursework prior to registration and with advisor approval.

**Registration Restrictions:**

**Required Prerequisite:** AIT 699B.

B Requires minimum grade of B.

Enrollment is limited to students with a major, minor, or concentration in Applied Information Technology.

Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

Enrollment limited to students in the Volgenau School of Engineering college.

**Schedule Type:** Thesis

**Grading:**
This course is graded on the Satisfactory/No Credit scale.

**800 Level Courses**

**AIT 800: Applied Information Technology Colloquium.** 1 credit.
Students attend a series of colloquia including talks by distinguished speakers, faculty candidates and Mason faculty. Topic areas include
research advances in technology, its application, and policy issues. Notes: Students must attend a minimum of three events per semester to earn one credit in this course. PhD INFT students with a concentration in Information Science and Technology must complete at least two credits of AIT 800. Offered by Info Sciences & Technology. May be repeated within the degree for a maximum 3 credits.

**Recommended Prerequisite:** Completion of AIT Core and at least 6 credits of AIT Field Requirements in PhD program.

**Schedule Type:** Seminar

**Grading:**
This course is graded on the Satisfactory/No Credit scale.

**Arabic (ARAB)**

**100 Level Courses**

**ARAB 101: Introduction to the Arabic Language.** 3 credits. Introduction to Arabic language, dialects, countries, and culture. Beginning modern standard and classical Arabic, with emphasis on the written language, script and phonology. Basic grammar covering gender, numbers, cases, prepositions, nominal sentences, and basic conversation and greetings. Offered by Modern & Classical Languages. Limited to three attempts. Equivalent to ARAB 110.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale.

**Additional Course Details:** Taught in Arabic

**ARAB 102: Introduction to the Arabic Language.** 3 credits. Introduction to developing reading skills in formal settings. Emphasizes modern standard Arabic in oral communication. Beginning grammar level focuses on verbal sentences, present tenses, questions, and compound nouns. Offered by Modern & Classical Languages. Limited to three attempts. Equivalent to ARAB 110.

**Recommended Prerequisite:** ARAB 101.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale.

**Additional Course Details:** Taught in Arabic

**ARAB 110: Elementary Arabic.** 6 credits. Introduces elements of grammar, vocabulary, oral skills, listening comprehension, and reading. Offered by Modern & Classical Languages. Limited to three attempts. Equivalent to ARAB 101, ARAB 102.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale.

**Additional Course Details:** Taught in Arabic

**200 Level Courses**

**Recommended Prerequisite:** ARAB 101, 102.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale.

**Additional Course Details:** Taught in Arabic

**ARAB 202: Intermediate Arabic II.** 3 credits. Emphasis on application of language skills to reading, composition, and discussion. Focuses on language structure, format of developing vocabulary from verbs, covering different derivations, and language patterns. Leads to learning the use of Arabic dictionary in depth. Grammar covers passive voice and verbal nouns. Offered by Modern & Classical Languages. Limited to three attempts.

**Recommended Prerequisite:** ARAB 201.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale.

**Additional Course Details:** Fulfills Frgn Lng requriment, Taught in Arabic

**300 Level Courses**

**ARAB 300: Advanced Arabic.** 3 credits. Introduces new complex syntactical and grammatical structures for critical enhancement of fluency in Modern Standard Arabic. Emphasis is placed on sentence structure and vocabulary enrichment. Students also gain additional exposure to linguistic diglossia, culture, and history. Offered by Modern & Classical Languages. Limited to three attempts.

**Recommended Prerequisite:** ARAB 202 or equivalent, appropriate placement score, or permission of instructor.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale.

**Additional Course Details:** Taught in Arabic

**ARAB 325: Major Arab Writers/Stories.** 3 credits. Studies works of major Arab writers or collections such as The Arabian Nights. Notes: Knowledge of Arabic helpful but not required. May be repeated when topic is different with permission of department. Offered by Modern & Classical Languages. May be repeated within the degree for a maximum 6 credits.

**Mason Core:** Literature

**Recommended Prerequisite:** ENGL 101/ENGH 101 or permission of instructor.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale.
ARAB 330: Reading and Conversation I. 3 credits.
Development of conversational fluency and reading skills in modern standard Arabic through class discussion, reports, and presentations. Includes readings from newspapers, journals, magazines, web sites, literary works, and other sources. Notes: ARAB 330 and 331 must be taken in sequence. Offered by Modern & Classical Languages. Limited to three attempts.

**Recommended Prerequisite:** ARAB 202 or equivalent, appropriate placement score, or permission of instructor.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale.

**Additional Course Details:** Taught in Arabic

**ARAB 331: Reading and Conversation II.** 3 credits.
Continuation of ARAB 330. Offered by Modern & Classical Languages. Limited to three attempts.

**Specialized Designation:** Writing Intensive in Major

**Recommended Prerequisite:** ARAB 300, appropriate placement score, or permission of instructor.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale.

**Additional Course Details:** Taught in Arabic

ARAB 350: Media Arabic I (Written Media). 3 credits.
Develops advanced reading skills through work with current written media in Arabic. Offered by Modern & Classical Languages. Limited to three attempts.

**Recommended Prerequisite:** ARAB 330 and 331 or appropriate placement score or permission of instructor.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale.

**Additional Course Details:** Taught in Arabic

ARAB 351: Media Arabic II (Spoken Media). 3 credits.
Develops advanced listening and speaking skills through work with current broadcasts in Arabic TV and Radio. Offered by Modern & Classical Languages. Limited to three attempts.

**Mason Core:** Capstone

**Recommended Prerequisite:** ARAB 350 or permission of instructor.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale.

**Additional Course Details:** Taught in Arabic

ARAB 355: Advanced Arabic Media: Debates & Context. 3 credits.
Multilevel open-source media analysis and advanced language acquisition class. In addition to developing effective strategies for discourse analysis in Arabic, students will gain exposure to core issues and debates within the current Arab world. Secondary source readings and lecture material focus on issues of rhetorical and aesthetic persuasion, propaganda, censorship, media bias and fake news. Offered by Modern & Classical Languages. Limited to two attempts.

**Recommended Prerequisite:** ARAB 300

**Registration Restrictions:**
**Required Prerequisite:** ARAB 202 C.
C Requires minimum grade of C.

**Schedule Type:** Seminar

**Grading:**
This course is graded on the Undergraduate Regular scale.

**Additional Course Details:** Taught in Arabic

ARAB 360: Topics in Arabic Cultural Production. 3 credits.
Focuses on major trends and issues in modern Arabic cultural production. In addition to material from the Middle East and North Africa, the course surveys works of art, cinema, media, and literature from across the global Arabic diaspora. Notes: Some knowledge of Arabic is preferable. Offered by Modern & Classical Languages. May be repeated within the degree for a maximum 6 credits.

**Specialized Designation:** Topic Varies, Non-Western Culture

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale.

**Additional Course Details:** Taught in Arabic

ARAB 375: Study Abroad - Arab World. 1-6 credits.
Designated study abroad programs in the Arab world. Notes: must be approved by Arabic program coordinator. Offered by Modern & Classical Languages. May be repeated within the degree for a maximum 6 credits.

**Recommended Prerequisite:** ARAB 110.

**Schedule Type:** Independent Study

**Grading:**
This course is graded on the Undergraduate Regular scale.

**Additional Course Details:** Taught in Arabic

ARAB 380: Arabic Dialects. 3 credits.
Study of the structure of one Arabic dialect with comparison to Modern Standard Arabic and the classical Fus-ha. Includes study of literature, proverbs, and culture associated with that dialect. Notes: May be repeated when dialect covered is different. Offered by Modern & Classical Languages. May be repeated within the term for a maximum 6 credits.

**Recommended Prerequisite:** ARAB 202 or equivalent, appropriate placement score, or permission of instructor.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale.

**Additional Course Details:** Taught in Arabic
ARAB 390: Translation Methods: Arabic to English. 3 credits.
Provides students with essential tools and techniques to translate Arabic texts to English. Includes practice applying these techniques to a variety of documents including literary, media, and legal texts. Offered by Modern & Classical Languages. Limited to three attempts.

Recommended Prerequisite: ARAB 330 and 331 or appropriate placement score or permission of instructor.

Schedule Type: Lecture
Grading:
This course is graded on the Undergraduate Regular scale.

Additional Course Details: Taught in Arabic

400 Level Courses
ARAB 420: Survey of Arabic Literature. 3 credits.
A survey of Arabic literature from its genesis to the present day. Offered by Modern & Classical Languages. Limited to three attempts.

Specialized Designation: Non-Western Culture

Recommended Prerequisite: Six credits of 300 level courses taught in Arabic or permission of instructor.

Schedule Type: Lecture
Grading:
This course is graded on the Undergraduate Regular scale.

Additional Course Details: Taught in Arabic

ARAB 430: Advanced Arabic Grammar. 3 credits.
Introduction to traditional Arabic grammar. Covers parts of speech, sentence structure, case marking, and verb structure. Combines traditional with modern approaches to Arabic grammar and includes practical drills. Offered by Modern & Classical Languages. Limited to three attempts.

Recommended Prerequisite: 6 credits of 300 level Arabic or permission of instructor.

Schedule Type: Lecture
Grading:
This course is graded on the Undergraduate Regular scale.

Additional Course Details: Taught in Arabic

ARAB 440: Topics in Arabic Religious Thought and Texts. 3 credits.
Survey of the religious and intellectual heritage of the Arab world. Notes: May be repeated when topic and texts are different. Offered by Modern & Classical Languages. May be repeated within the degree for a maximum 9 credits.

Mason Core: Capstone

Specialized Designation: Topic Varies, Non-Western Culture

Recommended Prerequisite: Six credits of 300 level Arabic or permission of instructor.

Schedule Type: Lecture
Grading:
This course is graded on the Undergraduate Regular scale.

Additional Course Details: Taught in Arabic

Art and Visual Technology (AVT)
100 Level Courses
AVT 101: New Majors Colloquium. 1 credit.
Provides a common core experience of contemporary perspectives on the broad range of professional career options open to studio art majors. Lectures address practical concerns but emphasize social, ethical, and philosophical aspects of visual arts professions. Notes: Students who enrolled at Mason in Fall 2007 or later must take AVT 101 during or before their first semester as an AVT major. Required of all AVT majors. May be taken prior to declaring the major or during the first semester as a declared AVT major. Offered by School of Art. Limited to three attempts.

Schedule Type: Lecture
Grading:
This course is graded on the Undergraduate Regular scale.

AVT 103: Introduction to the Artist's Studio. 3 credits.
Through projects, readings, class critiques, visuals, and field trips, students explore materials, techniques, concepts, and processes essential to understanding the language of visual arts and the artist's role. Develops imaginative thinking and sensitivity to visual environment. Note: for non-majors only. Offered by School of Art. Limited to three attempts.

Mason Core: Arts
Registration Restrictions:
Students cannot enroll who have a major in Art and Visual Technology.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale.

AVT 104: Two-Dimensional Design and Color. 3 credits.
Explores elements and principles of two-dimensional design, establishment of visual vocabulary, and critical analysis that supports conceptual development. Studio projects build fundamental knowledge, skills, understanding of precedents, and contemporary practices in visual arts. Offered by School of Art. Limited to three attempts.

Mason Core: Arts

Schedule Type: Studio

Grading:
This course is graded on the Undergraduate Regular scale.

AVT 105: Three-Dimensional Design and Beyond. 3 credits.
Explores elements and principles of three-dimensional design, establishment of visual vocabulary, and critical analysis that supports conceptual development. Studio projects explore form and composition, time-based media, materials, precedents, and contemporary practices in visual arts. Offered by School of Art. Limited to three attempts.

Recommended Prerequisite: AVT 104, or permission of instructor.

Schedule Type: Studio

Grading:
This course is graded on the Undergraduate Regular scale.

AVT 110: Digital Design Studio. 3 credits.
Introduces digital software from a graphic design perspective. Digital Design Studio will teach students industry standard software proficiencies in Adobe InDesign, Illustrator, and Photoshop. Students do not need any prior knowledge of Adobe software to complete this class. Offered by School of Art. Limited to three attempts.

Grading:
This course is graded on the Undergraduate Regular scale.

AVT 180: New Media in the Creative Arts. 3 credits.
Introduces computing from artist’s perspective. Emphasizes computer use for artistic creation and research. Overview of image making and time-based media within the broad context of contemporary art, new media art, and mediated culture. Offered by School of Art. Limited to three attempts.

Mason Core: Info Tech & Computing

Schedule Type: Studio

Grading:
This course is graded on the Undergraduate Regular scale.

AVT 204: Visual Thinking. 3 credits.
Explores the ways contemporary artists use principles of design and perception to challenge how we see our world physiologically, psychologically, or socially. Examples drawn from film, photography, new media art, and other contemporary artistic media. Offered by School of Art. Limited to three attempts.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale.

AVT 206: Color. 3 credits.
Color theory and principles of color interaction, including additive, subtractive, and partitive color experience; study of harmony, contrast, focus, space, opacity, transparency, temperature and value in both wet and dry media; and related applications of color technology. Offered by School of Art. Limited to three attempts.

Recommended Prerequisite: AVT 104, or permission of instructor.

Schedule Type: Studio

Grading:
This course is graded on the Undergraduate Regular scale.

AVT 215: Typography. 3 credits.
Introduction to history and use of type. Reading and projects develop awareness of type as a linguistic and visual communication tool. Introduces typographic design elements, including color, hierarchy, integration with imagery, structure, and content. Offered by School of Art. Limited to three attempts.

Mason Core: Arts

Registration Restrictions:
Required Prerequisite: AVT 110C.
C Requires minimum grade of C.

Schedule Type: Studio

Grading:
This course is graded on the Undergraduate Regular scale.

AVT 217: Introduction to Web Design. 3 credits.
An introduction to contemporary web design, in particular to standards, as a successful tool in design communication. Students gain hands-on experience on design issues specific to Web-based presentations, learn web page layout, effective navigation and delve into the design process. Offered by School of Art. Limited to three attempts.

Recommended Prerequisite: Admittance into the Graphic Design Undergraduate Certificate or permission of instructor.

Registration Restrictions:
Required Prerequisite: AVT 110C.
C Requires minimum grade of C.

Schedule Type: Studio

Grading:
This course is graded on the Undergraduate Regular scale.

AVT 222: Drawing I. 3 credits.
Introduction and exploration of the fundamentals of drawing methods and materials, with emphasis on observational study and critical analysis of the effective and expressive use of line, mass, value, perspective, and formal composition. Emphasis on problems involved in representational and abstract visual interpretations of forms. Notes: AVT majors
encouraged to take AVT 222 with AVT 104. Offered by School of Art. Limited to three attempts.

**Mason Core:** Arts

**Schedule Type:** Studio

**Grading:**
This course is graded on the Undergraduate Regular scale.

**AVT 232:** *Painting I.* 3 credits.
Introduction to the basic methods and principles of painting with a focus on observation, paint application, formal composition, color mixing, and the articulation of form. Students develop a visual awareness as they become familiar with the language of image making, construction, analysis, and awareness. Students prepare portfolios for collaborative and reflective critique. Offered by School of Art. Limited to three attempts.

**Mason Core:** Arts

**Schedule Type:** Studio

**Grading:**
This course is graded on the Undergraduate Regular scale.

**AVT 243:** *Printmaking I.* 3 credits.
Introduction to basics of hand printing. Emphasis on translation and transferal of images, tools, equipment, and technical skills for making a well-defined print. Students explore drawing, synthesis, and multiplicity in this interactive and collaborative course. Presentations and field trips focus on aesthetic and cultural concerns of making multiple images. Offered by School of Art. Limited to three attempts.

**Mason Core:** Arts

**Schedule Type:** Studio

**Grading:**
This course is graded on the Undergraduate Regular scale.

**AVT 252:** *Darkroom Photography I.* 3 credits.
Introduces photographic study and investigation of the fundamental practices and techniques of both film and digital forms with attention to its history and contemporary practices. Class discussions, field trips and critiques enhance visual and verbal vocabularies. Offered by School of Art. Limited to three attempts.

**Mason Core:** Arts

**Schedule Type:** Studio

**Grading:**
This course is graded on the Undergraduate Regular scale.

**AVT 253:** *Digital Photography I.* 3 credits.
Introduction to the digital camera as a tool for electronic photographic image making. Students will be introduced to principles and exploration of the aesthetics of digital photography and also learn basic image-editing skills in a computer environment. Offered by School of Art. Limited to three attempts.

**Mason Core:** Arts

**Schedule Type:** Studio

**Grading:**
This course is graded on the Undergraduate Regular scale.

**AVT 254:** *Photography.* 3 credits.
Introduces photographic study and investigation of the fundamental practices and techniques of both film and digital forms with attention to its history and contemporary practices. Class discussions, field trips and critiques enhance visual and verbal vocabularies. Offered by School of Art. Limited to three attempts.

**Recommended Prerequisite:** Restricted to AVT majors and AVT minors.

**Schedule Type:** Studio

**Grading:**
This course is graded on the Undergraduate Regular scale.

**AVT 262:** *Sculpture I.* 3 credits.
Projects in sculpture that emphasizes contemporary theory and issues, the development of individual concepts, and creative solutions. Explores the application of materials, tools, and imaginative processes. Faculty demonstrations, lectures, gallery and museum visits, and regular student work critiques. Offered by School of Art. Limited to three attempts.

**Mason Core:** Arts

**Schedule Type:** Studio

**Grading:**
This course is graded on the Undergraduate Regular scale.

**AVT 272:** *Interdisciplinary Arts.* 3 credits.
Introduces contemporary interdisciplinary art practice through readings and studio projects in performance and installation. Provides students with opportunities to deepen understanding of conceptual art, nontraditional media practices, and collaborative practice in visual arts. Offered by School of Art. Limited to three attempts.

**Mason Core:** Arts

**Schedule Type:** Studio

**Grading:**
This course is graded on the Undergraduate Regular scale.

**AVT 280:** *Introduction to New Media Arts.* 3 credits.
Investigates ways in which contemporary artists employ tools in response to social, political and cultural conditions. Students create meaningful works of art that demonstrate conceptual and contextual awareness plus technical ability. Offered by School of Art. Limited to three attempts.

**Recommended Prerequisite:** AVT 104, or permission of instructor.

**Schedule Type:** Studio

**Grading:**
This course is graded on the Undergraduate Regular scale.

**300 Level Courses**

**AVT 300:** *Artsbus Attendance.* 0 credits.
Students travel to New York or other destinations aboard the AVT Artsbus to attend faculty-selected exhibitions. Notes: AVT majors must satisfactorily complete course once for each semester they are enrolled as majors, up to five times. Repeatable up to three times per semester. Offered by School of Art. May be repeated within the term.
Schedule Type: Laboratory

Grading:
This course is graded on the Satisfactory/No Credit scale.

AVT 301: Visual Voices Colloquium. 1 credit.
Students attend AVT Visual Voices lecture series during the semester and complete assignments related to the topics covered. Notes: AVT majors must accumulate at least 3 credits in this colloquium to graduate. Offered by School of Art. May be repeated within the degree for a maximum 8 credits.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale.

AVT 305: Creative Processes. 3 credits.
Study of the creative process in general, with emphasis on the inspiration, working methods, and final creations of various artists. Students explore their own creative processes through journal keeping, collaborative exercises, and projects. Offered by School of Art. Limited to three attempts.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale.

AVT 307: Aesthetics. 3 credits.
Interdisciplinary course examines broad range of contemporary art and culture to engage an expansive conception of aesthetic experience. Students engage with historical and contemporary aesthetic theories, build heightened aesthetic sensibility, and explore their personal aesthetic. Offered by School of Art. Limited to three attempts.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale.

AVT 309: Art as Social Action. 3 credits.
Interdisciplinary exploration of work by citizen-artists whose art-making engages the social world. Students learn about the history of socially engaged art-making and experiment with individual and collaborative projects addressing social issues. Offered by School of Art. Limited to three attempts.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale.

AVT 311: Graphic Design Methods and Principles. 3 credits.
Emphasis on developing design solutions requiring demographic, historical, and/or cultural research. Course strengthens design and typography skills, introduces conceptual problem solving, audience considerations, and broad-based tools designers use to develop effective visual communication solutions. Offered by School of Art. Limited to three attempts.

Schedule Type: Studio

Grading:
This course is graded on the Undergraduate Regular scale.

AVT 313: Editorial Design. 3 credits.
Development and production of long-form design projects (magazines, newspapers, catalogs, and other serial and/or multipage publications). Emphasis on narrative, consistency, structure, clarity. Addresses information design issues and reinforces conceptual skills and integration of imagery and text. Offered by School of Art. Limited to three attempts.

Schedule Type: Studio

Grading:
This course is graded on the Undergraduate Regular scale.

AVT 318: History of Graphic Design. 3 credits.
A survey of design history. Looks at print and web design as both a reaction to and shaper of the broader culture (including other fine applied arts) through the study of major movements and designers. Offered by School of Art. Limited to three attempts.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale.

AVT 319: Mobile App Design. 3 credits.
Introduces students to designing user interfaces, and experiences for mobile devices. Students will be exposed to designing for a variety of mobile platforms including tablet, phone, and mobile web interfaces. Offered by School of Art. Limited to three attempts.

Recommended Prerequisite: C or higher in AVT 311.

Schedule Type: Studio

Grading:
This course is graded on the Undergraduate Regular scale.

AVT 322: Drawing II. 3 credits.
Students develop observational, sketching, and rendering skills. Introduction to a range of materials, methods, formal concepts, drawing in series, and critique vocabulary. Offered by School of Art. Limited to three attempts.

Registration Restrictions:
Required Prerequisite: AVT 222C.
C Requires minimum grade of C.

Schedule Type: Studio

Grading:
This course is graded on the Undergraduate Regular scale.

AVT 324: Figure Drawing. 3 credits.
Drawing with an emphasis on the observational study of the human body. Human anatomy and proportion are examined through a series of methodological approaches, including gesture, contour, mass, and modeling. Offered by School of Art. Limited to three attempts.
Registration Restrictions:
Required Prerequisite: AVT 222.  
C Requires minimum grade of C.

Schedule Type: Studio

Grading:
This course is graded on the Undergraduate Regular scale.

AVT 326: Nontraditional Approaches to Drawing. 3 credits.
Encourages students to challenge some traditional approaches to drawing by creating innovative works that combine familiar drawing techniques with a variety of materials, approaches, and unusual formats. Offered by School of Art. Limited to three attempts.

Recommended Prerequisite: AVT 222 or permission of instructor.

Schedule Type: Studio

Grading:
This course is graded on the Undergraduate Regular scale.

AVT 327: Illustration. 3 credits.
This course is intended to provide an overview of illustration as a visual communication medium. Sharing the tools and techniques of gallery artists and the communicative goals of graphic designers, illustrators work across media to make concepts understandable and powerful in the service of editorial, informational or persuasive goals. Students will begin to discover individually unique methods of problem solving by developing a personal visual vocabulary and relating it to historical and contemporary trends of art, design and illustration. Offered by School of Art. Limited to three attempts.

Recommended Prerequisite: AVT 324

Registration Restrictions:
Required Prerequisites: ((AVT 323C or 324C) and (AVT 180C or 110C)).  
C Requires minimum grade of C.

Schedule Type: Studio

Grading:
This course is graded on the Undergraduate Regular scale.

AVT 328: Mixed Media. 3 credits.
Students investigate the contemporary innovations and disciplinary cross-pollination which have revolutionized and expanded the boundaries of traditional fine arts. Projects incorporate text, sound, computer generated imagery, collaboration and installation. Offered by School of Art. Limited to three attempts.

Registration Restrictions:
Required Prerequisite: AVT 104C.  
C Requires minimum grade of C.

Schedule Type: Studio

Grading:
This course is graded on the Undergraduate Regular scale.

AVT 333: Painting II. 3 credits.
Focuses on the development of formal and technical skills, with an emphasis on paint application, color interaction, and support building and preparation. Introduces concepts, methodologies, and approaches relevant to contemporary painting. Offered by School of Art. Limited to three attempts.

Registration Restrictions:
Required Prerequisite: AVT 232C.  
C Requires minimum grade of C.

Schedule Type: Studio

Grading:
This course is graded on the Undergraduate Regular scale.

AVT 336: Experimental Painting. 3 credits.
Using contemporary painting practices as starting place, students explore a variety of experimental and conceptual approaches to painting. Offered by School of Art. Limited to three attempts.

Recommended Prerequisite: AVT 232 or permission of instructor.

Schedule Type: Studio

Grading:
This course is graded on the Undergraduate Regular scale.

AVT 337: Figurative Painting. 3 credits.
Working primarily with live models, students explore the human form as the main subject for a variety of visual and expressive inquiries. Offered by School of Art. Limited to three attempts.

Recommended Prerequisite: AVT 232, or permission of instructor.

Schedule Type: Studio

Grading:
This course is graded on the Undergraduate Regular scale.

AVT 340: Zines and Self-Publishing. 3 credits.
Zines and artist publications exist largely outside the mainstream. This course will develop your understanding of the relationship between a community and independent or DIY publishing, providing a way to connect with a group of people with the same interests and concerns as you. Offered by School of Art. Limited to three attempts.

Schedule Type: Studio

Grading:
This course is graded on the Undergraduate Regular scale.

AVT 341: Comics. 3 credits.
This is a course that explores Comics as a medium to tell stories and, using the language of mini-comics, zines, and DIY distribution, to make physical editions of comic books. Students will be looking at the geography of the comic book as object and exploring the diversity comics field as a medium and discipline. Offered by School of Art. Limited to three attempts.

Schedule Type: Studio

Grading:
This course is graded on the Undergraduate Regular scale.

AVT 343: Printmaking II. 3 credits.
An introduction to relief, screenprint, and intaglio printing, including the study of historical antecedents and their relevancy to contemporary printmaking. Students learn reductive and additive techniques in
Students achieve skills in multiple steps and incremental development focusing on electronic means of creating and manipulating imagery. A beginning course in hand printing digitally processed images. Projects preparing printing surfaces. Offered by School of Art. Limited to three attempts.

**Registration Restrictions:**
**Recommended Prerequisite:** AVT 243\(^C\).
\(^C\) Requires minimum grade of C.

**Schedule Type:** Studio

**Grading:**
This course is graded on the Undergraduate Regular scale.

**AVT 344: Book Arts: Books & Enclosures.** 3 credits.
This course will introduce the basic concepts of book arts. Physical properties of book structures and binding methods will be developed alongside a conceptual rigor necessary to explore ideas of narrative and space within the book form. Through projects, readings, lectures, group discussions, individual reviews, and critiques, the course will introduce the history, tools, equipment, materials and processes that built the contemporary book. Offered by School of Art. Limited to three attempts.

**Schedule Type:** Studio

**Grading:**
This course is graded on the Undergraduate Regular scale.

**AVT 345: Paper/Print/Book as Language.** 3 credits.
Introduces the artist's book as both physical structure and creative association of words and images. Students learn techniques of bookmaking, binding, and traditional and digital printmaking to produce an artist-made book with narrative and sequential elements. Offered by School of Art. Limited to three attempts.

**Recommended Prerequisite:** AVT 180, or permission of instructor.

**Schedule Type:** Studio

**Grading:**
This course is graded on the Undergraduate Regular scale.

**AVT 346: Digital Printmaking.** 3 credits.
A beginning course in hand printing digitally processed images. Projects focus on electronic means of creating and manipulating imagery. Students achieve skills in multiple steps and incremental development required in making prints. Offered by School of Art. Limited to three attempts.

**Recommended Prerequisite:** AVT 180, or permission of instructor.

**Schedule Type:** Studio

**Grading:**
This course is graded on the Undergraduate Regular scale.

**AVT 353: Darkroom Photography II.** 3 credits.
Continuation of Fundamentals of Photography with further investigation into the aesthetics of photography through experimentation with new camera formats, films, papers, developers and development of a photographic portfolio. Offered by School of Art. Limited to three attempts.

**Registration Restrictions:**
**Required Prerequisites:** AVT 252\(^C\) or 254\(^C\).
\(^C\) Requires minimum grade of C.

**Schedule Type:** Studio

**Grading:**
This course is graded on the Undergraduate Regular scale.

**AVT 354: Digital Photography II.** 3 credits.
A computer-intensive class in which students create digital images from the viewpoint of a photographic artist. Emphasis on digital photo techniques, including making digital negatives, concept development, and visual aesthetics. Offered by School of Art. Limited to three attempts.

**Recommended Prerequisite:** AVT 180, or permission of instructor.

**Registration Restrictions:**
**Required Prerequisite:** AVT 253\(^C\).
\(^C\) Requires minimum grade of C.

**Schedule Type:** Studio

**Grading:**
This course is graded on the Undergraduate Regular scale.

**AVT 356: Photo Studio Techniques.** 3 credits.
Introduces Theory, concepts and applications of photographic studio lighting. Emphasis on the ability to control and manipulate light in a photographic lighting studio environment using large format film cameras. Offered by School of Art. Limited to three attempts.

**Recommended Prerequisite:** AVT 353 or AVT 354, or permission of instructor.

**Schedule Type:** Studio

**Grading:**
This course is graded on the Undergraduate Regular scale.

**AVT 357: Photobook: Concepts & Form.** 3 credits.
The photobook is an increasingly diverse and versatile artistic medium. Through demos, readings, lectures, workshops, assignments and critiques the course will cover the fundamentals of current photobook theory. Upon successful completion of this course students will have created several books that demonstrate an understanding of, and comfort with, book development and production. Offered by School of Art. Limited to three attempts.

**Registration Restrictions:**
**Required Prerequisite:** AVT 253\(^C\).
\(^C\) Requires minimum grade of C.

**Schedule Type:** Studio

**Grading:**
This course is graded on the Undergraduate Regular scale.

**AVT 359: Photography Seminar.** 3 credits.
A combined studio and lecture course investigating photography's history, critical theory, philosophy, and practice. Lectures, discussions, readings, and projects focus on a medium that has enormously influenced art and culture. Offered by School of Art. Limited to three attempts.

**Recommended Prerequisite:** AVT 353 or permission of the instructor.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale.
AVT 363: *Sculpture II*. 3 credits.
Expands on the principles and processes introduced in Sculpture I, developing a higher level of technical competence and critical sophistication. Notes: Lectures, independent student research, and gallery and museum visits required. Vigorous critiques. Offered by School of Art. Limited to three attempts.

Registration Restrictions:
Required Prerequisite: AVT 262C.
C Requires minimum grade of C.

Schedule Type: Studio

Grading:
This course is graded on the Undergraduate Regular scale.

AVT 370: *Entrepreneurship in the Arts*. 3 credits.
Combined lecture and studio course in developing entrepreneurial skills in arts. Special focus on developing communication skills and planning strategies, as well as on nurturing skills that enable students to creatively solve problems and think about opportunities. Offered by School of Art. Limited to three attempts.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale.

Review of major approaches to the study of visual perception. Topics include analysis of picture perception, visual thinking, the relationship between symbolic and non-symbolic thinking and representation, and how pathologies of vision affect art production. Offered by School of Art. Limited to three attempts.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale.

AVT 372: *Hip Hop Culture*. 3 credits.
Examines hip hop as an art form within a continuum of cultural expression. Explores multilayered social, political, and aesthetic aspects of hip hop, historical causes and precedents, and contemporary derivatives and implications. Offered by School of Art. Limited to three attempts.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale.

AVT 373: *Performance Studio*. 3 credits.
Studio course focused on theory and practice of collaborative performance art. Detailed analysis of creation and production processes from interdisciplinary perspective in conjunction with practical training in multimedia technologies, body sculpture, and theater of images. Offered by School of Art. Limited to three attempts.

Recommended Prerequisite: AVT 272, or permission of instructor.

Schedule Type: Studio

Grading:
This course is graded on the Undergraduate Regular scale.

AVT 374: *Sound Art I*. 3 credits.
Introduction to the physics, phenomenology, and production of sound as an expressive medium. Using analog and digital tools, students will explore constructing with sound. Offered by School of Art. Limited to three attempts.

Recommended Prerequisite: AVT 180, or 280, or permission of instructor.

Schedule Type: Studio

Grading:
This course is graded on the Undergraduate Regular scale.

AVT 376: *Live Movies*. 3 credits.
Advanced performance studio emphasizing cinematic forms and multimedia technologies. Also covers sound design, scenic design and materials, production planning, and interdisciplinary approaches to narrative and content in performance. Notes: Students collaborate on production projects. Offered by School of Art. Limited to three attempts.

Schedule Type: Studio

Grading:
This course is graded on the Undergraduate Regular scale.

AVT 377: *Cyberpunk*. 3 credits.
Traces the ways that cinema, music, fiction, cultural theory, visual art, television, theater, and performance have embraced and been shaped by cyberpunk and cyberculture. Includes readings, writings, discussion, screenings, guest speakers, and research projects. Offered by School of Art. Limited to three attempts.

Schedule Type: Studio

Grading:
This course is graded on the Undergraduate Regular scale.

AVT 380: *Thinking Through Animation*. 3 credits.
Students will be encouraged to expand their abilities and capabilities as thinkers, artists and citizens. This course will provide an introduction to issues relating to the production and reception of animated media bracketing the turn of the 21st century. Offered by School of Art. Limited to three attempts.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale.

AVT 382: *2D Experimental Animation*. 3 credits.
Introduces conceptual, contextual, technical, and aesthetic practices of two-dimensional experimental animation. Students learn to animate hand-drawn and computer-generated images. Students work to create an imaginative and meaningful short animation with sound. Offered by School of Art. Limited to three attempts.

Recommended Prerequisite: AVT 280, or permission of instructor.

Schedule Type: Studio

Grading:
This course is graded on the Undergraduate Regular scale.

AVT 383: *3D Experimental Animation*. 3 credits.
Students create socially relevant 3D scenes with scaled objects, surface textures, lights, and shadows. These scenes serve as environments for
short, thought-provoking animations. Emphasis on idea development, critical examination of animation practices, and visual aesthetics. Offered by School of Art. Limited to three attempts.

**Recommended Prerequisite:** AVT 280 or permission of instructor.

**Schedule Type:** Studio

**Grading:**
This course is graded on the Undergraduate Regular scale.

**AVT 385: EcoArt. 3 credits.**
Develop collaborative projects that explore art and visual culture, the environment, and sustainability. Students are given access to the School of Art Permaculture Studio as a "green" work space for developing course projects. Offered by School of Art. May be repeated within the degree for a maximum 8 credits.

**Mason Core:** Arts, Encore: Sustainability, Synthesis, Encore: Well-Being

**Specialized Designation:** Green Leaf Focused Course

**Schedule Type:** Studio

**Grading:**
This course is graded on the Undergraduate Regular scale.

**AVT 390: Video Art. 3 credits.**
Integrates study of contemporary art theory, montage theory, and artistic practices with application to new media and technology. Special focus on visual culture and video art, sound design, and the sociopolitical implications of media. Offered by School of Art. Limited to three attempts.

**Recommended Prerequisite:** AVT 280 or permission of instructor.

**Schedule Type:** Studio

**Grading:**
This course is graded on the Undergraduate Regular scale.

**AVT 393: Field Experience in the Arts. 1-6 credits.**
Introductory working and learning experience with an organization or individual in the arts or as a teaching assistant. Students must complete 45 hours of work at the internship site for each credit. Note: Departmental permission required to register. Notes: Placement documentation to include 45 hours of work per credit. Offered by School of Art. May be repeated within the degree for a maximum 6 credits.

**Recommended Prerequisite:** Junior standing and permission of instructor and academic advisor.

**Schedule Type:** Internship

**Grading:**
This course is graded on the Undergraduate Regular scale.

**AVT 394: Honors Seminar. 1 credit.**
Offers highly motivated students opportunities to interact with art world professionals through field trips, research, critiques, and creative assignments. Notes: Students accrue credits toward graduation with AVT honors. Offered by School of Art. May be repeated within the degree for a maximum 6 credits.

**Recommended Prerequisite:** Open only to qualified AVT honors students by invitation.

**Schedule Type:** Seminar

**Grading:**
This course is graded on the Undergraduate Regular scale.

**AVT 395: Writing for Artists. 3 credits.**
Practical writing seminar in which students practice typical writing needs of creative professionals; including artist’s statements, grant proposals, and reviews; while also exploring ways in which artists have used writing, books, and language in art making. Offered by School of Art. Limited to three attempts.

**Specialized Designation:** Writing Intensive in Major

**Registration Restrictions:**
**Required Prerequisite:** ENGH 302C or ENGL 302C.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale.

**AVT 396: Writing for Designers. 3 credits.**
Practical writing seminar in which students practice typical statements, design briefs and proposals, and reviews; while also exploring ways in which designers have used writing, publications, and language in expressing critical design thinking. Offered by School of Art. Limited to three attempts.

**Specialized Designation:** Writing Intensive in Major

**Registration Restrictions:**
**Required Prerequisite:** ENGH 302C.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale.

**400 Level Courses**

**AVT 407: Advanced Aesthetics. 3 credits.**
Advanced examination of aesthetic concepts and theories, focusing on issues pertinent to artmaking. Offered by School of Art. Limited to three attempts.

**Registration Restrictions:**
**Required Prerequisite:** AVT 307C.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale.

**AVT 408: Visual Communication Theories. 3 credits.**
Advanced lecture course focusing on key theories and themes that have informed 20th and 21st century design practice. Explores theory and criticism in a variety of contexts, from popular to scholarly, and considers the role of the designers as thinkers and writers. Offered by School of Art. Limited to three attempts.

**Recommended Prerequisite:** C or higher in ENGH/ENGL 302 or permission of instructor.
AVT 410: Experiential Design History. 3 credits.
This hybrid lecture/studio course provides a historical perspective of the evolution of graphic design and examines graphic design’s contribution to culture through writing and design projects. The course will have both lecture and studio content, providing ‘hands-on’ experiential opportunities in traditional graphic techniques. Offered by School of Art. Limited to three attempts.

**Registration Restrictions:**
Required Prerequisite: ENGH 302C.
C Requires minimum grade of C.

**Schedule Type:** Seminar

**Grading:**
This course is graded on the Undergraduate Regular scale.

AVT 411: Motion Design. 3 credits.
Motion Design introduces the theories, techniques and practices of motion design and the integration of design, image, sound, video and animation. Offered by School of Art. Limited to three attempts.

**Registration Restrictions:**
Required Prerequisites: AVT 217C and 311C.
C Requires minimum grade of C.

Enrollment is limited to students with a major, minor, or concentration in Graphic Design or Web Design.

Enrollment limited to students in the AR-BFA-AVT program.

**Schedule Type:** Studio

**Grading:**
This course is graded on the Undergraduate Regular scale.

AVT 412: Advanced Typography. 3 credits.
An advanced exploration of type, design and the graphic organization of visual information. Emphasis is on the aesthetic and technical execution of typographic hierarchy in visual communications. Offered by School of Art. Limited to three attempts.

**Registration Restrictions:**
Required Prerequisite: AVT 313C.
C Requires minimum grade of C.

**Schedule Type:** Studio

**Grading:**
This course is graded on the Undergraduate Regular scale.

AVT 413: Professional Design Practices. 3 credits.
Addresses the nature of the professional graphic designer in terms of career development and self-marketing, visual presentations of design work, preparation of written materials and interview techniques. Special emphasis will be given to the development of a design business, as well as freelance and pro-bono design work. Offered by School of Art. Limited to three attempts.

**Registration Restrictions:**
Required Prerequisites: AVT 313C and 414C.
C Requires minimum grade of C.

**Schedule Type:** Seminar

**Grading:**
This course is graded on the Undergraduate Regular scale.

AVT 414: Corporate Design and Branding. 3 credits.
Fundamentals of branding and identity design. Topics include logo development, product packaging, marketing and advertising collaterals, web branding, and broadcast advertising development. Special attention is given to the creation of a graphics standards guide. Offered by School of Art. Limited to three attempts.

**Recommended Prerequisite:** Admittance into the Graphic Design Undergraduate Certificate, or Graphic Design Minor, or permission of instructor.

**Registration Restrictions:**
Required Prerequisites: (AVT 252C or 253C) and (AVT 311C and 396C).
C Requires minimum grade of C.

**Schedule Type:** Studio

**Grading:**
This course is graded on the Undergraduate Regular scale.

AVT 415: Web Design and Usability. 3 credits.
Introduces students to web design, usability, and the use of popular applications for static, interactive, and motion-based web development. Offered by School of Art. Limited to three attempts.

**Registration Restrictions:**
Required Prerequisites: (AVT 217C and 311C) and (AVT 313C or 414C).
C Requires minimum grade of C.

**Schedule Type:** Studio

**Grading:**
This course is graded on the Undergraduate Regular scale.

AVT 416: Advertising Design. 3 credits.
Provides insight and practice in the creative design process behind effective and memorable advertising. Emphasis on the design and presentation of a series of portfolio-ready advertising campaigns for actual client use. Offered by School of Art. Limited to three attempts.

**Registration Restrictions:**
Required Prerequisite: AVT 414C.
C Requires minimum grade of C.

Enrollment limited to students in the AR-BFA-AVT program.

**Schedule Type:** Studio

**Grading:**
This course is graded on the Undergraduate Regular scale.

AVT 417: Package Design. 3 credits.
Provides a focused studio experience to conceptualize and design multiple applications for contemporary package design. Offered by School of Art. Limited to three attempts.

**Registration Restrictions:**
Required Prerequisite: AVT 414C.
C Requires minimum grade of C.
Enrollment is limited to students with a concentration in Graphic Design. Enrollment limited to students in the AR-BFA-AVT program.

**Schedule Type:** Studio

**Grading:**
This course is graded on the Undergraduate Regular scale.

**AVT 419: Topics in Graphic Design.** 1-6 credits. Rotating subjects give students a deep look into and appreciation of a specific topic in design practice. Notes: Topics and credit vary with instructor. May be repeated when taken under different topics. Offered by School of Art. May be repeated within the term.

**Specialized Designation:** Topic Varies

**Registration Restrictions:**
Required Prerequisites: AVT 311\(^C\) and (AVT 313\(^C\) or 414\(^C\)).
\(^C\) Requires minimum grade of C.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale.

**AVT 420: Advanced Web Design.** 3 credits. Building on the principles and skills gained in AVT 415, this course delves deeper into web-related concepts and techniques. Students will gain advanced knowledge in evolving web technology, preparing them for professional entry into the web design field. Offered by School of Art. Limited to three attempts.

**Registration Restrictions:**
Required Prerequisite: AVT 415\(^C\).
\(^C\) Requires minimum grade of C.

**Schedule Type:** Studio

**Grading:**
This course is graded on the Undergraduate Regular scale.

**AVT 422: Drawing III.** 3 credits. Builds on intermediate drawing skills, emphasizing individual exploration and expressive techniques. Along with rigorous observational study, students work from a variety of sources to develop a broad understanding of visual solutions within contemporary art practice. Offered by School of Art. Limited to three attempts.

**Registration Restrictions:**
Required Prerequisite: AVT 323\(^C\).
\(^C\) Requires minimum grade of C.

**Schedule Type:** Studio

**Grading:**
This course is graded on the Undergraduate Regular scale.

**AVT 423: Drawing IV.** 3 credits. Students learn and practice advanced drawing skills and techniques in a variety of media and formats. Emphasis on development of content, personal sources, techniques, presentation strategies, and methods of analysis through critique. Offered by School of Art. Limited to three attempts.

**Registration Restrictions:**
Required Prerequisite: AVT 422\(^C\).
\(^C\) Requires minimum grade of C.

**Schedule Type:** Studio

**Grading:**
This course is graded on the Undergraduate Regular scale.

**AVT 432: Painting III.** 3 credits. Intermediate course with an emphasis on developing personal content, concepts, painting strategies, and a practical understanding of contemporary ideas in painting. Offered by School of Art. Limited to three attempts.

**Registration Restrictions:**
Required Prerequisite: AVT 333\(^C\).
\(^C\) Requires minimum grade of C.

**Schedule Type:** Studio

**Grading:**
This course is graded on the Undergraduate Regular scale.

**AVT 433: Advanced Painting I.** 3 credits. Students engage in a self-directed studio practice through the development of content, personal sources, techniques, presentation strategies, and methods of analysis through critique. Offered by School of Art. Limited to three attempts.

**Registration Restrictions:**
Required Prerequisite: AVT 432\(^C\).
\(^C\) Requires minimum grade of C.

**Schedule Type:** Studio

**Grading:**
This course is graded on the Undergraduate Regular scale.

**AVT 434: Advanced Painting II.** 3 credits. Students work rigorously and independently, advancing individual studio practice through in-depth dialogue with faculty and formal group critiques. Emphasis on individual decision making, personal initiative, and critical vocabularies. Offered by School of Art. Limited to three attempts.

**Registration Restrictions:**
Required Prerequisite: AVT 433\(^C\).
\(^C\) Requires minimum grade of C.

**Schedule Type:** Studio

**Grading:**
This course is graded on the Undergraduate Regular scale.

**AVT 435: Advanced Painting III.** 3 credits. Advanced directed research in painting. Employing rigorous concepts, presentation strategies, and in-depth critique, students develop independent projects into a cohesive body of work. Offered by School of Art. Limited to three attempts.

**Registration Restrictions:**
Required Prerequisite: AVT 434\(^C\).
\(^C\) Requires minimum grade of C.

**Schedule Type:** Studio

**Grading:**
This course is graded on the Undergraduate Regular scale.

**AVT 436: Advanced Painting IV.** 3 credits. Students continue to develop an independent studio practice in advanced painting. Employing rigorous concepts, presentation strategies, and in-depth critique, students develop independent projects into a cohesive body of work. Offered by School of Art. Limited to three attempts.

**Registration Restrictions:**
Required Prerequisite: AVT 435\(^C\).
\(^C\) Requires minimum grade of C.

**Schedule Type:** Studio

**Grading:**
This course is graded on the Undergraduate Regular scale.

**AVT 437: Advanced Painting V.** 3 credits. Students continue to develop an independent studio practice in advanced painting. Employing rigorous concepts, presentation strategies, and in-depth critique, students develop independent projects into a cohesive body of work. Offered by School of Art. Limited to three attempts.

**Registration Restrictions:**
Required Prerequisite: AVT 436\(^C\).
\(^C\) Requires minimum grade of C.

**Schedule Type:** Studio

**Grading:**
This course is graded on the Undergraduate Regular scale.
This course is graded on the Undergraduate Regular scale.

**AVT 442: Printmaking III.** 3 credits.

An intermediate print media course with an emphasis on a wider variety of tools and concepts that investigate photo-based imagery and advance personal narrative. Offered by School of Art. Limited to three attempts.

**Registration Restrictions:**
- **Required Prerequisite:** AVT 343<sup>C</sup>.
  - Requires minimum grade of C.

**Schedule Type:** Studio

**Grading:**
- This course is graded on the Undergraduate Regular scale.

**AVT 443: Printmaking IV.** 3 credits.

An advanced print media course that uses hand-drawn, digital, and photo-based imagery. Students explore traditional and new printmaking techniques in a series of related prints and explore their relevancy to contemporary printmaking. Offered by School of Art. Limited to three attempts.

**Registration Restrictions:**
- **Required Prerequisite:** AVT 442<sup>C</sup>.
  - Requires minimum grade of C.

**Schedule Type:** Studio

**Grading:**
- This course is graded on the Undergraduate Regular scale.

**AVT 444: Printmaking V.** 3 credits.

Advanced print media course incorporating three-dimensional applications of hand printmaking. Students develop concepts in digital printmaking, book making, sculptural prints, and installation works. Explores issues in contemporary printmaking through critical discussions, reading, and writing assignments. Offered by School of Art. Limited to three attempts.

**Registration Restrictions:**
- **Required Prerequisite:** AVT 443<sup>C</sup>.
  - Requires minimum grade of C.

**Schedule Type:** Studio

**Grading:**
- This course is graded on the Undergraduate Regular scale.

**AVT 453: Professional Practices.** 3 credits.

This course prepares studio art majors for their professional careers. Each student will select a facet of interest to develop assets for a professional portfolio. Emphasis will be placed on developing your professional brand and accompanying materials such as portfolio, websites, CVs etc. with critiques focusing on the individual's process. Offered by School of Art. Limited to three attempts.

**Recommended Prerequisite:** Completion of 60 credits, including 12 credits of upper-level studio coursework.

**Schedule Type:** Lecture

**Grading:**
- This course is graded on the Undergraduate Regular scale.

**AVT 454: Alternative Photo Processes.** 3 credits.

Introduction to 19th century and nontraditional photographic processes including cyanotype, van dyke, gum bichromate, liquid emulsion, and image transfer. Exploration and discussion of photography's influences, application, and use in other mediums. Offered by School of Art. Limited to three attempts.

**Schedule Type:** Studio

**Grading:**
- This course is graded on the Undergraduate Regular scale.

**AVT 455: Digital Printing Techniques.** 3 credits.

Continuation of 354 Digital Photo Methods with further examination into digital techniques, personal expression and digital printing. Course emphasis is on the fine art and craft of the digital print and portfolio development. Notes: Continuation of AVT 354 Offered by School of Art. Limited to three attempts.

**Recommended Prerequisite:** AVT 354, or permission of instructor.

**Schedule Type:** Studio

**Grading:**
- This course is graded on the Undergraduate Regular scale.

**AVT 457: Documentary Photography.** 3 credits.

Introduces documentary photography: techniques, history, choices, and ideas necessary to create meaningful photo essays that incorporate a personal, committed, in-depth approach to seeing and depicting lives and situations. Offered by School of Art. Limited to three attempts.

**Recommended Prerequisite:** AVT 353 or permission of instructor.

**Schedule Type:** Studio

**Grading:**
- This course is graded on the Undergraduate Regular scale.

**AVT 458: Advanced Studio Lighting.** 3 credits.

The advanced study of photographic studio lighting concepts using electronic strobes and power packs with emphasis placed on constructing studio materials, metering techniques, staging complex sets, and on-location photography. Offered by School of Art. Limited to three attempts.

**Registration Restrictions:**
- **Required Prerequisite:** AVT 356<sup>C</sup>.
  - Requires minimum grade of C.

**Schedule Type:** Studio

**Grading:**
- This course is graded on the Undergraduate Regular scale.

**AVT 462: Sculpture III.** 3 credits.

Advanced studio course for continued individual, conceptual, and critical development in sculpture. Biweekly seminar, independent research, museum and gallery visits, vigorous individual and group critiques, required documentation, and portfolio preparation supporting studio projects. Offered by School of Art. Limited to three attempts.

**Registration Restrictions:**
- **Required Prerequisite:** AVT 363<sup>C</sup>.
  - Requires minimum grade of C.
**Schedule Type:** Studio

**Grading:**
This course is graded on the Undergraduate Regular scale.

**AVT 463: Sculpture IV.** 3 credits.
Intensive studio course for advanced sculpture students to further individual, conceptual, and critical development. Students produce a body of work based on technical exploration, critical discussion, reading, and writing. Offered by School of Art. Limited to three attempts.

**Registration Restrictions:**
Required Prerequisite: AVT 462C.
C Requires minimum grade of C.

**Schedule Type:** Studio

**Grading:**
This course is graded on the Undergraduate Regular scale.

**AVT 464: Sculpture V.** 3 credits.
Advanced studio course for rigorous and independent production of sculpture. Weekly topical seminar, vigorous critiques, museum and gallery visits, professional documentation, and research resulting in a body of work to be exhibited. Offered by School of Art. Limited to three attempts.

**Registration Restrictions:**
Required Prerequisite: AVT 463C.
C Requires minimum grade of C.

**Schedule Type:** Studio

**Grading:**
This course is graded on the Undergraduate Regular scale.

**AVT 465: Sculpture VI.** 3 credits.
Students work rigorously and independently, gaining insights into personal process and direction through one-on-one critical dialogue with faculty and formal group critiques. Emphasizes individual decision making and personal initiative. Notes: Continuation of advanced work in AVT 465. Offered by School of Art. Limited to three attempts.

**Registration Restrictions:**
Required Prerequisite: AVT 464C.
C Requires minimum grade of C.

**Schedule Type:** Studio

**Grading:**
This course is graded on the Undergraduate Regular scale.

**AVT 466: Critical Theory in the Visual Arts.** 3 credits.
Examination of currents in theory and criticism that inform contemporary practice and critical analysis in the visual arts. Offered by School of Art. Limited to three attempts.

**Registration Restrictions:**
Required Prerequisite: ARTH 374C.
C Requires minimum grade of C.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale.

**AVT 472: Advanced Performance Studio.** 3 credits.

**Recommended Prerequisite:** AVT 373 or Permission of Instructor.

**Schedule Type:** Studio

**Grading:**
This course is graded on the Undergraduate Regular scale.

**AVT 473: Sound Art II.** 3 credits.
Extends a working knowledge of the materiality of sound into an in-depth exploration of creation in the sonic realm. May include synthesis, circuit-bending, use of field recordings and other samples, and live performance. Offered by School of Art. Limited to three attempts.

**Schedule Type:** Studio

**Grading:**
This course is graded on the Undergraduate Regular scale.

**AVT 474: Digital Media and Web Design Capstone.** 3 credits.
Student team-based experience grounded in the work of the preceding courses in the digital media and web design minor. Each individual student will produce a portfolio of digital media and web design related products and features that demonstrate core competencies in coding, design, content, and accessibility. Students will work in cross-disciplinary teams to carry out a client-based web design project, the process and outcomes of which will also be represented in the individual portfolio. Offered by School of Art. Limited to two attempts. Equivalent to ENGH 479.

**Recommended Prerequisite:** Before enrolling in the Capstone seminar, students need to have completed all required courses for the Digital Media and Web Design Minor.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale.

**AVT 482: Advanced Image Making.** 3 credits.
In-depth look at the processes and mechanisms used to generate, reconstruct, and/or create new media images. Students are required to create a series of contextually related images and to further develop their critical analysis abilities. Offered by School of Art. Limited to three attempts.

**Recommended Prerequisite:** AVT 280, or permission of instructor.

**Schedule Type:** Studio

**Grading:**
This course is graded on the Undergraduate Regular scale.

**AVT 483: RS: Art and Interactivity.** 3 credits.
Provides a context for art making as an interactive and participatory experience while critically examining the ways in which technologies may aid and also inhibit engagement with the social and political world. Offered by School of Art. Limited to three attempts.
Recommended Prerequisite: Research/Scholarship Intensive

Schedule Type: Studio

Grading:
This course is graded on the Undergraduate Regular scale.

AVT 487: Advanced Topics: New Media Art. 3 credits. Provides a context for exploring current developments in new media art practice in and outside the studio. Specific course content adapts and responds to ongoing movements in new media art and contemporary culture. Offered by School of Art. May be repeated within the term for a maximum 9 credits.

Specialized Designation: Topic Varies

Recommended Prerequisite: AVT 280 plus one 3XX-level New Art Course, or permission of instructor.

Schedule Type: Studio

Grading:
This course is graded on the Undergraduate Regular scale.

AVT 489: Internship in Art and Visual Technology. 1-6 credits. Unpaid professional-level work experience in a professional organization or with an individual artist, related to the student’s concentration and career plans. Students must complete 45 hours of work at the internship site for each credit. Note: departmental permission required to register. Notes: Placement documentation to include 45 hours of work per credit. Offered by School of Art. May be repeated within the degree for a maximum 12 credits.

Recommended Prerequisite: Senior standing, completion of 12 concentration credits, and permission of instructor.

Schedule Type: Internship

Grading:
This course is graded on the Undergraduate Regular scale.

AVT 491: Independent Study in Art and Visual Technology. 1-6 credits. Opportunity for development of advanced skills and concepts in a field of interest. Study proposal must be approved by instructor prior to registration. Students must complete 45 hours of work at the internship site for each credit. Notes: Project documentation to include 45 hours of work per credit. Offered by School of Art. May be repeated within the term for a maximum 24 credits.

Recommended Prerequisite: Senior standing, completion of 12 concentration credits, and permission of instructor.

Schedule Type: Independent Study

Grading:
This course is graded on the Undergraduate Regular scale.

AVT 493: Teaching Visual Thinking Through Media, PK-12. 3 credits. Investigates range and appropriateness of media and materials that encourage creative expression in the art classroom for PK-12 students, and expands the artist-teacher’s visual repertoire. Incorporates art history, criticism, and aesthetics, as well as language arts and other content areas that challenge students’ artistic growth and human development. Offered by School of Art. Limited to three attempts.

Registration Restrictions:

Required Prerequisite: AVT 495. Requires minimum grade of C.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale.

AVT 494: Strategies in Art Room: PK-12. 3 credits. The study of various media, skills and concepts adapted for PK-12 education advisor.

Registration Restrictions:

Required Prerequisite: AVT 495. Requires minimum grade of C.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale.

AVT 495: Introduction to Art Teaching and Learning. 3 credits. Explores art-teaching profession through readings, discussion, hands-on activities, and visits to diverse area public schools. Students discover a variety of ways that art is taught and evaluated to meet multiple educational needs of today’s PK-12 students. Notes: Prior to enrollment, students must complete art education inquiry form. Offered by School of Art. Limited to three attempts.

Recommended Prerequisite: Junior standing, and completion of at least 20 credits of AVT coursework with a C or higher; or permission of art

Registration Restrictions:

Required Prerequisites: (ENGH 302 and AVT 307). Requires minimum grade of C.

Schedule Type: Seminar

Grading:
This course is graded on the Undergraduate Regular scale.

AVT 496: Special Topics. 1-4 credits. Explores topical studies in AVT including theoretical and critical aspects of art or studio production. Notes: Topics and credit vary with instructor. May be repeated when taken under different topics. Offered by School of Art. May be repeated within the degree.

Specialized Designation: Topic Varies

Schedule Type: Studio

Grading:
This course is graded on the Undergraduate Regular scale.

AVT 497: Senior Project. 3 credits. Capstone course in which students develop and present a cohesive body of work along with written materials and documentation. Students participate in critiques with visiting artists or AVT faculty and in workshops supporting professional goals. Offered by School of Art. Limited to three attempts.

Mason Core: Capstone, Synthesis
Recommended Prerequisite: Senior Art and Visual Technology major, completion of 12 concentration credits, and completion or concurrent enrollment in all required Mason Core courses.

Schedule Type: Studio

Grading:
This course is graded on the Undergraduate Regular scale.

AVT 498: Senior Design Project. 3 credits.
Capstone course in which students develop and present a design project exploring the possibilities of personal or professional expression. Students participate in critiques with visiting artists or AVT faculty and in workshops supporting professional goals. Offered by School of Art. Limited to three attempts.

Mason Core: Capstone, Synthesis

Recommended Prerequisite: Senior Art and Visual Technology major.

Registration Restrictions:
Required Prerequisites: AVT 311C, 313C and 414C.
C Requires minimum grade of C.

Schedule Type: Studio

Grading:
This course is graded on the Undergraduate Regular scale.

500 Level Courses

AVT 507: Advanced Aesthetics. 3 credits.
Graduate seminar in aesthetic concepts and theories, focusing on issues pertinent to artmaking. Offered by School of Art. May not be repeated for credit.

Recommended Prerequisite: Admission to the MFA program or permission of instructor.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale.

AVT 519: Special Topics in Graphic Design. 1-6 credits.
Exploration of topical studies in graphic design, including theoretical and critical aspects of studio production. Offered by School of Art. May be repeated within the term for a maximum 13 credits.

Specialized Designation: Topic Varies

Recommended Prerequisite: Admission to AVT graduate program or permission of instructor.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

AVT 522: Drawing V. 4 credits.
Drawing on an advanced level, emphasizing individual decision-making and personal initiative. Offered by School of Art. May not be repeated for credit.

Recommended Prerequisite: Admission to the AVT graduate program, or permission of instructor.

AVT 523: Drawing VI. 4 credits.
Drawing on an advanced level, emphasizing individual decision-making and personal initiative. Offered by School of Art. May not be repeated for credit.

Recommended Prerequisite: Admission to the AVT graduate program, AVT 522, or permission of instructor.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Studio

Grading:
This course is graded on the Graduate Regular scale.

AVT 595: Introduction to Art Teaching and Learning. 3 credits.
Explores art-teaching profession through readings, discussion, hands-on activities, visits to diverse area public schools and action research. Students analyze ways that art is taught and evaluated to meet multiple educational needs of today's PK-12 students. Offered by School of Art. May not be repeated for credit.

Recommended Prerequisite: Admission to the MAT Program or permission of the art education advisor or director.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Seminar

**Grading:**
This course is graded on the Graduate Regular scale.

**AVT 596: Independent Study.** 1-6 credits.
Independent reading and research on specific project under department faculty member's direction. Notes: Written reports required. Offered by School of Art. May be repeated within the term.

**Recommended Prerequisite:** Admission to AVT graduate program or permission of instructor.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Independent Study

**Grading:**
This course is graded on the Graduate Regular scale.

**AVT 599: Special Topics in Art and Visual Technology.** 1-6 credits.
Exploration of topical studies in AVT, including theoretical and critical aspects of art or studio production. Notes: Topics and credit vary with instructor. May be repeated when taken under different topics. Offered by School of Art. May be repeated within the term.

**Specialized Designation:** Topic Varies

**Recommended Prerequisite:** Admission to the AVT graduate program or permission of instructor.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

**AVT 600: Research Methodologies.** 3 credits.
Graduate seminar focusing on development of independent research project in student's area of emphasis. Explores principal methods of researching and documenting art and arts practice. Along with traditional methods of library research, emphasizes new processes of examination and investigation through the use of computer-aided research systems. Offered by School of Art. May not be repeated for credit.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to students with a major in Art Education, Art and Visual Technology, Graphic Design or Visual and Performing Arts.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Seminar

**Grading:**
This course is graded on the Graduate Regular scale.

**AVT 605: Issues and Research in Art Education.** 3 credits.
Readings and projects explore historical and contemporary ideas, issues, philosophies, pedagogy, and research in art education. Investigates teachers' use of research-oriented questions and data to explore classroom issues and improve teaching and learning. Offered by School of Art. May not be repeated for credit.

**Recommended Prerequisite:** Admission to the MAT graduate program and permission of instructor.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

**AVT 606: Creativity and Cognition in the Arts and Media.** 3 credits.
Focuses on research on cognition, development, learning, and creativity in the visual arts and media in formal and informal educational settings. Offered by School of Art. May not be repeated for credit. Equivalent to EDEP 601.

**Recommended Prerequisite:** Admission to the AVT graduate program or permission of instructor.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Seminar

**Grading:**
This course is graded on the Graduate Regular scale.

**AVT 610: Graduate Seminar.** 2 credits.
Students present their work or the work of contemporary artists for discussion and peer and faculty critiques. Special focus on developing
public communication and presentation skills on contemporary issues in the arts. Notes: Seminar course required of all AVT graduate students four times during course of study. Offered by School of Art. May be repeated within the degree for a maximum 8 credits.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to students with a major in Art Education, Art and Visual Technology, Graphic Design or Visual and Performing Arts.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Seminar

Grading:
This course is graded on the Graduate Regular scale.

AVT 611: Graduate Design Seminar. 1 credit.
A laboratory for the exploration of contemporary design theory and practice through writing and design making, this class will have rotating topical content. Offered by School of Art. May be repeated within the degree for a maximum 3 credits.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to students with a major in Art and Visual Technology, Graphic Design or Visual and Performing Arts.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Seminar

Grading:
This course is graded on the Graduate Regular scale.

AVT 612: Independent Project Research. 1 credit.
Provides the development and research phase in preparation for AVT 794: Independent Design Project, the capstone course in the Graphic Design masters program. Students will prepare their written final project proposal for presentation to the AVT GD Graduate Faculty Committee. Notes: To be completed prior to enrolling in AVT 794: Independent Design Project. Offered by School of Art. May be repeated within the degree.

Recommended Prerequisite: completion of 30 graduate credits

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to students in the AR-MA-GD program.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Independent Study

Grading:
This course is graded on the Graduate Special scale.

AVT 613: Experiential Design History. 3 credits.
This hybrid lecture/studio course provides a historical perspective of the evolution of graphic design and examines graphic design's contribution to culture through writing and design projects. The course will have both lecture and studio content, providing hands-on experiential opportunities in traditional graphic techniques. Offered by School of Art. May not be repeated for credit.

Recommended Prerequisite: Admission to the AVT graduate program or permission of the instructor.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale.

AVT 614: Brand Identity Design. 4 credits.
This is an advanced design course with an emphasis on brand identity development. Topics include logo development, product packaging, marketing and advertising collaterals, web branding, and broadcast advertising development. Special attention is given to the creation of a graphic standards guide. Offered by School of Art. May not be repeated for credit.

Recommended Prerequisite: Admission to the AVT graduate program or permission of instructor.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Studio

Grading:
This course is graded on the Graduate Regular scale.

AVT 615: Technology for Art Teachers. 3 credits.
Addresses use of technology in PK-12 art classroom. Focuses on research, presentation and instruction, and image creation. Students develop technology-enhanced teaching units for different grade levels and explore related issues, including copyright, plagiarism, and appropriation. Offered by School of Art. May not be repeated for credit.

Recommended Prerequisite: Admission to the Art Education concentration ASTL and/or permission of art education director.

Registration Restrictions:
Enrollment limited to students with a class of Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

**AVT 616: Advanced Art and Interactivity. 4 credits.**
Studio, lecture course investigating art as networked activity. Particular attention focused on Internet as context for creation, distribution, and patronage of art. Offered by School of Art. May not be repeated for credit.

**Recommended Prerequisite:** Admission to AVT graduate program.

**Registration Restrictions:**
Enrollment limited to students with a class of Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Studio

**Grading:**
This course is graded on the Graduate Regular scale.

**AVT 617: Advanced Typography. 4 credits.**
Students will produce a body of work exploring the opportunities and limitations of typographical design. Offered by School of Art. May not be repeated for credit.

**Recommended Prerequisite:** Admission to graphic design MA (or MFA) program, AVT graduate program or permission of the instructor.

**Registration Restrictions:**
Enrollment limited to students with a class of Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Studio

**Grading:**
This course is graded on the Graduate Regular scale.

**AVT 618: Visual Communication Theories. 2 credits.**
Advanced graduate seminar focusing on key theories and themes that have informed 20th and 21st century design practice. Explores theory and criticism in a variety of contexts, from popular to scholarly, and considers the role of designers as thinkers and writers. Offered by School of Art. May not be repeated for credit.

**Recommended Prerequisite:** Admission to MFA program, or permission of instructor.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

**AVT 619: Advanced Web Design. 4 credits.**
Develops skills for the application of information, interaction, usability, and visual design for web site developments. Students gain in-depth knowledge of user behaviors and broader context of social, cultural, and contemporary issues in web communication. Students learn professional design processes and integrate multiple web developing technologies. Offered by School of Art. May not be repeated for credit.

**Recommended Prerequisite:** Admission to Graphic Design MA program or permission of instructor.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Studio

**Grading:**
This course is graded on the Graduate Regular scale.

**AVT 620: Theory, Criticism, and the Arts. 3 credits.**
Cross-disciplinary graduate seminar focusing on key theories and themes that have informed 20th- and 21st-century arts practice. Explores theory and criticism in a variety of contexts, from popular to scholarly, and considers the role of artists as thinkers and writers. Offered by School of Art. May not be repeated for credit.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to students with a major in Art Education, Art and Visual Technology, Graphic Design or Visual and Performing Arts.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

**AVT 621: Art Writing Seminar. 3 credits.**
Includes criticism, the artist statement, manifestos, and language as visual art. Offered by School of Art. May not be repeated for credit.

**Recommended Prerequisite:** Admission to MFA program, or permission of instructor.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment limited to students in the AR-MFA-AVT or AR-MFA-VPA programs.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

**AVT 622: Advanced Drawing.** 4 credits.
Advanced directed research in drawing with continued development of individual aesthetic. Study of historical and philosophical precedents integral. Offered by School of Art. May not be repeated for credit.

**Recommended Prerequisite:** Admission to the AVT graduate program, or permission of instructor.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Studio

**Grading:**
This course is graded on the Graduate Regular scale.

**AVT 632: Graduate Painting I.** 4 credits.
Entering students are expected to be competent painters, with technical proficiency, a disciplined process, and a directed personal vision. Students work rigorously and independently toward the understanding and mastery of techniques, methods, and concepts relevant to formal expression of personal content. Students expected to participate in critical discourse with supervising faculty. Achievement measured by faculty review board at mid-semester and term's end. Offered by School of Art. May not be repeated for credit.

**Recommended Prerequisite:** AVT 632, or permission of instructor.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Studio

**Grading:**
This course is graded on the Graduate Regular scale.

**AVT 634: Advanced Graduate Painting I.** 4 credits.
Working independently on a cohesive body of work, students must demonstrate a thorough understanding and mastery of techniques, methods, and concepts relevant to their own practices, and be able to discuss their work within the context of historical and contemporary art practices. Progress tracked and assessed through periodic one-on-one critical discussions with supervising faculty. Achievement measured by faculty review board at mid-semester and term's end. Offered by School of Art. May not be repeated for credit.

**Recommended Prerequisite:** AVT 633, or permission of instructor.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Studio

**Grading:**
This course is graded on the Graduate Regular scale.

**AVT 635: Advanced Graduate Painting II.** 4 credits.
Advanced independent studio production. Progress tracked and assessed through periodic critical discussions with supervising faculty. Achievement measured by faculty review board at mid-semester and end of term. Offered by School of Art. May not be repeated for credit.

**Recommended Prerequisite:** AVT 634, or permission of instructor.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.
Schedule Type: Studio

Grading:
This course is graded on the Graduate Regular scale.

AVT 641: Graduate Graphic Design I. 4 credits.
Working independently on a cohesive body of work, students must demonstrate a thorough understanding and mastery of techniques, methods, and concepts relevant to their own practices, and be able to discuss their work within the context of historical and contemporary design practices. Progress tracked and assessed through periodic one-on-one critical discussions with supervising faculty. Achievement measured by faculty review board at term's end. Offered by School of Art. May not be repeated for credit.

Recommended Prerequisite: Admission to MFA program.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Independent Study

Grading:
This course is graded on the Graduate Regular scale.

AVT 642: Graduate Printmaking I. 4 credits.
Directed research and practice in printmaking focuses on individualized development of content and technique. Explores intellectual and expressive aspects of printmaking process. Offered by School of Art. May not be repeated for credit.

Recommended Prerequisite: Admission to the AVT graduate program, or permission of instructor.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Studio

Grading:
This course is graded on the Graduate Regular scale.

AVT 643: Graduate Printmaking II. 4 credits.
Directed research and practice in printmaking focuses on individualized development of content and technique. Explores intellectual and expressive aspects of printmaking process. Offered by School of Art. May not be repeated for credit.

Recommended Prerequisite: AVT 642, or permission of instructor.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Independent Study

Grading:
This course is graded on the Graduate Regular scale.

AVT 644: Advanced Graduate Printmaking I. 4 credits.
Intensive studio course that furthers students' independence through production of individualized body of work reflecting interests within the broader contexts of contemporary social, cultural, and historical issues. Students also engage in collaborative studio practices to integrate visual technologies in their work. These may include digital imaging, drawing, graphic design, painting, performance, photography, and sculpture. Offered by School of Art. May not be repeated for credit.

Recommended Prerequisite: Admission to the AVT graduate program, AVT 643, or permission of instructor.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Studio

Grading:
This course is graded on the Graduate Regular scale.

AVT 645: Advanced Graduate Printmaking II. 4 credits.
Intensive studio course that furthers student independence through production of a body of work reflecting a broad context of social, cultural and contemporary issues. Offered by School of Art. May not be repeated for credit.

Recommended Prerequisite: Admission to MFA program, and AVT 644.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Independent Study

Grading:
This course is graded on the Graduate Regular scale.

AVT 646: Graduate Graphic Design II. 4 credits.
Continuing to work independently on a cohesive body of work, students must demonstrate a thorough understanding and mastery of techniques, methods, and concepts relevant to their own practices, and be able to discuss their work within the context of historical and contemporary art and design practices. Progress tracked and assessed through periodic one-on-one critical discussions with supervising faculty. Achievement measured by faculty review board at term's end. (This is the second
course in a two-course sequence.) Offered by School of Art. May not be repeated for credit.

**Recommended Prerequisite:** Admission to MFA program.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Independent Study

**Grading:**
This course is graded on the Graduate Regular scale.

**AVT 647:** Advanced Graduate Graphic Design I. 4 credits.
Working independently on a cohesive body of work, students must demonstrate a thorough understanding and mastery of techniques, methods, and concepts relevant to their own practices, and be able to discuss their work within the context of historical and contemporary design practices. Progress tracked and assessed through periodic one-on-one critical discussions with supervising faculty. Achievement measured by faculty review board at term's end. Offered by School of Art. May not be repeated for credit.

**Recommended Prerequisite:** Admission to MFA program, and AVT 646

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Independent Study

**Grading:**
This course is graded on the Graduate Regular scale.

**AVT 648:** Advanced Graphic Design II. 4 credits.
Continuing to work independently on a cohesive body of work, students must demonstrate a thorough understanding and mastery of techniques, methods, and concepts relevant to their own practices, and be able to discuss their work within the context of historical and contemporary art and design practices. Progress tracked and assessed through periodic one-on-one critical discussions with supervising faculty. Achievement measured by faculty review board at term's end. (This is the second course in a two course sequence.) Offered by School of Art. May not be repeated for credit.

**Recommended Prerequisite:** Admission to MFA program, and AVT 647.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Independent Study

**Grading:**
This course is graded on the Graduate Regular scale.

**AVT 652:** Graduate Photography I. 4 credits.
Critical theory and directed practice in photography focusing on development of a personal voice and working method through intellectual activity and creative work. Emphasizes ability to explore concepts, develop skills, and evolve as a communicator of ideas and photographic artist. Offered by School of Art. May not be repeated for credit.

**Recommended Prerequisite:** Admission to the AVT graduate program, or permission of instructor.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Studio

**Grading:**
This course is graded on the Graduate Regular scale.

**AVT 653:** Graduate Photography II. 4 credits.
An intensive critique class concentrating on the development of creative work with emphasis on articulating responses to others' work, the cultural climate, and issues involved in one's own work as it progresses. Notes: Continuation of Graduate Photography I. Weekly classes share equal time with critical theory and hands-on studio work. Includes readings, visiting artists and lecturers, and field trips. Offered by School of Art. May not be repeated for credit.

**Recommended Prerequisite:** Admission to the AVT graduate program, or permission of instructor.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Studio

**Grading:**
This course is graded on the Graduate Regular scale.

**AVT 654:** Advanced Graduate Photography I. 4 credits.
Intensive critique class concentrating on the development of creative work with emphasis on articulating responses to others' work, the cultural climate, and issues involved in one's own work as it progresses. Notes: Advanced graduate photography course. Weekly classes share equal time with critical theory and hands-on studio work. Includes readings, visiting artists and lecturers, and field trips. Offered by School of Art. May not be repeated for credit.

**Recommended Prerequisite:** Admission to the AVT graduate program, AVT 653, or permission of instructor.
Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Studio

Grading:
This course is graded on the Graduate Regular scale.

AVT 655: Advanced Graduate Photography II. 4 credits.
AVT 655, Advanced Graduate Photography II, Advanced independent studio production. Progress tracked and assessed through periodic critical discussions with supervising faculty. Achievement measured by faculty review board at mid-semester and end of term. Offered by School of Art. May not be repeated for credit.

Recommended Prerequisite: AVT 652, or permission of instructor.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Studio

Grading:
This course is graded on the Graduate Regular scale.

AVT 662: Graduate Sculpture I. 4 credits.
Intensive studio course that furthers student independence through production of a body of work reflecting interests, including a broader context of social, cultural, and contemporary issues. Emphasizes self-evaluation, critical discussion, reading, and writing. Offered by School of Art. May not be repeated for credit.

Recommended Prerequisite: Admission to the AVT graduate program, or permission of instructor.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Studio

Grading:
This course is graded on the Graduate Regular scale.

AVT 664: Advanced Graduate Sculpture I. 4 credits.
Advanced independent studio production. Progress tracked and assessed through periodic critical discussions with supervising faculty. Achievement measured by faculty review board at mid-semester and end of term. Offered by School of Art. May not be repeated for credit.

Recommended Prerequisite: Admission to the AVT graduate program, AVT 663, or Permission of Instructor.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Studio

Grading:
This course is graded on the Graduate Regular scale.

AVT 665: Advanced Graduate Sculpture II. 4 credits.
Advanced independent studio production. Progress tracked and assessed through periodic critical discussions with supervising faculty. Achievement measured by faculty review board at mid-semester and end of term. Offered by School of Art. May not be repeated for credit.

Recommended Prerequisite: AVT 664 or permission of the instructor.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Studio

Grading:
This course is graded on the Graduate Regular scale.
AVT 667: **Two-Dimensional Art Making and Differentiated Instruction.** 3 credits.
Through studio work and research on basic and innovative drawing strategies, students explore expressive visual qualities, composition, and color. Students develop professional portfolios that incorporate meaningful themes and contexts for developing visual literacy in PK-12. Offered by School of Art. May not be repeated for credit.

**Recommended Prerequisite:** Admission to the MAT in Art Education program and permission of instructor based on a portfolio review.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Studio

**Grading:**
This course is graded on the Graduate Regular scale.

AVT 668: **Three-Dimensional Art Making Across Cultures.** 3 credits.
Explores the diversity of art forms in world cultures and work of traditional and contemporary artists. Students learn basic three-dimensional art-making techniques, including ceramics and fibers, and learn to design three-dimensional art instruction for PK-12 levels. Offered by School of Art. May not be repeated for credit.

**Recommended Prerequisite:** Admission to the MAT program or Art Education Concentration ASTL and/or permission of the art education director.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Studio

**Grading:**
This course is graded on the Graduate Regular scale.

AVT 669: **Four Dimensional Art Making: Technology and New Media.** 4 credits.
Develops teacher skills for the application of advanced technology for the PK-12 art program and examines the changing nature and uses of technology for expanding visual literacy through pedagogical strategies. Offered by School of Art. May not be repeated for credit.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Studio

**Grading:**
This course is graded on the Graduate Regular scale.

AVT 670: **Teaching Practicum.** 1 credit.
Supervised classroom teaching practicum in Mason's undergraduate program or community college program. Offered by School of Art. May be repeated within the degree for a maximum 4 credits.

**Recommended Prerequisite:** Admission to the AVT graduate program or permission of instructor.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Seminar

**Grading:**
This course is graded on the Graduate Special scale.

AVT 672: **Performance Studio I.** 4 credits.
Introductory studio course looking at performance as a visual art practice and focusing on time, space and the body. Emphasizes artist as performer. Students study the work of performance practitioners, make short performance pieces, document and exhibit their work, and go to galleries and performances locally and in New York. Notes: Substantial research project required. Offered by School of Art. May not be repeated for credit.

**Recommended Prerequisite:** Admission to AVT graduate program or permission of instructor.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Studio

**Grading:**
This course is graded on the Graduate Regular scale.

AVT 674: **Advanced Performance Studio.** 4 credits.
Advanced laboratory for creating and producing performance art. Emphasizes new technologies and their applications, multimedia scriptwriting and storyboarding, and the creation of audiovisual performance. Students work independently and also contribute to collaborative production. Offered by School of Art. May not be repeated for credit.

**Recommended Prerequisite:** AVT 673 or permission of instructor.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.
Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Studio

**Grading:**
This course is graded on the Graduate Regular scale.

**AVT 676: Graduate Sound Art.** 4 credits.
Assuming basic competency in digital audio production and within the theory of sounded experience, students will be assisted in the incorporation of sonic material into their graduate research projects. Offered by School of Art. May not be repeated for credit.

**Recommended Prerequisite:** Admission to the AVT graduate program, or permission of instructor.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Studio

**Grading:**
This course is graded on the Graduate Regular scale.

**AVT 678: Interface and CD-ROM Design.** 5 credits.
Combined lecture and studio course in multimedia interface and CD-ROM design. Focuses on exporting traditional visual and aural artistic aesthetic to the computer environment within a multimedia context. Assigned class readings augmented and supported by presentations of various digital interfaces and CD-ROM examples. Discusses commercial, entertainment, and educational titles, as well as CD-ROM experimental art works. Studio time divided between AVT labs and area multimedia facilities. Students conceive, design, and develop two CD-ROM or kiosk interfaces due at midterm, and complete a dual platform CD-ROM project due at semester end. Offered by School of Art. May not be repeated for credit.

**Recommended Prerequisite:** Admission to the AVT graduate program or permission of instructor.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Studio

**Grading:**
This course is graded on the Graduate Regular scale.

**AVT 682: Experimental 2D Animation.** 4 credits.
Designed to broaden range of visually expressive, time-based media from cell animation and stop motion animation to rotoscoping and two-dimensional digital animation. Emphasizes idea generation, concept development, and visual aesthetics. Offered by School of Art. May not be repeated for credit.

**Recommended Prerequisite:** Admission to the AVT graduate program, or permission of instructor.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Studio

**Grading:**
This course is graded on the Graduate Regular scale.

**AVT 684: Advanced Image Making.** 4 credits.
Overview of two-dimensional computer-imaging applications in the arts, including painting, printmaking, mixed media, illustration, video, and animation. Lectures combine technical and aesthetic material, including image processing for artists and color reproduction. Emphasis on developing advanced studio portfolio. Offered by School of Art. May not be repeated for credit.

**Recommended Prerequisite:** Admission to AVT Graduate Program.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Studio

**Grading:**
This course is graded on the Graduate Regular scale.

**AVT 685: Video Art.** 4 credits.
Explores video as medium that is transforming art and is transformed by art. Emphasizes developing an approach to personal narrative, creative skills, and construction of meaning, as well as on acquiring technical skills. Offered by School of Art. May not be repeated for credit.

**Recommended Prerequisite:** Admission to the AVT graduate program, or permission of instructor.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Studio

**Grading:**
This course is graded on the Graduate Regular scale.
AVT 686: Experimental 3D Animation. 4 credits.
Teaches how to create realistic, three-dimensional scenes with scaled objects, surface textures, lights, and shadows. Emphasizes idea generation, concept development, visual aesthetics, and technical abilities. Students required to render a portfolio of high-resolution images. Offered by School of Art. May not be repeated for credit.

Recommended Prerequisite: Admission to AVT Graduate Program.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Studio

Grading:
This course is graded on the Graduate Regular scale.

AVT 687: Advanced Topics: New Media. 4 credits.
Advanced course in digital media, including layer compositing, digital video editing, rotoscoping, and cell animation. Emphasizes integrating traditional techniques with software applications; and publishing projects to CD-ROM, DV tape, DVD, and Internet. Offered by School of Art. May not be repeated for credit.

Specialized Designation: Topic Varies

Recommended Prerequisite: Admission to the AVT program, or permission of instructor.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Studio

Grading:
This course is graded on the Graduate Regular scale.

AVT 688: Hybrid Animation. 4 credits.
Study of digital two-dimensional and three-dimensional animation practices. Introduces lighting, camera movement, object motion, timing, and texture mapping as students plan and produce a short animation. Emphasizes idea generation, concept development, visual aesthetics, and technical abilities. Offered by School of Art. May not be repeated for credit.

Recommended Prerequisite: Admission to the AVT graduate program, or permission of instructor.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Studio

Grading:
This course is graded on the Graduate Regular scale.

AVT 691: Elementary Art Education. 3 credits.
Concepts and methods in early childhood and elementary art education. Notes: Students spend three hours per week in class and one hour per week in required field experience in public schools and other educational settings. Offered by School of Art. May not be repeated for credit.

Recommended Prerequisite: Admission to the MAT program and permission of instructor.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale.

AVT 692: Secondary Art Education. 3 credits.
Concepts and methods in secondary art education. Notes: Students spend three hours per week in class, and one hour per week in required field experience in the public schools and other educational settings. Offered by School of Art. May not be repeated for credit.

Recommended Prerequisite: AVT 691, or permission of the instructor.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale.

AVT 694: Advanced Studies in Teaching Critical Response to Art, PK-12. 3 credits.
Develops visual literacy and critical thinking skills by examining diverse theoretical models and applying strategies to expand knowledge about art and artifacts in the PK-12 classroom and museum. Offered by School of Art. May not be repeated for credit.

Recommended Prerequisite: Admission to the Art Education concentration ASTL and/or permission of the art education director.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.
Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Seminar

Grading: This course is graded on the Graduate Regular scale.

AVT 695: Internship in Art Education (Student Teaching). 5 credits. Full-time internship in which students teach in elementary and secondary schools with guidance from cooperating mentor teachers. College supervisors make periodic site visits to observe, assess, and evaluate progress. Offered by School of Art. May not be repeated for credit.

Recommended Prerequisite: Completion of all other MAT program requirements.

Recommended Corequisite: AVT 696.

Registration Restrictions: Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus. Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Internship

Grading: This course is graded on the Satisfactory/No Credit scale.

AVT 696: Internship in Art Education Seminar. 1 credit. Weekly professional seminar focused on needs and concerns of student teachers. Covers issues as they emerge in practice, and concludes with an "Art of Teaching Art" exhibit of work by students of preservice teachers. Offered by School of Art. May not be repeated for credit.

Recommended Corequisite: AVT 695.

Registration Restrictions: Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus. Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Seminar

Grading: This course is graded on the Satisfactory/No Credit scale.

AVT 697: Advanced Strategies and Curricular Innovations in the Visual Arts. 3 credits. Synthesizing knowledge and understandings gained in ASTL program, seminar focuses on innovative curriculum design, mastery of effective instructional strategies, and developing leadership potential for the field of visual art education. Offered by School of Art. May not be repeated for credit.

Recommended Prerequisite: Completion of all ASTL Art Education Concentration courses.

Registration Restrictions: Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus. Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Seminar

Grading: This course is graded on the Graduate Regular scale.

AVT 698: Independent Study/Directed Readings. 1-3 credits. Offered by School of Art. May be repeated within the degree for a maximum 6 credits.

Recommended Prerequisite: Admission to the MAT or Art Education Concentration (ASTL) and permission of art education director

Registration Restrictions: Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus. Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Independent Study

Grading: This course is graded on the Graduate Special scale.

700 Level Courses

AVT 794: Graphic Design Project. 4 credits. The capstone course in the graphic design Master of Arts degree. Provides for the independent development, design, production and presentation of a graduate-level design project guided by faculty and design professionals. Offered by School of Art. May not be repeated for credit.

Recommended Prerequisite: Admission to the AVT Graphic Design graduate program and completion of 30 graduate credits.

Registration Restrictions: Enrollment limited to Graduate level students.

Schedule Type: Independent Study

Grading: This course is graded on the Graduate Special scale.

AVT 796: Directed Reading. 1 credit. The development of independent research into the historical precedents, theoretical underpinnings, cultural forms, and idea territories pertinent to student's individual studio practice. Individualized section under the direction of division member. Notes: One of three courses comprising the MFA comprehensive experience for AVT students. Offered by School of Art. May not be repeated for credit.
Recommended Prerequisite: Admission to the AVT graduate program or permission of instructor.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Independent Study

Grading:
This course is graded on the Graduate Regular scale.

AVT 798: Directed Project and Exhibition. 1-6 credits.
The construction and presentation of a professional-quality public exhibition. Course includes significant independent studio production of a comprehensive body of work, leading to the MFA Thesis Exhibition. Exhibition must demonstrate student’s mastery of studio craft and concept. Individualized section under the direction of division member. Notes: One of three courses comprising the MFA comprehensive experience for AVT students. Offered by School of Art. May be repeated within the degree for a maximum 9 credits.

Recommended Prerequisite: Admission to the AVT graduate program or permission of instructor.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Thesis

Grading:
This course is graded on the Graduate Regular scale.

AVT 799: Thesis. 1-3 credits.
The written thesis informs, documents, and enhances the MFA thesis exhibition, which is the student’s primary creative research activity. The content of the written thesis may vary in accordance with artistic discipline and final exhibition. Individualized section under the direction of division member. Notes: One of three courses comprising the MFA comprehensive experience for AVT students. Offered by School of Art. May be repeated within the degree.

Recommended Prerequisite: Admission to the AVT graduate program or permission of instructor.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Thesis

Grading:
This course is graded on the Satisfactory/No Credit scale.

Art History (ARTH)

100 Level Courses

ARTH 101: Introduction to the Visual Arts. 3 credits.
Introduction to the content and principles of the visual arts. Approach varies with instructor. Offered by History & Art History. Limited to three attempts.

Mason Core: Arts

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale.

ARTH 102: Symbols and Stories in Art. 3 credits.
Introduces themes and imagery in art. Approaches and traditions to explore vary with the instructor. Offered by History & Art History. Limited to three attempts.

Mason Core: Arts

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale.

ARTH 103: Introduction to Architecture. 3 credits.
Introduces study, principle, and understanding of art of architecture. Approach varies with instructor; may be historical, geographical, technical, or thematic. Notes: Field trips required. Offered by History & Art History. Limited to three attempts.

Mason Core: Arts

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale.

ARTH 104: Design in the 20th Century. 3 credits.
This class will offer a chronological overview of the history of design in the 20th century, including industrial design, communication design, interior and landscape architecture, as well as corporate branding and new media from each period/major design movement. Topics discussed will include major design styles and movements, significant designers, manufacturers, and design-related companies, innovations in technology and material use, and the development of sales, marketing, and user-focused design. Offered by History & Art History. Limited to three attempts.

Mason Core: Arts

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale.

200 Level Courses

ARTH 200: History of Western Art I. 3 credits.
Major periods, monuments, and themes of Western art and architecture. Introduces Washington, D.C., museum collections and a historical framework for further study in art history. Covers prehistory, the ancient world, and the Middle Ages. Notes: Designed as a two-course sequence, but each part may be taken independently without prerequisite. Offered by History & Art History. Limited to three attempts.

Mason Core: Arts

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale.
ARTH 201: History of Western Art II. 3 credits.
Major periods, monuments, and themes of Western art and architecture. Introduces Washington, D.C., museum collections and a historical framework for further study in art history. Covers the art of the Renaissance, the baroque period, and modern Europe and the Americas. Notes: Designed as a two-course sequence, but each part may be taken independently without prerequisite. Offered by History & Art History. Limited to three attempts.

Mason Core: Arts
Schedule Type: Lecture
Grading:
This course is graded on the Undergraduate Regular scale.

ARTH 203: Survey of Asian Art. 3 credits.
Introduces the arts of South, Southeast, and east Asia. Examines aspects of the culture and history of Asia. Discusses monuments and artifacts in a variety of media and their relation to social and historical contexts. Offered by History & Art History. Limited to three attempts.

Mason Core: Arts
Specialized Designation: Non-Western Culture
Schedule Type: Lecture
Grading:
This course is graded on the Undergraduate Regular scale.

ARTH 204: Survey of Latin American Art. 3 credits.
Introduces arts of Latin America from pre-Columbian to modern era. Discusses important examples of painting, sculpture, and architecture in relation to culture and history of region. Offered by History & Art History. Limited to three attempts.

Mason Core: Arts
Specialized Designation: Non-Western Culture
Schedule Type: Lecture
Grading:
This course is graded on the Undergraduate Regular scale.

ARTH 206: Survey of African Art. 3 credits.
Introduces arts of Africa, from antiquity to the present day. Presents a variety of arts in relation to their historical and cultural contexts, and makes use of local museum resources. Offered by History & Art History. Limited to three attempts.

Mason Core: Arts
Specialized Designation: Non-Western Culture
Schedule Type: Lecture
Grading:
This course is graded on the Undergraduate Regular scale.

300 Level Courses
ARTH 303: National Traditions. 1-3 credits.
Studies traditions of art and architecture within a single selected country or historical region. Notes: May be repeated when topic is different.

Offered by History & Art History. May be repeated within the term for a maximum 6 credits.
Recommended Prerequisite: 24 hours or permission of instructor.
Schedule Type: Lecture
Grading:
This course is graded on the Undergraduate Regular scale.

ARTH 311: Design of Cities. 3 credits.
Explores problems in urban design in a particular geographical region or historical period. Approach varies with instructor and may involve archaeological or theoretical approaches appropriate to the specific context. Notes: May be repeated when topic is different. Offered by History & Art History. May be repeated within the degree for a maximum 6 credits.

Mason Core: Arts
Recommended Prerequisite: Completion of 24 credits.
Schedule Type: Lecture
Grading:
This course is graded on the Undergraduate Regular scale.

ARTH 315: Modern Architecture. 3 credits.
Studies in modern architecture from the Beaux Arts movement to the present; an investigation of stylistic, structural, or theoretical innovations. Offered by History & Art History. Limited to three attempts.

Recommended Prerequisite: 24 credits.
Schedule Type: Lecture
Grading:
This course is graded on the Undergraduate Regular scale.

ARTH 318: Art and Archaeology of Ancient Egypt. 3 credits.
Explores the art, architecture, and archaeology of ancient Egypt in its cultural and historic context. Besides the famous monuments, students will also examine the influence of ancient attitudes about cultural identity on the art of the period as well as the impact of ancient Egyptian art on ancient Greece and modern western culture. Offered by History & Art History. Limited to three attempts.

Specialized Designation: Non-Western Culture
Recommended Prerequisite: 24 credits (sophomore standing)
Schedule Type: Lecture
Grading:
This course is graded on the Undergraduate Regular scale.

ARTH 319: Art and Archaeology of the Ancient Near East. 3 credits.
Aspects of the art, archaeology, and culture of ancient Near East and Bronze Age Mediterranean. Approach varies depending on instructor; emphasis may be on Mesopotamia, Iran, Egypt, Anatolia, the Levant, or the Aegean. Offered by History & Art History. Limited to three attempts.

Specialized Designation: Non-Western Culture
Recommended Prerequisite: 24 credits.
Schedule Type: Lecture
Grading:
This course is graded on the Undergraduate Regular scale.

ARTH 314: Art and Archaeology of the Ancient Near East. 3 credits.
Aspects of the art, archaeology, and culture of ancient Near East and Bronze Age Mediterranean. Approach varies depending on instructor; emphasis may be on Mesopotamia, Iran, Egypt, Anatolia, the Levant, or the Aegean. Offered by History & Art History. Limited to three attempts.

Specialized Designation: Non-Western Culture
Recommended Prerequisite: 24 credits.
ARTH 320: Art of the Islamic World. 3 credits.
Introduction to Islamic art, from the time of Muhammad to present. Cultural and regional approach, utilizing local museum collections. Offered by History & Art History. Limited to three attempts.

Mason Core: Global Understanding

Specialized Designation: Non-Western Culture

Recommended Prerequisite: Completion of 24 hours.

Schedule Type: Lecture

Grading: This course is graded on the Undergraduate Regular scale.

ARTH 321: Greek Art and Archaeology. 3 credits.
History of ancient Greek architecture, sculpture, and painting. Offered by History & Art History. Limited to three attempts.

Mason Core: Arts

Recommended Prerequisite: Completion of 24 credits.

Schedule Type: Lecture

Grading: This course is graded on the Undergraduate Regular scale.

ARTH 322: Roman Art and Archaeology. 3 credits.
History of Roman architecture, sculpture, and painting. Offered by History & Art History. Limited to three attempts.

Mason Core: Arts

Recommended Prerequisite: Completion of 24 hours.

Schedule Type: Lecture

Grading: This course is graded on the Undergraduate Regular scale.

ARTH 324: From Alexander the Great to Cleopatra: The Hellenistic World. 3 credits.
Arts of the Hellenistic age within the context of history and culture of the period. Explores the powerful dynasties ruling wealthy empires; achievements in learning and literature housed in the Great Library at Alexandria; baroque sculpture adorning the Altar of Zeus at Pergamon; and Roman collectors of Greek art and antiques. Offered by History & Art History. Limited to three attempts.

Mason Core: Arts

Recommended Prerequisite: 24 credits.

Schedule Type: Lecture

Grading: This course is graded on the Undergraduate Regular scale.

ARTH 333: Early Christian and Byzantine Art. 3 credits.
Aspects of medieval art and culture in eastern Mediterranean world. Topics may include late antiquity, early Christianity, and the Byzantine empire and its neighbors. Designed to take advantage of unique local museum resources. Notes: Specific focus varies with instructor. Offered by History & Art History. Limited to three attempts.

Mason Core: Arts

Recommended Prerequisite: Completion of 24 hours.

Schedule Type: Lecture

Grading: This course is graded on the Undergraduate Regular scale.

ARTH 334: Western Medieval Art. 3 credits.
Aspects of art and architecture in medieval Europe, from the fall of the Roman Empire through the Gothic period. Notes: May be repeated when topic is different. Offered by History & Art History. Limited to three attempts.

Mason Core: Arts

Recommended Prerequisite: Completion of 24 credits.

Schedule Type: Lecture

Grading: This course is graded on the Undergraduate Regular scale.

ARTH 335: Arts of Medieval England. 3 credits.
Explores aspects of the art, architecture, and archeology of medieval England. Special emphasis may be placed on Cultural contexts and literary sources. Offered by History & Art History. Limited to three attempts.

Mason Core: Arts

Recommended Prerequisite: 24 credits.

Schedule Type: Lecture

Grading: This course is graded on the Undergraduate Regular scale.

ARTH 340: Early Renaissance Art in Italy, 1300-1500. 3 credits.
Studies in architecture, sculpture, and painting in the age of Giotto, Ghiberti, Masaccio, and Botticelli. Offered by History & Art History. Limited to three attempts.

Mason Core: Arts

Recommended Prerequisite: Completion of 24 credits.

Schedule Type: Lecture

Grading: This course is graded on the Undergraduate Regular scale.

ARTH 341: Northern Renaissance Art. 3 credits.
Studies in the art of France, Germany, and the Netherlands in the age of Van Eyck and Durer. Offered by History & Art History. Limited to three attempts.

Mason Core: Arts

Recommended Prerequisite: 24 hours.

Schedule Type: Lecture
Grading:
This course is graded on the Undergraduate Regular scale.

ARTH 342: High Renaissance Art in Italy, 1480-1570. 3 credits.
Studies in architecture, sculpture, and painting in the age of Leonardo, Michelangelo, Raphael, and Titian. Offered by History & Art History. Limited to three attempts.

Mason Core: Arts

Recommended Prerequisite: Completion of 24 hours.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale.

ARTH 343: The Art of Venice. 3 credits.
This course studies Venetian society and culture through the visual arts. Venice was a center of maritime trade in the late medieval and early modern Europe. Situated on the northeast coast of Italy, Venice was a hub for merchants, pilgrims, diplomats, soldiers, and sailors traveling around the Mediterranean region. These encounters shaped Venice's rich visual and material culture, which integrated features from other parts of Italy, northern Europe, the Byzantine Empire, Ottoman Turkey, North Africa, and Classical Greece and Rome into a distinctive aesthetic. In this course, we will study the major monuments (e.g., the church of San Marco and the Ducal Palace) and the celebrated artists (e.g., the Bellini family, Titian, Palladio, and Tiepolo). We will also consider other media that are often left out of art history surveys but were equally important to Venetian art, including the city's famous glass production, luxury textile industry, print and publishing, and mosaics. Offered by History & Art History. Limited to three attempts.

Mason Core: Arts

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale.

ARTH 344: Baroque Art in Italy, France, and Spain, 1600-1750. 3 credits.
Studies in architecture, sculpture, and painting in the age of Caravaggio, Bernini, Velazquez, and Poussin. Offered by History & Art History. Limited to three attempts.

Mason Core: Arts

Recommended Prerequisite: Completion of 24 credits.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale.

ARTH 345: Northern Baroque Art, 1600-1750. 3 credits.
Studies in architecture, sculpture, and painting in the age of Rubens, Van Dyck, Rembrandt, and Vermeer. Offered by History & Art History. Limited to three attempts.

Mason Core: Arts

Recommended Prerequisite: Completion of 24 hours.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale.

ARTH 350: History of Photography. 3 credits.
Development of photography from origins in France in the 19th century to the present. Offered by History & Art History. Limited to three attempts.

Mason Core: Arts

Recommended Prerequisite: 24 credits.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale.

ARTH 360: Nineteenth-Century European Art. 3 credits.
Movements from neoclassicism to symbolism discussed in relation to social, cultural, political, and technological changes in Europe. Offered by History & Art History. Limited to three attempts.

Mason Core: Arts

Recommended Prerequisite: Completion of 24 credits.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale.

ARTH 362: Twentieth-Century European Art. 3 credits.
Study of major movements (fauvism, cubism, futurism, constructivism, surrealism, and expressionism) and important artists in 20th-century painting and sculpture. Focus may vary. Offered by History & Art History. Limited to three attempts.

Mason Core: Arts

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale.

ARTH 370: Arts of the United States. 3 credits.
Introduces students to high art (painting and sculpture) and popular material and visual cultural forms (prints, furniture, textiles) through a chronological and thematic survey of U.S. Art, 1600 to 1950. Explores changing roles of arts, artists, craftsmen; issues of gender, race, class; and formation of national identity through the arts. Lectures and discussion are featured. Offered by History & Art History. Limited to three attempts.

Mason Core: Arts

Recommended Prerequisite: 24 hours of undergraduate credit.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale.

ARTH 371: American Architecture and Material Culture. 3 credits.
Studies in the history of American architecture or decorative arts in cultural context. Topics range from 17th century to 20th century, depending on instructor. Offered by History & Art History. Limited to three attempts.

Mason Core: Arts
Recommended Prerequisite: Completion of 24 hours.

Schedule Type: Studio

Grading:
This course is graded on the Undergraduate Regular scale.

ARTH 372: Studies in 18th- and 19th-Century Art of the United States. 3 credits. Developments in visual culture and the changing status of art practitioners throughout these periods. Focus is either chronological (Colonial Period, Gilded Age) or thematic (19th-century genre scenes, the American landscape and national identity). Notes: May be repeated when topic is different. Offered by History & Art History. May be repeated within the degree for a maximum 6 credits. Mason Core: Arts

Recommended Prerequisite: 24 hours.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale.

ARTH 373: Studies in 20th-Century Art of the United States. 3 credits. Developments in 20th-century American visual culture across all media. Notes: May be repeated when topic is different. Offered by History & Art History. May be repeated within the degree for a maximum 6 credits. Mason Core: Arts

Recommended Prerequisite: Completion of 24 credits.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale.

ARTH 374: Art Now. 3 credits. Explores visual art production since 1980, drawing on regional resources. Examines social, institutional, and political issues in recent art and its markets. Notes: Requires students to work collaboratively and make several field trips, including one Saturday bus trip to New York. Specific topics and assignments vary with the changing art season and instructor. Lecture, discussion. Offered by History & Art History. Limited to three attempts. Mason Core: Global Understanding Specialized Designation: Non-Western Culture

Recommended Prerequisite: Completion of 24 credits and one course in ARTH or AVT, or permission of instructor.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale.

ARTH 376: Twentieth-Century Latin American Art. 3 credits. Major movements and important artists in 20th-century Latin American art discussed in relation to social, cultural, and political conditions in the region. Offered by History & Art History. Limited to three attempts. Mason Core: Arts

Recommended Prerequisite: 24 credits.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale.

ARTH 382: Arts of India. 3 credits. History, culture, and arts of south Asia from earliest civilizations along the Indus River to onset of Western colonialism. Emphasizes role of material evidence in the creation of the South Asian history and how political, social, and religious developments affected the arts. Discusses monuments and artifacts in a variety of media in relation to historical contexts. Offered by History & Art History. Limited to three attempts. Mason Core: Global Understanding Specialized Designation: Non-Western Culture

Recommended Prerequisite: 24 credits.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale.

ARTH 383: Arts of Southeast Asia. 3 credits. Examines various cultural and artistic traditions of ancient Southeast Asia, from the earliest archaeological evidence to onset of colonialism. Lectures and discussions focus on material culture of the great civilizations that arose within borders of modern Thailand, Cambodia, Indonesia, Burma (Myanmar), Vietnam, Laos, and Malaysia. Offered by History & Art History. Limited to three attempts. Mason Core: Global Understanding Specialized Designation: Non-Western Culture

Recommended Prerequisite: Completion of 24 credits.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale.

ARTH 384: Arts of China. 3 credits. Explores the complex and dynamic history of China by examining ways in which social, religious, and political shifts have given rise to new and variant forms of material culture. Offered by History & Art History. Limited to three attempts. Mason Core: Global Understanding Specialized Designation: Non-Western Culture

Recommended Prerequisite: Completion of 24 credits and one course in ARTH or AVT, or permission of instructor.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale.

ARTH 385: Arts of Japan. 3 credits. Art and architecture of Japan, with particular attention to the ways political changes, religious movements, and social developments influenced and shaped those creations. Discusses monuments and artifacts in a variety of media in relation to social and historical contexts. Offered by History & Art History. Limited to three attempts. Mason Core: Global Understanding Specialized Designation: Non-Western Culture
Recommended Prerequisite: 24 credits.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale.

ARTH 386: The Silk Road. 3 credits.
Explores luxury arts and material culture of Eurasian trade routes between Mediterranean and China in historical, religious, and social contexts. Emphasizes cultural interactions in medieval Central Asia. Offered by History & Art History. Limited to three attempts.

Mason Core: Global Understanding

Specialized Designation: Non-Western Culture

Recommended Prerequisite: 24 credits.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale.

ARTH 393: Art History Internships. 3-6 credits.
Internship with a professional arts institution, organization, or individual in the Washington, D.C., area. Project to be arranged by student in consultation with faculty instructor and field supervisor. Notes: Strongly recommended for advanced art history students seeking exposure to professional work in visual arts. May be taken for 3 to 6 credits, or repeated for up to 6 credits. Offered by History & Art History. May be repeated within the degree for a maximum 6 credits.

Recommended Prerequisite: Art History major or minor and permission of instructor.

Schedule Type: Internship

Grading:
This course is graded on the Undergraduate Regular scale.

ARTH 394: The Museum. 3 credits.
Examines history, theory, practice, ethics, and current problems of collecting and displaying art and artifacts to the public. Emphasizes issues central to museums in Washington, D.C., or museums in other locations; focus varies with instructor. Offered by History & Art History. Limited to three attempts.

Mason Core: Synthesis

Recommended Prerequisite: 6 credits in art history at the 300-level and completion or concurrent enrollment in ENGH 302.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale.

ARTH 398: Study Abroad in the History of Art. 1-6 credits.
Study abroad. Course topics, content, and locations vary. Notes: A maximum of 6 credits may be applied to the major or minor with permission of the program. Offered by History & Art History. May be repeated within the term for a maximum 12 credits.

Schedule Type: Independent Study

Grading:
This course is graded on the Undergraduate Regular scale.

ARTH 399: Special Topics in the History of Art. 3 credits.
Topics vary. Notes: May be repeated when topic is different. Offered by History & Art History. May be repeated within the term.

Specialized Designation: Topic Varies

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale.

400 Level Courses

ARTH 400: Historiography and Methods of Research in Art History (Topic Varies). 3 credits.
Historical investigation of theories, methods, and critiques involved in the discipline of art history. Approach or focus may vary with instructor. Offered by History & Art History. Limited to three attempts.

Recommended Prerequisite: ENGL 302/ENGH 302 and 6 credits in art history at the 300 level or permission of instructor.

Schedule Type: Seminar

Grading:
This course is graded on the Undergraduate Regular scale.

ARTH 420: Advanced Studies in Ancient Art. 3 credits.
Studies a particular area of ancient art of the Mediterranean, Near East, or Middle East. Topics may be art form or medium, geographical area, theme, function, or context. Notes: May be repeated for credit when topic is different. Offered by History & Art History. May be repeated within the term.

Specialized Designation: Writing Intensive in Major

Recommended Prerequisite: ENGL 302/ENGH 302 and 6 credits in art history at the 300 level, or permission of instructor.

Schedule Type: Seminar

Grading:
This course is graded on the Undergraduate Regular scale.

ARTH 430: Advanced Studies in Medieval or Islamic Art. 3 credits.
Studies a single topic in medieval or Islamic art. May focus on a particular period, region, or medium, or may explore cultural interconnections within medieval Eurasian world. Notes: May be repeated when topic is different. Offered by History & Art History. May be repeated within the term for a maximum 12 credits.

Specialized Designation: Writing Intensive in Major

Recommended Prerequisite: ENGL 302/ENGH 302 and a 300-level course in medieval or Islamic art, or permission of instructor.

Schedule Type: Seminar

Grading:
This course is graded on the Undergraduate Regular scale.

ARTH 440: RS: Advanced Studies in Renaissance and Baroque Art. 3 credits.
Studies a particular aspect of Renaissance or baroque art. Topics may be monographic, thematic, or concentrated on the art of a smaller time
period or a particular area. Notes: May be repeated for credit when topic is different. Offered by History & Art History. May be repeated within the term.

**Specialized Designation:** Research/Scholarship Intensive, Topic Varies, Writing Intensive in Major

**Recommended Prerequisite:** ENGL 302/ENGH 302 and 6 credits in Art History at the 300 level, or permission of instructor.

**Schedule Type:** Seminar

**Grading:**
This course is graded on the Undergraduate Regular scale.

**ARTH 460:** RS: *Advanced Studies in 20th-Century European Art.* 3 credits.
Study of a particular topic in 20th century European art. Course may focus on a specific period, region, movement, medium, or theoretical issue, or explore cultural connections and transfer between regions. Notes: May be repeated when topic is different. Offered by History & Art History. May be repeated within the term for a maximum 9 credits.

**Specialized Designation:** Research/Scholarship Intensive, Topic Varies, Writing Intensive in Major

**Recommended Prerequisite:** ENGL 302/ENGH 302 and 3XX level course in 19th or 20th century European or American art, or permission of instructor.

**Schedule Type:** Seminar

**Grading:**
This course is graded on the Undergraduate Regular scale.

**ARTH 471:** *Advanced Studies in Art of the United States.* 3 credits.
Studies a particular area of American art, focusing on a form, such as landscape or genre painting; theme, such as nationalism, regionalism, or iconography of the family; or movement, such as American modernism. Offered by History & Art History. Limited to three attempts.

**Specialized Designation:** Writing Intensive in Major

**Recommended Prerequisite:** ENGL 302/ENGH 302 and 6 credits in art history at the 3XX level or permission of instructor.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale.

**ARTH 472:** RS: *Advanced Studies in 20th-Century Latin American Art.* 3 credits.
Study of a particular topic in 20th-century Latin American art. Course may focus on a specific period, region, movement, medium, or theoretical issue, or explore cultural connections and transfer between regions. Notes: May be repeated when topic is different. Offered by History & Art History. May be repeated within the degree for a maximum 9 credits.

**Specialized Designation:** Research/Scholarship Intensive, Writing Intensive in Major

**Recommended Prerequisite:** ENGL 302/ENGH 302 and a 3XX level course in 19th or 20th century art of Europe or the Americas, or permission of instructor.

**Schedule Type:** Seminar

**Grading:**
This course is graded on the Undergraduate Regular scale.

**ARTH 474:** *Advanced Studies in Contemporary Art.* 3 credits.
Study of a topic in contemporary art in a research seminar setting. Focus on particular theme, region, artist, or medium, or take a comparative approach. Notes: May be repeated when topic is different. Offered by History & Art History. May be repeated within the degree for a maximum 6 credits.

**Specialized Designation:** Writing Intensive in Major

**Recommended Prerequisite:** ENGL 302/ENGH 302; 3XX level coursework in modern or contemporary art; or permission of instructor.

**Schedule Type:** Seminar

**Grading:**
This course is graded on the Undergraduate Regular scale.

**ARTH 482:** RS: *Advanced Studies in Asian Art.* 3 credits.
Seminar-style discussions on a specific topic in Asian art. May focus on the art of a particular period, movement, reign, or region, as well as theoretical issues or works in a particular medium. Notes: May be repeated when topic is different. Offered by History & Art History. May be repeated within the term for a maximum 6 credits.

**Specialized Designation:** Research/Scholarship Intensive, Non-Western Culture, Writing Intensive in Major

**Recommended Prerequisite:** ENGL 302/ENGH 302, and 3XX-level course in any area of Asian art; or permission of instructor.

**Schedule Type:** Seminar

**Grading:**
This course is graded on the Undergraduate Regular scale.

**ARTH 490:** *Independent Study in Art History.* 3 credits.
Intensive study of a particular artist, period, or theoretical problem to be conducted by an individual student in consultation with instructor. Offered by History & Art History. Limited to three attempts.

**Specialized Designation:** Writing Intensive in Major

**Recommended Prerequisite:** ENGL 302/ENGH 302, and 3XX-level course in art history beyond ARTH 200, 201. Study proposal submitted prior to registration.

**Schedule Type:** Independent Study

**Grading:**
This course is graded on the Undergraduate Regular scale.

**ARTH 491:** *Independent Study in Art History.* 3 credits.
Study of a topic in art history beyond ARTH 200, 201. Study proposal submitted prior to registration.

**Specialized Designation:** Writing Intensive in Major

**Recommended Prerequisite:** 60 credits, ENGH 302, permission of instructor and chair, plus 9 credits in art history beyond ARTH 200, 201. Study proposal submitted prior to registration.

**Schedule Type:** Independent Study
Grading:
This course is graded on the Undergraduate Regular scale.

**ARTH 492: Honors Directed Readings.** 3 credits.
Linked individualized courses, usually given by same instructor. Involves directed readings. Notes: Students must have completed at least one course in the field, or with the professor, chosen for these honors courses. The 3 credits of readings should be taken before the 3 research credits, or they may be taken concurrently. Offered by History & Art History. Limited to three attempts.

**Recommended Prerequisite:** Admission to Art History Honors Program, ENGH 302, permission of instructor and chair.

**Schedule Type:** Independent Study

Grading:
This course is graded on the Undergraduate Regular scale.

**ARTH 493: Honors Directed Research.** 3 credits.
Linked individualized courses, usually given by same instructor. Culminates in research paper related to subject of readings. Notes: Students must have completed at least one course in the field, or with the professor, chosen for these honors courses. The 3 credits of readings should be taken before the 3 research credits, or they may be taken concurrently. Offered by History & Art History. Limited to three attempts.

**Recommended Prerequisite:** Admission to Art History Honors Program, ENGH 302, permission of instructor and chair.

**Schedule Type:** Independent Study

Grading:
This course is graded on the Undergraduate Regular scale.

**ARTH 495: Honors Directed Readings.** 3 credits.
Linked individualized courses, usually given by same instructor. Involves directed readings. Notes: Students must have completed at least one course in the field, or with the professor, chosen for these honors courses. The 3 credits of readings should be taken before the 3 research credits, or they may be taken concurrently. Offered by History & Art History. Limited to three attempts.

**Recommended Prerequisite:** 6 credits of 300-level courses in the College of Humanities and Social Sciences and ENGH 302.

**Schedule Type:** Seminar

Grading:
This course is graded on the Undergraduate Regular scale.

**ARTH 499: Advanced Studies in Art History.** 3 credits.
Seminar-style discussion on specific subjects in art history. Notes: May be repeated when topic is different. Offered by History & Art History. May be repeated within the degree for a maximum 6 credits.

**Recommended Prerequisite:** Writing Intensive in Major

**Schedule Type:** Seminar

Grading:
This course is graded on the Undergraduate Regular scale.

**ARTH 593: Internship in Art History.** 3-6 credits.
Internship with a professional arts institution, organization, or individual in the Washington, D.C., area. Project to be arranged by student in consultation with faculty instructor and field supervisor. Notes: Recommended for advanced art history students seeking exposure to professional work in visual arts. Offered by History & Art History. May be repeated within the degree for a maximum 6 credits.

**Recommended Prerequisite:** BA or equivalent or permission of instructor.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Internship

Grading:
This course is graded on the Undergraduate Regular scale.

**ARTH 594: The Museum.** 3 credits.
Examines history, theory, practice, ethics, and current problems of collecting and displaying art and artifacts to the public. Emphasizes issues central to museums in Washington, D.C., or museums in other locations. Focus may vary with instructor. Offered by History & Art History. May not be repeated for credit.

**Recommended Prerequisite:** Baccalaureate degree or permission of instructor.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

Grading:
This course is graded on the Undergraduate Regular scale.

**ARTH 596: Independent Study.** 1-3 credits.
Independent reading and research on specific project under direction of department member. Notes: Written report is required. May be repeated for credit. Offered by History & Art History. May be repeated within the term for a maximum 9 credits.

**Recommended Prerequisite:** Baccalaureate degree or permission of instructor.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Independent Study

**Grading:**
This course is graded on the Graduate Regular scale.

**ARTH 599:** Special Topics in Art History. 1-6 credits.
Topics vary. Notes: May be repeated for credit when topic is different. Offered by History & Art History. May be repeated within the term.

**Specialized Designation:** Topic Varies

**Recommended Prerequisite:** Baccalaureate degree or permission of instructor.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Seminar

**Grading:**
This course is graded on the Graduate Regular scale.

**600 Level Courses**

**ARTH 600:** Methods and Research in Art History. 3 credits.
Investigates theories, methods, and research strategies in discipline of art history. Designed for first-semester students in art history MA program; foundation for further graduate-level work in the program. Offered by History & Art History. May not be repeated for credit.

**Recommended Prerequisite:** Admission to the Art History MA program.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Seminar

**Grading:**
This course is graded on the Graduate Regular scale.

**ARTH 601:** Colloquium in Art History. 3 credits.
Offers graduate-level survey in academic art history led by an instructor of record, with input from full Art History faculty. Participants review the current field through lectures, focused readings and group discussions with relevant faculty member. Participants may read in more depth in areas of special interest. Provides preparation for MA exams and professional preparation for teaching. Offered by History & Art History. May not be repeated for credit.

**Recommended Prerequisite:** Admission to the MA Program in Art History.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

**ARTH 630:** Material Culture Studies. 3 credits.
Introduction to traditions that have contributed to the field of material culture study. Examines a broad range of the material world from the past to the present. Surveys the field’s historical roots and examines approaches to material culture scholarship. Notes: May be repeated for credit when topic is different. Offered by History & Art History. May be repeated within the term for a maximum 24 credits.

**Recommended Prerequisite:** Admission to the MA Program in Art History.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to students with a major in History of Decorative Arts.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

**ARTH 696:** Independent Directed Readings. 3 credits.
Designed to prepare students for comprehensive exams by integrating past work and filling gaps in expected knowledge before the exam. Notes: Taken in final semester of art history MA. Offered by History & Art History. May not be repeated for credit.

**Recommended Prerequisite:** Admission to Art History MA program and permission instructor.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Independent Study

**Grading:**
This course is graded on the Graduate Regular scale.
ARTH 699: Topics in Art History. 3 credits.
Research seminar on aspects of art history. Topics vary, but course entails extensive critical readings and discussion, development of bibliographies, and advanced-level research papers. Notes: May be repeated when topic is different. Offered by History & Art History. May be repeated within the term for a maximum 15 credits.

Specialized Designation: Topic Varies

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.
Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Seminar

Grading:
This course is graded on the Graduate Regular scale.

700 Level Courses
ARTH 799: Master’s Thesis. 1-3 credits.
Research and writing on approved thesis topic under direction of thesis committee. Notes: Students must register for a minimum of three credits in their first semester of 799 and maintain continuous enrollment in 799 while writing and submitting a thesis. A maximum of 3 credits of 799 may be applied to the MA in art history and a maximum of 6 credits to the MA in the history of decorative arts. Offered by History & Art History. May be repeated within the degree for a maximum 24 credits.

Recommended Prerequisite: Completion of 24 credits (for art history) or 45 credits (for history of decorative arts) and approval of thesis proposal by the faculty and program director.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Thesis

Grading:
This course is graded on the Satisfactory/No Credit scale.

Arts Management (AMGT)

400 Level Courses
AMGT 402: Professional Development. 1 credit.
Seminar course that involves the development of workplace frameworks for success. Offered by Coll Visual & Performing Arts. Limited to three attempts.

Recommended Prerequisite: Junior standing, admission to the arts administration minor, or permission of instructor.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale.

AMGT 405: Introduction to Arts Management. 3 credits.
Focuses on not-for-profit visual and performing arts organizations. Topics covered include the evolution of the field, the internal culture and structure, external influences, governance, planning, human resources, marketing, fundraising, financial management, economic impact, and other topics. Students will be introduced to a wide range of arts organizations, working arts administrators, and institutional models through field trips, guest lectures, readings, and institutional data. Offered by Coll Visual & Performing Arts. Limited to three attempts.

Recommended Prerequisite: Junior standing, admission to arts administration minor, or permission of instructor.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale.

AMGT 407: The Arts and Community Engagement. 3 credits.
This course is an overview of the arts and community engagement as practiced by the arts manager, artist, and educator. Students will learn to identify the need for community engagement and to develop successful techniques to implement outreach. Other topics will include accessibility, diversity, volunteerism, and governance. Offered by Coll Visual & Performing Arts. Limited to three attempts.

Recommended Prerequisite: Junior standing or permission of program director.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale.

AMGT 410: Technology in the Arts. 1 credit.
The one constant in life is change. In today's world, both technology and arts organizations are changing. This course will give a broad overview of the technologies commonly used in entrepreneurial, small, and large arts organizations and examines the intersection of technology, management, and the arts. Offered by Coll Visual & Performing Arts. Limited to three attempts.

Recommended Prerequisite: Junior standing.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale.

AMGT 471: Introduction to Grant Writing. 1 credit.
Course focuses on developing the skills necessary for successful grant applications for arts organizations. Study of relevant funding sources, awareness of available research materials, ability to construct coherent proposals, and defining fund-raising strategy for an arts organization. Offered by Coll Visual & Performing Arts. Limited to three attempts.

Recommended Prerequisite: Junior standing, admission to the arts administration minor, or permission of the instructor.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale.

AMGT 472: Technology in the Arts. 1 credit.
The one constant in life is change. In today's world, both technology and arts organizations are changing. This course will give a broad overview of the technologies commonly used in entrepreneurial, small, and large arts organizations and examines the intersection of technology, management, and the arts. Offered by Coll Visual & Performing Arts. Limited to three attempts.

Recommended Prerequisite: Junior standing.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale.
AMGT 489: Internship in Arts Management. 1-4 credits.
Apprenticeship, internship, or project with organization or individual in the arts. Must be prearranged with the minor coordinator before enrollment. Offered by Coll Visual & Performing Arts. May be repeated within the degree for a maximum 4 credits.

Recommended Prerequisite: Junior Standing, completion of 6 credits of courses in area of residency, AMGT 305, or permission of instructor.

Schedule Type: Internship
Grading:
This course is graded on the Undergraduate Regular scale.

500 Level Courses

AMGT 504: Professional Development Arts Management. 1 credit.
Combines experimental facets happening within the creative community and the development of an increasing awareness of self. Professional development is not only for the manager, but also for those who work for that manager. It is collaborative, ideally incorporating an evaluative stage. Topics addressed include professional development, consultation, coaching, communities of practice, lesson study, mentoring, reflective supervision and technical assistance. Offered by Coll Visual & Performing Arts. May not be repeated for credit.

Recommended Prerequisite: Admission to Arts Management program or permission of program director.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

AMGT 511: Introduction to Grant Writing. 1 credit.
Places components of the grant writing process within broader context of nonprofit management. Introduction to perspectives of grant seeker and maker. The grant writing process: research, proposal writing, terminology, oral and written techniques, and specific focus. Discover resources and compelling writing skills pertaining to proposal and letters of intent. Offered by Coll Visual & Performing Arts. May not be repeated for credit.

Recommended Prerequisite: Admission to Arts Management program or permission of program director.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

AMGT 512: Grant Writing in the Arts. 1 credit.
Places components of grant writing process within broader context of nonprofit management. Introduction to perspectives of grant seeker and maker. The grant writing process: research, proposal writing, terminology, oral and written techniques, and specific focus. Discover resources and compelling writing skills pertaining to proposal and letters of intent. Offered by Coll Visual & Performing Arts. May not be repeated for credit.

Recommended Prerequisite: Admission to Arts Management program or permission of program director.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

AMGT 513: Technology in the Arts. 1 credit.
The one constant in life is change. In today’s world, both technology and arts organizations are changing. This course will give a board overview of the technologies commonly used in entrepreneurial, small, and large arts organizations and examines the intersection of technology, management, and the arts. Offered by Coll Visual & Performing Arts. May not be repeated for credit.

Recommended Prerequisite: Admission to Arts Management program or permission of program director.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

AMGT 599: Special Topics in Arts Management. 1-6 credits.
Provides opportunity to explore special and timely topics in arts management including theoretical and applied areas. Topics and credit vary; may be repeated for up to 12 credits taken under different topics. Offered by Coll Visual & Performing Arts. May be repeated within the term for a maximum 12 credits.

Specialized Designation: Topic Varies
Recommended Prerequisite: Admission to Arts Management program or permission of program director.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.
Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

**600 Level Courses**

**AMGT 601: Fund Raising/Development I.** 3 credits.
Overview for students seeking general knowledge, as well as introductory course for those who will complete the fund-raising concentration. Teaches role of fund raising as management function and part of overall strategic intention of arts organizations, presenting fund raising as a multifaceted, team-based process. Analyzes tools and techniques for effective fund raising. Offered by Coll Visual & Performing Arts. May not be repeated for credit.

**Recommended Prerequisite:** Admission to Arts Management program or permission of program director.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

**AMGT 602: Seminar in Arts Management.** 3 credits.
Develops tools and techniques necessary for successful pursuit of a management career in visual and performing arts. Introduces wide range of arts organizations, working arts administrators, and institutional models through guest lectures, readings, field trips, and analysis of institutional data. Students gain understanding of organizational structures and functions, as well as models for general management. Offered by Coll Visual & Performing Arts. May not be repeated for credit.

**Recommended Prerequisite:** Admission to Arts Management program or permission of program director.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to English Language, Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Seminar

**Grading:**
This course is graded on the Graduate Regular scale.

**AMGT 603: The Arts in Society.** 3 credits.
Examines role of visual and performing arts, with emphasis on historic traditions and trends that have most directly influenced contemporary American practice. Consideration is given to the functions of art in society in addressing questions: What constitutes good or bad art? What is the value of art? What encouragements or impediments does our society offer to the creative artist or arts institution? Offered by Coll Visual & Performing Arts. May not be repeated for credit.

**Recommended Prerequisite:** Admission to Arts Management program or permission of program director.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

**AMGT 604: Public Relations and Marketing Strategies for the Arts I.** 3 credits.
Teaches strategic way of thinking about audience, community, and markets. Structured into four modules, beginning with fundamentals of strategic planning. Students learn about external and internal environments and the interplay among them; discuss marketing fundamentals pertaining to arts audiences; and are introduced to fundamentals of applied marketing media and advertising fundamentals. Offered by Coll Visual & Performing Arts. May not be repeated for credit.

**Recommended Prerequisite:** Admission to Arts Management program or permission of program director.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

**AMGT 606: Governance and Leadership.** 3 credits.
Board development including oversight and management of a board, as well as understanding board functions. Board relationships, including volunteers, are essential through all of the stages of a management career. Offered by Coll Visual & Performing Arts. May not be repeated for credit.

**Recommended Prerequisite:** Admission to Arts Management program or permission of program director.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.
Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

**AMGT 609: Performing Arts Management.** 3 credits.
Bridging strategic planning and marketing; audience development; financial management; and board and volunteer management with issues of scheduling, ticketing and sales, mission integration and strategic challenges of new facilities, and growth and operations of existing ones. Offered by Coll Visual & Performing Arts. May not be repeated for credit.

**Recommended Prerequisite:** Admission to Arts Management program or permission of program director.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

**AMGT 610: Visual Arts Management.** 3 credits.
Covers the many facets of visual art gallery management, from practical considerations of daily operations to the broader examination of gallery's role in art education, criticism, and art market. Topics such as exhibition coordination and installation, contracts, artist representation, fine art insurance, exhibition policies, budgets, and marketing are covered, along with the responsibility of educating a diverse public. Offered by Coll Visual & Performing Arts. May not be repeated for credit.

**Recommended Prerequisite:** Admission to Arts Management program or permission of program director.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

**AMGT 620: Legal Aspects in Arts Management.** 3 credits.
Overview of practical legal issues that will be encountered by arts managers of both for-profit and not-for-profit arts organizations, including contracts, copyrights, licensing, and for-profit and non-profit incorporation. Offered by Coll Visual & Performing Arts. May not be repeated for credit.

**Recommended Prerequisite:** Admission to Arts Management program or permission of program director.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

**AMGT 640: Programming and Project Arts Management.** 3 credits.
Provides both a theoretical framework for thinking about and assessing the value of various programming options and practical examples of the potential partners and resources available for program and project implementation. Offered by Coll Visual & Performing Arts. May not be repeated for credit.

**Recommended Prerequisite:** Admission to Arts Management program or permission of program director.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

**AMGT 705: Finance and Budgeting for Arts II.** 3 credits.
Introduces budgeting, planning, and finance as fundamentals of the strategic planning process and management control, specifically tailored to the needs of arts organizations. Offered by Coll Visual & Performing Arts. May not be repeated for credit.

**Recommended Prerequisite:** Admission to Arts Management program or permission of program director.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

**AMGT 704: Finance and Budgeting for Arts I.** 3 credits.
Introduces budget and finance as fundamentals of the budget process, specifically tailored to needs of arts organizations. Provides overview of accounting as tool to manage and control arts organizations. Involves laboratory component for teaching software application frequently encountered in fiscal operation of arts organizations. Offered by Coll Visual & Performing Arts. May not be repeated for credit.

**Recommended Prerequisite:** Admission to Arts Management program or permission of program director.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

**AMGT 700 Level Courses**

**AMGT 705: Finance and Budgeting for Arts II.** 3 credits.
Introduces budgeting, planning, and finance as fundamentals of the strategic planning process and management control, specifically tailored to the needs of arts organizations. Offered by Coll Visual & Performing Arts. May not be repeated for credit.
**Recommended Prerequisite:** AMGT 704

**Registration Restrictions:**

**Required Prerequisite:** AMGT 704B.

B- Requires minimum grade of B-.

Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

**AMGT 706: Festivals and Special Events.** 3 credits.

Technical aspects of events and festival management. Topics may include cultural understanding, tourism, sponsorship, fund raising and development, logistics of scheduling and contracts, and the relationship to larger venues, marketing and sales, and budgeting. Offered by Coll Visual & Performing Arts. May not be repeated for credit.

**Recommended Prerequisite:** Admission to Arts Management program or permission of program director.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

**AMGT 710: Arts Policy.** 3 credits.

Reviews current state of the sector, familiarizing students with most common rationales for public support of the arts and respective roles of federal, state, and local governments and private policy actors. Examines dilemmas that arts organizations face in balancing need for government support and artistic integrity with push and pull of the market. Compares U.S. policies to other developed countries. Offered by Coll Visual & Performing Arts. May not be repeated for credit.

**Registration Restrictions:**

**Required Prerequisites:** AMGT 602B and 603B.

B- Requires minimum grade of B-.

Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

**AMGT 711: Directed Readings and Project.** 1-6 credits.

Opportunity to engage in a more intensive study or project in arts management. Students partner with faculty member for intensive readings and project in strategy and planning in the arts, fundraising and development, entrepreneurial project work, arts marketing, arts policy and law, or other specialized areas pertinent to arts administration. Offered by Coll Visual & Performing Arts. May be repeated within the degree for a maximum of 6 credits.

**Recommended Prerequisite:** AMGT 704.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

**AMGT 742: Internship I.** 3 credits.

Provides a specific work environment to build on skills developed in the classroom and integrates work experience with specific academic exercises. Minimum 42 hours/credit. Required for developing practical application. Offered by Coll Visual & Performing Arts. May not be repeated for credit.

**Recommended Prerequisite:** Admission to Arts Management program, 15 credit standing; or permission of program director.

**Registration Restrictions:**

Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Internship

**Grading:**
This course is graded on the Graduate Special scale.

**AMGT 752: Arts Entrepreneurship.** 3,6 credits.

Lecture course in discovering and developing entrepreneurial skills in the arts. Students will conceive, develop, and present a for-profit or not-for-profit business plan and strategy; which will include model(s), market overview, management structure, along with revenue streams, an acquisition strategy, and technical and information technology strategies. Advanced course focuses on developing financial planning skills, funding strategies, marketing and arts sales. Offered by Coll Visual & Performing Arts. May be repeated within the degree for a maximum of 6 credits.

**Recommended Prerequisite:** Admission to Arts Management program or permission of program director; AMGT 704.

**Registration Restrictions:**

Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

**AMGT 792: Internship II.** 3 credits.

Provides a specific work environment to build on skills developed in the classroom and integrates work experience with specific academic exercises. Elective. Minimum 42 hours/credit. Required for developing practical application. Offered by Coll Visual & Performing Arts. May not be repeated for credit.

**Recommended Prerequisite:** Admission to Arts Management program, 15 credit standing; or permission of program director.

**Registration Restrictions:**
Assistive Technology (EDAT)

Enrollment is limited to Graduate or Non-Degree level students. Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Internship

Grading:
This course is graded on the Graduate Special scale.

AMGT 795: Capstone in Arts Management. 1 credit.
Required in order to complete the MA AMGT degree and must be taken in the last semester. Provides students with the opportunity to deepen, expand, and demonstrate mastery of one area of arts management expertise. Builds on work undertaken in a completed AMGT course or internship. Faculty will provide guidance and approve capstone topics. The capstone is a required one-credit course. Students may register for the capstone after having completed all core course requirements for the MA AMGT degree. Offered by Coll Visual & Performing Arts. May be repeated within the degree for a maximum 2 credits.

Recommended Prerequisite: All core course requirements for the MA AMGT degree.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Satisfactory/No Credit scale.

Assistive Technology (EDAT)

400 Level Courses

EDAT 410: Introduction to Assistive Technology. 3 credits.
Provides an understanding of assistive technology and application in instructional programs, career tasks, and life skills for individuals with disabilities. Enables students to better use assistive technology in education, work, community, and home environments. Offered by School of Education. Limited to three attempts.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale.

EDAT 421: Augmentative Communication. 3 credits.
Provides an overview of augmentative and alternative communication tools for use by individuals with speech and communication disabilities. Enables students to locate, use and train others on the range of AAC technologies available. Field experience may be required. Offered by School of Education. Limited to three attempts.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale.

EDAT 422: Assistive Technology for Individuals with Sensory Impairments. 3 credits.
Provides an overview of specific technology and resources available to enhance and improve the ability of individuals who are visually impaired/blind or hearing-impaired/deaf. Offered by School of Education. Limited to three attempts.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale.

500 Level Courses

EDAT 510: Introduction to Assistive Technology. 3 credits.
Provides an understanding of assistive technology and application in instructional programs, career tasks, and life skills for individuals with disabilities. Presentation and exploration experiences enable students to better use assistive technology in education, work, community, and home environments. Offered by School of Education. May not be repeated for credit.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale.

EDAT 521: Augmentative Communication. 3 credits.
Provides an overview of augmentative and alternative communication tools for use by individuals with speech and communication disabilities. Exploration experiences enable students to locate, use and train others on the range of AAC technologies available. Field experience may be required. Offered by School of Education. May not be repeated for credit.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale.
EDAT 522: Assistive Technology for Individuals with Sensory Impairments. 3 credits.
Provides an overview of specific technology and resources available to enhance and improve the ability of individuals who are visually impaired/ blind or hearing-impaired/deaf. Field experience may be required. Offered by School of Education. May not be repeated for credit.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale.

EDAT 523: Accessibility and Input Modifications. 3 credits.
Provides an overview of accessibility strategies and input modifications designed for use by individuals with disabilities. Exploration experiences enable students to locate, use and train others on the range of technologies available as well as design opportunities for constructing unique devices. Field experience may be required. Offered by School of Education. May not be repeated for credit.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale.

EDAT 524: Universal Design for Learning. 3 credits.
Describes the foundations and principles of Universal Design for Learning (UDL). Focuses on teaching students with various disabilities including those with learning disabilities from preschool to postsecondary education implementing technology-based and other UDL strategies. Applies UDL principles to the design of accessible instructional materials. Students have the opportunity to develop and implement UDL lesson plans. Offered by School of Education. May not be repeated for credit.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale.

EDAT 525: Software and Mobile Applications for Individuals with Disabilities. 3 credits.
Provides overview with software, mobile applications, and accessibility features. Identifies design features to meet individual's special needs; provides hands-one experiences with the range of software and mobile applications that incorporate evidence-based strategies for individuals with disabilities across environments, settings and the life span. Field experience may be required. Offered by School of Education. May not be repeated for credit.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale.

EDAT 527: Assistive Technology for Independent Living and Employment. 3 credits.
Provides an overview of assistive technology accommodations and public policy related to independent living for individuals with disabilities throughout their life span. Focuses on assistive technologies that support daily living tasks and workplace accommodations to improve the performance of daily living and work activities for individuals with disabilities. Offered by School of Education. May not be repeated for credit.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale.

EDAT 530: Assistive Technology for Independent Living. 3 credits.
Provides an overview of activities of daily living (ADLs) for individuals who have disabilities and the elderly. ADLs include but are not limited to assistive technologies that support dressing, feeding, hygiene, housework and safety. Field experience may be required. Offered by School of Education. May not be repeated for credit.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture
Grading: This course is graded on the Graduate Regular scale.

**EDAT 531: Assistive Technology in the Workplace.** 3 credits.
Provides an overview of workplace accommodations, functional barriers commonly experienced in the workplace, assistive technology, ergonomic strategies, and universal design approaches to improve performance of work activities for individuals with disabilities, including but not limited to mobility, dexterity, sensory, communication, and cognitive impairments. Field experience may be required. Offered by School of Education. May not be repeated for credit.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

Grading: This course is graded on the Graduate Regular scale.

**EDAT 599: Independent Study in Assistive Technology.** 1-6 credits.
Studies assistive technology research, theory, or practice under direction of faculty member. Offered by School of Education. May be repeated within the term for a maximum 6 credits.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate,Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

Grading: This course is graded on the Graduate Regular scale.

**EDAT 610: Designing Adapted Environments.** 3 credits.
Provides an overview of environmental adaptations for individuals with disabilities to increase their access to community, workplace, and school activities. Covers legal issues within the ADA for adapting environments and addresses programmatic and physical access issues. Notes: Field Experience required. Offered by School of Education. May not be repeated for credit.

**Registration Restrictions:**
Required Prerequisite: EDAT 510B-

B- Requires minimum grade of B-.

Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

Grading: This course is graded on the Graduate Regular scale.

**EDAT 649: Assistive Technology Assessment.** 3 credits.
Provides an overview of AT consideration and assessment procedures with emphasis on generated assessment plan and written report. Review and administer existing assistive technology (AT) evaluation instruments. Notes: Field Experience required. Offered by School of Education. May not be repeated for credit.

**Registration Restrictions:**
Required Prerequisite: EDAT 510B-

B- Requires minimum grade of B-.

Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

Grading: This course is graded on the Graduate Regular scale.

**Astronomy (ASTR)**

**Astronomy (ASTR) 100 Level Courses**

**ASTR 103: Astronomy.** 3 credits.
Introduction to origin of life, Earth, planets and sun, stars, galaxies, quasars, nature of space radiation, and general theory of relativity. Note: ASTR 103 with ASTR 112 or ASTR 114 can be used to fulfill a 4-credit lab science requirement. Not for physics majors. Offered by Physics & Astronomy. Limited to three attempts.

**Mason Core:** Natural Science Overview

**Schedule Type:** Lecture

Grading: This course is graded on the Undergraduate Regular scale.

**ASTR 111: The Solar System.** 3 credits.
Topics include history of astronomy, evolution of the solar system, properties of planets, scientific method, critical thinking, nature of light, and principles of telescope design. Notes: ASTR 111 and 112 can be used to fulfill a 4-credit lab science requirement; not for physics majors. Offered by Physics & Astronomy. Limited to three attempts.

**Mason Core:** Natural Science with Lab, Natural Science Overview

**Schedule Type:** Lecture

Grading: This course is graded on the Undergraduate Regular scale.

**ASTR 112: The Solar System Lab.** 1 credit.
Laboratory course associated with ASTR 111. Notes: ASTR 111 and 112 can be used to fulfill a 4-credit lab science requirement; not for physics majors. Offered by Physics & Astronomy. Limited to three attempts.
Introduction to Astrophysics. 3 credits.
Topics include electromagnetic radiation, stellar evolution, interstellar medium, galaxies, cosmology, scientific method, and critical thinking. 
Mason Core: Natural Science with Lab
Schedule Type: Laboratory
Grading:
This course is graded on the Undergraduate Regular scale.

ASTR 113: Stars, Galaxies, and the Universe. 3 credits.
Topics include electromagnetic radiation, stellar evolution, interstellar medium, galaxies, cosmology, scientific method, and critical thinking. 
Mason Core: Natural Science with Lab, Natural Science Overview
Schedule Type: Lecture
Grading:
This course is graded on the Undergraduate Regular scale.

ASTR 114: Stars, Galaxies, and the Universe Lab. 1 credit.
Laboratory course associated with ASTR 113. Notes: ASTR 113 and 114 can be used to fulfill a 4-credit lab science requirement; not for physics majors. Offered by Physics & Astronomy. Limited to three attempts.

ASTR 115: Finding New Worlds. 4 credits.
Topics include the search for planets outside the solar system, and new developments in the theory of solar system formation with an emphasis on student-led investigation using public data sources. Notes: ASTR 115 can be used to fulfill a 4-credit lab science requirement; not for physics majors. Offered by Physics & Astronomy. Limited to three attempts.

ASTR 210: Introduction to Astrophysics. 3 credits.
Introduction to astrophysics for scientists. Topics include astronomical measurement, celestial mechanics, electromagnetic radiation, stellar structure and evolution, the interstellar medium, galaxies, and a selection of topics at the forefront of astrophysics including space physics, exoplanets, galaxies, and cosmology. Offered by Physics & Astronomy. Limited to three attempts.

ASTR 210: Introduction to Astrophysics. 3 credits.
Introduction to astrophysics for scientists. Topics include astronomical measurement, celestial mechanics, electromagnetic radiation, stellar structure and evolution, the interstellar medium, galaxies, and a selection of topics at the forefront of astrophysics including space physics, exoplanets, galaxies, and cosmology. Offered by Physics & Astronomy. Limited to three attempts.

ASTR 302: Foundations of Cosmological Thought. 3 credits.
Examines scientific, historical, and philosophical foundations and development of cosmological thought from antiquity to the present. Emphasizes qualitative understanding of the development of cosmology concluding with the present concept of origin and evolution of universe. 
Mason Core: Natural Science Overview
Schedule Type: Lecture
Grading:
This course is graded on the Undergraduate Regular scale.

ASTR 301: Astrobiology. 3 credits.
Physical science perspective on origin and evolution of life on Earth and how life, in turn, has significantly influenced Earth's evolution. Topics include origin of Earth, mechanisms and sites for origin of life, co-evolution of life and Earth's atmosphere, habitability of planets, and the search for extraterrestrial life. Offered by Physics & Astronomy. Limited to three attempts.

Registration Restrictions:
Required Prerequisites: PHYS 160C or 170C.
C Requires minimum grade of C.

ASTR 302: Foundations of Cosmological Thought. 3 credits.
Examines scientific, historical, and philosophical foundations and development of cosmological thought from antiquity to the present. Emphasizes qualitative understanding of the development of cosmology concluding with the present concept of origin and evolution of universe. 
Mason Core: Natural Science Overview
Schedule Type: Lecture
Grading:
This course is graded on the Undergraduate Regular scale.

ASTR 301: Astrobiology. 3 credits.
Physical science perspective on origin and evolution of life on Earth and how life, in turn, has significantly influenced Earth's evolution. Topics include origin of Earth, mechanisms and sites for origin of life, co-evolution of life and Earth's atmosphere, habitability of planets, and the search for extraterrestrial life. Offered by Physics & Astronomy. Limited to three attempts.

Registration Restrictions:
Required Prerequisites: PHYS 160C or 170C.
C Requires minimum grade of C.

ASTR 302: Foundations of Cosmological Thought. 3 credits.
Examines scientific, historical, and philosophical foundations and development of cosmological thought from antiquity to the present. Emphasizes qualitative understanding of the development of cosmology concluding with the present concept of origin and evolution of universe. 
Mason Core: Natural Science Overview
Schedule Type: Lecture
Grading:
This course is graded on the Undergraduate Regular scale.

ASTR 301: Astrobiology. 3 credits.
Physical science perspective on origin and evolution of life on Earth and how life, in turn, has significantly influenced Earth's evolution. Topics include origin of Earth, mechanisms and sites for origin of life, co-evolution of life and Earth's atmosphere, habitability of planets, and the search for extraterrestrial life. Offered by Physics & Astronomy. Limited to three attempts.

Registration Restrictions:
Required Prerequisites: PHYS 160C or 170C.
C Requires minimum grade of C.

ASTR 302: Foundations of Cosmological Thought. 3 credits.
Examines scientific, historical, and philosophical foundations and development of cosmological thought from antiquity to the present. Emphasizes qualitative understanding of the development of cosmology concluding with the present concept of origin and evolution of universe. 
Mason Core: Natural Science Overview
Schedule Type: Lecture
Grading:
This course is graded on the Undergraduate Regular scale.

ASTR 301: Astrobiology. 3 credits.
Physical science perspective on origin and evolution of life on Earth and how life, in turn, has significantly influenced Earth's evolution. Topics include origin of Earth, mechanisms and sites for origin of life, co-evolution of life and Earth's atmosphere, habitability of planets, and the search for extraterrestrial life. Offered by Physics & Astronomy. Limited to three attempts.

Registration Restrictions:
Required Prerequisites: PHYS 160C or 170C.
C Requires minimum grade of C.
Specialized Designation: Topic Varies

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale.

400 Level Courses

ASTR 401: Computer Simulation in Astronomy. 3 credits.
Techniques and methods to simulate astronomical phenomena using a computer. Examples taken from a wide variety of astronomical phenomena, including radiation transfer in astrophysical objects, self-gravitating systems, hydrodynamics, and stellar models. Notes: Emphasizes hands-on projects. Offered by Physics & Astronomy. Limited to three attempts.

Registration Restrictions:
Required Prerequisites: ASTR 210C and PHYS 251C.
C Requires minimum grade of C.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale.

ASTR 402: RS: Methods of Observational Astronomy. 4 credits.
An introduction to the observational, statistical, and computational techniques used by observational astronomers. The course covers some of the basic skills needed to pursue a career in astronomy and is designed around preparing for and executing an observational research project. Fulfills writing intensive requirement in the major. Offered by Physics & Astronomy. Limited to three attempts.

Registration Restrictions:
Required Prerequisites: (PHYS 260C or 270C) and ASTR 124C, 210C and 401C and (ASTR 328C, 403C, 420C or 480C).
C May be taken concurrently.
C Requires minimum grade of C.

Schedule Type: Laboratory, Lecture

Grading:
This course is graded on the Undergraduate Regular scale.

ASTR 403: Planetary Science. 3 credits.
Introduction to the physics and chemistry of planets and their natural satellites, asteroids, and comets. Topics include history of the solar system; origin and evolution of planets, their internal structure and atmospheres; and analytical techniques used in remote and in situ study. Offered by Physics & Astronomy. Limited to three attempts.

Registration Restrictions:
Required Prerequisites: ASTR 210C and (PHYS 260C or 270C).
C Requires minimum grade of C.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale.

ASTR 404: Galaxies and Cosmology. 3 credits.
The structure of the Milky Way as the basis for our knowledge of galaxies; the properties of galaxies from our local neighborhood out to the youngest galaxies in the far distant universe; observational and theoretical approaches to the structure and evolution of galaxies; the basics of cosmology and the formation of structure in the universe. Computational tools introduced in ASTR 328 are developed further. Offered by Physics & Astronomy. Limited to three attempts.

Registration Restrictions:
Required Prerequisite: ASTR 328C.
C Requires minimum grade of C.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale.

ASTR 405: Honors Thesis in Astronomy I. 3 credits.
Project chosen and completed under the guidance of a faculty member, resulting in a written thesis. An oral progress report is required for ASTR 405. Offered by Physics & Astronomy. Limited to three attempts.

Registration Restrictions:
Required Prerequisites: (ASTR 210C and 328C) or ASTR 402C, PHYS 303C or 305C.
C Requires minimum grade of C.

Enrollment is limited to students with a major in Astronomy.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale.

ASTR 406: Honors Thesis in Astronomy II. 3 credits.
Project chosen and completed under the guidance of a faculty member, resulting in a written thesis. An oral progress report is required for ASTR 406. Offered by Physics & Astronomy. Limited to three attempts.

Registration Restrictions:
Required Prerequisite: ASTR 405C.
C Requires minimum grade of C.

Enrollment is limited to students with a major in Astronomy.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale.

ASTR 408: Senior Research. 3 credits.
Independent work under guidance of faculty member on research project in experimental, observational, or theoretical astronomy. Notes: Students may not receive more than 6 credits of ASTR 408 and 409. Written report on project required. May be taken twice with department permission. Offered by Physics & Astronomy. May be repeated within the degree for a maximum 6 credits.

Registration Restrictions:
Required Prerequisites: (ASTR 210C) and (ASTR 328C, 402C, PHYS 303C or 305C).
C Requires minimum grade of C.

Schedule Type: Research

Grading:
This course is graded on the Undergraduate Regular scale.
Grading:
This course is graded on the Undergraduate Regular scale.

**ASTR 409: Astronomy Internship. 3 credits.**
On-the-job experience for astronomy majors in industry or government laboratories, including summer research programs. Students work in observational, experimental, or theoretical astronomy, and prepare written report at end of internship. Notes: See department for other requirements and application procedure prior to enrollment. Students may not receive more than 6 credits of ASTR 408 and 409. Offered by Physics & Astronomy. Limited to three attempts.

**Registration Restrictions:**
**Required Prerequisites:** (ASTR 210\(^C\) and (ASTR 328\(^C\), 402\(^C\), PHYS 303\(^C\) or 305\(^C\)).
\(^C\) Requires minimum grade of C.

**Schedule Type:** Internship

**Grading:**
This course is graded on the Undergraduate Regular scale.

**ASTR 420: Exoplanets. 3 credits.**
Survey of exoplanet science. Topics include techniques for detecting and characterizing exoplanets, including their composition, atmospheres, and demographics. Offered by Physics & Astronomy. Limited to three attempts.

**Registration Restrictions:**
**Required Prerequisite:** ASTR 210\(^C\).
\(^C\) Requires minimum grade of C.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale.

**ASTR 480: The Interstellar Medium. 3 credits.**
Physical processes in the interstellar medium. Topics include the production and transfer of radiation, ionization and recombination, atomic and molecular excitation, dust physics, gas heating and cooling, and star formation. Offered by Physics & Astronomy. Limited to three attempts.

**Registration Restrictions:**
**Required Prerequisites:** ASTR 210\(^C\) and (PHYS 260\(^C\) or 270\(^C\)).
\(^C\) Requires minimum grade of C.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale.

**500 Level Courses**

**ASTR 532: Phys Interplanetary Med. 3 credits.**
Techniques and methods to simulate astronomical phenomena using a computer. Examples taken from a wide variety of astronomical phenomena, including radiation transfer in astrophysical objects, self-gravitating systems, hydrodynamics, and stellar models. Offered by Physics & Astronomy. May not be repeated for credit.

**Recommended Prerequisite:** ASTR 210, PHYS 251

**Registration Restrictions:**
Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

**ASTR 590: Selected Topics in Astronomy and Astrophysics. 1-6 credits.**
Advanced topics from recent theoretical or observational developments and their applications. Satisfies needs of professional community to keep abreast of current developments. Offered by Physics & Astronomy. May be repeated within the degree for a maximum 6 credits.

**Specialized Designation:** Topic Varies

**Recommended Prerequisite:** Permission of instructor.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

**Grading:**
This course is graded on the Graduate Regular scale.

**600 Level Courses**

**ASTR 601: Computer Simulation in Astronomy. 3 credits.**
An introduction to the observational, statistical, and computational techniques used by observational astronomers. The course covers some of the basic skills needed to pursue a career in astronomy and is designed around preparing for and executing an observational research project. Offered by Physics & Astronomy. May not be repeated for credit.

**Recommended Prerequisite:** ASTR 210, PHYS 251

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

**Grading:**
This course is graded on the Graduate Regular scale.
Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Laboratory, Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

**ASTR 603:** Planetary Sciences. 3 credits.
Offered by Physics & Astronomy. May not be repeated for credit.

**Recommended Prerequisite:** ASTR 210, PHYS 260.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

**ASTR 604:** Galaxies and Cosmology. 3 credits.
The structure of the Milky Way as the basis for our knowledge of galaxies; the properties of galaxies from our local neighborhood out to the youngest galaxies in the far distant universe; observational and theoretical approaches to the structure and evolution of galaxies; the basics of cosmology and the formation of structure in the universe. Offered by Physics & Astronomy. May not be repeated for credit.

**Recommended Prerequisite:** ASTR 328 and MATH 214.

**Recommended Corequisite:** PHYS 308.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

**ASTR 620:** Exoplanets. 3 credits.
Survey of exoplanet science. Topics include techniques for detecting and characterizing exoplanets, including their composition, atmospheres, and demographics. Offered by Physics & Astronomy. May not be repeated for credit.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

**ASTR 660:** Plasma Physics for Space and Astrophysics. 3 credits.
Offered by Physics & Astronomy. May not be repeated for credit. Equivalent to PHYS 660.

**Recommended Prerequisite:** PHYS 305

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

**ASTR 680:** Physics of Interstellar Media. 3 credits.
Physical processes in the interstellar media. Topics include the production and transfer of radiation, ionization and recombination, atomic and molecular excitation, dust physics, gas heating and cooling, and star formation. Offered by Physics & Astronomy. May not be repeated for credit.

**Recommended Prerequisite:** PHYS 402 or permission of instructor.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

**700 Level Courses**

**ASTR 730:** Stellar Astrophysics. 3 credits.
Survey of contemporary astrophysics. Topics include physical concepts, stellar spectra, Hertzsprung-Russell diagram, stellar atmospheres, stellar structure, interstellar matter, stellar evolution, high-energy phenomena, hydrodynamical processes in astrophysics, accretion disk formation, and shock formation. Offered by Physics & Astronomy. May not be repeated for credit.

**Recommended Prerequisite:** MATH 214, PHYS 303, 305, 308.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.
ASTR 764: *Computationa Astrophysics*. 3 credits.
Covers statistical mechanics concepts important in astrophysics. Presents unified approach to particle acceleration and interaction theory based on analytical and numerical analysis of Boltzmann and Liouville equations. Discusses computational methods relevant to particle transport problems, with emphasis on Fokker-Planck and Monte Carlo solution techniques. Applications from space sciences include studies of cosmic ray acceleration, photon comptonization, particle transport in the near-Earth environment, energy transport in stellar atmospheres, and self-gravitating system dynamics. Offered by Physics & Astronomy. May not be repeated for credit. Equivalent to CSI 764.

**Recommended Prerequisite:** ASTR 530.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.
Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

ASTR 765: *High-Energy and Accretion Astrophysics*. 3 credits.
Overview of the field of atomic and nuclear physics, including nuclear reactions of use to high-energy astrophysics. Discusses radiation processes in cosmic plasmas emphasizing quantum mechanical calculations; stellar evolution and nucleosynthesis; computational models of stellar evolution; binary stars and accretion disks; numerical models of the structure of accretion disks; compact stars, white dwarfs, neutron stars, and black holes; acceleration processes and cosmic rays; interstellar medium and propagation of cosmic rays; high-energy processes in the center of galaxies; and ground- and space-based techniques and observations. Offered by Physics & Astronomy. May not be repeated for credit.

**Recommended Prerequisite:** PHYS 502 and 513, and ASTR 530; or permission of instructor.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.
Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

ASTR 790: *Topics in Astronomy and Astrophysics*. 1-6 credits.
Topics from recent theoretical or observational developments and applications not covered in fixed-content astronomy and astrophysics courses. Notes: Satisfies need of professional community to keep abreast of current developments. Offered by Physics & Astronomy. May be repeated within the degree for a maximum 6 credits.

**Specialized Designation:** Topic Varies

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.
Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

ASTR 796: *Directed Reading and Research*. 1-12 credits.
Reading and research on a specific topic in astronomy, astrophysics, or related field under direction of faculty member. Offered by Physics & Astronomy. May be repeated within the degree for a maximum 12 credits.

**Recommended Prerequisite:** Admission to masters program and permission of instructor.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.
Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Research

**Grading:**
This course is graded on the Graduate Regular scale.

ASTR 798: *Research Project*. 3 credits.
Research project chosen and completed under guidance of graduate faculty member resulting in an acceptable technical report. Offered by Physics & Astronomy. May not be repeated for credit.

**Recommended Prerequisite:** Nine graduate credits or permission of instructor.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.
Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Thesis

**Grading:**
This course is graded on the Satisfactory/No Credit scale.

Research project chosen and completed under guidance of graduate faculty member resulting in acceptable technical report and oral defense acceptable to three-faculty-member thesis committee. Offered by Physics & Astronomy. May be repeated within the degree.

**Recommended Prerequisite:** 9 graduate credits and permission of instructor.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.
Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Thesis

**Grading:**
This course is graded on the Satisfactory/No Credit scale.

900 Level Courses

Covers development of a research proposal under the guidance of a dissertation director and the doctoral committee. The proposal forms the basis for the doctoral dissertation. Notes: Note: No more than 24 credits in ASTR/PHYS 998 and ASTR/PHYS 999 may be applied toward satisfying doctoral degree requirements in the physics PhD program. Out of the 24, no more than 12 credits of ASTR/PHYS 998 may be applied.
Athletic Training Education Program (ATEP)

100 Level Courses

ATEP 120: First Aid and Emergency Care. 2 credits.
Covers emergency management procedures for various injuries and sudden illnesses, including 1- and 2-person CPR, and use of an Automated External Defibrillator (AED) for cardiac emergencies and basic first aid techniques; certification in first aid and CPR. Offered by School of Kinesiology. Limited to two attempts.

Schedule Type: Lecture
Grading:
This course is graded on the Satisfactory/No Credit scale.

ATEP 150: Introduction to Athletic Training and Preventative Care Techniques. 3 credits.
Introduces the profession of athletic training and the basic principles of preventative care commonly used in the profession. Topics will include athletic training facility organization and procedures; protective sports equipment; construction of protective devices; and application of protective taping, braces, wrapping, and protective pads. Areas to be studied include the role of the athletic trainer in sports medicine, mechanisms of athletic injuries, tissue response to injury, blood-borne pathogens, introductory techniques of the assessment and evaluation of athletic injuries and emergency procedures. Offered by School of Kinesiology. Limited to three attempts.

Schedule Type: Lecture
Grading:
This course is graded on the Satisfactory/No Credit scale.

200 Level Courses

ATEP 201: Medical and Scientific Terminology. 3 credits.
Foundations of scientific and medical vocabulary including prefixes, suffixes and stems used to form compound words. Offered by School of Kinesiology. Limited to three attempts.

Schedule Type: Lecture
Grading:
This course is graded on the Undergraduate Regular scale.

ATEP 203: Prevention, Recognition, and Management of Athletic and Fitness Related Injuries. 3 credits.
Provides coaches and fitness professionals with theory on the prevention, recognition, and management of injuries and conditions that occur in athletic competition and recreational fitness activities. Offered by School of Kinesiology. Limited to three attempts.

Schedule Type: Lecture
Grading:
This course is graded on the Undergraduate Regular scale.

ATEP 205: Cultural Competence. 3 credits.
Explores cultural competence and its integration for effective professional practice. Includes communication styles, daily living practices, common sensitivities, self-awareness, and historical cultural implications in multicultural environments. Offered by School of Kinesiology. Limited to three attempts.

Schedule Type: Lecture
Grading:
This course is graded on the Undergraduate Regular scale.

ATEP 250: Physical Assessment of the Lower Body. 3 credits.
An analysis of the principles of physical assessment of the lower body. Notes: Formal acceptance to the professional phase of the ATEP. Offered by School of Kinesiology. Limited to three attempts.

Recommended Prerequisite: Grade of C or higher in ATEP 150, ATEP 180, BIOL 124, BIOL 125, HEAL 110, and ATEP 300.

Recommended Corequisite: ATEP 255, ATEP 256

Schedule Type: Lecture
Grading:
This course is graded on the Undergraduate Regular scale.

ATEP 255: Clinical Techniques I: Physical Assessment of the Lower Body. 3 credits.
An analysis of physical assessment clinical techniques of the lower body (including the lower extremity and abdomen). Notes: Formal acceptance to the professional phase of the ATEP. Offered by School of Kinesiology. Limited to three attempts.

Recommended Prerequisite: Grade of C or higher in ATEP 150, ATEP 180, BIOL 124, BIOL 125, HEAL 110, and ATEP 300.

Recommended Corequisite: ATEP 250, ATEP 256

Schedule Type: Laboratory
**ATEP 250: Practicum I: Physical Assessment of the Lower Body.** 3 credits.
A clinical practicum field experience under the direct supervision of a preceptor with emphasis on physical assessment of the lower body. Notes: Formal acceptance to the professional phase of the ATEP; Current Emergency Cardiac Care (ECC) Certification. Offered by School of Kinesiology. Limited to three attempts.

**Recommended Prerequisite:** Grade of C or higher in ATEP 150, ATEP 180, BIOL 124, BIOL 125, HEAL 110, and ATEP 300.

**Recommended Corequisite:** ATEP 250, ATEP 255

**Schedule Type:** Internship

**Grading:**
This course is graded on the Undergraduate Regular scale.

---

**ATEP 260: Physical Assessment of the Upper Body.** 3 credits.
An analysis of the principles of physical assessment of the upper body. Notes: Formal acceptance to the professional phase of the ATEP Offered by School of Kinesiology. Limited to three attempts.

**Recommended Prerequisite:** Grade of C or higher in ATEP 150, ATEP 180, ATEP 250, ATEP 255, ATEP 256, ATEP 300, BIOL 124, BIOL 125, HEAL 110, HEAL 230.

**Recommended Corequisite:** ATEP 265, ATEP 266.

**Schedule Type:** Laboratory

**Grading:**
This course is graded on the Undergraduate Regular scale.

---

**ATEP 265: Clinical Techniques II: Physical Assessment of the Upper Body.** 3 credits.
An analysis of physical assessment clinical techniques of the upper body (including the upper extremity, head, and neck). Notes: Formal acceptance to the professional phase of the ATEP Offered by School of Kinesiology. Limited to three attempts.

**Recommended Prerequisite:** Grade of C or higher in ATEP 150, ATEP 180, ATEP 250, ATEP 255, ATEP 256, ATEP 300, BIOL 124, BIOL 125, HEAL 110, HEAL 230.

**Recommended Corequisite:** ATEP 260, ATEP 266

**Schedule Type:** Laboratory

**Grading:**
This course is graded on the Undergraduate Regular scale.

---

**ATEP 266: Practicum II: Physical Assessment of the Upper Body.** 3 credits.
A clinical practicum field experience under the direct supervision of a preceptor with emphasis on physical assessment of the upper body. Notes: Formal acceptance to the professional phase of the ATEP; Emergency Cardiac Care (ECC) Certification Offered by School of Kinesiology. Limited to three attempts.

**Recommended Prerequisite:** Grade of C or higher in ATEP 150, 180, 250, 255, 256, 300; BIOL 124, 125; HEAL 110, 230.

**Recommended Corequisite:** ATEP 260, ATEP 265
ATHLETIC TRAINING EDUCATION PROGRAM (ATEP)

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Special scale.

ATEP 325: Athletic Training Foundations. 3 credits.
Investigates the knowledge, skill and professional foundations of the athletic training. Emphasizes is placed on the role of the athletic trainer as a member of the health care system by decision-making through evidence-based practice and foundational skills including fitting protective equipment and devices, and prophylactic preventative taping. Admission to the professional phase of the ATEP. Offered by School of Kinesiology. Limited to three attempts.

Registration Restrictions:
Required Prerequisites: ATEP 120, 150, 201, 300, BIOL 124, 125 and HEAL 230.
C Requires minimum grade of C.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale.

ATEP 330: Emergency Procedures for Athletic Trainers. 3 credits.
Investigates the scientific and philosophical foundations of pre-hospital emergency care principles pertinent to athletic trainers. Develops knowledge, critical thinking and problem solving skills necessary to correctly apply emergency care principles and associated skills in a variety of clinical and professional settings. Admission to the professional phase of ATEP. Offered by School of Kinesiology. Limited to three attempts.

Recommended Corequisite: ATEP 340, 345, 351, 354.

Registration Restrictions:
Required Prerequisites: ATEP 310, 320 and KINE 450.
C Requires minimum grade of C.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale.

ATEP 340: Lower Body Physical Assessment. 3 credits.
Analyzes principles of lower body physical assessment. Investigates mechanisms of injury, the evaluation process, and testing leading to diagnosis. Admission to the professional phase of the ATEP. Offered by School of Kinesiology. Limited to three attempts.

Recommended Corequisite: ATEP 330, ATEP 340, ATEP 351, ATEP 354.

Registration Restrictions:
Required Prerequisites: KINE 450, ATEP 310 and 320.
C Requires minimum grade of C.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale.

ATEP 345: Athletic Training Clinical Techniques 1. 3 credits.
Applies principles of lower body, thoracic and lumbar spine physical assessment. develops evaluation skills including special testing leading to diagnosis. Admission to the professional phase of ATEP. Offered by School of Kinesiology. Limited to three attempts.

Recommended Corequisite: ATEP 330, ATEP 340, ATEP 351, ATEP 354.

Registration Restrictions:
Required Prerequisites: KINE 450, ATEP 310 and 320.
C Requires minimum grade of C.

Schedule Type: Laboratory

Grading:
This course is graded on the Undergraduate Regular scale.

ATEP 350: Therapeutic Interventions I. 3 credits.
Integrates the use of therapeutic modalities and rehabilitation in the treatment of injuries and conditions including indications, contraindications, physiological effects, special programs, and resistance methods used with therapeutic modalities and prevention/rehabilitation methods. Offered by School of Kinesiology. Limited to three attempts.

Recommended Prerequisite: Grade of C or higher in ATEP 150, 180, 250, 255, 256, 260, 265, 266, 270, 300; BIOL 124, 125; HEAL 110, 230; KINE 310.

Recommended Corequisite: ATEP 355 and 356.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale.

ATEP 351: Lower Body Therapeutic Interventions. 3 credits.
Develops, implements, and evaluates treatment plans using therapeutic modalities and rehabilitation interventions in the treatment of lower body injuries and conditions. Establishes an evidence-based approach to therapeutic interventions use in patient treatment. Admission to the professional phase of the ATEP. Offered by School of Kinesiology. Limited to three attempts.

Recommended Corequisite: ATEP 330, ATEP 340, ATEP 345, ATEP 354.

Registration Restrictions:
Required Prerequisites: KINE 450, ATEP 310 and 320.
C Requires minimum grade of C.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale.

ATEP 354: Athletic Training Clinical Techniques 2. 3 credits.
Applies therapeutic interventions for the lower body in a laboratory setting. Develops rehabilitation treatment plans and skills necessary to carry out patient care. Admission to the professional phase of the ATEP. Offered by School of Kinesiology. Limited to three attempts.

Recommended Corequisite: ATEP 330, ATEP 340, ATEP 345, ATEP 351.

Registration Restrictions:
Required Prerequisites: KINE 450, ATEP 310 and 320.
C Requires minimum grade of C.

Schedule Type: Laboratory

Grading:
This course is graded on the Undergraduate Regular scale.

ATEP 355: Clinical Techniques 3: Therapeutic Interventions I. 3 credits.
An examination of the scientific theory and standard operating procedures necessary for the safe application of therapeutic modalities in a physically active patient population. Offered by School of Kinesiology. Limited to three attempts.

Recommended Prerequisite: Grade of C or higher in ATEP 150, 180, 250, 255, 256, 260, 265, 266, 270, 300; BIOL 124, 125; HEAL 110, 230; KINE 310.

Recommended Corequisite: ATEP 350 and 356.

Registration Restrictions:
Enrollment is limited to students with a major, minor, or concentration in Athletic Training.

Schedule Type: Laboratory

Grading:
This course is graded on the Undergraduate Regular scale.

ATEP 356: Practicum III: Therapeutic Modalities. 3 credits.
A clinical practicum field experience under the direct supervision of a preceptor with emphasis on therapeutic modalities. Notes: Formal Acceptance into the ATEP. Offered by School of Kinesiology. Limited to three attempts.

Recommended Prerequisite: Grade of C or higher in ATEP 150, 180, 250, 255, 260, 265, 266, 270, 300 BIOL 124, 125; HEAL 110, 230; KINE 310.

Recommended Corequisite: ATEP 350, 355.

Schedule Type: Internship

Grading:
This course is graded on the Undergraduate Regular scale.

ATEP 360: Therapeutic Interventions 2. 3 credits.
Integrated approach to the use of therapeutic modalities and rehabilitation in the treatment of injuries and conditions. Special consideration to specific body regions including a focus on the development, implementation, and evaluation of treatment plans. Notes: Formal acceptance into the professional phase of the ATEP. Offered by School of Kinesiology. Limited to three attempts.

Recommended Prerequisite: Grade of C or higher in ATEP 150, 180, 250, 255, 256, 260, 265, 266, 270, 300; BIOL 124, 125; HEAL 110, 230; KINE 310.

Recommended Corequisite: ATEP 365, 366.

Registration Restrictions:
Enrollment is limited to students with a major, minor, or concentration in Athletic Training.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale.

ATEP 361: Upper Body Therapeutic Interventions. 3 credits.
Utilizes an integrated approach to therapeutic interventions including modalities and rehabilitation in the treatment of upper body, head and neck injuries and conditions. Includes development, implementation, and evaluation of treatment plans for upper body, head and neck injuries.

Admission to the professional phase of the ATEP. Offered by School of Kinesiology. Limited to three attempts.

Recommended Corequisite: ATEP 365, ATEP 367, ATEP 370, ATEP 375.

Registration Restrictions:
Required Prerequisites: ATEP 351C, 354C, 330C, 340C and 345C.
C Requires minimum grade of C.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale.

ATEP 365: Athletic Training Clinical Techniques 4. 3 credits.
Applies therapeutic interventions for the upper body, head and neck in a laboratory setting. Develops rehabilitation treatment plans and skills necessary to carry out patient care. Offered by School of Kinesiology. Limited to three attempts.

Registration Restrictions:
Students with a class of Freshman or Sophomore may not enroll.

Enrollment is limited to students with a major in Athletic Training.

Schedule Type: Laboratory

Grading:
This course is graded on the Undergraduate Regular scale.

ATEP 366: Practicum IV: Therapeutic Rehabilitation. 3 credits.
A clinical practicum field experience under the direct supervision of a preceptor with emphasis on therapeutic rehabilitation. Notes: Formal acceptance into the professional phase of the ATEP; Current Emergency Cardiac Care (ECC) Certification. Offered by School of Kinesiology. Limited to three attempts.

Recommended Prerequisite: Grade of C or Better ATEP 150, 180, 250, 255, 256, 260, 265, 266, 270, 350, 355, 356; BIOL 124, 125; HEAL 110, 230; PHED 300 and 450.

Recommended Corequisite: ATEP 360, ATEP 365.

Schedule Type: Internship

Grading:
This course is graded on the Undergraduate Regular scale.

ATEP 367: Athletic Training Practicum 1. 2 credits.
Emphasizes physical assessment and therapeutic interventions of the lower body in a clinical immersion practicum field experience under the direct supervision of a preceptor for 150 hours. Offered by School of Kinesiology. Limited to three attempts.

Recommended Corequisite: ATEP 361, ATEP 365, ATEP 370, ATEP 375.

Registration Restrictions:
Required Prerequisites: ATEP 330C, 340C, 345C, 351C and 354C.
C Requires minimum grade of C.

Schedule Type: Internship

Grading:
This course is graded on the Undergraduate Special scale.
ATEP 370: Upper Body Physical Assessment. 3 credits.
Analyzes the principles of upper body physical assessment. Investigates mechanisms of injury, the evaluation process, and testing leading to diagnosis. Offered by School of Kinesiology. Limited to three attempts.

Recommended Corequisite: ATEP 361, ATEP 365, ATEP 367, ATEP 375.

Registration Restrictions:
Required Prerequisites: ATEP 330 C, 340 C, 345 C, 351 C and 354 C.
C Requires minimum grade of C.

Schedule Type: Lecture
Grading:
This course is graded on the Undergraduate Regular scale.

ATEP 375: Athletic Training Clinical Techniques 3. 3 credits.
Applies principles of upper body, head and neck physical assessment. Develops evaluation skills including special testing leading to diagnosis. Offered by School of Kinesiology. Limited to three attempts.

Recommended Corequisite: ATEP 361, ATEP 365, ATEP 367, ATEP 370.

Registration Restrictions:
Required Prerequisites: ATEP 330 C, 340 C, 345 C, 351 C and 354 C.
C Requires minimum grade of C.

Schedule Type: Laboratory
Grading:
This course is graded on the Undergraduate Regular scale.

400 Level Courses
ATEP 400: Pathopharmacology. 3 credits.
Examines the assessment and management techniques of general medical conditions and pharmacological principles and interventions. Offered by School of Kinesiology. Limited to three attempts.

Registration Restrictions:
Required Prerequisites: ATEP 300 C and KINE 310 C.
C Requires minimum grade of C.

Schedule Type: Lecture
Grading:
This course is graded on the Undergraduate Regular scale.

ATEP 441: Senior Seminar in Athletic Training. 3 credits.
Capstone educational experience focusing on current topics in the Athletic Training Profession and career development issues. Offered by School of Kinesiology. Limited to three attempts.

Mason Core: Capstone
Recommended Prerequisite: Grade of C or higher in ATEP 150, 180, 250, 255, 256, 260, 265, 266, 270, 300, 350, 355, 365, 366; BIOL 124, 125; HEAL 110, 230; KINE 310, 360.

Schedule Type: Internship
Grading:
This course is graded on the Undergraduate Regular scale.

ATEP 450: Administration and Management in Athletic Training. 3 credits.
Focuses on the professional management and administrative issues in athletic training including the planning, designing, development, organization, implementation, direction, and evaluation of a health care program. Discusses current issues in athletic training related to professional conduct and practice. Offered by School of Kinesiology. Limited to three attempts.

Recommended Prerequisite: ATEP 361, 365, 370, 375 and 400 C.
C Requires minimum grade of C.

Schedule Type: Lecture
Grading:
This course is graded on the Undergraduate Regular scale.

ATEP 456: Practicum 5 Professional Integration. 6 credits.
A clinical practicum field experience under the direct supervision of a preceptor with emphasis on professional skill integration. Notes: Formal acceptance into the professional phase of the ATEP; Current Emergency Cardiac Care (ECC) Certification. Offered by School of Kinesiology. Limited to three attempts.

Recommended Prerequisite: Grade of C or higher in ATEP 150, 180, 250, 255, 256, 260, 265, 266, 270, 300, 350, 355, 360, 365, 366, BIOL 124, 125; HEAL 110, 230; KINE 310, 360.

Recommended Corequisite: ATEP 450.

Schedule Type: Internship
Grading:
This course is graded on the Undergraduate Regular scale.

ATEP 457: Athletic Training Practicum 2. 1 credit.
Emphasizes physical assessment and therapeutic interventions of the upper body with non-sport populations and assessment of general medical conditions in a clinical practicum field experience under the direct supervision of a preceptor for 75 hours. Offered by School of Kinesiology. Limited to three attempts.

Recommended Corequisite: ATEP 450.

Registration Restrictions:
Required Prerequisites: ATEP 361 C, 365 C, 367 C, 370 C, 375 C and 400 C.
C Requires minimum grade of C.

Schedule Type: Internship
Grading:
This course is graded on the Undergraduate Special scale.

ATEP 460: Pediatric Sports Medicine. 3 credits.
Examines evidence-based practices for injury preventions, sport safety, emergency preparedness, and risk management within youth and scholastic sport. Offered by School of Kinesiology. Limited to three attempts.

Recommended Corequisite: ATEP 470, 476.

Registration Restrictions:
Required Prerequisites: ATEP 300 C and KINE 310 C.
C Requires minimum grade of C.

Schedule Type: Lecture
Grading:
This course is graded on the Undergraduate Regular scale.
ATEP 466: Athletic Training Practicum 3. 2 credits.
Emphasizes injury prevention administration physical assessment and therapeutic intervention during athletics preseason in a clinical practicum field experience under the direct supervision of a preceptor for 150 hours. Offered by School of Kinesiology. Limited to three attempts.

Registration Restrictions:
Required Prerequisites: ATEP 361C, 365C, 367C, 370C, 375C and 400C.
C Requires minimum grade of C.

Schedule Type: Internship

Grading:
This course is graded on the Undergraduate Special scale.

ATEP 470: Post Rehabilitative Therapeutic Interventions. 2 credits.
Explores current topics of musculoskeletal injury prevention and intervention. Investigates injury epidemiology, pain and nutritional theories. Offered by School of Kinesiology. Limited to three attempts.

Recommended Corequisite: ATEP 476.

Registration Restrictions:
Required Prerequisites: ATEP 450C, 457C and 466C.
C Requires minimum grade of C.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale.

ATEP 476: Athletic Training Practicum 4. 4 credits.
Emphasizes physical assessment and therapeutic interventions of the upper body in a clinical practicum field experience under the direct supervision of a preceptor for 300 hours. Offered by School of Kinesiology. Limited to three attempts.

Recommended Corequisite: ATEP 470.

Registration Restrictions:
Required Prerequisites: ATEP 450C, 457C and 466C.
C Requires minimum grade of C.

Schedule Type: Internship

Grading:
This course is graded on the Undergraduate Regular scale.

ATEP 480: Athletic Training Practicum 5. 6 credits.
Emphasizes professional skill integration with a clinical practicum field experience under the direct supervision of a preceptor for 400 hours Offered by School of Kinesiology. Limited to three attempts.

Recommended Corequisite: ATEP 480.

Registration Restrictions:
Required Prerequisites: ATEP 460C, 470C and 476C.
C Requires minimum grade of C.

Schedule Type: Internship

Grading:
This course is graded on the Undergraduate Regular scale.

ATEP 499: Independent Study in Athletic Training. 1-6 credits.
Study of a topic area in athletic training research, theory, or practice under direction of a faculty member. May be repeated, but not more than 6 total credits may be earned. Offered by School of Kinesiology. May be repeated within the degree.

Schedule Type: Independent Study

Grading:
This course is graded on the Undergraduate Regular scale.

500 Level Courses

ATEP 510: Advanced Functional Anatomy. 3 credits.
Investigates the musculoskeletal anatomy including innervation, vascular anatomy, and function of the neck, trunk and limbs. Synthesizes anatomy, physiology, and human movement as it relates to injury; case studies are used to enhance the understanding of human anatomy and interpret movement impairments. Offered by School of Kinesiology. May not be repeated for credit.

Recommended Prerequisite: Basic human anatomy and physiology and functional anatomy knowledge.

Recommended Corequisite: ATEP 520 and 525.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Special scale.

ATEP 520: Therapeutic Interventions Foundations. 3 credits.
Explores foundational knowledge and skills necessary for the safe, effective, and evidenced-based application of therapeutic interventions. Investigates physiologic response to injury and healing, physiologic cause of pain, physiologic response of tissue to therapeutic intervention including modalities and exercise. Offered by School of Kinesiology. May not be repeated for credit.

Recommended Prerequisite: Basic human anatomy and physiology and functional anatomy knowledge.

**Recommended Corequisite:** ATEP 510 and 525.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Special scale.

**ATEP 525: Athletic Training Foundations. 3 credits.**
Investigates the knowledge, skill and professional foundations of the athletic training. Emphasizes is placed on the role of the athletic trainer as a member of the health care system by decision-making through evidence-based practice and foundational skills including fitting protective equipment and devices, and prophylactic preventative taping. Offered by School of Kinesiology. May not be repeated for credit.

**Recommended Corequisite:** ATEP 510 and 520.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

**ATEP 530: Emergency Procedures for Athletic Trainers. 3 credits.**
Investigates the scientific and philosophical foundations of pre-hospital emergency care principles pertinent to athletic trainers. Develops knowledge, critical thinking and problem solving skills necessary to correctly apply emergency care principles and associated skills in a variety of clinical and professional settings. Offered by School of Kinesiology. May not be repeated for credit.

**Recommended Corequisite:** ATEP 540, 545, 550, 555.

**Registration Restrictions:**
Required Prerequisites: ATEP 510\(^B\) and 520\(^B\).
\(^B\)- Requires minimum grade of B-.

Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to students with a major in Athletic Training.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

**ATEP 540: Lower Body Physical Assessment. 3 credits.**
Analyses principles of lower body physical assessment. Investigates mechanisms of injury, the evaluation process, and testing leading to diagnosis. Offered by School of Kinesiology. May not be repeated for credit.

**Recommended Corequisite:** ATEP 530, 545, 550, 555.

**Registration Restrictions:**
Required Prerequisites: ATEP 510\(^B\) and 520\(^B\).
\(^B\)- Requires minimum grade of B-.

Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to students with a major in Athletic Training.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

**ATEP 545: Athletic Training Clinical Techniques 1. 3 credits.**
Applies principles of lower body, thoracic and lumbar spine physical assessment. Develops evaluation skills including special testing leading to diagnosis. Offered by School of Kinesiology. May not be repeated for credit.

**Recommended Corequisite:** ATEP 530, 540, 545, 550, 555.

**Registration Restrictions:**
Required Prerequisites: ATEP 510\(^B\) and 520\(^B\).
\(^B\)- Requires minimum grade of B-.

Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to students with a major in Athletic Training.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

**ATEP 550: Lower Body Therapeutic Interventions. 3 credits.**
Develops, implements, and evaluates treatment plans using therapeutic modalities and rehabilitation interventions in the treatment of lower body injuries and conditions. Establishes an evidence-based approach to therapeutic interventions use in patient treatment. Offered by School of Kinesiology. May not be repeated for credit.

**Recommended Corequisite:** ATEP 530, 540, 545, 550, 555.

**Registration Restrictions:**
Required Prerequisites: ATEP 510\(^B\) and 520\(^B\).
B- Requires minimum grade of B-.

Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to students with a major in Athletic Training.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale.

ATEP 555: Athletic Training Clinical Techniques 2. 3 credits.
Applies therapeutic interventions for the lower body in a laboratory setting. Develops rehabilitation treatment plans and skills necessary to carry out patient care. Offered by School of Kinesiology. May not be repeated for credit.

Recommended Corequisite: ATEP 530, 540, 545, 550.

Registration Restrictions:
Required Prerequisites: ATEP 510 B- and 520 B-.
B- Requires minimum grade of B-.

Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to students with a major in Athletic Training.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Laboratory

Grading:
This course is graded on the Graduate Regular scale.

ATEP 560: Upper Body Therapeutic Interventions. 3 credits.
Utilizes an integrated approach to therapeutic interventions including modalities and rehabilitation in the treatment of upper body, head and neck injuries and conditions. Includes development, implementation, and evaluation of treatment plans for upper body, head and neck injuries. Offered by School of Kinesiology. May not be repeated for credit.

Recommended Corequisite: ATEP 565, 566, 570, 575, 600.

Registration Restrictions:
Required Prerequisites: ATEP 530 B-, 540 B-, 545 B-, 550 B- and 555 B-.
B- Requires minimum grade of B-.

Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to students with a major in Athletic Training.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Internship

Grading:
This course is graded on the Graduate Special scale.

ATEP 570: Upper Body Physical Assessment. 3 credits.
Analyzes principles of upper body physical assessment. Investigates mechanisms of injury, the evaluation process, and testing leading to diagnosis. Offered by School of Kinesiology. May not be repeated for credit.

Recommended Corequisite: ATEP 560, 565, 566, 570, 575, 600.
Registration Restrictions:
Required Prerequisites: ATEP 530\(^B\), 540\(^B\), 545\(^B\), 550\(^B\) and 555\(^B\).
\(^B\) Requires minimum grade of B.

Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to students with a major in Athletic Training.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale.

ATEP 571: Orthopedic Bracing. 3 credits.
Provide instruction and experience in the fabrication, fitting and delivery of orthotic devices and related durable medical equipment. Offered by School of Kinesiology. May be repeated within the degree for a maximum 6 credits.

Registration Restrictions:
Required Prerequisites: (ATEP 540\(^B\) and 570\(^B\)).
\(^B\) Requires minimum grade of B.

Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to students with a major in Athletic Training.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale.

ATEP 572: Orthopedic Casting. 3 credits.
Provide instruction and experience in the fabrication, fitting and delivery of orthotic casting and related durable medical equipment. Offered by School of Kinesiology. May be repeated within the degree for a maximum 6 credits.

Registration Restrictions:
Required Prerequisites: (ATEP 540\(^B\) and 570\(^B\)).
\(^B\) Requires minimum grade of B.

Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to students with a major in Athletic Training.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Laboratory

Grading:
This course is graded on the Graduate Regular scale.

ATEP 573: Special Topics. 3 credits.
Provide an understanding and appreciation of evidence-based practices in special topic areas of orthopedic practice including but not limited to: diagnostic imagining, surgical preparation practices and healthcare administration and leadership in clinical practice. Offered by School of Kinesiology. May be repeated within the degree for a maximum 6 credits.

Specialized Designation: Topic Varies

Registration Restrictions:
Required Prerequisites: (ATEP 540\(^B\) and 570\(^B\)).
\(^B\) Requires minimum grade of B.

Enrollment is limited to students with a major in Athletic Training.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale.

ATEP 575: Athletic Training Clinical Techniques 3. 3 credits.
Applies principles of upper body, head and neck physical assessment. Develops evaluation skills including special testing, leading to diagnosis. Offered by School of Kinesiology. May not be repeated for credit.

Recommended Corequisite: ATEP 560, 565, 566, 570, 600.

Registration Restrictions:
Required Prerequisites: ATEP 530\(^B\), 540\(^B\), 545\(^B\), 550\(^B\) and 555\(^B\).
\(^B\) Requires minimum grade of B.

Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to students with a major in Athletic Training.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale.

600 Level Courses

ATEP 600: Pathopharmacology. 3 credits.
Examines the assessment and management techniques of general medical conditions and pharmacological principles and interventions. Offered by School of Kinesiology. May not be repeated for credit.

Recommended Prerequisite: Basic human anatomy and physiology and Functional Anatomy knowledge needed.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.
Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale.

ATEP 650: Administration and Management in Athletic Training. 3 credits.
Focuses on the professional management and administrative issues in athletic training including the planning, designing, development, organization, implementation, direction, and evaluation of a health care program. Discusses current issues in athletic training related to professional conduct and practice. Offered by School of Kinesiology. May not be repeated for credit.

Recommended Corequisite: ATEP 656.

Registration Restrictions:
Required Prerequisites: ATEP 560 B-, 565 B-, 566 B-, 570 B- and 575 B-.
B- Requires minimum grade of B-.

Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale.

ATEP 656: Athletic Training Practicum 2. 1 credit.
Emphasizes therapeutic interventions with non-sport populations during a clinical practicum field experience under the direct supervision of a preceptor for 75 to 125 hours. Offered by School of Kinesiology. May not be repeated for credit.

Recommended Corequisite: ATEP 650.

Registration Restrictions:
Required Prerequisites: ATEP 560 B- and 656 B-.
B- Requires minimum grade of B-.

Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Internship

Grading:
This course is graded on the Graduate Special scale.

ATEP 660: Pediatric Sports Medicine. 3 credits.
Examines evidence-based practices for injury prevention, sport safety, emergency preparedness, and risk management within youth and scholastic sport. Offered by School of Kinesiology. May not be repeated for credit.

Recommended Prerequisite: Basic human anatomy and physiology and Functional Anatomy knowledge needed.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale.

ATEP 667: Athletic Training Practicum 3. 2 credits.
Emphasizes injury prevention, healthcare administration, clinical evaluation during and athletics pre-season clinical practicum field experience under the direct supervision of a preceptor for 150 to 200 hours. Offered by School of Kinesiology. May not be repeated for credit.

Recommended Prerequisite: ATEP 650.

Registration Restrictions:
Required Prerequisites: ATEP 650 B- and 656 B-.
B- Requires minimum grade of B-.

Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Internship

Grading:
This course is graded on the Graduate Special scale.

ATEP 670: Post Rehabilitative Therapeutic Interventions. 2 credits.
Examines current topics of musculoskeletal injury prevention and intervention. Investigates injury epidemiology, pain and nutritional theories. Offered by School of Kinesiology. May not be repeated for credit.

Recommended Corequisite: ATEP 660, 676.

Registration Restrictions:
Required Prerequisites: ATEP 650 B-, 656 B- and 667 B-.
B- Requires minimum grade of B-.

Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale.
ATEP 676: Athletic Training Practicum 4. 4 credits. Emphasizes clinical examination, therapeutic interventions, and psychosocial strategies during a clinical practicum field experience under the direct supervision of a preceptor for 300 to 400 hours. Offered by School of Kinesiology. May not be repeated for credit.

Recommended Corequisite: ATEP 660, 670.

Registration Restrictions:
Required Prerequisites: ATEP 650^B, 656^B, and 667^B. 
^B Requires minimum grade of B-.

Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Internship

Grading: This course is graded on the Graduate Regular scale.

ATEP 680: Athletic Training Research. 3 credits. Examines methods for critically evaluating clinical research techniques and interventions to improve patient outcomes specific to the practice of athletic training. Offered by School of Kinesiology. May not be repeated for credit.

Recommended Corequisite: ATEP 686.

Registration Restrictions:
Required Prerequisites: ATEP 660^B, 670^B, and 676^B. 
^B Requires minimum grade of B-.

Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading: This course is graded on the Graduate Regular scale.

ATEP 686: Athletic Training Practicum 5. 6 credits. Emphasizes professional development, evidence-based practice and integration of knowledge, skills and clinical decision-making during a clinical practicum field experience under the direct supervision of a preceptor for 450 to 600 hours. Offered by School of Kinesiology. May not be repeated for credit.

Recommended Corequisite: ATEP 680.

Registration Restrictions:
Required Prerequisites: ATEP 660^B, 670^B, and 676^B. 
^B Requires minimum grade of B-.

Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Seminar

Grading: This course is graded on the Undergraduate Regular scale.

BIS 300: Understanding Interdisciplinary Studies. 3 credits. Focuses on literature and issues relevant to interdisciplinary and multidisciplinary studies and the BIS program. Students explore selected topics, develop and gather feedback on individualized concentration proposals, and review BIS program requirements. Offered by School of Integrative Studies. Limited to three attempts.

Schedule Type: Lecture

Grading: This course is graded on the Undergraduate Regular scale.

BIS 301: Adult Learner Transition. 3 credits. A comprehensive, research-based, problem-solving educational experience in which adult students learn the multiple factors that affect adult degree completion, assess their situation regarding these factors, and develop skills and plans to overcome the challenges of completing a bachelor's degree as an adult. Offered by School of Integrative Studies. Limited to three attempts.

Schedule Type: Seminar

Grading: This course is graded on the Undergraduate Regular scale.

BIS 304: Introduction to BIS. 1 credit. This course serves new transfer students in the Bachelors of Individualized Studies (BIS) program, and assists them with a successful transition to Mason. Students develop relationships with peers, staff, and faculty. They are introduced to campus resources, with special emphasis on research and writing resources and tools, and work closely with BIS academic advisors and faculty. Notes: Only transfer students in their first or second semester at Mason are eligible to take this course. Only one of BIS 304, UNIV 300, UNIV 302, UNIV 303, UNIV 304, UNIV 305, or UNIV 308 may be taken for credit. Offered by School of Integrative Studies. Limited to three attempts. Equivalent to UNIV 304.

Schedule Type: Seminar

Grading: This course is graded on the Undergraduate Regular scale.

BIS 390: The Research Process. 3 credits. Focuses on skills to develop a research project, find and organize relevant information, examine and critique evidence, establish criteria, and create plan to complete senior project. Notes: Open only to pre-BIS students and BIS majors. Students cannot receive credit for both BIS 390 and 391. Offered by School of Integrative Studies. Limited to three attempts. Equivalent to BIS 391.
Specialized Designation: Writing Intensive in Major

Recommended Prerequisite: BIS 300 and grade of 2.0 or above in ENGL 302/ENGH 302.

Registration Restrictions:
Enrollment is limited to students with a major in Individualized Study.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale.

BIS 391: The Research Process for Honors. 3 credits.
Focuses on skills to develop an honors-level research project, find and organize relevant information, examine and critique evidence, establish criteria, and create plan to complete Honors Senior Research Project (BIS 490). Approved research proposal required prior to registration in BIS 490. Notes: Students cannot receive credit for both BIS 390 and 391. Offered by School of Integrative Studies. Limited to three attempts.

Recommended Prerequisite: Acceptance to pursue honors in the major.

Registration Restrictions:
Enrollment is limited to students with a major in Individualized Study.

Schedule Type: Seminar

Grading:
This course is graded on the Undergraduate Regular scale.

BIS 399: Special Topics. 1-3 credits.
Selected topics reflecting interest in specialized areas. Notes: May be repeated when topic is different. Offered by School of Integrative Studies. May be repeated within the term for a maximum 6 credits.

Specialized Designation: Topic Varies

Registration Restrictions:
Enrollment is limited to students with a major in Individualized Study.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale.

400 Level Courses
BIS 489: Directed Readings and Research. 1-3 credits.
Readings and research on a topic directly relevant to student's core concentration. Notes: Open only to pre-BIS students and BIS majors. Individualized sections by arrangement. Guided by instructor with expertise. Topics must be approved by instructor and BIS director prior to enrollment. Offered by School of Integrative Studies. May be repeated within the degree for a maximum 6 credits.

Recommended Prerequisite: Open only to degree students in the Bachelor of Individualized Study Program.

Schedule Type: Independent Study

Grading:
This course is graded on the Undergraduate Regular scale.

BIS 490: RS: Senior Project. 4 credits.
Project or thesis on a topic directly relevant to student's concentration, which will be formally presented to an audience of peers and faculty.

Guided by student's faculty advisor and 490 instructor. Notes: Open only to BIS majors. Individualized sections for BIS honors. Capstone course in BIS core concentration. Research proposals must be approved by faculty mentor, executive committee, and BIS director prior to enrollment. Offered by School of Integrative Studies. Limited to three attempts.

Mason Core: Synthesis

Specialized Designation: Research/Scholarship Intensive

Recommended Prerequisite: BIS 390.

Registration Restrictions:
Enrollment limited to students in the LA-BIS-INDV program.

Schedule Type: Independent Study

Grading:
This course is graded on the Undergraduate Special scale.

BIS 495: Career Practicum. 1-6 credits.
Supervised experience in application of specified area. Offered by School of Integrative Studies. May be repeated within the degree for a maximum 9 credits.

Recommended Prerequisite: Permission of instructor or BIS Director.

Schedule Type: Internship

Grading:
This course is graded on the Undergraduate Special scale.

Bachelor’s of Applied Science (BAS)

300 Level Courses
BAS 300: Building Professional Competencies. 3 credits.
This course serves as an orientation to the BAS degree program. Current strengths are assessed and future planning is highlighted. Core competency areas related to personal effectiveness and academic/workplace success are stressed. Introduction to the university online learning system and other available resources useful for degree completion are also emphasized. Offered by Provost’s Office. Limited to three attempts.

Registration Restrictions:
Enrollment limited to students in a Bachelor of Applied Science degree.

Schedule Type: Seminar

Grading:
This course is graded on the Undergraduate Regular scale.

BAS 490: Introduction to Research Methods. 3 credits.
This course introduces students to fundamental research methods and processes. Students will explore their research interests and identify one topic as well as learn to set up research questions, review literature, and define appropriate methods for data collection. This course intends to prepare students for their practicum study in BAS 491. Offered by Provost's Office. Limited to three attempts.

Registration Restrictions:
Required Prerequisite: BAS 300.C.
C Requires minimum grade of C.
Biodefense (BIOD)

Enrollment is limited to students with a major in Applied Science.

Enrollment limited to students in the UN-BAS-APLS program.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale.

**BIOD 491:** Applied Sciences Capstone. 3 credits.
Students participate in an approved fieldwork study program and complete a research project as identified in BAS 490 Introduction to Research Methods. The Capstone project involves choosing and researching a workplace problem; designing, implementing and evaluating a specific plan of action; and formally presenting the project once completed. Offered by Provost's Office. Limited to three attempts.

**Registration Restrictions:**
Required Prerequisite: BAS 490
C Requires minimum grade of C.

Enrollment is limited to students with a major in Applied Science.

**Schedule Type:** Internship

**Grading:**
This course is graded on the Undergraduate Regular scale.

Biodefense (BIOD)

600 Level Courses

**BIOD 604:** Emerging Infectious Diseases I: Bacteria and Toxins. 3 credits.
Covers the microbiology, pathogenesis, clinical effects, and epidemiology of bacteria and toxins that pose threats to global health or can be utilized as biological weapons. Offered by Schar School of Policy & Govt. May not be repeated for credit.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

**BIOD 605:** Emerging Infectious Diseases II: Viral Agents. 3 credits.
Covers the microbiology, pathogenesis, clinical effects, and epidemiology of viruses that pose threats to global health or can be utilized as biological weapons. Offered by Schar School of Policy & Govt. May not be repeated for credit.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

**BIOD 609:** Biodefense Strategy. 3 credits.
Introduces students to the biodefense and biosecurity strategies and policies of the United States, other nations, and international organizations. Evaluates the effectiveness of these policies in strengthening defenses, improving intelligence, increasing oversight, enhancing nonproliferation, and reinforcing norms. Examines the interaction of biodefense and biosecurity with homeland, national, and international security. Offered by Schar School of Policy & Govt. May not be repeated for credit.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

**BIOD 610:** Advanced Topics in Global Health Security. 1-4 credits.
Different topics, depending on instructor's specialty. Topics include ethical, legal, scientific, security, political, and/or policy aspects of global health security, emphasizing current problems and research. Notes: May be repeated when topic is different. Offered by Schar School of Policy & Govt. May be repeated within the term for a maximum 18 credits.

**Specialized Designation:** Topic Varies

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

**BIOD 620:** Global Health Security Policy. 3 credits.
Explores issues emerging from the interaction of health and security that represent novel challenges to policy makers confronting a rapidly changing international landscape. Examines the origin and evolution of the concept of health security. Analyzes strategic impact of infectious disease outbreaks, global health security case studies, global health governance, and formulation and implementation of U.S. global health security policy. Offered by Schar School of Policy & Govt. May not be repeated for credit.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.
Enrollment is limited to Graduate, Non-Degree or Undergraduate level students. Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

**BIOD 621: Ethics and International Security.** 3 credits.
Challenges students to wrestle with dilemmas raised by the desire to behave ethically in an international system in which consensus about ethical matters is absent. Students will develop, apply, and justify their own perspective on an ethical problem related to international security using ethical theory and social science research. Ethical issues related to nuclear, biological, and chemical weapons that confront researchers, policy makers, and practitioners will be addressed. Offered by Schar School of Policy & Govt. May not be repeated for credit.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

**BIOD 622: Negotiating in the International Arena.** 3 credits.
Provides students with the concepts and tools for analyzing complex negotiation processes and introduces them to the challenges facing international negotiators. Students will read about the frameworks and perspectives that have guided the scholarly research on negotiation, as well as the latest findings from that research; analyze complex cases of actual negotiations in the security, trade, and environmental areas; and negotiate key issues on the agendas of nations and international organizations. Offered by Schar School of Policy & Govt. May not be repeated for credit.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

**BIOD 629: Nonproliferation and Arms Control.** 3 credits.
Examines the array of national and international measures used to slow, halt, and reverse the spread of nuclear, biological, chemical, and missile weapons. Explores the theory and practice of proliferation to provide insights into the supply and demand aspects of proliferation. Offered by Schar School of Policy & Govt. May not be repeated for credit.

**Registration Restrictions:**
Enrollment limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

**BIOD 705: Intelligence: Theory and Practice.** 3 credits.
Theory and practice of intelligence, including the intelligence cycle, organization of the intelligence community, and the origins and impact of recent reforms. Examines the capabilities and limitations of the different collection disciplines, analytic methodologies and pathologies, and the relationship between intelligence and policy. Analyzes challenges posed by collecting and analyzing intelligence on weapons of mass destruction programs conducted by states and terrorists. Offered by Schar School of Policy & Govt. May not be repeated for credit.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

**BIOD 706: Nuclear, Biological, and Chemical Weapons Policy and Security.** 3 credits.
Explores the causes, conduct, and consequences of the proliferation of nuclear, biological, and chemical weapons. Covers the historical, technological, normative, and strategic factors that have promoted and restrained the spread of these weapons. Addresses the motives for states to develop these weapons and the debate over the security implications of nuclear, biological, and chemical weapon proliferation. Offered by Schar School of Policy & Govt. May not be repeated for credit.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

**BIOD 709: Nonproliferation and Arms Control.** 3 credits.
Examines the array of national and international measures used to slow, halt, and reverse the spread of nuclear, biological, chemical, and missile weapons. Explores the theory and practice of proliferation to provide insights into the supply and demand aspects of proliferation. Offered by Schar School of Policy & Govt. May not be repeated for credit.

**Registration Restrictions:**
Enrollment limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

**BIOD 710: Health Security Preparedness.** 3 credits.
Examines national and international public health and medical preparedness for and response to natural disasters, terrorist acts, and disease outbreaks. Explores organizational and policy architecture, implementation challenges, and strategies for preventing, detecting, and mitigating these threats. Offered by Schar School of Policy & Govt. May not be repeated for credit.

**Registration Restrictions:**
Enrollment limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

**BIOD 722: Examining Terrorist Groups.** 3 credits.
Introduction to terrorism including the history and evolution of terrorism, case studies of key terrorist groups, the current nature of the terrorist threat and counterterrorism strategies. Offered by Schar School of Policy & Govt. May not be repeated for credit.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

**BIOD 723: Legal Dimensions of Homeland Security.** 3 credits.
Introduces the impact of legal issues on homeland security and biodefense. Topics include the origins of the Department of Homeland Security, the relationship between public health and law enforcement, the role of the military in homeland security, trade-offs between privacy and security, legal aspects of public-private cooperation in biodefense and homeland security, quarantine authority and enforcement, ensuring compliance with international treaties, and implementing biosecurity regulations. Offered by Schar School of Policy & Govt. May not be repeated for credit.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

**BIOD 725: Terrorism and Weapons of Mass Destruction.** 3 credits.
Examines the capabilities and intentions of terrorists to acquire and use chemical, biological, radiological, and nuclear (CBRN) weapons. The course provides an in-depth understanding of the history of CBRN terrorism, the current challenges posed by this threat, and the range of national and international policy tools available to address this threat. Offered by Schar School of Policy & Govt. May not be repeated for credit.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

**BIOD 726: Food Security.** 3 credits.
Analyzes threats to food security globally including those related to climate change and environmental degradation; animal and plant diseases; access to clean water; agricultural terrorism; and antimicrobial resistance. Explores the national and global health, economic, social, and ethical impacts of these disruptive forces. Examines strategies for enhancing the security of the global food production and supply systems. Offered by Schar School of Policy & Govt. May not be repeated for credit.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Grading:**
This course is graded on the Graduate Regular scale.

**BIOD 751: Biosurveillance.** 3 credits.
Provides an understanding of the capabilities required to provide reliable early warning of disease outbreaks and identify their etiological agents. Assesses strengths and limitations of physicians, laboratories, epidemiologists, aerosol sensors, and syndromic surveillance systems. Considers challenges posed by the integration and analysis of the information collected by these sources. Offered by Schar School of Policy & Govt. May not be repeated for credit.

**Recommended Prerequisite:** BIOD 604 and BIOD 605; or permission of instructor.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

**BIOD 760: National Security Technology and Policy.** 3 credits.
Introduces students to the intersection of science, technology, and policy in national security. Will examine the players in the formation of science policy; the roles they play; how the types, uncertainties, and availability of data affect science policy debates; and how science policy decisions are made. Topics to be covered include weapons of mass destruction, nonlethal weapons, nanotechnology, bioengineering, energy security, and pandemic influenza. Offered by Schar School of Policy & Govt. May not be repeated for credit.

**Registration Restrictions:**
Enrollment is limited to Graduate, Non-Degree or Washington Consortium level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

**BIOD 762: Biotechnology and Society.** 3 credits.
Examines the growing role of biotechnology in modern society, including benefits to human and animal health, industrial applications, and potential for misuse. Analyzes key variables influencing the revolution in biotechnology and impact in both developed and developing countries. Explores the political, economic, social, legal, security, and ethical implications of advances in life sciences and biotechnology. Offered by Schar School of Policy & Govt. May not be repeated for credit.

**Recommended Prerequisite:** BIOD 604 and 605 or permission of instructor.

**Registration Restrictions:**
Enrollment is limited to students with a major in Biodefense, Biological Threat and Defense or Microbial Biodefense.

Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

**BIOD 766:** Development of Vaccines and Therapeutics. 3 credits. Analyzes the process of developing new medical countermeasures against biological weapons and emerging infectious diseases such as SARS and pandemic influenza. Special attention is paid to the scientific, technical, political, regulatory, and economic obstacles to developing new vaccines and therapeutics. Examines the causes and potential solutions of public and private sector failures. Offered by Schar School of Policy & Govt. May not be repeated for credit.

**Registration Restrictions:**
Required Prerequisites: BIOD 604B or 605B. Requires minimum grade of B-.

Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

**BIOD 768:** Master’s Supervised Internship. 1-6 credits. Internship under supervision of qualified professional in biodefense at a government agency, consulting firm, industrial firm, or other acceptable agency. Offered by Schar School of Policy & Govt. May be repeated within the degree for a maximum 6 credits.

**Recommended Prerequisite:** Permission of program director or advisor.

**Registration Restrictions:**
Enrollment is limited to students with a major in Biodefense, Biological Threat and Defense or Microbial Biodefense.

Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Internship

**Grading:**
This course is graded on the Graduate Special scale.

**BIOD 780:** Global Health Security Capstone. 3 credits. Provides students with the opportunity to hone their research, writing, collaboration, and presentation skills through completion of a capstone project that synthesizes the theoretical and subject matter knowledge students have gained in the program. Offered by Schar School of Policy & Govt. May not be repeated for credit.

**Recommended Prerequisite:** Permission of program director or advisor.

**Registration Restrictions:**
Enrollment is limited to students with a major in Biodefense, Biological Threat and Defense or Microbial Biodefense.

Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Seminar

**Grading:**
This course is graded on the Graduate Regular scale.

**BIOD 793:** Directed Studies in Biodefense. 1-3 credits. Individualized study of topics not otherwise available in graduate program. May involve reading assignments, tutorials, lectures, papers, presentations, or lab or field study, determined in consultation with instructor. Offered by Schar School of Policy & Govt. May be repeated within the degree for a maximum 6 credits.

**Recommended Prerequisite:** Permission of instructor and program director.

**Registration Restrictions:**
Enrollment is limited to students with a major in Biodefense, Biological Threat and Defense or Microbial Biodefense.

Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Independent Study

**Grading:**
This course is graded on the Graduate Special scale.

**BIOD 798:** Master’s Research Project in Biodefense. 3 credits. Research project related to student’s concentration under supervision of faculty advisor. Student produces substantial and original contribution to the field of biodefense on the model of an article in a scholarly journal. Offered by Schar School of Policy & Govt. May not be repeated for credit.

**Recommended Prerequisite:** 24 credits in BIOD and permission of project director.

**Registration Restrictions:**
Enrollment is limited to students with a major in Biodefense, Biological Threat and Defense or Microbial Biodefense.

Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Thesis

**Grading:**
This course is graded on the Satisfactory/No Credit scale.

**800 Level Courses**

**BIOD 810:** Advanced Seminar in Biodefense. 3 credits. Explores issues of contemporary and emerging concern in biodefense and biosecurity. Topics may include legal, ethical, scientific, economic, and political aspects of biodefense and biosecurity. Notes: May be repeated when topic is different. Offered by Schar School of Policy & Govt. May be repeated within the term for a maximum 9 credits.

**Recommended Prerequisite:** 24 credits in BIOD and permission of program director.

**Registration Restrictions:**
Enrollment is limited to students with a major in Biodefense, Biological Threat and Defense or Microbial Biodefense.

Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.
Bioengineering (BENG)

100 Level Courses

BENG 101: Introduction to Bioengineering. 3 credits.
This course introduces students to the field of Bioengineering in general and here at Mason and the use of technology and innovation in solving problems in biology and medicine with an emphasis on engineering tools and concepts. With its recitation, it also introduces mathematical modeling and analysis of bioengineering problems through the use of standard software packages for simulation. Topics include: exploration of the field of Bioengineering, Matlab and other software applications for modeling and analyzing biomedical problems, engineering design, career development, and ethics. Offered by Bioengineering. Limited to two attempts.

Recommended Prerequisite: Permission of program director.

Registration Restrictions:
Students with the terminated from VSE major attribute may not enroll.

Schedule Type: Lecture, Recitation
Grading:
This course is graded on the Undergraduate Regular scale.

200 Level Courses

BENG 214: Physiology for Engineers. 3 credits.
This course provides a broad introduction to the subject of human physiology focusing on learning the subject matter from an engineering viewpoint. This course emphasizes organs and physiological systems (e.g. renal, cardiac) and applies engineering modeling concepts (using Matlab) to those systems. Offered by Bioengineering. Limited to two attempts. Equivalent to BENG 313.

Recommended Prerequisite: BENG 101, BIOL 213, and MATH 114.

Registration Restrictions:
Required Prerequisites: BENG 101, BIOL 213 and MATH 114.

Students with the terminated from VSE major attribute may not enroll.

Schedule Type: Lecture, Recitation
Grading:
This course is graded on the Undergraduate Regular scale.

BENG 220: Physical Bases of Biomedical Systems. 3 credits.
Introduces the physical basis of biomedical systems and signals. Demonstrates basic concepts of systems and signals theory, and shows their derivation from the biophysical concepts such as mechanics, fluid mechanics, pharmacokinetics and molecular biophysics which underlie the signals in living systems. Aims at providing the student with the mathematical and physical understanding to quantitatively describe biological systems. Offered by Bioengineering. Limited to two attempts.

Recommended Prerequisite: BIOD 998.

Registration Restrictions:
Required Prerequisites: (BENG 101\textsuperscript{C}, MATH 203\textsuperscript{C} and PHYS 160\textsuperscript{C}) and (MATH 214\textsuperscript{C} or 216\textsuperscript{C}).
\* May be taken concurrently.
\textsuperscript{C} Requires minimum grade of C.

Students with the terminated from VSE major attribute may not enroll.

Schedule Type: Lecture, Recitation

Grading:
This course is graded on the Undergraduate Regular scale.

BENG 230: Continuum Biomechanics and Transport I. 3 credits.
This course introduces the fundamental concepts and mathematical equations describing biosolids, biofluids and bionanoparticle phenomena; and their application to physiological problems encountered in biomedical engineering. Topics will include elasticity, biofluid flows, transport of mass, momentum, and heat in biological systems. Upon completion of this course students should have a fundamental understanding of the basic conservation laws describing biomechanical systems and should be able to apply these concepts to solve a variety of problems in bioengineering. Offered by Bioengineering. Limited to two attempts.

Registration Restrictions:
Required Prerequisites: (PHYS 160\textsuperscript{C}, MATH 203\textsuperscript{C}, 213\textsuperscript{C} and 214\textsuperscript{C}).
\* May be taken concurrently.
\textsuperscript{C} Requires minimum grade of C.

Students with the terminated from VSE major attribute may not enroll.

Schedule Type: Lecture, Recitation

Grading:
This course is graded on the Undergraduate Regular scale.

BENG 240: Biomaterials. 3 credits.
This course is to introduce Biomaterials science and emphasize its importance in modern medicine. This course will also provide knowledge to students on specific techniques used to characterize biomaterials and on the biological response to implanted materials. This course will emphasize the multidisciplinary nature of biomaterials science and will focus on specific topics including an overview of existing biomaterials (ceramics, metals, polymers and hydrogels), drug delivery applications, development of nanobiomaterials, and the biocompatibility of these materials. Biological testing (in vitro and in vivo) of these biomaterials will also be covered in this course. Offered by Bioengineering. Limited to two attempts.

Registration Restrictions:
Required Prerequisites: (CHEM 211\textsuperscript{C} or 271\textsuperscript{C}) and MATH 113\textsuperscript{C} and BIOL 213\textsuperscript{C}.
\textsuperscript{C} Requires minimum grade of C.

Students with the terminated from VSE major attribute may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale.

BENG 301: Bioengineering Measurements. 3 credits.
Introduces the basic concepts and tools for making biomedical measurements, describes instrumentation design and analysis considerations, and discusses several practical applications. Offered by Bioengineering. Limited to two attempts.

Registration Restrictions:
Required Prerequisites: BENG 380\textsuperscript{C}, 320\textsuperscript{C} and 313\textsuperscript{C}.
\textsuperscript{C} Requires minimum grade of C.

Enrollment is limited to students with a major, minor, or concentration in Bioengineering.

Students with the terminated from VSE major attribute may not enroll.

Schedule Type: Laboratory

Grading:
This course is graded on the Undergraduate Regular scale.

BENG 302: Bioengineering Measurements Lab. 1 credit.
Provides hands-on experience with sensors and instrumentation relevant to the analysis of living systems and related processes. Biomedical measurements include electrocardiograms, electromyograms, spirometry, pulse oximetry, and glucose monitoring. Offered by Bioengineering. Limited to two attempts.

Registration Restrictions:
Required Prerequisite: BENG 301\textsuperscript{C}.
\* May be taken concurrently.
\textsuperscript{C} Requires minimum grade of C.

Students with the terminated from VSE major attribute may not enroll.

Schedule Type: Laboratory

Grading:
This course is graded on the Undergraduate Regular scale.

BENG 304: Modeling and Control of Physiological Systems. 3 credits.
Introduces a systems-level understanding of biomedical systems. Emphasis on mathematical modeling of dynamic systems, including the role of feedback. Analogies between electrical and mechanical systems will be discussed. Examples covered will include multiple scales ranging from cells to organ systems. Offered by Bioengineering. Limited to two attempts.
Specialized Designation: Writing Intensive in Major

Registration Restrictions:
Required Prerequisites: MATH 214C and PHYS 260C and (BENG 320C or SYST 320C) and BENG 313C.
C Requires minimum grade of C.

Enrollment is limited to students with a major, minor, or concentration in Bioengineering.

Students with the terminated from VSE major attribute may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale.

BENG 313: Physiology for Engineers. 3 credits.
Provides a broad introduction to the subject of human physiology, focusing on learning the subject matter from an engineering viewpoint. Emphasis on organs and physiological systems where engineering has a significant role. Offered by Bioengineering. Limited to two attempts. Equivalent to BENG 214.

Registration Restrictions:
Required Prerequisites: (BENG 101C) and (MATH 114B or 116B) and (BIOL 213C).
C Requires minimum grade of C.
B- Requires minimum grade of B-.

Enrollment is limited to students with a major, minor, or concentration in Bioengineering.

Students with the terminated from VSE major attribute may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale.

BENG 320: Bioengineering Signals and Systems. 3 credits.
Introduces the conversion of analog signals to digital ones and methods for using digitally processed signals in biomedical applications. Offered by Bioengineering. Limited to two attempts.

Registration Restrictions:
Required Prerequisites: (BENG 101C) and MATH 214B-.
\(^\d\) May be taken concurrently.
C Requires minimum grade of C.
B- Requires minimum grade of B-.

Enrollment is limited to students with a major, minor, or concentration in Bioengineering.

Students with the terminated from VSE major attribute may not enroll.

Schedule Type: Lecture, Recitation

Grading:
This course is graded on the Undergraduate Regular scale.

BENG 322: Health Data Challenges. 3 credits.
Covers methodology and tools used to work with health data structures supporting organizations’ needs for reliable data that are captured, stored, processed, integrated, and prepared for further querying, decision making, data mining and knowledge discovery for a variety of clinical and organizational purposes. Data security and privacy, data standards, data interoperability, health information exchange, and big data analytics are discussed. Offered by Bioengineering. Limited to two attempts. Equivalent to IT 322.

Registration Restrictions:
Required Prerequisites: IT 214C and (STAT 250C or 344C).
C Requires minimum grade of C.

Students with the terminated from VSE major attribute may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale.

BENG 327: Cellular, Neurophysiological, and Pharmacological Neuroscience. 3 credits.
What makes neurons different from other cells? What do they do and how do they work? How do they communicate with each other? In this course, we will answer these questions and many more. We will cover the basics of cellular, neurophysiological, and pharmacological neuroscience, including cellular anatomy and membrane function, electrical properties of neurons, intracellular and intercellular signaling, synaptic plasticity, and circuit connectivity. Offered by Bioengineering. Limited to two attempts.

Registration Restrictions:
Required Prerequisites: ((CHEM 211C and 213C) or (CHEM 271C and 272C)).
C Requires minimum grade of C.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale.

BENG 330: Computational Methods in Bioengineering. 3 credits.
This course introduces students to the development of computational models for understanding physiological systems, and explores a variety of practical computational methods for biomedical problems. Topics include: introduction to scientific computing, linear and non-linear models, and finite difference methods for biomedical models based on ordinary and partial differential equations. Offered by Bioengineering. Limited to two attempts.

Registration Restrictions:
Required Prerequisites: (CS 112C, BENG 320C, 230C and MATH 214B-).
C Requires minimum grade of C.
B- Requires minimum grade of B-.

Enrollment is limited to students with a major, minor, or concentration in Bioengineering.

Students with the terminated from VSE major attribute may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale.

BENG 331: Computational Methods in Bioengineering Laboratory. 1 credit.
This lab course complements BENG 330 to enhance students’ knowledge on developing and applying computational models for biomedical engineering problems. Students will be provided analytical problems to solve and computational problems to program in the laboratory. Topics include: introduction to scientific computing, linear and non-linear
models, and finite difference methods for biomedical models based on ordinary and partial differential equations. Offered by Bioengineering. Limited to two attempts.

Registration Restrictions:
Required Prerequisite: BENG 330.C.
* May be taken concurrently.
C Requires minimum grade of C.

Enrollment is limited to students with a major, minor, or concentration in Bioengineering.

Students with the terminated from VSE major attribute may not enroll.

Schedule Type: Laboratory

Grading:
This course is graded on the Undergraduate Regular scale.

BENG 341: Introduction to Biomaterials. 3 credits.
To provide a fundamental understanding of current, state of the art, and future directions of biomaterials. Offered by Bioengineering. Limited to two attempts.

Specialized Designation: Mason Impact.

Registration Restrictions:
Required Prerequisites: (CHEM 251.C or 211.C) and (MATH 113.C) and (BIOL 213.C).
C Requires minimum grade of C.

Students with the terminated from VSE major attribute may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale.

BENG 350: Neural System Designs. 3 credits.
This course introduces the essential “design principles” of various parts of the mammalian nervous system. The recurring theme is that Evolution successfully managed to re-arrange the same building blocks (neurons, synaptic transmission, and membrane physiology) in different networks exquisitely tuned to their functions, though often in incompletely understood ways. Topics include: neuronal biophysics, network architecture, cortical systems, neuroinformatics, and neurotechnology applications. Offered by Bioengineering. Limited to two attempts.

Registration Restrictions:
Required Prerequisites: BENG 313.C and BIOL 213.C.
C Requires minimum grade of C.

Enrollment is limited to students with a major, minor, or concentration in Bioengineering.

Students with the terminated from VSE major attribute may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale.

BENG 360: Biomedical Imaging. 3 credits.
This course introduces the physical and engineering foundations of modern medical imaging instruments and image processing methods. These methods enable us to see biological organisms at different levels, starting from the atom level and going all the way to seeing inside the human body. It allows a better understanding of how life and its processes work at different levels, and diagnose disease, monitor treatment and perform minimally-invasive interventions. Different modalities include: microscopy, x-rays, computerized tomography (CT), nuclear imaging, ultrasound, and magnetic resonance imaging (MRI). Topics include: underlying physics, basics of instrumentation, clinical applications, and presentation of case studies. Offered by Bioengineering. Limited to two attempts.

Specialized Designation: Writing Intensive in Major

Registration Restrictions:
Required Prerequisites: PHYS 260.C and BENG 320.C.
C Requires minimum grade of C.

Enrollment is limited to students with a major, minor, or concentration in Bioengineering.

Students with the terminated from VSE major attribute may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale.

BENG 370: Bioinstrumentation and Devices I. 3 credits.
This course involves the design of instruments that allow engineers to both make measurements and intervene with living systems, including the human body. This course aims at providing the foundation for understanding bioinstrumentation electronics, with a special emphasis on sensors and measurements. Topics include: circuit analysis, electronic circuit design, basic sensors and their applications in Bioengineering, as well as learn how to build and make measurements in electronic systems. Offered by Bioengineering. Limited to two attempts.

Registration Restrictions:
* May be taken concurrently.
C Requires minimum grade of C.

Enrollment is limited to students with a major, minor, or concentration in Bioengineering.

Students with the terminated from VSE major attribute may not enroll.

Schedule Type: Lecture, Recitation

Grading:
This course is graded on the Undergraduate Regular scale.

BENG 371: Bioinstrumentation and Devices Laboratory. 1 credit.
This course introduces the basic concepts and tools for making biomedical measurements, both at the level of electronics and at the device level. At the electronics level, students will learn about basic electronic components, using them to build basic circuits, with emphasis on instrumentation components. At the device level, students will learn to describe instrumentation design and analysis considerations, and discuss practical applications. Students will gain hands-on experience with circuits, basic bioinstrumentation and signal analysis techniques that are fundamental in Bioengineering. Offered by Bioengineering. Limited to two attempts.

Registration Restrictions:
Required Prerequisite: BENG 370.C.
* May be taken concurrently.
Students with the terminated from VSE major attribute may not enroll.

Schedule Type: Laboratory

Grading:
This course is graded on the Undergraduate Regular scale.

BENG 380: Introduction to Circuits and Electronics. 3 credits.
Builds on simple circuit concepts introduced in PHYS 260. Includes circuit analysis using superposition, equivalent circuits and transient analysis of RL, RC and RLC circuits; sinusoidal excitations, AC steady state analysis; frequency response; operational amplifiers; and digital logic circuits. (Not intended for those majoring in electrical or computer engineering.) Offered by Bioengineering. Limited to two attempts.

Registration Restrictions:
Required Prerequisites: (PHYS 260C and MATH 214B) and BENG 320C.
\* May be taken concurrently.
C Requires minimum grade of C.
B Requires minimum grade of B.

Enrollment is limited to students with a major, minor, or concentration in Bioengineering.

Students with the terminated from VSE major attribute may not enroll.

Schedule Type: Lecture, Recitation

Grading:
This course is graded on the Undergraduate Regular scale.

BENG 381: Circuits and Electronics Lab. 1 credit.
Lab associated with BENG 380. Provides laboratory experience in basic electronics emphasizing issues and considerations that are paramount for biomedical instrumentation. Not intended for those majoring in electrical or computer engineering. Notes: Not intended for those majoring in electrical or computer engineering. Offered by Bioengineering. Limited to two attempts.

Registration Restrictions:
Required Prerequisites: PHYS 261C and BENG 380C.
\* May be taken concurrently.
C Requires minimum grade of C.

Students with the terminated from VSE major attribute may not enroll.

Schedule Type: Laboratory

Grading:
This course is graded on the Undergraduate Regular scale.

BENG 390: Engineering Design and Fabrication. 3 credits.
Project based course where students will design projects containing analog and digital components as well as mechanical parts. Students will simulate, build, and test their projects. Offered by Bioengineering. Limited to two attempts. Equivalent to ECE 390.

Registration Restrictions:
Required Prerequisites: (BENG 380C, ECE 280C or 285C).
C Requires minimum grade of C.

Students with the terminated from VSE major attribute may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale.

BENG 391: Bioengineering Professional Development. 1 credit.
This course covers the variety of responsibilities of bioengineers to society and helps prepare them for the workplace and/or graduate or professional school. Topics include exploration of various career paths in biomedical/bioengineering and related fields, ethics and professionalism, job/grad/professional school searching, networking, interviewing, and other career preparation topics. Speakers include faculty, invited guests from industry and government, and alumni. Offered by Bioengineering. Limited to two attempts.

Registration Restrictions:
Required Prerequisite: BENG 101C.
C Requires minimum grade of C.

Students with the terminated from VSE major attribute may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale.

BENG 395: RS: Mentored Research in Bioengineering. 1-3 credits.
Introduces the scientific research process through "hands on" experience: students are matched with faculty mentors who are actively involved in Bioengineering-related research. Requires no less than 60 hours per semester working with mentors. Offered by Bioengineering. May be repeated within the degree for a maximum 6 credits.

Specialized Designation: Research/Scholarship Intensive

Recommended Prerequisite: At least 60 credit hours applicable to the Bioengineering program.

Registration Restrictions:
Students with the terminated from VSE major attribute may not enroll.

Schedule Type: Independent Study

Grading:
This course is graded on the Undergraduate Regular scale.

400 Level Courses

BENG 406: Introduction to Biomechanics. 3 credits.
This course introduces the fundamental principles of musculoskeletal biomechanics, computational simulation of movement, and OpenSim simulator. Topics include functions and models of the musculoskeletal structures, mathematical description of motion, kinetics, and simulation of movement using OpenSim. Offered by Bioengineering. Limited to two attempts.

Registration Restrictions:
Required Prerequisites: (PHYS 160C or 243C) and MATH 203C and 214C and (BENG 220C, SYST 220C or ECE 220C) and BENG 313C.
C Requires minimum grade of C.

Students with the terminated from VSE major attribute may not enroll.
Schedule Type: Lecture
Grading:
This course is graded on the Undergraduate Regular scale.

**BENG 413:** Molecular Engineering Laboratory. 3 credits.
The course covers laboratory techniques in molecular and cellular engineering, such as Good Laboratory Practices according to industry standards, maintaining a laboratory notebook, equipment logbooks, NIST-traceable standards, use of statistics and a standard curve to calculate the concentration of an unknown, sensitivity of a laboratory assay, biomaterial-DNA interactions, imaging of cells and signal processing, interpreting data and writing a scientific report. Offered by Bioengineering. Limited to two attempts.

**Registration Restrictions:**
**Required Prerequisite:** BIOL 213\(^C\).
\(^C\) Requires minimum grade of C.

Enrollment is limited to students with a major, minor, or concentration in Bioengineering.

Students with the terminated from VSE major attribute may not enroll.

Schedule Type: Laboratory, Lecture
Grading:
This course is graded on the Undergraduate Regular scale.

**BENG 414:** Pathophysiology and the Role of New Technologies in Human Diseases. 3 credits.
This course provides examples from clinical medicine of how patients are diagnosed and treated for diseases of their cardiovascular and neurological systems, as well as for cancer and in acute care (emergency) units. The etiology and pathogenesis of disease processes and the current roles of technologies in diagnosis and treatment will be discussed. Unmet needs in these clinical areas that require research and technology development using engineering approaches will be identified and potential pathways towards clinical solutions will be investigated. Offered by Bioengineering. Limited to two attempts.

**Registration Restrictions:**
**Required Prerequisite:** BENG 214\(^C\).
\(^C\) Requires minimum grade of C.

Enrollment is limited to students with a major, minor, or concentration in Bioengineering.

Students with the terminated from VSE major attribute may not enroll.

Schedule Type: Lecture
Grading:
This course is graded on the Undergraduate Regular scale.

**BENG 417:** Bioengineering World Health. 3 credits.
This course covers the major types of medical equipment, including the principles of operation, the physiology underlying the measurement, the major functional (system) pieces for each instrument, and typical problems/applications of each instrument. Special focus is placed on making reliable and safe repairs in a low resource setting: Troubleshooting, creative problem solving, calibration and testing. Offered by Bioengineering. Limited to two attempts.

Schedule Type: Lecture
Grading:
This course is graded on the Undergraduate Regular scale.

**BENG 420:** Biomedical Data Analytics. 3 credits.
This course introduces the fundamental techniques and tools for analyzing biomedical data, important for many biomedical engineering problems. Topics include classification, regression, clustering, dimensionality reduction, data representation, and algorithm performance evaluation. Students will deepen their understanding of the concepts and gain hands-on experience on data analysis by applying algorithms to analyze and interpret various kinds of standard biological and biomedical data encountered in bioengineering fields. This course will be an innovative course leveraging hybrid learning through a combination of lectures, on-line content, and course project. Offered by Bioengineering. Limited to two attempts.

**Registration Restrictions:**
**Required Prerequisites:** CS 112\(^C\) and BENG 330\(^C\) and (STAT 350\(^C\) or 360\(^C\)).
\(^C\) Requires minimum grade of C.

Enrollment is limited to students with a major, minor, or concentration in Bioengineering.

Students with the terminated from VSE major attribute may not enroll.

Schedule Type: Lecture
Grading:
This course is graded on the Undergraduate Regular scale.

**BENG 421:** Cell and Tissue Engineering. 3 credits.
This course is designed to provide exposure to the concepts of cell/tissue functions and behavior and strategies to manipulate their responses, biomaterials to construct scaffolds, modern techniques of artificial organ development and wound healing and most importantly, the utilization of engineering principles for biomedical applications. The course schedule has been packaged to not only provide fundamental information on the above topics, but also to stimulate team working skills, awareness of the current scientific developments through literature review, real-time experiences through lab visits and demos, and career opportunities through industrial visits. Offered by Bioengineering. Limited to two attempts.

**Registration Restrictions:**
**Required Prerequisite:** BENG 240\(^C\).
\(^C\) Requires minimum grade of C.

Students with the terminated from VSE major attribute may not enroll.

Schedule Type: Lecture
Grading:
This course is graded on the Undergraduate Regular scale.

**BENG 426:** Neural Engineering. 3 credits.
This course is an overview of Neural Engineering. The sequence of topics are designed to cover from fundamentals of Neurophysiology through to applications of neural prosthesis such as retinal and cochlear implants. Other important aspects of Neural Engineering to be discussed include brain-machine interfaces, instrumentation for interfacing electronics to the nervous system, and sensors for neural research. Offered by Bioengineering. Limited to two attempts.

**Registration Restrictions:**
**Required Prerequisites:** BENG 370C and 371C.
C Requires minimum grade of C.

Enrollment limited to students with the terminated from VSE major attribute.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale.

**BENG 429: Mason-Inova Applied Technologies.** 3 credits.
This Mason-based class will provide students with the opportunity to learn fundamentals concepts in the classroom and interact with clinical technologies, through 3-hour practical experiences at the Fairfax Inova hospital every three to four weeks. Students will work with faculty and clinicians in both an academic and simulated clinical environment. Offered by Bioengineering. Limited to two attempts.

**Registration Restrictions:**
**Required Prerequisite:** BENG 214C.
C Requires minimum grade of C.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale.

**BENG 430: Continuum Biomechanics and Biotransport II.** 3 credits.
This course provides advanced and unifying treatment of the fundamental field equations describing the laws of continuum biomechanical systems including solids, fluids and transport phenomena in biological systems. Topics will include: blood and circulation, viscoelasticity, poroelasticity, thermoelasticity, and molecular and convective transport in biological systems. Offered by Bioengineering. Limited to two attempts.

**Registration Restrictions:**
**Required Prerequisites:** BENG 230C and 330C.
C Requires minimum grade of C.

Enrollment is limited to students with a major, minor, or concentration in Bioengineering.

Students with the terminated from VSE major attribute may **not** enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale.

**BENG 434: Computational Modelling of Neurons and Networks.** 3 credits.
Introduces the objectives, philosophy, and methodology of neuronal modeling. Instructs students in the use of some of the more popular neural modeling software packages. Students learn the syntax of several software packages, how to create neurons from subcellular components, and how to create networks by connecting neuron models. Offered by Bioengineering. Limited to two attempts.

**Registration Restrictions:**
**Required Prerequisite:** BENG 327C.
C Requires minimum grade of C.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale.

**BENG 435: Multi-scale Modeling and Simulation in Biomedicine.** 3 credits.
This course covers a variety of advanced computational methods for biomedical problems spanning multiple scales, from cells and molecules to tissues, organs and systems. Topics include: advanced computational techniques, finite difference methods, finite element methods, particle methods, stochastic simulations, agent-based methods, coupled problems and high-performance computing. Applications will be drawn from a variety of biomedical fields such as biosolid and biofluid mechanics, cell mechanics, pharmacokinetics, and physiologic systems. Offered by Bioengineering. Limited to two attempts.

**Registration Restrictions:**
**Required Prerequisites:** BENG 230C and 330C.
C Requires minimum grade of C.

Enrollment is limited to students with a major, minor, or concentration in Bioengineering.

Students with the terminated from VSE major attribute may **not** enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale.

**BENG 437: Medical Image Processing.** 3 credits.
This course aims at familiarizing the student with the basic concepts of image processing as they are applied to medical imaging problems. The class consists of two parts. The first part provides a brief overview of basic image processing, including image enhancement and restoration. The second part addresses problems that are central to medical image processing practice, including registration, segmentation and feature detection. Offered by Bioengineering. Limited to two attempts.

**Recommended Prerequisite:** BENG 360

**Registration Restrictions:**
**Required Prerequisite:** BENG 320C.
C Requires minimum grade of C.

Enrollment is limited to students with a major, minor, or concentration in Bioengineering.

Students with the terminated from VSE major attribute may **not** enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale.

**BENG 438: Advanced Biomedical Imaging.** 3 credits.
This course will provide an introduction to the physical, mathematical and engineering foundations of modern medical imaging instruments and imaging physics principles that enable us to "see" inside the human body to diagnose disease, monitor treatment and perform minimally-invasive interventions. The emphasis will be on diagnostic ultrasound, x-ray (CT), and MRI imaging methods, although other modalities will also be discussed. The course will also provide an overview of recent developments in the field of medical imaging and discuss some of the challenges and controversies. The students will get hands on experience in applying the methods learnt in class to real-world problems and imaging data. There will be broad scope to individually and collaboratively
explore current problems in medical imaging. Offered by Bioengineering. Limited to two attempts.

**Registration Restrictions:**
**Required Prerequisite:** BENG 360\(^{C}\).
\(^{C}\) Requires minimum grade of C.

Enrollment is limited to students with a major, minor, or concentration in Bioengineering.

Students with the terminated from VSE major attribute may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale.

**BENG 441: Nanomedicine and Drug Delivery.** 3 credits.
This course covers the evolving field of drug delivery ranging from basic to applied science. The course aims to teach students in Bioengineering concepts of nanomedicine and how to design effective drug delivery systems to treat diseases such as cancer, diabetes, cardiovascular diseases, etc. To achieve this goal, students will learn the fundamentals of surface chemistry to synthesize nanocarriers that are biocompatible and can be used for targeted delivery with reduced side effects. Students will also learn the most common and useful techniques to characterize the physical, chemical and functional characteristics of nanocarriers. Moreover, in this course, students will learn the interaction of the nanocarriers with animal and human physiologies, and how the drug is released from the nanocarrier. Furthermore, students will learn to test the therapeutic efficacy of the engineered nanovehicles both in vitro and in vivo. Offered by Bioengineering. Limited to two attempts.

**Registration Restrictions:**
**Required Prerequisites:** BENG 240\(^{C}\) or ((CHEM 211\(^{C}\) or 271\(^{C}\)) and BIOL 213\(^{C}\) and MATH 113\(^{C}\)).
\(^{C}\) Requires minimum grade of C.

Enrollment is limited to students with a major, minor, or concentration in Bioengineering.

Students with the terminated from VSE major attribute may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale.

**BENG 451: Translation and Entrepreneurship in Bioengineering.** 3 credits.
This course focuses on teaching the process of translational research and on creating both a medical device and a company vision. Emphasis is made on creating a robust medical device prototype based on a deep understanding of the disease. Regulatory and reimbursement processes are also addressed in detail. This course will draw upon lectures and different guest speakers. Offered by Bioengineering. Limited to two attempts.

**Registration Restrictions:**
**Required Prerequisites:** (BIOL 213\(^{C}\)) and (CHEM 251\(^{C}\) or 211\(^{C}\)).
\(^{C}\) Requires minimum grade of C.

Students with the terminated from VSE major attribute may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale.

**BENG 470: Bioinstrumentation and Devices II.** 3 credits.
This course delves deeper into two aspects of bioinstrumentation: the theory and use of different sensors commonly encountered in Bioengineering devices, and the development of microcontroller-based circuits that interface with such sensors. Students will gain knowledge of microcontroller circuit design and programming, interfacing with sensors and their applications in Bioengineering. Students will demonstrate their understanding of the subject by designing a microcontroller-based device that performs a biomedically-relevant measurement. Offered by Bioengineering. Limited to two attempts.

**Registration Restrictions:**
**Required Prerequisite:** BENG 370\(^{C}\).
\(^{C}\) Requires minimum grade of C.

Enrollment is limited to students with a major, minor, or concentration in Bioengineering.

Students with the terminated from VSE major attribute may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale.

The course provides an understanding of 1) intellectual property focusing on patents and the patent process in the US and globally; 2) regulatory frameworks for product approval such as FDA and international regulations, standards (ANSI, ASTM, ISO, GCP, GLP) and 3) product development including ideation and concept development, quality systems, global business models, financing and transactions. An overarching team project will involve invention, proof of concept, patenting, regulatory pathways and product development to market in a global context. Offered by Bioengineering. Limited to two attempts.

**Registration Restrictions:**
**Required Prerequisites:** BENG 240\(^{C}\) or 414\(^{C}\).
\(^{C}\) Requires minimum grade of C.

Students with the terminated from VSE major attribute may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale.

**BENG 487: Neuroinformatics.** 3 credits.
This class is a hands-on introduction to available and developing neuroinformatics infrastructures focuses on data processing, literature mining, and metadata annotation, with a special emphasis on neuronal morphology and hippocampal neuron types. The aim is to provide students with sufficient practical understanding of basic concepts and representative tools to participate confidently and actively in neuroscience projects with a substantial component of digital data. Prior computational experience is not required, and attendees will start using their newly acquired knowledge immediately. Offered by Bioengineering. Limited to two attempts.

**Registration Restrictions:**
**Required Prerequisite:** BENG 350\(^{C}\).
\(^{C}\) Requires minimum grade of C.
Students with the terminated from VSE major attribute may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale.

**BENG 491: Bioengineering Senior Seminar I.** 1 credit.
Covers the variety of responsibilities of bioengineers to society. Topics include ethics, regulation, research, industry, entrepreneurship, and cost issues. Professional approaches to job searching and effective technical communication will also be discussed. Speakers include faculty, invited guests from industry and government, as well as students. Notes: Students cannot receive credit for BENG 491 and ECE 491. Offered by Bioengineering. Limited to two attempts. Equivalent to ECE 491.

**Registration Restrictions:**
Enrollment limited to students with a class of Senior Plus or Senior.

Students with the terminated from VSE major attribute may not enroll.

**Schedule Type:** Seminar

**Grading:**
This course is graded on the Undergraduate Regular scale.

**BENG 492: Senior Advanced Design Project I.** 3 credits.
This course covers the whole engineering design process from the selection of a project to the design and construction of a prototype. Teams of students select a senior design project in bioengineering while considering the feasibility of the proposed project. The work includes identifying an engineering problem, establishing objectives and constraints, considering standards and requirements, developing preliminary design and a testable prototype (considering different design alternatives), as well as team management and organization. Offered by Bioengineering. Limited to two attempts.

**Mason Core:** Capstone, Synthesis

**Specialized Designation:** Impact Associated.

**Recommended Prerequisite:** 90 credit hours applicable to the Bioengineering Program and BENG 475

**Recommended Corequisite:** COMM 100 or COMM 101

**Registration Restrictions:**
Required Prerequisites: (ENGH 302C or HNRS 110C) and BENG 320C.
C Requires minimum grade of C.

Students with the terminated from VSE major attribute may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale.

**BENG 493: RS: Senior Advanced Design Project II.** 3 credits.
This course is the implementation of a senior design project for which preliminary work was done in BENG 492. It includes testing and refining the initial prototype, enhancing the design and construction of hardware and software, conducting tests via experiments or studies, evaluating/validating complete system. Requires oral presentations and written reports during project and at completion. Offered by Bioengineering. Limited to two attempts.

**Specialized Designation:** Research/Scholarship Intensive

**Registration Restrictions:**
Required Prerequisite: BENG 492C.
C Requires minimum grade of C.

Students with the terminated from VSE major attribute may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale.

**BENG 495: Bioengineering Senior Seminar II.** 1 credit.
Covers a variety of responsibilities of bioengineers. Topics include dealing with biomedical ethics, regulatory requirements, global considerations, and health care costs. Speakers will include faculty as well as guests from industry, government, and academia. Students are required to explore and then present some material themselves. Offered by Bioengineering. Limited to two attempts.

**Specialized Designation:** Writing Intensive in Major

**Recommended Prerequisite:** 90 credit hours applicable to the Bioengineering Program.

**Registration Restrictions:**
Required Prerequisite: COMM 100C.
C Requires minimum grade of C.

Students with the terminated from VSE major attribute may not enroll.

**Schedule Type:** Seminar

**Grading:**
This course is graded on the Undergraduate Regular scale.

**BENG 499: Special Topics in Bioengineering.** 0-4 credits.
Topics of special interest to undergraduates. Notes: May be repeated if topics substantially differ. Offered by Bioengineering. May be repeated within the term for a maximum 11 credits.

**Specialized Designation:** Topic Varies

**Registration Restrictions:**
Students with the terminated from VSE major attribute may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale.

**500 Level Courses**

**BENG 501: Bioengineering Research Methods.** 3 credits.
Examines approaches for scientific research with emphasis on bioengineering. Topics include biophysical origins of bioengineering measures, tools and technology for bioengineering data collection, basic principles of experimental design and statistical analyses, and interpretation of scientific results. Special attention will be given to ethical issues associated with the collection, use, and dissemination of data. Offered by Bioengineering. May not be repeated for credit.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.
Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale.

BENG 514: Pathophysiology and the Role of New Technologies in Human Diseases. 3 credits.
This course will provide examples from clinical medicine of how patients are diagnosed and treated for diseases of their cardiovascular and neurological systems, as well as for cancer and in acute care (emergency) units. The etiology and pathogenesis of disease processes and the current roles of technologies in diagnosis and treatment will be discussed. Unmet needs in these clinical areas that require research and technology development will be identified and potential pathways towards clinical solutions investigated. Offered by Bioengineering. May not be repeated for credit.

Registration Restrictions:
Required Prerequisite: BENG 214C.
C Requires minimum grade of C.

Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale.

BENG 521: Cell and Tissue Engineering. 3 credits.
This course is designed to provide exposure to the concepts of cell/tissue functions and behavior and strategies to manipulate their responses, biomaterials to construct scaffolds, modern techniques of artificial organ development and wound healing and most importantly, the utilization of engineering principles for biomedical applications. The course schedule has been packaged to not only provide fundamental information on the above topics, but also to stimulate team working skills, awareness of the current scientific developments through literature review, real-time experiences through lab visit and demo, and career opportunities through industrial visits. Offered by Bioengineering. May not be repeated for credit.

Registration Restrictions:
Required Prerequisite: BENG 240C.
C Requires minimum grade of C.

Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale.

BENG 525: Neural Engineering. 3 credits.
Provides an overview of topics in Neural Engineering. Topics covered range from sensory and motor prosthetic devices, stimulation of biological tissue, bioelectrodes and characterization techniques, brain-machine interfaces, and engineered devices to ameliorate neurodisorders. Prior knowledge in electrical or computer engineering disciplines required. Offered by Bioengineering. May not be repeated for credit. Equivalent to ECE 526.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale.

BENG 526: Neural Engineering. 3 credits.
Provides an overview of topics in Neural Engineering. Topics covered range from sensory and motor prosthetic devices, stimulation of biological tissue, bioelectrodes and characterization techniques, brain-machine interfaces, and engineered devices to ameliorate neurodisorders. Prior knowledge in electrical or computer engineering disciplines required. Offered by Bioengineering. May not be repeated for credit.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.
Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

**BENG 530: Continuum Biomechanics and Biotransport II.** 3 credits.
This course provides and advanced and unifying treatment of the fundamental field equations describing the laws of continuum biomechanical systems including solids, fluids and transport phenomena in biological systems. Topics will include: blood and circulation, viscoelasticity, poroelasticity, thermoelasticity, and molecular and convective transport in biological systems. Offered by Bioengineering. May not be repeated for credit.

**Registration Restrictions:**
**Required Prerequisites:** BENG 230C and 330C.
C Requires minimum grade of C.

Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

**BENG 535: Multi-Scale Modeling and Simulation in Biomedicine.** 3 credits.
This course covers a variety of advanced computational methods for modeling biomedical systems spanning multiple scales, from cells and molecules to tissues, organs and systems. Topics include: modeling cell biomechanics, modeling biofluids including blood flows, modeling biotransport phenomena including bioheat and molecular diffusion, and modeling tissue biomechanics, and modeling organs and physiological systems. Computational techniques will include: discrete particle dynamics methods, finite differences and finite element methods, stochastic and agent-based modeling, and high-performance computing. Offered by Bioengineering. May not be repeated for credit.

**Registration Restrictions:**
**Required Prerequisites:** BENG 230C and 330C.
C Requires minimum grade of C.

Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

**BENG 537: Medical Image Processing.** 3 credits.
This course aims at familiarizing the student with the basic concepts of image processing as they are applied to medical imaging problems. The first part of the course provides a brief overview of basic image processing, including image enhancement and restoration techniques. The second part of the course addresses problems that are central to medical image processing practice, including registration, segmentation and feature detection. This course also includes a project focused on biomedical image applications. Offered by Bioengineering. May not be repeated for credit.

**Registration Restrictions:**
**Required Prerequisite:** BENG 530C.
C Requires minimum grade of C.

Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

**BENG 541: Biomaterials.** 3 credits.
Covers the principles of biomaterials and biological interactions with materials, including an overview of biomaterials characterization, design and testing. Specific topics include the use of polymers, ceramics and metalloids in biomaterials, drug delivery applications, tissue engineering from an orthopedic and vascular perspective, biocompatibility, acute and chronic biological response to implanted material, and in vitro and in vivo testing of biomaterials. Offered by Bioengineering. May not be repeated for credit.

**Recommended Prerequisite:** BIOL 213 or BENG 213 with a C or better
CHEM 211 or CHEM 251 or BENG 201 with a C or better

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.
Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

**BENG 550: Advanced Biomechanics.** 3 credits.
Introduces the fundamental concepts of musculoskeletal biomechanics, and how to apply mechanical principles to quantitatively describe and analyze movement. Topics include properties, functions, and models of the musculoskeletal structures, 3D kinematics, locomotion, and instrumentation systems applied in musculoskeletal biomechanics and movement analysis. Offered by Bioengineering. May not be repeated for credit.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment limited to students in the College of Science, Schar School of Engineering colleges.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

**BENG 551: Translational Bioengineering.** 3 credits.
Demonstrates the process for the creation of both medical device prototypes and medical device companies. Focuses on designing and building a robust medical device prototype and writing a business plan. Also addresses cost of healthcare, reimbursement, regulatory processes, intellectual property, and marketing and sales aspects. Course will feature lectures, videos, and guest speakers who are successful medical device entrepreneurs. Offered by Bioengineering. May not be repeated for credit.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment limited to students in the College of Science, Schar School of Engineering colleges.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

**BENG 570: Bioinstrumentation and Devices II.** 3 credits.
A major part of Bioengineering involves the design of instruments that allows us to both make measurements and intervene in living systems. This course delves deeper into two aspects of bioinstrumentation: the theory and use of different sensors commonly encountered in bioengineering devices, and the development of microcontroller-based circuits that interface with such sensors. Students will gain knowledge of microcontroller circuit design and programming, interfacing with sensors and their applications in Bioengineering. Students will demonstrate their understanding of the subject by designing a microcontroller-based device that performs a biomedically-relevant measurement. Offered by Bioengineering. May not be repeated for credit.

**Registration Restrictions:**
**Required Prerequisite:** BENG 370. 
C Requires minimum grade of C.

Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

The course provides an understanding of i) intellectual property focusing on patents and the patent process in the US and globally, ii) regulatory frameworks for product approval such as FDA and international regulations, standards (ANSI, ASTM, ISO, GCP, GLP) and iii) product development including ideation and concept development, quality systems, global business models, financing and transactions. An overarching team project will involve invention, proof of concept, patenting, regulatory pathways and product development to market in a global context. Offered by Bioengineering. May not be repeated for credit.

**Registration Restrictions:**
**Required Prerequisite:** BENG 240.  
C Requires minimum grade of C.

Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

**BENG 590: Selected Topics in Bioengineering.** 3 credits.
Addresses selected topics from recent developments in various Bioengineering disciplines. Content may vary each semester depending on instructor and students’ interests. Offered by Bioengineering. May be repeated within the term for a maximum 6 credits.

**Specialized Designation:** Topic Varies

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.
Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

### 600 Level Courses

**BENG 600: Bioengineering Seminar.** 0 credits.
Students are required to attend seminars, including talks by distinguished speakers, faculty candidates, and Mason faculty. Notes: Required attendance and participation in a minimum of 2 seminars per semester. Offered by Bioengineering. May be repeated within the degree.

**Recommended Prerequisite:** Admission to MS Bioengineering program.

**Registration Restrictions:** Enrollment limited to students with a class of Graduate.

**Schedule Type:** Seminar

**Grading:**
This course is graded on the Satisfactory/No Credit scale.

**BENG 601: Collaborative Bioengineering Basic Science Research.** 3 credits.
This course provides exposure to research in the bioengineering department, provide a broad experience to interdisciplinary research, provide an overview of Biomedical Engineering to new graduate students, and connect students to faculty and scientists in other departments and institutions. Offered by Bioengineering. May not be repeated for credit.

**Registration Restrictions:** Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

**BENG 602: Collaborative Bioengineering Clinical Science Research.** 3 credits.
This course provides exposure to biomedical research in the bioengineering department, provide a broad experience to interdisciplinary research, provide an overview of how biomedical engineering research can address clinical unmet needs to new graduate students, and connect students to faculty and clinicians in a hospital setting and different institutions. Offered by Bioengineering. May not be repeated for credit.

**Registration Restrictions:** Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

**BENG 636: Advanced Biomedical Signal Processing.** 3 credits.
Provides an overview of advanced topics in biomedical signal processing with an emphasis on practical applications. Topics include introduction to physiological origins of biomedical signals, stochastic and adaptive signal processing, spectral estimation, signal modeling and analysis of nonstationary signals. Offered by Bioengineering. May not be repeated for credit.

**Recommended Prerequisite:** ECE 535 or equivalent; ECE 528 or equivalent.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

**BENG 641: Advanced Nanotechnology in Health.** 3 credits.
Presents interdisciplinary scientific and engineering approaches to solve relevant medical problems. Contents include polymer structure, composition, and material properties, natural and synthetic polymers, and their application to design novel nanocarriers for controlled drug release, scaffolds for tissue engineering, and new vectors for vaccines. The relevance of nanotechnology to advance treatments for cancer, infectious and neurodegenerative diseases are discussed in depth. Offered by Bioengineering. May not be repeated for credit.

**Recommended Prerequisite:** BENG 541, or permission of instructor.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

**BENG 699: Advanced Topics in Bioengineering.** 3 credits.
Advanced topics of current interest in bioengineering. Topics chosen so they do not duplicate other courses in department. Active participation encouraged in form of writing and presenting papers in research areas. Offered by Bioengineering. May be repeated within the degree for a maximum 6 credits.

**Specialized Designation:** Topic Varies

**Recommended Prerequisite:** Permission of instructor.
Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale.

**700 Level Courses**

**BENG 703: Laboratory Rotations in Biomaterials and Nanomedicine. 3 credits.**
Intensive introduction to a research laboratory in the area of biomaterials and nanomedicine. The student will read background material pertinent to the problem under study, learn and practice research methods of the laboratory, and formulate a short final project, which may be a proposal or an actual project, demonstrating some mastery of the techniques and approaches employed. Offered by Bioengineering. May be repeated within the degree for a maximum 6 credits.

Registration Restrictions:
Enrollment limited to students with a class of Graduate or Non-Degree.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Independent Study

Grading:
This course is graded on the Graduate Regular scale.

**BENG 704: Laboratory Rotations in Biomedical Imaging and Devices. 3 credits.**
Intensive introduction to a research laboratory in the area of biomedical imaging and devices. The student will read background material pertinent to the problem under study, learn and practice research methods of the laboratory, and formulate a short final project, which may be a proposal or an actual project, demonstrating some mastery of the techniques and approaches employed. Offered by Bioengineering. May be repeated within the degree for a maximum 6 credits.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate or Non-Degree.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Independent Study

Grading:
This course is graded on the Graduate Regular scale.

**BENG 705: Laboratory Rotations in Computational Biomedical Engineering. 3 credits.**
Intensive introduction to a research laboratory in the area of computational biomedical engineering. The student will read background material pertinent to the problem under study, learn and practice research methods of the laboratory, and formulate a short final project, which may be a proposal or an actual project, demonstrating some mastery of the techniques and approaches employed. Offered by Bioengineering. May be repeated within the degree for a maximum 6 credits.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate or Non-Degree.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Independent Study

Grading:
This course is graded on the Graduate Regular scale.

**BENG 706: Laboratory Rotations in Neurotechnology and Computational Neuroscience. 3 credits.**
Intensive introduction to a research laboratory in the area of neurotechnology and computational neuroscience. The student will read background material pertinent to the problem under study, learn and practice research methods of the laboratory, and formulate a short final project, which may be a proposal or an actual project, demonstrating some mastery of the techniques and approaches employed. Offered by Bioengineering. May be repeated within the degree for a maximum 6 credits.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate or Non-Degree.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Independent Study

Grading:
This course is graded on the Graduate Regular scale.

**BENG 725: Computational Motor Control. 3 credits.**
Uses approaches from robotics, control theory, and neuroscience to understand biological motor systems. Contents include modeling muscles, reflexes and neural systems to understand how the central nervous system plans and controls movement of the eyes and limbs. The theoretical control problem is compared to known neuronal properties of the motor system and diseases of the motor system affecting movement control. Offered by Bioengineering. May not be repeated for credit.

Registration Restrictions:
Enrollment limited to students with a class of Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale.

**BENG 738: Advanced Medical Image Processing. 3 credits.**
Advanced Medical Image Processing covers advanced processing techniques used in modern medical imaging. The course aims at developing an understanding of the mathematical background, principles and application of techniques such as segmentation, registration, morphometry, general linear modeling, principal and independent
component analysis. Offered by Bioengineering. May not be repeated for credit.

**Recommended Prerequisite:** BENG 320 (or equivalent), ECE 537 (or equivalent).

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

**BENG 745: Biomedical Systems and Microdevices.** 3 credits.
Bio-micro-electro-mechanical systems (BioMEMS) provide a robust approach to mimic in vivo microenvironments within controlled in vitro settings. This course introduces students to the highly interdisciplinary field of Lab-on-a-Chip technologies with emphasis on its advanced applications in biological and biomedical engineering. In addition to the microfabrication processes, a variety of analytical techniques routinely used in biomedical research will also be covered. Offered by Bioengineering. May not be repeated for credit.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

**BENG 750: Modeling and Simulation of Human Movement.** 3 credits.
Introduces the development and simulation of data-driven 3D neuro-musculoskeletal models to quantitatively study human movement in health and disease. Topics include reconstructing 3D models from imaging data, estimating kinematics from motion data, simulating movement incorporating multimodality data, and analyzing muscle and joint forces. Students use computational biomechanics software. The course consists of lectures, article presentations, modeling assignments and a project. Offered by Bioengineering. May not be repeated for credit.

**Recommended Prerequisite:** BENG 550 or permission of instructor.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

**BENG 798: Independent Reading and Research in Bioengineering.** 1-6 credits.
Independent study in Bioengineering under the supervision of a faculty member, resulting in an acceptable technical report or presentation. This course may be repeated once for a total of 12 credit hours towards a graduate degree in Bioengineering. Offered by Bioengineering. May be repeated within the degree for a maximum 12 credits.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

**Schedule Type:** Thesis

**Grading:**
This course is graded on the Satisfactory/No Credit scale.

**BENG 799: Master's Thesis.** 1-6 credits.
Research project chosen and completed under guidance of graduate faculty member that results in a technical report and an oral defense acceptable to thesis committee of faculty members. Offered by Bioengineering. May be repeated within the degree.

**Recommended Prerequisite:** 9 graduate credits, and permission of instructor.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate or Non-Degree.

Students in a Non-Degree Undergraduate degree may **not** enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

**Schedule Type:** Thesis

**Grading:**
This course is graded on the Satisfactory/No Credit scale.

**800 Level Courses**

**BENG 800: Bioengineering Colloquium.** 0 credits.
Students are required to attend colloquia including talks by distinguished speakers, faculty candidates, and Mason faculty. Notes: Required attendance and participation in a minimum of 3 seminars per semester. Offered by Bioengineering. May be repeated within the degree.

**Recommended Prerequisite:** Admission to PhD Bioengineering program.

**Registration Restrictions:**
Enrollment limited to Graduate level students.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

**Schedule Type:** Seminar

**Grading:**
This course is graded on the Satisfactory/No Credit scale.

**BENG 801: Bioengineering Colloquium II.** 3 credits.
Formal record of attending the required number of departmental seminars over multiple semesters. Students should first register for BENG 800 – Bioengineering Colloquium until they have attended 3 seminars per semester for 3 semesters. Once they have done so, they
should sign up for BENG 801 to receive credit. Offered by Bioengineering. May not be repeated for credit.

Registration Restrictions:
Required Prerequisite: BENG 800.

Enrollment is limited to Graduate level students.

Schedule Type: Seminar

Grading:
This course is graded on the Satisfactory/No Credit scale.

BENG 820: Seminar in Neuroengineering. 3 credits.
Selective analysis and discussion of topics in neuroengineering in areas of current research interest. Topics may include brain machine interfaces, advanced materials for implantable devices, computational neuroscience, neuronal biosensors and assays, and neuroprosthetics. Offered by Bioengineering. May be repeated within the degree for a maximum 6 credits.

Recommended Prerequisite: Admission to PhD Bioengineering program or permission of instructor.

Registration Restrictions:
Enrollment is limited to Graduate level students.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

Schedule Type: Seminar

Grading:
This course is graded on the Graduate Regular scale.

BENG 830: Seminar in Biomedical Imaging. 3 credits.
Selective analysis and discussion of topics in biomedical imaging in areas of current research interest. Topics may include techniques and analyses for ultrasound, magnetic resonance imaging (MRI), functional MRI, nuclear imaging, computer assisted tomography, positron emission tomography, and emergent approaches to imaging for health and disease. Offered by Bioengineering. May be repeated within the degree for a maximum 6 credits.

Recommended Prerequisite: Admission to PhD Bioengineering program or permission of instructor.

Registration Restrictions:
Enrollment is limited to Graduate level students.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

Schedule Type: Seminar

Grading:
This course is graded on the Graduate Regular scale.

BENG 830: Seminar in Biomedical Imaging. 3 credits.
Selective analysis and discussion of topics in biomedical imaging in areas of current research interest. Topics may include techniques and analyses for ultrasound, magnetic resonance imaging (MRI), functional MRI, nuclear imaging, computer assisted tomography, positron emission tomography, and emergent approaches to imaging for health and disease. Offered by Bioengineering. May be repeated within the degree for a maximum 6 credits.

Recommended Prerequisite: Admission to PhD Bioengineering program or permission of instructor.

Registration Restrictions:
Enrollment is limited to Graduate level students.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

Schedule Type: Seminar

Grading:
This course is graded on the Graduate Regular scale.

BENG 840: Seminar in Nano-scale Bioengineering. 3 credits.
Selective analysis and discussion of topics in nano-scale bioengineering in areas of current research interest. Topics may include nanoengineered materials, nanoscale devices and systems, and novel nano-scale fabrication and modeling approaches with application to biomedicine. Offered by Bioengineering. May be repeated within the degree for a maximum 6 credits.

Recommended Prerequisite: Admission to PhD Bioengineering program or permission of instructor.

Registration Restrictions:
Enrollment is limited to Graduate level students.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

Schedule Type: Seminar

Grading:
This course is graded on the Graduate Regular scale.

BENG 850: Seminar in Biomechanics. 3 credits.
Selective analysis and discussion of topics in biomechanics in areas of current research interest. Topics may include computational and physiological modeling for biomechanics, multiscale representation of biomechanical systems, data fusion techniques for biomechanics, and application of quantitative biomechanics for diagnostics or medical intervention. Offered by Bioengineering. May be repeated within the degree for a maximum 6 credits.

Recommended Prerequisite: Admission to PhD Bioengineering program or permission of instructor.

Registration Restrictions:
Enrollment is limited to Graduate level students.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

Schedule Type: Seminar

Grading:
This course is graded on the Graduate Regular scale.

BENG 850: Seminar in Biomechanics. 3 credits.
Selective analysis and discussion of topics in biomechanics in areas of current research interest. Topics may include computational and physiological modeling for biomechanics, multiscale representation of biomechanical systems, data fusion techniques for biomechanics, and application of quantitative biomechanics for diagnostics or medical intervention. Offered by Bioengineering. May be repeated within the degree for a maximum 6 credits.

Recommended Prerequisite: Admission to PhD Bioengineering program or permission of instructor.

Registration Restrictions:
Enrollment is limited to Graduate level students.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

Schedule Type: Seminar

Grading:
This course is graded on the Graduate Regular scale.

BENG 850: Seminar in Biomechanics. 3 credits.
Selective analysis and discussion of topics in biomechanics in areas of current research interest. Topics may include computational and physiological modeling for biomechanics, multiscale representation of biomechanical systems, data fusion techniques for biomechanics, and application of quantitative biomechanics for diagnostics or medical intervention. Offered by Bioengineering. May be repeated within the degree for a maximum 6 credits.

Recommended Prerequisite: Admission to PhD Bioengineering program or permission of instructor.

Registration Restrictions:
Enrollment is limited to Graduate level students.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

Schedule Type: Seminar

Grading:
This course is graded on the Graduate Regular scale.

BENG 998: Doctoral Dissertation Proposal. 1-12 credits.
Work on research proposal that forms basis for doctoral dissertation. May be repeated as needed. Notes: No more than 24 credits of BENG 998 and 999 may be applied to doctoral degree requirements. Offered by Bioengineering. May be repeated within the degree for a maximum 12 credits.

Registration Restrictions:
Enrollment is limited to Graduate level students.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

Schedule Type: Dissertation

Grading:
This course is graded on the Satisfactory/No Credit scale.

BENG 999: Doctoral Dissertation. 1-12 credits.
Formal record of commitment to doctoral dissertation research under direction of faculty member in bioengineering. May be repeated as needed. Notes: Once enrolled in 999, students must maintain continuous registration in 999 each semester until graduation, excluding summers. Students who defend in the summer must be registered for at least 1 credit of 999 in the summer. Offered by Bioengineering. May be repeated within the degree for a maximum 12 credits.

Registration Restrictions:
Bioinformatics (BINF)

300 Level Courses

BINF 334: Perl for Bioinformatics. 3 credits.
Introduction into Perl programming language. Topics include data representation, control structures, file input/output, subroutines, regular expressions, debugging, relational databases. Emphasizes bioinformatics applications including DNA sequence analysis, parsing FAST A and GenBank files, processing BLAST output files, SQL or equivalent query language. Offered by School of Systems Biology. Limited to three attempts.

Recommended Prerequisite: Knowledge of programming language or CS 112 or equivalent.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale.

BINF 354: Foundations in Mathematical Biology. 3 credits.
Interdisciplinary introduction to life sciences for physicists, chemists, engineers, and mathematicians. Combines knowledge from natural sciences, social and behavioral sciences, quantitative reasoning, and information technology. Covers selected topics in ecology, physiology, biochemistry, and behavior. May include biochemical reaction kinetics, Hodgkin-Huxley model for cellular electrical activity, continuous and discrete population interactions, and neural network models of learning. Techniques utilized include ordinary differential equations, difference equations, algebraic equations, and computer simulations. Offered by School of Systems Biology. Limited to three attempts.

Mason Core: Synthesis

Recommended Prerequisite: Completion or concurrent enrollment in all other required Mason Core courses (must include a chemistry course); MATH 114 or equivalent.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale.

BINF 402: Bioinformatics and Computational Biology Lab I. 1 credit.
Continuation of BINF401 and studies in-depth several algorithms and methods used in bioinformatics and computational biology. Students will learn sequence alignment and assembly algorithms, hidden Markov models, classification and prediction methods, genome annotation. These techniques will then be applied to current bioinformatics problems. Programming assignments are incorporated in the course program. Offered by School of Systems Biology. Limited to three attempts.

Recommended Prerequisite: BINF 401.

Schedule Type: Laboratory

Grading:
This course is graded on the Undergraduate Regular scale.

BINF 403: Bioinformatics and Computational Biology Lab II. 1 credit.
Laboratories will introduce students to bioinformatics tools designed to answer research problems in the topics covered in lectures, such as sequence alignment, sequence pattern recognition, structural conformation modeling, phylogenetic analysis methods and image comparisons. Offered by School of Systems Biology. Limited to three attempts.

Recommended Corequisite: BINF 401.

Schedule Type: Laboratory

Grading:
This course is graded on the Undergraduate Regular scale.

BINF 404: Bioinformatics and Computational Biology Lab II. 1 credit.
Laboratories will introduce students to research bioinformatics tools relevant to lecture topics such as: the correspondence of measured fragments to parent biomolecules, inference methods for gene and protein networks, predicting system outputs given specified inputs. Offered by School of Systems Biology. Limited to three attempts.

Recommended Corequisite: BINF 402

Schedule Type: Laboratory

Grading:
This course is graded on the Undergraduate Regular scale.

BINF 450: Bioinformatics for Life Sciences. 4 credits.
Teaches students how to understand the basis of and use of bioinformatics software in database searching, sequence analysis, gene identification, genomics, protein structure and phylogeny. Offered by School of Systems Biology. Limited to three attempts.

Recommended Prerequisite: BIOL 213, and either BIOL 482 or CHEM 463 or BIOL 483.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale.
**BINF 470: Molecular Biophysics.** 3 credits.
Offers a broad introduction into molecular biophysics. Demonstrates that the application of methods of physics provides a unique opportunity to tackle complex biological problems. Designed for physics or chemistry majors; also useful for biology majors interested in bioinformatics and computational biology. Offered by School of Systems Biology. Limited to three attempts. Equivalent to PHYS 370.

**Recommended Prerequisite:** PHYS 307 or CHEM 331, or permission of instructor.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale.

**BINF 490: Independent Senior Research in Bioinformatics and Computational Biology.** 3 credits.
Course offers individual research in bioinformatics and computational biology under the guidance of faculty member. Written report required upon course completion. Offered by School of Systems Biology. Limited to three attempts.

**Recommended Prerequisite:** Permission of instructor.

**Schedule Type:** Research

**Grading:**
This course is graded on the Undergraduate Regular scale.

**BINF 491: Senior Thesis in Bioinformatics.** 1 credit.
A project is chosen and completed under the guidance of a Bioinformatics Department faculty member. Notes: An oral progress report with a poster at the fall semester Bioinformatics Student Research Day is required. Offered by School of Systems Biology. Limited to three attempts.

**Recommended Corequisite:** BINF 401.

**Schedule Type:** Research

**Grading:**
This course is graded on the Undergraduate Regular scale.

**BINF 492: Senior Thesis in Bioinformatics.** 1 credit.
A project is chosen and completed under the guidance of a Bioinformatics Department faculty member. Notes: A written thesis in standard format is required. Offered by School of Systems Biology. Limited to three attempts.

**Recommended Corequisite:** BINF 402.

**Schedule Type:** Research

**Grading:**
This course is graded on the Undergraduate Regular scale.

### 500 Level Courses

**BINF 530: Introduction to Bioinformatics Methods.** 3 credits.
Introduction to methods and tools for pairwise sequence comparison, multiple sequence alignment, phylogenetic analysis, protein structure prediction and comparison, database similarity searches, and discovery of conserved patterns in protein sequence and structures. Offered by School of Systems Biology. May not be repeated for credit.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Graduate, Non-Degree or Undergraduate level students may not enroll.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

**BINF 531: Molecular Cell Biology for Bioinformatics.** 3 credits.
Intensive review of biochemistry, molecular biology, and cell biology necessary OT begin research in bioinformatics. Topics include protein biochemistry, nucleic acids biochemistry, DNA replication transcription, and translation, recombinant DNA technology, genomics, molecular structure of genes and chromosomes, and expression and control. Offered by School of Systems Biology. May not be repeated for credit.

**Recommended Prerequisite:** Undergraduate 300 and 400 level courses in biochemistry or cell biology, or permission of instructor.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

**BINF 550: Introduction to Bioinformatics Database Design.** 3 credits.
Students will acquire skills needed to exploit public biological databases, and establish and maintain personal databases that support their own research. Skills include learning underlying data models and the basics of DBMS and SQL. Offered by School of Systems Biology. May not be repeated for credit.

**Recommended Prerequisite:** Introductory computer programming course, or permission of the instructor.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

### 600 Level Courses

**BINF 630: Bioinformatics Methods.** 3 credits.
Introduction to methods and tools for pairwise sequence comparison, multiple sequence alignment, phylogenetic analysis, protein structure prediction and comparison, database similarity searches, and discovery
of conserved patterns in protein sequence and structures. Offered by School of Systems Biology. May not be repeated for credit.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

**BINF 631: Molecular Cell Biology for Bioinformatics. 3 credits.**
Intensive review of biochemistry, molecular biology, and cell biology necessary to begin research in bioinformatics. Topics include protein biochemistry, nucleic acids biochemistry, DNA replication, transcription, and translation, recombinant DNA technology, genomics, molecular structure of genes and chromosomes, and gene expression and control. Offered by School of Systems Biology. May not be repeated for credit.

**Recommended Prerequisite:** Undergraduate background in biochemistry, or cell biology, or permission of instructor.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

**BINF 633: Molecular Biotechnology. 3 credits.**
Introduction to the theory and practice of molecular biotechnology, with emphasis on the application of tools in today's society. Includes study of recombinant DNA technology, genomics, and bioinformatics as applied to commercially important products. Lectures reflect more recent advances and applications in the commercial aspects of biology. Offered by School of Systems Biology. May not be repeated for credit.

**Recommended Prerequisite:** BINF 633 or permission of instructor.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

**BINF 634: Bioinformatics Programming. 3 credits.**
Data representation, control structures, file input/output, subroutines, regular expressions, debugging, introduction to relational databases. Emphasizes bioinformatics applications including DNA sequence analysis, parsing FASTA and GenBank files, processing BLAST output files, SQL, or equivalent query language. Offered by School of Systems Biology. May not be repeated for credit.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

**BINF 636: Microarray Methodology and Analysis. 3 credits.**
Theory and practice of genome analysis including genetics, biochemistry, and tools for analyzing global gene expression, and detection and quantification of genes and gene products. Offered by School of Systems Biology. May not be repeated for credit.

**Recommended Prerequisite:** BINF 633 or permission of instructor.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

**BINF 637: Forensic DNA Sciences. 3 credits.**
Intensive introduction to parameters affecting data QC and analysis, including factors arising from biochemistry, chemistry, genetics, statistics, instrumentation, and software. Offered by School of Systems Biology. May not be repeated for credit.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

**BINF 639: Introduction to Biometrics. 3 credits.**
Introduction to methods for measuring humans. Topics include face, speaker, fingerprint, and shoeprint recognition; and handwriting analysis. Students develop computer programs to perform many of these tasks. Offered by School of Systems Biology. May not be repeated for credit.
Recommended Prerequisite: CSI 603 and 604 or permission of instructor.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale.

BINF 641: Biomolecular Modeling. 3 credits.
Introduction to basic principles and practice of computational biomolecular modeling. Students learn the elements of physical chemistry and molecular biology, which constitute the foundation of molecular modeling. Practical application of biomolecular software and development of related skills are emphasized through online lectures, homework, and course project. Offered by School of Systems Biology. May not be repeated for credit.

Recommended Prerequisite: Students are expected to be familiar with basic concepts of physics, calculus, and biology on undergraduate level.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale.

BINF 650: Introduction to Bioinformatics Database Design. 3 credits.
Students will acquire skills needed to exploit public biological databases and establish and maintain personal databases that support their own research; such skills include learning underlying data models and the basics of DBMS and SQL. Offered by School of Systems Biology. May not be repeated for credit.

Recommended Prerequisite: BINF 634 or equivalent, or permission of instructor.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale.

BINF 690: Numerical Methods for Bioinformatics. 3 credits.
Computational techniques for solving scientific problems focusing on applications in bioinformatics and computational biology. Students develop the ability to convert a quantitative problem into computer programs to solve the problem. Emphasizes efficiency and readability of code. Offered by School of Systems Biology. May not be repeated for credit.

Recommended Prerequisite: CS 112, MATH 113 or permission of instructor.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale.

700 Level Courses

BINF 701: Systems Biology. 3 credits.
Systems biology seeks to understand how a complex biological system functions. This involves the use of computational methods and models to integrate information obtained about these systems through a wide range of methods that span multiple spatial and temporal scales. Current research examples will be used to motivate and demonstrate these approaches. Offered by School of Systems Biology. May not be repeated for credit. Equivalent to BIOS 701.

Recommended Prerequisite: Admission to the Ph.D. program in Biosciences or Bioinformatics, CHEM 663 or equivalent.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale.

BINF 702: Biological Data Analysis. 3 credits.
Trains students in research methodologies for life sciences. Covers the three phases of biological research projects: experimental design, data collection and data analysis. Offered by School of Systems Biology. May not be repeated for credit.

Recommended Prerequisite: Admission to PhD program in bioinformatics or biosciences or permission of instructor.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale.
**Bioinformatics (BINF)**

**BINF 703: Bioinformatics Lab Rotation.** 1 credit.
Short-term introductory research on a specific topic in computational sciences and informatics under direction of faculty member. Offered by School of Systems Biology. May be repeated within the term for a maximum 3 credits.

**Recommended Prerequisite:** Permission of instructor.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Laboratory

**Grading:**
This course is graded on the Graduate Special scale.

**BINF 704: Colloquium in Bioinformatics.** 1 credit.
Seminar presentations in a variety of areas of bioinformatics and computational biology by COS faculty, staff, advanced PhD students, and professional visitors. Offered by School of Systems Biology. May be repeated within the degree for a maximum 3 credits.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Special scale.

**BINF 705: Research Ethics.** 1 credit.
Examines ethical issues in scientific research, reflecting on purpose and reviewing foundational principles for evaluating ethical issues. Provides skills for survival in scientific research through training in moral reasoning and teaching of responsible conduct. Students learn to apply critical-thinking skills to design, execution, and analysis of experiments and analysis of ethical issues in research, including use of animals and humans, standards in computer community, and research fraud. Guidelines for data ownership, manuscript preparation, and conduct of people in authority may be presented and discussed. Offered by School of Systems Biology. May not be repeated for credit.

**Recommended Prerequisite:** Permission of instructor.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

**BINF 730: Biological Sequence and Genome Analysis.** 3 credits.
Fundamental methods for analyzing nucleic acid and protein sequences, including pairwise and multiple alignment, database search methods, profile searches, and phylogenetic inference. Development of probabilistic tools, including hidden Markov models and optimization algorithms. Survey of current software tools. Offered by School of Systems Biology. May not be repeated for credit.

**Recommended Prerequisite:** A course in molecular biology, a course in probability, and ability to program in a high-level language, or permission of instructor.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

**BINF 731: Protein Structure Analysis.** 3 credits.
Computational methods for analyzing, classifying, and predicting three-dimensional protein structures. Covers theoretical approaches, techniques, and computational tools for protein structure analysis. Offered by School of Systems Biology. May not be repeated for credit.

**Recommended Prerequisite:** Permission of instructor, or previous courses in molecular biology, biochemistry, and computer programming.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

**BINF 732: Genomics.** 3 credits.
Surveys computational tools and techniques to study whole genomes, and explores biological basis of genome analysis algorithms. Topics include genome mapping, comparative genomics, and functional genomics. Offered by School of Systems Biology. May not be repeated for credit.

**Recommended Prerequisite:** General biology, programming experience, CSI 700 or equivalent, CSI 731, or permission of instructor.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

**BINF 733: Gene Expression Analysis.** 3 credits.
Analyzes gene expression data. Topics include cluster analysis and visualization of expression data, inference of genetic regulatory networks, and theoretical models of genetic networks. Offered by School of Systems Biology. May not be repeated for credit.

**Recommended Prerequisite:** Permission of instructor, ability to program in a high-level language and a course in molecular biology. S-Plus or Matlab experience recommended.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.
Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

**BINF 734: Advanced Bioinformatics Programming.** 3 credits.
Topics include algorithm design, complex data structures, object oriented programming, relational databases, designing modules, and graphics and web programming. Students complete a bioinformatics programming project. Offered by School of Systems Biology. May not be repeated for credit.

**Recommended Prerequisite:** BINF 634, or permission of instructor.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

**BINF 739: Topics in Bioinformatics.** 1-3 credits.
Selected topics in bioinformatics not covered in fixed-content bioinformatics courses. Offered by School of Systems Biology. May be repeated within the term for a maximum 6 credits.

**Specialized Designation:** Topic Varies

**Recommended Prerequisite:** Permission of instructor.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

**BINF 740: Introduction to Biophysics.** 3 credits.
Introduces biophysics, focusing on physical and chemical concepts and their relation to rapidly expanding interdisciplinary interfaces among biology, chemistry, and physics. Reveals multiscale nature of biophysics, and includes exploration of macroscopic and microscopic applications. Offered by School of Systems Biology. May not be repeated for credit. Equivalent to PHYS 630.

**Recommended Prerequisite:** Undergraduate courses in General Physics, Calculus, and Biology.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

**BINF 741: Introduction to Computer Simulations of Biomolecules.** 3 credits.
Details computational methods in biomolecular simulations, such as molecular dynamics and Monte Carlo algorithms. Special emphasis given to practical applications. Reviews most recent advances in biomolecular simulations. Offered by School of Systems Biology. May not be repeated for credit.

**Recommended Prerequisite:** Good programming skills, BINF 690 and 701, or permission of instructor.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

**BINF 751: Biochemical and Cellular Systems Modeling.** 3 credits.
Mathematical and computational methods for analysis of cellular and subcellular processes. Topics may include ion channels, whole cell models, intracellular signaling, biochemical oscillations, pathway modeling, parameter estimation, and sensitivity analysis. Offered by School of Systems Biology. May not be repeated for credit.

**Recommended Prerequisite:** Calculus and knowledge of a computer programming language; and BINF 690 and 701; or permission of instructor. Course in differential equations is recommended.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

**BINF 760: Machine Learning for Bioinformatics.** 3 credits.
Machine learning and data mining methods relevant to application to problems in computational biology. Methods include decision trees, random forests, rule learning methods, support vector machines, neural networks, genetic algorithms, instance-based learning, Bayesian networks, and evaluation metrics for learning systems. Applications include cancer prediction, gene finding, protein function classification, gene regulation network inference, and other recent bioinformatics applications selected from the literature. Notes: In addition to lectures from the instructor, students will present papers from the literature and complete a machine learning project. Offered by School of Systems Biology. May not be repeated for credit.

**Recommended Prerequisite:** BINF 630, BINF 631, and BINF 634, or permission of instructor.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

**BINF 795: Bioinformatics Internship.** 1-3 credits.
Involves off-campus, professional work with approved agencies, institutions, non-profits, or businesses throughout the semester. The internship work must produce one or more products such as; a
comprehensive report, a departmental presentation, a research project, or an article. Internship placement and product type must be approved by the student's faculty advisor. Offered by School of Systems Biology. May be repeated within the degree for a maximum 3 credits.

**Recommended Prerequisite:** Internship placement and parameters must be approved by the faculty advisor prior to registration.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Internship

**Grading:**
This course is graded on the Graduate Regular scale.

**BINF 796:** *Directed Reading and Research.* 1-6 credits.
Reading and research on specific topic in computational sciences and informatics under direction of faculty member. Offered by School of Systems Biology. May be repeated within the degree for a maximum 6 credits.

**Recommended Prerequisite:** Permission of instructor.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Research

**Grading:**
This course is graded on the Graduate Regular scale.

**BINF 798:** *Research Project.* 3 credits.
Project chosen and completed under guidance of graduate faculty member that results in acceptable technical report. Offered by School of Systems Biology. May not be repeated for credit.

**Recommended Prerequisite:** Twelve graduate credits and permission of instructor.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Thesis

**Grading:**
This course is graded on the Graduate Special scale.

**BINF 799:** *Master's Thesis.* 1-6 credits.
Project chosen and completed under guidance of graduate faculty member that results in acceptable technical report (master's thesis) and oral defense. Offered by School of Systems Biology. May be repeated within the degree.

**Recommended Prerequisite:** Twelve graduate credits and permission of instructor.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

**BINF 820:** *Advanced Topics in Molecular Cell Biology.* 3 credits.
Topics may include cell structure, biomembranes and cell architecture, cell signaling, receptor activation, gene expression and control, protein targeting and trafficking, and cell cycle regulation. Notes: Advanced molecular and cellular biology foundation for BINF students. Offered by School of Systems Biology. May not be repeated for credit.

**Specialized Designation:** Topic Varies

**Recommended Prerequisite:** BINF 631 or equivalent.

**Registration Restrictions:**
Enrollment is limited to Graduate level students.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

**BINF 831:** *Structural Genomics Project.* 3 credits.
Covers knowledge-based, large-scale protein structure analysis; classification and prediction of protein structure and function; and other current research topics in structural genomics. Projects address entire research enterprise from developing and defending proposal to peer-reviewed publication. Offered by School of Systems Biology. May not be repeated for credit.

**Recommended Prerequisite:** BINF 731, or permission of instructor.

**Registration Restrictions:**
Enrollment is limited to Graduate level students.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

**BINF 841:** *Research Topics in Biomolecular Simulations.* 3 credits.
Research-oriented course combining lectures and work on individual projects in biomolecular simulations. Topics include protein and peptide aggregation, binding, and unfolding and folding. Offered by School of Systems Biology. May not be repeated for credit.

**Specialized Designation:** Topic Varies

**Recommended Prerequisite:** BINF 741, or permission of instructor.

**Registration Restrictions:**
Enrollment is limited to Graduate level students.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

**BINF 996:** *Doctoral Reading and Research.* 1-6 credits.
Reading and research on specific topic in computational sciences and informatics under direction of faculty member. Offered by School of
Systems Biology. May be repeated within the degree for a maximum 6 credits.

**Recommended Prerequisite:** Admission to doctoral program or permission of instructor.

**Registration Restrictions:**
Enrollment is limited to Graduate level students.

**Schedule Type:** Research

**Grading:**
This course is graded on the Graduate Regular scale.

**BINF 998:** Doctoral Dissertation Proposal. 1-12 credits.
Covers development of research proposal, which forms basis for doctoral dissertation, under guidance of dissertation director and doctoral committee. Offered by School of Systems Biology. May be repeated within the degree.

**Recommended Prerequisite:** Permission of advisor.

**Registration Restrictions:**
Enrollment is limited to Graduate level students.

**Schedule Type:** Dissertation

**Grading:**
This course is graded on the Satisfactory/No Credit scale.

**BINF 999:** Doctoral Dissertation. 1-12 credits.
Doctoral dissertation research under direction of dissertation director. Notes: No more than 24 credits in BINF 998 and 999 may be applied to doctoral degree requirements. Offered by School of Systems Biology. May be repeated within the degree.

**Recommended Prerequisite:** Admission to doctoral candidacy. Students should contact the department for permission and CRN to register. Please indicate your major and semester in the subject heading.

**Registration Restrictions:**
Enrollment is limited to students with a class of Advanced to Candidacy.

Enrollment is limited to Graduate level students.

**Schedule Type:** Dissertation

**Grading:**
This course is graded on the Satisfactory/No Credit scale.

**Biology (BIOL)**

**100 Level Courses**

**BIOL 101:** Biology Freshman Seminar. 1 credit.
This course is for first-seminar freshman with a declared biology major. This elective will serve as a platform for freshman biology students to get practical advice and guidance for how to approach coursework, careers in biology, and professionalism. Offered by Biology. Limited to three attempts.

**Schedule Type:** Seminar

**Grading:**
This course is graded on the Undergraduate Regular scale.

**BIOL 103:** Introductory Biology I. 4 credits.
Topics include chemistry of life, cell structure and function, Mendelian genetics, evolution, and diversity of life. Notes: Survey course suitable for any major. May not be taken after BIOL 200-level or above courses have been taken. Offered by Biology. Limited to three attempts. Equivalent to BIOL 103T, BIOL 105.

**Mason Core:** Natural Science with Lab

**Schedule Type:** Laboratory, Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale.

**BIOL 105:** Introductory Biology I Laboratory. 1 credit.
The chemical basis of life, the structure and function of the cell, Mendelian and human genetics, and the major animal phyla are presented. Notes: Not available to students who have taken BIOL 103 or the equivalent. Offered by Biology. Limited to three attempts. Equivalent to BIOL 103.

**Registration Restrictions:**

**Required Prerequisite:** BIOL 103.

**Schedule Type:** Laboratory

**Grading:**
This course is graded on the Undergraduate Regular scale.

**BIOL 106:** Introductory Biology II Laboratory. 1 credit.
The structure and function of major organ systems of animals and an examination of the structure and function of plants, emphasizing the higher plants. Notes: Not available to students who have taken BIOL 104 or the equivalent. Offered by Biology. Limited to three attempts. Equivalent to BIOL 104.

**Mason Core:** Natural Science with Lab

**Registration Restrictions:**

**Required Prerequisites:** BIOL 107C or 104T.
*May be taken concurrently.
C Requires minimum grade of C.

**Schedule Type:** Laboratory

**Grading:**
This course is graded on the Undergraduate Regular scale.

**BIOL 107:** Intro Biology II Lecture. 3 credits.
Topics include animal (including human) structure, function, homeostatic mechanisms, organ systems, behavior, higher plant systems, and major concepts in ecology. Note: Students are strongly urged to take BIOL 103 prior to BIOL 107. Survey course suitable for any major. May not be taken after BIOL 200-level or above courses have been taken. Offered by Biology. Limited to three attempts.

**Mason Core:** Natural Science Overview

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale.

**BIOL 107:** Intro Biology II Lecture. 3 credits.
Topics include animal (including human) structure, function, homeostatic mechanisms, organ systems, behavior, higher plant systems, and major concepts in ecology. Note: Students are strongly urged to take BIOL 103 prior to BIOL 107. Survey course suitable for any major. May not be taken after BIOL 200-level or above courses have been taken. Offered by Biology. Limited to three attempts.

**Mason Core:** Natural Science Overview

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale.

**BIOL 124:** Human Anatomy and Physiology. 4 credits.
Introduction to structure and function of body’s major organ systems. Note: must be taken in sequence. Does not satisfy the natural science
Schedule Type: Laboratory, Lecture

Grading:
This course is graded on the Undergraduate Regular scale.

**BIOL 125: Human Anatomy and Physiology.** 4 credits.
Introduction to structure and function of body’s major organ systems.
Notes: Does not satisfy the natural science requirement in COS or CHSS.
Course requires the use of organisms. Not available for Biology major credit. Offered by Biology. Limited to three attempts.

Registration Restrictions:
Required Prerequisite: BIOL 124C.
C Requires minimum grade of C.

Schedule Type: Laboratory, Lecture

Grading:
This course is graded on the Undergraduate Regular scale.

**BIOL 140: Plants and People.** 3 credits.
An introduction to the interaction of plants and people from a biological perspective and the tools to continue life-long critical evaluation of emerging issues in human nutrition, agriculture, medicine, and global environmental change as they relate to plant biology. Designated a Green Leaf Course. Offered by Biology. Limited to three attempts.

Mason Core: Natural Science Overview, Encore: Sustainability

Specialized Designation: Green Leaf Related Course

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale.

**BIOL 177: Ecological Applications.** 3 credits.
This course introduces ecosystem concepts and applications to natural and managed ecosystems. This course will discuss the natural environment, ecological processes, and human interaction with and management of this environment. Humankind plays a major role in all worldwide environments and there is very little, if any, of the surface of this planet that remains untouched by human actions. Biologists, ecologists, environmental scientists, and policy makers, must provide for the needs of humanity while mitigating negative impacts on the natural environment. Offered by Biology. Limited to three attempts.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale.

**Recommended Corequisite:** CHEM 211

**Schedule Type:** Laboratory, Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale.

**BIOL 214: Biostatistics for Biology Majors.** 4 credits.
An introduction to statistics used in the life sciences. Offered by Biology. Limited to three attempts.

**Recommended Corequisite:** BIOL 213

**Schedule Type:** Lecture, Recitation

**Grading:**
This course is graded on the Undergraduate Regular scale.

**BIOL 246: Introductory Microbiology.** 3 credits.
Introduction to microbial cell structure, physiology, and pathogenicity. Emphasizes control of microorganisms, host-parasite interactions including immunology, and viral and bacterial pathogens. Note: not available for Biology major credit or to students who have BIOL 305. Offered by Biology. Limited to three attempts.

**Recommended Prerequisite:** BIOL 124 and 125, one year of general biology, or permission of instructor.

**Recommended Corequisite:** BIOL 306.

**Registration Restrictions:**
Students cannot enroll who have a major in Biology.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale.

**BIOL 295: Summer Research in Biology.** 1-3 credits.
Students enrolled in this course study life science related topics in an approved research environment during the summer. This course may involve one or more of the following: reading peer reviewed literature, conducting a field or laboratory study, attending scientific seminars and workshops, writing an abstract, preparing and presenting a poster, or writing a research paper. Notes: May be taken for 1 to 3 credits and repeated once for a total of 3 credits. Total limit for BIOL 295 is 3 credits toward 44 credits for BS or BA (as long as the number of 100-200 level credits for the biology areas has not been exceeded). Offered by Biology. May be repeated within the degree for a maximum of 3 credits.

**Recommended Prerequisite:** Permission of instructor and Biology Program Director.

**Schedule Type:** Research

**Grading:**
This course is graded on the Undergraduate Regular scale.

**200 Level Courses**

**BIOL 213: Cell Structure and Function.** 4 credits.
For science majors and preprofessionals in life sciences. Introduction to cell chemistry, metabolism, and genetics. Note: for science majors and pre-professionals in the life sciences. Offered by Biology. Limited to three attempts.

**Mason Core:** Natural Science with Lab

**300 Level Courses**

**BIOL 300: BioDiversity.** 4 credits.
This course explores the fundamental principles governing organismal biology while introducing the three domains of life: the Archaea, the Bacteria, the Eukaryotes, plus viruses. Offered by Biology. Limited to three attempts. Equivalent to BIOL 303, BIOL 304.

**Registration Restrictions:**
Required Prerequisites: BIOL 213\(^C\) or U213.
\(^C\) Requires minimum grade of C.

Schedule Type: Laboratory, Lecture

Grading:
This course is graded on the Undergraduate Regular scale.

BIOL 301: Biology and Society. 3 credits.
Biological problems facing society including pollution, cloning, emerging
diseases, global warming, and overpopulation. Notes: Not available
for biology major or minor elective credit. May be repeated if topic is
different. Offered by Biology. May be repeated within the term.

Mason Core: Synthesis

Recommended Prerequisite: BIOL 103 and 60 credits, or permission
of instructor.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale.

BIOL 302: Alternative Careers in Biology. 1 credit.
This course will explore non-traditional careers that utilize a biology
degree. Weekly seminars will allow biology undergraduates to discuss
and explore the broad-range of career options that utilize a biology degree
with professionals in those fields. Notes: Biology majors only. Offered by
Biology. Limited to three attempts.

Schedule Type: Seminar

Grading:
This course is graded on the Undergraduate Regular scale.

BIOL 303: Animal Biology. 4 credits.
Emphasizes structure and function of vertebrates, but surveys all animal
groups and protozoa. Also covers evolutionary theory, and evolutionary
history of major animal groups. Course requires use of organisms.
Offered by Biology. Limited to three attempts. Equivalent to BIOL 300,
BIOL 310.

Recommended Prerequisite: C or better in BIOL 213 or U213 or
permission of instructor.

Schedule Type: Laboratory, Lecture

Grading:
This course is graded on the Undergraduate Regular scale.

BIOL 304: Plant Biology. 4 credits.
Introduction to study of plants, their structure, development, nutrition, and
ecology. Emphasizes flowering plants, but surveys all groups and their
phylogenetic relationships. Offered by Biology. Limited to three attempts.
Equivalent to BIOL 310.

Recommended Prerequisite: C or better in BIOL 213 or U213, or
permission of instructor.

Schedule Type: Laboratory, Lecture

Grading:
This course is graded on the Undergraduate Regular scale.

BIOL 305: Biology of Microorganisms. 3 credits.
Morphology, physiology, and pathogenicity of certain groups of bacteria,
fungi, and viruses; stresses host-parasite interactions. Offered by Biology.
Limited to three attempts.

Recommended Corequisite: BIOL 306.

Registration Restrictions:
Required Prerequisites: (BIOL 213\(^C\) or U213).
\(^C\) Requires minimum grade of C.

Students cannot enroll who have a major in Nursing.

Schedule Type: Laboratory

Grading:
This course is graded on the Undergraduate Regular scale.

BIOL 306: Biology of Microorganisms Laboratory. 1 credit.
Laboratory techniques in culturing, staining, and identifying
microorganisms. Offered by Biology. Limited to three attempts.

Recommended Corequisite: BIOL 305 or 246.

Schedule Type: Laboratory

Grading:
This course is graded on the Undergraduate Regular scale.

BIOL 308: Foundations of Ecology and Evolution. 5 credits.
An examination of the principles of ecology, evolution, and the impact
of humans on the world around them. Topics will include evolutionary
history, biological diversity, and analyzes of interactions among
organisms and between organisms and their environment. Offered by
Biology. Limited to three attempts. Equivalent to BIOL 308T, BIOL 328,
BIOL 338.

Specialized Designation: Mason Impact., Writing Intensive in Major

Recommended Prerequisite: BIOL 311.

Registration Restrictions:
Required Prerequisites: (BIOL 213\(^C\) and 214\(^C\)) or (EVPP 110\(^C\) and
BIOL 214\(^C\)).
\(^C\) Requires minimum grade of C.

Schedule Type: Laboratory, Lecture

Grading:
This course is graded on the Undergraduate Regular scale.

BIOL 309: Introduction to Oceanography. 3 credits.
Introduction to chemical, biological, and geological aspects of oceanic
environment. May include field trips. Offered by Biology. Limited to three
attempts. Equivalent to EVPP 309, GEOL 309.

Recommended Prerequisite: Two of the following lab sciences courses
are required for a total of 8 credits: [GEOL 101 or 102], [EVPP 108 and 109
or 112 and 113 or 210], CHEM 211 and 213, [BIOL 103 or 213], [PHYS 160
and 161 or 243 and 244].

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale.
BIOL 311: General Genetics. 4 credits.
Basic principles of heredity and modern developments in this field.
Offered by Biology. Limited to three attempts.
Recommended Prerequisite: BIOL 214.

Registration Restrictions:
Required Prerequisite: (BIOL 213C).
C Requires minimum grade of C.

Schedule Type: Laboratory, Lecture
Grading:
This course is graded on the Undergraduate Regular scale.

BIOL 312: Biostatistics for Bioinformatics. 4 credits.
Use of probability and descriptive and inferential statistical techniques in interpreting biological data. Offered by Biology. Limited to three attempts.

Registration Restrictions:
Required Prerequisites: (BIOL 214C and CDS 130C).
C Requires minimum grade of C.

Schedule Type: Lecture, Recitation
Grading:
This course is graded on the Undergraduate Regular scale.

BIOL 314: Introduction to Research Design and Analysis. 4 credits.
Introduction to research design in a wide range of biological disciplines. Lecture will concentrate on how to design experiments with proper controls for statistical analysis, as well as obtaining permits and approvals from appropriate agencies. In recitation students will be given data sets to analyze. Offered by Biology. Limited to three attempts.

Specialized Designation: Mason Impact.
Recommended Prerequisite: BIOL 213, BIOL 214 or 312 or equivalent introductory statistics course, BIOL 311, CHEM 211, 212, 213, 214; Completion of Biology core recommended; Must be enrolled in Biology Research Semester.

Schedule Type: Lecture, Recitation
Grading:
This course is graded on the Undergraduate Regular scale.

BIOL 318: Conservation Biology. 3 credits.
Introduction to science used to identify species in need of conservation and techniques to manage and protect organisms. Offered by Biology. Limited to three attempts. Equivalent to EVPP 318.
Recommended Prerequisite: BIOL 308 or BIOL 300, or permission of instructor.

Schedule Type: Lecture
Grading:
This course is graded on the Undergraduate Regular scale.

BIOL 320: Comparative Chordate Anatomy. 4 credits.
Compares anatomy and morphology of major chordate groups. Lab emphasizes shark, mudpuppy, cat, and rabbit. Offered by Biology. Limited to three attempts.
Recommended Prerequisite: BIOL 308 or BIOL 310 or permission of instructor.

Schedule Type: Laboratory, Lecture
Grading:
This course is graded on the Undergraduate Regular scale.

BIOL 322: Developmental Biology. 3 credits.
Principles of embryonic development and differentiation in animal species at cellular, molecular, tissue, and whole organism levels. Offered by Biology. Limited to three attempts.
Recommended Prerequisite: BIOL 213 or U213 and BIOL 311 or L311 or permission of instructor.

Schedule Type: Lecture
Grading:
This course is graded on the Undergraduate Regular scale.

BIOL 323: Lab for Developmental Biology. 1 credit.
This laboratory will explore early developmental processes using classical and modern developmental, biology techniques. Students will have the opportunity to propose and carry out a small independent project using zebrafish as a model organism. Offered by Biology. Limited to three attempts.

Schedule Type: Laboratory
Grading:
This course is graded on the Undergraduate Regular scale.

BIOL 326: Animal Physiology. 3 credits.
General consideration of animal function emphasizing common life problems and methods for solving them. Topics include intercellular communication (nerve and endocrine), metabolism, water and solute balance, and cardiovascular and respiratory physiology. Offered by Biology. Limited to three attempts.
Recommended Prerequisite: BIOL 213 or U213 and BIOL 311 or L311, or permission of instructor.

Schedule Type: Lecture
Grading:
This course is graded on the Undergraduate Regular scale.

BIOL 331: Invertebrate Zoology. 4 credits.
Survey of invertebrate phyla, excluding insects, showing morphology, phylogeny, and general biology of these groups. Offered by Biology. Limited to three attempts.
Recommended Prerequisite: BIOL 308 or BIOL 300, or permission of instructor.

Schedule Type: Laboratory, Lecture
Grading:
This course is graded on the Undergraduate Regular scale.

BIOL 332: Insect Biology. 4 credits.
Survey of insects including taxonomy, morphology, physiology, behavior, ecology, and economic importance. Offered by Biology. Limited to three attempts.

**BIOL 334: Vertebrate Paleontology.** 4 credits.
Vertebrate Paleontology explores the evolution of vertebrates from the early Paleozoic to Recent. The course will cover the systematics, anatomy, paleogeography, and ecology of extinct vertebrates. Discussions will include fishes, early tetrapods & amniotes, dinosaurs, birds and mammals. Lab portion includes paleontology techniques, analysis, and study of fossil specimens and casts. A weekend field trip is included. Offered by Biology. Limited to three attempts. Equivalent to GEOL 334.

**Recommended Prerequisite:** Any two courses from the following list: GEOL 101, GEOL 102, BIOL 103, BIOL 104, BIOL 213, BIOL U213, BIOL 310 or the permission of the instructor.

**Schedule Type:** Laboratory, Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale.

**BIOL 335: Forensic Entomology.** 3 credits.
Explores the use of insects and other arthropods in field of forensic science as it pertains to the investigations of human and animal deaths and abuse, food and other product contamination, theft, the illegal drug trade and unethical entomological practices. The use and presentation of this information from such investigations in court room proceedings will be discussed. Offered by Biology. Limited to three attempts.

**Recommended Prerequisite:** BIOL 213 or U 213 or permission of instructor.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale.

**BIOL 336: Invertebrate Paleontology.** 4 credits.
Classification, evolutionary trends, and distribution of common invertebrate fossils. May include field trips. Notes: May include field trips. Offered by Biology. Limited to three attempts. Equivalent to GEOL 312.

**Recommended Prerequisite:** Either GEOL 101 and GEOL 102; or BIOL 103 and BIOL 104; or BIOL 213 or U213 and BIOL 310.

**Schedule Type:** Laboratory, Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale.

**BIOL 338: Lab for Fundamentals of Ecology and Evolution.** 2 credits.
This is a writing intensive experience and laboratory for transfer students who have previously taken an equivalent course to BIOL 308 that did not have a lab and did not meet the writing intensive requirements in the biology major. This course is paired with BIOL 308. Offered by Biology. Limited to three attempts.

**Specialized Designation:** Writing Intensive in Major

**Recommended Prerequisite:** Permission of Biology Program Director and faculty coordinator of BIOL 308.

**Schedule Type:** Laboratory

**Grading:**
This course is graded on the Undergraduate Regular scale.

**BIOL 340: Introductory Botany.** 4 credits.
Introduction to study of plants, their structure, development, nutrition, and ecology. Surveys of many groups of plants and their phylogenetic relationships will be studied. Offered by Biology. Limited to three attempts.

**Recommended Prerequisite:** 100-level introductory biology and/or BIOL 213.

**Schedule Type:** Laboratory, Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale.

**BIOL 344: Plant Diversity and Evolution.** 4 credits.
Investigates the diversity of vascular plants, including angiosperms, their evolutionary relationships, and the bases of their classification and identification. Offered by Biology. Limited to three attempts.

**Recommended Prerequisite:** BIOL 308 or BIOL 310, or permission of instructor.

**Schedule Type:** Laboratory, Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale.

**BIOL 345: Plant Ecology.** 4 credits.
Investigates the interaction of plants with their abiotic and biotic environment, native Virginian plant communities and their causes, and global processes affecting plant distributions over geological time. Notes: Three Saturday or Sunday field trips required. Offered by Biology. Limited to three attempts.

**Recommended Prerequisite:** BIOL 308 or BIOL 310, or permission of instructor.

**Schedule Type:** Laboratory, Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale.

**BIOL 350: Freshwater Ecosystems.** 4 credits.
Studies physical, chemical, and biological processes in lakes, streams, and wetlands. Lectures, field trips, and lab exercises teach physical and chemical aspects of aquatic systems and life cycles, and adaptations of aquatic organisms. Offered by Biology. Limited to three attempts. Equivalent to EVPP 350.

**Recommended Prerequisite:** CHEM 211/213 and CHEM 212/214 or CHEM 155/156 and BIOL 308 or EVPP 301.

**Schedule Type:** Laboratory, Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale.
BIOL 351: Conservation Seminar. 2 credits.
Examines key conservation issues, based on readings and discussions from the primary literature. Teaches professional development skills for scientists in conservation including fundraising, poster presentations, and interpretation of findings for diverse audiences. Develops skills for obtaining internships, jobs, or graduate positions. Offered by Biology. May be repeated within the degree for a maximum of 4 credits. Equivalent to CONS 400.

Recommended Prerequisite: EVPP 301 or EVPP 302 or BIOL 308 or INTS 401 (or equivalent course) or permission of instructor.

Schedule Type: Seminar
Grading:
This course is graded on the Undergraduate Regular scale.

BIOL 352: Monitoring and Assessment of Biodiversity. 4-6 credits.
Assessment, monitoring and conservation of species and habitats. Use tools for sampling species and habitats as well as how to evaluate their effectiveness. Apply this practical, hands-on knowledge to prepare a series of reports and recommendations for future work. Offered by Biology. Limited to three attempts. Equivalent to CONS 404.

Recommended Prerequisite: EVPP 301 or EVPP 302 or BIOL 308 or INTS 401 (or equivalent course) or permission of instructor.

Schedule Type: Lecture
Grading:
This course is graded on the Undergraduate Regular scale.

BIOL 353: Small Population Management. 4 credits.
Investigates species vulnerability to extinction and the methodologies of preserving genetic diversity in small populations, both in the wild and in captivity. Teaches modeling and laboratory techniques that promote successful captive breeding, such as hormone analysis and assisted reproductive techniques. Examines captive species in the Smithsonian Conservation Biology Institute to learn husbandry practices and skills from keepers and biologists. Offered by Biology. Limited to three attempts. Equivalent to CONS 406.

Recommended Prerequisite: EVPP 301 or EVPP 302 or BIOL 308 or INTS 401 (or equivalent course) or permission of instructor.

Schedule Type: Lecture
Grading:
This course is graded on the Undergraduate Regular scale.

BIOL 354: Research in Conservation. 5 credits.
One-on-one research experience with a conservation practitioner over 5 weeks (about 36 hours per week) on a conservation research project associated with that practitioner's program. Offered by Biology. Limited to three attempts.

Recommended Prerequisite: EVPP 301 or EVPP 302 or BIOL 308 or INTS 401 (or equivalent course) or permission of instructor.

Schedule Type: Lecture
Grading:
This course is graded on the Undergraduate Regular scale.

BIOL 355: Ecological Engineering and Ecosystem Restoration. 4 credits.
Provides definition, classification and practice of ecological engineering and ecosystem restoration. Describes general system ecology, ecosystem restoration, and the utilization of natural processes to provide ecosystem services to society and benefits to nature. Provides students with a systems-oriented perspective on environmental studies. Students will study principles in general system ecology and ecological engineering and explore practices in sustainable ecological design by carrying out a hands-on experimental design project with field microcosms/mesocosms in a newly established Wetland Mesocosm Compound on the campus. This course will involve a field trip (1-2 days). Offered by Biology. Limited to three attempts.

Recommended Prerequisite: CHEM 211 and CHEM 213, BIOL 308 or EVPP 301, and PHYS 243.

Schedule Type: Laboratory, Lecture
Grading:
This course is graded on the Undergraduate Regular scale.

BIOL 356: Landscape and Macrosystems Ecology. 4 credits.
Detect and characterize patterns in landscapes. Investigate how they form and change over time, and with anthropogenic influences. Models populations and communities across landscapes, and ways of managing them to achieve goals in managing species and ecosystem processes at local, regional, and continental scales. Offered by Biology. Limited to three attempts. Equivalent to CONS 405.

Recommended Prerequisite: (EVPP 301 and EVPP 302) or BIOL 308 or INTS 401 or equivalent course.

Schedule Type: Lecture
Grading:
This course is graded on the Undergraduate Regular scale.

BIOL 357: Ecology Field Skills. 4 credits.
In this course, you will be introduced to a variety of field techniques used in ecological research through occasional classroom lectures and intensive field activities. You start with an overview of sampling methodologies common to the discipline and progress to hands-on and remote sampling techniques for plants, insects, amphibians, reptiles, birds and mammals. You will become familiar with Virginia's flora and fauna, gain experience in sampling and identifying representative plants, invertebrates and vertebrates, and obtain experience in making observations and characterizing ecological interactions related to population, community, and behavioral ecology. Also, you will maintain a field journal and complete a research proposal following adapted guidelines of Mason's OSCAR program. Come to Front Royal ready to work hard and to spend long days in the field. Offered by Biology. Limited to three attempts.

Recommended Prerequisite: BIOL 308 or BIOL 300 (or equivalent) or INTS 401

Schedule Type: Laboratory, Lecture
Grading:
This course is graded on the Undergraduate Regular scale.

BIOL 374: Biogeography: Space, Time, and Life. 3 credits.
A survey of the relationship between the distribution of plants and animals on the earth surface and the physical geography and
environmental characteristics. Offered by Biology. Limited to three attempts. Equivalent to GGS 321.

**Recommended Prerequisite:** One of the following: BIOL 300, GGS 122, GGS 102, or permission of instructor.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale.

Introduction to ecosystem concepts and their applications to natural and managed ecosystems. Offered by Biology. Limited to three attempts. Equivalent to EVPP 377.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale.

**BIOL 378: Applied Ecology Laboratory.** 1 credit.
Application of ecosystem concepts in natural and managed ecosystems. Offered by Biology. Limited to three attempts.

**Recommended Corequisite:** BIOL 377 or EVPP 377.

**Schedule Type:** Laboratory

**Grading:**
This course is graded on the Undergraduate Regular scale.

**BIOL 379: RS: Ecological Sustainability.** 4 credits.
Introduces the concepts and applications of several important topics relating to ecological sustainability. Focuses on the role of soils in maintaining and managing environmental quality. Teaches students how to understand and interpret scientific data presented in various types of literature covering ecological sustainability. Offered by Biology. Limited to three attempts. Equivalent to EVPP 378.

**Mason Core:** Capstone

**Specialized Designation:** Green Leaf Focused Course, Research/Scholarship Intensive

**Recommended Prerequisite:** BIOL 308 or permission of instructor.

**Schedule Type:** Laboratory, Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale.

**BIOL 382: Introduction to Virology.** 3 credits.
An introduction to the fundamental nature of viruses, their classification, morphology, chemistry and their role in human disease. Offered by Biology. Limited to three attempts. Equivalent to EVPP 378.

**Registration Restrictions:**
Required Prerequisites: (BIOL 305C or L305) or (BIOL L246 or 246C).
C Requires minimum grade of C.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale.

**BIOL 385: Biotechnology and Genetic Engineering.** 3 credits.
Emphasizes theory and applications, including significance and societal implications of biotechnology applied to medicine, agriculture, and environment. Offered by Biology. Limited to three attempts.

**Registration Restrictions:**
Required Prerequisites: BIOL 311C or L311.
C Requires minimum grade of C.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale.

**BIOL 401: Phage Discovery.** 3 credits.
Discovery-based undergraduate research course where students purify phage from soil, use a variety of microbiology techniques, annotate phage genomes and use bioinformatics analyses. Offered by Biology. Limited to three attempts.

**Registration Restrictions:**
Required Prerequisites: ((BIOL 305C, L305 or 246C) and (BIOL 306C or L306)).
C Requires minimum grade of C.

**Schedule Type:** Laboratory

**Grading:**
This course is graded on the Undergraduate Regular scale.

**BIOL 402: Applied and Industrial Microbiology.** 3 credits.
Biology of microorganisms of ecological and industrial significance. Includes food production, spoilage and preservation, fermentation technology, waste disposal, water purification, biodeterioration, and decomposition. Offered by Biology. Limited to three attempts.

**Registration Restrictions:**
Required Prerequisites: BIOL 305C, L305, 246C or L246.
C Requires minimum grade of C.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale.

**BIOL 403: Techniques in Applied and Industrial Microbiology.** 1 credit.
Lab exercises illustrate basic and applied methodologies, including isolation of commercially useful strains. Discusses production and purification of industrial products. Offered by Biology. Limited to three attempts.

**Recommended Prerequisite:** BIOL 213 or U213, BIOL 305 or L305, BIOL 306 or L306, CHEM 211/213, CHEM 212/214; BIOL 402 (concurrent enrollment is permitted) or permission of instructor.

**Schedule Type:** Laboratory

**Grading:**
This course is graded on the Undergraduate Regular scale.

**BIOL 404: Medical Microbiology.** 3 credits.
Basic principles of infectious diseases caused by bacteria and viruses. Discusses genetics and molecular mechanisms of pathogenicity. Offered by Biology. Limited to three attempts.
BIOL 411: Advanced General Genetics. 3 credits.
Topics include quantitative genetics, extrachromosomal inheritance, and special techniques such as mutation screening, developmental genetics, cancer genetics, behavior genetics, evolutionary genetics, and ethics of genetic technology. Offered by Biology. Limited to three attempts.

Recommended Prerequisite: C or better in BIOL 311 or permission of instructor.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale.

BIOL 412: Phage Genomics. 3 credits.
Bacteriophages, viruses that infect bacteria, are the most abundant organisms in the biosphere. This course explores the genomes of mycobacteriophages (bacteriophages that infect mycobacteria) using bioinformatics tools. In this course, two mycobacteriophage genomes will be annotated and compared to other sequenced mycobacteriophage genomes. Bioinformatics tools will be used to learn more about bacteriophage protein function, immunity and genome structure. Each student in the course will formulate a comparative genomics question and use learned bioinformatics techniques to answer that question. The results of these experiments will be conveyed in the form of a research paper and oral presentation. This class is designed to give students the opportunity to actively participate in the process of scholarship and research in addition to learning valuable genomic and bioinformatics skills. Offered by Biology. Limited to three attempts.

Recommended Prerequisite: BIOL 311 or equivalent or permission of instructor.

Schedule Type: Research

Grading:
This course is graded on the Undergraduate Regular scale.

BIOL 413: Histotechniques. 3 credits.
Introduces theory and methods for the preparation of tissue samples from animal or plant specimens for examination with light or electron microscopy. Offered by Biology. Limited to three attempts.

Recommended Prerequisite: BIOL 311 and permission of instructor. May not be combined with BIOL 572 for credit. For Biology majors only. Undergraduate courses in biology and chemistry or permission of instructor.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale.

BIOL 405: Microbial Genetics. 4 credits.
Provides a modern, comprehensive knowledge of fungal biology including classification, phylogeny, structure, physiology/metabolism, growth and development, genetics, industrial applications including biotechnology, ecological roles including pathogenic interactions with plants, animals, and man. Offered by Biology. Limited to three attempts. Equivalent to EVPP 408.

Recommended Prerequisite: EVPP 108 and 109 and 112 and 113 or EVPP 210 or BIOL 213.

Schedule Type: Laboratory, Lecture

Grading:
This course is graded on the Undergraduate Regular scale.

BIOL 407: Microbial Diversity. 4 credits.
Studies effect of microorganisms on ecological and medical phenomena. Stresses evolution of microbial species, biochemical cycling, and species interactions. Laboratory stresses use of cultural, biochemical, and phylogenetic methods to study microbial isolation, metabolism, and identification. Offered by Biology. Limited to three attempts.

Recommended Prerequisite: BIOL 305 or L305 and (BIOL 306 or L306).

Schedule Type: Laboratory, Lecture

Grading:
This course is graded on the Undergraduate Regular scale.

BIOL 408: Mushrooms, Molds and Society. 3 credits.
Provides a modern, comprehensive knowledge of fungal biology including classification, phylogeny, structure, physiology/metabolism, growth and development, genetics, industrial applications including biotechnology, ecological roles including pathogenic interactions with plants, animals, and man. Offered by Biology. Limited to three attempts. Equivalent to EVPP 408.

Recommended Prerequisite: EVPP 108 and 109 and 112 and 113 or EVPP 210 or BIOL 213.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale.

BIOL 409: Medical Mycology. 3 credits.
Provides the student with current knowledge of both the medical and microbiological aspects of fungal diseases in humans, including the etiologic agents, geographic distribution, epidemiology, transmission, determinants of pathogenicity, laboratory detection, and therapy associated with the major human mycoses. Offered by Biology. Limited to three attempts. Equivalent to EVPP 409.

Recommended Prerequisite: BIOL 213 or U213 with a grade of C or better.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale.

BIOL 417: Selected Topics in Molecular and Cellular Biology. 1-4 credits.
Study of current topics in molecular and cellular biology. Notes: Topics vary. Offered by Biology. May be repeated within the term for a maximum of 8 credits.
**BIOL 421: Genetics of Human Diseases.** 3 credits.
Emphasizes strategies used for identification of genes involved in human genetic diseases. Both monogenic and complex human genetic diseases, as well as principles of genetic screening and counseling, will be presented. Offered by Biology. Limited to three attempts.

*Recommended Prerequisite: BIOL 311.*

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale.

**BIOL 422: Stem Cell Biology and Regenerative Medicine.** 3 credits.
A broad overview of the biological principles governing stem cell populations. The functional roles stem cells play in regulating normal development and contributing to disease-state pathologies. An examination of the therapeutic potential of stem cells through "regenerative medicine." Offered by Biology. Limited to three attempts.

*Recommended Prerequisite: BIOL 311.*

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale.

**BIOL 423: Biology of Obesity and Weight Loss.** 3 credits.
This course covers the causes and consequences of obesity and weight loss, including the general epidemiology and pathology of co-morbid conditions associated with obesity. The relative contributions of genetic and environmental factors influencing weight gain will be covered as well as recent trends in obesity research. Offered by Biology. Limited to three attempts.

*Recommended Prerequisite: BIOL 213 or U213 or permission of instructor.*

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale.

**BIOL 424: Current Topics in Microbiology.** 3 credits.
Study of current topics in microbiology. Notes: Topics vary. Offered by Biology. May be repeated within the degree for a maximum 6 credits.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale.

**BIOL 425: Human Physiology.** 3 credits.
Organ system approach to study of homeostasis, including cardiovascular, respiratory, renal, digestive, endocrine, and nervous system functions. Offered by Biology. Limited to three attempts.

*Recommended Prerequisite: BIOL 213 or U213 or permission of instructor.*

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale.

**BIOL 426: Mechanisms of Aging.** 3 credits.
A course where students will demonstrate knowledge of cellular and molecular mechanisms which drive the systematic changes that result in aging, and to understand the overall biological processes involved in complex biological systems. Offered by Biology. Limited to three attempts.

*Recommended Prerequisite: BIOL 213 or U213 and BIOL 311 or L311 or equivalent; or permission of instructor.*

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale.

**BIOL 427: Disease Ecology and Conservation.** 3 credits.
Presents the trans-disciplinary discipline of conservation medicine, the study of relationships between organism and ecosystem health and environmental conditions. Topics include infectious and noninfectious diseases, pathogens, processes, and impacts on human, biotic, and ecosystem health, and how to address the consequences of diseases to populations and ecological communities. Notes: This course will co-meet with EVPP 527. Undergraduate students in this course will have separate (shorter) reading and writing assignments and will be graded according to a different rubric than the graduate students. Offered by Biology. Limited to three attempts. Equivalent to EVPP 427.

*Recommended Prerequisite: 60 credits and BIOL 213 or BIOL/ EVPP 305/306 and BIOL 308 OR EVPP 301, or permission of instructor.*

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale.

**BIOL 430: Advanced Human Anatomy and Physiology I.** 4 credits.
Organ system approach to studying the structure and function of the human organism and maintenance of homeostasis. Detailed discussion of anatomical structures and their functions of the endocrine, nervous, muscular, skeletal, and integumentary systems following introduction to the cellular and tissue levels of organization. Topics also include selected
pathology for each organ system; current therapeutic interventions are addressed. Notes: Biology 124 is not approved for Biology Majors. Offered by Biology. Limited to three attempts.

Recommended Prerequisite: 60 credits.

Registration Restrictions:
Required Prerequisite: BIOL 213.C.
C Requires minimum grade of C.

Schedule Type: Laboratory, Lecture

Grading:
This course is graded on the Undergraduate Regular scale.

BIOL 431: Advanced Human Anatomy and Physiology II. 4 credits.
Continued study of the structure and function of the human organism and maintenance of homeostasis. Detailed discussion of anatomical structures and their functions of the cardiovascular, lymphatic, respiratory, urinary, digestive and reproductive organ systems. Topics also include selected disorders for each organ system to illustrate disruption of homeostasis. Offered by Biology. Limited to three attempts.

Registration Restrictions:
Required Prerequisite: BIOL 430.C.
C Requires minimum grade of C.

Schedule Type: Laboratory, Lecture

Grading:
This course is graded on the Undergraduate Regular scale.

BIOL 432: Clinical Applications in Human Physiology. 4 credits.
Select organ systems will be discussed relative to their physiology, pathology and pharmacology. Case study presentations will be an integral part of the class. Offered by Biology. Limited to three attempts.

Registration Restrictions:
Required Prerequisites: ((BIOL 124.C or 125.C) and (BIOL 430.C or 431.C)).
C Requires minimum grade of C.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale.

BIOL 433: Selected Topics in Plant Biology. 1-4 credits.
Lecture or field course in botany. Topic varies with instructor’s specialty. Offered by Biology. May be repeated within the degree for a maximum 8 credits.

Specialized Designation: Topic Varies

Recommended Prerequisite: BIOL 310 or permission of instructor.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale.

BIOL 434: Selected Topics in Biology. 4 credits.
Topics vary with instructor’s specialty. Offered by Biology. May be repeated within the degree for a maximum 8 credits.

Specialized Designation: Topic Varies

Recommended Prerequisite: BIOL 308 or BIOL 300 or permission of instructor.

Schedule Type: Fieldwork

Grading:
This course is graded on the Undergraduate Regular scale.

BIOL 437: Ornithology. 4 credits.
Study of evolution, systematics, physiology, ecology and behavior of birds, emphasizing field work. Offered by Biology. Limited to three attempts.

Recommended Prerequisite: BIOL 308 or equivalent or permission of instructor.

Schedule Type: Laboratory, Lecture

Grading:
This course is graded on the Undergraduate Regular scale.

BIOL 438: Mammalogy. 4 credits.
Study of evolution, systematics, physiology, ecology and behavior of mammals, emphasizing field work. Offered by Biology. Limited to three attempts.

Recommended Prerequisite: BIOL 308 or equivalent or permission of instructor.

Schedule Type: Laboratory, Lecture

Grading:
This course is graded on the Undergraduate Regular scale.

BIOL 439: Herpetology. 4 credits.
Study of evolution, systematics, physiology, ecology and behavior of reptiles, emphasizing field work. Offered by Biology. Limited to three attempts.

Recommended Prerequisite: BIOL 308 or equivalent or permission of instructor.

Schedule Type: Laboratory, Lecture

Grading:
This course is graded on the Undergraduate Regular scale.

BIOL 440: Field Biology. 0-4 credits.
Directed field studies emphasizing ecology and behavior. Topics vary but include design of field manipulations, data collection and analysis, and introduction to organisms of study site. May include field trips. Notes: Students bear cost of required field trips. May be repeated with permission of Biology Program. Total limit of 4 credits. This course does not satisfy requirements of the BA degree or BS degree, which state that students must complete at least one (BA degree) or two (BS degree) upper division courses that include a laboratory. Offered by Biology. May be repeated within the degree for a maximum 4 credits. Equivalent to EVPP 440.

Recommended Prerequisite: BIOL 308 or BIOL 300 or permission of instructor.

Schedule Type: Fieldwork

Grading:
This course is graded on the Undergraduate Regular scale.
BIOL 442: Urban Ecosystems and Processes. 4 credits.
Overview and introduction of challenges and opportunities that urban environments present to the plants and animals inhabiting cities and the ways that those organisms and entire ecosystems respond. Ecosystem ecology for engineered ecosystems along with reviews on urban metabolism, energy budgets, water cycles, and soil ecology taught. Creating and restoring green infrastructures is discussed. Note: the course will involve students to design and conduct a small-scale green infrastructure experiment/project on the campus. Offered by Biology. Limited to three attempts. Equivalent to EVPP 442.

Recommended Prerequisite: CHEM 211 and CHEM 213 and MATH 113 or equivalent and BIOL 308 and PHYS 243 or permission of instructor.

Schedule Type: Laboratory, Lecture
Grading:
This course is graded on the Undergraduate Regular scale.

BIOL 443: Tropical Ecology. 3 credits.
An introduction to the abiotic and biotic factors that define tropical habitats. The course emphasizes evolution, taxonomic diversity, and plant-animal interactions in terrestrial tropic forests. Offered by Biology. Limited to three attempts.

Registration Restrictions:
Required Prerequisites: (BIOL 308C or 300C).
C Requires minimum grade of C.

Schedule Type: Lecture
Grading:
This course is graded on the Undergraduate Regular scale.

BIOL 444: Tropical Ecology Laboratory. 1 credit.
An introduction to field-based scientific research. This course focuses on methods for testing hypotheses related to tropical plant and animal biology. Offered by Biology. Limited to three attempts.

Registration Restrictions:
Required Prerequisites: (BIOL 308C or 300C).
C Requires minimum grade of C.

Schedule Type: Laboratory
Grading:
This course is graded on the Undergraduate Regular scale.

BIOL 446: Ecological and Evolutionary Physiology. 3 credits.
Physiological responses organisms use to survive and reproduce successfully in their ever-changing environments. Responses to temperature, salinity, low oxygen levels and diet will be covered from a phylogenetic and energetic perspective. Offered by Biology. Limited to three attempts.

Recommended Prerequisite: BIOL 308 or BIOL 300, and BIOL 326 or BIOL 430 and BIOL 431, or permission of instructor.

Registration Restrictions:
Enrollment is limited to students with a major in Biology.

Schedule Type: Lecture
Grading:
This course is graded on the Undergraduate Regular scale.

BIOL 449: Marine Ecology. 3 credits.
Plants and animals of marine environments and physical and chemical conditions that affect their existence. Offered by Biology. Limited to three attempts. Equivalent to EVPP 449.

Recommended Prerequisite: BIOL 308 or permission of instructor.

Schedule Type: Lecture
Grading:
This course is graded on the Undergraduate Regular scale.

BIOL 450: Marine Conservation. 3 credits.
Provides an overview of threats to the marine environment, and discusses the scientific, socioeconomic, and political issues behind marine conservation. Covers categories of marine pollutants (chemical, biological, and physical contaminants) and their impacts on the marine ecosystem, as well as impacts on humans (health, social, and economic), threats to key marine species (e.g., coral, sharks, turtles, and marine mammals) and initiatives and laws developed to reduce these threats. Scientific and socioeconomic problems that hinder sustainable fisheries management and the science and policy behind the global warming debate are also discussed. The course also provides an overview of marine environmental law and policy issues related to marine conservation policy. Offered by Biology. Limited to three attempts. Equivalent to EVPP 421.

Recommended Prerequisite: BIOL 309 or equivalent, or permission of instructor.

Schedule Type: Lecture
Grading:
This course is graded on the Undergraduate Regular scale.

BIOL 452: Immunology. 3 credits.
Topics include structure and function of immunoglobulins, role of cell-mediated immunity, protective role of immune system, and disease and injury related to malfunctions of immune system. Offered by Biology. Limited to three attempts.

Specialized Designation: Mason Impact.

Recommended Prerequisite: BIOL 311.

Schedule Type: Lecture
Grading:
This course is graded on the Undergraduate Regular scale.

BIOL 453: Immunology Laboratory. 1 credit.
Techniques relevant to BIOL 452, including enzyme-linked immunoabsorbant assay, immunodiffusion, protein electrophoresis, and immune fixation. Offered by Biology. Limited to three attempts.

Specialized Designation: Mason Impact.

Recommended Prerequisite: BIOL 452 (concurrent enrollment is also permitted).

Registration Restrictions:
Required Prerequisites: (BIOL 306\(^C\) or L306). 
\(^C\) Requires minimum grade of C.

Schedule Type: Laboratory

Grading:
This course is graded on the Undergraduate Regular scale.

BIOL 454: Marine Mammal Biology and Conservation. 3 credits.
Covers the evolution, biology, ecology, and behavior of marine mammals from polar bears and sea otters to whales and dolphins. Marine mammal conservation and policy is also a major component of the course; several, lecture sessions are devoted to the issue of whaling, threats to marine mammal populations, and recent conservation issues such as marine mammals and noise pollution. The course also includes a number of guest lectures from a variety of international marine mammal experts. Offered by Biology. Limited to three attempts. Equivalent to EVPP 419.

Recommended Prerequisite: BIOL 309 or BIOL 449 or equivalent; or permission of instructor.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale.

BIOL 455: Marine Mammal Biology and Conservation Field Course. 1 credit.
Provides laboratory, seminar sessions and field work to accompany BIOL 454-001 - marine mammal biology and conservation. Field work includes several day-long boat trips. May take place in the US or abroad. The two week residential field course takes place in Scotland at the University (of London) Marine Biological Station, which is equipped with boats and laboratories. Offered by Biology. Limited to three attempts. Equivalent to EVPP 420.

Recommended Corequisite: EVPP 419 or 454

Schedule Type: Seminar

Grading:
This course is graded on the Undergraduate Regular scale.

BIOL 457: Reproductive Strategies. 3 credits.
Introduction to the research and evolutionary theory of sex and reproduction. Covers topics from the evolution of sex and gender to the evolution of complex reproductive strategies involving behaviors such as mate recognition, courtship displays, territoriality, polygamy, and offspring care. Lectures focus primarily on multi-cellular animals but also include discussions of unicellular prokaryotes and eukaryotes as well as plants. Offered by Biology. Limited to three attempts.

Recommended Prerequisite: BIOL 307 or 308 and 60 hours.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale.

BIOL 459: Fungi and Ecosystems. 3 credits.
Considers impact of fungi on ecosystems in terms of biogeochemical cycling, primary and secondary production, and regulating community structure and populations of individual species through their activities as symbionts and parasites. Discusses role of fungi in ameliorating pollutants produced by anthropogenic activities. Offered by Biology. Limited to three attempts. Equivalent to BIOL 559, EVPP 551.

Recommended Prerequisite: BIOL 308 or BIOL 300 or permission of instructor.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale.

BIOL 460: Infectious Diseases Wildlife. 3 credits.
During this course, diseases of wildlife will be examined with emphasis on causes and mechanisms, pathobiology, ecology and epidemiology and population significance. We will explore methods of diagnosis, control, prevention and outbreak investigation as they apply to management and conservation of wildlife populations. Also, diseases crossing species barriers will be examined. Offered by Biology. Limited to three attempts. Equivalent to EVPP 460.

Recommended Prerequisite: 60 credits and BIOL 308 or EVPP 301 or permission of the instructor.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale.

BIOL 465: Histology. 4 credits.
Microscopic structure of animal tissues and organs, with emphasis on vertebrates. Offered by Biology. Limited to three attempts.

Recommended Prerequisite: BIOL 308 or 300.

Schedule Type: Laboratory, Lecture

Grading:
This course is graded on the Undergraduate Regular scale.

BIOL 468: Vertebrate Natural History. 4 credits.
Introduces vertebrates with emphasis on systematic, evolution, life history, behavior and ecology. Laboratory emphasis on identification, taxonomy, and natural history of local vertebrates. Offered by Biology. Limited to three attempts.

Recommended Prerequisite: BIOL 308 or permission of the instructor.

Schedule Type: Laboratory, Lecture

Grading:
This course is graded on the Undergraduate Regular scale.

BIOL 470: Dinosaur Biology. 3 credits.
Introduction to the evolution, diversity, and biology of the dinosaurs and their descendants. Emphasis on how current biological knowledge is used to estimate and inter the morphology, physiology and ecology of these extinct animals. Offered by Biology. Limited to three attempts.

Recommended Prerequisite: BIOL 308 or BIOL 300 or permission of instructor.

Schedule Type: Lecture, Recitation

Grading:
This course is graded on the Undergraduate Regular scale.
BIOL 471: Evolution. 3 credits.
Process of evolution emphasizing role of genetics, properties of populations, and population differentiations. Offered by Biology. Limited to three attempts.

Registration Restrictions:
Required Prerequisite: (BIOL 308 C).
C Requires minimum grade of C.

Schedule Type: Lecture
Grading:
This course is graded on the Undergraduate Regular scale.

BIOL 472: Introductory Animal Behavior. 3 credits.
Study of mechanisms, functions, and evolution of behavior. Offered by Biology. Limited to three attempts.

Recommended Prerequisite: BIOL 308 or BIOL 300 or permission of instructor.

Schedule Type: Lecture
Grading:
This course is graded on the Undergraduate Regular scale.

BIOL 473: Introductory Laboratory in Animal Behavior. 1 credit.
Field or laboratory study in animal behavior with emphasis on mechanisms, functions, and evolution of behavior. Stresses experimental design and analysis of data. Writing-intensive laboratory. Offered by Biology. Limited to three attempts.

Recommended Prerequisite: BIOL 472 (concurrent enrollment also permitted).

Schedule Type: Laboratory
Grading:
This course is graded on the Undergraduate Regular scale.

BIOL 474: General Biochemistry. 4 credits.

Registration Restrictions:
Required Prerequisites: (BIOL 213 C or U213 C) and (CHEM 313 C or L313 C).
C Requires minimum grade of C.

Schedule Type: Lecture
Grading:
This course is graded on the Undergraduate Regular scale.

BIOL 475: Cell Signaling and Disease. 3 credits.
Expands on the key concepts of eukaryotic cell biology including the cell cycle, the cytoskeleton, cellular transport, the membrane and protein trafficking and cellular signaling. Offered by Biology. Limited to three attempts.

Recommended Prerequisite: BIOL 483 or permission of instructor.

Registration Restrictions:
Required Prerequisite: BIOL 311 C.
C Requires minimum grade of C.

Schedule Type: Lecture
Grading:
This course is graded on the Undergraduate Regular scale.

BIOL 476: Molecular Biology and Biotechnology Laboratory. 2 credits.
Introduction to theory, techniques, and practices used in modern molecular biotechnology laboratories. Offered by Biology. Limited to three attempts. Equivalent to BIOL 585.

Recommended Corequisite: BIOL 484 or permission of instructor.

Schedule Type: Laboratory
Grading:
This course is graded on the Undergraduate Regular scale.

BIOL 477: The Diversity of Fishes. 3 credits.
This course delves into the biology and ecology of fishes. Subjects of this class include fish anatomy, taxonomy, evolution, habitat adaptations, community dynamics, and ecosystem interactions. The course will also touch on human impacts on fishes, and conservation. Offered by Biology. Limited to three attempts.

Recommended Prerequisite: BIOL 309, BIOL 300, and BIOL 350/ EVPP 350.

Schedule Type: Lecture
Grading:
This course is graded on the Undergraduate Regular scale.

BIOL 480: The Diversity of Fishes. 3 credits.
This course delves into the biology and ecology of fishes. Subjects of this class include fish anatomy, taxonomy, evolution, habitat adaptations, community dynamics, and ecosystem interactions. The course will also touch on human impacts on fishes, and conservation. Offered by Biology. Limited to three attempts.

Recommended Prerequisite: BIOL 213 or U213, BIOL 311 or L311 or permission of instructor.

Schedule Type: Lecture
Grading:
This course is graded on the Undergraduate Regular scale.

BIOL 482: Introduction to Molecular Genetics. 3 credits.
Basic concepts of structure and function of genetic material at molecular level. Offered by Biology. Limited to three attempts.

Recommended Prerequisite: BIOL 213 or U213, BIOL 311 or L311 or permission of instructor.

Schedule Type: Lecture
Grading:
This course is graded on the Undergraduate Regular scale.

BIOL 485: Teaching Practicum. 1-3 credits.
Student gains teaching experience in a lecture, laboratory or field environment under the supervision of a faculty member. Student responsibilities may include a lecturing component, but may also include lab preparation, design of course materials, tutoring and grading. Course may be repeated once. Offered by Biology. May be repeated within the degree for a maximum 3 credits.
Recommended Prerequisite: BIOL 213 or U213, 311 or L311, 60 credit hours and permission of instructor, course coordinator (where applicable) and Program Director.

Schedule Type: Internship

Grading: This course is graded on the Undergraduate Regular scale.

BIOL 491: Selected Topics in Biology Laboratory Techniques. 1-2 credits. Experimental studies using current methods in biology. Provides training for research in various aspects of biology. Topics will depend on the professor teaching the class. The course may be repeated only if the topic is different. Offered by Biology. May be repeated within the degree for a maximum 4 credits.

Specialized Designation: Topic Varies

Registration Restrictions:
Required Prerequisites: ((BIOL 213C or U213) and (BIOL 311C or L311) and (BIOL 305C, L305 or 246C) and (BIOL 306C or L306) and (CHEM 211C and 213C) and (CHEM 212C and 214C)). C Requires minimum grade of C.

Schedule Type: Laboratory

Grading: This course is graded on the Undergraduate Regular scale.

BIOL 492: Senior Seminar. 1 credit. Weekly seminar course dealing with recent advances in biology. Topics selected from recent publications in the field. May be repeated for credit. Offered by Biology. May be repeated within the degree for a maximum 2 credits.

Specialized Designation: Topic Varies

Recommended Prerequisite: BIOL 311 and 90 credit hours, or permission of instructor.

Registration Restrictions:
Enrollment is limited to students with a major in Biology.

Schedule Type: Seminar

Grading: This course is graded on the Undergraduate Regular scale.

BIOL 493: Honors Research in Biology. 1-2 credits. Laboratory of field investigation under guidance of faculty member. Notes: Total limit for BIOL 493, 495 and 497 is 6 credits toward the 44 credit hours required for the Biology BS degree and only 3 credits toward the 32 hours required for the BA degree. Combined 493, 495 and 497 may not exceed 4 credit hours in any one semester. Offered by Biology. May be repeated within the degree for a maximum 2 credits.

Recommended Prerequisite: Admission to the Biology Honors Program, permission of instructor and Biology Program Director.

Registration Restrictions:
Enrollment is limited to students with a major in Biology.

Enrollment limited to students in the College of Science college.

Schedule Type: Research

Grading: This course is graded on the Undergraduate Regular scale.

BIOL 494: Honors Seminar in Biology. 1 credit. Weekly seminar course dealing with recent advances in biology. Topics selected from recent publications in field. Offered by Biology. May be repeated within the degree for a maximum 6 credits.

Recommended Prerequisite: Acceptance into Biology honors program and permission of instructor.

Schedule Type: Seminar

Grading: This course is graded on the Undergraduate Regular scale.

BIOL 495: Directed Studies in Biology. 1-2 credits. Study of a topic not otherwise available to student. May involve reading assignments, tutorials, lectures, papers, presentations, or field study, determined in consultation with instructor. May be taken for 1 to 2 credits and repeated once for a total of 2 credits. Total limit for combination of 495 and 497 is 6 credits toward 44 credits for BS and 3 credits toward 32 credits for BA. This course does not satisfy requirements of the BA degree or BS degree. Offered by Biology. May be repeated within the degree for a maximum 2 credits.

Recommended Prerequisite: Permission of instructor and Biology Program Director.

Schedule Type: Independent Study

Grading: This course is graded on the Undergraduate Regular scale.

BIOL 497: Special Problems in Biology. 1-3 credits. Lab or field project leading to written report of research. Research and paper completed under instructor’s guidance. Notes: Total limit for 495 and 497 combined is 6 credits toward the 44 credits required for BS and 3 credits toward 32 credits for BA. Combined BIOL 493, 495, 497 may not exceed 4 credit hours in any one semester. This course does not satisfy requirements of the BA degree or BS degree, which state that students must complete at least one (BA degree) or two (BS degree) upper division courses that include a laboratory. Offered by Biology. May be repeated within the degree for a maximum 6 credits.

Recommended Prerequisite: 60 credits and permission of instructor and chair.

Schedule Type: Research

Grading: This course is graded on the Undergraduate Regular scale.

BIOL 498: Research Seminar. 2 credits. Seminar discussing current scientific literature and literature related to research project undertaken by student as part of the research semester. Note: Must be enrolled in Biology Research Semester. Registration must be approved by a faculty sponsor and by the Biology Program Director and is limited to students who are enrolled concurrently in BIOL 499. For students in the Biology Honors Program, this course may be used to substitute for one credit of BIOL 494: Honors Seminar in Biology. Offered by Biology. Limited to three attempts.

Specialized Designation: Mason Impact.
Recommended Prerequisite: BIOL 213 or U213, BIOL 214 or 312 or equivalent introductory statistics course, BIOL 311 or L311, CHEM 211/213-212/214; Completion of Biology core recommended.

Schedule Type: Seminar

Grading:
This course is graded on the Undergraduate Regular scale.

BIOL 499: RS: Research in Biology. 6-9 credits.
Laboratory or field investigation under faculty guidance. Students will earn 6-9 credits toward the BA or BS degrees in Biology. Note: Must be enrolled in Biology Research Semester. Registration requires successful application and approval by Biology Program and faculty sponsor. Student receiving 9 credits for 499 will not be allowed to use BIOL 440, BIOL 495 and/or 497 neither toward the 32 BIOL hours needed for the BA degree, nor toward the 44 BIOL hours needed for the BS degree. This course will satisfy one upper division laboratory requirement for both the BA and BS degrees in Biology. Offered by Biology. Limited to three attempts.

Specialized Designation: Research/Scholarship Intensive

Recommended Prerequisite: BIOL 213 or U213, BIOL 214 or 312 or equivalent introductory statistics course, BIOL 311 or L311, CHEM 211/213-212/214; Completion of Biology core recommended.

Schedule Type: Laboratory

Grading:
This course is graded on the Undergraduate Regular scale.

500 Level Courses

BIOL 501: Microbial Diversity: An Organismal Approach. 3 credits.
In-depth study of nonpathogenic microbial world, emphasizing detection, enumeration, and classification of microorganisms; their physiological and evolutionary relationships; and biotechnological applications. Offered by School of Systems Biology. May not be repeated for credit.

Recommended Prerequisite: An undergraduate course in microbiology or permission of instructor.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale.

BIOL 506: Selected Topics in Microbiology. 1-4 credits.
Topic depends on instructor’s specialty. Notes: May be repeated only with permission of department chair. Offered by School of Systems Biology. May be repeated within the degree for a maximum 8 credits.

Specialized Designation: Topic Varies

Recommended Prerequisite: BIOL 305 or L305 or permission of instructor.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale.

BIOL 507: Selected Topics in Ecology. 0-4 credits.
Topic depends on instructor’s specialty. Notes: May be repeated only with permission of department chair. Offered by School of Systems Biology. May be repeated within the degree for a maximum 8 credits.

Specialized Designation: Topic Varies

Recommended Prerequisite: Course in Ecology and permission of instructor.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale.

BIOL 508: Selected Topics in Animal Biology. 1-4 credits.
Topic depends on instructor’s specialty. Notes: May be repeated only with permission of department chair. Offered by School of Systems Biology. May be repeated within the degree for a maximum 8 credits.

Specialized Designation: Topic Varies

Recommended Prerequisite: BIOL 303 or permission of instructor.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale.

BIOL 509: DNA Analysis of Biological Evidence. 3 credits.
Historical development of DNA profiling methods, current DNA typing techniques and the ongoing development of new forensic DNA typing methods. Emphasis will be placed on various analytical techniques used in the analysis of forensic evidence. Offered by School of Systems Biology. May not be repeated for credit.
Recommended Prerequisite: BIOL 311 or permission of instructor

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale.

BIOL 510: Forensic DNA Analysis Laboratory. 1 credit.
Provides hands-on experience with the methodologies of forensic DNA analysis. Offered by School of Systems Biology. May not be repeated for credit.

Recommended Prerequisite: BIOL 311

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Laboratory

Grading:
This course is graded on the Graduate Regular scale.

BIOL 515: Developmental Neurobiology. 3 credits.
Introduction to developmental neurobiology with overview of embryological development of the nervous system. Topics include neural induction, patterning/cell fate specification, and neural circuit assembly together with modern molecular methods for exploring neural development. Offered by School of Systems Biology. May not be repeated for credit.

Recommended Prerequisite: Completion of 60 hours, including PSYC 372 or BIOL 213 or BIOL U213 and BIOL 310.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale.

BIOL 516: Mammalian Neurobiology. 3 credits.
Functional anatomy of mammal brains emphasizing regional and systems neuroanatomy of humans. Correlates with material from clinical neurology, where possible. Laboratory component includes brain dissections and clinical correlations. Offered by School of Systems Biology. May not be repeated for credit. Equivalent to PSYC 531.

Recommended Prerequisite: BIOL 515.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Laboratory, Lecture

Grading:
This course is graded on the Graduate Regular scale.

BIOL 518: Conservation Biology. 3 credits.
Introduction to science used to identify species in need of conservation and techniques to manage and protect organisms. Offered by School of Systems Biology. May not be repeated for credit.

Recommended Prerequisite: BIOL 307 and BIOL 311 or equivalent.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale.

BIOL 527: Disease Ecology and Conservation. 3 credits.
Presents the trans-disciplinary discipline of conservation medicine, the study of relationships between organism and ecosystem health and environmental conditions. Topics include infectious and noninfectious diseases, pathogens, processes, and impacts on human, biotic, and ecosystem health, and how to address the consequences of diseases to populations and ecological communities. Notes: This course will co-meet with undergraduate-level students. Undergraduate students in this course will have separate (shorter) reading and writing assignments and will be graded according to a different rubric than the graduate students. Offered by Biology. May not be repeated for credit. Equivalent to EVPP 527.

Recommended Prerequisite: Knowledge base covered in BIOL 213 or BIOL/EVPP 305/306 and BIOL 308 OR EVPP 301, or permission of instructor.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale.
BIOL 532: Animal Behavior. 3 credits.
Ecological aspects of animal behavior. Offered by School of Systems Biology. May not be repeated for credit.

**Recommended Prerequisite:** BIOL 324 or permission of instructor.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

BIOL 533: Selected Topics in Plant Biology. 1-4 credits.
Topic depends on instructor's specialty. Notes: May be repeated only with permission of department chair. Offered by School of Systems Biology. May be repeated within the degree for a maximum 8 credits.

**Specialized Designation:** Topic Varies

**Recommended Prerequisite:** Course in plant biology or permission of instructor.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Special scale.

BIOL 537: Ornithology. 4 credits.
Study of evolution, systematics, physiology, ecology, and behavior of birds, emphasizing field work. Offered by School of Systems Biology. May not be repeated for credit.

**Recommended Prerequisite:** Course in Ecology, or permission of instructor.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Laboratory, Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

BIOL 538: Mammalogy. 4 credits.
Study of evolution, systematics, physiology, ecology, and behavior of mammals, emphasizing field work. Offered by School of Systems Biology. May not be repeated for credit. Equivalent to EVPP 538.

**Recommended Prerequisite:** Course in ecology or permission of instructor.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Laboratory, Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

BIOL 539: Herpetology. 4 credits.
Study of evolution, systematics, physiology, ecology, and behavior of amphibians and reptiles, emphasizing field work. Offered by School of Systems Biology. May not be repeated for credit.

**Recommended Prerequisite:** Course in ecology or permission of instructor.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Laboratory, Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

BIOL 543: Tropical Ecosystems. 4 credits.
Terrestrial, aquatic, and marine ecosystems in tropics, emphasizing plant communities, plant-animal interactions, and role of humans in the tropics. Notes: Field trip to tropics required as part of laboratory. Offered by School of Systems Biology. May not be repeated for credit. Equivalent to EVPP 543.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Laboratory, Lecture

**Grading:**
This course is graded on the Graduate Regular scale.
BIOL 550: Waterscape Ecology and Management. 3 credits.
Field and laboratory approaches to freshwater ecology with emphasis on study design, sampling methods, laboratory and data analysis, and report writing. Offered by School of Systems Biology. May not be repeated for credit. Equivalent to EVPP 550.

Recommended Prerequisite: General Chemistry and a course in ecology.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale.

BIOL 553: Advanced Topics in Immunology. 3 credits.
Comprehensive study of immunologic mechanisms as they pertain to immunologic diseases and transplantation. Offered by School of Systems Biology. May be repeated within the degree for a maximum 6 credits.

Specialized Designation: Topic Varies

Recommended Prerequisite: BIOL 452 or permission of instructor.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale.

BIOL 555: Lab in Waterscape Ecology. 1 credit.
Offered by School of Systems Biology. May not be repeated for credit. Equivalent to EVPP 555.

Recommended Prerequisite: BIOL 550 or permission of instructor.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Laboratory

Grading:
This course is graded on the Graduate Regular scale.

BIOL 556: Advanced Topics in Microbial Physiology and Metabolism. 3 credits.
Comprehensive study of microorganisms including growth, nutrition, transport, autotrophic and heterotrophic metabolism, regulation, and differentiation. Offered by School of Systems Biology. May not be repeated for credit.

Specialized Designation: Topic Varies

Recommended Prerequisite: BIOL 305 or L305 and 306 or L306 or permission of instructor.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale.

BIOL 559: Fungi and Ecosystems. 3 credits.
Considers impact of fungi on ecosystems in terms of their effects on biogeochemical cycling, primary and secondary production, and regulating community structure and populations of individual species through their activities as symbionts and parasites. Discusses role of fungi in ameliorating pollutants produced by anthropogenic activities. Offered by School of Systems Biology. May not be repeated for credit. Equivalent to BIOL 459.

Recommended Prerequisite: BIOL 304 and/or a course in microbiology or permission of instructor.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale.

BIOL 560: Infectious Diseases of Wildlife. 3 credits.
During this course, diseases of wildlife will be examined with emphasis on causes and mechanisms, pathobiology, ecology and epidemiology and population significance. We will explore methods of diagnosis, control, prevention and outbreak investigation as they apply to management and conservation of wildlife populations. Also, diseases crossing species barriers will be examined. Offered by School of Systems Biology. May not be repeated for credit. Equivalent to EVPP 560.

Recommended Prerequisite: Courses on evolution, ecology, zoology and conservation biology or permission of instructor.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

**BIOL 561: Comparative Animal Physiology.** 3 credits.
Detailed study of selected physiological systems of invertebrates and vertebrates, emphasizing current research. Offered by School of Systems Biology. May not be repeated for credit.

**Recommended Prerequisite:** BIOL 326 or permission of instructor.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

**BIOL 562: Personalized Medicine.** 3 credits.
Covers basic principles of molecular medicine, including the definition and the need for individualized diagnostics and therapeutics. Students will study the application of proteomics, genomics and bioinformatics as they relate to individualized therapy, and review the major advances in these fields which have relevance to molecular medicine of the future. Offered by School of Systems Biology. May not be repeated for credit.

**Recommended Prerequisite:** Advanced undergraduate coursework in Genetics and Molecular Cell Biology.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

**BIOL 563: Virology.** 3 credits.
Fundamental concepts of nature of viruses, virus classification, cultivation, and biochemistry. Emphasizes bacteriophage and animal viruses. Offered by School of Systems Biology. May not be repeated for credit.

**Recommended Prerequisite:** BIOL 482 or permission of instructor.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

**BIOL 564: Techniques in Virology.** 2 credits.
Basic techniques of animal virus propagation, isolation, and quantitation. Offered by School of Systems Biology. May not be repeated for credit.

**Recommended Prerequisite:** BIOL 563 (concurrent enrollment is also permitted) or permission of instructor.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Laboratory, Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

**BIOL 566: Cancer Genomics.** 3 credits.
Review of modern concepts in cancer biology including taxonomy of human tumors, common cancer syndromes, and genome instability. Genetic and molecular studies of tumor cell proliferation, migration, invasion, and death. Offered by School of Systems Biology. May not be repeated for credit.

**Recommended Prerequisite:** A course in genetics or biochemistry.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

**BIOL 568: Advanced Topics in Molecular Genetics.** 3 credits.
Comprehensive study of regulatory mechanisms controlling gene expression in viruses, prokaryotes, and eukaryotes, emphasizing current research. Offered by School of Systems Biology. May be repeated within the degree for a maximum 6 credits. Equivalent to BIOL 668.

**Specialized Designation:** Topic Varies

**Recommended Prerequisite:** BIOL 482 or permission of instructor.
**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

**BIOL 572: Human Genetics.** 3 credits.
Inheritance of humans emphasizing current problems, including genetic control of metabolic diseases, effects of radiation and chemical agents in environment, and directed genetic change. Offered by School of Systems Biology. May not be repeated for credit.

**Recommended Prerequisite:** BIOL 311 or permission of instructor.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

**BIOL 573: Developmental Genetics.** 3 credits.
Genetic approaches to problem of eukaryotic development, emphasizing current research on regulation of gene enzyme systems. Offered by School of Systems Biology. May not be repeated for credit.

**Recommended Prerequisite:** BIOL 311 or permission of instructor.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

**BIOL 574: Population Genetics.** 3 credits.
Genetic structure and dynamics of populations, both real and ideal. Offered by School of Systems Biology. May not be repeated for credit.

**Recommended Prerequisite:** BIOL 308 and 311, or permission of instructor.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

**BIOL 575: Selected Topics in Genetics.** 1-4 credits.
Different topics in different years, including molecular, developmental, physiological, and classical genetics, emphasizing current problems and research. Notes: May be repeated once with permission of department chair. Offered by School of Systems Biology. May be repeated within the term for a maximum 8 credits.

**Specialized Designation:** Topic Varies

**Recommended Prerequisite:** BIOL 311, or permission of instructor.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

**BIOL 577: Biogeochemistry: A Global Perspective.** 3 credits.
Structure and function of ecosystems, their interactions as components of landscapes, and contributions to global environment. Emphasizes biogeochemical cycles of natural, disturbed, and managed ecosystems, and their integration at landscape and global level as related to current ecological problems such as transfer of nonpoint source pollutants, atmospheric deposition, stratospheric ozone depletion, and global change. Offered by School of Systems Biology. May not be repeated for credit.

**Recommended Prerequisite:** BIOL 307, CHEM 211, 212 or permission of instructor.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

**BIOL 578: Mutation, DNA Repair, and Environmental Contamination.** 3 credits.
Overview of relationship between environmental contamination and genetic damage. Covers types of contamination that result in mutations,
and molecular mechanisms of DNA damage and repair. Offered by School of Systems Biology. May not be repeated for credit.

**Recommended Prerequisite:** BIOL 307 and 311.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus. Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

**BIOL 579: Molecular Evolution and Conservation Genetics.** 3 credits.
Evolution of genes and gene families at molecular level, including gene duplication and divergence, positive and negative selection, genetic drift, and molecular clocks. Also includes selected applications in conservation genetics, such as molecular phylogenetics and estimates of population size. Offered by School of Systems Biology. May not be repeated for credit.

**Recommended Prerequisite:** BIOL 311.

**Recommended Corequisite:** BIOL 471, or permission of instructor.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

**BIOL 580: Computer Applications for the Life Sciences.** 3 credits.
Studies computer use in biological sciences. Combines lectures, supervised exercises on mainframe and microcomputers. Students present seminars on advanced application and complete project using computers to fulfill a major assignment associated with another course or employment. Offered by School of Systems Biology. May not be repeated for credit.

**Recommended Prerequisite:** 12 hours of biology and one year of college mathematics, or permission of instructor.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

**BIOL 581: Estuarine and Coastal Ecology.** 3 credits.
Emphasizes marine biology of estuarine and coastal habitats of Chesapeake Bay region, and factors affecting distribution and abundance of organisms. Offered by School of Systems Biology. May not be repeated for credit. Equivalent to EVPP 581.

**Recommended Prerequisite:** Course in ecology and permission of instructor.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

**BIOL 582: Estuarine and Coastal Ecology Laboratory.** 1 credit.
Continues EVPP 546/BIOL 546 as the laboratory section focusing on the approach and methods of estuarine research, including analysis and communication of results. Offered by School of Systems Biology. May not be repeated for credit. Equivalent to EVPP 582.

**Recommended Corequisite:** BIOL 581 or EVPP 581.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Laboratory

**Grading:**
This course is graded on the Graduate Regular scale.

**BIOL 583: General Biochemistry.** 4 credits.
Structure and function of proteins, carbohydrates and lipids, enzymology, and metabolism and its controls. Emphasizes chemistry of nitrogen compounds. Offered by School of Systems Biology. May not be repeated for credit. Equivalent to BIOL 483.

**Recommended Prerequisite:** BIOL 213 or BIOL U213, CHEM 313 or CHEM L313, or permission of instructor.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.
Biology (BIOL)

Schedule Type: Lecture
Grading:
This course is graded on the Graduate Regular scale.

BIOL 585: Eukaryotic Cell Biology Laboratory. 1-2 credits.
Selected topics of laboratory procedures used in the study of eukaryotic cells. Notes: May be repeated one time with permission of program director. Offered by School of Systems Biology. May not be repeated for credit. Equivalent to BIOL 485.

Recommended Prerequisite: BIOL 484 or BIOL 682 or permission of instructor.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Laboratory
Grading:
This course is graded on the Graduate Regular scale.

BIOL 589: Teaching Practicum. 1 credit.
Experience teaching biology in laboratory or in field under supervision of faculty member. Notes: Undergraduate assists instructor. Offered by School of Systems Biology. May not be repeated for credit.

Recommended Prerequisite: Permission of instructor, chair, and course coordinator.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Independent Study
Grading:
This course is graded on the Graduate Regular scale.

BIOL 591: Special Topics. 1-6 credits.
Offered by School of Systems Biology. May be repeated within the degree.

Specialized Designation: Topic Varies

Recommended Prerequisite: Permission of instructor.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture
Grading:
This course is graded on the Graduate Regular scale.

600 Level Courses

BIOL 607: Fundamentals of Ecology. 3 credits.
Overview of concepts in physiological, population, community, and ecosystem ecology. Restricted to graduate students with little or no background in ecology. Offered by School of Systems Biology. May not be repeated for credit. Equivalent to EVPP 607.

Recommended Prerequisite: Permission of department.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

BIOL 608: Topics in Biology. 1-4 credits.
In-service course to strengthen and update teacher's knowledge of biology. Topics include organismal biology, cell biology, ecology, microbiology, or genetics. Notes: Not available for credit toward MS in biology, or PhD in environmental science and public policy. May be repeated for credit with permission of department chair. Offered by School of Systems Biology. May be repeated within the degree for a maximum 12 credits.

Specialized Designation: Topic Varies

Recommended Prerequisite: Employment or anticipated employment as a science teacher.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture
Grading:
This course is graded on the Graduate Regular scale.

BIOL 610: Bioremediation: Theory and Applications. 3 credits.
Provides basis for understanding proper application of bioremediation technologies to treatment for hazardous wastes. Includes evaluation of data to determine successful treatment. Offered by School of Systems Biology. May not be repeated for credit. Equivalent to EVPP 610.

Recommended Prerequisite: Course in microbiology and either organic chemistry or microbial physiology or equivalent or permission of instructor.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

**BIOL 611:** *Techniques in Environmental Microbiology.* 2 credits. Laboratory exercises illustrate techniques to demonstrate microbial degradation, detection of microbes, isolation, and evaluation of physiological and genetic characteristics. Notes: Open first to those enrolled in BIOL 610. Offered by School of Systems Biology. May not be repeated for credit.

**Recommended Prerequisite:** A laboratory course in microbiology or permission of instructor.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Laboratory

**Grading:**
This course is graded on the Graduate Regular scale.

**BIOL 643:** *Microbial Ecology.* 4 credits. Study of relationships between microorganisms and their natural environment, and methodology for observing their natural environment and biochemical activities in that environment. Offered by School of Systems Biology. May not be repeated for credit. Equivalent to EVPP 643.

**Recommended Prerequisite:** Course in microbiology or permission of instructor.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

**BIOL 644:** *Wetland Ecology and Management.* 4 credits. Applies modern ecological theories and methods to biological resource management in developing and developed countries. Explores problems in achieving optimum productivity of specific resources and application of systems analysis. Offered by School of Systems Biology. May not be repeated for credit.

**Recommended Prerequisite:** Course in ecology or permission of instructor.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

**BIOL 645:** *Freshwater Ecology.* 3 credits.

**BIOL 648:** * Population Ecology.* 3 credits.

**Recommended Prerequisite:** Course in ecology or permission of instructor.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

**BIOL 649:** *Biological Resource Management.* 3 credits.
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture
Grading:
This course is graded on the Graduate Regular scale.

**BIOL 650: Environment Analysis and Modeling.** 4 credits.
Offered by School of Systems Biology. May not be repeated for credit. Equivalent to EVPP 650.

**Recommended Prerequisite:** 8 hours of ecology or permission of instructor.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Laboratory, Lecture
Grading:
This course is graded on the Graduate Regular scale.

**BIOL 665: Environmental Hazards to Human Health.** 3 credits.
Health effects of chemical contaminants of air, water, and food resulting from industrialized society. Includes identifying, evaluating, and controlling hazards. Offered by School of Systems Biology. May not be repeated for credit.

**Recommended Prerequisite:** Courses in animal physiology and organic chemistry, or permission of instructor.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture
Grading:
This course is graded on the Graduate Regular scale.

**BIOL 666: Human Genetics Concepts for Health Care.** 3 credits.
Principles of genetically determined diseases with emphasis on clinical aspects of these diseases, genetic counseling, and laboratory methods used in human genetics. Extended studies students preparing to enter medical or dental school are welcome. Notes: Course in cell or molecular biology. Not available to students who have taken BIOL 572. Offered by School of Systems Biology. May not be repeated for credit.

**Recommended Prerequisite:** BS degree or enrollment in accelerated MS program. Course in cell or molecular biology.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Laboratory, Lecture
Grading:
This course is graded on the Graduate Regular scale.

**BIOL 668: Advanced Techniques in Molecular Biology.** 4 credits.
Experimental studies using current methods for purification and characterization of biologically important compounds. Provides training for research in molecular biology. Offered by School of Systems Biology. May not be repeated for credit.

**Recommended Prerequisite:** BIOL 568 or permission of instructor.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture
Grading:
This course is graded on the Graduate Regular scale.

**BIOL 669: Pathogenic Microbiology.** 3 credits.
Molecular mechanisms of bacterial pathogenicity and immune response in infectious diseases. Offered by School of Systems Biology. May not be repeated for credit.

**Recommended Prerequisite:** Courses in microbiology and biochemistry.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture
Grading:
This course is graded on the Graduate Regular scale.

**BIOL 675: Aerosol Biology.** 4 credits.
Provides students with familiarity with the state of the art aerosol equipment and techniques used in laboratory-based research pertaining to biological warfare or terrorism threats. Emphasis will be placed on biosafety procedures, techniques, and equipment used in conducting
experiments with infectious organisms in a contained environment. Offered by School of Systems Biology. May not be repeated for credit.

**Recommended Prerequisite:** Undergraduate courses in physics, math, and microbiology, and permission of the Director of the Center for Biodefense.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Laboratory, Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

**BIOL 678:** Cell-Based Assays. 2 credits.
Focus on 1) basics of eukaryotic cell culture; 2) various cell based assay techniques; 3) Real-Time PCR based functional analysis of the signaling pathways. Students will maintain their cell cultures for the duration of the experiments, perform at least one functional assay and analyze the resultant data. Students are expected to learn the properties and limitations of each cell based assay and should be able to explain their results regardless of the outcome. Each student will be responsible for submitting a written report summarizing the design of their experiments and its results. Each report will include the following sections: Introduction, Methods, Results and Discussion, and a special Troubleshooting section. Notes: A lab fee of $300 will be charged per student for lab supplies. Offered by School of Systems Biology. May not be repeated for credit.

**Recommended Prerequisite:** Permission of Instructor. 400-level coursework in cell or molecular biology.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment limited to students in the SC-MS-BCB, SC-MS-BIOL or SC-NDG-UNDE programs.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Laboratory

**Grading:**
This course is graded on the Graduate Regular scale.

**BIOL 680:** Advanced Eukaryotic Cell Biology. 3 credits.
Structure and function of biomembranes, cytoskeleton, and transport systems. Also discusses protein trafficking, cell cycle, and cell adhesion molecules. Offered by School of Systems Biology. May not be repeated for credit.

**Recommended Prerequisite:** BIOL 483, CHEM 313, CHEM 314, or permission of instructor.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to students with a major in Bioinformatics Comp Biology, Biology, Biosciences or Personalized Medicine.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

**BIOL 685:** Emerging Infectious Diseases. 3 credits.
Students will gain an understanding of the pathogenesis of emerging and/or re-emerging infectious diseases in terms of immune response and systemic alterations. Factors contributing to emergence and virulence for each pathogen will be emphasized. Epidemiology, disease progression, treatment strategies and/or control measures of identified emerging infectious diseases will be discussed. Offered by School of Systems Biology. May not be repeated for credit.

**Recommended Prerequisite:** BIOL 213 or U213 and 311 or L311, 482 or equivalent; or permission of instructor.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.
BIOL 690: *Introduction to Graduate Studies in Biology.* 1-2 credits. Required of all new MS students in biology. Offered by School of Systems Biology. May not be repeated for credit.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

BIOL 691: *Current Topics in Biology.* 1-4 credits. Study of current topics in biology as determined by instructor. Topics vary and center on emerging areas of investigation in the biological sciences. Offered by School of Systems Biology. May be repeated within the term for a maximum 8 credits.

**Specialized Designation:** Topic Varies

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

BIOL 692: *Seminar in Biology.* 1 credit. Topics vary. Offered by School of Systems Biology. May be repeated within the degree for a maximum 2 credits.

**Specialized Designation:** Topic Varies

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Seminar

**Grading:**
This course is graded on the Graduate Regular scale.

BIOL 693: *Directed Studies in Biology.* 1-8 credits. Study of topic not otherwise available in graduate program. May involve any combination of reading assignments, tutorials, lectures, papers, presentations, or laboratory or field study, determined in consultation with instructor. Notes: May not be used to fulfill explicit undergraduate prerequisites for graduate work. Offered by School of Systems Biology. May be repeated within the degree for a maximum 8 credits.

**Recommended Prerequisite:** Permission of instructor and graduate committee.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Research

**Grading:**
This course is graded on the Graduate Special scale.

BIOL 695: *Seminar in Molecular, Microbial, and Cellular Biology.* 1 credit. Review and discussion of recent literature in specialized area. Includes student presentations. Offered by School of Systems Biology. May be repeated within the degree for a maximum 6 credits.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Seminar

**Grading:**
This course is graded on the Graduate Regular scale.

**700 Level Courses**

BIOL 715: *Microbial Physiology.* 3 credits. Comprehensive study of functioning of microbial cells, with emphasis on pathogens. Stresses growth, transport, cell-to-cell signaling, biofilm formation, antibiotic resistance, and secondary metabolites. Offered by School of Systems Biology. May not be repeated for credit.

**Recommended Prerequisite:** An undergraduate lecture/lab course in microbiology, and a course in biochemistry.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

BIOL 718: *Techniques in Microbial Pathogenesis.* 3 credits. Laboratory-based class in which students perform current techniques in microbial pathogenesis. Offered by School of Systems Biology. May not be repeated for credit.

**Recommended Prerequisite:** Admission to the PhD biosciences program, the MS biology program, or permission of instructor.
Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Laboratory

Grading:
This course is graded on the Graduate Regular scale.

BIOL 720: Microbial Metabolism. 3 credits.
Discussions of catabolic and anabolic pathways of bacterial pathogens and regulation and integration of these pathways. Offered by School of Systems Biology. May not be repeated for credit.

Recommended Prerequisite: An undergraduate lecture/lab course in microbiology and a course in biochemistry.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale.

BIOL 745: Environmental Toxicology. 3 credits.
Study of nature, distribution, and interaction of toxic chemicals released into the environment. Emphasizes effects on nonhuman biota, detection and fate of chemicals, and implications for government regulation. Offered by School of Systems Biology. May not be repeated for credit. Equivalent to EVPP 745.

Recommended Prerequisite: Courses in ecology and physiology, or permission of instructor.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale.

BIOL 793: Research in Biology. 1-3 credits.
Library, laboratory, or field investigation under supervisor's guidance. Offered by School of Systems Biology. May be repeated within the degree for a maximum 3 credits.

Recommended Prerequisite: 8 hours of graduate hours in BIOL and permission of instructor and chair.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Research

Grading:
This course is graded on the Graduate Special scale.

BIOL 798: Master's Research Project. 1-3 credits.
Experimental or theoretical research project chosen and completed under guidance of graduate faculty member. Comprehensive report acceptable to student's advisory committee is required. Notes: Students who take BIOL 793 may not receive more than 6 credits total for both BIOL 793 and 798. Offered by School of Systems Biology. May be repeated within the degree for a maximum of 6 credits.

Recommended Prerequisite: Permission of instructor and chair.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Thesis

Grading:
This course is graded on the Satisfactory/No Credit scale.

BIOL 799: Thesis. 1-6 credits.
Thesis research under direction of supervisor. Notes: Students who take BIOL 793 may not receive more than 6 credits total for both BIOL 793 and 799. Offered by School of Systems Biology. May be repeated within the degree.

Recommended Prerequisite: 8 graduate hours in BIOL and permission of instructor.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Thesis

Grading:
This course is graded on the Satisfactory/No Credit scale.

Biomedical Sciences (BMED)

500 Level Courses

BMED 550: Special Topics in Biomedicine. 2 credits.
This course presents various topics in biomedicine in a lecture/seminar format. Students build on the ABS Certificate curriculum to enhance their understanding of biomedical issues and better prepare for careers in the health professions. Offered by College of Science. May not be repeated for credit.

Specialized Designation: Topic Varies

Recommended Prerequisite: Successful completion of first semester of the ABS Certificate curriculum (Biochemistry, Biostatistics, Histology).

Recommended Corequisite: Spring ABS Certificate courses (Human Anatomy, Human Physiology).

Registration Restrictions:
Enrollment limited to students in the SC-CERG-ABS program.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale.
600 Level Courses

**BMED 601: Biochemistry and Molecular Biology. 4 credits.**
Principles of biochemistry and cell signaling and current concepts regarding physiological processes at the cellular and molecular levels. Offered by College of Science. May not be repeated for credit.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to students with a major in Advanced Biomedical Sciences.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

**BMED 602: Biomedical Statistics. 3 credits.**
Basic principles of biostatistics and epidemiology in theoretical and practical context including: exploring and displaying data appropriately, exploring relationships between two variables, issues of gathering sample data, and understanding randomness and probability. Offered by College of Science. May not be repeated for credit.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to students with a major in Advanced Biomedical Sciences.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

**BMED 603: Cell Biology and Microscopic Anatomy. 3 credits.**
Examines basic histological techniques, ultrastructure of the cell, basic tissue types and histology of specific organ systems. Structure-functional and clinical correlations are described. Offered by College of Science. May not be repeated for credit.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to students with a major in Advanced Biomedical Sciences.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

**BMED 604: Fundamentals of Human Physiology. 5 credits.**
Essential concepts of physiology and mechanisms of body function are presented at various levels of organization, ranging from cellular and molecular to tissue and organ system levels. Emphasis is placed on understanding the integrated regulation of various body processes among the major systems. Offered by College of Science. May not be repeated for credit.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to students with a major in Advanced Biomedical Sciences.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

**BMED 605: Introduction to Human Anatomy. 3 credits.**
Principles of anatomy as well as the pertinent anatomy associated with the thorax, abdomen, and pelvic cavities. Offered by College of Science. May not be repeated for credit.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to students with a major in Advanced Biomedical Sciences.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

**BMED 610: Principles of Systems Biology. 2 credits.**
Students will build on their knowledge of cellular and molecular biology, genetics, and physiology to understand how these components combine to give rise to complex systems function found in biology. Offered by College of Science. May not be repeated for credit.

**Recommended Prerequisite:** Admission to Biomedical Sciences master's degree.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

**Schedule Type:** Lecture
Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type**: Lecture

**Grading**: This course is graded on the Graduate Regular scale.

**BMED 611**: Molecular Genetics. 2 credits.
Students will build on their knowledge of molecular biology and genetics to understand how these components’ functions are altered during the inception and course of human disease. Offered by College of Science. May not be repeated for credit.

**Recommended Prerequisite**: Admission to Biomedical Sciences master’s degree.

**Registration Restrictions**: Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type**: Lecture

**Grading**: This course is graded on the Graduate Regular scale.

**BMED 612**: Principles of Gross Anatomy. 1 credit.
Principles of anatomy as well as the pertinent anatomy associated with the thorax, abdomen, and pelvic cavities. Offered by College of Science. May not be repeated for credit.

**Recommended Prerequisite**: Admission to Biomedical Science’s master’s program

**Registration Restrictions**: Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type**: Lecture

**Grading**: This course is graded on the Graduate Regular scale.

**BMED 613**: Pathophysiology. 3 credits.
Students build on knowledge of physiologic principles and apply the information to pathologic conditions. A higher understanding of the molecular and genetic basis of pathology will be developed as the mechanisms of disease are studied. Offered by College of Science. May not be repeated for credit.

**Recommended Prerequisite**: Admission to Biomedical Sciences master’s program

**Registration Restrictions**: Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

**Schedule Type**: Lecture

**Grading**: This course is graded on the Graduate Regular scale.

**BMED 614**: Introduction to Neuroscience. 3 credits.
Achieve specific knowledge of the developmental and evolutionary aspects of the nervous system, to introduce systems neurobiology through study of the visual system and motor system pathways. Offered by College of Science. May not be repeated for credit.

**Recommended Prerequisite**: Admission to Biomedical Science’s master’s program

**Registration Restrictions**: Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type**: Lecture

**Grading**: This course is graded on the Graduate Regular scale.

**BMED 651**: Physician and Society. 1 credit.
Seminar series explores the cultural, social, economic and ethical factors that affect the practice of medicine in the 21st century. Offered by College of Science. May be repeated within the degree for a maximum 2 credits.

**Recommended Prerequisite**: Admission to Biomedical Science’s master’s program

**Registration Restrictions**: Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to students with a major in Advanced Biomedical Sciences.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type**: Seminar

**Grading**: This course is graded on the Satisfactory/No Credit scale.

**BMED 652**: Biomedical Career Pathways. 1 credit.
Series of workshops, presentations and field trips. Students will learn study and interview skills to become better prepared to complete AMCAS and secondary applications to medical schools. Offered by College of Science. May not be repeated for credit.

**Recommended Prerequisite**: Admission to Biomedical Science’s master’s program

**Registration Restrictions**: Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.
Enrollment is limited to students with a major in Advanced Biomedical Sciences or Biomedical Sciences.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Seminar

**Grading:**
This course is graded on the Graduate Regular scale.

**BMED 653: Forum and Research. 3 credits.**
Bi-weekly seminar-style presentations and reading assignments, followed by short student reports, followed by a small group discussions on topics of current interest. Students will prepare a detailed research paper on a topic related to one of the forum topics. Offered by College of Science. May not be repeated for credit.

**Recommended Prerequisite:** Admission to Biomedical Sciences master's degree.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

**Biosciences (BIOS)**

**700 Level Courses**

**BIOS 701: Systems Biology. 3 credits.**
Introduces biochemical systems to investigate complex, multicomponent, dynamic functions of cellular systems. Readings include articles from current literature in molecular biosciences. Application of molecular techniques within biosciences is now universal, and the underlying question remains "What is the structure of a cell, and how does it function?" Offered by School of Systems Biology. May not be repeated for credit. Equivalent to BINF 701.

**Recommended Prerequisite:** General Biochemistry.

**Registration Restrictions:**
Enrollment limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

**BIOS 702: Research Methods. 3 credits.**
Trains students in research methodologies, techniques, and data analysis in life sciences. Divided into three modules that introduce separate but equally significant components of any research project: parameters required to outline and synthesize a problem, techniques of measurement and analysis used by life scientists, and approaches for data analysis and interpretations. Offered by School of Systems Biology. May not be repeated for credit.

**Recommended Prerequisite:** Admission to the PhD program in Biosciences

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Laboratory

**Grading:**
This course is graded on the Graduate Special scale.

**BIOS 704: Topics in Biosciences. 1 credit.**
Combines invited seminars from internal and external faculty with graduate student seminars. Seminar presentation required for advancement to candidacy, generally given in last semester before candidacy. Includes discussion section led by course coordinator. Notes: Required of all students during each semester prior to advancement to candidacy. Should be repeated three times (except by permission of concentration director). Offered by School of Systems Biology. May be repeated within the term for a maximum 3 credits.

**Specialized Designation:** Topic Varies

**Recommended Prerequisite:** Admission to the PhD program in Biosciences.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Seminar

**Grading:**
This course is graded on the Graduate Regular scale.
BIOS 710: Current Topics in Bioscience. 1-3 credits.
Studies current topic in biosciences. Notes: Topics vary. May be repeated for credit with permission of concentration director. Offered by School of Systems Biology. May be repeated within the term for a maximum of 6 credits.

Specialized Designation: Topic Varies

Recommended Prerequisite: Admission to the PhD program in biosciences or to the MS program in biology.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale.

BIOS 715: Molecular Ecology. 3 credits.
Introduces students to basic concepts of molecular biology, genetics, molecular evolution, bioinformatics, NextGen Sequencing and Technology. Students should have prior background in genetics and evolution. Offered by School of Systems Biology. May not be repeated for credit. Equivalent to EVPP 515.

Recommended Prerequisite: Undergraduate course in Genetics and Chemistry or permission of instructor.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale.

BIOS 716: Methods in Evolutionary Biology. 4 credits.
Intended for students who plan to do research in Molecular Ecology, Molecular Evolution, Conservation Genetics, Genomics or Biocomplexity. The lecture reviews basic concepts while the lab provides students the opportunity to experience the detailed protocols necessary for research in molecular biology. The course integrates theory, protocols, analysis and bioinformatics. Offered by School of Systems Biology. May not be repeated for credit.

Recommended Prerequisite: BIOS 715 or permission of instructor.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale.

BIOS 717: Methods in Functional Genomics and Biotechnology. 3 credits.
Current laboratory techniques in molecular biology and genomics, including nucleic acid isolation, gene cloning and sequencing, gel blot analysis, PCR, in vitro mutagenesis, and theory and practice of DNA microarray analysis of gene expression. Topics may vary from year to year depending on advances in field. Offered by School of Systems Biology. May not be repeated for credit.

Recommended Prerequisite: Undergraduate coursework in genetics and molecular biology.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale.

BIOS 740: Laboratory Methods in Functional Genomics and Biotechnology. 3 credits.
Genetic structure and function at whole genome level. Includes some sequence analysis, comparative genomics, classical genetics, and developmental genetics, as well as analysis of synteny groups, isochores, gene families, genetic complexity, C value paradox, directed discovery of gene functions, and animal models of human disease. Readings from recent texts and primary research literature. Students expected to give one or two oral presentations of primary research papers, as well as complete midterm and final exams. Offered by School of Systems Biology. May not be repeated for credit.

Recommended Prerequisite: At least one undergraduate course in genetics and molecular biology, or permission of instructor.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale.

BIOS 741: Genomics. 3 credits.
Theory and applications of biotechnology. Includes promoter design, gene fusions, protein targeting, techniques of protein purification, construction of transgenic organisms, cloning of animals and plants, ethical and legal issues. This is a relatively new area of study that is rapidly changing; course strives to keep students abreast of current literature. Offered by School of Systems Biology. May not be repeated for credit.

Recommended Prerequisite: Undergraduate coursework in genetics and molecular biology.
Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale.

BIOS 743: Genomics, Proteomics, and Bioinformatics. 3 credits.
Fundamental methods for analyzing genomic and proteomic data, including nucleic acid and protein sequences, pair-wise and multiple alignment, database search methods, clustering and presentation of data, prediction modeling, and survey of available software and freeware tools. Offered by School of Systems Biology. May not be repeated for credit.

Recommended Prerequisite: Admission to PhD program in biosciences or to MS program in biology.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale.

BIOS 744: Molecular Genetics. 3 credits.
Develops understanding of principles of modern molecular genetics and methods of investigation of genomes of pro- and eukaryotes, including types of genetic manipulations conducted in research laboratories today. Offered by School of Systems Biology. May not be repeated for credit.

Recommended Prerequisite: Undergraduate coursework including BIOL 311; CHEM 313, 314, 315, and 318; equivalents; or permission of instructor.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale.

BIOS 760: Seminar in Molecular Systematics. 1-3 credits.
Presentations and discussion by students and faculty of research papers and projects. Offered by School of Systems Biology. May be repeated within the degree for a maximum 6 credits.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Laboratory, Lecture

Grading:
This course is graded on the Graduate Regular scale.

BIOS 765: Molecular Systematics. 4 credits.
Comparative evolutionary techniques applied to molecular data. Use of molecular techniques, molecular databases, and analytical techniques will be covered. Offered by School of Systems Biology. May not be repeated for credit.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Laboratory, Lecture

Grading:
This course is graded on the Graduate Regular scale.

BIOS 767: Molecular Evolution. 3 credits.
A review of the diversity and organization of genomes and evolutionary processes that operate at the molecular level. Emphasis will be placed on processes of molecular evolution and techniques used to analyze these processes. Offered by School of Systems Biology. May not be repeated for credit.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.
BIOS 782: Interdisciplinary Issues in Bioethics: Law and Policy. 3 credits.
Offered by School of Systems Biology. May not be repeated for credit.

Recommended Prerequisite: BIOS 780 and 781.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.
Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture
Grading:
This course is graded on the Graduate Regular scale.

Studies of specialized topics in biosciences. Specific arrangements for designing scope and area of study to be determined in consultation with instructor. May involve literature searches and review, workshops, or tutorials. Offered by School of Systems Biology. May be repeated within the degree for a maximum 24 credits.

Recommended Prerequisite: Permission of Research Advisor.

Registration Restrictions:
Enrollment is limited to Graduate level students.

Schedule Type: Research
Grading:
This course is graded on the Graduate Special scale.

BIOS 899: Directed Research in Biosciences. 1-12 credits.
Research on a pertinent topic in biosciences. Scope and subject of research to be determined by instructor. Offered by School of Systems Biology. May be repeated within the degree for a maximum 24 credits.

Recommended Prerequisite: Permission of Research Advisor.

Registration Restrictions:
Enrollment is limited to Graduate level students.

Schedule Type: Research
Grading:
This course is graded on the Graduate Special scale.

BIOS 998: Doctoral Dissertation Proposal. 1-6 credits.
Research and writing of research proposal for doctoral dissertation. Offered by School of Systems Biology. May be repeated within the degree.

Recommended Prerequisite: Permission of research advisor.

Registration Restrictions:
Enrollment is limited to Graduate level students.

Schedule Type: Dissertation
Grading:
This course is graded on the Satisfactory/No Credit scale.

BIOS 999: Doctoral Dissertation Research. 1-12 credits.
Research in concentration pertinent to students' program of study. Notes: Maximum of 24 credits can be applied toward degree. Offered by School of Systems Biology. May be repeated within the degree.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy.

Enrollment is limited to Graduate level students.

Schedule Type: Dissertation
Grading:
This course is graded on the Satisfactory/No Credit scale.

Business (BUS)

100 Level Courses

BUS 100: Business and Society. 3 credits.
Provides students with a foundation for understanding the role of business in society by exploring the nature and history of business enterprise, the social context of business, and the interaction of individuals with business by selecting current events in business and analyzing the content as well as the impact of the reported activities. A third attempt will require academic advisor approval. Offered by School of Business. Limited to two attempts.

Mason Core: Social/Behavioral Sciences

Recommended Prerequisite: Degree status.

Registration Restrictions:
Students with the terminated from BU major attribute may not enroll.

Schedule Type: Lecture
Grading:
This course is graded on the Undergraduate Regular scale.

BUS 103: Develop Professional Skills I: Foundational Elements. 3 credits.
Students will investigate and develop their professional skill set. Topics include introduction to the business school and business world, what it means to be professional, how to consume the business press, and how to research business issues. Develop professional writing and presentation skills, explore career options and the job search process, and develop personal educational and professional development plans. A third attempt will require academic advisor approval. Offered by School of Business. Limited to two attempts.

Specialized Designation: Mason Impact.

Registration Restrictions:
Students with the terminated from BU major attribute may not enroll.

Schedule Type: Lecture
Grading:
This course is graded on the Undergraduate Regular scale.
200 Level Courses

BUS 200: Global Environment of Business. 3 credits.
As world becomes increasingly connected, business serves as core institution that mediates relations between individuals across national boundaries. Provides overview of global environment of business through study of political economy, international institutions and international trade theories, and global conflicts and cooperation around issues (natural resources, labor, human rights, distribution of income, and the environment). Addresses implications of topics for business. Designated a Green Leaf Course. A third attempt will require academic advisor approval. Offered by School of Business. Limited to two attempts.

Mason Core: Global Understanding, Encore: Sustainability
Specialized Designation: Green Leaf Related Course
Registration Restrictions:
Non-Degree level students may not enroll.
Students with the terminated from BU major attribute may not enroll.
Schedule Type: Lecture
Grading:
This course is graded on the Undergraduate Regular scale.

BUS 210: Business Analytics I. 3 credits.
Course introduces business analytics and why businesses use analytics to create and sustain competitive advantage. Topics include data types, summarization and graphical display of data, application of basic probability rules, and probability distributions. Introduces fundamentals of spreadsheets and their use in business applications. Learn how to apply appropriate analytical tools to gain useful insights from real-life datasets. A third attempt will require academic advisor approval. Offered by School of Business. Limited to two attempts.

Registration Restrictions:
Non-Degree level students may not enroll.
Students with the terminated from BU major attribute may not enroll.
Schedule Type: Lecture
Grading:
This course is graded on the Undergraduate Regular scale.

BUS 292: Internship for Academic Credit. 3 credits.
This is general elective course is designed to give students the opportunity to gain practical and professional experience in conjunction with their academic development. The internship must be completed within the same academic semester to receive course credit. Offered by School of Business. Limited to two attempts.

Recommended Prerequisite: 24 credit hours
Registration Restrictions:
Required Prerequisite: BUS 103B.
B- Requires minimum grade of B-.
Non-Degree level students may not enroll.
Students with the terminated from BU major attribute may not enroll.
Schedule Type: Internship
Grading:
This course is graded on the Undergraduate Regular scale.

300 Level Courses

BUS 303: Develop Professional Skills II: Advanced Elements. 3 credits.
In this course, students will continue to develop their professional skill set. Topics covered include understanding the modern work environment, business ethics and professional responsibilities, and professional judgment. Students will also continue to hone their professional writing and presentation skills, prepare for the job search process, and develop personal job search and professional development plans. Notes: School of Business students will not be permitted to make more than three attempts to achieve a C or higher in BUS 303. The third attempt requires School of Business academic advisor approval. Those who do not successfully complete this course within three attempts will be terminated from their major and will not be eligible to receive a degree from the School of Business. For more information about this, see the "Termination from the Major" section under Academic Policies. Offered by School of Business. Limited to two attempts.

Specialized Designation: Mason Impact.
Registration Restrictions:
Required Prerequisites: (BUS 103C or U103).
C Requires minimum grade of C.
Students with a class of Freshman may not enroll.
Non-Degree level students may not enroll.
Students with the terminated from BU major attribute may not enroll.
Schedule Type: Lecture
Grading:
This course is graded on the Undergraduate Regular scale.

BUS 310: Business Analytics II. 3 credits.
Introduces modeling relationships contained in data and linear models to make predictions in business. Topics include estimation, hypotheses testing, statistical inference, analysis of variance and linear regression techniques. Fundamentals of linear programming to solve optimization problems in business. Apply analytical tools to gain insights from real-life datasets. Hands-on experience and application of the methods to data sets using spreadsheet software. A third attempt will require academic advisor approval. Offered by School of Business. Limited to two attempts.

Registration Restrictions:
Required Prerequisites: BUS 210C, U210 or 210T.
C Requires minimum grade of C.
Non-Degree level students may not enroll.
Students with the terminated from BU major attribute may not enroll.
Schedule Type: Lecture
Grading:
This course is graded on the Undergraduate Regular scale.

BUS 315: Introduction to the Government Contracting Industry. 3 credits.
The course provides students with a foundational knowledge of the government contracting (GovCon) industry. By explaining key concepts of the field, students will be able to understand how to leverage their knowledge immediately, upon hire in a GovCon-related opportunity by understanding the link between GovCon concepts and non-GovCon
business concepts. A third attempt will require academic advisor approval. Offered by School of Business. Limited to two attempts.

**Registration Restrictions:**

**Required Prerequisites:** MGMT 303<sup>C</sup> and BULE 303.<br>
<sup>C</sup> Requires minimum grade of C.

**Schedule Type:** Lecture

**Grading:**

This course is graded on the Undergraduate Regular scale.

### 400 Level Courses

**BUS 491: Special Topics in Business. 1-6 credits.**

Advanced study of special topics in business. Offered by School of Business. Limited to two attempts.

**Specialized Designation:** Topic Varies

**Registration Restrictions:**

Students with a class of Freshman or Sophomore may not enroll.

Non-Degree level students may not enroll.

Students with the terminated from BU major attribute may not enroll.

**Schedule Type:** Lecture

**Grading:**

This course is graded on the Undergraduate Regular scale.

**BUS 492: Internship in Business. 3 credits.**

Opportunity to gain practical, professional experience in conjunction with academic development. An internship is an important part of academic and career preparation. May be used as elective credit, but may not be repeated. Notes: No more than 6 credits of School of Business internship coursework (BUS 492 or ACCT 492) can be applied towards a student’s 120 (BU) degree applicable credits. Students must receive departmental approval in order to register for this course; please contact the School of Business Office of Career Services for internal eligibility requirements. Offered by School of Business. May be repeated within the degree for a maximum 6 credits. Equivalent to ACCT 492, FNAN 492, MGMT 492, MIS 492, MKTG 492, OM 492, OSCM 492.

**Recommended Prerequisite:** 75 credit hours

**Registration Restrictions:**

**Required Prerequisites:** ((MIS 301<sup>B</sup> or 303<sup>B</sup>) and (OM 301<sup>B</sup> or 303<sup>B</sup>)) or (ACCT 301<sup>B</sup> or 330<sup>B</sup>) or (MGMT 301<sup>C</sup>, 303<sup>C</sup>, 303<sup>B</sup> or 303<sup>B</sup>).<br>
<sup>B</sup> Requires minimum grade of B.<br>
<sup>C</sup> Requires minimum grade of C.

Students with a class of Freshman or Sophomore may not enroll.

Non-Degree level students may not enroll.

Students with the terminated from BU major attribute may not enroll.

**Schedule Type:** Internship

**Grading:**

This course is graded on the Undergraduate Regular scale.

**BUS 498: Capstone Course: Advanced Business Models. 3 credits.**

Advanced integrated exploration of business models and industry dynamics that uses case analyses to assess competition, organizational strategy, and firm performance. Students examine strategic change in organizations from multiple perspectives, integrating knowledge from core course work into several papers and major presentation. Students receive coaching from area business leaders as they complete their presentations. Students must earn a C or higher in order to meet the Business Core and Foundations degree requirements. A third attempt will require academic advisor approval. Offered by School of Business. Limited to two attempts.

**Mason Core:** Capstone

**Registration Restrictions:**

**Required Prerequisites:** (ACCT 301<sup>C</sup>, 303<sup>C</sup>, 330<sup>C</sup>, L301, L303 or L330) and (BULE 302<sup>C</sup>, 303<sup>C</sup>, L302 or L303) and (BUS 303<sup>C</sup>, L303, SOM 301<sup>C</sup> or L301) and (FNAN 301<sup>C</sup>, 303<sup>C</sup>, L301 or L303) and (MGMT 301<sup>C</sup>, 303<sup>C</sup>, L301 or L303) and (MIS 301<sup>C</sup>, 303<sup>C</sup>, L301 or L303) and (MGMT 301<sup>C</sup>, 303<sup>C</sup>, L301 or L303) and (OM 301<sup>C</sup>, 303<sup>C</sup>, L301, DESC 301<sup>C</sup>, L301 or OM L303) and (BUS 310<sup>C</sup>, L310, OM 210<sup>C</sup>, DESC 210<sup>C</sup>, U210 or OM U210).<br>
<sup>C</sup> Requires minimum grade of C.

Enrollment limited to students with a class of Senior Plus or Senior.

Non-Degree level students may not enroll.

Students with the terminated from BU major attribute may not enroll.

**Schedule Type:** Lecture

**Grading:**

This course is graded on the Undergraduate Regular scale.

### 700 Level Courses

**BUS 701: Professional Practicum. 3 credits.**

This course is designed to teach the practice of teaching, research, and philosophy of science. Classroom teaching, business research and other professional responsibilities common to business academics will be covered. This course will also introduce students to tools for the philosophical analysis of science. Students will learn about issues in observation, experiment, and reasoning, questions about the aims of science, scientific change, and the relations between science and values. This course should be taken in the first year of the program. Offered by School of Business. May not be repeated for credit.

**Registration Restrictions:**

Enrollment limited to students in a Doctor of Philosophy degree.

Enrollment limited to students in the School of Business college.

**Schedule Type:** Lecture

**Grading:**

This course is graded on the Graduate Regular scale.

**BUS 702: Writing for Business PhD Students. 3 credits.**

This course emphasizes a “learning by doing” approach to writing. It is run as a writing practicum with a focus on the procedural aspects of writing. Students will engage the writing process intensively and deliberately, both in and outside class. Students will read and evaluate different writings in business, providing evaluation and critique of them in the process of honing and refining their own writing skills. Students will develop strategies for writing regularly, for managing anxiety about writing, and developing critical, but constructive strategies of self-evaluation. Students will gain practice in different types of writing including research reports, scholarly journal articles, and research proposals. Students will read examples of the range of writings by business scholars, identifying persuasive argument, how to advance a
claim and the productive use of evidence. This course should be taken in the second year of the program. Offered by School of Business. May not be repeated for credit.

**Registration Restrictions:**
Enrollment limited to students in a Doctor of Philosophy degree.

Enrollment limited to students in the School of Business college.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

**BUS 703: Research Project.** 3 credits.
Student must complete a two-semester long research project on an approved topic under the guidance of a faculty advisor; and write a research paper that will be presented as a departmental seminar and be submitted to an academic journal. This course must be completed no later than the end of the fourth semester in the PhD program. 6 credits combined from taking this course twice will apply to the PhD degree. Offered by School of Business. May be repeated within the degree for a maximum 6 credits.

**Registration Restrictions:**
Enrollment limited to students in a Doctor of Philosophy degree.

Enrollment limited to students in the School of Business college.

**Schedule Type:** Research

**Grading:**
This course is graded on the Satisfactory/No Credit scale.

**800 Level Courses**

**BUS 801: Field Research in Business.** 3 credits.
Student must complete a one-semester long independent study with their faculty advisor where they take the lead on a field research project. This course is more advanced than BUS 798: Research Project as the design of this course is such that the student is the project lead. This course will be ideally completed in the third year. The rationale behind this course is that the student takes the lead on gaining access to the problem to be solved. This could involve gaining access to collect primary data from a business or organization, acquiring historical data, or developing an analytical model. The goal is for the student to understand the research problem as it situated in practice. The deliverable for this course is not a finished paper. Deliverables could include, but are not limited to: progress in securing data access, development of analytical models, demonstration of data organization, culling valuable business contacts, and making applied presentations to business and academic. Offered by School of Business. May not be repeated for credit.

**Registration Restrictions:**
Enrollment limited to students in a Doctor of Philosophy degree.

Enrollment limited to students in the School of Business college.

**Schedule Type:** Research

**Grading:**
This course is graded on the Graduate Regular scale.

---

**900 Level Courses**

**BUS 998: Doctoral Dissertation Proposal.** 1-6 credits.
Work on research proposal that forms basis for doctoral dissertation. Note: Students must complete a minimum of 3 credits of BUS 998. Offered by School of Business. May be repeated within the degree for a maximum 6 credits.

**Registration Restrictions:**
Enrollment limited to Graduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Dissertation

**Grading:**
This course is graded on the Satisfactory/No Credit scale.

**BUS 999: Doctoral Dissertation Research.** 1-18 credits.
Research on approved dissertation topic under direction of dissertation committee. Notes: Students must complete a minimum of 3 credits of BUS 999. Offered by School of Business. May be repeated within the degree for a maximum 18 credits.

**Registration Restrictions:**
Enrollment limited to Graduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Dissertation

**Grading:**
This course is graded on the Satisfactory/No Credit scale.

---

**Business and Legal Studies (BULE)**

**300 Level Courses**

**BULE 303: Legal Environment of Business.** 3 credits.
Survey of the legal environment of business, emphasizing legal concepts and legal reasoning to prepare students to recognize legal problems and formulate appropriate responses. Topics include the federal and state court systems, constitutional and administrative law, business torts and crimes, contracts and business ethics. Lecture, discussion, cases. Notes: School of Business students will not be permitted to make more than three attempts to achieve a C or higher in BULE 303. The third attempt requires School of Business academic advisor approval. Those who do not successfully complete this course within three attempts will be terminated from their major and will not be eligible to receive a degree from the School of Business. For more information about this, see the "Termination from the Major" section under Academic Policies. Students cannot receive credit for both BULE 302 and BULE 303. Offered by School of Business. Limited to two attempts.

**Recommended Prerequisite:** Degree status; sophomore standing

**Registration Restrictions:**
Students with a class of Freshman may not enroll.

Non-Degree or Washington Consortium level students may not enroll.

Students with the terminated from BU major attribute may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale.

400 Level Courses

**BULE 402: Commercial Law.** 3 credits.
Survey of commercial law emphasizing the Uniform Commercial Code. Lecture, discussion, cases. A third attempt will require academic advisor approval. Offered by School of Business. Limited to two attempts.

**Registration Restrictions:**

**Required Prerequisites:** BULE 302C, L302, 303C or L303.
C Requires minimum grade of C.

Students with a class of Freshman or Sophomore may **not** enroll.

Non-Degree level students may **not** enroll.

Students with the terminated from BU major attribute may **not** enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale.

Business Management (BMGT)

600 Level Courses

**BMGT 603: Economics for Successful Firm Management.** 3 credits.
Provides fundamental understanding of applying microeconomics concepts to managerial decision making. Explores principles of microeconomic theory, including market supply and demand, production and cost functions, industry structure, and product and resource pricing. Due to the presentation and application of course material, this course can only be taken by students enrolled in the Master of Science in Management Program. Offered by School of Business. May not be repeated for credit.

**Recommended Prerequisite:** Admission to BMGT program.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate or Senior Plus.

Students in a Non-Degree Post-Baccalaureate or Non-Degree Undergraduate degrees may **not** enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

**BMGT 613: Financial Reporting and Firm Analysis.** 3 credits.
Foundation course focusing on economics and analysis of business transactions and financial reporting issues. Topics include introduction to accounting framework in financial reporting; analysis of financial statements, economic events and impact on financial reports, and impact of accounting methods on financial reports. Due to presentation and application of course material, course only open to students enrolled in the Master of Science in Management Program. Offered by School of Business. May not be repeated for credit.

**Recommended Prerequisite:** Admission to BMGT program.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate or Senior Plus.

Students in a Non-Degree Post-Baccalaureate or Non-Degree Undergraduate degrees may **not** enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

**BMGT 623: Marketing and Firm Performance.** 3 credits.
Develops market-based knowledge and skills for effective marketing decision making, strategy design, implementation, and evaluation in variety of institutional and competitive situations. Addresses importance of companies being market-driven and customer-focused. Emphasis on case studies, team work, and projects. Due to the presentation and application of course material, this course is only open to students enrolled in the Master of Science in Management Program. Offered by School of Business. May not be repeated for credit.

**Recommended Prerequisite:** Admission to BMGT program.

**Registration Restrictions:**
Enrollment limited to students with a class of Graduate or Senior Plus.

Students in a Non-Degree Post-Baccalaureate or Non-Degree Undergraduate degrees may **not** enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

**BMGT 633: Statistical Analysis for Management.** 3 credits.
Use statistical methods as analytical tools for understanding and solving business problems and supporting business decision making. Includes descriptive statistics, sampling, inferencing and regression. Extensive use of applied business scenarios to illustrate concepts and computer software for data analysis. Due to presentation and application of course material, this course can only be taken by students in the Master of Science in Management Program. Offered by School of Business. May not be repeated for credit.

**Recommended Prerequisite:** Admission to BMGT program.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate or Senior Plus.

Students in a Non-Degree Post-Baccalaureate or Non-Degree Undergraduate degrees may **not** enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.
Course materials, this course can only be taken by students enrolled in the Master of Science in Management program. Offered by School of Business. May not be repeated for credit.

**Recommended Prerequisite:** Admission to BMGT program.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate or Senior Plus.

Students in a Non-Degree Post-Baccalaureate or Non-Degree Undergraduate degrees may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

**BMGT 638:** Managing Business Operations in a Global Environment. 3 credits.
Focuses on design, planning, and control activities to produce and deliver goods/services in organizations. Introduces operations management decisions; operations strategy, process analysis and design, capacity planning, supply chain management, total quality management, and project management. Uses quantitative modeling, case studies, and computer software to analyze/solve problems. Due to the presentation and application of course material, course only open to Master of Science in Management students. Offered by School of Business. May not be repeated for credit.

**Recommended Prerequisite:** Admission to BMGT program.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate or Senior Plus.

Students in a Non-Degree Post-Baccalaureate or Non-Degree Undergraduate degrees may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

**BMGT 643:** Financial Management in a Global Environment. 3 credits.
Introduces theory and practice of finance within corporations. Topics include intertemporal choice, valuation, capital budgeting and structure, working capital management, and risk and return analysis. Due to the presentation and application of course material, course can only be taken by students enrolled in the Master of Science in Management Program. Offered by School of Business. May not be repeated for credit.

**Recommended Prerequisite:** Admission to BMGT program.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate or Senior Plus.

Students in a Non-Degree Post-Baccalaureate or Non-Degree Undergraduate degrees may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

**BMGT 662:** Management of Information Technology. 3 credits.
Strategic, economic and managerial aspects of managing organization's IT assets are covered. Business value of IT is understood and assessed in context of its impact on organization's structure and strategy. Includes discussion on major issues pertaining management of IT infrastructure. Due to presentation and application of course material, course is only open to students enrolled in the Master of Science in Management Program. Offered by School of Business. May not be repeated for credit.

**Recommended Prerequisite:** Admission to BMGT program.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate or Senior Plus.

Enrollment is limited to Graduate or Undergraduate level students.

Students in a Non-Degree Post-Baccalaureate or Non-Degree Undergraduate degrees may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

**BMGT 678:** Business Strategy and Firm Leadership. 3 credits.
Capstone focusing on strategy development at business unit and corporate level. Cases, readings, and project format familiarize students with strategic management function and help develop analytical, organizational, and managerial skills to analyze complex business situations. Opportunities to integrate knowledge gained in prior course work. Due to presentation and application of course material, course only open to students enrolled in the Master of Science in Management program. Offered by School of Business. May not be repeated for credit.

**Recommended Prerequisite:** Admission to BMGT program.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate or Senior Plus.

Enrollment is limited to Graduate or Undergraduate level students.

Students in a Non-Degree Post-Baccalaureate or Non-Degree Undergraduate degrees may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.
This course is graded on the Graduate Special scale.

**BMGT 692: Professional Development Experience.** 1-3 credits.
Professional experience in conjunction with academic development. Hands-on experience is an important part of academic and career preparation and may be completed by an internship, consulting project, independent study or additional global experience. Must involve an average of 15 hours per week and be approved by program director. Offered by School of Business. May be repeated within the term for a maximum 3 credits.

**Recommended Prerequisite:** completion of 18 credit hours in BMGT program.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate or Senior Plus.

Enrollment is limited to students with a major in Management.

Enrollment limited to Graduate or Undergraduate level students.

**Schedule Type:** Internship

**Grading:**
This course is graded on the Graduate Special scale.

**BMGT 695: Global Business Perspectives.** 3 credits.
Includes a weeklong international student study tour lead by a full-time School of Business professor. Students interact with business and government leaders, participate in seminars, and visit sites of local or multinational companies. Focus on developing an increased understanding of global markets, competition, business strategy, and business opportunities in addition to the social and cultural dimensions of global business. Offered by School of Business. May not be repeated for credit.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate or Senior Plus.

Enrollment is limited to students with a major in Management.

Enrollment limited to Graduate or Undergraduate level students.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Special scale.

**MSIS 614: Financial and Cost Accounting.** 2 credits.
Provides managers with an overview of the purpose and importance of accounting within the organization and the financial valuation of information technology companies, projects, and product line. Students focus on the economics and analysis of business transactions and their related financial reporting issues from internal and external stakeholder perspectives. Students improve their skills in analyzing financial issues and presenting results in a case analysis framework. Offered by School of Business. May not be repeated for credit. Equivalent to TECM 614.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to students with a major in Management of Secure Info Syst or Technology Management.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

**MSIS 620: Economics of Technology Management.** 2 credits.
Enables students to build and evaluate economic and business models that can be used to analyze real managerial questions that affect all types of institutions, especially firms in the information technology industry. Students develop a better understanding of the operation of markets in general and the use of various quantitative and qualitative methods when making decisions within the firm. The use of economic analysis allows students to identify and evaluate decision alternatives, the competitive environments of firms, and the factors that influence firm performance, especially in the information technology industry. Offered by School of Business. May not be repeated for credit. Equivalent to TECM 620.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.
Enrollment is limited to students with a major in Management of Secure Info Syst or Technology Management.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale.

MSIS 635: Decision Models and Methods. 2 credits.
Explores current metrics and metric development for quality, intangible assets, and project management as required within information technology companies. Applies statistical tools of best use with these metrics. Offered by School of Business. May not be repeated for credit. Equivalent to TECM 635.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale.

MSIS 641: Innovation, Commercialization and Entrepreneurship. 2 credits.
Cybersecurity is a field with both tremendous opportunity and need for innovations and commercialization of new technologies. In addition, there is tremendous opportunity and success by cybersecurity startup firms in US and internationally. Course investigates technology and cybersecurity innovation and commercialization and keys to success for cybersecurity entrepreneurship. Offered by School of Business. May not be repeated for credit.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to students with a major in Management of Secure Info Syst.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale.

MSIS 643: Managerial Finance. 2 credits.
Surveys the theory and practice of corporate financial management with specific application to the technology sector. Students develop an understanding of key elements required in the valuation of project alternatives; including their strategic importance. Students evaluate and use financial management models and gain an understanding of how finance can be employed as a source of potential competitive advantage.

Offered by School of Business. May not be repeated for credit. Equivalent to TECM 643.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to students with a major in Management of Secure Info Syst or Technology Management.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale.

Approval by faculty member and program director required prior to registration. Studies specialized topics in business not otherwise available in the curriculum. Offered by School of Business. May be repeated within the degree for a maximum 4 credits.

Specialized Designation: Topic Varies

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to students with a major in Management of Secure Info Syst.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Independent Study

Grading:
This course is graded on the Graduate Regular scale.

MSIS 697: Special Topics in Management of Secure Information Systems. 1-3 credits.
Sections established as necessary to focus on various topical issues that emerge in practice of management of secure information systems. Offered by School of Business. May be repeated within the term for a maximum 6 credits.

Specialized Designation: Topic Varies

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to students with a major in Management of Secure Info Syst.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.
Schedule Type: Lecture

Grading:
This course is graded on the Graduate Special scale.

700 Level Courses

MSIS 711: Deriving Strategic Value from IT Investments. 2 credits.
Prepares students to be educated consumers of information technology to maximize strategic advantage of IT to an organization. Information technologies, architectures, and products are categorized and analyzed with a view to develop and maintain the most favorable IT asset portfolio to successfully carry out business goals and strategies. Techniques for making group technology assessments, outsourcing decisions, project bidding, and contract negotiations. Offered by School of Business. May not be repeated for credit. Equivalent to TECM 711.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale.

MSIS 735: Capstone Project. 1-3 credits.
Teams undertake a strategic evaluation and plan for IT-driven business initiatives. Presentation includes analysis of competitive forces and the value chain; recommendations, including changes in goals and organizational design; plan of action integrating marketing, human resource development, organizational design, finance, and information technology; and implementation plan using theories of communication and change management, to include business case and business plan. Offered by School of Business. May not be repeated for credit. Equivalent to TECM 735.

Registration Restrictions:
Enrollment is limited to students with a major in Management of Secure Info Syst or Technology Management.

Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Special scale.

Students spend a week in an international residency. Emphasizes dealing with technological changes across international markets and amid global developments, virtual organizations, and project management across cultures. Corporate site visits combined with presentations by professors from universities outside the United States and relevant practitioners. Offered by School of Business. May not be repeated for credit.

Registration Restrictions:
Enrollment is limited to students with a major in Management of Secure Info Syst.

Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Special scale.

Chemistry (CHEM)

100 Level Courses

CHEM 101: Introduction to Modern Chemistry. 3 credits.
Physical and chemical discoveries and properties of matter presented along with their application and impact on way of life. Topics include atomic and molecular structure, nuclear chemistry, and chemistry in Earth and atmosphere. Note: does not fulfill the requirement for a laboratory course in chemistry. Not for chemistry majors. No credit given for both CHEM 101 and CHEM 103 or for both CHEM 101 and CHEM 211-212. No previous knowledge of chemistry required. Offered by Chemistry. Limited to three attempts.

Mason Core: Natural Science Overview

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale.

CHEM 102: Chemistry for Changing Times. 3 credits.
Modern course to explore and discover chemistry in the 21st century with an emphasis on current societal concerns. Examines carbon-containing compounds such as polymers, biomolecules, drugs, and fuels, which play a central role in medicine, manufacturing, green energy, and forensic science. Topics include examples from organic chemistry, conformational analysis, stereochemistry, genetics, and protein-protein interactions. (CHEM 102 does not require concomitant registration in a 104 lab section.) Notes: Not open to students majoring in Chemistry, not intended for science majors. Offered by Chemistry. Limited to three attempts.

Mason Core: Natural Science Overview

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale.

**CHEM 103: Chemical Science in a Modern Society.** 4 credits.
Terminal course in chemistry for non-science and nursing majors. Principles and application of chemistry. Notes: CHEM 103 and CHEM 101 are taught simultaneously in the same room. CHEM 101 is for those students who are not required to complete the lab component of CHEM 103. Not open to students majoring in chemistry. Credit will not be given for both this course and CHEM 211, 212. Topics are those described for CHEM 101 and 102 but with lab to enhance scientific experience. Offered by Chemistry. Limited to three attempts.

**Mason Core:** Natural Science with Lab

**Schedule Type:** Laboratory, Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale.

**CHEM 104:** Chemistry for Changing Times. 4 credits.
Modern course in to explore and discover chemistry in the 21st century with an emphasis on current societal concerns. Examines carbon-containing compounds such as, polymers, biomolecules, drugs, and fuels, which play a central role in medicine, manufacturing, green energy, and forensic science. Topics include examples from organic chemistry, conformational analysis, stereochemistry, genetics, and protein-protein interactions. (CHEM 104 requires concomitant registration in a 104 lab section.) Notes: Not open to students majoring in Chemistry, not intended for science majors or credit for 211 and 213. Offered by Chemistry. Limited to three attempts.

**Mason Core:** Natural Science with Lab

**Schedule Type:** Laboratory, Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale.

**CHEM 105:** Introductory Chemistry Laboratory I. 1 credit.
Introductory laboratory course to demonstrate principles and application of chemistry. Notes: Not open to students majoring in chemistry. Credit will not be given for both this course and CHEM 211, 212. Students will enroll in CHEM 105 by Individualized Section and attend one of the CHEM 103 lab sections. Offered by Chemistry. Limited to three attempts.

**Recommended Prerequisite:** CHEM 101.

**Schedule Type:** Laboratory

**Grading:**
This course is graded on the Undergraduate Regular scale.

**CHEM 106:** Introductory Chemistry Laboratory II. 1 credit.
1-credit laboratory course for non-science majors. Laboratory experience to demonstrate principles and application of chemistry. Notes: Not open to students majoring in chemistry. Credit will not be given for both this course and CHEM 211, 212. Students will enroll in CHEM 106 by Individualized Section and attend one of the CHEM 104 lab sections. Offered by Chemistry. Limited to three attempts.

**Recommended Prerequisite:** CHEM 102.

**Schedule Type:** Laboratory

**Grading:**
This course is graded on the Undergraduate Regular scale.

**CHEM 155:** Introduction to Environmental Chemistry I. 4 credits.
Basic chemical principles of Earth’s water, air, and soil systems; presented in the context of understanding environmental issues. Includes Saturday morning field trips to sites of past and present environmental contamination, alternating with Saturday morning laboratory activities. Notes: Credit will not be given for this course and CHEM 103, 104. Offered by Chemistry. Limited to three attempts.

**Mason Core:** Natural Science with Lab, Encore: Sustainability

**Specialized Designation:** Green Leaf Related Course

**Recommended Prerequisite:** CHEM 155 or permission of instructor.

**Schedule Type:** Laboratory, Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale.

**CHEM 156:** Introduction to Environmental Chemistry II. 4 credits.
Basic chemical principles of Earth’s water, air, and soil systems; presented in the context of understanding environmental issues. Includes Saturday morning field trips to sites of past and present environmental contamination, alternating with Saturday morning laboratory activities. Notes: Credit will not be given for this course and CHEM 103, 104. Offered by Chemistry. Limited to three attempts.

**Mason Core:** Natural Science with Lab, Encore: Sustainability

**Specialized Designation:** Green Leaf Related Course

**Recommended Prerequisite:** CHEM 155 or permission of instructor.

**Schedule Type:** Laboratory, Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale.

**CHEM 211:** General Chemistry I. 3 credits.
Fundamental principles of atomic and molecular structure; chemical bonding; basic concepts of chemical reactions and thermochemistry; properties of gases, liquids, and solids. Notes: Credit will not be given for this course and CHEM 103, 104. Students majoring in science, engineering, or mathematics should choose this course sequence. CHEM 211 is a prerequisite to CHEM 212. Offered by Chemistry. Limited to three attempts. Equivalent to CHEM 105, CHEM 106, CHEM 201.

**Mason Core:** Natural Science with Lab

**Registration Restrictions:**
**Required Prerequisites:** CHEM 213\(^c\), U213\(^*\) or 213T\(^*\).

\(^*\) May be taken concurrently.

\(^c\) Requires minimum grade of C.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale.

**CHEM 212:** General Chemistry II. 3 credits.
Fundamentals of colligative properties, reaction rates and equilibrium. Topics include kinetics, properties of solutions, ionic equilibrium, chemical thermodynamics, electrochemistry, and nuclear chemistry. Notes: Credit will not be given for this course and CHEM 103, 104. Students majoring in science, engineering, or mathematics should
choose this course sequence. Offered by Chemistry. Limited to three attempts. Equivalent to CHEM 202.

**Mason Core:** Natural Science with Lab

**Registration Restrictions:**
- **Required Prerequisites:** (CHEM 211\(^C\), 211T or U211) and (CHEM 213\(^C\), 213T or U213) and (CHEM 214\(^C\), 214T or U214).

  * May be taken concurrently.
  * Requires minimum grade of C.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale.

**CHEM 213: General Chemistry Laboratory I.** 1 credit.
General Chemistry laboratory course for students majoring in science, engineering, or mathematics. Laboratory experience will demonstrate general chemistry principles and applications. Notes: Students majoring in science, engineering, or mathematics should choose this course sequence. Credit will not be given for this course and CHEM 103. Offered by Chemistry. Limited to three attempts.

**Mason Core:** Natural Science with Lab

**Registration Restrictions:**
- **Required Prerequisites:** CHEM 211\(^C\), U211* or 211T*.

  * May be taken concurrently.
  * Requires minimum grade of C.

**Schedule Type:** Laboratory

**Grading:**
This course is graded on the Undergraduate Regular scale.

**CHEM 214: General Chemistry Laboratory II.** 1 credit.
General Chemistry laboratory course for students majoring in science, engineering, or mathematics. Laboratory experience will demonstrate general chemistry principles and applications. Notes: Credit will not be given for this course and CHEM 103, CHEM 104. Students majoring in science, engineering, or mathematics should choose this course sequence. Offered by Chemistry. Limited to three attempts. Equivalent to CHEM 204.

**Mason Core:** Natural Science with Lab

**Registration Restrictions:**
- **Required Prerequisites:** (CHEM 212\(^C\), U212* or 212T*) and (CHEM 211\(^C\), 211T or U211) and (CHEM 213\(^C\), 213T or U213).

  * May be taken concurrently.
  * Requires minimum grade of C.

**Schedule Type:** Laboratory

**Grading:**
This course is graded on the Undergraduate Regular scale.

**CHEM 271: General Chemistry for Engineers Lecture.** 3 credits.
Fundamental principles of chemical structure and reactivity including atomic and molecular structure; chemical bonding; structures of ionic, covalent, and metallic lattices; oxidation reduction; electrochemistry and chemistry of metals; and introduction to organic chemistry and polymers. Notes: Enrollment restricted to students intending to major in engineering. Students who need two semesters of chemistry should enroll in CHEM 211/CHEM 213 and CHEM 212/CHEM 214. Credit will not be given for this course and CHEM 211/CHEM 213. Offered by Chemistry. May not be repeated for credit. Corequisite CHEM 272. Offered by Chemistry. Limited to two attempts.

**Mason Core:** Natural Science with Lab

**Registration Restrictions:**
- **Required Prerequisite:** CHEM 272\(^C\).

  * May be taken concurrently.
  * Requires minimum grade of C.

Enrollment limited to students in the Volgenau School of Engineering college.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale.

**CHEM 272: General Chemistry for Engineers Lab.** 1 credit.
Lab course to accompany CHEM 271 Lecture. General Chemistry laboratory course for students majoring in engineering. Laboratory experience will demonstrate general chemistry principles and applications. Corequisite CHEM 271. Offered by Chemistry. Limited to two attempts.

**Mason Core:** Natural Science with Lab

**Registration Restrictions:**
- **Required Prerequisite:** CHEM 271\(^C\).

  * May be taken concurrently.
  * Requires minimum grade of C.

**Schedule Type:** Laboratory

**Grading:**
This course is graded on the Undergraduate Regular scale.

**CHEM 310: Survey of Organic Chemistry.** 3 credits.
A one-semester survey of the chemistry of organic compounds with emphasis on structure, properties, stereochemistry, nomenclature, synthesis, and reactions of the major functional group families. Applications and compounds of importance to biology and biochemistry stressed. Credit will not be given for this course and CHEM 313; credit will not be given for this course and CHEM 314. Offered by Chemistry. Limited to three attempts.

**Mason Core:** Natural Science with Lab

**Registration Restrictions:**
- **Required Prerequisites:** (CHEM 271\(^C\) and 272\(^C\)) or (CHEM 211\(^C\), 213\(^C\), 212\(^C\) and 214\(^C\)).

  * Requires minimum grade of C.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale.

**CHEM 313: Organic Chemistry I.** 3 credits.
Theoretical, synthetic, industrial, and biological aspects of the chemistry of carbon compounds. Offered by Chemistry. Limited to three attempts.

**Recommended Corequisite:** CHEM 315.

**Registration Restrictions:**
Required Prerequisites: ((CHEM 212 or U212) and CHEM 211, 213 and 214). *C Requires minimum grade of C.

Schedule Type: Lecture

Grading: This course is graded on the Undergraduate Regular scale.

CHEM 314: Organic Chemistry II. 3 credits.
Theoretical, synthetic, industrial, and biological aspects of the chemistry of carbon compounds. Offered by Chemistry. Limited to three attempts.

Recommended Corequisite: CHEM 318.

Registration Restrictions:
Required Prerequisites: ((CHEM 313 or L313) and CHEM 211, 212, 213 and 214). *C Requires minimum grade of C.

Schedule Type: Lecture

Grading: This course is graded on the Undergraduate Regular scale.

CHEM 315: Organic Chemistry Lab I. 2 credits.
Lab techniques and reactions arranged to accompany CHEM 313. Notes: One-hour recitation. Offered by Chemistry. Limited to three attempts.

Registration Restrictions:
Required Prerequisites: ((CHEM 313 or L313) and CHEM 211, 212, 213 and 214). *May be taken concurrently. *C Requires minimum grade of C.

Schedule Type: Laboratory

Grading: This course is graded on the Undergraduate Regular scale.

CHEM 318: Organic Chemistry Lab II. 2 credits.
Continuation of CHEM 315, arranged to accompany CHEM 314. Notes: One-hour recitation. Offered by Chemistry. Limited to two attempts.

Recommended Corequisite: CHEM 314

Registration Restrictions:
Required Prerequisites: ((CHEM 211 or U211) and (CHEM 213 or U213) and (CHEM 212 or U212) and (CHEM 214 or U214) and (CHEM 313 or L313) and (CHEM 314 or L314) and (CHEM 315 or L315)). *May be taken concurrently. *C Requires minimum grade of C.

Schedule Type: Laboratory

Grading: This course is graded on the Undergraduate Regular scale.

CHEM 321: Quantitative Chemical Analysis. 4 credits.
Principles of chemical analysis emphasizing ionic equilibria. Lab consists of gravimetric, volumetric, and instrumental methods illustrating principal types of quantitative determinations. Offered by Chemistry. Limited to three attempts.

Registration Restrictions:
Required Prerequisites: CHEM 212, MATH 113, CHEM 211 and MATH 114. *May be taken concurrently. *C Requires minimum grade of C.

Schedule Type: Laboratory

Grading: This course is graded on the Undergraduate Regular scale.

CHEM 331: Physical Chemistry I. 3 credits.
Yearlong survey covering topics including thermodynamics, equilibria, kinetics, solution properties, elementary quantum theory, electrochemistry, atomic and molecular structure, and nuclear chemistry. Offered by Chemistry. Limited to two attempts.

Registration Restrictions:
Required Prerequisites: (CHEM 212, 211, 213 and 214) and (MATH 114 or 116) and (PHYS 243 or 160). *May be taken concurrently. *C Requires minimum grade of C.

Schedule Type: Lecture

Grading: This course is graded on the Undergraduate Regular scale.

CHEM 332: Physical Chemistry II. 3 credits.
Yearlong survey covering topics including thermodynamics, equilibria, kinetics, solution properties, elementary quantum theory, electrochemistry, atomic and molecular structure, and nuclear chemistry. Offered by Chemistry. Limited to three attempts.

Registration Restrictions:
Required Prerequisites: (MATH 114 and CHEM 331) and (PHYS 243 or 160) and (PHYS 244 or 260). *May be taken concurrently. *C Requires minimum grade of C.

Schedule Type: Lecture

Grading: This course is graded on the Undergraduate Regular scale.

CHEM 336: Physical Chemistry Lab I. 2 credits.
Quantitative experimental study of physicochemical principles. CHEM 336 and 337 constitute an introduction to the practice and theory of experimental physical chemistry. Notes: One-hour recitation. Offered by Chemistry. Limited to two attempts.

Specialized Designation: Writing Intensive in Major

Registration Restrictions:
Required Prerequisites: (CHEM 212, 321 and 331) and (PHYS 243 or 160) and (MATH 114 or 116). *May be taken concurrently. *C Requires minimum grade of C.

Schedule Type: Laboratory

Grading: This course is graded on the Undergraduate Regular scale.

CHEM 337: Physical Chemistry Lab II. 2 credits.
Continuation of CHEM 336. Notes: One-hour recitation. Offered by Chemistry. Limited to three attempts.

Registration Restrictions:
Required Prerequisites: (CHEM 331C or L331) and (CHEM 332C or L332C) and (CHEM 336C or L336).
* May be taken concurrently.
C Requires minimum grade of C.

Schedule Type: Laboratory

Grading:
This course is graded on the Undergraduate Regular scale.

CHEM 355: Undergraduate Research. 1-3 credits.
Original research project. May involve lab study, computer modeling and analysis, or other original research as appropriate. Research formulated and completed under instructor's guidance. Culminates in a written and oral final report. May be repeated for a total of 6 credits. Offered by Chemistry. May be repeated within the degree for a maximum 6 credits.

Registration Restrictions:
Required Prerequisites: CHEM 313C, 315C, MATH 113C, PHYS 243C and 244C.
C Requires minimum grade of C.

Enrollment limited to students with a class of Junior, Sophomore, Senior Plus or Senior.
Enrollment is limited to students with a major, minor, or concentration in Chemistry.

Schedule Type: Research

Grading:
This course is graded on the Undergraduate Regular scale.

400 Level Courses

CHEM 413: Synthetic and Mechanistic Organic Chemistry. 3 credits.
General review of synthetic pathways and applications to new topics, emphasizing fused ring aromatics, heterocyclics, natural products, and biologically active compounds. Includes relationship of applied organic chemistry to consumer products, including drugs and agricultural chemicals. Offered by Chemistry. Limited to three attempts.

Registration Restrictions:
Required Prerequisites: (CHEM 314C or 314L) and (CHEM 318C or 318L) and CHEM 331C.
C Requires minimum grade of C.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale.

CHEM 422: Instrumental Methods of Chemical Analysis. 3 credits.
Introduces theories of analysis by instrumental methods. Basic electronics applied to chemical measurements. Topics include introduction to theory of spectroscopy including ultraviolet, visible, and infrared, and electrochemical methods of analysis; theory of Fourier transform techniques such as FT-IR and FT-NMR, and theory of advanced pulse techniques. Offered by Chemistry. Limited to three attempts.

Registration Restrictions:
Required Prerequisites: CHEM 321C, 332C and 337C.
C Requires minimum grade of C.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale.

CHEM 423: Instrumental Methods of Chemical Analysis Laboratory. 2 credits.
Laboratory-based introduction to quantitative analysis of organic and inorganic substances by using modern analytical instrumentation. Laboratory highlights practice of atomic and molecular spectroscopy, spectrophotometry, chromatography, voltammetry, and potentiometry in relation to chemical experimentation. Offered by Chemistry. Limited to three attempts.

Registration Restrictions:
Required Prerequisite: CHEM 422C.
C Requires minimum grade of C.

Schedule Type: Laboratory

Grading:
This course is graded on the Undergraduate Regular scale.

CHEM 424: Principles of Chemical Separation. 3 credits.
Theories and models of separation with applications to analyses of a wide range of chemical, biological, and environmental samples. Topics include high-resolution gas and high-performance liquid chromatography. Emphasizes theory of reverse phase, normal phase, ion exchange, size exclusion, and affinity based separations. Also presents instrumentation such as detectors, pumps, columns, and data acquisition. Offered by Chemistry. Limited to three attempts.

Recommended Prerequisite: CHEM 332 or CHEM 422 or Permission of instructor

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale.

CHEM 425: Electroanalytical Chemistry. 3 credits.
Review of basic electrochemistry. Emphasizes analysis and research for applications of modern electrochemical techniques such as chronoamperometry; cyclic, stripping, and AC voltammetry; pulse polarography; coulometry; electrochemical sensors; and instrumentation. Offered by Chemistry. Limited to three attempts.

Recommended Prerequisite: CHEM 332 or CHEM 422 or permission of instructor.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale.

CHEM 427: Aquatic Environmental Chemistry. 3 credits.
Thermodynamic and kinetic processes regulating the chemistry of surface and groundwater in natural and polluted environments with particular emphasis in explaining the aqueous concentrations of chemical species and controlling geochemical factors in the hydrosphere. Structure, sources and transformations of organic matter in the aquatic environment and interactions with aqueous solutes will be covered as related to contemporary issues in water quality. Offered by Chemistry. Limited to three attempts.

Registration Restrictions:
Required Prerequisite: CHEM 321C.
C Requires minimum grade of C.
Schedule Type: Lecture
Grading:
This course is graded on the Undergraduate Regular scale.

CHEM 438: Atmospheric Chemistry. 3 credits.
The fundamental chemical processes of the Earth’s atmosphere including chemical cycles, thermodynamics, reaction kinetics, photochemistry, radiative balance, ozone chemistry and environmental issues, including air pollution, acid rain and global change. Offered by Chemistry. Limited to three attempts. Equivalent to CLIM 438.

Registration Restrictions:
Required Prerequisite: CHEM 332\(^C\).
\(^C\) Requires minimum grade of C.

Schedule Type: Lecture
Grading:
This course is graded on the Undergraduate Regular scale.

CHEM 439: RS: Atmospheric Chemistry II: Air Analysis Techniques. 3 credits.
The theory, design and implementation of air sampling and analysis techniques for investigating GMU and regional air quality. Offered by Chemistry. Limited to three attempts.

Specialized Designation: Research/Scholarship Intensive

Recommended Prerequisite: CHEM 438 or permission of instructor.

Schedule Type: Lecture
Grading:
This course is graded on the Undergraduate Regular scale.

CHEM 440: Properties and Bonding of Inorganic Compounds. 3 credits.
Interpretation of physical and chemical properties of inorganic compounds in terms of currently used bonding concepts. Topics include molecular symmetry and applications of symmetry, structure and bonding in ionic solids; reactions and characterizations of solids; electronic and magnetic properties and applications of solids. Offered by Chemistry. Limited to three attempts.

Registration Restrictions:
Required Prerequisites: CHEM 332\(^C\) and 337\(^C\).
\(^C\) Requires minimum grade of C.

Schedule Type: Lecture
Grading:
This course is graded on the Undergraduate Regular scale.

CHEM 441: Introduction to Research on Current Problem in Chemical Sciences. 3 credits.
Introduction to research on current problem in chemical sciences under supervision of faculty advisor. Includes literature search, conferences, and lab. Notes: Written and oral technical reports required. Offered by Chemistry. Limited to two attempts.

Registration Restrictions:
Required Prerequisite: CHEM 440 or permission of instructor.

Schedule Type: Research
Grading:
This course is graded on the Undergraduate Regular scale.

CHEM 442: Introduction to Chemical Research or Development. 1-3 credits.
Enrollment limited to students with the major, minor, or concentration in Chemistry.

Schedule Type: Research
Grading:
This course is graded on the Undergraduate Regular scale.

CHEM 443: Honors Research in Chemistry. 3 credits.
Enrollment is limited to students with a class of Senior Plus or Senior.

Schedule Type: Research
Grading:
This course is graded on the Undergraduate Regular scale.

CHEM 444: Bioinorganic Chemistry. 3 credits.
Application of inorganic coordination chemistry and physical methods in study of structure and function of metal ion sites in biomolecules. Properties of transition metal ions, ligand field theory. Topics include iron cytochromes, zinc and copper enzymes, cobalamins, iron sulfur proteins, oxygen transport, iron storage, electron transfer, inorganic model compounds, metals in medicine, and toxicity of inorganic species. Offered by Chemistry. Limited to three attempts.

Registration Restrictions:
Required Prerequisites: (CHEM 463\(^C\) or BIOL 483\(^C\)) and CHEM 331\(^C\) and 336\(^C\).
\(^C\) Requires minimum grade of C.

Schedule Type: Lecture
Grading:
This course is graded on the Undergraduate Regular scale.

CHEM 445: Special Projects in Chemistry. 1-3 credits.
Introduction to chemical research or development. Includes literature search, conferences, and lab. Notes: Written and oral technical reports required. Offered by Chemistry. Limited to two attempts.

Registration Restrictions:
Required Prerequisite: CHEM 441\(^C\).
\(^C\) Requires minimum grade of C.

Schedule Type: Research
Grading:
This course is graded on the Undergraduate Regular scale.

CHEM 446: Honors Research in Chemistry. 3 credits.
Enrollment is limited to students with a class of Senior Plus or Senior.

Schedule Type: Research
Grading:
This course is graded on the Undergraduate Regular scale.

CHEM 447: Honors Research in Chemistry. 3 credits.
Enrollment is limited to students with a class of Senior Plus or Senior.

Schedule Type: Research
Grading:
This course is graded on the Undergraduate Regular scale.

CHEM 448: Honors Research in Chemistry. 3 credits.
Enrollment is limited to students with a class of Senior Plus or Senior.

Schedule Type: Research
Grading:
This course is graded on the Undergraduate Regular scale.

CHEM 449: Honors Research in Chemistry. 3 credits.
Enrollment is limited to students with a class of Senior Plus or Senior.

Schedule Type: Research
Grading:
This course is graded on the Undergraduate Regular scale.

CHEM 450: Special Projects in Chemistry. 1-3 credits.
Introduction to chemical research or development. Includes literature search, conferences, and lab. Notes: Written and oral technical reports required. Offered by Chemistry. Limited to two attempts.

Registration Restrictions:
Required Prerequisite: CHEM 451\(^C\).
\(^C\) Requires minimum grade of C.

Schedule Type: Lecture
Grading:
This course is graded on the Undergraduate Regular scale.

CHEM 451: Special Projects in Chemistry. 1-3 credits.
Introduction to chemical research or development. Includes literature search, conferences, and lab. Notes: Written and oral technical reports required. Offered by Chemistry. Limited to two attempts.

Registration Restrictions:
Required Prerequisite: CHEM 450\(^C\).
\(^C\) Requires minimum grade of C.

Schedule Type: Research
Grading:
This course is graded on the Undergraduate Regular scale.

CHEM 452: Special Projects in Chemistry. 1-3 credits.
Introduction to chemical research or development. Includes literature search, conferences, and lab. Notes: Written and oral technical reports required. Offered by Chemistry. Limited to two attempts.

Registration Restrictions:
Required Prerequisite: CHEM 451\(^C\).
\(^C\) Requires minimum grade of C.

Schedule Type: Laboratory
Grading:
This course is graded on the Undergraduate Regular scale.

CHEM 453: Honors Research in Chemistry. 3 credits.
Introduction to research on current problem in chemical sciences under supervision of faculty advisor. Includes literature search, laboratory or theoretical work, conferences with faculty advisor, attendance at regularly scheduled seminars, and oral and written presentations. Notes: Credit will not be given for both these courses and CHEM 451, 452. Offered by Chemistry. Limited to two attempts.

Registration Restrictions:
**Chemistry**

**CHEM 313** C, 314 C, 315 C, 318 C, 331 C, 336 C and 490 T.

May be taken concurrently.

C Requires minimum grade of C.

Enrollment limited to students with a class of Senior Plus or Senior.

Enrollment is limited to students with a major in Chemistry.

Enrollment limited to students with the Honors Coll Schlrshp Confirmed, Honors College, or Honors in the Major.

**Schedule Type:** Research

**Grading:**

This course is graded on the Undergraduate Regular scale.

**CHEM 456:** Honors Research in Chemistry. 3 credits.

Introduction to research on current problem in chemical sciences under supervision of faculty advisor. Includes literature search, laboratory or theoretical work, conferences with faculty advisor, attendance at regularly scheduled seminars, and oral and written presentations. Notes: Credit will not be given for both these courses and CHEM 451, 452. Offered by Chemistry. Limited to two attempts.

**Registration Restrictions:**

**Required Prerequisites:** CHEM 455 C and 490 T.

May be taken concurrently.

C Requires minimum grade of C.

Enrollment limited to students with a class of Senior Plus or Senior.

Enrollment is limited to students with a major in Chemistry.

Enrollment limited to students with the Honors Coll Schlrshp Confirmed, Honors College, or Honors in the Major.

**Schedule Type:** Research

**Grading:**

This course is graded on the Undergraduate Regular scale.

**CHEM 458:** Chemical Oceanography. 3 credits.

The world’s oceans, including a variety of closed basins and estuaries, comprise a complex and dynamic system of chemical processes that interact with biological, geological, physical, and atmospheric processes to play a significant role in defining the earth’s fragile environment. This course will present an overview of the origin, occurrence, and distribution of the chemical components in sea water and an introduction to the basic principles of the chemical processes taking place in the marine environment. Designated a Green Leaf Course. Offered by Chemistry. Limited to three attempts. Equivalent to GEOL 458.

**Specialized Designation:** Green Leaf Related Course

**Registration Restrictions:**

**Required Prerequisites:** CHEM 211 C and 212 C and (CHEM 321 C or GEOL 309 C).

C Requires minimum grade of C.

**Schedule Type:** Lecture

**Grading:**

This course is graded on the Undergraduate Regular scale.

**CHEM 463:** General Biochemistry I. 4 credits.

Brief introduction to biochemistry, followed by in-depth look at amino acids and proteins, 3-D structure, folding and dynamics, their specialized function, and primary metabolism. Emphasizes enzymes and their chemical mechanisms, and metabolism. Offered by Chemistry. Limited to three attempts. Equivalent to BIOL 483.

**Registration Restrictions:**

**Required Prerequisites:** (CHEM 313 C or L313) and BIOL 213 C.

C Requires minimum grade of C.

**Schedule Type:** Lecture

**Grading:**

This course is graded on the Undergraduate Regular scale.

**CHEM 464:** General Biochemistry II. 3 credits.

Continuation of general biochemistry, focusing on secondary metabolism, cell signaling, and processes of replication, transcription, and translation. Emphasizes important biochemistry research topics; much material drawn from current biochemical literature. Offered by Chemistry. Limited to three attempts.

**Registration Restrictions:**

**Required Prerequisites:** CHEM 463 C or (BIOL 483 C and (CHEM 314 C or L314)).

C Requires minimum grade of C.

**Schedule Type:** Lecture

**Grading:**

This course is graded on the Undergraduate Regular scale.

**CHEM 465:** Biochemistry Lab. 2 credits.

Introduction to modern biochemical experimental methods of studying chemical and physical properties of biological molecules. Includes separation, identification, and characterization of biomolecules. Offered by Chemistry. Limited to three attempts.

**Specialized Designation:** Writing Intensive in Major

**Recommended Prerequisite:** Grade of C or better in CHEM 315 and CHEM 463.

**Recommended Corequisite:** CHEM 463.

**Registration Restrictions:**

**Required Prerequisites:** (CHEM 463 C or BIOL 483 C) and (CHEM 314 C or L315).

May be taken concurrently.

C Requires minimum grade of C.

**Schedule Type:** Laboratory

**Grading:**

This course is graded on the Undergraduate Regular scale.

**CHEM 467:** The Chemistry of Enzyme-Catalyzed Reactions. 3 credits.

Examples of enzyme mechanisms demonstrate how chemical principles are employed by living organisms. Specific enzyme mechanisms used to illustrate principles from organic, inorganic, and physical chemistry. Discusses techniques to monitor enzyme reactions. Offered by Chemistry. Limited to three attempts.

**Registration Restrictions:**

**Required Prerequisites:** CHEM 463 C, 464 C, 314 C and 331 C.
CHEM 480: Bioorganic Chemistry. 3 credits.
Basic understanding of chemical nature of biomolecules and biomacromolecules. Introduces biomolecules such as amino acids, proteins, carbohydrates, and lipids. Lectures focus on biophysical properties and synthesis, using practical examples and visual aids. Offered by Chemistry. Limited to three attempts.

Recommended Prerequisite: CHEM 314.

Schedule Type: Laboratory
Grading: This course is graded on the Undergraduate Regular scale.

CHEM 470: Laboratory Instructional Methods for Chemistry. 3 credits.
Lecture and laboratory experience teaching chemistry in laboratory. Students work closely with faculty members and are responsible for all aspects of teaching undergraduate laboratory techniques. Students also learn techniques for acquisition and storage of chemicals and laboratory apparatus, safety, disposal of chemical waste, and literature of chemical education. Offered by Chemistry. Limited to three attempts.

Recommended Prerequisite: CHEM 314.

Schedule Type: Laboratory
Grading: This course is graded on the Undergraduate Regular scale.

CHEM 529: Synthetic and Mechanistic Organic Chemistry. 3 credits.
General review of synthetic pathways and applications to new topics, emphasizing fused ring aromatics, heterocyclics, natural products, and biologically active compounds. Includes relationship of applied organic chemistry to consumer products, including drugs and agricultural chemicals. Organic core course. Offered by Chemistry. May not be repeated for credit.

Recommended Prerequisite: Grade of C or better in CHEM 314, CHEM 318 and CHEM 331.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Grading:
This course is graded on the Undergraduate Regular scale.

CHEM 539: Instrumental Techniques of Analysis. 2 credits.
Principles and operation of modern instrumentation, emphasizing applications to analysis of chemical, biological, and environmental samples. Methods include combined capillary column gas chromatography and mass spectrometry, high-performance liquid chromatography, optical methods, surface analysis methods, magnetic resonance spectroscopy, atomic emission and absorption spectrometry, and electroanalytical methods. With approval of research committee, students choose methods studied. Offered by Chemistry. May be repeated within the term.

Recommended Prerequisite: CHEM 312 and 422 or 521 or permission of department.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Grading:
This course is graded on the Undergraduate Regular scale.

500 Level Courses
CHEM 500: Selected Topics in Modern Chemistry. 3 credits.
Topics of interest in analytical, biological, environmental, geological, geochemical, inorganic, organic, and physical chemistry. Notes: Credit not allowed toward major in chemistry. Credit not allowed toward minor in chemistry. Offered by Chemistry. May not be repeated for credit.

Specialized Designation: Topic Varies

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Grading:
This course is graded on the Undergraduate Regular scale.

CHEM 513: Synthetic and Mechanistic Organic Chemistry. 3 credits.
General review of synthetic pathways and applications to new topics, emphasizing fused ring aromatics, heterocyclics, natural products, and biologically active compounds. Includes relationship of applied organic chemistry to consumer products, including drugs and agricultural chemicals. Organic core course. Offered by Chemistry. May not be repeated for credit.

Recommended Prerequisite: Grade of C or better in CHEM 314, CHEM 318 and CHEM 331.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Grading:
This course is graded on the Undergraduate Regular scale.

CHEM 592: Instrumental Techniques of Analysis. 2 credits.
Principles and operation of modern instrumentation, emphasizing applications to analysis of chemical, biological, and environmental samples. Methods include combined capillary column gas chromatography and mass spectrometry, high-performance liquid chromatography, optical methods, surface analysis methods, magnetic resonance spectroscopy, atomic emission and absorption spectrometry, and electroanalytical methods. With approval of research committee, students choose methods studied. Offered by Chemistry. May be repeated within the term.

Recommended Prerequisite: CHEM 312 and 422 or 521 or permission of department.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Grading:
This course is graded on the Undergraduate Regular scale.
Schedule Type: Independent Study
Grading:
This course is graded on the Graduate Regular scale.

CHEM 531: Elements of Physical Chemistry. 3 credits.
The course offers an intensive overview of the concepts, techniques, and models of physical chemistry as they apply to many branches of chemistry and allied sciences. The emphasis is for the students to develop practical skill in applying the concepts of thermodynamics, kinetics, and quantum mechanics to chemical systems at both the macroscopic and the atomic/molecular level. This course will use spreadsheet models to investigate chemical and physical systems. Offered by Chemistry. May not be repeated for credit.

Recommended Prerequisite: CHEM 211, 212; CHEM 313, 314; PHYS 243, 245 (college physics), MATH 113, or Permission of Instructor.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.
Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.
Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture
Grading:
This course is graded on the Graduate Regular scale.

CHEM 563: General Biochemistry I. 4 credits.
Brief introduction to biochemistry, followed by an in-depth look at amino acids and proteins, 3-D structure, folding and dynamics, their specialized function and primary metabolism. Emphasizes enzymes and their chemical mechanisms and metabolism. Students will be assigned papers from the primary literature and be required to answer questions from these papers on exams. Offered by Chemistry. May not be repeated for credit.

Recommended Prerequisite: CHEM 313, BIOL 213.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.
Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.
Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture
Grading:
This course is graded on the Graduate Regular scale.

CHEM 564: General Biochemistry II. 3 credits.
Previous course in biology recommended but not required. Important biological compounds, including proteins, carbohydrates, lipids, and nucleic acids, and their interrelations. Offered by Chemistry. May not be repeated for credit.

Recommended Prerequisite: CHEM 563 or equivalent.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.
Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.
Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture
Grading:
This course is graded on the Graduate Regular scale.

CHEM 567: The Chemistry of Enzyme-Catalyzed Reactions. 3 credits.
Examples of enzyme mechanisms demonstrate how chemical principles are employed by living organisms. Specific enzyme mechanisms used to illustrate principles from organic, inorganic, and physical chemistry. Discusses techniques to monitor enzyme reactions. Offered by Chemistry. May not be repeated for credit.

Recommended Prerequisite: CHEM 313 and 463 or permission of instructor.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.
Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.
Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture
Grading:
This course is graded on the Graduate Regular scale.

CHEM 568: Bioorganic Chemistry. 3 credits.
Basic understanding of chemical nature of biomolecules and biomacromolecules. Introduces biomolecules such as amino acids, proteins, carbohydrates, and lipids. Lectures focus on biophysical properties and synthesis, using practical examples and visual aids. Offered by Chemistry. May not be repeated for credit.

Recommended Prerequisite: CHEM 314 and 463, or equivalent, or permission of instructor.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.
Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.
Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture
Grading:
This course is graded on the Graduate Regular scale.

CHEM 579: Special Topics. 1-6 credits.
Current topics in chemistry, depending on instructor's specialty. Notes: May be repeated with different topics, with department approval. Offered by Chemistry. May be repeated within the term.
**Specialized Designation:** Topic Varies

**Recommended Prerequisite:** CHEM 313 and 314, or permission of instructor.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

---

**600 Level Courses**

**CHEM 613: Modern Polymer Chemistry.** 3 credits.
Synthetic and analytical chemistry of synthetic macromolecules. Topics include polymer solutions, molecular weight determination, spectroscopy, thermal analysis, x-ray crystallinity, polymerization types, and commercial and electroactive polymers. Organic core course. Offered by Chemistry. May not be repeated for credit.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

**CHEM 614: Physical Organic Chemistry.** 3 credits.
Principles underlying molecular structure, reactivity, and reaction mechanisms. Topics include valence-bond and molecular-orbital theory, electronic interpretation of organic reactions, stereocchemistry, conformational analysis, kinetics and thermodynamics of organic reactions, and photochemistry. Organic core course. Offered by Chemistry. May not be repeated for credit.

**Recommended Prerequisite:** CHEM 314 or permission of instructor.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

**CHEM 620: Modern Instrumentation.** 3 credits.
Methods of sensing and measurement of radiation, particles, pressure, concentrations of specific elements and compounds. Topics include basic operational amplifier circuits for analog signals, digitizing devices and computerized data collection, noise and noise-reduction methods, and specialized instrumentation systems for various areas of chemistry and physics. Offered by Chemistry. May not be repeated for credit.

**Recommended Prerequisite:** CHEM 332 or CHEM 422 or permission of instructor.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

**CHEM 624: Principles of Chemical Separation.** 3 credits.
Theories and models of separation with applications to analyses of a wide range of chemical, biological, and environmental samples. Topics include high-resolution gas and high-performance liquid chromatography. Emphasizes theory of reverse phase, normal phase, ion exchange, size exclusion, and affinity based separations. Also presents instrumentation such as detectors, pumps, and columns, and data acquisition. Offered by Chemistry. May not be repeated for credit.

**Recommended Prerequisite:** CHEM 332 or CHEM 422 or permission of instructor.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

**CHEM 625: Electroanalytical Chemistry.** 3 credits.
Review of basic electrochemistry. Emphasizes analysis and research for applications of modern electrochemical techniques such as chronoamperometry; cyclic, stripping, and AC voltammetry; pulse polarography; coulometry; electrochemical sensors; and instrumentation. Offered by Chemistry. May not be repeated for credit.

**Recommended Prerequisite:** CHEM 332 or CHEM 422 or permission of instructor.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.
Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

**CHEM 627: Aquatic Environmental Chemistry. 3 credits.**
Thermodynamic and kinetic processes regulating the chemistry of surface and groundwater in natural and polluted environments with particular emphasis in explaining the aqueous concentrations of chemical species and controlling geochemical factors in the hydrosphere. Structure, sources and transformations of organic matter in the aquatic environment and interactions with aqueous solutes will be covered as related to contemporary issues in water quality. Students will be assigned papers from the primary literature and be required to answer questions from these papers on exams. Offered by Chemistry. May not be repeated for credit.

**Recommended Prerequisite:** CHEM 321 or GEOL 302 or equivalent courses or permission of the instructor.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

**CHEM 633: Chemical Thermodynamics and Kinetics. 3 credits.**
Advanced study covering application of kinetics to the elucidation of reaction mechanisms and application of statistical thermodynamics to theory of elementary reaction rates. Physical core course. Offered by Chemistry. May not be repeated for credit. Equivalent to CSI 711.

**Recommended Prerequisite:** CHEM 331 and 332.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

**CHEM 641: Solid State Chemistry. 3 credits.**
Focuses on the design and synthesis, structure and bonding of solid state compounds; physical properties and characterization of solids. Topics of current interest will also be included. Offered by Chemistry. May not be repeated for credit.

**Recommended Prerequisite:** CHEM 441 or permission of instructor.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

**CHEM 646: Bioinorganic Chemistry. 3 credits.**
Applies inorganic coordination chemistry and physical methods to understand structure and function of metal ion sites in biomolecules. Biochemical roles of metal centers in oxygen transport, metalloenzymes, and electron transfer. Topics include iron cytochromes, zinc and copper enzymes, cobalamins, iron sulfur proteins, inorganic model compounds, and metals in medicine. Inorganic core course. Offered by Chemistry. May not be repeated for credit.

**Recommended Prerequisite:** CHEM 441, or permission of instructor.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

**CHEM 651: Environmental Chemistry of Organic Substances. 3 credits.**
Study of principles governing multimedia distribution and fate of organic chemicals in environment. Overview of origin and occurrence of major classes of natural and anthropogenic organic chemicals in environment. Environmental core course. Offered by Chemistry. May not be repeated for credit.

**Recommended Prerequisite:** One semester of Physical Chemistry, or permission of instructor.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.
**CHEM 660: Protein Biochemistry. 3 credits.**

Proteins play critical roles in most biological processes. Therefore, to understand these processes, it is necessary to understand proteins. This course will introduce students to proteins, their biosynthesis/biodegradation and their biophysical and biochemical properties. Biochemistry core course. Offered by Chemistry. May not be repeated for credit.

**Recommended Prerequisite:** CHEM 463 or equivalent or permission of instructor.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

**CHEM 665: Protein-Protein Interactions: Methods and Applications. 3 credits.**

Introduction to the fundamental principles of protein-protein interactions, including experimental design considerations and methods for quantification of these interactions. Offered by Chemistry. May not be repeated for credit.

**Recommended Prerequisite:** CHEM 463 (or equivalent), or permission of instructor.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

**CHEM 662: Modern Methods of Drug Discovery. 3 credits.**

Introduction to the process of drug discovery. Covers modern methods and strategies of target identification, lead identification, and lead optimization. Biochemistry core course. Offered by Chemistry. May not be repeated for credit.

**Recommended Prerequisite:** CHEM 463 (or equivalent) or permission of instructor.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

**CHEM 665: Protein-Protein Interactions: Methods and Applications. 3 credits.**

Introduction to the fundamental principles of protein-protein interactions, including experimental design considerations and methods for quantification of these interactions. Offered by Chemistry. May not be repeated for credit.

**Recommended Prerequisite:** CHEM 463 (or equivalent), or permission of instructor.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

**CHEM 670: Teaching Practicum. 2 credits.**

Prelaboratory lecture and laboratory teaching in chemistry. Students work closely with faculty and are responsible for all aspects of teaching undergraduate laboratory techniques. Offered by Chemistry. May not be repeated for credit.

**Recommended Prerequisite:** Enrollment in the graduate program and permission of Chair.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Internship

**Grading:**
This course is graded on the Graduate Special scale.

**700 Level Courses**

**CHEM 728: Introduction to Solid Surfaces. 3 credits.**

Introduces properties of solid surfaces. Topics include gas absorption isotherms, surface area measurement techniques, real and clean surfaces, physisorption and chemisorption, methods of gas adsorption and desorption, measurement of heats of adsorption, desorption kinetics, electron spectroscopies and surface sensitivities, instrumentation; and principles of vacuum technology. Offered by Chemistry. May not be repeated for credit. Equivalent to CSI 712.

**Recommended Prerequisite:** CHEM 422 or equivalent.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.
Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

**CHEM 735:** Astrophysical Chemistry of Planetary Bodies. 3 credits.
In depth review of the chemistry of planets, comets and other bodies in the Solar System. Emphasis will be placed on the laboratory techniques and measurements made in order to understand and predict astronomical observations. Offered by Chemistry. May not be repeated for credit.

**Recommended Prerequisite:** CHEM 331, or ASTR 403, or permission of instructor.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

**CHEM 736:** Computational Quantum Mechanics. 3 credits.
Study of fundamental concepts of quantum mechanics from computational point of view, review of systems with spherically symmetric potentials, electron-atom solutions to Schrodinger's equation, electron spin in many electron systems, atomic structure calculations, algebra of many electron calculations, Hartree-Fock, self-consistent field method, molecular structure calculations, scattering theory computations, and solid-state computations. Offered by Chemistry. May not be repeated for credit. Equivalent to CSI 783, PHYS 736.

**Recommended Prerequisite:** PHYS 502, 510, or permission of instructor.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

**CHEM 767:** Industrial Biochemistry. 3 credits.
An introduction to industrial biochemistry. Includes a mechanistic examination of the biosynthesis of several industrially important secondary metabolites, the industrial scale process of obtaining commercially valuable biochemical products, and the regulations that oversee the industrial biochemical process. Offered by Chemistry. May not be repeated for credit.

**Recommended Prerequisite:** CHEM 463 or permission of instructor.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Satisfactory/No Credit scale.

**CHEM 790:** Graduate Seminar. 1 credit.
Selected topics from recent chemical theory and applications, generally consisting of research presentations by invited faculty from other institutions. Attendance is required at 80% of the seminars and students must write up a 1 page summary of each talk attended. Course also used to teach students effective presentation methods. Notes: Requires, in last semester, seminar presentation on student’s research or another topic acceptable to department. Three credits of CHEM 790 required for MS degree; an additional 3 credits required after admission to PhD program. Offered by Chemistry. May be repeated within the degree for a maximum 3 credits.

**Recommended Prerequisite:** Admission to a graduate program in Chemistry and Biochemistry, or permission of instructor.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Seminar

**Grading:**
This course is graded on the Graduate Regular scale.

**CHEM 796:** Directed Reading and Research. 1-6 credits.
Reading and research on a specific topic in chemistry or biochemistry under direction of a faculty member. Offered by Chemistry. May be repeated within the degree for a maximum 12 credits.

**Recommended Prerequisite:** Admission to a graduate program in Chemistry and Biochemistry or affiliated programs.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Research

**Grading:**
This course is graded on the Graduate Regular scale.

**CHEM 798:** Research Project. 3-6 credits.
Experimental or theoretical research project chosen and completed under guidance of graduate faculty member. Notes: Requires comprehensive report acceptable to advisory committee, and final oral exam on report. Offered by Chemistry. May be repeated within the degree for a maximum 6 credits.

**Recommended Corequisite:** Permission of department; 6 credits of CHEM 798 or 799 (credit will not be given for both).

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Thesis

**Grading:**
This course is graded on the Satisfactory/No Credit scale.
CHEM 799: Master's Thesis. 1-6 credits.
Laboratory thesis research and writing under direction of supervisor.
Notes: Minimum of 3 credits for first two enrollment periods. Offered by Chemistry. May be repeated within the degree.

Recommended Corequisite: Permission of the department.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Thesis

Grading:
This course is graded on the Satisfactory/No Credit scale.

800 Level Courses
CHEM 814: Advanced Bioorganic Chemistry. 3 credits.
Introduces the chemical nature of biomolecules, with a focus on their organic properties. Focuses on the chemical principals that underlie the diverse structures, properties and reactions of biomolecules. Core course in the Chemistry and Biochemistry doctoral program. Offered by Chemistry. May not be repeated for credit.

Recommended Prerequisite: CHEM 313, 314, and 463 or equivalent; or permission of instructor.

Registration Restrictions:
Enrollment is limited to Graduate level students.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale.

CHEM 817: Organic Structural Spectroscopy. 3 credits.
Spectroscopic determination of organic molecular structure using 1H, 13H, 19F, and 31P nuclear magnetic resonance, infrared, ultraviolet, visible, and Raman spectroscopy, and mass spectrometry. Offered by Chemistry. May not be repeated for credit.

Recommended Prerequisite: CHEM 314 or equivalent.

Registration Restrictions:
Enrollment is limited to Graduate level students.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale.

CHEM 821: Theory of Analytical Processes. 3 credits.
Theory and application of contemporary analytical processes and methods used in chemistry research. Emphasis on analytical signals and accompanying noise, sample preparation techniques, and quality assurance in measurements. Core course in the Chemistry and Biochemistry doctoral program. Offered by Chemistry. May not be repeated for credit.

Recommended Prerequisite: Admission to Chemistry and Biochemistry doctoral program.

Registration Restrictions:
Enrollment is limited to Graduate level students.

Schedule Type: Research

Grading:
This course is graded on the Graduate Regular scale.

900 Level Courses
CHEM 833: Physical Chemistry and Biochemistry. 3 credits.
The theory and practical use of thermodynamics, kinetics, spectroscopy and quantum chemistry in chemical and biochemical research. Core course in the Chemistry and Biochemistry doctoral program. Offered by Chemistry. May not be repeated for credit.

Recommended Prerequisite: CHEM 331 or permission of instructor.

Registration Restrictions:
Enrollment is limited to Graduate level students.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale.

CHEM 891: Doctoral Scientific Critique, Writing and Presentation. 3 credits.
Development of skills associated with scientific communication and research such as oral presentation of scientific material, analysis of scientific research and preparation of scientific proposals. In preparing scientific proposals, students will learn how to identify scientific questions of interest and how to plan a course of experiments to address these questions. Core course in the Chemistry and Biochemistry doctoral program. Offered by Chemistry. May not be repeated for credit.

Recommended Prerequisite: Permission of academic advisor, research advisor and/or research committee

Registration Restrictions:
Enrollment is limited to Graduate level students.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale.

CHEM 896: Doctoral Directed Reading and Research. 1-6 credits.
Reading and research on a specific topic in Chemistry or Biochemistry under direction of a faculty member. Offered by Chemistry. May be repeated within the degree for a maximum 15 credits.

Recommended Prerequisite: Admission to the PhD in Chemistry and Biochemistry or affiliated programs.

Registration Restrictions:
Enrollment is limited to Graduate level students.

Schedule Type: Research

Grading:
This course is graded on the Graduate Regular scale.

CHEM 998: Doctoral Dissertation Proposal. 1-12 credits.
Development of a research proposal under the guidance of the research advisor and graduate committee. The resulting proposal, once approved by the student's research advisor and committee, forms the basis of the student's doctoral dissertation. May be repeated for credit, but no more than 24 combined credits from CHEM 998 and CHEM 999 may be applied toward satisfying doctoral degree requirements, with no more than 12
credits of CHEM 998. Offered by Chemistry. May be repeated within the degree.

**Recommended Prerequisite:** Permission of research advisor and/or graduate committee.

**Registration Restrictions:**
Enrollment is limited to Graduate level students.

**Schedule Type:** Dissertation

**Grading:**
This course is graded on the Satisfactory/No Credit scale.

**CHEM 999:** Doctoral Dissertation Research. 1-12 credits.
Research in the concentration pertinent to student's program of study under the direction of their research advisor and committee. Students may enroll for credits in this course once their research proposal has been approved. May be repeated for credit, but no more than 24 combined credits from CHEM 998 and CHEM 999 may be applied toward satisfying doctoral degree requirements, with no more than 12 credits of CHEM 998. Offered by Chemistry. May be repeated within the degree.

**Recommended Prerequisite:** Admission to candidacy in Chemistry and Biochemistry Doctoral Program.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy.

Enrollment is limited to Graduate level students.

**Schedule Type:** Dissertation

**Grading:**
This course is graded on the Satisfactory/No Credit scale.

---

**Chinese (CHIN)**

**100 Level Courses**

**CHIN 101:** Elementary Chinese. 3 credits.
Introduction to Mandarin, including basic grammar, oral expression, listening comprehension, reading, and writing. Notes: Students may not receive credit for CHIN 101 and CHIN 109 or 110. Offered by Modern & Classical Languages. Limited to three attempts. Equivalent to CHIN 109, CHIN 110.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale.

**Additional Course Details:** Taught in Chinese

**CHIN 102:** Elementary Chinese. 3 credits.
Continuation of CHIN 101. Notes: Students may not receive credit for CHIN 102 and CHIN 109 or 110. Offered by Modern & Classical Languages. Limited to three attempts. Equivalent to CHIN 109, CHIN 110.

**Recommended Prerequisite:** CHIN 101.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale.

**CHIN 110:** Elementary Chinese. 6 credits.
Introduces elements of grammar, vocabulary, oral skills, listening comprehension, and reading. Notes: Lab work required. Students may not receive credit for CHIN 110 and CHIN 101, 102, or 109. Offered by Modern & Classical Languages. Limited to three attempts. Equivalent to CHIN 101, CHIN 102, CHIN 109.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale.

**Additional Course Details:** Taught in Chinese

**200 Level Courses**

**CHIN 201:** Intermediate Chinese I. 3 credits.
Further development of skills acquired in CHIN 101 and 102, including grammar, oral expression, listening comprehension, reading, and writing. Notes: CHIN 201 and 202 must be taken in sequence. Offered by Modern & Classical Languages. Limited to three attempts.

**Recommended Prerequisite:** CHIN 101 and 102, or CHIN 110.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale.

**Additional Course Details:** Taught in Chinese

**CHIN 202:** Intermediate Chinese II. 3 credits.
Continuation of CHIN 201. CHIN 201 and 202 must be taken in sequence. Notes: Students may not receive credit for CHIN 202 and CHIN 209. Offered by Modern & Classical Languages. Limited to three attempts.

**Recommended Prerequisite:** CHIN 201.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale.

**Additional Course Details:** Fulfills Frgn Lng requirment, Taught in Chinese

**CHIN 209:** Intensive Intermediate Chinese. 6 credits.
Recommended for students who desire training in Chinese to an intermediate level of competence in a relatively short period of time. Notes: Equivalent to CHIN 201 and 202 taught in single semester. Students may not receive credit for CHIN 209 and the CHIN 201/202 sequence. Offered by Modern & Classical Languages. Limited to three attempts.

**Recommended Prerequisite:** CHIN 102, 109, appropriate placement score, or permission of instructor.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale.

**Additional Course Details:** Taught in Chinese

**300 Level Courses**

**CHIN 300:** Reading Skills Development. 3 credits.
Develops reading proficiency, emphasizing vocabulary and grammar of standard written Chinese. Introduces discourse structure, sociolinguis...
and cultural knowledge, and strategies for reading Chinese at an advanced level. Offered by Modern & Classical Languages. Limited to three attempts.

**Recommended Prerequisite:** CHIN 202, appropriate placement score, or permission of instructor.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale.

**Additional Course Details:** Taught in Chinese

CHIN 301: Advanced Grammar and Syntax. 3 credits.
In-depth review of Chinese grammar and syntax. Provides extensive practice in controlled and free writing, emphasizing fundamental difficulties and points of interference between English and Chinese. Offered by Modern & Classical Languages. Limited to three attempts.

**Recommended Prerequisite:** CHIN 202, appropriate placement score, or permission of instructor.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale.

**Additional Course Details:** Taught in Chinese

CHIN 305: Chinese for the Business World. 3 credits.
Introduces terminology and structure of business Chinese. Emphasizes acquiring vocabulary and developing facility in Chinese business articles and correspondence. Offered by Modern & Classical Languages. Limited to three attempts.

**Recommended Prerequisite:** CHIN 202, appropriate placement score, or permission of instructor.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale.

**Additional Course Details:** Taught in Chinese

CHIN 310: Survey of Chinese Literature. 3 credits.
Introduces outlines of Chinese literature to the 19th century, presented through literary sources arranged in roughly chronological order. Readings include poetry, fiction, personal essays; documents of philosophy, history, and religion; and transcribed oral records. Notes: Knowledge of Chinese helpful but not required. May be repeated when topic is different with approval of department. Offered by Modern & Classical Languages. Limited to three attempts.

**Mason Core:** Literature

**Specialized Designation:** Non-Western Culture

**Recommended Prerequisite:** ENGL 101/ENGH 101 or permission of instructor.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale.

**Additional Course Details:** Taught in Chinese

CHIN 311: Modern Chinese Literature in Translation. 3 credits.
Introduction of outlines of modern Chinese literature from early 20th century to post-Mao era, presented through literary sources arranged in roughly chronological order. Readings include poetry, fiction, personal essays. Notes: Knowledge of Chinese helpful but not required. May be repeated when topic is different with approval of department. Offered by Modern & Classical Languages. Limited to three attempts.

**Mason Core:** Literature

**Specialized Designation:** Non-Western Culture

**Recommended Prerequisite:** CHIN 202, appropriate placement score, or permission of instructor.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale.

**Additional Course Details:** Taught in Chinese

CHIN 318: Introduction to Classical Chinese. 3 credits.
Introduces basic structures and vocabulary of Classical Chinese, which still has a significant influence on the formal written prose of modern newspapers and documents. Offered by Modern & Classical Languages. Limited to three attempts.

**Mason Core:** Capstone

**Specialized Designation:** Non-Western Culture

**Recommended Prerequisite:** CHIN 202, appropriate placement score, or permission of instructor.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale.

**Additional Course Details:** Taught in Chinese

CHIN 320: Contemporary Chinese Film. 3 credits.
Explores China from 1949 to present through cinematic and literary representations. Discussions focus on representations of cultural, social, and political changes in the movies. Also introduces critical readings that address issues of gender and youth, family, ethnicity, modernity and the nation, as well as visuality and memory. Notes: Knowledge of Chinese language helpful but not required. Offered by Modern & Classical Languages. Limited to three attempts.

**Mason Core:** Literature

**Specialized Designation:** Non-Western Culture

**Recommended Prerequisite:** CHIN 202, appropriate placement score, or permission of instructor.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale.

**Additional Course Details:** Taught in Chinese

CHIN 325: Major Chinese Writers. 3 credits.
Studies works of major Chinese writers. Writers studied may vary. Notes: Knowledge of Chinese helpful but not required. May be repeated when topic is different with approval of department. Offered by Modern & Classical Languages. Limited to three attempts.

**Mason Core:** Literature

**Specialized Designation:** Non-Western Culture
Recommended Prerequisite: ENGL 101/ENGH 101, or permission of instructor.

Schedule Type: Lecture

Grading: This course is graded on the Undergraduate Regular scale.

CHIN 328: Asian American Women Writers. 3 credits.
Introduction to selected works by female writers of Chinese, Filipino, Indian, Japanese, and Korean descent. Analyzes themes, form, style, language, and structure of a variety of works, mainly novels and short stories. Assesses role and significance of writings as part of ethnic American and women's literature by exploring questions of identity formation and disintegration, and how they are rooted in gender, social status, ethnicity, community, geography, and generational conflict.
Notes: Knowledge of Asian languages not required. Offered by Modern & Classical Languages. Limited to three attempts.

Mason Core: Literature

Schedule Type: Lecture

Grading: This course is graded on the Undergraduate Regular scale.

CHIN 355: Readings in Chinese Poetry and Poetics. 3 credits.
Close readings and discussions of primary texts covering major periods in Chinese poetry to 1949. Analyzes variety of themes, forms, and styles.
Notes: May be repeated when readings are different with permission of department. Offered by Modern & Classical Languages. May be repeated within the degree for a maximum 6 credits.

Mason Core: Capstone

Recommended Prerequisite: CHIN 300 or permission of instructor.

Schedule Type: Lecture

Grading: This course is graded on the Undergraduate Regular scale.

Additional Course Details: Taught in Chinese

CHIN 365: Readings in Chinese Fiction after Mao. 3 credits.
Close readings and discussions of primary texts after the Cultural Revolution. Analyzes themes, subjects, language, and styles.
Notes: May be repeated when readings are different with permission of department. Offered by Modern & Classical Languages. May be repeated within the degree for a maximum 6 credits.

Recommended Prerequisite: CHIN 300 or permission of instructor.

Schedule Type: Lecture

Grading: This course is graded on the Undergraduate Regular scale.

Additional Course Details: Taught in Chinese

CHIN 470: Special Topics in Chinese Studies. 3 credits.
Covers topics on Chinese language, literature, or culture organized by theme, genre approach, or era. Notes: May be repeated when topic is different with permission of department. Offered by Modern & Classical Languages. May be repeated within the degree for a maximum 6 credits.

Specialized Designation: Topic Varies, Non-Western Culture

Schedule Type: Lecture

Grading: This course is graded on the Undergraduate Regular scale.

CHIN 475: Chinese Popular Culture. 3 credits.
Combines language learning with an introduction to the complex and vibrant popular culture of contemporary China: music, food, games, gender and family issues, commercial culture, and digital media. Authentic texts will include popular music and poems, films, TV shows, and social media posts. Offered by Modern & Classical Languages. Limited to three attempts.

Mason Core: Capstone

Recommended Prerequisite: Three years of college Chinese or equivalent.

Schedule Type: Lecture

Grading: This course is graded on the Undergraduate Regular scale.

Additional Course Details: Taught in Chinese

CHIN 480: Fourth-Year Chinese I. 3 credits.
Advanced work in major grammatical and lexical topics of Chinese. Applies theoretical principles to guided written and oral exercises. Offered by Modern & Classical Languages. Limited to three attempts.

Specialized Designation: Writing Intensive in Major

Recommended Prerequisite: CHIN 300 and 301; appropriate placement score, or permission of instructor.

Schedule Type: Lecture

Grading: This course is graded on the Undergraduate Regular scale.

Additional Course Details: Taught in Chinese

CHIN 481: Fourth-Year Chinese II. 3 credits.
Advanced work in major grammatical and lexical topics of Chinese. Applies theoretical principles to guided written and oral exercises. Offered by Modern & Classical Languages. Limited to three attempts.

Schedule Type: Lecture

Grading: This course is graded on the Undergraduate Regular scale.

Additional Course Details: Taught in Chinese

CHIN 485: China on Stage: Introduction to Chinese Theatrical Dramas in the 20th Century. 3 credits.
Literature-based Chinese language course open to students who want to learn about Chinese drama and further develop their Chinese language proficiency at advanced levels. Students read, discuss and perform seven classic twentieth-century Chinese plays in order to understand modern and contemporary Chinese society and the lives of ordinary Chinese people. Offered by Modern & Classical Languages. Limited to three attempts.

Additional Course Details: Taught in Chinese
Recommended Prerequisite: Two CHIN 300-level courses and one CHIN 400-level course

Recommended Corequisite: CHIN 400-level courses

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale.

Additional Course Details: Taught in Chinese

Work with schools, social service programs, government agencies, interest groups, museums, or corporations locally and in Chinese-speaking regions. With a faculty supervisor, students develop an internship contract, which requires the approval of the director. For each credit, student works on site at least 45 hours. Notes: Contact the department one semester prior to enrollment. Offered by Modern & Classical Languages. May be repeated within the term for a maximum 9 credits.

Recommended Prerequisite: CHIN 202 or equivalent.

Schedule Type: Internship

Grading:
This course is graded on the Undergraduate Regular scale.

Additional Course Details: Taught in Chinese

Civil and Infrastructure Engineering (CEIE)

100 Level Courses

CEIE 100: Environmental Engineering around the World. 3 credits.
Society’s relationship with the environment is: (1) fundamental to its success; (2) complex, involving economics, finance, law, culture, religion, politics, education, science, technology, and engineering; (3) widespread, often with impacts not just locally but regionally, nationally or globally; and (4) constantly changing with potentially enormous short-term and long-term benefits and costs that may be in conflict. This relationship can drive a society to thrive or decline. Humans today have unprecedented ability to affect the environment both locally and globally, and to be affected by it. Technology and engineering are key drivers in society’s efforts to manage our environment. This course will examine the history of various societies’ interactions—including our own—with the environment; explore our ability to affect the environment—in small and enormous ways—through modern science, technology and engineering; and foster debate on today’s critical environmental issues. Offered by Civil, Environ & Infrastr Engr. Limited to two attempts.

Mason Core: Global Understanding, Encore: Sustainability

Specialized Designation: Green Leaf Related Course

Registration Restrictions:
Students with the terminated from VSE major attribute may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale.

CEIE 101: Introduction to Civil Engineering. 2 credits.
This course introduces the profession of civil engineering, with specific emphasis on modern challenges and solutions that are internal and external to the domain of civil engineering. Topics include broad coverage on technology-driven solutions to traditional engineering problems such as geodesy and georeferencing; global positioning systems; remote sensing; infrastructure security; civil engineering; big data; structural health monitoring; and cyber-physical systems. Using the principles taught in the course, for the term project students will develop solutions to meet the United Nations Sustainable Development Goals to Transform the World. Offered by Civil, Environ & Infrastr Engr. Limited to two attempts.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale.

200 Level Courses

CEIE 203: Geomatics and Engineering Graphics. 3 credits.
Introduces topographic surveying and engineering drawing for civil engineering applications. Topics include surveying, GPS, GIS, digital terrain modeling, design of horizontal and vertical curve geometry for road applications, engineering drawing concepts, and drawing with CAD-based software. Fieldwork required on selected topics. Offered by Civil, Environ & Infrastr Engr. Limited to two attempts.

Registration Restrictions:
Required Prerequisites: (CEIE 117C or CDS 130C).
\( C \)
Requires minimum grade of \( C \).

Students with the terminated from VSE major attribute may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale.

CEIE 210: Statics. 3 credits.
Covers force vectors and operations in 2D and 3D; equilibrium of a particle; moment of a force vector; equilibrium of a rigid body; truss analysis; center of gravity, centroid and moment of inertia; shear force and bending moment diagrams; dry friction; virtual work. Offered by Civil, Environ & Infrastr Engr. Limited to two attempts.

Registration Restrictions:
Required Prerequisites: (PHYS 160C) and (MATH 114C or 116C).
\( C \)
Requires minimum grade of \( C \).

Students with the terminated from VSE major attribute may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale.

CEIE 240: Hydraulics. 3 credits.
Principles of fluids in equilibrium and motion. Topics include hydrostatic pressure; continuity, Bernoulli, and momentum equations; viscosity flow problems; pressure pipe flow and turbomachinery; measuring instruments; and applications to closed conduits and open channels. Offered by Civil, Environ & Infrastr Engr. Limited to two attempts.

Registration Restrictions:
Required Prerequisite: (PHYS 160C).
Students with the terminated from VSE major attribute may not enroll.

Schedule Type: Laboratory, Lecture

Grading:
This course is graded on the Undergraduate Regular scale.

**300 Level Courses**

**CEIE 301:** Engineering and Economic Models in Civil Engineering. 3 credits. Applies planning, analysis, control, and engineering economic models to life cycle of physical infrastructure. Introduces infrastructure design process and application of quantitative and probabilistic models. Presents applications of model building for engineering economics; decision making; forecasting; resource scheduling and allocation; estimating; work measurement and materials; and quality and process control in water, transportation, environmental, energy, and telecommunications infrastructure systems and the built environment. Offered by Civil, Environ & Infrastr Engr. Limited to two attempts.

Specialized Designation: Writing Intensive in Major

Registration Restrictions:
Required Prerequisites: (STAT 344<sup>C</sup> or L344) and (ENGL 302<sup>C</sup>, ENGH 302<sup>C</sup>, ENGL L302, ENGH L302, HNRS 353<sup>C</sup> or 360<sup>C</sup>).

C Requires minimum grade of C.

Students with the terminated from VSE major attribute may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale.

Registration Restrictions:
Required Prerequisites: (ENGR 210<sup>C</sup> or CEIE 210<sup>C</sup>).

C Requires minimum grade of C.

Students with the terminated from VSE major attribute may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale.

**CEIE 311:** Structural Analysis. 3 credits. Basic concepts and assumptions of structural analysis, including statical and geometric redundancy. Analysis, by integration of deformation of simple structural members. Virtual work method for the analysis of deformations of simple structural systems such as articulate beams, trusses, frames, and arches. Method of forces to analyze statically indeterminate systems, method of displacements to analyze geometrically indeterminate systems, and symmetry and antisymmetry in structural analysis. Uses computer programs for structural analysis. Offered by Civil, Environ & Infrastr Engr. Limited to two attempts.

Registration Restrictions:

Required Prerequisites: (ENGR 310<sup>C</sup>, L310, CEIE 310<sup>C</sup> or L310).

C Requires minimum grade of C.

Enrollment is limited to students with a major in Civil and Infrastructure Engr.

Students with the terminated from VSE major attribute may not enroll.

Schedule Type: Lecture, Recitation

Grading:
This course is graded on the Undergraduate Regular scale.

**CEIE 331:** Soil Mechanics. 3 credits. Covers soil classification, soil properties and engineering characteristics of soils. Includes seepage effects, effective stresses, soil strength and deformation characteristics. Also, the determination of immediate and consolidation settlement, lateral earth pressures and bearing capacities. Introduces foundation design fundamentals. Offered by Civil, Environ & Infrastr Engr. Limited to two attempts.

Registration Restrictions:
Required Prerequisites: (ENGR 210<sup>C</sup> or CEIE 210<sup>C</sup>) and (CEIE 230<sup>C</sup> or 240<sup>C</sup>).

C Requires minimum grade of C.

Enrollment is limited to students with a major in Civil and Infrastructure Engr.

Students with the terminated from VSE major attribute may not enroll.

Schedule Type: Laboratory, Lecture

Grading:
This course is graded on the Undergraduate Regular scale.

**CEIE 340:** Water Resource Engineering. 3 credits. Introduces principles and practice of water resources engineering. Topics include hydrology, governing principles, design and evaluation methods, common models, and typical applications in water resource engineering. Laboratory and field work required on selected topics. Offered by Civil, Environ & Infrastr Engr. Limited to two attempts.

Registration Restrictions:
Required Prerequisites: (CEIE 230<sup>C</sup>, U230, 240<sup>C</sup> or U240).

C Requires minimum grade of C.

Enrollment is limited to students with a major in Civil and Infrastructure Engr.

Students with the terminated from VSE major attribute may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale.

**CEIE 355:** Environmental Engineering and Science. 3 credits. Introduces students to the concepts of water pollution, air pollution, noise, and solid waste generation and management. Relationships between human population growth and pollution are introduced. Contemporary environmental engineering topics such as sustainability and global climate change are presented. Offered by Civil, Environ & Infrastr Engr. Limited to two attempts.

Specialized Designation: Green Leaf Related Course
Registration Restrictions:
Required Prerequisites: (CHEM 211\(^C\), U211, 251\(^C\), U251 or 271\(^C\)) and (CEIE 230\(^C\), U230, 240\(^C\) or U240).
\(^C\) Requires minimum grade of C.

Students with the terminated from VSE major attribute may not enroll.

Schedule Type: Lecture
Grading:
This course is graded on the Undergraduate Regular scale.

CEIE 360: Introduction to Transportation Engineering. 3 credits.
Introduces transportation systems and the factors that influence their planning, design, and operation. Topics include fundamentals of urban travel, travel demand forecasting, and traffic flow; principles of highway design; highway capacity and level of services; introduction to traffic control; traffic signal control systems; intersection design; speed zoning and control; and introduction to Intelligent Transportation Systems and travel demand management. Requires laboratory, field work on selected topics. Offered by Civil, Environ & Infrastr Engr. Limited to two attempts.

Registration Restrictions:
Required Prerequisites: (CEIE 290\(^C\), U290, 203\(^C\) or U203) and (ENGR 210\(^C\), U210, CEIE 210\(^C\) or U210).
\(^C\) Requires minimum grade of C.

Enrollment is limited to students with a major in Civil and Infrastructure Engr.

Students with the terminated from VSE major attribute may not enroll.

Schedule Type: Independent Study
Grading:
This course is graded on the Undergraduate Regular scale.

400 Level Courses

CEIE 400: Civil Engineering Planning and Management. 3 credits.
Quantitative and qualitative analysis in planning, design, construction, and management of engineering systems and facilities. Introduces policies, programs, and regulations that influence land development, history-enabling legislation, governing and regulating bodies, control of site plan development, and approval process. Examines structure, function, and purpose of urban design systems and how they can be achieved. Discusses physical relationships among development, land use, transportation, energy, communications, and water systems. Studies public- and private-sector urban development industry. Other topics include innovation, competition, new technology, and environmental issues. Requires design projects. Offered by Civil, Environ & Infrastr Engr. Limited to two attempts.

Registration Restrictions:
Required Prerequisites: (CEIE 340\(^C\) or L340) and (CEIE 360\(^C\) or L360).
\(^C\) Requires minimum grade of C.

Students with the terminated from VSE major attribute may not enroll.

Schedule Type: Lecture
Grading:
This course is graded on the Undergraduate Regular scale.

CEIE 401: Sustainable Land Development. 3 credits.
Introduces students to sustainable land development topics including low impact development, site resource conservation, ultra-low water design, deconstruction and materials reuse, healthy building design, green house gas reduction, zero and low energy design, and other topics related to sustainable practices in facilities and infrastructure design and construction. Offered by Civil, Environ & Infrastr Engr. Limited to two attempts.

Specialized Designation: Green Leaf Focused Course

Registration Restrictions:
Required Prerequisites: (CEIE 355\(^C\)) and (CEIE 340\(^C\)).
\(^C\) Requires minimum grade of C.

Students with the terminated from VSE major attribute may not enroll.

Schedule Type: Lecture
Grading:
This course is graded on the Undergraduate Regular scale.
CEIE 402: Highway Design and Construction. 3 credits.
Provides a survey of the tools, techniques, and methods used by the various civil engineering disciplines to design and construct highways. Combines lectures, individual readings, and hands-on exposure to the tools and processes used in design and construction of highways. All facets of a project are covered including planning, project management, survey and mapping, preliminary design, geotechnical, pavements, environmental, hydraulics, bridge design, PS&E design, materials, and construction. Notes: Course meets off-campus at the Federal Highway Administration Eastern Federal Lands Highway Division in Sterling, VA. Offered by Civil, Environ & Infrastr Engr. Limited to two attempts.

Registration Restrictions:
Required Prerequisite: CEIE 310.
C Requires minimum grade of C.

Enrollment limited to students with a class of Senior Plus or Senior.

Enrollment is limited to students with a major in Civil and Infrastructure Engr.

Students with the terminated from VSE major attribute may not enroll.

Schedule Type: Laboratory, Lecture
Grading:
This course is graded on the Undergraduate Regular scale.

CEIE 403: Experimental Methods in Civil Engineering. 3 credits.
Surveys common testing and laboratory experimental methods that civil engineers encounter in their professional practice and in research settings. Students fabricate specimens of civil engineering materials and conduct experiments in the following laboratories at the Federal Highway Administration's Turner-Fairbank Highway Research Center: Concrete and Steel Materials, Structures, Hydraulics, Geotechnical, and Asphalt.
Notes: Course meets off-campus at the Federal Highway Administration's Turner-Fairbank Highway Research Center in McLean, VA. Offered by Civil, Environ & Infrastr Engr. Limited to two attempts.

Registration Restrictions:
Required Prerequisite: CEIE 310.
C Requires minimum grade of C.

Enrollment limited to students with a class of Senior Plus or Senior.

Students cannot enroll who have a major in Civil and Infrastructure Engr.

Students with the terminated from VSE major attribute may not enroll.

Schedule Type: Laboratory, Lecture
Grading:
This course is graded on the Undergraduate Regular scale.

CEIE 409: Professional Practice and Management in Engineering. 1 credit.
This course instills professional ethics and management principles, and prepares students for leadership roles in practice. Topics include code of ethics related to the public, clients, contractors, suppliers, employers, agreements, contracts, competitive bidding, the engineering profession, conflict of interest, legal responsibilities and case law; case studies in professional ethics; professional licensure; engineering vs. engineering management; personal development: managing cultural norms, time management, career and grad school, continuing education; public policy considerations in engineering practice; practical considerations in project management; effective communications with employers, employees, contractors, and clients; marketing, competitive bidding and project selection; conflict resolution; and managing small business. Students are prepared to appear for the Fundamentals of Engineering exam, and their preparation is assessed. Offered by Civil, Environ & Infrastr Engr. Limited to two attempts.

Registration Restrictions:
Enrollment limited to students with a class of Junior, Senior Plus or Senior.

Students with the terminated from VSE major attribute may not enroll.

Schedule Type: Lecture, Recitation
Grading:
This course is graded on the Undergraduate Regular scale.

CEIE 412: Structural Steel Design. 3 credits.
Covers analysis and design of structural steel members including tension members, compression members, bolted and welded connections, columns, beams, and beam-columns. Offered by Civil, Environ & Infrastr Engr. Limited to two attempts.

Registration Restrictions:
Required Prerequisites: (CEIE 311 or L311).
C Requires minimum grade of C.

Students with the terminated from VSE major attribute may not enroll.

Schedule Type: Lecture
Grading:
This course is graded on the Undergraduate Regular scale.

CEIE 413: Reinforced Concrete Design. 3 credits.
Covers analysis and design of reinforced concrete members including beams, columns, slabs and footings; sizing of structural members for flexure and shear; determining serviceability limits; detailing reinforcing steel bars. Offered by Civil, Environ & Infrastr Engr. Limited to two attempts.

Registration Restrictions:
Required Prerequisites: (CEIE 311 or L311).
C Requires minimum grade of C.

Students with the terminated from VSE major attribute may not enroll.

Schedule Type: Lecture
Grading:
This course is graded on the Undergraduate Regular scale.

CEIE 414: Structural Modeling for Engineers. 3 credits.
This course provides an introduction to the computer modeling tools that underpin modern structural engineering practice: finite element analysis. Emphasis a combination of theory and practical experience with modeling software. Modeling concepts and the assumptions that engineers must make while building finite element models will be discussed. Topics include applications from structural analysis, structural design, and dynamic vibration analysis. Offered by Civil, Environ & Infrastr Engr. Limited to two attempts.

Recommended Prerequisite: CEIE 311.

Registration Restrictions:
Students with the terminated from VSE major attribute may not enroll.
**CEIE 432: Foundation Design.** 3 credits.
Introduction to various principles and practices of geotechnical engineering including estimation of soil properties using in-situ tests, laboratory tests, and correlations. Course includes study of earth pressure theories as applied to the design of retaining walls, anchored bulkheads, and excavation bracing. Additional topics include retaining wall stability, bearing capacity and settlement of shallow foundations on sands and clays and design considerations and capacity analysis of deep foundations. Offered by Civil, Environ & Infrastr Engr. Limited to two attempts.

**Registration Restrictions:**
Required Prerequisites: CEIE 305\textsuperscript{C} or 331\textsuperscript{C}.
\textsuperscript{C} Requires minimum grade of C.

Students with the terminated from VSE major attribute may **not** enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale.

**CEIE 435: Engineering Geology.** 3 credits.
Introduction to formation and occurrence of earth materials: rock and soil, weathering processes, geomorphology, structural geology, interpreting topographic and geologic maps; field investigation fundamentals; field engineering properties of soil and rock; standards and terminology; rock mass engineering classification systems; subsurface water control; rock as a construction material; special case studies in foundations, such as sinkholes, waste impoundments, dam failures, earth spillway performance. Offered by Civil, Environ & Infrastr Engr. Limited to two attempts.

**Registration Restrictions:**
Required Prerequisites: (CEIE 305\textsuperscript{C} or 331\textsuperscript{C}).
\textsuperscript{C} Requires minimum grade of C.

Students with the terminated from VSE major attribute may **not** enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale.

**CEIE 440: Water Supply and Distribution.** 3 credits.
Analysis and design of public water supplies. Topics include: water supply evaluation; water quality; demand projections; hydraulic analysis of water distribution systems including line sizing, fire protection, pumps, valves, and storage; surge analysis; water modeling; concepts in management, business, and public policy of public water supplies; and federal, state, and local government laws and regulations related to public water systems. Offered by Civil, Environ & Infrastr Engr. Limited to two attempts.

**Registration Restrictions:**
Required Prerequisites: (CEIE 340\textsuperscript{C} or U340).
\textsuperscript{C} Requires minimum grade of C.

Students with the terminated from VSE major attribute may **not** enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale.

**CEIE 442: Open Channel Flow.** 3 credits.
Analysis and design of open channels. Topics include principles of open channel flow including conservation of mass, momentum and energy; flow regimes including uniform, gradually varied, rapidly varied, and unsteady flows; sediment transport; channel design; and modeling and computer applications in open channel analysis and design. Offered by Civil, Environ & Infrastr Engr. Limited to two attempts.

**Registration Restrictions:**
Required Prerequisites: (CEIE 340\textsuperscript{C} or U340).
\textsuperscript{C} Requires minimum grade of C.

Students with the terminated from VSE major attribute may **not** enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale.

**CEIE 444: Water Resources Planning and Design.** 3 credits.
Concerned with effective use of water as a manageable natural resource. It assesses the impacts by various water resources development activities with economic, socio-cultural and environmental considerations. Methods for conducting tradeoff analyses among the engineered, human, and environmental aspects of projects are developed and applied in a term project. Offered by Civil, Environ & Infrastr Engr. Limited to two attempts.

**Recommended Prerequisite:** C or better in CEIE 340.

**Registration Restrictions:**
Students with the terminated from VSE major attribute may **not** enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale.

**CEIE 450: Environmental Engineering Systems.** 3 credits.
Introduces the concepts and applications of systems analysis in environmental engineering. Tools and methodologies of systems analysis are applied to improve the understanding and resolution of complex environmental engineering problems related to air, soil, water quality and pollution. Scientific, engineering, political, social, legal, regulatory, medical, economic, and financial impacts of environmental engineering decisions are considered. Offered by Civil, Environ & Infrastr Engr. Limited to two attempts.

**Specialized Designation:** Green Leaf Related Course

**Registration Restrictions:**
Required Prerequisites: (CEIE 355\textsuperscript{C} or L355).
\textsuperscript{C} Requires minimum grade of C.

Students with the terminated from VSE major attribute may **not** enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale.
CEIE 453: Water and Wastewater Treatment Processes. 3 credits.
Reviews unit treatment processes used in the treatment of water and wastewater systems. Topics include water quality, regulatory requirements, physical unit processes, chemical treatment processes and an introduction to biological treatment processes as applied to a range of community sizes. Offered by Civil, Environ & Infrastr Engr. Limited to two attempts.

Registration Restrictions:
Required Prerequisite: (CEIE 355<sup>C</sup>), <sup>C</sup> Requires minimum grade of C.

Students with the terminated from VSE major attribute may not enroll.

Schedule Type: Lecture
Grading:
This course is graded on the Undergraduate Regular scale.

CEIE 454: Sustainable Water Resources Infrastructure in Developing Countries. 3 credits.
This course addresses the principles of infrastructure engineering and planning in developing countries, with a focus on sustainable technologies for rural and small-scale water supply and wastewater treatment. Students will design simple, reliable water supply and sanitation systems for developing countries with limited human and material resources and with regard to local customs and socio-cultural public health and economic factors. Offered by Civil, Environ & Infrastr Engr. Limited to two attempts.

Registration Restrictions:
Required Prerequisite: CEIE 355<sup>C</sup>, <sup>C</sup> Requires minimum grade of C.

Students with the terminated from VSE major attribute may not enroll.

Schedule Type: Lecture
Grading:
This course is graded on the Undergraduate Regular scale.

CEIE 457: Remote Sensing in Civil Engineering. 3 credits.
This course provides an introduction to the fundamentals of remote sensing. It will focus on how remote sensing data are acquired, displayed, restored, enhanced, and analyzed. The course will be taught with an emphasis on remote sensing techniques as a tool for engineering practices, such as regional planning, site investigation, terrain mapping, urban infrastructure development, water resources engineering, and flood monitoring. Offered by Civil, Environ & Infrastr Engr. Limited to two attempts.

Recommended Prerequisite: C or better in CEIE 355.

Registration Restrictions:
Students with the terminated from VSE major attribute may not enroll.

Schedule Type: Lecture
Grading:
This course is graded on the Undergraduate Regular scale.

CEIE 461: Traffic Engineering. 3 credits.
Elements of traffic engineering analysis; system components of traffic operations: driver, vehicle, and roadway; traffic flow design elements including volume, density, and speed; intersection design elements including traffic control device warrants, signal timing, delay, capacity, and accident countermeasures; and terminal design elements including inflow, outflow, and circulation. Offered by Civil, Environ & Infrastr Engr. Limited to two attempts.

Registration Restrictions:
Required Prerequisites: (CEIE 360<sup>C</sup> or L360), <sup>C</sup> Requires minimum grade of C.

Students with the terminated from VSE major attribute may not enroll.

Schedule Type: Lecture
Grading:
This course is graded on the Undergraduate Regular scale.

CEIE 462: Urban Transportation Planning. 3 credits.
Technical and qualitative aspects of urban transportation planning process. Topics include urban travel characteristics and data collection methods; urban transportation modeling system, including land use, trip generation, trip distribution, mode choice, and trip assignment models; site traffic impact studies; environmental impacts; project and plan evaluation; and technology options for urban transport. Offered by Civil, Environ & Infrastr Engr. Limited to two attempts.

Registration Restrictions:
Required Prerequisites: (CEIE 360<sup>C</sup> or L360), <sup>C</sup> Requires minimum grade of C.

Students with the terminated from VSE major attribute may not enroll.

Schedule Type: Lecture
Grading:
This course is graded on the Undergraduate Regular scale.

CEIE 471: Construction Administration. 3 credits.
Examines the principals of project planning and administration using modern specification and project delivery methods. The role of the project manager as facilitator, constructability advisor, and on-site administrator is emphasized. Project risk transference, market conditions, and legal requirements are explored in the construction contract environment. Other topics include green specifications, design-build delivery, job order contracting, turnkey construction, and public-private partnerships. Appropriate for students, engineering and design professionals, project managers, contract administrators, and owners interested in the planning and administration needs of construction. Offered by Civil, Environ & Infrastr Engr. Limited to two attempts.

Registration Restrictions:
Required Prerequisites: (CEIE 370<sup>C</sup> or L370), <sup>C</sup> Requires minimum grade of C.

Students with the terminated from VSE major attribute may not enroll.

Schedule Type: Lecture
Grading:
This course is graded on the Undergraduate Regular scale.

CEIE 472: Building Information Modeling. 3 credits.
Virtual design and construction techniques are covered using modern 3D Building Information Modeling (BIM) software. Historical and technological basis for virtual building and infrastructure design are presented. Design and construction coordination are emphasized using clash detection, conflict management, constructibility analysis, specification mapping, and asset management. Industry supported
model component databases are used with commercial software design environments for hands-on simulated design and construction projects. Offered by Civil, Environ & Infrastr Engr. Limited to two attempts.

Registration Restrictions:

Required Prerequisites: (CEIE 370C or L370).

C Requires minimum grade of C.

Students with the terminated from VSE major attribute may not enroll.

Schedule Type: Lecture

Grading:

This course is graded on the Undergraduate Regular scale.

CEIE 474: Construction Computer Application and Informatics. 3 credits.

This course covers various topics in construction enterprise information systems, data-driven decision support, relational databases, data manipulation, data visualization, application of data mining and machine learning techniques. The R software is used in this course. Offered by Civil, Environ & Infrastr Engr. Limited to three attempts.

Registration Restrictions:

Required Prerequisites: (CEIE 370C, CDS 130C or CS 112C) and STAT 344C.

C Requires minimum grade of C.

Students with the terminated from VSE major attribute may not enroll.

Schedule Type: Lecture

Grading:

This course is graded on the Undergraduate Regular scale.

CEIE 476: Construction Cost Estimating. 3 credits.

Overview of cost estimating and financial management in the modern construction industry. Techniques and software applications for construction take-offs, bidding, bonding, insurance, equipment ownership, material and labor costing. Additional topics include: cost recovery planning, budgeting, forecasting, acquisition, cast flow management, managerial accounting concepts, and taxes. Offered by Civil, Environ & Infrastr Engr. Limited to three attempts.

Registration Restrictions:

Required Prerequisite: CEIE 370C.

C Requires minimum grade of C.

Students with the terminated from VSE major attribute may not enroll.

Schedule Type: Lecture

Grading:

This course is graded on the Undergraduate Regular scale.

CEIE 477: Construction Safety and Risk Management. 3 credits.

This course will give students an overall understanding of construction safety concepts, techniques and tools, and impact of safety performance. The focus will be in the capital projects industry. Offered by Civil, Environ & Infrastr Engr. Limited to three attempts.

Registration Restrictions:

Required Prerequisite: STAT 344C.

C Requires minimum grade of C.

Students with the terminated from VSE major attribute may not enroll.

Schedule Type: Lecture

Grading:

This course is graded on the Undergraduate Regular scale.

CEIE 478: Construction Planning and Scheduling. 3 credits.

This course will help students establish basic and advanced construction management skills with a focus on planning and scheduling of construction projects. Different procedures for construction control and developing a practical methodology appropriate for civil, environmental, and infrastructure engineering applications will be explored. An introduction to industry terminology, basic and advanced scheduling procedures, building work breakdown structures, activity identification, sequencing and logical ties, different levels schedule development using the critical path method, understanding schedule restrictions, schedule calculations, schedule resource management, and maintaining schedule updates will be covered. An emphasis will be placed on using computer-based scheduling software. Offered by Civil, Environ & Infrastr Engr. Limited to three attempts.

Registration Restrictions:

Required Prerequisite: CEIE 370C.

C Requires minimum grade of C.

Students with the terminated from VSE major attribute may not enroll.

Schedule Type: Lecture

Grading:

This course is graded on the Undergraduate Regular scale.

CEIE 490: Civil Engineering Senior Design Project I. 1 credit.

This course is the first course in a two-course sequence in the Civil Engineering Program. Students will be working on civil engineering projects, integrate their acquired fundamental engineering knowledge and incorporate input from practitioner engineers from industry. Students form multidisciplinary design teams, select real-world civil engineering projects, develop preliminary design solutions, and prepare a draft technical report. Students will learn necessary computer-aided design software and become familiar with engineering codes and standards. Offered by Civil, Environ & Infrastr Engr. Limited to two attempts.

Mason Core: Capstone, Synthesis

Recommended Prerequisite: Three 4xx level technical electives.

Registration Restrictions:

Required Prerequisites: (CEIE 301C or L301) and (CEIE 355C or L355) and (CEIE 340C or L340) and (CEIE 355C or L355) and (CEIE 360C or L360) and (CEIE 305C or L305) and (CEIE 331C or L331) and (CEIE 370C or L370).

C Requires minimum grade of C.

Enrollment limited to students with a class of Senior Plus or Senior.

Students with the terminated from VSE major attribute may not enroll.

Schedule Type: Laboratory

Grading:

This course is graded on the Undergraduate Regular scale.

CEIE 491: Civil Engineering Senior Design Project II. 3 credits.

This course is the second course in a two-course sequence in the Civil Engineering Program. Students will build on the work they completed in CEIE 490. Teams will finalize design solutions, study constructability, evaluate cost, and consider the social, environmental,
and sustainable impacts of their designs. Each student will demonstrate an understanding of the engineering design with an iterative, creative, decision-making process in which the basic sciences, mathematics, and engineering sciences are applied to convert resources into solutions. Student design must identify opportunities, develop requirements, perform analysis and synthesis, generate multiple solutions, evaluate solutions against requirements, considering risks, and make trade-offs, for the purpose of obtaining a high-quality solution under the given circumstances. An oral presentation, technical report, and technical drawing documenting the students’ solution is required at the completion of the project. Offered by Civil, Environ & Infrastr Engr. Limited to two attempts.

Registration Restrictions:
Required Prerequisite: CEIE 490C.
C Requires minimum grade of C.

Enrollment limited to students with a class of Senior Plus or Senior.

Schedule Type: Laboratory

Grading:
This course is graded on the Undergraduate Regular scale.

CEIE 497: Applied Engineering Abroad. 3 credits.
Introduces students to applications of engineering processes outside USA. The students will gain hands-on project management, critical thinking, intercultural and career skills by exploring engineering aspects such as auto assembly, airline manufacturing, metropolitan infrastructure, and bridge designs. By visiting technology museums, students will learn to appreciate the rich history of the country’s technology and manufacturing. Offered by Civil, Environ & Infrastr Engr. Limited to two attempts. Equivalent to SYST 497.

Mason Core: Global Understanding

Registration Restrictions:
Enrollment limited to students with a class of Junior, Senior Plus or Senior.

Students with the terminated from VSE major attribute may not enroll.

Schedule Type: Internship

Grading:
This course is graded on the Undergraduate Regular scale.

CEIE 498: Independent Study in Civil Engineering. 1-3 credits.
Directed self-study of special topics of current interest. Notes: May be repeated if topics substantially differ. Offered by Civil, Environ & Infrastr Engr. May be repeated within the term.

Recommended Prerequisite: Permission of the Department Chair.

Registration Restrictions:
Enrollment limited to students with a class of Junior or Senior.

Students with the terminated from VSE major attribute may not enroll.

Schedule Type: Independent Study

Grading:
This course is graded on the Undergraduate Regular scale.

CEIE 499: Special Topics in Civil Engineering. 1-3 credits.
Varies with nature of topic. Topics of special interest to undergraduates. Notes: May be repeated if topics substantially differ. Offered by Civil, Environ & Infrastr Engr. May be repeated within the term.

Specialized Designation: Topic Varies

Registration Restrictions:
Students with the terminated from VSE major attribute may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale.

500 Level Courses

CEIE 501: Sustainable Development. 3 credits.
Introduction to sustainability concepts and terminology including the development and use of sustainability indices. Exploration of sustainability tools and frameworks such as the Leadership in Energy and Environmental Design ( LEED ) Green Building Rating System, American Institute of Architects Sustainable Design Resources Guide, and the Natural Step ( TNS ) Framework. Methods for evaluation of sustainable sites, water/energy efficiency, sustainable materials and resources, and indoor air quality are presented. Designated a Green Leaf Course. Offered by Civil, Environ & Infrastr Engr. May not be repeated for credit.

Specialized Designation: Green Leaf Focused Course

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale.

CEIE 510: Geographic Information Systems in Engineering. 3 credits.
Introduces geographic information systems ( GIS ) and their application in environmental, transportation, land-use planning, and other engineering-related decision situations. Introduces methods and technologies for spatial data acquisition, specification, storage, manipulation, query, thematic analysis, presentation, and application in the design process. Introduces relationships, integration of GIS with computer-aided design and global positioning system. Hands-on projects. Offered by Civil, Environ & Infrastr Engr. May not be repeated for credit.

Recommended Prerequisite: Knowledge of computer programming and databases or permission of instructor.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.
Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

**CEIE 512: Structural Steel Design.** 3 credits.
Covers analysis and design of structural steel members including tension members, compression members, bolted and welded connections, columns, beams, and beam-columns. Offered by Civil, Environ & Infrastr Engr. May not be repeated for credit.

**Recommended Prerequisite:** CEIE 311

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

**CEIE 513: Reinforced Concrete Design.** 3 credits.
Covers analysis and design of reinforced concrete members including beams, columns, slabs and footings; sizing of structural members for flexure and shear; determining serviceability limits; detailing reinforcing steel bars. Offered by Civil, Environ & Infrastr Engr. May not be repeated for credit.

**Recommended Prerequisite:** CEIE 311

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

**CEIE 524: Introduction to Bridge Engineering.** 3 credits.
A balanced theoretical and practical insight into the art and science of bridge engineering. Various methodologies of bridge design and evaluation are investigated, including constructability reviews. Bridges of steel, reinforced concrete, and pre-stressed concrete materials are included. Short-span composites; major innovation and low cost solutions targeted at aging infrastructure. Offered by Civil, Environ & Infrastr Engr. May not be repeated for credit.

**Recommended Prerequisite:** Graduate Standing in CEIE; CEIE 512 or CEIE 513 or equivalent.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

**CEIE 525: Structural Evaluation and Rehabilitation.** 3 credits.
Structural condition survey and evaluation for strength and serviceability of existing structures including foundation elements; older building practices and materials; criteria for rehabilitation; retrofit techniques for change in function, loading, and seismic forces. Historic preservation issues. Repair, remediation, and structural strengthening methods and current trends. Carbon fiber external P.T. Material selection criteria, including mechanical and environmental factors. Cost/value feasibility analysis; estimating remedial construction costs; engineering oversight of rehabilitation work. Offered by Civil, Environ & Infrastr Engr. May not be repeated for credit.

**Recommended Prerequisite:** Graduate Standing in CEIE.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

**CEIE 526: Structural Steel Design II.** 3 credits.
Behavior, strength, and design of vertical steel structures using the LRFD approach; plate girders, composite beams, welded built-up columns, bolted and welded connections, beam-columns, and torsion; introduction to plastic analysis and its application to members and vertical structures; erection procedure and methods field inspection issues; unique properties of high strength steels. Offered by Civil, Environ & Infrastr Engr. May not be repeated for credit.

**Recommended Prerequisite:** Graduate Standing in CEIE; CEIE 512 or equivalent.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale.

CEIE 527: Pre-stressed Concrete. 3 credits.
Strength, behavior, analysis, and design of pre-stressed concrete members, vertical building structures, and bridges, with emphasis on pre-tensioned, post-tensioned construction; basics of segmental concrete bridges, cable-stayed bridges, and spliced-girder concrete bridges; continuous span theory; protection of pre- & post-tensioned systems; secondary effects. Composite Portland cement with cast-in-place topping; precast as a stay-in-place system; connection detailing; durability issues; advantages in a marine environment. Offered by Civil, Environ & Infrastr Engr. May not be repeated for credit.

Recommended Prerequisite: Graduate Standing in CEIE; CEIE 513 or equivalent.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale.

CEIE 532: Foundation Design. 3 credits.
Introduction to various principles and practice of geotechnical engineering including estimation of soil properties using in-situ tests, laboratory tests, and correlations. Course includes the study of earth pressure theories as applied to the design of retaining walls, anchored bulkheads, and excavation bracing. Additional topics include retaining wall stability, bearing capacity and settlement of shallow foundations on sands and clays and design considerations for deep foundations. Offered by Civil, Environ & Infrastr Engr. May not be repeated for credit.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale.

CEIE 535: Engineering Geology. 3 credits.
Introduction to formation and occurrence of earth materials -rock and soil; weathering processes, geomorphology, structural geology, interpreting topographic and geologic maps; field investigation fundamentals, field engineering properties of soil and rock; standards and terminology; rock mass engineering classification systems; subsurface water control; rock as a construction material; special case studies in foundations, such as sinkholes, waste impoundments , dam failures, earth spillway performance. Offered by Civil, Environ & Infrastr Engr. May not be repeated for credit.

Recommended Prerequisite: Graduate Standing in CEIE;

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale.
CEIE 540: Water Supply and Distribution. 3 credits.
Analysis and design of public water supplies. Topics include supply evaluation; water quality and quantity requirements; treatment requirements and methods; hydraulic analysis of water distribution systems including line sizing, fire protection, pumps, valves, and storage; sustainability; security; concepts in management, business, and public policy of public water systems; and federal, state, and local government laws and regulations related to public water systems. Requires laboratory, field work on selected topics. Designated a Green Leaf Course. Offered by Civil, Environ & Infrastr Engr. May not be repeated for credit.

Specialized Designation: Green Leaf Focused Course

Recommended Prerequisite: Course in hydraulics or fluid mechanics

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.
Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale.

CEIE 542: Open Channel Flow. 3 credits.
Analysis and design of open channels. Topics include principles of open channel flow including conservation of mass, momentum and energy; flow regimes including uniform, gradually varied, rapidly varied, and unsteady flows; sediment transport; channel design; modeling and computer applications in open channel analysis and design. Offered by Civil, Environ & Infrastr Engr. May not be repeated for credit.

Recommended Prerequisite: A course in hydraulics or fluid mechanics

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.
Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale.

CEIE 550: Environmental Engineering Systems. 3 credits.
Introduces the concepts and applications of systems analysis in environmental engineering. Tools and methodologies of systems analysis are applied to improve the understanding and resolution of complex environmental engineering problems related to air, soil, and water quality and pollution. Scientific, engineering, political, social, legal, regulatory, medical, economic, and financial impacts of environmental engineering decisions are considered. Offered by Civil, Environ & Infrastr Engr. May not be repeated for credit.

Recommended Prerequisite: CEIE 355.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.
Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale.

CEIE 553: Water and Wastewater Treatment Processes. 3 credits.
Studies unit treatment processes used in the treatment of water and wastewater systems. Topics include water quality, regulatory requirements, physical unit processes, chemical treatment processes and an introduction to biological treatment processes as applied to a range of community sizes. Offered by Civil, Environ & Infrastr Engr. May not be repeated for credit.

Recommended Prerequisite: CEIE 555.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.
Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale.

CEIE 556: Environmental Law. 3 credits.
Introductory course in the study of environmental laws as they pertain to urban systems infrastructure management. Reviews the National Environmental Policy Act, Clean Air Act, Clean Water Act, Safe Drinking Water Act, Resource Conservation and Recovery Act, Comprehensive Environmental Response, Compensation, and Liability Act, and other environmentally related legislation. Also reviews laws for allocation of surface and groundwater supplies, and reviews environmental law databases. Offered by Civil, Environ & Infrastr Engr. May not be repeated for credit.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduation Deadline Extended, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.
Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

**CEIE 557: Remote Monitoring Techniques for Civil Engineering Applications.** 3 credits.
This course covers the basic physics and applications of remote sensing, remote sensing systems (satellite, airborne, and ground-based), and atmospheric radiative transfer. The course focuses on remote sensing techniques as a tool for engineering practices and presents an exhaustive plethora of remote sensing applications for problem solving in civil, environmental, and infrastructure engineering. Examples include (but are not limited to) regional planning and site investigation, terrain mapping and urban infrastructure development, water resources engineering, transportation network analysis, landslide analysis, flood monitoring, and bridge inspection. Offered by Civil, Environ & Infrastr Engr. May not be repeated for credit.

**Recommended Prerequisite:** Graduate standing in CEIE.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

**CEIE 560: Public Transportation Systems.** 3 credits.
Analyzes public transportation systems in terms of their role in urban transportation. Topics include history of public transportation in the United States, quantitative performance attributes of different modes, analytical techniques for planning and operation, and management and administrative concepts. Offered by Civil, Environ & Infrastr Engr. May not be repeated for credit.

**Recommended Prerequisite:** CEIE 360.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

**CEIE 561: Traffic Engineering.** 3 credits.
Covers elements of traffic engineering analysis; system components of traffic operations: driver, vehicle, and roadway; traffic flow design elements including volume, density, and speed; intersection design elements including traffic control device warrants, signal timing, delay, capacity, and accident countermeasures; and terminal design elements including inflow, outflow, and circulation. Offered by Civil, Environ & Infrastr Engr. May not be repeated for credit.

**Recommended Prerequisite:** CEIE 365.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

**CEIE 562: Urban Transportation Planning.** 3 credits.
Covers technical and qualitative aspects of urban transportation planning process. Topics include urban travel characteristics and data collection methods; urban transportation modeling system, including land use, trip generation and distribution, mode choice, and trip assignment models; site traffic impact studies; environmental impacts; project and plan evaluation; and technology options for urban transport. Offered by Civil, Environ & Infrastr Engr. May not be repeated for credit.

**Recommended Prerequisite:** CEIE 360.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

**CEIE 571: Construction Administration.** 3 credits.
Examines the principals of project planning and administration using modern specification and project delivery techniques. The role of the project manager as facilitator, constructability advisor, and on-site administrator is emphasized. Project risk transference, market conditions, and legal requirements are explored in the construction contract environment. Other topics include green specifications, design-build delivery, job order contracting, turnkey construction, and public-private partnerships. Appropriate for students, engineering and design professionals, project managers, contract administrators, and owners interested in the planning and administration needs of construction. Offered by Civil, Environ & Infrastr Engr. May not be repeated for credit.

**Registration Restrictions:**
CEIE 573: Building Information Modeling. 3 credits.
Virtual design and construction techniques are covered using modern 3D Building Information Modeling (BIM) software. Historical and technological basis for virtual building and infrastructure design are presented. Design and construction coordination are emphasized using clash detection, conflict management, constructability analysis, specification mapping, and asset management. Industry-supported model component databases are used with commercial software design environments for hands-on simulated design and construction projects. Offered by Civil, Environ & Infrastr Engr. May not be repeated for credit.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.
Students in a Non-Degree Undergraduate degree may not enroll.

CEIE 574: Legal Aspects of the Construction Process. 3 credits.
Examines the legal principles associated with the construction process. Introduces legal and project delivery concepts and review of the rights and responsibilities of construction project participants. Topics include the application of differing site conditions clauses, delay claims, termination rights, remedies for breach of contract, and dispute resolution techniques. Also includes review of industry legal issues, such as principles of risk management, LEED liability, and design-build contracts. Offered by Civil, Environ & Infrastr Engr. May not be repeated for credit.

Recommended Prerequisite: Graduate Standing in CEIE.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.
Students in a Non-Degree Undergraduate degree may not enroll.

CEIE 575: Design for Constructability. 3 credits.
Systems design of structures to consider foundations, structures and constructability; foundation alternatives; structural design to simplify erection; prefabrication, modulation of structures; material handling on a construction site; crane selection and placement; temporary works. Offered by Civil, Environ & Infrastr Engr. May not be repeated for credit.

Recommended Prerequisite: Graduate Standing in CEIE.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.
Students in a Non-Degree Undergraduate degree may not enroll.

CEIE 576: Construction Cost Estimating. 3 credits.
Overview of cost estimating and financial management in the modern construction industry. Techniques and software applications for construction take-offs, bidding, bonding, insurance, equipment ownership, material and labor costing. Additional topics include: cost recovery planning; budgeting, forecasting, acquisition, cash flow management, managerial accounting concepts, and taxes. Offered by Civil, Environ & Infrastr Engr. May not be repeated for credit.

Recommended Prerequisite: Graduate Standing in CEIE.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.
Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale.

CEIE 578: Construction Planning and Scheduling. 3 credits.
This course will help students establish basic and advanced construction management skills with a focus on planning and scheduling of construction projects. Different procedures for construction control and developing a practical methodology appropriate for civil, environmental, and infrastructure engineering applications will be explored. An introduction to industry terminology, basic and advanced scheduling procedures, building work breakdown structures, activity identification, sequencing and logical ties, different levels schedule development using the critical path method, understanding schedule restrictions, schedule calculations, schedule resource management, and maintaining schedule updates will be covered. An emphasis will be placed on using computer-based scheduling software. Offered by Civil, Environ & Infrastr Engr. May not be repeated for credit.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale.

600 Level Courses

CEIE 601: Infrastructure Modeling. 3 credits.
Concepts of modeling for infrastructure engineering systems. Covers deterministic and stochastic modeling, multi-objective decision-making, and solution algorithms for civil infrastructure problems. Offered by Civil, Environ & Infrastr Engr. May not be repeated for credit.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale.

CEIE 603: Research Methods in Civil Engineering. 3 credits.
Familiarizes students with the process of rigorous research in civil engineering by providing a strong background in research methods, such as critical thinking, experimental design (idea, concept, design, development), writing a scientific article, and interpretation of results (uncertainty quantification, assumptions, etc.). Introduces common quantitative methods in civil engineering research such as descriptive and inferential statistics, data assimilation, and hypothesis testing. Encourages critical thinking and collaboration among students from different civil engineering disciplines. Offered by Civil, Environ & Infrastr Engr. May not be repeated for credit.

Recommended Prerequisite: Graduate standing in CEIE.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale.

CEIE 605: Risk and Uncertainty in Civil Engineering. 3 credits.
Probability and statistics topics for analysis of infrastructure systems. Includes Bayesian decision theory, decision trees, Monte Carlo analysis, stochastic models, simulation, and economic analysis of infrastructure projects and systems. Offered by Civil, Environ & Infrastr Engr. May not be repeated for credit.

Recommended Prerequisite: STAT 344.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale.

CEIE 607: Public Infrastructure Management and Finance. 3 credits.
Current and projected outlook for managing and financing public works infrastructure including, transportation, public utilities, water and waste water facilities, energy, and public buildings; Infrastructure management including the impact of built infrastructure on the environment, tracking and improving infrastructure performance, government regulations, emerging technologies, social concerns, and the impacts of disasters; Infrastructure finance including public and private sources of capital, special financing districts, bond markets, federal and state grants, public-private partnerships, and design-build project delivery. Offered by Civil, Environ & Infrastr Engr. May not be repeated for credit.
**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

**CEIE 611: Structural Analysis II.** 3 credits.
Application of the stiffness method in planar trusses, beams, planar frames, curved beams, and three-dimensional structures; Introduction to non-linear structural analysis with emphasis on geometric non-linearity. Offered by Civil, Environ & Infrastr Engr. May not be repeated for credit.

**Recommended Prerequisite:** Differential Equations.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

**CEIE 612: Mechanics of Materials II.** 3 credits.
Covers the foundations of structural modeling and theories of elasticity. Topics include: multidimensional theories of stress and strain, governing equations of elasticity, numerical solution techniques, material failure criteria, basics of nonlinear analysis. Offered by Civil, Environ & Infrastr Engr. May not be repeated for credit.

**Recommended Prerequisite:** Graduate standing in CEIE or permission of the instructor.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

**CEIE 613: Structural Dynamics.** 3 credits.
This course covers the fundamental principles necessary to analyze the responses of structures subjected to dynamic loads such as blast, earthquake, rotating machinery, etc. Idealized linear structural models subjected to free vibrations, harmonic vibrations, and impulsive loadings are presented. Practical applications of structural dynamics for solving simplified problems in blast and earthquake engineering are included. Offered by Civil, Environ & Infrastr Engr. May not be repeated for credit.

**Recommended Prerequisite:** Differential Equations.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

**CEIE 619: Special Topics in Structural Engineering.** 0-3 credits.
Advanced topics in recently developed areas of structural engineering. May be repeated for credit when topics vary. Offered by Civil, Environ & Infrastr Engr. May be repeated within the term.

**Recommended Prerequisite:** Topic Varies

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

**CEIE 620: Intelligent Systems in Civil Engineering.** 3 credits.
Covers autonomous systems in civil engineering across CEIE sub-disciplines. Topics include: sensing & instrumentation, data analytics, and machine learning applications. Laboratory exercises with sensing and data acquisition systems, as well as a student-driven class project. Offered by Civil, Environ & Infrastr Engr. May not be repeated for credit.

**Recommended Prerequisite:** Graduate standing in CEIE or permission of the instructor.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.
Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

**CEIE 623: Reinforced Concrete Design II.** 3 credits.
Covers the behavior, analysis and design of two-way reinforced concrete slabs; design of long columns including slenderness effects; structural design of isolated footings, combined footings and pile caps; design of deep beams using the strut-and-tie models; introduction bearing, retaining and shear wall designs. Offered by Civil, Envirn & Infrastr Engr. May not be repeated for credit.

**Recommended Prerequisite:** Reinforced Concrete Design.

**Grading Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

**CEIE 634: Geoenvironmental Design.** 3 credits.
This course covers the fundamental principles regarding waste geotechnics, including the design of landfill liners/covers, fate of pollutant transport in groundwater, transport processes, modeling techniques for flow and transport, waste settlement, and groundwater remediation technologies such as biodegradation of waste. The course requires students to study journal papers as supplemental material to the lectures. Offered by Civil, Envirn & Infrastr Engr. May not be repeated for credit.

**Recommended Prerequisite:** Graduate Standing in CEIE.

**Grading Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

**CEIE 635: Advanced Soil Mechanics.** 3 credits.
Consolidation of soil: primary and secondary, and rate. Soil strength in the framework of Critical State Soil Mechanics: normally consolidated, lightly and heavily overconsolidated, drained and undrained, elastic and plastic deformation. Offered by Civil, Envirn & Infrastr Engr. May not be repeated for credit.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

**CEIE 636: Sources of Geotechnical Data.** 3 credits.
Resources for conducting desk top studies; tools for field investigations; subsurface investigations (options and selection of techniques); laboratory testing of soil and rock; accepted testing procedures; typical values; empirical relationships between properties and testing techniques; risk and uncertainty; use of lab testing, insitu strength testing, and empirical methods in design; identifying slickensides. Offered by Civil, Envirn & Infrastr Engr. May not be repeated for credit.

**Recommended Prerequisite:** Graduate Standing in CEIE.

**Grading Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

**CEIE 637: Tunneling and Ground Improvement.** 3 credits.
Fundamentals of underground construction, design considerations, risk management, and various tunneling techniques including tunnels, caverns, and cut and cover construction. Densification-based and reinforcement-based ground improvement techniques and the basics of designing various systems of each. Specific techniques anticipated to be covered include surcharging, grouting, densification, and rigid inclusions. Offered by Civil, Envirn & Infrastr Engr. May not be repeated for credit.

**Recommended Prerequisite:** Graduate Standing in CEIE.

**Grading Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Students in a Non-Degree Undergraduate degree may not enroll.
Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale.

CEIE 638: Advanced Foundation Design. 3 credits.
Design of shallow and deep foundations for civil engineering structures, including time rate of consolidation settlement, stress distribution, elastic settlement, and bearing capacity. Driven piles and drilled shafts subjected to axial and lateral loading, both single and group action. Offered by Civil, Environ & Infrastr Engr. May not be repeated for credit.

Recommended Prerequisite: Graduate standing in CEIE.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale.

CEIE 641: Water Resources Engineering I: Principles and Practice. 3 credits.
Introduction to the principles of hydrology and hydraulics and their application to the planning, design and management of modern water resources. Offered by Civil, Environ & Infrastr Engr. May not be repeated for credit.

Recommended Prerequisite: Graduate standing in CEIE; CEIE 340 or equivalent.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale.

CEIE 642: Flood Hazards Engineering. 3 credits.
Introduction to the principles of flood hazards engineering. Theory and practice of the application of hydrology and hydraulics to flood hazards delineation. Theory and practice of the application of geospatial analyses to support flood hazards modeling. Application of computational methods to support planning, design and management of flood hazards. Offered by Civil, Environ & Infrastr Engr. May not be repeated for credit.

Recommended Prerequisite: Graduate standing in CEIE and CEIE 340 or equivalent.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale.

CEIE 643: Coastal Flood Hazards. 3 credits.
Introduction to the theory and practice of coastal flooding and hazards engineering. Topics include the theory of hurricane storm surges, tides, coastal hydrodynamics, waves and coastal processes. Use of the Surface Water Modeling System (SMS) and the Advanced Circulation Model (ADCIRC) for coastal flooding analysis. Introduction to High Performance Computing (HPC) modeling of hurricane storm surge. Introduction to Geographic Information Systems (GIS) applications to support coastal flood modeling and hazard analysis. Applications of coastal engineering to support coastal flood mapping and hazard prevention. Offered by Civil, Environ & Infrastr Engr. May not be repeated for credit.

Recommended Prerequisite: Graduate Standing in CEIE.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.
Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

**CEIE 644: Groundwater Systems Modeling.** 3 credits.
Introduces groundwater hydrology and modeling, including quantity and quality aspects. Topics include characterization of subsurface regime; well hydraulics; consideration of two-dimensional steady and unsteady-state flows; exploration of modeling approaches; simulation and optimization modeling; contaminant transport; parameter estimation; and design of systems to control groundwater quantity and quality. Offered by Civil, Environ & Infrastr Engr. May not be repeated for credit.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

**CEIE 649: Special Topics in Water Resources Engineering.** 0-3 credits.
Advanced topics in recently developed areas of water resources engineering. May be repeated for credit when topics vary. Offered by Civil, Environ & Infrastr Engr. May be repeated within the term.

**Specialized Designation:** Topic Varies

**Recommended Prerequisite:** Graduate standing in CEIE or permission of the instructor.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

**CEIE 658: Water Quality.** 3 credits.
This course addresses the physical, chemical and biological principles that define water quality. Mathematical and chemical models are formulated and employed to predict fate and transport of contaminants in both surface and groundwater. Laboratory and field-work are required. Offered by Civil, Environ & Infrastr Engr. May not be repeated for credit.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

**CEIE 659: Hazardous Waste.** 3 credits.
Physical, chemical and biological properties of hazardous waste; abiotic and biotic transformation of hazardous wastes and their fate in the environment; design of remediation schemes including incineration, landfill, bioremediation and other physical and chemical stabilization processes; principles of risk assessment to select and optimize hazardous waste treatment; methods and strategies for hazardous waste reduction. Offered by Civil, Environ & Infrastr Engr. May not be repeated for credit.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

**CEIE 657: Environmental Engineering Microbiology.** 3 credits.
Addresses the fundamental aspects of microbial physiology and ecology and their application to environmental engineering processes. Specific topics include cell structure and function, energetics, metabolism, enzyme and growth kinetics, microbial/environmental interactions (e.g. interactions with organic pollutants), biogeochemical cycles, and an introduction to engineering applications including bioremediation, wastewater treatment, biosensors and microbial fuel cells. Offered by Civil, Environ & Infrastr Engr. May not be repeated for credit.
CEIE 662: Travel Demand Modeling. 3 credits.
Covers elements of Travel Demand Modeling at considerable detail.
Design and execution of travel surveys; analysis of survey data; economic and demographic data and analysis; development of classification, regression and discrete choice models for four-step and activity based travel demand models; spatial analysis of data; matrix methods; validation and calibration of models; traffic and transit assignment methods and their application; select-link analysis. Hands-on modeling assignments. Offered by Civil, Environ & Infrasr Engr. May not be repeated for credit.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

Schedule Type: Lecture
Grading:
This course is graded on the Graduate Regular scale.

CEIE 663: Intelligent Transportation Systems. 3 credits.
Advanced transportation system operations and safety through the use of wireless and wireline communications; integrated transportation systems; in-vehicle technologies; industry standards; and systems architecture. Provides skills to apply advanced technologies to transportation systems to improve operational and safety performance. Provides nontraditional tools to address issues of congestion and improved safety performance. Offered by Civil, Environ & Infrasr Engr. May not be repeated for credit.

Recommended Prerequisite: CEIE 561 or 562.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

Schedule Type: Lecture
Grading:
This course is graded on the Graduate Regular scale.

CEIE 664: Transportation Engineering and the Environment. 3 credits.
Introduction to transportation and air quality; Clean Air Act; greenhouse gases, climate change, and modeling for greenhouse gases; travel activity; The NEPA process for transportation projects; road transportation and noise; noise abatement. Offered by Civil, Environ & Infrasr Engr. May not be repeated for credit.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

Schedule Type: Lecture
Grading:
This course is graded on the Graduate Regular scale.

CEIE 665: Travel Survey Methods and Data Analysis. 3 credits.
Covers the concept and practice of travel survey methods; national household travel survey; Census transportation survey and products; travel diary based, roadside, mail-in and web-based and GPS-based travel surveys; longitudinal vs. cross-sectional surveys; stated-preference survey; interactive and adaptive survey method; transit survey methods; special generator surveys; sampling approach and representativeness analysis; econometric data analysis; panel data; self-selection issues; other data mining methods; data security, privacy, IRB process, and ethics. Offered by Civil, Environ & Infrasr Engr. May not be repeated for credit.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

Schedule Type: Lecture
Grading:
This course is graded on the Graduate Regular scale.

CEIE 667: Multi-modal Transportation Systems. 3 credits.
Topical coverage of freight and logistics; non-motorized transportation considerations; and public transit planning. Freight topics include demand and supply modeling concepts; freight flow data sources; and truck size and weight policies. Bicycle and pedestrian planning considering traveler response to facility and policy improvements and identifying common resources for addressing non-motorized project concerns. Public transportation planning coverage including mass transit technology typologies, corridor planning and operations concepts, and finance and public policy issues, including environmental justice. Offered by Civil, Environ & Infrasr Engr. May not be repeated for credit.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.
Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale.

CEIE 668: Transportation Economics. 3 credits.
Application of micro- and macro-economic theories to transportation system analysis; interaction between transportation system, land use, and regional economics; mobility, accessibility, and system reliability; market equilibrium; pricing, willingness to pay, and welfare analysis; cost benefit analysis; project finance. Offered by Civil, Environ & Infrastr Engr. May not be repeated for credit.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale.

CEIE 669: Special Topics in Transportation Engineering. 0-3 credits.
Advanced topics in recently developed areas of transportation engineering. May be repeated for credit when topics vary. Offered by Civil, Environ & Infrastr Engr. May be repeated within the term.

Specialized Designation: Topic Varies

Recommended Prerequisite: Graduate standing in CEIE or permission of the instructor.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale.

CEIE 677: Construction Simulation. 3 credits.
Overview of production management in construction. Techniques for modeling construction operations, design of efficient processes, measurement and improvement of productivity. Computer simulation techniques for modeling and analysis. Offered by Civil, Environ & Infrastr Engr. May not be repeated for credit.

Recommended Prerequisite: Graduate Standing in CEIE.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale.

CEIE 678: Infrastructure Asset Management. 3 credits.
Provides the principles of infrastructure asset management, including performance management, risk management, financial planning, state-of-the-practice in implementing asset management systems for infrastructure owners, and challenges in development and implementation of asset management practices for public and private sector infrastructure owners. Introduces emerging technology applications in asset management to prepare the next generation of professionals for the marketplace of the future. Investigates how existing infrastructure assets are preserved, repaired and renewed, by shifting focus from creating new and additional capacity to maximizing the functionality of existing assets. Engineering, financial and investment planning, and management consulting principles are combined in a strategic and systematic process that focuses on effective operation, maintenance, upgrade, and expansion of physical assets through a whole-life approach. Offered by Civil, Environ & Infrastr Engr. May not be repeated for credit.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale.

CEIE 679: Special Topics in Construction Management. 3 credits.
Advanced topics in recently developed areas of construction management. May be repeated for credit when topics vary. Offered by Civil, Environ & Infrastr Engr. May be repeated within the term.

Specialized Designation: Topic Varies

Recommended Prerequisite: Graduate standing in CEIE or permission of the instructor.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.
CEIE 683: Water and Wastewater Systems Security. 3 credits.
Examines overall security of water and wastewater systems. Covers theory and methods to define water and wastewater infrastructure as physical and organizational systems. Explores concepts of infrastructure security; identifies actors, interactions in organizational infrastructure, and threats to water and wastewater infrastructure; describes behavior of physical and organizational infrastructures under stress; examines history of threats or attacks against water and wastewater systems; and explores evolution of design, operations, and maintenance paradigms in response to changes in threats. Covers proactive responses to security threats through vulnerability assessments, and models of organizational and physical infrastructure system. Offered by Civil, Environ & Infrasr Engr. May not be repeated for credit.

Recommended Prerequisite: BS in Civil Engineering or CEIE 440 and CEIE 455.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.
Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.
Students in a Non-Degree Undergraduate degree may not enroll.
Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale.

CEIE 686: Transportation System Security and Safety. 3 credits.
Focuses on critical transportation systems infrastructure and operations, and technologies for predicting and managing damage and disruptions caused by potential threats, including natural and technological disasters and terrorist threats. Includes asset management, methodologies for assessing vulnerabilities, potential impact of damage and disruption, applying state-of-the-art technologies and R&D processes for harnessing best analysis methods, and technologies for hardening transportation infrastructure systems. Includes sensing and surveillance using satellite and aerial remote sensing imagery, application of GIS and spatial information technologies, information and communication, intelligent transportation systems, hardening systems, and making intelligent choices for implementing technology advances to transportation security and safety. Offered by Civil, Environ & Infrasr Engr. May not be repeated for credit.

Recommended Prerequisite: BS in Engineering, or permission of instructor.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.
Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

CEIE 6890: Topics in Civil Engineering. 3 credits.
Topics not covered in the regular civil engineering offerings. Notes: Course content may vary each semester. Course may be repeated with change in topic. Offered by Civil, Environ & Infrasr Engr. May be repeated within the term.

Specialized Designation: Green Leaf Related Course, Topic Varies

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.
Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.
Students in a Non-Degree Undergraduate degree may not enroll.
Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale.

700 Level Courses

Introduces concepts, applications, and tools of systems analysis for water resources planning, management, and design. Problems including river basin planning, real-time hydro systems operations, water quality management, capacity expansion, urban drainage network design, and sanitary sewer design used to illustrate applications of systems analysis. Tools include optimization and simulation modeling and knowledge-based systems. Offered by Civil, Environ & Infrasr Engr. May not be repeated for credit.

Recommended Prerequisite: Graduate Standing in CEIE; CEIE641 or equivalent.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.
Students in a Non-Degree Undergraduate degree may not enroll.
Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale.

CEIE 762: Network Models for Transportation Planning. 3 credits.
Covers network models for transportation systems analysis - theory, mathematical structure, and applications of equilibrium, iterative, incremental, dynamic and stochastic equilibrium models. Also covers
data structures and heuristic methods for computer implementation of various algorithms such as shortest path and direction search algorithms; specialty network topics such as tracking and prohibition of turn movements, k-shortest path algorithms and select-link analysis. Offered by Civil, Environ & Infrastr Engr. May not be repeated for credit.

**Recommended Prerequisite:** CEIE 562 or 660; CEIE 601.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

**CEIE 763: Discrete Choice Analysis in Transportation.** 3 credits.
Utility theory and individual choice behavior; Binary choice model; Multinomial choice model; Characteristics of Probit and Logit models; Aggregate forecasting techniques; Travel survey and sampling; Test and choice of model structure; Correlation and nested Logit Model; Advanced models and estimation techniques; Travel, route choice and car ownership models. Offered by Civil, Environ & Infrastr Engr. May not be repeated for credit.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

**CEIE 764: Transportation Network Algorithms.** 3 credits.
This course focuses on network optimization algorithms for transportation and logistics systems. The application of these techniques to the determination of optimal routes and tours for various transportation and logistics applications is stressed. In addition to introducing a wide variety of network-related problems and existing techniques for solving a number of these problems, an important goal of the course is to help the class participants develop skills in creating and evaluating new algorithms and heuristics. Offered by Civil, Environ & Infrastr Engr. May not be repeated for credit.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate or Non-Degree.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

**CEIE 767: Traffic Engineering Modeling and Analysis.** 3 credits.
Covers fundamentals of traffic flow theory; shock-wave analysis; queuing theory; macroscopic traffic flow models on freeway and arterials; fundamentals of traffic simulation; car following models; network analysis based on traffic simulation models; and developing skills to select most appropriate model for given scenarios. Offered by Civil, Environ & Infrastr Engr. May not be repeated for credit.

**Recommended Prerequisite:** CEIE 562.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Satisfactory/No Credit scale.

**CEIE 795: Civil and Infrastructure Engineering Seminar.** 0 credits.
Invited speakers, faculty, and CEIE graduate students lecture on current topics and research. Fulfills seminar requirement for MS in civil and infrastructure engineering. Notes: Students must enroll in CEIE 795 each semester (fall and spring) for the duration of their MS studies. Offered by Civil, Environ & Infrastr Engr. May be repeated within the degree.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

**Schedule Type:** Seminar

**Grading:**
This course is graded on the Satisfactory/No Credit scale.

**CEIE 796: Directed Reading.** 1-3 credits.
Reading on specific topic under direction of faculty member. Notes: May be repeated with change in topic. Offered by Civil, Environ & Infrastr Engr. May be repeated within the degree.

**Recommended Prerequisite:** Graduate standing and permission of instructor.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

**Schedule Type:** Independent Study

**Grading:**
This course is graded on the Satisfactory/No Credit scale.
CEIE 798: Research Project in Civil Engineering. 3 credits. 
Analyzes and investigates contemporary problem in civil, environmental, and infrastructure engineering. Requires prior approval by faculty member who supervises student's work. Notes: Written report also required. Offered by Civil, Environ & Infrastr Engr. May not be repeated for credit.

Recommended Corequisite: CEIE 795.

Registration Restrictions: 
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

Schedule Type: Thesis

Grading: 
This course is graded on the Graduate Regular scale.

CEIE 799: Master's Thesis. 1-6 credits. 
Research project chosen and completed under guidance of graduate faculty member that results in technical report acceptable to three-faculty-member committee, and an oral defense. Offered by Civil, Environ & Infrastr Engr. May be repeated within the degree.

Recommended Prerequisite: 18 credits of graduate-level course work and permission of instructor.

Registration Restrictions: 
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

Schedule Type: Thesis

Grading: 
This course is graded on the Graduate Regular scale.

800 Level Courses

CEIE 800: Civil, Environmental, and Infrastructure Engineering Colloquium. 1 credit.
Seminar series required of Civil and Infrastructure PhD students. Features variety of speakers from universities, government, and private sectors. Topics include civil engineering technologies, research advancements, and policies. Doctoral students take 2 credits of CEIE 800 and make a presentation of their dissertation research at the seminar. No more than 1 credit per semester may be taken. Students eligible to register upon successful completion of qualifying exams. Offered by Civil, Environ & Infrastr Engr. May be repeated within the degree for a maximum 2 credits.

Registration Restrictions: 
Enrollment limited to students in the VS-PHД-CEIE program.

Enrollment is limited to Graduate level students.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

Schedule Type: Seminar

Grading: 
This course is graded on the Graduate Regular scale.

CEIE 890: Special Topics in Urban Transportation. 3 credits. 
Includes traffic safety analysis, simulation in transportation, intelligent transportation systems, advanced public transportation systems, congestion and travel demand management, geographic information systems and information technology, and innovative refinancing and public-private partnerships. Offered by Civil, Environ & Infrastr Engr. May be repeated within the degree for a maximum 6 credits.

Specialized Designation: Topic Varies

Recommended Prerequisite: CEIE 560 and 660 or equivalent; or permission of instructor.

Registration Restrictions: 
Enrollment is limited to Graduate level students.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

Schedule Type: Lecture

Grading: 
This course is graded on the Graduate Regular scale.

CEIE 892: Special Topics in Environmental and Water Resource Systems Engineering. 3 credits. 
Possible topics include studies in waste minimization; pollution prevention; hazardous waste management; wastewater management; air pollution control; solid waste management; environmental decision making; sustainability; water resource and environmental economics; wetlands management, design and construction; groundwater contamination modeling; stochastic hydrology; river basin planning and management; and water quality modeling. Offered by Civil, Environ & Infrastr Engr. May be repeated within the degree for a maximum 6 credits.

Specialized Designation: Green Leaf Focused Course, Topic Varies

Recommended Prerequisite: CEIE 601

Registration Restrictions: 
Enrollment is limited to Graduate level students.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

Schedule Type: Lecture

Grading: 
This course is graded on the Graduate Regular scale.

CEIE 894: Design and Inventive Engineering. 3 credits. 
Topics include Fundamentals: successful intelligence and creative intelligence, creative class, the Medici Effect, the Renaissance Man and Da Vinci's Seven Principles, engineering creativity; Design Engineering: system designing and architecting, designing as search, evolutionary designing, constraint search, constructive induction, Axiomatic and Inferential Design Theories; Inventive Engineering: Brainstorming, Synectics, Morphological Analysis, TRIZ, Visual Thinking, Inventive Design in Practice; Project Presentations. Notes: This is transdisciplinary course focused on creativity in engineering and science. Open to all graduate students in the Volgenau School of IT and Engineering; graduate students from other schools are encouraged to register with the
instructor's permission. Offered by Civil, Environ & Infrastr Engr. May not be repeated for credit.

**Registration Restrictions:**
Enrollment is limited to Graduate level students.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

**Schedule Type:** Seminar

**Grading:**
This course is graded on the Graduate Regular scale.

**CEIE 896:** Civil Engineering Research Topics. 3 credits.
Reading on specific topic under direction of faculty member. May be repeated with change in topic. Offered by Civil, Environ & Infracr Engr. May be repeated within the degree for a maximum 6 credits.

**Specialized Designation:** Topic Varies

**Recommended Prerequisite:** Admission into CEIE PhD program, or permission of instructor.

**Registration Restrictions:**
Enrollment is limited to Graduate level students.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

**Schedule Type:** Independent Study

**Grading:**
This course is graded on the Graduate Regular scale.

**900 Level Courses**

**CEIE 990:** Civil and Infrastructure Dissertation Topic Presentation. 1 credit.
Opportunity for PhD students to present research proposal for critique. Covers presentation of research topic for PhD in Civil and Infrastructure Engineering. Students complete dissertation research proposal. May be repeated with change in topic, but degree credit is given only once. Offered by Civil, Environ & Infracr Engr. May not be repeated for credit. Equivalent to STAT 990.

**Recommended Prerequisite:** Graduate Standing; completion of all course work required for PhD in Civil and Infrastructure Engineering or permission of instructor.

**Registration Restrictions:**
Enrollment limited to students in the VS-PHD-CEIE program.

Enrollment is limited to Graduate level students.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

**Schedule Type:** Research

**Grading:**
This course is graded on the Satisfactory/No Credit scale.

**CEIE 998:** Doctoral Dissertation Proposal. 1-12 credits.
Work on research proposal that forms basis for doctoral dissertation. May be repeated for credit. Notes: No more than 24 credits of CEIE 998 and 999 may be applied to doctoral degree requirements. Offered by Civil, Environ & Infracr Engr. May be repeated within the degree.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy.

Enrollment is limited to Graduate level students.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

**Schedule Type:** Dissertation

**Grading:**
This course is graded on the Satisfactory/No Credit scale.

**CLAS 240:** Greek and Latin Elements in English. 3 credits.
Studies formation of English vocabulary derived from Greek and Latin prefixes, stems, and suffixes to increase word power in English (vocabulary, style). Special emphasis on bioscientific, medical, and legal terminology. Intended for native and non-native speakers of English. Literary texts illustrate word analyses, vocabulary uses. Offered by Modern & Classical Languages. Limited to three attempts.

**Recommended Prerequisite:** ENGL 101/ENGH 101, or equivalent or permission of instructor.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale.

**CLAS 250:** Classical Mythology. 3 credits.
Illustrates role of classical myths in classical and modern literature and art. Notes: Coursework in English. Offered by Modern & Classical Languages. Limited to three attempts.

**Mason Core:** Literature

**Recommended Prerequisite:** ENGL 101/ENGH 101, or equivalent, or permission of instructor.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale.
Introduces history, culture, and literature of Greece and Rome through close readings of central passages from classical literature dealing with some of the most important aspects of human existence. Illustrates importance of classical antiquity for the Western tradition. Notes: Coursework in English. Offered by Modern & Classical Languages. Limited to three attempts.

*Mason Core*: Literature

**Recommended Prerequisite**: ENGL 101/ENGH 101 or equivalent or permission of instructor.

**Schedule Type**: Lecture

**Grading**: This course is graded on the Undergraduate Regular scale.

---

**300 Level Courses**

CLAS 330: *Roman Law and Society*. 3 credits.
Introduces the Roman legal system, from the Law of the Twelve Tables to Justinian's Digest. Explores the fundamental concepts of Roman Law and its importance for Roman society and the legal history of the West. Offered by Modern & Classical Languages. Limited to three attempts.

**Schedule Type**: Lecture

**Grading**: This course is graded on the Undergraduate Regular scale.

CLAS 340: *Greek and Roman Epic*. 3 credits.
Examines development of classical epic as genre, from beginnings with Homer to transformations in the works of later Greek and Roman authors. Notes: Coursework in English. Offered by Modern & Classical Languages. Limited to three attempts.

**Mason Core**: Literature

**Recommended Prerequisite**: ENGL 101/ENGH 101 or equivalent or permission of instructor.

**Schedule Type**: Lecture

**Grading**: This course is graded on the Undergraduate Regular scale.

---

CLAS 350: *Greek and Roman Tragedy*. 3 credits.
Follows development of tragedy from its origins to the works of Aeschylus, Sophocles, and Euripides, and its reappearance in the Roman world in the tragedies of Seneca. Considers influence of Greek tragedy on later cultures. Notes: Coursework in English. Offered by Modern & Classical Languages. Limited to three attempts.

**Mason Core**: Literature

**Recommended Prerequisite**: ENGL 101/ENGH 101 or equivalent or permission of instructor.

**Schedule Type**: Lecture

**Grading**: This course is graded on the Undergraduate Regular scale.

---

CLAS 360: *Greek and Roman Comedy*. 3 credits.
Studies forms, contexts, and developments of comedy as a dramatic form in Greco-Roman world. Traces development of New Comedy in Hellenistic age and translation and adaptation of New Comedy by Roman dramatists Plautus and Terence. Notes: Coursework in English. Offered by Modern & Classical Languages. Limited to three attempts.

**Mason Core**: Literature

**Recommended Prerequisite**: ENGL 101/ENGH 101 or equivalent or permission of instructor.

**Schedule Type**: Lecture

**Grading**: This course is graded on the Undergraduate Regular scale.

---

CLAS 380: *Greek and Roman Novels*. 3 credits.
Examines novels written in antiquity, and influences on postclassical and modern literature. Emphasizes works of Longus, Heliodorus, Petronius, and Apuleius. Notes: Coursework in English. Offered by Modern & Classical Languages. Limited to three attempts.

**Mason Core**: Literature

**Recommended Prerequisite**: ENGL 101/ENGH 101 or equivalent or permission of instructor.

**Schedule Type**: Lecture

**Grading**: This course is graded on the Undergraduate Regular scale.

---

**310 Level Courses**

CLAS 390: *Topics in Classical Literature and Culture*. 3 credits.
Studies forms, contexts, and developments of distinctive literary genre or cultural phenomenon in the Greco-Roman world. Notes: May be repeated for credit when topic is different. Offered by Modern & Classical Languages. May be repeated within the degree.

Specialized Designation: Topic Varies

**Recommended Prerequisite**: ENGL 101/ENGH 101 or permission of instructor.

**Schedule Type**: Lecture

**Grading**: This course is graded on the Undergraduate Regular scale.

---

**Climate Dynamics (CLIM)**

**100 Level Courses**

Survey of the scientific and societal issues associated with weather and climate variability and change. Examines physical phenomena observed in the Earth's weather and climate, providing sufficient scientific and technical background to enable students to critically examine arguments being discussed by policymakers and the public at large. Also reviews the current debate on climate change from a scientific point of view with a focus on those aspects that have the largest potential impact on global society. Offered by Atmospheric/Oceanic/Earth Sci. Limited to three attempts.

**Mason Core**: Natural Science Overview, Encore: Sustainability

**Specialized Designation**: Green Leaf Related Course

**Schedule Type**: Lecture
Grading:
This course is graded on the Undergraduate Regular scale.

CLIM 102: Introduction to Global Climate Change Science. 4 credits.
The scientific basis of computer models that simulate past and present climate and predict future climate change. How complex models are built, tested, and interpreted to better understand physical, chemical, and biological processes, how uncertainty is managed. Students conduct laboratory experiments through an online interface and apply results to policy and planning. Designated a Green Leaf Course. Notes: Computer models are used in the lab. Offered by Atmospheric/Oceanic/Earth Sci. Limited to three attempts.

Mason Core: Natural Science with Lab, Encore: Sustainability
Specialized Designation: Green Leaf Related Course
Recommended Prerequisite: Basic math skills (Geometry, Algebra).
Schedule Type: Laboratory, Lecture
Grading:
This course is graded on the Undergraduate Regular scale.

CLIM 111: Introduction to the Fundamentals of Atmospheric Science. 3 credits.
An overview of the Earth’s atmosphere, its history, and the physical and chemical processes that determine its characteristics. The focus is on key concepts from thermodynamics, radiation, chemistry, and dynamics that are essential for understanding the state, variability, and long term evolution of the atmosphere, especially in the context of comparisons with other planetary atmospheres. Offered by Atmospheric/Oceanic/Earth Sci. Limited to three attempts. Equivalent to PHYS 111.

Mason Core: Natural Science with Lab, Natural Science Overview, Encore: Sustainability
Specialized Designation: Green Leaf Related Course
Schedule Type: Lecture
Grading:
This course is graded on the Undergraduate Regular scale.

CLIM 112: Introduction to the Fundamentals of Atmospheric Science Lab. 1 credit.
Laboratory course associated with PHYS 111/CLIM 111. Study of the Earth’s atmosphere based on concepts taken from thermodynamics, radiation transport, chemistry, and dynamics. Offered by Atmospheric/Oceanic/Earth Sci. Limited to three attempts. Equivalent to PHYS 112.

Mason Core: Natural Science with Lab, Encore: Sustainability
Specialized Designation: Green Leaf Related Course
Registration Restrictions:
Required Prerequisites: PHYS 111* or CLIM 111*C.
* May be taken concurrently.
C Requires minimum grade of C.
Schedule Type: Laboratory
Grading:
This course is graded on the Undergraduate Regular scale.

300 Level Courses
CLIM 301: Weather Analysis and Prediction. 4 credits.
Large-scale behavior of mid-latitude weather systems. Includes coupling of synoptic motion to mesoscale processes that lead to significant weather events. Introduces the observational network, numerical weather models, and prediction. Laboratory portion gives practical experience in weather analysis, prediction, and technology currently used for visualization and analysis. Offered by Atmospheric/Oceanic/Earth Sci. Limited to three attempts.

Recommended Prerequisite: MATH 113 or equivalent; one of CLIM/PHYS 111/112 or EOS 121 or GGS 121.
Schedule Type: Laboratory, Lecture
Grading:
This course is graded on the Undergraduate Regular scale.

CLIM 312: Physical Climatology. 3 credits.
Quantitative description of nature and theory of the climate system, dynamics of atmosphere-ocean-land surface, internal interactions and response to external forcing, description of the climate record and simple climate models. Offered by Atmospheric/Oceanic/Earth Sci. Limited to three attempts. Equivalent to GGS 312.

Recommended Prerequisite: CLIM/PHYS 111/112 OR GGS 121; and PHYS 243,244, or permission of instructor.
Schedule Type: Lecture
Grading:
This course is graded on the Undergraduate Regular scale.

CLIM 314: Severe and Extreme Weather. 3 credits.
Behavior of weather events ranging from small scale (e.g., thunderstorms and tornadoes) to mesoscale (e.g., fronts and hurricanes). Introduces the dynamical and physical processes, atmospheric boundary layer processes, and coupling between different spatial scales that create and shape severe and localized weather events. Designated a Green Leaf Course. Offered by Atmospheric/Oceanic/Earth Sci. Limited to three attempts. Equivalent to GGS 314.

Specialized Designation: Green Leaf Related Course
Recommended Prerequisite: MATH 113 or equivalent; CLIM/PHYS 111/112 or EOS 121 or GGS 121.
Schedule Type: Lecture
Grading:
This course is graded on the Undergraduate Regular scale.

CLIM 319: Air Pollution. 3 credits.
Description of major types of air pollution and introduction to how their characteristics are influenced by interaction with the atmosphere. Topics include sources and distribution of pollution from local to global scales, effects of radiation and wind on pollution, modeling of plume dispersion, and pollution effects on climate. Designated a Green Leaf Course. Offered by Atmospheric/Oceanic/Earth Sci. Limited to three attempts.

Specialized Designation: Green Leaf Related Course
Recommended Prerequisite: CLIM 111 or GGS 121.
Schedule Type: Lecture
Grading:
This course is graded on the Undergraduate Regular scale.

CLIM 390: Topics in Climate Research. 1-4 credits.
Selected topics not covered in fixed content courses. May be included for credit by AOES majors in the 45 credits of courses required for BS degree. Offered by Atmospheric/Oceanic/Earth Sci. May be repeated within the degree for a maximum 6 credits.

Specialized Designation: Topic Varies

Recommended Prerequisite: 15 credits of AOES courses within concentration.

Schedule Type: Independent Study

Grading:
This course is graded on the Undergraduate Regular scale.

400 Level Courses

CLIM 408: Senior Research. 3 credits.
Independent research under guidance of faculty member on a research project in numerical, experimental, observational, or theoretical atmospheric or climate-related research. A written report on the project is required. Notes: May be repeated with department permission. Offered by Atmospheric/Oceanic/Earth Sci. May be repeated within the degree for a maximum 6 credits.

Specialized Designation: Writing Intensive in Major

Recommended Prerequisite: 15 credits of AOES courses within major.

Schedule Type: Research

Grading:
This course is graded on the Undergraduate Regular scale.

CLIM 409: Research Internship. 3 credits.
On-the-job experience for AOES majors in industry or government laboratories, including summer research programs. Students work in observational, experimental, or theoretical research, and prepare a written report at the end of the internship. Notes: May be repeated with department permission. Offered by Atmospheric/Oceanic/Earth Sci. May be repeated within the degree for a maximum 6 credits.

Recommended Prerequisite: 75 credits. 15 credits of courses in major and permission of department.

Schedule Type: Independent Study

Grading:
This course is graded on the Undergraduate Regular scale.

CLIM 411: Atmospheric Dynamics. 3 credits.
Observational bases and fundamentals of fluid dynamic principle for understanding atmospheric motions across multiple spatial and temporal scales; covers basic conservation laws of mass, momentum, and energy; concepts of circulation and vorticity; balanced atmospheric flows, e.g. geostrophic wind and shear, thermal wind; quasi-geostrophic and isentropic potential vorticity analysis for mid-latitude cyclones and fronts. Offered by Atmospheric/Oceanic/Earth Sci. Limited to three attempts.

Recommended Prerequisite: CLIM 111 and MATH 213, or permission of instructor.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale.

CLIM 412: Physical Oceanography. 3 credits.
Reviews global patterns of temperature, salinity, currents and waves in the world's oceans and how these patterns influence marine biota, climate, and human activity. Introduces key concepts which explain physical features of the ocean ranging from microscopic turbulence to global circulation. Designated a Green Leaf Course. Offered by Atmospheric/Oceanic/Earth Sci. Limited to three attempts. Equivalent to GEOL 412.

Specialized Designation: Green Leaf Related Course

Recommended Prerequisite: MATH 113 or 115 and PHYS 160 or 253; or permission of instructor.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale.

CLIM 429: Atmospheric Thermodynamics. 3 credits.
Thermodynamics of the atmosphere, properties of dry and moist air, air parcel as a thermodynamic system, atmospheric stability and convection, cloud formation and stability indices. Offered by Atmospheric/Oceanic/Earth Sci. Limited to three attempts.

Recommended Prerequisite: CLIM 111, MATH 114 and PHYS 260; or permission of instructor.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale.

CLIM 438: Atmospheric Chemistry. 3 credits.
Reviews fundamental chemical processes of the Earth's atmosphere including chemical cycles, thermodynamics, reaction kinetics, photochemistry, radiative balance, ozone chemistry and environmental issues, including air pollution, acid rain and global change. Includes some review of extraterrestrial atmospheric chemistry. Offered by Atmospheric/Oceanic/Earth Sci. Limited to three attempts. Equivalent to CHEM 438.

Recommended Prerequisite: CHEM 331 and 332 or permission of instructor.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale.

CLIM 440: Climate Dynamics. 3 credits.
Structure, dynamics and thermodynamics of atmospheric and oceanic circulations that maintain the climate. Role of the large scale transport of energy, moisture and angular momentum. Relationships of large scale circulation to weather and weather extremes, and implications for past and future climates. Offered by Atmospheric/Oceanic/Earth Sci. Limited to three attempts.

Recommended Prerequisite: MATH 213, MATH 214, and CLIM 411.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale.

CLIM 456: Introduction to Atmospheric Radiation. 3 credits.
Provides fundamentals, physical understanding and quantitative analysis of radiative transfer in the atmosphere, discusses radiation processes-reflection, refraction, absorption, transmission, emission, and scattering and introduces tools for atmospheric radiative transfer. Provide students the basics for more advanced topics such as remote sensing or satellite meteorology. Offered by Atmospheric/Oceanic/Earth Sci. Limited to three attempts. Equivalent to GGS 456.

Recommended Prerequisite: CLIM 111, MATH 114, and PHYS 260 or permission of instructor.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale.

CLIM 470: Numerical Weather Prediction. 3 credits.
Concepts and techniques of numerical prediction of weather, including the numerical models used and the rationale for large suites of meteorological forecasts. Sources of errors in the forecast: errors in the initial conditions and in the numerical weather prediction models. Interpretation of model output. Offered by Atmospheric/Oceanic/Earth Sci. Limited to three attempts.

Recommended Prerequisite: MATH 213, MATH 214, and CLIM 411.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale.

500 Level Courses

CLIM 511: Atmospheric Dynamics. 3 credits.
Observational bases and fundamentals of fluid dynamic principles for understanding atmospheric motions across multiple spatial and temporal scales; covers basic conservation laws of mass, momentum, and energy; concepts of circulation and vorticity; balanced atmospheric flows, e.g. geostrophic wind and shear, thermal wind, quasi-geostrophic and isentropic potential vorticity analysis for mid-latitude cyclones and fronts. Offered by Atmospheric/Oceanic/Earth Sci. May not be repeated for credit.

Recommended Prerequisite: MATH 213 or equivalent.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale.

Recommended Prerequisite: MATH 113 or MATH 115; PHYS 160 or PHYS 243; or permission of instructor.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

CLIM 610: Introduction to the Physical Climate System. 3 credits.
Provides modern understanding of ocean, atmosphere, and land based on fundamental physical laws. Describes current climate and physical processes by which climate is maintained. Covers theoretical models of general circulation of atmosphere, including time mean and transient behavior. Describes basics of ocean circulation and interactions between ocean and atmosphere. Reviews past climate change, stratosphere and its interactions with troposphere, and role of land processes in modulating climate. Offered by Atmospheric/Oceanic/Earth Sci. May not be repeated for credit.

Recommended Prerequisite: BS or MS in mathematics or a physical science, or permission of instructor.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale.

CLIM 614: Land-Climate Interactions. 3 credits.
Interdisciplinary course providing detailed description of surface energy and water balance over land and radiative and turbulent transfer. Introduces numerical techniques for modeling land surface and applications in weather, climate, and hydrologic forecasting and simulation. Includes hands-on experience with land surface models in computer laboratory, including sensitivity experiments to reinforce theoretical concepts. Exposure to contemporary research through reading and reviewing seminal journal papers. Offered by Atmospheric/Oceanic/Earth Sci. May not be repeated for credit.

Recommended Prerequisite: BS or MS in mathematics or physical science, or permission of instructor.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale.

CLIM 631: Urban Climate. 3 credits.
Provides a coherent system to describe, study, and understand the essentials of urban (micro) climates. Explores the physical principals governing the creation of distinct urban climates. Explains ways the built environment interacts with the atmosphere over scales that extend from walls and roofs up to whole cities. Also considers the effects of weather and climate on the city. Offered by Atmospheric/Oceanic/Earth Sci. May not be repeated for credit.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture
Grading:
This course is graded on the Graduate Regular scale.

CLIM 670: Earth System Modeling. 3 credits.
An Earth system model is composed of models simulating the evolution of the atmosphere, ocean, cryosphere, biosphere, and other components. Course introduces the component models, their interactions, and how they are used to predict the behavior of weather and climate on time scales that range from hours to centuries. Students will learn technical and scientific skills necessary to run an Earth system model and evaluate its output. Offered by Atmospheric/Oceanic/Earth Sci. May not be repeated for credit.

Recommended Prerequisite: Computer programming experience

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture
Grading:
This course is graded on the Graduate Regular scale.

CLIM 690: Scientific Basis of Climate Change. 3 credits.
A rigorous treatment of global warming, especially with regard to anthropogenic causes, based on the IPCC 4th Assessment Report "The Physical Science Basis". Topics include 1) Overview of observed climate, 2) Variability of climate, 3) Modeling of climate response to greenhouse gas forcing, 4) Greenhouse gases, chemistry, and aerosols, and 5) Projections of climate change and its societal impact. Offered by Atmospheric/Oceanic/Earth Sci. May not be repeated for credit.

Recommended Prerequisite: BS or MS in a natural science or engineering, or permission of instructor.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture
Grading:
This course is graded on the Graduate Regular scale.

700 Level Courses

CLIM 700: Climate Comprehensive Exam. 1 credit.
Preparation for and completion of written comprehensive exam, on a climate-related subject, within AOES department. The exam is part of the degree requirements in lieu of writing a master's thesis. Instructor should be the chair of the examination committee. The exam committee will specify exam content. Offered by Atmospheric/Oceanic/Earth Sci. May be repeated within the degree for a maximum 2 credits.

Recommended Prerequisite: At least 15 graduate credits, approved project proposal, and permission of major advisor or chair of the examination committee.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Independent Study
Grading:
This course is graded on the Satisfactory/No Credit scale.

CLIM 711: Introduction to Atmospheric Dynamics. 3 credits.
Covers basic conservation laws of mass, momentum, and energy and scaling analysis of equation of motion and thermodynamic equation. Discusses balanced flows in atmosphere, such as geostrophic wind and its vertical shear, and thermal wind relationship. Also explores circulation and vorticity; role of atmospheric boundary layer in mass, momentum, and energy transfer; synoptic scale motions; and role of gravity and Rossby waves in controlling general circulation of atmosphere. Offered by Atmospheric/Oceanic/Earth Sci. May not be repeated for credit.

Recommended Prerequisite: BS or MS in mathematics or a physical science, or permission of instructor.

Registration Restrictions:
Geophysical Fluid Dynamics. 3 credits.
Introduces geophysical fluid dynamics, the study of rotating stratified flows. Covers hydrostatics; equations of motion, gravity wave dynamics, and stratified flow; effects of rotation, midlatitude dynamics, Rossby number and quasigeostrophic expansion; beta plane approximation; and equatorial Kelvin and Rossby waves. Offered by Atmospheric/Oceanic/Earth Sci. May not be repeated for credit.

Recommended Prerequisite: CLIM 711 or permission of instructor.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale.

CLIM 752: Ocean General Circulation. 3 credits.
Description and theory of large-scale ocean circulation and how it affects climate. Focus is on ubiquitous flow structures such as gyres, equatorial currents, and meridional overturning cells. Examines how the circulation follows from wind and thermohaline forcing, as well as physical principles. The influence of the circulation on heat transport and climate variability is also discussed. Conceptual guideposts include barotropic gyres, Ekman cells, potential vorticity, western intensification, the interplay of gravity and the Earth’s rotation, advective...
diffusive balance, multiple flow states, and Rossby waves. Offered by Atmospheric/Oceanic/Earth Sci. May not be repeated for credit.

**Recommended Prerequisite:** CLIM 712 or 711 or equivalent, or permission of instructor.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

**CLIM 753: General Circulation of the Atmosphere.** 3 credits.
Overview and several theoretical perspectives of atmospheric transport of energy, moisture, and angular momentum, and how these processes fundamentally affect the climate on various time scales. Offered by Atmospheric/Oceanic/Earth Sci. May not be repeated for credit.

**Recommended Prerequisite:** CLIM 710 and CLIM 711.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

**CLIM 754: Elements of the Tropical Climate System.** 3 credits.
Observations and dynamics of key processes of tropical weather and climate. Topics include: structure of the tropical atmosphere and ocean, convection, dynamics of tropical waves in the atmosphere and ocean, tropical intraseasonal variability, tropical the global monsoons, cyclones, and stratospheric quasi-biennial oscillation. Offered by Atmospheric/Oceanic/Earth Sci. May not be repeated for credit.

**Recommended Prerequisite:** CLIM 711.

**Recommended Corequisite:** CLIM 710.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

**CLIM 759: Topics in Climate Dynamics.** 3 credits.
Covers selected topics in climate dynamics not covered in fixed-content courses. Notes: May be repeated for credit when offered with different content. Offered by Atmospheric/Oceanic/Earth Sci. May be repeated within the term for a maximum 9 credits.

**Specialized Designation:** Topic Varies

**Recommended Prerequisite:** Permission of instructor.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

**CLIM 761: Advanced Atmospheric Predictability and Prediction.** 3 credits.
Covers the theory and practice of predicting atmospheric circulation from daily weather to subseasonal weather regimes to seasonal climate. Discusses atmospheric data assimilation, the dynamics of rapidly amplifying modes, the role of large-scale instability and weather regime dynamics, and the role of boundary conditions. Students will design and carry out ensemble forecasts using a range of numerical models. Offered by Atmospheric/Oceanic/Earth Sci. May not be repeated for credit.

**Registration Restrictions:**
**Required Prerequisites:** CLIM 711B and 751B.

B: Requires minimum grade of B-.

Enrollment limited to students with a class of Advanced to Candidacy, Graduate or Non-Degree.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

**CLIM 762: Statistical Methods in Climate Research.** 3 credits.
Introduction to a core set of statistical methods that have proven useful to modern climate and predictability research. Topics include detecting and attributing climate change, describing climate variability with empirical orthogonal functions, statistical forecasting with regression and time series models, and identifying coupled patterns of variability with canonical correlation analysis. Offered by Atmospheric/Oceanic/Earth Sci. May not be repeated for credit.

**Recommended Prerequisite:** Undergraduate level linear algebra and STAT 344 (or equivalent), or permission of instructor.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

**CLIM 763: Advanced Statistical Methods in Climate Research.** 3 credits.
Introduction to multivariate statistical techniques commonly used in climate science, with special emphasis on estimation in large dimensional spaces. Topics include: multivariate regression, canonical correlation analysis, predictable component analysis, field significance tests, data assimilation (especially the ensemble Kalman Filter), discriminant analysis, and multivariate detection and attribution of climate change. Offered by Atmospheric/Oceanic/Earth Sci. May not be repeated for credit.

**Recommended Prerequisite:** CLIM 762 or permission of instructor.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

**CLIM 796:** Directed Reading and Research. 1-6 credits.
Reading and research on a specific topic in climate dynamics under the direction of a faculty member. Offered by Atmospheric/Oceanic/Earth Sci. May be repeated within the term for a maximum 6 credits.

**Recommended Prerequisite:** Admission into the climate dynamics doctoral program and permission of instructor.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Research

**Grading:**
This course is graded on the Graduate Regular scale.

**CLIM 798:** Master's Climate Research Project. 1-6 credits.
Research or literature-review project in climate science or related topic chosen and completed under the guidance of a faculty member. Proposal required before enrollment. Technical report acceptable to student's project committee required for completion. Offered by Atmospheric/Oceanic/Earth Sci. May be repeated within the degree for a maximum 12 credits.

**Recommended Prerequisite:** At least 15 graduate credits, approved project proposal, and permission of major advisor or chair of the examination committee.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Thesis

**Grading:**
This course is graded on the Satisfactory/No Credit scale.

**CLIM 799:** Master's Thesis in Climate. 1-6 credits.
Research project in climate science or related topic chosen and completed under the supervision of a faculty member. Resulting thesis acceptable to student's committee and potentially publishable is required for completion. Offered by Atmospheric/Oceanic/Earth Sci. May be repeated within the degree for a maximum 18 credits.

**Recommended Prerequisite:** Degree candidacy, thesis proposal approved by thesis committee, and permission of major advisor or instructor.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Thesis

**Grading:**
This course is graded on the Satisfactory/No Credit scale.

This course is graded on the Satisfactory/No Credit scale.

**900 Level Courses**

**CLIM 991:** Climate Dynamics Seminar. 1 credit.
Presentations in climate dynamics field by Mason faculty and invited speakers. Notes: A maximum of 3 credits may be applied toward the climate dynamics PhD. Offered by Atmospheric/Oceanic/Earth Sci. May be repeated within the degree.

**Registration Restrictions:**
Enrollment is limited to Graduate level students.

**Schedule Type:** Seminar

**Grading:**
This course is graded on the Graduate Regular scale.

**CLIM 996:** Doctoral Reading and Research. 1-6 credits.
Reading and research on a specific topic in climate dynamics under the direction of a faculty member. Offered by Atmospheric/Oceanic/Earth Sci. May be repeated within the term for a maximum 6 credits.

**Recommended Prerequisite:** Admission into the climate dynamics doctoral program and permission of instructor.

**Registration Restrictions:**
Enrollment is limited to Graduate level students.

**Schedule Type:** Research

**Grading:**
This course is graded on the Graduate Special scale.

**CLIM 997:** Doctoral Qualification. 3 credits.
Students develop a project that demonstrates their potential to do scientific research. Each student either proposes a research project, or submits an original manuscript that is suitable for a peer-reviewed scientific journal in the subject area of Climate Dynamics. Grading is based on an oral presentation and written work. Offered by Atmospheric/Oceanic/Earth Sci. May not be repeated for credit.

**Recommended Prerequisite:** Permission of Instructor

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy or Graduate.

**Schedule Type:** Independent Study

**Grading:**
This course is graded on the Graduate Regular scale.

**CLIM 998:** Doctoral Dissertation Proposal. 1-12 credits.
Covers development of research proposal under guidance of dissertation director and doctoral committee. Proposal forms basis for climate dynamics doctoral dissertation. Notes: Course may be repeated, but no more than 12 credits of CLIM 998 may be applied to doctoral degree requirements. Offered by Atmospheric/Oceanic/Earth Sci. May be repeated within the degree.

**Recommended Prerequisite:** Doctoral standing and permission of advisor.

**Registration Restrictions:**
Enrollment is limited to Graduate level students.

Enrollment limited to students in the College of Science college.
**Recommended Prerequisite:** Admission to doctoral candidacy and permission of advisor.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy.

Enrollment is limited to Graduate level students.

Enrollment limited to students in the College of Science college.

**Schedule Type:** Independent Study

**Grading:**
This course is graded on the Satisfactory/No Credit scale.

---

**College of Science (COS)**

**100 Level Courses**

**COS 120: Introduction to Research.** 1-3 credits.
Introduction to research, involving work on a research project. May involve lab study, computer modeling and analysis, mathematics, or other original research as appropriate. Research formulated and completed under instructor's guidance. Culminates in a written or oral final report. Offered by College of Science. May be repeated within the degree for a maximum 6 credits.

**Schedule Type:** Independent Study

**Grading:**
This course is graded on the Undergraduate Regular scale.

---

**300 Level Courses**

**COS 300: Professional Preparation for STEM Disciplines.** 3 credits.
Prepares any undergraduate major that is interested in enhancing their competences in science writing, technical communication and social media skills. Students will be prepared to become more competitive in the next generation workforce. Covers these topics: drafting and revising papers, dissecting scientific journal articles, communicating science to non-scientists, creating a podcast, writing grant proposals, and preparing CVs, resume and "elevator pitches." By the end of the course, the student will not only be familiar but more confident in effectively disseminating information in their own field of interest. Offered by College of Science. Limited to three attempts.

**Recommended Prerequisite:** ENGH 302 or its equivalent and COMM 100 or COMM 101 or their equivalents. Students should be at the sophomore level or above.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale.

---

**400 Level Courses**

**COS 400: Problem Solving and Leadership in STEAM.** 3 credits.
In this course, participants will experience a hands-on approach to incorporating problem solving principles into the STEAM (Science, Technology, Engineering, Arts and Mathematics) disciplines and consider implications for innovations in research, development, and entrepreneurship. This course consists of face to face meetings, follow up webinars, a collaborative project, and the opportunity for internship. Notes: This course may culminate with international travel; locations will vary by semester. Offered by College of Science. Limited to three attempts.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale.

**COS 401: RS: Discipline Based Education Research.** 2-3 credits.
Students will conduct an original Discipline-Based Education Research (DBER) project with their faculty mentor and STEM Accelerator faculty mentor. Offered by College of Science. Limited to three attempts.

**Specialized Designation:** Research/Scholarship Intensive

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale.

**COS 402: Special Topics in Science.** 1-4 credits.
Explore an array of exciting topics in science; the course's topic will vary by section offered. Offered by College of Science. May be repeated within the term for a maximum 8 credits.

**Specialized Designation:** Topic Varies

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale.

---

**500 Level Courses**

**COS 500: Professional Preparation for STEM Disciplines.** 3 credits.
Prepares graduate students that are interested in enhancing their competences in science writing, technical communication and social media skills. Students will be prepared to become more competitive in the next generation workforce. Covers these topics: drafting and revising papers, dissecting scientific journal articles, communicating science to non-scientists, creating a podcast, writing grant proposals, and preparing CVs, resume and "elevator pitches." By the end of the course, the student will not only be familiar but more confident in effectively disseminating information in their own field of interest. Offered by College of Science. May not be repeated for credit.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

---

**600 Level Courses**

**COS 600: Multidisciplinary Problem Solving and Leadership.** 3 credits.
In this course, participants will experience a hands-on approach to incorporating problem solving principles into the STEAM (Science, Technology, Engineering, Arts and Mathematics) disciplines and
consider implications for innovations in research, development, and entrepreneurship. This course consists of face to face meetings, follow up webinars, a collaborative project, and the opportunity for internship. Notes: This course may culminate with international travel; locations will vary by semester. Offered by College of Science. May not be repeated for credit.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture
Grading:
This course is graded on the Graduate Regular scale.

CVPA 105: Special Topics in the Arts. 1-3 credits.
Exploration of topical studies on the arts. Notes: Subject matter varies. May be repeated when taken under different topics. Offered by Coll Visual & Performing Arts. May be repeated within the term for a maximum 12 credits.

Specialized Designation: Topic Varies
Schedule Type: Lecture
Grading:
This course is graded on the Undergraduate Regular scale.

300 Level Courses

CVPA 308: Cross-Cultural Arts Appreciation. 3 credits.
Provides cumulative arts experience by tying subject matter to major cultural production of Center for the Arts. Notes: Subject matter varies. May be repeated when taken under different topics. Offered by Coll Visual & Performing Arts. May be repeated within the term for a maximum 12 credits.

Schedule Type: Lecture
Grading:
This course is graded on the Undergraduate Regular scale.

CVPA 399: Special Topics in the Arts. 1-6 credits.
In-depth presentation and exploration of topical studies on the arts. Notes: Subject matter varies. May be repeated when taken under different topics. Offered by Coll Visual & Performing Arts. May be repeated within the term for a maximum 24 credits.

Specialized Designation: Topic Varies
Schedule Type: Lecture
Grading:
This course is graded on the Undergraduate Regular scale.

College of Visual and Performing Arts (CVPA)

100 Level Courses

CVPA 101: Arts Pass. 2 credits.
Introduction to appreciation of the arts through lectures and demonstrations in visual art, music, dance, and theater. Emphasizes aesthetic principles in modern society. Students attend performances and exhibitions and develop analytical skills through written journal and discussion. Offered by Coll Visual & Performing Arts. May be repeated within the degree for a maximum 4 credits.

Schedule Type: Lecture
Grading:
This course is graded on the Undergraduate Regular scale.

CVPA 102: Experiencing the Arts. 3 credits.
Reserved for high school students enrolled in CVPA. Introduces collaborative and interdisciplinary arts experiences in visual art, music, dance, theater, film, and media through daily intensive immersion in the arts for two and a half weeks. Offered by Coll Visual & Performing Arts. Limited to three attempts.

Schedule Type: Lecture
Grading:
This course is graded on the Undergraduate Regular scale.

CVPA 308: Cross-Cultural Arts Appreciation. 3 credits.
Provides cumulative arts experience by tying subject matter to major cultural production of Center for the Arts. Notes: Subject matter varies. May be repeated when taken under different topics. Offered by Coll Visual & Performing Arts. May be repeated within the term for a maximum 12 credits.

Specialized Designation: Topic Varies
Schedule Type: Lecture
Grading:
This course is graded on the Undergraduate Regular scale.

CVPA 399: Special Topics in the Arts. 1-6 credits.
In-depth presentation and exploration of topical studies on the arts. Notes: Subject matter varies. May be repeated when taken under different topics. Offered by Coll Visual & Performing Arts. May be repeated within the term for a maximum 24 credits.

Specialized Designation: Topic Varies
Schedule Type: Lecture
Grading:
This course is graded on the Undergraduate Regular scale.

CVPA 430: Topics in Arts and Wellness. 1-3 credits.
In-depth presentation and exploration of topical studies in arts and wellness or related areas such as injury prevention, performance enhancement, and health and wellness training. Notes: Topic depends on instructor. May be repeated if taken under different topics. Offered by Coll Visual & Performing Arts. May be repeated within the degree for a maximum 9 credits.

Specialized Designation: Topic Varies
Recommended Prerequisite: 90 hours or permission of instructor, concurrent enrollment is permitted.

Schedule Type: Lecture
Grading:
This course is graded on the Undergraduate Regular scale.

CVPA 489: Field Experience in the Arts. 3-6 credits.
Apprenticeship, internship, or project with organization or individual in the arts. Must be prearranged with division director before enrollment. Offered by Coll Visual & Performing Arts. May be repeated within the term for a maximum 6 credits.
Recommended Prerequisite: Junior standing and completion of six credits in CVPA courses in the area of residency, CVPA 305, or permission of instructor.

Schedule Type: Internship

Grading: This course is graded on the Undergraduate Regular scale.

CVPA 499: Research/Performance/Topics in the Arts. 3-6 credits. Advanced research, performance, or exploration of topical studies in arts. Offered by Coll Visual & Performing Arts. May be repeated within the degree for a maximum 6 credits.

Specialized Designation: Topic Varies

Recommended Prerequisite: Permission of department chair.

Schedule Type: Independent Study

Grading: This course is graded on the Undergraduate Regular scale.

500 Level Courses

CVPA 530: Topics in Arts and Wellness. 1-3 credits. In-depth presentation and exploration of topical studies in arts and wellness and/or related areas (e.g., injury prevention, performance enhancement, health and wellness training to educators and arts professionals). Topic depends on instructor. Notes: May be repeated if taken under different topics. Offered by Coll Visual & Performing Arts. May be repeated within the degree for a maximum 9 credits.

Specialized Designation: Topic Varies

Recommended Prerequisite: 90 hours or permission of instructor.

Registration Restrictions: Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading: This course is graded on the Graduate Regular scale.

CVPA 592: Special Topics in Interdisciplinary Arts Studies. 1-3 credits. Topics in interdisciplinary arts. Offered by Coll Visual & Performing Arts. May be repeated within the term for a maximum 12 credits.

Specialized Designation: Topic Varies

Recommended Prerequisite: Undergraduate degree or equivalent, or Permission of Instructor.

Registration Restrictions: Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Seminar

Grading: This course is graded on the Satisfactory/No Credit scale.

CVPA 700: Academic Writing in the Arts. 1 credit. Prepares graduate students for the rigors of academic writing in the arts at the advanced level and supports students’ acculturation in the academic writing skills and practices of their discourse communities. Offered by Coll Visual & Performing Arts. May be repeated within the degree for a maximum 3 credits.

Registration Restrictions: Enrollment limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Seminar

Grading:
This course is graded on the Satisfactory/No Credit scale.

**CVPA 701: Thesis and Project Writing.** 1 credit.
Students will develop an expertise within the specific rhetorical context of the thesis/project genre, understand the specialized features of the final project or thesis, and apply the strategies they have learned in their disciplines to their capstone event. Offered by Coll Visual & Performing Arts. May be repeated within the degree for a maximum 3 credits.

**Recommended Prerequisite:** Completion of 21 graduate credits in a CVPA graduate degree.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Seminar

**Grading:**
This course is graded on the Satisfactory/No Credit scale.

---

**Communication (COMM)**

**100 Level Courses**

**COMM 100: Public Speaking.** 3 credits.
Presents principles to develop effective presentations for public and professional settings while integrating appropriate technologies. Emphasizes analyzing audience; composing meaningful, coherent messages; conducting responsible research; developing effective arguments; and improving delivery skills to strengthen confidence and credibility. Offered by Communication. Limited to three attempts.

**Mason Core:** Oral Communication

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale.

**COMM 101: Fundamentals of Communication.** 3 credits.
Presents principles to develop appropriate and effective communication strategies in one-to-one and small group communication settings. Emphasizes analyzing and assessing communication skills to create and sustain effective communication in personal and professional relationships. Offered by Communication. Limited to three attempts.

**Mason Core:** Oral Communication

**Schedule Type:** Laboratory, Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale.

**COMM 140: Forensics Seminar I.** 0-4 credits.
Intensive work in creative forensics events, including rhetorical criticism and informative, persuasive, extemporaneous, after-dinner, and impromptu speaking. Offered by Communication. May be repeated within the degree for a maximum 5 credits.

**Recommended Prerequisite:** Audition required.

**Schedule Type:** Seminar

**Grading:**
This course is graded on the Undergraduate Regular scale.

**COMM 141: Forensics Seminar II.** 0-4 credits.
Intensive work in recreative forensic events, including dramatic duo, program interpretation, poetry interpretation, dramatic interpretation, and prose interpretation. Offered by Communication. May be repeated within the degree for a maximum 5 credits.

**Recommended Prerequisite:** Audition required.

**Schedule Type:** Seminar

**Grading:**
This course is graded on the Undergraduate Regular scale.

**COMM 142: Debate Seminar I.** 0-4 credits.
Work in affirmative research, case construction, and oral presentation; directed toward affirmative analysis of intercollegiate debate proposition. Offered by Communication. May be repeated within the degree for a maximum 5 credits.

**Recommended Prerequisite:** Audition required.

**Schedule Type:** Seminar

**Grading:**
This course is graded on the Undergraduate Regular scale.

**COMM 143: Debate Seminar II.** 0-4 credits.
Work in negative research, case attacks, and oral presentation directed toward negative analysis of intercollegiate debate proposition. Offered by Communication. May be repeated within the degree for a maximum 5 credits.

**Recommended Prerequisite:** Audition required.

**Schedule Type:** Seminar

**Grading:**
This course is graded on the Undergraduate Regular scale.

**COMM 145: Newspaper Workshop I.** 0-1 credits.
Practical experience in writing, editing, or business aspects of newspaper production at Broadside or other papers. Coordinated by newspaper faculty advisor. Offered by Communication. May be repeated within the term for a maximum 3 credits.

**Recommended Prerequisite:** One 100 level COMM course, or permission of instructor.

**Schedule Type:** Seminar

**Grading:**
This course is graded on the Undergraduate Regular scale.

**COMM 148: Radio Workshop I.** 0-1 credits.
Students receive individual guidance while learning to be on-air show hosts at student internet radio station WGMU. New technologies such as computer automation systems and advanced production software are integrated throughout the curriculum to prepare students to engage in the most current applications for commercial and internet radio and podcasting. Offered by Communication. May be repeated within the degree for a maximum 3 credits.

**Recommended Prerequisite:** One 100 level COMM course, or permission of instructor.

**Schedule Type:** Studio

**Grading:**
This course is graded on the Undergraduate Regular scale.

COMM 157: Digital Media Workshop. 0-1 credits.
Offers students a hands-on introduction to digital tools of creative expression, involving the use of specific software and hardware, including operating systems, media editing programs, authoring applications, and software utilities. Notes: Students who have already completed or are in COMM 208 are not eligible to take this course. Offered by Communication. May be repeated within the degree for a maximum 3 credits.

Recommended Prerequisite: COMM 100 or 101 and declared major or minor in communication, undeclared major, or permission of undergraduate program director.

Schedule Type: Seminar

Grading:
This course is graded on the Undergraduate Regular scale.

200 Level Courses

COMM 200: Communication Theory. 3 credits.
Introduces the field of communication, including perspectives on theory and research, topical areas within the discipline, basic research methodologies, and a survey of theories in those areas. Covers basic procedures for theory-building, research, and writing about communication. Offered by Communication. Limited to three attempts.

Specialized Designation: Mason Impact.

Recommended Prerequisite: COMM 100 or COMM 101 or permission of undergraduate program director.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale.

COMM 201: Small Group Communication. 3 credits.
Principles of communicating effectively in small group situations. Emphasizes problem-solving group communication. Practice in working cooperatively with others to complete projects using systematic approach to problem solving. Offered by Communication. Limited to three attempts.

Recommended Prerequisite: COMM 101, or equivalent course.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale.

COMM 202: Media and Society. 3 credits.
Examines the relationship between media and society through the study of the development of various media systems in the United States, including print media, radio, television, film, the recording industry, and new communication technologies. Introduces media effects and basic theories. Offered by Communication. Limited to three attempts.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale.

COMM 203: Introduction to Journalism. 3 credits.
American journalism including history and First Amendment components; role of professional journalist; print, broadcast, and computer assisted news operations; economics of publishing; and effect of new technologies. Serves as starting point for those interested in journalism careers and as orientation for those interested in learning more about news business operations. Offered by Communication. Limited to three attempts.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale.

COMM 204: Introduction to Public Relations. 3 credits.
Introduces the evolving field of public relations and the role it plays in global business, politics and social interactions. Focuses on creation of integrated digital communication and social media engagement. This is a required course for the Communication Department Public Relations concentration and a prerequisite for several upper-level public relations courses. Offered by Communication. Limited to three attempts.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale.

COMM 208: Introduction to Media Production. 3 credits.
Provides a general introduction to media production with emphasis on the basics of multimedia tools for camera, audio, lighting, and editing, focusing on non-fiction, journalism, or public relations/advocacy presentations. Offered by Communication. Limited to three attempts.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale.

COMM 210: Voice and Articulation. 3 credits.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale.

COMM 220: Case Studies in Persuasion. 3 credits.
Examines common persuasive message strategies and approaches. Covers basic principles of persuasive process. Case studies include advertisements, speeches, and persuasive activities from all segments of society. Offered by Communication. Limited to three attempts.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale.

COMM 249: Communication Field Experience. 1-2 credits.
Field training and experience related to one of the five communication department concentrations through faculty-approved activity support. Offered by Communication. May be repeated within the term for a maximum 4 credits.
**Recommended Prerequisite:** 45 credits total.

**Schedule Type:** Activity-Based

**Grading:**
This course is graded on the Satisfactory/No Credit scale.

**COMM 255:** *Introduction to Media Literacy.* 3 credits.
Principles and practices of media literacy. Emphasizes critical viewing, listening, and reading media skills; and media effects on consumer. Offered by Communication. Limited to three attempts.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale.

**COMM 260:** *Basic Debate Theory and Practice.* 3 credits.
Theory and practice of formal debate, including approaches to analytical reasoning, research, delivery, and conceptual basis for debate. Does not require tournament participation. Offered by Communication. Limited to three attempts.

**Schedule Type:** Lecture, Recitation

**Grading:**
This course is graded on the Undergraduate Regular scale.

**COMM 261:** *Theories of Argumentation.* 3 credits.
Analyzes argument within communicative settings. Emphasizes deductive and inductive forms of reasoning, fallacies in reasoning, tests of evidence, and models for such analyses. Offered by Communication. Limited to three attempts.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale.

**300 Level Courses**

**COMM 300:** *Rhetorical Theory and Criticism.* 3 credits.
Theories and principles of public communication, emphasizing methods of persuasion, critical analysis, speaker-listener alignments in public setting, and measurements of effective public communication. Offered by Communication. Limited to three attempts.

**Specialized Designation:** Writing Intensive in Major

**Registration Restrictions:**
**Required Prerequisites:** COMM 200\(^C\) or U200.
\(^C\) Requires minimum grade of C.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale.

**COMM 301:** *Relational Communication Theory.* 3 credits.
Theories and principles of interpersonal communication emphasizing models of communication, verbal and nonverbal message systems, and analysis of communicative relationships. Offered by Communication. Limited to three attempts.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale.

**COMM 302:** *Media Theory.* 3 credits.
Provides a comprehensive review of mass communication and media theory, focusing on media effects and the complex relationships between media producers, messages, technologies, and users/audiences. Examines role of media in news, politics, and popular culture. Offered by Communication. Limited to three attempts.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale.

**COMM 303:** *Writing across the Media.* 3 credits.
Foundation course focusing on writing for the mass media: Internet, public relations, newspapers, broadcast (television and radio) and advertising with a strong emphasis on adherence to Associated Press Style. Notes: Prerequisite for all communication media writing courses. Lab work required. Offered by Communication. Limited to three attempts.

**Recommended Prerequisite:** 3 credits of 100 or 200-level COMM courses or 60 credits.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale.

**COMM 304:** *Foundations of Health Communication.* 3 credits.
Explores health communication research practice: the role of communication in health care delivery, health promotion and disease prevention, risk communication, and personal as well as psychological well-being. Examines interpersonal, organizational, team, family, and intercultural relationships. Offered by Communication. Limited to three attempts.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale.

**COMM 305:** *Foundations of Intercultural Communication.* 3 credits.
Analyzes communication variables as they relate to intercultural encounters. Emphasizes culture's influence on communication process, particularly influence of verbal and nonverbal communication on how message is interpreted. Notes: Communication majors are encouraged to complete COMM 200 prior to enrolling in this course. Offered by Communication. Limited to three attempts.

**Mason Core:** Global Understanding

**Recommended Prerequisite:** 3 credits of 100 or 200-level COMM courses or 60 credits.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale.

**COMM 306:** *Issues in Intercultural Communication.* 3 credits.
Applies basic principles of intercultural communication to analyze specific situations involving communication and cultural differences. Notes: Continuation of COMM 305. Offered by Communication. Limited to three attempts.

**Recommended Prerequisite:** COMM 305, or permission of instructor.
**COMM 204: Field Study in Communication.** 3 credits.
Structured communication learning experience: one to three weeks of travel in a foreign environment involving another country or relevant U.S. co-cultures. Students must complete appropriate readings, laboratory assignments, and personal learning paper to process communication concepts and experiences. Notes: May be repeated for credit when field study is substantially different with permission of the undergraduate director. Offered by Communication. May be repeated within the degree.

**Recommended Prerequisite:** Permission of instructor.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale.

**COMM 307: Field Study in Communication.** 3 credits.
This course examines the ways communication functions in political settings. Offered by Communication. Limited to three attempts.

**Recommended Prerequisite:** COMM 300.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale.

**COMM 330: Principles of Public Relations.** 3 credits.
Surveys nature, history, scope, and practice of public relations in business, trade associations, nonprofit organizations, and educational and government institutions. Covers principles, practice of public relations, including media relations, issues management, and public service announcements; marketing and research; planning and publicity for special events; house publications; and institutional advertising. Offered by Communication. Limited to three attempts.

**Recommended Prerequisite:** 3 hours of COMM credit and 60 hours, or permission of instructor.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale.

**COMM 331: Public Relations Campaigns.** 3 credits.
Develops the conceptual knowledge and practical skills students need to thrive in challenging public relations situations, such as crisis management, research for clients, communication with clients, and campaigns. Students complete the course with a portfolio of research, writing, and visual materials they have created through client work. Offered by Communication. Limited to three attempts.

**Registration Restrictions:**
Required Prerequisites: COMM 204, 330, U204 or L330. Requires minimum grade of C.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale.

**COMM 332: Nonverbal Communication.** 3 credits.
Theory, principles, and methods to analyze nonverbal communication. Emphasizes physical behavior, facial expression, personal space and territoriality, physical appearance, vocal cues, and environment. Offered by Communication. Limited to three attempts.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale.

**COMM 334: Family and Health Communication.** 3 credits.
Examines how family communication contributes to physical, psychological, and social wellness. Explores how family communication affects our experience with health transitions (e.g., coping with cancer; becoming a caregiver; losing a loved one), contributes to health outcomes (e.g., stress and anxiety; disordered eating behavior; schizophrenia; drug abuse), and is central to health promotion behavior (e.g., understanding health history and genetics). Offered by Communication. Limited to three attempts.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale.
COMM 335: Organizational Communication. 3 credits.
Theory, practice, and methods to analyze communication in organizations. Emphasizes process and structure, interaction formats, mechanisms for modification, and career paths in organizational communication. Offered by Communication. Limited to three attempts.

**Recommended Prerequisite:** COMM 100, 101, or 301, or permission of instructor.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale.

COMM 340: Forensics Seminar III. 0-4 credits.
Intensive work in various types of creative forensics events, including rhetorical criticism and informative, persuasive, extemporaneous, after-dinner, and impromptu speaking. Offered by Communication. May be repeated within the degree for a maximum 5 credits.

**Recommended Prerequisite:** Completion of 60 hours, or 4 hours of COMM 140. Audition required.

**Schedule Type:** Seminar

**Grading:**
This course is graded on the Undergraduate Regular scale.

COMM 341: Forensics Seminar IV. 0-4 credits.
Intensive work in various types of creative forensics events, including dramatic duo, program interpretation, poetry interpretation, dramatic interpretation, and prose interpretation. Offered by Communication. May be repeated within the degree for a maximum 5 credits.

**Recommended Prerequisite:** Completion of 60 hours, or 4 hours of COMM 141. Audition required.

**Schedule Type:** Seminar

**Grading:**
This course is graded on the Undergraduate Regular scale.

COMM 342: Debate Seminar III. 0-4 credits.
Work in affirmative research, case construction, and oral presentation directed toward affirmative analysis of intercollegiate debate proposition. Offered by Communication. May be repeated within the degree for a maximum 5 credits.

**Recommended Prerequisite:** Completion of 60 hours, or 4 hours of COMM 142. Audition required.

**Schedule Type:** Seminar

**Grading:**
This course is graded on the Undergraduate Regular scale.

COMM 343: Debate Seminar IV. 0-4 credits.
Work in negative research, case attacks, and oral presentation directed toward negative analysis of intercollegiate debate proposition. Offered by Communication. May be repeated within the degree for a maximum 5 credits.

**Recommended Prerequisite:** Completion of 60 hours, or 4 hours of COMM 142. Audition required.

**Schedule Type:** Seminar

**Grading:**
This course is graded on the Undergraduate Regular scale.

COMM 345: Newspaper Workshop II. 0-1 credits.
Practical experience in writing and editing for student newspaper or other papers. Offered by Communication. May be repeated within the term for a maximum 3 credits.

**Recommended Prerequisite:** 3 credits of COMM 145, 351, or permission of instructor.

**Schedule Type:** Seminar

**Grading:**
This course is graded on the Undergraduate Regular scale.

COMM 346: Yearbook Workshop. 1 credit.
Practical experience in promotion, marketing, and sales of video yearbook, or practical experience working on Senior Expressions, a print supplement to the video yearbook. Offered by Communication. May be repeated within the degree for a maximum 3 credits.

**Schedule Type:** Seminar

**Grading:**
This course is graded on the Undergraduate Regular scale.

COMM 347: Cable TV Programming and Marketing. 0-1 credits.
Practical experience in television programming, promotion, and marketing of a campus television cable network operation. Offered by Communication. May be repeated within the degree for a maximum 3 credits.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale.

COMM 348: Radio Workshop II. 0-1 credits.
Intensive practical application of previously acquired on-air show hosting skills at student internet radio station WGMU. Skill development in commercial production and writing included. New technologies such as social media, computer automation systems and advanced production software are integrated throughout the curriculum to prepare students to engage in the most current applications for commercial and internet radio and podcasting. Offered by Communication. May be repeated within the term for a maximum 3 credits.

**Recommended Prerequisite:** COMM 148, or permission of instructor.

**Schedule Type:** Seminar

**Grading:**
This course is graded on the Undergraduate Regular scale.

COMM 350: Mass Communication and Public Policy. 3 credits.
Investigates how matters of public importance are communicated via various mass communication channels. Emphasizes regulations to minimize influence of mass media on public decision-making, and media manipulation by pressure groups, politicians, and media gatekeepers. Offered by Communication. Limited to three attempts.

**Recommended Prerequisite:** COMM 202, 255, or 302, or permission of instructor.

**Schedule Type:** Lecture
Grading:
This course is graded on the Undergraduate Regular scale.

COMM 351: News Writing and Reporting. 3 credits.
Experience in actual news gathering. Students write and report for print and online outlets. Numerous in-class and out-of-class writing assignments train students in unique styles of print and online journalism. Offered by Communication. Limited to three attempts.

Registration Restrictions:
Required Prerequisites: COMM 303 or L303.
C Requires minimum grade of C.
Schedule Type: Lecture
Grading:
This course is graded on the Undergraduate Regular scale.

COMM 352: News Editing: Print and Beyond. 3 credits.
Copy preparation, headline writing, news judging, and layout for various forms of print and electronic formats. Introduces working on news copy desks. Offered by Communication. Limited to three attempts.

Registration Restrictions:
Required Prerequisites: COMM 303 or L303.
C Requires minimum grade of C.
Schedule Type: Lecture
Grading:
This course is graded on the Undergraduate Regular scale.

COMM 353: Broadcast Journalism. 3 credits.

Registration Restrictions:
Required Prerequisites: COMM 303 or L303.
C Requires minimum grade of C.
Schedule Type: Lecture
Grading:
This course is graded on the Undergraduate Regular scale.

COMM 354: Radio Production and Podcasting. 3 credits.
Students will learn and critically analyze the components of radio and podcast production including: interviewing, story development, script writing, interview techniques, remote and digital audio recording, editing of sound, mixing, and final production for broadcast. The course includes a lecture component and lab time where the instructor will consult with students on their practice and production assignments including short (30 seconds) and longer formats (around 4 minutes). Podcasts will be posted to a website and/or SoundCloud. Offered by Communication. Limited to three attempts.

Recommended Prerequisite: COMM 302 or permission of instructor
Schedule Type: Lecture
Grading:
This course is graded on the Undergraduate Regular scale.

COMM 355: Video: Performance and Writing. 3 credits.
Writing for video, performance skills for on-air work, interviewing. Offered by Communication. Limited to three attempts.

Recommended Prerequisite: 45 credits.
Schedule Type: Lecture
Grading:
This course is graded on the Undergraduate Regular scale.

COMM 358: Multi-Camera Studio Production. 3 credits.
Provides an in-depth exploration of the creative, technical, logistical, and aesthetic requirements of production in a multiple camera environment. The fundamental skills learned in this class will serve as a foundation for narrative, event, live sports, talk show, broadcast journalism, and magazine-styled television and webcast programming. Offered by Communication. Limited to three attempts.

Registration Restrictions:
Required Prerequisites: COMM 355, FAVS 255, COMM 208, L355, FAVS U255 or COMM U208.
C Requires minimum grade of C.
Schedule Type: Lecture
Grading:
This course is graded on the Undergraduate Regular scale.

COMM 359: Media Management. 3 credits.
Principles, practices of media management from general techniques to operation of individual departments within a media organization. Offered by Communication. Limited to three attempts.

Schedule Type: Lecture
Grading:
This course is graded on the Undergraduate Regular scale.

COMM 360: Digital Postproduction. 3 credits.
Offers instruction on delivering high-quality image and video products for digital media. Students will be introduced to an array of video-audio editing and digital image software for integrating video, audio, photo and graphic postproduction. Student projects focus on journalism, public relations, and advocacy contexts. Offered by Communication. Limited to three attempts.

Registration Restrictions:
Required Prerequisites: COMM 355, FAVS 255, COMM 208, L355, FAVS U255 or COMM U208.
C Requires minimum grade of C.
Schedule Type: Lecture
Grading:
This course is graded on the Undergraduate Regular scale.

COMM 361: Online Journalism. 3 credits.
Focuses on online journalism, research, reporting, web page and weblog creation, and writing for Internet. Offered by Communication. Limited to three attempts.

Registration Restrictions:
Required Prerequisites: COMM 303 or L303.
C Requires minimum grade of C.
Schedule Type: Lecture
Grading:
This course is graded on the Undergraduate Regular scale.

**COMM 362: Argument and Public Policy.** 3 credits.
Develops argumentative skills while examining contemporary public policy. Applies methods of argumentative analysis to design, implementation of public policy. Students learn by constructing, examining, and using public argument. Offered by Communication. Limited to three attempts.

Mason Core: Synthesis

Schedule Type: Lecture
Grading:
This course is graded on the Undergraduate Regular scale.

**COMM 363: Media Career Seminar.** 1 credit.
Practicum for students with production experience; students produce a final resume in area of expertise. Offered by Communication. Limited to three attempts.

Recommended Prerequisite: Two courses completed in area of media production focus.

Schedule Type: Laboratory
Grading:
This course is graded on the Undergraduate Regular scale.

**COMM 364: Videography.** 3 credits.
Provides a comprehensive overview of the principles and practices of visual storytelling, encompassing short documentaries, campaigns, commercial work, news and other non-fiction narratives. Mobile, DSLR and fixed-lens cameras will be used to explore all facets of visual production that tell human stories, with emphasis on character, conflict, drama, and surprise. Offered by Communication. Limited to three attempts.

Registration Restrictions:
Required Prerequisites: COMM 355\(^C\), FAVS 255\(^C\), COMM 208\(^C\), L355, FAVS U255 or COMM U208.
\(^C\) Requires minimum grade of C.

Schedule Type: Lecture
Grading:
This course is graded on the Undergraduate Regular scale.

**COMM 365: Gender, Race, and Class in the Media.** 3 credits.
Introduces concepts of power, influence of mass media. Allows students to see themselves as products, producers of media influence, and gives sense of the roles in the media or lack thereof, of groups based on their gender, race and/or class. Offered by Communication. Limited to three attempts.

Recommended Prerequisite: COMM 302 or permission of instructor.

Schedule Type: Lecture
Grading:
This course is graded on the Undergraduate Regular scale.

**COMM 366: Visual Communication.** 3 credits.
Teaches visual communication theories and applies them to creation of videos, web pages, multimedia production, Computer Based Training (CBT) and other technologies. Covers limits of visual communication in terms of perception, economics, and technology. Partial distance course includes viewing video modules and using electronically mediated discussion. Offered by Communication. Limited to three attempts.

Registration Restrictions:
Required Prerequisites: COMM 208\(^C\), FAVS 255\(^C\), COMM U208 or FAVS U255.
\(^C\) Requires minimum grade of C.

Schedule Type: Lecture
Grading:
This course is graded on the Undergraduate Regular scale.

**COMM 367: Children and Media.** 3 credits.
Provides an overview of the relationships between children and mass media. Focus of the course is on the effects of media consumption on children's social and psychological well-being. Students will learn major child development theories, review history, economics and regulation of children's programming, and explore children's use of and responses to various media. Offered by Communication. Limited to three attempts.

Schedule Type: Lecture
Grading:
This course is graded on the Undergraduate Regular scale.

**COMM 369: Multimedia Storytelling.** 3 credits.
Applies concepts of advanced visual storytelling within today's fluid media landscape. Students report and tell compelling stories across multiple platforms using simple, portable equipment and software essential to reporters working in the contemporary converged newsroom. Highlights a multimedia approach to journalism to include broadcast, mobile reporting skills and backpack journalism techniques. Offered by Communication. Limited to three attempts.

Recommended Prerequisite: COMM 353

Registration Restrictions:
Required Prerequisite: COMM 303\(^C\).
\(^C\) Requires minimum grade of C.

Schedule Type: Lecture
Grading:
This course is graded on the Undergraduate Regular scale.

**COMM 370: Feature Writing.** 3 credits.
Introduces aspiring journalists to research techniques and critical writing skills needed to produce publishable magazine or newspaper feature stories. Offered by Communication. Limited to three attempts.

Registration Restrictions:
Required Prerequisites: COMM 303\(^C\) or L303.
\(^C\) Requires minimum grade of C.

Schedule Type: Lecture
Grading:
This course is graded on the Undergraduate Regular scale.
COMM 371: Sports Writing and Reporting. 3 credits.
Experience in actual sports-related news gathering and reporting. Covers writing and reporting on sports-related subjects for print and online media. Numerous in-class and out-of-class writing assignments train students in the unique style of covering sports events, reporting breaking news, and writing feature stories. Offered by Communication. Limited to three attempts.

Registration Restrictions:
Required Prerequisites: COMM 303\(^C\) or L303.
\(^C\) Requires minimum grade of C.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale.

COMM 372: Sports and the Media. 3 credits.
Studies the role of mass media in constructing images of athletes, sport, and sports culture. Critical attention is given to broadcast, print, and film of sport media. Assesses sociological and cultural issues that shape sport media and culture. Offered by Communication. Limited to three attempts.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale.

COMM 373: Business and Economic Journalism. 3 credits.
Writing and reporting about business and the economy with focus on understanding financial news and reporting about companies, trade, and markets for print, broadcast, and online media. Students practice through in-class and out-of-class writing assignments. Offered by Communication. Limited to three attempts.

Registration Restrictions:
Required Prerequisites: COMM 303\(^C\) or L303.
\(^C\) Requires minimum grade of C.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale.

COMM 374: Political Journalism. 3 credits.
Writing and reporting about politics, elections and campaigns, and the legislative and executive branches of government for print, broadcast, and online media. Students practice the style and substance of covering political news through in-class and out-of-class writing assignments. A unique collaboration with C-SPAN including video conference opportunities with political and media personalities. Offered by Communication. Limited to three attempts.

Registration Restrictions:
Required Prerequisites: COMM 303\(^C\) or L303.
\(^C\) Requires minimum grade of C.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale.

COMM 375: Mass Communication Advertising and Promotions. 3 credits.
History, regulation, and ratings of advertising, as well as media buying, advertising campaigns, and strengths and weaknesses of media vehicles used in advertising. Offered by Communication. Limited to three attempts.

Recommended Prerequisite: COMM 302 or permission of instructor.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale.

COMM 376: Media Criticism. 3 credits.
Examines practical criticism of a wide variety of media texts including television programs, newspapers, articles, films, photographs, and advertisements. Introduces principles of major contemporary modes of analysis for systematically interpreting visual and verbal forms of communication. Offered by Communication. Limited to three attempts.

Recommended Prerequisite: Completion of 60 hours or permission of instructor.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale.

COMM 384: Public Relations and Social Media. 3 credits.
Explores the role of social media in contemporary public relations. Students engage in social media research and analysis, examine best practices for successful campaigns, seek to understand conditions for viral media, implement a personal branding strategy, create strategic engagement plans, and design campaigns. Offered by Communication. Limited to three attempts.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale.

COMM 385: Special Topics in Interpersonal and Organizational Communication. 3 credits.
Topics vary. Counts toward Organizational and Interpersonal Communication concentration in the Communication Department. Notes: May be repeated for credit when topic is different. Offered by Communication. May be repeated within the degree.

Specialized Designation: Topic Varies

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale.

COMM 386: Special Topics in Political Communication. 3 credits.
Topics vary. Counts toward Political Communication concentration in the Communication Department. Notes: May be repeated for credit when topic is different. Offered by Communication. May be repeated within the degree.

Specialized Designation: Topic Varies

Schedule Type: Lecture
COMM 387: Special Topics in Journalism. 3 credits.
Topics vary. Counts toward Journalism concentration in the Communication Department. Notes: May be repeated for credit when topic is different. Offered by Communication. May be repeated within the degree.

Specialized Designation: Topic Varies

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale.

COMM 388: Special Topics in Public Relations. 3 credits.
Topics vary. Counts toward Public Relations concentration in the Communication Department. Notes: May be repeated for credit when topic is different. Offered by Communication. May be repeated within the degree.

Specialized Designation: Topic Varies

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale.

COMM 389: Public Relations for Associations and Nonprofits. 3 credits.
Principles of editing and journalism applied to publications, public relations, and advertising needs within corporate environment. Job requirements of editorial positions in public relations, publications, and information as defined by trade associations, nonprofit organizations, and large corporations. Offered by Communication. Limited to three attempts.

Recommended Prerequisite: 60 credits, or 3 credits of lower-division COMM courses.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale.

COMM 390: Issues in Public Relations. 3 credits.
Focuses on current issues in corporate, government, and nonprofit public relations. Offered by Communication. Limited to three attempts.

Registration Restrictions:
Required Prerequisites: COMM 204C, 330C, U204 or L330.
C Requires minimum grade of C.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale.

COMM 391: Writing for Public Relations. 3 credits.
Focuses on public relations writing including news releases, client memos, broadcasting, speeches, brochures, journals, and advertisements. Includes writing styles, formats, organization, and writing research. Offered by Communication. Limited to three attempts.

Registration Restrictions:
Required Prerequisites: COMM 303C or L303.
C Requires minimum grade of C.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale.

COMM 392: Public Relations Study Abroad. 3 credits.
Concentrated survey course in public relations for business, trade associations, nonprofit organizations, and governmental institutions from the perspective of a location abroad. Emphasis placed on the global and intercultural aspects of public relations. Offered by Communication. Limited to three attempts.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale.

COMM 393: Special Topics in Health Communication. 3 credits.
Topics vary. Notes: May be repeated for credit when topic is different. Offered by Communication. May be repeated within the degree.

Specialized Designation: Topic Varies

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale.

COMM 394: Special Topics in Mass Communication. 3 credits.
Topics vary. Counts toward Media Production and Criticism Concentration in the Communication Department. Notes: May be repeated for credit when topic is different. Offered by Communication. May be repeated within the degree.

Specialized Designation: Topic Varies

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale.

COMM 395: Special Topics in Production. 1-3 credits.
Provides hands-on media production experience. Topics vary. Notes: May be repeated for credit when topic is different. Offered by Communication. May be repeated within the term.

Specialized Designation: Topic Varies

Schedule Type: Studio

Grading:
This course is graded on the Undergraduate Regular scale.

COMM 396: Research Practicum in Communication. 1-3 credits.
Work individually with a faculty member on a faculty research project. Requires readings in research methods and topic area and a final project. Notes: Students must submit an application for COMM 398 at least one week prior to the beginning of the semester. Offered by Communication. May be repeated within the degree for a maximum 6 credits.

Specialized Designation: Topic Varies

Recommended Prerequisite: 60 credits including at least 9 hours of COMM credit toward the major; minimum GPA of 2.5 overall and 3.0 in the major; approval of department.

Schedule Type: Independent Study

Grading:
This course is graded on the Undergraduate Regular scale.

**COMM 399: Special Topics in Communication.** 1-3 credits.
Topics vary; some require laboratories. Notes: May be repeated for credit when topic is different. Offered by Communication. May be repeated within the term.

**Specialized Designation:** Green Leaf Related Course, Topic Varies

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale.

**400 Level Courses**

**COMM 400: Research Methods in Communication.** 3 credits.
Explores applications for primary research methodologies used in communication. Research project with focus on survey, critical ethnographic, or experimental methodologies. Notes: Students may not receive credit for both COMM 400 and COMM 490. Offered by Communication. Limited to three attempts. Equivalent to COMM 490.

**Specialized Designation:** Mason Impact.

**Recommended Prerequisite:** COMM 300 with a minimum grade of 2.00 (C).

**Registration Restrictions:**
**Required Prerequisites:** COMM 200^C or U200.
^C Requires minimum grade of C.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale.

**COMM 401: Interpersonal Communication in the Workplace.** 3 credits.
Comprehensive study of theories and research associated with dynamics of interpersonal relationships in the workplace. Emphasizes individual motivation, interpersonal needs, communication styles, leadership, problem solving, decision making, diversity, interpersonal conflict, individual adaptation to organizational change, and influence of technology on workplace relationships. Offered by Communication. Limited to three attempts.

**Recommended Prerequisite:** COMM 301, or permission of instructor.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale.

**COMM 411: Public Relations Practicum.** 3 credits.
Helps communication majors apply their public relations education. Covers three general areas: public relations theory and applications, writing and editing, and networking/story placement. Includes public relations strategy and tactics, interviewing and analysis, writing and message delivery. Offered by Communication. Limited to three attempts.

**Registration Restrictions:**
**Required Prerequisites:** COMM 331^C or L331.
^C Requires minimum grade of C.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale.

**COMM 412: Politics and the Mass Media.** 3 credits.
Covers responsibilities; freedoms of mass media in a democracy; and media influence on citizens’ opinions, elections, and decisions of public officials. Offered by Communication. Limited to three attempts. Equivalent to GOVT 412.

**Recommended Prerequisite:** GOVT 103 or permission of instructor.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale.

**COMM 430: Persuasion.** 3 credits.
Theories of persuasive communication including traditional and contemporary attitudinal change; relationship among speaker, message, and audience; and relationship between attitudinal and behavioral change. Offered by Communication. Limited to three attempts.

**Recommended Prerequisite:** 60 credits or permission of instructor.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale.

**COMM 431: New Media and Democracy.** 3 credits.
Examines how an evolving media environment, including new information sources and new opportunities to produce content, changes how people understand their place in American society. Engages with questions of where and how people learn about, discuss, and engage with issues of public importance, such as political policy concerning science, health, technology, and society. Offered by Communication. Limited to three attempts.

**Recommended Prerequisite:** 60 credits or permission of instructor.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale.

**COMM 433: Environmental Communication.** 3 credits.
Rhetoric and persuasion about environmental issues in contemporary society. Investigation of case studies in corporate, institutional, and movement attempts to mobilize and cope with ecological concerns. Critical assessment of public communication is emphasized. Offered by Communication. Limited to three attempts.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale.

**COMM 434: Interviewing.** 3 credits.
Theory, principles, and practical skills essential to interview process. Emphasizes information gathering, journalistic, persuasive, employment, and performance-appraisal interviews. Offered by Communication. Limited to three attempts.

**Recommended Prerequisite:** 60 hours or permission of instructor.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale.
COMM 435: Digital Communication. 3 credits.
Offers practical application, skill development, and theoretical and critical assessment of mediated communication, including digital networking and social media. Discusses and engages with digital communication in terms of culture and language, functional and dysfunctional communication, social interaction, critical perspectives and ideology, copyright, freedom, ethics and responsibility, and images of the future. Offered by Communication. Limited to three attempts.

Recommended Prerequisite: 60 credits.
Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale.

COMM 440: Ceremonial Speech Writing and Performance. 3 credits.
Provides students with the opportunities to develop speaking skills for a variety of contexts from eulogies to commencement speeches. Offered by Communication. Limited to three attempts.

Recommended Prerequisite: 75+ hours or permission of instructor.
Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale.

COMM 450: Internship in Communication. 0-6 credits.
On-the-job training in communication through approved field work study programs. Internships arranged and supervised by Department of Communication through internship coordinator. Related class work in resume preparation and job interviewing. Notes: See department for the application process. Offered by Communication. May be repeated within the degree for a maximum 6 credits.

Recommended Prerequisite: 60 credits, major or minor in communication, journalism, or sport communication; 15 credits in COMM for majors, 12 credits for non-COMM majors, and permission of department.

Registration Restrictions:
Enrollment limited to students with a class of Junior or Senior.

Enrollment is limited to students with a major, minor, or concentration in Communication, Health Communication, Journalism, Political Communication or Sport Communication.

Schedule Type: Internship

Grading:
This course is graded on the Undergraduate Special scale.

COMM 451: Facilitating Communication Education. 3 credits.
Theory and practice in facilitating learning of communication principles and skills. Students work as instructional aides in lower-division classes under direct supervision of faculty member. Activities may include online learning support, social media updates, media production, facilitating small-group activities and individually critiquing oral performances. Offered by Communication. Limited to three attempts.

Schedule Type: Independent Study

Grading:
This course is graded on the Undergraduate Regular scale.

COMM 452: Media Production Practicum. 1-3 credits.
Theory and practice in creation, distribution, and response to media productions. Students complete minimum 150 hours of work as assistants to engineers, producers, directors, and organizers of media production facilities on campus, under supervision of a sponsoring faculty member. Notes: Only 3 credits may be applied to the communication major. Offered by Communication. May be repeated within the degree for a maximum 6 credits.

Recommended Prerequisite: COMM 208, 303, or 348.
Schedule Type: Internship

Grading:
This course is graded on the Undergraduate Regular scale.

COMM 454: Free Speech and Ethics. 3 credits.
Major issues surrounding roles of speech, press, and electronic media in society. Includes history of free speech and press issues in society, government role in regulating marketplace of ideas, and responsibility of individual in free society. Offered by Communication. Limited to three attempts.

Mason Core: Synthesis

Recommended Prerequisite: 60 credit hours or permission of instructor.
Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale.

COMM 455: History of Journalism. 3 credits.
Development of print journalism, emphasizing interaction of technology, audience, and government intervention. Topics include birth of press, development of modern newspaper, and American development including Revolutionary and Civil wars, rise of independent press, and yellow journalism. Offered by Communication. Limited to three attempts.

Recommended Prerequisite: 3 hours of COMM or HIST.
Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale.

COMM 456: Comparative Mass Media. 3 credits.
Survey of major foreign mass media systems as they compare with American system. Focuses on broad dimensions of international mass media and describes issues facing global journalism and media systems. Provides substantive framework to critically evaluate various national media systems. Offered by Communication. Limited to three attempts.

Mason Core: Global Understanding

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale.

COMM 465: Topics in Communication and Gender. 3 credits.
Topics may include gender and culture, women as rhetors, male and female communication, and communication and gender roles. Examines specific interests, ideally in seminar setting. Notes: May be repeated for credit when topic is different with permission of department. Offered by Communication. May be repeated within the term.
**Specialized Designation:** Topic Varies

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale.

**COMM 475:** Journalism Law. 3 credits.
Examines law as it relates to working journalist. Topics include libel, invasion of privacy, free press and fair trial, First Amendment, broadcast regulation, access to media, advertising, and effect of new technologies on these issues. Uses case approach to study leading court decisions in mass media law. Offered by Communication. Limited to three attempts.

**Recommended Prerequisite:** 60 credits or permission of instructor.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale.

**COMM 479:** Digital Media and Web Design Capstone. 3 credits.
Student team-based experience grounded in the work of the preceding courses in the digital media and web design minor. Each individual student will produce a portfolio of digital media and web-design related products and features that demonstrate core competencies in coding, design, content, and accessibility. Students will work in cross-disciplinary teams to carry out a client-based web design project, the process and outcomes of which will also be represented in the individual portfolio. Offered by Communication. Limited to two attempts. Equivalent to ENGH 479.

**Recommended Prerequisite:** Before enrolling in the Capstone seminar, students need to have completed all required courses for the Digital Media and Web Design Minor.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale.

**COMM 480:** College to Career: Strategies for Transition. 1 credit.
Designed to assist soon-to-be graduates in the employment transition process. Fundamental to the course are effective communication skills, creative research, and the desire to actively and aggressively seek meaningful employment. Offered by Communication. Limited to three attempts.

**Recommended Prerequisite:** 60+ credits or permission of instructor.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale.

**COMM 487:** Washington Media Institute. 3 credits.
Special topics offered through the Washington Media Institute. Students must be enrolled in the communication department's professional experience in communication minor. Notes: May not be applied to the communication major or minor. Offered by Communication. May be repeated within the degree for a maximum 15 credits.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale.

**COMM 490:** Honors Research Methods in Communication. 3 credits.
Honors version of COMM 400. Notes: Students may not receive credit for both COMM 400 and 490. Offered by Communication. Limited to three attempts. Equivalent to COMM 400.

**Specialized Designation:** Mason Impact.

**Recommended Prerequisite:** Acceptance to pursue honors in the major; COMM 300.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale.

**COMM 491:** RS: Honors Research Project in Communication. 3 credits.
Completion of independent honors research project under the guidance of the student’s faculty sponsor. Offered by Communication. May be repeated within the term.

**Specialized Designation:** Research/Scholarship Intensive

**Recommended Prerequisite:** Completion of COMM 490 with minimum grade of 3.0 and approval of honors project prospectus.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale.

**COMM 498:** RS: Research Projects in Communication. 3 credits.
Students plan, execute, and present an empirical research project exploring communication issues of their own choosing. Offered by Communication. Limited to three attempts.

**Specialized Designation:** Research/Scholarship Intensive

**Recommended Prerequisite:** COMM 200, COMM 400.

**Schedule Type:** Independent Study

**Registration Restrictions:**
Enrollment is limited to students with a major in Communication.
Enrollment limited to students in a Bachelor of Arts degree.

**Grading:**
This course is graded on the Undergraduate Regular scale.

**COMM 499:** Independent Study in Communication. 1-3 credits.
Study of a selected area in communication. Independent study application must be processed before start of semester in which work is to take place. Notes: May be repeated for credit with permission of director of undergraduate program. Communication courses at the 500 level open to post-baccalaureate students or advanced undergraduates with permission of department. Offered by Communication. May be repeated within the term.

**Recommended Prerequisite:** 75 credits and permission of department.

**Schedule Type:** Independent Study

**Grading:**
This course is graded on the Undergraduate Regular scale.
500 Level Courses

COMM 504: Communication and Interpersonal Conflict. 3 credits.
Focuses on interpersonal interactions, including dyadic and small-group levels in various settings such as friendships, marriage, family, and workplace. Examines factors that generate conflicts and communication strategies and skills that help shape conflict interaction toward productive ends. Offered by Communication. May not be repeated for credit.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.
Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.
Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture
Grading:
This course is graded on the Graduate Regular scale.

COMM 506: Communication in International Organizations. 3 credits.
Analyzes communication variables as they relate to organizational and managerial functions in international organizations. Topics include developing understanding of how cultural differences influence managerial activities and learning to deal effectively with differences. Offered by Communication. May not be repeated for credit.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.
Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.
Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture
Grading:
This course is graded on the Graduate Regular scale.

COMM 530: Theories of Small Group Communication. 3 credits.
Advanced-level theory and practice of small group interaction. Examines current research with a focus on learning applications of theories to relevant settings. Offered by Communication. May not be repeated for credit.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.
Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.
Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture
Grading:
This course is graded on the Graduate Regular scale.

COMM 590: Seminar in Communication. 3 credits.
Intensive study of specific topics; content varies. Notes: May be repeated for credit when topic is different. Offered by Communication. May be repeated within the term.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.
Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.
Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Seminar
Grading:
This course is graded on the Graduate Regular scale.

600 Level Courses

COMM 600: Introduction to Graduate Studies. 3 credits.
Offers a broad introduction to the field of communication in terms of communication-based theories and research. Offered by Communication. May not be repeated for credit.

Recommended Prerequisite: Admission to graduate program in communication or permission of graduate program director.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate or Senior Plus.
Enrollment is limited to students with a major in Communication.
Enrollment is limited to Graduate or Undergraduate level students.
Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture
Grading:
This course is graded on the Graduate Regular scale.

COMM 601: Communication in Professional Relationships. 3 credits.
Explores theoretical perspectives and relevant research to communication strategies and skills for various professional roles and situations. Relates theoretical foundations to practice, assessing theories and applications in individual professional fields. Offered by Communication. May not be repeated for credit.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.
Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.
Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture
Grading:
This course is graded on the Graduate Regular scale.
**COMM 602: Theories and Research of Mass Communication.** 3 credits.
Explores theories that have guided development of mass media. Emphasizes major scientific and humanistic approaches to mass media effects. Offered by Communication. May not be repeated for credit.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

**COMM 604: Communication Research Practicum.** 3 credits.
Helps communication master's students determine focus for program of study, thesis, and projects. Includes readings in applied communication research and exercises in topic selection, analysis. Offered by Communication. May not be repeated for credit.

**Recommended Prerequisite:** COMM 634 or permission of instructor.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Seminar

**Grading:**
This course is graded on the Graduate Regular scale.

**COMM 605: Intercultural Communication.** 3 credits.
Analyzes communication variables related to communication across cultures. Topics include nonverbal communication, time conceptualizations, perceptions and attitudes, values, social organization patterns, cultural norms, language, ethics, conflict across cultures, and research in intercultural communication. Offered by Communication. May not be repeated for credit.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

**COMM 615: Political Communication.** 3 credits.
Analyzes how political communication messages and strategies shape the development of perceptions and behavior in US presidential elections. Examines the interactions between media content and political action in election campaigns. Offered by Communication. May not be repeated for credit.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Seminar

**Grading:**
This course is graded on the Graduate Regular scale.

**COMM 620: Health Communication.** 3 credits.
Examines interpersonal communicative processes associated with health in consumer-provider, family, and health communication campaign contexts. Focus on understanding cultural differences in perceptions of/communication about health and disease. Offered by Communication. May not be repeated for credit.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Seminar

**Grading:**
This course is graded on the Graduate Regular scale.

**COMM 630: Theories of Public Relations.** 3 credits.
Provides a survey of public relations theories and major ethical issues. Examines ways theories relate to organizations, mass and international communication research, rhetoric, persuasion, and social movements. Offered by Communication. May not be repeated for credit.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

**COMM 631: Approaches to Group Facilitation.** 3 credits.
Introduces various theoretical and practical approaches to group facilitation with in-depth focus and practice in one approach. Students participate in group sessions, analyze videotapes of decision-making groups, and practice methodologies for facilitating group interaction. Offered by Communication. May not be repeated for credit.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

**COMM 632: Persuasion Theory.** 3 credits.
Introduces students to the processes and effects of persuasive communication. Covers key theories of persuasion, behavior change, information processing, message effects, as well as important frameworks that guide the practice of persuasion in applied settings. Particular attention is paid to message features that generate predictable effects and how such effects may vary across different communicative situations. Offered by Communication. May not be repeated for credit.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Seminar

**Grading:**
This course is graded on the Graduate Regular scale.

**COMM 634: Theories of Interpersonal Communication.** 3 credits.
Analyzes contemporary theories, concepts, and approaches to improving interpersonal communication. Examines interpersonal communication research. Offered by Communication. May not be repeated for credit.

**Recommended Prerequisite:** COMM 301 or permission of instructor.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

**COMM 635: Organizational Communication.** 3 credits.
Analyzes communication systems, processes in public and private organizations. Topics include conflict management, group decision making, interviewing, technical presentations, and using various channels for improving internal and external communication. Offered by Communication. May not be repeated for credit.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

**COMM 636: Communication Consulting.** 3 credits.
Investigates theories providing foundation for communication consulting. Provides theoretical information and mechanisms for application necessary to modify communicative behavior within organizations. Offered by Communication. May not be repeated for credit.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

**COMM 637: Risk Communication.** 3 credits.
Research on sharing information about physical hazards such as toxic waste, radiation, disease, injury, biohazards. Topics include communication concerning workplace safety, environmental problems, risk assessments, and scientific uncertainties. Offered by Communication. May not be repeated for credit.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Seminar

**Grading:**
This course is graded on the Graduate Regular scale.

**COMM 639: Science Communication.** 3 credits.
Reviews research on best practices in science communication for scientists and communication professionals. Explores theory on conceptualizing science communication as disseminating knowledge, promoting informed decision making, involving citizens in scientific research (i.e., citizen science), promoting legislative and individual actions, or creating entertainment. Students practice communicating complex science and designing contexts for public engagement with scientific research. Offered by Communication. May not be repeated for credit.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Seminar

**Grading:**
This course is graded on the Graduate Regular scale.

**COMM 640: Controversies in Science Communication.** 3 credits.
Examines the communication implications related to selected current topics of scientific controversy. Offered by Communication. May be repeated within the degree for a maximum 6 credits.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

**COMM 641: Advanced Communication Skills for STEM.** 3 credits.
Examines the specific oral, written, and mediated communication competencies needed by STEM professionals in modern society. Offered by Communication. May not be repeated for credit.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

**COMM 642: Science and the Public.** 3 credits.
Examines the relationship between science and society, with a particular emphasis on the role of communication in shaping public opinion on issues related to science and technology. Offered by Communication. May not be repeated for credit.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Seminar

**Grading:**
This course is graded on the Graduate Regular scale.

**COMM 644: Analysis and Criticism of Science Journalism.** 3 credits.
Examines media coverage of technically complex topics in science, social science, environment, health and medicine, and technology. Explores the influence of institutional media practices on news about science and technology. Offered by Communication. May not be repeated for credit.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Seminar

**Grading:**
This course is graded on the Graduate Regular scale.

**COMM 650: Research Methodologies in Communication.** 3 credits.
Introduces various research methods used by communication professionals. Focus on achieving understanding and knowledge of social scientific research, qualitative and quantitative, and critical analysis through use and application. Offered by Communication. May not be repeated for credit.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate or Senior Plus.

Enrollment is limited to students with a major in Communication.

Enrollment limited to students in the LA-MA-COM, LA-MAIS-ISIN or LA-PHD-COM programs.

Enrollment is limited to Graduate or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Laboratory, Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

**COMM 653: Graduate Seminar in Instructional Communication.** 3 credits.
Investigates theoretical and practical implications of instructional communication. Exposes graduate students to communication principles and practices of teaching college courses at upper and lower divisions. Offered by Communication. May not be repeated for credit.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Seminar

**Grading:**
This course is graded on the Graduate Regular scale.

COMM 655: Theory and Practice of Digital Communication. 3 credits.
Applies visual communication theory to the production of digital media. Emphasizes theories in nonfiction digital filmmaking, sound theory for audio production, and ethical and aesthetic topics in digital storytelling. Provides a community engaged learning component allowing students to partner with community organizations to produce digital media tools that address issues of social importance. Offered by Communication. May not be repeated for credit.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale.

COMM 660: Climate Change and Sustainability Communication Campaigns. 3 credits.
Offers practical application, skill development, and theoretical basis of communication campaigns developed in response to global warming and other threats to sustainability. Focuses on purposive campaigns to promote changes in individual behavior and public policy. Offered by Communication. May not be repeated for credit.

Specialized Designation: Green Leaf Focused Course

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Seminar

Grading:
This course is graded on the Graduate Regular scale.

COMM 670: Social Marketing. 3 credits.
Offers conceptual overview of social marketing: marketing methods designed to influence people to behave in ways that benefit society. Develops skills necessary to conduct a social marketing initiative and provides an opportunity for practical application of those skills. Offered by Communication. May not be repeated for credit.

Specialized Designation: Green Leaf Related Course

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Seminar

Grading:
This course is graded on the Graduate Regular scale.

COMM 696: Directed Readings and Research. 1-3 credits.
Reading and research on specific topic under direction of faculty member. Written report required; oral or written exam may be required. Offered by Communication. May be repeated within the term for a maximum 6 credits.

Recommended Prerequisite: Permission of department.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Internship

Grading:
This course is graded on the Graduate Special scale.

COMM 694: Communication Internship. 3 credits.
Students work in approved, professional-level communication position, meeting regularly with internship supervisor from department. Requires paper, journal, minimum 60 hours work for each credit of enrollment. Students usually enroll in internships at end of program of study. Offered by Communication. May not be repeated for credit.

Recommended Prerequisite: 18 graduate credits and permission of department.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Seminar

Grading:
This course is graded on the Graduate Regular scale.

COMM 690: Special Topics in Communication. 3 credits.
Explores contemporary issues in communication theory, research, and practice. Notes: Topics vary. May be repeated when topic is different. Offered by Communication. May be repeated within the term for a maximum 15 credits.

Specialized Designation: Green Leaf Related Course, Topic Varies

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Seminar

Grading:
This course is graded on the Graduate Regular scale.

COMM 690: Special Topics in Communication. 3 credits.
Explores contemporary issues in communication theory, research, and practice. Notes: Topics vary. May be repeated when topic is different. Offered by Communication. May be repeated within the term for a maximum 15 credits.

Specialized Designation: Green Leaf Related Course, Topic Varies

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Seminar

Grading:
This course is graded on the Graduate Regular scale.

COMM 690: Special Topics in Communication. 3 credits.
Explores contemporary issues in communication theory, research, and practice. Notes: Topics vary. May be repeated when topic is different. Offered by Communication. May be repeated within the term for a maximum 15 credits.

Specialized Designation: Green Leaf Related Course, Topic Varies

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.
Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Independent Study

**Grading:**
This course is graded on the Graduate Special scale.

**COMM 697: Independent Production.** 1-3 credits.
Media or creative production activities under direction of faculty member. Requires completed production; written report, oral exam may be required. Offered by Communication. May not be repeated for credit.

**Recommended Prerequisite:** Permission of department.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Independent Study

**Grading:**
This course is graded on the Graduate Special scale.

**COMM 700 Level Courses**

**COMM 700: Building Social Science Theory.** 3 credits.
Explores the process of developing and testing social science theories. Emphasizes the components and mechanisms of theory - such as variables and causality - in a manner intended to inform rigorous social science inquiry using quantitative or qualitative methods. Offered by Communication. May not be repeated for credit.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Seminar

**Grading:**
This course is graded on the Satisfactory/No Credit scale.

**COMM 701: Communication Science Research Practicum.** 3 credits.
Coordinates students into a research team to propose, test and report the findings of a two or three variable hypothesis. Conduct a research project that will make a publishable contribution to the communication science literature. May not be repeated for credit. Offered by Communication. May not be repeated for credit.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate or Non-Degree.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Satisfactory/No Credit scale.

**COMM 705: Intercultural Health and Risk Communication.** 3 credits.
Examines intercultural health and risk communication interventions; including health communication campaigns, public relations and advertising for health organizations, and how the media and Internet present health information. Offered by Communication. May not be repeated for credit.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

**COMM 706: Strategic Communication.** 3 credits.
Examines commonalities of strategic communication campaigns across fields (e.g., military, diplomacy, health, politics, marketing, public relations) in order to understand strategic communication, compare fields, and emphasize strategic and evaluative research across fields. Offered by Communication. May not be repeated for credit.

**Recommended Prerequisite:** COMM 630 or permission of instructor.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

**COMM 716: International Public Relations.** 3 credits.
Provides a survey of international public relations with an emphasis in three areas: applied knowledge for actual international practice, relevant theory, and ethical issues. Offered by Communication. May not be repeated for credit.

**Recommended Prerequisite:** COMM 706 or permission of instructor.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

**COMM 720: Consumer-Provider Health Communication.** 3 credits.
Explores relational health communication research and practice. Examines the role of interpersonal communication in health care delivery, health promotion, disease prevention, risk communication, and promoting personal and psychosocial well-being. Offered by Communication. May not be repeated for credit.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.
Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale.

COMM 721: E-Health Communication. 3 credits.
Explores the use of computer-mediated communication technologies in health care and health promotion, including examination of technology in health information dissemination, health education, health communication interventions, and the management of health care delivery. Offered by Communication. May not be repeated for credit.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale.

COMM 725: Qualitative Methods. 3 credits.
Examines qualitative research in communication. Emphasis is placed on techniques of naturalistic inquiry such as observation, interviewing, focus group methods, and ethnography, as well as tools for analyzing and reporting qualitative data. Offered by Communication. May not be repeated for credit.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale.

COMM 735: Crisis Communication. 3 credits.
Examines crisis communication contexts with a particular emphasis on the role of communication in a variety of crises and how the media and Internet present crisis information to the public. Offered by Communication. May not be repeated for credit.

Recommended Prerequisite: Permission of instructor.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale.

COMM 750: Research Methods II. 3 credits.
Extends basic research knowledge and skills learned in COMM 650 Research Methods I. Students will be taught to analyze and synthesize literature, develop theoretical linkages, and construct measurement scales. Offered by Communication. May not be repeated for credit.

Recommended Prerequisite: COMM 650.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale.

COMM 775: Media Content Analysis. 3 credits.
Introduces content analysis, a research technique for making replicable and valid inferences about text in sources such as news articles, advertisements, and television programs. Students design and conduct research using content analysis techniques. Offered by Communication. May not be repeated for credit.

Recommended Prerequisite: COMM 600 and COMM 650.

Registration Restriction:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale.

COMM 798: Communication Studies Project. 3 credits.
Final research seminar for all MA in communication students. Students discuss practical and theoretical issues related to project or thesis. Includes readings related to underlying theoretical, methodological, and ethical issues facing contemporary communication researchers and practitioners. MA students must take 798 in the semester of graduation or with permission of the MA Director. No more than 3 credits can be applied to the degree. Offered by Communication. May be repeated within the degree for a maximum 6 credits.

Recommended Prerequisite: COMM 600 and COMM 650.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Thesis

Grading:
This course is graded on the Satisfactory/No Credit scale.

COMM 799: Master's Thesis. 1-6 credits.
Original research endeavor related to student's concentration in communication under supervision of faculty committee. Offered by Communication. May be repeated within the degree.

Recommended Prerequisite: 24 graduate credits and approval of thesis proposal by faculty committee.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Thesis

Grading:
This course is graded on the Satisfactory/No Credit scale.
800 Level Courses

COMM 800: Studies for the Doctor of Philosophy in Education. 3-6 credits. Program of studies designed by student’s discipline director and approved by doctoral committee. Students participate in research activity of discipline director and write paper reporting original contributions. Offered by Communication. May not be repeated for credit.

**Registration Restrictions:**
Enrollment is limited to Graduate level students.

**Schedule Type:** Independent Study

**Grading:**
This course is graded on the Graduate Special scale.

COMM 820: Health Communication Campaigns. 3 credits. Explores use of communication campaigns to promote health and reduce health risks; examines how health communication campaigns are designed, implemented, and evaluated; and describes the role of communication research throughout the campaign process. Offered by Communication. May not be repeated for credit.

**Registration Restrictions:**
Enrollment is limited to Graduate level students.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

COMM 890: Special Topics in Communication. 3 credits. Selected topics reflecting specialized areas in communication. Notes: Topics vary. May be repeated for credit when topic is different. Offered by Communication. May be repeated within the degree.

**Specialized Designation:** Topic Varies

**Recommended Prerequisite:** PhD rank or permission of instructor.

**Registration Restrictions:**
Enrollment is limited to Graduate level students.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

900 Level Courses

**Recommended Prerequisite:** Approval of program director.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy.

**Schedule Type:** Dissertation

**Grading:**
This course is graded on the Satisfactory/No Credit scale.

COMM 999: Doctoral Dissertation Research. 1-15 credits. Research on an approved dissertation topic under the direction of dissertation committee. Notes: A minimum of 18 credits of COMM 998 and 999 combined must be applied to doctoral degree requirements. Offered by Communication. May be repeated within the degree.

**Recommended Prerequisite:** COMM 998.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy.

**Schedule Type:** Dissertation

**Grading:**
This course is graded on the Satisfactory/No Credit scale.

Computational and Data Sciences (CDS)

100 Level Courses

CDS 101: Introduction to Computational and Data Sciences. 3 credits. Introduction to the use of computers in scientific discovery through simulations and data analysis. Covers historical development and current trends in the field. Offered by Computational & Data Sciences. Limited to three attempts.

**Mason Core:** Natural Science with Lab, Natural Science Overview

**Recommended Prerequisite:** Appropriate score on the math placement test.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale.

CDS 102: Introduction to Computational and Data Sciences Lab. 1 credit. Experiments in computational and data sciences explore the connections between on-going advances in the natural sciences and the rapid advances in computing and data handling. Lab exercises demonstrate the use of computers in analyzing data, in modeling science problems, and in creating numerical simulations across the science disciplines. Offered by Computational & Data Sciences. Limited to three attempts.

**Mason Core:** Natural Science with Lab
Recommended Prerequisite: CDS 101. Concurrent enrollment is permitted.

Schedule Type: Laboratory

Grading:
This course is graded on the Undergraduate Regular scale.

CDS 130: Computing for Scientists. 3 credits.
Covers use of computers to solve practical scientific problems. Topics include creating effective scientific presentations, analysis of experimental data, online literature, data/information ethics, scientific modeling, and communication/collaboration tools. Designed to equip students with the knowledge and confidence they need to use future hardware and software systems both as students and throughout their scientific careers. Offered by Computational & Data Sciences. Limited to three attempts.

Mason Core: Info Tech & Computing

Recommended Prerequisite: Passing score on the math placement test for MATH 113.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale.

CDS 151: Data Ethics in an Information Society. 1 credit.
Examination of ethical issues related to access and use of information and data in the Internet age, for the general student, with special emphasis on ethical issues that apply to the proper use and interpretation of scientific and technical information. Offered by Computational & Data Sciences. Limited to three attempts.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale.

200 Level Courses

CDS 201: Introduction to Computational Social Science. 3 credits.
Undergraduate-level introduction to computational concepts, principles, and modeling approaches in social sciences, emphasizing simulations and elements of complexity theory as they apply to social phenomena. Survey includes systems dynamics, cellular automata, and agent-based models. Offered by Computational & Data Sciences. Limited to three attempts.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale.

CDS 205: Introduction to Agent-based Modeling and Simulation. 3 credits.
Undergraduate-level introduction to Agent-based Modeling. Provides a background onto why agent-based models and hands-on examination of agent-based models in the social sciences by examining and experimenting with a variety of social simulation projects. Offered by Computational & Data Sciences. Limited to three attempts.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale.

CDS 230: Modeling and Simulation I. 3 credits.
This course expands upon the foundation provided by CDS 130. Fundamental computational modeling techniques are used in a variety of science and engineering disciplines. Continued development of algorithmic thinking skills will be done using different computational environments. Offered by Computational & Data Sciences. Limited to three attempts.

Recommended Prerequisite: CDS 130 or permission of instructor.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale.

CDS 251: Introduction to Scientific Programming. 3 credits.
Focuses on elements of programming using the Fortran language and selected elements of the C language with emphasis on the aspects used in the computational and data sciences. Conducted through a combination of lecture and interactive computer laboratory. Offered by Computational & Data Sciences. Limited to three attempts.

Recommended Prerequisite: CDS 130.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale.

CDS 290: Topics in Computational and Data Sciences. 1-4 credits.
Selected topics in Computational and Data Sciences. May be accepted for credit by CDS majors and CDS minors. Offered by Computational & Data Sciences. May be repeated within the degree for a maximum 6 credits.

Specialized Designation: Topic Varies

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale.

CDS 292: Introduction to Social Network Analysis. 3 credits.
An introduction to methods and applications that examine social systems based on relations, structures, connectivity, location, roles, interactions, and other network properties. Example applications of Social Network Analysis covered will include politics, diseases, organizations, along with a variety of other social phenomena. Offered by Computational & Data Sciences. Limited to three attempts.

Mason Core: Quantitative Reasoning

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale.

300 Level Courses

CDS 301: Scientific Information and Data Visualization. 3 credits.
The techniques and software used to visualize scientific simulations, complex information, and data visualization for knowledge discovery. Includes examples and exercises to help students develop their understanding of the role visualization plays in computational science and provides a foundation for applications in their careers. Offered by Computational & Data Sciences. Limited to three attempts.
Recommended Prerequisite: CDS 101 or CDS 130 or equivalent, or permission of instructor.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale.

CDS 302: Scientific Data and Databases. 3 credits.
Data and databases used by scientists. Includes basics about database organization, queries, and distributed data systems. Student exercises will include queries of existing systems, along with basic design of simple database systems. Offered by Computational & Data Sciences. Limited to three attempts.

Specialized Designation: Writing Intensive in Major

Recommended Prerequisite: CDS 101 or CDS 130 or equivalent, or permission of instructor.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale.

CDS 303: Scientific Data Mining. 3 credits.
Data mining techniques from statistics, machine learning, and visualization to scientific knowledge discovery. Students will be given a set of case studies and projects to test their understanding of this field and provide a foundation for future applications in their careers. Offered by Computational & Data Sciences. Limited to three attempts.

Recommended Prerequisite: CDS 101 or CDS 130 or equivalent, or permission of instructor.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale.

400 Level Courses

CDS 403: Machine Learning Applications in Science. 3 credits.
Covers practical applications in STEM areas of decision trees, rule-based classification, support vector machines, Bayesian networks, ensemble methods, and Neural Networks. Emphasis resides on the process of applying machine learning effectively to a variety of problems. Offered by Computational & Data Sciences. Limited to three attempts.

Registration Restrictions:
Required Prerequisites: CDS 230\(^C\), MATH 203\(^C\) and CDS 303\(^C\).
\(^C\) Requires minimum grade of C.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale.

CDS 410: Numerical Analysis II. 3 credits.

Recommended Prerequisite: MATH 214 and MATH 446, proficiency in at least one computer programming language and computer operating system; or permission of instructor.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale.

CDS 411: Modeling and Simulation II. 3 credits.
Covers the application of modeling and simulation methods to various scientific applications, including fluid dynamics, solid mechanics, materials science, molecular mechanics, and astrophysics. Provides an introduction to modeling and simulation software, as well as high-performance computing. Offered by Computational & Data Sciences. Limited to three attempts.

Recommended Prerequisite: MATH 446, PHYS 262 or PHYS 245, and a 200- or higher-level computational methods course, or permission of instructor.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale.

CDS 421: Computational Data Science. 3 credits.
Covers the governing framework of data science for storing and processing big data in a distributed computer environment using simple programming models. Includes a comprehensive selection of tools from Hadoop, MapReduce, HDFS, Spark, Flink, Hive, HBase, MongoDB, Cassandra, Kafka. Students are expected to complete several computer projects using these cyber packages. Offered by Computational & Data Sciences. Limited to three attempts.

Recommended Prerequisite: CDS 251 or equivalent computer programming language, and knowledge of computer operating system, or permission of instructor.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale.

CDS 461: Molecular Dynamics and Monte Carlo Simulations. 3 credits.
Covers particle methods to solve variety of physical systems. Emphasizes study of structure and thermodynamics of condensed systems in liquid and solid phases while implementing numerically the Molecular Dynamics and Monte Carlo methods. Applications and projects include a variety of atomistic and molecular simulations based on pairwise interatomic interactions. Offered by Computational & Data Sciences. Limited to three attempts.

Recommended Prerequisite: Competency in programming at CDS 251 level, college physics, and MATH 214 or MA TH 216, or permission of instructor.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale.

CDS 468: Image Operators and Processing. 3 credits.
An introductory examination of image mathematics, computational protocols, and applications. Topics include image operator notation, channel operators, informational operators, intensity operators,
geometric operators, image transformations, frequency filtering, and image basis set expansions. This course will build the students' computational skill set as applied to visual data and create a library of image analysis scripts. Offered by Computational & Data Sciences. Limited to two attempts.

**Recommended Prerequisite:** CDS 230 or equivalent.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale.

**CDS 486: Topics in Computational and Data Sciences.** 3 credits.
Covers selected topics in computational and data sciences not covered in fixed content courses. Offered by Computational & Data Sciences. May be repeated within the degree for a maximum 6 credits.

**Specialized Designation:** Topic Varies

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale.

**CDS 487: Electronic Structure Computations.** 3 credits.
Covers computational aspects of materials science, such as first-principles methods of electronic structure calculations of periodic solids, clusters, and molecules, as well as the use of empirical potentials. Examples will be drawn from metals, insulators, and semiconductors. Students will construct simple codes and be guided in the use of the more sophisticated available computational packages. Offered by Computational & Data Sciences. Limited to three attempts.

**Recommended Prerequisite:** PHYS 308 or PHYS 402.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale.

**CDS 490: Directed Study and Research.** 1-3 credits.
Students work under the guidance of a faculty member on an independent study or directed research project in the computational and data sciences. May be repeated in combination with CDS 491 for a total of 6 credits between the two classes. Offered by Computational & Data Sciences. May be repeated within the degree for a maximum 6 credits.

**Recommended Prerequisite:** Students must be CDS majors or minors in their junior or senior year and have permission of the instructor.

**Schedule Type:** Independent Study

**Grading:**
This course is graded on the Undergraduate Regular scale.

**CDS 491: Internship.** 1-3 credits.
On-the-job experience for CDS majors and minors working in industry and government laboratories, including summer programs. Supervision and approval of this course must be arranged with department before registering. May be repeated in combination with CDS 490 for a total of 6 credits between the two classes. Offered by Computational & Data Sciences. May be repeated within the degree for a maximum 6 credits.

**Recommended Prerequisite:** Students must be CDS majors or minors in their junior or senior year and have permission of the instructor.

**Schedule Type:** Internship

**Grading:**
This course is graded on the Satisfactory/No Credit scale.

**CDS 492: Capstone in Data Science.** 3 credits.
This course is intended to provide a capstone experience for undergraduate students by synthesizing knowledge and experience that they acquired in earlier coursework to address a complex Data Science problem. This course requires analytical, collaborative, and communication skills. Offered by Computational & Data Sciences. Limited to three attempts.

**Mason Core:** Capstone

**Recommended Prerequisite:** CDS 230 and (CDS 301 or CDS 302) or permission of instructor.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale.

**500 Level Courses**

**CDS 501: Scientific Information and Data Visualization.** 3 credits.
Techniques and software used to visualize scientific simulations, complex information, and data visualization for knowledge discovery. Includes examples and exercises to help students develop their understanding of the role visualization plays in computational science and provides a foundation for applications in their careers. Offered by Computational & Data Sciences. May not be repeated for credit.

**Recommended Prerequisite:** CDS 130 or CDS 101; or permission of instructor.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

**CDS 502: Introduction to Scientific Data and Databases.** 3 credits.
Data and databases used by scientists. Includes basics about database organization, queries, and distributed data systems. Student exercises will include queries of existing systems, along with basic design of database systems. Examples from different disciplines will be given. Offered by Computational & Data Sciences. May not be repeated for credit.

**Recommended Prerequisite:** CDS 130 or CDS 101; or permission of instructor.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.
Computational Science and Informatics (CSI)

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale.

Computational Science and Informatics (CSI)

500 Level Courses

CSI 500: Computational Science Tools. 3 credits.
Introduces computer skills and packages commonly used in quantitative scientific research. Notes: CSI 601 and CSI 602, including additional material, have merged to create CSI 500. Offered by Computational & Data Sciences. May not be repeated for credit.

Recommended Prerequisite: 1 year of college calculus, knowledge of matrix algebra, and computer programming.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale.

CSI 501: Introduction to Scientific Programming. 3 credits.
Introduces and reviews programming in C and FORTRAN with emphasis on the aspects used in the computational and data sciences. Conducted through a combination of both lecture and interactive computer laboratory. Offered by Computational & Data Sciences. May not be repeated for credit.

Recommended Prerequisite: Permission of instructor.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale.

CSI 590: Quantitative Foundations for Computational Sciences. 3 credits.
Accelerated review of mathematical tools for scientific applications and analysis. Topics include vectors and matrices; differential and difference equations; linear systems; Fourier, Laplace, and Z-transforms; and probability theory. Notes: Not applicable to 48-credit course total for CSI PhD. Offered by Computational & Data Sciences. Limited to two attempts. Equivalent to SYST 500.

Recommended Prerequisite: MATH 213 and 214.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale.

CSI 597: Topics in Science and Engineering Simulation. 3 credits.
Covers selected topics in Science and Engineering simulation, not covered in fixed content computational sciences and informatics courses. Offered by Computational & Data Sciences. May not be repeated for credit.

Specialized Designation: Topic Varies

Recommended Prerequisite: Permission of instructor.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale.

600 Level Courses

CSI 600: Quantitative Foundations for Computational Sciences. 3 credits.
Accelerated review of mathematical tools for scientific applications and analysis. Topics include vectors and matrices; differential and difference equations; linear systems; Fourier, Laplace, and Z-transforms; and probability theory. Notes: Not applicable to 48-credit course total for CSI PhD. Offered by Computational & Data Sciences. May not be repeated for credit. Equivalent to SYST 500.

Recommended Prerequisite: MATH 213 and 214.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale.
CSI 606: Scientific Graphics and Visualization Tools. 1 credit.
An introduction into the use of scientific visualization tools for data analysis. Use of specific packages will be taught. Packages will include PV-WAVE, S-Plus, XV, XMGR, and the pnm tools on a rotating basis. Offered by Computational & Data Sciences. May not be repeated for credit.

Recommended Prerequisite: Competency in Linux of permission of instructor.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale.

CSI 629: Topics in Continuum Systems. 3 credits.
Covers selected topics in the computational aspects of continuum systems not covered in fixed-content courses in dynamical systems. Possible topics are smooth-particle hydrodynamics, radiation hydrodynamics, algorithms for continuum systems, adaptive grids for continuum computations, spectral methods in computational fluid dynamics, algorithms for concurrent machines, formation of high energy particle jets in astrophysical applications, application to Earth atmospheric problems, and flow considerations in molten materials. Offered by Computational & Data Sciences. May not be repeated for credit.

Specialized Designation: Topic Varies

Recommended Prerequisite: Permission of instructor.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale.

CSI 639: Ethics in Scientific Research. 3 credits.
Reviews purpose of scientific research and principles for evaluating ethical issues. Teaches skills for survival through training in moral reasoning and responsible conduct. Discusses ethical issues and applying critical-thinking skills to design, execution, and analysis of experiments. Issues include using animals, humans in research; ethical standards in computer community; research fraud; and currently accepted guidelines for data ownership, manuscript preparation, and conduct of those in authority. Offered by Computational & Data Sciences. May not be repeated for credit.

Recommended Prerequisite: PHYS 303, PHYS 305, PHYS 307, MATH 213, or permission of instructor.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale.

CSI 662: Introduction to Space Weather. 3 credits.
Introduction to space weather involving systems such as the sun, the heliosphere, and the Earth's magnetosphere and ionosphere. Covers the solar magnetic field, solar flares, coronal mass ejections, particle acceleration mechanisms, the solar wind, and the Earth's magnetic field, radiation belt, geomagnetic storms, and ionospheric disturbances. Offered by Computational & Data Sciences. May not be repeated for credit.

Recommended Prerequisite: PHYS 303, PHYS 305, PHYS 307, MATH 213, or permission of instructor.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale.

CSI 670: Economic Systems Design. 3 credits.
Introduces analytical and engineering principles used to develop exchange systems. Covers behavioral aspects of auction systems; matching, assignment, and transportation problems; and information markets. Introduces methods for testbedding systems using experimental economics. Offered by Computational & Data Sciences. May not be repeated for credit.
Recommended Prerequisite: Course in linear and nonlinear optimization, and course in linear algebra, or permission of instructor.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale.

CSI 672: Statistical Inference. 3 credits.
Fundamental principles of estimation and hypothesis testing. Topics include limiting distributions and stochastic convergence, sufficient statistics, exponential families, statistical decision theory and optimality for point estimation, Bayesian methods, maximum likelihood, asymptotic results, interval estimation, optimal tests of statistical hypotheses, and likelihood ratio tests. Offered by Computational & Data Sciences. May not be repeated for credit. Equivalent to STAT 652.

Recommended Corequisite: STAT 554.

Registration Restrictions:
Required Prerequisite: STAT 544B-.
B- Requires minimum grade of B-.

Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale.

CSI 674: Bayesian Inference and Decision Theory. 3 credits.
Introduces decision theory and relationship to Bayesian statistical inference. Teaches commonalities, differences between Bayesian and frequentist approaches to statistical inference, how to approach statistics problem, and how to combine data with informed expert judgment to derive useful and policy relevant conclusions. Teaches theory to develop understanding of when and how to apply Bayesian and frequentist methods; and practical procedures for inference, hypothesis testing, and developing statistical models for phenomena. Teaches fundamentals of Bayesian theory of inference, including probability as a representation for degrees of belief, likelihood principle, use of Bayes Rule to revise beliefs based on evidence, conjugate prior distributions for common statistical models, and methods for approximating the posterior distribution. Introduces graphical models for constructing complex probability and decision models from modular components. Offered by Computational & Data Sciences. May not be repeated for credit. Equivalent to OR 664, SYST 664.

Recommended Prerequisite: STAT 544, STAT 554, or equivalent.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale.

CSI 676: Regression Analysis. 3 credits.
Simple and multiple linear regression, polynomial regression, general linear models, subset selection, step-wise regression, and model selection. Also covered are multicollinearity, diagnostics, and model building as well as the theory and practice of regression analysis. Offered by Computational & Data Sciences. May not be repeated for credit. Equivalent to STAT 656.

Registration Restrictions:
Required Prerequisites: STAT 544B- and 554B-.
* May be taken concurrently.
B- Requires minimum grade of B-.

Enrollment limited to students with a class of Advanced to Candidacy, Graduate or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale.

CSI 678: Time Series Analysis and Forecasting. 3 credits.
Modeling stationary and nonstationary processes; autoregressive, moving average and mixed model processes; hidden periodicity models; properties of models; autocovariance and autocorrelation functions, and partial autocorrelation function; spectral density functions; identification of models; estimation of model parameters, and forecasting techniques. Offered by Computational & Data Sciences. May not be repeated for credit.

Registration Restrictions:
Required Prerequisites: STAT 544B- and 554B-.
B- Requires minimum grade of B-.

Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale.

**CSI 685: Fundamentals of Materials Science. 3 credits.**
Covers fundamentals of materials science with emphasis on physical topics including crystal structure and symmetry, dislocation theory, theory of interfaces, multicomponent phase diagrams, theory of phase transformations, nano-materials, metallic glasses. Includes a term project, assignments from current literature, and application of computation in materials science. Offered by Computational & Data Sciences. May not be repeated for credit. Equivalent to PHYS 615.

**Recommended Prerequisite:** Undergraduate degree in electrical or mechanical engineering, materials science, physics, chemistry or related disciplines; or permission of instructor.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

**CSI 687: Solid State Physics and Applications. 3 credits.**
Covers crystal structures, binding, lattice vibrations, free electron model, metals, semiconductors and semiconductor devices, superconductivity, and magnetism. Offered by Computational & Data Sciences. May not be repeated for credit. Equivalent to PHYS 512.

**Recommended Prerequisite:** PHYS 502 or equivalent.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

**CSI 685: Scientific Databases. 3 credits.**
Study of database support for scientific data management. Covers requirements and properties of scientific databases, data models for statistical and scientific databases, semantic and object-oriented modeling of application domains, statistical database query languages and query optimization, advanced logic query languages, and case studies such as the human genome project and Earth-orbiting satellites. Offered by Computational & Data Sciences. May not be repeated for credit.

**Recommended Prerequisite:** INFS 614 or equivalent, or permission of instructor.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

**700 Level Courses**

**CSI 701: Foundations of Computational Science. 3 credits.**
Covers mapping of mathematical models to computer software, including all aspects of developing scientific software such as architecture, data structures, advanced numerical algorithms, languages, documentation, optimization, validation, verification, and software reuse. Examples in bioinformatics, computational biology, computational physics, and global change demonstrate scientific advances enabled by computation. Class projects involve working in teams to develop software that implements mathematical models, using software to address important scientific questions, and conducting computational experiments with it. Offered by Computational & Data Sciences. May not be repeated for credit.

**Recommended Prerequisite:** Competency in UNIX and programming at CSI 501 level, and CSI 690; or permission of instructor.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.
CSI 702: High-Performance Computing. 3 credits.
Hardware and software associated with high-performance scientific computing. Computer architectures, processor design, programming paradigms, parallel and vector algorithms. Emphasizes importance of software scalability in science problems. Offered by Computational & Data Sciences. May not be repeated for credit.

Recommended Prerequisite: Competency in Linux and programming at CSI 501 level or permission of instructor.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale.

CSI 703: Scientific and Statistical Visualization. 3 credits.
Covers visualization methods used to provide new insights and intuition concerning measurements of natural phenomena and scientific and mathematical models. Presents case studies from myriad disciplines. Topics include human perception and cognition, introduction to graphics laboratory, elements of graphing data, representation of space-time and vector variables, representation of 3-D and higher dimensional data, dynamic graphical methods, and virtual reality. Work on a visualization project required. Emphasizes software tools on Silicon Graphics workstation, but other workstations and software may be used. Offered by Computational & Data Sciences. May not be repeated for credit.

Recommended Prerequisite: STAT 554 or CS 551, or permission of instructor.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale.

CSI 709: Topics in Computational Sciences and Informatics. 3 credits.
Covers selected topics in computational sciences and informatics not covered in fixed-content computational sciences and informatics courses. Offered by Computational & Data Sciences. May be repeated within the term for a maximum 9 credits.

Specialized Designation: Topic Varies

Recommended Prerequisite: Admission to the PhD program and permission of instructor.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale.

CSI 711: Chemical Thermodynamics and Kinetics. 3 credits.
Advanced study of thermodynamics and kinetics. Covers application of kinetics to elucidation of reaction mechanisms and application of statistical thermodynamics to theory of elementary reaction rates. Offered by Computational & Data Sciences. May not be repeated for credit. Equivalent to CHEM 633.

Recommended Prerequisite: CHEM 331 and 332.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale.

CSI 712: Introduction to Solid Surfaces. 3 credits.
Includes gas absorption isotherms, surface-area measurement techniques, real and clean surfaces, physisorption and chemisorption, methods of gas absorption and desorption, measurement of heats of adsorption, desorption kinetics, electron spectroscopies and their surface sensitivities, instrumentation needed, and principles of vacuum technology. Offered by Computational & Data Sciences. May not be repeated for credit. Equivalent to CHEM 728.

Recommended Prerequisite: CHEM 422 or equivalent.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale.

CSI 713: Quantum Chemistry. 3 credits.
Illustrates fundamental concepts of quantum mechanics with applications to chemical systems, including atomic and molecular electronic structure and properties, molecular symmetry, and intermolecular forces. Offered by Computational & Data Sciences. May not be repeated for credit.

Recommended Prerequisite: CHEM 332.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale.

CSI 714: Spectroscopy and Structure. 3 credits.
Covers quantum mechanics of the interaction of atoms and molecules with electromagnetic radiation. Also covers modern spectroscopic methods as applied to the elucidation of molecular structure and dynamics. Offered by Computational & Data Sciences. May not be repeated for credit.
Recommended Prerequisite: CHEM 332.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale.

CSI 719: Topics in Computational Chemistry. 3 credits.
Covers selected topics in computational chemistry not covered in fixed-content computational chemistry courses. Offered by Computational & Data Sciences. May be repeated within the degree for a maximum 12 credits.

Specialized Designation: Topic Varies

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Recommended Prerequisite: Permission of Instructor.

CSI 720: Fluid Mechanics. 3 credits.
Covers basic and advanced fluid mechanics and continuous hypothesis to define fluids. Introduces tensor analysis; Euclidean and Lagrangian representations of fluid flow; Laplace's equation; continuity equation; Navier-Stokes equations; Bernoulli's theorem and Crocco's form of the equations; steady and unsteady flows; potential, incompressible, and compressible flows; gravity and sound waves; gas dynamics; and viscous flows. Offered by Computational & Data Sciences. May not be repeated for credit.

Recommended Prerequisite: CSI 690 and CSI 780, or permission of instructor.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale.

CSI 721: Computational Fluid Dynamics I. 3 credits.
Covers fundamentals including spatial and temporal approximation techniques for partial differential equations, solution of large systems of equations, data structures, solvers of the Laplace/ full potential equation, and simple Euler solvers. Includes two major projects: Laplace solver and 2-D Euler solver on unstructured grids. Students expected to write their own codes. Offered by Computational & Data Sciences. May not be repeated for credit.

Recommended Prerequisite: Course in partial differential equations such as MATH 678 or equivalent; knowledge of linear algebra at level of MATH 603 or CSI 740/MATH 625; coding experience in FORTRAN or C; or permission of instructor.

Recommended Prerequisite: CSI 720 or Permission of Instructor.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale.

CSI 722: Computational Fluid Dynamics II. 3 credits.
Covers more advanced topics in computational fluid dynamics, including high-resolution schemes for hyperbolic PDEs, advanced Euler solvers, Navier-Stokes solvers, grid generation, adaptive mesh refinement, efficient use of supercomputing hardware, and future trends. Projects include topics in grid generation and adaptive refinement. Students expected to write their own codes. Offered by Computational & Data Sciences. May not be repeated for credit.

Recommended Prerequisite: CSI 721 or permission of instructor.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale.

CSI 723: Fluid Mechanics II. 3 credits.
Covers gas dynamics, shock waves, method of characteristics, boundary layer flows, instabilities, and turbulence modeling. Special topics include biological, non-Newtonian, and free surface flows; aeroelasticity; and magneto-hydrodynamics. Offered by Computational & Data Sciences. May not be repeated for credit.

Recommended Prerequisite: CSI 720 or Permission of Instructor.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale.

CSI 739: Topics in Bioinformatics. 3 credits.
Selected topics in bioinformatics not covered in fixed-content bioinformatics courses. Offered by Computational & Data Sciences. May not be repeated for credit.

Specialized Designation: Topic Varies

Recommended Prerequisite: Permission of instructor.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.
Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale.

CSI 740: Numerical Linear Algebra. 3 credits.
Covers computational methods for matrix systems; theory and development of numerical algorithms for the solution of linear systems of equations, including direct and iterative methods; analysis of sensitivity of system to computer round off; and solution of least squares problems using orthogonal matrices. Also covers computation of eigenvalues and eigenvectors, singular value decomposition, and applications. Offered by Computational & Data Sciences. May not be repeated for credit. Equivalent to MATH 625.

Recommended Prerequisite: MATH 203 and some programming experience.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale.

CSI 742: The Mathematics of the Finite Element Method. 3 credits.
The finite element method is commonly used for developing numerical approximations to problems involving ordinary and partial differential equations. Course develops underlying mathematical foundation, examines specific types of finite elements, analyzes convergence rates and approximation properties, and uses method to solve important equations. Students develop their own codes and are expected to complete independent projects. Offered by Computational & Data Sciences. May not be repeated for credit.

Recommended Prerequisite: MATH 446 or 685, or permission of instructor.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale.

CSI 744: Linear and Nonlinear Modeling in the Natural Sciences. 3 credits.
Develops tools of mathematical modeling while carrying out numerical simulations. Considers examples from across the sciences. Topics include basic issues such as models, simplification, linearity, and nonlinearity; dimensionless parameters; dimensional analysis; models involving differential equations; examples from population growth and chemical kinetics; models involving partial differential equations; diffusion, transport, nonlinearity and shocks; probabilistic modeling; perturbation methods; extrapolation; and introduction to stability. Offered by Computational & Data Sciences. May not be repeated for credit.

Recommended Prerequisite: Permission of Instructor.

Registration Restrictions:
CSI 758: Visualization and Modeling of Complex Systems. 3 credits.
Covers elements of modeling and analysis for scientific applications. Concentrates on sample projects and student-initiated projects to use visualization, image and graphical analysis as they apply to modeling of complex data sets and systems. Reviews methods of creating and generating analysis and visualization packages. Data sets from multiple sources will be used. Modeling and analysis accompanied by appropriate readings from current literature. Offered by Computational & Data Sciences. May not be repeated for credit.

Recommended Prerequisite: Permission of instructor.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale.

CSI 763: Statistical Methods in Space Sciences. 3 credits.
Covers statistical and data analysis methods applicable to problems in space science, remote sensing, and astrophysics. Includes parametric and nonparametric hypothesis testing, parameter estimation, correlation analysis, time series analysis, spatial analysis, and image reconstruction. Emphasizes imperfect nature of actual data sets and hypothesis. Examples drawn from current space science research. Offered by Computational & Data Sciences. May not be repeated for credit.

Recommended Prerequisite: ASTR 530 or permission of instructor.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale.

CSI 764: Computational Astrophysics. 3 credits.
Covers statistical mechanics concepts important in astrophysics. Presents unified approach to particle acceleration and interaction theory based on analytical and numerical analysis of Boltzmann and Liouville equations. Discusses computational methods relevant to particle transport problems, with emphasis on Fokker-Planck and Monte Carlo solution techniques. Applications from space sciences include studies of cosmic ray acceleration, photon comptonization, particle transport in the near-Earth environment, energy transport in stellar atmospheres, and self-gravitating system dynamics. Offered by Computational & Data Sciences. May not be repeated for credit. Equivalent to ASTR 764.

Recommended Prerequisite: ASTR 530.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale.

CSI 771: Computational Statistics. 3 credits.
Covers basic computationally intensive statistical methods and related methods, which would not be feasible without modern computational resources. Covers nonparametric density estimation including kernel methods, orthogonal series methods and multivariate methods, recursive methods, cross-validation, nonparametric regression, penalized smoothing splines, the jackknife and bootstrapping, computational aspects of exploratory methods including the grand tour, projection pursuit, alternating conditional expectations, and inverse regression methods. Offered by Computational & Data Sciences. May not be repeated for credit.

Registration Restrictions:

Required Prerequisite: CSI 672 B-
B- Requires minimum grade of B-.

Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale.

CSI 772: Statistical Learning. 3 credits.
Focuses on statistical learning theory by introducing the statistical and optimization background essential for developing new efficient statistical learning algorithms. Also discusses applications of statistical learning algorithms to the solution of important problems in many areas of science. Offered by Computational & Data Sciences. May not be repeated for credit.

Registration Restrictions:

Required Prerequisites: STAT 652 B- or CSI 672 B-
B- Requires minimum grade of B-.

Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale.

CSI 773: Statistical Graphics and Data Exploration. 3 credits.
Exploratory data analysis provides a reliable alternative to classical statistical techniques, which are designed to be the best possible when stringent assumptions apply. Topics include graphical techniques such as scatter plots, box plots, parallel coordinate plots, and other graphical devices; re-expression and transformation of data; influence and leverage; and dimensionality reduction methods such as projection pursuit. Offered by Computational & Data Sciences. May not be repeated for credit.

Recommended Prerequisite: A 300-level statistics course and a programming course, or permission of instructor.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.
Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

**CSI 775: Graphical Models for Inference and Decision Making.** 3 credits.
Theory and methods for inference and decision making in environments characterized by uncertain information. Covers graphical probability and decision models. Studies approaches to representing knowledge about uncertain phenomena, and planning and acting under uncertainty. Topics include knowledge engineering, exact and approximate inference in graphical models, learning in graphical models, temporal reasoning, planning, and decision-making. Practical model-building experience provided. Students apply what they learn to a project of their own choosing. Offered by Computational & Data Sciences. May not be repeated for credit. Equivalent to OR 719.

**Recommended Prerequisite:** STAT 652 or permission of instructor.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

**CSI 777: Principles of Knowledge Mining.** 3 credits.
Principles and methods for synthesizing task-oriented knowledge from computer data and prior knowledge and presenting it in human-oriented forms such as symbolic descriptions, natural language-like representations, and graphical forms. Topics include fundamental concepts of knowledge mining; methods for target data generation and optimization; statistical and symbolic approaches; knowledge representation and visualization; and new developments such as inductive databases, knowledge generation languages, and knowledge scouts. Offered by Computational & Data Sciences. May not be repeated for credit.

**Recommended Prerequisite:** INFS 614 or equivalent, or Permission of Instructor.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

**CSI 779: Topics in Computational Statistics.** 3 credits.
Selected topics in computational statistics not covered in fixed-content computational statistics courses. Offered by Computational & Data Sciences. May be repeated within the term.

**Specialized Designation:** Topic Varies

**Recommended Prerequisite:** Permission of instructor.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

**CSI 780: Principles of Modeling and Simulation in Science.** 3 credits.
Applies numerical methods to study of variety of physical systems, with emphasis on modeling and simulation. Develops numerical algorithms and simulation codes to gain understanding of mechanisms, processes in physical systems. Includes several projects drawn from such areas as atomic and molecular interactions, molecular dynamics, lattice dynamics, quantum systems, chaos, percolation, random walks, aggregation mechanisms of soft solids, nanomaterials, and nonlinear dynamics. Offered by Computational & Data Sciences. May not be repeated for credit.

**Recommended Prerequisite:** Competency in programming at CSI 501 level or permission of instructor.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

**CSI 782: Statistical Mechanics for Modeling and Simulation.** 3 credits.
Studies microcanonical, canonical, and grand canonical ensembles and fluctuations. Includes modeling of ideal, dilute, and diatomic gases, liquids, and crystals, and the Liouville equation. Introduces Brownian motion, kinetic theory, and transport processes. Includes several projects drawn from such areas as atomic and molecular interactions, molecular dynamics, lattice dynamics, quantum systems, chaos, percolation, random walks, aggregation mechanisms of soft solids, nanomaterials, and nonlinear dynamics. Offered by Computational & Data Sciences. May not be repeated for credit.

**Recommended Prerequisite:** CSI 690, or permission of instructor.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

**CSI 783: Computational Quantum Mechanics.** 3 credits.
Studies fundamental concepts of quantum mechanics from computational point of view, review of systems with spherically symmetric potentials, many electron atom solutions to Schrodinger's equation, electron spin in many-electron systems, atomic structure calculations, algebra of many-electron calculations, Hartree-Fock self-consistent field method, molecular structure calculations, scattering theory computations, and solid-state computations. Offered by Computational & Data Sciences. May not be repeated for credit. Equivalent to CHEM 736, PHYS 736.
Recommended Prerequisite: PHYS 502 and PHYS 613/CSI 780, or permission of instructor.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale.

CSI 786: Molecular Dynamics Modeling. 3 credits.
Introduces simulation methods in physical chemistry sciences. Covers computational approaches to modeling molecular and condensed matter systems, including interatomic and molecular potentials, Molecular Dynamics methods, time averages, ensemble distributions, numerical sampling, thermodynamic functions, response theory, transport coefficients, and dynamic structure. Offered by Computational & Data Sciences. May not be repeated for credit.

Recommended Prerequisite: CSI 690 or CSI 780 or equivalent, or CHEM 633/CSI 711, or permission of instructor.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale.

CSI 787: Computational Materials Science. 3 credits.
Covers selected topics in computational aspects of condensed matter, such as methods of electronic structure calculations, surface science, molecular clusters, lattice dynamics, nanomaterials, semiconductors, superconductivity, magnetism, Hubbard model, mesoscopic systems, and liquids. Offered by Computational & Data Sciences. May not be repeated for credit.

Recommended Prerequisite: PHYS 512/CSI 687 and PHYS 736/CSI 783, or permission of instructor.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale.

CSI 788: Simulation of Large Scale Systems. 3 credits.
Study of diverse, large-scale physical systems with emphasis on modeling and simulation. Students will undertake several projects which will draw from such areas as many-body dynamics, atmospheric structure and dynamics, high-temperature plasmas, stellar structure, hydro dynamical systems, galactic structure and interactions, and cosmology. Offered by Computational & Data Sciences. May not be repeated for credit.

Recommended Prerequisite: CSI 690 or permission of instructor.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Thesis

Grading:
This course is graded on the Satisfactory/No Credit scale.
CSI 799: Master's Thesis. 1-6 credits.
Project chosen and completed under guidance of graduate faculty member, resulting in acceptable technical report (master's thesis) and oral defense. Offered by Computational & Data Sciences. May be repeated within the degree.

Recommended Prerequisite: Completion of twelve graduate credits and Permission of Instructor.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Thesis

Grading:
This course is graded on the Satisfactory/No Credit scale.

800 Level Courses

CSI 854: Hyperspectral Imaging Applications. 3 credits.
Includes advanced hyperspectral concepts, multisystems tradeoffs, data collection and processing systems, imaging radar systems, laser systems, data fusion, calibration and data compression techniques, remote sensing and U.S. national policy. Applications include environmental, homeland security, medical, military, disaster mitigation, agricultural, and transportation topics. Offered by Computational & Data Sciences. May not be repeated for credit. Equivalent to GGS 840.

Recommended Prerequisite: Permission of instructor.

Registration Restrictions:
Enrollment is limited to Graduate level students.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale.

CSI 873: Computational Learning and Discovery. 3 credits.
Presents modern ideas, theories, and methods for computational learning and discovery, along with relevant applications including medical diagnosis, Earth science data analysis, and neuronal modeling. Includes background elucidation of fundamental concepts in computational learning, addressing discovery of equations, theory of causality, and comparison with biological and cognitive models. Students make presentations on topics of their research interest and work on projects involving state-of-the-art systems. Offered by Computational & Data Sciences. May not be repeated for credit. Equivalent to CSI 763.

Recommended Prerequisite: CS 580 or equivalent or permission of instructor.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Post-Baccalaureate or Non-Degree Undergraduate degrees may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale.

CSI 876: Measure and Linear Spaces. 3 credits.
Covers measure theory and integration, convergences theorems, and the theory of linear spaces and functional analysis, including normed linear spaces, inner product spaces, Banach and Hilbert spaces, Sobolev spaces, and reproducing kernels. Topics include wavelets, applications to stochastic processes, and nonparametric functional inference. Offered by Computational & Data Sciences. May not be repeated for credit.

Recommended Prerequisite: IT 776 or permission of instructor.

Registration Restrictions:
Enrollment is limited to Graduate level students.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale.

CSI 877: Geometric Methods in Statistics. 3 credits.
Develops foundations of geometric methods for statistics. Topics include n-dimension Euclidian geometry; projective geometry; differential geometry, including curves, surfaces, and n-dimensional differentiable manifolds; and computational geometry, including computation of convex hulls, tessellations of two-, three-, and n-dimensional spaces, and finite element grid generation. Examples include applications to scientific visualization. Offered by Computational & Data Sciences. May not be repeated for credit.

Recommended Prerequisite: STAT 690 or permission of instructor.

Registration Restrictions:
Enrollment is limited to Graduate level students.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale.

CSI 885: Atomistic Modeling of Materials. 3 credits.
Advanced course focusing on utilization of atomistic modeling and computer simulation techniques to analyze structure of crystalline materials. Introduces modern methodology of largescale atomistic simulations and provides hands-on experience through numerous examples and homework assignments based on simulation packages. Provides background knowledge on theory of lattice defects (point defects, interfaces, dislocations) and thermal and mechanical properties of solid materials (plastic deformation, fracture). Offered by Computational & Data Sciences. May not be repeated for credit.

Recommended Prerequisite: CSI 685, 700, and 786, or permission of instructor.

Registration Restrictions:
Enrollment is limited to Graduate level students.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale.

CSI 898: Research Colloquium in Computational Sciences and Informatics. 1 credit.
Presentations in specific research areas in computational sciences and informatics by faculty and staff members and professional visitors.

Notes: A maximum 3 credits of CSI 898, 899, and 991 may be applied to
PhD. Offered by Computational & Data Sciences. May be repeated within the term.

Registration Restrictions:
Enrollment is limited to Graduate level students.

Schedule Type: Seminar

Grading:
This course is graded on the Satisfactory/No Credit scale.

CSI 899: Colloquium in Computational and Data Sciences. 1 credit.
Presentations in specific research areas in computational sciences and informatics by faculty and staff members and professional visitors. Notes: A maximum 3 credits of CSI 898, 899, and 991 may be applied to PhD. Offered by Computational & Data Sciences. May be repeated within the term.

Registration Restrictions:
Enrollment is limited to Graduate level students.

Schedule Type: Seminar

Grading:
This course is graded on the Satisfactory/No Credit scale.

900 Level Courses

CSI 971: Probability Theory. 3 credits.
A rigorous measure-theoretic treatment of probability. Includes expectation, distributions, laws of large numbers and central limit theorems for independent random variables, characteristic function convergence, and Markov chains. Offered by Computational & Data Sciences. May not be repeated for credit. Equivalent to STAT 971.

Registration Restrictions:
Required Prerequisites: STAT 544B and MATH 315C.
B Requires minimum grade of B-.
C Requires minimum grade of C.

Enrollment is limited to Graduate level students.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale.

CSI 972: Mathematical Statistics I. 3 credits.
Focuses on theory of moments, least squares, maximum likelihood, and maximum entropy methods. Details methods of minimum variance unbiased estimation. Other topics include sufficiency and completeness of statistics, Fisher information, Cramer-Rao bounds, Bhattacharyya bounds, asymptotic consistency and distributions, statistical decision theory, minimax and Bayesian decision rules, and applications to engineering and scientific problems. Offered by Computational & Data Sciences. May not be repeated for credit. Equivalent to STAT 972.

Registration Restrictions:
Required Prerequisites: (CSI 672B or STAT 652B) and (CSI 876B, IT 876B, STAT 876B, IT 971B or STAT 971B).
B Requires minimum grade of B-.

Enrollment is limited to Graduate level students.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale.

CSI 973: Mathematical Statistics II. 3 credits.
Concentrates on theory of hypothesis testing. Topics include characterizing the decision process; simple versus simple hypothesis tests; Neyman Pearson Lemma; and uniformly most powerful, unbiasedness, invariance, randomized, and sequential tests. Applies testing principles to situations in normal distribution family and other families of distributions. Notes: Continuation of CSI 972. Offered by Computational & Data Sciences. May not be repeated for credit. Equivalent to STAT 973.

Registration Restrictions:
Required Prerequisite: CSI 972B.
B Requires minimum grade of B-.

Enrollment is limited to Graduate level students.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale.

CSI 978: Statistical Analysis of Signals. 3 credits.
Advanced course in analysis of discrete- and continuous-time signals using methods of stochastic differential equation and time series. Presumes familiarity with methods of harmonic analysis and times series modeling. Topics include state-space modeling and eigenvalue processing, nonlinear modeling of signals, non-Gaussian stochastic process structure, detection and estimation of vector-valued signals, robust signal detection, and array processing and target tracking. Offered by Computational & Data Sciences. May not be repeated for credit.

Recommended Prerequisite: STAT 544 and 658, or equivalent.

Registration Restrictions:
Enrollment is limited to Graduate level students.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale.

CSI 979: Advanced Topics in Computational Statistics. 3 credits.
Covers selected topics in computational statistics not covered in fixed-content computational statistics courses. Offered by Computational & Data Sciences. May be repeated within the degree for a maximum 12 credits.

Specialized Designation: Topic Varies

Recommended Prerequisite: Permission of instructor.

Registration Restrictions:
Enrollment is limited to Graduate level students.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale.

CSI 986: Advanced Topics in Large-Scale Physical Simulation. 3 credits.
Covers simulation of physical systems not covered in fixed-content physical simulation courses. Offered by Computational & Data Sciences. May be repeated within the degree for a maximum 12 credits.
Specialized Designation: Topic Varies

Recommended Prerequisite: Permission of instructor.

Registration Restrictions:
Enrollment is limited to Graduate level students.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale.

CSI 991: Seminar in Scientific Computing. 1 credit.
Considers selected topics in specific area of computational sciences and informatics not covered in fixed-content courses or as extension of fixed-content courses. Format for presentation is seminar with student participation. Notes: Maximum 3 credits of CSI 898, 899, and 991 may be applied to PhD. Offered by Computational & Data Sciences. May be repeated within the term.

Registration Restrictions:
Enrollment is limited to Graduate level students.

Schedule Type: Seminar

Grading:
This course is graded on the Satisfactory/No Credit scale.

CSI 996: Doctoral Reading and Research. 1-6 credits.
Reading and research on specific topic in computational sciences and informatics under direction of faculty member. May be repeated for a total of 6 credits. Offered by Computational & Data Sciences. May be repeated within the degree for a maximum 6 credits.

Recommended Prerequisite: Admission to doctoral program, permission of instructor.

Registration Restrictions:
Enrollment is limited to Graduate level students.

Schedule Type: Research

Grading:
This course is graded on the Graduate Regular scale.

CSI 998: Doctoral Dissertation Proposal. 1-12 credits.
Covers development of research proposal under guidance of dissertation director and doctoral committee. Proposal forms basis for doctoral dissertation. Notes: No more than 12 credits of CSI 998 may be applied to doctoral degree. Offered by Computational & Data Sciences. May be repeated within the degree.

Recommended Prerequisite: Permission of advisor.

Registration Restrictions:
Enrollment is limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Schedule Type: Dissertation

Grading:
This course is graded on the Satisfactory/No Credit scale.

CSI 999: Doctoral Dissertation. 1-12 credits.
Involves doctoral dissertation research under direction of dissertation director. Notes: No more than 24 credits in CSI 998 and 999 may be applied to doctoral degree. Offered by Computational & Data Sciences. May be repeated within the degree.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy.

Enrollment is limited to Graduate level students.

Schedule Type: Dissertation

Grading:
This course is graded on the Satisfactory/No Credit scale.

Computational Social Science (CSS)

600 Level Courses

CSS 600: Introduction to Computational Social Science. 3 credits.
Graduate-level introduction to computational concepts, principles, and modeling approaches in social sciences, emphasizing simulations and elements of complexity theory as they apply to social phenomena. Survey includes systems dynamics, cellular automata, and agent-based models. Offered by Computational & Data Sciences. May not be repeated for credit.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Seminar

Grading:
This course is graded on the Graduate Regular scale.

CSS 605: Object-Oriented Modeling in Social Science. 3 credits.
Presents and applies concepts and principles from object-based modeling paradigm. Emphasizes Unified Modeling Language (UML) to render structure and operation of complex social systems and processes. Offered by Computational & Data Sciences. May not be repeated for credit.

Recommended Prerequisite: CSS 600 or approval from instructor or program director. Concurrent enrollment is also permitted.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Seminar

Grading:
This course is graded on the Graduate Regular scale.

CSS 610: Agent-based Modeling and Simulation. 3 credits.
Provides hands-on examination of agent-based models in social sciences by examining and experimenting with variety of social-simulation projects conducted in modeling environments such as Swarm, Repast, Ascape,
and MASON (Multi-Agent Simulator of Networks and Neighborhoods). Offered by Computational & Data Sciences. May not be repeated for credit.

**Recommended Prerequisite:** CSS 600 or permission of instructor. Concurrent enrollment is also permitted.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.
Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Seminar

**Grading:**
This course is graded on the Graduate Regular scale.

**CSS 620: Origins of Social Complexity.** 3 credits.
Examines when, where, and how social complexity emerged in human societies, emphasizing long-term analysis and comparative information processing in four civilizations of the ancient world: West Asia, East Asia, Andean Peru, and Mesoamerica. Offered by Computational & Data Sciences. May not be repeated for credit.

**Recommended Prerequisite:** CSS 600 or permission of instructor.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.
Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

**CSS 625: Complexity Theory in the Social Sciences.** 3 credits.
Examines social phenomena including language, terrorism, the Internet, warfare, and wealth based on power laws and far-from equilibrium nonlinear dynamics. Emphasizes data analysis, and modeling and interpreting complexity-theoretic dynamics. Offered by Computational & Data Sciences. May not be repeated for credit.

**Recommended Prerequisite:** CSS 600 or permission of instructor.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.
Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Seminar

**Grading:**
This course is graded on the Graduate Regular scale.

**CSS 630: Comparative Computational Social Science.** 3 credits.
Applies comparative method for analyzing different types of computational models in the social sciences. Strong crossdomain and interdisciplinary emphasis akin to comparative economic systems, government, or linguistics. Offered by Computational & Data Sciences. May not be repeated for credit.

**Recommended Prerequisite:** CSS 600 or permission of instructor. Concurrent enrollment is also permitted.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.
Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Seminar

**Grading:**
This course is graded on the Graduate Regular scale.

**CSS 635: Cognitive Foundations of Computational Social Science.** 3 credits.
Examines cognitive foundations and information processing in computational social agents and compares to human cognitive phenomena, including emotions, trust, and reciprocity. Emphasizes modeling project. Offered by Computational & Data Sciences. May not be repeated for credit.

**Recommended Prerequisite:** CSS 600 and CSS 610 or permission of instructor. Concurrent enrollment is also permitted.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.
Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Seminar

**Grading:**
This course is graded on the Graduate Regular scale.

**CSS 640: Human and Social Evolutionary Complexity.** 3 credits.
Examines long-term evolution of human and societal complexity from global and cross-cultural perspective with emphasis on computational aspects leading to today's globalization. Global history from the computational social science perspective. Offered by Computational & Data Sciences. May not be repeated for credit.

**Recommended Prerequisite:** CSS 600, 620, and permission of instructor.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.
Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Seminar

**Grading:**
Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Seminar

**Grading:**
This course is graded on the Graduate Regular scale.

**CSS 643: Land-Use Modeling Techniques and Applications. 3 credits.**
Survey of literature on spatially explicit empirical models of land-use change. Hands-on experience developing and running simple models. Techniques include statistical models, mathematical programming models, cellular automata, agent-based models, and integrated models. Offered by Computational & Data Sciences. May not be repeated for credit.

**Recommended Prerequisite:** CSS 600 (may be taken concurrently) or permission of instructor.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Seminar

**Grading:**
This course is graded on the Graduate Regular scale.

**CSS 645: Spatial Agent-Based Models of Human-Environment Interactions. 3 credits.**
Discusses key challenges in spatial modeling of human-environment interactions. Reviews agent-based modeling applications in urban and rural interactions, agriculture, forestry, and other areas. Hand-on development of simple ABM models. Investigates linkages between GIS and ABM. Notes: CSS 600 may be taken concurrently. Offered by Computational & Data Sciences. May not be repeated for credit.

**Recommended Prerequisite:** GGS 631 or CSS 600 (may be taken concurrently) or permission of instructor.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Seminar

**Grading:**
This course is graded on the Graduate Regular scale.

**CSS 650: Physics Methods for Analyzing Social Complexity. 3 credits.**
Surveys complexity theoretic tools including strange attractors, Ising models, correlation functions, ergodic theory, power spectra, meanfield theory, and renormalization group. Emphasizes application to social, economic, or political systems. Offered by Computational & Data Sciences. May not be repeated for credit.

**Recommended Prerequisite:** CSS 600 and permission of instructor. Concurrent enrollment is also permitted.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Seminar

**Grading:**
This course is graded on the Graduate Regular scale.

**CSS 655: Social Systems Dynamics. 3 credits.**
Introduces systems dynamics modeling of social systems governed by levels/rates or stocks/flows processes, with applications to global modeling, terrorism, urban dynamics, organizations, and social and international conflict. Offered by Computational & Data Sciences. May not be repeated for credit.

**Recommended Prerequisite:** CSS 600. Concurrent enrollment is also permitted.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Seminar

**Grading:**
This course is graded on the Graduate Regular scale.

**CSS 665: Complex Adaptive Systems in Public Policy. 3 credits.**
Students learn (i) basic concepts of complex adaptive systems (CAS) and how they can be applied to policy analysis, and (ii) how to use agent-based modeling as a tool for policy analysis. Address modeling issues on representing a system, agent decision making, validation, experiment design and analysis, as well as incorporating empirical data and methods to inform agent-based modeling. Offered by Computational & Data Sciences. May not be repeated for credit.

**Recommended Prerequisite:** CSS 600. Concurrent enrollment is also permitted.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

**CSS 692: Social Network Analysis. 3 credits.**
Methods and applications that examine complex social systems based on relations, structures, connectivity, matrix representations,
location, roles, interactions, and other network properties. Applications to terrorism, cognition, organizations, and other social phenomena. Offered by Computational & Data Sciences. May not be repeated for credit.

**Recommended Prerequisite:** CSS 600. Concurrent enrollment is also permitted.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Seminar

**Grading:**
This course is graded on the Graduate Regular scale.

**CSS 695:** Agent-based Computational Economics. 3 credits.
Present lectures on neoclassical economic theory as we investigate how to use agent technology to move beyond neoclassical specifications. Survey the most well-known results in agent-based economics. Read and present papers that are at the research frontier. A semester long research project. Will be the focal point of weekly model development (coding), data analysis, and writing. Offered by Computational & Data Sciences. May not be repeated for credit.

**Recommended Prerequisite:** CSS 610. Undergraduate microeconomics.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

**700 Level Courses**

**CSS 710:** Advanced Agent-based Modeling and Simulation. 3 credits.
Cover topics related to large-scale agent models including how to 1) make use of available compute resources (CPU and memory) through threading and related code parallelization ideas and technologies; 2) sample data from large-scale models and calibrate/estimate such models, and 3) design experiments for models that are expensive to evaluate. Digest into other topics at the frontier of agent modeling. Offered by Computational & Data Sciences. May not be repeated for credit.

**Recommended Prerequisite:** CSS 610.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

**CSS 739:** Topics in Computational Social Science. 3 credits.
Selected topics in computational social science not covered in fixed-content computational social science courses. Offered by Computational & Data Sciences. May be repeated within the degree for a maximum 9 credits.

**Specialized Designation:** Topic Varies

**Recommended Prerequisite:** Permission of instructor.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

**CSS 796:** Directed Reading and Research. 3 credits.
Reading and research on specific topic in computational social science under direction of a faculty member. Offered by Computational & Data Sciences. May be repeated within the degree for a maximum 6 credits.

**Recommended Prerequisite:** Permission of instructor.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Research

**Grading:**
This course is graded on the Graduate Regular scale.

**CSS 798:** Research Colloquium in Computational Social Science. 1 credit.
Presentations in specific research areas in computational social science by Center for Social Complexity-associated faculty and professional visitors. Notes: Maximum 3 credits of CSS 898 and 899 may be applied toward PhD. Offered by Computational & Data Sciences. May be repeated within the degree for a maximum 3 credits.

**Recommended Prerequisite:** 12 graduate core requirement credits and permission of instructor.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Thesis

**Grading:**
This course is graded on the Graduate Special scale.

**800 Level Courses**

**CSS 898:** Research Colloquium in Computational Social Science. 1 credit.
Presentations in specific research areas in computational social science by Center for Social Complexity-associated faculty and professional visitors. Notes: Maximum 3 credits of CSS 898 and 899 may be applied toward PhD. Offered by Computational & Data Sciences. May be repeated within the degree for a maximum 3 credits.

**Recommended Prerequisite:**

**Registration Restrictions:**
Enrollment is limited to Graduate level students.

**Schedule Type:** Seminar

**Grading:**
This course is graded on the Satisfactory/No Credit scale.

**CSS 899: Colloquium in Computational Social Science.** 1 credit.
Presentations in variety of areas of computational social science by Center for Social Complexity-associated faculty and professional visitors. Notes: Maximum 3 credits of CSS 898 and 899 may be applied toward PhD. Offered by Computational & Data Sciences. May be repeated within the degree for a maximum 2 credits.

**Registration Restrictions:**
Enrollment is limited to Graduate level students.

**Schedule Type:** Seminar

**Grading:**
This course is graded on the Graduate Regular scale.

**900 Level Courses**

**CSS 909: Advanced Topics in Computational Social Science.** 3 credits.
Covers selected topics in computational social science and socioinformatics not covered in fixed-content courses. Offered by Computational & Data Sciences. May be repeated within the degree for a maximum 9 credits.

**Specialized Designation:** Topic Varies

**Recommended Prerequisite:** Permission of instructor.

**Registration Restrictions:**
Enrollment is limited to Graduate level students.

**Schedule Type:** Seminar

**Grading:**
This course is graded on the Graduate Regular scale.

**CSS 999: Doctoral Dissertation.** 1-12 credits.
Doctoral dissertation research under direction of dissertation director. Notes: Candidates must complete a combined minimum of 12 credits of doctoral proposal (CSS 998) and doctoral dissertation research (CSS 999), of which at least three credits must be of CSS 999. A combined maximum of 24 credits of CSS 998 and CSS 999 may be applied to the degree. Offered by Computational & Data Sciences. May be repeated within the degree.

**Recommended Prerequisite:** Approval of dissertation proposal.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy.

Enrollment is limited to Graduate level students.

**Schedule Type:** Dissertation

**Grading:**
This course is graded on the Satisfactory/No Credit scale.

**Computer Forensics (CFRS)**

**500 Level Courses**

**CFRS 500: Introduction to Forensic Technology and Analysis.** 3 credits.
Presents an overview of technologies related to the digital forensics process. It will introduce software, analysis, operating systems, networking, and other aspects required as the base for forensic examiners. Not intended to be taken for credit by students in the MS CFRS/DFCA program. Offered by Electrical & Comp. Engineering. May not be repeated for credit.

**Recommended Prerequisite:** Permission of advisor.

**Registration Restrictions:**
Enrollment is limited to Graduate level students.

**Schedule Type:** Seminar

**Grading:**
This course is graded on the Graduate Regular scale.

**CSS 999: Doctoral Dissertation Proposal.** 1-12 credits.
Covers development of research proposal, which forms basis for doctoral dissertation, under guidance of dissertation director and doctoral committee. Notes: Candidates must complete a combined minimum of 12 credits of doctoral proposal (CSS 998) and doctoral dissertation research (CSS 999), of which at least three credits must be of CSS 999. A combined maximum of 24 credits of CSS 998 and CSS 999 may be applied to the degree. Offered by Computational & Data Sciences. May be repeated within the degree.

**Recommended Prerequisite:** Approval of dissertation proposal.

**Registration Restrictions:**
Enrollment limited to students in the following colleges:

- College of Science
- Schar School of Policy and Gov
- School of Business
- Volgenau School of Engineering

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.
CFRS 510: Digital Forensics Analysis. 3 credits.
Explains computer forensics crime scene procedures, beginning with initial walk-through and evaluation; identification and collection of potential evidence; preparation of intrusion investigation; aspects of working with investigators and attorneys; reverse engineering with file identification and profiling; application of critical thinking in determination of significance of artifacts; and analysis and reporting of evidence. Offered by Electrical & Comp. Engineering. May not be repeated for credit.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale.

CFRS 590: Special Topics in Computer Forensics. 3 credits.
Presents selected topics from recent developments and applications in various computer forensics disciplines. Helps the professional computer forensics community keep abreast of current developments, and provides an applications-oriented introduction to emerging areas of computer forensics. Offered by Electrical & Comp. Engineering. May be repeated within the degree for a maximum 6 credits.

Specialized Designation: Topic Varies

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale.

600 Level Courses

CFRS 660: Network Forensics. 3 credits.
Deals with the collection, preservation, and analysis of network-generated digital evidence such that the evidence can be successfully presented in a court of law (both civil and criminal). The relevant federal laws will be examined as well as private sector applications. The capture/intercept of digital evidence, the analysis of audit trails, the recording of running processes, and the reporting of such information will be examined. Offered by Electrical & Comp. Engineering. May not be repeated for credit. Equivalent to TCOM 660.

Recommended Prerequisite: TCOM 535 and a working knowledge of computer programming.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the following colleges:

- College of Science
- Schar School of Policy and Gov
- School of Business
- Volgenau School of Engineering

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale.

CFRS 661: Digital Media Forensics. 3 credits.
Covers the collection, preservation, and analysis of digital media such that the evidence can be successfully presented in a court of law (both civil and criminal). The relevant federal laws and private sector applications will be examined, as well as the seizure, preservation, and analysis of digital media. Offered by Electrical & Comp. Engineering. May not be repeated for credit. Equivalent to TCOM 661.

Recommended Prerequisite: CFRS 510 and a working knowledge of computer operating systems (e.g. CYSE 211, IT 342, or equivalent).

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the following colleges:

- College of Science
- Schar School of Policy and Gov
- School of Business
- Volgenau School of Engineering

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale.

CFRS 663: Operations of Intrusion Detection for Forensics. 3 credits.
Introduces students to network and computer intrusion detection and its relation to forensics. Addresses intrusion detection architecture, system types, packet analysis, and products. Presents advanced intrusion detection topics such as intrusion prevention and active response, decoy systems, alert correlation, data mining, and proactive forensics. Offered by Electrical & Comp. Engineering. May not be repeated for credit. Equivalent to TCOM 663.
**Recommended Prerequisite:** TCOM 535 and a working knowledge of computer programming.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

CFRS 664: *Incident Response Forensics*. 3 credits.
Addresses incident detection, response, and those aspects of computer forensics pertinent to the investigation of trade secret theft, economic espionage, copyright infringement, piracy, and fraud. Procedures for gathering, preserving, and analyzing forensic evidence are discussed in detail and are applied to both computer and network incident response forensics. Offered by Electrical & Comp. Engineering. May not be repeated for credit. Equivalent to TCOM 664.

**Recommended Prerequisite:** TCOM 535.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

CFRS 698: *Independent Reading and Research*. 1-3 credits.
Studies selected area in computer forensics under the supervision of a faculty member. A written report is required. Notes: No more than a total of six credits may be taken from a combination of CFRS 698 and CFRS 798 for credit within the CFRS program. Offered by Electrical & Comp. Engineering. May be repeated within the degree for a maximum 6 credits.

**Recommended Prerequisite:** At least two core courses in the CFRS program; and permission of instructor

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

**Recommended Prerequisite:** CFRS 510 and CFRS 660

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate or Non-Degree.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

**Grading:**
This course is graded on the Graduate Regular scale.

CFRS 720: *Digital Audio Video Forensics*. 3 credits.
Presents an overview of digital multimedia (audio, images, video) forensic analysis to include methods, legal framework, software, hardware, and other aspects required for forensic/investigative examination. Offered by Electrical & Comp. Engineering. May not be repeated for credit.

**Recommended Prerequisite:** CFRS 510 and CFRS 661

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate or Non-Degree.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

**Grading:**
This course is graded on the Graduate Regular scale.

CFRS 725: *Linux Forensics*. 3 credits.
Presents the concepts, tools, and techniques used for forensic collection and analysis of Linux based operating systems and filesystems.
Introduces, demonstrates, and discusses current research in the use of the Linux operating system and open source forensic tools with emphasis on developing custom functionality from multiple components.
Offered by Electrical & Comp. Engineering. May not be repeated for credit.

**Recommended Prerequisite:** CFRS 510 and CFRS 661

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate or Non-Degree.

Students in a Non-Degree Undergraduate degree may not enroll.
CFRS 730: Forensic Deep Packet Inspection. 3 credits. Presents tools, techniques, and methodologies used to conduct deep packet forensic analysis. Application of industry best practices to both the collection and subsequent analysis of network packets with an emphasis on hands-on exercises using various digital analytical tools. Notes: Course will consist of exercises conducted in a lab environment with concurrent lectures (combined total of 3 credits for lab and lecture exercises). Offered by Electrical & Comp. Engineering. May not be repeated for credit.

Recommended Prerequisite: CFRS 660.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate or Non-Degree.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Laboratory, Lecture

Grading:
This course is graded on the Graduate Regular scale.

CFRS 737: Cloud Forensics. 3 credits. Introduces students to various cloud platforms and their featured and prepares students to acquire memory, disk and other cloud resources from cloud providers. Students will perform forensics on gathered artifacts. The course will take students from understanding what resources are available in a cloud provider to what artifacts exists and how to capture and analyze them. Offered by Electrical & Comp. Engineering. May not be repeated for credit.

Recommended Prerequisite: CFRS 510 and CFRS 660 or permission from instructor

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate or Non-Degree.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale.

CFRS 760: Legal and Ethical Issues in IT. 3 credits. Presents legal and ethics topics in the context of computer forensics. Includes legal principles, types of crimes, witness testimony, and forensics report writing. Offered by Electrical & Comp. Engineering. May not be repeated for credit.

Recommended Prerequisite: CFRS 510

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate or Non-Degree.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale.

CFRS 761: Malware Reverse Engineering. 3 credits. Reviews disassembled code for potentially malicious binary, or piece of malware, in order to gain a better understanding of how a binary functions when executed. Analyzes behavioral aspects as they are executed in a controlled environment. Environment changes (file, system, network, process, etc.), network communications, communications with remote devices, and so on, are closely observed for actionable information. Notes: Course will consist of exercises conducted in a lab environment with concurrent lectures (combined total of 3 credits for lab and lecture exercises). Offered by Electrical & Comp. Engineering. May not be repeated for credit.

Recommended Prerequisite: CFRS 510 and CFRS 660.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate or Non-Degree.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Laboratory, Lecture

Grading:
This course is graded on the Graduate Regular scale.

CFRS 762: Mobile Device Forensics. 3 credits. Reviews forensic evidence contained within mobile devices, including address books, call logs, text messages, video files, audio files, and Internet history. Discusses procedures and technologies associated with mobile devices and how such procedures differ from traditional computer forensics. Analyzes collected data and correlates information with data from carriers. Hands-on exercises included. Notes: Course will consist of exercises conducted in a lab environment with concurrent lectures (combined total of 3 credits for lab and lecture exercises). Offered by Electrical & Comp. Engineering. May not be repeated for credit.

Recommended Prerequisite: CFRS 510, CFRS 661.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate or Non-Degree.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale.

CFRS 763: Registry Forensics - Windows. 3 credits. Presents the concepts, tools, and techniques used for forensic collection, identification, and analysis of the Windows registry; review the structure and layout of the Windows registry and be introduced to the types of artifacts that can be found within; evaluate and interpret data from the
Windows registry with emphasis on hands-on exercises. Notes: Course will consist of exercises conducted in a lab environment with concurrent lectures (combined total of 3 credits for lab and lecture exercises). Offered by Electrical & Comp. Engineering. May not be repeated for credit.

**Recommended Prerequisite:** CFRS 510, CFRS 661.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

- Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

**Schedule Type:** Laboratory, Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

CFRS 764: Mac Forensics. 3 credits.

- Presents the basic tools and techniques used to conduct a Mac and iOS forensic analysis.
- Application of industry best practices to both the collection and subsequent analysis of Mac iOS systems with an emphasis on hands-on exercises using currently available open-source and commercial tools.

Notes: Course will consist of exercises conducted in a lab environment with concurrent lectures (combined total of 3 credits for lab and lecture exercises). Offered by Electrical & Comp. Engineering. May not be repeated for credit.

**Recommended Prerequisite:** CFRS 510, CFRS 661.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

- Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

CFRS 767: Penetration Testing in Computer Forensics. 3 credits.

- Presents the concepts, tools, and techniques used for penetration testing, vulnerability exploitation, assessment, reporting, and forensics; teaches multiple attack vectors as well as the defensive measures protecting against such attacks; focuses heavily on post attack forensics allowing for a complete picture of the attack process.

Notes: Course will consist of exercises conducted in a lab environment with concurrent lectures (combined total of 3 credits for lab and lecture exercises). Offered by Electrical & Comp. Engineering. May not be repeated for credit.

**Recommended Prerequisite:** CFRS 660, CFRS 663.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

- Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

**Schedule Type:** Laboratory, Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

CFRS 768: Digital Warfare. 3 credits.

- Presents concepts of forensic attribution, context, and motivations behind computer attacks including those tied to cyber warfare and cyber terrorism activities. Tactics, techniques, and procedures of current cyber-attacks will be addressed. Offered by Electrical & Comp. Engineering. May not be repeated for credit.

**Recommended Prerequisite:** CFRS 510, CFRS 660.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

- Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

CFRS 769: Anti-Forensics. 3 credits.

- Presents concepts of anti-forensics and obfuscation used in order to inhibit, frustrate, and mislead computer forensics examiners. Techniques, attempts, and actions used to negatively impact the existence, volume, or amount of evidence from digital repositories will be examined with goal of understanding and detecting anti-forensics. Offered by Electrical & Comp. Engineering. May not be repeated for credit.

**Recommended Prerequisite:** CFRS 510, CFRS 660.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

- Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

**Schedule Type:** Laboratory, Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

CFRS 770: Fraud and Forensics in Accounting. 3 credits.

- Prepares students to undertake forensic accounting, a specialty practice area of accounting, in order to develop the necessary expertise to be prepared to give expert evidence in any resultant trial. Offered by Electrical & Comp. Engineering. May not be repeated for credit.

**Recommended Prerequisite:** CFRS 510.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

- Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the following colleges:

- College of Science
- Schar School of Policy and Gov
- School of Business
- Volgenau School of Engineering

**Schedule Type:** Lecture
Grading:
This course is graded on the Graduate Regular scale.

CFRS 771: Digital Forensic Profiling. 3 credits.
Presents the application of criminal profiling to digital forensic evidence and cybercrime. Covers typologies of cyber criminals and reviews how the results of digital forensics can be used to profile individuals to better facilitate investigative interviews and prosecutions. Applies digital profiling to the identification of criminal behavior for insider threats and fraud. Offered by Electrical & Comp. Engineering. May not be repeated for credit.

Recommended Prerequisite: CFRS 510, CFRS 661.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

Schedule Type: Laboratory, Lecture

Grading:
This course is graded on the Graduate Regular scale.

CFRS 772: Forensic Artifact Extraction. 3 credits.
Presents tools and techniques for the extraction and processing of digital artifacts from various media and formats. Foundations are presented and examples are developed for Windows, Linux, Mac, and media filesystems, files, RAM, Windows Registry, solid state devices, network traffic, and mobile devices. Emphasis on applications and hands-on exercises.

Notes: Course will consist of exercises conducted in a lab environment with concurrent lectures (combined total of 3 credits for lab and lecture). Offered by Electrical & Comp. Engineering. May not be repeated for credit.

Recommended Prerequisite: CFRS 510, CFRS 661.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

Schedule Type: Laboratory, Lecture

Grading:
This course is graded on the Graduate Regular scale.

CFRS 773: Mobile Application Forensics and Analysis. 3 credits.
Presents mobile applications forensics and analysis. Analyze mobile applications on both the android and iPhone platforms in a lab environment in order to understand the weaknesses, pitfalls, and forensic challenges that exist or potentially exist when developing mobile client side software as well as identify forensic artifacts left behind from applications. Offered by Electrical & Comp. Engineering. May not be repeated for credit.

Recommended Prerequisite: CFRS 762.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

Schedule Type: Laboratory, Lecture

Grading:
This course is graded on the Graduate Regular scale.

CFRS 775: Kernel Forensics and Analysis. 3 credits.
Introduces students to low level programming analysis and low level API’s. Students will learn the basics of kernel level device drivers, how to load and unload software from the kernel, modification of kernel objects, interrupt and call hooking and memory hiding techniques. Offered by Electrical & Comp. Engineering. May not be repeated for credit.

Recommended Prerequisite: CFRS 761.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale.

CFRS 780: Advanced Topics in Computer Forensics. 3 credits.
Teaches advanced topics from recent developments and applications in various areas of computer forensics. Enhances the professional engineering community’s understanding of breakthrough developments in specific areas of computer forensics. Active participation of the students is encouraged in the form of writing and presenting papers in various research areas of the advanced topic. Offered by Electrical & Comp. Engineering. May be repeated within the term for a maximum of 6 credits.

Specialized Designation: Topic Varies

Recommended Prerequisite: Permission of Instructor.

Registration Restrictions:
Enrollment is limited to Graduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale.

CFRS 790: Advanced Computer Forensics. 3 credits.
Capstone course for the MS in computer forensics program. Students will be exposed to case studies and be required to conduct computer forensic investigations of digital media, intercepted packet switched data, and multisource log information to successfully complete each case study. Notes: To be taken in the last year prior to the completion of
degree requirement. Offered by Electrical & Comp. Engineering. May not be repeated for credit.

**Recommended Prerequisite:** CFRS 660, 661, and (663 or 664), and a minimum of 18 credits in the MS Computer Forensics Program prior to registration.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

**CFRS 798: Research Project.** 1-3 credits.
Conduct a research project to be chosen and completed under guidance of a graduate faculty member that results in an acceptable technical report. Notes: No more than a total of six credits may be taken from a combination of CFRS 698 and CFRS 798 for credit within the CFRS program. Offered by Electrical & Comp. Engineering. May be repeated within the degree for a maximum 6 credits.

**Recommended Prerequisite:** At least two core courses and a minimum of 12 credits in the CFRS program; permission of instructor.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

**Schedule Type:** Thesis

**Grading:**
This course is graded on the Graduate Regular scale.

**Computer Game Design (GAME)****100 Level Courses**

**GAME 101: Introduction to Game Design.** 3 credits.
Introductory overview of the game development process with an emphasis on game design. Through detailed study of historical and current games, students will learn the language and structure needed to develop their own game ideas. Students will learn the many aspects of a game development team and how each of these roles contributes to a game’s overall design. Offered by Coll Visual & Performing Arts. Limited to three attempts.

**Mason Core:** Arts

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale.

**GAME 140: Applied Coding for Game Designers.** 3 credits.
This entry-level course teaches students basic coding techniques used when implementing game logic. Through hands-on implementation of several simple text-based and 2D sprite-based games, this course prepares students for the coding challenges they will face in future GAME courses. Offered by Coll Visual & Performing Arts. Limited to three attempts.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale.

**200 Level Courses**

**GAME 210: Basic Game Design.** 3 credits.
Introduction to computer game design and development including a brief history of the field and current industry practice and production. Current major game design software, hardware, and associated tools are explored through simple game design projects. Offered by Coll Visual & Performing Arts. Limited to three attempts.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale.

**GAME 230: History of Computer Game Design.** 3 credits.
History of computer game design including games as a new medium for education, entertainment, and communications. Aspects of the business of computer game publishing, game criticism, storytelling, interactive fiction, violence, and virtual communities will be explored. Offered by Coll Visual & Performing Arts. Limited to three attempts.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale.

**GAME 231: Computer Animation for Games.** 3 credits.
2D and 3D modeling, character design, and animation projects are constructed using commercial and proprietary software and game design tool kits and engines. Simple texturing and models rigging for game animation will be discussed. Offered by Coll Visual & Performing Arts. Limited to three attempts.

**Registration Restrictions:**
**Required Prerequisites:** GAME 210\(^C\) and 230\(^C\).
\(^C\) Requires minimum grade of C.

**Schedule Type:** Studio

**Grading:**
This course is graded on the Undergraduate Regular scale.

**GAME 232: Online and Mobile Gaming.** 3 credits.
Class covers the history, practice, and design of online and mobile games. Class will discuss the current state of the smartphone applications and study the best practices to be successful in the applications market. Students will learn the development process for smartphone applications and develop original and innovative applications in a team-based environment. Offered by Coll Visual & Performing Arts. Limited to three attempts.

**Registration Restrictions:**
**Required Prerequisites:** GAME 210\(^C\) and 230\(^C\) and (GAME 140\(^C\) or CS 112\(^C\)).
\(^C\) Requires minimum grade of C.
**300 Level Courses**

**GAME 300: Portfolio Preparation.** 1 credit.
Student creates and refines a web portfolio to utilize throughout the course of study in presenting projects to aid in internship application and professional development. Offered by Coll Visual & Performing Arts. Limited to three attempts.

**Registration Restrictions:**
Required Prerequisites: GAME 310 and 398.
C Requires minimum grade of C.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale.

**GAME 310: Game Design Studio.** 3 credits.
Studio course that focuses on team-based game design. In collaboration with undergraduate students from VSITE's CS game design concentration, student teams design and develop complete computer-based and online serious and/or entertainment games. Offered by Coll Visual & Performing Arts. Limited to three attempts.

**Registration Restrictions:**
Required Prerequisites: GAME 231 and 232.
C Requires minimum grade of C.

**Schedule Type:** Studio

**Grading:**
This course is graded on the Undergraduate Regular scale.

**GAME 320: Digital Painting for Games.** 3 credits.
Students develop observational, sketching, and rendering skills in the digital medium. Students practice digital painting from reference and imagination as they create convincing game surfaces and simple concept drawings. Offered by Coll Visual & Performing Arts. Limited to three attempts.

**Recommended Prerequisite:** GAME 231 AVT 323 or AVT 333.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale.

**GAME 330: Computer Game Platform Analysis.** 3 credits.
Current and prototype consumer gaming platforms and consoles. Analysis will include conversion, transposition, and porting game media among most commercially produced platforms for analysis and comparisons. Offered by Coll Visual & Performing Arts. Limited to three attempts.

**Recommended Prerequisite:** GAME 250.

**Registration Restrictions:**
Required Prerequisites: GAME 310 and 331.
C Requires minimum grade of C.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale.

**GAME 331: Consumer Gaming Platform Analysis Lab.** 1 credit.
Current and prototype consumer gaming platforms and consoles. Analysis will include conversion, transposition, and porting game media among most commercially produced platforms for analysis and comparisons. Offered by Coll Visual & Performing Arts. Limited to three attempts.

**Recommended Prerequisite:** GAME 250.

**Registration Restrictions:**
Required Prerequisites: GAME 310 and 330.
C Requires minimum grade of C.

**Schedule Type:** Laboratory

**Grading:**
This course is graded on the Undergraduate Regular scale.

**GAME 332: RS: Story Design for Computer Games.** 3 credits.
Use of narrative structure and new media for designing computer game scenarios and stories. Traditional narrative techniques (text stories, novels, films) will be examined, as well as translations of the traditional to interactive, non-linear modes of communications. Analysis of current computer game story design theories, philosophies, and techniques will be covered. Offered by Coll Visual & Performing Arts. Limited to three attempts.

**Specialized Designation:** Research/Scholarship Intensive, Writing Intensive in Major

**Recommended Prerequisite:** Completion of 30 credits within major or permission of the instructor.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale.

**GAME 367: Writing and Editing Music and Sound.** 3 credits.
Composition, editing, processing, and integration of voice, environmental sounds and music into non-linear computer game environments. Special emphasis will be placed on HD sound and music post-production and mixing (3 & 5 transducer point listening spaces), sequential composition and sample-splicing techniques, and the study of competing compression algorithms for sound and music. Offered by Coll Visual & Performing Arts. Limited to three attempts.

**Recommended Prerequisite:** GAME 250.

**Registration Restrictions:**
Required Prerequisite: GAME 250.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale.
GAME 398: Advanced Game Design Animation. 3 credits.
Advanced 2D and 3D animation projects for interactive game scenes and scenarios are built using commercial and proprietary software and game design tool kits. Advanced texturing, rigging, lighting, and perspective manipulation will be covered. Offered by Coll Visual & Performing Arts. Limited to three attempts.

Registration Restrictions:
Required Prerequisite: GAME 231 C
C Requires minimum grade of C.

Schedule Type: Studio
Grading: This course is graded on the Undergraduate Regular scale.

GAME 399: Special Topics. 1-4 credits.
In-depth presentation and exploration of topical studies in computer game design. Subject matter varies. Notes: May be repeated when topic is different. Offered by Coll Visual & Performing Arts. May be repeated within the term for a maximum 12 credits.

Specialized Designation: Topic Varies
Schedule Type: Lecture
Grading: This course is graded on the Undergraduate Regular scale.

GAME 400: Game Design Practicum. 3 credits.
Studio/lecture course focuses on the design strengths and weaknesses inherent in current entertainment and serious games. UI design, level design and map structure, scoring stratum, online support, game ecologies, gaming communities, and designing/writing documentation and specifications will be studied. Offered by Coll Visual & Performing Arts. Limited to three attempts.

Recommended Prerequisite: GAME 330, 367 or 398. Must be a Computer Game Design minor.
Schedule Type: Lecture
Grading: This course is graded on the Undergraduate Regular scale.

GAME 410: Advanced Game Design Studio. 3 credits.
In collaboration with undergraduate students from VSITE's CS game design concentration, student teams design and develop complete computer-based and online serious and entertainment games. Offered by Coll Visual & Performing Arts. Limited to three attempts.

Registration Restrictions:
Required Prerequisites: GAME 330 and 331 C
C Requires minimum grade of C.
Schedule Type: Studio
Grading: This course is graded on the Undergraduate Regular scale.

GAME 431: Advanced Game Animation I. 3 credits.
Builds advanced 3D character animation skills. Students animate from reference using the principles of weight, follow through, and anticipation. Projects focus on creating interactive motions for characters using commercial software and game engines. Intermediate rigging will also be covered. Offered by Coll Visual & Performing Arts. Limited to three attempts.

Recommended Prerequisite: GAME 398.
Schedule Type: Lecture
Grading: This course is graded on the Undergraduate Regular scale.

GAME 489: Pre-Internship Seminar. 1 credit.
Student prepares for interview and application processes associated with securing an internship, finishing the course with a professional resume and portfolio ready for submission to potential employers. Offered by Coll Visual & Performing Arts. Limited to three attempts.

Recommended Prerequisite: GAME 300, Completion of 30 credits within major or permission of the instructor.
Schedule Type: Seminar
Grading: This course is graded on the Undergraduate Regular scale.

GAME 490: Senior Game Design Capstone. 3 credits.
Student develops a case study of a publicly or commercially published computer game exploring the technical, economic, ethical, social and political ramifications on its intended target market. A public lecture of the case study is required. Notes: Students are required to complete 6 credits for the degree program. Offered by Coll Visual & Performing Arts. May be repeated within the degree for a maximum 9 credits.

Mason Core: Capstone, Synthesis
Recommended Prerequisite: Completion of 60 credits in major. Students must be granted permission by the program director to take the course.
Schedule Type: Lecture
Grading: This course is graded on the Undergraduate Regular scale.

GAME 491: Internship. 3-4 credits.
Placement in an appropriate internship within a program approved by a federal, state or commercial game design/publishing agency or firm. Notes: 135 hours of internship on-site work must be completed for 3 credits. 180 hours of internship on-site work must be complete for 4 credits. Offered by Coll Visual & Performing Arts. May be repeated within the degree for a maximum 9 credits.

Recommended Prerequisite: GAME 489 and completion of 60 credits in major.
Schedule Type: Internship
Grading: This course is graded on the Undergraduate Regular scale.
This course is graded on the Undergraduate Regular scale.

**GAME 492: Independent Study** 1-6 credits.
Advanced research, computer game design, or exploration of topical studies in computer game design. Offered by Coll Visual & Performing Arts. May be repeated within the term for a maximum 12 credits.

**Schedule Type:** Independent Study

**Grading:**
This course is graded on the Undergraduate Regular scale.

**GAME 499: Advanced Studies in Game Design** 1-4 credits.
Exploration of various issues in computer game design, including theoretical aspects of games studies and production. Notes: Topics and credit vary with instructor. May be repeated when taken under different topics. Offered by Coll Visual & Performing Arts. May be repeated within the term for a maximum 12 credits.

**Recommended Prerequisite:** Admittance to BFA Game Design Program or instructor permission.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale.

### 500 Level Courses

**GAME 599: Advanced Studies in Game Design** 1-4 credits.
Exploration of various issues in computer game design, including theoretical aspects of games studies and production. Notes: Topics and credit vary with instructor. May be repeated when taken under different topics. Offered by Coll Visual & Performing Arts. May be repeated within the term for a maximum 9 credits.

**Recommended Prerequisite:** Admittance to MA Game Design Program or instructor permission.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

**Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.**

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

**GAME 600: Research Methodologies in Game Design** 3 credits.
Graduate seminar focusing on development of independent research project in student’s area of emphasis. Explores principal methods of researching and documenting game design and game practice. Along with traditional methods of library research, emphasizes new processes of examination and investigation through the use of computer-aided research clouds and systems. Students will research and write a publishable paper following standard scientific research practice. Offered by Coll Visual & Performing Arts. May not be repeated for credit.

**Recommended Prerequisite:** Admittance to MA Game Design Program or instructor permission.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

**Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.**

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

---

**GAME 599: Advanced Studies in Game Design** 1-4 credits.
Exploration of various issues in computer game design, including theoretical aspects of games studies and production. Notes: Topics and credit vary with instructor. May be repeated when taken under different topics. Offered by Coll Visual & Performing Arts. May be repeated within the degree for a maximum 4 credits.

**Recommended Prerequisite:** Admittance to MA Game Design Program or instructor permission.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

**Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.**

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

**GAME 605: Game Design Graduate Seminar** 1 credit.
Students present their own research and projects, or the work of contemporary game designers for discussion and peer and faculty critiques. Special focus on developing professional public communication and presentation skills about contemporary issues in the game design and production fields. Offered by Coll Visual & Performing Arts. May be repeated within the degree for a maximum 4 credits.

**Recommended Prerequisite:** Admittance to MA Game Design Program or instructor permission.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

**Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.**

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

**GAME 610: Game Production** 3 credits.
Studio and lecture course in the history, practice and design and production of computer games with an emphasis on serious games development. Students will research, design and develop a fully functioning game, for desktop, console, and/or mobile platforms in this two-semester course. This course will also support the thesis research and project development. Offered by Coll Visual & Performing Arts. May be repeated within the degree for a maximum 6 credits.

**Recommended Prerequisite:** Admittance to the MA Game Design Program or permission of instructor.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

**Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.**

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

**GAME 605: Game Design Graduate Seminar** 1 credit.
Students present their own research and projects, or the work of contemporary game designers for discussion and peer and faculty critiques. Special focus on developing professional public communication and presentation skills about contemporary issues in the game design and production fields. Offered by Coll Visual & Performing Arts. May be repeated within the degree for a maximum 4 credits.

**Recommended Prerequisite:** Admittance to MA Game Design Program or instructor permission.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

**Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.**

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.
GAME 617: Teaching Practicum. 3 credits.
Supervised classroom teaching in Mason's Computer Game Design undergraduate program, or summer Game-focused Potomac Academy Program. Offered by Coll Visual & Performing Arts. May not be repeated for credit.

Recommended Prerequisite: GAME 605 and 3 credits of GAME 610.

Regulation Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture
Grading:
This course is graded on the Graduate Regular scale.

GAME 626: Game Business, Entrepreneurship and Practice. 3 credits.
Combined lecture and studio course in discovering and developing entrepreneurial skill sets in the game design, production and publishing industry. Special focus will be given to developing communication skills, planning strategies, and nurturing the aptitude and attitudes that enable students to creatively solve problems, identify opportunities, and execute those opportunities in the game design and production industry. Offered by Coll Visual & Performing Arts. May not be repeated for credit.

Recommended Prerequisite: GAME 605 and GAME 610.

Regulation Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture
Grading:
This course is graded on the Graduate Regular scale.

GAME 628: Advanced Game Art. 3 credits.
Studio and Lecture course in advanced computer game modeling processes and techniques. Advanced topics in modeling interactive characters and environments will be covered, including texture painting, photosourcing, and both low and high-polygon modeling. A broad variety of art styles and game production pipelines will be explored. Offered by Coll Visual & Performing Arts. May not be repeated for credit.

Recommended Prerequisite: Admittance to MA Game Design Program or permission of instructor.

Regulation Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture
Grading:
This course is graded on the Graduate Regular scale.

GAME 630: Advanced Game Animation. 3 credits.
Combined Studio and Lecture course in creating advanced animations for interactive games, with an emphasis on realtime characters. Non-bipedal motions, rotoscoping, rigging, and other advanced topics in animation will also be explored. Offered by Coll Visual & Performing Arts. May not be repeated for credit.

Recommended Prerequisite: Admittance to the MA Game Design Program or permission of instructor.

Regulation Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture
Grading:
This course is graded on the Graduate Regular scale.

GAME 635: Issues in Interactive Entertainment. 3 credits.
Studio and lecture course in advanced design concepts for interactive game and entertainment platforms and systems. Microsoft's Kinect, Nintendo's Wii U, and Apple's AirPlay Mirroring will be studied. Offered by Coll Visual & Performing Arts. May not be repeated for credit.

Recommended Prerequisite: GAME 600, GAME 605 and 3 credits of GAME 610.

Regulation Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture
Grading:
This course is graded on the Graduate Regular scale.

GAME 638: Game Studio Management. 3 credits.
Lecture Courses in managerial responsibilities and issues concerning successfully managing a small to mid-size game design studio in today's game industry marketplace. Human resources and personnel management, investor relations and board management, contract negotiations and development analysis, game design and production team oversight, research and development, budget management and realistic financial projections will be covered. Offered by Coll Visual & Performing Arts. May not be repeated for credit.

Recommended Prerequisite: GAME 610 and GAME 626.

Regulation Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading: This course is graded on the Graduate Regular scale.

GAME 650: Advanced Music and Sound for Games. 3 credits. Combined studio and lecture course that will focus on the composition, editing, processing, mixing, and integration of sound assets, such as sfx, narration, and music into computer games. Time, frequency, and amplitude domain digital production and post-production techniques will be reviewed. Standard 2-channel, and 5.1 channel post-production/mixing, as well as contemporary middleware sound management applications will be studied. Offered by Coll Visual & Performing Arts. May not be repeated for credit.

Recommended Prerequisite: Admittance to the MA Game Design Program or permission of instructor.

Registration Restrictions: Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading: This course is graded on the Graduate Regular scale.

GAME 658: Interactive Game Systems Design. 3 credits. Studio and lecture course in advanced interactive games and simulations. A variety of entertainment platforms, systems, and their unique input devices will be explored, including augmented reality, social networks, and motion controllers. Games developed will use the latest online, mobile, and console platforms, as well as non-commercial prototype platforms. Offered by Coll Visual & Performing Arts. May not be repeated for credit.

Recommended Prerequisite: GAME 635.

Registration Restrictions: Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading: This course is graded on the Graduate Regular scale.

700 Level Courses

GAME 710: Graduate Internship. 3 credits. This course prepares students to succeed in the game design industry by assisting their placement in an appropriate internship within a program approved public or commercial game design/publishing agency or firm. A total of 180 hours of internship on-site work must be earned within the semester of registration. Each student is assigned a program internship coordinator, and an on-site internship supervisor. Offered by Coll Visual & Performing Arts. May not be repeated for credit.

Recommended Prerequisite: GAME 610 and GAME 617 and permission of Program Director.

Registration Restrictions: Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Internship

Grading: This course is graded on the Graduate Regular scale.

GAME 796: Directed Reading. 1 credit. Directed Reading must be taken in the fall of year two. Prior to the end of the first year, each student must identify a faculty member, based on interest and chosen topic that will serve as the student’s faculty mentor for the thesis research and writing, or project development process. Students should also plan to devote the summer between the two academic years of study to focused preliminary reading and research for the thesis paper or project. Notes: Directed Reading is overseen by the chosen faculty mentor, and will be tailored to each student's original thesis research paper or project. Offered by Coll Visual & Performing Arts. May be repeated within the degree for a maximum 3 credits.

Recommended Prerequisite: GAME 600 and GAME 605.

Registration Restrictions: Enrollment limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading: This course is graded on the Graduate Regular scale.

GAME 797: Proposal Writing. 1 credit. Proposal Writing is overseen by the chosen faculty mentor, and will be tailored to each student's original thesis research paper or project. Prior to the end of the first year, each student must identify a faculty member, based on interest and chosen topic that will serve as the student’s faculty mentor for the Proposal Writing course to prepare for the thesis writing, or project development process. Offered by Coll Visual & Performing Arts. May be repeated within the degree for a maximum 6 credits.

Recommended Prerequisite: GAME 796.

Registration Restrictions: Enrollment limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Satisfactory/No Credit scale.

GAME 798: Project and Applied Research. 3 credits.
The research project and supporting written document must reflect original research, development, and production of a complete serious game for graduate level work. The graduate project will involve a study of historical practice, and suitable for a public viewing experience and presentation. The written component will support the evolution of the creative process, the historical context of the work, the intended purpose and intent, all supported with scholarly citations and references. Faculty mentors will guide the project development process. Offered by Coll Visual & Performing Arts. May be repeated within the degree for a maximum 9 credits.

Recommended Prerequisite: Permission of Graduate Faculty Mentor.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Thesis

Grading:
This course is graded on the Satisfactory/No Credit scale.

GAME 799: Thesis. 4 credits.
The thesis project and or written document must reflect original research, analysis, and writing appropriate for graduate level work. The thesis written document should be between 85 to 100 pages in length, following university library standards of format for graduate thesis. If a thesis project is chosen, the project should compose a complete game design document, a completed and QA tested functional game using a commercially available engine, and a public presentation. Faculty mentors will guide the thesis development process for each student. Offered by Coll Visual & Performing Arts. May not be repeated for credit.

Recommended Prerequisite: Permission of Graduate Faculty Mentor.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Thesis

Grading:
This course is graded on the Satisfactory/No Credit scale.

Computer Science (CS)

100 Level Courses

CS 100: Principles of Computing. 3 credits.
This course is intended to help students learn to think in the manner necessary to fully grasp the nature and power of the digital world around us. The early era of the Internet and the personal computer led to the need for "computer literacy." Now, the changing nature of our global society requires that students learn new ways to think about problems and how to solve them, regardless of students' specific fields of endeavor. Through this course, students will explore major issues related to the "big ideas" of computational thinking (namely, (i) Creativity, (ii) Abstraction, (iii) Data, (iv) Algorithms, (v) Programming, (vi) Internet, and (vii) Societal Impact), as well as how these issues will impact their future lives. Offered by Computer Science. Limited to two attempts.

Mason Core: Info Tech & Computing

Registration Restrictions:
Students with the terminated from VSE major attribute may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale.

CS 101: Preview of Computer Science. 2 credits.
Offers a broad overview of computer science designed to provide students with an introduction to the field of computer science and an orientation to the Computer Science department and the computing environment at the university. Includes a project to introduce problem solving using computers. All computer science majors are required to take this course within their first year. Notes: All computer science majors are required to take this course within their first year. Offered by Computer Science. Limited to two attempts.

Registration Restrictions:
Required Prerequisite: CS 112*C.
*May be taken concurrently.
C Requires minimum grade of C.

Enrollment is limited to students with a major in Applied Computer Science or Computer Science.

Enrollment limited to students in a Bachelor of Science degree.

Students with the terminated from VSE major attribute may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Satisfactory/No Credit scale.

CS 105: Computer Ethics and Society. 1 credit.
Intensive introduction to legal, social, and ethical issues surrounding software development and computer use. Stresses professional conduct, social responsibility, and rigorous standards for software testing and reliability. Examines issues such as liability, ownership of information, and computer crime. Note: Students who have received credit for CS 305 or 306 should not register for CS 105. No credit will be given for CS 105 if a student has already received credit for CS 305 or 306. Offered by Computer Science. Limited to two attempts.

Registration Restrictions:
Students with the terminated from VSE major attribute may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale.

CS 110: Essentials of Computer Science. 3 credits.
Offers a broad overview of computer science designed to provide computer science majors with an introduction to their discipline. Fundamental computing concepts such as number representation, programming environments, communication tools, and basic network security measures are covered. Privacy and ethical use of computing are also discussed along with guest lectures to sample current computer science research. Note: All computer science majors are required to take this course within their first year as a computer science major. Offered by Computer Science. Limited to two attempts.
Students with the terminated from VSE major attribute may not enroll.

**Schedule Type:** Lecture

**Registration Restrictions:**
Enrollment limited to students in the VS-BS-ACS or VS-BS-CS programs.

**Grading:**
This course is graded on the Undergraduate Regular scale.

**CS 112: Introduction to Computer Programming.** 4 credits.
Rigorous introduction to problem solving through the development of computer programs. Focuses on identifying algorithmic patterns in problems, describing problem solutions in high-level pseudocode, then implementing in a procedural programming language. Basic programming concepts are covered in detail including expressions, control structures, simple data types, and input/output. Program testing and debugging are discussed to verify that problems are solved correctly. Note: The department will drop students who fail to meet the prerequisites. Lectures and Labs are offered in groups. Students MUST register for a lecture and a lab from the same group. Offered by Computer Science. Limited to two attempts.

**Mason Core:** Info Tech & Computing

**Registration Restrictions:**
Required Prerequisites: (minimum score of 65 in 'Math Placement Transcendentals', minimum score of 07 in 'Math Placement Transcendentals', MATH 105C, 105T, 104C, 104T, 113C or 123C).
C Requires minimum grade of C.

Students with the terminated from VSE major attribute may not enroll.

**Schedule Type:** Laboratory, Lecture

**Grading:**
This course is graded on the Undergraduate Special scale.

**200 Level Courses**

**CS 211: Object-Oriented Programming.** 3 credits.
Thorough treatment of programming according to object-oriented principles. Introduces classes, interfaces, inheritance, polymorphism, and single dispatch as means to decompose problems. Covers intermediate programming techniques including error handling through exceptions, arrangement of source code into packages, and simple data structures. Intermediate debugging techniques and unit testing are covered. Note: Lectures and labs are offered in groups. Students MUST register for a lecture and a lab from the same group. Offered by Computer Science. Limited to two attempts.

**Registration Restrictions:**
Required Prerequisite: (CS 112C).
C Requires minimum grade of C.

Students with the terminated from VSE major attribute may not enroll.

**Schedule Type:** Laboratory, Lecture

**Grading:**
This course is graded on the Undergraduate Special scale.

**CS 222: Computer Programming for Engineers.** 3 credits.
Introduction to C as a second programming language with emphasis on problems and language features relevant to engineers. Topics include basic data types, pointers, elementary data structures, file/output, bitwise operations, and Unix commands for compilation and debugging. Intended as terminal course in computer programming. Notes: Intended as terminal course in computer programming. Offered by Computer Science. Limited to two attempts.

**Registration Restrictions:**
Required Prerequisite: (CS 112C).
C Requires minimum grade of C.

Students with the terminated from VSE major attribute may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale.

**CS 262: Introduction to Low-Level Programming.** 3 credits.
Introduction to the language C, as well as operating system concepts, in UNIX, to prepare students for topics in systems programming. Offered by Computer Science. Limited to two attempts.

**Registration Restrictions:**
Required Prerequisites: (CS 110C or 101T) and (CS 211C or 222C).
C May be taken concurrently.
C Requires minimum grade of C.

Students with the terminated from VSE major attribute may not enroll.

**Schedule Type:** Laboratory, Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale.

**300 Level Courses**

**CS 306: Synthesis of Ethics and Law for the Computing Professional.** 3 credits.
Practical course to become effective computer professional. Examines legal and ethical issues surrounding computer technology and its use, as well as the foundation building that is necessary to deal with those challenges. Applies philosophical bases for ethical decision making to modern concerns raised by computers and technology. Addresses topics covered by CS 105 and CS 110 in a more intensive manner and focuses on the emerging legal and ethical issues involved in e-commerce and widespread use of the Internet. Notes: Computer science majors may use this course to satisfy the Mason Core synthesis requirement, so long as they have not previously taken CS 305 for credit. Offered by Computer Science. Limited to two attempts.

**Mason Core:** Synthesis

**Specialized Designation:** Writing Intensive in Major

**Recommended Prerequisite:** Junior standing (at least 60 credit hours).

**Recommended Corequisite:** All required Mason Core courses.

**Registration Restrictions:**
Required Prerequisites: (((COMM 100C or 101T) and ENGH 302C) or (HNRS 110C and 122C) or (HNRS 110C and 130C) or (HNRS 131C, 240C, 260C, 261C, 360C or 361C)) and (CS 105C or 110C).
C Requires minimum grade of C.

Students with the terminated from VSE major attribute may not enroll.

**Schedule Type:** Lecture
Grading:
This course is graded on the Undergraduate Regular scale.

**CS 310**: Data Structures. 3 credits.
Focuses on object-oriented programming with an emphasis on tools and techniques for developing moderate to large programs. Topics include use and implementation of linear and nonlinear data structures and the design and analysis of elementary algorithms. Offered by Computer Science. Limited to two attempts.

**Recommended Corequisite**: CS 105 or CS 110

**Registration Restrictions**:
**Required Prerequisites**: (CS 211 C and MATH 113 C or 124 C).
C Requires minimum grade of C.

Students with the terminated from VSE major attribute may not enroll.

**Schedule Type**: Lecture

**Grading**:
This course is graded on the Undergraduate Regular scale.

**CS 321**: Software Engineering. 3 credits.
An introduction to concepts, methods, and tools for the creation of large-scale software systems. Methods, tools, notations, and validation techniques to analyze, specify, prototype, and maintain software requirements. Introduction to object-oriented requirements modeling, including use of case modeling, static modeling, and dynamic modeling using the Unified Modeling Language (UML) notation. Concepts and methods for the design of large-scale software systems. Fundamental design concepts and design notations are introduced. A study of object-oriented analysis and design modeling using the UML notation. Students participate in a group project on software requirements, specification, and object-oriented software design. Offered by Computer Science. Limited to two attempts. Equivalent to SWE 321.

**Specialized Designation**: Writing Intensive in Major

**Registration Restrictions**:
**Required Prerequisites**: CS 310 C and (ENGH 302 C or (HNRS 110 C and 122 C) or (HNRS 110 C and 130 C) or (HNRS 131 C, 240 C, 260 C, 261 C, 360 C or 361 C)).
C Requires minimum grade of C.

Enrollment is limited to students with a major, minor, or concentration in Applied Computer Science, Computer Science, Software Engineering or Systems Engineering.

Students with the terminated from VSE major attribute may not enroll.

**Schedule Type**: Lecture

**Grading**:
This course is graded on the Undergraduate Regular scale.

**CS 325**: Introduction to Game Design. 3 credits.
Game design, in various electronic entertainment technologies, involves a diverse set of skills and backgrounds from narrative and art to computer programming. Surveys the technical aspects of the field, with an emphasis on programming. Offered by Computer Science. Limited to two attempts.

**Registration Restrictions**:
**Required Prerequisite**: (CS 211 C).
C Requires minimum grade of C.

Students with the terminated from VSE major attribute may not enroll.

**Schedule Type**: Lecture

**Grading**:
This course is graded on the Undergraduate Regular scale.

**CS 330**: Formal Methods and Models. 3 credits.
Abstract concepts that underlie much advanced work in computer science, with major emphasis on formal languages, models of computation, logic, and proof strategies. Offered by Computer Science. Limited to two attempts.

**Registration Restrictions**:
**Required Prerequisites**: (CS 211 C and MATH 125 C).
C Requires minimum grade of C.

Enrollment is limited to students with a major, minor, or concentration in Applied Computer Science, Computer Science or Software Engineering.

Enrollment limited to students in a Bachelor of Science or Post-Baccalaureate Certificate degrees.

Students with the terminated from VSE major attribute may not enroll.

**Schedule Type**: Lecture

**Grading**:
This course is graded on the Undergraduate Regular scale.

**CS 332**: Object-Oriented Software Design and Implementation. 3 credits.
In-depth study of software design and implementation using a modern, object-oriented language with support for graphical user interfaces and complex data structures. Topics covered will be specifications; design patterns; and abstraction techniques, including typing, access control, inheritance, and polymorphism. Students will learn the proper engineering use of techniques such as information hiding, classes, objects, inheritance, exception handling, event-based systems, and concurrency. Offered by Computer Science. Limited to two attempts. Equivalent to SWE 332.

**Registration Restrictions**:
**Required Prerequisite**: (CS 310 C).
C Requires minimum grade of C.

Students with the terminated from VSE major attribute may not enroll.

**Schedule Type**: Lecture

**Grading**:
This course is graded on the Undergraduate Regular scale.

**CS 351**: Visual Computing. 3 credits.
Focuses on programming essential mathematical and geometric concepts underlining computer graphics. Covers fundamental topics in computational geometry, 3D modeling, graphics algorithms, and graphical user interfaces using both 2D and 3D implementations. Reinforces object-oriented programming practices. Offered by Computer Science. Limited to two attempts.

**Registration Restrictions**:
**Required Prerequisites**: (CS 262 C and 310 C).
C Requires minimum grade of C.
Students with the terminated from VSE major attribute may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale.

**CS 367: Computer Systems and Programming.** 4 credits.
Introduces students to computer systems from a programmer’s perspective. Topics include data representation, assembly and machine-level representation of high-level language programs, the memory hierarchy, linking, exceptions, interrupts, processes and signals, virtual memory, and system-level I/O. Foundation for courses on compilers; networks; operating systems; and computer architecture, where a deeper understanding of systems-level issues is required. Offered by Computer Science. Limited to two attempts.

**Registration Restrictions:**
Required Prerequisites: (CS 262\(^C\) or 222\(^C\)) and MATH 125\(^C\) and CS 110\(^C\).
C Requires minimum grade of C.

Students with the terminated from VSE major attribute may not enroll.

**Schedule Type:** Lecture, Recitation

**Grading:**
This course is graded on the Undergraduate Regular scale.

**CS 390: Research and Project Design Principles in Computing.** 3 credits.
This course introduces students to the research and project design process within the computing field. Students will learn about the tools of the trade, work through design principles beginning with the articulation of a question, reviewing methods of exploration, gathering evidence, communicating results, and assessing and evaluating research or project outcomes. Offered by Computer Science. Limited to two attempts.

**Specialized Designation:** Mason Impact.

**Recommended Prerequisite:** CS 310 and CS 321.

**Registration Restrictions:**
Required Prerequisite: CS 262\(^C\).
C Requires minimum grade of C.

Students with the terminated from VSE major attribute may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale.

**CS 391: Advanced Programming Lab.** 1 credit.
Programming-intensive lab course. Students refine problem-solving and programming skills while gaining experience in teamwork. Focuses on data structures, recursion, backtracking, dynamic programming, and debugging. Central focus is applying familiar and new algorithms and data structures to novel circumstances. Offered by Computer Science. May be repeated within the degree for a maximum 3 credits.

**Registration Restrictions:**
Required Prerequisite: CS 310\(^C\).
C Requires minimum grade of C.

Students with the terminated from VSE major attribute may not enroll.

**Schedule Type:** Laboratory

**Grading:**
This course is graded on the Undergraduate Regular scale.

**CS 395: Student Initiated Special Topics.** 1 credit.
Special and emerging topics of interest to computer science undergraduates. Lectures are taught by student/faculty teams. Notes: May be repeated if topics are substantially different. Offered by Computer Science. May be repeated within the term for a maximum 3 credits.

**Specialized Designation:** Topic Varies

**Recommended Prerequisite:** Additional prerequisites will vary by topic.

**Registration Restrictions:**
Required Prerequisite: CS 211\(^C\).
C Requires minimum grade of C.

Enrollment is limited to students with a major in Applied Computer Science or Computer Science.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale.

**CS 399: Special Topics.** 3 credits.
Special and emerging topics in computer science or closely related disciplines. Notes: May be repeated if topics are substantially different. Offered by Computer Science. May be repeated within the term for a maximum 6 credits.

**Specialized Designation:** Topic Varies

**Recommended Prerequisite:** Additional prerequisites will vary by topic.

**Registration Restrictions:**
Required Prerequisite: CS 211\(^C\).
C Requires minimum grade of C.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale.

**CS 425: Game Programming I.** 3 credits.
Introduction to technologies and techniques used in modern computer games. Teams will explore the various facets of a complete design using sophisticated tools. Includes a project in which a game is prototyped; this prototype and initial design will serve as the starting point for the project in CS 426. Offered by Computer Science. Limited to two attempts.

**Registration Restrictions:**
Required Prerequisites: (CS 310\(^C\) and 351\(^C\)).
C Requires minimum grade of C.

Students with the terminated from VSE major attribute may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale.

**400 Level Courses**

**CS 425: Game Programming I.** 3 credits.
Introduction to technologies and techniques used in modern computer games. Teams will explore the various facets of a complete design using sophisticated tools. Includes a project in which a game is prototyped; this prototype and initial design will serve as the starting point for the project in CS 426. Offered by Computer Science. Limited to two attempts.

**Registration Restrictions:**
Required Prerequisites: (CS 310\(^C\) and 351\(^C\)).
C Requires minimum grade of C.

Students with the terminated from VSE major attribute may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale.
**CS 426: Game Programming II.** 3 credits.
Project-orientated continuation of CS 425 with an emphasis on the implementation of a complete game. Offered by Computer Science. Limited to two attempts.

**Registration Restrictions:**
**Required Prerequisites:** CS 325 and CS 425.
Requires minimum grade of C.

Students with the terminated from VSE major attribute may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale.

**CS 440: Language Processors and Programming Environments.** 3 credits.
Survey of basic programming language processors and software development tools such as assemblers, interpreters, and compilers. Topics include design and construction of language processors, formal syntactic definition methods, parsing techniques, and code-generation techniques. Offered by Computer Science. Limited to two attempts.

**Registration Restrictions:**
**Required Prerequisites:** (CS 310 and CS 330 and CS 367).
Requires minimum grade of C.

Students with the terminated from VSE major attribute may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale.

**CS 444: Introduction to Computational Biology.** 3 credits.
Introduces computational methods in molecular biology. Covers a broad array of topics in bioinformatics and computational biology. Organized as 3 four-week modules intended to capture the current classification of bioinformatics and computational biology methods, thereby providing students with a broad view of the field. Offered by Computer Science. Limited to two attempts.

**Recommended Prerequisite:** C or better in CS 310.

**Registration Restrictions:**
Students with the terminated from VSE major attribute may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale.

**CS 445: Computational Methods for Genomics.** 3 credits.
Fundamental principles and techniques for implementing computational algorithms to solve problems in biology arising from the need to process large volumes of genomic information. Topics include sequence analysis, alignment, and assembly, gene prediction, and knowledge-based protein structure prediction. Projects involve designing and programming basic alignment and prediction methods. Offered by Computer Science. Limited to two attempts.

**Recommended Prerequisite:** C or better in CS 310 and STAT 344.

**Registration Restrictions:**
Students with the terminated from VSE major attribute may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale.

**CS 450: Database Concepts.** 3 credits.
Covers basics to intermediate knowledge for the design, implementation, and use of relational database systems. Topics include the Entity-Relationship (ER) and Entity-Enhanced Relationship (EER) models for database design, Relational Algebra (RA), Structured Query Language (SQL), SQL programming techniques, functional dependencies and normalization, object and object-relational databases, and security. Students will practice to design, develop, and implement a relational ORACLE database and use the database for queries, transaction processing, and report generation. Offered by Computer Science. Limited to two attempts.

**Registration Restrictions:**
**Required Prerequisites:** (CS 310 and CS 330).
Requires minimum grade of C.

Students with the terminated from VSE major attribute may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale.

**CS 451: Computer Graphics.** 3 credits.
Basic graphics principles and programming. Topics include scan conversion, transformation, viewing, lighting, blending, texture mapping, and some advanced graphics techniques. Offered by Computer Science. Limited to two attempts.

**Registration Restrictions:**
**Required Prerequisites:** (MATH 203 and CS 310 and CS 367).
Requires minimum grade of C.

Students with the terminated from VSE major attribute may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale.

**CS 455: Computer Communications and Networking.** 3 credits.
Data communications and networking protocols, with study organized to follow layers of Internet Protocol Suite (TCP/IP family of protocols). Topics include role of various media and software components, local and wide area network protocols, network performance, and emerging advanced commercial technologies. Offered by Computer Science. Limited to two attempts.

**Registration Restrictions:**
**Required Prerequisites:** (CS 310 and CS 367 and STAT 344).
Requires minimum grade of C.

Students with the terminated from VSE major attribute may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale.
CS 463: Comparative Programming Languages. 3 credits.
Key programming mechanisms described independently of particular machines or languages, including control, binding, procedural abstraction, types, and concurrency. Includes basic programming competence in several different types of programming languages, including a language that provides concurrency. Notes: Students who have taken CS 363 may not receive credit for CS 463. Offered by Computer Science. Limited to two attempts.

Registration Restrictions:
Required Prerequisites: CS 330\(^C\), 367\(^C\) and 310\(^C\).
\(^C\) Requires minimum grade of C.
Students with the terminated from VSE major attribute may not enroll.

Schedule Type: Lecture
Grading:
This course is graded on the Undergraduate Regular scale.

CS 465: Computer Systems Architecture. 3 credits.

Registration Restrictions:
Required Prerequisite: (CS 367\(^C\)).
\(^C\) Requires minimum grade of C.
Students with the terminated from VSE major attribute may not enroll.

Schedule Type: Lecture
Grading:
This course is graded on the Undergraduate Regular scale.

CS 466: Secure Programming and Systems. 3 credits.
Fundamental principles and techniques for implementing secure computer systems. Topics include security and cryptography basics, vulnerability analysis, secure software development, and distributed system security. Projects involve designing and programming basic security tools, secure programs, and distributed systems. Offered by Computer Science. Limited to two attempts.

Registration Restrictions:
Required Prerequisites: (CS 310\(^C\)) and (CS 367\(^C\)).
\(^C\) Requires minimum grade of C.
Students with the terminated from VSE major attribute may not enroll.

Schedule Type: Lecture
Grading:
This course is graded on the Undergraduate Regular scale.

CS 469: Security Engineering. 3 credits.
Covers the software subsystems that are involved in defending computer systems. Studies threats and architecting solutions against them, including but not limited to access control and identity management, network and system security, intrusion detection and recovery systems, monitoring and forensic systems. Offered by Computer Science. Limited to two attempts.

Registration Restrictions:
Required Prerequisites: (CS 330\(^C\)) and (CS 367\(^C\)) and (STAT 344\(^C\)).
\(^C\) Requires minimum grade of C.
Students with the terminated from VSE major attribute may not enroll.

Schedule Type: Lecture
Grading:
This course is graded on the Undergraduate Regular scale.

CS 471: Operating Systems. 3 credits.
Issues in multiprogramming. Covers concurrent processes and synchronization mechanisms; processor scheduling; memory, file, I/O, and deadlock management; performance of operating systems; and projects dealing with synchronization in multiprogrammed OS and virtual memory management. Offered by Computer Science. Limited to two attempts.

Registration Restrictions:
Required Prerequisites: (CS 310\(^C\)) and (CS 367\(^C\) or ECE 445\(^C\)).
\(^C\) Requires minimum grade of C.
Students with the terminated from VSE major attribute may not enroll.

Schedule Type: Lecture
Grading:
This course is graded on the Undergraduate Regular scale.

CS 475: Concurrent and Distributed Systems. 3 credits.
Practical issues in designing and implementing concurrent and distributed software. Topics include concurrent programming, synchronization, multithreading, local and wide-area network protocols, distributed computation, systems integration, and techniques for expressing coarsegrained parallelism at the application level. Projects involve network programming at application level. Offered by Computer Science. Limited to two attempts.

Registration Restrictions:
Required Prerequisites: (CS 310\(^C\)) and (CS 367\(^C\)).
\(^C\) Requires minimum grade of C.
Students with the terminated from VSE major attribute may not enroll.

Schedule Type: Lecture
Grading:
This course is graded on the Undergraduate Regular scale.

CS 477: Mobile Application Development. 3 credits.
This project based course will teach fundamental principles of software development for the mobile device environment, emphasizing the application of numerous academic concepts and the new design and programming paradigms that stem from the use of mobile devices. Topics include user interfaces, event-based programming, interprocess communications, networking, mobile-specific capabilities and performance in a resource restricted environment. Offered by Computer Science. Limited to two attempts.

Registration Restrictions:
Required Prerequisites: CS 310\(^C\) and 367\(^C\).
\(^C\) Requires minimum grade of C.
Students with the terminated from VSE major attribute may not enroll.

Schedule Type: Lecture
Grading:
This course is graded on the Undergraduate Regular scale.

**CS 480: Introduction to Artificial Intelligence.** 3 credits.
Principles and methods for knowledge representation, reasoning, learning, problem solving, planning, heuristic search, and natural language processing and their application to building intelligent systems in a variety of domains. Uses LISP, PROLOG, or expert system programming language. Offered by Computer Science. Limited to two attempts.

**Registration Restrictions:**
Required Prerequisites: (CS 310<sup>C</sup>) and (CS 330<sup>C</sup>).
C Requires minimum grade of C.

Students with the terminated from VSE major attribute may **not** enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale.

**CS 482: Computer Vision.** 3 credits.
Basic principles of visual perception and their implementation on computer systems. Topics include early visual processing, edge detection, segmentation, intrinsic images, image modeling, representation of visual knowledge, and image understanding. Students complete projects involving real images. Offered by Computer Science. Limited to two attempts.

**Registration Restrictions:**
Required Prerequisites: (CS 310<sup>C</sup>) and (MATH 203<sup>C</sup>) and (STAT 344<sup>C</sup>).
C Requires minimum grade of C.

Students with the terminated from VSE major attribute may **not** enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale.

**CS 483: Analysis of Algorithms.** 3 credits.
Analyzes computational resources for important problem types by alternative algorithms and their associated data structures, using mathematically rigorous techniques. Specific algorithms analyzed and improved. Offered by Computer Science. Limited to two attempts.

**Registration Restrictions:**
Required Prerequisites: (CS 310<sup>C</sup>) and (CS 330<sup>C</sup>) and (MATH 125<sup>C</sup>).
C Requires minimum grade of C.

Students with the terminated from VSE major attribute may **not** enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale.

**CS 484: Data Mining.** 3 credits.
Basic principles and methods for data analysis and knowledge discovery. Emphasizes developing basic skills for modeling and prediction and performance evaluation. Topics include system design; data quality, preprocessing, and association; event classification; clustering; biometrics; business intelligence; and mining complex types of data. Offered by Computer Science. Limited to two attempts.

**Registration Restrictions:**
Required Prerequisites: CS 367<sup>C</sup>, 321<sup>C</sup> and 483<sup>C</sup>.
C Requires minimum grade of C.

May be taken concurrently.

Students with the terminated from VSE major attribute may **not** enroll.

**Schedule Type:** Computer Science. Limited to two attempts.

**Registration Restrictions:**
Required Prerequisites: CS 310<sup>C</sup> and (STAT 344<sup>C</sup> or 334<sup>C</sup>).
C Requires minimum grade of C.

Students with the terminated from VSE major attribute may **not** enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale.

**CS 485: Autonomous Robotics.** 3 credits.
Covers various basic topics in autonomous robotics, such as autonomous architectures and their interaction with physical hardware, elementary kinematics and robot control, motion and trajectory planning, localization, task planning, learning and adaptation, modeling, and sensor fusion. Includes projects involving physical robots. Offered by Computer Science. Limited to two attempts.

**Registration Restrictions:**
Required Prerequisites: CS 262<sup>C</sup>, 310<sup>C</sup> and MATH 203<sup>C</sup>.
C Requires minimum grade of C.

Students with the terminated from VSE major attribute may **not** enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale.

**CS 490: Design Exhibition.** 3 credits.
Capstone course focusing on design and successful implementation of major software project, encompassing broad spectrum of knowledge and skills, developed by team of students. Requires final exhibition to faculty-industry panel. Offered by Computer Science. May be repeated within the degree for a maximum 12 credits.

**Recommended Prerequisite:** Two other CS 400-level courses; and senior standing.

**Registration Restrictions:**
Required Prerequisites: (CS 321<sup>C</sup> or 421<sup>C</sup>) and (CS 483<sup>C</sup>).
C Requires minimum grade of C.

Students with the terminated from VSE major attribute may **not** enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale.

**CS 491: Industry-Sponsored Senior Design Project.** 3 credits.
Senior design project course focusing on design and successful implementation of major software project specified by an industry sponsor, encompassing broad spectrum of knowledge and skills, developed by team of students. Requires final exhibition to faculty-industry panel. Offered by Computer Science. May be repeated within the degree for a maximum 6 credits.

**Registration Restrictions:**
Required Prerequisites: CS 367<sup>C</sup>, 321<sup>C</sup> and 483<sup>C</sup>.
May be taken concurrently.
C Requires minimum grade of C.

Enrollment is limited to students with a major, minor, or concentration in Applied Computer Science or Computer Science.
Students with the terminated from VSE major attribute may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Special scale.

CS 498: Independent Study in Computer Science. 1-3 credits.
Research and analysis of selected problems or topics in computer science. Topic must be arranged with instructor and approved by department chair before registering. Notes: May be repeated if topics substantially different. Offered by Computer Science. May be repeated within the term for a maximum 6 credits.

Recommended Prerequisite: 60 credits, CS major, and Permission of Instructor.

Registration Restrictions:
Students with the terminated from VSE major attribute may not enroll.

Schedule Type: Independent Study

Grading:
This course is graded on the Undergraduate Regular scale.

CS 499: Special Topics in Computer Science. 3 credits.
Topics of special interest to undergraduates. Notes: May be repeated if topics substantially different. Offered by Computer Science. May be repeated within the term for a maximum 6 credits.

Specialized Designation: Topic Varies

Recommended Prerequisite: 60 credits. Additional prerequisites may vary with nature of topic.

Registration Restrictions:
Required Prerequisites: CS 310C and 330C.
C Requires minimum grade of C.

Students with the terminated from VSE major attribute may not enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale.

500 Level Courses

CS 504: Principles of Data Management and Mining. 3 credits.
Techniques to store, manage, and use data including databases, relational model, schemas, queries and transactions. On Line Transaction Processing, Data Warehousing, star schema, On Line Analytical Processing. MOLAP, HOLAP, and hybrid systems. Overview of Data Mining principles, models, supervised and unsupervised learning, pattern finding. Massively parallel architectures and Hadoop. Notes: This course cannot be taken for credit by students of the MS CS, MS ISA, MS SWE, CS PhD or IT PhD programs. Offered by Computer Science. May not be repeated for credit.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the Volgenau School of Engineering college.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale.

CS 530: Mathematical Foundations of Computer Science. 3 credits.
This course focuses on the topics of basic mathematical structures, mathematical logic and probability theory; and application of these concepts to problem solving and formal reasoning through hand-on practice with the use of computational tools. Notes: May not be taken for credit by students in the PhD CS or accelerated MSCS programs. May only be taken in the first semester at GMU. Offered by Computer Science. May not be repeated for credit.

Recommended Prerequisite: MATH 125 and STAT 344.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the Volgenau School of Engineering college.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale.

CS 531: Computer Systems and Fundamentals of Systems Programming. 3 credits.
This course is a hands-on introduction to the systems level of programming with an emphasis on data structures and interfacing with operating systems. This course focuses on fundamental data structures needed to design and implement systems applications and continues with an introduction to the Unix Application Programming Interface, signals, threads, and interprocess communications. This course is taught from a programmatic perspective using C, with special topics in both Java and Python. May not be taken for credit by students in the PhD CS or accelerated MSCS programs. May only be taken in the first semester at GMU. Offered by Computer Science. May not be repeated for credit.

Recommended Prerequisite: CS 310 and CS 367 or equivalent.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the Volgenau School of Engineering college.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale.

**CS 540: Language Processors.** 3 credits.
Basic programming language processors such as assemblers, interpreters, and compilers. Topics include design and construction of language processors, formal syntactic definition methods, parsing techniques, and code generation techniques. Lab includes construction of language processors and experience with programming environments. Offered by Computer Science. May not be repeated for credit.

**Recommended Prerequisite:** MATH 125 and CS 310 and CS 330 and CS 465.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the Volgenau School of Engineering college.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

**CS 550: Database Systems.** 3 credits.
An introduction to database management with focus on architecting databases and using them in applications. Topics to be covered include: data modeling with the Entity-Relationship model, the relational data model and its formal languages, SQL, the theory of database design, object databases, XML and Web data. Offered by Computer Science. May not be repeated for credit.

**Recommended Prerequisite:** (CS 310 and CS 330) or (INFS 501 and INFS 515 and INFS 519 and SWE 510).

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the Volgenau School of Engineering college.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

**CS 555: Computer Communications and Networking.** 3 credits.
Techniques and systems for communication of data between computational devices and layers of Internet Protocol Suite. Topics include role of various media and software components, local and wide area network protocols, network design, performance and cost considerations, and emerging advanced commercial technologies. Emphasizes TCP/IP family of protocols. Offered by Computer Science. May not be repeated for credit.

**Recommended Prerequisite:** CS 310 and CS 367 and STAT 344.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the Volgenau School of Engineering college.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

**CS 571: Operating Systems.** 3 credits.
Models of operating systems. Major functions including processes, memory management, I/O, interprocess communication, files, directories, shells, distributed systems, performance, and user interface. Offered by Computer Science. May not be repeated for credit.

**Recommended Prerequisite:** CS 310 and CS 367 and CS 465.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the Volgenau School of Engineering college.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

**CS 580: Introduction to Artificial Intelligence.** 3 credits.
Principles and methods for knowledge representation, reasoning, learning, problem solving, planning, heuristic search, and natural language processing and their application to building intelligent systems in a variety of domains. LISP, PROLOG, or expert system programming language. Offered by Computer Science. May not be repeated for credit.

**Recommended Prerequisite:** CS 310 and CS 330.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the Volgenau School of Engineering college.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

**CS 583: Analysis of Algorithms.** 3 credits.
Topics include analyzing sequential and parallel algorithmic strategies such as greedy methods, divide and conquer strategies, dynamic programming, search and traversal techniques, and approximation algorithms; and analyzing specific algorithms falling into these classes, NP-Hard and NP-Complete problems. Offered by Computer Science. May not be repeated for credit.

**Recommended Prerequisite:** CS 310 and CS 330 and MATH 125.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the Volgenau School of Engineering college.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

**CS 584: Theory and Applications of Data Mining.** 3 credits.
Concepts and techniques in data mining and multidisciplinary applications. Topics include databases; data cleaning and transformation; concept description; association and correlation rules; data classification and predictive modeling; performance analysis and scalability; data mining in advanced database systems, including text, audio, and images; and emerging themes and future challenges. Offered by Computer Science. May not be repeated for credit.

**Recommended Prerequisite:** CS 310 and STAT 344.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the Volgenau School of Engineering college.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

**CS 587: Introduction to Cryptography.** 3 credits.
Covers formal definitions of security for the most common tasks: data encryption and authentication, in both the private key and public key settings. Covers the process of formally proving that constructions meet the appropriate security definitions. Also covers practical constructions and applications, such as how to correctly use block ciphers and hash functions for the tasks above. In addition, several current topics in cryptography may also be covered. Offered by Computer Science. May not be repeated for credit.

**Recommended Prerequisite:** CS 330

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the Volgenau School of Engineering college.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

**CS 595: Basic Topics in Computer Science.** 3 credits.
Special topics in computer science not occurring in existing courses. Offered by Computer Science. May be repeated within the degree for a maximum 9 credits.

**Specialized Designation:** Topic Varies

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate or Non-Degree.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

**600 Level Courses**

**CS 600: Theory of Computation.** 3 credits.
Introduction to logic and proof techniques, formal languages, automata theory, and computational complexity. Specific topics include regular and context-free languages, Turing machines, NP-completeness, and undecidability. Offered by Computer Science. May not be repeated for credit.

**Recommended Prerequisite:** CS 583
B- Requires minimum grade of B-.

Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the Volgenau School of Engineering college.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale.

CS 611: Computational Methods for Genomics. 3 credits.
Covers fundamental principles and techniques for implementing computational algorithms to solve problems in biology arising from the need to process large volumes of genomic information. Topics include sequence analysis, alignments, sequence assembly, gene prediction, and protein structure prediction. Offered by Computer Science. May not be repeated for credit.

Registration Restrictions:
Required Prerequisite: CS 583 B-.
B- Requires minimum grade of B-.

Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the Volgenau School of Engineering college.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale.

CS 630: Advanced Algorithms. 3 credits.
Provides an overview of advanced algorithm design and analysis techniques. Topics include algorithms for hash tables, matrix operations, number theory, string matching, computational geometry, combinatorial optimization, and linear programming; also the areas of NP-completeness and approximation algorithms. Offered by Computer Science. May not be repeated for credit.

Recommended Prerequisite: Proficiency in C programming language.

Registration Restrictions:
Required Prerequisites: (CS 583 B- and 571 B-).
B- Requires minimum grade of B-.

Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the Volgenau School of Engineering college.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale.
CS 640: Advanced Compilers. 3 credits.
Examines advanced compiler techniques such as code optimizations for sequential and parallel machines; compilers for logical, functional, or object-oriented languages; and other topics in current literature. Offered by Computer Science. May not be repeated for credit.

Registration Restrictions:
Required Prerequisites: (CS 540B and 583B).
B- Requires minimum grade of B-.

Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the Volgenau School of Engineering college.

Schedule Type: Lecture
Grading:
This course is graded on the Graduate Regular scale.

CS 650: Advanced Database Management. 3 credits.
Study of the internal architecture of database systems. Topics include: physical data organization and indexing, query processing and optimization, transaction processing, database system architectures, Web services and Web data security. Offered by Computer Science. May not be repeated for credit.

Registration Restrictions:
Required Prerequisites: (CS 550B or INFS 614B).
B- Requires minimum grade of B-.

Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the Volgenau School of Engineering college.

Schedule Type: Lecture
Grading:
This course is graded on the Graduate Regular scale.

CS 655: Wireless and Mobile Computing. 3 credits.
This course provides an introduction to wireless and mobile networking. Topics include principles and architectures of wireless and mobile networking and fundamental issues of wireless communications with energy-constrained, mobile devices. It discusses physical, data link and network layer protocols including IEEE 802.11, and emerging wireless networks such as Internet-of-Things, high-speed millimeter-waves, vehicular networks, and mobile and IoT sensing applications including indoor localization, smart-homes, and smart-cities. Offered by Computer Science. May not be repeated for credit.

Recommended Prerequisite: CS 555
Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Lecture
Grading:
This course is graded on the Graduate Regular scale.

CS 657: Mining Massive Datasets with MapReduce. 3 credits.
Covers the techniques to mine large datasets, including Distributed File Systems and Map-Reduce, similarity search, and data stream processing. Covers classic problems in data mining, such as clustering, association rule mining, and others from the point of view of scalability. Includes a final project to exercise concepts covered in class. Offered by Computer Science. May not be repeated for credit.

Registration Restrictions:
Required Prerequisite: CS 584B.
B- Requires minimum grade of B-.

Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the Volgenau School of Engineering college.

Schedule Type: Lecture
Grading:
This course is graded on the Graduate Regular scale.

CS 658: Networked Virtual Environments. 3 credits.
Networked virtual environment overview, networking and multimedia concepts, virtual simulation concepts, efficiency/performance issues, and online conferencing/virtual classrooms. Course is based around a project with multiple segments, each covering one aspect of networked virtual environments, plus a final session where one- or two-person teams create a minimally functional networked virtual environment over the Internet using multicast network software. Lectures available online/recorded. Offered by Computer Science. May not be repeated for credit.

Registration Restrictions:
Required Prerequisite: CS 555B.
B- Requires minimum grade of B-.

Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the Volgenau School of Engineering college.

Schedule Type: Lecture
Grading:
This course is graded on the Graduate Regular scale.

**CS 662: Computer Graphics Game Technologies.** 3 credits.
Addresses some graphics game techniques including collision detection, levels of detail, physics-based simulations, textures, maps, and shadows. Offered by Computer Science. May not be repeated for credit.

**Registration Restrictions:**
**Required Prerequisite:** CS 551<sup>B</sup>.
<sup>B</sup> Requires minimum grade of B-.

Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the Volgenau School of Engineering college.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

**CS 667: Biometrics and Identity Management.** 3 credits.
Basic principles and methods for automatic authentication of individuals. Technologies include face, fingerprint, and iris recognition; and speaker verification. Additional topics cover multimodal biometrics, system design, performance evaluation, and privacy concerns. Term project required. Offered by Computer Science. May not be repeated for credit.

**Registration Restrictions:**
**Required Prerequisite:** CS 580<sup>B</sup>.
<sup>B</sup> Requires minimum grade of B-.

Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the Volgenau School of Engineering college.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

**CS 672: Computer System Performance Evaluation.** 3 credits.
Theory and practice of analytical models of computer systems. Topics include open and closed multiclass queuing networks, single and multiple class Mean Value Analysis, Markov Chains, performance and availability models of Internet data centers, software performance engineering, and e-commerce performance. Offered by Computer Science. May not be repeated for credit.

**Registration Restrictions:**
**Required Prerequisite:** CS 571<sup>B</sup>.
<sup>B</sup> Requires minimum grade of B-.

Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the Volgenau School of Engineering college.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

**CS 673: Multimedia Computing and Systems.** 3 credits.
Focuses on technological and development environments in developing multimedia applications. Projects involve experience with multimedia authoring tools and simulations to assess performance. Offered by Computer Science. May not be repeated for credit.

**Registration Restrictions:**
**Required Prerequisite:** CS 571<sup>B</sup>.
<sup>B</sup> Requires minimum grade of B-.

Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the Volgenau School of Engineering college.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

**CS 675: Distributed Systems.** 3 credits.
Issues in design and implementation of distributed systems and applications. Topics include distributed communication paradigms, middleware, coordination and synchronization, distributed transactions, consistency and replication, fault-tolerance and reliability, and peer-to-peer systems. Offered by Computer Science. May not be repeated for credit.

**Registration Restrictions:**
**Required Prerequisite:** CS 571<sup>B</sup>.
<sup>B</sup> Requires minimum grade of B-.

Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the Volgenau School of Engineering college.

**Schedule Type:** Lecture
Grading:
This course is graded on the Graduate Regular scale.

CS 681: Instructable Cognitive Agents. 3 credits.
Design and development of cognitive agents that learn problem-solving expertise directly from domain experts. Topics include modeling expert's knowledge, mixed-initiative reasoning based on knowledge and evidence, ontology design and development, multistrategy rule learning, and knowledge-based maintenance. Projects include development of specific cognitive agents through teaching and learning. Offered by Computer Science. May not be repeated for credit.

Registration Restrictions:
Required Prerequisite: CS 580B.
B- Requires minimum grade of B-.

Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.
Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.
Students in a Non-Degree Undergraduate degree may not enroll.
Enrollment limited to students in the Volgenau School of Engineering college.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale.

CS 682: Computer Vision. 3 credits.
Study of computational models of visual perception and their implementation in computer systems. Topics include early visual processing, edge detection, segmentation, intrinsic images, image modeling, representation of visual knowledge, and image understanding. Offered by Computer Science. May not be repeated for credit.

Registration Restrictions:
Required Prerequisites: (CS 580B and (CS 583B or 584B)).
B- Requires minimum grade of B-.

Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.
Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.
Students in a Non-Degree Undergraduate degree may not enroll.
Enrollment limited to students in the Volgenau School of Engineering college.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale.

CS 683: Parallel Algorithms. 3 credits.
Examines design and analysis of parallel algorithms. Material focuses on algorithms for both theoretical and practical models of parallel computation. Considers algorithm design and analysis for PRAM and existing SIMD and MIMD type architectures. Topics include sorting, graph algorithms, numerical algorithms, and computational complexity. Offered by Computer Science. May not be repeated for credit.

Registration Restrictions:
Required Prerequisite: CS 580B.
B- Requires minimum grade of B-.

Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.
Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale.

CS 684: Graph Algorithms. 3 credits.
Data structures and analytical techniques to study graph algorithms. Data structures include disjoint sets, heaps, and dynamic trees. Algorithms include minimum spanning trees, shortest path, maximum flow, and graph planarity. Offered by Computer Science. May not be repeated for credit.

Registration Restrictions:
Required Prerequisites: (CS 580B and (CS 583B or 584B)).
B- Requires minimum grade of B-.

Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.
Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.
Students in a Non-Degree Undergraduate degree may not enroll.
Enrollment limited to students in the Volgenau School of Engineering college.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale.

CS 685: Autonomous Robotics. 3 credits.
Reviews developments in intelligent autonomous systems. Studies applications of artificial intelligence, computer vision, and machine learning to robotics. Topics include analysis and design of algorithms and architectures for planning, navigation, sensory data understanding, sensor fusion, spatial reasoning, motion control, knowledge acquisition, learning concepts and procedures, self-organization, and adaptation to environment. Offered by Computer Science. May not be repeated for credit.

Registration Restrictions:
Required Prerequisite: CS 580B.
B- Requires minimum grade of B-.

Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.
Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.
Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the Volgenau School of Engineering college.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

**CS 686: Image Processing and Applications.** 3 credits.
Concepts and techniques in image processing. Discusses methods for image capture, transformation, enhancement, restoration, and encoding. Students complete projects involving naturally occurring images. Offered by Computer Science. May not be repeated for credit.

**Registration Restrictions:**
**Required Prerequisite:** CS 583\(^B\).
\(^B\) Requires minimum grade of B-.

Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the Volgenau School of Engineering college.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

**CS 687: Advanced Artificial Intelligence.** 3 credits.
Explores foundational issues of artificial intelligence, such as roles of knowledge and search, formalization of knowledge and inference, and symbolic versus emergent approaches to intelligence. Studies advanced programming techniques for artificial intelligence, relationship to foundational issues, and important application areas for artificial intelligence. Notes: Major programming project required. Offered by Computer Science. May not be repeated for credit.

**Registration Restrictions:**
**Required Prerequisite:** CS 580\(^B\) or 584\(^B\).
\(^B\) Requires minimum grade of B-.

Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the Volgenau School of Engineering college.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

**CS 688: Machine Learning.** 3 credits.
This course covers the theory and principles underlying different machine learning paradigms. The emphasis is on statistical theory and methodology. Topics include: Model selection and generalization; Overfitting and under fitting; Bayesian theory and Decision theory; Maximum Likelihood estimation, MAP; Regularization; Bias-variance tradeoff; Curse of dimensionality; Dimensionality reduction; Linear Models for classification; Probabilistic Generative Models; Probabilistic Discriminative Models; Neural Networks (Backpropagation); Deep Learning (CNNs); Kernel methods; Support Vector Machines; Ensemble Methods; Unsupervised Learning (Clustering, EM, Mixture Modeling); Reinforcement learning. Offered by Computer Science. May not be repeated for credit.

**Registration Restrictions:**
**Required Prerequisites:** CS 580\(^B\) or 584\(^B\).
\(^B\) Requires minimum grade of B-.

Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the Volgenau School of Engineering college.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

**CS 689: Planning Motions of Robots and Molecules.** 3 credits.
Covers topics from artificial intelligence, algorithms and databases. Presents algorithms that model and simulate physical and biological systems and focuses on motion-planning algorithms for robotic systems in the presence of obstacles. Simple deterministic and sampling-based approaches to motion planning will be covered, as well as advanced planning methods including planning with kinematics and dynamic constraints. Selected topics include sensor-based motion planning, manipulation planning, assembly planning, planning under uncertainty and robotics-inspired methods to compute functionally-relevant motions of molecular chains. Offered by Computer Science. May not be repeated for credit.

**Registration Restrictions:**
**Required Prerequisite:** CS 583\(^B\).
\(^B\) Requires minimum grade of B-.

Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the Volgenau School of Engineering college.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

**CS 695:** Topics in Computer Science. 3 credits.
Special topics in computer science not occurring in regular computer science sequence. Notes: May be repeated for credit when topics are distinctly different. Offered by Computer Science. May be repeated within the term.

**Specialized Designation:** Topic Varies

**Recommended Prerequisite:** Completion of at least two core courses and permission of the instructor.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the Volgenau School of Engineering college.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

**CS 697:** Independent Reading and Research. 1-3 credits.
Students may undertake a course of study under supervision of consenting faculty member. Students usually submit written statement of course content and tentative reading list as part of request for approval. Literature review, project report, or other written product usually required. Offered by Computer Science. May not be repeated for credit.

**Recommended Prerequisite:** Completion of at least two core courses, and permission of the instructor.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the Volgenau School of Engineering college.

**Schedule Type:** Research

**Grading:**
This course is graded on the Graduate Regular scale.

**700 Level Courses**

**CS 700:** Research Methodology in Computer Science. 3 credits.
Topics include approaches for evaluating, writing, and presenting scholarly papers, research integrity issues, and quantitative models and methods in experimental computer science. Techniques for the use of analytic and simulation models, design of experiments, hypothesis testing, and statistical analysis of data are presented. Students apply these techniques to a project, write a report, and make a presentation to the class. Offered by Computer Science. May not be repeated for credit.

**Recommended Prerequisite:** Admission to PhD in Computer Science or PhD in Information Technology programs.

**Registration Restrictions:**
Enrollment is limited to students with a major in Computer Science or Information Technology.

Enrollment limited to students in a Doctor of Philosophy degree.

Enrollment limited to students in the Volgenau School of Engineering college.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

**CS 706:** Concurrent Software Systems. 3 credits.
Topics include concurrent programming languages and constructs, and specification, design, verification, and validation of concurrent programs. Students required to solve concurrent programming problems and check solutions by using verification, testing, and debugging tools. Offered by Computer Science. May not be repeated for credit.

**Required Prerequisite:** CS 571^B^.

^B^ Requires minimum grade of B-.

Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the Volgenau School of Engineering college.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

**CS 719:** Scalable Internet Services. 3 credits.
Discusses, from quantitative point of view, characteristics of most important technologies used to support implementation of e-business sites. Includes topics such as hardware and software architectures of e-business sites, authentication, payment services, understanding customer behavior, workload characterization, scalability analysis, and
performance prediction. Notes: Term paper and project required. Offered by Computer Science. May not be repeated for credit.

Registration Restrictions:
Required Prerequisites: (CS 555\(^{B-}\) and 571\(^{B-}\)).
\(^{B-}\) Requires minimum grade of B-.

Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the Volgenau School of Engineering college.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale.

CS 747: Deep Learning. 3 credits.
This course presents the theory, underlying principles and applications of Deep Learning (DL). Deep learning is a Machine Learning approach based on learning data representations as opposed to designing task-specific algorithms. The course covers the concepts of Multilayer Perceptrons (MLPs) and algorithms to train them (gradient descent, backpropagation), Regularization of DL, Convolutional Networks (CNNs), Autoencoders, Recurrent Networks (RNNs), and Deep Generative Models including Generative Adversarial Methods. Problems from various application domains such as natural language processing and computer vision will be discussed. Offered by Computer Science. May not be repeated for credit.

Recommended Prerequisite: CS 688

Registration Restrictions:
Enrollment is limited to students with a major in Computer Science or Software Engineering.

Enrollment limited to students in a Master of Science degree.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale.

CS 752: Interactive Graphics Software. 3 credits.
Advanced graphics methods and tools. Topics include visualization, modeling, rendering, animation, simulation, virtual reality, graphics software tools, and current research topics. Offered by Computer Science. May not be repeated for credit.

Registration Restrictions:
Required Prerequisites: (CS 551\(^{B-}\) and 583\(^{B-}\)).
\(^{B-}\) Requires minimum grade of B-.

Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the Volgenau School of Engineering college.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale.

CS 755: Advanced Computer Networks. 3 credits.
Current and emerging issues in advanced computer networks and applications. Topics include software systems associated with packet and cell-switched networking architectures and protocols, high-performance LANs, scheduling and congestion control, mobile networking, multimedia applications, and next generation of Internet. Offered by Computer Science. May not be repeated for credit.

Registration Restrictions:
Required Prerequisite: CS 555\(^{B-}\).
\(^{B-}\) Requires minimum grade of B-.

Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the Volgenau School of Engineering college.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale.

CS 756: Performance Analysis of Computer Networks. 3 credits.
Analytical, measurement, and simulation techniques for modeling and analyzing computer networks. Examines elementary queuing analysis; networks of queues; routing and flow controls; and applications to local and wide area networks, Internet, and emerging networking technologies. A large portion of the course is devoted to projects, normally performed in student teams, who apply the techniques presented. Offered by Computer Science. May not be repeated for credit.

Registration Restrictions:
Required Prerequisite: CS 555\(^{B-}\).
\(^{B-}\) Requires minimum grade of B-.

Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the Volgenau School of Engineering college.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale.

CS 773: Real-Time Systems Design and Development. 3 credits.
Real-time systems and principles supporting design and implementation. Emphasizes fundamental results from real-time scheduling theory and relevance to computer system design. Topics include system design issues for real-time applications involving operating systems, communication networks, databases, and multimedia. Offered by Computer Science. May not be repeated for credit.

Registration Restrictions:
Required Prerequisite: CS 571\(^{B-}\).
\(^{B-}\) Requires minimum grade of B-.

Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.
Enrollment limited to students in the Volgenau School of Engineering college.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

**CS 774: Computational Vision.** 3 credits.
Studies recent advances in development of machine vision algorithms and knowledge-based vision systems. Topics include scalespace; Gabor and wavelet processing; distributed and hierarchical processing using neural networks; motion analysis; active, functional, and selective perception; object and target recognition; expert systems; data fusion; and machine learning. Emphasizes system integration in terms of perception, control, action, and adaptation. Presents applications to robotics, intelligent highways, inspection, forensic, and data compression. Offered by Computer Science. May not be repeated for credit.

**Registration Restrictions:**
**Required Prerequisites:** (CS 682B and 686B).
B- Requires minimum grade of B-.

Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the Volgenau School of Engineering college.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

**CS 775: Advanced Pattern Recognition.** 3 credits.
 Covers statistical pattern recognition, neural network, and statistical learning theory approaches. Topics include decision theory and Bayes’ theorem, density (parametric and nonparametric) estimation, linear and nonlinear discriminant analysis, SVM and kernel methods, SRM and model selection, performance evaluation, mixture of experts (AdaBoost), dimensionality reduction, feature selection and extraction, and clustering. Emphasizes experimental design, applications, and performance evaluation. Offered by Computer Science. May not be repeated for credit.

**Registration Restrictions:**
**Required Prerequisite:** CS 688B-.
B- Requires minimum grade of B-.

Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the Volgenau School of Engineering college.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

**CS 777: Human-Computer Intelligent Interaction.** 3 credits.
Current and emerging issues in human-computer intelligent interaction, and human-centered systems and their applications. Topics include video processing, visualization, virtual environments, adaptation and tutoring, image and scene modeling, analysis and synthesis, face and gesture recognition, and speech and natural language processing. Notes: Term project and topical review required. Offered by Computer Science. May not be repeated for credit.

**Registration Restrictions:**
**Required Prerequisites:** (CS 580B- and 551B-) or (CS 682B-).
B- Requires minimum grade of B-.

Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the Volgenau School of Engineering college.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

**CS 779: Topics in Resilient and Secure Computer Systems.** 3 credits.
Covers study of alternate computer security, including how these methods can be combined in a layered defense and factors that affect the selection of the architectures. Reviews recent papers and reports. Offered by Computer Science. May not be repeated for credit.

**Registration Restrictions:**
**Required Prerequisites:** CS 571B or ISA 562B-.
B- Requires minimum grade of B-.

Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the Volgenau School of Engineering college.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

**CS 782: Advanced Machine Learning.** 3 credits.
The course covers recent advances in the field of machine learning. Possible topics include: Learning Theory (PAC, error bounds, VC-dimension); Learning manifolds; Transfer learning; Active learning; Learning with structured data (e.g. graphs); Topic modeling; Learning with text; Graphical Models (Bayesian Networks); Learning HMMs. Topics may change depending on the instructor. Offered by Computer Science. May not be repeated for credit.

**Registration Restrictions:**
**Required Prerequisites:** (CS 681B-, 687B- or 688B-).
B- Requires minimum grade of B-.

Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the Volgenau School of Engineering college.

**Schedule Type:** Lecture
Grading:
This course is graded on the Graduate Regular scale.

CS 787: Decision Guidance Systems. 3 credits.
Decision-guidance systems support an iterative process of giving actionable recommendations to and extracting feedbacks from human decision-makers, with the goal of arriving at the best possible course of action. Focuses on models, languages, algorithms and applications of Decision-Guidance Management Systems, used for fast development of decision-guidance applications. Offered by Computer Science. May not be repeated for credit.

Registration Restrictions:
Required Prerequisites: (INFS 614 B- or CS 550 B-).
B- Requires minimum grade of B-.

Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the Volgenau School of Engineering college.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale.

CS 788: Autonomic Computing. 3 credits.
Studies self-managing, self-optimizing, self-configuring, self-tuning, self-healing, and self-protecting computing systems. This course analyzes many examples of autonomic systems as well as various techniques to design and build such systems. This is a doctoral seminar based on reading and analysis of current papers. Offered by Computer Science. May not be repeated for credit.

Registration Restrictions:
Required Prerequisites: (CS 555 B-, 571 B- or ISA 562 B-).
B- Requires minimum grade of B-.

Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the Volgenau School of Engineering college.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale.

CS 795: Advanced Topics in CS. 3 credits.
Advanced topics not occurring in regular sequence. Notes: May be repeated for credit when subject differs. Satisfies MS breadth requirement only if explicitly stated in syllabus in given section. Only one such course should be used for breadth requirements. Offered by Computer Science. May be repeated within the term.

Specialized Designation: Topic Varies

Recommended Prerequisite: Admission into computer science PhD program.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the Volgenau School of Engineering college.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale.

CS 798: Project Seminar. 3 credits.
Master's degree candidates undertake a project using knowledge gained in MS program. Notes: Topics chosen in consultation with advisor. Meets project or thesis requirement for MS in computer science. Offered by Computer Science. May not be repeated for credit.

Recommended Prerequisite: 18 hours of credit applicable toward the M.S. in computer science.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the Volgenau School of Engineering college.

Schedule Type: Thesis

Grading:
This course is graded on the Graduate Special scale.

CS 799: Thesis. 1-6 credits.
Original or expository work evaluated by committee of three faculty members. Offered by Computer Science. May be repeated within the degree.

Recommended Prerequisite: 18 hours of credit applicable toward the M.S. in Computer Science.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the Volgenau School of Engineering college.

Schedule Type: Thesis

Grading:
This course is graded on the Satisfactory/No Credit scale.

800 Level Courses

CS 800: Computer Science Colloquium. 0 credits.
Students are required to attend colloquia including talks by distinguished speakers, faculty candidates, and Mason faculty. Notes: This course introduces PhD students to research topics in computer science. Offered by Computer Science. May be repeated within the degree for a maximum of 2 credits.

Registration Restrictions:
Enrollment is limited to students with a major in Computer Science.

Enrollment is limited to Graduate level students.
Enrollment limited to students in a Doctor of Philosophy degree.

Enrollment limited to students in the Volgenau School of Engineering college.

**Schedule Type:** Seminar

**Grading:**
This course is graded on the Satisfactory/No Credit scale.

**CS 895:** Research Topics in CS. 3 credits.
Advanced topics not occurring in regular sequence. Notes: May be repeated for credit when subject differs. Only one such course should be used for breadth requirements. Offered by Computer Science. May be repeated within the term.

**Specialized Designation:** Topic Varies

**Recommended Prerequisite:** Doctoral status.

**Registration Restrictions:**
Enrollment is limited to Graduate level students.

Enrollment limited to students in the Volgenau School of Engineering college.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

**CS 896:** Directed Reading and Research. 1-6 credits.
Reading and research on a specific topic under the direction of a faculty member. Notes: Students can sign up for this class only after satisfying the CS PhD breadth requirement. Offered by Computer Science. May be repeated within the degree for a maximum 18 credits.

**Recommended Prerequisite:** Permission of Instructor.

**Registration Restrictions:**
Enrollment limited to students in the VS-PHD-CS program.

Enrollment is limited to Graduate level students.

Enrollment limited to students in a Doctor of Philosophy degree.

Enrollment limited to students in the Volgenau School of Engineering college.

**Schedule Type:** Research

**Grading:**
This course is graded on the Satisfactory/No Credit scale.

**CS 990:** Dissertation Topic Presentation. 0 credits.
Students put together a professional presentation of a research proposal and present it for critique to fellow students and interested faculty. Notes: Must be completed before the presentation of a dissertation research proposal. Offered by Computer Science. May not be repeated for credit. Equivalent to CEIE 990, IT 990, STAT 990.

**Recommended Prerequisite:** Student must have passed the PhD qualifying examinations.

**Registration Restrictions:**
Enrollment is limited to Graduate level students.

Enrollment limited to students in the Volgenau School of Engineering college.

**Schedule Type:** Dissertation

**Grading:**
This course is graded on the Satisfactory/No Credit scale.

**CS 999:** Doctoral Dissertation. 1-12 credits.
Dissertation research under the supervision of the dissertation director. Notes: No more than 24 credits of CS 998 and 999 may be applied to the doctoral degree requirements. Offered by Computer Science. May be repeated within the degree.

**Recommended Prerequisite:** Admission to candidacy.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy.

Enrollment is limited to Graduate level students.

Enrollment limited to students in the Volgenau School of Engineering college.

**Schedule Type:** Dissertation

**Grading:**
This course is graded on the Satisfactory/No Credit scale.

---

**Conflict Analysis and Resolution (CONF)**

**100 Level Courses**

**CONF 101:** Conflict and Our World. 3 credits.
Brief history of field, survey of key conflict resolution themes and theories, and intervention methods. Overview includes general factors of conflict and its resolution; and nature of conflict in interpersonal, group, organizational, and international situations. Offered by Conflict Analysis & Resolution. Limited to three attempts.

**Mason Core:** Social/Behavioral Sciences

**Schedule Type:** Lecture, Recitation
Grading:
This course is graded on the Undergraduate Regular scale.

200 Level Courses

CONF 210: Theories of Conflict Analysis and Resolution. 3 credits.
Students will utilize critical thinking and analytical skills to begin an in-depth examination of the major theories of conflict analysis and resolution. Theories and case studies will include root causes and dynamics of conflict and methods of conflict analysis and resolution. Notes: Required course for all CONF majors (BA and BS) beginning Fall 2011. Offered by Conflict Analysis & Resolution. Limited to three attempts.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale.

CONF 300: Conflict Resolution Techniques and Practice. 3 credits.
Advanced consideration of CONF 101 topics, introduction of core notion of reflective practice, conflict resolution techniques, practice, third party roles, and ethics. Offered by Conflict Analysis & Resolution. Limited to three attempts.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale.

CONF 301: Research and Inquiry in Conflict Resolution. 3 credits.
Introduces social science research methods at undergraduate level. Covers basic epistemology of social research, including quantitative and qualitative methods, emphasizing participatory action research, and evaluation and assessment work. Offered by Conflict Analysis & Resolution. Limited to three attempts.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale.

CONF 302: Culture, Identity, and Conflict. 3 credits.
Covers deeply rooted, intractable, or protracted social conflicts around core issues of identity, including race, ethnicity, religion, and nationalism. Explores cultural, symbolic, and discursive approaches to identity conflict. Offered by Conflict Analysis & Resolution. Limited to three attempts.

Specialized Designation: Writing Intensive in Major

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale.

CONF 310: Special Topics in Practice. 1-3 credits.
Examines selected topics related to practice in the field of conflict analysis and resolution. Topics vary, addressing practical skills and knowledge necessary to conflict resolution practice. Notes: May be repeated if topics vary. Offered by Conflict Analysis & Resolution. May be repeated within the term for a maximum 6 credits.

Specialized Designation: Topic Varies

Schedule Type: Seminar

Grading:
This course is graded on the Undergraduate Regular scale.

CONF 314: Advising Seminar for Conflict Majors. 1 credit.
This course offers students structured time to explore opportunities available in conflict analysis and resolution and discuss issues pertinent to career preparation. Attention is focused on identifying personal strengths, understanding the job search process, and developing the skills and documents to be successful when applying for internships and jobs. Offered by Conflict Analysis & Resolution. Limited to three attempts.

Schedule Type: Seminar

Grading:
This course is graded on the Undergraduate Regular scale.

CONF 320: Interpersonal Conflict Analysis and Resolution. 3 credits.
Considers personal, relational, social and cultural dimensions of interpersonal conflict. Introduces concepts and skills for understanding the causes, patterns, systems and dynamics of difficult issues and situations. Uses readings, case studies, and role plays to develop ability to analyze and intervene in interpersonal conflicts. Offered by Conflict Analysis & Resolution. Limited to three attempts.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale.

CONF 325: Dialogue and Difference. 3 credits.
Covers challenges of communicating across differences of age, gender, language, culture, political orientation, and contextual situations. Students will engage in preparing and analyzing communication strategies in conflict situations and will participate in a dialogue over the term that explores the meaning and experience of difference on the Mason campus. Offered by Conflict Analysis & Resolution. Limited to three attempts.

Schedule Type: Seminar

Grading:
This course is graded on the Undergraduate Regular scale.

CONF 326: Negotiation. 3 credits.
The ability to negotiate and manage conflicts effectively is an essential skill in international, community, organizational and personal settings. Negotiation is the art and science of securing an agreement between two or more independent parties. This course is an introduction to the analysis and practice of negotiation and provides a solid foundation for further inquiry and application. Students will examine research and theories of negotiation, how different cultures influence conflict, frameworks for analyzing negotiation, and the roles of various factors (influences and contexts, tactics and strategies) on the negotiation process and outcome. This course will include a blend of lectures, class discussions, individual and group exercises, simulations and negotiation role plays in class. Offered by Conflict Analysis & Resolution. Limited to three attempts.

Schedule Type: Seminar

Grading:
This course is graded on the Undergraduate Regular scale.

CONF 330: **Community, Group, and Organizational Conflict Analysis and Resolution.** 3 credits.
Covers conflict in communities, groups and organizations. Introduces theories of social harmony and conflict, drawing on sociology, social psychology, community psychology, organizational psychology, administration of justice, philosophy, and conflict resolution. Uses case studies, class presentations, and group projects to develop ability to analyze conflict and make recommendations for change. Offered by Conflict Analysis & Resolution. Limited to three attempts.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale.

CONF 331: **Simulation in Community and Organizational Conflict Resolution.** 1 credit.
Builds on the theories and concepts presented in CONF 330 to focus on the practice of group and community conflict. Through intensive simulations using conflict cases, students will have the opportunity to practice conflict resolution skills such as dialogue, problem solving, mediation and negotiation and gain a practical understanding of third party roles and intervention strategies in community, group, and organizational settings. Offered by Conflict Analysis & Resolution. Limited to three attempts.

**Schedule Type:** Laboratory

**Grading:**
This course is graded on the Undergraduate Regular scale.

CONF 335: **Justice and Reconciliation.** 3 credits.
Explores justice and reconciliation from a conflict perspective. Drawing on approaches in the interdisciplinary fields of sociolegal studies and conflict analysis and resolution, the course considers these and other questions: How does injustice fuel conflict? What role should justice play in guiding conflict prevention and addressing the aftermath of violence? What is reconciliation and how do we know when it has been achieved? Are justice and reconciliation mutually reinforcing processes or does one stand in the way of the other? The first part of the course focuses on foundational concepts and questions understood through domestic US examples, examining topics such as: gender equality and gender violence, migration and integration, discrimination, identity politics, healing communities, and environmental justice. We then broaden our perspective geographically, as we examine justice and reconciliation as responses to mass atrocity. Offered by Conflict Analysis & Resolution. Limited to three attempts.

**Schedule Type:** Seminar

**Grading:**
This course is graded on the Undergraduate Regular scale.

CONF 340: **Global Conflict Analysis and Resolution.** 3 credits.
Covers conflict at macro level, introducing theories of international and global violence and conflict, drawing from disciplines of international relations, political science, intercultural communication, and conflict resolution. Covers impact of globalization and structural causes of conflict. Uses class discussions, case studies, and final paper to develop analytical skills to help in analysis of conflict. Prepares for further course work for international conflict concentration. Offered by Conflict Analysis & Resolution. Limited to three attempts.

**Mason Core:** Global Understanding

CONF 334: **International Field Experience.** 1-6 credits.
Learning experience in the application of conflict analysis and resolution (CAR) skills in special program settings. Provides supervised practice in CAR techniques, leadership, program implementation, and strategies to facilitate conflict resolution in educational institutions or community settings. Offered by Conflict Analysis & Resolution. May be repeated within the term for a maximum 9 credits.

**Schedule Type:** Internship

**Grading:**
This course is graded on the Undergraduate Regular scale.

CONF 341: **Simulation in Global Conflict Resolution.** 1 credit.
Focuses primarily on global conflict resolution practice. Using the methodologies of dialogue, problem-solving, and intensive simulation, students will increase their theoretical and practical understanding of peace making, peace building, and transformation processes within a specific international case. Offered by Conflict Analysis & Resolution. May be repeated within the degree for a maximum 2 credits.

**Schedule Type:** Laboratory

**Grading:**
This course is graded on the Undergraduate Regular scale.

CONF 345: **Social Dynamics of Terrorism, Security, and Justice.** 3 credits.
Presents students with analytical frameworks to account for terrorist acts and organizations and explore social dynamics underlying the development of, and response to, terrorism. Topics may include recruitment into violent groups, counterterrorism and human rights concerns, role of religious and political ideologies in terrorism and counterterrorism, media coverage of terrorism, and effects of terrorism on social structures and processes. Offered by Conflict Analysis & Resolution. Limited to three attempts.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale.

CONF 347: **Internship Field Experience.** 1-9 credits.
Internships will provide an opportunity for students to gain practical experience, reflect on those experiences, and apply academic theories outside of the normal classroom environment. Students will apply academic theories learned in the classroom to situations that arise in the work environment. Students must obtain approval and complete an internship proposal application in order to be registered for the course. Notes: Course does not have a regular meeting time; students submit work via blog and e-mail, some meetings with instructor. Offered by Conflict Analysis & Resolution. May be repeated within the degree for a maximum 9 credits.

**Schedule Type:** Fieldwork

**Grading:**
This course is graded on the Undergraduate Regular scale.

CONF 375: **Special Programs Field Experience.** 1-6 credits.
Learning experience in the application of conflict analysis and resolution (CAR) skills in special program settings. Provides supervised practice in CAR techniques, leadership, program implementation, and strategies to facilitate conflict resolution in educational institutions or community settings. Offered by Conflict Analysis & Resolution. May be repeated within the term for a maximum 9 credits.

**Schedule Type:** Fieldwork

**Grading:**
This course is graded on the Undergraduate Regular scale.

CONF 385: **International Field Experience.** 3 credits.
Investigates conflict theory through international field experience including participation in formally organized courses offered by Global
Education Office or another form of international field experience approved by program director. Offered by Conflict Analysis & Resolution. May be repeated within the degree for a maximum 6 credits.

Recommended Prerequisite: CONF 101 and permission of advisor.

Schedule Type: Seminar

Grading:
This course is graded on the Undergraduate Regular scale.

CONF 386: Context and Synthesis: Study Abroad. 1 credit.
Investigates conflict theory through cross cultural experience which includes participation in formally organized semester abroad programs offered by the Global Education Office or another form of international field experience approved by the program director. Offered by Conflict Analysis & Resolution. May be repeated within the degree for a maximum 2 credits.

Schedule Type: Independent Study

Grading:
This course is graded on the Undergraduate Regular scale.

CONF 392: Youth and Conflict. 3 credits.
Explores aspects of youth and conflict in terms of context and dynamics at the local, regional, and global levels, as well as interactions with violence and peace. Youth is more than a distinct life phase or political category; this course challenges the boundaries of how we understand the considerations and constraints of the transition to adulthood. Objectives of the course are: to develop a better understanding of the generational and gendered dynamics of conflict and peace; to situate youth contextually, socially, culturally, economically, and politically, to explore impacts of gender, age, and context upon youth individually as well as within constituent groups; to incorporate youth into theoretical and practical maps of conflict analysis and resolution. Offered by Conflict Analysis & Resolution. Limited to three attempts.

Schedule Type: Seminar

Grading:
This course is graded on the Undergraduate Regular scale.

CONF 392: Violence: Causes, Dynamics & Alternatives. 3 credits.
Examines causes, sources, and origins of group violence with particular attention to group violence and ethnic conflict. Explores alternative proposals that explain why violence becomes a primary, or at least a viable, form of resolving conflict in some societies. Offered by Conflict Analysis & Resolution. Limited to three attempts.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale.

CONF 394: Human Rights and Inequality. 3 credits.
Examines inequality, social justice, and human rights in an age of globalization. Topics may include international law and order, welfare-and social policy, regionalism and multilateralism, environmental protection, gender equality, terrorist and transnational criminal networks, human trafficking, modern slavery, world poverty, corporate military firms, governance of global financial institutions, security, and transnational social movements. Offered by Conflict Analysis & Resolution. Limited to three attempts.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale.

CONF 397: Study Abroad Special Topics. 1-9 credits.
Transfer credit for relevant coursework taken during direct exchange study abroad trips. Offered by Conflict Analysis & Resolution. May be repeated within the term for a maximum 12 credits.

Specialized Designation: Topic Varies

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale.

CONF 398: Special Topics in Advanced Techniques and Practices. 3 credits.
Examines selected topics relating to conflict resolution techniques and practices. Topics vary but may include mediation, negotiation, reflective practice, and facilitation. Notes: May be repeated if topics vary. Offered by Conflict Analysis & Resolution. May be repeated within the term for a maximum 9 credits.

Specialized Designation: Topic Varies

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale.

CONF 399: Special Topics in Conflict Analysis and Resolution. 3 credits.
Examines selected topics relating to analysis or resolution of conflict. Topics vary but may include historical examination of conflict, social issues stemming from conflict, ethical issues in intervention, globalization, human rights, sources of conflict, or relationship of particular identity domains to conflict. Notes: May be repeated if topics vary. Offered by Conflict Analysis & Resolution. May be repeated within the term for a maximum 9 credits.

Specialized Designation: Topic Varies

Schedule Type: Lecture Varies

Grading:
This course is graded on the Undergraduate Regular scale.

400 Level Courses

CONF 425: Mediating Conflict. 3 credits.
A skill development course connecting conflict resolution theory and practice to the mediation process through lectures, discussion, self-reflection, experiential learning, and role-plays. This course has been approved to meet the 20-hour basic education requirements for mediation certification by the Judicial Council of Virginia and the Office of the Executive Secretary, Supreme Court of Virginia. Offered by Conflict Analysis & Resolution. Limited to three attempts.

Schedule Type: Seminar

Grading:
This course is graded on the Undergraduate Regular scale.

CONF 435: Building Peace in Divided Societies. 3 credits.
A major challenge to peacebuilding efforts domestically and globally are the boundaries that communities believe separates themselves from others. The boundaries have ethnic, racial, religious or cultural roots,
often with long histories of division and violence. This class will examine case studies and strategies from around the globe of peacebuilding in complex communities. Offered by Conflict Analysis & Resolution. Limited to three attempts.

**Schedule Type:** Seminar

**Grading:**
This course is graded on the Undergraduate Regular scale.

**CONF 490:** *RS: Integration*. 3 credits.
Capstone course in which students reflect on what they have learned, integrating knowledge from course work and synthesizing it to a cogent body of knowledge. Includes class discussion and final project that demonstrates understanding of conflict theory and reflective practice. Offered by Conflict Analysis & Resolution. Limited to three attempts.

**Mason Core:** Synthesis

**Specialized Designation:** Research/Scholarship Intensive

**Registration Restrictions:**
Required Prerequisite: CONF 301C. Requires minimum grade of C.

**Schedule Type:** Seminar

**Grading:**
This course is graded on the Undergraduate Regular scale.

**CONF 499:** *Independent Research in Conflict Analysis and Resolution*. 1-6 credits.
Readings and research conducted on individual basis in consultation with instructor. Notes: Student may not present more than 3 credits for graduation credit. Offered by Conflict Analysis & Resolution. May be repeated within the degree for a maximum 6 credits.

**Schedule Type:** Independent Study

**Grading:**
This course is graded on the Undergraduate Regular scale.

**500 Level Courses**

**CONF 500:** *Frameworks for Ethical Dispute Resolution Practice*. 3 credits.
Prepares Dispute Resolution students to play innovative and creative roles where dispute resolution is required. This foundational course looks at dispute resolution in the context of larger systems and structures and promotes a practice of dispute resolution with a lens toward increasing social justice. Students will encounter different tools and theories to support effective conflict assessment and work with intervention design principles used in the range of dispute resolution modalities. Building skills as reflective practitioners, students will develop a balance between process and ethical considerations. Offered by Conflict Analysis & Resolution. May not be repeated for credit.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the Conflict Analysis Resolution or Health and Human Services colleges.

**Schedule Type:** Seminar

**Grading:**
This course is graded on the Graduate Regular scale.

**CONF 501:** *Introduction to Conflict Analysis and Resolution*. 3 credits.
Introduces field of conflict analysis and resolution. Examines definitions of conflict and diverse views of its “resolution.” Explores thinking about human behavior, and social systems as they relate to origins of conflict and role of conflict in violent and peaceful social change. Considers appropriate responses to conflict at interpersonal, intergroup, industrial, communal, and international levels. Offered by Conflict Analysis & Resolution. May not be repeated for credit.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the Coll Nursing Health Science, Conflict Analysis Resolution or Health and Human Services colleges.

**Schedule Type:** Seminar

**Grading:**
This course is graded on the Graduate Regular scale.

**600 Level Courses**

**CONF 600:** *Foundations of Conflict Analysis and Resolution*. 6 credits.
This course offers an integration of theory, research and practice to investigate the inner workings of our field. It includes conflict theories, models and modes of practice that function as the grounding to subsequent courses in the curriculum, and exploration of some of the key contemporary debates. The course includes opportunities for linking theory to practice with experimental learning activities. Offered by Conflict Analysis & Resolution. May not be repeated for credit.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the Conflict Analysis Resolution or Health and Human Services colleges.

**Schedule Type:** Seminar

**Grading:**
This course is graded on the Graduate Regular scale.

**CONF 605:** *Foundations of Peacebuilding*. 6 credits.
This foundational course, building on initiatives of the United Nations and other multilateral organizations, explores dynamics of post-conflict peace building and prepares students to play innovative roles in peacebuilding and reconstruction of civil societies. The course introduces the theory, research and practice of peacebuilding programming with a focus on ethical, conflict-sensitive and inclusive process design and implementation. The course investigates the historical arc of peacebuilding practice and current implementation strategies; and examines peacebuilding theories, models and modes of practice that function as the grounding to subsequent courses in the curriculum, and explores of some of the key contemporary debates in the field.
The course includes opportunities for linking theory to practice with experimental learning activities. Offered by Conflict Analysis & Resolution. May not be repeated for credit.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the Conflict Analysis Resolution college.

**Schedule Type:** Seminar

**Grading:**
This course is graded on the Graduate Regular scale.

CONF 610: Conflict Inquiry. 3 credits.
Introduces students to the philosophies behind social science research and the methods for conducting research in the field of conflict resolution. Focuses on the identification of research problems associated with particular conflict situations, selection of appropriate research methods, and the design of effective research projects. Offered by Conflict Analysis & Resolution. May not be repeated for credit.

**Recommended Prerequisite:** CONF 600.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate or Senior Plus.

Enrollment is limited to Graduate or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the Coll Nursing Health Science, Conflict Analysis Resolution or Health and Human Services colleges.

**Schedule Type:** Seminar

**Grading:**
This course is graded on the Graduate Regular scale.

CONF 620: Reflective Practice in Interpersonal-Multiparty Conflicts. 3 credits.
Introductory skill-building course integrating conflict theory and practice using reflective practitioner model. Students learn necessary skills for third-party facilitation and mediation, including active listening, empathy, paraphrasing, reframing, and negotiation, in addition to analytical skills of problem solving and creation of transformational processes. Cases for practice focus on interpersonal and intergroup conflict. Offered by Conflict Analysis & Resolution. May not be repeated for credit.

**Recommended Prerequisite:** CONF 501, 600, or 801

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the Conflict Analysis Resolution or Health and Human Services colleges.

**Schedule Type:** Seminar

**Grading:**
This course is graded on the Graduate Regular scale.

CONF 625: Engaging Conflict. 3 credits.
This course will provide students an experiential opportunity to consider the relationship between social science theories and conflict analysis and resolution work; and engagement in a variety of forms with real world conflict. Each course will provide students the opportunity to engage in research and practice activities, choosing the appropriate modalities for the conflict they are engaging with. Offered by Conflict Analysis & Resolution. May be repeated within the term for a maximum 12 credits.

**Specialized Designation:** Topic Varies

**Recommended Prerequisite:** CONF 600.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the Conflict Analysis Resolution or Health and Human Services colleges.

**Schedule Type:** Fieldwork

**Grading:**
This course is graded on the Graduate Regular scale.

CONF 631: Mediation in Diverse Settings. 3 credits.
A skill development course connecting dispute resolution theory and practice to the mediation process through lectures, discussion, self-reflection, experiential learning, and role-plays. Along with consideration of foundational principles of mediation practice, the course covers a range of mediation traditions, including: facilitative mediation, evaluative mediation, transformative mediation, narrative mediation, etc. Along with understanding the mediation process, students will explore the impact on mediation of culture, power, race, gender and other contextual factors that challenge contemporary mediators. Offered by Conflict Analysis & Resolution. May not be repeated for credit.

**Recommended Prerequisite:** CONF 500, 501, 600, 801

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the Conflict Analysis Resolution or Health and Human Services colleges.

**Schedule Type:** Seminar

**Grading:**
This course is graded on the Graduate Regular scale.

CONF 632: Coaching through Conflict. 3 credits.
Participants will learn the theory and value of professional coaching. They will review and practice several models of conflict coaching. Each student will evaluate their peers and receive feedback on their coaching.
The class will examine conflict styles and address these styles through coaching. The participants will understand the larger field of coaching. Each student will design a template for group coaching. And the students will learn the competencies, markers, and ethics related to professional coaching. Offered by Conflict Analysis & Resolution. May not be repeated for credit.

**Recommended Prerequisite:** CONF 500, 501, 600, 801

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the Conflict Analysis Resolution or Health and Human Services colleges.

**Schedule Type:** Seminar

**Grading:**
This course is graded on the Graduate Regular scale.

**CONF 640:** Practicum in Contemporary Dispute Resolution. 3 credits.
Capstone course facilitating integration of learning in the graduate certificate in dispute resolution and appropriate mentored application and experiential learning. Offered by Conflict Analysis & Resolution. May not be repeated for credit.

**Recommended Prerequisite:** CONF 500

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the Conflict Analysis Resolution college.

**Schedule Type:** Seminar

**Grading:**
This course is graded on the Graduate Regular scale.

**CONF 650:** Conflict Analysis and Resolution Advanced Skills. 3 credits.
Introduces innovative practices and provides structure to reflect on and improve ability to work within conflict settings. Considers the intersection of theory and practice, with special attention to the challenges of translation, adaptation, and transfer of skills and models. Offered by Conflict Analysis & Resolution. May not be repeated for credit.

**Recommended Prerequisite:** CONF 501, CONF 600 or CONF 801

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.
CONF 653: World Religions, Diplomacy, and Conflict Resolution. 3 credits. Analyzes ways world religions play role in conflicts, war, diplomacy, peacemaking, and conflict resolution. Offered by Conflict Analysis & Resolution. May not be repeated for credit.

Recommended Prerequisite: CONF 501, CONF 600, or CONF 801

Registration Restrictions: Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the Conflict Analysis Resolution or Health and Human Services colleges.

Schedule Type: Seminar

Grading: This course is graded on the Graduate Regular scale.

CONF 654: Mass Atrocity: Early Warning and Prevention. 3 credits. This course provides students with scholarly, practical, and relevant knowledge of Genocide and Atrocity Prevention. Students will analyze genocide and mass-atrocities as part of a spectrum of violence and conflict, and gain expertise in prevention mechanisms, including: early warning indicators, early prevention strategies, diplomacy, international justice, legal infrastructures, negotiation, mediation, humanitarian relief and intervention, civilian protection, and civil society-based solutions. Offered by Conflict Analysis & Resolution. May not be repeated for credit.

Recommended Corequisite: CONF 501 or 502. Concurrent enrollment is not permitted.

Registration Restrictions: Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Seminar

Grading: This course is graded on the Graduate Regular scale.

CONF 657: Facilitation Skills. 3 credits. Covers range of skills in group facilitation processes, with emphasis on conflict analysis and resolution approaches to improve group communication. Includes skill-building exercises. Offered by Conflict Analysis & Resolution. May not be repeated for credit.

Recommended Prerequisite: CONF 501, CONF 600, or CONF 801

Registration Restrictions: Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the Coll Nursing Health Science or Conflict Analysis Resolution colleges.

Schedule Type: Seminar

Grading: This course is graded on the Graduate Regular scale.

CONF 658: Diversity and Difference in Conflict Analysis and Resolution. 3 credits. Covers elements of cultural diversity, understanding, and awareness, as well as creative ways of approaching issues of diversity, identity, worldviews, and territory. Considers individuals, organizations, communities and nations. Offered by Conflict Analysis & Resolution. May not be repeated for credit.

Recommended Prerequisite: CONF 501, CONF 600, or CONF 801

Registration Restrictions: Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the Conflict Analysis Resolution or Health and Human Services colleges.

Schedule Type: Seminar

Grading: This course is graded on the Graduate Regular scale.

CONF 659: Leadership in Conflict Analysis and Resolution. 3 credits. Covers roles and styles of leadership in interpersonal, organizational, community, group, and international conflicts. Considers cultural roles of leaders as insider-partials, negotiators, facilitators, and mediators. Offered by Conflict Analysis & Resolution. May not be repeated for credit.

Recommended Prerequisite: CONF 501, CONF 600, or CONF 801

Registration Restrictions: Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the Conflict Analysis Resolution or Health and Human Services colleges.

Schedule Type: Seminar

Grading: This course is graded on the Graduate Regular scale.

CONF 660: Conflict Assessment and Program Evaluation. 3 credits. Covers assessment methods appropriate to conflict contexts and related evaluation approaches and techniques for use in areas of peace building, community processes, or interpersonal conflict. Offered by Conflict Analysis & Resolution. May not be repeated for credit.

Recommended Prerequisite: CONF 501 or 502. Concurrent enrollment is also permitted.

Registration Restrictions:
CONF 605: Special Topics in Conflict Analysis and Resolution. 3 credits.
In-depth study of contemporary areas of conflict resolution practice.
Notes: Fulfills elective requirement for certificate program. Topics vary. Offered by Conflict Analysis & Resolution. May be repeated within the degree for a maximum 6 credits.

**Recommended Prerequisite:** CONF 501 or CONF 600.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Students in a Non-Degree Undergraduate degree may **not** enroll.

Enrollment limited to students in the Conflict Analysis Resolution college.

**Schedule Type:** Seminar

**Grading:**
This course is graded on the Graduate Regular scale.

**CONF 665:** Applied Integration for Graduate Certificates. 3 credits.
Capstone course facilitating integration of learning in the graduate certificate programs and appropriate mentored application and experiential learning. Offered by Conflict Analysis & Resolution. May not be repeated for credit.

**Recommended Prerequisite:** CONF 501; CONF 660; and CONF 650, 651, 652, or 653.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Students in a Non-Degree Undergraduate degree may **not** enroll.

Enrollment limited to students in the Coll Nursing Health Science or Conflict Analysis Resolution colleges.

**Schedule Type:** Seminar

**Grading:**
This course is graded on the Graduate Regular scale.

**CONF 666: Funding and Managing Peacebuilding Programming.** 3 credits.
This course delves into the practical fundraising and implementation challenges of peacebuilding programming. The course focuses on building philanthropic support, identifying funding sources, grant writing, donor/funder management best practices, budgeting, and financial reporting for peacebuilding projects and programming. Offered by Conflict Analysis & Resolution. May not be repeated for credit.

**Recommended Prerequisite:** CONF 605

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Students in a Non-Degree Undergraduate degree may **not** enroll.

Enrollment limited to students in the Conflict Analysis Resolution college.

**Schedule Type:** Seminar

**Grading:**
This course is graded on the Graduate Regular scale.

**CONF 667: Conflict Sensitive and Inclusive Peacebuilding.** 3 credits.
Humanitarian, development and peacebuilding organizations and funders are increasingly concerned with designing and implementing projects that do not exacerbate conflict dynamics by using conflict sensitive, inclusive and ethical approaches. This course prepares students to develop and implement conflict-sensitive and inclusive programming by applying in-depth knowledge of conflict dynamics; understanding the interactions between interventions and the conflict context; ensuring that the interventions minimize potential negative impacts; adjusting programming to changing conflict dynamics; and increasing capacities of communities to adapt to change, become more resilient and reduce the likelihood of relapsing into violence. Offered by Conflict Analysis & Resolution. May not be repeated for credit.
Recommended Prerequisite: CONF 605

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the Conflict Analysis Resolution college.

Schedule Type: Seminar

Grading:
This course is graded on the Graduate Regular scale.

CONF 675: Peacebuilding Capstone. 3 credits.
This course is taken in conjunction with MA in Peacebuilding internship course. It is a structured opportunity for students to reflect on and learn from their real-world engagements in peacebuilding work. Students integrate peacebuilding theory and practice content together with their on the ground experience for final reflection and capstone project writing assignment. The course also explores and prepares students for the most effective ways of developing and pursuing career opportunities in the peacebuilding field. Offered by Conflict Analysis & Resolution. May not be repeated for credit.

Recommended Prerequisite: CONF 605, CONF 660, CONF 661, CONF 662, CONF 670

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the Conflict Analysis Resolution college.

Schedule Type: Seminar

Grading:
This course is graded on the Graduate Regular scale.

CONF 682: Principles of Environmental Conflict Resolution. 3 credits.
Explores the nature and characteristics of environmental conflict and efforts to manage, resolve or transform it. Students will develop a capacity to assess the strengths and weaknesses of environmental conflict resolution processes while learning about best practices for preventing, preparing for, and addressing environmental conflict. Offered by Conflict Analysis & Resolution. May not be repeated for credit. Equivalent to EVPP 682.

Recommended Prerequisite: CONF 501, CONF 600, or CONF 801

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree, Undergraduate or Washington Consortium level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the Conflict Analysis Resolution or Health and Human Services colleges.

Schedule Type: Seminar

Grading:
This course is graded on the Graduate Special scale.

CONF 683: Environmental Conflict Resolution: Situation Assessment, Process Design and Best Practices. 3 credits.
Explores best practices for managing, resolving, and transforming environmental conflict using environmental conflict resolution (ECR) processes. Nature and dynamics of environmental disputes, methods for assessing conflict situations, and methods for conducting various forms of ECR processes will be covered in the context of selected case studies with emphasis on student involvement. Offered by Conflict Analysis & Resolution. May not be repeated for credit. Equivalent to EVPP 683.

Specialized Designation: Green Leaf Related Course

Recommended Prerequisite: One of CONF 501, CONF 600, CONF 682 or EVPP 682

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the Conflict Analysis Resolution or Health and Human Services colleges.

Schedule Type: Seminar

Grading:
This course is graded on the Graduate Regular scale.

CONF 694: Internship. 1-6 credits.
Students are expected to mesh theory and practice through observation and experience. Includes comprehensive report analyzing experiences. For 3 credits of internship students must complete 160 hours of work on site. Students must receive permission of the Internship Coordinator prior to registering. Notes: Under direction of internship coordinator, students spend at least 160 hours on project involving study, resolution of conflict for each 3-credit internship. Offered by Conflict Analysis & Resolution. May be repeated within the term for a maximum 9 credits.

Recommended Prerequisite: 21 credits, including CONF 657.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate or Senior Plus.

Enrollment is limited to Graduate or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the Coll Nursing Health Science, Conflict Analysis Resolution or Health and Human Services colleges.

Schedule Type: Internship

Grading:
This course is graded on the Graduate Special scale.
CONF 695: Selected Topics. 3 credits.
Topics vary; announced each academic year. Offered by Conflict Analysis & Resolution. May be repeated within the term for a maximum 12 credits.

Specialized Designation: Topic Varies

Recommended Prerequisite: CONF 501, CONF 600 or CONF 801

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the Coll Nursing Health Science, Conflict Analysis Resolution or Health and Human Services colleges.

Schedule Type: Seminar

Grading:
This course is graded on the Graduate Regular scale.

CONF 697: Directed Readings and Research. 1-6 credits. Independent reading at master's level on specific topic related to conflict analysis and resolution, as agreed to by student and faculty member. Offered by Conflict Analysis & Resolution. May be repeated within the term for a maximum 6 credits.

Specialized Designation: Topic Varies

Recommended Prerequisite: CONF 501 or CONF 600

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the Coll Nursing Health Science, Conflict Analysis Resolution or Health and Human Services colleges.

Schedule Type: Research

Grading:
This course is graded on the Graduate Regular scale.

700 Level Courses

CONF 702: Peace Studies. 3 credits.
Examines diverse meanings of peace, conflict, and violence, and then reviews different issues relevant to understanding peace and conflict, including the sources of war, poverty and economic disparities, and ecological degradation. Other topics to be covered are peace keeping, peace building, sustainable development, ecological preservation, nonviolence, and peace movements. Offered by Conflict Analysis & Resolution. May not be repeated for credit.

Specialized Designation: Green Leaf Focused Course

Recommended Prerequisite: CONF 501, CONF 600 or CONF 801.

Registration Restrictions:

Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the Coll Nursing Health Science, Conflict Analysis Resolution or Health and Human Services colleges.

Schedule Type: Seminar

Grading:
This course is graded on the Graduate Regular scale.

CONF 704: Narrative Approaches to Conflict Analysis. 3 credits. This course provides participants with the analytic tools needed to conduct their own research on conflict and conflict resolution, using a narrative perspective. This course enables students to a) review the key narrative research in the field of conflict resolution; b) design a narrative analysis of conflict; c) conduct a narrative analysis of conflicts. Offered by Conflict Analysis & Resolution. May not be repeated for credit.

Recommended Corequisite: CONF 501, CONF 600, or CONF 801.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the Conflict Analysis Resolution college.

Schedule Type: Seminar

Grading:
This course is graded on the Graduate Regular scale.

CONF 705: Conflict and Discourse Analysis. 3 credits. The study of discourse, culture, narratives and public interpretations are becoming ever more important to the field of Conflict Analysis and Resolution. In this class we explore these concepts as they have been used in cutting edge approaches to the analysis and resolution of conflict. Offered by Conflict Analysis & Resolution. May not be repeated for credit.

Recommended Prerequisite: CONF 501, CONF 600, or CONF 801

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the Conflict Analysis Resolution college.

Schedule Type: Seminar

Grading:
This course is graded on the Graduate Regular scale.

CONF 706: Ethics and Conflict. 3 credits. Students explore issues and controversies in our field about what is just and unjust, morally right and wrong, and good and bad. Such issues are relevant to analysis and practice before, during, after the occurrence of conflict; the major topics include: validity of pacifism, the notions of a just war, the challenges of genocide prevention, non-violent resistance, humanitarian interventions, and human rights activism. Offered by Conflict Analysis & Resolution. May not be repeated for credit.

Recommended Prerequisite: CONF 501, CONF 600, or CONF 801.
This course is graded on the Graduate Regular scale.

**CONF 707: Gender and Violence.** 3 credits.
This course will address gendered dimensions of violent conflict and its transformation. Key themes to be explored include gender and post-conflict justice and reconciliation; the gendered politics of memory, speech and representation; militarism and masculinity; sexual violence and discourses of trauma, victimization and agency; and the ethics and politics of analytic and practice approaches. Case studies will include the partition of India/Pakistan; wartime sexual assault in Bosnia/the DRC; and domestic violence in the U.S. and South Asia. Offered by Conflict Analysis & Resolution. May not be repeated for credit.

**Recommended Prerequisite:** CONF 501, CONF 600, or CONF 801.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the Conflict Analysis Resolution or Health and Human Services colleges.

**Schedule Type:** Seminar

**Grading:**
This course is graded on the Graduate Regular scale.

**CONF 708: Identity and Conflict.** 3 credits.
Explores complex interrelations of social identity and postmodern conflicts in society. Emphasizes the role of identity in processes of conflict resolution and transformation. Critical rethinking of ethnic, national, and religious identities as both generators and outcomes of conflict are an important part of the course. Extends knowledge on structure and dynamics of identity-based conflicts and develops a framework for their resolution. Course includes lectures, simulations, and case studies. Offered by Conflict Analysis & Resolution. May not be repeated for credit.

**Recommended Prerequisite:** CONF 501, CONF 600, or CONF 801.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the Conflict Analysis Resolution or Health and Human Services colleges.

**Schedule Type:** Seminar

**Grading:**
This course is graded on the Graduate Regular scale.

**CONF 720: Ethnic and Cultural Factors in Conflict Resolution.** 3 credits.
Examines the role culture plays in genesis, structuring, and resolution of processes of conflict within and between groups. Special attention to ethnicity and other subcultural markers of identity in complex social systems as generators and outcomes of conflict. Explores relevance of variables to success or failure of conflict resolution. Offered by Conflict Analysis & Resolution. May not be repeated for credit.

**Recommended Prerequisite:** CONF 501, CONF 600, or CONF 801.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the Conflict Analysis Resolution or Health and Human Services colleges.

**Schedule Type:** Seminar

**Grading:**
This course is graded on the Graduate Regular scale.

**CONF 721: Conflict and Race.** 3 credits.
Addresses historic analyses of racial and ethnic identity conflicts and their resolution. Offered by Conflict Analysis & Resolution. May not be repeated for credit.

**Recommended Prerequisite:** CONF 501, CONF 600, or CONF 801.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the Conflict Analysis Resolution or Health and Human Services colleges.

**Schedule Type:** Seminar

**Grading:**
This course is graded on the Graduate Regular scale.

**CONF 722: Conflict and Religion.** 3 credits.
Explores role of religious ideas, practices, and organizations in conflict, war, peace making, and conflict resolution. Offered by Conflict Analysis & Resolution. May not be repeated for credit.

**Recommended Prerequisite:** CONF 501, CONF 600, or CONF 801.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the Conflict Analysis Resolution or Health and Human Services colleges.

**Schedule Type:** Seminar

**Grading:**
This course is graded on the Graduate Regular scale.

**CONF 723: Conflict and Gender.** 3 credits.
Examines constructs of gender and conflict as they relate to critical analysis of theory and practice. Reviews feminist theories for contributions to social and conflict theories. Uses narratives to explore how gender, power dynamics interact in conflict. Offered by Conflict Analysis & Resolution. May not be repeated for credit.
Recommended Prerequisite: CONF 501, CONF 600, or CONF 801.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the Coll Nursing Health Science, Conflict Analysis Resolution or Health and Human Services colleges.

Schedule Type: Seminar

Grading:
This course is graded on the Graduate Regular scale.

CONF 725: Conflict and Spirituality. 3 credits.
Explores the relationship of spirituality to the dynamics of conflicts and conflict resolution. Offered by Conflict Analysis & Resolution. May not be repeated for credit.

Recommended Prerequisite: CONF 501, CONF 600, or CONF 801.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the Coll Nursing Health Science, Conflict Analysis Resolution or Health and Human Services colleges.

Schedule Type: Seminar

Grading:
This course is graded on the Graduate Regular scale.

CONF 726: Moral and Philosophical Foundations of Conflict. 3 credits.
Explores major historical and contemporary positions on the intellectual, moral, and religious foundations for analyzing and resolving conflict. Enhances critical abilities in metacritique, dialectics, and intellectual self-appropriation. Offered by Conflict Analysis & Resolution. May not be repeated for credit.

Recommended Prerequisite: CONF 501, CONF 600, or CONF 801.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the Coll Nursing Health Science, Conflict Analysis Resolution or Health and Human Services colleges.

Schedule Type: Seminar

Grading:
This course is graded on the Graduate Regular scale.

CONF 727: Ethnographic Methods for Conflict Analysis and Resolution. 3 credits.
Looks at how ethnographic tools can be used for conflict analysis. Offered by Conflict Analysis & Resolution. May not be repeated for credit.

Recommended Prerequisite: CONF 501, CONF 600, or CONF 801.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the Coll Nursing Health Science, Conflict Analysis Resolution or Health and Human Services colleges.

Schedule Type: Seminar

Grading:
This course is graded on the Graduate Regular scale.

CONF 728: Human Rights Theory and Practice in Comparative Perspective. 3 credits.
Introduces major controversies and debates surrounding use of human rights theory and practice cross-culturally. After basic study of human rights philosophy, uses case studies from around the world to examine problems and potential of human rights in today's globalized world. Offered by Conflict Analysis & Resolution. May not be repeated for credit.

Recommended Prerequisite: CONF 501, CONF 600, or CONF 801.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the Coll Nursing Health Science, Conflict Analysis Resolution or Health and Human Services colleges.

Schedule Type: Seminar

Grading:
This course is graded on the Graduate Regular scale.

CONF 730: Structural Sources of Conflict. 3 credits.
Examines how structures and institutions affect behavior and give rise to conflictual relationships at all social levels, from interpersonal to the international. Explores role of conflict resolution as political process providing opportunities for nonviolent system change. Offered by Conflict Analysis & Resolution. May not be repeated for credit.

Recommended Prerequisite: CONF 501, CONF 600, or CONF 801.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the Coll Nursing Health Science, Conflict Analysis Resolution or Health and Human Services colleges.

Schedule Type: Seminar

Grading:
This course is graded on the Graduate Regular scale.

CONF 731: Conflict in Organizations. 3 credits.
Explores intersection and dynamics of organizational behavior and dimensions of conflict. Involves theoretical perspectives and cases examining conflict analysis and resolution. Practices strategies for prevention and intervention. Field research in greater metropolitan area integrates course content. Offered by Conflict Analysis & Resolution. May not be repeated for credit.

Recommended Prerequisite: CONF 501, CONF 600, or CONF 801.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the Coll Nursing Health Science, Conflict Analysis Resolution or Health and Human Services colleges.

**Schedule Type:** Seminar

**Grading:**
This course is graded on the Graduate Regular scale.

**CONF 732:** *Conflict in Development.* 3 credits.
Examines the relationship between processes of political and economic change and conflict; the relationship between democratization and conflict; the relationship between structural adjustment policies and conflict; and the challenges of postconflict reconstruction. Offered by Conflict Analysis & Resolution. May not be repeated for credit.

**Recommended Prerequisite:** CONF 501, CONF 600, or CONF 801.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Enrollment limited to students in the Coll Nursing Health Science, Conflict Analysis Resolution or Health and Human Services colleges.

**Schedule Type:** Seminar

**Grading:**
This course is graded on the Graduate Regular scale.

**CONF 733:** *Law and Justice from a Conflict Perspective.* 3 credits.
Contrasts legal processes and institutions with alternative approaches to dispute resolution. Defines and distinguishes among legal, "alternative dispute resolution," and problem-solving analysis as methods for resolving rather than controlling conflict. Examines to what extent legal procedures are truly applicable to resolving deep-rooted conflict. Offered by Conflict Analysis & Resolution. May not be repeated for credit.

**Recommended Prerequisite:** CONF 501, CONF 600, or CONF 801.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the Coll Nursing Health Science, Conflict Analysis Resolution or Health and Human Services colleges.

**Schedule Type:** Seminar

**Grading:**
This course is graded on the Graduate Regular scale.

**CONF 736:** *Globalization and International Conflict.* 3 credits.
Explores economic, political, social, and cultural meanings of globalization; how they affect conflict processes at international level; and when and under what conditions globalization promotes cooperation or conflict. Offered by Conflict Analysis & Resolution. May not be repeated for credit.

**Recommended Prerequisite:** CONF 501, CONF 600, or CONF 801.

**Registration Restrictions:**
also new research on the political economy of civil war, organizational characteristics of insurgent movements, how rebels and civilians interact during wartime, and how transnational processes shape civil wars. A better understanding of these structures and dynamics is essential to better peacebuilding in the context of internal conflicts. Offered by Conflict Analysis & Resolution. May not be repeated for credit.

**Recommended Prerequisite:** CONF 501, CONF 600, or CONF 801.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the Conflict Analysis Resolution or Health and Human Services colleges.

**Schedule Type:** Seminar

**Grading:**
This course is graded on the Graduate Regular scale.

**CONF 752: Dynamics of Post-War Peacebuilding.** 3 credits.
This seminar examines the processes of war termination and comparative peace processes; components and dynamics of peacebuilding and the relationships among peacebuilding, democratization, and state-building; roles of third parties in promoting negotiations, peace implementation and sustainable peacebuilding, reconciliation and reconstruction. Offered by Conflict Analysis & Resolution. May not be repeated for credit.

**Recommended Prerequisite:** CONF 501, CONF 600, or CONF 801. CONF 751 recommended.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the Conflict Analysis Resolution or Health and Human Services colleges.

**Schedule Type:** Seminar

**Grading:**
This course is graded on the Graduate Regular scale.

**CONF 754: Micro-theories of Conflict.** 3 credits.
The goal of this course is to explore theoretical approaches to psychological processes, personality, in-group and intergroup dynamics, and social processes in the society as a whole with the emphasis on their role in the processes of conflict resolution and transformation. Critical understanding of psychological and socio-psychological phenomena as both generators and outcomes of conflict will be an important part of the course. This course has three main parts: psychological processes, approaches to person, and group processes and society. Offered by Conflict Analysis & Resolution. May not be repeated for credit.

**Recommended Prerequisite:** CONF 501, CONF 600, or CONF 801.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the Conflict Analysis Resolution or Health and Human Services colleges.

**Schedule Type:** Seminar

**Grading:**
This course is graded on the Graduate Regular scale.

**CONF 755: Transforming Conflict through Insight.** 3 credits.
The Insight approach is best understood as an applied human science. Like other applied sciences, it requires students to master an explanatory framework that enables them to frame their questions, formulate their hypotheses, verify their findings, and plan their actions. Thus, the course is designed follow an activity-based, problem-solving approach to learning and using the Insight approach. The objective is to enable students to master the Insight approach by putting it to work, with course meetings build around analytical exercises and activities designed to illuminate assigned readings. Offered by Conflict Analysis & Resolution. May not be repeated for credit.

**Recommended Prerequisite:** CONF 501, CONF 600, or CONF 801.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the Conflict Analysis Resolution or Health and Human Services colleges.

**Schedule Type:** Seminar

**Grading:**
This course is graded on the Graduate Regular scale.

**CONF 756: Addressing Intractable Conflict.** 3 credits.
This course is about the biggest problems facing our communities, our nation, and our world today. Our communities, our nations (the US and others), and the world have proven remarkably unable to "solve" any of these problems. Why? We assert it is because they are all underlain by a more fundamental problem the inability to constructively deal with difficult and intractable conflicts. These conflicts prevent us as individuals, organizations, and governments (at all levels) from making wise decisions or taking effective action that will address any of these pressing problems. Offered by Conflict Analysis & Resolution. May not be repeated for credit.

**Recommended Prerequisite:** CONF 501, CONF 600, or CONF 801.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the Conflict Analysis Resolution or Health and Human Services colleges.

**Schedule Type:** Seminar

**Grading:**
This course is graded on the Graduate Regular scale.

**CONF 757: Conflict and Literature.** 3 credits.
The purpose of this course is to teach students to read/interpret written and oral texts; explore what imaginative literature can teach us about the causes, motives, dynamics, and possibilities of resolving violent
social conflicts; deepen our understanding of the human dimensions of conflicts involving mass movements for social transformation; and practice creating imaginative works of our own. Offered by Conflict Analysis & Resolution. May not be repeated for credit.

**Recommended Prerequisite:** CONF 501, CONF 600, CONF 801.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the Conflict Analysis Resolution college.

**Schedule Type:** Seminar

**Grading:**
This course is graded on the Graduate Regular scale.

**CONF 758: Social Dynamics of Terrorism.** 3 credits.

Presents students with analytical frameworks to account for terrorist acts and organizations and explore social dynamics underlying the development of, and response to, terrorism. Topics may include recruitment into violent groups, counterterrorism and human rights concerns, role of religious and political ideologies in terrorism and counterterrorism, media coverage of terrorism, and effects of terrorism on social structures and processes. Offered by Conflict Analysis & Resolution. May not be repeated for credit.

**Recommended Prerequisite:** CONF 501, CONF 600, CONF 801.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the Conflict Analysis Resolution or Health and Human Services colleges.

**Schedule Type:** Seminar

**Grading:**
This course is graded on the Graduate Regular scale.

**CONF 759: Building Peace in Divided Societies.** 3 credits.

Explores the roots of peacebuilding as a conflict resolution strategy in terms of changes over time, basic assumptions underpinning the emergence and continuance of conflict, building peace, and challenges to community participation as well as varied reactions to the building peace enterprise. The tensions theoretically and practically between building peace and continuity of the conflictual status quo will be explored in detail throughout the course. The focus on communities intersects and often conflicts with the more prominent global peacebuilding frame, often considered an elite endeavor as well as the political economy of the status quo as evidenced in the United States. Why, for example, does the term peacebuilding not appear regularly when considering domestic US conflict and its effects? There are, of course, more questions than answers. However, the focus of the course is to expand our thinking, conceptualizing, and theorizing regarding the current state of peacebuilding. Offered by Conflict Analysis & Resolution. May not be repeated for credit.

**Recommended Prerequisite:** CONF 501, CONF 600, or CONF 801.

**Registration Restrictions:**
Enrollment is limited to students with a major in Conf Analysis Resolution.

**CONF 779: Proposal Development.** 1 credit.

Covers development of research proposal for master’s thesis, including framing a question, literature review, and designing appropriate methodology. Students form master’s thesis committee and review Human Subjects Review Board’s guidelines and procedures. Offered by Conflict Analysis & Resolution. May be repeated within the term for a maximum 6 credits.

**Specialized Designation:** Topic Varies

**Recommended Prerequisite:** CONF 501, CONF 600, or CONF 801.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the Coll Nursing Health Science, Conflict Analysis Resolution or Health and Human Services colleges.

**Schedule Type:** Seminar

**Grading:**
This course is graded on the Graduate Regular scale.

**CONF 797: Professional Development Seminars.** 1-3 credits.

These 1- and 2-credit courses are scheduled non-conventionally using weekends, concentrated presentations, and intersession periods to develop advanced professional skills. Possible topics include marketing conflict resolution services, academic course design, training design, mediation, facilitation, family practice, fundraising, writing for publication, advanced field research techniques, and grassroots applications of conflict resolution. Offered by Conflict Analysis & Resolution. May be repeated for credit.

**Recommended Prerequisite:** CONF 501, CONF 600, or CONF 801.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Enrollment limited to students in the Conflict Analysis Resolution or Health and Human Services colleges.

**Schedule Type:** Seminar

**Grading:**
This course is graded on the Graduate Regular scale.

**CONF 799: Thesis.** 1-6 credits.

Two semesters, usually taken as 3 credits per semester. Original research or analysis under direction of thesis committee. Contact the Graduate Advisor for registration code. Offered by Conflict Analysis & Resolution. May be repeated within the degree.

**Recommended Prerequisite:** CONF 600 and CONF 610
Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

Enrollment limited to students in the Coll Nursing Health Science, Conflict Analysis Resolution or Health and Human Services colleges.

Schedule Type: Thesis

Grading:
This course is graded on the Satisfactory/No Credit scale.

**800 Level Courses**

**CONF 801: Introduction to Conflict Analysis and Resolution.** 3 credits.
Introduces field of conflict analysis and resolution for doctoral students. Examines definitions of conflict and diverse views of resolution. Explores thinking about human behavior and social systems as they relate to origins and role of conflict in violent and peaceful social change. Considers appropriate responses to conflict at interpersonal, intergroup, industrial, communal, and international levels. Notes: Prerequisite or corequisite for all PhD CONF students. Offered by Conflict Analysis & Resolution. May not be repeated for credit.

Registration Restrictions:
Enrollment is limited to students with a major in Conf Analysis Resolution.

Enrollment limited to students in a Doctor of Philosophy degree.

Schedule Type: Seminar

Grading:
This course is graded on the Graduate Regular scale.

**CONF 802: Theories of the Person.** 3 credits.
Understanding human conflict requires knowledge of human behavior, motivation, and perception. Reviews and critically analyzes several psychological theories for application to conflict analysis and resolution theory and practice. Offered by Conflict Analysis & Resolution. May not be repeated for credit.

Recommended Prerequisite: CONF 801. Concurrent enrollment is also permitted.

Registration Restrictions:
Enrollment is limited to students with a major in Conf Analysis Resolution.

Enrollment limited to students in a Doctor of Philosophy degree.

Schedule Type: Seminar

Grading:
This course is graded on the Graduate Regular scale.

**CONF 803: Structural Theories.** 3 credits.
Understanding social conflict and potential for conflict resolution requires that both conflict and cooperation be perceived in relation to patterns of social change. Reviews and critiques significant theories of social change to establish a basis for creative conflict analysis and resolution. Offered by Conflict Analysis & Resolution. May not be repeated for credit.

Recommended Prerequisite: CONF 801. Concurrent enrollment is also permitted.

Registration Restrictions:
Enrollment is limited to students in the CA-PHD-CONF program.

Enrollment limited to Graduate level students.

Enrollment limited to students in the Conflict Analysis Resolution college.

Schedule Type: Seminar

Grading:
This course is graded on the Graduate Regular scale.

**CONF 804: Alternate Theoretical Foundations.** 3 credits.
Familiarizes students with the ideas generated by the Frankfurt School of social theorists and others who have extended or altered these ideas. Students will use these insights to deepen an understanding of serious social conflicts and to explore the implications of critical theories for conflict resolution processes. Offered by Conflict Analysis & Resolution. May not be repeated for credit.

Recommended Corequisite: CONF 801.

Registration Restrictions:
Enrollment is limited to students in the CA-PHD-CONF program.

Enrollment limited to Graduate level students.

Enrollment limited to students in the Conflict Analysis Resolution college.

Schedule Type: Seminar

Grading:
This course is graded on the Graduate Regular scale.

**CONF 811: Quantitative Foundations.** 3 credits.
Building on logic of inquiry, introduces steps in research process to prepare dissertation and implement published research. Covers wide array of quantitative research approaches in social sciences, with emphasis on conflict analysis. Offered by Conflict Analysis & Resolution. May not be repeated for credit.

Recommended Prerequisite: CONF 801

Registration Restrictions:
Enrollment is limited to students in the CA-PHD-CONF program.

Enrollment limited to Graduate level students.

Enrollment limited to students in the Coll Nursing Health Science, Conflict Analysis Resolution or Health and Human Services colleges.

Schedule Type: Seminar

Grading:
This course is graded on the Graduate Regular scale.

**CONF 812: Qualitative Foundations: Social Sciences.** 3 credits.
Continuation of steps in research process to prepare dissertation and implement published research. Builds on CONF 811 by examining qualitative research approaches used in social sciences, with emphasis
on conflict analysis. Offered by Conflict Analysis & Resolution. May not be repeated for credit.

Recommended Prerequisite: CONF 801

Registration Restrictions:
Enrollment is limited to students with a major in Conf Analysis Resolution.

Enrollment limited to students in a Doctor of Philosophy degree.

Schedule Type: Seminar

Grading:
This course is graded on the Graduate Regular scale.

CONF 813: Qualitative Foundations: Humanities. 3 credits.
Explores qualitative research design as it pertains to the humanities, including the methods and epistemology behind the various issues likely to emerge in the process of conducting research. In addition to material on research design and methodology, reading assignments include several monographs that employ different qualitative methodologies. Offered by Conflict Analysis & Resolution. May not be repeated for credit.

Recommended Prerequisite: CONF 801.

Registration Restrictions:
Enrollment is limited to students with a major in Conf Analysis Resolution.

Enrollment limited to students in a Doctor of Philosophy degree.

Schedule Type: Seminar

Grading:
This course is graded on the Graduate Regular scale.

CONF 820: Reflective Practice in Interpersonal-Multiparty Conflicts. 3 credits.
Introductory skill-building course integrating conflict theory and practice using reflective practitioner model. Students learn necessary skills for third-party facilitation and mediation, including active listening, empathy, paraphrasing, reframing, and negotiation, in addition to analytical skills of problem solving and creation of transformational processes. Cases for practice focus on interpersonal and intergroup conflict. Offered by Conflict Analysis & Resolution. May not be repeated for credit.

Recommended Corequisite: CONF 801.

Registration Restrictions:
Enrollment is limited to students with a major in Conf Analysis Resolution.

Enrollment limited to students in a Doctor of Philosophy degree.

Schedule Type: Laboratory

Grading:
This course is graded on the Graduate Regular scale.

CONS 100: Introduction to Field Conservation Ecology. 2 credits.
In this immersive 1-week experience, high school students will acquire firsthand exposure to fieldwork in conservation and how conservation professionals contribute to survival of species in natural habitats. Through a combination of lectures, discussions, fieldwork and outdoor adventure students will be introduced to major concepts of ecology (including diversity, succession, species interactions, communities, populations and ecosystems) in the context of species and habitat conservation. Offered by Provost's Office. Limited to three attempts.
CONS 110: Special Topics in Conservation. 1-3 credits.
Students acquire first-hand exposure to a specific topic in conservation and how conservation professionals contribute to the long-term survival of species. Through a combination of lectures, discussions, and field/lab work, students explore current questions, methods and applications related to a particular topic in conservation. Course Format: Sections of this Smithsonian-Mason School of Conservation course will be taught as an intensive, mixed-format (lectures, lab exercises, field exercises) offerings, in residential, full-day, 1-3-week sessions held at the 3,200 acre Smithsonian Conservation Biology Institute in Front Royal, VA. Students may also be required to complete pre-course reading assignments, and carry out and submit final projects during (or within six weeks after) the onsite session. Offered by Provost's Office. May be repeated within the degree for a maximum 6 credits.

Specialized Designation: Topic Varies
Schedule Type: Lecture
Grading: This course is graded on the Undergraduate Regular scale.

200 Level Courses
CONS 201: How to Succeed in Conservation. 2 credits.
Develops professional and personal skills needed to succeed in the field of conservation. Gives an overview of best practices in conservation, as well as self-promotion and professional engagement skills (networking, social media use, online presence). Skills learned include leadership, communication, community engagement, outreach, social marketing, and conflict resolution. Introduces the range of careers and integration of disciplines in conservation. Offered by Provost's Office. Limited to three attempts.

Schedule Type: Lecture
Grading: This course is graded on the Undergraduate Regular scale.

300 Level Courses
CONS 320: Conservation in Practice. 3 credits.
Work with a conservation mentor in a practicum experience. Create a portfolio documenting professional development. Notes: Must be taken concurrently with CONS 401, CONS 402, CONS 410, and CONS 490. Offered by Provost's Office. Limited to three attempts.

Recommended Prerequisite: A college level biological or
Recommended Corequisite: environmental science course. CONS 401, CONS 402, CONS 410, and CONS 490.
Schedule Type: Lecture
Grading: This course is graded on the Undergraduate Regular scale.

400 Level Courses
CONS 400: Conservation Seminar. 2 credits.
Examines key conservation issues, based on readings and discussions from the primary literature. Teaches professional development skills for scientists in conservation including fundraising, poster presentations, and interpretation of findings for diverse audiences. Develops skills for obtaining internships, jobs, or graduate positions. Offered by Provost's Office. May be repeated within the degree for a maximum 6 credits. Equivalent to BIOL 351.

Specialized Designation: Mason Impact
Registration Restrictions:
Required Prerequisites: BIOL 308C, EVPP 301C, 302C, BIOL 377C, EVPP 377C or INTS 401C.
C Requires minimum grade of C.
Schedule Type: Seminar
Grading: This course is graded on the Undergraduate Regular scale.

CONS 401: Conservation Theory. 3 credits.
Introduces the field of conservation biology and science-based management of threatened wildlife, habitats, and human landscapes. Provides theoretical background for understanding the importance of biodiversity conservation and sustainability. Notes: Must be taken concurrently with CONS 320, CONS 402, CONS 410, and CONS 490. Students cannot get credit for this course and Biology 318 or NCLC 401. Offered by Provost's Office. Limited to three attempts.

Specialized Designation: Green Leaf Related Course, Mason Impact
Recommended Prerequisite: A college level biological or
Recommended Corequisite: environmental science course. CONS 320, CONS 402, CONS 410, and CONS 490.
Schedule Type: Lecture
Grading: This course is graded on the Undergraduate Regular scale.

CONS 402: Applied Conservation. 4 credits.
A practical scientific approach to the nature of biodiversity and species loss. Students participate in field conservation exercises in a variety of settings, as well as endocrine and reproductive technology labs. Students apply field and laboratory experiences to understanding science's connection to management decision-making for conservation. Notes: Must be taken concurrently with CONS 320, CONS 401, CONS 410, and CONS 490. Offered by Provost's Office. Limited to three attempts.

Specialized Designation: Green Leaf Related Course, Mason Impact
Recommended Prerequisite: A college level biological or
Recommended Corequisite: environmental science course. CONS 320, CONS 401, CONS 410, and CONS 490.
Schedule Type: Laboratory, Lecture
Grading: This course is graded on the Undergraduate Regular scale.

CONS 404: Biodiversity Monitoring. 4 credits.
Covers the assessment, monitoring and conservation of species and habitats as well as the tools for sampling species and habitats and the evaluation of those tools' effectiveness. Students use this practical, hands-on knowledge to prepare a series of reports and recommendations for future work. This practical, hands-on knowledge is used to prepare
plans and recommendations for future work. Offered by Provost’s Office. Limited to three attempts.

Specialized Designation: Green Leaf Related Course

Registration Restrictions:
Required Prerequisites: BIOL 308C, EVPP 301C, 302C, BIOL 377C, EVPP 377C or INTS 401C.
C Requires minimum grade of C.

Schedule Type: Laboratory, Lecture

Grading:
This course is graded on the Undergraduate Regular scale.

CONS 405: Landscape and Macrosystems Ecology. 4 credits.
Identify and characterize patterns in landscapes, investigate how they form and change over time, and consider anthropogenic influences. Model populations and communities across landscapes, and consider ways of managing them to achieve goals in managing species and ecosystem processes at local, regional, and continental scales. Offered by Provost’s Office. Limited to three attempts.

Specialized Designation: Mason Impact.

Registration Restrictions:
Required Prerequisites: BIOL 308C, EVPP 301C, 302C, BIOL 377C, EVPP 377C or INTS 401C.
C Requires minimum grade of C.

Schedule Type: Laboratory, Lecture

Grading:
This course is graded on the Undergraduate Regular scale.

CONS 406: Small Population Management. 4 credits.
Investigates species vulnerability to extinction and the methodologies of preserving genetic diversity in small populations, both in the wild and in captivity. Teaches modeling and laboratory techniques that promote successful captive breeding, such as hormone analysis and assisted reproductive techniques, as well as working with data in R. Examines captive species in the Smithsonian Conservation Biology Institute to learn husbandry practices and skills from keepers and biologists. Offered by Provost’s Office. Limited to three attempts.

Specialized Designation: Mason Impact.

Registration Restrictions:
Required Prerequisites: BIOL 308C, EVPP 301C, 302C, BIOL 377C, EVPP 377C or INTS 401C.
C Requires minimum grade of C.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale.

CONS 410: Human Dimensions in Conservation. 3 credits.
Provides sociological, local and global perspectives on conservation issues including adaptive management, conflict resolution, environmental economics, sustainability, public policy, environmental values and public opinion, and conservation ethics. Notes: Must be taken concurrently with CONS 320, CONS 401, CONS 402, and CONS 490. Offered by Provost’s Office. Limited to three attempts.

Mason Core: Social/Behavioral Sciences, Encore: Sustainability

Specialized Designation: Green Leaf Focused Course, Mason Impact.

Recommended Prerequisite: A college level biological or

Recommended Corequisite: environmental science course. CONS 320, CONS 401, CONS 402, and CONS 490.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale.

CONS 440: Ecology Field Skills. 4 credits.
Directed field studies emphasizing ecology and behavior. Topics vary but include design of field manipulation, data collection and analysis, and introduction to organisms of study site. May include field trips. Offered by Provost’s Office. Limited to three attempts. Equivalent to BIOL 357, EVPP 440.

Recommended Prerequisite: BIOL308 or BIOL310 (or equivalent course), or INTS 401 Conservation Biology

Schedule Type: Laboratory, Lecture

Grading:
This course is graded on the Undergraduate Regular scale.

CONS 460: Statistics and Study Design in Ecology and Conservation. 3 credits.
An understanding of statistics and study design is essential to success in the fields of ecology and conservation. However, many of the analyses of greatest utility for ecological data are frequently unable to be addressed in introductory courses, while advanced courses often delve deeply into a limited set of techniques. This course bridges this gap: building on knowledge obtained in introductory courses, additional techniques appropriate to many forms of ecological data and more advanced approaches will be introduced. This course will address the fundamentals of study design, linking choices made when establishing a research project to the types of analyses appropriate to the chosen design. Emphasis will be placed on understanding the output of analyses, and separating statistical significance from biological or ecological significance. Additionally, skills in data manipulation, analyses, and graphics using the R statistical computing environment will be developed. Offered by Provost’s Office. Limited to three attempts.

Registration Restrictions:
Required Prerequisites: BIOL 214C, SOCI 313C, STAT 250C or CONS 404C.
C Requires minimum grade of C.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale.

CONS 480: Primate Behavior, Ecology and Conservation. 3 credits.
Using primates as a focal taxon, this two-week course examines the theoretical background on how ecology, behavior, and life history influence primate abundance, distribution, and population dynamics. Teaches data collection methods for primate behavior studies, survey methods and habitat assessment techniques. Topics include several conservation-related case studies. Includes the development of a research proposal concerning primate socio-ecological strategies to address larger conservation issues. Notes: Students have the option to register for an “add-on” field experience course, CONS 497
“Primate Behavior and Conservation in Peru”, through the Mason Study Abroad Global Education Office (GEO). In this course, students conduct independent research on primate species in the wild. The course takes place at the Los Amigos Biological Research Station in Peru. Offered by Provost’s Office. Limited to three attempts.

**Recommended Prerequisite:** This course is open to 3rd and 4th year undergraduate students who have obtained a minimum GPA of 2.25. The course is also open to recent graduates, non-degree seeking students and non-Mason students.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale.

**CONS 490:** *RS: Integrated Conservation Strategies.* 3 credits.
Integrates the course work of the Smithsonian-Mason Semester through study of current conservation issues. Students incorporate interdisciplinary aspects of conservation into a summative group case study on a chosen conservation issue and present formally before a faculty panel. Notes: Must be taken concurrently with CONS 320, CONS 401, CONS 402, and CONS 410. Offered by Provost’s Office. Limited to three attempts.

**Mason Core:** Encore: Sustainability, Synthesis

**Specialized Designation:** Green Leaf Related Course, Research/Scholarship Intensive

**Recommended Prerequisite:** A college level biological or environmental science course. CONS 320, CONS 401, CONS 402, and CONS 410.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale.

**CONS 491:** *RS: Conservation Management Planning.* 4 credits.
Explores strategies and decisions that help secure the long-term survival of threatened species and habitats. Focuses on the planning tools necessary to define and set conservation goals and quantitatively assess species and areas of conservation value and prioritization. Offered by Provost’s Office. Limited to three attempts.

**Mason Core:** Encore: Sustainability, Synthesis

**Specialized Designation:** Green Leaf Related Course, Research/Scholarship Intensive

**Registration Restrictions:**

**Required Prerequisites:** BIOL 308<sup>C</sup>, EVPP 301<sup>C</sup>, 302<sup>C</sup>, BIOL 377<sup>C</sup>, EVPP 377<sup>C</sup> or INTS 401<sup>C</sup>.

<sup>C</sup> Requires minimum grade of C.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale.

**CONS 497:** *Special Topics in Conservation.* 1-4 credits.
Topics of current relevance to the field of conservation. Offered by Provost’s Office. May be repeated within the degree for a maximum 9 credits.

**Specialized Designation:** Topic Varies

**Schedule Type:** Independent Study

**Grading:**
This course is graded on the Undergraduate Regular scale.

**CONS 498:** *Internship.* 1-3 credits.
Directed readings and final reflective paper or project in conjunction with an internship subject to instructor approval. Permission to enroll must be obtained from the Mason Center for Conservation Studies at least two weeks prior to the start of the semester. Offered by Provost’s Office. May be repeated within the degree for a maximum 9 credits.

**Schedule Type:** Internship

**Grading:**
This course is graded on the Undergraduate Regular scale.

**CONS 499:** *Independent Study/Research.* 1-3 credits.
An independent project or directed exploration into an area of conservation not covered by other courses. Offered by Provost’s Office. May be repeated within the degree for a maximum 9 credits.

**Recommended Prerequisite:** Permission of instructor.

**Schedule Type:** Independent Study

**Grading:**
This course is graded on the Undergraduate Regular scale.

**CONS 4996:** *Research in Conservation.* 6 credits.
One-on-one research experience with a conservation practitioner over 5 weeks (about 36 hours per week) on a conservation research project associated with that practitioner’s program. Offered by Provost’s Office. May be repeated within the degree for a maximum 12 credits.

**Mason Core:** Capstone

**Specialized Designation:** Mason Impact.

**Registration Restrictions:**

**Required Prerequisites:** BIOL 308<sup>C</sup>, EVPP 301<sup>C</sup>, 302<sup>C</sup>, BIOL 377<sup>C</sup>, EVPP 377<sup>C</sup> or INTS 401<sup>C</sup>.

**Schedule Type:** Independent Study

**Grading:**
This course is graded on the Undergraduate Regular scale.

**CONS 540:** *Ecology Field Skills.* 4 credits.
Graduate level directed field studies emphasizing ecology and behavior. Topics vary but include design of field manipulations, data collection and analysis, and introduction to organisms of study site. May include field trips. Offered by Provost’s Office. May not be repeated for credit.

**Recommended Prerequisite:** BIOL 308 or BIOL 310, or EVPP 305 and EVPP 306, or INTS 401 or equivalent course

**Registration Restrictions:**

Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

**500 Level Courses**

**CONS 540:** *Ecology Field Skills.* 4 credits.
Graduate level directed field studies emphasizing ecology and behavior. Topics vary but include design of field manipulations, data collection and analysis, and introduction to organisms of study site. May include field trips. Offered by Provost’s Office. May not be repeated for credit.

**Recommended Prerequisite:** BIOL 308 or BIOL 310, or EVPP 305 and EVPP 306, or INTS 401 or equivalent course

**Registration Restrictions:**

Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.
Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Laboratory, Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

**CONS 560:** *Statistics and Study Design in Ecology and Conservation.* 3 credits.
An understanding of statistics and study design is essential to success in the fields of ecology and conservation. However, many of the analyses of greatest utility for ecological data are frequently unable to be addressed in introductory courses, while advanced courses often delve deeply into a limited set of techniques. This course bridges this gap: building on knowledge obtained in introductory courses, additional techniques appropriate to many forms of ecological data and more advanced approaches will be introduced. This course will address the fundamentals of study design, linking choices made when establishing a research project to the types of analyses appropriate to the selected design. Emphasis will be placed on understanding the output of analyses, and separating statistical significance from biological or ecological significance. Additionally, skills in data manipulation, analyses, and graphics using the R statistical computing environment will be developed. Offered by Provost’s Office. Limited to three attempts.

**Registration Restrictions:**
**Required Prerequisites:** BIOL 214\(^c\), SOCI 313\(^c\), STAT 250\(^c\) or CONS 404\(^c\).
\(^c\) Requires minimum grade of C.

Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

**CONS 580:** *Primate Behavior, Ecology and Conservation.* 3 credits.
Using primates as a focal taxon, this two-week course examines the theoretical background on how ecology, behavior, and life history influence primate abundance, distribution, and population dynamics. Teaches data collection methods for primate behavior studies, survey methods and habitat assessment techniques. Topics include several conservation-related case studies. In this course, students conduct independent research on primate species in the wild. The course takes place at the Los Amigos Biological Research Station in Peru. Offered by Provost’s Office. May not be repeated for credit.

**Recommended Prerequisite:** This course is open to graduate students who have obtained a minimum GPA of 3.0. The course is also open to non-Mason students.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

**CONS 597:** *Special Topics in Conservation.* 1-4 credits.
Topics of current relevance to the field of conservation. Offered by Provost’s Office. May be repeated within the degree for a maximum 9 credits.

**Specialized Designation:** Topic Varies

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

**600 Level Courses**

**CONS 625:** *Statistics for Ecology and Conservation Biology.* 3 credits.
This regression-based analytical course combines lectures on theory and concepts with significant time practicing statistical tools within the R environment. The course concludes with a 2-day project session where participants work independently to conduct a full analysis of a provided dataset and present their results. This course covers: probability theory, random variables and statistical distributions, linear models, generalized linear models, model diagnostics, data transformations, visualizing results, missing data and collinearity. Offered through the Smithsonian-Mason School of Conservation in cooperation with the Smithsonian Conservation Biology Institute on site in Front Royal, VA. Course Format: This course is taught as an intensive, mixed format (lectures and computer lab learning the latest data analysis tools). Notes: Offered through the Smithsonian-Mason School of Conservation in cooperation with the Smithsonian Conservation Biology Institute on site for specific taxa through lectures, case studies, lab exercises, and field work. Each course includes not only significant time in the field practicing field data collection methods but also significant time in the computer lab learning the latest data analysis tools. Notes: Offered through the Smithsonian-Mason School of Conservation Studies in cooperation with the Smithsonian Conservation Biology Institute on site.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

**CONS 630:** *Species Monitoring & Conservation.* 3 credits.
Explores monitoring and conservation research methods and approaches for specific taxa through lectures, case studies, lab exercises, and field work. Each course includes not only significant time in the field practicing field data collection methods but also significant time in the computer lab learning the latest data analysis tools. Notes: Offered through the Smithsonian-Mason School of Conservation Studies in cooperation with the Smithsonian Conservation Biology Institute on site.

Students in a Non-Degree Undergraduate degree may not enroll.
in Front Royal, VA. Course Format: This course is taught as an intensive, mixed format (lectures and computer work) offering, in a residential full-day (8:30am-6pm), 2 week session. Students complete pre-course assignments, and are graded in participation, computer exercises and a final exam. Some night and early morning sessions may occur. Offered by Provost’s Office. May be repeated within the degree for a maximum 9 credits.

**Recommended Prerequisite:** A general biology (or relevant species-related) course and a statistics course, or permission of instructor. Prior coursework in environmental science, zoology and ecology recommended.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

**CONS 645: Estimating Animal Abundance and Occupancy.** 3 credits.
Provides a strong theoretical and analytical background to the current and accepted methods of estimating population parameters including abundance, occupancy, survival, and population change. The course teaches study design, implementation and analysis of data from distance sampling, mark-recapture, and occupancy modeling techniques, with all analysis performed and practiced in the program R. Time is provided throughout for work on a student’s own data/project with help of instructors. Offered through the Smithsonian-Mason School of Conservation in cooperation with the Smithsonian Conservation Biology Institute on site in Front Royal, VA. Course Format: This course is taught as an intensive, mixed format (lectures, computer work) offering, in a residential full-day (8:30am-6pm), 2-week session. Students complete pre-course assignments, are graded in participation, computer exercises and a final exam. Night sessions may occur, there is a full day of class on Saturday. Sunday is free. Offered by Provost’s Office. May not be repeated for credit.

**Recommended Prerequisite:** College-level introductory statistics course.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

**CONS 697: Special Topics in Conservation.** 1-3 credits.
Topics of current relevance to the field of conservation. Notes: May be repeated for credit with approval of the Smithsonian Mason School of Conservation. Offered through the Smithsonian-Mason School of Conservation in cooperation with the Smithsonian Conservation Biology Institute on site in Front Royal, VA. Course Format: These courses are taught as an intensive, mixed format (lectures and computer work) offering, in a residential full-day (8:30am-6pm), 1 week, 10 day or 2 week session. Students complete pre-course assignments, and are graded in participation, computer exercises and a final exam or project. Some night sessions may occur and courses may include weekend class days. Offered by Provost’s Office. May be repeated within the degree for a maximum 9 credits.

**Specialized Designation:** Topic Varies

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

**Counseling and Development (ECD) 500 Level Courses**

**ECD 525: Advanced Human Growth and Development.** 3 credits.
Covers human development throughout the life span, including emotional, physical, and cognitive development; and emphasizes personal adjustment and achievement. Offered by School of Education. May not be repeated for credit.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

**600 Level Courses**

**ECD 601: Introduction to Research in Counseling.** 3 credits.
Enhances knowledge of and involvement in counseling research by introducing techniques and principles to design, implement, and evaluate research projects and program development in community and school settings. Offered by School of Education. May not be repeated for credit.

**Registration Restrictions:**
Enrollment limited to students with a major in Counseling and Development or Counseling.

Enrollment is limited to Graduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

EDCD 602: Foundations in Counseling. 3 credits.
Provides students with an introduction to the field of professional counseling. Provides graduate students in counseling with knowledge about the history and foundations of counseling, the professional identity and multifaceted role of the counselor, program mission statement and its relationship to counseling. Offered by School of Education. May not be repeated for credit.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

EDCD 603: Counseling Theories and Practice. 3 credits.
Covers major theoretical approaches to counseling from a multicultural perspective and provides supervised introduction to basic skills. Offered by School of Education. May not be repeated for credit.

**Recommended Prerequisite:** EDCD 602 (may be taken concurrently).

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to students with a major in Counseling and Development, Education, Post-Masters Counseling Lic or Psychology.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Registeration Restrictions:**
Required Prerequisite: EDCD 603\(^B\).
\(^B\) Requires minimum grade of B.

Enrollment is limited to students with a major, minor, or concentration in Counseling or School Counseling.

Enrollment limited to students in a Graduate Certificate or Master of Education degrees.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

EDCD 604: Assessment and Appraisal in Counseling. 3 credits.
Prepares students to become informed about psychological and educational tests and assessment procedures that are used and applied in a counseling context. Offered by School of Education. May not be repeated for credit.

**Registration Restrictions:**
Required Prerequisite: EDCD 601\(^B\).
\(^B\) Requires minimum grade of B.

Enrollment is limited to students with a major in Counseling and Development or Counseling.

Enrollment is limited to Graduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

EDCD 606: Counseling Children and Adolescents. 3 credits.
Presents theories, techniques, and counseling issues relevant to children and adolescents. Provides practice with an emphasis on process and culturally competent counseling strategies. Offered by School of Education. May not be repeated for credit.

**Registration Restrictions:**
Required Prerequisite: EDCD 603\(^B\).
\(^B\) Requires minimum grade of B.

Enrollment is limited to students with a major, minor, or concentration in Counseling or School Counseling.

Enrollment limited to students in a Graduate Certificate or Master of Education degrees.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

EDCD 608: Group Processes and Analyses. 4 credits.
Presents theories appropriate to various types of groups and descriptions of group practices, methods, dynamics, and facilitative skills. Focuses on applying theory to practice. Includes lab. Offered by School of Education. May not be repeated for credit.

**Registration Restrictions:**
Required Prerequisites: EDCD 606\(^B\) or 609\(^B\).
\(^B\) Requires minimum grade of B.

Enrollment is limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to students with a major, minor, or concentration in Counseling and Development or Counseling.

Enrollment is limited to students in a Graduate Certificate or Master of Education degrees.

**Schedule Type:** Laboratory, Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

EDCD 609: Clinical Mental Health Counseling. 3 credits.
Covers counseling skills, process and strategies associated with major counseling theories. Provides intensive practice in both technical and conceptual skills with emphasis on self-awareness, case conceptualization, racial-cultural considerations, and supervised practice in a community setting. Offered by School of Education. May not be repeated for credit.

**Registration Restrictions:**
Required Prerequisites: EDCD 602\(^B\) and 603\(^B\).
\(^B\) Requires minimum grade of B.

Enrollment is limited to students with a major, minor, or concentration in Clinical Mntl Hlth Counseling or Counseling.
Enrollment limited to students in a Graduate Certificate or Master of Education degrees.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

**EDCD 610: Career and Educational Counseling.** 3 credits.
Presents theories and counseling issues relevant to career counseling in schools and community agencies. Offered by School of Education. May not be repeated for credit.

**Registration Restrictions:**
**Required Prerequisites:** EDCD 606\(^B\), 609\(^B\) or 604\(^B\).
\(^B\) Requires minimum grade of B.

Enrollment is limited to students with a major, minor, or concentration in Counseling and Development or Counseling.

Enrollment limited to students in a Graduate Certificate or Master of Education degrees.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

**EDCD 611: Introduction to Ethical and Legal Issues in School Counseling.** 3 credits.
Introduces principles, practices, and application of ethical and legal issues in school counseling. Offered by School of Education. May not be repeated for credit.

**Registration Restrictions:**
**Required Prerequisites:** EDCD 602\(^B\), 603\(^B\) and 613\(^B\).
\(^B\) Requires minimum grade of B.

Enrollment is limited to students with a major in Counseling and Development or Counseling.

Enrollment limited to Graduate level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

**EDCD 613: Introduction to School Counseling.** 3 credits.
Addresses the role of the school counselor and provides an understanding of the coordination of counseling program components as they relate to the school and the wider community. Offered by School of Education. May not be repeated for credit.

**Registration Restrictions:**
**Required Prerequisite:** EDCD 602\(^B\) .
\(^\ast\) May be taken concurrently.
\(^B\) Requires minimum grade of B.

Enrollment is limited to students with a major, minor, or concentration in Counseling or School Counseling.

Enrollment limited to students in a Graduate Certificate or Master of Education degrees.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

**EDCD 615: School-Based Mental Health.** 3 credits.
Provides an overview of mental disorders and disabilities impacting children and adolescents, with particular attention devoted to early identification and intervention in a school setting. Offered by School of Education. May not be repeated for credit.

**Registration Restrictions:**
**Required Prerequisites:** EDCD 602\(^B\) and 609\(^B\).
\(^\ast\) May be taken concurrently.
\(^B\) Requires minimum grade of B.

Enrollment is limited to students with a major, minor, or concentration in Counseling or School Counseling.

Enrollment limited to students in a Graduate Certificate or Master of Education degrees.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

**EDCD 619: Trauma and Crisis Counseling.** 3 credits.
Provides an introduction to trauma and crisis counseling using theories and techniques from bioecological and multicultural-social justice perspectives. Covers assessments and interventions with individuals, families, and communities who have experienced trauma/crisis. Offered by School of Education. May not be repeated for credit.

**Registration Restrictions:**
**Required Prerequisites:** EDCD 525\(^B\), 606\(^B\) or 609\(^B\).
\(^B\) Requires minimum grade of B.

Enrollment is limited to students with a major in Counseling and Development or Counseling.

Enrollment limited to students in a Graduate Certificate or Master of Education degrees.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

**EDCD 621: School, Family, and Community Collaboration.** 2 credits.
Provides an overview of consultation and collaboration theories and practice. Helps students develop consultation and collaboration skills that may be applied in schools, community agencies, or other organizational settings. Offered by School of Education. May not be repeated for credit.

**Registration Restrictions:**
**Required Prerequisites:** EDCD 602\(^B\), 613\(^B\) or 654\(^B\).
\(^B\) Requires minimum grade of B.

Enrollment is limited to students with a major in Counseling and Development or Counseling.

Enrollment limited to students in a Graduate Certificate or Master of Education degrees.
Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale.

**EDCD 626: Principles and Practices of School Counseling.** 3 credits.
Focuses on the comprehensive development, delivery, and evaluation of school counseling programs based on the Virginia state model and the American School Counselor Association national model. Offered by School of Education. May not be repeated for credit.

**Registration Restrictions:**
**Required Prerequisites:** EDCD 602 and 613.**
B Requires minimum grade of B.

Enrollment is limited to students with a major, minor, or concentration in Counseling and Development or Counseling.

Enrollment limited to students in a Graduate Certificate or Master of Education degrees.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale.

**EDCD 628: Counseling and Social Justice.** 3 credits.
Discusses the Counseling and Development program's mission statement of Social Justice, Multiculturalism, Internationalism, Advocacy and Leadership. Provides an overview of theories and models of social justice, advocacy, and leadership. Examines theories and models from a multicultural perspective and discusses within the context of counseling in school and community settings. Examines the role of counselors as change agents, leaders, and advocates. Note: Students must have completed 24 credits in the Counseling program. Offered by School of Education. May not be repeated for credit.

**Registration Restrictions:**
**Required Prerequisites:** EDCD 660* and 608 and (EDCD 654 or 626).**
B Requires minimum grade of B.

Enrollment is limited to students with a major, minor, or concentration in Counseling and Development or Counseling.

Enrollment limited to students in a Graduate Certificate or Master of Education degrees.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale.

**EDCD 652: Introduction to Substance Abuse Counseling.** 3 credits.
Introduces substance abuse counseling. Covers addiction issues, diagnosis and treatment planning, and individual and group counseling strategies with diverse populations. Offered by School of Education. May not be repeated for credit.

**Recommended Prerequisite:** EDCD 603 or concurrent enrollment.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to students with a major, minor, or concentration in Community Agency Counseling or Post-Masters Counseling Lic.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale.

**EDCD 654: Counseling and Ethics in Community Agencies.** 3 credits.
Provides a foundation for ethical and legal counseling practice within community and agency settings. Examines the role and professional identity of the clinical mental health counselor, with attention to multicultural and social justice perspectives. Offered by School of Education. May not be repeated for credit.

**Registration Restrictions:**
**Required Prerequisites:** EDCD 602 and 603.**
B Requires minimum grade of B.

Enrollment is limited to students with a major, minor, or concentration in Clinical Mntl Hlth Counseling or Counseling.

Enrollment limited to Graduate level students.

Enrollment limited to students in a Graduate Certificate or Master of Education degrees.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale.

**EDCD 656: Diagnosis and Treatment Planning for Mental Health Professionals.** 3 credits.
Introduces students to fundamental concepts in the classification of psychopathology as well as the clinical interviewing skills necessary to apply DSM-5 diagnoses to clients in a sound and ethical manner. Incorporates an explicit focus on the role of race and culture in diagnosis and treatment. Offered by School of Education. May not be repeated for credit.

**Recommended Prerequisite:** EDCD 603 (may be taken concurrently).

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to students with a major in Counseling and Development, Education or Post-Masters Counseling Lic.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale.
EDCD 658: Couples and Family Counseling. 3 credits. 
Introduces major approaches to counseling couples and families. Uses case studies and simulations to facilitate transition from theory to practice. Offered by School of Education. May not be repeated for credit.

**Recommended Prerequisite:** EDCD 609 (may be taken concurrently).

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to students with a major, minor, or concentration in Community Agency Counseling or Post-Masters Counseling Lic.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

EDCD 660: Multicultural Counseling. 3 credits.
Examines multicultural issues in counseling and explores the complexities of culture and its influence on the client/counselor relationship. Promotes awareness and understanding of cultural differences and their effect on the counseling relationship. Investigates variables that interact with culture that may interfere with the counseling relationship, such as historical, political, socioeconomic, psychosocial adjustment, racism, prejudice, discrimination, and oppression. May be taken concurrently.

B Requires minimum grade of B.

Enrollment is limited to students with a major, minor, or concentration in Counseling and Development or Counseling.

Enrollment is limited to students in a Graduate Certificate or Master of Education degrees.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

**700 Level Courses**

EDCD 750: Practicum in Mental Health Counseling. 3 credits.
Provides supervised practice in a counseling setting similar to the setting in which the student may work with an emphasis on the counseling process. Provides opportunities to practice counseling skills related to ethics, supervision, self-care, decision-making, and professional identity and relationships. Note: students without 30 hours of prior Counseling program coursework will be dropped. Offered by School of Education. May not be repeated for credit.

**Registration Restrictions:**
**Required Prerequisite:** EDCD 608B.
B Requires minimum grade of B.

Enrollment is limited to students with a major in Counseling and Development or Counseling.

Enrollment limited to students in a Graduate Certificate or Master of Education degrees.

**Schedule Type:** Internship

**Grading:**
This course is graded on the Satisfactory/No Credit scale.

EDCD 751: Practicum in School Counseling. 3 credits.
Provides supervised practice in a school counseling setting similar to the setting in which the student may work with an emphasis on the counseling process. Provides opportunities to practice counseling skills related to ethics, supervision, self-care, decision-making, and professional identity and relationships. Note: students without 30 hours of prior Counseling program coursework will be dropped. Offered by School of Education. May not be repeated for credit.

**Registration Restrictions:**
**Required Prerequisite:** EDCD 608B.
B Requires minimum grade of B.

Enrollment is limited to students with a major in Counseling and Development or Counseling.

Enrollment limited to students in a Graduate Certificate or Master of Education degrees.

**Schedule Type:** Internship

**Grading:**
This course is graded on the Satisfactory/No Credit scale.

EDCD 755: Practicum in Counseling. 3 credits.
Provides supervised practice in a counseling setting similar to the setting in which the student may work with an emphasis on the counseling process. Notes: Weekly graduate class emphasizes site processing. Offered by School of Education. May not be repeated for credit.

**Recommended Prerequisite:** Completion of CNDV program course work except for EDCD 610 or electives (total credits cannot exceed 3 credits); overall GPA of 3.00; no grade lower than B in skills courses EDCD 603, 606/609 and 608; no more than two grades of C in any other graduate course work required by CNDV program; permission of advisor.

**Registration Restrictions:**
Enrollment is limited to students with a major in Counseling and Development, Education or Post-Masters Counseling Lic.

Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Internship

**Grading:**
This course is graded on the Satisfactory/No Credit scale.

EDCD 791: Internship in Counseling. 3 credits.
Provides supervised practice in a counseling setting similar to the setting in which the student may work with an emphasis on the counseling process. Builds on previous practicum experiences. Offered by School of Education. May not be repeated for credit.

**Recommended Prerequisite:** EDCD 608B.
B Requires minimum grade of B.

Enrollment is limited to students in a Graduate Certificate or Master of Education degrees.

**Schedule Type:** Internship

**Grading:**
This course is graded on the Satisfactory/No Credit scale.
Recommended Prerequisite: Completion of CNDV program course work except for electives; overall GPA of 3.00; no grade lower than B in skills courses EDCD 603, 606/609, 608 and 755; no more than two grades of C in any other graduate course work required by CNDV program; permission of advisor.

Registration Restrictions:
Enrollment is limited to students with a major in Counseling and Development, Education or Post-Masters Counseling Lic.

Enrollment is limited to Graduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Internship

Grading:
This course is graded on the Satisfactory/No Credit scale.

EDCD 792: Internship in Mental Health Counseling I. 3 credits.
Provides supervised practice in a clinical mental health counseling setting similar to the setting in which the student may work with an emphasis on the counseling process. Develops skills in case conceptualization, assessing needs, and applying counseling knowledge and skills with clients under supervision. Note: Completion of all required counseling program coursework with a B or better; permission of advisor; students may be concurrently registered for no more than 6 credits of the following courses: EDCD 610, EDCD 621, or electives. Offered by School of Education. May not be repeated for credit.

Registration Restrictions:
Required Prerequisite: EDCD 750B.

B Requires minimum grade of B.

Enrollment is limited to students with a major in Counseling and Development or Counseling.

Enrollment limited to students in a Graduate Certificate or Master of Education degrees.

Schedule Type: Internship

Grading:
This course is graded on the Satisfactory/No Credit scale.

EDCD 793: Internship in Mental Health Counseling II. 3 credits.
Provides supervised practice in a counseling setting similar to the setting in which the student may work with an emphasis on the counseling process. Builds on previous practicum and Internship I experiences, including evaluating interventions and programs. Note: Completion of all required counseling program coursework with a B or better; permission of advisor; students may be concurrently registered for no more than 6 credits of the following: EDCD 610, EDCD 621, or electives. Offered by School of Education. May not be repeated for credit.

Registration Restrictions:
Required Prerequisite: EDCD 792B.

B Requires minimum grade of B.

Enrollment is limited to students with a major in Counseling and Development or Counseling.

Enrollment limited to students in a Graduate Certificate or Master of Education degrees.

Schedule Type: Internship

Grading:
This course is graded on the Satisfactory/No Credit scale.

EDCD 794: Internship in School Counseling I. 3 credits.
Provides supervised practice in a school counseling setting similar to the setting in which the student may work with an emphasis on the counseling process. Develops skills in case conceptualization, assessing needs, and applying counseling knowledge and skills with clients under supervision. Note: Completion of all required counseling program coursework with a B or better; permission of advisor; students may be concurrently registered for no more than 6 credits of the following courses: EDCD 610, EDCD 621, or electives. Offered by School of Education. May not be repeated for credit.

Registration Restrictions:
Required Prerequisite: EDCD 751B.

B Requires minimum grade of B.

Enrollment is limited to students with a major in Counseling and Development or Counseling.

Enrollment limited to students in a Graduate Certificate or Master of Education degrees.

Schedule Type: Internship

Grading:
This course is graded on the Satisfactory/No Credit scale.

EDCD 795: Internship in School Counseling II. 3 credits.
Provides supervised practice in a counseling setting similar to the setting in which the student may work with an emphasis on the counseling process. Builds on previous practicum and Internship I experiences, including evaluating interventions and programs. Note: Completion of all required counseling program coursework with a B or better; permission of advisor; students may be concurrently registered for program electives. Offered by School of Education. May not be repeated for credit.

Registration Restrictions:
Required Prerequisite: EDCD 794B.

B Requires minimum grade of B.

Enrollment is limited to students with a major in Counseling and Development or Counseling.

Enrollment limited to students in a Graduate Certificate or Master of Education degrees.

Schedule Type: Internship

Grading:
This course is graded on the Satisfactory/No Credit scale.

EDCD 797: Advanced Topics in Education. 1-6 credits.
See EDUC 797. Offered by School of Education. May be repeated within the term.

Specialized Designation: Topic Varies

Registration Restrictions:
Required Prerequisite: EDCD 603B.

B Requires minimum grade of B.

Enrollment is limited to students with a major in Counseling and Development, Counseling or Post-Masters Counseling Lic.
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

### 800 Level Courses

**EDCD 894:** *Advanced Family and Systems Counseling.* 3 credits.
Develops advanced level skills and competencies in the practice of family and systems counseling. Multiple theoretical models for practice in a multicultural society will be explored, as will the applications of those models in multiple professional settings. Offered by School of Education. May not be repeated for credit.

**Recommended Prerequisite:** Admission to PhD in Counseling and Development Program.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy.

Enrollment is limited to Graduate level students.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

**EDCD 895:** *Emerging Issues in Counseling and Development.* 3 credits.
Examines issues in counseling profession, including counseling theory and methodology, development of client groups, new roles and settings for counselors, emerging assessment procedures, new understanding of diagnosis, and impact of societal changes on counseling profession. Offered by School of Education. May not be repeated for credit.

**Recommended Prerequisite:** Admission to the PhD program or permission of instructor.

**Registration Restrictions:**
Enrollment limited to students with a major in Education.

Enrollment is limited to Graduate level students.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

**EDCD 896:** *Advanced Multicultural Counseling.* 3 credits.
Focuses on advanced issues in multicultural counseling, including multicultural counseling theories, skills, assessment, supervision, research, and ethics. Offered by School of Education. May not be repeated for credit.

**Recommended Prerequisite:** Masters degree in counseling or related counseling field from an accredited institution of higher education and EDCD 660, or equivalent; EDCD 895; admission to the Counseling and Development Doctoral Program, or Permission of Instructor.

**Registration Restrictions:**
Enrollment limited to students with a major in Education.

Enrollment is limited to Graduate level students.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.

**EDCD 897:** *Grant Writing and Publishing.* 3 credits.
Focuses on grant writing and publishing in counseling and psychology. Offered by School of Education. May not be repeated for credit.

**Recommended Prerequisite:** Masters degree in counseling or related counseling field from an accredited institution of higher education and EDCD 608 or equivalent; EDCD 895; admission to the Counseling and Development Doctoral Program, or Permission of Instructor.

**Registration Restrictions:**
Enrollment limited to students with a major in Education.

Enrollment is limited to Graduate level students.

**Schedule Type:** Seminar

**Grading:**
This course is graded on the Graduate Regular scale.

**EDCD 898:** *The Theory and Practice of Counseling Supervision.* 4 credits.
Explores counseling supervision theory from a multicultural and social justice perspective. Students will apply these theories by supervising Master’s level community agency and school counseling practicum students under the supervision of the instructor. Offered by School of Education. May not be repeated for credit.

**Recommended Prerequisite:** Admission to PhD in Counseling and Development Program; Master’s degree in Counseling or related field, or permission of the instructor.

**Registration Restrictions:**
Enrollment limited to students with a major in Education.

Enrollment is limited to Graduate level students.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Graduate Regular scale.
900 Level Courses

EDCD 900: Leadership and Advocacy in the Counseling Profession. 4 credits.
Introduces students to broad theoretical concepts, strategies, and skills related to leadership and advocacy within the counseling profession, and will help students integrate leadership and advocacy into their professional identity. Offered by School of Education. May not be repeated for credit.

Recommended Prerequisite: Admission to PhD in Counseling and Development Program.

Registration Restrictions:
Enrollment limited to students with a major in Education.
Enrollment limited to graduate level students.
Enrollment limited to students in a Doctor of Philosophy degree.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale.

EDCD 990: Advanced Internship in Counseling Leadership. 3 credits.
Provides supervised practice in counseling leadership setting or position. Emphasizes counseling leadership in practice. Notes: Biweekly class emphasizes topical seminars and supervision. Offered by School of Education. May not be repeated for credit.

Recommended Prerequisite: Admission to the Ph.D. in Education program, Counseling and Development specialization; EDCD 628 or equivalent; EDCD 895.

Registration Restrictions:
Enrollment limited to students with a major in Education.
Enrollment limited to students in a Doctor of Philosophy degree.

Schedule Type: Internship

Grading:
This course is graded on the Graduate Special scale.

EDCD 991: Advanced Internship in Counseling. 6 credits.
Provides an intensive multicultural social justice oriented field based supervised experience. Emphasizes intensive use of multicultural competencies in practice, supervision, and program development and evaluation in order to address social justice issues for clients in school or community settings. Offered by School of Education. May not be repeated for credit.

Recommended Prerequisite: Admission to the Ph.D. in Education program, Counseling and Development specialization; EDCD 628 or equivalent; EDCD 895 and EDCD 896.

Registration Restrictions:
Enrollment limited to students with a major in Education.
Enrollment limited to graduate level students.
Enrollment limited to students in a Doctor of Philosophy degree.

Schedule Type: Internship

Grading:
This course is graded on the Graduate Regular scale.

EDCD 994: Advanced Internship in Social Justice. 3 credits.
Provides opportunities to implement programs and strategies to affect social justice for clients in school or community settings. Notes: Biweekly class emphasizes topical seminars and supervision. Offered by School of Education. May not be repeated for credit.

Recommended Prerequisite: Admission to the PhD in Education program, Counseling and Development specialization; EDCD 628 or equivalent; EDCD 895.

Registration Restrictions:
Enrollment is limited to students with a major in Education.
Enrollment limited to students in a Doctor of Philosophy degree.

Schedule Type: Internship

Grading:
This course is graded on the Graduate Special scale.

Criminology (CRIM)

100 Level Courses

CRIM 100: Introduction to Criminal Justice. 3 credits.
Overview of the American system of criminal justice, covering theories of justice, criminal law, policing, courts and associated pre and post-trial legal processes, punishment and corrections, and juvenile justice. Required for all criminology majors and minors. Offered by Criminology, Law and Society. Limited to three attempts.

Mason Core: Social/Behavioral Sciences

Specialized Designation: Mason Impact.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale.

200 Level Courses

CRIM 210: Introduction to Criminology. 3 credits.
Explores and evaluates how crime is defined and measured, and examines crime patterns and trends. Provides an overview and critical assessment of the major theories of crime causation. Notes: CRIM majors who are concentrating in criminal justice are strongly encouraged to take this course before or during the first semester of taking upper-level courses in the concentration. Offered by Criminology, Law and Society. Limited to three attempts.

Recommended Prerequisite: CRIM 100.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale.

CRIM 220: Introduction to Law and Society. 3 credits.
Introduces the relationship between law and society. Discusses theoretical perspectives from a number of social science disciplines. Promotes a foundational understanding of the concept of law and the origins, development, and role of law in society, particularly outside of formal legal institutions. Limited to three attempts. Equivalent to IT 357.

Recommended Prerequisite: CRIM 100.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale.

CRIM 304: Computer Crime, Forensics, and Auditing. 3 credits.

CRIM 305: Crime and Crime Policy. 3 credits.
Examines the development of crime policy, including the influence of crime trends, politics, public opinion, media, criminological theory, and empirical research. Considers the effectiveness of crime policy. Offered by Criminology, Law and Society. Limited to three attempts.

Recommended Prerequisite: CRIM 100

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale.

CRIM 306: Criminal Justice Ethics. 3 credits.
Analyzes ethical principles relevant for those working in criminal justice. Required for all criminology majors. Offered by Criminology, Law and Society. Limited to three attempts.

Recommended Prerequisite: CRIM 100

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale.

CRIM 307: Social Inequality, Crime, and Justice. 3 credits.
Explores the significance of social inequality (especially race and gender inequality) for several crime and criminal justice issues. Examines variations in criminal offending and victimization, and explores disparities in criminal justice processing. Offered by Criminology, Law and Society. Limited to three attempts.

Recommended Prerequisite: CRIM 100

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale.

CRIM 308: Human Rights and Justice. 3 credits.
Studies the norms, laws, and systems for the promotion and protection of human rights. Provides a foundation for understanding historical, legal, political, economic, and ethical aspects of human rights. Examines ideological and cultural perspectives, sources of violations, the United Nations, regional and national mechanisms, special issues (e.g., women, torture, children, minorities), and the role of nongovernmental organizations. Offered by Criminology, Law and Society. Limited to three attempts.

Recommended Prerequisite: CRIM 100

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale.

CRIM 310: Introduction to the Intelligence Community. 3 credits.
Introduces students to the structure, function, and process of the intelligence community including the basic skills in writing, research, and

300 Level Courses

CRIM 301: Public Law and the Judicial Process. 3 credits.
Covers American judicial organization and operation, role of the Supreme Court in policy formation, and selected constitutional principles. Offered by Criminology, Law and Society. Limited to three attempts. Equivalent to GOVT 301.

Recommended Prerequisite: CRIM 100

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale.

CRIM 302: Delinquency. 3 credits.
Presents theories of juvenile delinquency and societal reactions to it, gender differences in rates and types, historical overview, development of juvenile justice system, and critical assessment of juvenile justice and its alternative. Offered by Criminology, Law and Society. Limited to three attempts.

Recommended Prerequisite: CRIM 100

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale.

CRIM 303: Criminal Justice Administration. 3 credits.
Examines problems of criminal justice administration, including organization, planning, decision-making, and change. Required for all criminology majors. Offered by Criminology, Law and Society. Limited to three attempts.

Recommended Prerequisite: CRIM 100

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale.

CRIM 304: Computer Crime, Forensics, and Auditing. 3 credits.
Covers computer crime, relevant laws, agencies, standards, auditing, logging, forensics, and related software. Explores legal principles such as chain of evidence, electronic document discovery, eavesdropping, and entrapment. Hands-on experience with forensics tools. Offered by Criminology, Law and Society. Limited to three attempts. Equivalent to IT 357.

Recommended Prerequisite: CRIM 100

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale.

CRIM 305: Crime and Crime Policy. 3 credits.
Examines the development of crime policy, including the influence of crime trends, politics, public opinion, media, criminological theory, and empirical research. Considers the effectiveness of crime policy. Offered by Criminology, Law and Society. Limited to three attempts.

Recommended Prerequisite: CRIM 100

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale.

CRIM 306: Criminal Justice Ethics. 3 credits.
Analyzes ethical principles relevant for those working in criminal justice. Required for all criminology majors. Offered by Criminology, Law and Society. Limited to three attempts.

Recommended Prerequisite: CRIM 100

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale.

CRIM 307: Social Inequality, Crime, and Justice. 3 credits.
Explores the significance of social inequality (especially race and gender inequality) for several crime and criminal justice issues. Examines variations in criminal offending and victimization, and explores disparities in criminal justice processing. Offered by Criminology, Law and Society. Limited to three attempts.

Recommended Prerequisite: CRIM 100

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale.

CRIM 308: Human Rights and Justice. 3 credits.
Studies the norms, laws, and systems for the promotion and protection of human rights. Provides a foundation for understanding historical, legal, political, economic, and ethical aspects of human rights. Examines ideological and cultural perspectives, sources of violations, the United Nations, regional and national mechanisms, special issues (e.g., women, torture, children, minorities), and the role of nongovernmental organizations. Offered by Criminology, Law and Society. Limited to three attempts.

Recommended Prerequisite: CRIM 100

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale.

CRIM 310: Introduction to the Intelligence Community. 3 credits.
Introduces students to the structure, function, and process of the intelligence community including the basic skills in writing, research, and
presentation used in intelligence analysis. Required for all intelligence analysis minors. Offered by Criminology, Law and Society. Limited to three attempts.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale.

**CRIM 312: Intelligence Analysis Techniques.** 3 credits.
Introduces the key analytical techniques used by entry-level analysts in the Intelligence community. Offered by Criminology, Law and Society. Limited to three attempts.

**Registration Restrictions:**
**Required Prerequisites:** CRIM 310D or L310.
D Requires minimum grade of D.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale.

**CRIM 315: Research Methods and Analysis in Criminology.** 3 credits.
Provides an introduction to research design, methods, and analysis in the field of criminology. Students learn to understand, interpret, and critique quantitative and qualitative research approaches, and become intelligent consumers of research. Notes: This course does not meet the College's IT requirements. Offered by Criminology, Law and Society. Limited to three attempts.

**Specialized Designation:** Mason Impact.

**Recommended Prerequisite:** CRIM 100.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale.

**CRIM 320: Crime and Place.** 3 credits.
Focuses on the analysis of locations that attract and repel crime, displacement of crime, and identifying and measuring crime concentrations. Offered by Criminology, Law and Society. Limited to three attempts.

**Recommended Prerequisite:** CRIM 100.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale.

**CRIM 325: Hate Crime.** 3 credits.
Provides an introductory understanding of the definitions of hate crime; extremist groups and individuals; reporting, investigation, and prosecution of hate crimes; and hate crime policy and legislation. Offered by Criminology, Law and Society. Limited to three attempts.

**Recommended Prerequisite:** CRIM 100.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale.

**CRIM 350: Counterintelligence.** 3 credits.
Introduces the legal authority, objectives, and guidelines of the counterintelligence discipline. Covers the investigative, defensive, offensive, and collection activities of the counterintelligence function. Notes: Elective course for the Intelligence Analysis minor. Offered by Criminology, Law and Society. Limited to three attempts.

**Registration Restrictions:**
**Required Prerequisites:** CRIM 310D or L310.
D Requires minimum grade of D.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale.

**400 Level Courses**

**CRIM 400: Applied Criminal Psychology.** 3 credits.
Uses overview of psychological and criminological theories to apply behavioral science theory to practical application in forensic settings. Focuses on analysis of various crime scenes and characteristics of offenders. Offered by Criminology, Law and Society. Limited to three attempts.

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale.

**CRIM 401: Policing in America.** 3 credits.
Fundamental issues relevant to contemporary public policing in America: role and history of police; impact on crime, disorder, and other social problems; discretion and its control; moral hazards; police legitimacy and public support; police culture and the police organization; and community policing. Offered by Criminology, Law and Society. Limited to three attempts.

**Recommended Prerequisite:** CRIM 100

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale.

**CRIM 402: Punishment and Corrections.** 3 credits.
Covers theories on forms of punishment systems; punishment and corrections as a product of historical, cultural, and political changes; differences by race and gender in punishment and corrections; problems of social control and violence in prisons; alternative rehabilitation; and community prevention strategies. Offered by Criminology, Law and Society. Limited to three attempts.

**Recommended Prerequisite:** CRIM 100

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale.

**CRIM 403: Community Corrections.** 3 credits.
Studies the purposes and goals of community-based corrections and its various components, including pretrial diversion, probation, parole, and emerging alternatives to traditional incarceration. Addresses issues related to offenders returning to the community and critical issues facing jails, community corrections, and the management of offenders in
community settings. Examines the role of community corrections within the broader correctional system. Offered by Criminology, Law and Society. Limited to three attempts.

**Recommended Prerequisite:** CRIM 100

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale.

**CRIM 404: Crime Victims and Victimization.** 3 credits.
Explores experiences of crime victims, distribution of the risks of victimization, and causes and consequences of victimization. Also considers nature and influence of victim's rights advocates. Offered by Criminology, Law and Society. Limited to three attempts.

**Recommended Prerequisite:** CRIM 100

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale.

**CRIM 405: Law and Justice around the World.** 3 credits.
Comparative inquiry into the models of legal and justice systems around the world. Considers how social and legal norms are created, and how different societies exercise powers of social control. Evaluates justice models in action, including law and courts, policing, corrections, and juvenile justice. Offered by Criminology, Law and Society. Limited to three attempts.

**Mason Core:** Global Understanding

**Recommended Prerequisite:** CRIM 100

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale.

**CRIM 406: Family Law and the Justice System.** 3 credits.
Introduction to the elements of family law, and exploration of its influence on American social life and contemporary notions of justice. Topics include marriage and parenting, divorce, custody and support, nontraditional families, and domestic violence. Offered by Criminology, Law and Society. Limited to three attempts.

**Recommended Prerequisite:** CRIM 100

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale.

**CRIM 407: Advanced Topics in Law and Society.** 3 credits.
Provides an in-depth examination of the law's role in social life to deepen students' appreciation of the law in action. Focuses on scholarly research that describes and explains how legal actors, processes, and institutions operate in the world. Topics include: theories of legal change, law's relationship to class, gender, and race, and law, culture, and identity. Offered by Criminology, Law and Society. Limited to three attempts.

**Specialized Designation:** Topic Varies

**Recommended Prerequisite:** CRIM 100 or GOVT 301

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale.

**CRIM 408: Criminal Courts.** 3 credits.
Studies the workings, advantages, and frailties of criminal courts, and explores whether the system works effectively and efficiently. Offered by Criminology, Law and Society. Limited to three attempts.

**Recommended Prerequisite:** CRIM 100 or GOVT 301

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale.

**CRIM 409: Community Policing.** 3 credits.
Study of community policing, particularly in the United States. Covers history and development of community policing, community relations, problem solving, and issues of organizational change. Offered by Criminology, Law and Society. Limited to three attempts.

**Recommended Prerequisite:** CRIM 100

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale.

**CRIM 410: Criminal Investigations.** 3 credits.
Focuses on criminal investigations and the role of the criminal investigator in the criminal justice system. Offered by Criminology, Law and Society. Limited to three attempts.

**Recommended Prerequisite:** CRIM 100

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale.

**CRIM 411: Innovations in Policing.** 3 credits.
New developments in law enforcement's response to technical, legal, and social change. Examines law enforcement policies and practices in the past and present, and directions for the future. Offered by Criminology, Law and Society. Limited to three attempts.

**Recommended Prerequisite:** CRIM 100

**Schedule Type:** Lecture

**Grading:**
This course is graded on the Undergraduate Regular scale.

**CRIM 412: Controversial Legal Issues.** 3 credits.
Focuses on the study of law as an institution that continuously interacts with other social institutions at the individual, community, state, and federal levels. Examines how constitutional and statutory laws are interpreted by the courts to determine and define the law through contemporary, controversial, legal issues. Explores how the courts, using the law, resolve today's most controversial issues. Offered by Criminology, Law and Society. Limited to three attempts.

**Recommended Prerequisite:** CRIM 100
CRIM 423: Constitutional Law: Civil Rights and Liberties. 3 credits.
Studies First Amendment freedoms of speech, press, assembly, association, and religion; the right to privacy; and Fourteenth Amendment right to equal protection. Offered by Criminology, Law and Society. Limited to three attempts. Equivalent to GOVT 423.

Recommended Prerequisite: CRIM 100

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale.

CRIM 424: Constitutional Law: Criminal Process and Rights. 3 credits.
Studies constitutional law pertaining to the rights of the criminally accused from investigation and evidence through attorney, trial, and punishment stages at federal and state levels. Required for all criminology majors. Offered by Criminology, Law and Society. Limited to three attempts.

Recommended Prerequisite: CRIM 100

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale.

CRIM 425: Criminal Justice Management. 3 credits.
Explains the management function for current and future criminal justice managers. Emphasizes communication, leadership skills, and organizational development. Offered by Criminology, Law and Society. Limited to three attempts.

Recommended Prerequisite: D or higher in CRIM 100

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale.

CRIM 430: Criminal Law. 3 credits.
An overview of the definitions and elements of crimes, defense strategies, and the differences in criminal law across states. Offered by Criminology, Law and Society. Limited to three attempts.

Recommended Prerequisite: CRIM 100

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale.

CRIM 460: Surveillance and Privacy in Contemporary Society. 3 credits.
Philosophical perspectives, historical context, technological developments, and institutional changes that surround controversies about privacy and surveillance in contemporary society. Explores public and private institutions conducting surveillance, how they calculate and manage risk, and legal constraints on surveillance activities. Offered by Criminology, Law and Society. Limited to three attempts. Equivalent to GOVT 460.

Recommended Prerequisite: CRIM 100, 306, and 315.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale.

CRIM 471: Prevention and Deterrence of Crime. 3 credits.
Theoretical and practical strategies for crime prevention and deterrence.
Discusses social, environmental, and mechanical developments, police courts, and correctional elements of law enforcement in terms of current effectiveness and future potential for crime prevention. Offered by Criminology, Law and Society. Limited to three attempts.

Recommended Prerequisite: CRIM 100

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale.

CRIM 475: Theory and Politics of Terrorism. 3 credits.
Explores origins of terrorism, tracing development from early states to a modern mode of conflict. Presents national, regional, and global perspectives. Offered by Criminology, Law and Society. Limited to three attempts.

Recommended Prerequisite: CRIM 100

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale.

CRIM 479: Preparation for Internship. 3 credits.
Preparation for internship in a justice organization or justice-related work activity. Students develop a relationship with a prospective internship sponsor and develop a plan for the internship and the research to be reported. Notes: This course is only open to students majoring in Criminology, Law and Society, and should only be taken by students who intend to complete an internship. Offered by Criminology, Law and Society. Limited to three attempts.

Recommended Prerequisite: CRIM 100, 306, and 315.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale.
CRIM 480: Internship. 6-12 credits.
Application of classroom learning to an applied justice setting. Students maintain daily journals, conduct research, and deliver written and oral reports. Notes: Before enrolling, students must have a plan approved by the instructor. Seminars are held several times during the semester for discussion and oral presentation. Minimum of 45 hours of on-the-job work time required for each credit. Offered by Criminology, Law and Society. May be repeated within the degree for a maximum 12 credits.

Recommended Prerequisite: CRIM 100, 306, 315, 479, and approval of department.

Schedule Type: Internship
Grading:
This course is graded on the Undergraduate Regular scale.

CRIM 485: Study Abroad. 1-12 credits.
Study Abroad. Course topics, content, and locations vary. Offered by Criminology, Law and Society. May be repeated within the degree for a maximum 12 credits.

Specialized Designation: Topic Varies
Recommended Prerequisite: CRIM 100.

Schedule Type: Lecture
Grading:
This course is graded on the Undergraduate Regular scale.

CRIM 490: Special Topics. 1-3 credits.
Recent developments in the field. Notes: Topics vary. May be used to fulfill requirements for different concentrations in the BS in criminology, law, and society depending on the topic. May be repeated when topic is different. Offered by Criminology, Law and Society. May be repeated within the term for a maximum 15 credits.

Specialized Designation: Topic Varies
Recommended Prerequisite: CRIM 100.

Schedule Type: Lecture
Grading:
This course is graded on the Undergraduate Regular scale.

CRIM 491: Honors Seminar I. 3 credits.
Course includes readings, individual or group projects, and discussion of seminar papers. Notes: First of a two-course sequence, subject varies. May be repeated when topic varies. Offered by Criminology, Law and Society. May be repeated within the degree for a maximum 6 credits.

Specialized Designation: Mason Impact.
Recommended Prerequisite: Acceptance to pursue honors in the major.

Schedule Type: Seminar
Grading:
This course is graded on the Undergraduate Regular scale.

CRIM 492: RS: Honors Seminar II. 3 credits.
Course includes readings and discussion of seminar papers, leading to a research project under the direction of a faculty member. Notes: Second of a two-course sequence, subject varies. Oral exam on the research and report may be required. May be repeated when topic varies. Offered by Criminology, Law and Society. May be repeated within the degree for a maximum 6 credits.

Recommended Prerequisite: CRIM 100 and CRIM 315.

Schedule Type: Independent Study
Grading:
This course is graded on the Undergraduate Regular scale.

CRIM 495: Capstone in Criminology, Law and Society. 3 credits.
Provides an in-depth examination of a historical and contemporary issues facing criminology and law and society scholars. Focuses on the philosophies, practices, and procedures used by individuals and organizations and uses a variety of materials, experiences and resources. Offered by Criminology, Law and Society. Limited to three attempts.

Mason Core: Synthesis
Specialized Designation: Mason Impact., Writing Intensive in Major
Recommended Prerequisite: CRIM 100, ENGL 101/ENGH 101; ENGL 302/ENGH 302; COMM 100, or 104; 60 credits.

Schedule Type: Lecture, Recitation
Grading:
This course is graded on the Undergraduate Regular scale.

CRIM 498: Research Practicum. 1-3 credits.
Supervised research experience with a professor in a non-classroom setting. Offers students an opportunity to gain valuable research experience and training in research. Students are required to work 45 hours (across the semester) per credit. Notes: Open to majors in CRIM with 60 credits and permission of instructor and department. Offered by Criminology, Law and Society. May be repeated within the term for a maximum 6 credits.

Recommended Prerequisite: CRIM 100 and CRIM 315.

Registration Restrictions:
Enrollment is limited to students with a major, minor, or concentration in Criminology, Law and Society.

Schedule Type: Independent Study
Grading:
This course is graded on the Undergraduate Regular scale.

CRIM 499: Independent Study. 1-3 credits.
Reading and research on a specific topic under the direction of a faculty member. Notes: Open to majors in CRIM with 90 credits and permission of instructor and department. Written report is required; an oral exam or report may also be required. Degree requirements to be fulfilled by a particular independent study determined by student’s advisor. Offered by Criminology, Law and Society. May be repeated within the term for a maximum 9 credits.

Recommended Prerequisite: CRIM 100 and 90 credits.

Schedule Type: Independent Study
Grading:
This course is graded on the Undergraduate Regular scale.
500 Level Courses

**CRIM 509: Justice Organizations and Processes.** 3 credits.
Examines structures, practices, and performance of organizations involved in administration of justice: law enforcement, courts and legal agencies, corrections, regulatory and related agencies, and private organizations. Offered by Criminology, Law and Society. May not be repeated for credit. Equivalent to PUAD 509.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Seminar

**Grading:**
This course is graded on the Graduate Regular scale.

**CRIM 510: Policing in a Democratic Society.** 3 credits.
Fundamental issues in policing a democratic society: police mission, subculture, performance measurement, moral hazards, discretion, impact on crime and disorder, legitimacy, community policing, and other reforms. Offered by Criminology, Law and Society. May not be repeated for credit.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Seminar

**Grading:**
This course is graded on the Graduate Regular scale.

**CRIM 511: Evidence-based Crime and Justice Policy.** 3 credits.
Examines the role that science and research play in criminal justice agencies, policies and practices. Includes understanding the strengths and limitations of the evidence-based practices framework, reviewing evidence about the effectiveness, fairness, theoretical underpinnings, and efficiency of various policies and practices to deal with crime and justice issues, and understanding how research is translated into policy and practice. Offered by Criminology, Law and Society. May not be repeated for credit.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Seminar

**Grading:**
This course is graded on the Graduate Regular scale.

**CRIM 512: Implementing Crime and Justice Policy.** 3 credits.
Introduces students to the art and science behind implementing policies in today's criminal justice organizations. While considering effective, best, and evidence-based practices, students will learn about both processes and outcomes related to adopting, adapting, implementing and sustaining reform in justice agencies. Key concepts include technology transfer, transportability, uptake, diffusion, fidelity, and change. Offered by Criminology, Law and Society. May not be repeated for credit.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Seminar

**Grading:**
This course is graded on the Graduate Regular scale.

**CRIM 513: Leadership in Justice Organizations.** 3 credits.
Explores theory and evidence of various approaches to leadership and management as applied in justice organizations. Examples of leadership approaches include, trait, skills, style, contingency, path-goal, transformational, servant, team, and psychodynamic. Practical aspects of coping with the risks of leadership are included. Involves case studies and student self-analysis using diagnostic tools. Offered by Criminology, Law and Society. May not be repeated for credit.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Seminar

**Grading:**
This course is graded on the Graduate Regular scale.

**CRIM 514: Legal and Ethical Issues in Criminal Justice.** 3 credits.
Legal and ethical issues in the making and administration of criminal justice policy in the United States. Covers the legal framework governing each issue, competing values influencing policies and practice, and the history of legal reforms in the criminal justice system. Recurrent underlying themes are legalized discretion, gender and racial equality, due process, and procedural justice. Offered by Criminology, Law and Society. May not be repeated for credit.

**Registration Restrictions:**
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Seminar

**Grading:**
This course is graded on the Graduate Regular scale.
Grading:
This course is graded on the Graduate Regular scale.

CRIM 515: Criminal Justice Research Methods and Data Analysis. 3 credits. Methods of scientific inquiry applied to criminal justice issues. Includes formulation of research questions, logic of inquiry, research design, observation, measurement, and introduction to social statistics and applications to criminal justice data analysis. Learn to critique research and present data in agency reports. Offered by Criminology, Law and Society. May not be repeated for credit.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Seminar

Grading:
This course is graded on the Graduate Regular scale.

CRIM 516: Evaluation of Crime and Justice Policies and Practices. 3 credits. The major principles and approaches of program evaluation applied to crime and justice policies. Presents a conceptual framework for problem evaluation. Explores issues and methods for developing evaluation questions and assessing various aspects of program theory, operation and outcomes. Offered by Criminology, Law and Society. May not be repeated for credit.

Recommended Prerequisite: CRIM 515.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Seminar

Grading:
This course is graded on the Graduate Regular scale.

CRIM 517: Research Practicum in Justice Policy and Practice. 3 credits. Student-initiated research project supervised by instructor. Student will identify a client criminal justice organization or stakeholder group and conduct useful research on an issue of interest to that organization or group, producing a policy-oriented white paper suitable for delivery to the organization or group. Offered by Criminology, Law and Society. May not be repeated for credit.

Recommended Prerequisite: CRIM 515, CRIM 516.

Registration Restrictions:
Enrollment limited to students with a major in Criminal Justice or Criminology, Law and Society.

Enrollment is limited to Graduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Seminar

Grading:
This course is graded on the Graduate Regular scale.

CRIM 521: The Constitution, Criminal Procedure, and Security. 3 credits. Focuses on understanding legal doctrines that form basis of U.S. constitutional criminal procedural rights and how doctrines develop, why courts rule as they do, and evaluating strengths, weaknesses of rights. For MS Students. Offered by Criminology, Law and Society. May not be repeated for credit.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Seminar

Grading:
This course is graded on the Graduate Regular scale.

CRIM 523: Law and Social Control. 3 credits. Competing conceptions of law, political systems, and social control. Intellectual traditions behind social control, its definitions, and mechanisms for regulating public and private behavior, by both individuals and organizations in society. For MS Students. Offered by Criminology, Law and Society. May not be repeated for credit.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Seminar

Grading:
This course is graded on the Graduate Regular scale.

CRIM 541: Conduct of Justice Organizations at the Street Level. 3 credits. How justice organizations behave at lowest levels, where service is delivered and discretion is greatest (suspects, victims, witnesses, police officers, prison guards, parole officers, attorneys, and others who interact with the justice system). For MS students. Offered by Criminology, Law and Society. May not be repeated for credit.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Seminar

Grading:
This course is graded on the Graduate Regular scale.

CRIM 544: Corrections. 3 credits.
Covers the social institutions and processes involved in punishment, control, and behavior change. Reviews the consequences of different policies and organizational approaches. For MS students. Offered by Criminology, Law and Society. May not be repeated for credit.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Seminar
Grading:
This course is graded on the Graduate Regular scale.

CRIM 545: Crime Analysis. 3 credits.
History, theory, and techniques of crime analysis and crime mapping. Includes routine activities, pattern, and rational choice theories. Review of data types. Application of crime analysis to crime control tactics, strategies, and administration. Offered by Criminology, Law and Society. May not be repeated for credit.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Seminar
Grading:
This course is graded on the Graduate Regular scale.

CRIM 561: Politics of Crime Policy. 3 credits.
Explores political context of crime policy. Examines influence of public opinion, interest groups, scientific community, and other political forces. In-depth, case-study comparison of several crime policies. For MS students. Offered by Criminology, Law and Society. May not be repeated for credit.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Seminar
Grading:
This course is graded on the Graduate Regular scale.

CRIM 562: Crime and Place. 3 credits.
Examines the concentration of crime at places, including geographic, environmental, and sociological features that attract or repel crime.

Discusses theoretical explanations, crime prevention strategies, and the measurement of crime concentrations. For MS students. Offered by Criminology, Law and Society. May not be repeated for credit.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Seminar
Grading:
This course is graded on the Graduate Regular scale.

CRIM 595: Special Topics. 3 credits.
Recent developments in the field or topics not covered by regularly listed courses. The course content varies. For MS students. Offered by Criminology, Law and Society. May be repeated within the term for a maximum 9 credits.

Specialized Designation: Topic Varies
Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Seminar
Grading:
This course is graded on the Graduate Regular scale.

700 Level Courses
CRIM 700: Values, Ethics, and Criminal Justice Policy. 3 credits.
Overview of important public values and classical and contemporary theories for understanding how these values apply to the criminal justice process. Offered by Criminology, Law and Society. May not be repeated for credit. Equivalent to GOVT 726.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Seminar
Grading:
This course is graded on the Graduate Regular scale.

CRIM 710: Criminological Theory. 3 credits.
Summarizes key principles and development of major criminological theories and evaluates the state of the empirical evidence for each one. Provides a critical assessment of different perspectives and identifies weaknesses and gaps. Offered by Criminology, Law and Society. May not be repeated for credit.

Registration Restrictions:
Enrollment limited to students with a class of Graduate or Non-Degree.
Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Seminar

**Grading:**
This course is graded on the Graduate Regular scale.

**CRIM 720: Law and Social Science.** 3 credits.
Examines social science approaches to the law and the social processes that affect the behavior of legal actors and institutions. Includes theory and research in the law and society tradition. Offered by Criminology, Law and Society. May not be repeated for credit.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Seminar

**Grading:**
This course is graded on the Graduate Regular scale.

Focuses on understanding legal doctrines that form basis of U.S. constitutional procedural rights and how doctrines develop, why courts rule as they do, and evaluating strengths, weaknesses of rights. Offered by Criminology, Law and Society. May not be repeated for credit.

**Recommended Prerequisite:** CRIM 720 or GOVT 728, or permission of instructor.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Seminar

**Grading:**
This course is graded on the Graduate Regular scale.

**CRIM 723: Law and Social Control.** 3 credits.
Competing conceptions of law, political systems, and social control. Intellectual traditions behind social control, its definitions, and mechanisms for regulating public and private behavior, by both individuals and organizations in society. Offered by Criminology, Law and Society. May not be repeated for credit.

**Recommended Prerequisite:** CRIM 720 or GOVT 728, or permission of instructor.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Seminar

**Grading:**
This course is graded on the Graduate Regular scale.

**CRIM 730: Courts and Constitutional Law.** 3 credits.
Role, influence, and effects of U.S. courts in creating constitutional norms and interpreting them. Special attention to First and Fourteenth Amendments, Commerce Clause. Analyzes leading court cases. Offered by Criminology, Law and Society. May not be repeated for credit.

**Recommended Prerequisite:** CRIM 720 or GOVT 728, or permission of instructor.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Seminar

**Grading:**
This course is graded on the Graduate Regular scale.

**CRIM 740: Justice Organizations.** 3 credits.
Understanding and evaluating criminal justice policies, practices, and structures in an organizational context. Draws on organizational theory and empirical research to explore the challenges and opportunities to shape criminal justice processes and outcomes. Offered by Criminology, Law and Society. May not be repeated for credit. Equivalent to PUAD 790.

**Recommended Prerequisite:** CRIM 740 or PUAD 790, or permission of instructor.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Seminar

**Grading:**
This course is graded on the Graduate Regular scale.

**CRIM 741: Street Level Criminal Justice.** 3 credits.
How justice organizations behave at lowest levels, where service is delivered and discretion is greatest (suspects, victims, witnesses, police officers, prison guards, parole officers, attorneys, and others who interact with the justice system). Offered by Criminology, Law and Society. May not be repeated for credit. Equivalent to PUAD 723.

**Recommended Prerequisite:** CRIM 740 or PUAD 790, or permission of instructor.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Seminar

**Grading:**
This course is graded on the Graduate Regular scale.

**CRIM 742: Leadership in Justice and Security Organizations.** 3 credits.
Examines leadership theories, and explores fundamental questions about leadership in justice and security organizations today. Offered by Criminology, Law and Society. May not be repeated for credit.

**Recommended Prerequisite:** CRIM 740 or GOVT 790, or permission of instructor.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

**Schedule Type:** Seminar

**Grading:**
This course is graded on the Graduate Regular scale.
CRIM 744: Corrections. 3 credits.
Covers the social institutions and processes involved in punishment, control, and behavior change. Reviews the consequences of different policies and organizational approaches. Offered by Criminology, Law and Society. May not be repeated for credit.

Recommended Prerequisite: CRIM 740.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Seminar

Grading:
This course is graded on the Graduate Regular scale.

CRIM 760: Evidence-Based Crime Policy. 3 credits.
Explores the theoretical and empirical support for crime and justice interventions and policies, and examines the translational link between research and criminal justice practices. Offered by Criminology, Law and Society. May not be repeated for credit.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Seminar

Grading:
This course is graded on the Graduate Regular scale.

CRIM 761: Politics of Crime Policy. 3 credits.
Explores political context of crime policy. Examines influence of public opinion, interest groups, scientific community, and other political forces. In-depth, case-study comparison of several crime policies. Offered by Criminology, Law and Society. May not be repeated for credit.

Recommended Prerequisite: CRIM 760/GOVT 792 or permission of instructor.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Seminar

Grading:
This course is graded on the Graduate Regular scale.

CRIM 764: Sentencing. 3 credits.
Explores theories of punishment and sentencing practices. Examines political, sociological, criminological, and organizational influences on sentencing processes and decisions. Offered by Criminology, Law and Society. May not be repeated for credit.

Recommended Prerequisite: CRIM 760.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Seminar

Grading:
This course is graded on the Graduate Regular scale.

CRIM 760: Research Methods. 3 credits.
Introduces logic and methods of scientific inquiry in justice, law, and crime policy. Includes conceptualization of research questions, observation, measurement, research design, and principles of causality. Evaluation of extant research according to scientific principles. Offered by Criminology, Law and Society. May not be repeated for credit.

Recommended Prerequisite: Undergraduate course in social science research methods or statistics, or permission of instructor.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Seminar

Grading:
This course is graded on the Graduate Regular scale.

CRIM 780: Justice Program Evaluation. 3 credits.
Practical exploration of assessment techniques used in evaluating need for and consequences of justice programs and policies. Design and measurement, interpreting and presenting results. Offered by Criminology, Law and Society. May not be repeated for credit. Equivalent to PUAD 791.

Recommended Prerequisite: PUAD 511/612, CRIM 780, or two graduate-level statistics courses; or permission of instructor.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may not enroll.

Schedule Type: Seminar

Grading:
This course is graded on the Graduate Regular scale.

CRIM 782: Statistics I. 3 credits.
Focuses on descriptive and inferential statistical methods and theory with application to problems within the justice field. Explores the logic of inferential statistical methods in general and null hypothesis significance testing in particular. Covers widely used statistical procedures within the
applied social sciences. Offered by Criminology, Law and Society. May not be repeated for credit.

**Recommended Prerequisite:** An undergraduate social science research methods course or an undergraduate statistics course.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Seminar

**Grading:**
This course is graded on the Graduate Regular scale.

**CRIM 783:** *Statistics II.* 3 credits.
Focuses on the theory and application of multivariate regression methods as applied within the justice field. Topics include tests for and consequences of violating assumptions of the generalized linear model, dummy coding of categorical variables, testing of interaction effects, logistic regression, ordered and multinominal logit, and missing data analysis. Offered by Criminology, Law and Society. May not be repeated for credit.

**Recommended Prerequisite:** CRIM 782 or a comparable course.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Seminar

**Grading:**
This course is graded on the Graduate Regular scale.

**CRIM 784:** *Experimental Criminology.* 3 credits.
Discusses the methodological, statistical, ethical, and practical concerns associated with experimental research designs in criminology. Offered by Criminology, Law and Society. May not be repeated for credit.

**Recommended Prerequisite:** CRIM 780.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Seminar

**Grading:**
This course is graded on the Graduate Regular scale.

**CRIM 790:** *Capstone in Policy and Practice.* 3 credits.
Student-initiated research project supervised by instructor. Students must work with a justice organization to conduct useful research and produce a policy-oriented white paper. Offered by Criminology, Law and Society. May not be repeated for credit.

**Recommended Prerequisite:** CRIM 780 or permission of instructor.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Independent Study

**Grading:**
This course is graded on the Graduate Regular scale.

**CRIM 795:** *Special Topics.* 3 credits.
Recent developments in field, or topics not covered by regularly listed courses. Notes: Topics vary. May be repeated when topic is different. Offered by Criminology, Law and Society. May be repeated within the term for a maximum 15 credits.

**Specialized Designation:** Topic Varies

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Seminar

**Grading:**
This course is graded on the Graduate Regular scale.

**CRIM 797:** *Professionalization Seminar.* 0 credits.
Introduces doctoral students to research, scholarship and teaching practices in the field to promote their professional development. Notes: Required for Ph.D. students. Offered by Criminology, Law and Society. May not be repeated for credit.

**Recommended Prerequisite:** Successful completion of 12 graduate level CRIM credits.

**Registration Restrictions:**
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

**Schedule Type:** Independent Study

**Grading:**
This course is graded on the Graduate Special scale.

**CRIM 799:** *Master’s Thesis.* 1-6 credits.
