Interested students should attend an information session early in their undergraduate career. For more information, visit the Graduate School of Education’s website (http://gse.gmu.edu/).

Admissions & Policies

Admissions

University-wide admissions policies can be found in the Undergraduate Admissions Policies section of this catalog.

To apply for this program, please complete the George Mason University Admissions Application (https://www2.gmu.edu/admissions-aid/apply-now/).

Policies

Students must fulfill all Requirements for Bachelor’s Degrees including the Mason Core.

The intensive writing requirement is fulfilled by taking PHYS 407 Senior Laboratory in Modern Physics (Mason Core), PHYS 410 Computational Physics Capstone (Mason Core), or ASTR 402 RS: Methods of Observational Astronomy (Mason Core), which are also capstone courses for the major.

For policies governing all undergraduate programs, see AP.5 Undergraduate Policies.

Double Majors

Students considering a double major with physics should discuss this option with the respective undergraduate coordinators.

Note that at least 18 credits used to fulfill the Physics, BS cannot be used to fulfill another major or minor. Some course substitutions are allowed for double majors, but these should be discussed with a physics advisor in advance.

Alternative Introductory Sequence

Normally, students who intend to major in physics should take the physics introductory sequence:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>PHYS 160</td>
<td>University Physics I (Mason Core)</td>
<td>3</td>
</tr>
<tr>
<td>PHYS 161</td>
<td>University Physics I Laboratory (Mason Core)</td>
<td>1</td>
</tr>
<tr>
<td>PHYS 260</td>
<td>University Physics II (Mason Core)</td>
<td>3</td>
</tr>
<tr>
<td>PHYS 261</td>
<td>University Physics II Laboratory (Mason Core)</td>
<td>1</td>
</tr>
</tbody>
</table>

Students who decide to major in physics after completing PHYS 243 College Physics I (Mason Core), PHYS 244 College Physics I Lab (Mason Core), PHYS 245 College Physics II (Mason Core) and PHYS 246 College Physics II Lab (Mason Core) are welcome, but are required...
to obtain written permission from the Department of Physics and Astronomy before a change of major can be approved.

Requirements

Degree Requirements

Total credits: minimum 120

Students should refer to the Admissions & Policies tab for specific policies related to this program.

Students must complete a total of 75 credits in the major (69 credits if completing a second major), including at least 11 credits in mathematics, with a minimum GPA of 2.00.

Students must complete the coursework described below and either select a concentration or select the "BS without Concentration" option:

Physics Core Courses

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>

PHYS 428 Relativity  

Lastly, select 3 credits from the following:

ASTR 403 Planetary Science  
ASTR 404 Galaxies and Cosmology  
ASTR 420 Exoplanets  

Total Credits 31-37

1 Fulfills the writing intensive requirement.
**ASTR 403** Planetary Science

**PHYS 306** Wave Motion and Electromagnetic Radiation

**PHYS 412** Solid State Physics and Applications

**Total Credits** 28-34

1. Fulfills the writing intensive requirement.

**Mason Core and Elective Credits**

In order to meet a minimum of 120 credits, this degree requires 45 (or 51 if completing a second major) additional credits, which may be applied toward any remaining Mason Core requirements (outlined below), Requirements for Bachelor’s Degrees, and elective courses. Students are strongly encouraged to consult with their advisors to ensure that they fulfill all requirements.

**Mason Core**

Some Mason Core requirements may already be fulfilled by the major requirements listed above. Students are strongly encouraged to consult their advisors to ensure they fulfill all remaining Mason Core requirements.

1. Most programs include the writing-intensive course designated for the major as part of the major requirements; this course is therefore not counted towards the total required for Mason Core.

2. Minimum 3 credits required.

**Honors**

**Honors in the Major**

Physics majors who have maintained an overall GPA of at least 3.50 in physics courses and a GPA of 3.50 in all courses taken at George Mason University may apply to the physics honors program when they complete the first semester of their junior year.

To graduate with honors in physics, a student is required to maintain a minimum GPA of 3.00 in physics courses and successfully complete PHYS 405 Honors Thesis in Physics I and PHYS 406 Honors Thesis in Physics II with a GPA of at least 3.50 and a grade of at least ‘A-’ in PHYS 406 Honors Thesis in Physics II. Please visit the department for details.

**Accelerated Master’s**

**Physics, BS/Curriculum and Instruction, Accelerated MEd (Secondary Education Physics concentration)**

**Overview**

Highly-qualified undergraduates may be admitted to the bachelor’s/accelerated master’s program and obtain both a BS in Physics and an MEd in Curriculum and Instruction, Secondary Education Physics Concentration in an accelerated time-frame after satisfactory completion of 149 credits. See AP.6.7 Bachelor’s/Accelerated Master’s Degrees for policies related to this program.

This accelerated option is offered jointly by the department of Physics and Astronomy and the School of Education.

Students in an accelerated degree program must fulfill all university requirements for the master’s degree. For policies governing all graduate degrees, see AP 6 Graduate Policies.

**Application Requirements**

Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in Graduate Admissions Policies. For information specific to this accelerated master’s program, see Application Requirements and Deadlines (https://cehd.gmu.edu/bachelors-accelerated-masters-program/).

**Accelerated Option Requirements**

Students complete the following courses in their senior year:

<table>
<thead>
<tr>
<th>Senior</th>
<th>Fall Semester</th>
<th>Credits</th>
<th>Spring Semester</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>SEED 540</td>
<td>3</td>
<td>EDRD 619</td>
<td>3</td>
</tr>
<tr>
<td></td>
<td>SEED 573</td>
<td>3</td>
<td>SEED 673</td>
<td>3</td>
</tr>
</tbody>
</table>

Total Credits 12

While undergraduate students, accelerated master’s students are able to apply two of the courses listed above to both the bachelor’s and master’s degrees. These courses are considered advanced standing for the MEd. A minimum grade of B must be earned to be eligible to count as advanced standing. The other two courses are taken as reserve graduate credit and do not apply to the undergraduate degree. Early in their final undergraduate semester, students must submit the Bachelor’s/Accelerated Master’s Transition Form to the CEHD Admissions Office and specify which of the four courses are to be designated as advanced standing and reserve graduate credit.
Physics, BS/Applied and Engineering Physics, Accelerated MS

Overview
This program allows academically strong undergraduates with a demonstrable commitment to research to obtain the Physics, BS and Applied and Engineering Physics, MS degrees by successfully completing 144 credits. Upon completion, students are well-prepared for entry into a professional school or a PhD program in physics or a related discipline.

Admitted students take selected graduate courses during their senior year and are able to use up to 6 graduate credits in partial satisfaction of requirements for the undergraduate degree. Upon completion and conferral of the bachelor’s degree and with satisfactory performance (grade of 'B' or better) in each of the graduate courses, students are given advanced standing in the master’s program and complete an additional 24 credits to receive the master’s degree.

For more detailed information, see AP.6.7 Bachelor’s/Accelerated Master’s Degrees. For policies governing all graduate degrees, see AP.6 Graduate Policies.

Application Requirements
Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in the Graduate Admission Policies section of this catalog.

Successful applicants will have completed at least 90 credits toward their undergraduate degree and 45 credits in physics major coursework. The physics major GPA must be at least 3.50. One or more recommendation letters from one or more research supervisors are also required. Interested applicants should submit a letter to the undergraduate physics coordinator requesting admission along with the aforementioned recommendation letter(s). Contact the physics undergraduate or graduate coordinator for further details.

Accelerated Option Requirements
At the beginning of the student’s final undergraduate semester, students must submit a bachelor’s/accelerated master’s transition form (http://registrar.gmu.edu/forms/) to the College of Science’s Office of Academic and Student Affairs (https://cos.gmu.edu/about/contact-us/). Students must begin their master’s program in the semester immediately following conferral of the bachelor’s degree.

Students must maintain an overall GPA of 3.00 or higher in graduate coursework.

Reserve Graduate Credit
While still in undergraduate status, a maximum of 6 additional graduate credits may be taken as reserve graduate credit and applied to the master’s program. Reserve graduate credits do not apply to the undergraduate degree.

Bachelor’s Degree (selected), Bioinformatics Management, Accelerated PSM

Overview
This degree option allows highly qualified George Mason University bachelor’s students to earn a Bioinformatics Management, PSM (https://catalog.gmu.edu/colleges-schools/science/systems-biology/bioinformatics-management-professional-science-masters/) degree in less time than if they had first graduated with a BS degree and then applied to the PSM program sequentially.

Admission and Processing Requirements
Students in the Biology, BS (https://catalog.gmu.edu/colleges-schools/science/biology/biology-bs/); Chemistry, BS (https://catalog.gmu.edu/colleges-schools/science/chemistry-biochemistry/chemistry-bs/); Computational and Data Sciences, BS (https://catalog.gmu.edu/colleges-schools/science/computational-data-sciences/computational-data-sciences-bs/); Neuroscience, BS (https://catalog.gmu.edu/colleges-schools/science/neuroscience-program/neuroscience-bs/); or Physics, BS (https://catalog.gmu.edu/colleges-schools/science/physics-astronomy/physics-bs/) with an overall GPA of at least 3.00 in their last 60 credits are welcome to apply to the Bioinformatics Management, PSM accelerated master’s program. Applicants to this accelerated master’s degree have previously taken courses in molecular biology, computer science, calculus, physical chemistry, and statistics. Students with deficiencies in one or more of these areas may be required to take additional courses from the undergraduate curriculum.

The GRE requirement is waived for students accepted into this accelerated program.

By the beginning of the undergraduate student’s senior year, they should submit a Graduate Application for Accelerated Master’s Program form (obtained from the College of Science’s Office of Academic and Student Affairs (https://cos.gmu.edu/about/contact-us/)).

By at least the beginning of their senior year, students should seek out the Bioinformatics Management, PSM (https://catalog.gmu.edu/colleges-schools/science/systems-biology/bioinformatics-management-professional-science-masters/) Program Director who will aid the student in choosing the appropriate graduate courses to take and help to prepare the student for graduate studies.

In their senior year, accelerated master’s students must complete the two graduate courses indicated on their Accelerated Master’s Program Application with a minimum grade of 3.00 in each course. They must maintain a minimum GPA of 3.00 in all coursework and in coursework applied to their major. In the semester specified on the application (around the completion and conferral of the undergraduate degree), students must submit the Bachelor’s/Accelerated Master’s Transition form (found on the Office of the University Registrar website (http://registrar.gmu.edu/forms/)) and will subsequently be admitted into graduate status.

Reserve Graduate Credits
Students admitted to this program may take graduate courses after completing 90 undergraduate credits, and up to 6 credits of appropriate graduate coursework may be used in partial satisfaction of the requirements for the undergraduate degree. If students earn at least a 3.00 GPA in these classes, they are granted advanced standing in the master’s program and must then complete an additional 25 credits to receive the master’s degree.

To apply these credits to the master’s degree, students must request that the credits be moved from the undergraduate degree to the graduate degree using the Bachelor’s/Accelerated Master’s Transition
form found on the Office of the University Registrar website (http://registrar.gmu.edu/forms/) (as noted above).

Students may take up to 6 additional approved graduate credits as reserve graduate credit. These credits do not apply to the undergraduate degree but will reduce the subsequent master's degree credits accordingly (e.g., with 6 credits counted towards undergraduate degree plus the maximum 6 reserve credits, the PSM could be completed with 19 post-bachelor's credits). The ability to take courses for reserve graduate credit is available to all high achieving undergraduates with the permission of the School of Systems Biology (https://catalog.gmu.edu/colleges-schools/science/systems-biology/).

Policies
For more detailed information on accelerated master's in general, see AP.6.7 Bachelor's/Accelerated Master's Degrees (https://catalog.gmu.edu/policies/academic/graduate-policies/#ap-6-7).

For policies governing all graduate programs, see AP.6 Graduate Policies (https://catalog.gmu.edu/policies/academic/graduate-policies/).

Physics, PhD

Email: gadvphys@gmu.edu
Website: physics.gmu.edu

The degree program contains a Standard Concentration for traditional physics programs that focus on Astrophysics, Condensed Matter Theory, Dynamical Systems/Biological Physics, High Energy Physics, Materials Physics, Space Sciences, and an Engineering Physics Concentration that combines the disciplines of physics, mathematics, and engineering. The doctoral students accepted into each concentration of the physics PhD program take a required set of core courses for the given concentration (see Requirements tab).

By working with the dissertation committee, a student in the Standard Concentration may choose to specialize in an emphasis area such as Astrophysics, Atomic Molecular and Optical Physics, Condensed Matter Experiment, Condensed Matter Theory, Dynamical Systems/Biological Physics, High Energy Physics, Materials Physics, Space Sciences, or others according to his or her particular interests. A student in the Engineering Physics Concentration may choose to specialize in Applied Mechanics (Fluids and Solids), or other applied and engineering physics areas. By the end of their first year, all students should pair with a faculty advisor who will guide them toward doctoral candidacy.

Admissions & Policies

Admissions
University-wide admissions policies can be found in the Graduate Admissions Policies section of this catalog.

To apply for this program, please complete the George Mason University Admissions Application (https://www2.gmu.edu/admissions-aid/apply-now/).

Those holding a baccalaureate degree in physics, astronomy, or engineering from a regionally accredited institution, who earned a GPA of 3.00 (out of 4.00) or higher in their last 60 credits, and have received acceptable scores on the GRE-GEN are invited to apply for admission. Three letters of recommendation must be submitted, preferably from former professors. The GRE subject test in physics is highly recommended for all interested applicants in the standard concentration who received their baccalaureate degrees within the past five years. The GRE requirement can be waived if the student has received a master's degree from a regionally accredited U.S. institution.

A degree-seeking graduate applicant with a baccalaureate degree who has not met all admission requirements may be offered provisional admission if sufficient evidence is presented to suggest that the applicant has the ability to pursue graduate work. For more details concerning admission requirements to George Mason University please refer to Graduate Admission Policies.

Policies
For policies governing all graduate programs, see AP.6 Graduate Policies.

Reduction of Credits
For students entering the doctoral program with a master's degree in a related field from a regionally accredited institution, the number of required credits may be reduced up to 30 credits, subject to approval of the program faculty and the college's associate dean. See AP.6.5.2 Reduction of Credits for more information.

Requirements

Degree Requirements
Total credits: 72

Students should refer to the Admissions & Policies tab for specific policies related to this program.

Students must first choose one concentration, then continue with the additional sections:

Standard Concentration (STND)

<td>Directed Reading and Research</td>
</tr>
<tr>
<td>PHYS 798</td>
<td>Research Project</td>
</tr>
</tbody>
</table>

Any graduate-level course chosen from PHYS/ASTR courses

Total Credits 27

2. PHYS 796 Directed Reading and Research/ASTR 796 Directed Reading and Research may be repeated as needed.

3. General elective courses may be chosen from PHYS/ASTR courses, and/or other related disciplines as approved by the student’s advisor or dissertation committee.

**Qualifying Examination**

All students must successfully pass the four individual sections required for each concentration of a qualifying examination. For the Standard Concentration, the four topics on the qualifying exam are covered in the four core courses (PHYS 684 Quantum Mechanics I, PHYS 685 Classical Electrodynamics I, PHYS 705 Classical Mechanics, and PHYS 711 Statistical Mechanics). For the Engineering Physics Concentration, the four topics on the qualifying exam are covered in the four core courses (PHYS 690 Engineering Thermodynamics or PHYS 711 Statistical Mechanics, PHYS 620 Continuum Mechanics or PHYS 705 Classical Mechanics, PHYS 510 Computational Physics I and PHYS 613 Computational Physics II) and in one of the specialty science courses (PHYS 694 Applied Mechanics of Solids or PHYS 695 Applied Fluid Mechanics).

All four sections of the qualifying exam will be offered twice a year, typically in the week before the start of the fall and spring semesters. A student can choose to take a particular section or a combination of sections at one sitting. Grades of “pass” or “unsatisfactory” will be given individually for each of the four sections of the exam. If a student receives a grade of “unsatisfactory” in a given section of the exam, he/she is allowed to retake that section in the next cycle, but a student must satisfactorily pass all sections of the exam by the end of the third year from the date of enrollment in the PhD program. Students entering the program with equivalent courses taken at another institution can satisfy a core course requirement by taking the associated qualifying exam without taking the course.

At the beginning of each academic year, the program director will appoint members to the qualifying examination committee. This committee is responsible for creating, administering, and grading the qualifying exams offered that year. Additional information and previous qualifying exams can be found on the departmental web page.

**Dissertation Committee and Program of Study**

Upon successful completion of the qualifying examinations, a dissertation committee should be formed by the student as soon as possible. The chair of this committee must be a graduate faculty member from the Department of Physics and Astronomy. The committee must include at least two additional members from the graduate faculty, one of whom must be from outside the Department of Physics and Astronomy. The composition of the committee must be approved by the program director. The dissertation committee is responsible for directing the student in their chosen field of research. The student should work closely with their committee to select specialty courses and electives that form a cohesive program of study. The student’s program of study must be approved by the dean before advancement to candidacy.

**Advancement to Candidacy**

Before a student may be advanced to doctoral candidacy, he/she needs to complete all required coursework, pass the qualifying examination, have the program of study and dissertation proposal approved by the dean, and be recommended by the dissertation committee. Advancement to doctoral candidacy implies that the student has demonstrated adequate breadth and depth of knowledge in the field of study and is capable of conducting research on the boundaries of knowledge.

**Dissertation Research**

Note: No more than 24 combined credits from PHYS 998 Doctoral Dissertation Proposal/ASTR 998 Doctoral Dissertation Proposal and PHYS 999 Doctoral Dissertation/ASTR 999 Doctoral Dissertation may be applied toward satisfying the doctoral degree requirements, with no more than 21 credits of PHYS 998 Doctoral Dissertation Proposal/ASTR 998 Doctoral Dissertation Proposal.

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>ASTR 998</td>
<td>Doctoral Dissertation Proposal</td>
<td>24</td>
</tr>
<tr>
<td>ASTR 999</td>
<td>Doctoral Dissertation</td>
<td></td>
</tr>
</tbody>
</table>
**Doctoral Dissertation**

After advancing to doctoral candidacy, the student works with their dissertation committee to develop their preliminary research into a doctoral dissertation. The dissertation research should represent a significant contribution to its scientific field and should be deemed publishable in a refereed scientific journal. The dissertation must be defended in a public forum before the dissertation committee and other interested faculty.

**Renewable Energy Interdisciplinary Minor**

Banner Code: RNRG

Undergraduate Physics Advisor

203 Planetary Hall
Fairfax Campus

Phone: 703-993-5356
Email: uadvphys@gmu.edu
Website: physics.gmu.edu

This college-wide interdisciplinary minor is designed for students considering a career in the field of renewable energy, or as preparation for graduate work in a wide range of academic disciplines.

Renewable energy, as normally understood, includes a variety of methods of energy generation, such as solar, wind, hydro, tidal, and geothermal, as well as energy storage methods and energy conservation. Jobs related to renewable energy lie in a wide range of areas including engineering, business, marketing, finance, installation, software, legal affairs, and research. Projections suggest that employment opportunities in the renewable energy field will increase dramatically in the near future. The Renewable Energy Interdisciplinary Minor is therefore ideally suited for students with majors in engineering, business, policy, and science.

**Admissions & Policies**

**Policies**

Eight credits of coursework must be unique to the minor and students must complete all coursework with a minimum GPA of 2.00. For policies governing all minors, see AP.5.3.4 Minors.

**Requirements**

**Minor Requirements**

Total credits: 17-20

Students should refer to the Admissions & Policies tab for specific policies related to this program.

**Academic Advising**

308 Bull Run Hall
Science and Technology Campus

Phone: 703-993-7136
Forensic Science Program

Website: cos.gmu.edu/georgesquared/

The Advanced Biomedical Sciences (ABS) graduate certificate is a program offered jointly by George Mason University and Georgetown University Medical Center (GUMC) (http://gumc.georgetown.edu/). This program is designed for students who have all of their core coursework and extracurricular prerequisites for medical, dental or other health-related fields, but otherwise have a comparatively limited science background (non-science majors with only the pre-health curricular core, for example), modest grades in the sciences as undergraduates, and/or also need to improve their Medical College Admission Test, Dental Admission Test, or other pre-professional scores. This is a 9-month full-time program that begins each fall semester. Most classes are held at George Mason University’s Science and Technology Campus in Manassas, Virginia with cadaveric anatomy labs held at GUMC.

The graduate certificate may be pursued on a full-time basis in either a lecture-based format or a hybrid format using recorded lectures and a discussion-based classroom experience. The program is premium-priced with no tuition distinction between the in-state or out-of-state residency status.

This certificate program qualifies for Title IV Federal Financial Aid.

Affiliated Faculty
Banerjee, Partha; Castilla, Marina; Djakiew, Daniel; Downey, Ryan; Johnson, Michael; Mulroney, Susan; Myers, Adam; Notario, Vicente; Whitney, Jennifer

Admissions & Policies

Admissions
University-wide admissions policies can be found in Graduate Admissions Policies.

To apply for this program, please complete the George Mason University Admissions Application (https://www2.gmu.edu/admissions-aid/apply-now/).

Applicants are expected to have a bachelor’s degree from a regionally accredited university, the desire to pursue a career in medicine, dentistry, or other health-related career, completion of all of the prerequisite courses for medical or dental school (one year each of biology, chemistry, organic chemistry, physics and math), and overall credentials suitable for acceptance to graduate programs in the College of Science at George Mason University and the Georgetown University Graduate School of Arts and Sciences.

Policies
For policies governing all graduate programs, see AP6 Graduate Policies.

Requirements

Certificate Requirements
Total credits: 20

This certificate may be pursued on a full-time basis only.

Students should refer to the Admissions & Policies tab for specific policies related to this certificate.

Email: fscience@gmu.edu
Website: forensicscience.gmu.edu

Administration

• Mary Ellen O’Toole, Director

George Mason University is home to one of the premiere forensic science programs in the country. Forensic science is the application of scientific principles and techniques to the legal process. It is a blanket term for many fields and disciplines, all related to the application of science to the law. The mission of the Forensic Science Program (FSP) is to provide outstanding scholarship to graduate and undergraduate students, seeking a career in forensic science, with both an in-depth theoretical as well as operational foundation.

As the field of forensic science is growing rapidly and new technology is being developed on a regular basis, our FSP specializes in providing the most current, accepted practices and methodologies in the application of forensic science techniques. The program also provides specialized learning experiences through select internship possibilities and research opportunities.

Our two-pronged theoretical-operational programs, prepare both undergraduate and graduate students with the skills and scientific knowledge to work in entry level and advanced positions. Depending on their degree and areas of interest, students are prepared to work in a wide range of forensic settings: from the laboratory to a homicide scene to the battlefield as an intelligence analyst/officer, tasked with using biometrics to identify the next lone wolf or terrorist cell.

The FSP is an interdisciplinary academic program with its own dedicated teaching faculty who all have operational experience in forensic science. The program is administered by the Forensic Science Program Director, and is governed by the Forensic Science Program Committee.

This minor addresses the growing national and regional interest in forensic science by introducing students to the technical, scientific, and legal aspects of the field. The minor provides an attractive option for students with majors in the natural sciences, criminology, psychology, or computer science, and the curriculum structure makes it particularly suitable for students with majors in biology and chemistry.

Admissions & Policies

Policies
At least 8 credits must be applied only to this minor and may not be used to fulfill requirements of the student’s major, concentration, or another minor or undergraduate certificate.

For policies governing all minors, see AP.5.3.4 Minors.

Requirements

Minor Requirements
Total credits: 20-21

Students should refer to the Admissions & Policies tab for specific policies related to this program.

Students must complete at least 6 credits in their minor at George Mason University and achieve a minimum GPA of 2.00 in courses applied to the minor.

Please pay attention to the prerequisites for each course in the curriculum below.

The Bachelor of Science in Forensic Science is a general forensic science degree that covers various fields within forensic science including field and laboratory applications. These topics include areas such as, crime scene investigation, forensic DNA, forensic chemistry, trace evidence, firearms examination, questioned document, fingerprints, arson, and drug analysis.

This degree is intended to provide students with a well-rounded, hands-on forensic science education in order to prepare students for entrance into a graduate-level educational program, and/or entry-level professional careers in public and private forensic laboratories, federal, state, or local government/law enforcement, defense, homeland security and intelligence agencies.

Unique features of this program include innovative curriculum that offers hands-on training with crime scene techniques and crime laboratory methodologies, an outdoor forensic excavation research and training facility, and courses taught by professional and distinguished faculty from various forensic agencies and laboratories.

Admissions & Policies

Admissions

University-wide admissions policies can be found in the Undergraduate Admissions Policies section of this catalog.

To apply for this program, please complete the George Mason University Admissions Application (https://www2.gmu.edu/admissions-aid/apply-now/).

Policies

Students must fulfill all Requirements for Bachelor's Degrees, including the Mason Core.
CHEM 314 Organic Chemistry II 3
CHEM 315 Organic Chemistry Lab I 2
CHEM 318 Organic Chemistry Lab II 2
MATH 113 Analytic Geometry and Calculus I (Mason Core) 4-6
or MATH 123 Calculus with Algebra/Trigonometry, Part A
& MATH 124 and Calculus with Algebra/Trigonometry, Part B (Mason Core)

PHYS 243 College Physics I (Mason Core) 3
PHYS 244 College Physics I Lab (Mason Core) 1
PHYS 245 College Physics II (Mason Core) 3
PHYS 246 College Physics II Lab (Mason Core) 1

Mason Core and Electives

In order to meet a minimum of 120 credits, this degree requires an additional 31-34 credits, which may be applied toward any remaining Mason Core requirements, Requirements for Bachelor's Degrees, and elective courses. Students are strongly encouraged to consult with their advisors to ensure that they fulfill all requirements.

**Mason Core**

Some Mason Core requirements may already be fulfilled by the major requirements listed above. Students are strongly encouraged to consult their advisors to ensure they fulfill all remaining Mason Core requirements.

Total Credits 40

1 Most programs include the writing-intensive course designated for the major as part of the major requirements; this course is therefore not counted towards the total required for Mason Core.

2 Minimum 3 credits required.

**Accelerated Master's**

**Forensic Science, BS/Forensic Science, Accelerated MS Overview**

Highly qualified Mason undergraduate forensic science majors may apply to the accelerated master's degree with a concentration in either crime scene investigation, forensic biology analysis, forensic chemistry analysis, or forensic/biometric identity analysis. Students who have completed between 75 and 100 credits toward the bachelor's degree are invited to apply. Students are eligible to enter this program and enroll in graduate courses after successfully completing 90 undergraduate credits, inclusive of prerequisites, toward the Forensic (https://catalog.gmu.edu/colleges-schools/science/chemistry-biochemistry/chemistry-bs/) Science, BS (https://catalog.gmu.edu/colleges-schools/science/forensic-program/forensic-science-bs/) degree. This flexibility makes it possible for students to complete graduate coursework during their final year. If accepted, students will be able to earn the Forensic (https://catalog.gmu.edu/colleges-schools/science/chemistry-biochemistry/chemistry-bs/) Science, BS (https://catalog.gmu.edu/
Successful applicants will have completed each of the following courses and the Forensic Science, MS (https://catalog.gmu.edu/colleges-schools/science/forensic-program/forensic-science-bs/) after satisfactory completion of 150 credits.

For more detailed information, see AP6.7 Bachelor’s/Accelerated Master’s Degrees (https://catalog.gmu.edu/policies/academic/graduate-policies/#ap-6-7). For policies governing all graduate degrees, see AP6 Graduate Policies (https://catalog.gmu.edu/policies/academic/graduate-policies/).

Concentration Declaration
Students must declare their intended concentration upon application. In the event that a student wishes to change their concentration, students may request to change their concentration by submitting a letter to the Forensic Science Program Director detailing the request and providing justification. These requests and possible substitutions/waivers will be considered on a case-by-case basis and only when the appropriate admissions requirements are met.

Application Requirements
Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in the Graduate Admissions Policies (https://catalog.gmu.edu/admissions/graduate-policies/) section of this catalog.

Application requirements for this accelerated master’s program include one letter of recommendation from a Forensic Science Program faculty member or advisor. Additionally, a detailed goal statement is required to include why you are interested in the MS in forensic science degree, career goals and professional aspirations, and proposed area of interest of your final Research Project. The GRE and resume are not required for admission into this program.

Successful applicants will have completed each of the following courses or equivalent with a GPA of 3.00 or higher:

- FRSC 200 Survey of Forensic Science
- FRSC 201 Introduction to Criminalistics
- FRSC 302 Forensic Trace Analysis
- FRSC 303 Forensic Evidence and Ethics
- BIOL 213 Cell Structure and Function (Mason Core)
- CHEM 211 General Chemistry I (Mason Core) and CHEM 213 General Chemistry Laboratory I (Mason Core)
- CHEM 212 General Chemistry II (Mason Core) and CHEM 214 General Chemistry Laboratory II (Mason Core)

While undergraduate students, accelerated master’s students complete six credits of graduate courses as indicated on their Accelerated Master’s Program Application with a minimum grade of 3.00 in each course.

Students must meet with an advisor to approve eligible graduate coursework. Once admitted to the accelerated master’s program, students must maintain a minimum cumulative GPA of 3.0 in all coursework. On completion and conferral of the undergraduate degree in the semester indicated in the application, they submit the Bachelor’s/Accelerated Master’s Transition Form and are admitted to graduate status.

As graduate students, accelerated master’s students have an advanced standing. They must meet all master’s degree requirements except for the two courses (6 credits) they completed as undergraduates. Students must begin their master’s program the semester immediately following conferral of the undergraduate degree.

Forensic Biology Analysis Concentration Applicants:
In order to obtain a career as a DNA Analyst, the student should have undergraduate coursework in Statistics, Molecular Biology, Genetics, and Biochemistry.

Reserve Graduate Credit
Students may take up to 6 additional graduate credits as reserve graduate credit. These credits do not apply to the undergraduate degree. To apply these credits to the master’s degree, students should use the Bachelor’s/Accelerated Master’s Transition Form.

The ability to take courses, including ones not listed above, for reserve graduate credit is available to all high achieving undergraduates with the permission of the department. Permission is normally granted only to qualified Mason seniors within 15 hours of graduation. See the Graduate Course Enrollment by Undergraduates (https://catalog.gmu.edu/policies/academic/registration-attendance/#text) section of this catalog for more information.

Premium Tuition
Students enrolled in this professional MS program are charged at a differential (premium) tuition rate. Therefore, any courses or secondary programs that they may enroll in are subject to the differential tuition rate. The Forensics Graduate Certificate (https://catalog.gmu.edu/colleges-schools/science/forensic-program/forensics-graduate-certificate/) has the same premium tuition rate, making it the ideal program for concurrent enrollment (if desired).

Criminal Background Check
The successful passing of a Virginia Department of Forensic Sciences background check is required prior to gaining access to FRSC 540 Advanced Forensic Chemistry, FRSC 541 Forensic Chemistry Laboratory, FRSC 560 Advanced Forensic DNA Sciences, and FRSC 561 Forensic DNA Laboratory.

Course Notes
- FRSC 560 Advanced Forensic DNA Sciences and FRSC 561 Forensic DNA Laboratory

Students shall have completed undergraduate coursework in molecular and/or cell biology, as well as genetics, or students must obtain permission of the instructor prior to taking FRSC 560 Advanced Forensic DNA Sciences and FRSC 561 Forensic DNA Laboratory.

- FRSC 540 Advanced Forensic Chemistry and FRSC 541 Forensic Chemistry Laboratory.

Students shall have completed undergraduate coursework in general chemistry including polarity and acid/base chemistry. Students shall also have completed Organic Chemistry and be able to identify functional groups and other chemistry structures that make up a molecule. Exposure to instrumental techniques such as gas chromatography, mass spectrometry and infrared spectroscopy is recommended or permission of instructor.

Forensic Science, MS

Banner Code: SC-MS-FRSC

Academic Advising
The Forensic Science Program offers a master's degree in Forensic Science with four concentrations to best suit the student's future career goals: Crime Scene Investigation, Forensic Biology Analysis, Forensic Chemistry Analysis, and Forensic/Biometric Identity Analysis. This graduate degree will prepare students for a rewarding career in federal, state and local laboratories, investigative or intelligence agencies, private companies, or allow professionals currently working in the field an opportunity to improve their education and optimize career advancement.

Located in Northern Virginia within the Washington DC Metro area, our students are afforded the opportunity to study in close proximity to a plethora of federal, state and local crime laboratories, investigative and intelligence agencies. These facilities provide unique access to forensic science experts and offer students competitive internships and job opportunities.

Available concentrations include:

- Crime Scene Investigation
- Forensic Biology Analysis
- Forensic Chemistry Analysis
- Forensic/Biometric Identity Analysis

**Admissions & Policies**

**Admissions**

**Application Requirements**

University-wide admissions policies can be found in Graduate Admissions Policies.

To apply for this program, please complete the George Mason University Admissions Application (https://www2.gmu.edu/admissions-aid/apply-now/).

In addition to fulfilling Mason's admission requirements for graduate study, applicants must provide:

- Three letters of recommendation from academic references or references in the industry or government who are familiar with the applicant's academic and/or professional accomplishments.
- Resume
- Detailed goal statement to include why you are interested in coming into Mason's Forensic Science Master's program, career goals, and professional aspirations, and proposed area of interest for your final research project.
- Two copies of official transcripts from each institution of higher education attended.
- A Virginia Domicile Classification Form.

TOEFL scores are required of all international applicants who do not hold at least a bachelor's degree from a regionally-accredited institution within the US (some exceptions apply). The TOEFL score has to at least be a total of 88, with a minimum of 20 in each section.

The GRE is not required for admission into this program. Additional requirements for each specific concentration are listed below.

**Concentration-Specific Requirements**

**Forensic Biology Analysis and Forensic Chemistry Analysis Concentrations**

A bachelor's degree in a forensic or natural science.

**Forensic/Biometric Identity Analysis Concentration**

A bachelor of science or bachelor of arts degree in a forensic or natural science, computer science, computer electronic or electrical engineering, information systems or information technology (or its equivalent coursework in a relevant field).

**Crime Scene Investigation Concentration**

A bachelor of science or bachelor of arts degree in a related field.

**Policies**

For policies governing all graduate programs, see AP6 Graduate Policies.

**Premium Tuition**

Students enrolled in this professional MS program are charged at a differential (premium) tuition rate. Therefore, any courses or secondary programs that they may enroll in are subject to the differential tuition rate. The Forensics Graduate Certificate has the same premium tuition rate, making it the ideal program for concurrent enrollment (if desired).

**Concentration Declaration**

Students must declare their intended concentration upon application. In the event that a student wishes to change their concentration, students may request to change their concentration by submitting a letter to the Forensic Science Program Director detailing the request and providing justification. These requests and possible substitutions/waivers will be considered on a case-by-case basis and only when the appropriate admissions requirements are met.

**Criminal Background Check**

The successful passing of a Virginia Department of Forensic Sciences (http://www.dfs.virginia.gov/) background check is required prior to gaining access to FRSC 540 Advanced Forensic Chemistry, FRSC 541 Forensic Chemistry Laboratory, FRSC 560 Advanced Forensic DNA Sciences, and FRSC 561 Forensic DNA Laboratory.

**Course Notes**

FRSC 560 Advanced Forensic DNA Sciences and FRSC 561 Forensic DNA Laboratory

Students shall have completed undergraduate coursework in molecular and/or cell biology, as well as genetics, or students must obtain permission of the instructor prior to taking FRSC 560 Advanced Forensic DNA Sciences and FRSC 561 Forensic DNA Laboratory.

FRSC 540 Advanced Forensic Chemistry and FRSC 541 Forensic Chemistry Laboratory

Students shall have completed undergraduate coursework in general chemistry including polarity and acid/base chemistry. Students shall also have completed Organic Chemistry and be able to identify functional groups and other chemistry structures that make up a molecule.
Exposure to instrumental techniques such as gas chromatography, mass spectrometry and infrared spectroscopy is recommended or permission of instructor.

Research Project or Non-Research Project

Research Project Option

The Research Project Option is designed for students planning to pursue a doctoral degree or a career involving research in the field of forensic science or other related disciplines. The research project is based on laboratory research that must be preapproved by the advisory committee, which is appointed during the first semester of registration in FRSC 610 (1 credit) Forensic Research Project. Students are responsible for selecting research advisors who can commit as an advisor during the semesters that the student indicates that they will be conducting their research and enrolled in FRSC 610. Students must then complete their written research project and present their research during an oral defense during the semester of registration in FRSC 610 (3 credit) Forensic Research Project.

FRSC 600 | Forensics Seminar                           | 1       |
FRSC 610 | Forensic Research Project                   |         |

Non-Research Project Option

Students selecting this option are not required to complete a laboratory-based research project. Instead, they must successfully pass FRSC 699 (0 credits) Forensic Comprehensive Examination to demonstrate thorough comprehension of the curriculum and must select 5 credits of additional elective coursework.

FRSC 699 | Comprehensive Examination                   |         |
Select 5 credits of additional FRSC elective courses

Concentration in Forensic Biology Analysis (FRSB)

This concentration educates students for a career as a forensic biology laboratory analyst.

The successful passing of a Virginia Department of Forensic Sciences background check is required prior to gaining access to FRSC 560 Advanced Forensic DNA Sciences and FRSC 561 Forensic DNA Laboratory. In order to obtain a career as a DNA Analyst, the student should have undergraduate coursework in Statistics, Molecular Biology, Genetics, and Biochemistry.

Accelerated Master's

Forensic Science, BS/Forensic Science, Accelerated MS

Overview
Highly qualified Mason undergraduate forensic science majors may apply to the accelerated master's degree with a concentration in either crime scene investigation, forensic biology analysis, forensic chemistry analysis, or forensic/biometric identity analysis. Students who have completed between 75 and 100 credits toward the bachelor's degree are invited to apply. Students are eligible to enter this program and enroll in undergraduate courses after successfully completing 90 undergraduate credits, inclusive of prerequisites, toward the Forensic (https://catalog.gmu.edu/colleges-schools/science/chemistry-biochemistry/chemistry-bs/) Science, BS (https://catalog.gmu.edu/colleges-schools/science/forensic-program/forensic-science-bs/) degree. This flexibility makes it possible for students to complete graduate coursework during their final year. If accepted, students will be able to earn the Forensic (https://catalog.gmu.edu/colleges-schools/science/chemistry-biochemistry/chemistry-bs/) Science, BS (https://catalog.gmu.edu/colleges-schools/science/forensic-program/forensic-science-bs/) and the Forensic Science, MS (https://catalog.gmu.edu/colleges-schools/science/forensic-program/forensic-science-ms/) after satisfactory completion of 150 credits.

For more detailed information, see AP.6.7 Bachelor's/Accelerated Master's Degrees (https://catalog.gmu.edu/policies/academic/graduate-policies/#ap-6-7). For policies governing all graduate degrees, see AP.6 Graduate Policies (https://catalog.gmu.edu/policies/academic/graduate-policies/).

Concentration Declaration
Students must declare their intended concentration upon application. In the event that a student wishes to change their concentration, students may request to change their concentration by submitting a letter to the Forensic Science Program Director detailing the request and providing justification. These requests and possible substitutions/waivers will be considered on a case-by-case basis and only when the appropriate admissions requirements are met.

Application Requirements
Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in the Graduate Admissions Policies (https://catalog.gmu.edu/admissions/graduate-policies/) section of this catalog.

Application requirements for this accelerated master's program include one letter of recommendation from a Forensic Science Program faculty member or advisor. Additionally, a detailed goal statement is required to include why you are interested in the MS in forensic science degree, career goals and professional aspirations, and proposed area of interest of your final Research Project. The GRE and resume are not required for admission into this program.

Successful applicants will have completed each of the following courses or equivalent with a GPA of 3.00 or higher:

FRSC 200 Survey of Forensic Science
FRSC 201 Introduction to Criminalistics
FRSC 302 Forensic Trace Analysis
FRSC 303 Forensic Evidence and Ethics
BIOI 213 Cell Structure and Function (Mason Core)
CHEM 211 General Chemistry I (Mason Core) and CHEM 213 General Chemistry Laboratory I (Mason Core)
CHEM 212 General Chemistry II (Mason Core) and CHEM 214 General Chemistry Laboratory II (Mason Core)

While undergraduate students, accelerated master's students complete six credits of graduate courses as indicated on their Accelerated Master's Program Application with a minimum grade of 3.00 in each course. Students must meet an advisor to approve eligible graduate coursework. Once admitted to the accelerated master's program, students must maintain a minimum cumulative GPA of 3.0 in all coursework. On completion and conferral of the undergraduate degree in the semester indicated in the application, they submit the Bachelor's/Accelerated Master's Transition Form and are admitted to graduate status.

As graduate students, accelerated master's students have an advanced standing. They must meet all master's degree requirements except for the two courses (6 credits) they completed as undergraduates. Students must begin their master's program the semester immediately following conferral of the undergraduate degree.

Forensic Biology Analysis Concentration Applicants:
In order to obtain a career as a DNA Analyst, the student should have undergraduate coursework in Statistics, Molecular Biology, Genetics, and Biochemistry.

Reserve Graduate Credit
Students may take up to 6 additional graduate credits as reserve graduate credit. These credits do not apply to the undergraduate degree. To apply these credits to the master's degree, students should use the Bachelor's/Accelerated Master's Transition Form.

The ability to take courses, including ones not listed above, for reserve graduate credit is available to all high achieving undergraduates with the permission of the department. Permission is normally granted only to qualified Mason seniors within 15 hours of graduation. See the Graduate Course Enrollment by Undergraduates (https://catalog.gmu.edu/policies/
Forensic science encompasses many fields (physical, biological, and social sciences) and deals with the intersection of science, technology, and the law. In common academic parlance “forensic science” most typically refers to the application of any recognized, quantifiable science to the evaluation of a material substance that exists physically or virtually that may be critical to a legal proceeding (for example, assessing the identity of an individual who is accused of a crime via molecular biological testing (e.g., DNA)). This program is designed to provide an advanced understanding of the applicable forensic sciences, human behavior, and best practices with respect to the criminal justice/legal system in tandem with professional and managerial skills.

The Forensic Science, PSM will prepare students and professionals for the next stage in their careers by providing them with advanced knowledge in forensic science and managerial skillsets so they can take advantage of exciting and increasingly more demanding administrative opportunities. The ultimate aim of the program is the successful placement of graduates in relevant positions, helping students achieve their professional goals.

Admissions & Policies

Note: as of catalog publication in April, the program described below has been approved by the Board of Visitors and sent to the State Council of Higher Education in Virginia for consideration as a new degree program. The university cannot accept applications or enroll students in this program until SCHEV approval has been granted.

Admissions

Application Requirements

University-wide admissions policies can be found in Graduate Admissions Policies.

To apply for this program, please complete the George Mason University Admissions Application (https://www2.gmu.edu/admissions-aid/apply-now/).

In addition to fulfilling Mason's admission requirements for graduate study, applicants must provide:

- Three letters of recommendation from academic references or references in the industry or government who are familiar with the applicant’s academic and/or professional accomplishments
- Resume
- Detailed goal statement on why you are interested in Mason’s Forensic Science, PSM program, to include your career goals and professional aspirations
- Official transcripts from each institution of higher education attended
- A Virginia Domicile Classification Form

TOEFL scores are required of all international applicants who do not hold at least a bachelor's degree from a regionally-accredited institution within the US (some exceptions apply). The TOEFL score has to at least be a total of 88, with a minimum of 20 in each section.

The GRE is not required for admission into this program. Additional requirements for each program emphasis are listed below.

Emphasis-specific Requirements

Crime Scene Investigation

A bachelor of science or bachelor of arts degree in a related field.
Biometric Identity Analysis Emphasis, Forensic Biology Analysis Emphasis, and Forensic Chemistry Analysis Emphasis
A bachelor’s degree in a forensic or natural science.

Policies
For policies governing all graduate programs, see AP6 Graduate Policies.

Premium Tuition
Students enrolled in this program are charged at a differential (premium) tuition rate. Therefore, any courses that they may enroll in are subject to the differential tuition rate, including any professional skills courses.

Emphasis Declaration
Students must declare their intended emphasis upon application. In the event that a student wishes to change their emphasis, students may request the change by submitting a letter to the Forensic Science Program Director detailing the request and providing justification. These requests and possible substitutions/waivers will be considered on a case-by-case basis and only when the appropriate admissions requirements are met.

Criminal Background Check

Course Notes
FRSC 560 and FRSC 561
Students shall have completed undergraduate coursework in molecular and/or cell biology, as well as genetics, or students must obtain permission of the instructor prior to taking FRSC 560 (https://catalog.gmu.edu/search/?P=FRSC%20560/) Advanced Forensic DNA Sciences and FRSC 561 (https://catalog.gmu.edu/search/?P=FRSC%20561/) Forensic DNA Laboratory.

FRSC 540 and FRSC 541
Students shall have completed undergraduate coursework in general chemistry including polarity and acid/base chemistry. Students shall also have completed Organic Chemistry and be able to identify functional groups and other chemistry structures that make up a molecule. Exposure to instrumental techniques such as gas chromatography, mass spectrometry and infrared spectroscopy is recommended or permission of instructor prior to taking FRSC 540 Advanced Forensic Chemistry and FRSC 541 Forensic Chemistry Laboratory.

Degree Requirements
Total credits: 36
Students should refer to the Admissions & Policies tab for specific policies related to this program.

Students must complete the program’s core and internship course. Additionally, students must select one area of emphasis and one professional skills option. Students are strongly encouraged to discuss course options with an advisor. All students must reach a minimum of 36 credits for degree conferral.

Fairfax Campus

Phone: 703-993-5071
Email: fscience@gmu.edu
Website: cos.gmu.edu/forensic-science/

This interdisciplinary graduate certificate program is designed for students seeking training in forensic science, as well as for

¹ Students enrolled in the Forensic Science, PSM program are charged at a differential (premium) tuition rate regardless of the course; any professional skills courses taken will also be subject to the differential tuition rate.

² MBA and GBUS-prefixed courses are offered on an alternative semester schedule (view the Schedule of Classes [https://patriotweb.gmu.edu/pls/prod/bwckschd.p_disp_dyn_sched/] for details).

Internship

The internship component is intended to provide students with the opportunity to put into practice all of the skills and knowledge accumulated throughout their studies in this program. Students must arrange an internship with a private company, a governmental agency, a non-governmental organization, or some other entity with an interest in forensic science and management. Students must identify a specific person within that outside entity who will be the contact and manager of the internship.

Internship credit is never given for work previously done, or for work that would have been done in any case due to an existing employment relationship.

The internship work must produce one or more products such as a comprehensive report, a departmental presentation, a research project, or an article. Internship placement and product type must be approved by the student’s faculty advisor.

Further details and procedures for completing the internship can be found with the faculty advisor.

current professionals employed by the federal government, local law enforcement, and private security corporations. Forensics refers to the application of scientific methodologies to the analysis of crime scenes, the collection of evidence, and the laboratory analysis of that evidence in support of criminal investigations. Related legal aspects are also considered as part of a comprehensive approach to forensics.

At the time of completion, depending on the concentration, students will be able to understand the basic principles of forensics and perform a general crime scene analysis. Available concentrations include: Crime Scene Investigation, Forensic Biometric Identity Analysis, and General Forensic Science; curriculum requirements for each concentration are listed in the Requirements tab.

This certificate may be pursued on a part-time or full-time basis.

This certificate program qualifies for Title IV Federal Financial Aid.

Admissions & Policies

Admissions
University-wide admissions policies can be found in the Graduate Admissions Policies section of this catalog.

Applicants to the general forensics concentration should hold a BA or BS degree from a regionally-accredited university with a minimum GPA of 3.00.

To apply, prospective students should submit a completed George Mason University Admissions Application (https://www2.gmu.edu/admissions-aid/apply-now/), two copies of official transcripts from all institutions attended, and a current résumé. TOEFL scores are required of all international applicants who do not hold at least a bachelor’s degree from a regionally-accredited institution within the US (some exceptions apply).

Pursuing the Forensic Science, MS
Students who wish to continue their studies may apply to the Forensic Science, MS. Please see AP 6.9 Requirements for Master’s Degrees and contact an advisor for details.

Policies
For policies governing all graduate programs, see AP 6.6 Graduate Policies.

Premium Tuition
Students enrolled in this professional program are charged at a differential (premium) tuition rate. Therefore, any courses or secondary programs that they may enroll in are subject to the differential tuition rate. The Forensic Science, MS has the same premium tuition rate, making it the ideal program for concurrent enrollment (if desired).

Requirements

Certificate Requirements
Total credits: 18

This certificate may be pursued on a full- or part-time basis.

Students should refer to the Admissions & Policies tab for specific policies related to this program.

Students must complete all core courses and select one concentration.

The Interdisciplinary Program in Neuroscience (IPN) at George Mason University is grounded in systems biology, biochemistry, bioengineering, and psychology. Research and education within the IPN is coordinated under the efforts of faculty participating from a number of colleges across the university.

The IPN administers the Neuroscience Minor, Neuroscience BS, and the Neuroscience PhD. Participating neuroscience faculty comprise a unique blend of traditional, experimental, and computational scientists with research spanning a spectrum of key topics in neuroscience including: behavior, anatomy, physiology, neuropharmacology, computational modeling, and informatics. Key research initiatives currently underway within the IPN are:

- Plasticity mechanisms underlying neurological development
- Identifying and characterizing protein interactions for the dopamine and nicotinic acetylcholine receptors in the brain
- Biochemical dynamics in disorders of the basal ganglia
- Computational methods for simulation of complex biological systems
- Description and generation of neuronal morphology
- Adaptive control for stabilization of epilepsy
- Role of metals in memory and Alzheimer's disease
- Biochemical/metabolic simulations at the organism level
- Cellular and sub-cellular models of associative learning
- Experimental and computational models in calcium signaling
- Synaptic plasticity

**Faculty**

**Program Faculty**

**Professors**

Ascoli, Barreto, Blackwell, Cebral, Flinn, Houser, Jafri, Klimov, Lipsky, McCabe, Olds, Sander

**Associate Professors**

Dumas, Fryxell, Greenwood, Kabbani, Krueger, McDonald, Peixoto, Peterson, Sikdar, So, Thompson

**Assistant Professors**

Brielmaier, Herin, Joiner, Lewis

**Adjunct Faculty**

Neckel

**Programs**

- Neuroscience Minor
- Neuroscience, BS
- Neuroscience, PhD

The INP also co-administers the Neuroethics Concentration in the Interdisciplinary Studies, MAIS and the Neuroscience Concentration in the Biology, MS.

**Neuroscience Minor**

**Banner Code: NEUR**

**Academic Advising**

Website: neuroscience.gmu.edu

Neuroscience is one of the most rapidly growing disciplines in science and society today. Due to its interdisciplinary nature, it draws on skills from anatomy, chemistry, electrical engineering, genetics, math, psychology, economics, and philosophy among others. Students in diverse fields can benefit from neuroscience through this minor.

**Admissions & Policies**

**Policies**

Eight credits of coursework must be unique to the minor. For policies governing all minors, see AP.5.3.4 Minors.

For policies governing all undergraduate programs, see AP.5 Undergraduate Policies.

**Requirements**

**Minor Requirements**

Total credits: 21-22

Students should refer to the Admissions & Policies tab for specific policies related to this program.

Students must complete at least 20 credits of coursework with a minimum GPA of 2.00.

**Biology Courses**

Website: neuroscience.gmu.edu

The Bachelor of Science in Neuroscience is an interdisciplinary program emphasizing the relationship between the biology and chemistry of the nervous system and the behavior of an organism. The BS prepares students for graduate-level study in both medical school and doctoral and master’s-level programs in neuroscience and other health-related fields, and work in the neuroscience field.

Admissions & Policies

Admissions

University-wide admissions policies can be found in the Undergraduate Admissions Policies section of this catalog.

To apply for this program, please complete the George Mason University Admissions Application (https://www2.gmu.edu/admissions-aid/apply-now/).

Policies

Students must fulfill all Requirements for Bachelor's Degrees, including the Mason Core.

NEUR 410 Current Topics in Neuroscience or NEUR 411 Seminar in Neuroscience fulfill the writing intensive requirement.

For policies governing all undergraduate programs, see AP.5 Undergraduate Policies.

Degree Requirements

Total credits: minimum 120

Students should refer to the Admissions & Policies tab for specific policies related to this program.

NEUR 335  Molecular, Developmental, and Systems Neuroscience  3

Technical Writing
NEUR 410  Current Topics in Neuroscience or NEUR 411  Seminar in Neuroscience  3

Required Psychology Lab Course
PSYC 373  Biopsychology Laboratory  2

Total Credits  54-57

1 Students must earn a minimum grade of 1.67 (C-) in these courses.
2 The course chosen to fulfill this requirement cannot be applied to the 24 credits of approved neuroscience electives.
3 Transfer students who have earned transfer credit for PSYC 372 Biopsychology may substitute this course for PSYC 375 Brain and Sensory Processes.
4 Either course fulfills the writing intensive requirement.

Electives
Students should consult with an advisor to choose appropriate elective courses, which must be approved by the director of the program. A sample of possible electives is given below. Only courses not already taken in the degree will apply as electives, with the exception of seminar and topics courses; a different topic must be addressed in the second instance of a seminar or topics course. Students may apply no more than 6 credits of courses with a grade of ‘D’ to this requirement.

Students intending to pursue a doctorate in neuroscience or a medical degree are advised to take CHEM 313 Organic Chemistry I and CHEM 315 Organic Chemistry Lab I.

Total Credits  24
Fulfills the writing intensive requirement.

Mason Core and Elective Credits
In order to meet a minimum of 120 credits, this degree requires an additional 39-42 credits which may be applied toward any remaining Mason Core requirements (outlined below), Requirements for Bachelor’s Degrees, and elective courses. Students are strongly encouraged to consult with their advisors to ensure that they fulfill all requirements.

Mason Core
Some Mason Core requirements may already be fulfilled by the major requirements listed above. Students are strongly encouraged to consult their advisors to ensure they fulfill all remaining Mason Core requirements.

Total Credits 40

1 Most programs include the writing-intensive course designated for the major as part of the major requirements; this course is therefore not counted towards the total required for Mason Core.

2 Minimum 3 credits required.

Honors

Honors in the Major
Highly-qualified students may apply to graduate with honors in the major.

Eligibility
To be eligible for admission, neuroscience majors must have completed at least 60 credits and have a minimum cumulative GPA of 3.25 and a minimum GPA of 3.25 in neuroscience courses.

Honors Requirements
If accepted, students must take a sequence of three courses, which culminates in the successful completion and presentation of an independent honors thesis.

To graduate with honors, students must earn a minimum GPA of 3.50 in their honors courses, maintain a minimum cumulative GPA of 3.25, and complete an honors thesis.

Accelerated Master's

Neuroscience, BS/Biology, Accelerated MS

Overview
Qualified undergraduates may be admitted into an accelerated master’s program and obtain both a Neuroscience, BS and a Biology, MS (https://catalog.gmu.edu/colleges-schools/science/systems-biology/biology-ms/) within an accelerated time frame. Students admitted to this program may take graduate courses after completing 90 undergraduate credits, and up to 6 credits of graduate work may be used in partial satisfaction of the requirements for the undergraduate degree. If students earn at least a 3.00 GPA in these classes, they are granted advanced standing in the master’s program and must then complete an additional 24 credits to receive the master’s degree. All other master’s degree requirements must be met, including a minimum of 18 credits taken for the master’s after the bachelor’s degree is complete.

Application Requirements
Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in the Graduate Admission Policies (https://catalog.gmu.edu/admissions/graduate-policies/) section of this catalog. Application information for this accelerated master’s program can be found on the School of Systems Biology’s website (https://cos.gmu.edu/ssb/).

Successful applicants will have an overall undergraduate GPA of at least 3.10. Three letters of recommendation, including one from a prospective thesis or project advisor, are required. Additionally, they will have completed the following courses with a GPA of 3.00 or higher:

</table>
Accelerated Option Requirements

At the beginning of the student's final undergraduate semester, students must submit a bachelor's/accelerated master's transition form (available from the Office of the University Registrar (http://registrar.gmu.edu/)) to the College of Science's Office of Academic and Student Affairs (https://cos.gmu.edu/about/contact-us/). Students must begin their master's program in the semester immediately following conferral of the bachelor's degree.

Students must maintain an overall GPA of 3.00 or higher in graduate coursework and should consult with their faculty advisor to coordinate their academic goals.

After completing 120 credits and all requirements for the bachelor's degree and filing the Graduation Intent Form, students are awarded a bachelor's degree.

Additional Requirements

- Satisfactory performance in undergraduate coursework must be maintained.
- Satisfactory graduate-level performance in each approved graduate course taken while in undergraduate status (receiving a grade of B or better (3.0 or higher) in each course).
- Submission of documents to complete the master's application before the published deadline, including a goals statement and a resume. GRE scores are not required.
- Completion of undergraduate degree from George Mason University.
- Confirmation of a graduate faculty advisor.

Bachelor's Degree (selected), Bioinformatics Management, Accelerated PSM

Overview

This degree option allows highly qualified George Mason University bachelor's students to earn a Bioinformatics Management, PSM (https://catalog.gmu.edu/colleges-schools/science/systems-biology/bioinformatics-management-professional-science-masters/) degree in less time than if they had first graduated with a BS degree and then applied to the PSM program sequentially.

Admission and Processing Requirements

Students in the Biology, BS (https://catalog.gmu.edu/colleges-schools/science/biology/biology-bs/); Chemistry, BS (https://catalog.gmu.edu/colleges-schools/science/chemistry-biochemistry/chemistry-bs/); Computational and Data Sciences, BS (https://catalog.gmu.edu/colleges-schools/science/computational-data-sciences/computational-data-sciences-bs/); Neuroscience, BS (https://catalog.gmu.edu/colleges-schools/science/neuroscience-program/neuroscience-bs/); or Physics, BS (https://catalog.gmu.edu/colleges-schools/science/physics-astronomy/physics-bs/) with an overall GPA of at least 3.00 in their last 60 credits are welcome to apply to the Bioinformatics Management, PSM accelerated master's program. Applicants to this accelerated master's should have previously taken courses in molecular biology, computer science, calculus, physical chemistry, and statistics. Students with deficiencies in one or more of these areas may be required to take additional courses from the undergraduate curriculum.

The GRE requirement is waived for students accepted into this accelerated program.

By the beginning of the undergraduate student's senior year, they should submit a Graduate Application for Accelerated Master's Program form (obtained from the College of Science's Office of Academic and Student Affairs (https://cos.gmu.edu/about/contact-us/)).

By at least the beginning of their senior year, students should seek out the Bioinformatics Management, PSM (https://catalog.gmu.edu/colleges-schools/science/systems-biology/bioinformatics-management-professional-science-masters/) Program Director who will aid the student in choosing the appropriate graduate courses to take and help to prepare the student for graduate studies.

In their senior year, accelerated master's students must complete the two graduate courses indicated on their Accelerated Master's Program Application with a minimum grade of 3.00 in each course. They must maintain a minimum GPA of 3.00 in all coursework and in coursework applied to their major. In the semester specified on the application (around the completion and conferral of the undergraduate degree), students must submit the Bachelor's/Accelerated Master's Transition form (found on the Office of the University Registrar website (http://registrar.gmu.edu/forms/)) and will subsequently be admitted into graduate status.

Reserve Graduate Credits

Students admitted to this program may take graduate courses after completing 90 undergraduate credits, and up to 6 credits of appropriate graduate coursework may be used in partial satisfaction of the requirements for the undergraduate degree. If students earn at least a 3.00 GPA in these classes, they are granted advanced standing in the master's program and must then complete an additional 25 credits to receive the master's degree.

To apply these credits to the master's degree, students must request that the credits be moved from the undergraduate degree to the graduate degree using the Bachelor's/Accelerated Master's Degree form found on the Office of the University Registrar website (http://registrar.gmu.edu/forms/) (as noted above).

Students may take up to 6 additional approved graduate credits as reserve graduate credit. These credits do not apply to the undergraduate degree but will reduce the subsequent master's degree credits accordingly (e.g., with 6 credits counted towards undergraduate degree plus the maximum 6 reserve credits, the PSM could be completed with 19 post-bachelor's credits). The ability to take courses for reserve graduate credit is available to all high achieving undergraduates with the permission of the School of Systems Biology (https://catalog.gmu.edu/colleges-schools/science/systems-biology/).

Policies

For more detailed information on accelerated master's in general, see AP6.7 Bachelor's/Accelerated Master's Degrees (https://catalog.gmu.edu/policies/academic/graduate-policies/#ap-6-7).

For policies governing all graduate programs, see AP6 Graduate Policies (https://catalog.gmu.edu/policies/academic/graduate-policies/).

Neuroscience, PhD

Banner Code: SC-PHD-NEUR

Nadine Kabbani

Phone: 703-993-4406
Email: nkabbani@gmu.edu

The Neuroscience, PhD program focuses on the study of the brain and addresses the challenge of developing an integrative understanding of cognition and higher brain function. In response to this challenge, the rapidly developing field of neuroscience has produced an exponential increase in the amount of data available to investigators as they develop new theories of brain function and new hypotheses to test. The main objective of the program is to prepare students to participate at the cutting edge of this exciting field in academia, industry, and government. The program provides students with a rich interdisciplinary intellectual environment that fosters the development of the skills they will need to successfully pursue research careers.

Current faculty research focuses on the broad areas of behavior, anatomy, physiology, neuropharmacology, molecular biology, computational modeling, and informatics. External research collaborations exist with federal agencies, private and not-for-profit corporations, and other universities. The scope of research ranges from the subcellular and molecular level (in the context of such phenomena as drug addiction and the biological basis of schizophrenia) to the systems and behavioral level.

Current research projects include plasticity mechanisms supporting development, network formation and information processing, cellular and subcellular models of associative learning, biochemical dynamics in disorders of the basal ganglia, computational methods for simulation of complex biological systems, role of metals in memory and Alzheimer's disease, and dynamical behavior of neurons and networks of neurons, and identifying and characterizing protein interactions for the dopamine and nicotinic acetylcholine receptors in the brain.

### Admissions & Policies

#### Admissions

University-wide admissions policies can be found in the Graduate Admissions Policies section of this catalog.

To apply for this program, please complete the George Mason University Admissions Application (https://www2.gmu.edu/admissions-aid/apply-now/).

Applicants should have a bachelor’s degree in a relevant field and undergraduate courses in organic chemistry, cell biology, and calculus. Coursework in biochemistry (e.g. BIOL 483 General Biochemistry), cell biology (e.g. BIOL 484 Cell Signaling and Disease), and molecular genetics (e.g. BIOL 482 Introduction to Molecular Genetics) is highly recommended. Admission requires a minimum GPA of 3.25 in undergraduate work and acceptable GRE scores. In addition, the applicant’s goal statement should relate to the research interests of at least one faculty member in the program and include the names of two faculty members who may be suitable as advisors or supervisory committee members.

To apply, complete the George Mason University Admissions Application (https://www2.gmu.edu/admissions-aid/apply-now/), supply a goal statement, two copies of official transcripts from each college and graduate institution attended, three letters of recommendation from faculty members or individuals who have firsthand knowledge of the applicant’s academic or research capabilities, and an official report of scores obtained on the GRE-GEN. The GRE-SUB is optional. TOEFL scores are required of all international applicants.

### Policies

For policies governing all graduate programs, see AP.6 Graduate Policies.

### Reduction of Credits

For students entering the doctoral program with a master’s degree in a related field from a regionally accredited institution, the number of required credits may be reduced up to 30 credits, subject to approval of the program faculty and the college’s associate dean for student affairs. See AP.6.5.2 Reduction of Credits for more information.

### Transfer of Credit

An alternative to the reduction of credit is a transfer of credit. With this option, up to 24 credits of previous, relevant graduate coursework may be transferred into the program, provided those credits have not been applied toward a previous degree.

### Requirements

#### Degree Requirements

Total credits: 72

Students should refer to the Admissions & Policies tab for specific policies related to this program.

Complete the Business Fundamentals Graduate Certificate and receive both the graduate certificate and the Neuroscience PhD upon completion of both programs’ requirements.

Total Credits 47-49
Publication
An additional requirement for graduation calls for students to have at least one publication (in print or in press) in a refereed journal.

Doctoral Committee and Proposal
When coursework is nearing completion, the student should form a doctoral committee and start preparing their dissertation proposal. Students in consultation with their advisor identify which faculty are appropriate to be a part of their committee. The dissertation committee administers the qualifying exam and evaluates the dissertation proposal as well as the dissertation itself. At least one of the committee members must be outside of the dissertation advisor’s department.

Candidacy Examination and Advancement to Candidacy
The doctoral candidacy examination includes written and oral components. After passing the candidacy exam and receiving committee approval for the dissertation proposal, the student is advanced to doctoral candidacy.

Dissertation Research
Note: No more than 24 combined credits from NEUR 998 Dissertation Proposal and NEUR 999 Doctoral Dissertation may be applied toward satisfying doctoral degree requirements, with no more than 12 credits of NEUR 998 Dissertation Proposal.

Pre-Medical Undergraduate Certificate
Banner Code: SC-CERB-PMCL

Donna M. Fox, Ph.D.
Phone: 703-993-9532

The Pre-Medical Undergraduate Certificate is a premium program offered to enlisted members of the U.S. military who are chosen specifically from a federal program referred to as EMDP2 (Enlisted to Medical Degree Preparatory Program). This is a post-baccalaureate program aimed at active duty military enlisted members who have earned a bachelor’s degree from a regionally accredited institution with a minimum cumulative GPA of 3.0, who have experience working in a health-related position in the military, and who meet all other requirements specified by the Uniformed Services University of the Health Sciences (USU) (https://www.usuhs.mil/), and who are interested in matriculating at the Uniformed Services University (military medical school) or another US accredited medical school. Only those individuals who are supported by EMDP2 are eligible to enroll in the Pre-Medical Undergraduate Certificate.

The Pre-Medical Undergraduate Certificate will provide a one-year undergraduate program that will allow qualified individuals to complete undergraduate pre-medical admissions requirements as currently specified by the American Association of Medical Colleges (https://www.aamc.org/) (AAMC).
Bioinformatics and Computational Biology Graduate Certificate

Administration

- Iosif Vaisman, Director
- Dmitri Klimov, BCB PhD Program Director
- Alessandra Luchini, BIOS PhD Program Director
- Don Seto, BCB MS Program Director
- Ancha Baranova, Biology MS Program Director
- Vikas Chandhoke, PSM Program Director
- Kimberly Harris, Graduate Coordinator
- Andrea Nikoi, Director of HR and Finance

The School of Systems Biology offers undergraduate and graduate degree programs in bioinformatics and computational biology, and graduate degree programs in biology and biosciences. The school also offers research opportunities at the graduate and undergraduate levels. For additional details about current faculty research activities, please visit the school’s website.

The School of Systems Biology works closely with and provides faculty and administrative support to the Department of Biology, through which the Biology, BA and Biology, BS degrees are offered. Accelerated master’s options are also available.

Requirements & Policies

Policies
Students are governed by the university’s policies.

Using Laboratories
Only authorized experiments and exercises may be carried out in the school’s research and teaching laboratories and must be done under the supervision of a university faculty or staff member. No unauthorized work is allowed in any laboratory.

Using Organisms in Classes
Direct observations of actual organisms are considered an essential part of learning biology at all levels. Direct observations of organisms may involve the use of living or preserved specimens, dissections of organisms or parts of organisms, and microscopic examination of organisms or parts of organisms. All use of live animals conforms to National Institutes of Health guidelines for the use and care of laboratory animals. Activities specified above may be a required part of a course and thus serve as a basis for grading in the course. Any questions about the administration of this policy should be directed to the course coordinator or instructor.

Website: cos.gmu.edu/ssb/

This graduate certificate addresses the growing national and regional demand for trained computational biologists by combining a solid foundation in biotechnology with computational skills relevant to bioinformatics. With online and in-classroom courses, the flexibility of this certificate’s structure permits students to custom design their curriculum under an advisor’s guidance, making the graduate certificate especially relevant for students employed in today’s diverse Northern Virginia high-technology workplace. Ideal candidates for this certificate are those who have a background in biological and computer sciences, and are currently working in or planning to enter the fields of biotechnology or bioinformatics. The certificate is also highly relevant for students who are interested in advancing their career goals but may not have adequate time available to undertake a graduate degree program.

All courses are also offered online, allowing students to participate in class without having to travel to campus. Further information can be found with Mason Online (http://masononline.gmu.edu/).
The certificate may be pursued on a part-time or full-time basis.

Admissions & Policies

Admissions

University-wide admissions policies can be found in the Graduate Admissions Policies section of this catalog.

To apply for this program, please complete the George Mason University Admissions Application (https://www2.gmu.edu/admissions-aid/apply-now/).

Applicants should hold a BA or BS degree in a discipline related to biological or computer science from a regionally accredited university, with a minimum GPA of 3.00. Applicants should have taken courses in molecular biology, computer science, calculus, physical chemistry, or statistics, and should also possess working knowledge of a computer programming language. To apply, prospective students should complete a George Mason University Admissions Application (https://www2.gmu.edu/admissions-aid/apply-now/), supply two copies of official transcripts from each college and graduate institution attended, and a current résumé. TOEFL scores are required of all international applicants.

Policies

For policies governing all graduate certificate programs, see AP6 Graduate Policies.

Premium Tuition

The certificate is a professional certification program that charges students at a differential (premium) tuition rate, with an additional $100 per credit added to the standard George Mason University graduate tuition rate for students who enroll in this certificate program, regardless of in-state or out-of-state status. The differential tuition is used to fund continuing improvements in the College of Science’s (COS) educational facilities used to support the certificate program.

Students may not pursue this certificate concurrently with any other graduate degree program or certificate program offered by COS. In addition, students may not apply previous credit hours from another certificate, degree, or non-degree studies to this certificate program because of the differential (premium) tuition rate.

Requirements

Certificate Requirements

Total credits: 15

This certificate may be pursued on a full- or part-time basis.

Science and Technology Campus

Phone: 703-993-8400
Email: binf@gmu.edu
Website: cos.gmu.edu/ssb/

In the field of bioinformatics and computational biology, specialists collect, store, analyze and present complex biological data. Through this work, critical contributions are made to basic biology, disease detection, drug design, modeling biosystems, forensics, agriculture, and environmental sciences through the combination of biological analysis and high-performance computing. This degree addresses the growing national and regional demand for trained computational biologists. It combines a solid foundation in biotechnology with the computational skills required for bioinformatics. The flexibility of the degree structure permits students to custom design their curriculum under an advisor’s guidance, making the program especially relevant for students employed in today’s diverse biotechnology workplace. Students completing the program are qualified to pursue careers that require knowledge of current bioinformatics methods and applications, and the ability to develop and/or use new bioinformatics software.

Courses are generally offered in the late afternoon or early evening to accommodate students with full-time employment outside the university. Students employed at area biotechnology organizations may take up to 6 credits (out of 31) for bioinformatics work done on the job, under the guidance of a faculty member. This work-related project may be applied as either a 3-credit research project or a 6-credit master’s thesis.

All courses are also offered online, allowing students to participate in class without having to travel to campus. Further information can be found on with Mason Online (http://masononline.gmu.edu/).
Admissions & Policies

Admissions

University-wide admissions policies can be found in the Graduate Admissions Policies section of this catalog.

To apply for this program, please complete the George Mason University Admissions Application (https://www2.gmu.edu/admissions-aid/apply-now/).

Eligibility

Applicants should have a bachelor's degree in biology, computer science, or a related field, with a GPA of at least 3.00 in their last 60 credits of study. Applicants should have taken courses in biology, computer science, calculus, physical chemistry, and statistics. Students with deficiencies in one or more of these areas may be required to take additional courses from the undergraduate curriculum.

Application Requirements

To apply, prospective students should complete a George Mason University Admissions Application (https://www2.gmu.edu/admissions-aid/apply-now/), supply two copies of official transcripts from each college and graduate institution attended, a current résumé, and an expanded goals statement. Applicants should also include three letters of recommendation and official scores obtained on the GRE general exam. The GRE requirement will be waived if the student holds a master's degree from a regionally accredited U.S. institution. TOEFL scores are required for all international applicants.

In the field of bioinformatics and computational biology, specialists collect, store, analyze, and present complex biological data. Through this work, critical contributions are made to disease detection, drug design, forensics, agriculture, and environmental sciences through the combination of biological analysis and high-performance computing. The main objective of this doctorate is to educate the next generation of computational biologists for careers in academia, industry, and government. The program provides students with interdisciplinary academic training that includes fundamental bioscience courses as well as core and advanced courses in bioinformatics. Courses are designed to be completed in approximately two years. Completion of coursework, the comprehensive exam, and a successful dissertation proposal results in advancement to candidacy status. In the final phase, students focus on research that culminates in a dissertation.

The program is structured to be accessible for full and part-time students. Many of the courses are offered in a distance-learning format, allowing students to participate in class without having to travel to campus; visit Mason Online (http://masononline.gmu.edu/) for details.
Admissions & Policies

Admissions
University-wide admissions policies can be found in the Graduate Admissions Policies section of this catalog.

To apply for this program, please complete the George Mason University Admissions Application (https://www2.gmu.edu/admissions-aid/apply-now/).

Eligibility
Applicants should have a bachelor's degree in biology, computer science, or a related field, with a minimum GPA of 3.25 in the last earned degree. Applicants should have taken courses in molecular biology, cell biology, biochemistry, genetics, calculus, physical chemistry, computer programming and data structures, and probability and statistics. Students with deficiencies in one or more of these areas may be admitted provisionally and required to take additional courses, some of which may not be applicable to the degree's course total. Students whose undergraduate record does not include basic biochemistry will be required to take a basic course prior to BINF 701 Systems Biology.

Application Requirements
To apply, prospective students should submit the George Mason University Admissions Application (https://www2.gmu.edu/admissions-aid/apply-now/), two copies of official transcripts from each college and graduate institution attended, a current résumé, and an expanded goals statement. Applicants should also include three letters of recommendation and an official report of scores obtained on the GRE general exam. Scores should be in the 45th percentile or above. The GRE requirement for admission to the doctoral program will be waived if the student holds a master's degree from a regionally accredited U.S. institution. TOEFL or IELTS scores are required of all international applicants.

Policies
For policies governing all graduate programs, see AP 6 Graduate Policies.

Reduction of Credits
For students entering the doctoral program with a master's degree in a related field from a regionally accredited institution, the number of required credits may be reduced up to 30 credits, subject to approval of the program director and the college's associate dean for student affairs. See AP 6.5.2 Reduction of Credits for more information.

Total Credits: 48-60

Doctoral Committee and Advancement to Candidacy
By the end of the semester when coursework is completed, the student must form a doctoral committee made up of a minimum of three graduate faculty members and take a written comprehensive exam. The exam includes written and oral components. Upon passing the comprehensive exam and submitting an acceptable dissertation proposal, the student is advanced to doctoral candidacy to begin the dissertation writing phase.

Dissertation Research
A minimum of 12 and maximum of 24 combined credits from BINF 998 Doctoral Dissertation Proposal and BINF 999 Doctoral Dissertation may be applied toward satisfying doctoral degree requirements. Students must take at least 3 credits of BINF 999 Doctoral Dissertation.

</tbody>
</table>

Total Credits: 12-24

Doctoral Dissertation
After advancing to doctoral candidacy, students work on their doctoral dissertation while enrolled in BINF 999 Doctoral Dissertation. The dissertation should represent a significant contribution that is suitable for publication in a refereed scientific journal. The dissertation must be defended in a public forum before the dissertation committee and other interested faculty.

This degree addresses the regional and national need for technically trained managers who will be able to lead teams of bioinformaticians in both the public and private sectors. The degree combines a solid foundation in bioinformatics research, tools, and techniques, with the management skills needed to address the associated legal, ethical, managerial, and business issues. The degree is intended for:

- Students seeking advancement in their current bioinformatics careers that requires an advanced degree in bioinformatics combined with management expertise.
- Students with a general background in biological science or computational methods who are planning to enter the field of bioinformatics as managers and would like to strengthen their bioinformatics and managerial expertise.

**Admissions & Policies**

**Admissions**

University-wide admissions policies can be found in the Graduate Admissions Policies section of this catalog.

To apply for this program, please complete the George Mason University Admissions Application (https://www2.gmu.edu/admissions-aid/apply-now/).

**Eligibility**

Applicants should have a bachelor’s degree in biology, computer science, or a related field, with a GPA of at least 3.00 in their last 60 credits of study. Applicants should have taken courses in molecular biology, computer science, calculus, physical chemistry, and statistics. Students with deficiencies in one or more of these areas may be required to take additional courses from the undergraduate curriculum.

**Application Requirements**

To apply, prospective students should submit the George Mason University Admissions Application (https://www2.gmu.edu/admissions-aid/apply-now/), supply two copies of official transcripts from each college and graduate institution attended, a current résumé, and an expanded goals statement. Applicants should also include three letters of recommendation and official scores obtained on the GRE general exam. The GRE requirement will be waived if the student holds a master’s degree from a U.S. institution. TOEFL or IELTS scores are required of all international applicants.

**Policies**

For policies governing all graduate programs, see AP6 Graduate Policies.

**Requirements**

**Degree Requirements**

Total credits: 30

Students should refer to the Admissions & Policies tab for specific policies related to this program.

**Bioinformatics Core Courses**

Foundational courses in modern biotechnology, tools and methods for bioinformatics analysis, and methods for creating customized bioinformatics tools.

**Bioinformatics Management, Professional Science Master’s**

Banner Code: SC-MSP-BNFM

Vikas Chandhoke, Program Director
This Professional Science Master’s (https://www.professionalsciencemasters.org/) (PSM) degree addresses the growing demand for trained bioinformatics professionals with solid management skills able to assume leadership roles in biotechnology, pharmaceutical and health care sectors. The flexible degree structure allows students to custom design a curriculum that best suits their needs and allows a focus on the biological big data analysis, genomics, or bioinformatics software development and management. Students will receive advanced training in bioinformatics and management through coursework and an external internship. The curriculum was developed with active input from the Program Advisory Board consisting of recognized leaders in the field. Many courses are offered in a distance-learning format, allowing students to participate in class without having to travel to campus.

Due to the varied course options and their associated prerequisites, students are encouraged to create a program of study with their faculty advisor by the end of their first semester of studies.

Total Credits 6

1 If chosen, it is recommended that students take the colloquium course early in their studies so that they may be exposed to various possibilities and areas of research presented by the speakers.

2 The maximum amount of internship credits that can be applied to the degree is 6 credits.

Internship

The internship component is intended to provide students with the opportunity to put into practice all of the skills and knowledge accumulated throughout their studies in this program. Students must arrange an internship with a private company, a governmental agency, a non-governmental organization, or some other entity with an interest in bioinformatics and management. Students must identify a specific person within that outside entity who will be the contact and manager of the internship.

Internship credit is never given for work previously done, or for work that would have been done in any case due to an existing employment relationship.

The internship work must produce one or more products such as: a comprehensive report, a departmental presentation, a research project, or an article. Internship placement and product type must be approved by the student's faculty advisor.

Further details and procedures for completing the internship can be found with the faculty advisor.

Accelerated Master's

Bachelor's Degree (selected), Bioinformatics Management, Accelerated PSM

Overview

This degree option allows highly qualified George Mason University bachelor’s students to earn a Bioinformatics Management, PSM (https://catalog.gmu.edu/colleges-schools/science/systems-biology/bioinformatics-management-professional-science-masters/) degree in less time than if they had first graduated with a BS degree and then applied to the PSM program sequentially.

Admission and Processing Requirements

Students in the Biology, BS (https://catalog.gmu.edu/colleges-schools/science/biology/biology-bs/); Chemistry, BS (https://catalog.gmu.edu/colleges-schools/science/chemistry-biochemistry/chemistry-bs/); Computational and Data Sciences, BS (https://catalog.gmu.edu/colleges-schools/science/computational-data-sciences/computational-data-sciences-bs/); Neuroscience, BS (https://catalog.gmu.edu/colleges-schools/science/neuroscience-program/neuroscience-bs/); or Physics, BS (https://catalog.gmu.edu/colleges-schools/science/physics-astronomy/physics-bs/) with an overall GPA of at least 3.00 in their last 60 credits are welcome to apply to the Bioinformatics Management, PSM accelerated master's program. Applicants to this accelerated master's should have previously taken courses in molecular biology, computer science, calculus, physical chemistry, and statistics. Students
with deficiencies in one or more of these areas may be required to take additional courses from the undergraduate curriculum.

The GRE requirement is waived for students accepted into this accelerated program.

By the beginning of the undergraduate student's senior year, they should submit a Graduate Application for Accelerated Master's Program form (obtained from the College of Science's Office of Academic and Student Affairs (https://cos.gmu.edu/about/contact-us/)).

By at least the beginning of their senior year, students should seek out the Bioinformatics Management, PSM (https://catalog.gmu.edu/colleges-schools/science/systems-biology/bioinformatics-management-professional-science-masters/) Program Director who will aid the student in choosing the appropriate graduate courses to take and help to prepare the student for graduate studies.

In their senior year, accelerated master's students must complete the two graduate courses indicated on their Accelerated Master's Program Application with a minimum grade of 3.00 in each course. They must maintain a minimum GPA of 3.00 in all coursework and in coursework applied to their major. In the semester specified on the application (around the completion and conferral of the undergraduate degree), students must submit the Bachelor's/Accelerated Master's Transition form (found on the Office of the University Registrar website (http://registrar.gmu.edu/forms/)) and will subsequently be admitted into graduate status.

**Reserve Graduate Credits**

Students admitted to this program may take graduate courses after completing 90 undergraduate credits, and up to 6 credits of appropriate graduate coursework may be used in partial satisfaction of the requirements for the undergraduate degree. If students earn at least a 3.00 GPA in these classes, they are granted advanced standing in the master's program and must then complete an additional 25 credits to receive the master's degree.

To apply these credits to the master's degree, students must request that the credits be moved from the undergraduate degree to the graduate degree using the Bachelor's/Accelerated Master's Transition form found on the Office of the University Registrar website (http://registrar.gmu.edu/forms/) (as noted above).

Students may take up to 6 additional approved graduate credits as reserve graduate credit. These credits do not apply to the undergraduate degree but will reduce the subsequent master's degree credits accordingly (e.g., with 6 credits counted towards undergraduate degree plus the maximum 6 reserve credits, the PSM could be completed with 19 post-bachelor's credits). The ability to take courses for reserve graduate credit is available to all high achieving undergraduates with the permission of the School of Systems Biology (https://catalog.gmu.edu/colleges-schools/science/systems-biology/).

**Policies**

For more detailed information on accelerated master's in general, see AP.6.7 Bachelor's/Accelerated Master's Degrees (https://catalog.gmu.edu/policies/academic/graduate-policies/#ap-6-7).

For policies governing all undergraduate programs, see AP5 Undergraduate Policies.

**Bioinformatics Minor**

**Banner Code: BNF**

**Academic Advising**

Colgan Hall, Room 312
Science and Technology Campus
Phone: 703-993-8400
Email: binf@gmu.edu
Website: cos.gmu.edu/ssb/

The minor is an interdisciplinary program consisting of required courses in biology, programming, statistics, and bioinformatics.

### Admissions & Policies

**Policies**

Eight credits of coursework must be unique to the minor. For policies governing all minors, see AP.5.3.4 Minors.

For policies governing all undergraduate programs, see AP5 Undergraduate Policies.

### Requirements

#### Minor Requirements

Total credits: 19-20

Students should refer to the Admissions & Policies tab for specific policies related to this program.

Students must complete the following courses with a minimum GPA of 2.00.

**Banner Code: SC-MS-BIOL**

Ancha Baranova, Program Director

312 Colgan Hall
This program provides advanced training for college graduates or professionals seeking careers in the biomedical research, biotechnology, neuroscience or biodefense, as well as evolutionary and animal biology, animal biology and biology teaching. Master’s level concentrations are available in microbiology and infectious disease, molecular biology, neuroscience, evolutionary biology, and translational and clinical research. Alternatively, students may choose the program in general biological sciences, which allows flexibility to build a degree program tailored to a specific research or career interest.

Admissions & Policies

Admissions

University-wide admissions policies can be found in the Graduate Admissions Policies section of this catalog.

To apply for this program, please complete the George Mason University Admissions Application (https://www2.gmu.edu/admissions-aid/apply-now/).

While each applicant’s qualifications are reviewed as a whole, the following are provided: Applicants to the program must have a bachelor’s degree in biology or its equivalent. Additionally, all MS concentrations require a GPA of 3.00 in biology coursework or in the last 60 credits of undergraduate study. Students must also submit three letters of recommendation and scores on the GRE general exam. Exam scores should be in the 45th percentile or above. Admission is contingent on acceptance by a faculty research advisor.

Microbiology and Infectious Disease (MID) Concentration

Students who choose the Microbiology and Infectious Disease Concentration must have a lecture and lab course in microbiology and a lecture course in biochemistry.

Translational and Clinical Research (TCR) Concentration

Students who choose the Translational and Clinical Research Concentration may submit MCAT scores in place of GRE general exam scores.

Evolutionary Biology (EB) Concentration

Students who choose the Evolutionary Biology Concentration must also submit a personal statement/statement of interest consistent with at least one faculty member’s research program. GRE score should be approximately 303.

Policies

For policies governing all graduate programs, see AP6 Graduate Policies.

Requirements

Degree Requirements

Total credits: 30

Students should refer to the Admissions & Policies tab for specific policies related to this program.

Program of Study

The faculty advisor and the student work together to develop a program of study that best fits the student’s background and interests. The student must submit a program of study to the program director for approval within the first 12 credits of coursework. By the end of the second semester of coursework, students will form a graduate committee made up of three faculty members. At least two committee members must be faculty in the School of Systems Biology.

Concentration Options

Candidates for the Biology, MS focus their study in one of five approved concentrations below, or by completing coursework for the program in biological sciences in an area of study chosen in consultation with the student’s advisor and program director.

Research Options

Students have the option to complete a 3-6 credit master’s thesis (BIOL 799 Thesis) or a 1-3 credit research project (BIOL 798 Master’s Research Project). In accordance with AP6 Graduate Policies, the same quality of work is expected of students regardless of which option they choose.

- Thesis: In general, the MS thesis is most appropriate for students planning or considering a research career. Students pursuing the thesis option must write a formal thesis that meets the requirements of the school and must defend their thesis and present their results in a public seminar.
- Research Project: The MS project is most appropriate for students who have scheduling commitments, such as a full-time job, that may preclude performing a complete series of laboratory experiments. Students pursuing the project option must successfully complete written and oral comprehensive exams.

- BIOL 690 Introduction to Graduate Studies in Biology
  or BIOS 702 Research Methods

Core Biology 12-13

Select four courses from the following:

- BIOL 553 Advanced Topics in Immunology
- BIOL 563 Virology
- BIOL 583 General Biochemistry
- BIOL 669 Pathogenic Microbiology
- BIOL 715 Microbial Physiology
- BIOL 579 Molecular Evolution and Conservation Genetics
  or BIOS 744 Molecular Genetics
- BIOL 580 Computer Applications for the Life Sciences
- BIOL 691 Current Topics in Biology 3
- BIOS 710 Current Topics in Bioscience 2
- BIOS 743 Genomics, Proteomics, and Bioinformatics

Total Credits: 30

1 Other relevant graduate-level coursework may be selected in consultation with the advisor.
2 Credit for these courses may only be applied toward the degree if the course topic is relevant to microbiology and infectious diseases and approved by the advisor.
3 Suggested section topic: Vaccines. Other relevant topics may only be applied toward the degree with advisor approval.
4 Credit for this course may only be applied toward the degree if the course topic is relevant to the concentration or research topic and approved by the advisor.

MS with Concentration in Molecular Biology (MOB)

Research Methodology 1-3

- BIOL 690 Introduction to Graduate Studies in Biology
  or BIOS 702 Research Methods

Core Biology 12-13

Select 12-13 credits from the following:

- BIOL 568 Advanced Topics in Molecular Genetics
  or BIOS 744 Molecular Genetics
- BIOL 579 Molecular Evolution and Conservation Genetics
  or BIOS 767 Molecular Evolution
- BIOL 583 General Biochemistry
- BIOS 742 Biotechnology
Bioinformatics 3

Select one from the following:

- BIOL 580 Computer Applications for the Life Sciences
- BINF 630 Bioinformatics Methods
- BINF 634 Bioinformatics Programming

Molecular Techniques 2-7

Select 2-7 credits from the following:

- BINF 739 Topics in Bioinformatics
- BIOL 585 Eukaryotic Cell Biology Laboratory
- BIOL 678 Cell-Based Assays
- BIOS 716 Methods in Evolutionary Biology
- BIOS 740 Laboratory Methods in Functional Genomics and Biotechnology

Special topics courses, such as BIOL 575 or BIOL 691, may also be approved for this requirement by the program director, but only in semesters in which they are primarily a laboratory course of at least two credits with substantial content of techniques in molecular biology.

Seminar 2

- BIOL 695 Seminar in Molecular, Microbial, and Cellular Biology

Research 1-6

Select one from the following:

- BIOL 798 Master’s Research Project
- BIOL 799 Thesis (3-6 credits)

Electives 0-6

In order to reach 30 total credits, select from the following courses 0-6 credits of BIOL, BIOS, or related electives not previously taken:

- BIOL 553 Advanced Topics in Immunology
- BIOL 562 Personalized Medicine
- BIOL 566 Cancer Genomics
- BIOL 568 Advanced Topics in Molecular Genetics
- BIOL 575 Selected Topics in Genetics
- BIOL 579 Molecular Evolution and Conservation Genetics
- BIOL 583 General Biochemistry
- BIOL 585 Eukaryotic Cell Biology Laboratory
- BIOL 666 Human Genetics Concepts for Health Care
- BIOL 691 Current Topics in Biology
- BIOL 693 Directed Studies in Biology
- BIOL 793 Research in Biology
- BIOS 740 Laboratory Methods in Functional Genomics and Biotechnology
- BIOS 741 Genomics
- BIOS 742 Biotechnology
- BIOS 743 Genomics, Proteomics, and Bioinformatics
- BIOS 744 Molecular Genetics
- BIOS 767 Molecular Evolution

Total Credits: 30

1. Other relevant graduate-level coursework may be selected in consultation with the advisor.
2. Suggested section topic: Epigenetics. Other relevant topics may only be applied toward the degree with advisor approval.
3. Credit for this course may only be applied toward the degree if the course topic is relevant to the concentration or research topic and approved by the advisor.

MS with Concentration in Neuroscience (NEUR)

### Organismal Biology

Select 6-8 credits from the following suggestions in consultation with an advisor and/or committee and the program director:

| Code | Title | |
|------|-------| |
| BIOL 501 | Microbial Diversity: An Organismal Approach | |
| BIOL 507 | Selected Topics in Ecology | |
| BIOL 508 | Selected Topics in Animal Biology | |
| BIOL 518 | Conservation Biology | |
BIOS 765 Molecular Systematics
BIOS 767 Molecular Evolution
EVPP 536 The Diversity of Fishes
EVPP 550 Waterscape Ecology and Management
EVPP 551 Fungi and Ecosystems
EVPP 555 Lab in Waterscape Ecology
EVPP 643 Microbial Ecology
EVPP 651 Multivariate Data Analysis for Ecology and Environmental Science

Total Credits: 30

1. Only required if not previously completed; this course is a prerequisite to EVPP 615.
2. Other relevant graduate-level coursework may be selected in consultation with the advisor.
3. Credit for this course may only be applied toward the degree if the course topic is relevant to the concentration or research topic and approved by the advisor.

Total Credits: 30

1. Other relevant graduate-level coursework may be selected in consultation with the advisor.
2. Credit for this course may only be applied toward the degree if the course topic is relevant to the concentration or research topic and approved by the advisor.
3. Suggested course topic: Biology of Obesity and Weight Loss. Other relevant topics may only be applied toward the degree with advisor approval.
4. Suggested course topic: Creativity and Innovation. Other relevant topics may only be applied toward the degree with advisor approval.

Curriculum Notes

• For students concurrently enrolled in the Advanced Biomedical Sciences Graduate Certificate, contact your advisor for details regarding:
• BMED course credit that may be counted towards this concentration
• Meeting requirements for graduate certificates and requirements for master’s degrees

Accelerated Master’s

Biology, BS/Biology, Accelerated MS

Overview
Qualified undergraduates may be admitted into an accelerated master’s program and obtain both a Biology, BS and a Biology, MS within an accelerated time frame. Students admitted to this program may take graduate courses after completing 90 undergraduate credits, and up to 6 credits of graduate work may be used in partial satisfaction of the requirements for the undergraduate degree. If students earn at least a 3.00 GPA in these classes, they are granted advanced standing in the master’s program and must then complete an additional 24 credits to receive the master’s degree. All other master’s degree requirements must be met, including a minimum of 18 credits taken for the master’s after the bachelor’s degree is complete.

For more detailed information, see AP6.7 Bachelor’s/Accelerated Master’s Degrees. For policies governing all graduate programs, see AP6 Graduate Policies.

Application Requirements
Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in the Graduate Admission Policies section of this catalog. Application information for this accelerated master’s program can be found on the School of Systems Biology’s website (https://www2.gmu.edu/admissions-aid/how-apply/accelerated-masters/).

Successful applicants will have an overall undergraduate GPA of at least 3.10. Additionally, they will have completed the following courses with a GPA of 3.00 or higher:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>BIOL 213</td>
<td>Cell Structure and Function (Mason Core)</td>
<td>4</td>
</tr>
<tr>
<td>BIOL 214</td>
<td>Biostatistics for Biology Majors</td>
<td>4</td>
</tr>
<tr>
<td>BIOL 308</td>
<td>Foundations of Ecology and Evolution</td>
<td>5</td>

<td>Organic Chemistry I</td>
<td>3</td>
</tr>
<tr>
<td>CHEM 315</td>
<td>Organic Chemistry Lab I</td>
<td>2</td>
</tr>
</tbody>
</table>

Three letters of recommendation, including one from a prospective thesis or project advisor, are required.

Accelerated Option Requirements
At the beginning of the student’s final undergraduate semester, students must submit a bachelor’s/accelerated master’s transition form (available from the Office of the University Registrar (http://registrar.gmu.edu/)) to the College of Science’s Office of Academic and Student Affairs (https://cos.gmu.edu/about/contact-us/). Students must begin their master’s program in the semester immediately following conferral of the bachelor’s degree.

Students must maintain an overall GPA of 3.00 or higher in graduate coursework and should consult with their faculty advisor to coordinate their academic goals.

After completing 120 credits and all requirements for the bachelor’s degree and filing the Graduation Intent Form, students are awarded a bachelor’s degree. Accelerated master’s students must then submit scores on the GRE to have the provisional qualifier removed. Ordinarily, students should receive a minimum combined score of 303 on the verbal and quantitative portions of the general test.

Reserve Graduate Credit
While still in undergraduate status, a maximum of 6 additional graduate credits may be taken as reserve graduate credit and applied to the master’s program. Reserve graduate credits do not apply to the undergraduate degree.

Neuroscience, BS/Biology, Accelerated MS

Overview
Qualified undergraduates may be admitted into an accelerated master’s program and obtain both a Neuroscience, BS and a Biology, MS (https://catalog.gmu.edu/colleges-schools/science/systems-biology/neuroscience/) within an accelerated time frame. Students admitted to this program may take graduate courses after completing 90 undergraduate credits, and up to 6 credits of graduate work may be used in partial satisfaction of the requirements for the undergraduate degree. If students earn at least a 3.00 GPA in these classes, they are granted advanced standing in the master’s program and must then complete an additional 24 credits to receive the master’s degree. All other master’s degree requirements must be met, including a minimum of 18 credits taken for the master’s after the bachelor’s degree is complete.

Application Requirements
Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in the Graduate Admission Policies (https://catalog.gmu.edu/admissions/graduate-policies/) section of this catalog. Application information for this accelerated master’s program can be found on the School of Systems Biology’s website (https://cos.gmu.edu/ssb/).

Successful applicants will have an overall undergraduate GPA of at least 3.10. Three letters of recommendation, including one from a prospective thesis or project advisor, are required. Additionally, they will have completed the following courses with a GPA of 3.00 or higher:

**Admissions & Policies**

**Admissions**

University-wide admissions policies can be found in the Graduate Admissions Policies section of this catalog.

To apply for this program, please complete the George Mason University Admissions Application (https://www2.gmu.edu/admissions-aid/apply-now/).

**Application Requirements**

The following are required of applicants to this program:

- Minimum 3.25 GPA in previous coursework with significant training in the biological sciences.
- Three letters of recommendation from faculty members or individuals who have firsthand knowledge of the applicant's academic or professional capabilities.
- Statement of purpose consistent with the research interests of at least one faculty member in the program.
- Scores on GRE general exam (required) and biology or biochemistry subject exam (recommended) taken within the past five years prior to date of application submission. The GRE exam is waived if applicants hold a master's degree from a fully-accredited U.S. university at the time of their application.
- A TOEFL score of 575 on the paper-based exam or 230 on the computer-based exam is required of international students.

An interview may also be required. Applications should be submitted by January 1st for fall admission. Under unusual circumstances, applications may be considered for spring admission if they are received by October 1st. Applications will be considered until positions are filled. Students are encouraged to meet application deadlines to be considered for scholarships and stipends.

Strong candidates who lack several prerequisites may be admitted to provisional status. Removal from provisional status and continuation in the program is contingent on earning a GPA of 3.25 in the program's fundamental courses, plus completion of missing prerequisites.

Students who have not taken a course in basic biochemistry will be required to complete one prior to BIOS 701 Systems Biology.

**Policies**

For policies governing all graduate programs, see AP.6 Graduate Policies.

**Reduction of Credits**

For students entering the doctoral program with a master's degree in a related field from a regionally accredited institution, the number of required credits may be reduced up to 30 credits, subject to approval of the program faculty and the college's associate dean for student affairs.

**Transfer of Credit**

Graduate credits taken previously and not used toward another degree may be transferred, subject to the approval of the advisor, the program director, and the associate dean. See AP.6.5 Credit by Exam, Reduction or Transfer for more information.

Website: cos.gmu.edu/ssb/

This program is a research-oriented field of study that prepares students for significant contributions in academic or industrial settings. It is broken down into three concentrations: Cell and Molecular Biology, Microbiology and Infectious Disease, and Biocomplexity and Evolutionary Biology.

The academic component is a three-tiered structure. The first tier provides a set of core courses designed to advance research skills across all disciplines. The second tier comprises additional core courses and elective courses. The first two tiers are designed to be completed in approximately two years, including the comprehensive qualifying exam. Only on completion of these requirements, the qualifying exam, and a successful dissertation proposal can the students advance to candidacy status. The third tier focuses on research and culminates in a dissertation.

---

**Academic Component**

- **CHEM 313** Organic Chemistry I 3  
- **CHEM 315** Organic Chemistry Lab I 2

**Accelerated Option Requirements**

At the beginning of the student's final undergraduate semester, students must submit a bachelor's/accelerated master's transition form (available from the Office of the University Registrar (http://registrar.gmu.edu/)) to the College of Science's Office of Academic and Student Affairs (https://cos.gmu.edu/about/contact-us/). Students must begin their master's program in the semester immediately following conferral of the bachelor's degree.

Students must maintain an overall GPA of 3.00 or higher in graduate coursework and should consult with their faculty advisor to coordinate their academic goals.

After completing 120 credits and all requirements for the bachelor's degree and filing the Graduation Intent Form, students are awarded a bachelor's degree.

**Additional Requirements**

- Satisfactory performance in undergraduate coursework must be maintained.
- Satisfactory graduate-level performance in each approved graduate course taken while in undergraduate status (receiving a grade of B or better (3.0 or higher) in each course).
- Submission of documents to complete the master's application before the published deadline, including a goals statement and a resume. GRE scores are not required.
- Completion of undergraduate degree from George Mason University.
- Confirmation of a graduate faculty advisor.

**Biosciences, PhD**

This program is a research-oriented field of study that prepares students for significant contributions in academic or industrial settings. It is broken down into three concentrations: Cell and Molecular Biology, Microbiology and Infectious Disease, and Biocomplexity and Evolutionary Biology.

The academic component is a three-tiered structure. The first tier provides a set of core courses designed to advance research skills across all disciplines. The second tier comprises additional core courses and elective courses. The first two tiers are designed to be completed in approximately two years, including the comprehensive qualifying exam. Only on completion of these requirements, the qualifying exam, and a successful dissertation proposal can the students advance to candidacy status. The third tier focuses on research and culminates in a dissertation.

---

**Admissions & Policies**

**Admissions**

University-wide admissions policies can be found in the Graduate Admissions Policies section of this catalog.

To apply for this program, please complete the George Mason University Admissions Application (https://www2.gmu.edu/admissions-aid/apply-now/).

**Application Requirements**

The following are required of applicants to this program:

- Minimum 3.25 GPA in previous coursework with significant training in the biological sciences.
- Three letters of recommendation from faculty members or individuals who have firsthand knowledge of the applicant's academic or professional capabilities.
- Statement of purpose consistent with the research interests of at least one faculty member in the program.
- Scores on GRE general exam (required) and biology or biochemistry subject exam (recommended) taken within the past five years prior to date of application submission. The GRE exam is waived if applicants hold a master's degree from a fully-accredited U.S. university at the time of their application.
- A TOEFL score of 575 on the paper-based exam or 230 on the computer-based exam is required of international students.

An interview may also be required. Applications should be submitted by January 1st for fall admission. Under unusual circumstances, applications may be considered for spring admission if they are received by October 1st. Applications will be considered until positions are filled. Students are encouraged to meet application deadlines to be considered for scholarships and stipends.

Strong candidates who lack several prerequisites may be admitted to provisional status. Removal from provisional status and continuation in the program is contingent on earning a GPA of 3.25 in the program's fundamental courses, plus completion of missing prerequisites.

Students who have not taken a course in basic biochemistry will be required to complete one prior to BIOS 701 Systems Biology.

**Policies**

For policies governing all graduate programs, see AP.6 Graduate Policies.

**Reduction of Credits**

For students entering the doctoral program with a master's degree in a related field from a regionally accredited institution, the number of required credits may be reduced up to 30 credits, subject to approval of the program faculty and the college's associate dean for student affairs.

**Transfer of Credit**

Graduate credits taken previously and not used toward another degree may be transferred, subject to the approval of the advisor, the program director, and the associate dean. See AP.6.5 Credit by Exam, Reduction or Transfer for more information.
Requirements

Degree Requirements

Total credits: 72

Students should refer to the Admissions & Policies tab for specific policies related to this program.

Students in the doctoral program are required to present two research papers at a meeting or conference any time before graduation.

Concentration in Cell and Molecular Biology (CMB)

This concentration prepares students for significant contributions in an academic or industrial research career. Coursework covers microarray analysis of gene expression, proteome analysis, sequencing and analysis of gene polymorphisms, gene and genome evolution, molecular studies of disease mechanisms, mechanisms of toxicology and mutagenesis, developmental neuroscience, and biotechnological applications.

Concentration in Microbiology and Infectious Disease (MID)

Students in this concentration will be prepared for employment in academia, government, or industry. By stressing mechanisms of pathogenicity, physiology, metabolism, and genomic and proteomic analysis of pathogens, students will have a firm foundation for future research in infectious disease. Students will also be introduced to advanced laboratory practices, such as animal research methodologies and biocontainment laboratory work.

Concentration in Biocomplexity and Evolutionary Biology (BEB)

This concentration prepares students for careers in academia, government or industry. Through this concentration students will learn laboratory and quantitative skills that will enable them to investigate evolutionary relationships among organisms at the population, species or ecosystem level. Students will be encouraged to explore a wide range of coursework in order to develop a broad background in evolutionary biology and a deep knowledge of relevant methodologies necessary to keep abreast in this rapidly changing field.

The science of evolutionary biology is fundamentally concerned with documenting not only genetic change, but also the processes that cause it. Evolutionary biology includes paleobiology, population genetics, evolutionary ecology and phylogenetics. Biocomplexity is the study of living organisms, including their unique structural, chemical and genetic properties, their distribution and abundance in nature, and their evolutionary relationships to all other organisms. Given the fact that most of the earth's biodiversity is unknown, collecting, cataloging and studying organisms have always been and will continue to be one of the most challenging aspects of biology.

Total Credits 23-36

1 Students may take other courses related to their research topic if approved by their committee. Courses in Geographic Information Systems or Statistics are encouraged.

Dissertation Committee

Upon admission to the program, each student is assigned an advisor from the bioscience faculty. The advisor may be changed by mutual consent of student and advisor, or petition to the program director and associate dean. With their advisor, students adopt an individual program that focuses on a specific area of research.

By the end of the fourth semester of coursework, students assemble a dissertation committee of four graduate faculty members with representation from at least two academic departments. The faculty advisor and the program director approve the program of study.

Qualifying Examination

On nearing completion of course requirements, students take a qualifying exam with a written and an oral component. At the discretion of the committee, the written qualifying exam may be retaken once if the student’s performance was deemed below satisfaction.

Advancement to Candidacy

Upon successful completion of the qualifying exam, the majority of all coursework, and an accepted dissertation proposal, students will be recommended for advancement to candidacy by the committee and the program director.

The semester after advancement to candidacy, students are eligible to enroll in dissertation research (BIOS 999 Doctoral Dissertation Research). Students must review their progress on the dissertation with their graduate committee on a regular basis until graduation.

Dissertation Research

No more than 24 combined credits from BIOS 998 Doctoral Dissertation Proposal and BIOS 999 Doctoral Dissertation Research may be applied toward satisfying doctoral degree requirements. Students register for a minimum of 3 credits of BIOS 999 Doctoral Dissertation Research in the first semester of advancement.

Total Credits 12-24

Doctoral Dissertation

After advancing to doctoral candidacy, students work with their dissertation committee to develop their dissertation proposal into a completed doctoral dissertation. The dissertation research should represent a significant contribution that is publishable in a refereed scientific journal. When the dissertation is complete, students will present their results to their graduate committee and defend their dissertation in a public forum.

Personalized Medicine Graduate Certificate

Academic Advising

312 Colgan Hall
Science and Technology Campus
Phone: 703-993-8400
Email: biologygrad@gmu.edu
Website: cos.gmu.edu/ssf/

This certificate is based upon a set of core courses that currently support the Biology, MS; the Biosciences, PhD; the Bioinformatics and Computational Biology, MS; and the Bioinformatics and Computational Biology, PhD degree programs. Students completing this certificate will receive the most up-to-date advanced education available in the region. Completion of the certificate will enhance the careers of those students who are already working in this area, and can also serve as a
useful intermediate step towards later enrollment in master’s or doctoral programs.

Courses are generally offered in the late afternoon or in the evening to accommodate students with full-time employment outside of the university.

This certificate may be pursued on a part-time or full-time basis.

**Admissions & Policies**

**Admissions**

University-wide admissions policies can be found in the Graduate Admissions Policies section of this catalog.

To apply for this program, please complete the George Mason University Admissions Application (https://www2.gmu.edu/admissions-aid/apply-now/).

Prospective students should hold an undergraduate GPA of 3.00 or current employment in clinical or translational research, diagnostics lab, or biological data analysis field.

To be considered for admission, applicants must submit the George Mason University Admissions Application (https://www2.gmu.edu/admissions-aid/apply-now/), all undergraduate transcript(s), three letters of recommendation, and a statement of interest.

**Policies**

Students may not enroll initially in any College of Science master’s or doctoral program and later transfer into this certificate program.

For policies governing all graduate programs, see AP 6 Graduate Policies.

**Premium Tuition**

This certificate charges students a differential tuition rate of $100 per credit hour, which is added to the standard graduate tuition rate (regardless of in or out of state status).

**Requirements**

**Certificate Requirements**

Total credits: 15

This certificate may be pursued on a full- or part-time basis.

Students should refer to the Admissions & Policies tab for specific policies related to this program.

**Required Core Courses**

¹ Credit for these courses may only be applied toward the certificate's electives if the research topic is relevant to personalized or translational medicine.

**College of Visual and Performing Arts**

C211 College Hall
Fairfax Campus
MSN: 1H4
Phone: 703-993-8877
Website: cvpa.gmu.edu

**Administration**

- Rick Davis, Dean
- Lisa C. Kahn, Associate Dean for Research and Graduate Studies
- John Wilkin, Director Finance and Administration, CFO
- Julie Thompson, Executive Director, Center for the Arts
- Karen Reedy, Associate Dean for Undergraduate Education

**College Code: AR**

The mission of the College of Visual and Performing Arts (CVPA) is to advance the study, creation, performance, exhibition, and management of the arts, acting on the strong belief in their transformative influence on individuals and civilizations. Fusing the academic and the professional, the campus and the community, the past and the present, CVPA seeks to engage new art forms, populations, and ways of working to meet the needs of a changing world both inside and beyond the walls of the
The College strives to ensure that Mason’s entire student population has the opportunity to experience and study the arts as a key component of a well-rounded liberal education.

Studying the arts goes hand in hand with creation, performance, and management. Each major features strong academic preparation in the history and theory of the art form in support of discipline-based technique courses. The college’s faculty of practicing artist-teachers-managers works closely with students in a variety of curricular and co-curricular creative projects. Once basic techniques are established, students are encouraged to stretch, grow, and experiment within this supportive environment, enhancing their experience as working artists and arts managers while enriching the cultural life of the campus community.

An education in the arts is deepened by regular contact with the work of distinguished visiting artists. The college is home to the Center for the Arts (http://cfag.gmu.edu/) on the Fairfax campus and the Hylton Performing Arts Center (https://hyltoncenter.org/) on the Science and Technology campus, both of which present diverse programs of cultural experiences for the entire university community, as well as Northern Virginia and the greater Washington, D.C., area. Artists from across the country and around the world regularly perform, give master classes, work with students during extended residencies, and interact with the community in a variety of other ways. The accessibility and vitality of the Concert Hall, Hylton Center, TheaterSpace, the Gillespie Gallery of Art, Johnson Center Cinema, Harris Theater, and other campus and regional venues provide an unparalleled educational experience in the arts.

Requirements & Policies

General Academic Policies

The requirements for each academic program offered by the college are described in the sections below. Students are ultimately responsible for their academic progress towards their degrees. All students are subject to the university’s general academic policies in addition to those specific to each academic unit.

Accommodations for Disabled Students

Students with documented disabilities should contact the Office of Disability Services (http://ods.gmu.edu) (Student Union I, Room 222; 703-993-2474) to open a file and learn more about accommodations that may be available to them.

Auditing

Students who wish to audit a course must obtain written permission from the instructor before registering for the class. Students do not receive grades or credit for audited courses. A student who audits a course does so for the purposes of self-enrichment and academic exploration and is not required to actively participate in class assignments, presentations, or exams. The course is offered only on a space-available basis with the approval of the instructor. It is expected that auditing students will respect all class rules and practices.

The Course Audit Form can be found on the Registrar’s website (http://registrar.gmu.edu). The form must be submitted to the Office of the University Registrar by the last day to drop the course.

Note: A previously audited course may be taken again for credit in a later term. Students may also audit a course previously taken and passed; however, students may not change from credit to audit status or from audit to credit status after the end of the drop period, as defined above. The usual tuition and fees apply to audit status.

Auditing Courses under the Senior Citizen Waiver Program

Under terms of the Senior Citizen Higher Education Act of 1974, eligible Virginia residents (requires legal domicile for one year) that are 60 years of age or older are entitled to enroll to audit (no academic credit received) up to three academic credit courses per semester and pay no tuition or fees, except fees established for the purpose of paying for course materials or laboratory fees.

For more information on policies and procedures, please refer to the Registrar’s website (https://registrar.gmu.edu/topics/senior-citizen-waiver/).

E-mail

George Mason University uses only Mason e-mail accounts to communicate with enrolled students. Students should activate their Mason e-mail, use it to communicate with their school/ department/ program and other administrative units, and check it regularly for important information.

Registration

Students are personally responsible for correctly registering for courses and paying all tuition and fees by the official university registration and payment deadlines. Instructors do not have the authority to add students to courses. All students should verify the accuracy of their enrollment before the end of the add and drop periods.

Questions about Academic Policies

Students with questions regarding exceptions to academic policies should contact the CVPA Academic Affairs Office (College Hall, C200; 703-993-4551).

Undergraduate Policies and Information

Degree Programs

The undergraduate degree consists of coursework in the Mason Core, a major area of study, and electives. To earn a bachelor’s degree, students must complete a minimum of 120 credits, of which at least 45 must be upper level courses (numbered 300 and above). At least one course at the 300 or 400 level must be designated “writing intensive.”

Academic Course Load

Undergraduate students earning degrees in CVPA may register for 18 credits per fall and spring semester without the dean’s permission. Students are advised that they will be required to pay additional tuition beyond the 15-credit, university full-time academic load. Students should be cognizant of the time commitment when they register for their courses, especially if they register for high numbers of credits. Students are urged to consult with their academic advisor regularly and familiarize themselves with Mason guidelines for work and academic load. Students are reminded that employment must not take priority over coursework.

Advising

Students are assigned academic advisors and are strongly encouraged to meet with them at least once per semester, and particularly when they achieve 75 credits or are two semesters before expected graduation. Undeclared CVPA students and undergraduate students in academic difficulty (cumulative GPA under 2.00) are required to see an advisor prior to registration for the semester following registration restriction.
Minimum Cumulative GPA in Major
Undergraduate students earning CVPA degrees must earn a minimum 2.00 cumulative GPA in their major, or higher if required by their program.

Foreign Language Requirement
Some degrees within CVPA require intermediate-level proficiency in one foreign language or the completion of a minor, double major or double degree. The foreign language requirement may be fulfilled by completing a course in a foreign language numbered 202, 209, or 210 (or higher level courses taught in the language) or achieving a satisfactory score on an approved proficiency test. International students should consult the CVPA Academic Affairs Office about a possible waiver of this requirement.

Leave of Absence
All undergraduate students who are planning an absence from George Mason must submit a formal request for Leave of Absence to the Office of the University Registrar. Students do not need to complete the Leave of Absence form if they are participating in a George Mason University sponsored study abroad program or have received permission to study elsewhere. The maximum time allowed for a Leave of Absence is four semesters. A new application for admission to the university will be required if a student is away for more than 2 academic years OR a Leave of Absence form was not submitted. Re-admission is not guaranteed. See AP.1.8 Undergraduate Leave of Absence for full university policy.

Mason Core Program
The baccalaureate degree requires students to take a range of courses that provide a broad knowledge of the world, develop the ability to think both conceptually and critically, acquaint them with many different methods of inquiry, and provide the skills to continue intellectual growth throughout their lives. Students select from a range of courses outlined in the Mason Core section. Students accepted into the Honors College fulfill some/all of their Mason Core requirements with completion of that program of study. Students are strongly advised to consult the University Mason Core page.

Minors
Some degrees within CVPA require a minor or intermediate-level proficiency in one foreign language. University policy states that as part of their minor, students must earn 8 distinct credits that are not used to fulfill requirements for their major. Some programs have more specific criteria for applying credits to a minor.

RECR courses
Any 100-level RECR courses incorporating dance, offered by the College of Education and Human Development, cannot be counted toward credits required for a degree in CVPA. Students may take non-dance RECR courses for elective credit for CVPA degrees.

Prerequisites
Undergraduate students must earn a C or better in prerequisite courses to proceed to the next course.

Study Elsewhere
Students with fewer than 60 hours of transfer coursework (not including registration through the Consortium of Universities of the Washington Metropolitan Area or coursework completed through the Center for Global Education) may take up to 12 hours of coursework in CVPA disciplines at another institution. A student may seek permission for additional hours beyond these limits for summer registration if his/her permanent residence is more than 50 miles from the George Mason University Fairfax campus. Students must obtain advance, written approval from the student’s dean and the course dean’s office. Students who enroll elsewhere without advance written permission while enrolled at Mason will not receive transfer credit for the coursework taken at another institution unless they re-apply for admission to Mason as transfer applicants and meet all priority deadlines. Re-admission is not guaranteed, and transfer credit is awarded based upon course equivalences in effect at the time of re-admission. Freshmen and transfer students in their first semester at Mason are not permitted to study elsewhere. Courses previously attempted at Mason (including withdrawals) cannot be taken elsewhere. Schools and Colleges have study elsewhere criteria for courses in their disciplines in addition to University policy. Students must be in good standing with a minimum cumulative GPA of 2.00 in their Mason courses. See AP.1.4.2 Permission to Study Elsewhere for additional information.

Transfer of Credit
Transfer students must resolve transfer credit issues within the first academic year of enrollment.

Undergraduate students may transfer a maximum of 18 credits earned in non-degree status at Mason.

Withdrawals
Students are responsible for all courses in which they remain officially enrolled once the drop period has ended.

Undergraduates enrolled in degree programs are eligible to withdraw from three classes through the ninth week (of a fifteen week semester) without dean’s approval and at the student’s own discretion during their entire undergraduate career at Mason. See AP.1.5.1 Selective Withdrawal for Undergraduates for further details.

Instructors do not have the authority to withdraw students from classes. Withdrawals other than Selective Withdrawals require the approval of the academic dean and are typically allowed only for full semesters at a time (all enrolled courses) and are only permitted for non-academic reasons. No withdrawals can be approved to avoid an unsatisfactory grade. When submitting a withdrawal request, students must provide original, verifiable, third-party documentation for the reason for the withdrawal. Requests for withdrawals should be submitted as early in the semester as possible, and never after the last day of classes.

Graduate Policies and Information
For items not listed below, please refer to the university’s policies: AP6 Graduate Policies.

Admissions
CVPA follows university policies for graduate admissions. Some programs ask for additional admissions requirements. Please refer to the program for a listing of all requirements.

All applicants, regardless of admission or not, will have their decision uploaded through their self-service center. Applicants will be notified that their decision is ready for their review via email to the address they provided at the point of application. Applicants will not be told decisions over the phone or in-person. Applicants who do not meet our minimum requirements (e.g., GPA, test scores, pre-screening requirements, portfolio requirements) may be issued a denial decision before their application is completed.
The College of Visual and Performing Arts does not offer an appeal process for admissions decisions. Applicants are welcome to file a new application for a future semester.

Graduate Programs
CVPA's graduate programs offer highly focused study designed to prepare students for professional work in the arts and education. The requirements for each graduate degree are described under the program's catalog entry.

Transfer of Credit
Graduate credit earned prior to admission to a certificate, master's, or doctoral program may be eligible to be transferred and applied to a CVPA graduate program, certificate or doctoral degree. Please see AP.6.5.3 Transfer of Credit for more detailed information about the requirements.

Appeals Process

Appeals of Academic Procedures
See Appeals of Academic Procedures for University Policies.

CVPA Procedures for Grade Appeal
Although faculty members are generally the best judges of student performance in their classes, circumstances may cause a student to believe that a professor has made an unfair grade decision. Therefore, a Grade Appeal process has been established to ensure a fair hearing in such cases. Grade appeals are not accepted after the last day of classes for the following semester, as indicated in the Schedule of Classes (spring for fall grades, fall for spring and summer grades). The process for initiating and resolving a Grade Appeal is as follows:

1. The first step to resolve differences between an instructor and student concerning a grade should be a discussion with the instructor; this meeting should occur within two weeks of the student’s written request for a meeting; if the instructor is no longer affiliated with the University, the appeal is made to the Program Director.

2. If the instructor and student cannot resolve the issue, and the student wishes to pursue the matter further, he or she must present to the Program Director, a written appeal including the following: A description of the outcome of the informal discussion process. Any relevant documents the student would like to have reviewed as part of the appeal process. A copy of the course syllabus and assignment descriptions. Failing a satisfactory resolution, the student may appeal the grade by submitting a written appeal to the CVPA Academic Affairs Office. Undergraduate students will submit their request to the associate dean; graduate students will submit their requests to the associate dean in the CVPA Academic Affairs Office.

The decision of the CVPA Assistant or Associate Dean is final.

CVPA Procedure for Non-Academic Appeals or Grievance
A student who intends to file a non-academic appeal, or intends to file a grievance against a faculty member, another student, or administrator undertakes the following steps:

1. The student meets with the professor and Program Director to discuss the non-academic appeal/grievance; this meeting should occur within two weeks of the student’s written request for a meeting; if the person is no longer affiliated with the University, the request is made to the Department or Program Director only.

2. The professor (Program Director) responds to the student within three days of the meeting.

3. If the student wishes to continue the non-academic appeal/grievance, the student must submit a written explanation to Academic Affairs Office. The Associate Dean reviews all non-academic appeals and grievances, and has the final decision for the college.

4. The student may follow additional University appeal procedures outlined in Appeals of Academic Procedures.

Academic Termination from an Undergraduate Program
Termination from a major may be imposed as a result of excessive repeating of required courses without achieving the minimum standard, and for other evidence of continued failure to make adequate progress toward completion of the major. Some programs have specific criteria for termination from the major. See the program and AP.5.2.4 Termination from the Major.

Academic Dismissal from an Undergraduate Program
A third suspension results in academic dismissal from the university. See AP.5.2.6 Academic Dismissal for details.

Academic Dismissal from a Graduate Program
The Office of the University Registrar contacts students via e-mail if they have earned an academic warning, or dismissal. Students wishing to appeal should contact the CVPA Graduate Programs Office within three days of the e-mail date. A deadline for the appeal documentation is determined, normally two weeks. Students are to submit:

1. A written statement explaining the circumstances that led to the dismissal, along with supporting documentation from employers, physicians, or other sources as necessary;

2. Evidence that the circumstances precipitating the unsatisfactory academic performance have been remedied;

3. Statement from department and program's graduate coordinator supporting the student's continued enrollment at the University.

Upon receipt of the above,

1. The Associate Dean of Academic Affairs reviews the appeal.

2. The final decision of the Associate Dean is forwarded to the student and the Office of the University Registrar.

3. The student may follow University appeal procedures outlined in Appeals of Academic Procedures.

For these, and any other academic concerns, students are encouraged to contact George Mason University’s Ombudsman for Student Academic Affairs. The ombudsman is a neutral, independent, informal, and confidential party who provides assistance to students in resolving university-related concerns. The ombudsman is an advocate for fairness and the equitable treatment of students, operates independently of all formal grievance processes at the university, and considers all sides of an issue in an impartial and objective manner. The ombudsman has no authority to make exceptions or to grant requests but can perform informal investigations and, as a result, may recommend actions that lead to changes in processes and policies at the university. Meetings with the ombudsman are confidential. The ombudsman serves all undergraduate and graduate students at the university.

Undergraduate Program

Arts Management Minor

The field of visual and performing arts offers many career paths that rely on a strong foundation in one or more art forms and require specific knowledge and skills in administration and management. The minor in arts management is open to all CVPA majors as well as art history majors. All other students must complete 9 credits of arts-related course work to be eligible for this minor.

Graduate Program

MA in Arts Management

The Master of Arts in Arts Management responds to a growing demand for graduates who can manage and coordinate the arts, bridging the worlds of performing and visual arts with applied managerial skills. The Washington, D.C., region is home to one of the nation’s largest concentrations of arts organizations. The demand for arts managers with skills in financial and budgetary management, strategic management and entrepreneurship, and public relations, including marketing and advertising, has arguably never been more acute. The need for arts managers with skills in philanthropy, fund raising, and ongoing relationship management in the private and public arts sectors also continues to grow at a fast pace.

The MA in Arts Management is a 36-credit program of study that provides a core curriculum in the fundamentals of arts management. Students complete a 24-credit core and then select 9 credits of approved elective courses. Students also take an internship, which affords an in-depth opportunity to work with professionals in the field. The internship provides the opportunity to work at more than 60 different visual and performing arts venues in Washington, D.C., as well as national and international locations.

Requirements & Policies

Requirements

Admissions

The program is geared toward those with a passion for the arts. Diversity among applicants is anticipated and sought, and candidates are evaluated on a case-by-case basis. Work experience is strongly preferred. It is anticipated that some students will come from the arts community, with experience and training in music, dance, theater, visual and technical arts and wish to add the skills of marketing, finance, strategy, fundraising, entrepreneurship, and management to their repertoire. It is also expected that some students will enter with more developed skills in business and wish to unite these skills with prior experiences in the arts.

For admissions requirements and deadlines, applicants should visit the graduate admissions page of the Arts Management website (http://artsmanagement.gmu.edu).

Accelerated Master’s

Art and Visual Technology, BA/Arts Management, Accelerated MA

Overview
Undergraduates in Art may apply to the accelerated master’s degree in Arts Management. If accepted, students will be able to earn an Art and Visual Technology, BA and an Arts Management, MA after satisfactory completion of 150 credits.

Students choosing the accelerated option must fulfill all university requirements for the master’s degree. The regular designed timeframe would be a start in the Fall and completion of all coursework in the Summer five years later with the exception of Capstone, which is only offered in Fall and Spring. Students may need a longer timeframe to complete all requirements.

This accelerated option is offered through joint cooperation between the School of Art and the Arts Management Program.

For more detailed information, see AP.6.7 Bachelor’s/Accelerated Master’s Degrees. For policies governing all graduate degrees, see AP.6 Graduate Policies.

Admissions Requirements
Applicants to accelerated master’s programs must have completed at least 75 credits that apply to their undergraduate degree (with at least 24 credits at Mason) and no more than 100 credits. Applicants should submit an Accelerated Master’s Program Application, available from the College of Visual and Performing Arts (CVPA) Academic Affairs Office. It includes the proposed conferral date for the undergraduate degree and
the two graduate courses that are to be applied to the undergraduate degree.

Interested students should contact the Arts Management Program Office for more details about the application process.

**Accelerated Option Requirements**

As an undergraduate, the accelerated master’s student is required to complete the two graduate courses indicated on their Accelerated Master’s Program application with a minimum grade of 3.00 in each course. Students must maintain a minimum GPA of 3.00 in all coursework and in coursework applied to their major. On completion and conferment of the undergraduate degree in the semester indicated in the application, candidates submit the Bachelor’s/Accelerated Master’s Transition Form (which shall incorporate all of the Graduate Admission requirements of the university) and are admitted to graduate status.

As graduate students, accelerated master’s students have an advanced standing and must meet all master’s degree requirements except for the two courses (6 credits) completed as undergraduates. Students will begin their master’s program in the semester immediately following conferment of the undergraduate degree, and they may also begin in the summer term.

**Reserve Graduate Credit**

Students may take up to 6 additional graduate credits as reserve graduate credit. These credits do not apply to the undergraduate degree. The ability to take courses for reserve graduate credit is available to all high achieving undergraduates with permission of the School of Art. Permission to take a graduate course for reserve graduate credit is normally granted only to Mason seniors within 15 credit hours of graduation and must be approved by the Dean’s Office.

To apply these credits to the master’s degree, students must request that the credits be moved from the undergraduate degree to the graduate degree using the Bachelor’s/Accelerated Master’s Transition Form.

**Art and Visual Technology, BFA/Arts Management, Accelerated MA**

**Overview**

Undergraduates in Art may apply to the accelerated master’s degree in Arts Management. If accepted, students will be able to earn an Art and Visual Technology, BFA and an Arts Management, MA after satisfactory completion of 150 credits.

Students choosing the accelerated option must fulfill all university requirements for the master’s degree. The regular designed timeframe would be a start in the Fall and completion of all coursework in the Summer five years later with the exception of Capstone, which is only offered in Fall and Spring. Students may need a longer timeframe to complete all requirements.

This accelerated option is offered through joint cooperation between the School of Art and the Arts Management Program.

For more detailed information, see AP6.7 Bachelor’s/Accelerated Master’s Degrees. For policies governing all graduate degrees, see AP6 Graduate Policies.

**Admissions Requirements**

Applicants to accelerated master’s programs must have completed at least 75 credits that apply to their undergraduate degree (with at least 24 credits at Mason) and no more than 100 credits. Applicants should submit an Accelerated Master’s Program Application, available from the College of Visual and Performing Arts (CVPA) Academic Affairs Office. It includes the proposed conferment date for the undergraduate degree and the two graduate courses that are to be applied to the undergraduate degree.

Interested students should contact the Arts Management Program Office for more details about the application process.

**Accelerated Option Requirements**

As an undergraduate, the accelerated master’s student is required to complete the two graduate courses indicated on their Accelerated Master’s Program application with a minimum grade of 3.00 in each course. Students must maintain a minimum GPA of 3.00 in all coursework and in coursework applied to their major. On completion and conferment of the undergraduate degree in the semester indicated in the application, candidates submit the Bachelor’s/Accelerated Master’s Transition Form (which shall incorporate all of the Graduate Admission requirements of the university) and are admitted to graduate status.

As graduate students, accelerated master’s students have an advanced standing and must meet all master’s degree requirements except for the two courses (6 credits) completed as undergraduates. To apply these credits to the master’s degree, students must request that the credits be moved from the undergraduate degree to the graduate degree using the Bachelor’s/Accelerated Master’s Transition Form.

**Theater, BA/Arts Management, Accelerated MA**

**Overview**

Undergraduates in Theater may apply to the accelerated master’s degree in Arts Management. If accepted, students will be able to earn a BA in Theater and an MA in Arts Management after satisfactory completion of 150 credits.

Students choosing the accelerated option must fulfill all university requirements for the master’s degree. The regular designed timeframe would be a start in the Fall and the completion in the Summer five years later, but longer time frames may also be available.
See AP.6.7 Bachelor's/Accelerated Master’s Degree for policies related to this program. For policies governing all graduate degrees, see AP6 Graduate Policies.

Admission Requirements
Applicants to accelerated master’s programs must have completed at least 75 credits that apply to their undergraduate degree (with at least 24 credits at Mason) and no more than 90 credits. Applicants should submit an Accelerated Master’s Program Application, available from the College of Visual and Performing Arts (CVPA) Graduate Studies. It includes the proposed conferral date for the undergraduate degree and the two graduate courses that are to be applied to the undergraduate degree.

Interested students should contact the Arts Management Program Office for more details about the application process.

Accelerated Option Requirements
As an undergraduate, the accelerated master’s student is to complete the two graduate courses indicated on their Accelerated Master’s Program application with a minimum grade of 3.00 in each course. Students must maintain a minimum GPA of 3.00 in all coursework and in coursework applied to their major. On completion and conferral of the undergraduate degree in the semester indicated in the application, they submit the Bachelor’s/Accelerated Master’s Transition Form (which shall incorporate all of the Graduate Admission requirements of the university) and are admitted to graduate status.

As graduate students, accelerated master’s students have an advanced standing. They must meet all master’s degree requirements except for the two courses (6 credits) they completed as undergraduates. The Internal Internship (AMGT 742 Internship I) will be within Theater at Mason (generally with the School of Theater). Students will begin their master’s program in the semester immediately following conferral of the undergraduate degree, and they may also begin in the summer term.

Reserve Graduate Credit
Students may take up to 6 additional graduate credits as reserve graduate credit. These credits do not apply to the undergraduate degree. The ability to take courses for reserve graduate credit is available to all high achieving undergraduates with permission of the School of Theater. To apply these credits to the master’s degree, students must request that the credits be moved from the undergraduate degree to the graduate degree using the Bachelor’s/Accelerated Master’s Transition Form.

Computer Game Design Program
Sang Nam, Director
2019 Art and Design Building
Fairfax Campus
Phone: 703-993-5734
Website: game.gmu.edu

Undergraduate Program
The 120-credit Computer Game Design, BFA program enables students to focus on the artistic components of computer game design while providing them with the technical skills prerequisite to the field. Required courses include computer science, art and visual technology, music, the humanities, and computer game design. The required internship provides students with practical experience that enhances their employability post-graduation.

Graduate Program
The Master of Arts in Computer Game Design prepares graduate students who may have studied game design at the undergraduate level or who have degrees in a related technology, humanities, or arts disciplines for a career in game development and design. The program’s intention is to prepare students for employment and further study in the computer game design and development fields with a curriculum that reflects the gaming industry’s demand for an academically rigorous, technical program coupled with an understanding of the artistic and creative elements of the evolving field of study.

Requirements & Policies
Undergraduate Program
Admissions
A writing sample will be reviewed prior to admission into the Game Design Program. Students will either be accepted, provisionally accepted, or denied. Visit the department website (http://game.gmu.edu/) for further instruction.

Writing-Intensive Requirement
The university requires all undergraduate students to complete at least one course designated “writing intensive” in their majors at the 300 level or above. Students in the BFA in computer game design fulfill this requirement by successfully completing GAME 332 RS: Story Design for Computer Games.

Upper-Level Credits
All undergraduate students are required to complete a minimum of 45 credits of upper-division courses at the 300-499 level. Fulfilling degree requirements does not guarantee this requirement will be met.

Major GPA
All GAME undergraduate students must earn a minimum 2.00 cumulative GPA in their major.
All GAME courses except GAME 101 Introduction to Game Design (Mason Core), GAME 250 Music for Film and Video and GAME 367 Writing and Editing Music and Sound must be passed with a grade of C or better.

Academic Policies
All GAME majors are required to adhere to the George Mason University Honor code. Failure to do so may result in academic sanctions up to an including dismissal from the University.

Please see College of Visual and Performing Arts for college academic policies.

Graduate Program

Admissions
Admission is competitive. An offer of admission is valid only for the semester for which the student applies. For application requirements and deadlines, applicants should visit the Computer Game Design website (http://game.gmu.edu/). Mason encourages early applications from prospective students who wish to be considered for academic scholarships or grants.

The minor embodies the core components discovered in the larger game design field. It offers a core of foundational studies with intermediate and advanced course options in game animation, game sound and music, or game design and development. Students pursuing the minor will be able to participate in game program events, special activities, game design competitions, and in most projects hosted in the Computer Game Design Research Studio.

Admissions & Policies

Eight credits of coursework must be unique to the minor and students must complete all coursework with a minimum GPA of 2.00. For policies governing all minors, see AP5.3.4 Minors.

4-Year Plan

Bachelor of Fine Arts in Computer Game Design Sample Plan of Study

The sample plan below is a recommended sequencing of courses based on pre-requisites and scheduling. This may not fit every student’s needs and is a guideline, not a requirement. Students should confirm major requirements with their academic advisor and with PatriotWeb Degree Evaluation to ensure they enroll in the proper courses and are on track to graduate.

Detailed four year plans and degree planning checklists can be found at https://advising.gmu.edu/current-student/majors-at-mason/.

Computer Game Design, MA

Banner Code: AR-MA-GAME

Sang Nam, Director

2025 Art and Design Building Fairfax Campus

Phone: 703-993-4362
Email: snam5@gmu.edu
Website: game.gmu.edu/graduate/

The Master of Arts in Computer Game Design prepares graduate students, who may have studied game design at the undergraduate level or have degrees in a related technology, humanities, or arts discipline, for employment and further study in the computer game design and development fields. The curriculum reflects the gaming industry’s demand for an academically rigorous, technical program coupled with an understanding of the artistic and creative elements of the evolving field of study.

Admissions & Policies

Admissions

Admission is competitive. An offer of admission is valid only for the semester for which the student applies. Application for graduate admission is made to the Office of Graduate Admissions. The application deadline for fall admission is March 1; the application deadline for the spring semester is November 1. Mason encourages early applications...
from prospective students who wish to be considered for academic scholarships, grants or teaching assistantships.

**Eligibility**

Admission is contingent on satisfactory completion of in-progress coursework and graduation from a bachelor’s degree with a 3.00 GPA or higher from an accredited undergraduate institute of higher education.

**Application Requirements**

The following items are required with applications for admission in the MA in Computer Game Design:

- Evidence of computer programming knowledge. A minimum of 3 credits (undergraduate or graduate) of *Pearl* or *Python* and 3 credits of *Java* or *C#* is required (subject to change as fields develop);
- Completed online application for graduate study;
- Application fee;
- Official transcripts from all undergraduate institutions attended;
- Three letters of recommendation: letters from instructors, professional supervisors, who can evaluate the applicant’s academic potential;
- International students must meet University criteria for the TOEFL (current University standard: 230 for computer-based, 88 for internet based tests) or other English proficiency examination;
- Goals statement: 1000 words, double spaced, 12 font;
- Writing sample: essay, review, project written within the last 3 years for academic course, college publication or competition, or for professional or community activity;
- Portfolio: must display 20 examples of the applicants' most accomplished work. The applicant’s portfolio is a major selection criterion for graduate admission. Applicants’ portfolio items are considered part of the application for admission and, thus, cannot be returned. The portfolio and all other application materials will be submitted to the Office of Graduate Admissions. See website for submission instructions.

**Sport and Computer Game Design Minor (CVPA)**

Banner Code: SCGD

Phone: 703-993-5734

Website: [http://game.gmu.edu/](http://game.gmu.edu/)

This minor is offered jointly with the School of Recreation, Health, and Tourism.

It offers academic preparation in an industry that has seen rapid expansion in the sale, design, and production of sport-related games around the world. The required courses provide students with a foundational overview of the sports industry, the sport management academic discipline, and computer game design. Students can complement that knowledge with the selection of courses in these two disciplines that meet their individual interests.

**Admissions & Policies**

**Policies**

Eight credits of coursework must be unique to the minor and students must complete all coursework with a minimum GPA of 2.00. For policies governing all minors, see AP.5.3.4 Minors.

Film and Video Studies Program

Giovanna Chesler, Director

C100 College Hall
Fairfax Campus

Phone: 703-993-3287
Website: film.gmu.edu

The Film and Video Studies Program offers a multidisciplinary Bachelor of Arts degree in cinematic arts production. We emphasize Directing, Producing, Cinematography, Screenwriting, Sound Design and Editing, along with business, ethics, history, and theory of film and media. Students engage with many genres of cinematic storytelling, including short fiction, documentary, video art, television, web series and interactive video.

Students engage on a teaching film set (our Mason Film Lab) allow students to earn credits while they learn.

Film at Mason is a community of cinematic storytellers that fosters creativity, analysis, and diverse perspectives, professional practice and socially-conscious filmmaking. The Film and Video Studies Program is grounded in flexible thinking, critical engagement, interpersonal communication and regional storytelling. Graduates apply their skills on film sets, in corporate environments, and with community organizations with professionalism that is creative, entrepreneurial, and adaptable.

Requirements & Policies

Requirements
Portfolio
Admission to Film and Video Studies is considered separately from admission to the university and only through a digital portfolio review. Information about the portfolio process, including submission deadlines and portfolio application requirements, can be found on the program’s website (https://film.gmu.edu/) or by calling the Film office at 703-993-3287. Admission to the university is determined by the Admissions Office.

Writing-Intensive
The university requires all students to complete at least one course designated “writing-intensive” in their majors at the 300 level or above. Students seeking a BA in Film and Video studies fulfill this requirement by completing ENGH 373 Film and Video Forms, FAVS 380 TV Writing, FAVS 498 Development for Senior Project or THR 482 Advanced Screenplay Workshop.

Major GPA
All Film and Video Studies undergraduate students must earn a minimum grade of C in all courses in their major.

Policies
Upper-Level Credits
All undergraduate students are required to complete a minimum of 45 credits of upper-division courses at the 300-499 level.
**Termination from the Major**

No Film and Video Studies course that is required for the major may be unsuccessfully attempted more than three times. A grade lower than a C constitutes an unsuccessful attempt in any given course. Those students who do not successfully complete such a course within three attempts will be terminated from the major. For more information, see the “Termination from the Major” section under AP5 Undergraduate Policies.

**Academic Policies**

Please see College of Visual and Performing Arts for college academic policies.

Website: film.gmu.edu

The Film and Video Studies degree is the first multidisciplinary undergraduate degree in Virginia focusing on cinematic arts production and film theory and history with core courses in ethics, business, writing for the moving image, fiction, documentary, interactive storytelling and episodic television.

Students complete courses in the Film Core. To fine-tune their craft, students select advanced courses of study from four concentrations:

- Directing
- Producing
- Production/Post-Production (Cinematography or Editing/Sound)
- Screenwriting

Each concentration includes a capstone experience wherein students are mentored by faculty on original projects in their senior year that prepare them for work in the cinematic arts.

**Admissions & Policies**

**Admissions**

All students are admitted to the Film program separately from their admission to the university and only by portfolio review.

**Policies**

**Major GPA**

All Film and Video Studies undergraduate students must earn a minimum grade of C in all courses in their major.

For policies governing all undergraduate degrees, see AP5 Undergraduate Policies. See College of Visual and Performing Arts for policies specific to the college.

**Requirements**

**Degree Requirements**

Total credits: 120

Students must earn a minimum grade of C in all required Film degree courses.

**Mason Core**

Film majors may not double-count Literature and Art courses toward both the Film major and Mason Core requirements. The synthesis requirement is part of the Film core requirements.

FAVS 450 is recommended for the summer between Junior and Senior year.

Detailed four year plans and degree planning checklists can be found at https://advising.gmu.edu/current-student/majors-at-mason/.

School of Art
2050 Art and Design Building
Fairfax Campus
Phone: 703-993-8898
Website: soa.gmu.edu

Mission
George Mason University's School of Art is a collaborative academic and professional community focused on advancing creativity through traditional and new media applied to varying social contexts. The School of Art is founded on the premise that art both reflects and inspires a creative society, improving the human condition while describing the world, both as it is and could be. We focus on the role of artists in that conversation. We encourage students to see art both as an individual expression and public interaction. We celebrate historical reference, current relevance and experimentation-emphasizing innovative ways of thinking that enhance the impact of art on the future of society.

Embedded in a major liberal arts university rich in learning resources, the School of Art plays a vital role in the creative climate of the institution and the region through the cross-disciplinary research it facilitates and the artwork it produces and exhibits. The School's facilities engage an exceptional faculty of practicing artists, an active visiting artist program, and a diverse and intellectually curious graduate and undergraduate student body. Artistic skills and principles of creative practice in all visual media are grounded in a forward-thinking, adaptive curriculum. Faculty and students forge cross-disciplinary experimentation, challenging conventional thinking and blurring the lines between traditional artistic disciplines, indeed, between the arts and other humanities and sciences.

The School of Art educates artists and creative professionals to be responsible contributors to society, preparing them to be agents of change in an increasingly connected, complex, inclusive world. We highly value rigor in conceptual approach, skill in art production, and imaginative methods for implementing projects and engaging audiences. Each student is given a background in aesthetic and analytical judgment, the ethical framework for professional practice, the confidence to be both self-reliant and collaborative, and the mastery of design and production necessary to thrive as a professional artist in a competitive global environment.

Undergraduate Programs
Undergraduate studio degrees offered by the School of Art include the bachelor of arts (BA) and the bachelor of fine arts (BFA). An honors program enhances either degree for selected AVT majors. The school also offers undergraduate minors in art and visual technology, arts and social change, graphic design, photography, and web design.

For students who are interested in a career in teaching art in the public schools, neither the BA nor the BFA program satisfies all requirements for those seeking licensure. Undergraduate students interested in this field are highly encouraged to consider the accelerated degree path for the master of art in teaching and should contact the school's art education advisor to learn more about teacher preparation.

All George Mason University students are welcome to enroll in course work in the School of Art to fulfill Mason Core for requirements for the
arts or to pursue minors. Consult the course listings for prerequisites and requirements. Students should carefully examine prerequisites for School of Art courses. Students may be removed from a course if they enroll without having fulfilled the prerequisites.

**Studies**
The School of Art program is located in the Art and Design Building which houses well-equipped studios for drawing, painting, photography, printmaking, and sculpture, as well as six computer-equipped studios that cross platforms and are installed with current software applications used for two-dimensional imaging, three-dimensional modeling, animation, video production, sound editing, multimedia authoring, photography, and web publishing.

Policies, procedures, and schedules for studio use are established by the AVT studio faculty and are posted in the studios.

**Graduate Programs**
The MA in Graphic Design offers students a comprehensive study and preparation for the graphic design profession. The program calls for 36 credits, which includes courses in typography, web design, image making, and brand design. The broad range of study is intended to develop professionals prepared for an ever-expanding graphic design field. This degree is the only MA in Graphic Design in the Washington Metropolitan region.

The Art Education Licensure Certificate is a post-baccalaureate program designed for those who currently hold a graduate degree in an art-related field along with those who want a more immediate entrance into the art teaching profession. This 'licensure only' program, which results in a pre K-12 art certification in the Commonwealth of Virginia, is a 21 credit program consisting of graduate education courses, area endorsements, student teaching internships and seminar.

The Master of Arts in Teaching in Art Education is a pre-service degree program that prepares students with a BFA degree or equivalent for pre K-12 art licensure by the Commonwealth of Virginia. Using a studio-based approach to art education and working closely with area public school systems, the MAT degree consists of 30 credits of graduate art education, school practicum experience, studio work, and preservice teaching internship and seminar.

**MFA, Visual and Performing Arts**
The School of Art offers two concentrations under the Master of Fine Arts, Visual and Performing Arts degree: Graphic Design and Visual Art. Applicants to the program must designate which concentration they intend to apply for on the application. Each concentration has its own unique set of admissions requirements and program requirements. For specific information, please refer to the Visual and Performing Arts, MFA entry.

The MFA is a terminal degree that prepares students to become professional artists, work in technology or arts-related fields, and teach at the university level. Candidates are required to complete 60 credits, of which 30 credits are made up from core requirements and 30 are made up of emphasis and studio requirements.

In the Visual Arts concentration, students may select an emphasis in new media, painting and drawing, photography, printmaking, sculpture, or InterArts. The latter offers students the opportunity to combine art forms in interdisciplinary projects that may be installation, performance, publishing, time-based, or writing-based; and combine creative and critical approaches to their work.

While it is anticipated that students will move through the MFA as described in this catalog, individuals with extensive professional accomplishment may, upon recommendation of the SOA Graduate Committee and with prior approval of the CVPA dean, craft an individualized program within their intended emphasis that meets curricular requirements.

**Accelerated Master's Options**
The School of Art offers the following Accelerated Master’s programs:

- Art and Visual Technology, BA/Arts Management, Accelerated MA
- Art and Visual Technology, BFA/Art Education, Accelerated MAT
- Art and Visual Technology, BFA/Arts Management, Accelerated MA
- Art and Visual Technology, BFA/Graphic Design, Accelerated MA

Each program allows undergraduate students to take graduate classes that can be used towards a designated Master's degree. Undergraduates who wish to pursue the accelerated Master's route should talk to their academic advisor first to see if they qualify. Students must be within 75-100 credits of their Bachelor’s program to be eligible to apply; those who have earned more than 100 credits will not be considered. Students must be approved by their academic advisor and formally apply and be accepted to the Master’s program through an Accelerated Master's application. For more information about admissions requirements and the application process, students should visit the website (http://cvpa.gmu.edu).

**Faculty**

**Professors**
Carbonneau, Elahi (Director), Linton, White

**Associate Professors**
Cooley, Crawford, Cui, Endress, Frenn, Karametou, Rothstein, Sheridan, Starr (Associate Director), Winant, Wrbican

Requirements & Policies

Requirements

Undergraduate Admission to the School of Art

Students are admitted to School of Art degree programs separately from their admission to George Mason University and only by portfolio review. The College of Visual and Performing Arts strongly encourages students to apply to the university by November 1 in order to receive maximum scholarship consideration, including merit and talent-based scholarships.

Applicants apply to George Mason University. Admission to George Mason is determined by the Admissions Office and is separate from admission to the School of Art degree programs. All School of Art applicants are encouraged to apply for admission to the university prior to submitting a portfolio for review.

Successfully complete a portfolio review. Please refer to the Portfolio Review Criteria (https://art.gmu.edu/portfolio-review/).

Artsbus Requirement

All AVT majors must meet the school's requirement of travel to galleries and museums through the Artsbus program. Students meet this requirement by enrolling in AVT 300 Artsbus Attendance. The procedure and requirements for enrollment in AVT 300 Artsbus Attendance are the same as for any other class.

Freshmen who enroll as AVT majors must register for AVT 300 Artsbus Attendance 5 times during their course of study. Transfer students and students who change their majors to AVT must register for AVT 300 Artsbus Attendance for the equivalent of each semester they are enrolled at Mason, up to a maximum of five semesters. Semesters of enrollment in AVT 300 Artsbus Attendance do not have to be consecutive. Students may take AVT 300 Artsbus Attendance up to three times in a semester if they wish to accelerate their completion of the requirement although this is strongly discouraged.

All rules and requirements to AVT 300 Artsbus Attendance participation are posted on the Artsbus website (http://artsbus.gmu.edu). Students are responsible for being familiar with and following the posted rules and requirements for Artsbus. The site also provides pertinent information for each trip regarding exhibits as well as reviews and articles for exhibitions.

Visual Voices Requirement

All AVT majors must fulfill three credits of AVT 301 Visual Voices Colloquium in order to graduate unless they are enrolled at Mason for fewer than three semesters. If enrolled for less than three semesters, students are required to register for AVT 301 Visual Voices Colloquium each semester in which they are enrolled. Visual Voices is an intrinsic part of the major, offering students a chance to meet with and hear nationally and internationally recognized artists speak about their work.

Writing-Intensive Requirement

Mason requires all students to complete at least one course designated “writing intensive” in their majors at the 300 level or above. AVT students fulfill this requirement by successfully completing AVT 395 Writing for Artists.

Upper-Level Credits

All undergraduate students are required to complete a minimum of 45 credits of upper-division courses at the 300–499 level.

Major GPA

All School of Art BA and BFA majors, AVT minor, Arts and Social Change minor, Graphic Design minor, Photography minor, and Web Design minor students must earn a grade of C or better in required AVT coursework, including Studio Foundation, Critical Analysis and Contemporary Practice, Breadth and Experience, Synthesis and Concentrations. All School of Art undergraduate students must earn a minimum 2.00 cumulative GPA in their major. To graduate with a BA or BFA in Art and Visual Technology with a concentration in Graphic Design, students are required to maintain a 2.40 GPA in concentration classes. Students who fail to maintain this minimum may either retake core classes (an earned higher grade replaces the old one) or take concentration special topics classes in order to raise their average to the threshold. The effect of this change will be that very weak students will have to return to required classes to master core skills, and marginally weak students will be able to meet the requirement while expanding the breadth of their education.

Policies

See CVPA Requirements and Policies.

Honors Program

Students interested in the Honors Program in School of Art should contact the director of the school. Both BA and BFA students are eligible to apply for admission to the program. Honors students must complete at least 4 credits AVT 394 Honors Seminar. They must have a cumulative GPA of at least 3.00 and at least 3.50 in AVT 394 Honors Seminar and the AVT major.

Programs

- Animation Minor
- Art Education Licensure Graduate Certificate
- Art Education, MAT
- Art and Visual Technology, BA
- Art and Visual Technology, BFA

Professional Practices
AVT 413 Professional Design Practices 5 or AVT 453 Professional Practices 3

Synthesis
AVT 497 Senior Project (Mason Core) or AVT 498 Senior Design Project (Mason Core) 3

Total Credits 52

1 Students concentrating in graphic design must take either AVT 318 History of Graphic Design or AVT 410 Experiential Design History to fulfill this requirement. Students concentrating in photography must complete ARTH 350 History of Photography to fulfill this requirement.
2 Must be taken for a total of 3 credits or each semester, if less than 3 semesters.
3 Students concentrating in graphic design must take AVT 396 Writing for Designers to fulfill this requirement.
4 At least one course must be a 200-level studio course. See each concentration for individual requirements.
5 All students concentrating in graphic design must complete AVT 413 Professional Design Practices.
6 Students concentrating in graphic design and printmaking & book arts must take AVT 110 Digital Design Studio for this requirement.

Artsbus Requirement
All AVT majors must meet the school’s requirement of travel to galleries and museums through the Artsbus program. Students meet the requirement by enrolling in AVT 300 Artsbus Attendance. The procedure and requirements for enrollment in AVT 300 are the same as for any other class.

Freshmen who enroll as AVT majors must register for AVT 300 Artsbus Attendance 5 times during their course of study. Transfer students and students who change their majors to AVT must register for AVT 300 Artsbus Attendance for the equivalent of each semester they are enrolled at Mason, up to a maximum of five semesters.

Concentrations
Select one concentration and complete the requirements therein.

Concentrations
• Drawing (DRW)
• Graphic Design (GD)
• New Media Art (NMA)
• Painting (PNT)
• Photography (PHO)
• Printmaking & Book Arts (PMBA)
• Sculpture (SCL)

Drawing (DRW)
All AVT majors concentrating in drawing must complete AVT 232 Painting I (Mason Core) under Breadth and Experience.

Code Title Credits
AVT 422 Drawing III 3
AVT 423 Drawing IV 3
Select 6 credits from the following: 6
AVT 324 Figure Drawing
AVT 326 Nontraditional Approaches to Drawing
AVT 328 Mixed Media
AVT 333 Painting II
AVT 336 Experimental Painting
AVT 337 Figurative Painting
AVT 432 Painting III
AVT 433 Advanced Painting I
AVT 496 Special Topics 1

Other courses as approved by program director.

Total Credits 12

1 Topic must be Drawing.

Graphic Design (GD)
All AVT majors concentrating in graphic design must complete AVT 252 Darkroom Photography I (Mason Core) or AVT 253 Digital Photography I (Mason Core) under Breadth and Experience.

Code Title Credits
AVT 311 Graphic Design Methods and Principles 3
AVT 313 Editorial Design 3
AVT 414 Corporate Design and Branding 3
Select 3 credits from the following: 3
AVT 412 Advanced Typography
AVT 415 Web Design and Usability
AVT 416 Advertising Design
AVT 419 Topics in Graphic Design
### New Media Art (NMA)

All students concentrating in new media art must complete AVT 280 Introduction to New Media Arts under Breadth and Experience, and AVT 180 New Media in the Creative Arts for their IT Mason Core requirement.

</table>

Total Credits: 19

1 Must be outside student’s primary major field of study.

2 May be taken inside or outside of the department. All students are required to take a minimum of 45 credits of upper-division courses (300 and 400 level); most students will require at least 13 elective credits at the 300 level or above. AVT 393 Field Experience in the Arts and AVT 489 Internship in Art and Visual Technology are not required courses but are highly recommended as electives for BA students.
4-Year Plan

Bachelor of Arts in Art and Visual Technology Sample Plan of Study

The sample plan below is a recommended sequencing of courses based on pre-requisites and scheduling. This may not fit every student's needs and is a guideline, not a requirement. Students should confirm major requirements with their academic advisor and with PatriotWeb Degree Evaluation to ensure they enroll in the proper courses and are on track to graduate.

Accelerated Master’s

Art and Visual Technology, BA/Arts Management, Accelerated MA

Overview

Undergraduates in Art may apply to the accelerated master’s degree in Arts Management. If accepted, students will be able to earn an Art and Visual Technology, BA and an Arts Management, MA after satisfactory completion of 150 credits. Students choosing the accelerated option must fulfill all university requirements for the master’s degree. The regular designed timeframe would be a start in the Fall and completion of all coursework in the Summer five years later with the exception of Capstone, which is only offered in Fall and Spring. Students may need a longer timeframe to complete all requirements.

This accelerated option is offered through joint cooperation between the School of Art and the Arts Management Program. For more detailed information, see AP.6.7 Bachelor’s/Accelerated Master’s Degrees. For policies governing all graduate degrees, see AP6 Graduate Policies.

Admissions Requirements

Applicants to accelerated master’s programs must have completed at least 75 credits that apply to their undergraduate degree (with at least 24 credits at Mason) and no more than 100 credits. Applicants should submit an Accelerated Master’s Program Application, available from the College of Visual and Performing Arts (CVPA) Academic Affairs Office. It includes the proposed conferral date for the undergraduate degree and the two graduate courses that are to be applied to the undergraduate degree.

Interested students should contact the Arts Management Program Office for more details about the application process.

Accelerated Option Requirements

As an undergraduate, the accelerated master’s student is required to complete the two graduate courses indicated on their Accelerated Master’s Program application with a minimum grade of 3.00 in each course. Students must maintain a minimum GPA of 3.00 in all coursework and in coursework applied to their major. On completion and conferral of the undergraduate degree in the semester indicated in the application, candidates submit the Bachelor’s/Accelerated Master’s Transition Form (which shall incorporate all of the Graduate Admission requirements of the university) and are admitted to graduate status.

As graduate students, accelerated master’s students have an advanced standing and must meet all master’s degree requirements except for the two courses (6 credits) completed as undergraduates. Students will begin their master’s program in the semester immediately following conferral of the undergraduate degree, and they may also begin in the summer term.

Reserve Graduate Credit

Students may take up to 6 additional graduate credits as reserve graduate credit. These credits do not apply to the undergraduate degree. The ability to take courses for reserve graduate credit is available to all high achieving undergraduates with permission of the School of Art. Permission to take a graduate course for reserve graduate credit

1. All students concentrating in new media art must take AVT 180 New Media in the Creative Arts.
2. Nonnative speakers of English with limited proficiency in the language may substitute ENGH 100 Composition for Multilingual Writers (Mason Core) for ENGH 101 Composition (Mason Core). Students must attain a minimum grade of C in ENGH 100 Composition for Multilingual Writers (Mason Core) or ENGH 101 Composition (Mason Core), as well as in ENGH 302 Advanced Composition (Mason Core), to fulfill degree requirements.
3. AVT majors may not choose AVT courses to meet this requirement, and they may not double-count ARTH courses toward both the AVT major and the Mason Core arts requirement.
4. including at least one laboratory science
5. AVT majors may not double-count ARTH courses toward both AVT major requirements and the Mason Core global understanding requirement.

AVT 491 Independent Study in Art and Visual Technology or AVT 496 Special Topics may be taken with permission of the Concentration Director.

**InterArts (IA)**
The concentration in InterArts is an individualized program of study focused on arts research with multidisciplinary goals. Students concentrating in InterArts are engaged with both creative and conceptual inquiry in the development of artistic practice bolstered by knowledge of other disciplines. Often, this work exists at the interstices of artforms, and focuses on research on areas of interest to the student. InterArts students draw on the large resources of the School of Art and the university in creating an individualized program of studio courses and complementary courses for a total of 24 credits (12 credits of disciplinary focus and 12 credits of complementary study). In consultation with a faculty advisor, the student drafts a curriculum contract outlining the course of study, which is approved by the InterArts faculty. Admission to the concentration is based on acceptance into the BFA program via a portfolio review process and project approval from the InterArts faculty.

**4-Year Plan**

**Bachelor of Fine Arts in Art & Visual Technology Sample Plan of Study**

The sample plan below is a recommended sequencing of courses based on pre-requisites and scheduling. This may not fit every student’s needs and is a guideline, not a requirement. Students should confirm major requirements with their academic advisor and with PatriotWeb Degree Evaluation to ensure they enroll in the proper courses and are on track to graduate.

### Accelerated Master's

**Art and Visual Technology, BFA/Art Education, Accelerated MAT**

**Overview**

Undergraduates in art may apply to the accelerated master's degree in Art Education. If accepted, students will be able to earn an Art and Visual Technology, BFA and an Art Education, MAT after satisfactory completion of 144 credits.

Students choosing the accelerated option must fulfill all university requirements for the master’s degree. The regular designed timeframe would be a start in the Fall and the completion in the Fall semester five and a half years later, but longer time frames may also be available.

For more detailed information, see AP.6.7 Bachelor’s/Accelerated Master’s Degrees. For policies governing all graduate degrees, see AP.6 Graduate Policies.

### Admissions Requirements

Applicants to accelerated master’s programs must have completed at least 75 credits that apply to their undergraduate degree (with at least 24 credits at Mason) and no more than 100 credits. Applicants should submit an Accelerated Master’s Program Application, available from the College of Visual and Performing Arts (CVPA) Academic Affairs Office. It includes the proposed conferral date for the undergraduate degree and the two graduate courses that are to be applied to the undergraduate degree.

In addition to meeting the general university requirements for admission for graduate study, applicants must submit:

- Statement of intent and professional goals for entering the field
- Three letters of reference from faculty members or individuals who have firsthand knowledge of the applicant’s academic or professional capabilities
- Official score on Praxis Core or SAT equivalent
- MAT (for BFA students) portfolio must include 15 to 20 images that reflect artistic breadth and depth, including samples of work with ample attention to drawing and painting from observation. These works must be submitted through SlideRoom. All pieces must include the title of the piece, date, medium, and size of each work. Incomplete portfolios will not be considered.

### Teacher Endorsement

Students for the MAT (for BFA students) must complete ALL endorsements, as well as the Praxis Core Exam and the PLUS art education foundational courses:
Students must meet Virginia Department of Education's required semester credit hours in the following specific areas:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>

</tr>
<tr>
<td>Total Credits</td>
<td></td>
<td>9</td>
</tr>
</tbody>
</table>

Students should work closely with their advisor to ensure they complete these course requirements through the BFA in Art and Visual Technology and MAT degrees.

**Accelerated Option Requirements**

As an undergraduate, the accelerated master's student is required to complete the two graduate courses indicated on their Accelerated Master's Program application with a minimum grade of 3.00 in each course. Students must maintain a minimum GPA of 3.00 in all coursework and in coursework applied to their major. On completion and conferral of the undergraduate degree in the semester indicated on the application, candidates submit the Bachelor's/Accelerated Master's Transition Form (which shall incorporate all of the Graduate Admission requirements of the university) and are admitted to graduate status.

As graduate students, accelerated master's students have an advanced standing and must meet all master's degree requirements except for the two courses (6 credits) completed as undergraduates. Students will begin their master's program in the semester immediately following conferral of the undergraduate degree, and they may also begin in the summer term.

**Reserve Graduate Credit**

Students may take up to 6 additional graduate credits as reserve graduate credit. These credits do not apply to the undergraduate degree. The ability to take courses for reserve graduate credit is available to all high-achieving undergraduates with permission of the School of Art. Permission to take a graduate course for reserve graduate credit is normally granted only to Mason seniors within 15 credit hours of graduation and must be approved by the Dean's Office.

To apply these credits to the master's degree, students must request that the credits be moved from the undergraduate degree to the graduate degree using the Bachelor's/Accelerated Master's Transition Form.

**Art and Visual Technology, BFA/Arts Management, Accelerated MA**

**Overview**

Undergraduates in Art may apply to the accelerated master's degree in Arts Management. If accepted, students will be able to earn an Art and Visual Technology, BFA and an Arts Management, MA after satisfactory completion of 150 credits.

Students choosing the accelerated option must fulfill all university requirements for the master’s degree. The regular designed timeframe would be a start in the Fall and completion of all coursework in the Summer five years later with the exception of Capstone, which is only offered in Fall and Spring. Students may need a longer timeframe to complete all requirements.

This accelerated option is offered through joint cooperation between the School of Art and the Arts Management Program.

For more detailed information, see AP6.7 Bachelor's/Accelerated Master's Degrees. For policies governing all graduate degrees, see AP6 Graduate Policies.

**Admissions Requirements**

Applicants to accelerated master's programs must have completed at least 75 credits that apply to their undergraduate degree (with at least 24 credits at Mason) and no more than 100 credits. Applicants should submit an Accelerated Master's Program Application, available from the College of Visual and Performing Arts (CVPA) Academic Affairs Office. It includes the proposed conferral date for the undergraduate degree and the two graduate courses that are to be applied to the undergraduate degree.

Interested students should contact the Arts Management Program Office for more details about the application process.

**Accelerated Option Requirements**

As an undergraduate, the accelerated master's student is required to complete the two graduate courses indicated on their Accelerated Master's Program application with a minimum grade of 3.00 in each course. Students must maintain a minimum GPA of 3.00 in all coursework and in coursework applied to their major. On completion and conferral of the undergraduate degree in the semester indicated in the application, candidates submit the Bachelor's/Accelerated Master's Transition Form (which shall incorporate all of the Graduate Admission requirements of the university) and are admitted to graduate status.

As graduate students, accelerated master's students have an advanced standing and must meet all master's degree requirements except for the two courses (6 credits) completed as undergraduates. Students will begin their master's program in the semester immediately following conferral of the undergraduate degree, and they may also begin in the summer term.

**Reserve Graduate Credit**

Students may take up to 6 additional graduate credits as reserve graduate credit. These credits do not apply to the undergraduate degree. The ability to take courses for reserve graduate credit is available to all high-achieving undergraduates with permission of the School of Art. Permission to take a graduate course for reserve graduate credit is normally granted only to Mason seniors within 15 credit hours of graduation and must be approved by the Dean's Office.

To apply these credits to the master's degree, students must request that the credits be moved from the undergraduate degree to the graduate degree using the Bachelor's/Accelerated Master's Transition Form.
Art and Visual Technology, BFA/Graphic Design, Accelerated MA

Overview
Undergraduates in Art may apply to the accelerated master's degree in Graphic Design. If accepted, students will be able to earn an Art and Visual Technology, BFA and a Graphic Design, MA after satisfactory completion of 150 credits.

Students choosing the accelerated option must fulfill all university requirements for the master’s degree. The standard timeframe would be a start in the Fall and the completion in the Fall semester five and a half years later, but longer time frames may also be available.

For more detailed information, see AP6.7 Bachelor’s/Accelerated Master’s Degrees. For policies governing all graduate degrees, see AP6 Graduate Policies.

Admissions Requirements
Applicants to accelerated master’s programs must have completed at least 75 credits that apply to their undergraduate degree (with at least 24 credits at Mason) and no more than 100 credits. Applicants should submit an Accelerated Master’s Program Application, available from the College of Visual and Performing Arts (CVPA) Academic Affairs Office. It includes the proposed conferral date for the undergraduate degree and the two graduate courses that are to be applied to the undergraduate degree.

In addition to meeting the general university requirements for admission for graduate study, applicants must submit three letters of recommendation from faculty, or those who can evaluate the applicant's academic potential; a sample of academic writing about art or graphic design, such as a paper from an art or design history course; and 20 examples of original design works in a format that is viewable via SlideRoom.

Accelerated Option Requirements
As an undergraduate, the accelerated master’s student is required to complete the two graduate courses indicated on their Accelerated Master’s Program application with a minimum grade of 3.00 in each course. Students must maintain a minimum GPA of 3.00 in all coursework and in coursework applied to their major. On completion and conferral of the undergraduate degree in the semester indicated in the application, candidates submit the Bachelor's/Accelerated Master's Transition Form (which shall incorporate all of the Graduate Admission requirements of the university) and are admitted to graduate status.

As graduate students, accelerated master’s students have an advanced standing and must meet all master’s degree requirements except for the two courses (6 credits) completed as undergraduates. Students will begin their master’s program in the semester immediately following conferral of the undergraduate degree, and they may also begin in the summer term.

Reserve Graduate Credit
Students may take up to 6 additional graduate credits as reserve graduate credit. These credits do not apply to the undergraduate degree. The ability to take courses for reserve graduate credit is available to all high achieving undergraduates with permission of the School of Art. Permission to take a graduate course for reserve graduate credit is normally granted only to Mason seniors within 15 credit hours of graduation and must be approved by the Dean’s Office.

To apply these credits to the master's degree, students must request that the credits be moved from the undergraduate degree to the graduate degree using the Bachelor's/Accelerated Master's Transition Form.

Art Education Licensure Graduate Certificate

Banner Code: AR-CERG-ARTL

2005 Art and Design Building
Fairfax Campus

Phone: 703-993-8898
Website: soa.gmu.edu

Following this curriculum does not guarantee entry into the Master of Art Teaching (MAT) Program. Prospective MAT students must meet all MAT admissions requirements. Students must also complete a minimum of 18 credits in degree status after admission to the degree program.

This certificate may be earned either on a part time or full time basis.

Admissions & Policies

Admissions

Admission Requirements
In addition to meeting the general university admission requirements, admission to the licensure program is contingent on completion of a BFA, BA in art or approved equivalent along with a minimum 3.00 cumulative undergraduate GPA. Eligibility for the certificate may demand additional coursework to establish proficiency in visual arts. Students will be required to satisfy the required state endorsement courses prior to student teaching.

Applications will be accepted for fall and spring semesters. The deadline for receipt of application materials is October 1 for Spring and April 1 for Fall. Each applicant must provide the following materials:

- Completed application form
- Certified copies of all undergraduate transcripts and any graduate transcripts
- Statement of intent and professional goals for entering the field
- Three letters of reference from faculty members or individuals who have firsthand knowledge of the applicant’s academic or professional capabilities
- Official passing score on Praxis Core or SAT equivalent
- TOEFL score, if required by Mason policies
- Portfolio of 15-20 images that reflect artistic breadth and depth, including drawing skills of the applicant’s art. The work should be submitted via SlideRoom. All portfolios must include a written image sheet with the corresponding number, title, date, medium, and size of each work. Incomplete portfolios will not be considered. Applicants’ portfolio items are considered part of the application for admission and, thus, cannot be returned. Please do not send original materials.

The all application items should be submitted to the Office of Graduate Admissions (https://www2.gmu.edu/admissions-aid/how-apply/graduate/). Applicants refer to the graduate page of the School of Art website (http://soa.gmu.edu/graduateprograms/) for more details.
Diversity among students is another consideration for acceptance into the program. Applicants with degrees in areas other than art are welcome, although they may be required to complete undergraduate core and studio art history courses.

The certificate is a post-baccalaureate program designed for those who currently hold an undergraduate degree in an art-related field along with those who want a more immediate entrance into the art teaching profession. This "licensure only" program, which results in a pre K-12 art certification in the Commonwealth of Virginia, is a 21-credit program consisting of graduate education courses, art endorsements, student teaching internships and seminar.

International students may be required to undergo an additional audit of their undergraduate transcripts.

**Policies**

Students must earn a B- or higher in all coursework.

For policies governing all graduate certificates, see AP.6 Graduate Policies.

### Requirements

**Certificate Requirements**

Total credits: 21

This certificate may be pursued on a full- or part-time basis.

**Total Credits** 21

1 Prior to internship, student must pass: Praxis II, VCLA, technology and child abuse standards to receive placement for student teaching.

All Licensure Certificate students will receive ongoing evaluations by the art education faculty to determine their readiness for student teaching.

In addition, applicants who did not take equivalent undergraduate courses will be required to take AVT 180 New Media in the Creative Arts, art education endorsements, plus any additional studio or art history course work to meet Virginia licensure requirements.

**Art Education, MAT**

Banner Code: AR-MAT-ARTE

2005 Art and Design Building
Fairfax Campus

Phone: 703-993-8898
Website: soa.gmu.edu

The Master of Arts in Teaching in Art Education (MAT I) is a pre-service degree program that prepares students with a BFA degree or equivalent for PreK-12 art licensure by the Commonwealth of Virginia. Using a studio-based approach to art education and working closely with area public school systems, the MAT degree consists of 30 credits of graduate art education, school practicum experience, studio work, and pre-service teaching internship and seminar.

### Available Concentrations

This degree program has two concentrations: one concentration for those seeking certification (MAT I) as well as a one for licensed art teachers who are continuing education (MAT II). The concentration for licensed art teachers (MAT II) is designed for PreK-12 licensed art teachers who currently hold an undergraduate degree in art education and a current teaching license in Art Education. Applicants should be interested in obtaining a graduate art education degree for further professional development. Students take graduate art education courses, approved graduate level studio art courses, education courses, and complete a capstone project.

### Admissions & Policies

**Admissions**

In addition to meeting the general university admission requirements for graduate study, admission to this program is contingent on completion of a BFA in visual art or approved equivalent. Candidates must have a minimum 3.00 cumulative undergraduate GPA.

**Eligibility**

Eligibility for the MAT I in Art Education program may demand additional course work to establish proficiency in visual arts. Students lacking a strong background in the visual arts or pedagogy, or those who earned a BFA or BA at an institution other than Mason, may be required to satisfy prerequisite courses prior to entry into the graduate program. Applicants must complete an endorsement worksheet through the College of Education and Human Development in order to prove that their previous coursework satisfies the prerequisite requirements for Virginia licensure and/or for entry into the Master's program.

Students interested in pursuing the degree with the concentration for licensed art teachers must meet the above with the following exceptions: admission is contingent upon the completion of a BFA or BA in art or art education with a minimum 3.00 cumulative undergraduate GPA, maintaining a current PreK-12 license to teach art education with at least one or more years of art teaching experience.

**Application Materials and Deadlines**

Applications will be accepted for fall and spring semesters. The deadline for receipt of application materials is October 1 and March 1. Each applicant must provide the following materials:

- Completed application form
- Certified copies of all undergraduate transcripts and any graduate transcripts
- Statement of intent and professional goals for entering the field
• Three letters of reference from faculty members or individuals who have firsthand knowledge of the applicant’s academic or professional capabilities
• Official scores on Praxis Core or SAT equivalent (MAT I only)
• Endorsement Worksheet (MAT I only)
• TOEFL score (for international applicants only)

Portfolio Requirement<sup>1</sup>:
• MAT I: portfolio must include 15 to 20 images that reflect artistic breadth and depth, including drawing skills of the applicant’s art.
• MAT II: portfolio must include 10 images of the applicant’s personal art that reflect artistic breadth and depth, including drawing skills, along with 10 student art works displaying a variety of 2-D and 3-D media. Student artwork is to be accompanied by a brief description of the lesson content.

<sup>1</sup> All portfolios should be submitted through SlideRoom. All portfolios must include title, date, medium, and size of each work. Incomplete portfolios will not be considered.

All application materials should be submitted to the Office of Graduate Admissions. Qualified applicants may be invited to an on-campus interview. Applicants should visit the School of Art’s website (http://soa.gmu.edu/graduateadmissions/) for more details.

Diversity among students is another consideration for acceptance into the program. Applicants with degrees in areas other than art are welcome, although they may be required to complete additional undergraduate core, studio, and art history courses.

### Policies

See College of Visual and Performing Arts for policies specific to the college.

### Requirements

#### Degree Requirements

Total Credits: 30

Students must earn a B- or higher in licensure coursework.

#### Required Core Courses

</tr>
</tbody>
</table>

Total Credits: 21

<sup>1</sup> Prior to internships, students must pass: Praxis II, VCLA, technology & child abuse standards.

#### MAT (I) Professional Teaching Portfolio

The comprehensive experience for the MAT I includes the following:

1. a group exhibition, “The Art of Teaching Art Showcase,” in which MAT candidates display and formally present works of PreK–12 student art completed during the internship, along with exemplars of the MAT candidate’s own artwork, and

2. a culminating review of the intern’s competencies as reflected in a professional teaching portfolio, accomplished during the internship seminar course that accompanies student teaching.

A committee of MAT faculty will determine whether the student has mastered the field of study based on the final portfolio and exhibition. Students who are unable to successfully complete the full student teaching internship in art education and seminar for student teachers will be terminated from the MAT in Art Education program.

#### MAT (I) Teacher Endorsement

MAT I students originally admitted under provisional status must complete all endorsements and any assigned art education foundational courses (which may include AVT 494 Strategies in Art Room: PK-12 and AVT 495 Introduction to Art Teaching and Learning) by the date indicated on the student’s provisional admission agreement and prior to admission to degree status. These courses may be taken concurrently with other MAT courses, but may not exceed a total of 9 credits. All MAT I students should meet all testing and coursework requirements prior to starting their student teaching internship.

Students must have a studio major in the Visual Arts and meet the Virginia Department of Education’s required semester credit hours in the following specific areas: 12 hours of two-dimensional media, 12 hours of three-dimensional media, 9 hours of cultural context and art history, judgment and criticism, aesthetics, and 3 hours of related areas of the fine arts.

**Note:**

MAT I students will receive ongoing evaluation reviews by the MAT faculty to determine whether they have achieved satisfactory progress toward their degree.

#### MAT (II) Concentration for Licensed Art Teachers (LAT) Required Courses

<table>

<sup>1</sup> MAT I students will receive ongoing evaluation reviews by the MAT faculty to determine whether they have achieved satisfactory progress toward their degree.
AVT 606 Creativity and Cognition in the Arts and Media 3
AVT 615 Technology for Art Teachers 3
AVT 698 Independent Study/Directed Readings 1
EDUC 537 Introduction to Culturally Linguistically Diverse Learners 3
Select 3 credits of graduate education courses from the following: 3

EDUC 511 Child and Adolescent Development in Global Contexts
EDUC 522 Foundations of Secondary Education
EDUC 542 Foundations of Education
EDUC 543 Children, Family, Culture, and Schools, 4-12 Year Olds
EDUC 597 Special Topics in Education
EDUC 606 Education and Culture
EDUC 613 How Students Learn
EDUC 614 Designing and Assessing Teaching and Learning
EDUC 615 Educational Change
Or other course as approved by director

Total Credits 21

1 Other courses as approved by director may fulfill this requirement.

Capstone:
LAT concentration students must complete a Capstone Project. Under the guidance of a faculty advisor, students will select a topic in a personal area of interest in art education pedagogy, carry out in-depth research, and prepare a capstone final project in the form of a written report and visual presentation.

Student Teaching Placement Requirement
All MAT students must pass Praxis II and Virginia Communication and Language Assessment (VCLA) to receive placement for student teaching in the final semester.

Accelerated Master’s

Art and Visual Technology, BFA/Art Education, Accelerated MAT

Overview
Undergraduates in art may apply to the accelerated master’s degree in Art Education. If accepted, students will be able to earn an Art and Visual Technology, BFA and an Art Education, MAT after satisfactory completion of 144 credits.

Students choosing the accelerated option must fulfill all university requirements for the master’s degree. The regular designed timeframe would be a start in the Fall and the completion in the Fall semester five and a half years later, but longer time frames may also be available.

For more detailed information, see AP.6.7 Bachelor’s/Accelerated Master’s Degrees. For policies governing all graduate degrees, see AP.6 Graduate Policies.

Admissions Requirements
Applicants to accelerated master’s programs must have completed at least 75 credits that apply to their undergraduate degree (with at least 24 credits at Mason) and no more than 100 credits. Applicants should submit an Accelerated Master’s Program Application, available from the College of Visual and Performing Arts (CVPA) Academic Affairs Office. It includes the proposed conferral date for the undergraduate degree and the two graduate courses that are to be applied to the undergraduate degree.

In addition to meeting the general university requirements for admission for graduate study, applicants must submit:

- Statement of intent and professional goals for entering the field
- Three letters of reference from faculty members or individuals who have firsthand knowledge of the applicant’s academic or professional capabilities
- Official score on Praxis Core or SAT equivalent
- MAT (for BFA students) portfolio must include 15 to 20 images that reflect artistic breadth and depth, including samples of work with ample attention to drawing and painting from observation. These works must be submitted through SlideRoom. All pieces must include the title of the piece, date, medium, and size of each work. Incomplete portfolios will not be considered.

Teacher Endorsement
Students for the MAT (for BFA students) must complete ALL endorsements, as well as the Praxis Core Exam and the PLUS art education foundational courses:

<table>

</tr>
<tr>
<td>3</td>
<td>hours of related areas of fine arts</td>
<td>3</td>
</tr>
<tr>
<td>Total Credits</td>
<td></td>
<td>36</td>
</tr>
</tbody>
</table>

Students should work closely with their advisor to ensure they complete these course requirements through the BFA in Art and Visual Technology and MAT degrees.

Accelerated Option Requirements
As an undergraduate, the accelerated master’s student is required to complete the two graduate courses indicated on their Accelerated Master’s Program application with a minimum grade of 3.00 in each course. Students must maintain a minimum GPA of 3.00 in all coursework and in coursework applied to their major. On completion and conferral of the undergraduate degree in the semester indicated on the application, candidates submit the Bachelor’s/Accelerated Master’s Transition Form.
(which shall incorporate all of the Graduate Admission requirements of the university) and are admitted to graduate status.

As graduate students, accelerated master’s students have an advanced standing and must meet all master’s degree requirements except for the two courses (6 credits) completed as undergraduates. Students will begin their master’s program in the semester immediately following conferral of the undergraduate degree, and they may also begin in the summer term.

**Reserve Graduate Credit**

Students may take up to 6 additional graduate credits as reserve graduate credit. These credits do not apply to the undergraduate degree. The ability to take courses for reserve graduate credit is available to all high-achieving undergraduates with permission of the School of Art. Permission to take a graduate course for reserve graduate credit is normally granted only to Mason seniors within 15 credit hours of graduation and must be approved by the Dean’s Office.

To apply these credits to the master’s degree, students must request that the credits be moved from the undergraduate degree to the graduate degree using the Bachelor’s/Accelerated Master’s Transition Form.

## Arts and Social Change Minor

**Banner Code: ASC**

2050 Art and Design Building
Fairfax Campus
Phone: 703-993-8898
Email: avt@gmu.edu
Website: soa.gmu.edu

The minor leverages artistic and creative practice in an array of academic and social contexts. The goal is to infuse these practices into territories outside the traditional art world through research, participatory experimentation and documentary aesthetic aspects of social practice. With a focus on creative research and project production students experience direct engagement with communities while developing skills toward fostering positive change in communities via the arts.

### Admissions & Policies

#### Policies

Students must complete an approved AVT course for their Mason Core Arts requirement.

Special topics courses will be notated in Patriot Web as a designated Arts and Social Change course.

Twelve credits of coursework must be unique to the minor. For policies governing all minors, see AP.5.3.4 Minors.

### Requirements

Admissions & Policies

Policies
Eight credits of coursework must be unique to the minor. For policies governing all minors, see AP.5.3.4 Minors.

This minor is available to AVT majors. AVT majors must complete 12 credits unique to the minor.

It is recommended that non-AVT majors take AVT 104 Two-Dimensional Design and Color (Mason Core) for their Art Mason Core requirement as well as AVT 180 New Media in the Creative Arts for the Information Technology (IT, except ethics) requirement. These courses are prerequisites for Graphic Design coursework.

Requirements

Minor Requirements
Total credits: 15

Note: Students pursuing the Graphic Design minor are only responsible for the prerequisites required in the minor curriculum. Please contact the department for questions or issues when registering for classes.

Email: avt@gmu.edu
Website: soa.gmu.edu

The Graphic Design Undergraduate Certificate is for prospective students with a 4-year baccalaureate undergraduate degree from an accredited institution who seek to gain the skills and competency to advance into a career in graphic design. It encompasses a specific body of knowledge and practice that prepares candidates for rewarding positions in the design field.

This certificate may be completed under part- or full-time basis.

Admissions & Policies

Admissions

There is not a portfolio review required for admission, but prospective students—those with graphic design experience—should consider scheduling an interview with the program director prior to applying. Tuition is billed at the undergraduate rate, and most students complete certificate requirements in four semesters.

Students entering the certificate must be able to demonstrate basic skills in visual language and should have working knowledge of professional graphic design software, or must take AVT 110 Digital Design Studio in addition to other required courses.

Policies

For policies governing all undergraduate programs, see AP.5 Undergraduate Policies.

Requirements

Graphic Design, MA

Banner Code: AR-MA-GD

2005 Art and Design Building
Fairfax Campus
Phone: 703-993-8898
Website: soa.gmu.edu

The Master of Arts in Graphic Design offers students a comprehensive study and preparation for the graphic design profession. The program calls for 36 credits, which includes courses in typography, web design, image making, and brand design. The broad range of study is intended to develop professionals prepared for an ever-expanding graphic design field.

Admissions & Policies

Admissions

Application deadlines are as published by the University. Applicants should have an earned BA or BFA degree in Graphic Design from an accredited college or university, with a GPA of 3.00 in art courses. However, applicants with a BA or BS in another discipline, and work experience in the field may also apply for admission. Student should schedule an interview with design faculty prior to admission.

In addition to meeting the general university requirements for admission for graduate study, applicants must submit three letters of
recommendation from faculty members, or those who can evaluate the applicant’s academic potential; a sample of academic writing about art or graphic design, such as a paper from an art or design history course; and a portfolio with 20 examples of design works that are SlideRoom-compatible.

Portfolio Guidelines
The applicant’s portfolio is a major selection criterion for graduate admission and should represent the applicant’s most accomplished work.

Applicants’ portfolio items are considered part of the application for admission and, thus, cannot be returned. Please do not send original materials. The portfolio and all other application materials should be submitted to the Office of Graduate Admissions. For more information, contact the School of Art at 703-993-8898.

Studios
The School of Art is located in the Art and Design Building which houses well equipped studios for drawing, painting, photography, printmaking, and sculpture, as well as six computer-equipped studios that cross platforms and are installed with current software applications used for two dimensional imaging, three-dimensional modeling, animation, video production, sound editing, multimedia authoring, photography, and web publishing.

Policies
For policies governing all graduate degrees, see AP.6 Graduate Policies.

See College of Visual and Performing Arts for policies specific to the college.

Accelerated Master's

Art and Visual Technology, BFA/Graphic Design, Accelerated MA

Overview
Undergraduates in Art may apply to the accelerated master’s degree in Graphic Design. If accepted, students will be able to earn an Art and Visual Technology, BFA and a Graphic Design, MA after satisfactory completion of 150 credits.

Students choosing the accelerated option must fulfill all university requirements for the master’s degree. The standard timeframe would be a start in the Fall and the completion in the Fall semester five and a half years later, but longer time frames may also be available.

For more detailed information, see AP.6.7 Bachelor’s/Accelerated Master's Degrees. For policies governing all graduate degrees, see AP.6 Graduate Policies.

Admissions Requirements
Applicants to accelerated master’s programs must have completed at least 75 credits that apply to their undergraduate degree (with at least 24 credits at Mason) and no more than 100 credits. Applicants should submit an Accelerated Master’s Program Application, available from the College of Visual and Performing Arts (CVPA) Academic Affairs Office. It includes the proposed conferral date for the undergraduate degree and the two graduate courses that are to be applied to the undergraduate degree.

In addition to meeting the general university requirements for admission for graduate study, applicants must submit three letters of recommendation from faculty, or those who can evaluate the applicant’s academic potential; a sample of academic writing about art or graphic design, such as a paper from an art or design history course; and 20 examples of original design works in a format that is viewable via SlideRoom.
Accelerated Option Requirements
As an undergraduate, the accelerated master’s student is required to complete the two graduate courses indicated on their Accelerated Master’s Program application with a minimum grade of 3.00 in each course. Students must maintain a minimum GPA of 3.00 in all coursework and in coursework applied to their major. On completion and conferral of the undergraduate degree in the semester indicated in the application, candidates submit the Bachelor’s/Accelerated Master’s Transition Form (which shall incorporate all of the Graduate Admission requirements of the university) and are admitted to graduate status.

As graduate students, accelerated master’s students have an advanced standing and must meet all master’s degree requirements except for the two courses (6 credits) completed as undergraduates. Students will begin their master’s program in the semester immediately following conferral of the undergraduate degree, and they may also begin in the summer term.

Reserve Graduate Credit
Students may take up to 6 additional graduate credits as reserve graduate credit. These credits do not apply to the undergraduate degree. The ability to take courses for reserve graduate credit is available to all high achieving undergraduates with permission of the School of Art. Permission to take a graduate course for reserve graduate credit is normally granted only to Mason seniors within 15 credit hours of graduation and must be approved by the Dean’s Office.

To apply these credits to the master’s degree, students must request that the credits be moved from the undergraduate degree to the graduate degree using the Bachelor’s/Accelerated Master’s Transition Form.

Admissions & Policies

Admissions
Prospective Illustration Minor applicants are required to earn a 3.0 GPA in both AVT 222 Drawing I (Mason Core) and AVT 323 Drawing II prior to applying. A portfolio review is required for admission.

Policies
Eight credits of coursework must be unique to the minor with a minimum 2.00 GPA earned in all courses applied to the minor. For policies governing all minors, see AP.5.3.4 Minors.

Email: avt@gmu.edu
Website: soa.gmu.edu

The minor provides opportunities for students to develop a personal vision in response to photography’s role in contemporary art and culture. Various studio classes emphasize a range of techniques in the production of traditional, digital and experimental imagery. Critical thinking combined with studio/lab experience enhance this comprehensive introduction to the field and practice of photography.

Admissions & Policies

Policies
Eight credits of coursework must be unique to the minor with a minimum 2.00 GPA earned in all courses applied to the minor. For policies governing all minors, see AP.5.3.4 Minors.

This minor is available to AVT majors. AVT majors must complete 12 credits unique to the minor.

Students in this program demonstrate technical mastery and devote their college study to an intensive and comprehensive dance curriculum.

Daily technical training in modern dance and ballet, and numerous performance opportunities develops a versatile dancer. Student progress in the BFA program is assessed consistently. Because of the professional nature of the BFA degree, the program requires completion of 126 credits of coursework.

Admissions & Policies

Admissions

Entrance to the program is by audition. Information about the audition process, including dates and audition application, can be found on the school web page (http://dance.gmu.edu), or by calling the dance office at 703-993-1114. Admission to the university is determined by the Admissions Office.

Policies

For policies governing all undergraduate degrees, see AP5 Undergraduate Policies.

1. Meets Mason Core global understanding requirement
2. Three credits will meet the Mason Core arts requirement.

### 4-Year Plan

**Bachelors of Fine Arts in Dance Sample Plan of Study**

The sample plan below is a recommended sequencing of courses based on pre-requisites and scheduling. This may not fit every student's needs and is a guideline, not a requirement. Students should confirm major requirements with their academic advisor and with PatriotWeb Degree Evaluation to ensure they enroll in the proper courses and are on track to graduate.

World Dance Minor

Banner Code: DNCW

A300 deLaski Performing Arts Building
Fairfax Campus
Phone: 703-993-1114
Website: dance.gmu.edu

The minor in World Dance develops knowledge and appreciation of the vast diaspora of the philosophies, history, and cultural diversity of world dance forms.

Admissions & Policies

Policies

Eight credits of coursework must be unique to the minor and students must complete all coursework with a minimum GPA of 2.00. For policies governing all minors, see AP.5.3.4 Minors.

School of Music
Linda Monson, Director
A417 deLaski Performing Arts Building
Fairfax Campus
Phone: 703-993-1380
Website: music.gmu.edu

Undergraduate Programs
Bachelor's Degrees
The two undergraduate degree programs offered through the School of Music, the bachelor of arts (BA) in music and the bachelor of music (BM), prepare students for graduate work in music and music literature; research and professional work in musical activities; and state licensure, or certification, to teach vocal and choral or instrumental music at the elementary and secondary school levels.

The School of Music enables students to pursue worthwhile vocational goals as teachers, performers, conductors, composers, and in music technology. The School of Music also seeks to educate its students to reflect a concern for cultural and humanistic values as future ambassadors and advocates of music and other arts. Through innovative learning experiences, the School of Music provides all students in the BA and BM programs with opportunities to become effective musicians, teachers, and advocates of music. Teaching music is the principal area in which students can find employment in private studios, public and private schools, academies, and higher education within the ever-changing workplace. Because of this, all music majors at Mason receive some training in the teaching of music.

The School of Music also recognizes the critical outreach role it provides in serving students from all majors, as well as members of the community who significantly benefit from the values and experiences of an education in music. The School of Music seeks to provide unique educational opportunities through its various course offerings, workshops, presentations, and performances for those seeking music enrichment.

Teacher Licensure
Undergraduate students seeking certification to teach vocal and choral or instrumental music at the elementary and secondary levels must earn the BM degree as specified under Concentration in Music Education section in this section. Students who have earned a baccalaureate degree and are seeking state licensure to teach music must also complete this sequence of courses, which constitute a state-approved program for teacher education in music.

Graduate Certificates
Music Education Licensure for PK-12
This graduate certificate is designed as a pathway to music education licensure for music students without an undergraduate degree in music education. Upon completing this certificate students will be equipped with the necessary skills, knowledge, and experience to obtain music teaching licensure from the Commonwealth of Virginia.

Music for Well-Being Graduate Certificate
The Graduate Certificate in Music for Well-Being builds on courses currently offered in the School of Music and on the school-wide initiative around well-being as an important consideration and subject of study for all musicians.

Expanding and supplementing courses developed in connection with the undergraduate minor in Music for Well-Being, the certificate allows students to explore the connections between music and consciousness and between vibration, meditation, and well-being. The graduate certificate gives students a thorough grounding in theory and practice and includes instruction in compositional and improvisational approaches. Although there is some overlap in subject matter, this is not intended as a program in music therapy. The certificate is conceived as a compliment to the programs focused on mindfulness and well-being that are a priority across the university. The success of the long-running Healing Arts Ensemble at the graduate level, as well as the undergraduate level, and the growth in the new minor in Music for Well-Being indicates the potential level of student interest in the program.

This certificate may be pursued in either part-time or full-time status.

Instrumental Performance Artist Graduate Certificate
The certificate is a specialized, graduate-level program for advanced musicians who desire to further develop and refine their performance art. The certificate program is a two-year course of study requiring at least two consecutive semesters of residence. A total of 32 credits is required. Advisor’s approval is required for each semester’s enrollment.

Piano Performance Artist Certificate
The certificate is a specialized, graduate-level program for advanced musicians who desire to further develop and refine their performance art. The certificate program is a two-year course of study requiring at least two consecutive semesters of residence. A total of 32 credits is required. Advisor’s approval is required for each semester’s enrollment.
**Vocal Performance Artist Certificate**
The certificate is a specialized, graduate-level program for advanced musicians who desire to further develop and refine their performance art. The certificate program is a two-year course of study requiring at least two consecutive semesters of residence. A total of 32 credits is required. Advisor's approval is required for each semester's enrollment.

**Graduate Programs**

**Accelerated Master's Option**
The School of Music offers a Music, BM (Performance)/Music, Accelerated MM (Performance) option which allows undergraduate students to take graduate classes that can be used towards a designated master's degree. Undergraduates who wish to pursue the accelerated master's route should talk to their academic advisor first to see if they qualify. Students must be within 75-90 credits of their bachelor's program to be eligible to apply; those who have earned more than 90 credits will not be considered. Students must be approved by their academic advisor and formally apply and be accepted to the master’s program through an accelerated master's application. For more information about admissions requirements and the application process, students should visit the website (http://cvpa.gmu.edu).

**Music, Master of Music (MM)**
The Master of Music (MM) degree is offered as an educational channel to meet the intellectual and career needs of qualified students. It is a comprehensive and advanced program of study with a choice of concentrations in performance, music education, composition, conducting, jazz studies, and pedagogy. The MM with a concentration in music education does not provide licensure to teach music in public or private schools.

**Music Education, Ph.D.**
The PhD in music education, a research-intensive degree, focuses on the gathering, processing, and interpretation of information. Students in the PhD program take seminars and topics courses in music education, as well as research courses through the College of Education and Human Development. PhD graduates are expected to demonstrate the ability to communicate significant concepts of music education.

The PhD in music education requires 60 credits beyond the master's degree in music.

**Doctor of Musical Arts (DMA)**
The DMA concentrations are composition, conducting, and performance. While these concentrations share some required coursework, each is also distinct in course requirements. Professional musicians earn the DMA to enhance and extend their knowledge and practice within their area of specialization. The DMA student focuses on the profession of music performance, conducting, or composition, as well as the theory and practice of those disciplines.

The Doctor of Musical Arts (DMA) degree requires 60 credits beyond the master’s degree in music.

**Faculty**

**School Faculty**

**Professors**
Balakerskaia, Billingham, Camphouse, Carroll, Engebretson, Layendecker (Heritage Chair), Maiello, Miller, Monson (Director), Rendler, G. Smith

**Associate Professors**
Aler, Ciobra, Gillam, Green, Guessford, Kilkenny, Nickens, T. Owens (Associate Director), D. Purcell, G. Robinson

**Assistant Professors**
Alvarez, Carr, Huang, Lavengood, Mulcahy, Walsh

**Administrative Faculty**
Delaney, Freer

**Adjunct Faculty**

**Requirements & Policies**

**Requirements**

**Admission Requirements**
Enterance to all music degree programs is by audition. Arrangements for an audition must be made in advance by contacting the School of Music before the scheduled audition date. Auditions are held approximately once per month. Audition dates and audition application forms are available through the School of Music (http://music.gmu.edu).

**Program Requirements**
A fundamentals of music test is given prior to the first week of classes to all students enrolled in MUSI 115 Introduction to Music Theory. Call for additional information.

Competency placement tests are required of all transfer students who wish to present transfer credit in any of the following areas: music theory, aural skills, and keyboard skills.

Students must earn a minimum 2.00 cumulative GPA in their major or higher, if required by their program.

**Policies**
See CVPA Requirements and Policies.

**Termination from the Major**
No School of Music course that is required for the major may be unsuccessfully attempted more than three times. A grade of F constitutes an unsuccessful attempt in any given course. Those students who do not successfully complete such a course within three attempts...
will be terminated from the major. For more information, see AP5.2.4 Termination from the Major.

**Writing-Intensive Requirement**
Mason requires all students to complete at least one course designated “writing intensive” in their major at the 300 level or above. Students majoring in music may fulfill this requirement by successfully completing MUSI 332 Music History in Society II or MUSI 438 Music History in Society B. Students who transfer this course into Mason may be required to repeat it or enroll in some other suitable course to fulfill the writing intensive requirement.

**Programs**
- Artist Graduate Certificate
- Ethnomusicology Minor
- Jazz Studies Minor
- Music Education Licensure for PK-12 Graduate Certificate
- Music Education, PhD
- Music Minor

**Artist Graduate Certificate**
Banner Code: AR-CERG-ARTC

**Admissions & Policies**

**Admissions**

**Application Materials**
- An artist certificate application and current résumé
- A bachelor's degree in music or equivalent (as evaluated by the School of Music Admissions Committee)
- Transcripts from previous educational institutions
- One-page written statement of student's goals and interest in the program
- Two letters of recommendation
- Recording of a live performance of solo works from the standard repertory submitted via SlideRoom.

Applicants must perform an audition recital and be interviewed on the Mason Campus. Applicants will be notified of the date and time of the audition and interview.

**Policies**
For policies governing all graduate certificates, see AP6.8 Requirements for Graduate Certificates.

**Requirements**

**Certificate Requirements**
Total credits: 22-32
This certificate may be pursued on a full-or part-time basis.

**Requirements**
Students must complete all requirements within a concentration. Total credits varies dependent on the concentration.

**Concentration in Instrumental Performance (IPFM)**
Total credits: 32

Ethnomusicology Minor

**Banner Code:** EMUS

**Music Academic Advisor**

A417 deLaski Performing Arts Building
Fairfax Campus

Phone: 703-993-1392
Email: music@gmu.edu
Website: music.gmu.edu/degree-programs/undergraduate/
The minor is designed for students who wish to widen their scope of knowledge about music, while deepening their understanding of the world’s peoples. Students learn in the classroom, as well as experientially, in the form of applied studies and exercises in field work, how music-making functions within cultural contexts, conveying varied meanings in bodily action and musical sound worldwide. Students gain skills that will serve them in many fields of endeavor, from developing specific musical expertise to acquiring proficiency with technological and anthropological aspects of ethnographic inquiry.

Admissions & Policies

Admissions

Students must first demonstrate to the Ethnomusicology coordinator a basic level of knowledge and training in some area of Western or non-Western music, or earn a grade of B or higher in MUSI 103 Musics of the World (Mason Core) or MUSI 431 Music History in Society III (Mason Core).

Policies

Eight credits of coursework must be unique to the minor with a minimum 2.00 GPA earned in all courses applied to the minor. For policies governing all minors, see AP.5.3.4 Minors.

Requirements

Minor Requirements

Total credits: 18

This minor is open to music and non-music majors who wish to explore America’s unique art form. It is open to all instrumentalists and vocalists, including students who perform on instruments not typically associated with jazz.

Admissions & Policies

Admissions
No prior experience in jazz is needed, but candidates must pass a music audition.

Policies
Students in the keyboard area use the Keyboard Skills I credit as a music elective.

University policy states that students must earn 8 distinct credits that are not used for their major toward their degree, with a minimum 2.00 GPA earned in all courses applied to the minor. For policies governing all minors, see AP.5.3.4 Minors.

Music Education Licensure for PK-12 Graduate Certificate

Banner Code: AR-CERG-MELP

Music Academic Advisor
A417 deLaski Performing Arts Building
Fairfax Campus

Phone: 703-993-1392
Email: music@gmu.edu
Website: music.gmu.edu/degree-programs/undergraduate/

This certificate may be earned on a full-time or part-time basis.

This certificate program qualifies for Title IV Federal Financial Aid.
Admissions & Policies

Admissions

• In addition to standard requirements through the university’s online application, requirements for this program include:
  • Transcript audit that indicates: Bachelor of Music or its equivalent, minimum cumulative G.P.A. of 3.0 (Endorsement Worksheet)
  • Official copy of Praxis Core Academic Skills for Educators Test (or equivalency)
  • One page professional goals statement submitted with application
  • Upon application review by music education faculty, the successful applicant will be invited to an interview and music skills proficiency exam.

Coursework completed at other institutions will not be considered for transfer into this graduate certificate program. Applicants who believe they have met requirements for a license are encouraged to apply directly to the Virginia Department of Education (VDOE). Instructions and a type-and-print version of the application for a teaching license can be found on the VDOE website.

1 Specifics regarding testing requirements and passing scores are dictated by the College of Education and Human Development (CEHD) and can be found online at https://cehd.gmu.edu/teacher/test/praxis (https://cehd.gmu.edu/teacher/test/praxis/)

Policies

For policies governing all undergraduate programs, see AP.5 Undergraduate Policies.

Internship

Upon completion of coursework the candidate must complete a student teaching internship at the elementary and secondary levels in a program-approved public or private school (6 credits). Prior to being permitted to student teach, the candidate must complete and pass the VCLA, the Praxis Subject Assessment (Music Content Knowledge-5113), and the MTEC Competency Check.

</table>

Total Credits 6

1 The requirements and procedures for applying for an internship as well as the MTEC Competency Check is outlined in the Music Education Handbook (https://music.gmu.edu). Candidates will be advised to sign up for vocal and/or instrumental technique courses during coursework as needed to help prepare them for these exams. Note that techniques courses are not required and thus cannot be transferred or counted as course substitutions for completion of the certificate.

Music Education, PhD

Banner Code: AR-PHD-MUE

A417 deLaski Performing Arts Building
Fairfax Campus

Phone: 703-993-1395
Email: music@gmu.edu
Website: music.gmu.edu/degree-programs/graduate/

The Music Education, PhD is a research-intensive degree focusing on the gathering, processing, and interpretation of information. Students in the Music Education PhD program take seminars and topics courses in music education, as well as research courses through the College of Education and Human Development. Music Education, PhD graduates are expected to demonstrate the ability to communicate significant concepts of music education. The Music Education, PhD requires 90 credits, 60 beyond the master’s degree in music.

Admissions & Policies

Admissions

Admission Requirements

In addition to meeting all admission requirements for graduate study, applicants should submit the following:

• Master’s degree in music or its equivalent from an accredited university;
• GPA of 3.00 in master’s-level music coursework; 3.50 in courses related to the prospective area of doctoral study (music education, performance, composition, or conducting);
• Three recommendations;
• Satisfactory scores on GRE;
• Sample of academic writing such as a graduate-level paper from a musicology or music history course taken during MM studies.

2 Must be taken within the student’s first 2 semesters
1 Students should contact their academic advisor in regards to fulfilling this requirement.
• Students in performance and conducting must audition. Specific details of those requirements are available from the advisors.
• Composition students must present a portfolio of recent compositions and recordings of performances.
• Music education majors must present a dossier of their teaching experience and activities, a video of sample classroom teaching, and they must schedule an interview with music faculty including the director of graduate studies (DGS) prior to admission.

Applicants should refer to the graduate admissions (https://music.gmu.edu/auditions/masters-auditions/) page of the School of Music website for specific details on what is required and how to submit their materials. There is no provisional admission. Students must meet appropriate standards prior to commencing doctoral studies.

**Policies**

For policies governing all graduate programs, see AP6 Graduate Policies (https://catalog.gmu.edu/policies/academic/graduate-policies/).

500- to 800-level music courses may be counted as electives except for the following classes: MUSI 501, MUSI 502, MUSI 516, MUSI 532, MUSI 533. These are review courses that cover undergraduate-level material and they may not be counted toward the MM, DMA, or Ph.D.

**Reduction of Credit**

Students must have a master’s degree before being admitted. Most students receive a reduction of study of 30 credits based on their previous master’s degree.

**Requirements**

**Degree Requirements**

Total credits: 90

The following degree plan is based on a student who receives a full 30 credit reduction. Students who do not receive a full credit reduction should choose additional credits in consultation with their advisor.

**Placement Examinations**

Prior to the beginning of the first semester of doctoral studies, the student must complete placement examinations in music theory, music history, and musicianship (including aural skills and keyboard skills). Positive scores on the placement exams may reduce or eliminate prerequisites for courses in music history and music theory.

**Doctoral Coursework**

The doctoral student must maintain a minimum of 3.00 GPA in courses presented on the degree plan, which may include no more than 6 credits with a grade of C. The GPA calculation excludes all transfer courses and Mason extended studies or nondegree credits not formally approved for the degree.

</tr>
</tbody>
</table>

Select 6 credits of MUSI 500 - 800 level electives as approved by advisor 6

Total Credits 48

**Residency**

More than half of all credits (minimum 72) must be taken in doctoral degree status, after admission to the degree program. One year (fall and spring) of consecutive full-time study (9 credits per semester) is recommended (18 total credits). Or, the academic residency requirement may be fulfilled by earning 21 credits within 12 months (fall and spring semesters and summer term). Academic residency should be completed during the first year of study. Any necessary prerequisite courses at the 500 level can be included to meet the residency requirement. Language courses at the undergraduate level may not be included. Note: The academic residency does not imply meeting the standards of Virginia residency for tuition purposes.

**Language Requirements**

Reading proficiency is required in a language appropriate to the student’s major area of study. Normally, this will be German, French, or Italian. Alternatively, the student may choose to demonstrate proficiency interpreting statistical findings in quantitative-based educational research. The director of graduate studies and the Graduate Committee will determine the appropriate area of study. Reading proficiency may be accomplished by completing a reading examination provided by the music faculty. The reading examination provided by the faculty will normally consist of translation (with dictionary) of appropriate technical passages relevant to the student’s area of study within a two-hour period. The language reading proficiency should be completed prior to earning 12 credits of courses at the 600 level or above.

**Graduate Committee**

The Graduate Committee will evaluate the progress of the student annually. Continuation in the program is subject to the endorsement of this group.
Comprehensive Exams
After the completion of required courses (excluding dissertation credits) or during the semester when completion of those courses is anticipated, the student will take comprehensive examinations. The written exams may also be followed by a one-hour oral exam if needed to clarify issues included in the written exams.

</tr>
<tr>
<td>MUSI 999</td>
<td>Dissertation (A minimum of 6 credits)</td>
<td>12</td>
</tr>
</tbody>
</table>

Total Credits: 12

Advancement to Candidacy
Before doctoral students may be advanced to candidacy by the dean of the College of Visual and Performing Arts, they must complete all coursework required by the program faculty, be certified in all relevant doctoral research skills, pass the comprehensive exams, and be recommended by the Graduate Committee, the director of graduate studies, and the director of the School of Music. Students advanced to candidacy after the add period for a given semester must wait until the following semester to register for MUSI 999 Dissertation.

Dissertation
The dissertation is the capstone experience of doctoral study. The dissertation will be guided by the Dissertation Committee consisting of at least three members of the music faculty. The student’s major professor will chair the committee. The director of graduate studies of the School of Music may be a part of the committee; if not, he or she will serve ex officio. All Dissertation Committee members will be appointed by the dean of the College of Visual and Performing Arts and have graduate faculty status, as approved by the university provost.

Final Defense and Graduation
When all degree requirements have been satisfied, including completion of the doctoral dissertation, the doctoral candidate may request a doctoral defense. Approval for the defense must be obtained from the Dissertation Committee, the director of graduate studies and the director of the School of Music, and the dean of the College of Visual and Performing Arts. Notice of a defense must be circulated to the university community two weeks before the defense date.

All relevant rules regarding schedule, fees, and other matters as described in the catalog must be followed. All copies of the dissertation materials and fees must be paid before the doctoral degree is awarded.

A417 deLaski Performing Arts Building
Fairfax Campus
Phone: 703-993-1392
Email: music@gmu.edu
Website: music.gmu.edu/degree-programs/advising/

The minor is designed to allow participation by students with minimal formal musical training. The coursework allows students to explore the connections between music and consciousness and between vibration, mindfulness, and well-being.
Admissions & Policies

Admissions

Admission to the Music for Well-Being minor is by interview with the minor coordinator.

Policies

University policy states that students must earn 8 distinct credits that are not used for their major toward their minor, with a minimum grade of 2.00 earned in all courses applied to the minor. For policies governing all minors, see AP.5.3.4 Minors.

All students pursuing a music pedagogy minor must pass a music audition and an interview.

Policies

University policy states that students must earn 8 distinct credits that are not used for their major toward their minor, with a minimum grade of C earned in all courses applied to the minor. For policies governing all minors, see AP.5.3.4 Minors.

Admissions & Policies

Admissions

Entrance requirements

MUSI 100 Fundamentals of Music (Mason Core) or MUSI 115 Introduction to Music Theory with a grade of C or higher. A music audition and interview with music technology faculty is required.
Policies

University policy states that students must earn 8 distinct credits that are not used for their major toward their degree, with a minimum 2.00 GPA earned in all courses applied to the minor. For policies governing all minors, see AP 5.3.4 Minors.

### Literature  
3

### Natural Science  
7

### Western Civilization/World History  
3

### Social or Behavioral Sciences  
3

### Global Understanding  
3

**Total Credits:** 31

1. Nonnative speakers of English with limited proficiency in the language may substitute ENGH 100 Composition for Multilingual Writers (Mason Core) for ENGH 101 Composition (Mason Core). Students must attain a minimum grade of C in ENGH 100 Composition for Multilingual Writers (Mason Core) or ENGH 101 Composition (Mason Core), to fulfill degree requirements.

2. All students excluding Music Technology and Pedagogy students must take MUSI 251 Musical/Oral Communication.

3. Also have significant elective choices as per Mason Core listing.

4. Two classes; one must contain a lab.

5. All students excluding Music Technology and Pedagogy students must take MUSI 431 Music History in Society III (Mason Core).

Remaining Mason Core requirements are fulfilled with major coursework.

### Additional Non-Major coursework

Bachelor of Arts in Music Sample Plan of Study

The sample plan below is a recommended sequencing of courses based on prerequisites and scheduling. This may not fit every student’s needs and is a guideline, not a requirement. Students should confirm major requirements with their academic advisor and with PatriotWeb Degree Evaluation to ensure they enroll in the proper courses and are on track to graduate.

Detailed four year plans and degree planning checklists can be found at https://advising.gmu.edu/current-student/majors-at-mason/.

Accelerated Master’s

Music, BA/Arts Management, Accelerated MA

Overview

Students choosing the accelerated option must fulfill all university requirements for the master’s degree. The regular designed timeframe would be a start in the Fall and completion of all coursework in the Summer five years later with the exception of Capstone, which is only offered in Fall and Spring. Students may need a longer timeframe to complete all requirements.

This accelerated option is offered through joint cooperation between the School of Music and the Arts Management Program.

For more detailed information, see AP 6.7 Bachelor’s/Accelerated Master’s Degrees. For policies governing all graduate degrees, see the Academic Policies section of the catalog.

Application Requirements

Applicants to accelerated master’s programs must have completed at least 75 credits that apply to their undergraduate degree (with at least 24 credits at Mason) and no more than 100 credits. Applicants should submit an Accelerated Master’s Program Application, available from the College of Visual and Performing Arts (CVPA) Graduate Studies. It includes the proposed conferral date for the undergraduate degree and the two graduate courses that are to be applied to the undergraduate degree.
Interested students should contact the Arts Management Program Office for more details about the application process.

**Accelerated Option Requirements**

As an undergraduate, the accelerated master’s student is to complete the two graduate courses indicated on their Accelerated Option Requirements.

As an undergraduate, the accelerated master’s student is to complete the two graduate courses indicated on their Accelerated Master’s Program application with a minimum grade of B in each course. Students must maintain a minimum GPA of 3.00 in all coursework and in coursework applied to their major. On completion and conferral of the undergraduate degree in the semester indicated in the application, they submit the Bachelor’s/Accelerated Master’s Transition Form (which shall incorporate all of the Graduate Admission requirements of the university) and are admitted to graduate status.

As graduate students, accelerated master’s students have an advanced standing. They must meet all master’s degree requirements except for the two courses (6 credits) they completed as undergraduates. Students will begin their master’s program in the semester immediately following conferral of the undergraduate degree, and they may also begin in the summer term.

**Reserve Graduate Credits**

Students may take up to 6 additional graduate credits as reserve graduate credit. These credits do not apply to the undergraduate degree. The ability to take courses for reserve graduate credit is available to all high achieving undergraduates with permission of the School of Music. Permission to take a graduate course for reserve graduate credit is normally granted only to Mason seniors within 15 hours of graduation and must be approved by the Dean’s Office.

To apply these credits to the master’s degree, students must request that the credits be moved from the undergraduate degree to the graduate degree using the Bachelor’s/Accelerated Master’s Transition Form.

**Requirements**

**Degree Requirements**

Total credits: 120

Students must complete all Mason Core requirements and core coursework, as well as the requirements within one selected concentration.

**Mason Core**

Coursework within the major and concentration fulfills the information technology, global understanding, oral communications, fine arts, and synthesis requirements. Students must fulfill the requirements remaining in the following areas:

<table>
<thead>
<tr>
<th>Code</th>

Concentration in Music Education (MUE)

Certification to Teach

The music education concentration at George Mason University is recognized by the Virginia Department of Education (VDOE) as an approved teacher preparation program that imparts licensure. Even though an undergraduate student may declare music education as their major, this is not an official indication of a student's degree status. In order to be accepted into the degree, students must complete an application, meet all eligibility requirements, and pass the MTEC Interview and Skill Proficiency Exam. All entry requirements are described in Part 1 of the GMUSicEd Handbook located online (https://sites.google.com/site/gmusicedhandbook/information/part1bme/).

The deadline for applying to the BME and taking the MTEC exam is the 4th semester of coursework. The 4th semester is defined as a minimum of 36 attempted credits. Transfer and continuing students entering GMU as an undergraduate with 36 or more credits will be required to apply to the BME no later than their 2nd semester of coursework at GMU.

Student must complete all concentration requirements as well as requirements for one of the following emphases:

- Brass
- Guitar
- Keyboard
- Percussion
- String
- Voice
- Woodwind

Courses Required for All Emphases

### 4-Year Plan

#### Bachelor of Music Sample Plan of Study

The sample plan below is a recommended sequencing of courses based on prerequisites and scheduling. This may not fit every student’s needs and is a guideline, not a requirement. Students should confirm major requirements with their academic advisor and with PatriotWeb Degree Evaluation to ensure they enroll in the proper courses and are on track to graduate.

**Music Technology Electroacoustic**

</table>
Master’s Degrees. For policies governing all graduate degrees, see AP.6.7 Bachelor’s/Accelerated Master’s Transition Form.

Students in the BM (Performance)/MM (Performance) accelerated degree program must fulfill all university requirements for the master’s degree, including a minimum of 18 applicable graduate credits taken after the bachelor’s degree has been completed and posted to the student’s academic record. Successful completion of the accelerated MM will require one summer of coursework between years 4 and 5.

As graduate students, accelerated master’s students have an advanced standing. They must meet all master’s degree requirements except for the two courses (6 credits) they completed as undergraduates. The regular designed timeframe would be a start in the Fall and completion of all coursework in the Summer five years later with the exception of Capstone, which is only offered in Fall and Spring. Students may need a longer timeframe to complete requirements.

For more detailed information, see AP.6.7 Bachelor’s/Accelerated Master’s Degrees. For policies governing all graduate degrees, see Academic Policies.

Music, BM/Arts Management, Accelerated MA

Overview

Students choosing the accelerated option must fulfill all university requirements for the master’s degree. The regular designed timeframe would be a start in the Fall and completion of all coursework in the Summer five years later with the exception of Capstone, which is only offered in Fall and Spring. Students may need a longer timeframe to complete all requirements.

This accelerated option is offered through joint cooperation between the School of Music and the Arts Management Program.

For more detailed information, see AP.6.7 Bachelor’s/Accelerated Master’s Degrees. For policies governing all graduate degrees, see the Academic Policies section of the catalog.

Admissions

Applicants to accelerated master’s programs must have completed at least 75 credits that apply to their undergraduate degree (with at least 24 credits at Mason) and no more than 100 credits. Applicants should submit the following:

- An Accelerated Master’s Program Application, available from the College of Visual and Performing Arts (CVPA) Graduate Studies
- 1-2 page Goals Statement
- Two letters of recommendation
- In addition, all applicants must complete a live performance audition. Arrangements for an audition must be made in advance by contacting the School of Music before the scheduled audition date. Auditions are held approximately once per month. Audition dates and audition application forms are available through the School of Music website.

Interested students should contact the Senior Academic Advisor, School of Music, for more details about the application process.

Degree Requirements & Reserve Graduate Credit

After admission and having earned 90 undergraduate credits, accelerated master’s students complete 6 credits of graduate coursework in their field of study (with a 3.00 GPA or better in each course), specified by their undergraduate and graduate advisors. These credits will apply to the undergraduate degree and provide the student advanced standing in the MM Performance program. All graduate course prerequisites must be completed prior to enrollment. While still in undergraduate status, a maximum of 6 additional graduate credits may be taken as reserve graduate credit and applied to the master’s program. Reserve graduate credits do not apply to the undergraduate degree.

To apply these credits to the master’s degree, students should use the Bachelor’s/Accelerated Master’s Transition Form.

The regular designed timeframe would be a start in the Fall and completion of all coursework in the Summer five years later with the exception of Capstone, which is only offered in Fall and Spring. Students may need a longer timeframe to complete requirements.

For more detailed information, see AP.6.7 Bachelor’s/Accelerated Master’s Degrees. For policies governing all graduate degrees, see Academic Policies.
degree in the semester indicated in the application, they submit the Bachelor's/Accelerated Master's Transition Form (which shall incorporate all of the Graduate Admission requirements of the university) and are admitted to graduate status.

As graduate students, accelerated master's students have an advanced standing. They must meet all master's degree requirements except for the two courses (6 credits) they completed as undergraduates. Students will begin their master's program in the semester immediately following conferral of the undergraduate degree, and they may also begin in the summer term.

Reserve Graduate Credits
Students may take up to 6 additional graduate credits as reserve graduate credit. These credits do not apply to the undergraduate degree. The ability to take courses for reserve graduate credit is available to all high achieving undergraduates with permission of the School of Music. Permission to take a graduate course for reserve graduate credit is normally granted only to Mason seniors within 15 hours of graduation and must be approved by the Dean's Office.

To apply these credits to the master's degree, students must request that the credits be moved from the undergraduate degree to the graduate degree using the Bachelor's/Accelerated Master's Transition Form.

Music, MM

Email: music@gmu.edu
Website: music.gmu.edu/degree-programs/graduate/

The Music, MM degree is offered as an educational channel to meet the intellectual and career needs of qualified students. It is a comprehensive and advanced program of study with a choice of concentrations in performance, music education, composition, conducting, jazz studies, collaborative piano, and pedagogy. The Music, MM with a concentration in music education does not provide licensure to teach music in public or private schools.

Admissions & Policies

Admissions
Requirements
In addition to fulfilling admission requirements for graduate study, applicants are expected to hold a baccalaureate degree in music or another discipline, with courses equaling the music requirements (minus the 7- to 8-credit teaching sequence) for the BA in music offered at Mason.

The following admission requirements must also be met:

- Performance: pre-screening submitted through SlideRoom and audition
- Conducting: pre-screening submitted through SlideRoom and audition
- Composition: submission of a portfolio of compositions
- Music Education: interview with music faculty, a video of sample classroom teaching and submission of a two- to three-page paper on the applicant's philosophy of music education.
- Pedagogy: audition in the primary applied teaching area is required. Applicants are expected to have large and small ensemble experience on the major instrument and should have presented a full solo recital or equivalent. All music teaching experience should be summarized.
- Jazz Studies: A portfolio of at least five jazz tunes in contrasting styles, as well as a complete repertoire list of all jazz tunes studied/ performed. Submit all jazz materials via SlideRoom and schedule audition.
- Collaborative Piano: pre-screening submitted through SlideRoom and audition

Applicants should refer to the graduate admissions page of the School of Music website for specific details on what is required and how to submit their materials.

Diagnostic Entrance Exam
All students except those enrolled in the MM in music education are required to complete diagnostic entrance examinations in music theory, music history, aural skills, and basic keyboard skills. These examinations must be taken prior to the beginning of the first semester of graduate study. A sufficient placement score can reduce or eliminate prerequisites for some of the 600-level and above courses in music theory and history.

Foreign Language Exams (Vocal Performance Emphasis)
Students in the MM degree program (emphasis in vocal performance) must take proficiency exams in French, German, Italian, and English to demonstrate diction competency. Students may be required to take MUSI 525 Performance Seminar and Vocal Literature for Singers and Accompanists I, MUSI 526 Performance Seminar and Vocal Literature for Singers and Accompanists II.

Comprehensive Exit Exam
All students are required to pass a comprehensive exit exam except those enrolled in the MM in music education (online and face-to-face modalities). This exam is normally administered during the graduation semester. August graduates should consult with the Director of Graduate Studies about the timing of their exit exams prior to their final spring semester. This exam is usually a three-hour written test, with questions based primarily on course work the student has taken toward the degree at Mason. Students enrolled in the MM in music education (online and face-to-face modalities) will be required to submit a comprehensive electronic portfolio in place of a comprehensive exit exam. For students in the music education concentration, the portfolio is normally submitted during the graduation semester or, in the case of students selecting the thesis option in the music education concentration, on completion of 24 credits of course work and immediately before beginning work on the thesis.

Policies
500- to 800-level music courses may be counted as electives except for the following classes: MUSI 501, MUSI 502, MUSI 516, MUSI 532, MUSI 533. These are review courses that cover undergraduate-level material and they may not be counted toward the MM, DMA, or Ph.D.

• Performance: pre-screening submitted through SlideRoom and audition
• Composition: submission of a portfolio of compositions
• Music Education: interview with music faculty, a video of sample classroom teaching and submission of a two- to three-page paper on the applicant's philosophy of music education.
• Pedagogy: audition in the primary applied teaching area is required. Applicants are expected to have large and small ensemble experience on the major instrument and should have presented a full solo recital or equivalent. All music teaching experience should be summarized.
• Jazz Studies: A portfolio of at least five jazz tunes in contrasting styles, as well as a complete repertoire list of all jazz tunes studied/ performed. Submit all jazz materials via SlideRoom and schedule audition.
• Collaborative Piano: pre-screening submitted through SlideRoom and audition

Applicants should refer to the graduate admissions page of the School of Music website for specific details on what is required and how to submit their materials.

For policies governing all graduate degrees, see AP .6 Graduate Policies. See College of Visual and Performing Arts for policies specific to the college.

Program Requirements
A student must successfully complete the appropriate 30 credits in graduate music courses. With approval of the graduate advisor, 3 non-music graduate credits may be taken.

The student is admitted as concentrating in one of seven areas: performance, music education, composition, conducting, jazz studies, collaborative piano, or pedagogy. All students are required to complete the 11 credits described as General Requirements plus 19 credits in one of the six areas identified as Additional Requirements. There are some limited possibilities for double concentrations. For details, see the director of graduate studies.

Requirements

Degree Requirements
Total credits: 30

General Requirements for All Concentrations
Music Education students will have 9 credits of General Requirements and 21 credits of Concentration Requirements; all other concentrations will have 11 credits of General Requirements and 19 credits of Concentration Requirements.

**Accelerated Master's**

**Music, BM (Performance)/Music, Accelerated MM (Performance)**

**Overview**

Students in the Music, BM (Performance concentration) have the option of obtaining an accelerated Music, MM (Performance concentration).

For more detailed information, see AP6.7 Bachelor’s/Accelerated Master’s Degrees. For policies governing all graduate degrees, see AP6 Graduate Policies.
Admissions Requirements
Applicants to accelerated master’s programs must have completed at least 75 credits that apply to their undergraduate degree (with at least 24 credits at Mason) and no more than 100 credits. Applicants should submit the following:

- An Accelerated Master’s Program Application, available from the College of Visual and Performing Arts (CVPA) Graduate Studies
- 1-2 page Goals Statement
- Two letters of recommendation
- In addition, all applicants must complete a live performance audition. Arrangements for an audition must be made in advance by contacting the School of Music before the scheduled audition date. Auditions are held approximately once per month. Audition dates and audition application forms are available through the School of Music website.

Interested students should contact the Senior Academic Advisor, School of Music, for more details about the application process.

Degree Requirements & Reserve Graduate Credit
After admission and having earned 90 undergraduate credits, accelerated master’s students complete 6 credits of graduate coursework in their field of study (with a 3.00 GPA or better in each course), specified by their undergraduate and graduate advisors. These credits will apply to the undergraduate degree and provide the student advanced standing in the MM Performance program. All graduate course prerequisites must be completed prior to enrollment. While still in undergraduate status, a maximum of 6 additional graduate credits may be taken as reserve graduate credit and applied to the master’s program. Reserve graduate credits do not apply to the undergraduate degree.

To apply these credits to the master’s degree, students should use the Bachelor’s/Accelerated Master’s Transition Form.

Students in the BM (Performance)/MM (Performance) accelerated degree program must fulfill all university requirements for the master’s degree, including a minimum of 18 applicable graduate credits taken after the bachelor’s degree has been completed and posted to the student’s academic record. Successful completion of the accelerated MM will require one summer of coursework between years 4 and 5.

As graduate students, accelerated master’s students have an advanced standing. They must meet all master’s degree requirements except for the two courses (6 credits) they completed as undergraduates. The regular designed timeframe would be a start in the Fall and completion of all coursework in the Summer five years later with the exception of Capstone, which is only offered in Fall and Spring. Students may need a longer timeframe to complete requirements.

For more detailed information, see AP6.7 Bachelor’s/Accelerated Master’s Degrees. For policies governing all graduate degrees, see Academic Policies.

Musical Arts, DMA
Banner Code: AR-DMA-MUAR

Fairfax Campus
Phone: 703-993-1392

Email: music@gmu.edu
Website: music.gmu.edu/degree-programs/graduate/

The Doctor of Musical Arts (DMA) requires 90 credits, 60 credits beyond the Master’s degree in music. The doctor of musical arts concentrations are composition, conducting, and performance. While these concentrations share some of the required coursework, each is also distinct in course requirements. Professional musicians earn the DMA to enhance and extend their knowledge and practice within their area of specialization. The DMA student focuses on the profession of music performance, as well as the theory and practice of the discipline.

Admissions & Policies

Admissions Requirements
In addition to meeting all admission requirements for graduate study, applicants should submit the following:

- Master’s degree in music from an accredited university;
- GPA of 3.00 in master’s-level music coursework, 3.50 in courses related to the prospective area of doctoral study (performance, composition, or conducting);
- Three recommendations;
- Satisfactory scores on GRE;
- A sample of academic writing such as a graduate-level paper from a (musicology or music history) course taken during MM studies;
- Audition (performance and conducting students only). Specific details of those requirements are available from the advisors.
- A portfolio of recent compositions and recordings of performances (composition students only).

Applicants should refer to the graduate admissions page of the School of Music website for specific details on what is required and how to submit their materials. There is no provisional admission. Students must meet appropriate standards prior to commencing doctoral studies.

Policies
500- to 800-level music courses may be counted as electives except for the following classes: MUSI 501, MUSI 502, MUSI 516, MUSI 532, MUSI 533. These are review courses that cover undergraduate-level material and they may not be counted toward the MM, DMA, or Ph.D.

For policies governing all graduate degrees, see AP .6 Graduate Policies. See College of Visual and Performing Arts for policies specific to the college.

Reduction of Credit
Students must have a master’s degree before being admitted to the Doctor of Musical Arts Program. Most students receive a reduction of study of 30 credits based on their previous master’s degree.

Requirements

Degree Requirements
Total credits: 90
The following degree plan is based on a student who receives a full 30 credit reduction. Students who do not receive a full credit reduction should choose additional credits in consultation with their advisor.

**Placement Examinations**

Prior to the beginning of the first semester of doctoral studies, the student must complete placement examinations in music theory, music history, and musicianship (including aural skills and keyboard skills). Positive scores on the placement exams may reduce or eliminate prerequisites for courses in music history and music theory. Recitals can be scheduled only after completion of any necessary prerequisites in music theory, music history, and musicianship.

**Doctoral Coursework**

The doctoral student must maintain a minimum of 3.00 GPA in courses presented on the degree plan, which may include no more than 6 credits with a grade of C. The GPA calculation excludes all transfer courses and Mason extended studies or non-degree credits not formally approved for the degree.

Students must complete the following required courses as well as those in their chosen concentration:

the School of Music may be part of the committee; if not, he or she will

serve ex officio. All Dissertation Committee members will be appointed by

the dean of the College of Visual and Performing Arts and have graduate

faculty status, as approved by the university provost. Performance and

composition recitals are also subject to the approval of the Dissertation

Committee.

Final Defense and Graduation

When all degree requirements have been satisfied, including completion of

the doctoral dissertation, the doctoral candidate may request a

doctoral defense. Approval for the defense must be obtained from

the Dissertation Committee, the director of graduate studies and the

director of the School of Music, and the dean of the College of Visual and

Performing Arts. Notice of a defense must be circulated to the university

community two weeks before the defense date.

All relevant rules regarding schedule, fees, and other matters as

described in the catalog must be followed. All copies of the dissertation

materials and fees must be paid before the doctoral degree is awarded.

School of Theater

Kevin Murray, Associate Director

A407 deLaski Performing Arts Building

Fairfax Campus

Phone: 703-993-1120

Email: theater@gmu.edu

Website: theater.gmu.edu

Undergraduate Programs

Theater BA and BFA

The School of Theater offers Bachelor of Arts (BA) and Bachelor of Fine

Arts (BFA) degrees and prepares students for graduate study or entry

into the profession through rigorous, concentrated, and individualized

training; however, students are encouraged to maintain wide-ranging

interests within the school and throughout the university’s extensive

offerings. Theater majors organize their advanced work within the major

to include classes in areas of emphasis including performance, design

and technical theater, and other theater studies.

Theater BA Concentrations

Theater majors must complete their Bachelor of Arts degree with a

concentration in one of the following areas: Design and Technical

Theater, Performance (Acting and Directing), Theater Education for
Students must earn a minimum 2.5 cumulative GPA to complete a BA. Bachelor of Arts students must use some/all general electives to complete a minor, double major, double degree or intermediate-level proficiency in one foreign language.

Certification for Theater Education for Theater Arts PK-12
The Theater Education for Theater Arts PK-12 concentration is approved by the Virginia State Department of Education and administered through the College of Education and Human Development, which is accredited by the National Council for the Accreditation of Teacher Education (NCATE). Upon degree conferral and completion of all requirements, students will be eligible to apply for Virginia state licensure. Minimum scores on the Praxis Core and VCLA tests must be achieved before state licensure is granted.

Students must be formally accepted into the Theater Education for Theater Arts PK-12 concentration.

Theater BFA Concentrations
Theater majors must complete their Bachelor of Fine Arts degree with a concentration in one of the following areas: Design for Stage and Screen, Performance for Stage and Screen (Acting and Directing), or Musical Theater Performance. Students must earn a minimum 2.5 cumulative GPA to complete a BFA.

Graduate Programs

Accelerated Master’s Program
The School of Theater offers a Theater, BA/Arts Management, Accelerated MA option which allows undergraduate students to take graduate classes that can be used towards a designated Master’s degree. Undergraduates who wish to pursue the accelerated Master’s route should talk to their academic advisor first to see if they qualify. Students must be within 75-90 credits of their Bachelor’s program to be eligible to apply; those who have earned more than 100 credits will not be considered. Students must be approved by their academic advisor and formally apply and be accepted to the Master’s program through an Accelerated Master’s application. For more information about admissions requirements and the application process, students should visit the college website (http://cvpa.gmu.edu).

Visual and Performing Arts, MFA
The School of Theater offers one concentration under the Master of Fine Arts, Visual and Performing Arts degree: Theater. Applicants to the program must designate which concentration they intend to apply for on the application. Each concentration has its own unique set of admissions requirements and program requirements.

Graduate Certificate

Teaching Theatre PK-12 Graduate Certificate
The Teaching Theater PK–12 Graduate Certificate is a pre-service program that prepares students for Theater Arts licensure by the Commonwealth of Virginia. In conjunction with the College of Education and Human Development, the Certificate curriculum consists of graduate-level Theater and Education courses, field experience observation and pre-service teaching internship.

Requirements & Policies

Requirements

Admission Requirements
Entrance to the program is by audition/interview or portfolio review. Information about the audition process, including dates, can be found on the School of Theater website. Admission to the university is determined by the Office of Admissions (https://www2.gmu.edu/admissions-aid/).

Program Audition, Portfolio Requirements
A student must interview with a faculty panel in order to apply to become a Theater major. Additionally, actors must audition for the program, designers and technicians must undergo a portfolio review, writers must submit a writing sample, and educators must provide a written statement of teaching philosophy. See details on the College of Visual & Performing Arts Admissions page (https://cvpa.gmu.edu/admissions/undergraduate-admissions/school-theater-admissions/).

We are looking for:

• An appropriate level of craft and artistry.
• Commitment to the work as demonstrated by preparation for the interview, audition, and/or portfolio review.
• A willingness to accept direction, criticism and mentoring.
• A willingness and ability to collaborate with students, faculty, and professionals.

Students must schedule their audition or interview through SlideRoom (https://gmucvpa.slideroom.com/#/login/program/43722). Additional details can be found on the College of Visual & Performing Arts Admissions page (https://cvpa.gmu.edu/admissions/undergraduate-admissions/school-theater-admissions/). You will receive an email confirmation of your program audition date.

If you have any questions, please contact School of Theater Program Manager, Kevin Murray (http://kmurra3@gmu.edu), 703-993-2195. If necessary, an applicant may request an individual appointment during
normal business hours. Theater major program auditions and portfolio reviews will take place within the School of Theater on the Fairfax Campus.

Writing-Intensive Requirement

The university requires all students to complete at least one course designated writing-intensive in their major at the 300 level or above. Students seeking a BA or BFA in Theater fulfill this requirement by successfully completing THR 350 Script Analysis or THR 482 Advanced Screenplay Workshop.

Production Requirements

Participation in Theater at Mason productions is expected of all declared majors. Students must have a minimum 2.5 cumulative GPA to participate in Theater at Mason productions.

Theater Honors Program

See the Theater, BA or Theater, BFA for specific details.

BA/BFA Policies

Students seeking to earn a BA or BFA as a second bachelor’s degree, either concurrently or sequentially, must complete all Theater degree requirements. Students must earn a minimum 2.00 cumulative GPA in their major. A student must earn a minimum cumulative GPA of 2.5 to complete a BA with a concentration or a BFA.

This minor is offered by the College of Visual and Performing Arts (School of Theater) and the College of Education and Human Development (School of Recreation, Health, and Tourism). This minor, available to all Mason undergraduate students, offers the opportunity to study special event management and event technologies, design and production for installations and special events. Students will gain insights into industry standards and practices regarding planning, managing, and executing live events and presentations. The required courses in this minor provide students with a foundational overview of management and production. Students can complement that knowledge with specific electives that meet their individual interests in events and areas of design and technology.
Admissions & Policies

Policies

University policy states that students must earn 8 distinct credits that are not used for their major toward their minor, with a minimum grade of 2.00 earned in all courses applied to the minor. For policies governing all minors, see AP 5.3.4 Minors.

Website: https://theater.gmu.edu/academics/theater-programs

The BA degree stresses the breadth of a liberal arts education in the belief that such study, combined with serious practical training and experience, offers the best preparation for a life in theater and screen.

Students complete the theater core. To organize their advance work within the major, students elect a course of study from four concentrations:

- Performance (Acting and Directing)
- Design and Technical Theater
- Theater Education for Theater Arts PK-12
- Theater Studies
### Admissions & Policies

#### Admissions

Entrance to the program is by audition/interview or portfolio review. Information about the audition process, including dates on the School of Theater website (https://theater.gmu.edu).

Admission to the university is determined by the Admissions Office. University-wide admissions policies can be found in the Undergraduate Admissions Policies section of this catalog.

#### Policies

For policies governing all undergraduate degrees, see AP.5 Undergraduate Policies (https://catalog.gmu.edu/policies/academic/undergraduate-policies/).

¹ Must be taken four times during course of study.
² May fulfill either Mason Core Global Understanding requirement or dramatic literature requirement but not both.
³ or with permission of Director
Design & Tech concentration students must complete THR 240 for the Design/Tech in the Discipline requirement.

**Theater Concentrations**

Theater majors earning a BA in Theater must select one of the following concentrations:

**Concentrations**
- Concentration in Design and Technical Theater (DTT)
- Concentration in Performance (PFM)
- Concentration in Theater Education for Theater Arts PK-12 (THEA)
- Concentration in Theater Studies (THST)

**Concentration in Design and Technical Theater (DTT)**

Provides a foundation of knowledge, technique, and experience in one or more areas of theater design and technology in preparation for advanced study and professional work in the field.

**Upper-Level Theater Electives**

12 credits of 300-400 level THR coursework

- or with permission of Director

**Concentration in Performance (PFM)**

Designed for the serious student of acting and directing with professional aspirations. Solid grounding in the fundamentals of performance analysis and basic training of the actor's instrument are complemented by a rigorous, sequential instruction in the various facets of the actor's craft.

At its core, the Performance Concentration is a blend of Modern and Classical actor training using a Stanislavski-grounded approach balanced with techniques for understanding texts written two hundred years before "motivation" and "characterization" entered the critical vocabulary. Rounding out the curriculum is specialized study in vocal production and movement technique. Matriculation in this program expresses a profound commitment to a rigorous intellectual, physical and emotional investigation of the discipline of performance over a two-year period. Professional development is enhanced with ongoing student progress reviews, support and advising from Performance Concentration faculty.

**Upper-Level Theater Electives**

12 credits of 300-400 level THR coursework

- or with permission of Director

**Concentration in Theater Education for Theater Arts PK-12 (THEA)**

Designed for students interested in pursuing theater education. Students pursuing a concentration in Theater Education for Theater Arts PK-12 must:

- Maintain an overall GPA of 2.80 in all course work completed at Mason and in course work at all institutions of higher learning combined.
- Earn no grade lower than a C in theater and professional education courses needed for graduation.

Upon completion of all required coursework students must complete 15 weeks of a full-time student teaching internship (THR 455 Theater Education Internship). Applications for placement, subject to approval of the unit, are submitted to the Field Placement Specialist in the College of Education and Human Development at the beginning of the previous semester. In addition, students must pass the VCLA before student teaching.

Concentration in Theater Studies (THST)
Designed for the Theater generalist or the writer specializing in playwriting, screenwriting, production dramaturgy, season planning, theater criticism, and translation/adaptation for the stage. The Concentration in Theater Studies requires each student to work with a faculty adviser to craft an individualized course of study that challenges their development conceptually and creatively for a total of 27 credits of upper-division (300-400 level) THR courses. Concentration curriculum must include a minimum of three credits of THR 422 Advanced Performance Practicum or THR 492 Advanced Practicum.

3-Year Plan

Bachelors of Arts in Theatre Sample Plan of Study
The sample plan below is a recommended sequencing of courses based on pre-requisites and scheduling. This may not fit every student’s needs and is a guideline, not a requirement. Students should confirm major requirements with their academic advisor and with PatriotWeb Degree Evaluation to ensure they enroll in the proper courses and are on track to graduate.

</tbody>
</table>

Detailed four year plans and degree planning checklists can be found at https://advising.gmu.edu/current-student/majors-at-mason/.
**Honors**

**Honors in the Major**
Highly-qualified students who have completed 75 credits may pursue advanced work leading to graduation with honors in the major. Students apply for Honors in Theater by submitting to the Director (by November 15 or April 15) a two-page written statement outlining their reasons for pursuing advanced coursework and specific professional goals, along with the names of two Mason theater faculty members who have agreed to serve as references.

Students satisfy the honors course sequence by taking three honors-specific courses from their chosen concentration. They must also maintain an overall GPA of 3.50 and a GPA of 3.75 within the major.

**Accelerated Master's**

**Theater, BA/Arts Management, Accelerated MA**

**Overview**
Undergraduates in Theater may apply to the accelerated master’s degree in Arts Management. If accepted, students will be able to earn a BA in Theater and an MA in Arts Management after satisfactory completion of 150 credits.

Students choosing the accelerated option must fulfill all university requirements for the master’s degree. The regular designed timeframe would be a start in the Fall and the completion in the Summer five years later, but longer time frames may also be available.

See AP.6.7 Bachelor's/Accelerated Master's Degree for policies related to this program. For policies governing all graduate degrees, see AP6 Graduate Policies.

**Admission Requirements**
Applicants to accelerated master’s programs must have completed at least 75 credits that apply to their undergraduate degree (with at least 24 credits at Mason) and no more than 90 credits. Applicants should submit an Accelerated Master’s Program Application, available from the College of Visual and Performing Arts (CVPA) Graduate Studies. It includes the proposed conferral date for the undergraduate degree and the two graduate courses that are to be applied to the undergraduate degree.

Interested students should contact the Arts Management Program Office for more details about the application process.

**Accelerated Option Requirements**
As an undergraduate, the accelerated master’s student is to complete the two graduate courses indicated on their Accelerated Master’s Program application with a minimum grade of 3.00 in each course. Students must maintain a minimum GPA of 3.00 in all coursework and in coursework applied to their major. On completion and conferral of the undergraduate degree in the semester indicated in the application, they submit the Bachelor’s/Accelerated Master’s Transition Form (which shall incorporate all of the Graduate Admission requirements of the university) and are admitted to graduate status.

As graduate students, accelerated master’s students have an advanced standing. They must meet all master’s degree requirements except for the two courses (6 credits) they completed as undergraduates. The Internal Internship (AMGT 742 Internship I) will be within Theater at Mason (generally with the School of Theater). Students will begin their master’s program in the semester immediately following conferral of the undergraduate degree, and they may also begin in the summer term.

**Reserve Graduate Credit**
Students may take up to 6 additional graduate credits as reserve graduate credit. These credits do not apply to the undergraduate degree. The ability to take courses for reserve graduate credit is available to all high achieving undergraduates with permission of the School of Theater. Permission to take a graduate course for reserve graduate credit is normally granted only to Mason seniors within 15 hours of graduation and must be approved by the Dean’s Office.

To apply these credits to the master’s degree, students must request that the credits be moved from the undergraduate degree to the graduate degree using the Bachelor’s/Accelerated Master’s Transition Form.

</tbody>
</table>

1 Must be taken four times during course of study.
2 May fulfill Mason Core global understanding or the upper-level dramatic literature requirement but not both.
3 or with permission of Director
4 Design & Tech concentration students must complete THR 240 for the Design/Tech in the Discipline requirement.

Theater BFA Concentrations

Theater majors earning a BFA in Theater must select one of the following concentrations:

Concentrations
- Design for Stage and Screen Concentration (DSS)
- Musical Theater Performance Concentration (MTPF)
- Performance for Stage and Screen (Acting and Directing) Concentration (PSS)

Design for Stage and Screen Concentration (DSS)

1 The School of Music offers placement tests in Theory, Sight Singing, Ear Training and Keyboard Skills for students with an exceptional level of competency or prior academic experience in these areas. Placement tests are optional. However, students must pass the specific placement tests in order to receive “credit-by-examination” to be applied for credit to the concentration. These exams are only available the semester you begin coursework at Mason and cannot be scheduled for a later time. Opportunities to take the placement exams and additional exam details are posted on the School of Music website: music.gmu.edu (https://music.gmu.edu)

2 Registration by audition/interview only. Students completing THR 428 for the first time must register for 3 credits. Students repeating the course may elect to register for 1-3 credits.

4-Year Plan

Bachelor of Fine Arts in Theater Sample Plan of Study

The sample plan below is a recommended sequencing of courses based on pre-requisites and scheduling. This may not fit every student's needs and is a guideline, not a requirement. Students should confirm major requirements with their academic advisor and with PatriotWeb Degree Evaluation to ensure they enroll in the proper courses and are on track to graduate.

**Total Credits 120-121**

Detailed four year plans and degree planning checklists can be found at https://advising.gmu.edu/current-student/majors-at-mason/.

### Honors

**Honors in the Major**

Highly-qualified students who have completed 75 credits may pursue advanced work leading to graduation with honors in the major. Students apply for Honors in Theater by submitting to the Director (by November 15 or April 15) a two-page written statement outlining their reasons for pursuing advanced coursework and specific professional goals, along with the names of two Mason theater faculty members who have agreed to serve as references.

Students satisfy the honors course sequence by taking three honors-specific courses from their chosen concentration. They must also maintain an overall GPA of 3.50 and a GPA of 3.75 within the major.

### Visual and Performing Arts, MFA

**Banner Code:** AR-MFA-VPA

**Phone:** 703-993-2196  
**Email:** cvpaaff@gmu.edu

The MFA in Visual and Performing Arts is a terminal degree which prepares students as professional artists and scholars who can work within their specialty and teach at the university level. Creative work and skill building are at the core of the study. The curriculum is designed for serious and talented students who are prepared to examine modes
of creative inquiry in an inclusive, unique environment that promotes exploration, analysis, synthesis, and development as artists.

Admissions & Policies

Admissions

Concentration in Dance

The MFA in Visual and Performing Arts, concentration in Dance, is a highly selective 60-credit program of study grounded in the modern dance genre that emphasizes mastery in performance, choreography, and teaching in higher education. Applicants must have significant (5 years or more) professional performance experience in modern or ballet at the national or international level. They must also demonstrate professional competence in choreography as exemplified by a significant body of work, and have experience teaching technique at the advanced level.

All MFA applicants are required to submit the following items:

- Online Application and Fee
- Official transcripts from each institution of higher education attended
- 3 letters of recommendation
- Resume
- Goals Statement

The following should be sent directly to the School of Dance via SlideRoom:

- 15-minute video of original choreography
- Artistic Goals Statement
- Resume
- Applicant must satisfy the following prerequisites: advanced dance technique, improvisation, dance composition, history, anatomy/kinesiology, and dance production. Prerequisite courses are usually fulfilled if the applicant has earned a BA or BFA in Dance.

Qualified students will be invited for an audition after review of application materials.

Concentration in Graphic Design

All MFA applicants are required to submit the following items:

- Online Application and Fee
- Official transcripts from each institution of higher education attended
- 3 letters of recommendation
- Resume
- Goals Statement

Additional Requirements for Concentration in Graphic Design:

- Portfolio
- Writing Sample: A critical and historical essay or academic paper on a design- (preferred) or art-related topic.

Portfolio Guidelines

The applicant’s portfolio is a major selection criterion for graduate admission and should represent the applicant’s most accomplished work. The portfolio and all other application materials should be submitted to the Office of Graduate Admissions. For more information, contact the School of Art office at 703-993-8898.

Portfolios should include 20 samples of design work submitted through SlideRoom. Samples must be labeled with: name of artist, title, and date. Videos and Flash files (no more than 4 minutes for each section) must be playable through SlideRoom. In the case of collaborative work, the applicant’s role should be clearly stated.

Concentration in Theater

The MFA in Visual and Performing Arts with a concentration in Theater is a highly selective program designed for theater artists with some professional experience who continue to work professionally during their course of study. Students are admitted to a specific emphasis: Acting, Design & Technology, or Directing. A program of study will be designed for each individual, based on their area of expertise, previous experience and professional goals.

Admissions Requirements

All MFA applicants are required to submit the following items:

- Online application and fee
- Official transcripts from each institution of higher education attended
- 3 letters of recommendation
- Résumé
- Goals statement

Additional requirements for a concentration in Theater:

- Portfolio
- Interview or audition

To apply to the program, candidates must have completed a degree in Theater or 33 semester hours distributed among the following areas:

- Directing (6 credits)
- Technical Theater (9 credits)
- Cultural Context & Theater History (3 credits)
- Performance (6 credits)
- Dramatic Literature (9 credits)

Portfolio Guidelines

The applicant’s portfolio is a major selection criterion for graduate admission and should represent the applicant’s most accomplished work. The portfolio and all other application materials should be submitted to the Office of Graduate Admissions.

Portfolio requirements are different for each graduate area of emphasis and are listed below. Incomplete portfolios will not be considered. Applicants’ portfolio items are considered part of the application for admission and, thus, cannot be returned. Please do not send original materials.

Audition & Portfolio Requirements by Area of Emphasis

Acting

Applicants for the concentration in Theater with an emphasis in Acting must complete an audition for the program. Applicants should be prepared with three contrasting monologues. Two monologues are required; a third should be prepared to share on request. Please prepare both classical and contemporary work. Auditors will be looking for range, transformational potential, and vocal and physical expressiveness.

Design & Technology

Applicants for the concentration in Theater with an emphasis in Design & Technology must submit one fully documented design in your area of emphasis (i.e., lighting, sound, scenery, costume, etc.). This may include: script analysis, research, renderings, paperwork, drafting, diagrams,
sound clips and/or production photos. Additional examples of design work and artistic vision may also be submitted.

Directing
Applicants for the concentration in Theater with an emphasis in Directing must submit both a portfolio of produced work and a directorial analysis of a play or opera. For the latter, include at least six visual images with supporting annotation.

Concentration in Visual Art
All MFA applicants are required to submit the following items:

- Online Application and Fee
- Official transcripts from each institution of higher education attended
- 3 letters of recommendation
- Resume
- Goals Statement

Additional Requirements for Concentration in Visual Arts:

- Portfolio

Portfolio Guidelines
The applicant’s portfolio is a major selection criterion for graduate admission and should represent the applicant’s most accomplished work.

The portfolio and all other application materials should be submitted to the Office of Graduate Admissions. For more information, contact the School of Art office at 703-993-8898.

Portfolio requirements are different for each graduate area of emphasis and are listed below. Incomplete portfolios will not be considered.

Portfolio Requirements by Area of Emphasis

InterArts
20 images submitted through SlideRoom. Samples must be labeled with: name of artist, title and date. Videos and Flash files (no more than four minutes for each section) must be playable through SlideRoom. In the case of collaborative work, the applicant’s role should be clearly stated. If writing-based materials are submitted, they should be submitted in printed form.

New Media Arts
20 images submitted through SlideRoom. Samples must be labeled with: name of artist, title and date. Videos and Flash files (no more than four minutes for each section) must be playable through SlideRoom. Only the relevant parts of the video should be marked for viewing, with the applicant’s role clearly stated.

Painting and Drawing
20 images submitted through SlideRoom. Samples must be labeled with: name of artist, title and date.

Photography
20 images submitted through SlideRoom. Samples must be labeled with: name of artist, title and date.

Printmaking
20 images submitted through SlideRoom. Samples must be labeled with: name of artist, title and date.

Sculpture
20 images submitted through SlideRoom. Samples must be labeled with: name of artist, title and date.

Policies
Program Requirements
Candidates are required to complete 60 credits, of which 30 are made up from core requirements. An additional 30 credits are based on concentration area and comprehensive experience.

MFA concentrations include:

- Dance
- Graphic Design
- Theater
- Visual Art

While the faculty anticipate that students will work through their coursework as described in this catalog, individuals with extensive professional accomplishment may craft an individualized program that meets curricular requirements. Individualized programs require the recommendation of the Graduate Committee within the student’s respective school as well as the approval of the CVPA Associate Dean.

Requirements

Degree Requirements
Total credits: 60

Students should complete all requirements within the concentration to which they have been admitted. Candidates are required to complete 60 credits, of which 30 are made up from core requirements. An additional 30 credits are based on concentration area and comprehensive experience.

Concentration in Dance (DANC)
The MFA in Visual and Performing Arts, concentration in Dance, is a highly selective 60-credit program of study grounded in the modern dance genre that emphasizes mastery in performance, choreography, and teaching in higher education.

**Concentration in Graphic Design (GD)**

The MFA in Visual and Performing Arts, concentration in Graphic Design offers students a comprehensive study and preparation for the graphic design profession. The program includes courses in typography, web design, image making, and brand design, as well as prepares students for an academic career in Graphic Design. The broad range of study is intended to develop professionals prepared for an ever-expanding graphic design field.

Concentration in Visual Art (VART)

The MFA in Visual and Performing Arts, concentration in Visual Arts, is a terminal degree that prepares students to become professional artists, work in technology or arts-related fields, and teach at the university level. Students select an emphasis in one of the following: New Media, Painting and Drawing, Photography, Printmaking, Sculpture, or InterArts. Students have the opportunity to combine art forms in projects that may be installation, performance, publishing, time-based, or writing-based, and combine creative and critical approaches in their work.

Core Requirements

Interdisciplinary Programs and Courses

College Code: UN

Academic Units

• Smithsonian-Mason School of Conservation

Programs

• Applied Science, BAS
• Design Thinking Minor

Applied Science, BAS

Banner Code: UN-BAS-APLS

Administration

• Janette Kenner Muir, Academic Director and Associate Provost for Academic Initiatives and Services
• Marcy R. L. Glover, Curriculum Coordinator
• Krystal Dains, Coordinator, Volgenau School of Engineering concentrations
• Jane Walker, Coordinator, School of Conflict Analysis and Resolution concentration

The Bachelor of Applied Science (BAS) is an undergraduate liberal arts degree program for adult learners. It is designed primarily to deepen student knowledge in an academic area and foster critical thinking, analytic reasoning, and an ability to synthesize information.

The BAS articulates well with specialized Applied Associate Science (AAS) degree programs, providing a streamlined path to completion of traditional academic requirements leading to the baccalaureate degree. It meets students’ professional and personal goals while developing a depth of knowledge and proficiency of skill that translates well to the workplace. However, it is not organized in the same way as a traditional baccalaureate degree. Students planning graduate study should consult with an academic advisor prior to undertaking this degree program.

Admissions & Policies

Admissions

As a prerequisite to enrollment in the BAS, students must have received an Associate of Applied Science (AAS) degree from an accredited two-year institution in an approved area of specialization. Students should review specific Admissions details on the program’s website. (http://bas.gmu.edu)

Policies

For policies governing all undergraduate degrees, see AP5 Undergraduate Policies.

Program Requirements

BAS students must fulfill all requirements for bachelor’s degrees including Mason Core requirements, to include 45 credits of upper-level coursework. All Mason Core requirements must be met with either George Mason courses or transferrable equivalents.

The minimum credit requirement for a bachelor’s degree is 120 credits; however, while there is some variation between concentration areas, fulfilling all Mason Core requirements and an academic concentration is likely to require most BAS students to complete at least 63-66 credits at George Mason, which may lead to over 120 credits of coursework in order to receive the degree.

Admitted BAS students will be academically advised by the appropriate BAS Program concentration Advisor to plan their course of study including completion of the Mason Core, the BAS concentration, and any remaining requirements. See the website (http://bas.gmu.edu) for more information.

The degree plan outlined is based on a student who transfers in a minimum of 30 credits from a completed AAS degree. Some of these credits may count only towards the elective requirement within the BAS degree.

Specific concentrations may have additional policies indicated below.

Requirements

Degree Requirements

Total credits: 120-126

Concentrations are intended to provide focus for the BAS curriculum in an area relevant to the student’s AAS degree while allowing for the breadth of study associated with a liberal arts baccalaureate degree. Please note that determination of current transfer work for these concentrations may impact course requirements.

In addition to satisfying all Mason Core requirements, students must satisfy the requirements for one of the eight concentrations.

Concentrations

• Concentration in Applied Conflict Analysis and Resolution (ACAR)
• Concentration in Cyber Security (CYBS)
• Concentration in Cloud Computing (CCG)
• Concentration in Health, Wellness and Social Services (HWSS)
• Concentration in Human Development and Family Science (HDFS)
• Concentration in Legal Studies (LGLS)
• Concentration in Managerial Leadership (MGL)
• Concentration in Technology and Innovation (TCNV)

Concentration in Applied Conflict Analysis and Resolution (ACAR)

This concentration is in collaboration with the School for Conflict Analysis and Resolution.

CONF 425 Mediating Conflict or foreign language completed at the 202 level. 3

CONF 490 RS: Integration (Mason Core) 3

Electives

In consultation with their advisor, students are required to take 18 credits of concentration coursework; at least 9 credits must be from the CONF department. The concentration list can be found in the catalog or on our website.

Total Credits 42

Electives (variable)

All BAS students are required to complete a minimum of 120 credit hours of coursework. Students will work with their advisor to determine how to fulfill their outstanding credit hours to ensure they have met all major and university requirements. The number of elective credits that a BAS student may have available will vary by concentration and the amount of applicable transfer coursework the student has been awarded.

Concentration in Cyber Security (CYBS)

This concentration is in collaboration with the Volgenau School of Engineering and is only available to students who graduate with an AAS degree in Cyber Security from a partner school. Full admissions requirements can be viewed on the program website (http://bas.gmu.edu).

Students must have a C or better in any course that satisfies a prerequisite for an IT course. To graduate with the BAS with a Cyber Security concentration, students must have a C or better in their core, concentration, and technical focus courses.

Electives (variable)
All BAS students are required to complete a minimum of 120 credit hours of coursework. Students will work with their advisor to determine how to fulfill their outstanding credit hours to ensure they have met all major and university requirements. The number of elective credits that a BAS student may have available will vary by concentration and the amount of applicable transfer coursework the student has been awarded.

Concentration in Cloud Computing (CCG)
This concentration is in collaboration with the School of Business and the Volgenau School of Engineering and is only available to students who graduate with an AAS degree in a related field from a partner school. Full admissions requirements can be viewed on the program website (http://bas.gmu.edu).

To graduate with the BAS with a Cloud Computing concentration, students must have a C or better in their core and concentration courses.

Additional Concentration Requirements
In order to complete the Cloud Computing Concentration, students complete one of the two following areas:

Concentration in Health, Wellness and Social Services (HWSS)
This concentration is in collaboration with the College of Health and Human Services.

To enroll in this concentration, students must have an AAS in one of the following areas:

• Health Information Management
• Hospitality Management, Nutrition Management specialization
• Nursing
• Physical Therapist Assistant
• Respiratory Therapy

Concentration Requirements

1 Other relevant courses may be selected with advisor approval.
The Information Sciences and Technology department offers 1-credit, self-paced, online review courses; ending with an in-class final exam. Students who register for a 1-credit course and successfully pass will receive credit (not a waiver) for the corresponding 3-credit course. Students who are not successful must take the respective course at Mason to meet their degree requirements. Review courses are available as follows:

- for IT 213 Multimedia and Web Design: IT 193 Review of Multimedia and Web Design
- for IT 214 Database Fundamentals: IT 194 Review of Database Fundamentals

Electives (variable)
All BAS students are required to complete a minimum of 120 credit hours of coursework. Students will work with their advisor to determine how to fulfill their outstanding credit hours to ensure they have met all major and university requirements. The number of elective credits that a BAS student may have available will vary by concentration and the amount of applicable transfer coursework the student has been awarded.

Accelerated Master's

Applied Science, BAS Cyber Security Concentration/Digital Forensics, Accelerated MS

Overview
Highly-qualified students in the Applied Science, BAS, Cyber Security Concentration have the option of obtaining an accelerated Digital Forensics, MS.

For more detailed information, see AP.6.7 Bachelor's/Accelerated Master's Degrees. For policies governing all graduate degrees, see AP6 Graduate Policies.

Admission Requirements
Students in the Applied Science, BAS, Cyber Security Concentration (https://catalog.gmu.edu/colleges-schools/interdisciplinary-programs-courses/applied-science-bas-cybs) program may apply for this option if they have earned 90 undergraduate credits with an overall GPA of at least 3.25. Criteria for admission are identical to criteria for admission to the Digital Forensics, MS program.

Accelerated Option Requirements
Students must complete all credits that satisfy requirements for the BAS and MS programs, with 6 credits overlapping with two of the following four courses:

<table>
<thead>
<tr>
<th>Code</th>

</tr>
</tbody>
</table>

Degree Conferral
Students must apply the semester before they expect to complete the BAS requirements to have the BAS degree conferred. In addition, at the beginning of the student’s final undergraduate semester, students must complete a Bachelor’s/Accelerated Master’s Transition form that is submitted to the Office of the University Registrar and the VSE Graduate Admissions Office. At the completion of MS requirements, a master’s degree is conferred.

Design Thinking Minor

Banner Code: DSTH

The Design Thinking Minor is designed flexibly to include courses that may already be in a student’s major. It culminates in a capstone course with a studio format in which students with multi-disciplinary backgrounds collaborate and learn by using the design thinking process to explore problems, prototype solutions, and convey their ideas through effective visual, written, and oral presentations.

Admissions & Policies

Policies
In addition to the required coursework, three courses should be selected from either the list of electives under the Design in the Built Environment Track or the User Experience Design (UXD) Track. Note that the three electives must all belong to one of these two groups.

Eight credits of coursework must be unique to the minor. For policies governing all minors, see AP.5.3.4 Minors.

For policies governing all undergraduate programs, see AP5 Undergraduate Policies.

Smithsonian-Mason School of Conservation

Smithsonian-Mason School of Conservation

1500 Remount Road
Front Royal, VA 22630

Phone: 540-635-0115 (direct)
Website: smconservation.gmu.edu

Administration

- Cody W. Edwards, Executive Director
- Robert Barrett, Assistant Director of Recruitment and Outreach
- Anastasia Triplett, Assistant Director of Budget and Administration

The Smithsonian Institution and George Mason University partnered to establish the Smithsonian-Mason School of Conservation (SMSC) to provide innovative education for current and future generations of global conservation professionals, leaders, and practitioners.

SMSC offers a range of residential, hands-on, interdisciplinary programs in conservation biology for undergraduate and graduate students and professionals on the grounds of SCBI in Front Royal, Virginia. Highly qualified world experts, including Smithsonian scientists, Mason faculty, and colleagues from other U.S. and international conservation organizations, provide students with direct connections to the most current teaching, research techniques, and work in the field.

Undergraduate Program

The Smithsonian-Mason Semester offers undergraduate programs in which students can earn a Conservation Studies Minor (CHSS), or apply credits to certain Mason degrees. There are currently three 16 credit programs: “Conservation, Biodiversity and Society”, “Wildlife Ecology and Conservation”, and “Endangered Species Conservation”. See the Programs of Study section of this catalog for details on the minor and the Courses section for details on the courses (select the course prefix CONS). Grounded in natural science, this interdisciplinary semester brings public policy, sociology, conflict resolution, and global awareness to the learning environment. Students majoring in the Integrative Studies, BS, Biology, BS, Environmental Science, BS, Environmental and Sustainability Studies, BA (CHSS), Applied Science, BAS, and Global Affairs, BA can fulfill major requirements and/or Mason Core requirements with Smithsonian-Mason Semester (CONS) credits subject to college approval.

Graduate Program

Smithsonian-Mason School of Conservation graduate courses offer in-depth explorations of advanced and highly specialized topics in applied conservation studies. Courses cover a diverse selection of topics focusing on biodiversity conservation, ranging from adaptive management to statistics in ecology and conservation, to non-invasive genetic techniques. All current courses take place as intensive one or two-week sessions and participants are in residence on the SMSC grounds in Front Royal, VA.

Although the Smithsonian-Mason School of Conservation does not presently offer a graduate degree, coursework may be applied to George Mason University’s Environmental Science and Policy, MS concentration in Conservation Science and Policy. In many cases, graduate students will have the unique opportunity to learn alongside conservation professionals currently working in the field. The unparalleled resources at the facilities draw researchers and practitioners from around the world, and this offers a rare opportunity for students and professionals to interact to mutual benefit in a hands-on situation and to receive informal mentoring from experienced practitioners.

College Code: PP

The Schar School of Policy and Government prepares undergraduate and graduate students to be leaders who advance the public good in the private, public, and nonprofit sectors. Through research and education in policy, government, and international affairs, Schar allows Mason to more effectively serve the region, Commonwealth, nation, and world.

The Schar faculty combines original research with real-world experience to connect theory and practice for the benefit of students and wider constituencies. The School employs approximately 80 full-time faculty members across a wide range of disciplines, including political science, public administration, international relations, economics, management, geography, engineering, sociology, anthropology, and law. Schar is a major research unit of the University, with approximately $2 million per year in sponsored funding. Schar faculty members frequently advise governments, companies, and non-profit organizations, appear in the national and international media, and participate in public debates on critical issues of the day.

Schar offers two undergraduate majors, eight master’s degree programs, three doctoral programs, and a range of undergraduate minors and graduate certificates. Collectively, these programs enroll approximately 2,000 students. Schar offers classes on Mason’s Fairfax and Arlington campuses, and its faculty members have offices on both campuses.

Undergraduate Programs

Schar offers two degrees for students interested in political science, government, and international relations: a BA in Government and International Politics and a BS in Public Administration. Majors in Government and International Politics take core courses in American political institutions, the political systems of other countries, and international relations. Students can focus their electives to earn a concentration in American institutions and processes, comparative politics, international political economy, international relations, law, philosophy and governance, political analysis, political behavior and identity politics, public policy, or a higher credit concentration in Philosophy, Politics, and Economics (https://ppe.gmu.edu). Majors in public administration and policy take courses in government, management, policy, and administration. Concentrations are offered in administration and management, economic policy analysis, international political economy, nonprofit management, public policy, and US government institutions.

Students have an opportunity to do internships as part of their degree programs, gaining valuable work experience while earning academic credit.

Minors

Schar offers minors in American government, international/comparative studies, international security, legal studies, and public policy and management. In addition, faculty from the School coordinate or participate in the Asia-Pacific and Northeast Asian Studies Minor, Global Systems Minor, Latin American Studies Minor, Middle East Studies Minor, Islamic Studies Minor, and Urban and Suburban Studies Minor. It participates with the Philosophy Department in the Political Philosophy Minor and with the Communications Department in the Political Communication Minor (CHSS).

Bachelor’s/Accelerated Master’s Programs

The School offers qualified undergraduates in any major the opportunity to apply to several accelerated master’s degree programs. If accepted, students may earn both an undergraduate and a graduate degree, sometimes within five years. More information about the degree options and application process may be found here (http://schar.gmu.edu/programs/undergraduate-degrees/accelerated-masters-programs/).

Graduate Programs

Schar offers three doctoral degree programs and eight master’s degree programs, as well as numerous graduate certificate programs. Specific information on each program may be found by clicking the ”Programs” tab at the top of this page.

The Schar School of Policy and Government and the Antonin Scalia Law School offer a joint JD/MPP degree program in law and public policy studies. For more information, go to the website (http://www.law.gmu.edu/academics/degrees/jd_mpp/).

Research Centers

The Schar School of Policy and Government’s research centers focus on a wide range of issues and areas.

Center for Energy Science and Policy

Co-Directors: Richard Kauzlarich, PhD and Paul R. Houser, PhD

This center, a joint initiative of the College of Science and Schar School, provides objective analysis of key issues in the energy field that is grounded in original research. It serves as a center of gravity for the many researchers at George Mason whose work engages them with these issues and connects them with decision-makers in the economy, society, and government.

Center for Global Policy

Director: Jack Goldstone, PhD
This center conducts research on a wide range of global policy issues, including foreign trade, democratization and state-building, and transnational networks. It also analyzes specific policy issues for a variety of government agencies, and develops and serves as the home to several major cross-national databases for global policy.

**Center for Microeconomic Policy Research**  
**Director:** John Earle, PhD  
This center is a forum for policy-relevant research using micro-economic and micro-econometric methods.

**Center for Regional Analysis**  
**Director:** Terry Clower, PhD  
Focusing on economic development in technologically intensive regions, the Center for Regional Analysis (CRA) maintains a corporate technology database for the national capital region. The CRA provides economic forecasting services to government agencies at all levels around the world.

**Center for Science and Technology Policy**  
**Co-Directors:** David M. Hart, PhD and Connie McNeely, PhD  
This center helps facilitate the exchange of information and ideas among the worldwide science, foreign affairs, trade, and technology communities. Areas of emphasis include international trade and science and technology.

**Center for Security Policy Studies**  
**Director:** Ellen Laipson, MA  
Today's security challenges—from proliferation and terrorism to climate change and cyber security—are beyond the scope of any one nation-state to address. Finding solutions requires international and multi-lateral cooperation among regional and global leaders, both state-based and outside the state, including corporate and non-governmental actors. The purpose of the Center for Security Policy Studies is to strengthen global strategic thinking by current and future policy-makers, so as to improve US and global security in the 21st century.

**Center for the Study of International Medical Policies and Practices**  
**Director:** Arnauld Nicogossian, MD  
This center provides leadership and focus on global medical and public health policies and processes, working collaboratively with health, science, and medical organizations in the public and private sectors, and academic organizations to address pressing global policy concerns.

**Center for Transportation Public-Private Partnership Policy**  
**Director:** Jonathan L. Gifford, PhD  
The Center is devoted to advancing the objective consideration of public-private partnerships for transportation system renewal and expansion through research, education and public service. The Center supports development of U.S. and international case studies of P3 projects and programs, analyses of the impact of P3s, sponsors workshops and conferences, and supports graduate students and faculty.

**Michael V. Hayden Center for Intelligence, Policy, and International Security**  
**Director:** Larry Pfeiffer, M.A.  
The threats to global security have rarely ever been so great in scope and number—in such a complex, complicated world, intelligence has never been more vital. The Michael V. Hayden Center for Intelligence, Policy, and International Security at the Schar School for Policy and Government provides for the full examination of intelligence and its interplay with US national security.

**Stephen S. Fuller Institute for Research on the Washington Region’s Economic Future**  
**Director:** Stephen S. Fuller, PhD  
Through consistent monitoring of regional issues and the economy, the institute is able to identify critical conditions and trends impacting the future vitality of the Washington region's economy. Regularly communicating these findings and producing timely research on short- and long-term regional policy options ensure local business and government leaders are equipped with the data needed to make informed decisions regarding the region’s future.

**Terrorism, Transnational Crime and Corruption Center**  
**Director:** Louise I. Shelley, PhD  
The Terrorism, Transnational Crime and Corruption Center (TraCCC) is the first center in the United States devoted to understanding the links among terrorism, transnational crime and corruption. The center teaches, researches and formulates policy on these critical issues. TraCCC accomplishes its mission through international research partnerships engaging in fundamental and applied research projects. Research addresses such diverse concerns as national security, economic development and human rights.

**Faculty**

**School Faculty**  
**Professors**  
Abramson, Acs, Button, Clower, Conlan, Dinan, Dudley, Dueck, Earle, Gifford, Goldstone, Hart, Katz, Malawer, Mandaville, McNeely, Olds, Pfiffner, Regan, Reiner, Rhodes, Root, Rozell, Ruth, Shelley, Singh, Slavov, Thatchenkery, Wan, Wedel

**Associate Professors**  
Anacker, Auerswald, Burt, Butt, Gest, Haddad, Koblenz, Koizumi, Listokin, Lopez-Santana, Marvel, Mayer, McGlinchey, McGrath, Miller, Ouaghram-Gormley, Scherer, Schintler, Sommer, Thrall, Toepler, Victor, Zolnik

**Assistant Professors**  
Berk, Hunzeker, Pham, Terman, Zhang

**Research and Term Faculty**  
Burroughs, Daigle, Deitz, Edner, El Shazli, Hayden, Kauzlarich, Laipson, LaPorte, Martin, Neaves, Nicogossian, Schneider, Shafroth, Srikantia, Stabile, Walker, Wilde

**Requirements & Policies**

**Policies for Undergraduate Students**  
Students should become familiar with the university’s Academic Policies in addition to those specific to each academic unit.

The undergraduate degree consists of coursework in four areas: (a) Mason Core requirements, (b) School requirements for the Schar school, (c) requirements specified for the chosen major, and (d) electives. All students must complete 120 credits, of which at least 45 must
be in upper-level courses (numbered 300 and above). At least one course at the 300 or 400 level must be designated "writing intensive." In Schar, GOVT 490 Synthesis Seminar (Mason Core) or GOVT 491 Honors Seminar (Mason Core) will satisfy this requirement.

The School requirements, (b) above, are the same as the additional requirements for the College of Humanities and Social Sciences. For the BA in Government and International Politics, there is one class in Philosophy or Religion, one additional class in social and behavioral science, one class in non-Western culture, and demonstrated foreign language proficiency at the intermediate level. Students should consult the Mason Core and CHSS requirements page (http://chss.gmu.edu/general-education/all-requirements/) for more detailed information.

All students are responsible for meeting with their academic advisor, and reviewing their transcripts and degree audits regularly to ensure that they are correct and meet all their requirements. Transfer students are encouraged to meet with their academic advisor prior to registering for classes to review their transcripts and course equivalencies. In some cases, students may need to earn more than 120 credits to complete all of their requirements.

Students with questions about exceptions to academic policies and about School requirements should contact Schar Undergraduate Student Services (Research Hall, Room 359; 703-993-1400; gvip@gmu.edu or puad@gmu.edu).

Additional policy information and forms are available on the Schar website (http://schar.gmu.edu/).

Registration
Students are personally responsible for correctly registering for courses and paying all tuition and fees by the official university registration and payment deadlines. All students should verify the accuracy of their enrollment before the end of the official add period.

Academic Load
Students should review AP.1.2 Academic Load.

In order to be considered for a credit overload, students must fulfill all of the following criteria:

- Be in good academic standing
- Have completed the prior semester with a GPA of 2.33 or higher
- Have a cumulative GPA of 2.33 or higher
- Have demonstrated in prior semesters at Mason the ability to handle an increased and demanding courseeload while maintaining high performance
- Have no remaining incompletes (INs) from a previous semester

Freshmen and transfer students in their first semesters are not given permission for overloads as they have yet to establish an academic record at George Mason University.

If approved for an overload, the student is responsible for adding the additional class(es) and paying for the related tuition by the official university deadlines.

Excluded Courses and Credits
At most 3 credits of 100-level Recreation (RECR) activity courses may be taken for general elective credit for an undergraduate degree in the Schar School of Policy and Government.

Only Military Science (MLSC) courses at the 400-level can be used for credit for a degree in the School; credit for other MLSC courses may not be applied toward a degree in the School.

Once matriculated at Mason, students may not take CLEP exams and apply credits from those exams to degrees in the School. Students may apply credits from CLEP exams to degrees in the School only if those credits were awarded and reported prior to admission.

University Consortium
Students should review university policies regarding the University Consortium under Special Registration Procedures in the Academic Policies section of this catalog. Students who have attempted or failed a course at Mason are not permitted to take the equivalent course through the consortium under any circumstances. All consortium registration requests must be submitted to the Schar Undergraduate Student Services office at least 3 weeks prior to the first day of classes for the relevant semester at Mason.

Permission to Study at Another Regionally-Accredited U.S. Institution
Once enrolled in degree status at Mason, students with fewer than 60 hours of transfer coursework (not including registration through the Consortium of Universities of the Washington Metropolitan Area or coursework completed through Mason Study Abroad) may take up to 8 hours of coursework in Schar disciplines at another institution. See the university Permission to Study Elsewhere policy for additional information.

Study Abroad
In order to be considered for study through Mason Study Abroad, students must plan well in advance and receive prior, written permission from the Assistant Dean. Students must also meet all of the following criteria:

- Meet all eligibility requirements for their program as specified by Mason Study Abroad including course prerequisites and minimum GPA.
- Have completed the immediately preceding semester at Mason with a minimum GPA of 2.00.
- Have completed the necessary forms and have obtained all required signatures and course equivalencies.

Students in danger of probation, suspension, or dismissal should plan very carefully before requesting to study abroad. Students who are not in good academic standing will not be permitted to study abroad.

Leave of Absence
All undergraduate students who are planning an absence from George Mason must submit a formal request for Leave of Absence to the Office of the University Registrar. Students do not need to complete the Leave of Absence form if they are participating in a George Mason University sponsored study abroad program or have received permission to study elsewhere.

The maximum time allowed for a Leave of Absence is two years. A new admission application will be required if a Leave of Absence extends beyond two years. If a Leave of Absence form was not submitted, a new admission application will be required if a student misses two graded semesters, excluding the summer term. Re-admission is not guaranteed. See Academic Policies for full university policy.
Withdrawals
Students should review the Withdrawal section in the Academic Policies section of this catalog. Courses for which a withdrawal is approved receive a grade of "W."

Students should be aware of the potential consequences of withdrawing on their academic standing. Although credits graded "W" do not affect a student’s GPA, they do count towards the total attempted hours. The total attempted hours and cumulative GPA together determine a student’s academic standing. These are explained in the Academic Standing section of Academic Policies.

Academic Clemency
Students should review the university policies regarding academic clemency in the Academic Standing section of Academic Policies.

To be considered for clemency, students must meet all of the following criteria:

- Be absent from George Mason for a minimum of three consecutive calendar years.
- Provide a detailed explanation for why they were unsuccessful in those courses and how they have made changes to ensure their academic progress upon their return.
- Submit their request within 12 months of the first day of the re-enrollment term.
- Complete at least 6 credits during their first 12 months back at George Mason.
- Earn a minimum GPA of 2.50 each semester back prior to making the clemency request with no individual grade below 2.00.

If the last three minimum academic requirements are not met, clemency will not be allowed under any circumstances.

Appeals Process
Undergraduate students may appeal decisions concerning academic actions to the Schar Office of Undergraduate Student Services. They may appeal decisions of the Office of Undergraduate Student Services to the Associate Dean. Students may appeal decisions of the Associate Dean to the Associate Provost, Undergraduate Academic Affairs and Programs. Students who feel that the School's appeal process was conducted unfairly may appeal to the Provost's Office as specified in the Academic Policies section of this catalog.

The grade appeal process occurs at the Dean’s Council level as discussed above.

Students should file all appeals in a timely manner, usually within the semester in which the original decision is rendered, but no later than the final day of classes of the following semester.

Second Bachelor's Degree
Students should review the university policies regarding second bachelor's degrees in the Undergraduate Admission Policies and in Academic Policies/Requirements for Undergraduate Programs sections of the catalog. Students pursuing a second bachelor's degree concurrently with their first bachelor's degree at Mason must meet all the additional requirements for the School (see second paragraph of the Policies for Undergraduate Students section) if they differ from the requirements in the School or College of their first major.

Students pursuing a second bachelor's degree in the School after already having received one or more bachelor's degrees are considered to have met all of the Mason Core requirements. Students pursuing a Bachelor of Science degree do not have additional School-level requirements. Students pursuing a Bachelor of Arts degree in the School must complete these additional School-level requirements: one additional 3-credit course each in philosophy or religious studies, in social and behavioral science, and in non-western culture (for a total of 9 credits). They must also demonstrate proficiency in a foreign language through the intermediate level.

Minors
Students may elect to take up to two minors in addition to their major field of study. For policies governing all minors, see the AP5.3.4 Minors section of this catalog. Students interested in earning a minor should complete the appropriate section of the Change/Declaration of Academic Program form and submit it to the Office of the University Registrar. See All about Minors for more information.

Concentration Courses and Minors
Students may elect to declare a concentration, which requires four of their major field electives to be from the same designated field. Students should be aware that minors usually require between 15 and 21 credits of study, at least 8 of which must be applied only to that minor and may not be used to fulfill requirements of the student’s major, concentration, an undergraduate certificate, or another minor.

Honors in the Major
Highly qualified students majoring in Government and International Politics and Public Administration may pursue advanced work leading to graduation with honors in the major. Those students selected for participation in this program take a two-course sequence: GOVT 491 Honors Seminar (Mason Core) and GOVT 496 Directed Readings and Research. To graduate with honors in the major, students must complete these courses with a minimum GPA of 3.50.

Policies for Graduate Students
Students should become familiar with the university's Academic Policies in addition to those specific to each academic unit.

Graduate Student Appeal and Grievance Procedures
Graduate student appeal and grievance procedures are based on George Mason University's honor system. Students are responsible for understanding the provisions of the code described in detail in the Academic Policies section of this catalog and in Schar’s graduate student guides.

Students with grievances should direct them in writing to the Assistant Dean of Admissions and Student Services, who will provide guidance on how to resolve their concerns in accordance with established procedures.

Students may appeal decisions concerning academic actions, including termination. Written appeals must be submitted to the Assistant Dean of Admissions and Student Services. The merit of these appeals will be reviewed by the Dean or Dean’s designate.

Grade appeals are made to the Dean. Students should contact the Associate Dean for Academic Affairs in writing to initiate the process. The Dean's decision is final.

A student who is facing termination from the program for non-academic reasons may appeal the decision to the Dean. This appeal must be in...
writing and must be received within 30 calendar days of the date on the notice of dismissal or termination. The Dean or Dean’s designate will make a final determination. This determination may not be appealed.

### Programs

- American Government Minor
- Biodefense Graduate Certificate
- Biodefense, MS
- Biodefense, PhD
- Emergency Management and Homeland Security Graduate Certificate
- Global Health and Security Graduate Certificate
- Global Systems Minor
- Government Analytics Minor (Schar)
- Government and International Politics, BA
- Illicit Trade Analysis Graduate Certificate (pending SCHEV approval)
- International Commerce and Policy, MA
- International Security Minor
- International Security, MA
- International / Comparative Studies Minor
- Legal Studies Minor
- National Security and Public Policy Graduate Certificate
- Nonprofit Management Graduate Certificate
- Organization Development and Knowledge Management, MS
- Political Communication Minor (Schar)
- Political Science, MA
- Political Science, PhD
- Public Administration, BS
- Public Administration, MPA
- Public Management Graduate Certificate
- Public Policy and Management Minor
- Public Policy, MPP
- Public Policy, PhD
- Science, Technology, and Security Graduate Certificate
- Strategic Trade Graduate Certificate
- Terrorism and Homeland Security Graduate Certificate
- Transportation Policy, Operations, and Logistics, MA
- Urban and Suburban Studies Minor

### American Government Minor

**Banner Code:** AMGV  
**Robert J. McGrath, Associate Professor & Minor Advisor**  
359 Research Hall  
Fairfax Campus

The minor in American government provides students the opportunity to focus on the most relevant features of American government, its institutions, the political behavior of its citizens and leaders, and the defining political questions of our time.

### Admissions & Policies

**Policies**  
Students pursuing this minor must complete 18 credits in government with a minimum grade of C in each course. Eight credits of coursework must be unique to the minor. For policies governing all minors, see AP.5.3.4 Minors.

### Requirements

**Minor Requirements**

- Any course on political institutions: GOVT 301–GOVT 309
- Any course on political behavior GOVT 310–GOVT 319
- Any course from GOVT 409–GOVT 420
- GOVT 344 American Foreign Policy
- GOVT 480 Internship[^1]  

**Total Credits:** 15

[^1]: When topic is relevant, 3 credits of GOVT 480 Internship may be applied to the minor with approval of the minor advisor.

### Biodefense Graduate Certificate

**Banner Code:** PP-CERG-BIOD

**Academic Advising**

560 Founders Hall  
Arlington Campus  
359 Research Hall  
Fairfax Campus

Website: schar.gmu.edu

The certificate provides an interdisciplinary introduction to man-made and natural biological threats, including a background in the science and technology of biodefense and the specialized areas of threat assessment, non-proliferation, and medical and public health preparedness. Students already pursuing a master’s degree in the school may, after admission to a certificate program, in most cases, earn an additional six credits (two courses) in the Schar School to receive a certificate in addition to the master’s degree.

The graduate certificate may be pursued on a part-time or full-time basis.
Admissions & Policies

Admissions

Applicants to all graduate programs must meet the admission standards and application requirements for graduate study as specified in Graduate Admission Policies. Participants must be admitted to a certificate program. Admission requirements are the same as those for the master’s programs and may be found on the Schar admissions website (http://schar.gmu.edu/admissions/).

Policies

For policies governing all graduate certificates, see AP.6.8 Requirements for Graduate Certificates.

Termination from Program

Students admitted to a Schar program will be terminated from the program upon receiving one grade of F and are no longer eligible to take courses in the school. Per university regulation, students are terminated from the university after accumulating grades of F in two courses or 9 credits of unsatisfactory grades in graduate courses. See AP.6.6.2 Academic Termination.

Academic Advising

560 Founders Hall
Arlington Campus

359 Research Hall
Fairfax Campus

Website: schar.gmu.edu

The Master of Science in Biodefense prepares students to become the next generation of biodefense and biosecurity professionals and scholars. This program provides students with a foundation in microbiology and biotechnology combined with a broader security and organizational context.

Admissions & Policies

Admissions

Admission Requirements

Please see Graduate Admissions for information on graduate admission to George Mason University. Specific information on application requirements and deadlines for the Biodefense master’s program may be found on the Schar admissions website (http://schar.gmu.edu/admissions/).

Completed applications for fall and spring semesters are reviewed on a rolling basis, with late applications considered on a space-available basis. Students may be admitted for nondegree study and apply a limited number of credits toward the master’s degree should they choose to apply to the degree program later, in accordance AP.6.4.1 Change from Nondegree Status.

Policies

Academic Policies

Students admitted to a Schar program will be terminated from the Schar school upon receiving one grade of F and are no longer eligible to take courses in the school. Per university regulation, students are terminated from the university after accumulating grades of F in two courses or 9 credits of unsatisfactory grades in graduate courses.

For policies governing all graduate degrees, see AP.6 Graduate Policies.

Requirements

Degree Requirements

Total credits: 36

The schedule of courses that students plan on taking should be approved in an education plan designed by the students and their advisor during
the student's first semester. Students must receive the permission of their advisor to take courses outside of the Biodefense Program.

Core Courses

Students are strongly encouraged to take the core courses as early as possible because they provide the foundation for the rest of the program.

Accelerated Master’s

Bachelor’s Degree (any)/Biodefense, Accelerated MS

Overview

Highly qualified undergraduates in any major may apply to the accelerated Biodefense, MS. If accepted, students will be able to earn a bachelor’s degree in their chosen major and a Biodefense, MS with a reduced number of overall credits and within a reduced time frame, sometimes within five years.

For more detailed information, see AP6.7 Bachelor’s/Accelerated Master’s Degrees. For policies governing all graduate degrees, see AP6 Graduate Policies.

Admission

Please see the Graduate Admissions for general information on graduate admission to George Mason University. Information specific to the accelerated MS program may be found on the Schar website (http://schar.gmu.edu/programs/undergraduate-degrees/accelerated-masters-programs/).

To be considered for this accelerated master’s program, applicants must have completed a minimum of 75 credits and have a minimum GPA of 3.50 in all coursework applied to the degree.

Accelerated Option Requirements

While undergraduate students, accelerated master’s students complete two graduate courses (six credits) that may be counted toward both the bachelor’s and master’s degrees. In addition, students may take another two courses (six credits) to be held as reserve graduate credit and count only toward the master’s degree. The courses are BIOD 604 Emerging Infectious Diseases I: Bacteria and Toxins, GOVT 500 The Scientific Method and Research Design, BIOD 605 Emerging Infectious Diseases II: Viral Agents and BIOD 620 Global Health Security Policy. Students must maintain a minimum GPA of 3.00 in these courses and in coursework applied to their major.

Upon completion and conferral of the undergraduate degree in the semester indicated in the application, students must submit the Bachelor’s/Accelerated Master’s Transition Form to apply credits to the master’s degree. Students must begin their master’s program the semester immediately following conferral of the undergraduate degree (excluding summer).

Biodefense, PhD

Banner Code: PP-PHD-BIOD

Academic Advising

560 Founders Hall
Arlington Campus
359 Research Hall

1 Other courses must be approved by the program advisor. Up to six elective credits may be taken outside of Schar.
George Mason University

This program is designed to prepare students to serve as scholars and professionals in the fields of biodefense and biosecurity. The program integrates knowledge of natural and man-made biological threats with the skills to develop and analyze policies and strategies for enhancing biosecurity. Other areas of biodefense, including nonproliferation, intelligence and threat assessment, and medical and public health preparedness are integral parts of the program.

Admissions & Policies

Admissions

See Graduate Admissions for general information on graduate admission to George Mason University. See the Schar School of Policy and Government Admissions website (http://schar.gmu.edu/admissions/doctorate-admissions/) for application requirements and deadlines. Students are considered for admission for the Fall term only.

Policies

For policies governing all graduate degrees, see AP.6.10 Requirements for Doctoral Degrees.

Reduction of Credit

Students who enter the doctoral program with a master's degree or other graduate credit may have their credit reduced by up to 30 credits, subject to the approval of the program director.

Requirements

Degree Requirements

Total credits: 72

Students are strongly encouraged to take the core courses as early as possible because they provide the foundation for the rest of the program. The courses which students plan to take should be approved in a program of study designed by the student and their advisor during the student's first semester. Students may take up to 12 credits of courses outside of the Biodefense Program with prior written approval of their advisor. Consult with the graduate program director or coordinator for a list of BIOD electives and approved non-BIOD electives that may be used to fulfill some of the requirements below.

A complete description of the program policies, procedures, and requirements is in the PhD student and faculty handbook (https://schar.gmu.edu/current-students/phd-student-services/phd-handbook-forms/), which is published annually.

Qualifying Exam
The purpose of the qualifying exam is to determine if the student is ready to engage in dissertation research. Doctoral students are eligible to take the exam at the conclusion of coursework, provided an approved Degree Plan is on file with Schar. The exam must be completed before the student takes dissertation proposal (BIOD 998 Doctoral Dissertation Proposal).

Advancement to Candidacy
Advancement to candidacy for the doctoral degree occurs when a student has met the coursework requirements, passed the comprehensive qualifying examination, presented and successfully defended a dissertation proposal, and has an approved dissertation committee.

Dissertation Research
Once enrolled in BIOD 998, students in this degree program must maintain continuous registration in BIOD 998 or BIOD 999 each semester (excluding summers) until the dissertation is submitted to and accepted by the University Libraries. Once enrolled in BIOD 999, students must follow the university’s continuous registration policy as specified in AP 6.10.6 Dissertation Registration. Students who defend in the summer must be registered for at least 1 credit of BIOD 999.

Students may apply to this degree a minimum of 3 and a maximum of 6 credits of BIOD 998 and a minimum of 6 and a maximum of 18 credits of BIOD 999. They apply a minimum of 12 and a maximum of 24 dissertation credits (BIOD 998 and BIOD 999 combined) to the degree. Because of the continuous registration policy, students may be required to register for additional credits of these courses.

Before registering in BIOD 999, students must offer a successful public defense of the dissertation proposal. Students must present the results of the dissertation research to their dissertation committee in a seminar and defend their dissertation to the university community. Successful completion of a dissertation is contingent on approval of the dissertation committee and the dean.

Total Credits 12-24
Admissions & Policies

Admissions

Applicants to all graduate programs must meet the admission standards and application requirements for graduate study as specified in the Graduate Admission Policies section of this catalog. Participants must be admitted to a certificate program. Admission requirements are the same as those for the master’s programs and may be found on the Schar admissions web site (http://spgia.gmu.edu/admissions/).

Policies

For policies governing all graduate certificates, see AP.6.8 Requirements for Graduate Certificates.

Termination from Program

Students admitted to a Schar program will be terminated from the program upon receiving one grade of F and are no longer eligible to take courses in the school. Per university regulation, students are terminated from the university after accumulating grades of F in two courses or 9 credits of unsatisfactory grades in graduate courses. See the Academic Policies section of the catalog for additional policies pertaining to graduate students.

Requirements

Global Systems Minor

Banner Code: GLOS

Academic Advising

359 Research Hall
Fairfax Campus

Global systems have become increasingly important to the way we live and work, and a global perspective makes us more aware of how we are connected to others around the world and to the whole of nature.

The interdisciplinary minor in global systems is designed to complement virtually any undergraduate major. It works well for majors in business disciplines, economics, languages, geography, government and international politics, history, and other disciplines that take a global view. Students in professional programs learn to connect their professional concerns to global issues of health care, trade and finance, or technology. Students in the liberal arts gain insights into their disciplines as they learn how the arts, humanities, sciences, and social sciences are affected by global issues such as demographic change, telecommunications, and environmental protection.
Government Analytics Minor (Schar)

Banner Code: GVAN

Dr. Robert McGrath

344 Research Hall

Fairfax Campus

Phone: 703-993-4567
Email: mcgrat2@gmu.edu

Government analytics involves the use of cutting-edge tools of data science and analysis to address political, policy, and governance problems at federal, state, local, and organizational levels. This minor introduces students to the tools and context that are now commonly employed by government entities and agencies, as well as by the non-profit and private sectors. In particular, students will work with canonical programming languages (R and Python) and apply these tools to substantive issues in political science, public administration, and international relations. The minor integrates a technical curriculum with real-world applicability and gives students the flexibility and independence to develop unique expertise and hone research skills. The curriculum also introduces students to issues of copyright and privacy that are integral to ethical government analytics.

Admissions & Policies

Admissions

This minor is available to all Mason undergraduate students.

Policies

Eight credits of coursework must be unique to the minor and students must complete all coursework with a minimum GPA of 2.00. For policies governing all minors, see AP.5.3.4 Minors.

Requirements

Minor Requirements

Total credits: 19-20

Of the total of 19 credits, 9 credits must be unique to minor

Admissions & Policies

Policies
For policies governing all undergraduate degrees, see AP5 Undergraduate Policies.

Program Requirements
Students must fulfill all Requirements for Bachelor’s Degrees including the Mason Core. Students pursuing a BA in Government and International Politics must complete additional requirements for the BA degree in the Schar School of Policy and Government.

Students pursuing this degree must complete 43 credits in GOVT and earn a minimum grade of 2.00 in each course applied to the major.

Requirements

Degree Requirements
Total credits: minimum 120

Students pursuing a BA in Government and International Politics and wishing to narrow their focus may choose to concentrate in one of eight government fields or complete a higher credit concentration in Philosophy, Politics, and Economics.

BA with or without Government Concentration

<table>

Senior Seminar
Select one seminar from the following:

- GOVT 490 Synthesis Seminar (Mason Core)
- GOVT 491 Honors Seminar (Mason Core)

Total Credits: 19

This option is for students who have been accepted to pursue honors in the major.

Government Field Study

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>Select any eight advanced government field courses, with or without a government concentration</td>
<td>24</td>
</tr>
</tbody>
</table>

Total Credits: 24

Students may complete a government concentration (four courses) in one field, then complete any four more advanced government field courses to satisfy this requirement. Students who do not pursue a government concentration may choose 24 credits from the advanced government field courses listed below (with restriction) for a broader learning experience.

Up to three credits of GOVT 399 Research Practicum and GOVT 480 Internship may be used to fulfill the field course requirement with prior advisor approval. Up to six credits of GOVT 480 Directed Readings and Research may be used to fulfill this requirement with prior advisor approval. GOVT 490 Synthesis Seminar (Mason Core) or GOVT 491 Honors Seminar (Mason Core) may not be used to fulfill this requirement.

Advanced government field courses include courses numbered GOVT 301 - GOVT 499.

Concentrations
- Concentration in American Institutions and Processes (AMIP)
- Concentration in Comparative Politics (CPOL)
- Concentration in International Political Economy (IPE)
- Concentration in International Relations (INTR)
- Concentration in Law, Philosophy and Governance (LPGV)
- Concentration in Political Analysis (PA)
- Concentration in Political Behavior and Identity Politics (PBIP)
- Concentration in Public Policy and Administration (PPA)
• Individualized Concentration (IND)
• Concentration in Philosophy, Politics, and Economics (PPE)

<table>

Total Credits 27

Writing-Intensive Requirement

The university requires all students to complete at least one course designated "writing intensive" in their majors. Students majoring in government and international politics may fulfill this requirement by successfully completing GOVT 490 Synthesis Seminar (Mason Core) or GOVT 491 Honors Seminar (Mason Core) in their major programs.

Schar Requirements in Addition to Mason Core Below

Code Title Credits
One course in Philosophy or Religion
One additional course in Social and Behavioral Sciences
One course in Non-Western Culture
Proficiency in a foreign language through the intermediate level

Mason Core

Some Mason Core requirements may already be fulfilled by the major requirements listed above. Students are strongly encouraged to consult their advisors to ensure they fulfill all remaining Mason Core requirements.

Honors

Honors in the Major

Highly qualified students majoring in Government and International Politics and Public Administration may pursue advanced work leading to graduation with honors in the major. Those students selected for participation in this program take a two-course sequence: GOVT 491 Honors Seminar (Mason Core) and GOVT 496 Directed Readings and Research. To graduate with honors in the major, students must complete these courses with a minimum GPA of 3.50.

Accelerated Master's

Bachelor's Degree (any)/Biodefense, Accelerated MS

Overview

Highly qualified undergraduates in any major may apply to the accelerated Biodefense, MS. If accepted, students will be able to earn a bachelor's degree in their chosen major and a Biodefense, MS with a reduced number of overall credits and within a reduced time frame, sometimes within five years.

For more detailed information, see AP.6.7 Bachelor's/Accelerated Master's Degrees. For policies governing all graduate degrees, see AP6 Graduate Policies.

Admission

Please see the Graduate Admissions for general information on graduate admission to George Mason University. Information specific to the accelerated MS program may be found on the Schar website (http://
schar.gmu.edu/programs/undergraduate-degrees/accredited-masters-programs/).

To be considered for this accelerated master’s program, applicants must have completed a minimum of 75 credits and have a minimum GPA of 3.50 in all coursework applied to the degree.

**Accelerated Option Requirements**

While undergraduate students, accelerated master’s students complete two graduate courses (six credits) that may be counted toward both the bachelor’s and master’s degrees. In addition, students may take another two courses (six credits) to be held as reserve graduate credit and count only toward the master’s degree. The courses are BIOD 604 Emerging Infectious Diseases I: Bacteria and Toxins, GOVT 500 The Scientific Method and Research Design, BIOD 605 Emerging Infectious Diseases II: Viral Agents and BIOD 620 Global Health Security Policy. Students must maintain a minimum GPA of 3.00 in these courses and in coursework applied to their major.

Upon completion and conferral of the undergraduate degree in the semester indicated in the application, students must submit the Bachelor’s/Accelerated Master’s Transition Form to apply credits to the master’s degree. Students must begin their master’s program the semester immediately following conferral of the undergraduate degree (excluding summer).

**Bachelor’s Degree (any)/International Security, Accelerated MA**

**Overview**

Highly-qualified undergraduates in any major may apply to the accelerated MA degree program in International Security. If accepted students will be able to earn a bachelor’s degree in their major and an MA in International Security with a reduced number of overall credits and within a reduced time frame, sometimes within five years. More information on bachelor’s/accelerated master’s programs may be found in AP.6.7 Bachelor’s/Accelerated Master’s Degrees.

Students in an accelerated degree program must fulfill all university requirements for the master’s degree. See AP.6.9 Requirements for Master’s Degrees.

**Admission**

Please see Graduate Admission Policies for general information on graduate admission to George Mason University. Specific information on application requirements and deadlines may be found on the Schar admissions website (http://schar.gmu.edu/admissions/).

To be considered for this accelerated master’s program, applicants must have completed a minimum of 75 credits, including at least 12 credits of Government, Economics and/or Global Affairs courses, and have a minimum GPA of 3.50 in all coursework applied to the degree.

**Accelerated Option Requirements**

While undergraduate students, accelerated master’s students complete two graduate courses (six credits) that may be counted toward both the bachelor’s and master’s degrees. In addition, students may take another two courses (six credits) to be held as reserve graduate credit and count only toward the master’s degree. The courses are:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>GOVT 540</td>
<td>International Relations</td>
<td>3</td>
</tr>

<td>PUBP 504</td>
<td>Grand Strategy</td>
<td>3</td>
</tr>
<tr>
<td>PUBP 506</td>
<td>Ethics and the Use of Force</td>
<td>3</td>
</tr>
</tbody>
</table>

Students must maintain a minimum GPA of 3.00 in these courses and in coursework applied to their major.

Upon completion and conferral of the undergraduate degree in the semester indicated in the application, students must submit the Bachelor’s/Accelerated Master’s Transition Form to apply credits to the master’s degree. Students must begin their master’s program the semester immediately following conferral of the undergraduate degree (excluding summer).
Bachelor's Degree (any)/Political Science, Accelerated MA

Overview

Highly-qualified undergraduates in any major may apply to the accelerated MA degree in political science. If accepted, students will be able to earn a bachelor’s degree in their chosen major and a MA in Political Science with a reduced number of overall credits and within a reduced time frame, sometimes five years. More information on bachelor’s accelerated master’s programs may be found in AP.6.7 Bachelor’s/Accelerated Master’s Degrees.

Students in an accelerated degree program must fulfill all university requirements for the master’s degree. See AP.6.9 Requirements for Master’s Degrees.

Admission

See Graduate Admission Policies for general information on graduate admission to George Mason University. Specific information on application requirements and deadlines for the Political Science master’s program may be found on the Schar website (http://schar.gmu.edu/programs/undergraduate-degrees/accelerated-masters-programs/).

To be considered for this accelerated master’s program, applicants must have completed a minimum of 75 credits, including 12 GOVT credits, and have a minimum GPA of 3.50 in all coursework applied to the degree.

Accelerated Option Requirements

While undergraduate students, accelerated master’s students complete two graduate courses (six credits) that may be counted toward both the bachelor’s and master’s degrees. In addition, students may take another two courses (six credits) to be held as reserve graduate credit and count only toward the master’s degree. The courses are chosen from GOVT 500 The Scientific Method and Research Design, GOVT 510 American Government and Politics, GOVT 520 Political Theory, GOVT 530 Comparative Politics, GOVT 540 International Relations. Students must maintain a minimum GPA of 3.00 in these courses and in coursework applied to their major.

Upon completion and conferral of the undergraduate degree in the semester indicated in the application, students must submit the Bachelor’s/Accelerated Master’s Transition Form to apply credits to the master’s degree. Students must begin their master’s program the semester immediately following conferral of the undergraduate degree (excluding summer).

Bachelor’s Degree (any)/Public Administration, Accelerated MPA

Overview

Highly-qualified undergraduates in any major may apply to the accelerated master’s degree in public administration. If accepted, students will be able to earn a bachelor’s degree in their chosen major and a master’s degree in public administration with a reduced number of overall credits and within a reduced time frame, sometimes within five years. See AP.6.7 Bachelor’s/Accelerated Master’s Degrees.

Students in an accelerated degree program must fulfill all university requirements for the master’s degree. For policies governing all graduate degrees, see AP.6 Graduate Policies.

Admission

Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in Graduate Admissions. Information specific to the accelerated MPA program may be found on the Schar website (http://schar.gmu.edu/programs/undergraduate-degrees/accelerated-masters-programs/).

To be considered for this accelerated master’s program, applicants must have completed a minimum of 75 credits, including 12 GOVT credits, and have a minimum GPA of 3.50 in all coursework applied to the degree.

Accelerated Option Requirements

While undergraduate students, accelerated master’s students complete two graduate courses (six credits) that may be counted toward both the bachelor’s and master’s degrees. In addition, students may take another two courses (six credits) to be held as reserve graduate credit and count only toward the master’s degree. The courses are PUAD 502 Administration in Public and Nonprofit Organizations, POGO 511 Introductory Data Analysis for Policy and Government, PUAD 520 Organization Theory and Management Behavior and PUAD 540 Public Policy Process. Students must maintain a minimum GPA of 3.00 in these courses and in coursework applied to their major.

Upon completion and conferral of the undergraduate degree in the semester indicated in the application, students must submit the Bachelor’s/Accelerated Master’s Transition Form to apply credits to the master’s degree. Students must begin their master’s program the semester immediately following conferral of the undergraduate degree (excluding summer).

Bachelor’s Degree (any)/Public Policy, Accelerated MPP

Overview

Highly-qualified undergraduates in any major may apply to the accelerated Master of Public Policy (MPP) program. If accepted students will be able to earn a bachelor’s degree in their chosen major and the Master of Public Policy with a reduced number of overall credits and within a reduced time frame, sometimes within five years. More information on bachelor’s accelerated master’s programs may be found in AP.6.7 Bachelor’s/Accelerated Master’s Degrees (https://catalog.gmu.edu/policies/academic/graduate-policies/#ap-6-7).

Students in an accelerated degree program must fulfill all university requirements for the master’s degree. See AP.6.9 Requirements for Master’s Degrees. (https://catalog.gmu.edu/policies/academic/graduate-policies/#ap-6-9)

Admission

Please see Graduate Admission Policies for general information on graduate admission to George Mason University. Information specific to the accelerated Master of Public Policy program may be found on the Schar website (http://schar.gmu.edu/programs/undergraduate-degrees/accelerated-masters-programs/).

To be considered for this accelerated master’s program, applicants must have completed a minimum of 75 credits, including 12 credits of Government and/or Economics courses, and have a minimum GPA of 3.50 in all coursework applied to the degree.
Accelerated Option Requirements

While undergraduate students, accelerated master’s students complete two graduate courses (six credits) that may be counted toward both the bachelor’s and master’s degrees. In addition, students may take another two courses (six credits) from the following list to be held as reserve graduate credit and count only toward the master’s degree. The student must have a minimum GPA of 3.00 in each course. Students must maintain a minimum GPA of 3.00 in these courses and in coursework applied to their major.

Illicit Trade Analysis Graduate Certificate (pending SCHEV approval)

Banner Code: PP-CERG-ILTA

Note: as of catalog publication in April, the program described below has been approved by the Board of Visitors and sent to the State Council of Higher Education in Virginia for consideration as a new degree program. The university cannot accept applications or enroll students in this program until SCHEV approval has been granted.

Admissions & Policies

Note: as of catalog publication in April, the program described below has been approved by the Board of Visitors and sent to the State Council of Higher Education in Virginia for consideration as a new degree program. The university cannot accept applications or enroll students in this program until SCHEV approval has been granted.

Admissions

Applicants to all graduate programs must meet the admission standards and application requirements for graduate study as specified in Graduate Admission Policies (https://catalog.gmu.edu/admissions/graduate-policies/). Participants must be admitted to a certificate program. Admission requirements are the same as those for the master’s programs and may be found with Schar Admissions (http://schar.gmu.edu/admissions/).

Policies

For policies governing all graduate certificates, see AP6.8 Requirements for Graduate Certificates (https://catalog.gmu.edu/policies/academic/graduate-policies/#ap-6-8).

Termination from Program

Students admitted to a Schar program will be terminated from the program upon receiving one grade of F and are no longer eligible to take courses in the school. Per university regulation, students are terminated from the university after accumulating grades of F in two courses or 9 credits of unsatisfactory grades in graduate courses. For policies governing all graduate degrees, see Graduate Policies (https://catalog.gmu.edu/policies/academic/graduate-policies/).

Requirements

Note: as of catalog publication in April, the program described below has been approved by the Board of Visitors and sent to the State Council of Higher Education in Virginia for consideration as a new degree program. The university cannot accept applications or enroll students in this program until SCHEV approval has been granted.

Certificate Requirements

Total credits: 15

This certificate may be pursued on a part-time basis only.

International Commerce and Policy, MA

Banner Code: PP-MA-ICP

Academic Advising

560 Founders Hall
Arlington Campus

359 Research Hall
Fairfax Campus

Website: schar.gmu.edu

The International Commerce and Policy, MA program (ICP) is an interdisciplinary course of study to help students from around the world prepare for jobs in the new economy. Unlike traditional international affairs programs, the degree is focused on such international economic issues as global trade and investment. The MA in international commerce and policy differs from an MBA program by providing training in the
political, social, and technological aspects of the global economy. In today’s world, it is critical for all participants in global markets to understand the multifaceted environment in which they work.

**Faculty**

The core faculty is augmented by adjunct faculty members who bring a wealth of practical knowledge and experience, as well as strong academic qualifications to the program. Adjuncts are drawn from the U.S. Commerce and State Departments, the Office of the U.S. Trade Representative, and the International Trade Commission, among other government agencies, as well as from the private sector, the think tank community, and trade associations.

**Courses**

Courses are offered primarily in the late afternoon and evening to fit the schedules of busy professionals. In addition to classroom study, the program emphasizes experiential learning by supporting student internships, cooperative education, and research activities with private- and public-sector employers, and sponsoring a variety of study-abroad experiences.

**Admissions & Policies**

**Admissions**

**Applications**

Please see Graduate Admission Policies for general information on graduate admission to George Mason University. Specific information on application requirements and deadlines may be found on the Schar admissions website (http://schar.gmu.edu/admissions/).

Students from all academic backgrounds are welcome to apply; however, some knowledge of economics, preferably through at least two undergraduate economics courses, is encouraged. While many students may have prior educational and work-related training in business and economics, others see the ICP Program as a bridge from government, education, and other non-business occupations to careers in the global economy.

Completed applications for fall and spring semesters are reviewed on a rolling basis, with late applications considered on a space-available basis. Students may be admitted for nondegree study and apply a limited number of credits toward the master’s degree should they choose to apply to the degree program later, in accordance with university policy.

**Policies**

For policies governing all graduate degrees, see AP.6 Graduate Policies.

**Termination from Program**

Students admitted to an Schar graduate program will be terminated from Schar upon receiving one grade of F and are no longer eligible to take courses in Schar. Per university regulation, students are terminated from the university after accumulating grades of F in two courses or 9 credits of unsatisfactory grades in graduate courses.

**Program Requirements**

The ICP Program requires 36 credits of coursework. All degree candidates must take 21 credits of work in required courses. The remaining 15 credits consist of electives that may include internships, independent studies, and study abroad. Upon entering the program students complete core courses first to prepare for higher-level elective coursework.

Accelerated Master’s

Bachelor’s Degree (any)/International Commerce and Policy, Accelerated MA

Overview
Highly-qualified undergraduates in any major may apply to the accelerated MA degree program in International Commerce and Policy. If accepted students will be able to earn a bachelor’s degree in their major and an MA in International Commerce and Policy with a reduced number of overall credits and within a reduced time frame, sometimes within five years. More information on bachelor’s/accelerated master’s programs may be found in AP.6.7 Bachelor’s/Accelerated Master’s Degrees.

Students in an accelerated degree program must fulfill all university requirements for the master’s degree. See AP.6.9 Requirements for Master’s Degrees.

Admission
Please see Graduate Admission Policies for general information on graduate admission to George Mason University. Specific information on application requirements and deadlines may be found on the Schar admissions website (http://schar.gmu.edu/admissions/).

To be considered for this accelerated master’s program, applicants must have completed a minimum of 75 credits, including at least 12 credits of Government, Economics and/or Global Affairs courses, and have a minimum GPA of 3.50 in all coursework applied to the degree.

Accelerated Option Requirements
While undergraduate students, accelerated master’s students complete two graduate courses (six credits) that may be counted toward both the bachelor’s and master’s degrees. In addition, students may take another two courses (six credits) to be held as reserve graduate credit and count only toward the master’s degree. The courses are ITRN 500 Global Political Economy, ITRN 504 Microeconomics and Trade Policy, ITRN 503 Macroeconomic Policy in the Global Economy and ITRN 605 Technology, Culture and Commerce. Students must maintain a minimum GPA of 3.00 in these courses and in coursework applied to their major.

Upon completion and conferral of the undergraduate degree in the semester indicated in the application, students must submit the Bachelor’s/ Accelerated Master’s Transition Form to apply credits to the master’s degree. Students must begin their master’s program the semester immediately following conferral of the undergraduate degree (excluding summer).

International Security Minor

Banner Code: INLS

Academic Advising
359 Research Hall
Fairfax Campus

The world faces a complex range of threats to its security and stability. Some, including war, terrorism and weapons of mass destruction, have been around for a long time. Others, including climate change and cyber conflict, are relatively new. And in today’s increasingly connected world, old threats like pandemic disease and state fragility now take on a new urgency. Using a mix of history, theory and policy analysis, the international security minor prepares students to think critically about these pressing issues.

Faculty
Hunzeker (minor advisor)

Admissions & Policies

Policies
Eight credits of coursework must be unique to the minor and students must complete all coursework with a minimum GPA of 2.00. For policies governing all minors, see AP.5.3.4 Minors.

Requirements

Minor Requirements
Total credits: 18

Students must complete all coursework with a minimum grade of 2.00 in each course.

The program trains early to mid-career professionals who seek the analytical and substantive capabilities to address the security challenges of the 21st century. In addition to understanding the traditional military and diplomatic approaches that characterized the state-centric security framework of the last century, the program’s core courses will provide a firm grounding with regard to public-private and international collaborative responses to emerging and unconventional threats, ranging from transnational crime, terrorism, illicit trade, proliferation of emerging technologies and WMD, and corruption to state fragility and ethnic and sectarian conflict.

Admissions & Policies

Admissions

See Graduate Admission Policies for general information on graduate admission to George Mason University. Specific information on application requirements and deadlines for the MA in International Security program may be found on the Schar admissions website (http://schar.gmu.edu/admissions/).

Completed applications for fall and spring semesters are reviewed on a rolling basis, with late applications considered on a space-available basis. Students may be admitted for nondegree study and apply a limited number of credits toward the master’s degree should they choose to apply to the degree program later, in accordance with university policy.

Policies

Students admitted to a Schar program will be terminated from Schar upon receiving one grade of F and are no longer eligible to take courses in Schar. Per university regulation, students are terminated from the university after accumulating grades of F in two courses or 9 credits of unsatisfactory grades in graduate courses. For additional information, see Graduate Policies.

Accelerated Master’s

Bachelor’s Degree (any)/International Security, Accelerated MA

Overview
Highly-qualified undergraduates in any major may apply to the accelerated MA degree program in International Security. If accepted students will be able to earn a bachelor’s degree in their major and an MA in International Security with a reduced number of overall credits and within a reduced time frame, sometimes within five years. More information on bachelor’s/accelerated master’s programs may be found in AP.6.7 Bachelor’s/Accelerated Master’s Degrees.

Students in an accelerated degree program must fulfill all university requirements for the master’s degree. See AP.6.9 Requirements for Master’s Degrees.

Admission
Please see Graduate Admission Policies for general information on graduate admission to George Mason University. Specific information on application requirements and deadlines may be found on the Schar admissions website (http://schar.gmu.edu/admissions/).

To be considered for this accelerated master’s program, applicants must have completed a minimum of 75 credits, including at least 12 credits of Government, Economics and/or Global Affairs courses, and have a minimum GPA of 3.50 in all coursework applied to the degree.

Accelerated Option Requirements
While undergraduate students, accelerated master’s students complete two graduate courses (six credits) that may be counted toward both the bachelor’s and master’s degrees. In addition, students may take another two courses (six credits) to be held as reserve graduate credit and count only toward the master’s degree. The courses are:

<td>PUBP 504</td>
<td>Grand Strategy</td>
<td>3</td>
</tr>
<tr>
<td>PUBP 506</td>
<td>Ethics and the Use of Force</td>
<td>3</td>
</tr>
</tbody>
</table>

Students must maintain a minimum GPA of 3.00 in these courses and in coursework applied to their major.

Upon completion and conferral of the undergraduate degree in the semester indicated in the application, students must submit the Bachelor’s/Accelerated Master’s Transition Form to apply credits to the master’s degree. Students must begin their master’s program the semester immediately following conferral of the undergraduate degree (excluding summer).
Legal Studies Minor
Banner Code: LGLS

Academic Advising
359 Research Hall
Fairfax Campus

The minor in legal studies focuses on constitutional foundations and interpretations, legal processes, the development of common, statutory, and agency law, and the functions of judicial systems.

Faculty
Walker (minor advisor)

Admissions & Policies

Policies
Eight credits of coursework must be unique to the minor and students must complete all coursework with a minimum GPA of 2.00. For policies governing all minors, see AP5.3.4 Minors.

National Security and Public Policy Graduate Certificate
Banner Code: PP-CERG-NSP

Academic Advising
560 Founders Hall
Arlington Campus
359 Research Hall
Fairfax Campus

Website: schar.gmu.edu

The Schar School of Policy and Government offers certificate programs in conjunction with its master’s programs. Students already pursuing a master’s degree in the school may, in most cases, after admission to a certificate program, earn an additional six credits (two courses) in Schar to receive a certificate in addition to the master’s degree.

The graduate certificate may be pursued on a part-time or full-time basis.

Admissions & Policies

Admissions
Applicants to all graduate programs must meet the admission standards and application requirements for graduate study as specified in Graduate Admission Policies. Participants must be admitted to a certificate program. Admission requirements are the same as those for the master’s programs and may be found with Schar Admissions (http://schar.gmu.edu/admissions/).

Policies
For policies governing all graduate certificates, see AP6.8 Requirements for Graduate Certificates.

Termination from Program
Students admitted to a Schar program will be terminated from the program upon receiving one grade of F and are no longer eligible to take courses in the school. Per university regulation, students are terminated from the university after accumulating grades of F in two courses or 9 credits of unsatisfactory grades in graduate courses. For policies governing all graduate degrees, see Graduate Policies.

Requirements

Certificate Requirements
Total credits: 15

This certificate may be pursued on a full-or part-time basis.

## Nonprofit Management Graduate Certificate

**Banner Code:** PP-CERG-NPMG

### Academic Advising

560 Founders Hall  
Arlington Campus  
359 Research Hall  
Fairfax Campus  

Website: schar.gmu.edu

The Schar School of Policy and Government offers certificate programs in conjunction with its master's programs. Students already pursuing a master's degree in the school may, in most cases, after admission to a certificate program, earn an additional six credits (two courses) in Schar to receive a certificate in addition to the master's degree.

The graduate certificate in nonprofit management may only be pursued on a part-time basis.

### Admissions & Policies

#### Admissions

Applicants to all graduate programs must meet the admission standards and application requirements for graduate study as specified in the Graduate Admission Policies section of this catalog. Participants must be admitted to a certificate program. Admission requirements are the same as those for the master's programs and may be found on the Schar Admissions website (http://schar.gmu.edu/admissions/).

### Policies

For policies governing all graduate certificates, see AP.6.8 Requirements for Graduate Certificates

#### Termination from Program

Students admitted to a Schar program will be terminated from the program upon receiving one grade of F and are no longer eligible to take courses in the school. Per university regulation, students are terminated from the university after accumulating grades of F in two courses or 9 credits of unsatisfactory grades in graduate courses. See AP.6 Graduate Policies for additional policies pertaining to graduate students.

### Requirements

#### Certificate Requirements

Total credits: 15

This certificate may be pursued on a part-time basis only.

Select two electives (6 credits) in the nonprofit area.

1. A list of relevant electives is available under the concentration in nonprofit management in the MPA (master of public administration).

### Organization Development and Knowledge Management, MS

**Banner Code:** PP-MS-ODKM

### Academic Advising

560 Founders Hall  
Arlington Campus  

Website: schar.gmu.edu

The Master of Science in Organization Development and Knowledge Management is an integrated program taught in executive format and designed for professionals who have several years of work experience. Providing conceptual tools and practical guidance to foster organizational change, the program focuses on three related areas: creating and leveraging knowledge through networks of people who communicate and collaborate; understanding and managing change by integrating the diverse roles of people, processes, and technology; and enhancing and facilitating collaboration by building effective relationships in technology-rich environments. A feature of this program is the group-oriented approach to learning supported by the use of
web-based collaborative computer technologies. Students develop the competencies to apply these technologies to make organizations more effective.

The cohort usually completes the program on a part-time basis. Full-time study is also possible by arrangement with the program director.

Students work in teams and complete most of the courses in sequence. The second academic year includes an action learning component, in which participants undertake projects in organizations and apply research methods. Overall, the process and methods of evaluation stress the cumulative development of competencies and the capacity to apply the insights gained. Students are expected to have easy access to a computer and the Internet. Minimum computer specifications can be obtained from the program office.

Admissions & Policies

Admissions

Students are considered for admission for the fall term only.

Please see Graduate Admission Policies for general information on graduate admission to George Mason University. Specific information on application requirements and deadlines may be found on the Schar admissions website (http://schar.gmu.edu/admissions/).

Policies

Students admitted to a Schar program will be terminated from Schar upon receiving one grade of F and are no longer eligible to take courses in Schar. Per university regulation, students are terminated from the university after accumulating grades of F in two courses or 9 credits of unsatisfactory grades in graduate courses.

See AP.6 Graduate Policies for more information.

Political Communication Minor (Schar)

Banner Code: PCOM

Academic Advising

359 Research Hall
Fairfax Campus

The interdisciplinary minor in political communication is offered jointly by the Schar School of Policy and Government and the CHSS Department of Communication.

Political communication explores the interaction among members of the public, the media, advocacy groups, and politicians in democratic society. This minor uses a diverse approach to questions of how mass and interpersonal communication influence democratic functioning, including

1. how political actors use strategic messaging to persuade and mobilize the public
2. how citizens make sense of these messages and their impact on engagement, deliberation, efficacy, knowledge, and participation
3. the role of the mass media in facilitating or hindering this relationship

Political communication includes explicitly political activities like voting and political campaigns. It also encompasses any issue of public debate or deliberation, including culture and social movements.

Faculty

Daigle (minor advisor for Schar)

Admissions & Policies

Admissions

This minor is available to all Mason undergraduate students with the exception of communication majors pursuing a concentration in political communication.
Policies
Eight credits of coursework must be unique to the minor and students must complete all coursework with a minimum GPA of 2.00. A minimum of 6 COMM credits and a minimum of 6 GOVT credits are required. For policies governing all minors, see AP.5.3.4 Minors.

Requirements

Minor Requirements
Total credits: 18
Students should be aware of the specific policies associated with this program, located on the Admissions & Policies tab.

Political Science, MA
Banner Code: PP-MA-POS

Academic Advising
560 Founders Hall
Arlington Campus
359 Research Hall
Fairfax Campus

Website: schar.gmu.edu

The Master of Arts in Political Science program prepares students for advanced work in political science, teaching, and research about government; a career in government and politics; and work in domestic and international nongovernmental organizations.

The program is made up of four core courses in political science and completion of either a concentration in international security or a broader field of specialization in American government and politics, international relations, or comparative politics. Students choosing a specialization have interdisciplinary opportunities to take up to 9 credits in related fields such as history or public policy.

The master’s degree is the first step in an engaging and stimulating career. Students develop a deeper understanding of political ideas and institutions, more sophisticated research skills, a better grasp of the intricacies of governments abroad, and a deeper knowledge of the complexities of international politics. This degree can lead to a career teaching about government; working with legislative bodies, government agencies, and international organizations; or doing research and writing about politics and government.
Admissions & Policies

Admissions
Requirements
See Graduate Admission Policies for general information on graduate admission to George Mason University. Specific information on application requirements and deadlines may be found with Schar Admissions (http://schar.gmu.edu/admissions/).

Completed applications for fall and spring semesters are reviewed on a rolling basis, with late applications considered on a space-available basis. Students may be admitted for non-degree study and apply a limited number of credits toward the master’s degree should they choose to apply to the degree program later, in accordance with university policy.

Policies
Termination from Program
Students admitted to a Schar program will be terminated from Schar upon receiving one grade of F and are no longer eligible to take courses offered by the Schar school. Per university regulation, students are terminated from the university after accumulating grades of F in two courses or 9 credits of unsatisfactory grades in graduate courses. For policies governing all graduate degrees, see Graduate Policies.

Requirements
Degree Requirements
Total credits: 36

Students should develop an education plan with their advisors that lists the courses they plan to take. The plan is approved by the student’s advisor. Students may include courses from other units to complement their field of specialization; they should reflect the ideas, institutions, or processes of contemporary governance.

Students who wish to begin a career in government and politics or to alter their current career path in government and politics are encouraged to take a 3-credit internship in their area of interest. Internships can be arranged through the Schar school.

Select up to two electives.  
Total Credits 0-6

1 The number of electives students have will depend on how many credits they took in the concentration or field of specialization and which electives they choose. Students may take a 3-credit project or a 6-credit thesis. Students choose the remaining credits required for the degree, if any, from other courses in Schar, including an internship, additional courses in the field of specialization, or from course work offered by other units.

3 Credits of Project or 6 Credits of Thesis

A project or thesis is required for the MA in political science. Students who choose to do a project take 3 credits of GOVT 798 Political Science Research Project linked to an advanced specialty course and produce a final research project. Students who choose to do a thesis should be aware of the policies governing theses. They must follow the enrollment policy of the university and, once enrolled in GOVT 799 Political Science Thesis, must maintain continuous enrollment as specified in AP.6.9.3 Master’s Thesis. A thesis director and a committee of two additional faculty members appointed by the school read and approve the thesis. Students should make arrangements for doing a project or thesis with their advisor.

Accelerated Option Requirements

While undergraduate students, accelerated master’s students complete two graduate courses (six credits) that may be counted toward both the bachelor’s and master’s degrees. In addition, students may take another two courses (six credits) to be held as reserve graduate credit and count only toward the master’s degree. The courses are chosen from GOVT 500 The Scientific Method and Research Design, GOVT 510 American Government and Politics, GOVT 520 Political Theory, GOVT 530 Comparative Politics, GOVT 540 International Relations. Students must maintain a minimum GPA of 3.00 in these courses and in coursework applied to their major.

Upon completion and conferral of the undergraduate degree in the semester indicated in the application, students must submit the Bachelor’s/Accelerated Master’s Transition Form to apply credits to the master’s degree. Students must begin their master’s program the semester immediately following conferred undergraduate degree (excluding summer).

Political Science, PhD

Banner Code: PP-PHD-POS

Academic Advising

560 Founders Hall  
Arlington Campus
359 Research Hall  
Fairfax Campus

Website: schar.gmu.edu

The doctoral degree in political science program is designed to prepare students for teaching and conducting research about government, careers in government and politics, and work in domestic and international nongovernmental organizations. The program allows students to combine their academic education with experience in the kinds of complex domestic and international political organizations they are studying. This model for political science education, patterned after the American Political Science Association’s Congressional Fellows Program, is designed to foster scholarship and a firsthand understanding of domestic and international institutions such as think tanks, international bodies, nongovernmental organizations, journals of political opinion, and congressional and executive branch offices.
Admissions & Policies

Admissions

Application Requirements
See Graduate Admission Policies for general information on graduate admission to George Mason University. See Schar Admissions (http://schar.gmu.edu/admissions/) for application requirements and deadlines for the PhD in Public Policy. Students are considered for admission for the Fall term only.

For students who have been admitted with a bachelor’s degree, the Faculty Review Committee will review each student’s progress after 30 credits of coursework to determine whether the student will be allowed to continue their work toward the PhD. For students entering the program with a master’s degree, this review will occur after 12 credits in this program. Students who are not allowed to continue to work toward the PhD will be allowed to complete the MA degree.

Policies

For policies governing all graduate programs, see AP6 Graduate Policies (https://catalog.gmu.edu/policies/academic/graduate-policies/).

Academic Advising
A total of 12 credits of supporting courses may be taken in other departments to fulfill a minority of the credits for any of the requirements below, including the methodology requirement, with prior written approval of the program director. All courses should be planned with an advisor and appear on a program of study, which requires the approval of the program director.

A complete description of the program policies, procedures, and requirements is in the PhD student and faculty handbook (https://schar.gmu.edu/current-students/phd-student-services/phd-handbook-forms/), which is published annually.

Reduction of Credit
For students entering the program with a master’s or MPA degree, the number of credits required for the doctorate may be reduced by up to 30 credits subject to approval of the doctoral program director.

Advancement to Candidacy

To advance to candidacy, students must complete all coursework required by their approved program of study. Students must also successfully complete and pass two comprehensive qualifying exams in major fields. In addition, students must have an approved dissertation committee and must present and successfully defend a dissertation proposal before advancing to candidacy.

Dissertation Research

Once enrolled in GOVT 998 Doctoral Dissertation Proposal, students in this degree program must maintain continuous registration in GOVT 998 Doctoral Dissertation Proposal or GOVT 999 Doctoral Dissertation Research each semester (excluding summers) until the dissertation is submitted to and accepted by the University Libraries. Once enrolled in GOVT 999 Doctoral Dissertation Research, students must follow the university's continuous registration policy as specified in AP.6.10.6 Dissertation Research. Students who defend in the summer must be registered for at least 1 credit of GOVT 999 Doctoral Dissertation Research.

Students may apply to this degree a minimum of 3 and a maximum of 6 credits of GOVT 998 Doctoral Dissertation Proposal and a minimum of 6 credits of GOVT 999 Doctoral Dissertation Research. They apply a minimum of 12 and a maximum of 24 dissertation credits (GOVT 998 Doctoral Dissertation Proposal and GOVT 999 Doctoral Dissertation Research combined) to the degree. Because of the continuous registration policy, students may be required to register for additional credits of these courses.

Students who do fewer than 24 credits of dissertation will complete their degree with additional electives.

Admissions & Policies

For policies governing all undergraduate degrees, see AP5 Undergraduate Policies.

Requirements

Degree Requirements

Total credits: minimum 120

Students must fulfill all Requirements for Bachelor's Degrees including the Mason Core. Students pursuing a BS in Public Administration must complete additional requirements for the BS degree in the Schar School of Policy and Government.

Students must earn a minimum grade of 2.00 in each course applied to the major, including GOVT courses as well as the supporting courses in other disciplines used to fulfill the requirements below. See an advisor before registering.

Core Courses

The math or statistics core course cannot be used to fulfill the Mason Core requirement in quantitative reasoning.

<table>

Total Credits  24

Students may complete a concentration of at least 12 credits in one field to fulfill a concentration. Students who do not wish to pursue a concentration may choose at least 24 credits from any of the advanced public administration courses listed below (with restrictions noted below) for a broader learning experience. Up to three credits of GOVT 399 Research Practicum and GOVT 480 Internship may be used to fulfill the field course requirement with prior advisor approval. Up to six credits of GOVT 399 Directed Readings and Research may be used to fulfill this requirement with prior advisor approval. GOVT 490 Synthesis Seminar (Mason Core) or GOVT 491 Honors Seminar (Mason Core) may not be used to fulfill this requirement.

</tr>
</tbody>
</table>

Total Credits  0-12

Students pursuing a concentration will complete the degree by taking four courses (minimum of 12 credits) within one concentration, chosen from the lists of advanced field courses shown below, to complete a minimum of 24 credits of field courses.

Concentration Areas
- Concentration in Administration and Management (ADMM)
- Concentration in Public Policy (PUBP)
- Concentration in Nonprofit Management (NPMG)
- Concentration in US Government Institutions (USGI)
- Concentration in Economic Policy Analysis (ECPA)
- Concentration in International Political Economy (IPE)
- Individualized Concentration (IND)

</tr>
</tbody>
</table>

### Individualized Concentration (IND)

Create your own concentration consisting of four upper level courses with Director approval.

1 A minimum of two courses in this concentration must be advanced public administration field courses.

### Writing-Intensive Requirement

The university requires all students to complete at least one course designated "writing intensive" in their majors. Students majoring in public administration may fulfill this requirement by successfully completing GOVT 490 Synthesis Seminar (Mason Core) or GOVT 491 Honors Seminar (Mason Core) in their major programs.

### Mason Core

Some Mason Core requirements may already be fulfilled by the major requirements listed above. Students are strongly encouraged to consult their advisors to ensure they fulfill all remaining Mason Core requirements.

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>ECON 309</td>
<td>Economic Problems and Public Policies</td>
<td>3</td>
</tr>
<tr>
<td>ECON 310</td>
<td>Money and Banking</td>

<tr>
<td>ECON 335</td>
<td>Environmental Economics</td>
<td>3</td>
</tr>
<tr>
<td>ECON 355</td>
<td>The Political Economy of Nonprofit Institutions</td>
<td>3</td>
</tr>
</tbody>
</table>

### Foundation Requirements

Written Communication (ENGH 101) | 3
Oral Communication               | 3
Quantitative Reasoning           | 3
Information Technology and Computing | 3

### Exploration Requirements

Arts | 3
Global Understanding             | 3
Literature                        | 3
Natural Science                   | 7
Social and Behavioral Sciences    | 3
Western Civilization/World History | 3

### Integration Requirements

Written Communications (ENGH 302) | 3
Writing-Intensive                  | 3
Synthesis/Capstone                 | 3
Total Credits                      | 40
Most programs include the writing-intensive course designated for the major as part of the major requirements; this course is therefore not counted towards the total required for Mason Core.

Minimum 3 credits required.

### 4-Year Plan

#### Bachelors of Science in Public Administration Sample Plan of Study

The sample plan below is a recommended sequencing of courses based on pre-requisites and scheduling. This may not fit every student's needs and is a guideline, not a requirement. Students should confirm major requirements with their academic advisor and with PatriotWeb Degree Evaluation to ensure they enroll in the proper courses and are on track to graduate.

#### First Year

Total Credits 122

Detailed four year plans and degree planning checklists can be found at https://advising.gmu.edu/current-student/majors-at-mason/.

### Honors

#### Honors in the Major

Highly qualified students majoring in Government and International Politics and Public Administration may pursue advanced work leading to graduation with honors in the major. Those students selected for participation in this program take a two-course sequence: GOVT 491 Honors Seminar (Mason Core) and GOVT 496 Directed Readings and Research. To graduate with honors in the major, students must complete these courses with a minimum GPA of 3.50.

### Accelerated Master's

#### Bachelor's Degree (any)/Biodefense, Accelerated MS

**Overview**

Highly qualified undergraduates in any major may apply to the accelerated Biodefense, MS. If accepted, students will be able to earn a bachelor's degree in their chosen major and a Biodefense, MS with a reduced number of overall credits and within a reduced time frame, sometimes within five years.

For more detailed information, see AP.6.7 Bachelor’s/Accelerated Master's Degrees. For policies governing all graduate degrees, see AP6 Graduate Policies.

**Admission**

Please see the Graduate Admissions for general information on graduate admission to George Mason University. Information specific to the accelerated MS program may be found on the Schar website (http://schar.gmu.edu/programs/undergraduate-degrees/accelerated-masters-programs/).

To be considered for this accelerated master's program, applicants must have completed a minimum of 75 credits and have a minimum GPA of 3.50 in all coursework applied to the degree.

**Accelerated Option Requirements**

While undergraduate students, accelerated master's students complete two graduate courses (six credits) that may be counted toward both the bachelor's and master's degrees. In addition, students may take another two courses (six credits) to be held as reserve graduate credit and count only toward the master's degree. The courses are BIOD 604 Emerging Infectious Diseases I: Bacteria and Toxins, GOVT 500 The Scientific Method and Research Design, BIOD 605 Emerging Infectious Diseases II: Viral Agents and BIOD 620 Global Health Security Policy. Students must maintain a minimum GPA of 3.00 in these courses and in coursework applied to their major.
Upon completion and conferral of the undergraduate degree in the semester indicated in the application, students must submit the Bachelor’s/Accelerated Master’s Transition Form to apply credits to the master’s degree. Students must begin their master’s program the semester immediately following conferral of the undergraduate degree (excluding summer).

Bachelor’s Degree (any)/International Security, Accelerated MA

Overview
Highly-qualified undergraduates in any major may apply to the accelerated MA degree program in International Security. If accepted, students will be able to earn a bachelor’s degree in their major and an MA in International Security with a reduced number of overall credits and within a reduced time frame, sometimes within five years. More information on bachelor’s/accelerated master’s programs may be found in AP.6.7 Bachelor’s/Accelerated Master’s Degrees.

Students in an accelerated degree program must fulfill all university requirements for the master’s degree. See AP.6.9 Requirements for Master’s Degrees.

Admission
Please see Graduate Admission Policies for general information on graduate admission to George Mason University. Specific information on application requirements and deadlines may be found on the Schar admissions website (http://schar.gmu.edu/admissions/).

To be considered for this accelerated master’s program, applicants must have completed a minimum of 75 credits, including at least 12 credits of Government, Economics and/or Global Affairs courses, and have a minimum GPA of 3.50 in all coursework applied to the degree.

Accelerated Option Requirements
While undergraduate students, accelerated master’s students complete two graduate courses (six credits) that may be counted toward both the bachelor’s and master’s degrees. In addition, students may take another two courses (six credits) to be held as reserve graduate credit and count only toward the master’s degree. The courses are:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>GOVT 540</td>
<td>International Relations</td>
<td>3</td>
</tr>
<tr>
<td>POGO 511</td>
<td>Introductory Data Analysis for Policy and Government</td>
<td>3</td>
</tr>
<tr>
<td>PUBP 504</td>
<td>Grand Strategy</td>
<td>3</td>
</tr>
<tr>
<td>PUBP 506</td>
<td>Ethics and the Use of Force</td>
<td>3</td>
</tr>
</tbody>
</table>

Students must maintain a minimum GPA of 3.00 in these courses and in coursework applied to their major.

Upon completion and conferral of the undergraduate degree in the semester indicated in the application, students must submit the Bachelor’s/Accelerated Master’s Transition Form to apply credits to the master’s degree. Students must begin their master’s program the semester immediately following conferral of the undergraduate degree (excluding summer).

Bachelor’s Degree (any)/International Commerce and Policy, Accelerated MA

Overview
Highly-qualified undergraduates in any major may apply to the accelerated MA degree program in International Commerce and Policy. If accepted, students will be able to earn a bachelor’s degree in their major and an MA in International Commerce and Policy with a reduced number of overall credits and within a reduced time frame, sometimes within five years. More information on bachelor’s/accelerated master’s programs may be found in AP.6.7 Bachelor’s/Accelerated Master’s Degrees.

Students in an accelerated degree program must fulfill all university requirements for the master’s degree. See AP.6.9 Requirements for Master’s Degrees.

Admission
Please see Graduate Admission Policies for general information on graduate admission to George Mason University. Specific information on application requirements and deadlines may be found on the Schar admissions website (http://schar.gmu.edu/admissions/).

To be considered for this accelerated master’s program, applicants must have completed a minimum of 75 credits, including at least 12 credits of Government, Economics and/or Global Affairs courses, and have a minimum GPA of 3.50 in all coursework applied to the degree.

Accelerated Option Requirements
While undergraduate students, accelerated master’s students complete two graduate courses (six credits) that may be counted toward both the bachelor’s and master’s degrees. In addition, students may take another two courses (six credits) to be held as reserve graduate credit and count only toward the master’s degree. The courses are ITRN 500 Global Political Economy, ITRN 504 Microeconomics and Trade Policy, ITRN 503 Macroeconomic Policy in the Global Economy and ITRN 605 Technology, Culture and Commerce. Students must maintain a minimum GPA of 3.00 in these courses and in coursework applied to their major.

Upon completion and conferral of the undergraduate degree in the semester indicated in the application, students must submit the Bachelor’s/Accelerated Master’s Transition Form to apply credits to the master’s degree. Students must begin their master’s program the semester immediately following conferral of the undergraduate degree (excluding summer).

Bachelor’s Degree (any)/Political Science, Accelerated MA

Overview
Highly-qualified undergraduates in any major may apply to the accelerated MA degree in political science. If accepted, students will be able to earn a bachelor’s degree in their chosen major and a MA in Political Science with a reduced number of overall credits and within a reduced time frame, sometimes five years. More information on bachelor’s/accelerated master’s programs may be found in AP.6.7 Bachelor’s/Accelerated Master’s Degrees.

Students in an accelerated degree program must fulfill all university requirements for the master’s degree. See AP.6.9 Requirements for Master’s Degrees.
Introduction

See Graduate Admission Policies for general information on graduate admission to George Mason University. Specific information on application requirements and deadlines for the Political Science master’s program may be found on the Schar website (http://schar.gmu.edu/programs/undergraduate-degrees/accelerated-masters-programs/).

To be considered for this accelerated master’s program, applicants must have completed a minimum of 75 credits, including 12 GOVT credits, and have a minimum GPA of 3.50 in all coursework applied to the degree.

Accelerated Option Requirements

While undergraduate students, accelerated master’s students complete two graduate courses (six credits) that may be counted toward both the bachelor’s and master’s degrees. In addition, students may take another two courses (six credits) to be held as reserve graduate credit and count only toward the master’s degree. The courses are PUAD 502 Administration in Public and Nonprofit Organizations, POGO 511 Introductory Data Analysis for Policy and Government, PUAD 520 Organization Theory and Management Behavior and PUAD 540 Public Policy Process. Students must maintain a minimum GPA of 3.00 in these courses and in coursework applied to their major.

Upon completion and conferral of the undergraduate degree in the semester indicated in the application, students must submit the Bachelor’s/Accelerated Master’s Transition Form to apply credits to the master’s degree. Students must begin their master’s program the semester immediately following conferral of the undergraduate degree (excluding summer).

Bachelor’s Degree (any)/Public Policy, Accelerated MPP

Overview

Highly-qualified undergraduates in any major may apply to the accelerated Master of Public Policy (MPP) program. If accepted students will be able to earn a bachelor’s degree in their chosen major and the Master of Public Policy with a reduced number of overall credits and within a reduced time frame, sometimes within five years. More information on bachelor’s/accelerated master’s programs may be found in AP.6.7 Bachelor’s/Accelerated Master’s Degrees (https://catalog.gmu.edu/policies/academic/graduate-policies/#ap-6-7).

Students in an accelerated degree program must fulfill all university requirements for the master’s degree. See AP.6 Requirements for Master’s Degrees. (https://catalog.gmu.edu/policies/academic/graduate-policies/#ap-6-9)

Admission

Please see Graduate Admission Policies for general information on graduate admission to George Mason University. Information specific to the accelerated Master of Public Policy program may be found on the Schar website (http://schar.gmu.edu/programs/undergraduate-degrees/accelerated-masters-programs/).

To be considered for this accelerated master’s program, applicants must have completed a minimum of 75 credits, including 12 credits of Government and/or Economics courses, and have a minimum GPA of 3.50 in all coursework applied to the degree.

Accelerated Option Requirements

While undergraduate students, accelerated master’s students complete two graduate courses (six credits) that may be counted toward both the bachelor’s and master’s degrees. In addition, students may take another two courses (six credits) to be held as reserve graduate credit and count only toward the master’s degree. The courses are PUAD 502 Administration in Public and Nonprofit Organizations, POGO 511 Introductory Data Analysis for Policy and Government, PUAD 520 Organization Theory and Management Behavior and PUAD 540 Public Policy Process. Students must maintain a minimum GPA of 3.00 in these courses and in coursework applied to their major.

Fairfax Campus

Website: schar.gmu.edu

The Master of Public Administration (MPA) is designed for people who hold or aspire to hold leadership positions in organizations that participate in the development and implementation of public policy. The mission of the MPA program is to give graduate students the opportunity to build their knowledge of politics, public policy and management and to enhance their analytic, problem solving, and communication skills.

MPA students at Mason have the research and cultural resources of the Washington, D.C. area at their disposal. Government agencies representing all levels in the U.S. federal system are located close to the campus, as are the National Archives, the Library of Congress, and the Smithsonian Institution. Another benefit is the wide range of internship opportunities available in governmental and nonprofit organizations. The MPA Program regularly has internship invitations from national, state, and local government organizations, as well as from nonprofit organizations whose principal work is at the local, state, national, or international levels. Many of these internships are paid positions.

MPA courses are held at the Fairfax and the Arlington campuses during the week and on the weekend in an accelerated format.

Admissions & Policies

Admissions

Requirements

See Graduate Admission Policies for general information on graduate admission to George Mason University. Specific information on application requirements and deadlines may be found with Schar Admissions (http://schar.gmu.edu/admissions/).

Completed applications for fall and spring semesters are reviewed on a rolling basis, with late applications considered on a space-available basis. Students may be admitted for nondegree study and apply a limited number of credits toward the master’s degree should they choose to apply to the degree program later, in accordance with university and school policy.

Requirements

Degree Requirements

Total credits: 36-39

The required courses emphasize the development of knowledge about public policy and management, as well as analytical problem-solving and communication skills, and third-party governance. Through these courses, students develop a shared knowledge base and skill set. The elective courses can be used by students to focus their knowledge and skill development within one concentration. Alternatively, the electives can be used to extend the breadth of study with courses drawn from a variety of concentrations or from other departments and schools across the university.

Total Credits  12

1 Students may take their electives within one of the concentrations which follow. As an alternative, with the approval of their advisor, students may select their electives from several concentrations or fields. Students not pursuing a concentration may select electives from Schar course offerings.

Concentrations

Students may declare only one concentration. PUAD 794 Internship and POGO 796 Directed Readings and Research may be applied to a concentration where content is appropriate and with prior written approval of the student’s advisor. Other courses may also be applied to a concentration with prior written approval of the advisor.

### Accelerated Master's

**Bachelor's Degree (any)/Public Administration, Accelerated MPA**

**Overview**

Highly-qualified undergraduates in any major may apply to the accelerated master’s degree in public administration. If accepted, students will be able to earn a bachelor’s degree in their chosen major and a master's degree in public administration with a reduced number of overall credits and within a reduced time frame, sometimes within five years. See AP.6.7 Bachelor’s/Accelerated Master’s Degrees.

Students in an accelerated degree program must fulfill all university requirements for the master’s degree. For policies governing all graduate degrees, see AP6 Graduate Policies.

**Admission**

Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in Graduate Admissions. Information specific to the accelerated MPA program may be found on the Schar website (http://schar.gmu.edu/programs/undergraduate-degrees/accelerated-masters-programs/).

To be considered for this accelerated master’s program, applicants must have completed a minimum of 75 credits, including 12 GOVT credits, and have a minimum GPA of 3.50 in all coursework applied to the degree.

**Accelerated Option Requirements**

While undergraduate students, accelerated master’s students complete two graduate courses (six credits) that may be counted toward both
the bachelor’s and master’s degrees. In addition, students may take another two courses (six credits) to be held as reserve graduate credit and count only toward the master’s degree. The courses are PUAD 502 Administration in Public and Nonprofit Organizations, POGO 511 Introductory Data Analysis for Policy and Government, PUAD 520 Organization Theory and Management Behavior and PUAD 540 Public Policy Process. Students must maintain a minimum GPA of 3.00 in these courses and in coursework applied to their major.

Upon completion and conferral of the undergraduate degree in the semester indicated in the application, students must submit the Bachelor’s/Accelerated Master’s Transition Form to apply credits to the master’s degree. Students must begin their master’s program the semester immediately following conferral of the undergraduate degree (excluding summer).

Website: schar.gmu.edu

The Schar School of Policy and Government offers certificate programs in conjunction with its master’s programs. Students already pursuing a master’s degree in the school may, in most cases, after admission to a certificate program, earn an additional six credits (two courses) in Schar to receive a certificate in addition to the master’s degree. Students must begin their master’s program the semester immediately following conferral of the undergraduate degree (excluding summer).

The graduate certificate in public management may only be pursued on a part-time basis.

Admissions & Policies

Admissions

Applicants to all graduate programs must meet the admission standards and application requirements for graduate study as specified in Graduate Admission Policies. Participants must be admitted to a certificate program. Admission requirements are the same as those for the master’s programs and may be found on the Schar admissions website (http://schar.gmu.edu/admissions/).

Policies

For policies governing all graduate certificates, see AP.6.8 Requirements for Graduate Certificates.

Termination from Program

Students admitted to a Schar program will be terminated from that program upon receiving one grade of F and are no longer eligible to take courses in the school. Per university regulation, students are terminated from the university after accumulating grades of F in two courses or 9 credits of unsatisfactory grades in graduate courses. For policies governing all graduate degrees, see Graduate Policies.

Requirements

Certificate Requirements

Total credits: 15

This certificate may be pursued on a part-time basis only.

Fairfax Campus

Website: schar.gmu.edu

The master of public policy leads to a degree for aspiring or experienced professionals who seek career advancement through cutting-edge education and training in policy analysis and development in increasingly technical and global environments. The program prepares students to be reflective practitioners who develop, implement, manage, analyze, evaluate, and effect innovative change in the public and private sectors through a course of study that emphasizes the fundamentals of policy development; the role of technology, analytic assessment, and modeling for policy evaluation; and the implications of international and global perspectives on policy formation. Courses are offered primarily in late afternoon and evening to fit the schedules of busy professionals.

Admissions & Policies

Admissions

Requirements

See Graduate Admission Policies for general information on graduate admission to George Mason University. Specific information on application requirements and deadlines may be found with Schar Admissions (http://schar.gmu.edu/admissions/). Completed applications for fall and spring semesters are reviewed on a rolling basis, with late applications considered on a space-available basis. Students may be admitted for nondegree study and apply a limited number of credits toward the master’s degree should they choose to apply to the degree program later, in accordance with university policy.

Policies

Termination from Program

Students admitted to a Schar program will be terminated from Schar upon receiving one grade of F and are no longer eligible to take courses in Schar. Per university regulation, students are terminated from the university after accumulating grades of F in two courses or 9 credits of unsatisfactory grades in graduate courses. For policies governing all graduate degrees, see Graduate Policies.

Program Requirements

Students must complete 36 to 39 credits of coursework through a combination of core courses, electives, and a professional experience requirement. Appropriate professional experience can be demonstrated through previous employment or a supervised internship. Students will also be exposed to the global nature of public policy activity through the core requirement of international comparative policy assessment.

Accelerated Master's Bachelor's Degree (any)/Public Policy, Accelerated MPP
Overview
Highly-qualified undergraduates in any major may apply to the accelerated Master of Public Policy (MPP) program. If accepted students
will be able to earn a bachelor's degree in their chosen major and the Master of Public Policy with a reduced number of overall credits and within a reduced time frame, sometimes within five years. More information on bachelor's/accelerated master's programs may be found in AP.6.7 Bachelor's/Accelerated Master's Degrees (https://catalog.gmu.edu/policies/academic/graduate-policies/#ap-6-7).

Students in an accelerated degree program must fulfill all university requirements for the master's degree. See AP.6.9 Requirements for Master's Degrees. (https://catalog.gmu.edu/policies/academic/graduate-policies/#ap-6-9)

**Admission**

Please see Graduate Admission Policies for general information on graduate admission to George Mason University. Information specific to the accelerated Master of Public Policy program may be found on the Schar website (http://schar.gmu.edu/programs/undergraduate-degrees/accelerated-masters-programs/).

To be considered for this accelerated master's program, applicants must have completed a minimum of 75 credits, including 12 credits of Government and/or Economics courses, and have a minimum GPA of 3.50 in all coursework applied to the degree.

**Accelerated Option Requirements**

While undergraduate students, accelerated master's students complete two graduate courses (six credits) that may be counted toward both the bachelor's and master's degrees. In addition, students may take another two courses (six credits) from the following list to be held as reserve graduate credit and count only toward the master's degree. The student must have a minimum GPA of 3.00 in each course. Students must maintain a minimum GPA of 3.00 in these courses and in coursework applied to their major.

<table>

</tr>
</tbody>
</table>

Upon completion and conferral of the undergraduate degree in the semester indicated in the application, students must submit the Bachelor's/Accelerated Master's Transition Form to apply credits to the master's degree. Students must begin their master's program the semester immediately following conferral of the undergraduate degree (excluding summer).

**Public Policy, PhD**

**Banner Code:** PP-PHD-PUBP

**Academic Advising**

560 Founders Hall
Arlington Campus

359 Research Hall
Fairfax Campus

Website: schar.gmu.edu

This doctoral degree in public policy is distinctive in its heavy emphasis on the combined influence of technology, culture, and institutions on public policy. Students investigate the increasing tensions created by technologically driven organizational change. This doctoral program prepares its graduates to assume positions of significant responsibility in academia, government, and the private and public sectors. With a focus on analytical and research-based approaches to public policy, our students seek to understand the underlying determinants of public policy choices, analyze and improve the implementation of policy, and identify and assess new opportunities to address emerging issues.

To investigate the policy issues associated with substantive policy areas, students develop in-depth understanding of American institutions, values, and culture; competence in research methods and advanced analytical methodologies; and a comparative, international perspective. At the time of admission, each student is assigned a faculty advisor who assists in the design and development of the student's program.

**Admissions & Policies**

**Admissions**

See Graduate Admission Policies for general information on graduate admission to George Mason University. See Schar Admissions (http://schar.gmu.edu/admissions/) for application requirements and deadlines for the PhD in Public Policy. Students are considered for admission for the Fall term only.

**Policies**

For policies governing all graduate degrees, see AP.6.10 Requirements for Doctoral Degrees (https://catalog.gmu.edu/policies/academic/graduate-policies/#ap-6-10).

**Program Requirements**

Students are required to complete a minimum of 80 credits of graduate coursework, of which no more than 12 may be dissertation credits. Specific coursework requirements include four foundational core courses, one semester of participation in the research colloquium (public policy seminar), two advanced methodology courses, three courses in an area of program specialization, and three advanced courses tailored to the student's research needs and interests. Courses are determined in collaboration with the student's advisor and are drawn widely not only from Schar, but also from other programs at Mason.

At the completion of core skills coursework (Stage One), students must pass a qualifying exam that evaluates mastery of the first year's material, as well as the ability to integrate that material when addressing important and complex public policy problems and issues. Students must then develop their research areas through specialized coursework, and pass a field exam structured around their specific field of proposed doctoral research (Stages Two and Three). Other requirements include the successful preparation and defense of a doctoral research proposal and the ensuing dissertation (Stage Four).

A complete description of the program policies, procedures, and requirements is in the PhD student and faculty handbook (https://schar.gmu.edu/current-students/phd-student-services/phd-handbook-forms/), which is published annually.
Reduction of Credit

Students who enter the doctoral program with a master's degree or other graduate credit may have their credit reduced by up to 30 credits, subject to the approval of the program director.

Prerequisites: Methodological and Substantive Foundations

PhD students are required to have competence in the following three areas, either by taking these courses or by proving competence through a placement exam or evidence of previous relevant coursework.

Prerequisite courses will not count as part of the 80 credit requirement.

Pass the comprehensive Qualifying Exam

Total Credits: 15

Stage Two - Policy Fields and Skills

After passing the qualifying exam, students assemble a Field Research Committee. By the end of their third semester, full-time students (fourth semester for part-time) must choose a chair for their Field Committee.

By the start of their fourth semester, full-time students (fifth semester for part-time) must submit to the chair of their Field Committee a plan for their Field of Study. The Field of Study Plan will describe a proposed research area, including citations relevant to current research in that field; four relevant field courses; and the names of faculty who will be involved. The plan must be approved by both the student’s Field Committee chair and the program director.

Stage Three - Research Foundations

In Stage Three, students take coursework approved in the Field of Study Plan.

The Field of Study must include one advanced methods course from the approved list for the doctoral program, or be approved in writing by the Field Committee Chair and Doctoral Program Director. Where appropriate courses are not available from Schar School, students may petition the Director of the PhD program for substitute courses to count for their Field of Study Plan.

Students are expected to complete coursework before taking PUBP 998 credits. A student may take no more than six credits of PUBP 998 before completing a field of study plan and having it approved by three Graduate Faculty members.

The Schar School of Policy and Government offers certificate programs in conjunction with its master’s programs. Students already pursuing a master’s degree in the school may, in most cases, after admission to a certificate program, earn an additional six credits (two courses) in Schar to receive a certificate in addition to the master’s degree. The certificate in science, technology, and security provides an introduction to the intersection of science and security, covering topics such as the technology of CBRN weapons, proliferation, technical countermeasures, and the role of science and technology in the policy-making process.

The graduate certificate in science, technology, and security may be pursued on a part-time or full-time basis.

Admissions & Policies

Admissions

Applicants to all graduate programs must meet the admission standards and application requirements for graduate study as specified in Graduate Admission Policies. Participants must be admitted to a certificate program. Admission requirements are the same as those for the master’s programs and may be found on the Schar admissions website (http://schar.gmu.edu/admissions/).

Policies

For policies governing all graduate certificates, see AP.6.8 Requirements for Graduate Certificates.

Termination from Program

Students admitted to a Schar program will be terminated from that program upon receiving one grade of F and are no longer eligible to take courses in the school. Per university regulation, students are terminated from the university after accumulating grades of F in two courses or 9 credits of unsatisfactory grades in graduate courses. For policies governing all graduate degrees, see Graduate Policies.

The Schar School offers certificate programs in conjunction with its master’s programs. Students already pursuing a master’s degree in the school may, in most cases, after admission to a certificate program, earn an additional six credits (two courses) in Schar to receive a certificate in addition to the master’s degree. The certificate in terrorism and homeland security is an interdisciplinary introduction to the phenomenon of modern terrorism and its implications for US domestic and foreign policy. It focuses on multidisciplinary analysis and holistic cross-sectorial approaches to long-term prevention of and response to terrorism.

The graduate certificate may only be pursued on a part-time basis.

Admissions 
Applicants to all graduate programs must meet the admission standards and application requirements for graduate study as specified in Graduate Admission Policies. Participants must be admitted to a certificate program. Admission requirements are the same as those for the master’s programs and may be found on the Schar admissions website (http://schar.gmu.edu/admissions/).

Transportation Policy, Operations, and Logistics, MA

Banner Code: PP-MA-TPOL

Academic Advising

560 Founders Hall
Arlington Campus
359 Research Hall
Fairfax Campus

Website: schar.gmu.edu

The Master of Arts in Transportation Policy, Operations, and Logistics (TPOL) program is designed for students and practicing professionals engaged in planning, regulating, managing, and operating transportation facilities and services. Students obtain a working knowledge of the theory, policy, law, research, and practices required to effectively and efficiently supply and operate transportation facilities and services. They also learn to think critically and analytically about the problems and challenges in this field and communicate their analyses clearly and effectively through written and oral presentations.

Admissions & Policies

Admissions

Requirements

See Graduate Admission Policies for general information on graduate admission to George Mason University. Specific information on application requirements and deadlines may be found with Schar Admissions (http://schar.gmu.edu/admissions/).

Completed applications for fall and spring semesters are reviewed on a rolling basis, with late applications considered on a space-available basis. Students may be admitted for nondegree study and apply a limited number of credits toward the master’s degree should they choose to apply to the degree program later, in accordance with university policy.

Policies

Termination from Program

Students admitted to a Schar program will be terminated from Schar upon receiving one grade of F and are no longer eligible to take courses in Schar. Per university regulation, students are terminated from the university after accumulating grades of F in two courses or 9 credits of unsatisfactory grades in graduate courses. For policies governing all graduate degrees, see Graduate Policies.

- Agnieszka Paczynska, MS Program Director
- Mara Schoeny, Undergraduate and Graduate Certificate Program Director

College Code: CA

The School for Conflict Analysis and Resolution (S-CAR), is committed to the development of theory, research, and practice that interrupt cycles
of violence. The school community includes scholars, graduate and undergraduate students, alumni, practitioners, and organizations in the field of peace making and conflict resolution. Building on the strengths of our four research centers, field-based courses, and faculty with expertise from over a dozen disciplines, earning a degree at S-CAR will take you to the epicenter of conflict and prepare you for a meaningful career.

Recognized in 1997 as a Commonwealth Center of Excellence by the Virginia Legislature, S-CAR is committed to serving our students, faculty and staff, our local community, our global mission, and the field of Conflict Analysis and Resolution. S-CAR is a leader in George Mason University’s commitment to be a University for the world, leveraging our long history of engagement in research and intervention in real world problems and our strength in preparing our graduates to productively engage in our local and global challenges. S-CAR strives to break down the silos of domestic and international conflict research and practice with teaching, research and practice that cut across levels of conflict.

Our world class faculty has published foundational texts on such topics as culture, social identity, narrative, religion, history and education, gender, and peacebuilding and consciousness. As scholar-practitioners, their projects and teaching engage them around the globe, including in the Middle East, Africa, the Caucasus, and here in the United States.

We offer a full complement of degree programs: Bachelor’s, Master’s, Graduate Certificate, and Doctoral degrees that develop students’ ability to engage with theory and build their own practice.

**Undergraduate Programs**

**Bachelor’s Degrees and Minors**
Conflict Analysis and Resolution offers students a BA, BS, and two minors in an interdisciplinary social science field with practical applications. The minors are in Conflict Analysis and Resolution or Sport and Conflict Resolution. The field of conflict analysis and resolution analyzes the sources and dynamics of conflict and the means for resolution toward lasting peace. Conflict resolution students take a series of core courses that provide a background in conflict theory, analysis, and conflict resolution skills. All conflict analysis and resolution majors also choose an area of concentration. There are six concentrations: Building Peace in Divided Societies, Global Engagement, Political and Social Action, Justice and Reconciliation, Interpersonal Dynamics, and Collaborative Leadership. After selecting a concentration, students choose courses from units throughout the university that relate to the concentration and their areas of interest. The major also requires three credits of field experience in the form of an internship, independent research, or study abroad.

**Bachelor’s/Accelerated Master’s**

**Bachelor’s/Accelerated Master’s**
The School offers qualified undergraduates the opportunity to apply to the accelerated master’s degree program. If accepted, students will earn both an undergraduate and a graduate degree after satisfactory completion of 147 credits, sometimes within 5 years. More information about the degree options and application process may be found here (http://scar.gmu.edu/undergraduate/degrees/accelerated-masters/).

**Graduate Programs**

**PhD Program**
The PhD program in Conflict Analysis and Resolution, the first of its kind in the United States, provides advanced study for students in the fields of conflict and conflict resolution. Students are prepared for careers as researchers, theoreticians, and teachers in higher education, and as policy administrators, analysts, and consultants in the public and the private sectors. The program stresses a close link between knowledge of theory and process in the resolution of conflict. For this, training in the methods of research and analysis is emphasized. In addition, students are expected to obtain a background in a substantive area of conflict, usually related to the topic of the dissertation.

**MS Program**
The MS in Conflict Analysis and Resolution is a professional program that prepares students for practice and further academic work by integrating conflict analysis and resolution theory, research, and practical techniques. Participants study the theory, methods, and ethical perspectives of the field, and apply this knowledge in laboratory simulations and workshops, internships, and field practice. Graduates work in a variety of settings where conflict resolution is useful and interest groups are in conflict with current and emergent public policy. Examples are businesses, unions, government agencies, religious groups, court systems, educational institutions, community centers, international relief and development organizations, and consulting firms.

**Graduate Certificates**
S-CAR offers a graduate certificate in Mass Atrocity and Genocide Prevention and a graduate certificate in Conflict Analysis and Resolution. The Conflict Analysis and Resolution certificate offers four concentrations: Advanced Skills; Collaborative Community Action; Prevention and Reconstruction Contexts; and World Religions and Peacebuilding. Each of these 15-credit programs is specifically tailored to provide students with practical knowledge of conflict analysis and resolution relevant to their focused areas of work. Designed for mid-career professionals studying in a cohort environment, the certificate programs integrate conflict analysis and resolution theory, research, and practical techniques. These programs use intensive course sessions, lecture, seminar, and applied mentored learning in real and simulated situations to prepare students to use conflict analysis and resolution approaches in their work in a variety of fields.

Requirements & Policies

Policies

Students should become familiar with the university’s general academic policies in addition to those specific to each academic unit. See the Academic Policies.

Policies specific to each academic program can be found listed in each program’s catalog listing.

Appeal of Decisions

The policies of the School for Conflict Analysis and Resolution are designed to be consistent, equitable, and transparent. Our office strives to be thorough, timely, and open to answer any questions students may have regarding our decisions and/or the process through which they were reached. Students seeking clarification and explanation of the decision should request an appointment with the appropriate Program Director to discuss their concerns.

Students have the right to appeal decisions regarding requests for academic actions. This step can only be taken after a request to meet with the Program Director. Students who wish to pursue an appeal after this meeting should do so only if they can provide sufficient and compelling reasons for their initial claim to be reconsidered. Such reasons include newly available documentation, proof of an irregularity in procedures, proof of inequity or inconsistency, or consequences so serious that further review is warranted. A student’s dissatisfaction or disagreement with the decision does not constitute sufficient reason for a decision to be changed. Appeals are first reviewed by the Program Director. If denied, the appeal is forwarded to the Dean. The decision of the Dean is the final decision of the School.

If the appeal is a case involving a school-level policy, the Dean serves as the final point of appeal. If the appeal involves university level policies, students must first complete the school-level appeal process before appealing to the Provost’s Office.

- Peacebuilding, MA (pending SCHEV approval)
- Sport and Conflict Resolution Minor (SCAR)

Conflict Analysis and Resolution Graduate Certificate
Banner Code: CA-CERG-CONF

This 15-credit certificate is specifically tailored to provide students with practical knowledge of conflict analysis and resolution relevant to their focused areas of work. Designed for mid-career professionals studying in a cohort environment, the certificate programs integrate conflict analysis and resolution theory, research, and practical technique. These programs use intensive course sessions, lecture, seminar, and applied mentorship in real and simulated situations to prepare students to use conflict analysis and resolution approaches in their work in a variety of fields. Students choose one of four concentrations.

This certificate may only be pursued on a part-time basis, unless a student is concurrently enrolled in another degree program or takes additional courses over those required for the certificate program. Some courses are offered only in intensive Saturday and Sunday formats or online.

Concentrations

Advanced Skills

The Advanced Skills concentration covers conflict resolution skills in challenging conflicts and considers innovative and emerging practices. This concentration considers the complexity of conflict in a variety of different settings and prepares students to design and implement interventions for difficult conflicts. The concentration emphasizes skill development.

Prevention and Reconstruction Contexts

The Prevention and Stabilization Contexts concentration augments development, defense, security, or humanitarian aid work experience with the theories and skills of conflict analysis and resolution for designing, implementing, and evaluating conflict-sensitive initiatives internationally in areas of potential violence and post-conflict reconstruction and stabilization. Considers cross-sectoral approaches to long-term violence prevention and constructive conflict resolution.

World Religions and Peacebuilding

The World Religions and Peacebuilding concentration considers strategies to reduce global violence and terrorism by incorporating the best moral practices of religious communities into policy planning, diplomacy, civil society building and democratization. Covers strategies to elicit moderate moral religious expression in conflict regions to strengthen civil society and democracy.

Collaborative Community Action

All communities have conflicts, some much more severe than others, often driven by deep racial and ethnic divisions, economic inequity, complex intractable problems, and environmental degradation. Many community conflicts are triggered by changes, whether a new law or new development. These are among the many issues that effective, inclusive, collaborative community processes can help address. This concentration incorporates theory and skills needed to identify concerns and design collaborative processes that employ a wide range of design options ranging from small group dialogue to facilitated consensus building and online engagement to thousand person town meetings.
Admissions & Policies

Admissions
Requirements
Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in Graduate Admissions. Applicants to this certificate must submit an undergraduate transcript showing completion of an undergraduate degree or equivalent, a cover letter specifying interest in the program, two letters of recommendation, and a curriculum vitae or résumé indicating relevant work experience.

In addition, prior work experience in areas related to the chosen graduate certificate is desirable. GRE or other standardized test scores are not required but may be submitted. The TOEFL is required of international students. For more information, see Admission of International Students.

Policies
For policies governing all graduate certificates, see AP.6.8 Requirements for Graduate Certificates.

Class Schedule
Please note that some classes for this graduate certificate are offered only in Saturday and Sunday sessions. Please check the Schedule of Classes for each term to identify course meeting dates, and specific add/drop dates for these partial semester courses.

### Conflict Analysis and Resolution Minor

**Banner Code: CONF**

This minor provides students with the theory and skills to examine how and why conflicts occur and what can be done to mitigate their destructive aspects while reinforcing their constructive potential. Courses in the minor highlight relational, social, structural, and cultural factors that influence conflict and its resolution. This minor engages students in understanding the complexity of contemporary issues and problems and can be applied to many fields of study or professional careers.

**Advising**

Advisors help students create a course of study that meets their interests and career goals. All majors and minors are strongly encouraged to meet regularly with an academic advisor from the School who will help students develop and follow a coherent plan of study and complete the degree in a timely manner.

**Admissions & Policies**

**Admissions**

This minor is open to all undergraduate students.

**Policies**

Students pursuing this minor must complete 15 credits of coursework in conflict analysis and resolution with a minimum GPA of 2.00. Eight credits of coursework must be unique to the minor. For policies governing all minors, see AP 5.3.4 Minors.

### Conflict Analysis and Resolution, BA

**Banner Code: CA-BA-CONF**

The world is becoming increasingly connected and the ability to create and maintain cross-cultural connections is more important than ever. As the effects of violence and conflict are felt throughout the global community, we are seeing more and more opportunities for collaboration, problem solving, and peacebuilding in local communities and across international barriers. To prepare our students to make cross-cultural connections, Bachelor's of Arts in Conflict Analysis and Resolution students must demonstrate intermediate level proficiency in a foreign language.

#### Concentrations

All conflict analysis and resolution majors choose an area of concentration from the following:

- Building Peace in Divided Societies
- Global Engagement
- Political and Social Action
- Justice and Reconciliation
- Interpersonal Dynamics
- Collaborative Leadership

**Advising**

School for Conflict Analysis and Resolution advisors help students create an interdisciplinary course of study that meets their interests and career goals. All majors are strongly encouraged to meet regularly with an academic advisor from the School who will help students develop
and follow a coherent plan of study and complete the degree in a timely manner.

Admissions & Policies

Policies
For policies governing all undergraduate degrees, see AP5 Undergraduate Policies.

Major Coursework Grade Requirement
Students cannot use more than 12 credits of coursework within the major with a C- or D grade to count towards the Conflict Analysis and Resolution, BA. If a student receives C- or D grades in excess of the allowed number, they may retake courses to meet the major coursework grade requirement for graduation. Students taking a graduate course for undergraduate credit must achieve a grade of B- or higher for graduate course credits to count towards their undergraduate degree.

Transfer Students
For policies governing admission and requirements for students transferring from another college or university, see Undergraduate Admission Policies - Transfer.

Admitted and enrolled transfer students who have completed an AA, AS, or AAS degree from the Virginia Community College System (VCCS) and have been offered admission to Mason by the Office of Admissions may be eligible for a waiver of all George Mason University’s Mason Core requirements in accordance with the Guaranteed Admission Agreement. Students eligible for this waiver are still required by the university to complete ENGH 302 Advanced Composition (Mason Core) and a synthesis course.

Transfer students who have been offered admission under the terms of the Guaranteed Admission Agreement and are pursuing a BA are considered to have met all school requirements except for proficiency in a foreign language.

Students with a bachelor’s degree from an accredited institution who are pursuing a BA in this school are considered to have met all school requirements except for proficiency in a foreign language.

Requirements

Degree Requirements
Total credits: 120

Students must fulfill all requirements for bachelor’s degrees as stated in Academic Policies including all Mason Core requirements. Students majoring in Conflict Analysis and Resolution must also complete the college-level requirements for foreign language proficiency as well as 51 major requirement credits for the BA degree.

Students pursuing a double major/degree with a program outside of the S-CAR undergraduate program will be expected to fulfill all of the Mason Core and college requirements necessary to complete the second major. Please check with the second major department concerning additional requirements.

Total Credits 27

Field Experience
Students can choose to fulfill this requirement through an internship, service learning, study abroad, or independent study.

Students may not be approved for field experience until they have earned at least 30 credits. It is recommended that students complete at least nine credits of conflict coursework before applying for field experience credit. Prior departmental approval is required for students to receive credit through any field experience options. Students interested in trips with S-CAR can find information here (https://scar.gmu.edu/academics/undergraduate/study-abroad/). Students interested in study abroad through the Global Education Office can find information here (https://studyabroad.gmu.edu). Please contact an S-CAR advisor with questions or for information on the opportunities, policies, and procedures for field experience credit.

Courses may NOT double count for the concentration requirement and the skills and practice requirement.

Concentrations
There are seven concentrations.

Concentrations
• Concentration in Building Peace in Divided Societies (BPDS)
• Concentration in Global Engagement (GLBE)
• Concentration in Political and Social Action (PSA)
• Concentration in Justice and Reconciliation (JRCN)
• Concentration in Interpersonal Dynamics (INTD)
• Concentration in Collaborative Leadership (CLDR)
• Concentration in Individualized Concentration (IND)

To fulfill the concentration requirement students select six concentration courses. Four of those six courses must be taken from within their chosen concentration. The remaining two concentration courses may be taken from any of the concentration course lists. Special topics courses relevant to the concentration and/or courses that provide regional expertise can be substituted with departmental approval. Students are encouraged to check special topics courses each semester and think creatively about which courses support learning in their chosen concentration. At least two of the six concentration courses must be taken in residence. CONF 397 Study Abroad Special Topics and courses transferred from another institution do not fulfill this requirement. Courses may not double count for the concentration requirement and the skills and practice requirement.

Concentration in Building Peace in Divided Societies (BPDS)
Focuses on how divided societies with a history of conflict seek to transform relationships and situations of violence and injustice. Examines communities and societies that have experienced conflict and how individuals and groups build peace locally and globally.

Concentration in Global Engagement (GLBE)
Focuses on studying the dynamics and impact of global conflict resolution. Examines domestic and international dimensions of security, state-to-state conflict, internal wars, terrorism, migration, negotiation, and diplomacy. Explores what can be done to reduce violent conflict and increase peace and security.

### Individualized Concentration (IND)

Students interested in creating their own concentration can work with an advisor to decide upon a set of at least six courses that form a cohesive theme and will fulfill the requirements of the BA in Conflict Analysis and Resolution. Individualized concentrations must be approved by the Director of the Undergraduate Program.

### BA in Conflict Analysis and Resolution without Concentration

Students may opt to complete their major in Conflict Analysis and Resolution without a concentration. The department offers many elective courses that allow students to deepen their understanding of theory and practice within the field of Conflict Resolution. Students may choose this option and complete the conflict resolution Core and 18 credits of conflict coursework selected from the following. These credits may not be used to also fulfill the skills and practice or field experience requirements.

<table>

Foreign Language Proficiency

Students must demonstrate intermediate-level proficiency in one foreign language. This requirement may be fulfilled by successfully completing a foreign language course numbered 202 or higher. Students may also fulfill this requirement by achieving a satisfactory score on a university approved foreign language proficiency test. Students who are already proficient in a second language may be eligible for a waiver of this requirement.

Writing-Intensive Requirement

All Mason students are required to complete at least one course designated as "writing intensive" in their major at the 300-level or above. CONF 302 Culture, Identity, and Conflict has been designated "writing intensive."

Electives

<table>

Bachelor of Arts in Conflict Analysis and Resolution Sample Plan of Study

The sample plan below is a recommended sequencing of courses based on pre-requisites and scheduling. This may not fit every student's needs and is a guideline, not a requirement. Students should confirm major requirements with their academic advisor and with PatriotWeb Degree Evaluation to ensure they enroll in the proper courses and are on track to graduate.

Detailed four year plans and degree planning checklists can be found at [https://advising.gmu.edu/current-student/majors-at-mason/](https://advising.gmu.edu/current-student/majors-at-mason/).

Conflict Analysis and Resolution, BA or BS/Conflict Analysis and Resolution, Accelerated MS

**Overview**

This accelerated Master’s option is designed for highly qualified and motivated undergraduate students that have completed at least 6 credit hours of CONF coursework at the time of application. If accepted, students may take up to 12 credits of graduate coursework before undergraduate degree conferral and will be able to earn an undergraduate degree and the Conflict Analysis and Resolution, MS after satisfactory completion of at least 147 credits. The time period for the combined program is typically five years. It provides a streamlined MS application process with no additional application fee.

For more detailed information, see AP.6.7 Bachelor’s/Accelerated Master’s Degrees. For policies governing all graduate degrees, see AP.6 Graduate Policies.

**Application Requirements**

For specific application requirements and information for the accelerated Conflict Analysis and Resolution, see Eligibility, Policies, and Deadlines (http://scar.gmu.edu/undergraduate/degrees/accelerated-masters/). Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in Graduate Admissions.

Students must have a minimum undergraduate cumulative GPA of 3.25 at the time of application.

**Accelerated Master’s Requirements**

- During the first semester in senior status admitted students may take up to 6 credits (1-2 classes) that will count towards both their undergraduate AND graduate degrees. During the second semester of senior status, students may take up to 6 credits (1-2 classes) that will count towards the graduate degree only.
- Students must begin their master’s program the semester immediately following conferral of the undergraduate degree and will be expected to complete all remaining graduate program requirements within five years.
- See the program website (https://scar.gmu.edu/academics/undergraduate/accelerated-masters/) for additional information.

**Accelerated MS Requirements**

- No grade below a B is permitted for any undergraduate or graduate CONF course taken after application to the accelerated master’s program until completion of the undergraduate program.
- If a student receives a grade below a B in any CONF course after acceptance in the program, they will not be allowed to continue on to the master’s program. Students that have received a grade below a B in a CONF course after acceptance into the program may re-apply to the master’s program after conferral of the undergraduate degree; however, re-application does not guarantee admission.
- At the time of the undergraduate degree conferral, students’ GPAs must meet the standard required for admission to the master’s degree.
- Students may not take more than 12 credits a semester if taking two graduate courses or 15 credits a semester if taking one graduate course.

Bachelor’s Degree (selected)/Interdisciplinary Studies, Accelerated MAIS (Religious Studies Concentration)

**Overview**

Highly-qualified undergraduates in selected majors (see below) may apply to the accelerated master’s degree in interdisciplinary studies with a concentration in religious studies. If accepted, and depending on their undergraduate major, students will be able to earn a bachelor’s degree in their chosen major and a master’s in interdisciplinary studies with a concentration in religious studies after satisfactory completion of 150
credits, sometimes within five years. See AP.6.7 Bachelor’s/Accelerated Master’s Degrees.

Students in an accelerated degree program must fulfill all university requirements for the master’s degree. For policies governing all graduate degrees, see AP.6 Graduate Policies.

Selected Majors
- Art history
- Philosophy
- Conflict analysis and resolution
- Global affairs
- History
- Religious studies
- Russian and Eurasian studies
- Sociology
- Anthropology

If the student has not majored in religious studies, it is preferred, though not required, that the student have a minor in religious studies.

Application Requirements
Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in the Admissions. For information specific to the accelerated MAIS, see Application Requirements and Deadlines (http://mais.gmu.edu/programs/la-mais-isin/application/).

Accelerated Option Requirements
While undergraduate students, accelerated master’s students complete two graduate courses as indicated on their Accelerated Master’s Program Application with a minimum grade of B in each course. Once admitted to the accelerated master’s pathway, students must maintain a minimum cumulative GPA of 3.25 in all coursework. Upon completion and conferral of the undergraduate degree in the semester indicated in the application, they submit the Bachelor’s/Accelerated Master’s Transition Form and are admitted to graduate status.

Code | Title                                                                 | Credits |
-----|----------------------------------------------------------------------|---------|
RELI 600 | Interdisciplinary Pathways in the Study of Religion             | 6       |

RELI 636 | Religion and the Natural Environment                                  |         |
RELI 637 | Religion and Secularity in State and Society                          |         |

Total Credits 6

The ability to take courses, including ones not listed above, for reserve graduate credit is available to all high achieving undergraduates with the permission of the department. Permission is normally granted only to qualified Mason seniors within 15 hours of graduation. See AP.1.4.4 Graduate Course Enrollment by Undergraduates.

Bachelor’s Degree (selected)/Interdisciplinary Studies, Accelerated MAIS (Social Justice and Human Rights Concentration)

Overview
Highly-qualified undergraduates in select majors (listed below) may apply to the accelerated master’s degree in Interdisciplinary Studies with a concentration in Social Justice and Human Rights. If accepted, and depending on their undergraduate major, students will be able to earn an undergraduate degree in their chosen major and a master’s in Interdisciplinary Studies with a concentration in Social Justice and Human Rights after satisfactory completion of 150 credits, sometimes within five years.

For more detailed information, see AP.6.7 Bachelor’s/Accelerated Master’s Degrees. For policies governing all graduate degrees, see AP.6 Graduate Policies.

Selected Majors

Application Requirements
Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in Graduate Admissions. For information specific to the accelerated MAIS, see Application Requirements and Deadlines (http://mais.gmu.edu/programs/la-mais-isin/application/) on the departmental web site.
Accelerated Option Requirements

While undergraduate students, accelerated master’s students complete INTS 540 Contemporary Issues in Social Justice Human Rights and one course chosen from the list of electives for the MAIS concentration in Social Justice and Human Rights as indicated on their Accelerated Master’s Program Application with a minimum grade of B in each course. Once admitted to the accelerated master’s pathway, students must maintain a minimum cumulative GPA of 3.25 in all coursework. Upon completion and conferral of the undergraduate degree in the semester indicated in the application, they submit the Bachelor’s/Accelerated Master’s Transition Form and are admitted to graduate status.

As graduate students, accelerated master’s students have an advanced standing. They must meet all master’s degree requirements except for the two courses (6 credits) they completed as undergraduates. Students must begin their master’s program the semester immediately following conferral of the undergraduate degree.

Reserve Graduate Credit

Students may take up to 6 additional graduate credits as reserve graduate credit (chosen from the list of electives for the MAIS concentration in social justice and human rights). These credits do not apply to the undergraduate degree. The ability to take courses for reserve graduate credit is available to all high achieving undergraduates with the permission of the department. Permission to take a graduate course for reserve graduate credit is normally granted only to Mason seniors within 15 hours of graduation. See AP.1.4.4 Graduate Course Enrollment by Undergraduates.

Bachelor's Degree (selected)/Interdisciplinary Studies, Accelerated MAIS (Women and Gender Studies Concentration)

Overview

Highly-qualified undergraduates in select majors may apply to the accelerated master’s degree in interdisciplinary studies with a concentration in women and gender studies. If accepted, and depending on their undergraduate major, students will be able to earn a bachelor’s degree in their chosen major and a master’s degree in interdisciplinary studies with a concentration in women and gender studies after satisfactory completion of 150 credits, sometime within five years.

For more detailed information, see AP.6.7 Bachelor’s/Accelerated Master’s Degrees. For policies governing all graduate degrees, see AP.6 Graduate Policies.

Selected Majors

Application Requirements

Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in Graduate Admissions. For information specific to the accelerated MAIS, see the departmental web site (http://mais.gmu.edu/programs/la-mais-isin/application/).

Accelerated Option Requirements

While undergraduate students, accelerated master’s students complete two graduate courses as indicated on their Accelerated Master’s Program Application with a minimum grade of B in each course. Once admitted to the accelerated master’s pathway, students must maintain a minimum cumulative GPA of 3.25 in all course work. Upon completion and conferral of the undergraduate degree in the semester indicated in the application, they submit the Bachelor’s/Accelerated Master’s Transition Form and are admitted to graduate status.

Conflict Analysis and Resolution, BS

Banner Code: CA-BS-CONF

Analytical skills and techniques are critical to solving the world’s toughest problems. In order to solve conflict we must first understand it. Critical thinking and research skills are the focus of our Bachelor of Science program and are in demand by employers of all sectors. Students pursuing a Bachelor’s of Science in Conflict Analysis and Resolution
develop research skills and have the opportunity to gain experience designing surveys, conducting interviews, analyzing statistics, and organizing data.

All conflict analysis and resolution majors choose an area of concentration:

• Building Peace in Divided Societies
• Global Engagement
• Political and Social Action
• Justice and Reconciliation
• Interpersonal Dynamics
• Collaborative Leadership

Advising
Advisors help students create an interdisciplinary course of study that meets their interests and career goals. All majors are strongly encouraged to meet regularly with an academic advisor from the School who will help students develop and follow a coherent plan of study and complete the degree in a timely manner.

Admissions & Policies

For policies governing all undergraduate degrees, see AP.5 Undergraduate Policies.

Major Coursework Grade Requirement
Students cannot use more than 12 credits of coursework within the major with a C- or D grade to count towards the Conflict Analysis and Resolution, BS. If a student receives C- or D grades in excess of the allowed number, they may retake courses to meet the major coursework grade requirement for graduation. Students taking a graduate course for undergraduate credit must achieve a grade of B- or higher for graduate course credits to count towards their undergraduate degree.

Transfer Students
For policies governing admission and requirements for students transferring from another college or university, see Undergraduate Admission Policies - Transfer.

Admitted and enrolled transfer students who have completed an AA, AS, or AA&S degree from the Virginia Community College System (VCCS) and have been offered admission to Mason by the Office of Admissions may be eligible for a waiver of all George Mason University’s Mason Core requirements in accordance with the Guaranteed Admission Agreement. Students eligible for this waiver are still required by the university to complete ENGH 302 Advanced Composition (Mason Core) and a synthesis course.

Requirements

Degree Requirements
Total credits: 120

Students must fulfill all requirements for bachelor’s degrees as stated in Academic Policies including all Mason Core requirements. S-CAR majors must complete the 6 credit college-level requirement in research methods as well as 51 major requirement credits for the BS degree.

Students pursuing a double major/degree with a program outside of the S-CAR undergraduate program will be expected to fulfill all of the Mason Core and college requirements necessary to complete the second major. Please check with the second major department concerning additional requirements.

Total Credits 27

Field Experience

Students can choose to fulfill this requirement through an internship, service learning, study abroad, or independent study.

Students may not be approved for field experience until they have earned at least 30 credits. It is recommended that students complete at least 9 credits of conflict coursework before applying for field experience credit. Prior departmental approval is required for students to receive credit through any field experience options. Students interested in trips with S-CAR can find information here (https://scar.gmu.edu/field-experience/). Students interested in study abroad through the Global Education Office can find information here (http://studyabroad.gmu.edu). Please contact an S-CAR advisor with questions or for information on the opportunities, policies, and procedures for field experience credit.

Select a minimum of three credits from the following:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>CONF 370</td>
<td>Internship Field Experience</td>
<td>3</td>

<td>3</td>
</tr>
</tbody>
</table>

Total Credits 3

Skills and Practice

This three credit requirement can be fulfilled by taking

1. an additional 3 credits of field experience, OR
2. a foreign language course at the 250 level or higher, OR
3. one 3 credit course or three 1 credit courses from the following:
Conflict Analysis and Resolution, BS

Select one of these 3 credit courses:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>CONF 325</td>
<td>Dialogue and Difference</td>
<td>3</td>

Total Credits 6

Concentrations

There are seven concentrations:

- Concentration in Building Peace in Divided Societies (BPDS)
- Concentration in Global Engagement (GLBE)
- Concentration in Political and Social Action (PSA)
- Concentration in Justice and Reconciliation (JRCN)
- Concentration in Interpersonal Dynamics (INTD)
- Concentration in Collaborative Leadership (CLDR)
- Individualized (IND)

To fulfill the concentration requirement students select six concentration courses. Four of those six courses must be taken from within their chosen concentration. The remaining two concentration courses may be taken from any of the concentration course lists. Special topics courses relevant to the concentration and/or courses that provide regional expertise can be substituted with departmental approval. Students are encouraged to check special topics courses each semester and think creatively about the applicability of courses that support learning in their chosen concentration. At least two of the six concentration courses must be CONF courses taken in residence. CONF 397 Study Abroad Special Topics and courses transferred from another institution do not fulfill this requirement. Courses may not double count for the concentration requirement and the skills and practice requirement.

Concentration in Building Peace in Divided Societies (BPDS)
Focuses on how divided societies with a history of conflict seek to transform relationships and situations of violence and injustice. Examines communities and societies that have experienced conflict and how individuals and groups build peace locally and globally.

Select at least four of the six concentration courses from the following:

<table>
<thead>
<tr>
<th>Code</th>

</tbody>
</table>

Total Credits 12

Concentration in Global Engagement (GLBE)
Focuses on studying the dynamics and impact of global conflict resolution. Examines domestic and international dimensions of security, state-to-state conflict, internal wars, terrorism, migration, negotiation, and diplomacy. Explores what can be done to reduce violent conflict and increase peace and security.
Select at least four of the six concentration courses from the following:

<table>
<thead>
<tr>

</table>

Total Credits 12

Concentration in Interpersonal Dynamics (INTD)
Focuses on the dynamics of social interaction that lead to interpersonal conflict and the processes and skills that support the transformation of these conflicts. Issues examined include intercultural communication, psychology of groups, family relationships, and other dimensions of human relations.

Select four of the six concentration courses from the following:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>CONF 325</td>
<td>Dialogue and Difference</td>

Total Credits 12
Individualized Concentration (IND)

Students interested in creating their own concentration can work with an advisor to decide upon a set of at least six courses that will fulfill the requirements of the BS in Conflict Analysis and Resolution. Individualized concentrations must be approved by the Director of the Undergraduate Program.

BS in Conflict Analysis and Resolution without Concentration

Students may opt to complete their major in Conflict Analysis and Resolution without a concentration. The department offers many elective courses that allow students to deepen their understanding of theory and practice within the field of Conflict Resolution. Students may choose this option and complete the conflict resolution Core and 18 credits of conflict coursework selected from the following. These credits may not be used to also fulfill the skills and practice or field experience requirements.

<table>
<thead>
<tr>

</tbody>
</table>

Total Credits 18

Electives

Remaining credits needed to bring the degree total to 120 may be fulfilled with general elective courses.  

1. Up to 3 credits of 100 level Recreation (RECR) courses may be taken as general elective credits.
2. Only Military Science (MLSC) courses at the 400-level can be used for credit for a degree in the School; credit for other MLSC courses may not be applied toward a degree in the School.

Mason Core

Some Mason Core requirements may already be fulfilled by the major requirements listed above. Students are strongly encouraged to consult their advisors to ensure they fulfill all remaining Mason Core requirements.

<table>

Integration Requirements

Written Communications (ENGH 302) | 3
Writing-Intensive 1 | 3
Synthesis/Capstone 2 | 3

Total Credits 40

1. Most programs include the writing-intensive course designated as part of the major requirements; this course is therefore not counted towards the total required for Mason Core.
2. Minimum 3 credits required.

Writing-Intensive Requirement

All Mason students are required to complete at least one course designated as "writing intensive" in their major at the 300-level or above. CONF 302 Culture, Identity, and Conflict has been designated "writing intensive."

4-Year Plan

Bachelor of Science in Conflict Analysis and Resolution Sample Plan of Study

The sample plan below is a recommended sequencing of courses based on prerequisites and scheduling. This may not fit every student’s needs and is a guideline, not a requirement. Students should confirm major requirements with their academic advisor and with PatriotWeb Degree Evaluation to ensure they enroll in the proper courses and are on track to graduate.

Detailed four year plans and degree planning checklists can be found at https://advising.gmu.edu/current-student/majors-at-mason/.

Accelerated Master's

Conflict Analysis and Resolution, BA or BS/Conflict Analysis and Resolution, Accelerated MS

Overview

This accelerated Master's option is designed for highly qualified and motivated undergraduate students that have completed at least 6 credit hours of CONF coursework at the time of application. If accepted, students may take up to 12 credits of graduate coursework before undergraduate degree conferral and will be able to earn an undergraduate degree and the Conflict Analysis and Resolution, MS after satisfactory completion of at least 147 credits. The time period for the combined program is typically five years. It provides a streamlined MS application process with no additional application fee.

For more detailed information, see AP.6.7 Bachelor's/Accelerated Master's Degrees. For policies governing all graduate degrees, see AP.6 Graduate Policies.

Application Requirements

For specific application requirements and information for the accelerated Conflict Analysis and Resolution, MS, see Eligibility, Policies, and Deadlines (http://scar.gmu.edu/undergraduate/degrees/accelerated-masters/). Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in Graduate Admissions.

Students must have a minimum undergraduate cumulative GPA of 3.25 at the time of application.

Accelerated Master’s Requirements

- During the first semester in senior status admitted students may take up to 6 credits (1-2 classes) that will count towards both their undergraduate AND graduate degrees. During the second semester of senior status, students may take up to 6 credits (1-2 classes) that will count towards the graduate degree only.
- Students must begin their master's program the semester immediately following conferral of the undergraduate degree and will be expected to complete all remaining graduate program requirements within five years.
- See the program website (https://scar.gmu.edu/academics/undergraduate/accelerated-masters/) for additional information.
Accelerated MS Requirements

- No grade below a B is permitted for any undergraduate or graduate CONF course taken after application to the accelerated master’s program until completion of the undergraduate program.
- If a student receives a grade below a B in any CONF course after acceptance in the program, they may re-apply to the master’s program after conferral of the undergraduate degree; however, re-application does not guarantee admission.
- At the time of the undergraduate degree conferral, students’ GPAs must meet the standard required for admission to the master’s degree.
- Students may not take more than 12 credits a semester if taking two graduate courses or 15 credits a semester if taking one graduate course.

Bachelor’s Degree (selected)/Interdisciplinary Studies, Accelerated MAIS (Religious Studies Concentration)

Overview

Highly-qualified undergraduates in selected majors (see below) may apply to the accelerated master’s degree in interdisciplinary studies with a concentration in religious studies. If accepted, and depending on their undergraduate major, students will be able to earn a bachelor’s degree in their chosen major and a master’s in interdisciplinary studies with a concentration in religious studies after satisfactory completion of 150 credits, sometimes within five years. See AP.6.7 Bachelor’s/Accelerated Master’s Degrees.

Students in an accelerated degree program must fulfill all university requirements for the master’s degree. For policies governing all graduate degrees, see AP6 Graduate Policies.

Selected Majors

- Art history
- Philosophy
- Conflict analysis and resolution
- Global affairs
- History
- Religious studies
- Russian and Eurasian studies
- Sociology
- Anthropology

If the student has not majored in religious studies, it is preferred, though not required, that the student have a minor in religious studies.

Application Requirements

Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in the Admissions. For information specific to the accelerated MAIS, see Application Requirements and Deadlines (http://mais.gmu.edu/programs/la-mais-isin/application/).

Accelerated Option Requirements

While undergraduate students, accelerated master’s students complete two graduate courses as indicated on their Accelerated Master’s Program Application with a minimum grade of B in each course. Once admitted to the accelerated master’s pathway, students must maintain a minimum cumulative GPA of 3.25 in all coursework. Upon completion and conferral of the undergraduate degree in the semester indicated in the application, they submit the Bachelor’s/Accelerated Master’s Transition Form and are admitted to graduate status.

Total Credits 6

As graduate students, accelerated master’s students have an advanced standing. They must meet all master’s degree requirements except for the two courses (6 credits) they completed as undergraduates. Students must begin their master’s program the semester immediately following conferral of the undergraduate degree.

Reserve Graduate Credit

Students may take up to 6 additional graduate credits as reserve graduate credit. These credits do not apply to the undergraduate degree. To apply these credits to the master’s degree, students should use the Bachelor’s/Accelerated Master’s Transition Form.

Total Credits 6

The ability to take courses, including ones not listed above, for reserve graduate credit is available to all high achieving undergraduates with the permission of the department. Permission is normally granted only to qualified Mason seniors within 15 hours of graduation. See AP.1.4.4 Graduate Course Enrollment by Undergraduates.
Bachelor's Degree (selected)/Interdisciplinary Studies, Accelerated MAIS (Social Justice and Human Rights Concentration)

Overview
Highly-qualified undergraduates in select majors (listed below) may apply to the accelerated master’s degree in Interdisciplinary Studies with a concentration in Social Justice and Human Rights. If accepted, and depending on their undergraduate major, students will be able to earn an undergraduate degree in their chosen major and a master’s in Interdisciplinary Studies with a concentration in Social Justice and Human Rights after satisfactory completion of 150 credits, sometimes within five years.

For more detailed information, see AP6.7 Bachelor’s/Accelerated Master’s Degrees. For policies governing all graduate degrees, see AP6 Graduate Policies.

Selected Majors

Application Requirements
Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in Graduate Admissions. For information specific to the accelerated MAIS, see Application Requirements and Deadlines (http://mais.gmu.edu/programs/la-mais-isin/application/) on the departmental web site.

Accelerated Option Requirements
While undergraduate students, accelerated master’s students complete INTS 540 Contemporary Issues in Social Justice Human Rights and one course chosen from the list of electives for the MAIS concentration in Social Justice and Human Rights as indicated on their Accelerated Master’s Program Application with a minimum grade of B in each course. Once admitted to the accelerated master’s pathway, students must maintain a minimum cumulative GPA of 3.25 in all coursework. Upon completion and conferral of the undergraduate degree in the semester indicated in the application, they submit the Bachelor’s/Accelerated Master’s Transition Form and are admitted to graduate status.

As graduate students, accelerated master’s students have an advanced standing. They must meet all master’s degree requirements except for the two courses (6 credits) they completed as undergraduates. Students must begin their master’s program the semester immediately following conferral of the undergraduate degree.

Reserve Graduate Credit
Students may take up to 6 additional graduate credits as reserve graduate credit (chosen from the list of electives for the MAIS concentration in social justice and human rights). These credits do not apply to the undergraduate degree. The ability to take courses for reserve graduate credit is available to all high achieving undergraduates with the permission of the program. Permission to take a graduate course for reserve graduate credit is normally granted only to Mason seniors within 15 hours of graduation. See AP1.4.4 Graduate Course Enrollment by Undergraduates.

Bachelor’s Degree (selected)/Interdisciplinary Studies, Accelerated MAIS (Women and Gender Studies Concentration)

Overview
Highly-qualified undergraduates in select majors may apply to the accelerated master’s degree in interdisciplinary studies with a concentration in women and gender studies. If accepted, and depending on their undergraduate major, students will be able to earn a bachelor’s degree in their chosen major and a master’s degree in interdisciplinary studies with a concentration in women and gender studies after satisfactory completion of 150 credits, sometime within five years.

For more detailed information, see AP6.7 Bachelor’s/Accelerated Master’s Degrees. For policies governing all graduate degrees, see AP6 Graduate Policies.

Selected Majors

Application Requirements
Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in Graduate Admissions. For information specific to the accelerated MAIS, see the departmental web site (http://mais.gmu.edu/programs/la-mais-isin/application/).

Accelerated Option Requirements
While undergraduate students, accelerated master’s students complete two graduate courses as indicated on their Accelerated Master’s Program Application with a minimum grade of B in each course. Once admitted to the accelerated master’s pathway, students must maintain a minimum cumulative GPA of 3.25 in all course work. Upon completion and conferral of the undergraduate degree in the semester indicated in the application, they submit the Bachelor’s/Accelerated Master’s Transition Form and are admitted to graduate status.

**Conflict Analysis and Resolution, MS**

*Banner Code: CA-MS-CONF*

*Graduate Program Office*

Phone: 703-993-1300  
Email: scar@gmu.edu

This professional program prepares students for practice and further academic work by integrating conflict analysis and resolution theory, research, and practical techniques. Participants study the theory, methods, and ethical perspectives of the field, and apply this knowledge in laboratory simulations and workshops, internships, and field practice. Graduates work in a variety of settings where conflict resolution is useful and interest groups are in conflict with current and emergent public policy. Examples are businesses, unions, government agencies, religious groups, court systems, educational institutions, community centers, international relief and development organizations, and consulting firms.

**Admissions & Policies**

**Admissions**

**Admission Requirements**

Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in Graduate Admissions. In addition, applicants must submit all undergraduate and graduate transcripts; two letters of recommendation, one of which should be from a faculty member in the applicant’s undergraduate or graduate major field; a resume or curriculum vitae; and a 750- to 1,000-word essay on goals and reasons for seeking admission to the program. GRE or other standardized test scores are not required but may be submitted. The TOEFL is required of international students. For more information, see Admission of International Students. Students can be admitted to the MS program for either the Fall or Spring semesters.

Background courses in social sciences, as well as prior work experience, are desirable. Prior graduate academic work is evaluated on an individual basis for possible transfer credit and fulfillment of program requirements; however, Mason usually does not reduce the total credits required for the degree. Students may enroll on a full- or part-time basis. The MS Program is available on-campus, online (https://masononline.gmu.edu/programs/conflict-analysis-and-resolution-ms/) or in a hybrid format (on-campus and distance learning).

**Policies**

Mason requires all students to complete the master’s degree within six years of their official admission date.

Consult the S-CAR student handbook for information on registration procedures.

**Transfer of Non-Degree Credit**

A maximum of 12 credits of S-CAR graduate courses taken at George Mason as a non-degree graduate student, or as part of S-CAR’s graduate certificate program may be transferred into the MS program. How credit will be counted will be determined in consultation with the admitted student’s advisor. A maximum of six credits of non-S-CAR courses taken as non-degree credit can be counted toward the MS program. Courses counted toward another degree cannot be transferred.

**Adding an S-CAR Certificate Program**

Students may elect to complete an S-CAR Graduate Certificate in addition to the MS program. Graduate certificates are opportunities for students to further tailor their academic program and specialize in a specific area of conflict resolution practice. Certain graduate certificate courses can be used to fulfill MS program requirements. Students should consult with the Graduate Program Director for policies on counting certificate courses toward the MS degree.

**Requirements**

**Degree Requirements**

Dual Degree Options

Dual Degree Program with the University of Malta

Students have the opportunity to pursue a MS in Conflict Analysis and Resolution from George Mason University and a MA in Conflict Resolution and Mediterranean Security from the University of Malta through an innovative Dual Degree Program. Teaching faculty includes professors from both George Mason University and the University of Malta. All teaching is in English and all classes are held at the Valletta Campus of the University of Malta. The 400-year-old University of Malta Valletta campus incorporates state-of-the-art instructional technology. The entire program is delivered over three intensive semesters on a full time basis starting in late September. Classes are held on a two week intensive block basis for the first two semesters while the third semester is devoted to the completion of a thesis.

Orientation in Malta begins at the end of September. Classes run from the beginning of October through June. Students work on their theses from June until October. University of Malta graduation is in November and Mason graduation is in December. The total duration of the program is 15 months. More information is available at the program website (http://scar.gmu.edu/academics/maltaprogram/). US and Canadian students apply through the Mason graduate admissions process and indicate they want to participate in the Malta program. All other students should apply through the University of Malta. (http://www.um.edu.mt/imp/)

Conflict Analysis and Resolution, MS and Social Work, MSW Dual Degree

The Department of Social Work and the School for Conflict Analysis and Resolution have joined forces to offer a three year dual-degree program. Students can earn both an MSW and an MS in Conflict Analysis and Resolution while taking advantage of the diversity of the Washington, D.C., metropolitan area and the university's proximity to the nation's capital. This is the only dual-degree program of its kind.

Admission Requirements

Applicants must meet the admission standards and application requirements specified in Graduate Admissions and apply using the online Application for Graduate Admission (http://admissions.gmu.edu/). The application process is competitive, and applications are considered for the fall semester only.

Students interested in the 3-year dual degree program submit one online Application for Graduate Admission (http://admissions.gmu.edu/), select the MSW in Social Work as a primary program, and submit all application support materials to the Office of Graduate Admission in the College of Health and Human Services. Applicants should communicate their interest in completing the dual degree program in their essays, and recommendations should address the dual program interest. Students must be admitted to both programs in the same semester (fall only) to be admitted to the dual degree program.

For application deadlines and detailed application requirements please refer to the CHHS Admissions website (https://chhs.gmu.edu/admissions/graduate-admissions/standards-requirements-and-deadlines/). Interested students should consult the MSW program website (https://socialwork.gmu.edu/program/view/19658/), the MSW program, and the MSW program director for additional information prior to applying.

Transfer of Credit

Transfer credit is governed AP6.5.3 Transfer of Credit and AP6 Graduate Policies. Transfer credits must be approved by the program director and the dean. Students who enroll initially through non-degree studies should seek course advising through the department prior to taking a course and plan to submit their application to the dual degree program as soon as possible.

Please refer to the Transfer of Credit policy for the MSW in Social Work for departmental policy governing courses taken at another institution and the maximum number of credits allowed.

Accelerated Master's

Bachelor's Degree (any)/Conflict Analysis and Resolution, Accelerated MS

Overview

This accelerated Master's option is designed for highly qualified and motivated undergraduate students that have completed at least 6 credit hours of CONF coursework at the time of application. If accepted, students may take up to 12 credits of graduate coursework before undergraduate degree conferral and will be able to earn an undergraduate BA or BS and the Conflict Analysis and Resolution, MS after satisfactory completion of at least 147 credits. The time period for the combined program is typically five years. It provides a streamlined MS application process with no additional application fee.

For more detailed information, see AP6.7 Bachelor’s/Accelerated Master’s Degrees. For policies governing all graduate degrees, see AP6 Graduate Policies.

Application Requirements

For specific application requirements and information for the accelerated Conflict Analysis and Resolution, MS, see Eligibility, Policies, and Deadlines (http://scar.gmu.edu/undergraduate/degrees/accelerated-masters/). Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in Graduate Admissions (https://catalog.gmu.edu/admissions/graduate-policies/).

Students must have a minimum undergraduate cumulative GPA of 3.25 at the time of application.

Accelerated Master’s Requirements

- During the first semester in senior status admitted students may take up to 6 credits (1-2 classes) that will count towards both their undergraduate AND graduate degrees. During the second semester of senior status, students may take up to 6 credits (1-2 classes) that will count towards the graduate degree only.
- At the beginning of the last semester of undergraduate study, the Bachelor’s/Accelerated Master’s Transition Form signed by an S-CAR undergraduate advisor is submitted to the Director of Graduate Student Services who will then forward to Graduate Admissions. Upon completion and conferral of the undergraduate degree the student is admitted to graduate status.
- Students must begin their master’s program the semester immediately following conferral of the undergraduate degree and will be expected to complete all remaining graduate program requirements within five years.
- Additional policies can be found on the program website (https://scar.gmu.edu/academics/undergraduate/accelerated-masters/).
Accelerated Master's Requirements

- No grade below a B is permitted for any undergraduate or graduate CONF course taken after application to the accelerated master's program until completion of the undergraduate program.
- If a student receives a grade below a B in any CONF course after acceptance in the program, they will not be allowed to continue on to the master’s program. Students that have received a grade below a B in a CONF course after acceptance into the program may re-apply to the master's program after conferral of the undergraduate degree; however, re-application does not guarantee admission.
- At the time of the undergraduate degree conferral, students’ GPAs must meet the standard required for admission to the master’s degree.
- Students may not take more than 12 credits a semester if taking two graduate courses or 15 credits a semester if taking one graduate course.

Conflict Analysis and Resolution, BA or BS/Conflict Analysis and Resolution, Accelerated MS

Overview

This accelerated Master’s option is designed for highly qualified and motivated undergraduate students that have completed at least 6 credit hours of CONF coursework at the time of application. If accepted, students may take up to 12 credits of graduate coursework before undergraduate degree conferral and will be able to earn an undergraduate degree and the Conflict Analysis and Resolution, MS after satisfactory completion of at least 147 credits. The time period for the combined program is typically five years. It provides a streamlined MS application process with no additional application fee.

For more detailed information, see AP6.7 Bachelor’s/Accelerated Master’s Degrees. For policies governing all graduate degrees, see AP6 Graduate Policies.

Application Requirements

For specific application requirements and information for the accelerated Conflict Analysis and Resolution, MS, see Eligibility, Policies, and Deadlines (http://scar.gmu.edu/undergraduate/degrees/accelerated-masters/). Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in Graduate Admissions.

Students must have a minimum undergraduate cumulative GPA of 3.25 at the time of application.

Accelerated Master’s Requirements

- During the first semester in senior status admitted students may take up to 6 credits (1-2 classes) that will count towards both their undergraduate AND graduate degrees. During the second semester of senior status, students may take up to 6 credits (1-2 classes) that will count towards the graduate degree only.
- Students must begin their master’s program the semester immediately following conferral of the undergraduate degree and will be expected to complete all remaining graduate program requirements within five years.
- See the program website (https://scar.gmu.edu/academics/undergraduate/accelerated-masters/) for additional information.

Accelerated MS Requirements

- No grade below a B is permitted for any undergraduate or graduate CONF course taken after application to the accelerated master’s program until completion of the undergraduate program.
- If a student receives a grade below a B in any CONF course after acceptance in the program, they will not be allowed to continue on to the master’s program. Students that have received a grade below a B in a CONF course after acceptance into the program may re-apply to the master's program after conferral of the undergraduate degree; however, re-application does not guarantee admission.
- At the time of the undergraduate degree conferral, students’ GPAs must meet the standard required for admission to the master’s degree.
- Students may not take more than 12 credits a semester if taking two graduate courses or 15 credits a semester if taking one graduate course.

Conflict Analysis and Resolution, PhD

Banner Code: CA-PHD-CONF

The Conflict Analysis and Resolution doctoral program, the first of its kind in the United States, provides advanced study for students in the field of conflict analysis and conflict resolution. Students are prepared for careers as researchers, theoreticians, and teachers in higher education, and as policy administrators, analysts, and consultants in the public and private sectors.

The program stresses a close link between knowledge of theory and process in the resolution of conflict. For this, training in the methods of research and analysis is emphasized. In addition, students are expected to obtain a background in a substantive area of conflict, usually related to the topic of the dissertation.

Admissions & Policies

Admissions

A master's or equivalent degree is required for admission to the PhD program.

Application Requirements

In addition to meeting all admission requirements for graduate study, applicants must submit:

- all undergraduate and graduate transcripts
- three letters of recommendation, one of which should be from a faculty member in the applicant's undergraduate or graduate major field
- a 750 to 1,000 word essay on goals and reasons for seeking admission to the program
- a written sample of work that shows the applicant’s potential for completing dissertation research in a doctoral program
- a resume or curriculum vitae.

The Graduate Record Exam (GRE) or other standardized test scores are not required but may be submitted. The Test of English as a Foreign Language (TOEFL) is required of international students.
For more information, see the Admission of International Students. Although students may enroll on a full- or part-time basis, entry into the program is in the fall semester only.

**Policies**

For policies governing all graduate degrees, see AP.6.10 Requirements for Doctoral Degrees.

**Reduction of Credit**

Since a master’s degree or equivalent is required for admission, students will automatically receive a 15 credit reduction to the number of credits required.

Students may have the required number of credits reduced by up to 15 additional credits based on relevant previous coursework. The actual number of applied credits is determined in consultation with the student’s advisor and the Graduate Program Director after a review of courses taken, subsequent to a student’s admission to the program.

**Completion Timelines**

Students must satisfactorily complete their coursework, comprehensive paper, advance to candidacy, and complete the dissertation within 9 years of admission to the program. Students are expected to have advanced to candidacy within 6 years of admission to the program.

**Plan of Study Guidelines**

All doctoral students should meet with their faculty advisor before starting classes to develop a plan of study. This plan should show the sequence of courses anticipated. It should be based on a discussion between the student and the advisor about the student’s interest and goals. The plan should ensure that the student completes coursework efficiently and is able to build toward candidacy. The student and the advisor should then meet at least once each semester thereafter to review and amend the plan. The Program Director should receive a copy of each new or revised plan of study.

**Transfer of Non-Degree Credit**

A maximum of 12 credits of S-CAR graduate courses taken at George Mason as a non-degree graduate student, or as part of S-CAR’s graduate certificate program may be transferred into the PhD program. How credit will be counted will be determined in consultation with the student’s advisor and the Graduate Program Director. A maximum of 6 credits of non-S-CAR courses taken as non-degree credit can be counted toward the PhD program. Courses counted toward another degree cannot be transferred.

**Adding a S-CAR Certificate Program**

Students may elect to complete a S-CAR graduate certificate in addition to the PhD program. Graduate certificates are opportunities for students to further tailor their academic program and specialize in a specific area of Conflict Resolution practice. Certain graduate certificate courses can be used to fulfill PhD program requirements. Students should consult with the Graduate Program Director for policies on counting certificate courses toward the PhD degree.

With the advisor’s approval, each student may include a maximum of 6 credits of electives from outside the S-CAR Program, including courses in other Mason departments, consortium courses, and transfer courses from other universities. The intent is to allow students to have maximum flexibility in selecting courses to build skills and knowledge needed in dissertation work. CONF 897 Directed Reading may be taken to meet the requirement. Only two directed readings classes (6 credits) can be applied toward doctoral elective requirements.

**Foreign Language Requirement**

At the point of application to fulfill the comprehensive paper, students will indicate to the Director of the Doctoral Program the membership of their dissertation committee. This committee will determine, based on the scope and nature of the student’s research, the specific language requirement a student must meet. This will be conveyed to the Graduate Program Director. This language requirement must be completed prior to graduation.
Comprehensive Paper
Students are eligible to complete the comprehensive paper when they have completed all the requirements of coursework in the doctoral program with the exception of CONF 998 Doctoral Dissertation Proposal and CONF 999 Doctoral Dissertation Research and the language requirement. A student is advanced to candidacy upon successful completion of the comprehensive paper. Papers can be submitted for evaluation twice each year, once in the winter and once in the summer. Students who do not pass initially should form a plan of study with the chair of their dissertation committee and the Graduate Program Director that will prepare them to resubmit. The comprehensive paper may be resubmitted two times for a total of three attempts. After three unsuccessful attempts, the student should consult with the Graduate Program Director about the possibility of transferring to a Master’s degree program.

Advancement to Candidacy
Upon successfully completing coursework (except dissertation) listed on the Plan of Study and passing the comprehensive paper, students will be advanced to candidacy. Students are expected to advance to candidacy within 6 years of admission to the program. Students have a total of 9 years from admission to complete all course requirements, including the dissertation.

Dissertation Research
Students are required to complete 12 combined credits of CONF 998 Doctoral Dissertation Proposal and CONF 999 Doctoral Dissertation Research, including at least 3 credits of CONF 999 Doctoral Dissertation Research. Students must have a signed dissertation proposal in order to register for CONF 999 Doctoral Dissertation Research.

</tbody>
</table>

Total Credits 12

1 All CONF 998 courses are graded In Progress until completion of the proposal. At that time, a grade of Satisfactory is issued.
2 All CONF 999 courses are graded In Progress until the dissertation defense is successfully completed. At that time, a grade of Satisfactory is issued.

Dissertation Committee
Students should propose a Dissertation Committee to the Graduate Program Director and the Dean who then formally appoint the committee. This must be done prior to taking the comprehensive exam. The Dissertation Committee must include a chairperson from among S-CAR graduate faculty and at least two other members of the graduate faculty, one of whom must be a non-S-CAR Mason faculty member. The Dean will inform the student, committee members, and Graduate Program Director when the committee has been appointed.

Dissertation Proposal
After the student passes the comprehensive exam and advances to candidacy, the next job of the committee is to approve the candidate’s dissertation proposal. The proposal is the candidate’s description (in some detail) of his/her dissertation project, reflecting the successful work of the comprehensive examination paper. It will include an argument about the hypothesis/theory question being tackled and the specific methods of research to be used. It should be prepared in consultation with the chair of the committee, and must be approved by all committee members. After receiving permission from the full committee, the candidate makes an oral presentation of the dissertation proposal before the committee and the Graduate Program Director that is also open to other S-CAR faculty, fellow students, and other scholars. In scheduling the defense, it is the student’s responsibility to ensure that all members of the committee are available and will be present for the defense.

A signed cover page from that proposal must be filed with the the Graduate Program Director. Failure to complete the formation of a committee and an approved proposal by the end of the 12-month period will result in the candidate’s dismissal from the doctoral program. (Candidates may appeal to the Dean a further extension of this dissertation preparation period, but such appeals will be allowed only on grounds of documented illness, family emergency, or military deployment). Candidates should consult thesis.gmu.edu/ (http://thesis.gmu.edu/) to ensure the proposal is in the correct format and has been submitted to all the appropriate offices.

Writing the Dissertation and its Defense
The chair of the dissertation committee usually takes most of the responsibility for guiding the overall project and the writing of the dissertation, although all members (and other useful persons) should be consulted as appropriate. It is the committee’s responsibility to ensure a quality piece of work. When advanced to candidacy, the Guide for Preparing Graduate Thesis, Dissertation and Projects tells exactly how to prepare an acceptable dissertation. Please visit thesis.gmu.edu/ (http://thesis.gmu.edu/) to ensure formatting guidelines are met and submission procedures followed.

It is essential that doctoral committee members have sufficient time to read and evaluate dissertation drafts with care prior to the dissertation defense date. The committee may require no more than one month to read the final draft and provide feedback. It is also essential that students have sufficient time after the defense to do final revisions, editing and formatting. If the University determines the deadlines for final library submission deadline is May 1, for example, the defense must take place prior to April 1 and the full draft dissertation must be delivered to the full committee before March 1.

The dissertation is to be orally defended in public, minimally with the entire committee present. The S-CAR faculty and students must receive public notice of the defense at least two weeks prior. Students are welcome to invite family and friends. The University may also send a representative. The public defense helps ensure that the University’s standards are met, and offers an opportunity to learn from the students’ research. After a successful defense, the cover page is signed by the members of the Dissertation Committee, Graduate Program Director and Dean; and the dissertation is filed with the University. An additional signed copy should be delivered to the S-CAR Burton Library.

Dissertations must be presented to the library in the proper format or they will not be accepted. Please visit the University Dissertation & Thesis Services web site at thesis.gmu.edu/ (http://thesis.gmu.edu/) for dissertation formatting requirements and submission deadlines. Mason’s Dissertation and Thesis Coordinator may be reached at udds@gmu.edu or 703-993-2222.
Contemporary Dispute Resolution Graduate Certificate (pending SCHEV approval)

Banner Code: CA-CERG-CDRE

S-CAR Graduate Programs

Phone: 703-993-1300
Email: scarinfo@gmu.edu
Website: scar.gmu.edu

Note: as of catalog publication in April, the program described below has been approved by the Board of Visitors and sent to the State Council of Higher Education in Virginia for consideration as a new degree program. The university cannot accept applications or enroll students in this program until SCHEV approval has been granted.

The Graduate Certificate in Contemporary Dispute Resolution is intended for professionals who are already engaged in dispute resolution practice who desire additional skills and training. This includes such fields as human resources, equal employment opportunity, mediators, and other dispute resolution professionals. This program presents dispute resolution within the frame of social justice practice and emphasizes working with complex and diverse systems.

Admissions & Policies

Note: as of catalog publication in April, the program described below has been approved by the Board of Visitors and sent to the State Council of Higher Education in Virginia for consideration as a new degree program. The university cannot accept applications or enroll students in this program until SCHEV approval has been granted.

Admissions

Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in Graduate Admissions (https://catalog.gmu.edu/admissions/graduate-policies/). Applicants to this certificate must submit an undergraduate transcript showing completion of an undergraduate degree or equivalent, a cover letter specifying interest in the program, two letters of recommendation, and a curriculum vitae or résumé indicating relevant work experience.

In addition, prior work experience in areas related to the chosen graduate certificate is desirable. GRE or other standardized test scores are not required but may be submitted. The TOEFL is required of international students. For more information, see Admission of International Students (https://catalog.gmu.edu/admissions/international-students/).

Policies

For policies governing all graduate certificates, see AP.6.8 Requirements for Graduate Certificates.

Mass Atrocity and Genocide Prevention Graduate Certificate

Banner Code: CA-CERG-MAGP

Douglas Irvin-Erickson, Program Director

Email: dirviner@gmu.edu
Website: scar.gmu.edu/academic-programs/graduate-and-professional-certificates

This 15-credit program is tailored to provide students with practical knowledge of conflict analysis and resolution relevant to Mass Atrocity Prevention, including genocide and mass violence prevention. Designed for mid-career professionals studying in a cohort environment, or graduate students seeking specialized, practical knowledge, the certificate program integrates conflict analysis and resolution theory, research, and practical techniques of preventing mass atrocities. Certificate courses include intensive sessions, lectures, seminars, and applied-mentored learning in real and simulated situations. Students consider strategies to prevent mass atrocities through policy planning, diplomacy, civil society building, democratization, development, education, and “up-streaming” prevention efforts that apply peace-building, dialogue, and conflict resolution approaches designed specifically for highly-escalated conflict contexts where mass atrocities seem likely to appear.

Admissions & Policies

Admissions

Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in Graduate Admissions. Applicants to this certificate must submit an undergraduate transcript showing completion of an undergraduate degree or equivalent, a cover letter specifying interest in

Peacebuilding, MA (pending SCHEV approval)

Banner Code: CA-MA-PCB

S-CAR Graduate Programs

Phone: 703-993-1300
Email: scarinfo@gmu.edu
Website: scar.gmu.edu

Note: as of catalog publication in April, the program described below has been approved by the Board of Visitors and sent to the State Council of Higher Education in Virginia for consideration as a new degree program. The university cannot accept applications or enroll students in this program until SCHEV approval has been granted.

The Master of Arts in Peacebuilding program supports students interested in developing career relevant skills for work on peacebuilding projects domestically and internationally in three ways. First, with scaffolded practical skills-oriented courses and an extensive internship opportunities, the program prepares graduates for reflective practice in planning and implementing peacebuilding initiatives and projects. Second, consultations with practitioners and organizations in the field provided input to design a program that builds the practical and professional skill sets required in contemporary peacebuilding contexts both locally and internationally. Finally, the program pays particular attention to the ethics, inclusivity and social justice aspects of being a peacebuilder throughout its content development and delivery.

This 30-credit program is designed to be completed over three semesters. The program, in addition to providing theoretical knowledge of peacebuilding to students, will therefore provide students with ample opportunities to develop and hone those practical and professional skills. During the first two terms, spring and summer, students will be in residence in Arlington devoting their time to course work. The last term, fall, students will be placed in internships and will enroll in a practicum capstone course to build practical and professional skills.

Admissions & Policies

Admissions Requirements
Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in Graduate Admissions. In addition, applicants must submit all undergraduate and graduate transcripts; two letters of recommendation, one of which should be from a faculty member in the applicant’s undergraduate or graduate major field; a resume or curriculum vitae; and a 750- to 1,000-word essay on goals and reasons for seeking admission to the program. GRE or other standardized test scores are not required but may be submitted. The TOEFL is required of international students. For more information, see Admission of International Students.

The MA in Peacebuilding runs as a cohort. Students will be admitted for the Spring term only and will complete within one year taking courses in Spring, Summer, and Fall.

Background courses in social sciences, as well as prior work experience, are desirable. Prior graduate academic work is evaluated on an individual basis for possible transfer credit and fulfillment of program requirements; however, Mason usually does not reduce the total credits required for the degree.

The MA in Peacebuilding is a full time program. Students take coursework in residence at the Arlington Campus in the Spring and Summer term. For the Fall term students will be participating in a practicum and online capstone courses. Students do not need to be in residence in Arlington for the Fall term.
Policies

Mason requires all students to complete the master’s degree within six years of their official admission date.

Consult the S-CAR student handbook for information on registration procedures.

Transfer of Non-Degree Credit

A maximum of 12 credits of S-CAR graduate courses taken at George Mason as a non-degree graduate student, or as part of S-CAR’s graduate certificate program may be transferred into the MA program. How credit will be counted will be determined in consultation with the admitted student’s advisor. A maximum of three credits of non-S-CAR courses taken as non-degree credit can be counted toward the MA program. Courses counted toward another degree cannot be transferred.

Adding an S-CAR Certificate Program

Students may elect to complete an S-CAR Graduate Certificate in addition to the MA program. Graduate certificates are opportunities for students to further tailor their academic program and specialize in a specific area of conflict resolution practice. Certain courses can be used to fulfill MA and Certificate program requirements. Students should consult with the Graduate Program Director for policies on counting certificate courses toward the MA degree.

School of Business

Enterprise Hall

Phone: 703-993-1880

Website: business.gmu.edu

Administration

- Maury Peiperl, Dean
- Anne Magro, Senior Associate Dean, Strategy and Impact
- Cheryl Druehl, Associate Dean, Faculty
- Richard Klimoski, Associate Dean, Research
- Paige Wolf, Associate Dean, Graduate Programs
- Patrick Soleymani, Associate Dean, Undergraduate Programs
- Diane Vermaaten, Executive Director, Finance and Administration

College Code: BU

The mission of the School of Business is to prepare a diverse student body to succeed in a global business environment. Through the faculty's creation and dissemination of business knowledge, practice, and pedagogy, we enable our students to develop analytical and communication skills and to practice ethical business behavior.

Business leaders and organizations are actively involved with the School of Business through executive education programs, speaker engagements, classroom lectures, case competitions, internships, and career placement. The School of Business also maintains close connections to the business community through its advisory board and advisory councils to academic programs. 220 business leaders representing 168 different companies serve as advisory board (including Friends of the Alumni Chapter Board) or council members.

The School of Business enrolled more than 4,000 undergraduate students and more than 550 graduate students in its programs.

The School of Business’s programs offer students a variety of opportunities to enhance their professional endeavors.

- Our innovative curriculum meets the demands of the marketplace, focused on business fundamentals, strategic thinking and teamwork.
- Our distinguished faculty are cross-disciplinary collaborators and innovative practitioners that are passionate about education. They bring both theoretical and applied expertise to the classroom.
- Our outstanding career management professionals are dedicated to providing tailored support to promote our students’ professional advancement and leverage their degree over the short- and long-term.
- Our diverse student population offers unique opportunities to network and learn from your fellow classmates. Students at Mason represent over 130 different countries and all 50 states.

Undergraduate

The programs in business education culminate in a BS degree with a concentration in one of eight areas: accounting, business analytics, finance, financial planning and wealth management, management information systems, management, marketing, or supply chain management.

Graduate

The School of Business offers an MBA, and MS degrees in Accounting, Management, Real Estate Development, and Technology Management.

Highly-qualified Mason Accounting majors may apply to the accelerated master’s degree program and obtain both Accounting, BS and Accounting, MS degrees after satisfactory completion of a total of 144 credits.

Graduate certificates are offered in Business Analytics, Business Fundamentals, Accounting Analytics, Government Accounting, Forensic Accounting, IT Strategy and Digital Transformation, Chief Information Officer, and Global IT Leadership.

For policies governing all accelerated degree programs, see AP.6.7 Bachelor’s/Accelerated Master’s Degrees.

Centers

The School of Business houses four centers. The Center for Innovation and Entrepreneurship provides experiential learning through academic programs as well as hands-on programs for Mason students interested in innovation, invention, early stage startups, and entrepreneurship. The Center for Real Estate Entrepreneurship focuses on real estate research and education in real estate development and finance. The Investor Protection & Corporate Fraud Research Center strives to provide thought leadership on investor protection and fraud risk by sponsoring, conducting, and disseminating research in these areas. The Center for Infrastructure Protection & Homeland Security conducts research, develops projects, and provides expert analysis and insight into policy across a variety of infrastructure sectors and related fields, including energy, transportation, cyber-security, defense and finance. The Center for Government Contracting has established the first-in-the-nation university center to address business, policy, regulatory and other issues in government contracting.

Requirements & Policies

Policies
Academic Policies
Students should become familiar with the university’s general academic policies in addition to those specific to each academic unit.

E-mail
George Mason University uses only Mason e-mail accounts to communicate with enrolled students. Students should activate their Mason e-mail, use it to communicate with their school/department/program and other administrative units, and check it regularly for important information.

Study Elsewhere Policy
A student who has matriculated at Mason may transfer a limited number of hours (9 for undergraduates, 6 for graduates) of coursework in School of Business disciplines from another institution (not including registration through the Consortium of Universities of the Washington Metropolitan Area or coursework completed through the Center for Global Education). Students are permitted to take courses elsewhere under unusual circumstances—these circumstances do not include scheduling or commuting convenience, or financial (lower cost) reasons.

Special instructions for School of Business students: courses that are attempted at a two-year institution may not be used to fulfill upper-level requirements. Any course that a student wished to transfer to fulfill major or graduate-level course requirements in the School of Business must be attempted at an institution accredited by the Association to Advance Collegiate Schools of Business (AACSB).

For additional information, see AP 1.4.2 Permission to Study Elsewhere.

Undergraduate Internship Policy
The School of Business recognizes the importance of experiential education in both learning to apply theory to practice and positioning students for success in their careers. Because the School of Business is committed to supporting students’ professional success, the School requires that all student internships for credit be registered with the School of Business as one of the following: ACCT 492, FNAN 492, MGMT 492, MIS 492, MKTG 492, or OSCM 492. Students may enroll in a maximum of 6 credits for these courses. Only three credits of an internship course may be taken at a time. For students in catalog years Fall 2016 and beyond, one internship course may apply to the major or concentration, and a second internship course would apply as general elective credit. For students in catalog years prior to Fall 2016, a maximum of 6 credits of internship may apply to general electives. See Internship for Academic Credit (https://business.gmu.edu/career/bus492/).

Termination from the Major
Students who do not earn a C or higher in three attempts of School of Business Foundations and Core courses will be terminated from the School of Business. Students terminated from the School of Business are prohibited from enrolling in any School of Business course and will not be eligible to receive a degree from the School of Business.

Courses required for School of Business Foundations: ACCT 203 Survey of Accounting, BUS 100 Business and Society (Mason Core), BUS 103
Develop Professional Skills I: Foundational Elements, BUS 200 Global Environment of Business (Mason Core), BUS 210 Business Analytics I, BUS 310 Business Analytics II, ECON 103 Contemporary Microeconomic Principles (Mason Core), ECON 104 Contemporary Macroeconomic Principles (Mason Core), and MATH 108 Introductory Calculus with Business Applications (Mason Core).

Once a student has attempted a School of Business Foundations and/or Core course twice unsuccessfully, they must meet with an academic advisor in order to receive an override to register for the third attempt. Students who do not successfully complete these core courses and foundations courses within three attempts will be terminated from the School of Business and will not be eligible to receive a degree from the School of Business. Students terminated from the School of Business are prohibited from enrolling in any School of Business course.

Students terminated from the School of Business are permitted to declare the business minor only, and are not able to declare any other School of Business minors. For more information about this, see AP 5.2.4 Termination from the Major. The School of Business Termination Policy is separate from the University Repeat Policy AP 1.3.4.

All School of Business courses require a C or higher with the exception of FNAN 303 Financial Management for Finance majors or those with a Concentrations in Finance (B- or higher is required). No upper-level major required or elective course may be attempted for a C or higher more than three times. Once a third unsuccessful attempt is made in a School of Business major required or elective course the student will be unable to pursue that major/concentration and must work with an academic advisor to declare a new major/concentration in the School of Business.
University Consortium
Students should review university policies regarding the University Consortium under Special Registration Procedures in the Academic Policies section of this catalog. Students who have attempted or failed a course at Mason are not permitted to take the equivalent course through the consortium under any circumstance. All consortium registration requests must be submitted to the dean’s office at least 3 weeks prior to the first day of classes for the relevant semester at Mason.

Any consortium course that a student wishes to register for to fulfill major or graduate-level course requirements in the School of Business must be attempted at an institution accredited by the Association to Advance Collegiate Schools of Business (AACSB).

Non-Business School Student Credit Limitation
Enrolled undergraduate students who are not declared in a School of Business major are limited to 9 credits of upper-level business coursework within the School of Business. This policy applies to any student who is declared in another major or program at Mason. This policy does not apply to students who have declared a School of Business minor and are earning required credit toward that minor.

Undergraduate Course Overload Policy
The School of Business recommends that undergraduate students attempt no more than 18 credits in an academic semester and no more than 14 credits in a summer term. Students wishing to attempt more than 18 credits must submit a Permission to Overload form to their academic advisor.

To be eligible for a course overload, a student must fulfill all of the following criteria:

- At least a 3.0 cumulative GPA at Mason
- Have completed all courses successfully in his/her previous semester with no Fs or incompletes (IN)
- Complete the Permission to Overload form and obtain an academic advisor's signature

Freshmen and transfer students in their first semesters are not given permission for overloads as they have yet to establish an academic record at George Mason University.

If approved for an overload, the student is responsible for adding the additional class(es) and paying for the related tuition by the official university deadlines.

Transfer Credit Expiration Policy
Transfer credit is not awarded for any business (management, marketing, finance, accounting, management information systems, operations management, foundations, core, or any other School of Business course), courses completed more than ten years prior to Mason enrollment. This includes any older courses completed at RBC or the VCCS.

Laptop Policy
All School of Business Undergraduate Students must have access to a portable computing device that meets the following minimum standards. (http://business.gmu.edu/media/com_managedlists/72/Laptop-Requirements-AY2021.pdf)

Appeals Process
The School of Business strives to maintain policies and procedures that are consistent with those of the University, as well as in the best interest of our students. If you have any questions concerning a particular policy or procedure, contact the Office of Student Success & Academic Services, Room 008 of Enterprise Hall (703-993-1880) or visit the website (http://business.gmu.edu).

Courses Excluded from any School of Business BS Degree
Transfer credit is not awarded for any School of Business courses completed more than ten years prior to Mason enrollment.

Accounting Analytics Graduate Certificate

Banner Code: BU-CERG-ACAN

Graduate Program Office

Phone: 703-993-8006
Email: sbusgrad@gmu.edu

The Accounting Analytics Graduate Certificate is for students and working professionals to pair their accounting knowledge and skills with data and analytical knowledge. The certificate program will provide a building block for Master’s in Accounting students and working professionals seeking a career change or advancement and provides a foundation to compete for current accounting employment opportunities.

Admissions & Policies

Admissions

All students registering for School of Business graduate courses must have graduate standing. Non-degree student status is not available.

Full eligibility and admission requirements can be viewed on the program website (http://business.gmu.edu/masters-in-accounting/accounting-analytics-certificate/).

Policies

Students may use the credits completed as part of their graduate degree requirements in accordance with program requirements and AP.6 Graduate Policies. A maximum of 3 graduate credits taken at another institution can be transferred to the graduate certificate. The time limit for completion is four years from the date of admission to the graduate certificate. Students must have a minimum GPA of 3.00 to complete the certificate.

Requirements

Certificate Requirements

Total credits: 12

This certificate may be pursued on a full-or part-time basis.

Academic Advising
Phone: 703-993-1880
Email: masonbus@gmu.edu

This program provides an opportunity for nondegree-seeking students to earn the academic credit necessary to sit for the Uniform CPA Examination in Virginia.

This undergraduate certificate may be pursued on a part-time basis. Maintaining full-time status is not guaranteed. Students have four years to complete the certificate.

This certificate program qualifies for Title IV Federal Financial Aid.

Admissions & Policies

Admissions
The requirement for enrollment is a bachelor’s degree or higher from an accredited college or university.

Policies
Certificate Completion
Students are required to complete a minimum of 30 credits of accounting courses. At least 16 required credits must be taken at Mason after acceptance to the certificate program. Students have four years to complete certificate requirements. Students who are given permission to re-enroll following an absence from Mason may not count the four-year time limit as beginning on the date of re-enrollment.

Successful completion of the certificate program requires a grade of C or better in accounting courses and a GPA of at least 2.00 in all courses. Students are only permitted three attempts to pass each course with a C or better; following a third unsuccessful attempt the student will no longer be able pursue the certificate program.

Virginia Uniform CPA Examination
All students who wish to sit for the Uniform CPA Examination in Virginia are required to have completed 150 college-level credits, including at least 30 credits of accounting with courses in financial accounting, auditing, taxation, and management accounting; and at least 24 credits of non-accounting business courses.

Requirements
Certificate Requirements
Total credits: 30

This certificate may be pursued on a part-time basis only.

Administration

- JK Aier, Chair; Accounting Area and Director; Investor Protection & Corporate Fraud Research Center

The Bachelor of Science in Accounting prepares students for professional careers in the private and public sectors. The accounting major is designed to produce accounting professionals who can both generate and apply financial information to solve business problems. Our students learn principles of business and accounting as well as the specific skills and specialized technical knowledge necessary for success in the dynamic field of accounting. Our program emphasizes ethics, critical thinking, written and verbal communication, and effective use and understanding of technology. Our graduates are employed by the assurance, tax advisory, and consulting groups of the top accounting firms as well as Fortune 100 companies. Our proximity to the nation’s capital provides unique opportunities for our graduates to work in government and in the federal practices of public accounting firms. The accounting degree program is separately accredited by AACSB International.

Students interested in CPA certification can apply to the Master of Science in Accounting degree to meet the 150 hour requirement for CPA certification in most states. The MSA allows students to meet the 150 hour requirement for CPA certification in most states in only nine months.

Admissions & Policies

Policies

Academic Policies

Students should become familiar with the university's general academic policies in addition to those specific to each academic unit.

E-mail

George Mason University uses only Mason e-mail accounts to communicate with enrolled students. Students should activate their Mason e-mail, use it to communicate with their school/department/program and other administrative units, and check it regularly for important information.

Study Elsewhere Policy

A student who has matriculated at Mason may transfer a limited number of hours (9 for undergraduates, 6 for graduates) of coursework in School of Business disciplines from another institution (not including registration through the Consortium of Universities of the Washington Metropolitan Area or coursework completed through the Center for Global Education). Students are permitted to take courses elsewhere under unusual circumstances—these circumstances do not include scheduling or commuting convenience, or financial (lower cost) reasons.

Special instructions for School of Business students: courses that are attempted at a two-year institution may not be used to fulfill upper-level requirements. Any course that a student wished to transfer to fulfill major or graduate-level course requirements in the School of Business must be attempted at an institution accredited by the Association to Advance Collegiate Schools of Business (AACSB).

For additional information, see AP.1.4.2 Permission to Study Elsewhere.

Undergraduate Internship Policy

The School of Business recognizes the importance of experiential education in both learning to apply theory to practice and positioning students for success in their careers. Because the School of Business is committed to supporting students' professional success, the School requires that all student internships for credit be registered with the School of Business as one of the following: ACCT 492, FNAN 492, MGMT 492, MIS 492, MKTG 492, or OSCM 492. Students may enroll in a maximum of 6 credits for these courses. Only three credits of an internship course may be taken at a time. For students in catalog years Fall 2016 and beyond, one internship course may apply to the major or concentration, and a second internship course would apply as general elective credit. For students in catalog years prior to Fall 2016, a maximum of 6 credits of internship may apply to general electives.

See Internship for Academic Credit (https://business.gmu.edu/career/bus492/).

Termination from the Major

Students who do not earn a C or higher in three attempts of School of Business Foundations and Core courses will be terminated from the School of Business. Students terminated from the School of Business are prohibited from enrolling in any School of Business course and will not be eligible to receive a degree from the School of Business.

Courses required for School of Business Foundations: ACCT 203 Survey of Accounting, BUS 100 Business and Society (Mason Core), BUS 103 Develop Professional Skills I: Foundational Elements, BUS 200 Global Environment of Business (Mason Core), BUS 210 Business Analytics I, BUS 310 Business Analytics II, ECON 103 Contemporary Microeconomic Principles (Mason Core), ECON 104 Contemporary Macroeconomic Principles (Mason Core), and MATH 108 Introductory Calculus with Business Applications (Mason Core).

Once a student has attempted a School of Business Foundations and/or Core course twice unsuccessfully, they must meet with an academic advisor in order to receive an override to register for the third attempt. Students who do not successfully complete these core courses and foundations courses within three attempts will be terminated from the School of Business and will not be eligible to receive a degree from the School of Business. Students terminated from the School of Business are prohibited from enrolling in any School of Business course.

Students terminated from the School of Business are permitted to declare the business minor only, and are not able to declare any other School of Business minors. For more information about this, see AP.5.2.4 Termination from the Major. The School of Business Termination Policy is separate from the University Repeat Policy AP.1.3.4.
All School of Business courses require a C or higher with the exception of FNAN 303 Financial Management for Finance majors or those with a Concentrations in Finance (B- or higher is required). No upper-level major required or elective course may be attempted for a C or higher more than three times. Once a third unsuccessful attempt is made in a School of Business major required or elective course the student will be unable to pursue that major/concentration and must work with an academic advisor to declare a new major/concentration in the School of Business.

University Consortium
Students should review university policies regarding the University Consortium under Special Registration Procedures in the Academic Policies section of this catalog. Students who have attempted or failed a course at Mason are not permitted to take the equivalent course through the consortium under any circumstance. All consortium registration requests must be submitted to the dean’s office at least 3 weeks prior to the first day of classes for the relevant semester at Mason.

Any consortium course that a student wishes to register for to fulfill major or graduate-level course requirements in the School of Business must be attempted at an institution accredited by the Association to Advance Collegiate Schools of Business (AACSB).

Non-Business School Student Credit Limitation
Enrolled undergraduate students who are not declared in a School of Business major are limited to 9 credits of upper-level business coursework within the School of Business. This policy applies to any student who is declared in another major or program at Mason. This policy does not apply to students who have declared a School of Business minor and are earning required credit toward that minor.

Undergraduate Course Overload Policy
The School of Business recommends that undergraduate students attempt no more than 18 credits in an academic semester and no more than 14 credits in a summer term. Students wishing to attempt more than 18 credits must submit a Permission to Overload form to their academic advisor.

To be eligible for a course overload, a student must fulfill all of the following criteria:

- At least a 3.0 cumulative GPA at Mason
- Have completed all courses successfully in his/her previous semester with no Fs or incompletes (IN)
- Complete the Permission to Overload form and obtain an academic advisor’s signature

Freshmen and transfer students in their first semesters are not given permission for overloads as they have yet to establish an academic record at George Mason University.

If approved for an overload, the student is responsible for adding the additional class(es) and paying for the related tuition by the official university deadlines.

Transfer Credit Expiration Policy
Transfer credit is not awarded for any School of Business courses completed more than ten years prior to Mason enrollment. This includes any older courses completed at RBC or the VCCS.

Laptop Policy
All School of Business Undergraduate Students must have access to a portable computing device that meets the following minimum standards. (http://business.gmu.edu/media/com_managedlists/72/Laptop-Requirements-AY2021.pdf)

Appeals Process
The School of Business strives to maintain policies and procedures that are consistent with those of the University, as well as in the best interest of our students. If you have any questions concerning a particular policy or procedure, contact the Office of Student Success & Academic Services, Room 008 of Enterprise Hall (703-993-1880) or visit the website (http://business.gmu.edu).

Courses Excluded from any School of Business BS Degree
Transfer credit is not awarded for any School of Business courses completed more than ten years prior to Mason enrollment.

1. A grade of C or higher is required in each of the upper-level accounting major courses listed below. Students will not be permitted to make more than three attempts to achieve a C or higher in the following required Accounting courses: ACCT 311, ACCT 331, ACCT 332, ACCT 351, ACCT 361, and ACCT 461. Those who do not successfully complete these required courses within three attempts will not be eligible to receive a degree in Accounting from the School of Business. Students terminated from the BS Accounting program are prohibited from enrolling in any Accounting course.

2. Students who anticipate taking the CPA, CMA, CIA, or other professional exam should consult the applicable regulations and meet with their advisor. State regulations regarding professional examinations may dictate course selections.

3. Students in the MSAccel program and select high performing undergraduates may take graduate courses for undergraduate credit. Enrollment in a graduate level course in not guaranteed. Please contact an academic advisor for additional information.

1. Students must successfully complete all Business Core courses to be eligible to enroll in BUS 498.
Advanced Accelerated Accounting Pathway

The A++ program is designed for incoming freshman who have credit for MATH 108 Introductory Calculus with Business Applications (Mason Core), ECON 103 Contemporary Microeconomic Principles (Mason Core), and ENGH 101 Composition (Mason Core) prior to starting at Mason. This is an advanced pathway for high performing accounting majors interested in completing their Bachelor's and Master's in Accounting in four years. Students interested in this pathway should discuss requirements with a School of Business academic advisor.

Honors

Honors in the Major

The School of Business Accounting Honors Program provides highly motivated students majoring in accounting with an enriched academic experience integrating curricular, co-curricular and extra-curricular development. Admission to the Honors Program is by invitation only.

Admission Requirements

- Minimum 3.0 cumulative Mason GPA
- A- or higher on first attempt ACCT 303 Accounting for Decision Making
- Submission of a personal statement/essay
- Two recommendations from faculty within the School of Business
- Once admitted to the program, students with a cumulative GPA below a 3.0 will be dropped from the program

Curricular Requirements

- 3.0 cumulative Mason GPA
- 3.5 GPA in the major, or be in the 95th percentile GPA within the major
- B- or higher on first attempt in every major course

Co-Curricular Requirements

The student must complete ONE of the following in addition to the curriculum requirements:
• ACCT 462 Honors Seminar in Accounting
• BUS 498 Capstone Course: Advanced Business Models (Mason Core) Honors section.

Extra-Curricular Requirements
• Attendance at a minimum of two honors events, as determined by the Honors Faculty Coordinator

Requirements for Students to Obtain the Honors Designation
• Honors students must meet all curricular, co-curricular, and extracurricular requirements mentioned above at graduation

Accelerated Master’s

Accounting, BS/Accounting, Accelerated MS
Overview
Mason Accounting majors may apply to the bachelor's/accelerated master’s program to obtain both Accounting, BS or Business, BS with a Concentration in Accounting and Accounting MS degrees. In the accelerated program, up to six credits of eligible ACCT 600-level courses can be used to meet both bachelor’s and master’s degree requirements. In addition, students have the option to earn up to 6 credits of reserve credit in 600-level ACCT courses (earned credit held in reserve to apply later toward a graduate degree).

For policies governing all accelerated master’s degree programs, see AP.6.7 Bachelor's/Accelerated Master's Degrees.

Students in an accelerated degree program must fulfill all university requirements for the master’s degree. For policies governing all graduate degrees, see AP.6 Graduate Policies.

Application Requirements
Applicants to accelerated master’s programs must have completed at least 75 credits toward their undergraduate degree (with at least 15 credits earned at Mason). Academic requirements specific to this bachelor’s/accelerated master’s program can be found on the School of Business website (http://business.gmu.edu/masters-in-accounting/admissions/mason-msa-pathways/).

Students submit an application online through the Office of Graduate Admissions. Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in Graduate Admissions Policies. (https://catalog.gmu.edu/admissions/graduate-policies/)

Accelerated Option Requirements
In their final undergraduate semester, students must submit the Bachelor’s/Accelerated Master’s Transition Form to the MS in Accounting advisor to specify which course(s) are to be designated as advanced standing and if applicable, reserve graduate credit.

Following completion of the Accounting, BS, or a Business, BS with a concentration in accounting, a bachelor’s accelerated master’s student may transition into the Accounting, MS program if they have met the guidelines in AP.6.7 and the School of Business requirements here (http://business.gmu.edu/masters-in-accounting/admissions/mason-msa-pathways/).

Accounting, MS

Email: sbusgrad@gmu.edu

Administration
• Robert Broshears, Director, MSA Program

The MS in Accounting program integrates fundamental business skills and specialized knowledge and acumen required by the accounting profession. The MSA program is pursued as a face to face or an online option.

Admissions & Policies

Admissions
Admission and Eligibility Requirements
All students registering for School of Business graduate courses must have graduate standing. Nondegree student status is not available. To be eligible for our MS in Accounting (the full-time, part-time and accelerated accounting programs), you must have a bachelor’s degree in accounting or equivalent from an accredited institution or have completed 27 college credits in accounting.

Applicants who have a business degree, but do not have an accounting degree or equivalent will be provisionally admitted until they have completed the following courses or equivalents with a grade of B- or better:

• ACCT 531 Foundations of Financial Reporting I
• ACCT 532 Foundations of Financial Reporting II
• ACCT 551 Foundations of Taxation of Business Entities
• ACCT 561 Foundations of Assurance Services

The prerequisites are currently only available in-person, not online. Online students with business degree backgrounds are eligible to take these prerequisite courses in-person if admitted provisionally to the MS in Accounting program.

Applicants who do not have an accounting degree or business degree will be provisionally admitted until they have completed the following courses or equivalents with a grade of B- or better:

• ACCT 303 Accounting for Decision Making
• ACCT 531 Foundations of Financial Reporting I
• ACCT 532 Foundations of Financial Reporting II
• ACCT 551 Foundations of Taxation of Business Entities
• ACCT 561 Foundations of Assurance Services

The prerequisites are currently only available in-person, not online. Online students with business degree backgrounds are eligible to take these
prerequisite courses in-person if admitted provisionally to the MS in Accounting program.

International students with accounting degrees that lack a course in U.S. tax will be required to take ACCT 351 prior to matriculation.

Full admission requirements can be viewed at the school's website. (http://business.gmu.edu/masters-in-accounting/admissions/requirements/)

Policies
For policies governing all graduate degrees, see AP6 Graduate Policies.

Email: sbusgrad@gmu.edu

Administration
- Pallab Sanyal, Director, MBA Program

This degree prepares the next generation of world leaders through a rigorous, stimulating business and management curriculum based on global perspective, industry demand and leadership.

The MBA core curriculum effectively integrates functional areas with the use of IT, oral and written communication, and teamwork. The MBA program requires 48 credits: 30 credits of core courses, 3 credits of Global coursework and 15 credits of elective courses. The MBA program operates on an 8 week module structure and can be pursued either as a face to face or an online format.

JD/MBA Dual Degree students can apply 15 credits of Law elective coursework toward the MBA elective degree requirement. See the Antonin Scalia Law School (http://www.law.gmu.edu/academics/degrees/) for more details.
Admissions & Policies

Admissions

Admissions and Eligibility Requirements

• All students registering for School of Business graduate courses must have graduate standing. Non-degree student status is not available.
• An earned baccalaureate degree from a regionally-accredited institution of higher education, or international equivalent, verified from official transcripts.
• A minimum of two years of full-time, post-baccalaureate professional employment.
• One college-level calculus course prior to enrolling (recommended but not required).

Full admission requirements can be viewed on the program website (http://business.gmu.edu/mba-programs/admissions/).

Policies

For policies governing all graduate degrees, see AP.6 Graduate Policies.

Requirements

Degree Requirements

Total credits: 48

Core Courses

Students enroll in 6 credits per module for a total of 24 credits a year.

Business Analytics Graduate Certificate

Banner Code: BU-CERG-BUSA

Graduate Program Office
Phone: 703-993-8006
Email: sbusgrad@gmu.edu

Administration

• Pallab Sanyal, Director, MBA Program

The Business Analytics Graduate Certificate will help analysts and professionals from diverse domains to effectively analyze data through the hands-on use of decision modeling and other techniques using popular software tools. The program covers a wide array of methodologies and techniques — from data collection, organization, reporting and mining to extraction of useful and actionable information for decision makers.

This certificate may be completed on a part-time or full-time basis.

Non-MBA students enroll in GBUS courses while MBA students enroll in MBA courses.

This certificate qualifies for Title IV Federal Financial Aid.

Admissions

Admissions

Eligibility Requirements

All students registering for School of Business graduate courses must have graduate standing. Non-degree student status is not available.

Full eligibility and admission requirements can be viewed on the program website (http://business.gmu.edu/mba-programs/analytics/).
Policies

Students may use the credits completed as part of their graduate degree requirements in accordance with program requirements and AP 6 Graduate Policies. A maximum of 3 graduate credits taken at another institution can be transferred to the graduate certificate. The time limit for completion is four years from the date of admission to the graduate certificate. Students must have a minimum GPA of 3.00 to complete the certificate.

Admissions & Policies

Policies

At least eight credits of the minor courses must be unique to the Business Analytics Minor and not applied toward any other major, minor, or concentration. Students must achieve a grade of C or better in each course that is applied toward the minor. For policies governing all minors, see AP 5.3.4 Minors.

Administration

• David Gallay, Director of Minor Programs

The amount of data flowing from, to, and through enterprises of all sorts is enormous, and growing rapidly—more rapidly than the capabilities of organizations to use it. Successful enterprises are those that make effective use of the abundance of data to which they have access: to make better predictions, better decisions, and form better strategies. Business analytics—which encompasses a variety of techniques to extract useful information from different sources of data—is being embraced at an increasing rate by organizations that need to gain actionable and forward-looking insight from their data. This minor in business analytics will provide students with the cutting-edge knowledge and skills they need to use and gather data to identify, understand, and deliver insights that internal and external clients find vital to organizational success.
The graduate certificate in Business Fundamentals provides students with foundational knowledge in four key areas of business: accounting, finance, management, and marketing. This introduction will augment students' skillsets from their own academic and professional disciplines with a fundamental understanding of effective business practices. Courses taken in the Business Fundamentals graduate certificate can be applied toward the Mason MBA upon acceptance into the degree program.

Admissions & Policies

Admissions

All students registering for School of Business graduate courses must have graduate standing. Non-degree student status is not available.

Full eligibility and admission requirements can be viewed on the program website: [http://business.gmu.edu/mba-programs/business-fundamentals-certificate/](http://business.gmu.edu/mba-programs/business-fundamentals-certificate/)

Policies

Students may use the credits completed as part of their graduate degree requirements in accordance with program requirements and AP.6 Graduate Policies.

A maximum of 3 graduate credits taken at another institution can be transferred to the graduate certificate. The time limit for completion is four years from the date of admission to the graduate certificate. Students must have a minimum GPA of 3.00 to complete the certificate.

Requirements

Certificate Requirements

Total credits: 12

This certificate may be pursued on a full- or part-time basis.

Business Minor

Banner Code: BUS

Academic Advising

Phone: 703-993-1880
Email: masonbus@gmu.edu

Administration

• David Gallay, Director of Minor Programs

The business minor provides an introduction to the skills needed for success in the rapidly changing and evolving world of business. Because it is designed for non-business students who seek to learn business essentials to enhance their own area of expertise, the minor provides broad exposure to business concepts and theories. The minor also presents and integrates the major functional areas in business to solve management problems through the use of IT. Strong written and oral communication skills are expected.

Admissions & Policies

Policies

For policies governing all minors, see AP.5.3.4 Minors. The School of Business residency requirement for this minor supersedes the university requirement: at least nine credits must be earned at Mason.

At least eight credits of the minor courses must be unique to the Business Minor and not applied toward any other major, minor, or concentration. Students must achieve a grade of C or better in each course that is applied toward the minor.

The School of Business is ranked in the top 10 percent of the nation’s undergraduate business schools and offers a Bachelor of Science in Business with innovative concentrations. The School of Business also offers several options for a minor for business and non-business majors, as well as an undergraduate certificate program in accounting. The School of Business programs are designed to prepare graduates for work in a rapidly changing and competitive marketplace with local, regional, and global companies. With Mason’s location in Northern Virginia and proximity to Washington, D.C., combined with the assistance of the School of Business’s own Career Services staff and Student Success and Academic Services staff, students are also afforded exceptional opportunities to gain practical experience and global engagement opportunities to complement their academic coursework. Students admitted spring 2020 and later will graduate with a Bachelor of Science in Business degree.

### Admissions & Policies

#### Policies

**Academic Policies**

Students should become familiar with the university’s general academic policies in addition to those specific to each academic unit.

**Email**

George Mason University uses only Mason e-mail accounts to communicate with enrolled students. Students should activate their Mason e-mail, use it to communicate with their school, department, program, and other administrative units, and should check it regularly for important information.

**Study Elsewhere Policy**

A student who has matriculated at Mason may transfer a limited number of hours (9 for undergraduates, 6 for graduates) of coursework in School of Business disciplines from another institution (not including registration through the Consortium of Universities of the Washington Metropolitan Area or coursework completed through the Center for Global Education). Students are permitted to take courses elsewhere under unusual circumstances - these circumstances do not include scheduling or commuting convenience, or financial (lower cost) reasons.

Special instructions for School of Business students: courses that are attempted at a two-year institution may not be used to fulfill upper-level requirements. Any course that a student wished to transfer to fulfill major, concentration or graduate-level course requirements in the School of Business must be attempted at an institution accredited by the Association to Advance Collegiate Schools of Business (AACSB).

For additional information, see AP.1.4.2 Permission to Study Elsewhere.

**Undergraduate Internship Policy**

The School of Business recognizes the importance of experiential education in both learning to apply theory to practice and positioning students for success in their careers. Because the School of Business is committed to supporting students’ professional success, the School requires that all student internships for credit be registered with the School of Business as either ACCT 492 Internship in Accounting, BUS 492 Internship in Business, FNAN 492 Internship in Finance, MGMT 492 Internship in Management, MIS 492 Internship in Management Information Systems, MKTG 492 Internship in Marketing, and OSCM 492 Internship in Operations and Supply Chain Management.

Students may enroll in a maximum of 6 credits for these courses. Only three credits of an internship course may be taken at a time. For students in catalog years Fall 2016 and beyond, one internship course may apply to the concentration as an elective, and a second internship course would apply as a general elective credit. For students in catalog years prior to Fall 2016, a maximum of 6 credits of internship may apply to general electives. See Internship Academic Credit (http://catalog.gmu.edu/colleges-schools/business/business-bs/business.gmu.edu/career/bus492/).

**Termination Policy**

Students who do not earn a C or higher in three attempts of School of Business Foundations and Core courses will be terminated from the School of Business. Students terminated from the School of Business are prohibited from enrolling in any School of Business course and will not be eligible to receive a degree from the School of Business.

Courses required for School of Business Foundations: ACCT 203 Survey of Accounting, BUS 100 Business and Society (Mason Core), BUS 103 Develop Professional Skills I: Foundational Elements, BUS 200 Global Environment of Business (Mason Core), BUS 210 Business Analytics I, BUS 310 Business Analytics II, ECON 103 Contemporary Microeconomic Principles (Mason Core), ECON 104 Contemporary Macroeconomic Principles (Mason Core), and MATH 108 Introductory Calculus with Business Applications (Mason Core).

Once a student has attempted a School of Business Foundations and/or Core course twice unsuccessfully, they must meet with an academic advisor in order to receive an override to register for the third attempt. Students who do not successfully complete these foundation and/or core courses within three attempts will be terminated from the School of Business and will not be eligible to receive a degree from the School of Business. Students terminated from the School of Business are prohibited from enrolling in any School of Business course.

Students terminated from the School of Business are permitted to declare the business minor only, and are not able to declare any other School of Business minors. For more information about this, see AP.5.2.4 Termination from the Major. The School of Business Termination Policy is separate from the University Repeat Policy AP.1.3.4.

All School of Business courses require a C or higher with the exception of FNAN 303 for Finance and Financial Planning concentrations and majors (B- or higher is required). No upper-level concentration required or elective course may be attempted for a C or higher more than three times. Once a third unsuccessful attempt is made in a School of Business
concentration required or elective course, the student will be unable to pursue that concentration and must work with an academic advisor to declare a new concentration in the School of Business.

**University Consortium**

Students should review university policies regarding the University Consortium under Special Registration Procedures in the Academic Policies section of this catalog. Students who have attempted or failed a course at Mason are not permitted to take the equivalent course through the consortium under any circumstance. All consortium registration requests must be submitted to the dean's office at least 3 weeks prior to the first day of classes for the relevant semester at Mason.

Any consortium course that a student wishes to register for to fulfill major or graduate-level course requirements in the School of Business must be attempted at an institution accredited by the Association to Advance Collegiate Schools of Business (AACSB).

**Non-Business School Student Credit Limitation**

Enrolled undergraduate students who are not declared in the School of Business are limited to 9 credits of upper-level business coursework within the School of Business. This policy applies to any student who is declared in another major or program at Mason. This policy does not apply to students who have declared a School of Business minor and are earning required credit toward that minor. This policy does not apply to students who have been terminated from the School of Business. Terminated students are prohibited from taking business courses.

**Undergraduate Course Overload Policy**

The School of Business recommends that undergraduate students attempt no more than 18 credits in an academic semester and no more than 14 credits in a summer term. Students wishing to attempt more than 18 credits must submit a Permission to Overload form to their academic advisor.

To be eligible for a course overload, a student must fulfill all of the following criteria:

- At least a 3.0 cumulative GPA at Mason
- Have completed all courses successfully in their previous semester with no F or incomplete (IN) grades
- Complete the Permission to Overload form and obtain an academic advisor's signature

Freshmen and transfer students in their first semesters are not given permission for overloads as they have yet to establish an academic record at George Mason University.

If approved for an overload, the student is responsible for adding the additional class(es) and paying for the related tuition by the official university deadlines.

**Transfer Credit Expiration Policy**

Transfer credit is not awarded for any business (management, marketing, finance, accounting, management information systems, operations and supply chain management, foundations, core, or any other School of Business course) courses completed more than ten years prior to Mason enrollment. This includes any older courses completed at RBC or the VCCS.

---

**Laptop Policy**

School of Business students are required to adhere to the School of Business laptop requirements. These requirements are required for all business courses. More information about the laptop policy can be found here (http://business.gmu.edu/media/com_managedlists/72/Laptop-Requirements-AAY2021.pdf).

**Appeals Process**

The School of Business strives to maintain policies and procedures that are consistent with those of the University, as well as in the best interest of our students. If you have any questions concerning a particular policy or procedure, contact the Office of Student Success & Academic Services, Room 008 of Enterprise Hall (703-993-1880) or visit the website (https://www.business.gmu.edu).

Requirements

Degree Requirements

Total credits: 120

School of Business students pursuing a BS degree must complete a minimum of 120 credits, including the Mason Core requirements, business foundations, business core and concentration requirements. In addition, the following requirements must be met:

- A minimum of 45 credits at the 300- or 400-level.
- A minimum of 30 credits of School of Business core and concentration courses at Mason.
- At least 9 credits required for the specific concentration and BUS 498 Capstone Course: Advanced Business Models (Mason Core) taken at Mason.
- A grade of C or higher earned in the business foundations, business core and concentration requirements.

Students should carefully follow prerequisites for School of Business courses. Students may be removed from a course if they enroll without having fulfilled the prerequisites.

Mason Core Requirements

Some Mason Core requirements may already be fulfilled by the major requirements listed below. Students are strongly encouraged to consult their advisors to ensure they fulfill all remaining Mason Core requirements.

Concentration in Accounting (ACCT)

The concentration in Accounting prepares students for professional careers in the private and public sectors. The accounting concentration is designed to produce accounting professionals who can both generate and apply financial information to solve business problems. Our students learn principles of business and accounting as well as the specific skills and specialized technical knowledge necessary for success in the dynamic field of accounting. Our program emphasizes ethics, critical thinking, written and verbal communication, and effective use and understanding of technology. Our graduates are employed by the assurance, tax advisory, and consulting groups of the top accounting firms as well as Fortune 100 companies. Our proximity to the nation’s capital provides unique opportunities for our graduates to work in government and in the federal practices of public accounting firms. The accounting concentration program is separately accredited by AACSB International. Students interested in CPA certification can apply to the MSA (https://catalog.gmu.edu/colleges-schools/business/ accounting-ms/) degree to meet the 150 hour requirement for CPA certification in most states. The MSA (https://catalog.gmu.edu/colleges-schools/business/accounting-ms/) allows students to meet the 150 hour requirement for CPA certification in most states in only nine months.

Also available for eligible students, the Accelerated Advanced Accounting Pathway (A++) is a pathway that provides the ability to complete a bachelor and master’s degree in accounting in four years. For more information, please meet with an academic advisor in the School of Business.

</table>
A grade of C or higher is required in each of the upper-level accounting concentration courses listed. Students will not be permitted to make more than three attempts to achieve a C or higher in the following required accounting courses: ACCT 311, ACCT 331, ACCT 332, ACCT 351, ACCT 361, and ACCT 461. Those who do not successfully complete these required courses within three attempts will not be eligible for the concentration in Accounting. Students terminated from the Accounting concentration are prohibited from enrolling in any accounting course.

Students who anticipate taking the CPA, CMA, CIA or other professional exam should consult the applicable regulations and meet with their advisor. State regulations regarding professional examinations may dictate course selections.

Students in the Accelerated Master’s program and select high performing undergraduates may take graduate courses for undergraduate credit. Enrollment in a graduate level course is not guaranteed. Please contact an academic advisor for additional information.

Concentration in Business Analytics (BUSA)

Business analytics encompasses a wide array of methodologies and techniques, from collection, organization, reporting and mining of data to extraction of useful and actionable information for the decision makers. As the field matures, more organizations are turning to business analytics as part of their core function to assist decision making and strategy development. Business analytics is grounded in an understanding of business and uses knowledge and skills related to analytic tools to identify business questions that can be answered by data, identify appropriate data to answer the questions, evaluate the quality of the data, analyze the data, form conclusions, and meaningfully communicate those conclusions to relevant parties. Business analysts will work in practice with data scientists with backgrounds in engineering, math, or computer science whose expertise in data analytics is centered on data architecture or developing data analysis tools.

Second Concentration in Business Analytics

Students declaring a second concentration in Business Analytics must complete the four required courses and two elective courses for the concentration (listed above).

Concentration in Finance (FNAN)

The concentration in Finance prepares students for professional careers by providing a solid foundation in the principles necessary to make operating decisions for an organization and in financial market analysis. We educate our finance students to understand, evaluate, and manage risk. In addition, students learn to conduct and effectively present financial analysis and research valuing complex projects, assets, securities, and firms. Students in the finance concentration explore the relationships among investors, firms, financial institutions, markets, and regulators. Students with a concentration in Finance have a unique opportunity to compete globally, as well as regionally, for unique and diverse job opportunities, including government (U.S. Treasury and the Board of Governors), large financial corporations (Fannie Mae and Freddie Mac), international organizations (World Bank and IMF), and other careers related to Finance.

2 With the exception of FNAN 300 and FNAN 303

Second Concentration in Finance
Students declaring a second concentration in Finance must complete the four required courses and two elective courses for the concentration (listed above).

Concentration in Financial Planning and Wealth Management (FPWM)
Consumers increasingly seek professional advice on managing their finances from professionals with wide-ranging knowledge from taxes and estate planning to insurance and retirement planning to portfolio management. In a recent article title, Forbes described Financial Planning as “One of the Fastest Growing Careers” and noted that the field “is in Desperate Need of Young Talent.” The article went on to explain that the field is expected to grow at a 32% rate over the next decade according to the Bureau of Labor Statistics while the average growth rate for all occupations is 14%.” (Touryalai, 2012). The field of financial planning includes several certifications including the Certified Financial Planner certification (CFP) through the CFP Board and Personal Financial Specialist (PFS) certification through the AICPA. The national CFP Board and regional FPA leadership have reached out to Mason to work with us to develop a CFP-registered program in Financial Planning due to the significant need in our region for graduates with this specialization.

Code Title Credits

Second concentration in Management
Students declaring a second concentration in Management must complete the two required courses and four elective courses for the concentration (listed above).

Concentration in Management Information Systems (MIS)
The concentration in Management Information Systems encompasses analysis, design, implementation, and management of information systems, to support business processes and decision making in all functional areas of an organization. The curriculum highlights not only the fundamental building blocks of information systems, but also the interaction of technology, people and business processes. MIS students learn about designing, building, maintaining, and securing information systems to meet organizational goals. They also acquire skills to use data and information through business analytics to support better managerial decision making in areas such as marketing, accounting and finance. MIS graduates are capable of translating business needs into technology-based solutions, and new technological advances into business capabilities. The MIS concentration prepares students for diverse technology based careers including Business Analyst, System Analyst, Security Analyst, Data Analyst, IT Project Management, IT Quality Management, Cloud Management, IS Audit and Control, Government Contracting, and Consulting.

Second Concentration in Management Information Systems

Students declaring a second concentration in Management Information Systems must complete the three required courses and three elective courses for the concentration (listed above). At least 2 of the electives must be MIS courses.

Concentration in Marketing (MKTG)

The concentration in Marketing prepares students for a broad range of global and domestic career options in corporations, small businesses, government, and nonprofits. A marketing concentration provides students with a solid foundation in marketing management for understanding the needs of the customer, the value organizations create for their customers, and opportunities and threats in the global marketplace. Students learn marketing concepts and practices related to consumer behavior, marketing research and analytics, and marketing planning and strategy (product development, pricing, distribution, and advertising and promotions). Our graduates work in such diverse fields as advertising and marketing communications, product and brand management, customer relationship management, new product/service development, new market and business development, sales, retail management, marketing research and analytics, and digital and social media marketing.

1 Satisfies Writing Intensive requirement

Second Concentration in Operations and Supply Chain Management
Students declaring a second concentration in Operations and Supply Chain Management must complete the three required courses and three elective courses for the concentration (listed above). At least 2 of the electives must be OSCM courses.

Honors

Admission Requirements
• Minimum 3.0 cumulative Mason GPA
• A- or higher on first attempt at the core course for the concentrations
  • ACCT: A- or higher in ACCT 303 Accounting for Decision Making
  • BUSA: A- or higher in MIS 303 Introduction to Business Information Systems
  • FNAN: A- or higher in FNAN 303 Financial Management
  • FPWM: A- or higher in FNAN 303 Financial Management
  • MGMT: A- or higher in MGMT 303 Principles of Management
  • MIS: A- or higher in MIS 303 Introduction to Business Information Systems
  • MKTG: A- or higher in MKTG 303 Principles of Marketing
  • OSCM: A- or higher in OSCM 303 Operations Management
• Submission of a personal statement/essay
• Two recommendations from faculty within the School of Business
• Once admitted to the program, students with a cumulative GPA below a 3.0 will be dropped from the program

Curricular Requirements
• 3.0 cumulative Mason GPA
• 3.5 GPA in the concentration or be in the 95th percentile GPA within the concentration
• B- or higher on first attempt in every concentration course

Co-Curricular Requirements
The student must complete ONE of the following in addition to the curriculum requirements:

4-Year Plan

Bachelors of Science in Business Sample Plan of Study
The sample plan below is a recommended sequencing of courses based on pre-requisites and scheduling. This may not fit every student's needs and is a guideline, not a requirement. Students should confirm major requirements with their academic advisor and with PatriotWeb Degree Evaluation to ensure they enroll in the proper courses and are on track to graduate.

#### Total Credits 120-122

Detailed four year plans and degree planning checklists can be found at https://advising.gmu.edu/current-student/majors-at-mason/.

### Accounting, BS/Accounting, Accelerated MS

#### Overview

Mason Accounting majors may apply to the bachelor’s/accelerated master’s program to obtain both Accounting, BS or Business, BS with a Concentration in Accounting and Accounting MS degrees. In the accelerated program, up to six credits of eligible ACCT 600-level courses can be used to meet both bachelor’s and master’s degree requirements. In addition, students have the option to earn up to 6 credits of reserve
credit in 600-level ACCT courses (earned credit held in reserve to apply later toward a graduate degree).

For policies governing all accelerated master’s degree programs, see AP6.7 Bachelor’s/Accelerated Master’s Degrees.

Students in an accelerated degree program must fulfill all university requirements for the master’s degree. For policies governing all graduate degrees, see AP6 Graduate Policies.

Application Requirements
Applicants to accelerated master’s programs must have completed at least 75 credits toward their undergraduate degree (with at least 15 credits earned at Mason). Academic requirements specific to this bachelor’s/accelerated master’s program can be found on the School of Business website (http://business.gmu.edu/masters-in-accounting/admissions/mason-msa-pathways/).

Students submit an application online through the Office of Graduate Admissions. Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in Graduate Admissions Policies. (https://catalog.gmu.edu/admissions/graduate-policies/)

Accelerated Option Requirements
In their final undergraduate semester, students must submit the Bachelor’s/Accelerated Master’s Transition Form to the MS in Accounting advisor to specify which course(s) are to be designated as advanced standing and if applicable, reserve graduate credit.

Following completion of the Accounting, BS, or a Business, BS with a concentration in accounting, a bachelor’s accelerated master’s student may transition into the Accounting, MS program if they have met the guidelines in AP6.7 and the School of Business requirements here (http://business.gmu.edu/masters-in-accounting/admissions/mason-msa-pathways/).

Chief Information Officer Graduate Certificate
Banner Code: BU-CERG-CIO

Graduate Program Office
Phone: 703-993-8003
Email: sbusgrad@gmu.edu

Administration
• Candace Deans, Director, MS in Technology Management Program

The Chief Information Officer Graduate Certificate helps Information Technology (IT) professionals gain core competencies necessary for advancement into executive level roles that manage IT resources and strategy within organizations. The program specifically focuses on Enterprise Architecture and IT Governance, Management of Information Security, IT Project Management, Managing IT Investments, Managing IT Operations, and Emerging Technologies.

This certificate may be pursued on a part or full time basis.

Admissions & Policies

Admissions
Applicants are expected to be current students in the MS Technology Management program. This is a 12 credit program and students may use the credits completed as part of their graduate degree requirements in accordance with AP6.8.1 Students in Master’s or Doctoral Programs also Pursuing Graduate Certificates.

Requirements
Certificate Requirements
Total credits: 12
This certificate may be pursued on a full-or part-time basis.

Entrepreneurship Minor
Banner Code: ENTR

Academic Advising
Phone: 703-993-1880
Email: masonbus@gmu.edu

Administration
• David Gallay, Director of Minor Programs

The Entrepreneurship Minor provides students with an interest in learning more about elements of new venture creation the ability to gain a strong set of entrepreneurship acumen. In combination with the school’s expanding co-curricular entrepreneurship programs, the minor in entrepreneurship will provide an experiential platform to grow student skill sets, networks and professional portfolios.

Admissions & Policies

Policies
Students must complete five courses for a total of 15 credits. Students must earn credit for the two required courses and can pick three courses of electives. At least eight credits must be unique to the minor and not applied toward any other major, minor, or concentration. Students must
achieve a grade of C or better in each course that is applied toward the minor. For policies governing all minors, see AP 5.3.4 Minors.

The School of Business residency requirement for this minor supersedes the university requirement: at least nine credits must be earned at Mason.

## Requirements

### Minor Requirements

Total credits: 15

### Required Courses

Business major students should take:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>MGMT 451</td>
<td>Introduction to Entrepreneurship</td>
<td>3</td>
</tr>
<tr>
<td>MGMT 452</td>
<td>Experiential Entrepreneurship</td>
<td>3</td>
</tr>
<tr>
<td>Total Credits</td>
<td></td>
<td>6</td>
</tr>
</tbody>
</table>

Non-business major students should take one of the following courses:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>MBUS 304</td>
<td>Entrepreneurship: Starting and Managing a New Enterprise</td>
<td>3</td>
</tr>
<tr>
<td>or IT 495</td>
<td>Turning Ideas into Successful Companies</td>
<td>3</td>
</tr>
<tr>
<td>MGMT 452</td>
<td>Experiential Entrepreneurship</td>
<td>3</td>
</tr>
<tr>
<td>Total Credits</td>
<td></td>
<td>6</td>
</tr>
</tbody>
</table>

### Electives

Select three courses from any of the following interests: 9

- **Commercial Entrepreneurship Courses:**
  - ACCT 311 Managerial and Cost Accounting
  - ACCT 351 Taxation and Managerial Decision Making
  - FNAN 341 Introduction to Firm Valuation
  - FNAN 431 Venture Capital and Private Financing of Startups
  - MGMT 453 Starting a Business
  - MKTG 313 Advertising and Marketing Communications
  - MKTG 352 Marketing Analytics for New Product Development
  - MKTG 353 New Product Development
  - OSCM 320 Supply Chain Management in a Global Economy
  - OSCM 493 Management of Technology Projects

- **Social Innovation Courses:**
  - EVPP 480 Sustainability in Action (Mason Core)
  - GOVT 353 Social Entrepreneurship
  - GOVT 358 Nonprofit Financial Planning
  - INTS 331 The Nonprofit Sector (Mason Core)
  - INTS 431 Principles of Fund Raising
  - INTS 450 Social Innovation in Action
  - MGMT 454 Social Impact and Entrepreneurship
  - PHIL 305 Business Ethics

- **Other Entrepreneurship Electives:**
  - PSYC 335 Psychology of Creativity and Innovation

### Executive MBA

Banner Code: BU-MBA-BUEX

Graduate Program Office

Phone: 703-993-2136

Email: emba@gmu.edu

### Administration

- Claus Langfred, Academic Director, Executive MBA Program

The Executive MBA is designed for those with a minimum of 7 years of significant business or military/professional experience. The program’s focus is management decision making, strategic management of business resources, and leadership – all in the context of National Security and Government Contracting firms. Dedicated faculty, an innovative and relevant curriculum for the D.C. area, a student-centered program team, and great colleagues contribute to the learning experience of a lifetime. The program is carefully designed to help students master a broad range of executive-level competencies while cultivating expert business-related knowledge of the National Security business environment. Students complete the program as a cohort, resulting in strong bonds and networking opportunities. The program is completed in 16 months, starting in January and classes are held approximately one Saturday and one Friday per month.

### Diversity in Learning

Students encounter multiple approaches to learning in the program. Classroom discussions, team projects, individual reading, team presentations, team problem solving, business simulations, business case analyses, coaching, and a D.C. residency all contribute to the creative learning environment delivered by the Mason Executive MBA Program.

### National Security Focus

With America’s role in the world continually evolving to meet new global challenges, the role of leadership in the security industry has never been more vital. The need for military leaders, government executives and corporate defense contractors who can provide mission critical products and services - and who understand the unique demands of the complex and dynamic national security sector - has never been more critical. Dedicated faculty from the Mason School of Business and adjunct faculty (working faculty working in specialty areas of the security sector) as well as accomplished government, military, and corporate guest speakers, technical experts, and Mason alumni employed in the security industry, are a part of the National Security focus on this program. The dynamic learning environment brings contemporary challenges of the national security industry right into the classroom.
Admissions & Policies

Admissions
Full eligibility and admission requirements can be viewed at the program’s website. (http://business.gmu.edu/graduate/)

Policies
All students registering for School of Business graduate courses must have graduate standing. Non-degree student status is not available.

Requirements

Degree Requirements
Total credits: 48

Modules
Students complete eight 8-week modules. During each eight-week module, students complete two courses (one in-person and one on-line) in an applications-oriented sequence that takes them from developing core management skills through the understanding and application of the tools of business performance to the talents of leadership.

Finance Minor
Banner Code: FNAN

Academic Advising
Phone: 703-993-1880
Email: masonbus@gmu.edu

Administration

• David Gallay, Director of Minor Programs

The Finance minor provides students with a strong foundation in areas related to corporate financial management, investment analysis and management, risk management, management consulting, banking and other financial institution administration. The minor is well suited not only for non-Finance business majors, but also for students who are not business majors and are interested in a possible career in finance.

Admissions & Policies

Policies
For policies governing all minors, see AP.5.3.4 Minors. The School of Business residency requirement for this minor supersedes the university requirement: at least nine credits must be earned at Mason.

At least eight credits of the minor courses must be unique to the Finance Minor and not applied toward any other major, minor, or concentration. Students must achieve a grade of C or better in each course that is applied toward the minor.

For additional information, see AP1.4.2 Permission to Study Elsewhere.

**Undergraduate Internship Policy**

The School of Business recognizes the importance of experiential education in both learning to apply theory to practice and positioning students for success in their careers. Because the School of Business is committed to supporting students’ professional success, the School requires that all student internships for credit be registered with the School of Business as one of the following: ACCT 492, FNAN 492, MGMT 492, MIS 492, MKTG 492, or OSCM 492. Students may enroll in a maximum of 6 credits for these courses. Only three credits of an internship course may be taken at a time. For students in catalog years Fall 2016 and beyond, one internship course may apply to the major or concentration, and a second internship course would apply as general elective credit. For students in catalog years prior to Fall 2016, a maximum of 6 credits of internship may apply to general electives. See Internship for Academic Credit (https://business.gmu.edu/career/bus492/).

**Termination from the Major**

Students who do not earn a C or higher in three attempts of School of Business Foundations and Core courses will be terminated from the School of Business. Students terminated from the School of Business are prohibited from enrolling in any School of Business course and will not be eligible to receive a degree from the School of Business.

Courses required for School of Business Foundations: ACCT 203 Survey of Accounting, BUS 100 Business and Society (Mason Core), BUS 103 Develop Professional Skills I: Foundational Elements, BUS 200 Global Environment of Business (Mason Core), BUS 210 Business Analytics I, BUS 310 Business Analytics II, ECON 103 Contemporary Microeconomic Principles (Mason Core), ECON 104 Contemporary Macroeconomic Principles (Mason Core), and MATH 108 Introductory Calculus with Business Applications (Mason Core).

Once a student has attempted a School of Business Foundations and/or Core course twice unsuccessfully, they must meet with an academic advisor in order to receive an override to register for the third attempt. Students who do not successfully complete these core courses and foundations courses within three attempts will be terminated from the School of Business and will not be eligible to receive a degree from the School of Business. Students terminated from the School of Business are prohibited from enrolling in any School of Business course.

Students terminated from the School of Business are permitted to declare the business minor only, and are not able to declare any other School of Business minors. For more information about this, see AP5.2.4 Termination from the Major. The School of Business Termination Policy is separate from the University Repeat Policy AP1.3.4.

All School of Business courses require a C or higher with the exception of FNAN 303 Financial Management for Finance majors or those with a Concentrations in Finance (B- or higher is required). No upper-level major required or elective course may be attempted for a C or higher more than three times. Once a third unsuccessful attempt is made in a School of
Business major required or elective course the student will be unable to pursue that major/concentration and must work with an academic advisor to declare a new major/concentration in the School of Business.

**University Consortium**

Students should review university policies regarding the University Consortium under Special Registration Procedures in the Academic Policies section of this catalog. Students who have attempted or failed a course at Mason are not permitted to take the equivalent course through the consortium under any circumstance. All consortium registration requests must be submitted to the dean’s office at least 3 weeks prior to the first day of classes for the relevant semester at Mason.

Any consortium course that a student wishes to register for to fulfill major or graduate-level course requirements in the School of Business must be attempted at an institution accredited by the Association to Advance Collegiate Schools of Business (AACSBB).

**Non-Business School Student Credit Limitation**

Enrolled undergraduate students who are not declared in a School of Business major are limited to 9 credits of upper-level business coursework within the School of Business. This policy applies to any student who is declared in another major or program at Mason. This policy does not apply to students who have declared a School of Business minor and are earning required credit toward that minor.

**Undergraduate Course Overload Policy**

The School of Business recommends that undergraduate students attempt no more than 18 credits in an academic semester and no more than 14 credits in a summer term. Students wishing to attempt more than 18 credits must submit a Permission to Overload form to their academic advisor.

To be eligible for a course overload, a student must fulfill all of the following criteria:

- At least a 3.0 cumulative GPA at Mason
- Have completed all courses successfully in his/her previous semester with no Fs or incompletes (IN)
- Complete the Permission to Overload form and obtain an academic advisor’s signature

Freshmen and transfer students in their first semesters are not given permission for overloads as they have yet to establish an academic record at George Mason University.

If approved for an overload, the student is responsible for adding the additional class(es) and paying for the related tuition by the official university deadlines.

**Transfer Credit Expiration Policy**

Transfer credit is not awarded for any business (management, marketing, finance, accounting, management information systems, operations management, foundations, core, or any other School of Business course), courses completed more than ten years prior to Mason enrollment. This includes any older courses completed at RBC or the VCCS.

**Laptop Policy**

All School of Business Undergraduate Students must have access to a portable computing device that meets the following minimum standards. (http://business.gmu.edu/media/com_managedlists/72/Laptop-Requirements-AY2021.pdf)

**Appeals Process**

The School of Business strives to maintain policies and procedures that are consistent with those of the University, as well as in the best interest of our students. If you have any questions concerning a particular policy or procedure, contact the Office of Student Success & Academic Services, Room 008 of Enterprise Hall (703-993-1880) or visit the website (http://business.gmu.edu).

**Courses Excluded from any School of Business BS Degree**

Transfer credit is not awarded for any School of Business courses completed more than ten years prior to Mason enrollment.

Degree Requirements

Total credits: 120

School of Business students pursuing a BS degree must complete a minimum of 120 credits, including the Mason Core requirements, business foundations, business core and major requirements. In addition, the following requirements must be met:

- A minimum of 45 credits at the 300- or 400-level.
- A minimum of 30 credits of School of Business core and major courses at Mason.
- At least 9 credits required for the specific major and BUS 498 Capstone Course: Advanced Business Models (Mason Core) taken at Mason.
- A grade of C or higher earned in the business foundations, business core and major requirements.

Students should carefully examine prerequisites for School of Business courses. Students may be removed from a course if they enroll without having fulfilled the prerequisites.

Mason Core Requirements

Some Mason Core requirements may already be fulfilled by the major requirements listed below. Students are strongly encouraged to consult their advisors to ensure they fulfill all remaining Mason Core requirements.

Total Credits 27-28

1 Mathematics students are required to complete 7 credits of natural science by completing one 4-credit laboratory science and one 3 credit non-lab science.

Note:

Remaining Mason Core requirements are fulfilled with major course work.

Business Foundations

Those who do not successfully complete these courses within three attempts will be terminated from the School of Business and will not be eligible to receive a degree from the School of Business. Students terminated from the School of Business are prohibited from enrolling in any School of Business course. Students terminated from the School of Business are permitted to declare a business minor. For more information about this, see AP 5.2.4 Termination from the Major.

1 Students must successfully complete all Business Core courses to be eligible to enroll in BUS 498

Second Major in Finance

School of Business majors declaring a second major in Finance must complete the four required courses and two elective courses for the major.

4-Year Plan

Bachelors of Science in Finance Sample Plan of Study

The sample plan below is a recommended sequencing of courses based on pre-requisites and scheduling. This may not fit every student’s needs.
and is a guideline, not a requirement. Students should confirm major requirements with their academic advisor and with PatriotWeb Degree Evaluation to ensure they enroll in the proper courses and are on track to graduate.

Honors

Honors in the Major

The School of Business Finance Honors Program provides highly motivated students majoring in finance with an enriched academic experience integrating curricular, co-curricular and extra-curricular development. Admission to the Honors Program is by invitation only.

Admission Requirements

- Minimum 3.0 cumulative Mason GPA
- A- or higher on first attempt of FNAN 303 Financial Management
- Submission of a personal statement/essay
- Two recommendations from faculty within the School of Business
- Once admitted to the program, students with a cumulative GPA below a 3.0 will be dropped from the program

Curricular Requirements

- 3.0 cumulative Mason GPA
- 3.5 GPA in the major or be in the 95th percentile GPA within the major
- B- or higher on first attempt in every major course

Co-Curricular Requirements

The student must complete ONE of the following in addition to the curriculum requirements:

- FNAN 462 Honors Seminar in Finance
- BUS 498 Capstone Course: Advanced Business Models (Mason Core) (Honors section)

Extra-Curricular Requirements

- Attendance at a minimum of two honors events, as determined by the Honors Faculty Coordinator

Requirements for Students to Obtain the Honors Designation

Honors students must meet all curricular, co-curricular, and extracurricular requirements mentioned above at graduation.

Finance, MS (pending SCHEV approval)

Banner Code: BU-MS-FNAN

Graduate Program Office

Email: sbusgrad@gmu.edu

Administration

- Alexander Philipov, Chair, Finance Area

Note: as of catalog publication in April, the program described below has been approved by the Board of Visitors and sent to the State Council of Higher Education in Virginia for consideration as a new degree program. The
The Master of Science in Finance provides students with an intensive and focused educational experience. This program enables students with limited work experience (i.e., recent undergraduates) to advance their education with a finance-focused curriculum and enhance their qualifications through a master’s degree. The program is ideal for students who have limited work experience or have decided to pursue a finance-related career path after receiving their undergraduate degrees. It is designed to equip students with advanced knowledge and abilities essential for the highly skilled financial work environment.

Admissions & Policies

Note: as of catalog publication in April, the program described below has been approved by the Board of Visitors and sent to the State Council of Higher Education in Virginia for consideration as a new degree program. The university cannot accept applications or enroll students in this program until SCHEV approval has been granted.

Admissions

Students eligible for this program must have completed all courses and requirements for their undergraduate degree by the start of the Finance, MS program.

Admission to this program is based on a combination of the following criteria:

• Undergraduate GPA (target 3.2)
• Standardized test score (e.g., GMAT/GRE) (targets: GMAT 550, GRE 303)
• Two letters of recommendation, one of which must be from a professor in the applicant’s major department or school (for currently enrolled students)
• A bachelor’s degree from an accredited university or an approved institution
• One official copy of transcripts of all colleges and universities attended in the United States and abroad
• Statement of Purpose (statement describing how and why they would benefit from the program)
• A current resume
• English proficiency standards as required of all Mason graduate students. In particular, applicants who have earned a bachelor’s, master’s or doctoral degree from a regionally accredited university in the United States, Canada (excluding province of Quebec), United Kingdom, Ireland, Australia, and New Zealand are considered to have met that standard. All other applicants are required to take an English proficiency examination and meet minimum scores set by Mason in order to be considered for admission. The TOEFL or IELTS exams can be used to meet this requirement. The minimum scores are:
  • TOEFL: IBT (minimum score: 88 total with 20 points minimum in each section); CBT (230); and PBT (570).
  • IELTS — Academic: 6.5 total band score.

Applicants will be accepted based on an acceptable combination of GMAT/GRE and cumulative grade point average from their undergraduate institution. Waivers for standardized tests may be made based on exceptional letters of recommendation from prior faculty with knowledge of the applicant’s academic capabilities. Applications will be reviewed by the School of Business admissions team using pre-approved admissions criteria to either accept or deny the applicant. In case of ambiguity, a second-level review comprised of faculty members from the Finance area will submit their votes to the admissions team. Applications will be made with the Office of Graduate Admissions (https://www2.gmu.edu/admissions-aid/how-apply/graduate/) at Mason.

Policies

For policies governing all graduate degrees, see AP6 Graduate Policies.

Forensic Accounting Graduate Certificate

Banner Code: BU-CERG-FACC

Graduate Program Office

Phone: 703-993-8006
Email: sbusgrad@gmu.edu

The Graduate Certificate in Forensic Accounting provides an opportunity for students to acquire education in the emerging field of forensic accounting. Students with a bachelor’s degree in accounting can also use the certificate as a means of obtaining the necessary 150 hours of academic credit to qualify to sit for the Virginia CPA exam.
The Forensic Accounting Graduate Certificate may be pursued on a part-time basis. Maintaining full-time status is not guaranteed.

**Admissions & Policies**

**Admissions**

**Eligibility Requirements**
All students registering for School of Business graduate courses must have graduate standing. Non-degree student status is not available. Full eligibility and admission requirements can be viewed at the school's website (http://business.gmu.edu/masters-in-accounting/forensic-accounting/).

**Policies**
For policies governing all graduate certificates, see AP.6.8 Requirements for Graduate Certificates.

Students are responsible for familiarization and compliance with the university's Graduate Policies contained in this catalog. A minimum of 3 graduate credits taken at another institution can be transferred to the graduate certificate. The time limit for completion is four years from the date of admission to the graduate certificate. Students must have a minimum GPA of 3.0 to complete the certificate.

**Requirements**

**Certificate Requirements**
Total credits: 12

This certificate may be pursued on a part-time basis only.

**Global IT Leadership Graduate Certificate**

**Banner Code:** BU-CERG-GITL

**Graduate Program Office**
Phone: 703-993-8006
Email: sbusgrad@gmu.edu

The graduate certificate in Global IT Leadership is designed to help students gain an understanding of emerging markets and innovation opportunities, enhance student knowledge at the intersection of global business and technology, and expose students to global challenges through an international residency. Students will participate in a 7-10 day study abroad trip as a part of this certificate where they will be exposed to C-suite business executives and government leaders to learn about doing business in a foreign country. Courses taken in the Global IT Leadership graduate certificate can be applied toward the MS in Technology Management program upon acceptance into the degree program.

**Admissions & Policies**

**Admissions**
All students registering for School of Business graduate courses must have graduate standing. Non-degree student status is not available.

Full eligibility and admission requirements can be viewed on the program website (http://business.gmu.edu/masters-in-technology-management/global-it-leadership-certificate/).

**Policies**
Students may use the credits completed as part of their graduate degree requirements in accordance with program requirements and AP6 Graduate Policies. A maximum of 3 graduate credits taken at another institution can be transferred to the graduate certificate. The time limit for completion is four years from the date of admission to the graduate certificate. Students must have a minimum GPA of 3.0 to complete the certificate.

**Government Contracting Minor**

Banner Code: GOVC

**Academic Advising**

Phone: 703-993-1880
Email: masonbus@gmu.edu

**Administration**

• David Gallay, Director of Minor Programs

The government contracting market sector is huge. At the federal level, alone, the U.S. General Accountability Office reported that annual obligations through contracts for goods and services exceeded $430 billion. Many of the federal agencies that contract for goods and services, as well as the contractors that carry out those contracts, are in the Washington DC metropolitan area. There is a need to prepare those Business School students who seek careers in government agencies or with government contractors with the skills and knowledge to promote success in their careers. A minor in government contracting will meet this need by providing students with an understanding of the best practices, processes, and methodologies of government contracting. Students will gain this understanding from a government agency’s perspective, as well as from a government contractor’s perspective.

**Admissions & Policies**

**Policies**

At least eight credits of the minor courses must be unique to the Government Contracting Minor and not applied toward any other major, minor, or concentration. Students must achieve a grade of C or better in each course that is applied toward the minor. For policies governing all minors, see AP5.3.4 Minors.

Information Security Management, MS (pending SCHEV approval)

Banner Code: BU-MS-ISMG

School of Business Graduate Programs
Email: sbusgrad@gmu.edu

Administration
• Nirup Menon, PhD, Area Chair, ISOM

Note: as of catalog publication in April, the program described below has been approved by the Board of Visitors and sent to the State Council of Higher Education in Virginia for consideration as a new degree program. The university cannot accept applications or enroll students in this program until SCHEV approval has been granted.

The Master of Science in Information Security Management prepares students to manage the security of data and information such as financial information, intellectual property, personally identifiable information, and information entrusted by third parties. The program focuses on building competencies in information security management through an appropriate blend of deep business and requisite technical knowledge through topics such as security analytics, governance, auditing, risk management, economics of information security, and managing vendors and partners. It provides students with the knowledge and skills to be able to prioritize security deficits and the solutions to address these deficits from a business perspective.

Admissions & Policies

Note: as of catalog publication in April, the program described below has been approved by the Board of Visitors and sent to the State Council of Higher Education in Virginia for consideration as a new degree program. The university cannot accept applications or enroll students in this program until SCHEV approval has been granted.

Admissions
All students registering for School of Business graduate courses must have graduate standing. Non-degree student status is not available.

Full eligibility and admission requirements can be viewed here (http://business.gmu.edu).

Policies
Students are responsible for familiarization and compliance with the university’s Graduate Policies.

It is recommended that students have a C or better in MIS 310 and MIS 320 (or equivalent courses) before taking the core courses. Students without these recommended prerequisite courses will work with an academic advisor in the ISOM department/School of Business on avenues to remedy the lack of these competencies prior to taking the core courses.

Requirements

Degree Requirements
Total credits: 36

Note: As of catalog publication in April, the program described below has been approved by the Board of Visitors and sent to the State Council of Higher Education in Virginia (SCHEV) for consideration as a new degree program. The university cannot accept applications or enroll students in this program until SCHEV approval has been granted. Check the school/department website for current program status.

Information Systems and Operations Management, BS

Banner Code: BU-BS-ISOM

Academic Advising
Phone: 703-993-1880
Email: masonbus@gmu.edu

Administration
- Nirup Menon, Chair, Information Systems and Operations Management Area

The Bachelor of Science in Information Systems and Operations Management (ISOM) prepares students with the skills to analyze and leverage information systems and operational processes to address real-world problems and opportunities. The curriculum highlights the interaction of technology, processes and people, helping students gain an understanding of these components and their impact on business value. ISOM graduates apply this knowledge of information technology and operations management to analyze, design, and improve business processes through better information systems design and implementation, and associated project management. Further, ISOM graduates deliver seamless technology-enabled solutions for improving organizational processes and supply chains by integrating different business functions, collaborating with business units in defining requirements, identifying new IT-driven business opportunities, prototyping the solutions, and managing complex projects. ISOM majors also have opportunities to pursue specialized elective tracks in operations, supply chain management, business analytics, and information security.

Admissions & Policies

Policies

Academic Policies
Students should become familiar with the university’s general academic policies in addition to those specific to each academic unit.

E-mail
George Mason University uses only Mason e-mail accounts to communicate with enrolled students. Students should activate their Mason e-mail, use it to communicate with their school/department/program and other administrative units, and check it regularly for important information.

Study Elsewhere Policy
A student who has matriculated at Mason may transfer a limited number of hours (9 for undergraduates, 6 for graduates) of coursework in School of Business disciplines from another institution (not including registration through the Consortium of Universities of the Washington Metropolitan Area or coursework completed through the Center for Global Education). Students are permitted to take courses elsewhere under unusual circumstances—these circumstances do not include scheduling or commuting convenience, or financial (lower cost) reasons.

Special instructions for School of Business students: courses that are attempted at a two-year institution may not be used to fulfill upper-level requirements. Any course that a student wished to transfer to fulfill major or graduate-level course requirements in the School of Business must be attempted at an institution accredited by the Association to Advance Collegiate Schools of Business (AACSB).

For additional information, see AP1.4.2 Permission to Study Elsewhere.

Undergraduate Internship Policy
The School of Business recognizes the importance of experiential education in both learning to apply theory to practice and positioning students for success in their careers. Because the School of Business is committed to supporting students’ professional success, the School requires that all student internships for credit be registered with the School of Business as one of the following: ACCT 492, FNAN 492, MGMT 492, MIS 492, MKTG 492, or OSCM 492. Students may enroll in a maximum of 6 credits for these courses. Only three credits of an internship course may be taken at a time. For students in catalog years Fall 2016 and beyond, one internship course may apply to the major or concentration, and a second internship course would apply as general elective credit. For students in catalog years prior to Fall 2016, a maximum of 6 credits of internship may apply to general electives. See Internship for Academic Credit (https://business.gmu.edu/career/bus492/).

Termination from the Major
Students who do not earn a C or higher in three attempts of School of Business Foundations and Core courses will be terminated from the School of Business. Students terminated from the School of Business are prohibited from enrolling in any School of Business course and will not be eligible to receive a degree from the School of Business.

Courses required for School of Business Foundations: ACCT 203 Survey of Accounting, BUS 100 Business and Society (Mason Core), BUS 103 Develop Professional Skills I: Foundational Elements, BUS 200 Global

Total Credits: 12
Environment of Business (Mason Core), BUS 210 Business Analytics I, BUS 310 Business Analytics II, ECON 103 Contemporary Microeconomic Principles (Mason Core), ECON 104 Contemporary Macroeconomic Principles (Mason Core), and MATH 108 Introductory Calculus with Business Applications (Mason Core).

Once a student has attempted a School of Business Foundations and/or Core course twice unsuccessfully, they must meet with an academic advisor in order to receive an override to register for the third attempt. Students who do not successfully complete these core courses and foundations courses within three attempts will be terminated from the School of Business and will not be eligible to receive a degree from the School of Business. Students terminated from the School of Business are prohibited from enrolling in any School of Business course.

Students terminated from the School of Business are permitted to declare the business minor only, and are not able to declare any other School of Business minors. For more information about this, see AP .5.2.4 Termination from the Major. The School of Business Termination Policy is separate from the University Repeat Policy AP1.3.4.

All School of Business courses require a C or higher with the exception of FNAN 303 Financial Management for Finance majors or those with a Concentrations in Finance (B- or higher is required). No upper-level major required or elective course may be attempted for a C or higher more than three times. Once a third unsuccessful attempt is made in a School of Business major required or elective course the student will be unable to pursue that major/concentration and must work with an academic advisor to declare a new major/concentration in the School of Business.

University Consortium

Students should review university policies regarding the University Consortium under Special Registration Procedures in the Academic Policies section of this catalog. Students who have attempted or failed a course at Mason are not permitted to take the equivalent course through the consortium under any circumstance. All consortium registration requests must be submitted to the dean’s office at least 3 weeks prior to the first day of classes for the relevant semester at Mason.

Any consortium course that a student wishes to register for to fulfill major or graduate-level course requirements in the School of Business must be attempted at an institution accredited by the Association to Advance Collegiate Schools of Business (AACSB).

Non-Business School Student Credit Limitation

Enrolled undergraduate students who are not declared in a School of Business major are limited to 9 credits of upper-level business coursework within the School of Business. This policy applies to any student who is declared in another major or program at Mason. This policy does not apply to students who have declared a School of Business minor and are earning required credit toward that minor.

Undergraduate Course Overload Policy

The School of Business recommends that undergraduate students attempt no more than 18 credits in an academic semester and no more than 14 credits in a summer term. Students wishing to attempt more than 18 credits must submit a Permission to Overload form to their academic advisor.

To be eligible for a course overload, a student must fulfill all of the following criteria:

- At least a 3.0 cumulative GPA at Mason
- Have completed all courses successfully in his/her previous semester with no Fs or incompletes (IN)
- Complete the Permission to Overload form and obtain an academic advisor’s signature

Freshmen and transfer students in their first semesters are not given permission for overloads as they have yet to establish an academic record at George Mason University.

If approved for an overload, the student is responsible for adding the additional class(es) and paying for the related tuition by the official university deadlines.

Transfer Credit Expiration Policy

Transfer credit is not awarded for any business (management, marketing, finance, accounting, management information systems, operations management, foundations, core, or any other School of Business course), courses completed more than ten years prior to Mason enrollment. This includes any older courses completed at RBC or the VCCS.

Laptop Policy

All School of Business Undergraduate Students must have access to a portable computing device that meets the following minimum standards. (http://business.gmu.edu/media/com_managedlists/72/Laptop-Requirements-AY2021.pdf)

Appeals Process

The School of Business strives to maintain policies and procedures that are consistent with those of the University, as well as in the best interest of our students. If you have any questions concerning a particular policy or procedure, contact the Office of Student Success & Academic Services, Room 008 of Enterprise Hall (703-993-1880) or visit the website (http://business.gmu.edu).

Courses Excluded from any School of Business BS Degree

Transfer credit is not awarded for any School of Business courses completed more than ten years prior to Mason enrollment.

Requirements

Degree Requirements
Total credits: 120
School of Business students pursuing a BS degree must complete a minimum of 120 credits, including the Mason Core requirements, business foundations, business core and major requirements. In addition, the following requirements must be met:

• A minimum of 45 credits at the 300- or 400-level.
• A minimum of 30 credits of School of Business core and major courses at Mason.
• At least 9 credits required for the specific major.
• A grade of C or higher earned in the business foundations, business core and major requirements.

Students should carefully examine prerequisites for School of Business courses. Students may be removed from a course if they enroll without having fulfilled the prerequisites.

Mason Core Requirements
School of Business students must complete the Mason Core requirements. Some Mason Core requirements may already be fulfilled by the major requirements listed below. Students are strongly encouraged to consult their advisors to ensure they fulfill all remaining Mason Core requirements.

Electives

Select 12 credits from the following:

- MIS 320 Networks and Security
- MIS 341 Cloud Computing Essentials
- MIS 350 Introduction to Programming for Business Applications
- MIS 410 Advanced Database Systems
- MIS 412 E-Business Systems Development
- MIS 415 Information Systems Audit and Control
- MIS 420 Information Security and Assurance
- MIS 430 Data Warehousing
- MIS 431 Data Mining for Business Applications
- MIS 432 Advanced Data Mining
- MIS 433 Programming for Analytics
- MIS 441 Cloud System Management
- MIS 462 Honors Seminar in Management Information Systems (Topic Varies)
- MIS 491 Seminar in Management Information Systems
- MIS 492 Internship in Management Information Systems
- MIS 499 Independent Study in Management Information Systems
- OSCM 320 Supply Chain Management in a Global Economy
- or OM 320 Supply Chain Management in a Global Economy
- OSCM 330 Service Operations
- OSCM 352 Management Science
- OSCM 430 Design Thinking for Innovations Operations
- OSCM 435 Business Process Analysis and Simulation
- or OM 435 Business Process Analysis and Simulation
- OSCM 440 Public Sector Operations
- OSCM 452 Business Forecasting
Optional Concentrations

Students have considerable flexibility in their choice of electives and may choose from two concentrations of study: one in Operations and Supply Chain Management (OSCM) and the other in Management Information Systems (MIS). Students are strongly urged to discuss their choice of electives and programs of study with their academic advisor and an ISOM faculty member. Concentrations must be declared prior to a student filing an intent to graduate.

Concentration in Operations and Supply Chain Management (OSCM)

If a student has taken any four of the following electives, beyond the ISOM required courses, they can declare an OSCM concentration.

<table>
<thead>
<tr>
<th>Code</th>

Total Credits 3

1. Students must successfully complete all Business Core courses to be eligible to enroll in BUS 498

Second Major in Information Systems and Operations Management

School of Business majors declaring a second major in Information Systems and Operations Management must complete the three required courses and three elective courses for the major.
# 4-Year Plan

## Bachelors of Science in Information Systems & Operations Management (ISOM) Sample Plan of Study

The sample plan below is a recommended sequencing of courses based on pre-requisites and scheduling. This may not fit every student's needs and is a guideline, not a requirement. Students should confirm major requirements with their academic advisor and with PatriotWeb Degree Evaluation to ensure they enroll in the proper courses and are on track to graduate.

## Honors

### Honors in the Major

The School of Business ISOM Honors Program provides highly motivated students majoring in ISOM with an enriched academic experience integrating curricular, co-curricular and extra-curricular development. Admission to the Honors Program is by invitation only.

### Admission Requirements

- Minimum 3.0 cumulative Mason GPA
- A- or higher on first attempt MIS 303 or OSCM 303
- Submission of a personal statement/essay
- Two recommendations from faculty within the School of Business
- Once admitted to the program, students with a cumulative GPA below a 3.0 will be dropped from the program

### Curricular Requirements

- 3.0 cumulative Mason GPA
- 3.5 GPA in the major or be in the 95th percentile GPA within the major
- B- or higher on first attempt in every major course

### Co-Curricular Requirements

The student must complete ONE of the following in addition to the curriculum requirements:

- MIS 462 Honors Seminar in Management Information Systems (Topic Varies)
- OSCM 462 Honors Seminar in Operations Management (Topic Varies)
- BUS 498 Capstone Course: Advanced Business Models (Mason Core) (Honors section)

### Extra-Curricular Requirements

- Attendance at a minimum of two honors events, as determined by the Honors Faculty Coordinator

### Requirements for Students to Obtain the Honors Designation

- Honors students must meet all curricular, co-curricular, and extracurricular requirements mentioned above at graduation.

## International Business Minor

Banner Code: IB

### Academic Advising

Phone: 703-993-1880
Email: masonbus@gmu.edu
The minor in International Business provides an introduction for those students interested in learning more about elements of business unique to international organizations or in pursuing a career in international business. With a strong set of business skills developed through the core undergraduate curriculum and their majors, students in the International Business Minor can further develop their skills in managing and communicating across different cultures, improve their understanding of how specific business disciplines vary in an international setting, and cultivate an appreciation for international monetary issues.

**Admissions & Policies**

**Policies**

Students must complete five courses for a total of 15 credits. At least eight credits of the minor courses must be unique to the International Business Minor and not applied toward any other major, minor, or concentration. Students must achieve a grade of C or better in each course that is applied to the minor.

For policies governing all minors, see AP.5.3.4 Minors. The School of Business residency requirement for this minor supersedes the university requirement: at least nine credits must be earned at Mason.

**Requirements**

**Minor Requirements**

Total credits: 15

</tr>
</tbody>
</table>

Select four electives from the following: ¹

Total Credits: 12

¹ A maximum of one ECON or GOVT course may count towards the minor. The other three electives must be School of Business coursework.

**Co-Curricular Requirement**

Students must complete one of the following in addition to the curriculum requirements:

**Global Experience**

- Global residency course;
- An international internship abroad;
- A domestic internship with significant international experience;
- An approved study abroad program; or
- Study at a Mason campus or a Mason joint program overseas

OR

**Foreign Language**

- One language study course; or
- A course taught in foreign literature when taught in a foreign language

**IT Strategy and Digital Transformation Graduate Certificate**

Banner Code: BU-CERG-ITDT

Graduate Program Office

Phone: 703-993-8006
Email: sbusgrad@gmu.edu

The graduate certificate in IT Strategy and Digital Transformation is designed to develop skills for designing a digital transformation strategy, enhance knowledge at the intersection of emerging technologies and digital transformation, and expose students to real world applications through company use cases. Courses taken in the IT Strategy and Digital Transformation graduate certificate can be applied toward the MS in Technology Management program upon acceptance into the degree program.

**Admissions & Policies**

**Admissions**

All students registering for School of Business graduate courses must have graduate standing. Non-degree student status is not available.

**Policies**

Students may use the credits completed as part of their graduate degree requirements in accordance with program requirements and AP6 Graduate Policies. A maximum of 3 graduate credits taken at another institution can be transferred to the graduate certificate. The time limit
for completion is four years from the date of admission to the graduate certificate. Students must have a minimum GPA of 3.00 to complete the certificate.

### Requirements

#### Certificate Requirements

Total credits: 12

This certificate may be pursued on a full- or part-time basis.

### Management Information Systems Minor

Banner Code: MIS

Phone: 703-993-1880

Website: business.gmu.edu

#### Administration

- David Gallay, Director of Minor Programs

With the growth in Internet-based companies and the digitization of processes and data in traditional companies, the demand for business analysts, data analysts, and information systems professionals is growing in most economies. The MIS minor offers Business and other Mason undergraduate students a focused set of courses that provide them foundational knowledge and skills in management information systems. The focus is on applying information systems solutions to business problems. The minor is not intended for MIS/IT/CS majors. It is intended for students who could benefit from a deeper understanding of MIS as it relates to their major. The benefit of being able to apply information systems solutions in their chosen career would make the students more marketable/attractive to employers in an increasingly digital economy. The MIS minor offers a useful and attractive option for both business and non-business students.

### Admissions & Policies

#### Policies

The School of Business residency requirement for this minor supersedes the university requirement: at least nine credits must be earned at Mason.

At least eight credits of the minor courses must be unique to the MIS Minor and not applied toward any other major, minor, or concentration. Students must achieve a grade of C or better in each course that is applied toward the minor. For policies governing all minors, see AP.5.3.4 Minors.

### Management, BS

Banner Code: BU-BS-MGMT

#### Academic Advising

Phone: 703-993-1880

Email: masonbus@gmu.edu

#### Administration

- Masoud Yasai, Chair, Management Area
The Bachelor of Science in Management prepares students to take leadership, management, and entrepreneurial roles in the public and private sectors. Students learn such skills as strategic thinking, motivating and managing a nationally and internationally diverse workforce, building and leading team efforts, negotiating successfully, and instituting planned change in organizations.

Admissions & Policies

Policies

Academic Policies

Students should become familiar with the university's general academic policies in addition to those specific to each academic unit.

E-mail

George Mason University uses only Mason e-mail accounts to communicate with enrolled students. Students should activate their Mason e-mail, use it to communicate with their school/department/program and other administrative units, and check it regularly for important information.

Study Elsewhere Policy

A student who has matriculated at Mason may transfer a limited number of hours (9 for undergraduates, 6 for graduates) of coursework in School of Business disciplines from another institution (not including registration through the Consortium of Universities of the Washington Metropolitan Area or coursework completed through the Center for Global Education). Students are permitted to take courses elsewhere under unusual circumstances—these circumstances do not include scheduling or commuting convenience, or financial (lower cost) reasons.

Special instructions for School of Business students: courses that are attempted at a two-year institution may not be used to fulfill upper-level requirements. Any course that a student wished to transfer to fulfill major or graduate-level course requirements in the School of Business must be attempted at an institution accredited by the Association to Advance Collegiate Schools of Business (AACSB).

For additional information, see AP.1.4.2 Permission to Study Elsewhere.

Undergraduate Internship Policy

The School of Business recognizes the importance of experiential education in both learning to apply theory to practice and positioning students for success in their careers. Because the School of Business is committed to supporting students' professional success, the School requires that all student internships for credit be registered with the School of Business as one of the following: ACCT 492, FNAN 492, MGMT 492, MIS 492, MKTG 492, or OSCM 492. Students may enroll in a maximum of 6 credits for these courses. Only three credits of an internship course may be taken at a time. For students in catalog years Fall 2016 and beyond, one internship course may be attempted for a C or higher more than three times. Once a student has attempted a School of Business Foundations and/Core course twice unsuccessfully, they must meet with an academic advisor to declare a new major/concentration in the School of Business.

Termination from the Major

Students who do not successfully complete these core courses and foundations courses within three attempts will be terminated from the School of Business and will not be eligible to receive a degree from the School of Business. Students terminated from the School of Business are prohibited from enrolling in any School of Business course.

Courses required for School of Business Foundations: ACCT 203 Survey of Accounting, BUS 100 Business and Society (Mason Core), BUS 103 Develop Professional Skills I: Foundational Elements, BUS 200 Global Environment of Business (Mason Core), BUS 210 Business Analytics I, BUS 310 Business Analytics II, ECON 103 Contemporary Macroeconomic Principles (Mason Core), ECON 104 Contemporary Macroeconomic Principles (Mason Core), and MATH 108 Introductory Calculus with Business Applications (Mason Core).

Once a student has attempted a School of Business Foundations and/or Core course twice unsuccessfully, they must meet with an academic advisor in order to receive an override to register for the third attempt. Students who do not successfully complete these core courses and foundations courses within three attempts will be terminated from the School of Business and will not be eligible to receive a degree from the School of Business. Students terminated from the School of Business are prohibited from enrolling in any School of Business course.

Students terminated from the School of Business are permitted to declare the business minor only, and are not able to declare any other School of Business minors. For more information about this, see AP.5.2.4 Termination from the Major. The School of Business Termination Policy is separate from the University Repeat Policy AP.1.3.4.

All School of Business courses require a C or higher with the exception of FNAN 303 Financial Management for Finance majors or those with a Concentrations in Finance (B- or higher is required). No upper-level major required or elective course may be attempted for a C or higher more than three times. Once a third unsuccessful attempt is made in a School of Business major required or elective course the student will be unable to pursue that major/concentration and must work with an academic advisor to declare a new major/concentration in the School of Business.

University Consortium

Students should review university policies regarding the University Consortium under Special Registration Procedures in the Academic Policies section of this catalog. Students who have attempted or failed a course at Mason are not permitted to take the equivalent course through the consortium under any circumstance. All consortium registration requests must be submitted to the dean’s office at least 3 weeks prior to the first day of classes for the relevant semester at Mason.

Any consortium course that a student wishes to register for to fulfill major or graduate-level course requirements in the School of Business must be attempted at an institution accredited by the Association to Advance Collegiate Schools of Business (AACSB).

Non-Business School Student Credit Limitation

Enrolled undergraduate students who are not declared in a School of Business major are limited to 9 credits of upper-level business coursework within the School of Business. This policy applies to any
student who is declared in another major or program at Mason. This policy does not apply to students who have declared a School of Business minor and are earning required credit toward that minor.

**Undergraduate Course Overload Policy**

The School of Business recommends that undergraduate students attempt no more than 18 credits in an academic semester and no more than 14 credits in a summer term. Students wishing to attempt more than 18 credits must submit a Permission to Overload form to their academic advisor.

To be eligible for a course overload, a student must fulfill all of the following criteria:

- At least a 3.0 cumulative GPA at Mason
- Have completed all courses successfully in his/her previous semester with no Fs or incompletes (IN)
- Complete the Permission to Overload form and obtain an academic advisor's signature

Freshmen and transfer students in their first semesters are not given permission for overloads as they have yet to establish an academic record at George Mason University.

If approved for an overload, the student is responsible for adding the additional class(es) and paying for the related tuition by the official university deadlines.

**Transfer Credit Expiration Policy**

Transfer credit is not awarded for any business (management, marketing, finance, accounting, management information systems, operations management, foundations, core, or any other School of Business course), courses completed more than ten years prior to Mason enrollment. This includes any older courses completed at RBC or the VCCS.

**Laptop Policy**

All School of Business Undergraduate Students must have access to a portable computing device that meets the following minimum standards. (http://business.gmu.edu/media/com_managedlists/72/Laptop-Requirements-AY2021.pdf)

**Appeals Process**

The School of Business strives to maintain policies and procedures that are consistent with those of the University, as well as in the best interest of our students. If you have any questions concerning a particular policy or procedure, contact the Office of Student Success & Academic Services, Room 008 of Enterprise Hall (703-993-1880) or visit the website (http://business.gmu.edu).

**Courses Excluded from any School of Business BS Degree**

Transfer credit is not awarded for any School of Business courses completed more than ten years prior to Mason enrollment.

Degree Requirements

Total credits: 120

School of Business students pursuing a BS degree must complete a minimum of 120 credits, including the Mason Core requirements, business foundations, core and major requirements. In addition, the following requirements must be met:

- A minimum of 45 credits at the 300- or 400-level.
- A minimum of 30 credits of School of Business core and major courses at Mason.
- At least 9 credits required for the specific major and BUS 498 Capstone Course: Advanced Business Models (Mason Core) taken at Mason.
- A grade of C or higher earned in the business foundations, business core and major requirements.

Students should carefully examine prerequisites for School of Business courses. Students may be removed from a course if they enroll without having fulfilled the prerequisites.

Mason Core Requirements

School of Business students must complete the Mason Core requirements. Some Mason Core requirements may already be fulfilled by the major requirements listed below. Students are strongly encouraged to consult their advisors to ensure they fulfill all remaining Mason Core requirements.

</tbody>
</table>

Total Credits: 27-28

1. MATH 108 or MATH 113 satisfies the Mason Core Quantitative Reasoning requirement

Business Foundations

Those who do not successfully complete these courses within three attempts will be terminated from the School of Business and will not be eligible to receive a degree from the School of Business. Students terminated from the School of Business are prohibited from enrolling in any School of Business course. Students terminated from the School of Business are permitted to declare a business minor. For more information about this, see AP.5.2.4 Termination from the Major.

Second Major in Management

School of Business majors declaring a second major in Management must complete the two required courses and four elective courses for the major.

Honors

Honors in the Major

The School of Business Management Honors Program provides highly motivated students majoring in management with an enriched academic experience integrating curricular, co-curricular and extra-curricular development. Admission to the Honors Program is by invitation only.

Admission Requirements

- Minimum 3.0 cumulative Mason GPA
- A- or higher on first attempt of MGMT 303
- Submission of a personal statement/essay
- Two recommendations from faculty within the School of Business
- Once admitted to the program, students with a cumulative GPA below a 3.0 will be dropped from the program

Curricular Requirements

- 3.0 cumulative Mason GPA
- 3.5 GPA in the major or be in the 95th percentile GPA within the major
- B- or higher on first attempt in every major course

Co-Curricular Requirements

The student must complete ONE of the following in addition to the curriculum requirements:
• MGMT 462 Honors Seminar in Management (Topic Varies)
• BUS 498 Capstone Course: Advanced Business Models (Mason Core) (Honors section)

Extra-Curricular Requirements
• Attendance at a minimum of two honors events, as determined by the Honors Faculty Coordinator

Requirements for Students to Obtain the Honors Designation
• Honors students must meet all curricular, co-curricular, and extracurricular requirements mentioned above at graduation

4-Year Plan

Bachelors of Science in Management
The sample plan below is a recommended sequencing of courses based on pre-requisites and scheduling. This may not fit every student's needs and is a guideline, not a requirement. Students should confirm major requirements with their academic advisor and with PatriotWeb Degree Evaluation to ensure they enroll in the proper courses and are on track to graduate.

Administration
• Victoria Grady, Director, MS in Management Program

The program prepares recent graduates of non-business majors for success in business fields. The Master of Science in Management offers the fundamentals of business management in a global environment and is composed of the core discipline areas common to all business graduate programs that are accredited by the Association to Advance Collegiate Schools of Business (AACSB). It is a full time, daytime program. Students will enter as a cohort and complete all degree requirements within 11 months.

Admissions & Policies

Admissions
Admissions and Eligibility Requirements
Admission to the Master of Science in Management is contingent on applicants having completed an undergraduate degree program within 24 months prior to when they would enroll in the program.

Policies
For policies governing all graduate degrees, see AP6 Graduate Policies.

1 Course options not used to fulfill the Global requirement can be applied toward the Elective requirement.

Administration

- David Gallay, Director of Minor Programs

The Marketing Minor provides any student who is interested in marketing a solid foundation for understanding the needs of the customer and in the principles of marketing management. This includes understanding new product development, creating marketing communications and promotions, managing customer relationships, and analyzing consumer and market trends. Learning outcomes also include the value organizations create for their customers, and opportunities and threats in the global marketplace.

This minor provides a wide range of marketing classes that can enhance major coursework in other academic disciplines. In the required courses, students learn about the voice of the consumer and customer behavior, and explore fundamental marketing principles. In the elective courses, students can tailor their focus with a variety of specialized topics.

Admissions & Policies

Policies

For policies governing all minors, see AP.5.3.4 Minors. The School of Business residency requirement for this minor supersedes the university requirement: at least nine credits must be earned at Mason.

At least eight credits of the minor courses must be unique to the Business Minor and not applied toward any other major, minor, or concentration. Students must achieve a grade of C or better in each course that is applied toward the minor. This minor is available to all non-Marketing majors at the University with a minimum of sophomore standing.

Academic Advising

Phone: 703-993-1880
Email: masonbus@gmu.edu
The Bachelor of Science in Marketing prepares students for a broad range of global and domestic career options in corporations, small businesses, government, and nonprofits. A marketing degree provides students with a solid foundation in marketing management for understanding the needs of the customer, the value organizations create for their customers, and opportunities and threats in the global marketplace. Students learn marketing concepts and practices related to consumer behavior, marketing research and analytics, and marketing planning and strategy (product development, pricing, distribution, and advertising and promotions). Our graduates work in such diverse fields as advertising and marketing communications, product and brand management, customer relationship management, new product/service development, new market and business development, sales, retail management, marketing research and analytics, and digital and social media marketing.

Admissions & Policies

Policies
Academic Policies
Students should become familiar with the university’s general academic policies in addition to those specific to each academic unit.

E-mail
George Mason University uses only Mason e-mail accounts to communicate with enrolled students. Students should activate their Mason e-mail, use it to communicate with their school/department/program and other administrative units, and check it regularly for important information.

Study Elsewhere Policy
A student who has matriculated at Mason may transfer a limited number of hours (9 for undergraduates, 6 for graduates) of coursework in School of Business disciplines from another institution (not including registration through the Consortium of Universities of the Washington Metropolitan Area or coursework completed through the Center for Global Education). Students are permitted to take courses elsewhere under unusual circumstances—these circumstances do not include scheduling or commuting convenience, or financial (lower cost) reasons.

Special instructions for School of Business students: courses that are attempted at a two-year institution may not be used to fulfill upper-level requirements. Any course that a student wished to transfer to fulfill major or graduate-level course requirements in the School of Business must be attempted at an institution accredited by the Association to Advance Collegiate Schools of Business (AACSB).

For additional information, see AP1.4.2 Permission to Study Elsewhere.

Undergraduate Internship Policy
The School of Business recognizes the importance of experiential education in both learning to apply theory to practice and positioning students for success in their careers. Because the School of Business is committed to supporting students’ professional success, the School requires that all student internships for credit be registered with the School of Business as one of the following: ACCT 492, FNAN 492, MGMT 492, MIS 492, MKTG 492, or OSCM 492. Students may enroll in a maximum of 6 credits for these courses. Only three credits of an internship course may be taken at a time. For students in catalog years Fall 2016 and beyond, one internship course may apply to the major or concentration, and a second internship course would apply as general elective credit. For students in catalog years prior to Fall 2016, a maximum of 6 credits of internship may apply to general electives. See Internship for Academic Credit (https://business.gmu.edu/career/bus492/).

Termination from the Major
Students who do not earn a C or higher in three attempts of School of Business Foundations and Core courses will be terminated from the School of Business. Students terminated from the School of Business are prohibited from enrolling in any School of Business course and will not be eligible to receive a degree from the School of Business.

Courses required for School of Business Foundations: ACCT 203 Survey of Accounting, BUS 100 Business and Society (Mason Core), BUS 103 Develop Professional Skills I: Foundational Elements, BUS 200 Global Environment of Business (Mason Core), BUS 210 Business Analytics I, BUS 310 Business Analytics II, ECON 103 Contemporary Microeconomic Principles (Mason Core), ECON 104 Contemporary Macroeconomic Principles (Mason Core), and MATH 108 Introductory Calculus with Business Applications (Mason Core).

Once a student has attempted a School of Business Foundations and/or Core course twice unsuccessfully, they must meet with an academic advisor in order to receive an override to register for the third attempt. Students who do not successfully complete these core courses and foundations courses within three attempts will be terminated from the School of Business and will not be eligible to receive a degree from the School of Business. Students terminated from the School of Business are prohibited from enrolling in any School of Business course.
Students terminated from the School of Business are permitted to declare the business minor only, and are not able to declare any other School of Business minors. For more information about this, see AP5.2.4 Termination from the Major. The School of Business Termination Policy is separate from the University Repeat Policy AP1.3.4.

All School of Business courses require a C or higher with the exception of FNAN 303 Financial Management for Finance majors or those with a Concentrations in Finance (B- or higher is required). No upper-level major required or elective course may be attempted for a C or higher more than three times. Once a third unsuccessful attempt is made in a School of Business major required or elective course the student will be unable to pursue that major/concentration and must work with an academic advisor to declare a new major/concentration in the School of Business.

University Consortium

Students should review university policies regarding the University Consortium under Special Registration Procedures in the Academic Policies section of this catalog. Students who have attempted or failed a course at Mason are not permitted to take the equivalent course through the consortium under any circumstance. All consortium registration requests must be submitted to the dean’s office at least 3 weeks prior to the first day of classes for the relevant semester at Mason.

Any consortium course that a student wishes to register for to fulfill major or graduate-level course requirements in the School of Business must be attempted at an institution accredited by the Association to Advance Collegiate Schools of Business (AACSB).

Non-Business School Student Credit Limitation

Enrolled undergraduate students who are not declared in a School of Business major are limited to 9 credits of upper-level business coursework within the School of Business. This policy applies to any student who is declared in another major or program at Mason. This policy does not apply to students who have declared a School of Business minor and are earning required credit toward that minor.

Undergraduate Course Overload Policy

The School of Business recommends that undergraduate students attempt no more than 18 credits in an academic semester and no more than 14 credits in a summer term. Students wishing to attempt more than 18 credits must submit a Permission to Overload form to their academic advisor.

To be eligible for a course overload, a student must fulfill all of the following criteria:

- At least a 3.0 cumulative GPA at Mason
- Have completed all courses successfully in his/her previous semester with no Fs or incompletes (IN)
- Complete the Permission to Overload form and obtain an academic advisor's signature

Freshmen and transfer students in their first semesters are not given permission for overloads as they have yet to establish an academic record at George Mason University.

If approved for an overload, the student is responsible for adding the additional class(es) and paying for the related tuition by the official university deadlines.

Transfer Credit Expiration Policy

Transfer credit is not awarded for any business (management, marketing, finance, accounting, management information systems, operations management, foundations, core, or any other School of Business course), courses completed more than ten years prior to Mason enrollment. This includes any other courses completed at RBC or the VCCS.

Laptop Policy

All School of Business Undergraduate Students must have access to a portable computing device that meets the following minimum standards. (http://business.gmu.edu/media/commanagedlists/72/Laptop-Requirements-AY2021.pdf)

Appeals Process

The School of Business strives to maintain policies and procedures that are consistent with those of the University, as well as in the best interest of our students. If you have any questions concerning a particular policy or procedure, contact the Office of Student Success & Academic Services, Room 008 of Enterprise Hall (703-993-1880) or visit the website (http://business.gmu.edu).

Courses Excluded from any School of Business BS Degree

Transfer credit is not awarded for any School of Business courses completed more than ten years prior to Mason enrollment.

Requirements

Degree Requirements

Total credits: 120

School of Business students pursuing a BS degree must complete a minimum of 120 credits, including the Mason Core requirements, business foundations, business core and major requirements. In addition, the following requirements must be met:

- A minimum of 45 credits at the 300- or 400-level.
- A minimum of 30 credits of School of Business core and major courses at Mason.
- At least 9 credits required for the specific major and BUS 498 Capstone Course: Advanced Business Models (Mason Core) taken at Mason.
- A grade of C or higher earned in the business foundations, business core and major requirements.

Students should carefully examine prerequisites for School of Business courses. Students may be removed from a course if they enroll without having fulfilled the prerequisites.

Mason Core Requirements

School of Business students must complete the Mason Core requirements. Some Mason Core requirements may already be fulfilled by the major requirements listed below. Students are strongly encouraged to consult their advisors to ensure they fulfill all remaining Mason Core requirements.

Note:

Remaining Mason Core requirements are fulfilled with major coursework.

Business Foundations

Students who do not successfully complete these courses within three attempts will be terminated from the School of Business and will not be eligible to receive a degree from the School of Business. Students terminated from the School of Business are prohibited from enrolling in any School of Business course. Students terminated from the School of Business are permitted to declare a business minor. For more information about this, see AP.5.2.4 Termination from the Major.

Business Core

Students who do not successfully complete these courses within three attempts will be terminated from the School of Business and will not be eligible to receive a degree from the School of Business. Students terminated from the School of Business are prohibited from enrolling in any School of Business course. Students terminated from the School of Business are permitted to declare a business minor. For more information about this, see AP.5.2.4 Termination from the Major.

General Electives

General electives may be selected from any University or School of Business course, except courses designated for the Business minor (MBUS). Credits awarded as Associate Degree Elective Credit (ADEC) as part of a student's transfer evaluation are also excluded from general electives.

Major Requirements in Marketing

Major electives may be selected from any University or School of Business course, except courses designated for the Business minor (MBUS). Credits awarded as Associate Degree Elective Credit (ADEC) as part of a student's transfer evaluation are also excluded from general electives.

Second Major in Marketing

School of Business majors declaring a second major in Marketing must complete the three required courses and three elective courses for the major.

4-Year Plan

The sample plan below is a recommended sequencing of courses based on prerequisites and scheduling. This may not fit every student's needs and is a guideline, not a requirement. Students should confirm major requirements with their academic advisor and with PatriotWeb Degree Evaluation to ensure they enroll in the proper courses and are on track to graduate.

**Total Credits 120-121**

Detailed four year plans and degree planning checklists can be found at https://advising.gmu.edu/current-student/majors-at-mason/.

**Honors**

**Honors in the Major**

The School of Business Marketing Honors Program provides highly motivated students majoring in marketing with an enriched academic experience integrating curricular, co-curricular and extra-curricular development. Admission to the Honors Program is by invitation only.

**Admission Requirements**

- Minimum 3.0 cumulative Mason GPA
- A- or higher on first attempt of MKTG 303
- Submission of a personal statement/essay
- Two recommendations from faculty within the School of Business
- Once admitted to the program, students with a cumulative GPA below a 3.0 will be dropped from the program

**Curricular Requirements**

- 3.0 cumulative Mason GPA
- 3.5 GPA in the major or be in the 95th percentile GPA within the major
- B- or higher on first attempt in every major course

**Co-Curricular Requirements**

The student must complete ONE of the following in addition to the curriculum requirements:

- MKTG 462 Honors Seminar in Marketing (Topic Varies)
- BUS 498 Capstone Course: Advanced Business Models (Mason Core) (Honors section)

**Extra-Curricular Requirements**

- Attendance at a minimum of two honors events, as determined by the Honors Faculty Coordinator

**Requirements for Students to Obtain the Honors Designation**

- Honors students must meet all curricular, co-curricular, and extracurricular requirements mentioned above at graduation

**Operations and Supply Chain Management Minor**

Banner Code: OSCM

Phone: 703-993-1880
Website: business.gmu.edu

**Administration**

- David Gallay, Director of Minor Programs

With the expanding global marketplace, multi-echelon supply chains span countries across the globe. The fusion of online and offline channels have given rise to omni-channel strategies adopted by major companies and there is a large demand for analysts and professionals in procurement, distribution, process improvement, logistics, and supply chain management. Specifically, the Metro DC region with its enormous federal government footprint and concomitant supply chain/logistics providers, demands professionals with supply chain management related skills; even in those who may not be majoring in that area. The OSCM minor offers students a focused set of courses that provide them the knowledge, training, and skills in supply chain management. Students with an OSCM minor will learn how to efficiently and effectively manage the activities involved in transforming organizational resources into customer value. They will be able to provide innovative and value-added solutions to organizations in the areas of process improvement, quality...
management, project management, supply chain analytics, and global supply chain design, coordination, and implementation.

**Admissions & Policies**

**Policies**

School of Business residency requirement for this minor supersedes the university requirement: at least nine credits must be earned at Mason. At least eight credits of the minor courses must be unique to the OSCM Minor and not applied toward any other major, minor, or concentration. Students must achieve a grade of C or better in each course that is applied toward the OSCM minor.

For policies governing all minors, see AP.5.3.4 Minors.

**Administration**

- Carolyn Grimsley, Director, MS in Real Estate Development

The Master of Science in Real Estate Development is designed to provide real estate professionals with the knowledge essential to assume increasingly responsible leadership roles within the development industry. Areas of emphasis include real estate finance, investment analysis, project management, sustainability and economic development. The distinctiveness of this degree program lies in its multi-disciplinary curriculum, which incorporates coursework from the domains of business, engineering and public policy. Created in consultation with leading real estate development companies, the curriculum has been designed to strengthen the employment potential and upward mobility of industry professionals working in the areas of development, architecture, engineering, public planning, construction management, real estate finance, mortgage lending, property management, real estate law and related fields.

**Admissions & Policies**

**Admissions**

**Requirements**

All students registering for School of Business graduate courses must have graduate standing. Non degree student status is not available.

Full eligibility and admission requirements can be viewed here (http://business.gmu.edu/masters-in-real-estate-development/admissions/).

**Policies**

The 36-hour curriculum includes 18 hours of required courses and 18 hours of electives. Students are responsible for familiarization and compliance with AP.6 Graduate Policies.

**Requirements**

**Degree Requirements**

**Total credits: 36**

<tbody>
<tr>
<td></td>
<td>Select 15 credits of electives</td>
<td>15</td>
</tr>
</tbody>
</table>

1 Electives may be selected from other REAL courses (see below) and available offerings in appropriate areas including the Schar School of Policy and Government; the School of Business; the Volgenau School of Engineering; the College of Humanities and Social Sciences; the College of Science; and the School for Conflict Analysis & Resolution.

Students wishing to choose a field for emphasis may select, with the approval of a faculty advisor, 3 elective courses within the field that together constitute an emphasis area. They must also then take 3 courses outside the selected emphasis to reach the required elective total of 15. With prior approval of an advisor, students may design their own emphasis. The following are examples of fields for emphasis and courses within each field which may be selected.

**Organizational Issues Emphasis**

Volgenau School of Engineering

Graduate
• Computer Engineering
• Computer Science
• Cyber Security Engineering
• Electrical Engineering
• Information Technology
• Mechanical Engineering
• Statistics
• Systems Engineering

Minors
Minors are available in aviation flight training and management, bioengineering, computer science, data analysis, environmental engineering, information technology, mechanical engineering, software engineering, statistics, and systems engineering.

BS/Accelerated MS Programs
Accelerated master’s degree programs offer high-achieving Mason undergraduates the opportunity to complete their bachelor’s and master’s degrees within five years. Qualified candidates take advantage of a streamlined master’s application process with no application fee and the ability to take up to 12 graduate credits at the undergraduate tuition rate.

Graduate Programs
Master of Science Programs
The ever-increasing complexity and technical challenges in engineering, computer science, and information technology demand studies beyond the bachelor’s degree.

The Volgenau School offers the following master’s programs:

• Applied Information Technology
• Bioengineering
• Biostatistics
• Civil and Infrastructure Engineering
• Computer Engineering
• Computer Science
• Cyber Security Engineering (pending SCHEV approval)
• Data Analytics Engineering
• Digital Forensics
• Electrical Engineering
• Information Security and Assurance
• Information Systems
• Operations Research
• Software Engineering
• Statistical Science
• Systems Engineering
• Telecommunications

**Doctor of Philosophy Programs**

PhD students will gain comprehensive knowledge in their area of study and will be prepared for careers in higher education and scientific research. They are required to demonstrate a comprehensive understanding and complete research that adds significantly to the body of knowledge in engineering, computer science, information technology, or statistics.

The Volgenau School offers seven doctoral programs:

• Bioengineering
• Civil and Infrastructure Engineering
• Computer Science
• Electrical and Computer Engineering
• Information Technology
• Mechanical Engineering (pending SCHEV approval)
• Statistical Science
• Systems Engineering and Operations Research

**Cardinal Education**

Cardinal Education (formerly the Commonwealth Graduate Engineering Program/CGEI) is the premier provider of high-quality post-baccalaureate online engineering education in the Commonwealth of Virginia. It is designed for practicing engineers, computing, and information scientists interested in maintaining and enhancing their skills through the pursuit of an online degree or certificate. Participating universities are: George Mason University, Old Dominion University, University of Virginia, Virginia Commonwealth University, Virginia State University, and Virginia Tech. Offerings include master’s degrees and certificate programs.

While each program is based at one of the six participating universities, the collaboration between universities allows students more flexibility, potential shorter time to completion, and greater variety in course offerings. A substantial number of course requirements can be taken at any of the six participating universities to satisfy the degree or certificate program.

Students interested should begin by applying directly to the university offering the degree of interest. Mason has a number of degree and certificate programs available through Cardinal Education. These programs follow all policies stated in this catalog for the program, while also allowing up to 50 percent of non-core required credits to be completed at other Cardinal Education participating universities. Faculty advisor approval is needed when taking courses at a partner university.

Policies for other universities’ programs and courses are determined by those institutions. Please consult with the university offering the program or course of interest for details.

For more information including the Mason programs available through this partnership, visit the Cardinal Education website.

---

**Requirements & Policies**

**Undergraduate Requirements**

**Degree Requirements**

The following general requirements must be completed by all undergraduate students:

• At least 120 credits of academic work including at least 45 credits of upper-level courses (numbered 300 or above);
• At least 6 credits of English composition, 3 credits of literature, and 3 credits of oral communication (Mason Core courses);
• At least 3 credits of arts, 3 credits of Western civilization or world history, 3 credits of social and behavioral science, and 3 credits of global understanding issues (Mason Core courses);
• At least 24 credits of social science and humanities course work, which is normally satisfied by the 24 credits of Mason Core courses described above;

All requirements are listed in the sections for specific Volgenau School majors. These include university requirements for mathematics, natural science, information technology including ethics, and synthesis. Sample schedules that fulfill degree requirements for individual programs within the Volgenau School are available from the departments.

**Undergraduate Policies**

**Academic Policies**

Students should become familiar with the Academic Policies in the University Catalog in addition to policies specific to each academic unit. The Academic Policies also list additional university requirements for minor programs and double majors.

**Academic Appeal of Policies and Actions**

A student’s instructor, academic advisor and/or department can resolve most academic issues. If, however, an undergraduate student disagrees with a decision at the department level and feels that there may be reasonable grounds for appeal, the student should contact the Volgenau School Undergraduate Student Services Office at 703-993-1511 for guidance in preparing a request to the Associate Dean for Undergraduate Programs or other offices as appropriate. Information about grade appeals is found in AP.3.9 Grade Appeals.

**Academic Progression**

Students majoring in Volgenau School programs are expected to have an acceptable plan of study on file, formulated with assistance from their departmental advisor. They are expected to make reasonable progress toward their degree during each semester in which they are enrolled.

Termination from a major—or from all majors in a college—may be imposed as a result of excessive repeating of required courses without achieving the minimum standard, and for other evidence of continued failure to make adequate progress toward declaration or completion of the major. For more information, see AP.5.2.4 Termination from the Major (https://catalog.gmu.edu/policies/academic/undergraduate-policies/#ap-5-2-4)

**Sample Schedules**

Sample schedules that fulfill degree requirements for individual programs within the Volgenau School are available from the departments.
Change of Major

1. Criteria for freshman students in their first semester at Mason
Freshman students who have been admitted to any VSE engineering or computer science program may change their major to any other engineering or computer science program before the final drop deadline of their first semester at Mason.

Freshman students who have been admitted to Information Technology, Statistics, VSE Undeclared, or any non-VSE major must have departmental approval to change their major to a VSE program before the final drop deadline of their first semester at Mason.

Any change of major requests made after this deadline are bound to the change of major criteria outlined in section 3 and require the completion of at least one semester at Mason.

2. Criteria for transfer students in their first semester at Mason
Transfer students who have been admitted to any VSE engineering program may change their major to any other engineering program before the final drop deadline of their first semester at Mason.

Transfer students who have been admitted to Computer Science, Information Technology, Statistics, VSE Undeclared, or any non-VSE major must have department approval to change their major to a VSE program before the final drop deadline of their first semester at Mason.

Any change of major requests made after this deadline are bound to the change of major criteria outlined in section 3 and require the completion of at least one semester at Mason.

3. Criteria for students who have completed at least one semester at Mason
Students who have completed at least one semester at Mason and who are considering changing their major to any VSE engineering program should consult with the Volgenau School of Engineering Coordinator of Undergraduate Advising, 2500 Nguyen Engineering Building. These students must have successfully completed MATH 114, PHYS 160 and PHYS 161 (with a grade of at least C) and should have a minimum Mason GPA of 2.75* in all technical coursework. Technical coursework refers to any math, physics, engineering, statistics and computer sciences courses completed thus far at Mason and that are applicable to the intended engineering major. At least 6 credits of these technical courses should have been completed successfully at Mason.

*Students considering changing their major to Bioengineering with a Pre-Health concentration need to meet the above VSE engineering program requirements furthermore with a minimum Mason GPA of 3.00.

Students considering changing their major to Applied Computer Science, Computer Science, Information Technology, or Statistics should consult with the Volgenau School of Engineering Coordinator of Undergraduate Advising, 2500 Nguyen Engineering Building. These students need to meet the criteria for that program as defined in the change of major section for that program in the catalog. Minimum GPA requirements stated for those programs are based on courses taken at Mason.

Exceptions to the policy may only be granted at the discretion of the chair or associate chair of the department.

Undecided Students in the Volgenau School of Engineering
Students who are undecided about their specific major may select Volgenau School Undecided as their major. This should be done as soon as possible after a student enrolls at Mason. Students will be advised to follow an initial semester or two of courses that could be applicable to majors that are of interest to them. This may involve taking courses that help the student better understand different engineering and computing areas, but which may not contribute to the total credits needed for the major they eventually choose.

VSE Undecided students are advised by the VSE Undeclared Academic Advisor and occasionally by the Coordinator of Undergraduate Academic Advising in the Student Services Office. Students should seek advising at least once each semester.

Undeclared Students in the Volgenau School of Engineering
Students who apply to a VSE major but do not meet major admissions criteria will be accepted into VSE Undeclared. These students will become eligible to declare a VSE major after meeting specific requirements as determined by that particular major. Students will be advised to follow an initial semester or two of courses that would be applicable to the major they plan to declare.

VSE Undeclared students are advised by the VSE Undeclared Academic Advisor and occasionally by the Coordinator of Undergraduate Academic Advising in the Student Services Office. Students should seek advising at least once each semester.

Writing-Intensive Requirement
The university requires all undergraduate students to successfully complete a course, or a combination of courses, designated "writing intensive" in their majors at the 300 level or above. To determine the writing-intensive course requirements for specific degrees, refer to the major program descriptions in the following department sections.

Restricted Courses
Students are encouraged to take advantage of the many excellent courses available to broaden their educational experience or strengthen their background; however, some credits earned may not satisfy any degree requirements. Degree requirements for Volgenau School undergraduate programs may not include credits earned in military science. At most 3 credits of 100-level RECR coursework may be taken to satisfy the degree requirements of those VSE programs that allow general electives. Whenever there is uncertainty, students must consult with an academic advisor in their department.

Online Education Programs
In order to increase access to Volgenau School education while meeting the needs of the School’s student population, select degree programs and courses may be completed via online education. All academic policies and procedures apply to online education programs and courses as referred to in the appropriate sections of this catalog. Some instructors may require exams and/or other meetings to take place in a proctored or on-campus environment. Students should contact the instructor concerning these requirements if not explicitly stated on Patriot Web. Space permitting and if desired, students enrolled in the online sections are also permitted to attend the instructor’s campus-based classroom section if offered during the same semester.

For more information about the Volgenau School programs available online, visit Mason Online (http://masononline.gmu.edu/).

Termination from the Major
No math, science, or Volgenau School of Engineering course that is required for the major may be attempted more than three times. Those
students who do not successfully complete such a course within three attempts will be terminated from the major. Undeclared students in the Volgenau School who do not successfully complete a course required for a Volgenau School major within three attempts will also be terminated.

In addition, students in the Volgenau School with evidence of continued failure to make adequate progress toward declaring or completing a Volgenau School major will be terminated from the school. Adequate progress is determined by the major program. For more information, see AP.5.2.4 Termination from the Major (https://catalog.gmu.edu/policies/academic/undergraduate-policies/#ap-5-2-4).

Once a student has attempted one of these courses twice unsuccessfully, the third attempt must be no later than the next semester of enrollment, excluding summers. Failure to take the course at that time will result in termination from the major. A third attempt of a Volgenau School of Engineering course requires support by the student’s major department as well as permission by the department offering the course. This permission is not guaranteed. If the student is unable to take the course when required, the student may request an extension to a future semester; extensions require approval of the student’s advisor, their department, and the Associate Dean for Undergraduate Programs. The deadline for extension requests is the add deadline for the semester in which the course is required.

Students who have been terminated from a Volgenau School of Engineering major may not register for a Volgenau School course without permission of the department offering the course. This applies to all undergraduate courses offered by the Volgenau School except IT 104 Introduction to Computing and STAT 250 Introductory Statistics I (Mason Core).

A student may not declare any major in the Volgenau School of Engineering if the student has previously met the termination criteria for that major at any time, regardless of what the student’s major was at the time the courses were taken.

**Graduate Policies**

**Admission**

Admission decisions are made by the faculty committee or graduate coordinator of the respective graduate program. Denial of admission is not subject to appeal. Applicants denied admission to a program are not permitted to enroll in courses in that graduate program, though they may apply for either non-degree enrollment or admission to another program.

If an applicant is offered graduate admission, the college reserves the right to withdraw that offer of admission if:

- During his or her academic studies, the admitted applicant has a significant drop in academic performance or fails to graduate with a degree prior to the first day of classes for the term admitted.
- There has been a misrepresentation in the application process.
- Prior to the first day of classes for the term admitted, the school learns that the admitted applicant has engaged in behavior that indicates a serious lack of judgment or integrity, irrespective of the outcome of any disciplinary process related to such behavior.
- Students admitted to an accelerated master’s program do not maintain satisfactory progress in his or her undergraduate program, do not receive a minimum grade of 3.00 in the graduate classes taken as an undergraduate, or otherwise does not meet the conditions specified on the application and admission letter.

The university further reserves the right to require the applicant to provide additional information (and/or authorization for the release of information) about any such matter.

**Academic Policies**

Students are responsible for becoming familiar with the Academic Policies (https://catalog.gmu.edu/policies/academic/) in the University Catalog in addition to policies specific to the School. A resource for Mason Engineering Graduate Students is maintained online (https://mymasonportal.gmu.edu/webapps/blackboard/content/listContent.jsp?course_id=_336120_1&content_id=_7639878_1&mode=reset/) with graduate-specific Volgenau information.

**Academic Progression**

Graduate students must make satisfactory progress toward a degree. At a minimum, this requires maintaining enrollment in at least one term per academic year and a GPA of 3.0 or higher. Inability to make satisfactory progress toward a degree may result in termination (https://catalog.gmu.edu/policies/academic/graduate-policies/). Academic programs of study are entitled to enforce more stringent criteria which may include specific grade requirements in courses, successful completion of doctoral qualifying exams, etc. Please refer to your program for additional information.

**Doctoral Change of Program**

Students in Volgenau School of Engineering doctoral programs are not permitted to change doctoral programs without a new, formal PhD admission application submitted in accordance with the established requirements and deadlines.

**Non-degree**

Non-degree graduate students taking courses in the Volgenau School may not register for classes numbered 700 or higher. A maximum of 12 credits of non-degree coursework can be transferred into a degree program.

**Readmission**

Graduate students who have been terminated or have resigned from a program in the Volgenau School and want to reapply to the same program must wait five (5) semesters (Fall/Spring) before submitting a new application for admission. A full application for admission as well as all application materials required of that program must be submitted (or resubmitted). GRE scores, if required, cannot be older than five years. Previous admission to a program does not guarantee readmission to the same program. The circumstances of the prior termination or resignation will be a factor in the decision-making process. Graduate credit earned prior to termination may be applied to the degree program as long as the requirements are satisfied for Transfer of Credit (https://catalog.gmu.edu/policies/academic/graduate-policies/#text).

**Online Education Programs**

In order to increase access to Volgenau School education while meeting the needs of the School’s student population, select degree programs and courses may be completed via online education. All academic policies and procedures apply to online education programs and courses as referred to in the appropriate sections of this catalog. Some instructors may require exams and/or other meetings to take place in a proctored or on-campus environment. Students should contact the instructor concerning these requirements if not explicitly stated on Patriot Web. Space permitting and if desired, students enrolled in the online sections
are also permitted to attend the instructor’s campus-based classroom section if offered during the same semester.

For more information about the Volgenau School programs available online, visit Mason Online (http://masononline.gmu.edu/).

Termination
University policy on Academic Termination can be found in AP.6.6.2 (https://catalog.gmu.edu/policies/academic/graduate-policies/). School specific process and criteria can be found on the Mason Engineering Graduate Student Resource page (https://mymasonportal.gmu.edu/webapps/blackboard/content/listContent.jsp?course_id=_336120_1&amp;content_id=_7639878_1&amp;mode=reset/).

Academic Units

- Department of Bioengineering
- Department of Computer Science
- Department of Cyber Security Engineering
- Department of Electrical and Computer Engineering
- Department of Information Sciences and Technology
- Department of Mechanical Engineering

Data Analytics Engineering, MS

Banner Code: VS-MS-DAEN

Phone: 703-993-6269
Email: datamine@gmu.edu

The MS in Data Analytics Engineering is a multidisciplinary degree program in the Volgenau School of Engineering, and is designed to provide students with an understanding of the technologies and methodologies necessary for data-driven decision-making. Students study topics such as data mining, information technology, statistical modeling, predictive analytics, optimization, risk analysis, and data visualization. It is aimed at students who wish to become data scientists and analysts in finance, marketing, operations, business/government intelligence and other information intensive groups generating and consuming large amounts of data.

Admissions & Policies

Admissions

Applicants must have completed a baccalaureate degree from a regionally accredited program with an earned GPA of 3.00 or better in their 60 highest-level credits. Applicants are expected to have completed a degree in engineering, business, computer science, statistics, mathematics, or information technology, with demonstrated foundational competence in calculus, statistics, and computer programming. Applicants without that formal academic preparation but with clear evidence of strong and extensive work experience in data or analytics, may also be considered on a case by case basis. DAEN 500 Data Analytics Fundamentals may be required for domestic students without a basic foundation in Data Analytics.

For each of the concentrations there are additional admission requirements. These are listed in the descriptions of the individual concentrations.

In addition to fulfilling Mason’s admission requirements for graduate study, applicants must provide:

- Two letters of recommendation, preferably from academic references or references in industry or government who are familiar with the applicant’s professional or academic accomplishments.
- Resume.
- Detailed statement of career goals and professional aspirations.
- Completed self-evaluation form.
- If the applicant’s native language is not English, proof of English competency with a minimum TOEFL score of 575 for the paper-based exam or 230 for the computer-based exam.

Policies

Students are strongly encouraged to meet with their academic advisor during their first semester and design an approved plan of study. Students should seek out their advisor when questions arise and when their plan of study needs to be revised. Any changes to the plan of study are to be approved by the DAEN advisor. A copy of the plan of study will remain on file with the program.

Total Credits 15

1 CS 504 Principles of Data Management and Mining (for all concentrations except Data Mining) or CS 584 Theory and Applications of Data Mining (for the Data Mining concentration only)
Concentrations

Students can elect a concentration that corresponds to a specialized technical area. Students not interested in a concentration can work with an advisor to select 15 credits of electives from among courses allowed in all the concentrations.

Available Concentrations

- Concentration in Applied Analytics (APAN)
- Concentration in Bioengineering (BIOE)
- Concentration in Business Analytics (BUSA)
- Concentration in Cyber Analytics (CYBA)
- Concentration in Data Mining (DTM)
- Concentration in Financial Engineering (FNNE)
- Concentration in Health Data Analytics (HDAN)
- Concentration in the Internet of Things (INOT)
- Concentration in Predictive Analytics (PRAN)
- Concentration in Statistical Analytics (STLA)

Concentration in Applied Analytics (APAN)

Focuses on the practical elements of adapting big data approaches to common analytic problems and government operations.

Additional Admission Requirements

Students entering the program should have completed the following George Mason undergraduate courses or their equivalents:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>IT 106</td>
<td>Introduction to IT Problem Solving Using Computer Programming</td>

<td>Introductory Calculus with Business Applications (Mason Core)</td>
<td>3</td>
</tr>
<tr>
<td>STAT 250</td>
<td>Introductory Statistics I (Mason Core)</td>
<td>3</td>
</tr>
</tbody>
</table>

Required Concentration Courses

All students are required to take one fundamental course:

- AIT 524 Database Management Systems

In addition, students in this concentration may choose four courses from the following list:

- AIT 582 Metadata Analytics for Big Data
- AIT 614 Big Data Essentials
- AIT 622 Determining Needs for Complex Big Data Systems
- AIT 624 Knowledge Mining from Big-Data
- AIT 664 Information: Representation, Processing and Visualization
- AIT 726 Natural Language Processing
- AIT 736 Applied Machine Learning
- DAEN 698 Data Analytics Research Project

Total Credits 15

Concentration in Bioengineering (BIOE)

Focuses on data collection from medical devices/sensors and conditioning, filtering, extraction, and preparing the data.

Additional Admission Requirements

Domestic students with some deficiencies in preparation may be admitted provisionally pending completion of foundation courses in mathematics or computer science. Undergraduate credit earned for this purpose may not be applied toward the graduate degree.

- ECE 537 | Introduction to Digital Image Processing (DIP) | 3       |

Total Credits 15

Concentration in Business Analytics (BUSA)

Students will learn to effectively analyze data through the hands-on use of decision modeling and other techniques using popular software tools. This concentration utilizes a wide array of methodologies and techniques — from data collection, organization, reporting and mining to extraction of useful and actionable information for decision makers.

Additional Admission Requirements

Students entering the program must have successfully completed STAT 515 Applied Statistics and Visualization for Analytics or STAT 554 Applied Statistics I with a grade of B or better.

Total Credits 15
Concentration in Cyber Analytics (CYBA)
Deals with the process of acquiring, extracting, integrating, transforming, and modeling data with the goal of deriving useful information that is suitable for presentation in a court of law. Digital forensics is a key component in criminal, civil, intelligence, and counter-terrorism matters. Students will be able to apply data analytics to such areas as digital media, intercepted (network) data, mobile media, unknown code, and leverage that analysis in order to determine, intent, attribution, cause, effect, and context.

Additional Admission Requirements
Students entering the program should have completed the following George Mason undergraduate courses or their equivalents:

Concentration in Financial Engineering (FNNE)
The concentration emphasizes both analytical and practical aspects of financial and econometric data analytics. Students are expected to demonstrate proficiency in several quantitative modeling disciplines. Students are also expected to understand issues relevant to practical aspects of investment and hedging decision making, derivative valuation, and risk analysis. Students will learn the techniques to analyze large financial and economic data to derive meaningful knowledge, which will be useful for developing effective business and risk mitigation strategies and making sound financial, marketing, and investment decisions. The concentration prepares students for careers in business analytics with a focus on practical applications in financial operations, investment, and risk mitigation strategy development.

Additional Admission Requirements
Students entering the program should have completed the following George Mason undergraduate courses or their equivalents:

### Concentration in Predictive Analytics (PRAN)

The ultimate goal of analytics of Big Data is to derive value by suggesting effective actions for the future. Predictive analytics focuses on the methods for deciding on the best course of action, taking into account possible constraints and risks. The concentration will provide students with skills that drive effective decision making and optimization. Students will learn the techniques to analyze both structured and unstructured data to derive meaningful knowledge, which will be useful for developing effective strategies and making optimal decisions.

The concentration emphasizes both analytical and practical aspects of predictive analytics. Students are expected to master the practical aspects of modeling and methods for optimization. Students are also expected to demonstrate proficiency in decision making, design of decision support systems, and risk analysis. The program prepares students for careers in big data analytics with a focus on strategic decision making in practical applications including financial engineering, health care, transportation, and intelligence.

**Additional Admission Requirements**

Students entering the program should have completed the following George Mason undergraduate courses or their equivalents:

Total Credits 15

### Concentration in the Internet of Things (INOT)

The focus of this concentration is driven by sensors that collect the staggering amount of data that exists today. The Internet of Things (IoT) is expanding, at a geometric level, the number of devices that collect, forward, and offer for analysis data. IOTA looks at Data Analytics from the perspective of IoT and sensors. Analog and digital sensing design and deployment, hardware options, power consumption, security, sampling and quantization, Fourier transform, time analysis, and synchronization are topics covered in this concentration.

**Additional Admission Requirements**

**Concentration in Statistical Analytics (STLA)**

Provides students with skills necessary for gaining insight from data. Enables students to evaluate large data-sets from a rigorous statistical perspective, including theoretical, computational, and analytical techniques. Emphasis will be placed on developing deep analytical talent in the two areas of statistical modeling and data visualization. "Big Data" are well-known to encompass high levels of uncertainty and complex interactions and relationships. To gain knowledge from these data and hence inform decisions, elucidation of the core interactions and relationships must be done in a manner that acknowledges uncertainties in order to both minimize false signals and maximize true discoveries. Statistical modeling does exactly this – it accounts for uncertainty while identifying relationships. Visualization is often a critical component of modeling, but visualization also stands alone as an important tool for presentation of information, decision analysis, and process improvement.

**Additional Admission Requirements**

Students entering the program should have completed the following George Mason undergraduate courses or their equivalents:

<table>
<thead>
<tr>

**Accelerated Master’s**

**Applied Computer Science, BS/Data Analytics Engineering, Accelerated MS**

Overview

Highly-qualified students in the Applied Computer Science, BS have the option of obtaining an accelerated Data Analytics Engineering, MS.

For more detailed information, see AP.6.7 Bachelor’s/Accelerated Master’s Degrees. For policies governing all graduate degrees, see AP.6 Graduate Policies.

**Admission Requirements**

Students in the Applied Computer Science, BS program may apply to this option if they have earned 90 undergraduate credits with an overall GPA of at least 3.30. Students must have successfully completed:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>CS 310</td>
<td>Data Structures</td>
<td>3</td>
</tr>
<tr>

<td>Computer Systems and Programming</td>
<td>4</td>
</tr>
<tr>
<td></td>
<td><strong>Total Credits</strong></td>
<td><strong>10</strong></td>
</tr>
</tbody>
</table>

**Accelerated Option Requirements**

Students have the opportunity to earn 3-6 credits in graduate coursework that count towards both the BS and MS degrees.

Students must register for 3-6 credits of CS 500-level basic courses in place of the corresponding CS 400-level courses required for the undergraduate degree requirements. Specifically, students in all concentrations of the Applied Computer Science, BS program must register for:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>CS 584</td>
<td>Theory and Applications of Data Mining</td>
<td>3</td>
</tr>
<tr>
<td></td>
<td><strong>Total Credits</strong></td>
<td><strong>3</strong></td>
</tr>
</tbody>
</table>

Students in the Software Engineering and Bioinformatics concentrations of the Applied Computer Science, BS program must also register for:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>CS 550</td>
<td>Database Systems</td>
<td>3</td>
</tr>
<tr>

### Bioengineering, BS/Data Analytics Engineering, Accelerated MS

**Overview**
Highly-qualified students in the Bioengineering, BS have the option of obtaining an accelerated Data Analytics Engineering, MS with a concentration in Bioengineering.

Students in an accelerated degree program must fulfill all university requirements for the master’s degree. For policies governing all graduate degrees, see AP.6 Graduate Policies.

**Admission Requirements**
Students in the Bioengineering, BS program may apply to this option if they have earned 95 undergraduate credits with an overall GPA of at least 3.30. Students must have successfully completed BENG 320 Bioengineering Signals and Systems. Criteria for admission are identical to criteria for admission to the Bioengineering concentration of the Data Analytics Engineering, MS program.

**Accelerated Option Requirements**
Students must complete all requirements for the BS and MS programs, with 6 credits overlap.

Students register for 6 credits of 500-level basic courses in place of the corresponding 400-level courses required for the undergraduate degree requirements. Specifically, students must register for:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>BENG 501</td>
<td>Bioengineering Research Methods</td>
<td>3</td>
</tr>
<tr>
<td>CS 504</td>
<td>Principles of Data Management and Mining (in place of BENG 420)</td>
<td>3</td>
</tr>
</tbody>
</table>

**Total Credits**: 6

**Note**: Students are permitted to take additional graduate basic courses in their undergraduate programs. In such cases, those classes cannot be counted toward requirements for the MS.

### Degree Conferral
Students must apply the semester before they expect to complete the BS requirements to have the BS degree conferred. In addition, at the beginning of the student’s final undergraduate semester, students must complete a Bachelor’s/Accelerated Master’s Transition form that is submitted to the Office of the University Registrar and the VSE Graduate Admissions Office. At the completion of MS requirements, a master’s degree is conferred.

### Computer Science, BS/Data Analytics Engineering, Accelerated MS

**Overview**
Highly-qualified students in the Computer Science, BS have the option of obtaining an accelerated Data Analytics Engineering, MS.

For more detailed information, see AP.6.7 Bachelor’s/Accelerated Master’s Degrees. For policies governing all graduate degrees, see AP6 Graduate Policies.

**Admission Requirements**
Students in the Computer Science, BS program may apply to this option if they have earned 90 undergraduate credits with an overall GPA of at least 3.30. Students must have successfully completed CS 310 Data Structures, CS 330 Formal Methods and Models and CS 367 Computer Systems and Programming.

**Accelerated Option Requirements**
Students must complete all requirements for the BS and MS programs, with 6 credits overlap.

Students register for 6 credits of CS 500-level basic courses in place of the corresponding CS 400-level courses required for the undergraduate degree requirements. Specifically, students must register for:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>CS 584</td>
<td>Theory and Applications of Data Mining</td>
<td>3</td>
</tr>
</tbody>
</table>

Select one of the following courses in place of the corresponding 400-level courses:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>CS 550</td>
<td>Database Systems</td>
<td></td>
</tr>
<tr>
<td>CS 580</td>
<td>Introduction to Artificial Intelligence</td>
<td>3</td>
</tr>
</tbody>
</table>

**Total Credits**: 6

**Note**: Students are permitted to take additional graduate basic courses in their undergraduate programs. In such cases, those classes cannot be counted toward requirements for the MS.

### Degree Conferral
Students must apply the semester before they expect to complete the BS requirements to have the BS degree conferred. In addition, at the beginning of the student’s final undergraduate semester, students must complete a Bachelor’s/Accelerated Master’s Transition form that is submitted to the Office of the University Registrar and the VSE Graduate Admissions Office.
Admissions Office. At the completion of MS requirements, a master’s degree is conferred.

Mechanical Engineering, BS/Data Analytics Engineering, Accelerated MS

Overview
Highly-qualified students in the Mechanical Engineering, BS program have the option of applying to the accelerated Data Analytics Engineering, MS program.

For more detailed information, see AP6.7 Bachelor’s/Accelerated Master’s Degrees. For policies governing all graduate degrees, see AP6 Graduate Policies.

Admission Requirements
Students in the Mechanical Engineering, BS program may apply to the accelerated Data Analytics Engineering, MS program if they have earned 90 undergraduate credits with an overall GPA of at least 3.30.

Accelerated Option Requirements
Students must complete all credits that satisfy requirements for the BS and MS programs, with six credits overlap chosen from the following courses:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>AIT 580</td>
<td>Analytics: Big Data to Information</td>
<td>3</td>
</tr>
<tr>
<td>CS 504</td>
<td>Principles of Data Management and Mining</td>
<td>3</td>
</tr>
</tbody>
</table>

All graduate course prerequisites must be completed prior to enrollment. Each 500-level course must be completed with a grade of B or better to apply toward the MS program. The graduate courses selected for overlap must be approved by the academic advisors of both the BS and MS programs. The graduate courses may be counted as Technical Electives toward the Mechanical Engineering, BS program requirements, with approval of the Mechanical Engineering Department.

Degree Conferral
Students must apply the semester before they expect to complete the BS requirements to have the BS degree conferred. In addition, at the beginning of the student’s final undergraduate semester, students must complete a Bachelor’s/Accelerated Master’s Transition form that is submitted to the Office of the University Registrar and the VSE Graduate Admissions and Recruitment office. At the completion of MS requirements, a master’s degree is conferred.

Statistics, BS/Data Analytics Engineering, Accelerated MS

Overview
Highly-qualified students in the Statistics, BS program have the option of applying to the accelerated Data Analytics Engineering, MS program.

For more detailed information, see AP6.7 Bachelor’s/Accelerated Master’s Degrees. For policies governing all graduate degrees, see AP6 Graduate Policies.

Admission Requirements
Students in the Statistics, BS program may apply to the accelerated Data Analytics Engineering, MS program if they have earned 90 undergraduate credits with an overall GPA of at least 3.30.

Accelerated Option Requirements
Students must complete all credits that satisfy requirements for the BS and MS programs, with six credits overlap chosen from the following courses:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>CS 504</td>
<td>Principles of Data Management and Mining</td>
<td>3</td>
</tr>
<tr>
<td></td>
<td>or CS 584 Theory and Applications of Data Mining</td>
<td>3</td>
</tr>
<tr>
<td>OR 541</td>
<td>Operations Research: Deterministic Models (Credit may not be received for both OR 441 and OR 541.)</td>
<td>3</td>
</tr>
<tr>
<td></td>
<td>or OR 531 Analytics and Decision Analysis</td>
<td></td>
</tr>
<tr>
<td>STAT 515</td>
<td>Applied Statistics and Visualization for Analytics</td>
<td>3</td>
</tr>
<tr>
<td></td>
<td>or STAT 554 Applied Statistics I</td>
<td></td>
</tr>
</tbody>
</table>

All graduate course prerequisites must be completed prior to enrollment. Each 500-level course must be completed with a grade of B or better to apply toward the MS program. The graduate courses selected for overlap must be approved by the academic advisors of both the BS and MS programs. The graduate courses may be counted as Technical Electives toward the Statistics, BS program requirements, with approval of Statistics Department undergraduate coordinator.

Degree Conferral
Students must apply the semester before they expect to complete the BS requirements to have the BS degree conferred. In addition, at the beginning of the student’s final undergraduate semester, students must complete a Bachelor’s/Accelerated Master’s Transition form that is submitted to the Office of the University Registrar and the VSE Graduate Admissions and Recruitment office. At the completion of MS requirements, a master’s degree is conferred.

Systems Engineering, BS/Data Analytics Engineering, Accelerated MS

Overview
Qualified undergraduate students in the Systems Engineering, BS have the option of obtaining an accelerated Data Analytics Engineering, MS.

For more detailed information, see AP6.7 Bachelor’s/Accelerated Master’s Degrees. For policies governing all graduate degrees, see AP6 Graduate Policies.

Admission Requirements
Mason undergraduate students majoring in systems engineering may apply to this option if they have earned 90 undergraduate credits with an overall GPA of at least 3.30.

For the predictive analytics concentration, students must submit evidence of:

- Satisfactory completion of courses in calculus, applied probability and statistics, and a scientific programming language.
• Familiarity with analytical modeling software, such as spreadsheets or math packages.

**Accelerated Option Requirements**
Students must complete all credits that satisfy requirements for the BS and MS programs, with six credits overlap chosen from the courses in the following table. For BS candidates, these graduate courses replace the corresponding undergraduate courses listed. The undergraduate version of these courses may not be applied toward the MS degree.

<table>
<thead>
<tr>
<th>Undergraduate</th>
<th>Graduate</th>
<th>Notes</th>
</tr>
</thead>
<tbody>
<tr>
<td>SYST 473</td>
<td>SYST 573</td>
<td>Credit may not be received for both courses.</td>
</tr>
<tr>
<td>OR 441</td>
<td>OR 541</td>
<td>Credit may not be received for both courses.</td>
</tr>
<tr>
<td>SYST 438</td>
<td>SYST 538</td>
<td>This course applies to only certain concentrations; Credit may not be received for both courses.</td>
</tr>
<tr>
<td>SYST 468</td>
<td>SYST 568</td>
<td>This course applies to only certain concentrations; Credit may not be received for both courses.</td>
</tr>
<tr>
<td>SYST 488</td>
<td>SYST 588</td>
<td>This course applies to only certain concentrations; Credit may not be received for both courses.</td>
</tr>
</tbody>
</table>

For the predictive analytics and financial engineering concentration, any other 500-level course may be applied to both the undergraduate and graduate degrees with approval of the advisor and SEOR department chair.

OR 541 Operations Research: Deterministic Models will substitute for the OR 531 Analytics and Decision Analysis core requirement in the MS DAE program. Students are not permitted to take OR 531 Analytics and Decision Analysis.

**Degree Conferral**
Students must apply the semester before they expect to complete the BS requirements to have the BS degree conferred. In addition, at the beginning of the student’s final undergraduate semester, students must complete a Bachelor’s/Accelerated Master’s Transition form that is submitted to the Office of the University Registrar and the VSE Graduate Admissions Office. At the completion of MS requirements, a master's degree is conferred.

**Data Analytics Graduate Certificate**
Banner Code: VS-CERG-DNIC

Phone: 703-993-6269
Email: datamine@gmu.edu

The Data Analytics Graduate Certificate allows students to obtain a basic foundation of knowledge and skills in data analytics engineering. These foundation courses provide the student with an understanding of the following concepts:
• Data, data quality, and large volumes of data
• Data management and data mining
• Modeling and model usage for making decisions
• Statistical methods and visualization

**Admissions & Policies**

**Admissions**
Applicants must have completed a baccalaureate degree from a regionally accredited program with an earned GPA of 3.00 or better in their 60 highest-level credits. Applicants are expected to have completed a degree in engineering, business, computer science, statistics, mathematics, or information technology, with demonstrated foundational competence in calculus, statistics, and computer programming. Applicants without that formal academic preparation but with clear evidence of strong and extensive work experience in data or analytics, may also be considered on a case by case basis. Current graduate students in the Volgenau School of Engineering and the School of Business can elect this certificate with the Graduate Secondary Certificate Program Application from the Office of the University Registrar (http://registrar.gmu.edu).

**Policies**
For policies governing all graduate certificates, see AP.6.8 Requirements for Graduate Certificates.

**Requirements**

**Certificate Requirements**
Total credits: 12

This certificate may be pursued on a part-time basis only.

**Coursework**
Students must achieve a total GPA of at least 3.00, with no more than three credits of a grade of C from the following courses.

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>AIT 580</td>

**Department of Bioengineering**
Phone: 703-993-5846
Email: bioeng@gmu.edu
Website: bioengineering.gmu.edu
Bioengineering involves the application of engineering tools and concepts to solve problems in biology or medicine. The impact of engineering on biomedicine is wide ranging, from advanced biomedical imaging technologies to discovering new diagnostic devices and targeted therapeutics. With an aging population, the growing costs of health care, and the impact of novel technology to fundamental understanding in biosciences, the demand for bioengineers is growing. This program provides students with a solid foundation in engineering while offering in-depth exposure to the life sciences. Bioengineering faculty members collaborate with colleagues at George Mason University and nearby institutions including Inova Health Center, and federal laboratories such as the Naval Research Laboratory, the National Institutes of Health Clinical Center, and the National Institute of Standards and Technology.

Research areas include:
- biomechanics
- biomedical imaging
- neuroengineering
- computational neuroscience
- microfabricated devices
- nanomedicines
- biomaterials
- tissue engineering

Available Programs

Bioengineering, BS

The BS in Bioengineering is a challenging multidisciplinary training program with the goal of enabling graduates to be competitive for an entry-level position in the biomedical industry or to continue their education in graduate school or medical school. The curriculum provides a strong background in the biological and engineering fundamentals of bioengineering as well as upper level courses in areas of biomedical measurements, biomedical systems modeling, and bioinformatics. The department offers six concentrations: Bioengineering Healthcare Informatics, Bioengineering Prehealth, Biomaterial and Nanomedicine, Biomedical Imaging and Devices, Computational Biomedical Engineering, Neurotechnology and Computational Neuroscience. In addition the Bioengineering, BS program offers an Honors Program to outstanding students. Entry is by invitation and based on academic performance achieved at Mason.

Bioengineering, MS

The Bioengineering, MS prepares students for research and professional practice in bioengineering and related fields. This program comprises four core areas: biomechanics, biomaterials, biomedical imaging, and neuroengineering while offering three different options. Students can choose to focus their graduate work toward a career in academia (thesis option), or in industry (practicum or coursework option).

Bioengineering, PhD

The Bioengineering, PhD is a research-intensive, multifaceted program which is comprised of four different concentrations. Students can choose to focus their graduate work in nanoscale bioengineering, neuroengineering, biomedical imaging or data-driven biomechanical modeling.

Faculty

Professors
Ascoli, Blackwell, Buschmann (chair), Cebral, Hoemann, Sikdar

Associate Professors
Bray, Ikonomidou, Peixoto, Wei

Assistant Professors
Chitnis, Ross, Veneziano

Affiliated Professors

Programs

- Bioengineering Minor
- Bioengineering, BS
- Bioengineering, MS
- Bioengineering, PhD

Bioengineering Minor

Banner Code: BIOE
Website: bioengineering.gmu.edu/

The minor in Bioengineering is available to both engineering and non-engineering majors. It provides considerable opportunities in a highly cross-disciplinary field involving the application of engineering concepts and tools to solve problems in biomedicine. The minor in Bioengineering prepares students to gain and reinforce their knowledge of biology and engineering fundamentals, and develop and apply skills to clinically-relevant challenges.

Admissions & Policies

Admissions
Students must have completed MATH 114 Analytic Geometry and Calculus II with a grade of B- or better to be admitted to the minor.

Policies
Eight credits of coursework must be unique to the minor. For policies governing all minors, see AP.S.3.4 Minors.

Requirements

Total credits: 19-21
## Minor Requirements

### Required Courses:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>BENG 101</td>
<td>Introduction to Bioengineering</td>
<td>3</td>
</tr>
<tr>
<td>BIOL 213</td>
<td>Cell Structure and Function (Mason Core)</td>
<td>4</td>
</tr>
<tr>
<td>BENG 214</td>
<td>Physiology for Engineers</td>
<td>3</td>
</tr>
</tbody>
</table>

Total Credits: 10

1 All students in the Bioengineering minor program are recommended to register for the specific section of BIOL 213 Cell Structure and Function (Mason Core).

### Technical Electives:

Select at least nine credits from the following list: 9-11

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>

### Bioengineering, BS

**Banner Code: VS-BS-BIOE**

**Academic Advising**

Phone: 703-993-4190  
Email: cborke@gmu.edu  
Website: https://bioengineering.gmu.edu/academics/bachelor-science-bioengineering

Bioengineering, also referred to as biomedical engineering, is the application of engineering tools and approaches to solve problems in biology and medicine. It is a broad and growing field that draws upon rapid advances in technology and computation, as well as on unprecedented growth in basic biological understanding. This program provides i) a scientific foundation in math, physics, biology, chemistry and physiology; ii) broad introductions to bioengineering technology platforms of medical imaging, devices, computational biomedical engineering, computational neuroscience and neurotechnology, biomaterials and nanomedicine, and health care informatics followed by a deepening of knowledge in at least one of these areas through a chosen concentration; and iii) translational courses showing how new technologies can be implemented in clinical medicine and be commercialized by industry partners.

Engineering design experiences are built into each year of the curriculum culminating in a senior design project. The impact of engineering, technologies and computer science on biomedicine is immense, and can only be harnessed through integrative multidisciplinary training in Bioengineering. With the growing demand for better health care, the need for bioengineers is expected to be high.

The multidisciplinary training in this field makes graduates competitive for positions in government and in biomedical industry. The BS in
Bioengineering also enables students to continue their education in graduate school or medical school.

**Accreditation**
The bachelor’s program in Bioengineering is accredited by the Engineering Accreditation Commission of ABET, http://www.abet.org.

**Program Educational Objectives**
Graduates of the Bioengineering bachelor’s program are expected within 3-5 years of graduation to:

1. Contribute to the development or application of health-related products or processes that are a benefit to society.
2. Continue their formal education by making demonstrable progress toward an advanced degree or professional development milestone.
3. Communicate and perform effectively as members and/or leaders of multidisciplinary teams.

**Concentrations**
The concentrations in the BS Bioengineering program are:

- Bioengineering Healthcare Informatics (BHI)
- Bioengineering Prehealth (BMPH)
- Biomaterials and Nanomedicine (BNM)
- Biomedical Imaging and Devices (BMID)
- Computational Biomedical Engineering (CBME)
- Neurotechnology and Computational Neuroscience (NTCN)

**Admissions & Policies**

**Policies**
For policies governing all undergraduate degrees, see AP.5 Undergraduate Policies.

**Advising**
All Bioengineering students are required to meet with their departmental academic advisor prior to course registration each semester. Students who are considering bioengineering as their major must meet with the Volgenau School of Engineering Coordinator of Undergraduate Advising in 2500 Nguyen Engineering Building.

**Change of Major**
See Change of Major for more information.

**Writing-Intensive Requirement**
Mason’s writing-intensive requirement is satisfied by BENG 360 Biomedical Imaging, in which faculty provide feedback on student writing assignments.

**Termination from the Major**
No math, science, or Volgenau School of Engineering course that is required for the major may be attempted more than three times. Those students who do not successfully complete such a course within three attempts will be terminated from the major. Undeclared students in the Volgenau School who do not successfully complete a course required for a Volgenau School major within three attempts will also be terminated.

In addition, students in the Volgenau School with evidence of continued failure to make adequate progress toward declaring or completing a Volgenau School major will be terminated from the school. Adequate progress is determined by the major program. For more information, see AP.5.2.4 Termination from the Major (https://catalog.gmu.edu/policies/academic/undergraduate-policies/#ap-5-2-4).

Once a student has attempted one of these courses twice unsuccessfully, the third attempt must be no later than the next semester of enrollment, excluding summers. Failure to take the course at that time will result in termination from the major. A third attempt of a Volgenau School of Engineering course requires support by the student’s major department as well as permission by the department offering the course. This permission is not guaranteed. If the student is unable to take the course when required, the student may request an extension to a future semester; extensions require approval of the student’s advisor, their department, and the Associate Dean for Undergraduate Programs. The deadline for extension requests is the add deadline for the semester in which the course is required.

Students who have been terminated from a Volgenau School of Engineering major may not register for a Volgenau School course without permission of the department offering the course. This applies to all undergraduate courses offered by the Volgenau School except IT 104 Introduction to Computing (Mason Core) and STAT 250 Introductory Statistics I (Mason Core).

A student may not declare any major in the Volgenau School of Engineering if the student has previously met the termination criteria for that major at any time, regardless of what the student’s major was at the time the courses were taken.

**Requirements**

**Degree Requirements**
Total credits: 122-134

Students must complete each BENG, BIOL, CHEM, CS, ECE, ME course presented as part of the required credits for the degree with a grade of C or better.

- BENG 434 Computational Modelling of Neurons and Networks
- BENG 435 Multi-scale Modeling and Simulation in Biomedicine
- BENG 437 Medical Image Processing
- BENG 438 Advanced Biomedical Imaging
- BENG 441 Nanomedicine and Drug Delivery

1. All students in the Bioengineering program are required to register for the specific section of BIOL 213.
2. All students in the Bioengineering program need a grade of B- or better in MATH 114 and MATH 214, which are a pre-requisite requirement for some BENG courses.
3. All students in the Bioengineering program are required to register for the specific section of MATH 203 that includes a 1-hour recitation with Matlab applications.

Honors

Honors in the Major

The Department of Bioengineering offers an Honors Program that creates a community of outstanding scholars in bioengineering who share a commitment to learning, service, and leadership. The Program is based on the bioengineering curriculum, and is distinct from the University Honors Curriculum.

Eligibility

Entry to the Honors Program is by invitation, extended to students with a declared major in Bioengineering who have completed a minimum of 30 credit hours at Mason with a minimum cumulative GPA of 3.50 and a minimum GPA of 3.20 in each prior semester.

Honors Requirements

The Honors Program is challenging and designed for the highly motivated student with interests in any of the bioengineering concentrations. Honors students must satisfy requirements in addition to those of the normal BS degree in bioengineering, including:

- Successful completion of BENG 395 RS: Mentored Research in Bioengineering
- Six credits must be earned by taking a combination of BENG 5XX/6XX level courses. With permission of the Department of Bioengineering, 5XX/6XX level courses from other Volgenau School of Engineering programs may be considered.

Once admitted to the Honors Program, students must remain in good standing and maintain a minimum cumulative GPA of 3.50 and a minimum GPA of 3.20 in each semester for all courses counting toward the BS degree in bioengineering, maintain continuous enrollment working towards the degree, and abide by the Mason Honor Code.

Accelerated Master’s

BS (selected)/Statistical Science, Accelerated MS

Overview

Highly-qualified students in BS programs have the option of applying to the accelerated Statistical Science, MS program.

For more detailed information, see AP.6.7 Bachelor’s/ Accelerated Master’s Degrees. For policies governing all graduate degrees, see AP.6 Graduate Policies.

Admission Requirements

No specific undergraduate BS degree is required. Students enrolled in any BS degree may apply to the accelerated Statistical Science, MS program.
program if such an accelerated Statistical Science, MS pathway is allowable from the student's BS program, which will be determined by the academic advisors of both the BS and MS programs; and if they have earned 90 undergraduate credits with an overall GPA of 3.00. Students must have successfully completed the following Mason courses each with a grade of C or better prior to admission to the accelerated program:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>MATH 213</td>
<td>Analytic Geometry and Calculus III</td>
<td>3</td>
</tr>
<tr>
<td>MATH 203</td>
<td>Linear Algebra</td>
<td>3</td>
</tr>
<tr>
<td>or MATH 321</td>
<td>Abstract Algebra</td>
<td></td>
</tr>
<tr>
<td>STAT 250</td>
<td>Introductory Statistics I (Mason Core)</td>
<td>3</td>
</tr>
<tr>
<td>or STAT 344</td>
<td>Probability and Statistics for Engineers and Scientists I</td>
<td></td>
</tr>
<tr>
<td>STAT 346</td>
<td>Probability for Engineers</td>
<td>3</td>
</tr>
<tr>
<td>or MATH 351</td>
<td>Probability</td>
<td></td>
</tr>
<tr>
<td>STAT 362</td>
<td>Introduction to Computer Statistical Packages</td>
<td>3</td>
</tr>
</tbody>
</table>

Accelerated Option Requirements

Students must complete all credits satisfying degree requirements for the BS and MS programs, with 6 credits overlap chosen from the following courses: STAT 515 Applied Statistics and Visualization for Analytics, STAT 544 Applied Probability, STAT 554 Applied Statistics I, STAT 560 Biostatistical Methods, and STAT 574 Survey Sampling I. (Credit may not be received for both STAT 474 and STAT 574; nor for both STAT 460 and STAT 560.) The graduate courses selected for overlap must be approved by the academic advisors of both the BS and MS programs. All graduate course prerequisites must be completed prior to enrollment. Each graduate course must be completed with a grade of B or better to apply toward the MS degree.

While still in undergraduate status, a maximum of 6 additional graduate credits may be taken as reserve graduate credit and applied to the master’s program. Reserve graduate credits do not apply to the undergraduate degree.

Degree Conferral

Students must apply the semester before they expect to complete the BS requirements to have the BS degree conferred. In addition, at the beginning of the student’s final undergraduate semester, students must complete a Bachelor's/Accelerated Master’s Transition form that is submitted to the Office of the University Registrar and Graduate Recruitment and Enrollment Services. At the completion of MS requirements, a master’s degree is conferred.

Bioengineering, BS/Bioengineering, Accelerated MS

Overview

Highly-qualified students in Bioengineering, BS (https://catalog.gmu.edu/colleges-schools/engineering/bioengineering/bioengineering-bs/) have the option of obtaining an accelerated Bioengineering, MS (https://catalog.gmu.edu/colleges-schools/engineering/bioengineering/bioengineering-ms/).

For more detailed information, see AP6.7 Bachelor’s/Accelerated Master’s Degrees (https://catalog.gmu.edu/policies/academic/graduate-policies/#ap-6-7). For policies governing all graduate degrees, see AP6 Graduate Policies (https://catalog.gmu.edu/policies/academic/graduate-policies/).

Admission Requirements:

Mason undergraduate students majoring in Bioengineering, BS may apply to this option if they have earned 90 undergraduate credits with an overall GPA of at least 3.20 and completed all MATH and PHYS requirements. Criteria for admission are identical to criteria for admission to the Bioengineering, MS (https://catalog.gmu.edu/colleges-schools/engineering/bioengineering/bioengineering-ms/) program.

Accelerated Options Requirement

Students must complete all credits that satisfy requirements for both the BS and MS programs. Up to two courses (6 credits) of approved MS level courses taken as part of the undergraduate degree may be applied to the graduate degree. The courses selected for this purpose must be approved by the academic advisor of both the BS and MS programs and by the Bioengineering department chair. For undergraduate Bioengineering technical electives, the students may choose the graduate version of such elective courses to replace the corresponding undergraduate courses.

Degree Conferral

Students are recommended to meet with the Bioengineering academic advisor one year before and must apply to the program one semester before they expect to complete the BS requirements to have the BS degree conferred. In addition, at the beginning of the student’s final undergraduate semester, students must complete a Bachelor’s/Accelerated Master’s Transition form that is submitted to the Office of the University Registrar and the VSE Graduate Admissions Office. At the completion of MS requirements, a MS degree is conferred.

<tr>
<td>STAT 554</td>
<td>Applied Statistics I</td>
<td>3</td>
</tr>
</tbody>
</table>

Note:

Students are permitted to take additional graduate basic courses in their undergraduate programs. In such cases, those classes cannot be counted toward requirements for the MS.

**Degree Conferral**

Students must apply the semester before they expect to complete the BS requirements to have the BS degree conferred. In addition, at the beginning of the student’s final undergraduate semester, students must complete a Bachelor’s/Accelerated Master’s Transition form that is submitted to the Office of the University Registrar and the VSE Graduate Admissions Office. At the completion of MS requirements, a master’s degree is conferred.

Bioengineering, BS/Operations Research, Accelerated MS

**Overview**

Highly-qualified students in the Bioengineering, BS have the option of obtaining an accelerated Operations Research, MS.

For more detailed information, see AP6.7 Bachelor’s/Accelerated Master’s Degrees. For policies governing all graduate degrees, see AP6 Graduate Policies.

**Admission Requirements**

Mason undergraduate students majoring in Bioengineering, BS may apply to this option if they have earned 90 undergraduate credits with an overall GPA of at least 3.30 and completed all MATH and PHYS requirements. Criteria for admission are identical to criteria for admission to the Operations Research, MS program.

**Accelerated Options Requirement**

Students must complete all credits that satisfy requirements for both the BS and MS programs. Up to two courses (6 credits) of approved master’s level courses taken as part of the undergraduate degree may be applied to the graduate degree. The courses selected for this purpose must be approved by the academic advisors of both the BS and MS programs and by the SEOR department chair. For the BS programs that allow undergraduate electives from the department of system engineering and operations research, the students may choose the graduate version of such elective courses to replace the corresponding undergraduate courses.

**Degree Conferral**

Students must apply the semester before they expect to complete the BS requirements to have the BS degree conferred. In addition, at the beginning of the student’s final undergraduate semester, students must complete a Bachelor’s/Accelerated Master’s Transition form that is submitted to the Office of the University Registrar and the VSE Graduate Admissions Office. At the completion of MS requirements, a master’s degree is conferred.

Bioengineering, BS/Data Analytics Engineering, Accelerated MS

**Overview**

Highly-qualified students in the Bioengineering, BS have the option of obtaining an accelerated Data Analytics Engineering, MS with a concentration in Bioengineering.

Students in an accelerated degree program must fulfill all university requirements for the master’s degree. For policies governing all graduate degrees, see AP6 Graduate Policies.

**Admission Requirements**

Students in the Bioengineering, BS program may apply to this option if they have earned 95 undergraduate credits with an overall GPA of at least 3.30. Students must have successfully completed CS 222 Computer Programming for Engineers and BENG 320 Bioengineering Signals and Systems. Criteria for admission are identical to criteria for admission to the Bioengineering concentration of the Data Analytics Engineering, MS program.

**Accelerated Option Requirements**

Students must complete all requirements for the BS and MS programs, with 6 credits overlap.

Students register for 6 credits of 500-level basic courses in place of the corresponding BENG 400-level courses required for the undergraduate degree requirements. Specifically, students must register for:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>BENG 501</td>
<td>Bioengineering Research Methods</td>
<td>3</td>

<td>Principles of Data Management and Mining (in place of BENG 420)</td>
<td>3</td>
</tr>
<tr>
<td></td>
<td><strong>Total Credits</strong></td>
<td><strong>6</strong></td>
</tr>
</tbody>
</table>

Note:

Students are permitted to take additional graduate basic courses in their undergraduate programs. In such cases, those classes cannot be counted toward requirements for the MS.

Bioengineering, BS/Systems Engineering, Accelerated MS

**Overview**

Highly-qualified students in the Bioengineering, BS have the option of obtaining an accelerated Systems Engineering, MS.

For more detailed information, see AP6.7 Bachelor’s/Accelerated Master’s Degrees. For policies governing all graduate degrees, see AP6 Graduate Policies.
Admission Requirements
Mason undergraduate students majoring in Bioengineering, BS may apply to this option if they have earned 90 undergraduate credits with an overall GPA of at least 3.30 and completed all MATH and PHYS requirements. Criteria for admission are identical to criteria for admission to the Systems Engineering, MS program.

Accelerated Options Requirement
Students must complete all credits that satisfy requirements for both the BS and MS programs. Up to two courses (6 credits) of approved master's level courses taken as part of the undergraduate degree may be applied to the graduate degree. The courses selected for this purpose must be approved by the academic advisors of both the BS and MS programs and by the SEOR department chair. For the BS programs that allow undergraduate electives from the department of system engineering and operations research, the students may choose the graduate version of such elective courses to replace the corresponding undergraduate courses.

Degree Conferral
Students must apply the semester before they expect to complete the BS requirements to have the BS degree conferred. In addition, at the beginning of the student's final undergraduate semester, students must complete a Bachelor's/Accelerated Master's Transition form that is submitted to the Office of the University Registrar and the VSE Graduate Admissions Office. At the completion of MS requirements, a master's degree is conferred.

Bioengineering, MS
Banner Code: VS-MS-BIOE
Academic Advisor: Shani Ross, PhD
Phone: 703-993-5934
Email: sross20@gmu.edu
Website: https://bioengineering.gmu.edu/academics/master-science-bioengineering

The MS in Bioengineering prepares students for research and professional practice in bioengineering and related fields. The program includes both fundamentals and advanced work to apply engineering techniques to solve problems in biology and medicine. A major distinguishing feature of the curriculum is that it is designed to educate leaders who understand and appreciate how biomedical technology is translated from bench to bedside. Graduates from this program will eventually work in universities, industry or government in a variety of roles due to the breadth of this program and its content specific clinical translation of new technologies.

Admissions & Policies

Admissions
Applicants must have completed a baccalaureate degree in engineering or the sciences from an accredited program and an earned GPA of 3.0 or better in their 60 highest-level credits.

In addition to fulfilling Mason’s admission requirements for graduate study, applicants seeking to be admitted must demonstrate or provide the following:

- Demonstrate strong knowledge in ordinary differential equations cell biology and general chemistry as demonstrated by the BS degree, course selection, or project work.
- Additional knowledge in molecular biology, physiology, organic chemistry, linear algebra, and/or statistics is recommended.
- Provide two letters of recommendation, from references who are familiar with the applicant’s professional accomplishments.
- Provide a resume and detailed statement of career goals and professional aspirations.
- If their native language is not English, students must take the English Proficiency exam. Test score minimum requirements are available at https://www2.gmu.edu/admissions-aid/how-apply/graduate/standardized-test-information/ (https://www2.gmu.edu/admissions-aid/how-apply/graduate/standardized-test-information/)
- Provide official GRE scores.

Requirements

Degree Requirements
Total credits: 30-33
Students complete the Core Bioengineering requirements, and requirements within one selected option: thesis, practicum or coursework.

</table>

Total Credits 6
Students are expected to complete 6 credits of BENG 799 Master's Thesis towards their degree. Students cannot enroll in BENG 799 Master's Thesis until the completion of their second semester of coursework. Once enrolled students must maintain continuous registration in thesis research until graduation, excluding summers. Students who defend in the summer must be registered for at least 1 credit of thesis research during that summer term.

Students choose from a restricted list of technical specialization courses to increase technical depth in an area of their interest, under the guidance and with the approval of the student's advisor. Students must choose six credits from these courses. At least half of the selected classes must be at the 600 or 700 level.

**Committee Selection**

Each student must form a master’s committee comprising three individuals. A minimum of two members of the committee must be tenured or tenure-track faculty in the Department of Bioengineering. The other member must be from outside the department.

**Thesis Research Proposal**

Each student must prepare a written thesis proposal, and it must be presented before the completion of the second semester. The proposal must be made available to the committee at least two weeks in advance of the presentation. The proposal must be presented to and approved by the committee. The committee determines whether the proposal has merit and can lead to significant contributions to the area and whether the student has the knowledge and skills to complete the proposed work successfully and in a timely manner. If the student fails to defend the proposal, the student may present a proposal a second time, no later than 60 days from the first attempt. Failure in the second attempt results in dismissal from the program.

**Thesis Preparation and Defense**

While preparing the thesis, the candidate enrolls in thesis research. The candidate can proceed to a public defense of the thesis once it has been approved by the committee.

The defense must be announced at least two weeks in advance. The thesis draft must be submitted to the library and made publicly available at least two weeks in advance of the defense. The entire committee must be present at the defense. If the candidate fails to defend the thesis, the candidate may request a second defense, following the same procedures as for the initial defense. A candidate who fails a second attempt to defend the thesis is terminated from the program.

**Practicum Option**

Note: Students who elect to the coursework option will complete a minimum of 33 credit hours.

Additional Training Requirement
Bioengineering Seminar
All MS students are required to attend a minimum of two departmental seminars per semester. Students will sign an attendance sheet available at the end of each seminar.

Accelerated Master's

Bioengineering, BS/Bioengineering, Accelerated MS

Overview
Highly-qualified students in the Bioengineering, BS (https://catalog.gmu.edu/colleges-schools/engineering/bioengineering/bioengineering-bs/) have the option of obtaining an accelerated Bioengineering, MS (https://catalog.gmu.edu/colleges-schools/engineering/bioengineering/bioengineering-ms/).

For more detailed information, see AP.6.7 Bachelor's/Accelerated Master's Degrees. For policies governing all graduate degrees, see AP.6 Graduate Policies.

Admission Requirements
Mason undergraduate students majoring in Bioengineering, BS may apply to this option if they have earned 90 undergraduate credits with an overall GPA of at least 3.20 and completed all MATH and PHYS requirements. Criteria for admission are identical to criteria for admission to the Bioengineering, MS (https://catalog.gmu.edu/colleges-schools/engineering/bioengineering/bioengineering-ms/) program.

Accelerated Options Requirement
Students must complete all credits that satisfy requirements for both the BS and MS programs. Up to two courses (6 credits) of approved MS level courses taken as part of the undergraduate degree may be applied to the graduate degree. The courses selected for this purpose must be approved by the academic advisor of both the BS and MS programs and by the Bioengineering department chair. For undergraduate Bioengineering technical electives, the students may choose the graduate version of such elective courses to replace the corresponding undergraduate courses.

Degree Conferral
Students are recommended to meet with the Bioengineering academic advisor one year before and must apply to the program one semester before they expect to complete the BS requirements to have the BS degree conferred. In addition, at the beginning of the student's final undergraduate semester, students must complete a Bachelor's/ Accelerated Master's Transition form that is submitted to the Office of the University Registrar and the VSE Graduate Admissions Office. At the completion of MS requirements, a MS degree is conferred.
Mechanical Engineering, BS / Bioengineering, Accelerated MS

Overview
Highly-qualified students in the Mechanical Engineering, BS have the option of obtaining an accelerated Bioengineering, MS.

For more detailed information, see AP6.7 Bachelor’s/Accelerated Master’s Degrees. For policies governing all graduate degrees, see AP6 Graduate Policies.

Admission Requirements
Mason undergraduate students majoring in Mechanical Engineering, BS may apply to this option if they have earned 90 undergraduate credits with an overall GPA of at least 3.20, completed all MATH and PHYS requirements, and passed BENG 320 Bioengineering Signals and Systems and BIOL 213 Cell Structure and Function (Mason Core) with the grade of C or better. It is also recommended that students take BENG 214 Physiology for Engineers and are proficient in MATLAB. Criteria for admission are identical to criteria for admission to the Bioengineering, MS program.

Accelerated Options Requirement
Students must complete all credits that satisfy requirements for both the BS and MS programs. Students take 6 credits of approved MS level BENG courses as part of their undergraduate degree that will also be applied to the graduate degree. The courses selected for this purpose must be approved by the academic advisor of both the BS and MS programs and by the Bioengineering department chair.

Specifically, students are encouraged to take two of the following courses to apply towards both their undergraduate and graduate degree.

Bioengineering, PhD

Banner Code: VS-PHD-BIOE

Academic Advisor: Parag Chitnis, PhD

Phone: 703-993-5039
Email: pchitnis@gmu.edu
Website: https://bioengineering.gmu.edu/academics/phd-bioengineering

Rapid technologically driven advances in understanding and treating human disease have opened up vast opportunities to advance human health through research that integrates engineering, basic sciences, medical sciences, and knowledge of industry practices. The doctoral program will prepare leaders in bioengineering in this broader, integrative sense of the discipline. A major distinguishing feature of the curriculum is its emphasis on understanding how biomedical technology is translated from bench to bedside. Graduates from this program will eventually work in universities, industry or government in a variety of roles, including scientific research, technology development, and regulatory affairs.

Admissions & Policies

Admissions

Application Requirements
In addition to fulfilling Mason’s admission requirements for graduate study, applicants should:

- Have a baccalaureate degree in engineering or the sciences from an accredited program with a reputation for high academic standards and an earned GPA of 3.3 or better in their highest-level engineering-related credits.
- Provide official GRE Scores.
- Provide three letters of recommendation, preferably from academic references or references in industry or government who are familiar with the applicant’s aptitude for research.
- Provide a resume and detailed statement of career goals and professional aspirations, including why they want to study at Mason, and two faculty with whom they want to work.
- Demonstrate interest in combining engineering and the natural sciences with discovery and application in the life science; i.e., via a degree which reflects the desired combination (such as bioengineering, biomedical engineering, biophysics); a degree in engineering or the natural sciences which includes coursework in life sciences; a degree in biology which includes coursework in mathematics, physics, or engineering; a project or research experience with combined complementary expertise.
- If their native language is not English, students must take the English Proficiency exam. Test score minimum requirements are available at https://www2.gmu.edu/admissions-aid/how-apply/graduate/standardized-test-information (https://www2.gmu.edu/admissions-aid/how-apply/graduate/standardized-test-information/).

Policies

Reduction of Credit

Students must complete a minimum of 72 graduate credits, which may be reduced by a maximum of 30 credits from a related master’s degree. Reduction of credit requires the approval of the program director or designee and the dean or designee of the school. They determine how many credits are eligible for the reduction of credit.
Program Requirements
The Bioengineering PhD program requires successful completion of coursework detailed in a plan of study, qualifying examination, dissertation proposal, and final dissertation defense. Additional training requirements include seminar attendance, ethics training, and mentoring and teaching experience. All the general requirements for doctoral degrees at Mason apply to this program as well.

For students to remain eligible for the PhD program, they must maintain a "B" average. Grades of "C" or lower in courses cannot be counted towards degree completion. Refer to the University policy AP 6.6.2 (https://catalog.gmu.edu/policies/academic/graduate-policies/) and the Mason Engineering Graduate Student Resources (https://mymasonportal.gmu.edu/webapps/blackboard/content/listContent.jsp?course_id=_336120_1&content_id=_7643583_1/) regarding academic termination policies.

Technical Electives

These graduate courses develop additional technical expertise in a student’s PhD concentration. Students must choose 12 credits from the following list and/or from the concentration courses that are not already being taken for the concentration requirement. At least half of the selected classes must be at or above the 600 level.

</table>

Program of Study

Upon starting the PhD program, the student should review the course requirements in the catalog and, in consultation with their advisor, define a plan of study and declare a concentration. The recommended timeline, milestones, instructions, and forms can all be found on the Bioengineering PhD program’s website: https://bioengineering.gmu.edu/academics/phd-bioengineering/.

Qualifying Examination

All students entering the Bioengineering PhD program are expected to pass a qualifying exam within one to two years of entering the program. Detailed instructions and forms can be found here (https://bioengineering.gmu.edu/academics/phd-bioengineering/). The goal of the qualifying exam is to test the student’s preparation to undertake doctoral level research. The exam will test the student’s research competency as well as knowledge of core bioengineering concepts and competency in complementary areas.

A committee identified by the student’s advisor (dissertation director) will administer the exam. The exam consists of a written and oral component, times and dates of which are determined by the student’s dissertation director. The candidate’s dissertation director communicates with the committee to determine the four topics of the exam, completes the qualifying exam topics form and transmits the form to the candidate. At least two months prior to the written exam, the student will receive a reading list from each committee member. The committee members provide their written questions to the committee chair who puts them together into the final form of the written exam. The student will take the written exam and their answers will be transmitted to the committee members. The oral exam will take place about one week after the written exam.

Composition of the Qualifying Exam Committee:
The committees for the qualifying exam consists of four individuals:

- A minimum of two members, including the chair of the committee must be graduate faculty in the Department of Bioengineering.
- One member must be graduate faculty from outside the department.
The chair of the committee is responsible for ensuring the correct forms are completed and procedures are followed.

The dissertation director is the main scientist guiding the student’s research and cannot be chair of the committee.

**Written Exam:**
A set of four topics, relevant to the student’s concentration and research topic, will be assigned to the student as representing essential knowledge that the student should master to be successful in their research, at least two months prior to the qualifying exam. In addition, the qualifying exam committee will provide the student a list of readings for each topic that the student is expected to master. The list of readings can include specific articles, books or book chapters, or syllabus items (e.g. from a class at Mason) for each of the topics. Each of the committee members creates written questions for one of the topics which will be provided to the student on the day of the exam.

The written component is a four hour exam with questions from each of the four examiners. There will be one question per examiner and each question is expected to require one hour to answer. The exam is closed book. One question can be replaced by a computational assignment to be completed by the time of the oral. In that case, the total written exam time will be reduced to three hours.

**Oral Exam:**
At least one week after the written exam, the student will take the oral exam. The oral consists of answering questions by the qualifying committee related to the topics of the written exam.

**Grading:**
The committee determines whether the candidate has passed or failed the exam based on the written report and oral exam and reports the results in the qualifying exam results form. The committee optionally provides a list of recommendations, e.g. additional material the student needs to master. If the student fails the exam, the committee has the option of recommending that the student re-takes the exam, and if so, must specify what must be improved, e.g. knowledge of certain topics, oral presentation, and/or written exam. The committee can also specify a time frame for the second exam. The exam can only be repeated once. A student who fails to qualify on their second try will be removed from the program.

**Dissertation Proposal**
Each student must prepare and defend a written dissertation proposal to their dissertation committee. The student’s dissertation director names the committee and chooses the date and time of the oral presentation. Detailed instructions, grading rubrics, and required forms are all found here (https://bioengineering.gmu.edu/academics/phd-bioengineering/). While preparing this proposal, the student enrolls in BENG 998 Doctoral Dissertation Proposal. The proposal must be made available to the committee at least two weeks in advance of the presentation. The proposal must be presented to and approved by the dissertation committee. All committee members assess the written proposal and oral presentation using the grading rubrics. The committee determines whether the proposal has merit and can lead to significant contributions to the area and whether the student has the knowledge and skills to complete the proposed work successfully and in a timely manner.

Students may present their dissertation proposal only after passing the qualifying exam. If the student fails to defend the proposal, the student may present a dissertation proposal a second time at a later date. Failure in the second attempt results in dismissal from the program.

**Written Proposal:**
The proposal should at a minimum clearly state the research question and the specific aims of the research, provide a critical review of the literature, present the hypotheses, the rationale and the significance of the research in addressing a gap in scientific knowledge, describe the research methods and study design in sufficient detail and present preliminary results demonstrating the feasibility of the research. Additional guidelines are provided in the written proposal rubric.

**Oral Presentation and Exam:**
The candidate must present the proposal to committee in a venue open to the public. The presentation should be 30 - 45 minutes long. Following the research presentation, the dissertation committee will ask the students a number of questions to evaluate the students understanding of the relevant literature and methods that are broadly related to the chosen area of research, and whether the student has the knowledge and skills to complete the proposed work successfully and in a timely manner. Additional guidelines are provided in the oral presentation rubric.

**Grading:**
The written proposal and oral presentation are graded according to rubrics and the results reported in the proposal results form. If the dissertation committee feels that the student is not adequately prepared, they may recommend remedial measures, including additional coursework to address any gaps in knowledge, or modification of the aims of the proposal. The proposal may be repeated once.

**Advancement to Candidacy**
The student is advanced to candidacy for the PhD degree once they have successfully presented and defended a written dissertation proposal, completed all 48 course credits, and completed a minimum of 6 credits of BENG 998 Doctoral Dissertation Proposal. The student should also submit the Advancement to Candidacy form. The instructions for advancement to candidacy and the required form can be found here (https://bioengineering.gmu.edu/academics/phd-bioengineering/).

**Dissertation Research**
Students are expected to complete 24 credits of BENG 998 Doctoral Dissertation Proposal and BENG 999 Doctoral Dissertation towards their degree. Students cannot enroll in BENG 998 Doctoral Dissertation Proposal before they have passed the qualifying exam. Students cannot enroll in BENG 999 Doctoral Dissertation before they have advanced to candidacy. Students who advanced to candidacy after the add period for a given semester must wait until the following semester to register for BENG 999 Doctoral Dissertation. Students cannot advance to candidacy and defend their dissertation during the same semester. Once enrolled in BENG 999 Doctoral Dissertation, students must maintain continuous registration in BENG 999 Doctoral Dissertation each semester until graduation, excluding summers. Students who defend in the summer must be registered for at least 1 credit of BENG 999 Doctoral Dissertation during that summer term.

Dissertation Committee Selection

Each student must form a dissertation committee, comprising four or five individuals:

- A minimum of two members, including the chair of the committee must be graduate faculty in the Department of Bioengineering.
- One member must be graduate faculty from outside the department.
- The chair of the committee is responsible for ensuring the correct forms are completed and procedures are followed.
- The dissertation director is the main scientist guiding the student’s research and cannot be the chair of the committee.
- It is strongly recommended that one of the committee members be external to the university.

Refer to https://catalog.gmu.edu/policies/academic/graduate-policies/#text for who is allowed to be on these committees (see section AP6.10.5 Dissertation Committee). The dissertation proposal committee has the same requirements as the dissertation committee. It is recommended for continuity that the same faculty should be on the committee for the qualifying exam, dissertation proposal, and dissertation defense; however, committee membership can be changed if circumstances warrant.

Dissertation Preparation and Defense

The candidate must write and publicly defend their dissertation. The student’s dissertation director names the committee and chooses the date and time of the oral defense. The committee must sign and submit a pre-defense form four weeks prior to the defense. Detailed instructions, grading rubrics, and required forms are all found here (https://bioengineering.gmu.edu/academics/phd-bioengineering/). While preparing the dissertation, the candidate enrolls in BENG 999 Doctoral Dissertation. The candidate can proceed to a public defense of the dissertation once their dissertation has been approved by the dissertation committee. The dissertation must make significant contributions to its area as evidenced by refereed journal and/or conference publications.

The candidate should begin early in the term to meet the deadlines (https://registrar.gmu.edu/students/graduation/timelines/). The candidate schedules a Format Review with University Dissertation & Thesis Services (UDTS) at least 2 - 3 weeks prior to the defense (https://library.gmu.edu/udts/process). The candidate provides the written dissertation to the committee at least 4 weeks before the defense. The defense must be announced at least two weeks in advance. The entire dissertation committee must be present at the defense, unless an exception is approved by the director of the PhD in Bioengineering Program in advance of the defense. If the candidate fails to defend the dissertation, the candidate may request a second defense, following the same procedures as for the initial defense. There is no time limit for this request other than general time limits for the doctoral degree. A candidate who fails a second attempt to defend the dissertation is terminated from the program.

Dissertation:

The dissertation should report on research performed by the candidate during their studies at Mason. Ideally, the main chapters of the dissertation are comprised of published manuscripts, submitted manuscripts, and the student’s final manuscript in preparation. The dissertation should include an introductory chapter, which gives a broad overview of all the research, and a concluding chapter, which summarizes the main findings of the body of work, and outlines future directions suggested by the research. Additional guidelines are provided in the written dissertation rubric. Format of the dissertation is determined by University Dissertation & Thesis Services.

Oral Presentation and Exam:

The candidate must present the dissertation to committee in a venue open to the public. The oral presentation should last 30 - 45 minutes and include a general introduction and background to enable understanding by a broad audience. Explanation of the candidate’s research should focus on the most significant results with easy to understand graphics. Additional guidelines for preparing the presentation are provided in the oral presentation rubric.

Following the research presentation, the dissertation committee will ask the candidate a number of questions to evaluate the student’s understanding of research. The questioning generally begins with the external examiner and ends with the research supervisor’s evaluation. All committee members assess the written dissertation and the oral presentation using the grading rubrics and the results are reported on the dissertation results form. If the dissertation committee feels the dissertation does not make a sufficient contribution, or that the oral presentation was inadequate, the committee may request further research or require a repeat of the oral presentation.

Grading:

Following the presentation and questions, the candidate and other attendees leave the room to allow the committee to deliberate. The deliberations are presided by the chair of the committee who begins by asking the external examiner to evaluate the candidate. Other committee members then provide their evaluations ending with the research supervisor’s evaluation. All committee members assess the written dissertation and the oral presentation using the grading rubrics and the results are reported on the dissertation results form. If the dissertation committee feels the dissertation does not make a sufficient contribution, or that the oral presentation was inadequate, the committee may request further research or require a repeat of the oral presentation.

Additional Training Requirements

Bioengineering Seminar

All PhD students are required to attend a minimum of 3 departmental seminars per semester. Students will sign an attendance sheet available at the end of each seminar.

Ethics Training

Prior to beginning research studies in a Bioengineering laboratory, all PhD students must complete the on-line Collaborative Institutional Training Initiative (CITI) Responsible Conduct of Research course. CITI training modules provide students with an understanding of conflicts of interest, research misconduct, peer review, and authorship.

Bioengineering Mentorship

All PhD students are required to participate in mentoring at least one undergraduate Bioengineering senior design team for a duration of 1 year. PhD students work with the faculty advisor for the senior design team and are expected to apply translational and entrepreneurial concepts towards the mentorship of the team.

Teaching Requirement

For degree conferred all PhD students are required to participate in at least one teaching activity in consultation with their major advisors. Teaching opportunities include presenting lectures, conducting recitation sessions, serving as a teaching assistant, working as a laboratory assistant, participating in teaching workshops, preparing course materials, and other related activities approved by the student’s advisor.

Department of Computer Science

PhD program: csphd@gmu.edu
Computer science is a discipline concerned with the analysis, design, implementation, maintenance, and evolution of computer-based systems used in almost all walks of life. Computer science is at the center of the information revolution in the 21st century. Advanced computation tools and techniques are revolutionizing and transforming the way we work, play, communicate, collaborate, and conduct business. In addition, computational approaches are integral to several scientific and engineering fields such as computational sciences, bioinformatics, and health informatics, to name a few.

Computer scientists must be well-grounded not only in the theory of computing, but also in its application to diverse areas. Computer scientists must be capable of working closely with members of other professions associated with computing. Students who pursue this discipline will learn about programming languages, data structures, algorithms, operating systems, artificial intelligence, robotics, data mining, computer networking, cyber-security, databases and software engineering.

Faculty

Department Faculty

Professors

Associate Professors
Ammann, Domeniconi, Durić, Gingold, Li, Lien, Lin, Maddox, Richards, Snyder (Associate Chair), Wang, White (Associate Chair), Zhong

Assistant Professors
Baldimtsi, Bell, Cheng, Dimitriadis, González Hernández, Gordon, Larson, LaToza, Mengistu, Osterweil, Pathak, Soundararajan, Yu

Instructors
Andrea, Avramovic, Neary, Otten, Russell

Adjunct Professors
Abu Jbara, Bailey, Batarseh, Curts, Dubey, Ellis, Fielding, Geldon, Greenwald, He, Kaznachey, King, Kodali, Kowalski, Kurtz, McDowall, Nidiffier, Nordstrom, Olimpiew, Pettit, Reep, Seymour, Styx, Wheeler

Emeritus Faculty
DeJong, Gomaa, Hamburger, Rine, Wechsler

Email: csug@gmu.edu
Website: http://cs.gmu.edu/prospective-students/undergraduate-programs/bs-in-applied-computer-science/

This program presents an innovative approach to the integration of computer science with other disciplines that require expertise in computing techniques. These disciplines do not merely use computing but create new and interesting problems for computer scientists.

Admissions & Policies

Policies

Advanced Placement, Credit by Exam
A score of 4 on the Advanced Placement (AP) computer science exam qualifies students for credit in CS 112 Introduction to Computer Programming. A score of 4 on the International Baccalaureate (IB) computer science exam qualifies students for credits in CS 112 Introduction to Computer Programming, and a score of 5 or more qualifies students for credit in CS 211 Object-Oriented Programming.

Change of Major
Students requesting a change of major to Applied Computer Science must meet with the Volgenau School of Engineering Coordinator of Undergraduate Advising, 2500 Nguyen Engineering Building. Students requesting a change of major to Applied Computer Science must have a GPA of at least 2.75 in computer science and math courses and successfully completed one of CS 112 (http://catalog.gmu.edu/preview_course_nopop.php?catoid=29&amp;coid=302778/) or CS 211 (http://catalog.gmu.edu/preview_course_nopop.php?catoid=29&amp;coid=302780/), and one of MATH 113 (http://catalog.gmu.edu/preview_program.php?catoid=29&amp;pid=28176/#tt1999), MATH 114 (http://catalog.gmu.edu/preview_course_nopop.php?catoid=29&amp;coid=305053/), or MATH 125 (http://catalog.gmu.edu/
Grades
Students must earn a C or better in any course intended to satisfy a prerequisite for a computer science course. Applied Computer Science majors may not use more than one course with a grade of C- or D toward department requirements.

Program Requirements
For the BS ACS degree, students must complete 120 credits, including the Mason Core requirements. The program requires foundation, core, and concentration courses. These course requirements provide expertise in programming, computer systems, software requirements and modeling, formal methods, and analysis of algorithms.

Repeating Courses
Students may attempt an undergraduate course taught by the Volgenau School of Engineering twice. A third attempt requires approval of the department offering the course. This policy does not apply to STAT 250 Introductory Statistics I (Mason Core), which follows the normal university policy for repeating undergraduate courses.

The CS Department may not allow students to retake certain high-demand CS courses in which they have already earned a grade of C or better simply to improve their GPA.

Writing-Intensive Requirement
Computer science majors complete the writing-intensive requirement through a sequence of projects and reports in CS 306 Synthesis of Ethics and Law for the Computing Professional (Mason Core) and CS 321 Software Engineering. Faculty members provide feedback on students’ expository writing.

Termination from the Major
No math, science, or Volgenau School of Engineering course that is required for the major may be attempted more than three times. Those students who do not successfully complete such a course within three attempts will be terminated from the major. Undeclared students in the Volgenau School who do not successfully complete a course required for a Volgenau School major within three attempts will also be terminated.

In addition, students in the Volgenau School with evidence of continued failure to make adequate progress toward declaring or completing a Volgenau School major will be terminated from the school. Adequate progress is determined by the major program. For more information, see AP 5.2.4 Termination from the Major (https://catalog.gmu.edu/policies/academic/undergraduate-policies/#ap-5-2-4).

Once a student has attempted one of these courses twice unsuccessfully, the third attempt must be no later than the next semester of enrollment, excluding summers. Failure to take the course at that time will result in termination from the major. A third attempt of a Volgenau School of Engineering course requires support by the student’s major department as well as permission by the department offering the course. This permission is not guaranteed. If the student is unable to take the course when required, the student may request an extension to a future semester; extensions require approval of the student’s advisor, their department, and the Associate Dean for Undergraduate Programs. The deadline for extension requests is the add deadline for the semester in which the course is required.

Students who have been terminated from a Volgenau School of Engineering major may not register for a Volgenau School course without permission of the department offering the course. This applies to all undergraduate courses offered by the Volgenau School except IT 104 Introduction to Computing (Mason Core) and STAT 250 Introductory Statistics I (Mason Core).

A student may not declare any major in the Volgenau School of Engineering if the student has previously met the termination criteria for that major at any time, regardless of what the student’s major was at the time the courses were taken.

Requirements

Degree Requirements
Total credits: 120

Students must complete all foundation, core, elective, and communication requirements, and the requirements from one selected concentration.

4-Year Plan

Bachelor of Science in Applied Computer Science

Detailed four year plans and degree planning checklists can be found at https://advising.gmu.edu/current-student/majors-at-mason/.

Honors

CS Honors Program

The Department of Computer Science offers a CS Honors Program for students with strong computational foundations and the drive to delve deeper into computing. The program is based on the bachelor of science in computer science and applied computer science curriculum and is distinct from the University Honors College curriculum.

Entry Requirements

Students must be seeking a Bachelor of Science in Computer Science or a Bachelor of Science in Applied Computer Science and must apply for entry into the CS Honors Program after completing 12 credits of CS courses. Applicants must meet the GPA requirements outlined below to enter into the CS Honors Program.

Honors Requirements

CS Honors Program students must fulfill all standard courses required by the Bachelor of Science in Computer Science or Applied Computer Science degree as well as the following additional requirements:

- GPA Requirement: Students must maintain an overall GPA of at least 3.50 and a GPA of at least 3.50 for courses which count towards the BS/CS or BS/ACS major including math, natural sciences, and all CS/SWE courses.
- Research Project Requirement: Students must complete a significant research project prior to graduation. Students should seek out a CS faculty member willing to serve as their research advisor for the project. The project should comprise original work by the student and be demonstrated via two channels:
  a. a written project report that is approved by the student's research advisor and submitted to the department;
  b. a presentation of the project to an audience of students and/or faculty.
- Advanced Course Requirement: At least two Advanced Courses must be completed. A complete list of acceptable advanced courses is maintained by the CS department and is available on the department web site.

Accelerated Master’s

Applied Computer Science, BS/Computer Science, Accelerated MS

Overview

Highly-qualified students in the Applied Computer Science, BS have the option of obtaining an accelerated Computer Science, MS.

For more detailed information, see AP.6.7 Bachelor’s/Accelerated Master’s Degrees. For policies governing all graduate degrees, see AP6 Graduate Policies.

Admission Requirements

Students in the Applied Computer Science, BS program may apply to this option if they have earned 90 undergraduate credits with an overall GPA of at least 3.30. Students must have successfully completed.
Accelerated Option Requirements

Students have the opportunity to earn 3-6 credits in graduate coursework that count towards both the BS and MS degrees.

Students may register for 3-6 credits of the following CS 500-level courses in place of the corresponding CS 400-level courses required for the BS degree. Note: Students in the Applied Computer Science BS are required to take CS 583 Analysis of Algorithms as an advanced standing course.

Note:

Students also have the option to take up to 6 additional credits of graduate coursework, which serve as reserve graduate credit to be counted towards the MS degree only.

Degree Conferral

Students must apply the semester before they expect to complete the BS requirements to have the BS degree conferred. In addition, at the beginning of the student’s final undergraduate semester, students must complete a Bachelor’s/Accelerated Master’s Transition form that is submitted to the Office of the University Registrar and the VSE Graduate Admissions Office. At the completion of MS requirements, a master’s degree is conferred.

Applied Computer Science, BS/Data Analytics Engineering, Accelerated MS

Overview

Highly-qualified students in the Applied Computer Science, BS have the option of obtaining an accelerated Data Analytics Engineering, MS.

For more detailed information, see AP6.7 Bachelor’s/Accelerated Master’s Degrees. For policies governing all graduate degrees, see AP6 Graduate Policies.

Admission Requirements

Students in the Applied Computer Science, BS program may apply to this option if they have earned 90 undergraduate credits with an overall GPA of at least 3.30. Students must have successfully completed:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>CS 310</td>
<td>Data Structures</td>
<td>3</td>
</tr>
<tr>
<td>CS 330</td>
<td>Formal Methods and Models</td>
<td>3</td>
</tr>
</tbody>
</table>

Total Credits 10

Accelerated Option Requirements

Students have the opportunity to earn 3-6 credits in graduate coursework that count towards both the BS and MS degrees.

Students must register for 3-6 credits of CS 500-level basic courses in place of the corresponding CS 400-level courses required for the undergraduate degree requirements. Specifically, students in all concentrations of the Applied Computer Science, BS program must register for:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>CS 540</td>
<td>Language Processors</td>
<td>3</td>
</tr>
<tr>
<td>CS 550</td>

</tr>
<tr>
<td>CS 557</td>
<td>Computer Communications and Networking</td>
<td>3</td>
</tr>
<tr>
<td>CS 580</td>
<td>Introduction to Artificial Intelligence</td>
<td>3</td>
</tr>
<tr>
<td>CS 584</td>
<td>Theory and Applications of Data Mining</td>
<td>3</td>
</tr>
</tbody>
</table>

Total Credits 3

Note:

Students in the Software Engineering and Bioinformatics concentrations of the Applied Computer Science, BS program must also register for:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>CS 550</td>
<td>Database Systems</td>
<td>3</td>
</tr>
</tbody>
</table>

Total Credits 3

Note:

Students in the Computer Game Design and Geography concentrations of the Applied Computer Science, BS program must also register for one of the following courses:

<table>
<thead>
<tr>

</tr>
<tr>
<td>CS 580</td>
<td>Introduction to Artificial Intelligence</td>
<td>3</td>
</tr>
</tbody>
</table>

Note:

For students in the Computer Game Design and Geography concentrations of the Applied Computer Science, BS program, one of the 500 level courses will count as an elective towards their undergraduate degree.

Students also have the option to take up to 6 additional credits of graduate coursework, which serves as reserve graduate credit to be counted towards the MS degree only.

Degree Conferral

Students must apply the semester before they expect to complete the BS requirements to have the BS degree conferred. In addition, at the beginning of the student’s final undergraduate semester, students must complete a Bachelor’s/Accelerated Master’s Transition form that is submitted to the Office of the University Registrar and the VSE Graduate Admissions Office. At the completion of MS requirements, a master’s degree is conferred.

Applied Computer Science, BS/Information Security and Assurance, Accelerated MS

Overview

Highly-qualified students in the Applied Computer Science, BS program have the option of enrolling in an accelerated Information Security and Assurance, MS program.
For more detailed information, see AP6.7 Bachelor's/Accelerated Master's Degrees. For policies governing all graduate degrees, see AP6 Graduate Policies.

**Admission Requirements**

Students in the Applied Computer Science, BS program can apply for this option if they have earned 90 undergraduate credits with an overall GPA of at least 3.30. Students must have successfully completed:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>CS 310</td>
<td>Data Structures</td>
<td>3</td>
</tr>
<tr>
<td>CS 330</td>
<td>Formal Methods and Models</td>
<td>3</td>
</tr>
<tr>
<td>CS 367</td>
<td>Computer Systems and Programming</td>
<td>4</td>
</tr>
<tr>
<td><strong>Total Credits</strong></td>
<td></td>
<td><strong>10</strong></td>
</tr>
</tbody>
</table>

**Accelerated Option Requirements**

Students have the opportunity to earn 3-6 credits in graduate coursework that count towards both the BS and MS degrees.

Students may register for 3-6 credits of the following CS 500-level courses in place of the corresponding CS 400-level courses required for the BS degree. Specifically, students must take:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>CS 583</td>
<td>Analysis of Algorithms</td>
<td>3</td>
</tr>
<tr>
<td>Select one of the following:</td>
<td></td>
<td>3</td>
</tr>
<tr>
<td>CS 540</td>
<td>Language Processors</td>
<td></td>
</tr>
<tr>
<td>CS 550</td>
<td>Database Systems</td>
<td></td>
</tr>
<tr>

</tr>
<tr>
<td>CS 584</td>
<td>Theory and Applications of Data Mining</td>
<td></td>
</tr>
<tr>
<td><strong>Total Credits</strong></td>
<td></td>
<td><strong>6</strong></td>
</tr>
</tbody>
</table>

Note:

Students complete all MS in Information Security and Assurance core courses and apply the two courses from the above list toward the degree requirements. Students also have the option to take up to 6 additional credits of graduate coursework, which serves as reserve graduate credit to be counted towards the MS degree only.

**Degree Conferral**

Students must apply the semester before they expect to complete the BS requirements to have the BS degree conferred. In addition, at the beginning of the student’s final undergraduate semester, students must complete a Bachelor's/Accelerated Master’s Transition form that is submitted to the Office of the University Registrar and the VSE Graduate Admissions Office. At the completion of MS requirements, a master’s degree is conferred.

**Applied Computer Science, BS/Information Systems, Accelerated MS**

**Overview**

Highly-qualified students in the Applied Computer Science, BS program have the option of obtaining an accelerated Information Systems, MS. See AP6.7 Bachelor's/Accelerated Master's Degrees.

Students in an accelerated degree program must fulfill all university requirements for the master's degree. For policies governing all graduate degrees, see AP6 Graduate Policies.

**Admission Requirements**

Students in the Applied Computer Science, BS program can apply to this option if they have earned 90 undergraduate credits with an overall GPA of at least 3.30. Students must have successfully completed:

### Admissions & Policies

**Admissions**

**Declaring a CS Minor**
Students requesting a Computer Science Minor must have completed CS 112 Introduction to Computer Programming or CS 211 Object-Oriented Programming with a grade of B or better.

**Policies**

**Grades**
No more than 3 credits of D grades may be used to satisfy requirements for the Computer Science Minor.

**Program Requirements**
The minor in computer science requires completion of at least 19 credits. Students should pay careful attention to prerequisites when selecting courses.

For policies governing all minors, see AP.5.3.4 Minors.

### Minor Requirements

Total credits: 19-20

**Required Courses**

<table>

Computer Science Undergraduate Certificate

Banner Code: VS-CERB-CS

Academic Advising
Phone: 703-993-1530
Email: csinfo@gmu.edu
Website: cs.gmu.edu/prospective-students/undergraduate-programs/undergraduate-certificate/

This certificate targets students who are working on or possess an undergraduate degree in a technical (science or engineering) field but lack a formal credential in the computer science field. The certificate also targets students who have shown an aptitude for graduate study but do not have the academic prerequisites required for admittance into a graduate MS computer science program.

The undergraduate certificate in computer science may be pursued on a full-time basis except when limited by prerequisite constraints.

Admissions & Policies

Admissions
Students must have programming experience at the level of CS 112 Introduction to Computer Programming and CS 211 Object-Oriented Programming, and either a BS in a technical field with a 3.00 GPA or higher or current enrollment in a technical undergraduate major.

Policies
For policies governing all undergraduate programs, see AP.5 Undergraduate Policies.

Certificate Requirements

Total credits: 28

This certificate may be pursued on a full-time basis only.

Basic Computer Science

Computer Science, BS

Banner Code: VS-BS-CS

Academic Advising
Phone: 703-993-1530
Email: csug@gmu.edu
Website: http://cs.gmu.edu/prospective-students/undergraduate-programs/bs-in-computer-science/

The objectives of the Computer Science, BS program relate to the abilities of the graduates several years after graduation. Our graduates are expected within three to five years of graduation to have:
• Established themselves as successful and productive computing professionals or engaged in advanced study such as a graduate degree program.
• Worked effectively both in team environments and as individuals.
• Fulfilled their responsibilities in the areas of ethics, continuing professional development, and effective written and oral communications.

The bachelor’s program in Computer Science is accredited by the Computing Accreditation Commission of ABET, http://www.abet.org.

Admissions & Policies

Policies

Advanced Placement, Credit by Exam
A score of 4 on the Advanced Placement (AP) computer science exam qualifies the student for credit in CS 112 Introduction to Computer Programming. A score of 4 on the International Baccalaureate (IB) computer science exam qualifies students for credit in CS 112 Introduction to Computer Programming, and a score of 5 or more qualifies students for credit in CS 211 Object-Oriented Programming.

Change of Major
Students who are considering computer science as their major may not use more than one course with grade of C- or lower toward department requirements.

Computer Science, Computer Engineering Double Major
Computer Science majors can earn a double major in Computer Science and Computer Engineering if they complete additional credits beyond the 120 credits required for the Computer Science degree. The additional credits must be part of an approved plan of study. For more information, visit the department website.

Cooperative Education
Students may participate in the Mason cooperative education program or a work-study program in the Washington, D.C. area.

Grades
Students must earn a C or better in any course intended to satisfy a prerequisite for a computer science course. Computer science majors may not use more than one course with grade of C- or lower toward department requirements.

Repeating Courses
Students may attempt an undergraduate course taught by the Volgenau School of Engineering twice. A third attempt requires approval of the department offering the course. This policy does not apply to STAT 250 Introductory Statistics I (Mason Core), which follows the normal university policy for repeating undergraduate courses.

The CS Department may not allow students to retake certain high-demand CS courses in which they have already earned a grade of C or better simply to improve their GPA.

Writing-Intensive Requirement
Computer science majors complete the writing-intensive requirement through a sequence of projects and reports in CS 306 Synthesis of Ethics and Law for the Computing Professional (Mason Core) and CS 321 Software Engineering. Faculty members provide feedback on students’ expository writing.

Termination from the Major
No math, science, or Volgenau School of Engineering course that is required for the major may be attempted more than three times. Those students who do not successfully complete such a course within three attempts will be terminated from the major. Undeclared students in the Volgenau School who do not successfully complete a course required for a Volgenau School major within three attempts will also be terminated.

In addition, students in the Volgenau School with evidence of continued failure to make adequate progress toward declaring or completing a Volgenau School major will be terminated from the school. Adequate progress is determined by the major program. For more information, see AP 5.2.4 Termination from the Major (https://catalog.gmu.edu/policies/academic/undergraduate-policies/#ap-5-2-4).

Once a student has attempted one of these courses twice unsuccessfully, the third attempt must be no later than the next semester of enrollment, excluding summers. Failure to take the course at that time will result in termination from the major. A third attempt of a Volgenau School of Engineering course requires support by the student’s major department as well as permission by the department offering the course. This permission is not guaranteed. If the student is unable to take the course when required, the student may request an extension to a future semester; extensions require approval of the student’s advisor, their department, and the Associate Dean for Undergraduate Programs. The deadline for extension requests is the add deadline for the semester in which the course is required.

Students who have been terminated from a Volgenau School of Engineering major may not register for a Volgenau School course without permission of the department offering the course. This applies to all undergraduate courses offered by the Volgenau School except IT 104 Introduction to Computing (Mason Core) and STAT 250 Introductory Statistics I (Mason Core).

A student may not declare any major in the Volgenau School of Engineering if the student has previously met the termination criteria for that major at any time, regardless of what the student’s major was at the time the courses were taken.

Requirements

Total Credits: 3

\(^1\) Those planning to take MATH 352 Statistics may replace STAT 344 Probability and Statistics for Engineers and Scientists I with MATH 351 Probability.

### Computer Science-Related Courses

Students may need to choose electives to satisfy prerequisites for the following courses:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>STAT 354</td>
<td>Probability and Statistics for Engineers and Scientists II</td>
<td></td>
</tr>
<tr>
<td>OR 335</td>
<td>Discrete Systems Modeling and Simulation</td>
<td></td>
</tr>
<tr>
<td>OR 441</td>
<td>Deterministic Operations Research</td>
<td></td>
</tr>
<tr>
<td>OR 442</td>
<td>Stochastic Operations Research</td>
<td></td>
</tr>
<tr>
<td>ECE 301</td>
<td>Digital Electronics</td>
<td></td>
</tr>
<tr>
<td>ECE 331</td>
<td>Digital System Design</td>
<td></td>
</tr>
<tr>
<td>ECE 332</td>
<td>Digital Electronics and Logic Design Lab</td>
<td></td>
</tr>
<tr>
<td>ECE 335</td>
<td>Embedded Systems and Hardware Interfaces</td>
<td></td>
</tr>
<tr>
<td>ECE 446</td>
<td>Device Driver Development</td>
<td></td>
</tr>
<tr>
<td>ECE 447</td>
<td>Single-Chip Microcomputers</td>
<td></td>
</tr>
</tbody>
</table>

Select 6 credits from the following: 6

ECE 445 may be taken as a replacement for CS 465.

At most 3 credits total of CS 490 Design Exhibition and CS 491 Industry-Sponsored Senior Design Project may be counted toward the senior computer science requirement.

At most 3 credits total of CS 499 Special Topics in Computer Science may be counted toward the senior computer science requirement.

### Note:

MATH 104 Trigonometry and Transcendental Functions, MATH 105 Precalculus Mathematics, MATH 108 Introductory Calculus with Business Applications (Mason Core), and courses with an IT designation (and any associated cross-listed courses) cannot be counted toward this degree.
ECE 511  Computer Architecture
SWE 432  Web Application Development
SWE 437  Software Testing and Maintenance
SWE 443  Software Architectures
SYST 371  Systems Engineering Management
SYST 470  Human Factors Engineering
PHIL 371  Philosophy of Natural Sciences
PHIL 376  Symbolic Logic
ENGH 388  Professional and Technical Writing

Any MATH or CS course numbered above 300 (except MATH 351)  

Total Credits 6

1 Those planning to take MATH 352 Statistics may replace STAT 344 Probability and Statistics for Engineers and Scientists I with MATH 351 Probability.

Communication

Students need three credits of communication:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>COMM 100</td>
<td>Public Speaking (Mason Core)</td>
<td>3</td>
</tr>
<tr>
<td>or COMM 101</td>
<td>Fundamentals of Communication (Mason Core)</td>
<td></td>
</tr>
</tbody>
</table>

Natural Science

Select 12 credits of natural science

Total Credits 12

The courses should be intended for science and engineering students and must include a two course sequence with laboratories. Some approved combinations have a total of more than 12 hours.

Approved Two-Course Sequences with Laboratories

Total Credits 21

1 CS majors must take the Natural Sciences section of ENGH 302 Advanced Composition (Mason Core).

Electives

Students must complete 8 elective credits

Total Credits 8

4-Year Plan

Bachelor of Science in Computer Science Sample Plan of Study

Detailed four year plans and degree planning checklists can be found at https://advising.gmu.edu/current-student/majors-at-mason/.

Honors

Honors in the Major

The Department of Computer Science offers a CS Honors Program for students with strong computational foundations and the drive to delve deeper into computing. The program is based on the bachelor of science in computer science and applied computer science curriculum and is distinct from the University Honors College curriculum.

Entry Requirements

Students must be seeking a Bachelor of Science in Computer Science or a Bachelor of Science in Applied Computer Science and must apply for entry into the CS Honors Program after completing 12 credits of CS courses. Applicants must meet the GPA requirements outlined below to enter into the CS Honors Program.

Honors Requirements

CS Honors Program students must fulfill all standard courses required by the Bachelor of Science in Computer Science or Applied Computer Science degree as well as the following additional requirements:

- GPA Requirement: Students must maintain an overall GPA of at least 3.50 and a GPA of at least 3.50 for courses which count towards the
BS/CS or BS/ACS major including math, natural sciences, and all CS/ SWE courses.

- Research Project Requirement: Students must complete a significant research project prior to graduation. Students should seek out a CS faculty member willing to serve as their research advisor for the project. The project should comprise original work by the student and be demonstrated via two channels:
  a. a written project report that is approved by the student’s research advisor and submitted to the department;
  b. a presentation of the project to an audience of students and/or faculty.
- Advanced Course Requirement: At least two Advanced Courses must be completed. A complete list of acceptable advanced courses is maintained by the CS department and is available on the department web site.

### Accelerated Master’s

#### BS (selected)/Operations Research, Accelerated MS

**Overview**

Highly-qualified students in BS programs have the option of obtaining an accelerated Operations Research, MS.

For more detailed information, see AP6.7 Bachelor’s/Accelerated Master’s Degrees. For policies governing all graduate degrees, see AP6 Graduate Policies.

**Admission Requirements**

Mason undergraduate students majoring in both engineering and non-engineering disciplines may apply to this option if 1) such an accelerated Operations Research, MS pathway is allowable from the student’s BS program, which will be determined by the academic advisors of both the BS and MS programs and by the SEOR department chair, 2) they have earned 90 undergraduate credits with an overall GPA of at least 3.30, and 3) they have completed all MATH and PHYS requirements. Criteria for admission are identical to criteria for admission to the Operations Research, MS program.

Students must additionally complete MATH 203 prior to applying for the graduate program.

**Accelerated Option Requirements**

Students must complete all credits that satisfy requirements for both the BS and MS programs. Up to two courses (6 credits) of approved master’s level courses taken as part of the undergraduate degree may be applied to the graduate degree. The courses selected for this purpose must be approved by the academic advisors of both the BS and MS programs and by the SEOR department chair.

For the BS programs that allow undergraduate electives from the department of systems engineering and operations research, the students may choose the graduate version of such elective courses to replace the corresponding undergraduate courses.

**Degree Conferral**

Students must apply the semester before they expect to complete the BS requirements to have the BS degree conferred. In addition, at the beginning of the student’s final undergraduate semester, students must complete a Bachelor’s/Accelerated Master’s Transition form that is submitted to the Office of the University Registrar and the VSE Graduate Admissions Office. At the completion of MS requirements, a master’s degree is conferred.

#### BS (selected)/Statistical Science, Accelerated MS

**Overview**

Highly-qualified students in BS programs have the option of applying to the accelerated Statistical Science, MS program.

For more detailed information, see AP6.7 Bachelor’s/Accelerated Master’s Degrees. For policies governing all graduate degrees, see AP6 Graduate Policies.

**Admission Requirements**

No specific undergraduate BS degree is required. Students enrolled in any BS degree may apply to the accelerated Statistical Science, MS program if such an accelerated Statistical Science, MS pathway is allowable from the student’s BS program, which will be determined by the academic advisors of both the BS and MS programs; and if they have earned 90 undergraduate credits with an overall GPA of 3.00. Students must have successfully completed the following Mason courses each with a grade of C or better prior to admission to the accelerated program:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>MATH 213</td>
<td>Analytic Geometry and Calculus III</td>
<td>3</td>
</tr>
<tr>
<td>MATH 203</td>
<td>Linear Algebra</td>
<td>3</td>
</tr>
<tr>
<td>or MATH 321</td>
<td>Abstract Algebra</td>
<td></td>
</tr>
<tr>
<td>STAT 250</td>
<td>Introductory Statistics I (Mason Core)</td>
<td>3</td>
</tr>
<tr>
<td>or STAT 344</td>
<td>Probability and Statistics for Engineers and Scientists I</td>
<td></td>
</tr>
<tr>
<td>STAT 346</td>
<td>Probability for Engineers</td>
<td>3</td>
</tr>
<tr>
<td>or MATH 351</td>
<td>Probability</td>
<td></td>
</tr>
<tr>
<td>STAT 362</td>
<td>Introduction to Computer Statistical Packages</td>
<td>3</td>
</tr>
<tr>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

**Accelerated Option Requirements**

Students must complete all credits satisfying degree requirements for the BS and MS programs, with 6 credits overlap chosen from the following courses: STAT 515 Applied Statistics and Visualization for Analytics, STAT 544 Applied Probability, STAT 554 Applied Statistics I, STAT 560 Biostatistical Methods, and STAT 574 Survey Sampling I. (Credit may not be received for both STAT 474 and STAT 574; nor for both STAT 460 and STAT 560.) The graduate courses selected for overlap must be approved by the academic advisors of both the BS and MS programs. All graduate course prerequisites must be completed prior to enrollment. Each graduate course must be completed with a grade of B or better to apply toward the MS degree.

While still in undergraduate status, a maximum of 6 additional graduate credits may be taken as reserve graduate credit and applied to the master’s program. Reserve graduate credits do not apply to the undergraduate degree.

**Degree Conferral**

Students must apply the semester before they expect to complete the BS requirements to have the BS degree conferred. In addition, at the beginning of the student’s final undergraduate semester, students must
must complete a Bachelor’s/Accelerated Master’s Transition form that is submitted to the Office of the University Registrar and Graduate Recruitment and Enrollment Services. At the completion of MS requirements, a master’s degree is conferred.

**BS (selected)/Systems Engineering, Accelerated MS**

**Overview**

Highly-qualified students in BS programs have the option of obtaining an accelerated Systems Engineering, MS.

For more detailed information, see AP.6.7 Bachelor’s/Accelerated Master’s Degrees. For policies governing all graduate degrees, see AP6 Graduate Policies.

**Admission Requirements**

Mason undergraduate students majoring in both engineering and non-engineering disciplines may apply to this option if 1) such an accelerated Systems Engineering, MS pathway is allowable from the student’s BS program, which will be determined by the academic advisors of both the BS and MS programs and by the SEOR department chair, 2) they have earned 90 undergraduate credits with an overall GPA of at least 3.30, and 3) they have completed all MATH and PHYS requirements. Criteria for admission are identical to criteria for admission to the Systems Engineering, MS program.

**Accelerated Option Requirements**

Students must complete all credits that satisfy requirements for both the BS and MS programs. Up to two courses (6 credits) of approved master’s level courses taken as part of the undergraduate degree may be applied to the graduate degree. The courses selected for this purpose must be approved by the academic advisors of both the BS and MS programs and by the SEOR department chair.

For the BS programs that allow undergraduate electives from the department of systems engineering and operations research, the students may choose the graduate version of such elective courses to replace the corresponding undergraduate courses.

**Degree Conferral**

Students must apply the semester before they expect to complete the BS requirements to have the BS degree conferred. In addition, at the beginning of the student’s final undergraduate semester, students must complete a Bachelor’s/Accelerated Master’s Transition form that is submitted to the Office of the University Registrar and the VSE Graduate Admissions Office. At the completion of MS requirements, a master’s degree is conferred.

**Computer Science, BS/Computer Science, Accelerated MS**

**Overview**

The university offers highly-qualified students in the Computer Science, BS the option of obtaining an accelerated Computer Engineering, MS.

For more detailed information, see AP.6.7 Bachelor’s/Accelerated Master’s Degrees. For policies governing all graduate degrees, see AP6 Graduate Policies.

**Admission Requirements**

Students in the Computer Science, BS program may apply for this option if they have earned 75 undergraduate credits with an overall GPA of at least 3.00. Criteria for admission are identical to criteria for admission to the Computer Engineering, MS program.

**Accelerated Option Requirements**

Students must complete all credits that satisfy the requirements for the BS and MS programs, with 6 credits overlapping.

Students take 6 credits of 500-level ECE or CS courses as part of their technical electives or substitutes for required courses in the Computer Science, BS program.

Specifically, students are encouraged to take two of the following courses:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>CS 571</td>
<td>Operating Systems</td>
<td>3</td>
</tr>
<tr>
<td>ECE 508</td>
<td>Internet of Things</td>
<td>3</td>
</tr>
<tr>
<td>ECE 511</td>
<td>Computer Architecture</td>
<td>3</td>
</tr>
<tr>
<td>ECE 516</td>
<td>Mobile Systems and Applications</td>
<td>3</td>
</tr>
<tr>
<td>ECE 527</td>
<td>Learning From Data</td>
<td>3</td>
</tr>
<tr>
<td>ECE 542</td>
<td>Computer Network Architectures and Protocols</td>
<td>3</td>
</tr>
</tbody>
</table>

1 CS 471 and CS 571 should not be simultaneously used to fulfill the requirements of the Computer Science, BS program.

**Degree Conferral**

Students must apply the semester before they expect to complete the BS requirements to have the BS degree conferred. In addition, at the beginning of the student’s final undergraduate semester, students must complete a Bachelor’s/Accelerated Master’s Transition form that is submitted to the Office of the University Registrar and the VSE Graduate Admissions Office. At the completion of MS requirements, a master’s degree is conferred.

**Computer Science, BS/Computer Science, Accelerated MS**

**Overview**

Highly-qualified students in the Computer Science, BS have the option of obtaining an accelerated Computer Science, MS.

For more detailed information, see AP.6.7 Bachelor’s/Accelerated Master’s Degrees. For policies governing all graduate degrees, see AP6 Graduate Policies.

**Admission Requirements**

Students in the Computer Science, BS program may apply to this option if they have earned 90 undergraduate credits with an overall GPA of at least 3.00. Students must have successfully completed CS 310 Data Structures, CS 330 Formal Methods and Models and CS 367 Computer Systems and Programming.

**Accelerated Option Requirements**

Students have the opportunity to earn 3-6 credits in graduate coursework that count towards both the BS and MS degrees.
Students may register for 3-6 credits of the following CS 500-level courses in place of the corresponding CS 400-level courses required for the BS degree.

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>CS 540</td>
<td>Language Processors</td>
<td>3</td>
</tr>
<tr>
<td>CS 550</td>
<td>Database Systems</td>
<td>3</td>
</tr>
<tr>
<td>CS 551</td>
<td>Computer Graphics</td>
<td>3</td>
</tr>
<tr>
<td>CS 555</td>
<td>Computer Communications and Networking</td>
<td>3</td>
</tr>
<tr>
<td>CS 571</td>
<td>Operating Systems</td>
<td>3</td>
</tr>
<tr>
<td>CS 580</td>
<td>Introduction to Artificial Intelligence</td>
<td>3</td>
</tr>
<tr>
<td>CS 583</td>
<td>Analysis of Algorithms</td>
<td>3</td>
</tr>
<tr>
<td>CS 584</td>
<td>Theory and Applications of Data Mining</td>
<td>3</td>
</tr>
</tbody>
</table>

Note:

Students also have the option to take up to 6 additional credits of graduate coursework, which serves as reserve graduate credit to be counted towards the MS degree only.

**Degree Conferral**

Students must apply the semester before they expect to complete the BS requirements to have the BS degree conferred. In addition, at the beginning of the student’s final undergraduate semester, students must complete a Bachelor’s/Accelerated Master’s Transition form that is submitted to the Office of the University Registrar and the VSE Graduate Admissions Office. At the completion of MS requirements, a master’s degree is conferred.

**Computer Science, BS/Curriculum and Instruction, Accelerated MEd (Secondary Education Computer Science concentration)**

**Overview**

Highly-qualified undergraduates may be admitted to the bachelor’s/accelerated master’s program and obtain a BS in Computer Science (degree without concentration) and an MEd in Curriculum and Instruction (concentration in Secondary Education Computer Science) in an accelerated time-frame after satisfactory completion of 149 credits. See AP.6.7 Bachelor’s/Accelerated Master’s Degree for policies related to this program.

Students in an accelerated degree program must fulfill all university requirements for the master’s degree. For policies governing all graduate degrees, see AP.6 Graduate Policies.

**Application Requirements**

Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in Graduate Admissions Policies. For information specific to this accelerated master’s program, see Application Requirements and Deadlines (https://cehd.gmu.edu/bachelors-accelerated-masters-program/).

**Accelerated Option Requirements**

Students must complete the following courses in their senior year:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>SEED 540</td>
<td>3 EDRD 619</td>
<td>3</td>
</tr>
<tr>
<td>SEED 566</td>
<td>3 SEED 676</td>
<td>3</td>
</tr>
<tr>
<td></td>
<td>Total Credits</td>
<td>6</td>
</tr>
</tbody>
</table>

While undergraduate students, accelerated master’s students are able to apply two of the courses listed above to both the bachelor’s and master’s degrees. These courses are considered advanced standing for the MEd. A minimum grade of B must be earned to be eligible to count as advanced standing. The other two courses are taken as reserve graduate credit and do not apply to the undergraduate degree. Early in their final undergraduate semester, students must submit the Bachelor’s/Accelerated Master’s Transition Form to the CEHD Admissions Office and specify which of the four courses are to be designated as advanced standing and reserve graduate credit.

**Computer Science, BS/Data Analytics Engineering, Accelerated MS**

**Overview**

Highly-qualified students in the Computer Science, BS have the option of obtaining an accelerated Data Analytics Engineering, MS.

For more detailed information, see AP.6.7 Bachelor’s/Accelerated Master’s Degrees. For policies governing all graduate degrees, see AP.6 Graduate Policies.

**Admission Requirements**

Students in the Computer Science, BS program may apply to this option if they have earned 90 undergraduate credits with an overall GPA of at least 3.30. Students must have successfully completed CS 310 Data Structures, CS 330 Formal Methods and Models and CS 367 Computer Systems and Programming.

**Accelerated Option Requirements**

Students must complete all requirements for the BS and MS programs, with 6 credits overlap.

Students register for 6 credits of CS 500-level basic courses in place of the corresponding CS 400-level courses required for the undergraduate degree requirements. Specifically, students must register for:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>CS 584</td>
<td>Theory and Applications of Data Mining</td>
<td>3</td>
</tr>
</tbody>
</table>

Select one of the following courses in place of the corresponding 400-level courses:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>CS 550</td>
<td>Database Systems</td>
<td>3</td>
</tr>
<tr>
<td>CS 580</td>
<td>Introduction to Artificial Intelligence</td>
<td>3</td>
</tr>
</tbody>
</table>

Total Credits 6

Note:

Students are permitted to take additional graduate basic courses in their undergraduate programs. In such cases, those classes cannot be counted toward requirements for the MS.
Degree Conferral
Students must apply the semester before they expect to complete the BS requirements to have the BS degree conferred. In addition, at the beginning of the student’s final undergraduate semester, students must complete a Bachelor’s/Accelerated Master’s Transition form that is submitted to the Office of the University Registrar and the VSE Graduate Admissions Office. At the completion of MS requirements, a master’s degree is conferred.

Computer Science, BS/Information Security and Assurance, Accelerated MS
Overview
Highly-qualified students in the Computer Science, BS have the option of obtaining an accelerated Information Security and Assurance, MS.

Admission Requirements
Students in the Computer Science, BS program may apply for this option if they have earned 90 undergraduate credits with an overall GPA of at least 3.30. Students must have successfully completed CS 310 Data Structures, CS 330 Formal Methods and Models and CS 367 Computer Systems and Programming.

Accelerated Option Requirements
Students have the opportunity to earn 3-6 credits in graduate coursework that count towards both the BS and MS degrees. Students may register for 3-6 credits of the following CS 500-level courses in place of the corresponding CS 400-level courses required for the BS degree.

<table>

<td>CS 583</td>
<td>Analysis of Algorithms</td>
<td>3</td>
</tr>
<tr>
<td>CS 584</td>
<td>Theory and Applications of Data Mining</td>
<td>3</td>
</tr>
</tbody>
</table>

Note:
Students complete all MS in Information Security and Assurance core courses and apply the two courses from above toward the elective requirements. Students also have the option to take up to 6 additional credits of graduate coursework, which serve as reserve graduate credit to be counted towards the MS degree only.

Degree Conferral
Students must apply the semester before they expect to complete the BS requirements to have the BS degree conferred. In addition, at the beginning of the student’s final undergraduate semester, students must complete a Bachelor’s/Accelerated Master’s Transition form that is submitted to the Office of the University Registrar and the VSE Graduate Admissions Office. At the completion of MS requirements, a master’s degree is conferred.
Computer Science, BS/Software Engineering, Accelerated MS

Overview
Highly-qualified students in the Computer Science, BS have the option of obtaining an accelerated Software Engineering, MS.

For more detailed information, see AP 6.7 Bachelor’s/Accelerated Master’s Degrees. For policies governing all graduate degrees, see AP 6 Graduate Policies.

Admission Requirements
Students in the Computer Science, BS program may apply to this option if they have earned 90 undergraduate credits with an overall GPA of at least 3.30. Students must have successfully completed CS 310 Data Structures, CS 330 Formal Methods and Models and CS 367 Computer Systems and Programming.

Accelerated Option Requirements
Students have the opportunity to earn 3-6 credits in graduate coursework that count towards both the BS and MS degrees. Students may register for 3-6 credits of the following CS 500-level courses in place of the corresponding CS 400-level courses required for the BS degree.

Email: csgrad@gmu.edu

Website: http://cs.gmu.edu/prospective-students/ms-programs/ms-in-cs/

The Computer Science graduate program prepares students for research and professional practice in computer science and related technologies. The program includes both fundamentals and advanced work in the areas of artificial intelligence and databases, programming languages and software engineering, systems and networks, theoretical computer science, and visual computing. Graduate classes are divided into basic classes, which have no graduate course prerequisite, and advanced classes, which have a graduate class as a prerequisite. Graduate classes are generally offered in the late afternoon and evening. Financial aid in the form of graduate assistantships may be available for full-time degree-seeking students.

Admissions & Policies

Admissions
In addition to fulfilling Mason’s admission requirements for graduate study, applicants must meet the following requirements:

- Hold a baccalaureate degree that includes:
  - Data Structures and Algorithms (CS 310 Data Structures)
  - Automata Theory and Formal Languages (CS 330 Formal Methods and Models)
  - Computer Architecture including Assembly Language (CS 367 Computer Systems and Programming)
  - Calculus I and II
  - A substantial course in discrete mathematics such as MATH 125 Discrete Mathematics I (Mason Core)

- Earned a cumulative GPA of 3.00 or higher for the last two years of undergraduate work, preferably with a major in a technical field such as computer science, mathematics, physical sciences, engineering, or information systems.

- Submit transcripts of all post secondary education, complete the online application, including a goals statement, resume, and two letters of recommendation.

- A valid GRE score is required for those who have not earned a Bachelor’s degree or higher from a US institution.

- English Proficiency Exam Score (https://www2.gmu.edu/admissions-aid/how-apply/graduate/standardized-test-information/), if applicable.

Requirements

Degree Requirements
Total credits: 30

Required Courses and Plan of Study
In addition to general university requirements, completion of the MS in CS requires 30 credits of graduate courses.

To ensure that students have uniform preparation for the core courses, all students are required to take CS 530 Mathematical Foundations of Computer Science and CS 531 Computer Systems and Fundamentals of Systems Programming as their first two courses in the program. Students with a strong academic background in computer science may have
CS 530 and CS 531 substituted for other elective courses at the discretion of the program director. Students enrolled in PhD CS or the Bachelor's/Accelerated Master's program cannot take these courses for credit. Students also have the opportunity to indicate that they have the requisite knowledge corresponding to CS 530 and CS 531 by passing an exam. The exams are given before classes begin in January and August, and can only be taken once. Students failing either one of the exams must take the equivalent course in their first semester. Students who successfully test out of CS 530 or CS 531 will be required to fulfill the credit requirement with other coursework chosen under advisement.

Courses are grouped in the following five broad areas: Artificial Intelligence and Databases, Programming Languages and Software Engineering, Systems and Networks, Theoretical Computer Science, and Visual Computing. The list of pre-approved courses with their areas follows.

All the following requirements should be satisfied for the MS in CS degree:

- CS 583 Analysis of Algorithms (from the Theoretical Computer Science area) and two additional core courses from two other areas must be successfully completed with a grade of B- or higher. Students receiving lower than a B- must retake the course or face termination.
- At least four courses (12 credits) must be chosen from the advanced courses in the list of pre-approved courses from at least two different areas.
- At least six courses, including two advanced courses, must be designated CS.
- At least eight courses must be taken from the list of pre-approved courses. Up to two computer science-related courses that are not on the list of pre-approved courses may be taken with prior approval of the program director.

**Plan of Study**

Before the end of the first semester, students must have a plan of study approved by their academic advisor. This plan should be kept up to date by regular consultation with the academic advisor.

**Core Courses by Area**

1. Must be successfully completed with a grade of B- or better

**Preapproved Basic and Advanced MS CS Courses by Area**

**Artificial Intelligence and Databases**

- **Basic Courses:**
  - CS 550 Database Systems
  - CS 580 Introduction to Artificial Intelligence
  - CS 584 Theory and Applications of Data Mining
  - INFS 623 Web Search Engines and Recommender Systems

- **Advanced Courses:**
  - CS 595 Basic Topics in Computer Science
  - CS 650 Advanced Database Management
  - CS 657 Mining Massive Datasets with MapReduce
  - CS 667 Biometrics and Identity Management
  - CS 681 Instructable Cognitive Agents
  - CS 685 Autonomous Robotics
  - CS 687 Advanced Artificial Intelligence
  - CS 688 Machine Learning
  - CS 689 Planning Motions of Robots and Molecules
  - CS 747 Deep Learning
  - CS 782 Advanced Machine Learning
  - CS 787 Decision Guidance Systems
  - INFS 740 Database Programming for the World Wide Web
  - INFS 760 Advanced Database Management
  - INFS 772 Intelligent Agents and the Semantic Web
  - INFS 774 Enterprise Architecture

**Programming Languages and Software Engineering**

- **Basic Courses:**
  - CS 540 Language Processors
  - SWE 619 Object-Oriented Software Specification and Construction
  - SWE 620 Software Requirements Analysis and Specification
  - SWE 621 Software Design and Architecture
  - SWE 622 Distributed Software Engineering
  - SWE 642 Software Engineering for the World Wide Web
  - SWE 645 Component-Based Software Development

- **Advanced Courses:**
  - CS 640 Advanced Compilers
  - ISA 681 Secure Software Design and Programming
  - SWE 631 Software Design Patterns
  - SWE 632 User Interface Design and Development
  - SWE 637 Software Testing
  - SWE 642 Software Engineering for the World Wide Web
  - SWE 645 Component-Based Software Development
### Systems and Networks

#### Basic Courses:
- **CS 531**: Computer Systems and Fundamentals of Systems Programming
- **CS 555**: Computer Communications and Networking
- **CS 571**: Operating Systems
- **CS 587**: Introduction to Cryptography
- **ISA 562**: Information Security Theory and Practice
- **ISA 564**: Security Laboratory

#### Advanced Courses:
- **CS 635**: Foundations of Parallel Computation
- **CS 655**: Wireless and Mobile Computing
- **CS 658**: Networked Virtual Environments
- **CS 672**: Computer System Performance Evaluation
- **CS 673**: Multimedia Computing and Systems
- **CS 675**: Distributed Systems
- **CS 706**: Concurrent Software Systems
- **CS 719**: Scalable Internet Services
- **CS 756**: Performance Analysis of Computer Networks
- **CS 773**: Real-Time Systems Design and Development
- **CS 779**: Topics in Resilient and Secure Computer Systems
- **CS 788**: Autonomic Computing
- **ISA 656**: Network Security
- **ISA 664**: Operating Systems Security
- **ISA 694**: Intrusion Detection
- **ISA 697**: Topics in Information Security
- **ISA 763**: Security Protocol Analysis
- **ISA 764**: Security Experimentation
- **ISA 785**: Research in Digital Forensics

### Theoretical Computer Science

#### Basic Courses:
- **CS 530**: Mathematical Foundations of Computer Science
- **CS 583**: Analysis of Algorithms

#### Advanced Courses:
- **CS 600**: Theory of Computation
- **CS 611**: Computational Methods for Genomics
- **CS 630**: Advanced Algorithms
- **CS 633**: Computational Geometry
- **CS 683**: Parallel Algorithms
- **CS 684**: Graph Algorithms

### Visual Computing

#### Basic Courses:
- **CS 551**: Computer Graphics

### Advanced Courses:
- **CS 662**: Computer Graphics Game Technologies
- **CS 667**: Biometrics and Identity Management
- **CS 682**: Computer Vision
- **CS 686**: Image Processing and Applications
- **CS 752**: Interactive Graphics Software
- **CS 774**: Computational Vision
- **CS 777**: Human-Computer Intelligent Interaction

## Project or Thesis

Three to six credit hours of the advanced classes may be replaced by a project or thesis with consent of a faculty sponsor and faculty advisor. The project or thesis must be guided and approved by a committee of three appropriate faculty members and presented at an appropriate forum. The thesis must meet relevant university requirements.

<table>

## Additional Pre-approved CS Courses

These courses are not classified by area. Note that CS 695 Topics in Computer Science/CS 795 Advanced Topics in CS can be used to satisfy the breadth requirement if the area is listed in the syllabus for the course.

CS 555  Computer Communications and Networking
CS 571  Operating Systems
CS 600  Theory of Computation
CS 655  Wireless and Mobile Computing

**Thesis:**
Students, with the consent of a faculty sponsor and faculty advisor, may also elect a 6-credit thesis (CS 799 Thesis). The thesis must be guided and approved by a committee of three appropriate faculty members and presented at an appropriate forum. If the faculty advisor and the program director agree that the thesis is appropriate for the concentration the students will need to complete the two courses from the category 1 and one course from the category 2 in addition to the thesis to complete the Concentration requirements.

**Concentration in Machine Learning (ML)**
In addition to the existing program requirements, MS CS degree students must satisfy the following requirements.

Students must take 5 courses from the following categories:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>CS 584</td>
<td>Theory and Applications of Data Mining</td>
<td>3</td>
</tr>
<tr>
<td>CS 688</td>

<td>3</td>
</tr>
</tbody>
</table>

Choose 2-3 elective courses: 6-9

- CS 657  Mining Massive Datasets with MapReduce
- CS 681  Instructable Cognitive Agents
- CS 747  Deep Learning
- CS 782  Advanced Machine Learning

Choose 0-1 related course: 0-3

- CS 580  Introduction to Artificial Intelligence
- CS 687  Advanced Artificial Intelligence
- CS 685  Autonomous Robotics
- CS 682  Computer Vision

**Thesis (optional):**
Students, with the consent of a faculty sponsor and faculty advisor, may also elect a 6-credit thesis (CS 799 Thesis). The thesis must be guided and approved by a committee of three faculty members and presented to the committee. If the faculty advisor and the program director agree that the thesis is appropriate for the concentration the student will need to complete the two courses from category 1 and one course from category 2 in addition to the thesis to complete the concentration requirements.

For more detailed information, see AP.6.7 Bachelor's/Accelerated Master's Degrees. For policies governing all graduate degrees, see AP.6 Graduate Policies.

**Admission Requirements**
Students in the Applied Computer Science, BS program may apply to this option if they have earned 90 undergraduate credits with an overall GPA of at least 3.30. Students must have successfully completed:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>CS 310</td>

<td>Formal Methods and Models</td>
<td>3</td>
</tr>
<tr>
<td>CS 367</td>
<td>Computer Systems and Programming</td>
<td>4</td>
</tr>
</tbody>
</table>

Total Credits 10

**Accelerated Option Requirements**
Students have the opportunity to earn 3-6 credits in graduate coursework that count towards both the BS and MS degrees.

Students may register for 3-6 credits of the following CS 500-level courses in place of the corresponding CS 400-level courses required for the BS degree. Note: Students in the Applied Computer Science BS are required to take CS 583 Analysis of Algorithms as an advanced standing course.

<table>
<thead>
<tr>

<td>Theory and Applications of Data Mining</td>
<td>3</td>
</tr>
</tbody>
</table>

Note:
Students also have the option to take up to 6 additional credits of graduate coursework, which serve as reserve graduate credit to be counted towards the MS degree only.

**Degree Conferral**
Students must apply the semester before they expect to complete the BS requirements to have the BS degree conferred. In addition, at the beginning of the student's final undergraduate semester, students must complete a Bachelor's/Accelerated Master's Transition form that is submitted to the Office of the University Registrar and the VSE Graduate Admissions Office. At the completion of MS requirements, a master's degree is conferred.

**Computer Science, BS/Computer Science, Accelerated MS**

**Overview**
Highly-qualified students in the Computer Science, BS have the option of obtaining an accelerated Computer Science, MS.
Admission Requirements
Students in the Computer Science, BS program may apply to this option if they have earned 90 undergraduate credits with an overall GPA of at least 3.30. Students must have successfully completed CS 310 Data Structures, CS 330 Formal Methods and Models and CS 367 Computer Systems and Programming.

Accelerated Option Requirements
Students have the opportunity to earn 3-6 credits in graduate coursework that count towards both the BS and MS degrees.

Students may register for 3-6 credits of the following CS 500-level courses in place of the corresponding CS 400-level courses required for the BS degree.

Email: csphd@gmu.edu
Website: http://cs.gmu.edu/prospective-students/phd-program/

The PhD program in Computer Science prepares students to become technical leaders in their fields of research. We have a world-class faculty with research expertise in a diverse set of computer science areas and our program is nationally ranked. Additionally, we are located in the suburbs of Washington, DC at the center of one of the largest computer science and information technology corridors in the nation and a major center for science and engineering research and funding. Our PhD graduates have been highly successful both in academic and industrial positions.

The Computer Science PhD program requires coursework, successful completion of a breadth requirement, comprehensive examination, and a doctoral dissertation that is first proposed and eventually defended. Mason’s general doctoral requirements (https://catalog.gmu.edu/policies/academic/graduate-policies/#text) apply to this program.

Admissions & Policies

Admissions
All applicants must have an undergraduate degree, and their prior academic work must show a strong academic background in computer science. In addition, the GRE General Test is required from every applicant. Finally, each applicant must provide a resume, brief statement of career goals and personal aspirations, as well as three letters of reference. Each application receives careful consideration from the PhD Admission Committee.

Policies
Program Requirements
The 72 hours of required doctoral-level credits typically consist of 48 credits of regular coursework and 24 credits of dissertation research.

Degree Requirements
Total credits: 72

Nine credits of advanced graduate courses 1 9
30 credits of graduate level courses in the Computer Science department or a field related to the student’s doctoral research area 2 30

Total Credits 48

1 Must be selected in consultation with the student’s advisor from a list maintained by the CS department. Independent study courses cannot be used towards the 9 credit hours that must be obtained in advanced graduate courses.

2 Must be selected in consultation with the student’s advisor.
Note:

With careful selection of courses, students may earn an MS degree as part of their PhD studies.

Reduction of Credit

Students entering the PhD program with an approved MS degree can receive a reduction of credit for up to 30 credits. Reduction of credit requires the approval of the program director or designee and the dean or designee of the school.

Breadth Requirement

Students must demonstrate breadth of knowledge in computer science by obtaining superior grades in four graduate courses, including CS 583 Analysis of Algorithms. Collectively the four courses must span at least three of the following eight areas: Theoretical Computer Science, Systems and Networks, Security, Programming Languages, Software Engineering, Artificial Intelligence, Databases, and Visual Computing.

The grades obtained in the four selected courses must meet the following requirements:

- Students must obtain an A- or better grade in at least three of the four courses
- In the fourth course, students must obtain a grade of B or better.

A list of courses that can be used to satisfy the breadth requirement is maintained by the CS department.

A course that is used to satisfy the breadth requirement may be repeated at most once (the grade received in the last attempt is considered when evaluating the breadth requirement).

To satisfy the breadth requirement, a student can use the grades (s)he received in the past, provided that at most five years elapsed since the course was taken. The course must have been taken at GMU. Exceptions to this rule are rare and require filing a petition with supplementary documents to the Computer Science department.

An alternative way to satisfy the breadth requirement is to pass the written qualifying exams (http://cs.gmu.edu/current-students/phd-students/qualifying-exam-policies-and-procedures/). The exams are offered once every semester (usually two weeks before the semester begins).

To qualify, each student must pass exams in four areas, one of which is Foundations of Computer Science. The other three areas are chosen from these eight areas: computer systems, networks, compilers and languages, software construction, software testing, artificial intelligence, database systems, and information security.

The four exams must be attempted in the same semester, and a failed exam may be retaken once only, in the next semester. A student who fails to pass the four exams in two consecutive semesters is deemed to have failed to satisfy the breadth requirement, and is subject to termination.

If the student takes one or more written qualifying exams, the breadth requirement can only be satisfied by passing the qualifying exams (the criterion based on course performance cannot apply).

Dissertation Research

A minimum of 24 credits of CS 998 Doctoral Dissertation Proposal and CS 999 Doctoral Dissertation must be completed, of which at least 12 must be in CS 999 Doctoral Dissertation. Only 24 credits of CS 998 Doctoral Dissertation Proposal and CS 999 Doctoral Dissertation may be applied toward the degree. Students may enroll in CS 998 Doctoral Dissertation Proposal only after passing the breadth requirement, and they may enroll in CS 999 Doctoral Dissertation only after advancing to candidacy.

<table>

<td></td>
</tr>
</tbody>
</table>

Comprehensive Exam

To demonstrate the depth of knowledge in their intended area of research, the students must pass a comprehensive exam. The comprehensive exam is administered by a committee consisting of four members: the research advisor, an additional faculty member selected by the student, and two tenured CS faculty members selected by the PhD program director. One of the members selected by the program director chairs the committee.

The comprehensive exam has both written and oral components. The student is required to initiate the comprehensive exam procedure by submitting a form to the CS department at least four months prior to the target oral exam date. For the written component of the exam, the student prepares a critical review of research literature on a topic in the intended area of research. The report should synthesize the previous research in the target area with particular emphasis on open problems. The report should be 8-10 pages long and should contain a minimum of 20 references. The written report must be received by the committee members at least one month before the oral exam date.

The oral exam includes a presentation by the student based on the written report. The duration of the oral exam is typically two hours with the presentation limited to 20 minutes. The exam is public but only the members of the committee are permitted to ask questions.

The scope of the oral exam is defined by a reading list that includes research articles selected by the student and advisor, as well as the textbooks and articles related to the intended broader research area of the student selected by the other members of the committee and the CS department. The complete reading list, as well as the members of the examination committee will be finalized and communicated to the student by the CS department at least three months before the oral exam date. The comprehensive exam reading list becomes part of the student’s record.

When in both written and oral components at least three out of four committee members find the student’s performance satisfactory, the student passes the comprehensive exam. Otherwise the student is allowed to re-take the exam only once (with both written and oral components) and no later than the next semester. If the written report is found unsatisfactory by two or more committee members, the oral exam is not administered in that attempt. Students who fail the comprehensive exam are subject to termination.

The student can form a dissertation committee only after successfully passing the comprehensive exam.

Milestones and Deadlines

The students are expected to make steady progress in the program by completing the required course work and research-related milestones
within the specified deadlines. Students who fail to meet the deadlines will be dismissed from the program unless there are extenuating circumstances approved by the department.

Successful completion of CS 700 Research Methodology in Computer Science: Within the first two semesters in the program.

Successful completion of CS 701 Research Experience in Computer Science: Within the first 18 credits in the program.

Determining the research advisor: Within the first 24 credits in the program or three years, whichever comes first.

Satisfy the breadth requirement: Within the first 24 credits in the program or three years, whichever comes first.

Successful completion of both instances of CS 800 Computer Science Colloquium: Within the first 36 credits in the program or five years, whichever comes first.

Taking the comprehensive exam: Within the first 36 credits in the program (cannot be postponed beyond five years). The student must pass the exam in at most two attempts.

Advancing to candidacy and graduation: Time limits are determined by the general university rules that apply to the PhD Programs.

A student who misses any time limits is subject to termination.

Annual Evaluation
All students in the program (except the students in their first year in the PhD program) are required to complete an annual progress report (http://cs.gmu.edu/resources/student-forms/). This report must be submitted by the end of September every year to the Administrative Coordinator of the CS PhD program.

The annual reports are reviewed by the members of the faculty to assess the student’s progress in the program and feedback is provided to each student.

Dissertation Committee Selection
Each student must form a dissertation committee, comprising four or five individuals. Three members of the committee must be Graduate Faculty in the Computer Science Department. The fourth member should be a member of the George Mason University graduate faculty who is outside the department. A fifth member may be from outside the university. The chair of the dissertation committee, who must also be the dissertation director, must be a member of the Graduate Faculty in the Volgenau School. The committee must be approved by the chair of the Computer Science Department.

Dissertation Proposal
Each student must prepare a written dissertation proposal. While preparing this proposal, the student enrolls in CS 998 Doctoral Dissertation Proposal. The proposal must be made available to the committee at least two weeks in advance of the presentation. The proposal must be presented to and approved by the dissertation committee. The committee determines whether the proposal has merit and can lead to significant contributions to the area and whether the student has the knowledge and skills to complete the proposed work successfully and in a timely manner. Students may present their dissertation proposal only after passing the comprehensive exam, and the presentation may not be on the same day as the comprehensive exam. If the student fails to defend the proposal, the student may present a dissertation proposal a second time at a later date. Failure in the second attempt results in termination from the program. On completing this requirement successfully, the student is advanced to candidacy for the PhD degree.

Dissertation Preparation and Defense
While preparing the dissertation, the candidate must enroll in CS 999 Doctoral Dissertation each term. When the work is deemed complete, the dissertation is defended. The public defense is preceded by a predefense meeting in which only the candidate, the dissertation committee members, and the director of the PhD in Computer Science Program (or his or her representative) are present. If the committee approves, the candidate may then schedule the final public defense. There should be at least one month between the predefense meeting and the defense, and the defense must be announced at least two weeks in advance. The dissertation must be made available to the committee at least two weeks in advance of the defense. The entire dissertation committee must be present at the defense, unless an exception is approved by the director of the PhD in Computer Science Program in advance of the defense. The dissertation must make significant contributions to its area and be publishable in refereed journals or conferences. If the candidate defends the dissertation successfully, the dissertation committee recommends that the final form of the dissertation be completed under the supervision of the dissertation director and the graduate faculty of Mason accept the candidate for the PhD degree. If the candidate fails to defend the dissertation, the candidate may request a second defense, following the same procedures as for the initial defense. There is no time limit for this request other than general time limits for the doctoral degree and an additional predefense is not required. A candidate who fails a second attempt to defend the dissertation is terminated from the program.

Information Security and Assurance Graduate Certificate
Banner Code: VS-CERG-ISA

Academic Advising
Phone: 703-993-1530
Email: csgrad@gmu.edu
Website: cs.gmu.edu/prospective-students/ms-programs/graduate-certificate/

This graduate certificate program is intended for students interested in science and methods for ensuring secrecy, integrity, availability, and legitimate use of information systems. The certificate may be pursued concurrently with any of the graduate programs in the Volgenau School.

The graduate certificate may only be pursued on a part-time basis.

Admissions & Policies

Admissions
Applicants must hold a baccalaureate degree from an accredited institution and have earned a GPA of 3.00 or higher in the last 60 credits.

Applicants must possess knowledge equivalent to that provided by the following courses:
The Department of Computer Science's MS degree in Information Security and Assurance prepares graduates to fill the current and future need for information security and assurance professionals. Graduates work in a wide variety of capacities, protecting the information systems of different types of organizations and supporting the nation's information infrastructure. The Master of Science in Information Security and Assurance provides students with the general and technical knowledge and skills to understand the relationship between information security and advancing information systems technology. The program gives graduates a theoretical understanding of the science and methodologies for ensuring the secrecy and integrity of data, as well as the availability and legitimate use of data and information systems.

Students focus on the technical and management aspects of information security and examine ways to provide secure information processing systems by investigating operating systems security, distributed secure system architectures, database security, software applications security, security policies, secure e-commerce, network and distributed systems security, cryptography, and security protocols. Graduates of the program are actively recruited by federal, state, and local governments, as well as the private sector. Typical employers include Internet-based companies, software companies, banks and insurance companies, and in general any organization that depends heavily on the use of IT. All classes are scheduled in the late afternoon and early evening to accommodate employed students.

Admissions & Policies

Admissions

Eligibility and Application Requirements
Applicants must hold a four-year (120-credit minimum) baccalaureate degree from an accredited institution and have earned a GPA of 3.00 or better in the last 60 credits. Other requirements are as follows:

- Submit the appropriate application with two letters of recommendation from people directly knowledgeable of the applicant's professional and academic competence, a one-page goals statement, and a work resume.
- International students must submit their English Proficiency scores.

Policies

Foundation Requirements
To succeed in graduate courses, students entering the MS program must have coursework or equivalent knowledge in the following five foundation areas: (1) introductory programming in any programming language; (2) knowledge of an object-oriented programming language such as Java, C++, or C#; (3) data structures and algorithms; (4) machine organization such as those given in computer system architecture or assembly language courses; (5) and topics in discrete mathematics, including sets, propositional and predicate logic, relations, functions, trees, graphs, and inductive proofs.

The level of knowledge required in these areas is equivalent to that taught in undergraduate courses and may be demonstrated in one of several ways:

Information Security and Assurance, MS

Banner Code: VS-MS-ISA

Academic Advising
Phone: 703-993-1530
Email: csgrad@gmu.edu
1. Applicable undergraduate coursework: Such courses must appear on transcripts from the student’s undergraduate university, or another accredited university. Applicable courses from George Mason University and Northern Virginia Community College (NVCC) are given here:

   a. **Foundation:** OO programming
      - GMU CS: CS 211 Object-Oriented Programming
      - GMU IT: IT 106 Introduction to IT Problem Solving Using Computer Programming & IT 206 Object Oriented Techniques for IT Problem Solving
      - NVCC: CSC 201
   b. **Foundation:** Data structures
      - GMU CS: CS 310 Data Structures
      - GMU IT: IT 306 Data Structures and Algorithms in Java
      - NVCC: None
   c. **Foundation:** Machine organization
      - GMU CS: CS 367 Computer Systems and Programming or CS 465 Computer Architecture
      - GMU IT: IT 342 Operating Systems Fundamentals
      - NVCC: None
   d. **Foundation:** Discrete math
      - GMU Math: MATH 125 Discrete Mathematics I (Mason Core)
      - NVCC: MATH 288

   - Preparatory coursework taken at GMU: The CS department offers the following bridge foundation courses: (1-2) SWE 510 Object-Oriented Programming in Java, (3) INFS 519 Program Design and Data Structures, (4) INFS 515 Computer Organization Course and Operating Systems, and (5) INFS 501 Discrete and Logical Structures for Information Systems. These courses may be taken by students in non-degree or provisional status.
   - Passing appropriate testout exams: Students can self-prepare and attempt testout exams for SWE 510 Object-Oriented Programming in Java, INFS 519 Program Design and Data Structures, (4) INFS 515 Computer Organization Course and Operating Systems, and INFS 501 Discrete and Logical Structures for Information Systems. The exams are given before classes begin in January and August, and can only be retaken once. Registration is not required; students need only be present at the date, time, and location specified and bring some form of photographic identification. Detailed information is available on the department web site. Students who fail any one of the exams must take the equivalent course before enrolling in the core curriculum courses.
   - Eligible domestic students who lack one or more foundations may be admitted provisionally and required to take the appropriate preparatory course or pass the testout exam. Other students may be advised to learn the foundation material and re-apply.

**Advising**

The department holds orientation meetings each January and August to advise newly admitted and continuing students. Members of the faculty are present to answer questions and offer advice concerning programs of study. Detailed information is available on the department web site (https://cs.gmu.edu/).

The department also provides an advising function to students, as outlined in the student advising form available from the department. Each student is assigned a faculty advisor with whom to confer on matters related to degree requirements. A plan of study form for the MS degree should be completed and submitted by the student soon after admission to the program. This serves as a planning guide for the student.

**Requirements**

**Degree Requirements**

Total credits: 30

Completion of the degree program requires a minimum of 30 approved graduate credits (10 courses). Students must choose a concentration.

**Required Core Courses**

These courses provide the necessary background and fundamentals of information systems security and assurance. To continue in the program, students are required to obtain a B- or higher grade in the core courses. Students receiving lower than a B- must retake the course or face termination.

Accelerated Master's

Applied Computer Science, BS/Information Security and Assurance, Accelerated MS

Overview

Highly-qualified students in the Applied Computer Science, BS program have the option of enrolling in an accelerated Information Security and Assurance, MS program.

For more detailed information, see AP 6.7 Bachelor's/Accelerated Master's Degrees. For policies governing all graduate degrees, see AP 6 Graduate Policies.

Admission Requirements

Students in the Applied Computer Science, BS program can apply for this option if they have earned 90 undergraduate credits with an overall GPA of at least 3.30. Students must have successfully completed:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>CS 310</td>
<td>Data Structures</td>
<td>3</td>
</tr>
<tr>
<td>CS 330</td>
<td>Formal Methods and Models</td>
<td>3</td>
</tr>
<tr>
<td>CS 367</td>
<td>Computer Systems and Programming</td>
<td>4</td>
</tr>
</tbody>
</table>

Total Credits: 10

Accelerated Option Requirements

Students have the opportunity to earn 3-6 credits in graduate coursework that count towards both the BS and MS degrees.

Students may register for 3-6 credits of the following CS 500-level courses in place of the corresponding CS 400-level courses required for the BS degree. Specifically, students must take:
Information Security and Assurance, MS

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>CS 583</td>
<td>Analysis of Algorithms</td>
<td>3</td>
</tr>
</tbody>
</table>

Select one of the following: 3

<table>
<thead>
<tr>
<th>Code</th>

</tr>
<tr>
<td>CS 580</td>
<td>Introduction to Artificial Intelligence</td>
<td></td>
</tr>
<tr>
<td>CS 584</td>
<td>Theory and Applications of Data Mining</td>
<td></td>
</tr>
</tbody>
</table>

Total Credits 6

Note:

Students complete all MS in Information Security and Assurance core courses and apply the two courses from the above list toward the degree requirements. Students also have the option to take up to 6 additional credits of graduate coursework, which serves as reserve graduate credit to be counted towards the MS degree only.

Degree Conferral

Students must apply the semester before they expect to complete the BS requirements to have the BS degree conferred. In addition, at the beginning of the student’s final undergraduate semester, students must complete a Bachelor’s/Accelerated Master’s Transition form that is submitted to the Office of the University Registrar and the VSE Graduate Admissions Office. At the completion of MS requirements, a master’s degree is conferred.

Information Technology, BS/Information Security and Assurance, Accelerated MS Overview

Highly-qualified students in the Information Technology, BS have the option of obtaining an accelerated Information Security and Assurance, MS.

For more detailed information, see AP 6.7 Bachelor’s/Accelerated Master’s Degrees. For policies governing all graduate degrees, see AP 6 Graduate Policies.

Admission Requirements

Students in the Information Technology, BS program may apply for this option if they have earned 90 undergraduate credits with an overall GPA of at least 3.30. Criteria for admission are identical to criteria for admission to the Information Security and Assurance, MS program.

Accelerated Option Requirements

Students must complete all credits that satisfy requirements for the BS and MS programs, with 6 credits overlapping with the two following courses:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>INFS 612</td>
<td>Principles and Practices of Communication Networks (satisfies IT 441 requirement in the BS program)</td>
<td>3</td>
</tr>
<tr>
<td>ISA 562</td>
<td>Information Security Theory and Practice (satisfies IT 462 requirement in the BS program)</td>
<td>3</td>
</tr>
</tbody>
</table>

Note:

Students must complete MATH 125 Discrete Mathematics I (Mason Core) as their discrete math requirement and IT 306 Data Structures and
Algorithms in Java as part of their concentration requirements in the BS program.

Degree Conferral
Students must apply the semester before they expect to complete the BS requirements to have the BS degree conferred. In addition, at the beginning of the student’s final undergraduate semester, students must complete a Bachelor’s/Accelerated Master’s Transition form that is submitted to the Office of the University Registrar and the VSE Graduate Admissions Office. At the completion of MS requirements, a master’s degree is conferred.

Information Systems, MS

Banner Code: VS-MS-ISYS

Academic Advising
Phone: 703-993-1530
Email: csgrad@gmu.edu
Website: cs.gmu.edu/prospective-students/ms-programs/ms-in-information-systems/

Modern information systems manage data, information and knowledge to support enterprise functions and decision making as well as human social activity over the Internet. Increasingly, these systems are distributed, collaborative, involve big data and hosted in the cloud.

The mission of the MSIS program is to allow students of diverse baccalaureate and professional backgrounds to obtain a high-quality MS degree that:

- provides students with the theoretical knowledge and hands-on project experience needed to analyze, design, build, deploy, maintain, manage and promote effective organizational use of modern information systems;
- allows students to further specialize in related areas of big data, data and knowledge engineering, decision support systems, web-based software engineering and information security assurance; and,
- prepares students for careers in information systems in large and small organizations in both industry and government.

Career paths open to graduates include systems analyst, data administrator, database administrator, information architect, systems architect, decision analyst, data warehouse administrator, database application developer, web-based information systems designer and developer, information engineer, knowledge engineer, chief information officer, chief knowledge officer, chief privacy officer and project manager.

Admissions & Policies

Admissions

Eligibility and Application Requirements
Applicants must hold a four-year (120-credit minimum) baccalaureate degree from an accredited institution and have earned a GPA of 3.00 or better in the last 60 credits. Applicants also must submit the following:

- A one-page goals statement
- A work resume.
- International students must submit their English proficiency scores.

Policies

Foundation Requirements
To succeed in graduate courses, students entering the MS program must have coursework or equivalent knowledge in the following five foundation areas: (1) introductory programming in any programming language; (2) knowledge of an object-oriented programming language such as Java, C++, or C#; (3) data structures and algorithms; (4) machine organization such as those given in computer system architecture or assembly language courses; (5) and topics in discrete mathematics, including sets, propositional and predicate logic, relations, functions, trees, graphs, and inductive proofs.

The level of knowledge required in these areas is equivalent to that taught in undergraduate courses and may be demonstrated in one of several ways:

1. Applicable undergraduate coursework: Such courses must appear on transcripts from the student’s undergraduate university, or another accredited university. Applicable courses from George Mason University and Northern Virginia Community College (NVCC) are given here:

   a. Foundation: OO programming
      - GMU CS: CS 211 Object-Oriented Programming
      - GMU IT: IT 106 Introduction to IT Problem Solving Using Computer Programming & IT 206 Object Oriented Techniques for IT Problem Solving
      - NVCC: CSC 201

   b. Foundation: Data structures
      - GMU CS: CS 310 Data Structures
      - GMU IT: IT 306 Data Structures and Algorithms in Java
      - NVCC: None

   c. Foundation: Machine organization
      - GMU CS: CS 367 Computer Systems and Programming or CS 465 Computer Systems Architecture
      - GMU IT: IT 342 Operating Systems Fundamentals
      - NVCC: None

   d. Foundation: Discrete math
      - GMU Math: MATH 125 Discrete Mathematics I (Mason Core)
      - NVCC: MATH 288

2. Preparatory coursework taken at GMU: The CS department offers the following bridge foundation courses: (1-2) SWE 510 Object-Oriented Programming in Java, (3) INFS 519 Program Design and Data Structures, (4) INFS 515 Computer Organization Course and Operating Systems, and (5) INFS 501 Discrete and Logical Structures for Information Systems. These courses may be taken by students in non-degree or provisional status.

3. Passing appropriate testout exams: Students can self-prepare and attempt testout exams for SWE 510 Object-Oriented Programming in Java, INFS 519 Program Design and Data Structures, INFS 515 Computer Organization Course and Operating Systems, and INFS 501 Discrete and Logical Structures for Information Systems. The exams are given before classes begin in January and August, and can only be taken once. Registration is not required; students need only be present at the date, time, and location specified and bring some form of photographic identification. Detailed information is available on the department web site. Students who fail any one of the exams must
take the equivalent course before enrolling in the core curriculum courses.

Eligible domestic students who lack one or more foundation may be admitted provisionally and required to take the appropriate preparatory course or pass the testout exam. Other students may be advised to learn the foundation material and re-apply.

Advising
The department holds orientation meetings in January and August to advise newly admitted and continuing students. Members of the faculty are present to answer questions and offer advice concerning programs of study. Detailed information is available on the department web site (https://cs.gmu.edu/).

The department also provides an advising function to students, as outlined in the student advising form available from the department. Each student is assigned a faculty advisor with whom to confer on matters related to degree requirements. A plan of study form for the MS degree should be completed and submitted by the student soon after admission to the program. This plan serves as a guide for the student.

Requirements

Degree Requirements
Total credits: 30

Core Courses
To provide a common background in the fundamentals of information systems, the following core courses, which constitute the technical body of knowledge for the program, are required of all students. Students with strong academic background in mathematical foundations of computer science may have CS 530 Mathematical Foundations of Computer Science substituted for another elective course at the discretion of the program director.

Electives
Five courses selected from the lists which follow.  

Electives are organized into the following emphasis areas: database management, data mining, electronic commerce, software engineering, knowledge management, and information security and assurance.

In addition to the core courses taken as part of the MS-ISYS curriculum, students may choose an emphasis within the program by taking five courses from one of the emphasis areas listed below. Students may also choose electives spanning several emphasis areas; they may also plan their electives so as to obtain certificates offered by the department. A list of approved electives is given within emphasis areas and by graduate program. A full list follows. Special topics courses may be used as electives with prior approval of the student’s academic advisor and the graduate coordinator.

Students, with the consent of a faculty sponsor and faculty advisor, may also elect courses in individualized study, special topics, or a 6-credit thesis (INFS 799 Thesis), which is primarily intended for students planning to pursue a PhD in information technology with a concentration in information systems.

Applied Computer Science, BS/Information Systems, Accelerated MS

Overview
Highly-qualified students in the Applied Computer Science, BS program have the option of obtaining an accelerated Information Systems, MS. See AP.6.7 Bachelor's/Accelerated Master's Degrees.

Students in an accelerated degree program must fulfill all university requirements for the master's degree. For policies governing all graduate degrees, see AP.6 Graduate Policies.

Admission Requirements
Students in the Applied Computer Science, BS program can apply to this option if they have earned 90 undergraduate credits with an overall GPA of at least 3.30. Students must have successfully completed:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>CS 310</td>
<td>Data Structures</td>
<td>3</td>
</tr>
<tr>
<td>CS 330</td>
<td>Formal Methods and Models</td>
<td>3</td>
</tr>
<tr>
<td>CS 367</td>
<td>Computer Systems and Programming</td>
<td>4</td>
</tr>
<tr>
<td></td>
<td><strong>Total Credits</strong></td>
<td><strong>10</strong></td>
</tr>
</tbody>
</table>

Accelerated Option Requirements
Students have the opportunity to earn 3-6 credits in graduate coursework that count towards both the BS and MS degrees.

Students may register for 3-6 credits of the following CS 500-level courses in place of the corresponding CS 400-level courses required for the BS degree. Specifically, students must take:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>CS 583</td>
<td>Analysis of Algorithms</td>
<td>3</td>
</tr>
<tr>
<td></td>
<td><strong>Select one of the following:</strong></td>
<td><strong>3</strong></td>
</tr>

</tr>
</tbody>
</table>

Computer Science, BS/Information Systems, Accelerated MS

Overview
Highly-qualified students in the Computer Science, BS have the option of obtaining an accelerated Information Systems, MS.

For more detailed information, see AP.6.7 Bachelor's/Accelerated Master's Degrees. For policies governing all graduate degrees, see AP.6 Graduate Policies.

Admission Requirements
Students in the Computer Science, BS program may apply to this option if they have earned 90 undergraduate credits with an overall GPA of at least 3.30. Students must have successfully completed CS 310 Data Structures, CS 330 Formal Methods and Models and CS 367 Computer Systems and Programming.

Accelerated Option Requirements
Students have the opportunity to earn 3-6 credits in graduate coursework that count towards both the BS and MS degrees. Students may register for 3-6 credits of the following CS 500-level courses in place of the corresponding CS 400-level courses required for the BS degree.

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>CS 540</td>
<td>Language Processors</td>
<td>3</td>
</tr>
<tr>

<td>CS 583</td>
<td>Analysis of Algorithms</td>
<td>3</td>
</tr>
<tr>
<td>CS 584</td>
<td>Theory and Applications of Data Mining</td>
<td></td>
</tr>
<tr>
<td></td>
<td><strong>Total Credits</strong></td>
<td><strong>3</strong></td>
</tr>
</tbody>
</table>
Note:
Students complete all MS in Information Systems core courses and apply the two courses from above toward the elective requirements. Students also have the option to take up to 6 additional credits of graduate coursework, which serve as reserve graduate credit to be counted towards the MS degree only.

Degree Conferral
Students must apply the semester before they expect to complete the BS requirements to have the BS degree conferred. In addition, at the beginning of the student’s final undergraduate semester, students must complete a Bachelor’s/Accelerated Master’s Transition form that is submitted to the Office of the University Registrar and the VSE Graduate Admissions Office. At the completion of MS requirements, a master’s degree is conferred.

Information Technology, BS/Information Systems, Accelerated MS
Overview
Highly-qualified students in the Information Technology, BS have the option of obtaining an accelerated Information Systems, MS.

For more detailed information, see AP.6.7 Bachelor’s/Accelerated Master’s Degrees. For policies governing all graduate degrees, see AP6 Graduate Policies.

Admission Requirements
Students in the Information Technology, BS program may apply to this option if they have earned 90 undergraduate credits with an overall GPA of at least 3.30. Criteria for admission are identical to the criteria for admission to the Information Systems, MS program.

Accelerated Option Requirements
Students must complete all credits that satisfy requirements for the BS and MS programs, with up to 6 overlapping credits chosen from the following two courses:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>CS 550</td>
<td>Database Systems (satisfies IT 414 requirement in the BS program)</td>
<td>3</td>
</tr>
<tr>
<td>INFS 622</td>
<td>Information Systems Analysis and Design (satisfies as one DTP concentration course in the BS program)</td>
<td>3</td>
</tr>
</tbody>
</table>

Note:
Students must complete MATH 125 Discrete Mathematics I (Mason Core) as their discrete math requirement and IT 306 Data Structures and Algorithms in Java as part of their concentration requirements in the BS program.

Degree Conferral
Students must apply the semester before they expect to complete the BS requirements to have the BS degree conferred. In addition, at the beginning of the student’s final undergraduate semester, students must complete a Bachelor’s/Accelerated Master’s Transition form that is submitted to the Office of the University Registrar and the VSE Graduate Admissions Office. At the completion of MS requirements, a master’s degree is conferred.

Software Engineering Graduate Certificate
Banner Code: VS-CERG-SWE
Academic Advising
Phone: 703-993-1530
Email: csgrad@gmu.edu
Website: cs.gmu.edu/prospective-students/ms-programs/graduate-certificates/

This graduate certificate program provides knowledge, tools, and techniques to those who are working in or planning to work in software engineering, but do not want to complete requirements for a master’s degree in the field. The certificate may be pursued concurrently with any of the graduate degree programs in the Volgenau School of Engineering.

The graduate certificate may be pursued on a part-time or full-time basis.

Admissions & Policies

Admissions
General Concentration
Applicants must hold a baccalaureate degree from an accredited institution and have earned a GPA of 3.00 or higher in the last 60 credits. In addition, applicants must complete a self-assessment form, which can be obtained from the Computer Science Department. This form provides summary information concerning background and preparation for the program.

Applicants must possess knowledge equivalent to the following undergraduate courses: structured programming in a modern programming language, data structures, discrete mathematics, and machine organization. The level of knowledge may also be achieved by taking the following foundation courses at Mason:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>INFS 501</td>
<td>Discrete and Logical Structures for Information Systems</td>
<td>3</td>
</tr>
<tr>
<td>SWE 510</td>
<td>Object-Oriented Programming in Java</td>
<td>3</td>
</tr>
<tr>
<td>INFS 515</td>
<td>Computer Organization Course and Operating Systems</td>
<td>3</td>
</tr>
<tr>
<td>INFS 519</td>
<td>Program Design and Data Structures</td>
<td>3</td>
</tr>
</tbody>
</table>

In addition, it is desirable, but not necessary, for applicants to have at least one year of appropriate work experience in building or modifying software systems.

Applicants must submit a one- to two-page statement of educational and work experience in the computing field that includes a statement of career goals in software engineering. Students not enrolled in a graduate degree program at Mason should apply for the certificate program through the Office of Graduate Admission. Students already enrolled in a Mason graduate degree program should apply to the department for admission into the certificate program. Admission into the certificate program does not guarantee acceptance into any MS program.
Web-Based Software Engineering Concentration

Applicants must hold a baccalaureate degree from an accredited institution and have earned a GPA of 3.00 or better in the last 60 credits. Applicants must complete a self-assessment form, which can be obtained from the department or the department website. The form provides information concerning background and preparation for the program.

Applicants must possess knowledge equivalent to that provided by the following courses:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>INFS 501</td>
<td>Discrete and Logical Structures for Information Systems</td>
<td>3</td>
</tr>
<tr>
<td>SWE 510</td>
<td>Object-Oriented Programming in Java</td>
<td>3</td>
</tr>
<tr>
<td>INFS 515</td>
<td>Computer Organization Course and Operating Systems</td>
<td>3</td>
</tr>
<tr>
<td>INFS 519</td>
<td>Program Design and Data Structures</td>
<td>3</td>
</tr>
</tbody>
</table>

Students not enrolled in a graduate degree program at Mason should apply for the certificate program through the Office of Graduate Admission. Students already enrolled in a Mason graduate degree program should apply to the department for admission into the certificate program. Admission to the certificate program does not guarantee admission to any MS program.

Policies

Students must complete four courses with an average grade of B or higher for a total of 12 credits of graduate study.

Requirements

Certificate Requirements

Total credits: 12

This certificate may be pursued on a full- or part-time basis.

Requirements

Students must complete all requirements within a concentration.

Concentration in General (GEN)

Select three courses from the following:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>SWE 619</td>
<td>Object-Oriented Software Specification and Construction</td>
<td>3</td>
</tr>
<tr>
<td>SWE 621</td>
<td>Software Design and Architecture</td>
<td>3</td>
</tr>
<tr>
<td>SWE 632</td>
<td>User Interface Design and Development</td>
<td>3</td>
</tr>
<tr>
<td>SWE 637</td>
<td>Software Testing</td>
<td>3</td>
</tr>
</tbody>
</table>

Select one course from the following: 1

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>CS 675</td>
<td>Distributed Systems</td>
<td>3</td>
</tr>
<tr>
<td>CS 706</td>
<td>Concurrent Software Systems</td>
<td></td>
</tr>
<tr>
<td>SWE 620</td>
<td>Software Requirements Analysis and Specification</td>
<td></td>
</tr>
<tr>
<td>SWE 625</td>
<td>Software Project Management</td>
<td></td>
</tr>
<tr>
<td>SWE 626</td>
<td>Software Project Laboratory</td>
<td></td>
</tr>
<tr>
<td>SWE 631</td>
<td>Software Design Patterns</td>
<td></td>
</tr>
<tr>
<td>SWE 632</td>
<td>User Interface Design and Development</td>
<td></td>
</tr>
</tbody>
</table>

Total Credits 12

Notes:

Students enrolled in the MS in Information Systems Program must substitute SWE 620 Software Requirements Analysis and Specification for INFS 622 Information Systems Analysis and Design to obtain this certificate. Credit is not given for taking both INFS 622 Information Systems Analysis and Design and SWE 620 Software Requirements Analysis and Specification; only 3 credits will be awarded.

Students enrolled in the MS in Computer Science Program may obtain a certificate in software engineering by taking any four SWE courses. If CS 706 Concurrent Software Systems is included, it is possible to complete the MS in Computer Science and the certificate in software engineering in 30 hours.

Concentration in Web-Based Software Engineering (WBSE)

Admissions & Policies

Admissions

Declaring a Software Engineering Minor

Students requesting a software engineering minor must have completed CS 112 Introduction to Computer Programming or CS 211 Object-Oriented Programming with a B or better.

Policies

General

Candidates for the minor in software engineering must complete 19 credits in software engineering with a minimum GPA of 2.00, 8 credits of which must be unique to the minor and not used for the major. For policies governing all minors, see AP.5.3.4 Minors.

Grades

No more than 3 credits of D grades may be used to satisfy minor requirements.

Requirements

Minor Requirements

Total credits: 19

Software Engineering, MS

Banner Code: VS-MS-SWE

Academic Advising

Phone: 703-993-1530
Email: csgrad@gmu.edu
Website: cs.gmu.edu/prospective-students/ms-programs/ms-in-software-engineering/

The MS in Software Engineering (MS-SWE) prepares students to become leaders in engineering high quality, large scale, computing solutions to real life problems. Software engineering spans all aspects of developing software, including requirements analysis, design, construction, testing, usability, security, maintenance, and economics. Software engineering spans all types of software, including mobile and web applications, software services, enterprise software, and large complex systems. We revise courses regularly to keep up with changes in software engineering.

The MS-SWE program emphasizes pragmatic problem solving that addresses reliability, usability, future growth, security, cost, and efficiency. Graduates go on to technical leadership positions such as engineering lead, software architect, director of engineering, and CTO, as well as managerial and executive positions. MS-SWE students come from a diversity of undergraduate backgrounds, including computer science, engineering, mathematics, sciences, and business. The DC area has one of the largest collections of software companies in the world and the workforce is constantly growing, making our graduates in very high demand. Many MS-SWE students work full-time at companies that are constantly hiring, making every class meeting a mini-job fair. All classes are scheduled in the late afternoon to accommodate part-time students.

Admissions & Policies

Admissions

To succeed in graduate courses, students entering the MS program must have coursework or equivalent knowledge in the following five foundation areas: (1) **introductory programming** in any programming language; (2) knowledge of an **object-oriented programming** language such as Java, C++, or C#; (3) **data structures** and algorithms; (4) **machine organization** such as those given in computer system architecture or assembly language courses; (5) and topics in **discrete mathematics**, including sets, propositional and predicate logic, relations, functions, trees, graphs, and inductive proofs.

The level of knowledge required in these areas is equivalent to that taught in undergraduate courses and may be demonstrated in one of several ways:

1. Applicable undergraduate coursework: Such courses must appear on transcripts from the student’s undergraduate university, or another accredited university. Applicable courses from George Mason University and Northern Virginia Community College (NVCC) are given here:

   a. **Foundation**: OO programming
      - GMU CS: CS 211 Object-Oriented Programming
      - GMU IT: IT 106 Introduction to IT Problem Solving Using Computer Programming IT 106 Introduction to IT Problem Solving Using Computer Programming & IT 206 Object Oriented Techniques for IT Problem Solving
      - NVCC: CSC 201

   b. **Foundation**: Data structures
      - GMU CS: CS 310 Data Structures
      - GMU IT: IT 306 Data Structures and Algorithms in Java
      - NVCC: None

   c. **Foundation**: Machine organization
2. Preparatory coursework taken at GMU: The CS department offers the following bridge foundation courses: (1-2) SWE 510 Object-Oriented Programming in Java, (3) INFS 519 Program Design and Data Structures, (4) INFS 515 Computer Organization Course and Operating Systems, and (5) INFS 501 Discrete and Logical Structures for Information Systems. These courses may be taken by students in non-degree or provisional status.

3. Passing appropriate testout exams: Students can self-prepare and attempt testout exams for SWE 510 Object-Oriented Programming in Java, INFS 519 Program Design and Data Structures, INFS 515 Computer Organization Course and Operating Systems, and INFS 501 Discrete and Logical Structures for Information Systems. The exams are given before classes begin in January and August, and can only be taken once. Registration is not required; students need only be present at the date, time, and location specified and bring some form of photographic identification. Detailed information is available on the department web site. Students who fail any one of the exams must take the equivalent course before enrolling in the core curriculum courses.

Eligible domestic students who lack one or more foundation may be admitted provisionally and required to take the appropriate preparatory course or pass the testout exam. Other students may be advised to learn the foundation material and re-apply.

Application Requirements
In addition to general admission requirements of the university, each applicant to the MS program must hold a four-year (120-credit minimum) baccalaureate degree in an appropriate discipline from an accredited institution and have earned a GPA of 3.00 or better in the last 60 credits of undergraduate study. Other requirements are as follows:

- Provide a resume and a one- to two-page statement of educational and work experience in the computing field that includes a statement of career goals in software engineering.
- International students must submit their English Proficiency scores.

Policies
Program Requirements
In addition to the general requirements of the university, the MS in Software Engineering requires a minimum of 30 graduate credits. The coursework is divided into three categories: a breadth requirement of 12 credits of core courses, a depth requirement of 9 credits of emphasis courses, and 9 credits of elective courses.

Advising
The department holds orientation meetings each January and August to advise incoming and continuing students. Members of the faculty are present to answer questions and offer advice concerning programs of study. Detailed information is available on the department web site (https://cs.gmu.edu/). The department also provides an advising function to students, as outlined in the student advising form available from the department. Each student is assigned a faculty advisor with whom to confer on matters related to degree requirements. A plan of study form for the MS degree should be completed and submitted by the student soon after admission; this plan serves as a guide for the student.

### Requirements

Admission Requirements

Students in the Applied Computer Science, BS program may apply to this option if they have earned 90 undergraduate credits with an overall GPA of at least 3.30. Students must have successfully completed:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>CS 310</td>
<td>Data Structures</td>
<td>3</td>
</tr>
<tr>
<td>CS 330</td>
<td>Formal Methods and Models</td>
<td>3</td>
</tr>
<tr>
<td>CS 367</td>
<td>Computer Systems and Programming</td>
<td>4</td>
</tr>
<tr>
<td>Total Credits</td>
<td>10</td>
<td></td>
</tr>
</tbody>
</table>

Accelerated Option Requirements

Students have the opportunity to earn 3-6 credits in graduate coursework that count towards both the BS and MS degrees.

Students may register for 3-6 credits of the following CS 500-level courses in place of the corresponding CS 400-level courses required for the BS degree. Specifically, students must take:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>CS 583</td>
<td>Analysis of Algorithms</td>
<td>3</td>
</tr>
<tr>
<td>Select one of the following:</td>
<td></td>
<td>3</td>
</tr>
<tr>
<td>CS 540</td>
<td>Language Processors</td>
<td></td>
</tr>
<tr>
<td>CS 550</td>
<td>Database Systems</td>
<td></td>
</tr>
<tr>
<td>CS 551</td>
<td>Computer Graphics</td>
<td></td>
</tr>
<tr>
<td>CS 555</td>
<td>Computer Communications and Networking</td>
<td></td>
</tr>
<tr>
<td>CS 571</td>
<td>Operating Systems</td>
<td></td>
</tr>
<tr>
<td>CS 580</td>
<td>Introduction to Artificial Intelligence</td>
<td></td>
</tr>
<tr>
<td>CS 584</td>
<td>Theory and Applications of Data Mining</td>
<td></td>
</tr>
<tr>
<td>Total Credits</td>
<td>6</td>
<td></td>
</tr>
</tbody>
</table>

Note:

Students complete all Software Engineering, MS core courses and apply the two courses from the above list toward the elective requirements. Students also have the option to take up to 6 additional credits of graduate coursework, which serves as reserve graduate credit to be counted towards the MS degree only.

Degree Conferral

Students must apply the semester before they expect to complete the BS requirements to have the BS degree conferred. In addition, at the beginning of the student’s final undergraduate semester, students must complete a Bachelor’s/Accelerated Master’s Transition form that is submitted to the Office of the University Registrar and the VSE Graduate Admissions Office. At the completion of MS requirements, a master’s degree is conferred.

Applied Computer Science, BS/Software Engineering, Accelerated MS

Overview

Highly-qualified students in the Applied Computer Science, BS have the option of obtaining an accelerated Software Engineering, MS. See AP.6.7 Bachelor’s/Accelerated Master’s Degrees.

Students in an accelerated degree program must fulfill all university requirements for the master’s degree. For policies governing all graduate degrees, see AP.6 Graduate Policies.

Computer Science, BS/Software Engineering, Accelerated MS

Overview

Highly-qualified students in the Computer Science, BS have the option of obtaining an accelerated Software Engineering, MS.
For more detailed information, see AP.6.7 Bachelor's/Accelerated Master's Degrees. For policies governing all graduate degrees, see AP.6 Graduate Policies.

**Admission Requirements**

Students in the Computer Science, BS program may apply to this option if they have earned 90 undergraduate credits with an overall GPA of at least 3.30. Students must have successfully completed CS 310 Data Structures, CS 330 Formal Methods and Models and CS 367 Computer Systems and Programming.

**Accelerated Option Requirements**

Students have the opportunity to earn 3-6 credits in graduate coursework that count towards both the BS and MS degrees. Students may register for 3-6 credits of the following CS 500-level courses in place of the corresponding CS 400-level courses required for the BS degree.

<table>
<thead>
<tr>
<th>Code</th>

</tr>
<tr>
<td>CS 584</td>
<td>Theory and Applications of Data Mining</td>
<td>3</td>
</tr>
</tbody>
</table>

Note:

Students complete all MS in Software Engineering core courses and apply the two courses from the above list toward elective requirements. Students also have the option to take up to 6 additional credits of graduate coursework, which serve as reserve graduate credit to be counted towards the MS degree only.

**Degree Conferral**

Students must apply the semester before they expect to complete the BS requirements to have the BS degree conferred. In addition, at the beginning of the student's final undergraduate semester, students must complete a Bachelor's/Accelerated Master's Transition form that is submitted to the Office of the University Registrar and the VSE Graduate Admissions Office. At the completion of MS requirements, a master's degree is conferred.

**Information Technology, BS/Software Engineering, Accelerated MS**

**Overview**

Highly-qualified students in the Information Technology, BS have the option of obtaining an accelerated Software Engineering, MS.

For more detailed information, see AP.6.7 Bachelor's/Accelerated Master's Degrees. For policies governing all graduate degrees, see AP.6 Graduate Policies.

**Admission Requirements**

Students in the Information Technology, BS program may apply to this option if they have earned 90 undergraduate credits with an overall GPA of at least 3.30. Criteria for admission are identical to criteria for admission to the Software Engineering, MS Program.

**Accelerated Option Requirements**

Students must complete all credits that satisfy requirements for the BS and MS programs, with up to 6 overlapping credits chosen from the following two courses:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>CS 550</td>
<td>Database Systems (satisfies IT 414 requirement in the BS program)</td>
<td>3</td>
</tr>
<tr>
<td>SWE 619</td>
<td>Object-Oriented Software Specification and Construction (satisfies as one DTP concentration course in the BS program)</td>
<td>3</td>
</tr>
</tbody>
</table>

Note:

Students must complete MATH 125 Discrete Mathematics I (Mason Core) as their discrete math requirement and IT 306 Data Structures and Algorithms in Java as part of their concentration requirements in the BS program.

**Degree Conferral**

Students must apply the semester before they expect to complete the BS requirements to have the BS degree conferred. In addition, at the beginning of the student’s final undergraduate semester, students must complete a Bachelor’s/Accelerated Master’s Transition form that is submitted to the Office of the University Registrar and the VSE Graduate Admissions Office. At the completion of MS requirements, a master's degree is conferred.

**Department of Cyber Security Engineering**

Phone: 703-993-1636

Cyber Security Engineering is concerned with the development of cyber resilient systems which include the protection of the physical as well as computer and network systems. It requires a proactive approach in engineering design of physical systems with cyber security incorporated from the beginning of system development. Cyber security engineering is an important quantitative methodology to be used in all industries to include, but not limited to, transportation, energy, healthcare, infrastructure, finance, government (federal, state, and local), and defense. The Cyber Security Engineering Department is focused on academics and research for the cyber security engineering of integrated cyber-physical systems. The department prepares students with a foundation in cyber security engineering, and is most appropriate for students with a strong mathematics and science background.

This degree provides a foundation in cyber security engineering and is most appropriate for students with a strong mathematics and science background.

Admissions & Policies

Policies
For policies governing all undergraduate degrees, see AP.5 Undergraduate Policies.

Advising and Plan of Study
All cyber security engineering students are assigned a faculty advisor. With the advisor’s help and approval, each student is required to complete a plan of study, which constitutes a learning plan for the degree program. The plan of study must be signed by the student’s advisor and the Program Chair and be updated and signed by the advisor at least once a year.

Change of Major
See Change of Major for more information.

</table>

Total Credits 18

### Note:
All students must submit at least 24 credits of social science and humanities coursework, which is normally satisfied by the 24 credits of Mason Core social science and humanities courses listed above and with the oral communication and economics requirement.

### 4-Year Plan

**Bachelor of Science in Cyber Security Engineering Sample Plan of Study**

Detailed four year plans and degree planning checklists can be found at https://advising.gmu.edu/current-student/majors-at-mason/.

### Accelerated Master's

**Cyber Security Engineering, BS/Computer Engineering, Accelerated MS**

**Overview**

The university offers highly-qualified students in the Cyber Security Engineering, BS the option of obtaining an accelerated Computer Engineering, MS.

For more detailed information, see AP.6.7 Bachelor's/Accelerated Master's Degrees (https://catalog.gmu.edu/policies/academic/graduate-policies/#ap-6-7). For policies governing all graduate degrees, see AP.6
Graduate Policies (https://catalog.gmu.edu/policies/academic/graduate-policies/).

Admission Requirements

Students in the Cyber Security Engineering, BS program may apply for this option if they have earned 75 undergraduate credits with an overall GPA of at least 3.00. Criteria for admission are identical to criteria for admission to the Computer Engineering, MS program.

Accelerated Option Requirements

Students must complete all credits that satisfy the requirements for the BS and MS programs, with 6 credits overlapping.

Students take 6 credits of 500-level ECE or CS courses as part of their technical electives or substitutes for required courses in the Cyber Security Engineering, BS program.

Specifically, students are encouraged to take two of the following courses:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>CS 571</td>
<td>Operating Systems</td>
<td>3</td>
</tr>
<tr>
<td>ECE 505</td>
<td>Hardware Security</td>
<td>3</td>
</tr>
<tr>
<td>ECE 508</td>
<td>Internet of Things</td>
<td>3</td>
</tr>
<tr>
<td>ECE 511</td>
<td>Computer Architecture</td>
<td>3</td>
</tr>
<tr>
<td>ECE 542</td>
<td>Computer Network Architectures and Protocols</td>
<td>3</td>
</tr>
</tbody>
</table>

Degree Conferral

Students must apply the semester before they expect to complete the BS requirements to have the BS degree conferred. In addition, at the beginning of the student’s final undergraduate semester, students must complete a Bachelor’s/Accelerated Master’s Transition form that is submitted to the Office of the University Registrar and the VSE Graduate Admissions Office. At the completion of MS requirements, a master’s degree is conferred.

Cyber Security Engineering, BS/Digital Forensics, Accelerated MS

Overview

Highly-qualified students in the Cyber Security Engineering, BS have the option of obtaining an accelerated Digital Forensics, MS.

For more detailed information, see AP.6.7 Bachelor’s/Accelerated Master’s Degrees. For policies governing all graduate degrees, see AP 6 Graduate Policies.

Admission Requirements

Students in the Cyber Security Engineering, BS program may apply for this option if they have earned 90 undergraduate credits with an overall GPA of at least 3.25. Criteria for admission are identical to criteria for admission to the Digital Forensics, MS program.

Accelerated Option Requirements

Students must complete all credits that satisfy requirements for the BS and MS programs, with 6 credits overlapping.

Students register for two Digital Forensics core courses (6 credits) in place of two of the three required technical electives, as part of the undergraduate degree requirements. Specifically, students must take:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>CFRS 500</td>
<td>Introduction to Forensic Technology and Analysis</td>
<td>3</td>
</tr>
<tr>
<td>and one of the following:</td>
<td></td>
<td></td>
</tr>
<tr>
<td>CFRS 510</td>
<td>Digital Forensics Analysis (satisfies the IT 357 requirement for the INFS concentration in the BS program)</td>
<td>3</td>
</tr>
<tr>
<td>CFRS 660</td>
<td>Network Forensics (satisfies one NTEL concentration course in the BS program)</td>
<td>3</td>
</tr>
</tbody>
</table>

Total Credits 6

Note: Students complete all Digital Forensics, MS core courses and apply the two courses from the above list toward the Digital Forensics, MS requirements.

Degree Conferral

Students must apply the semester before they expect to complete the BS requirements to have the BS degree conferred. In addition, at the beginning of the student’s final undergraduate semester, students must complete a Bachelor’s/Accelerated Master’s Transition form that is submitted to the Office of the University Registrar and the VSE Graduate Admissions Office. At the completion of MS requirements, a master’s degree is conferred.

Cyber Security Engineering, BS/Operations Research, Accelerated MS

Overview

Highly-qualified students in the Cyber Security Engineering, BS have the option of obtaining an accelerated Operations Research, MS.

For more detailed information, see AP.6.7 Bachelor’s/Accelerated Master’s Degrees. For policies governing all graduate degrees, see AP 6 Graduate Policies.

Admission Requirements

Mason undergraduate students majoring in Cyber Security Engineering, BS may apply to this option if they have earned 90 undergraduate credits with an overall GPA of at least 3.30 and completed all MATH and PHYS requirements. Criteria for admission are identical to criteria for admission to the Operations Research, MS program.

Accelerated Options Requirement

Students must complete all credits that satisfy requirements for both the BS and MS programs. Up to two courses (6 credit hours) of approved master’s level courses taken as part of the undergraduate degree may be applied to the graduate degree. The courses selected for this purpose must be approved by the academic advisors of both the BS and MS programs and by the SEOR department chair. For the BS programs that allow undergraduate electives from the department of system engineering and operations research, the students may choose the graduate version of such electives to replace the corresponding undergraduate courses.

Degree Conferral

Students must apply the semester before they expect to complete the BS requirements to have the BS degree conferred. In addition, at the
starting the student’s final undergraduate semester, students must complete a Bachelor’s/Accelerated Master’s Transition form that is submitted to the Office of the University Registrar and the VSE Graduate Admissions Office. At the completion of MS requirements, a master’s degree is conferred.

Cyber Security Engineering, BS/Systems Engineering, Accelerated MS

Overview

Highly-qualified students in the Cyber Security Engineering, BS have the option of obtaining an accelerated Systems Engineering, MS.

For more detailed information, see AP6.7 Bachelor’s/Accelerated Master’s Degrees. For policies governing all graduate degrees, see AP6 Graduate Policies.

Admissions Requirements

Mason undergraduate students majoring in Cyber Security Engineering, BS may apply to this option if they have earned 90 undergraduate credits with an overall GPA of at least 3.30 and completed all MATH and PHYS requirements. Criteria for admission are identical to criteria for admission to the Systems Engineering, MS program.

Accelerated Options Requirement

Students must complete all credits that satisfy requirements for both the BS and MS programs. Up to two courses (6 credit hours) of approved master’s level courses taken as part of the undergraduate degree may be applied to the graduate degree. The courses selected for this purpose must be approved by the academic advisors of both the BS and MS programs and by the SEOR department chair. For the BS programs that allow undergraduate electives from the department of system engineering and operations research, the students may choose the graduate version of such electives to replace the corresponding undergraduate courses.

Degree Conferral

Students must apply the semester before they expect to complete the BS requirements to have the BS degree conferred. In addition, at the beginning of the student’s final undergraduate semester, students must complete a Bachelor’s/Accelerated Master’s Transition form that is submitted to the Office of the University Registrar and the VSE Graduate Admissions Office. At the completion of MS requirements, a master’s degree is conferred.

Cyber Security Engineering, MS (pending SCHEV approval)

Banner Code: VS-MS-CYSE

Note: as of catalog publication in April, the program described below has been approved by the Board of Visitors and sent to the State Council of Higher Education in Virginia for consideration as a new degree program. The university cannot accept applications or enroll students in this program until SCHEV approval has been granted.

The field of cyber security engineering is concerned with the development of cyber-resilient systems that include the protection of physical as well as computer and network systems. It requires a proactive approach in engineering the design of systems, with cybersecurity incorporated from the beginning of system development. The purpose of the MS in Cyber Security Engineering is to provide students with the currently rare combination of highly technical knowledge and skills, cyber security expertise, and a holistic systems engineering perspective. The program provides instruction on the design, planning, and management of systems and procedures for protecting critical physical and cyber infrastructure from external threats, including terrorism. The program provides students with the deep technical foundations of cyber security in the form of software, hardware, networking, and cryptography, as well as systems engineering tools and methods to design and secure complex cyber physical systems. Students learn homeland security policy, critical infrastructure policy, information security, matrix vulnerability assessment, threat assessment, physical security, personnel security, operational security, contingency planning, case analyses of specific industries and systems, redundancy planning, emergency and disaster planning, security systems, and intelligence operations. Graduates are prepared to design and implement secure complex and cyber-physical systems consisting of software, hardware, and networking components; respond to, investigate, and remediate incidents involving these systems; and develop offensive and defensive tools and techniques to attack and secure these systems.

Admissions & Policies

Note: as of catalog publication in April, the program described below has been approved by the Board of Visitors and sent to the State Council of Higher Education in Virginia for consideration as a new degree program. The university cannot accept applications or enroll students in this program until SCHEV approval has been granted.

Admissions

The MS in Cyber Security Engineering will build on the body of knowledge acquired in undergraduate programs of study in engineering, computer science, or closely related disciplines. As such, applicants will be expected to have a bachelor’s degree in engineering, computer science, or closely related disciplines and to have completed the engineering math sequence as well as courses in probability and statistics, and computer science. A minimum undergraduate GPA of 3.00 is required.

Policies

Students must complete a minimum of 30 graduate credits beyond the bachelor’s degree with a GPA of 3.00 or higher, with no more than 6 credit hours of C grades. The plan of study includes a 21 credit required Core component which includes a mandatory capstone course, and 9 credits of electives.

Requirements

Note: as of catalog publication in April, the program described below has been approved by the Board of Visitors and sent to the State Council of Higher Education in Virginia for consideration as a new degree program. The university cannot accept applications or enroll students in this program until SCHEV approval has been granted.

Advanced Networking Protocols for Telecommunications certificate program offers courses on Internet Routing and Network Security. This graduate certificate program is designed for those who are working in or planning to work in the telecommunication industry but do not want to complete requirements for a master’s degree in the field. The certificate may be pursued on a part-time or full-time basis. The certificate may also be pursued concurrently with any of the graduate degree programs in the Volgenau School of Engineering.

Admissions & Policies

Policies
This certificate may be pursued on a full-or part-time basis.

For all policies governing Graduate Certificates, please see AP.6.8 Requirements for Graduate Certificates.

Academic Advising

MSN 1G5
4400 University Drive
Fairfax, VA 22030

Phone: 703-993-1569
Email: ece@gmu.edu
Website: https://ece.gmu.edu/undergraduate-studies/bachelors-programs/bs-computer-engineering

The field of computer engineering can be described as an amalgam of hardware and software design. Computer engineers are involved in research, design, development, production, and operation of a wide variety of digital systems, from integrated circuits through microcontrollers, multi-core processors, FPGA-based accelerators, to big-data and cloud computing platforms. Reflecting the industry trend to integrate hardware and software development, the computer engineering program is built around computer-aided design tools that can simulate and assist in the design of new digital systems, such as those found in smartphones, tablets, robots, autonomous vehicles, drones, spacecraft, computer networks, smart factories, defense systems, and the internet-of-things. Advanced languages, such as VHDL and Python, and software tools, such as those used for FPGA- and ASIC-design and simulation, can be used to model hardware and software functionality from the system and architecture level down to the gate and transistor levels. Design, optimization, verification, and testing methodology involving these tools are taught in the program. Hands-on design experiences and simulation are emphasized throughout the curriculum through labs and projects integrated into various courses. The program culminates in a year-long senior design project effort which provides each student with the opportunity to apply concepts to designing, innovating and building a functional hardware system in a team environment.

The Department of Electrical and Computer Engineering is staffed by 30 full-time professors and several part-time professors.
The bachelor’s program in Computer Engineering is accredited by the Engineering Accreditation Commission of ABET, http://www.abet.org.

Career Opportunities
Career opportunities exist in engineering design and development such as hardware/software co-design and integration, embedded system programming, mobile system and application development, robot and drone design, and cloud and big data computing. Other opportunities include engineering management, consultancy, technical sales, and patent law. The program provides a strong preparation for graduate study.

Specializations
The curriculum provides a strong background in the fundamentals of computer engineering. A number of technical elective specializations are offered, ranging from primarily hardware-oriented to those that are more software-oriented. These include robotics, embedded systems, computer networks, internet of things, power and energy systems and hardware and system security. The curriculum includes 9 credits of senior technical electives, which may be used for specialization in one of these technical areas.

Additional Information
The requirements for the degree may be satisfied on a full-time or part-time basis. Cooperative education provides students the opportunity to integrate paid career-related work experience with classroom learning. Academic credit towards the completion of major requirements cannot be given for co-op experience. In addition to the usual financial aid available through the Office of Student Financial Aid, computer engineering majors are encouraged to apply for scholarships provided by various professional societies and industrial organizations in their field.

Admissions & Policies

Policies
For policies governing all undergraduate degrees, see AP.5 Undergraduate Policies.

Writing-Intensive Requirement
Mason’s writing-intensive requirement is satisfied by the following two courses: ECE 333 Linear Electronics I and ECE 491 Engineering Seminar in which faculty provide writing instruction and feedback on student technical writing assignments. Drafts and revisions are required.

Change of Major
See Change of Major for more information.

Double Major and Minor Programs for Computer Engineering and Electrical Engineering
Computer Engineering majors and Electrical Engineering majors can earn degrees with double majors in a number of disciplines. Computer Engineering and Computer Science may be combined. Electrical Engineering has been combined with Computer Engineering, Mechanical Engineering, Computer Science, Physics, or Math. Details are available in the department brochures or at the Volgenau School website (http://volgenau.gmu.edu). There are several minors available for students in the ECE Department including the Mechanical Engineering minor, Bioengineering minor and others as listed in the catalog.

Grade Requirements
All computer engineering students are strongly encouraged to see their major faculty advisor each semester before course registration.

Students must complete each ECE, ENGR, BENG, CS, MATH, PHYS and STAT course presented as part of the required 126 credits for the degree with a grade of C or better.

Students must also complete any course required by the program that is a prerequisite to another course applicable to the degree with a grade of C or better.

Termination from the Major
No math, science, or Volgenau School of Engineering course that is required for the major may be attempted more than three times. Those students who do not successfully complete such a course within three attempts will be terminated from the major. Undeclared students in the Volgenau School who do not successfully complete a course required for a Volgenau School major within three attempts will also be terminated.

In addition, students in the Volgenau School with evidence of continued failure to make adequate progress toward declaring or completing a Volgenau School major will be terminated from the school. Adequate progress is determined by the major program. For more information, see AP.5.2.4 Termination from the Major (https://catalog.gmu.edu/policies/academic/undergraduate-policies/#ap-5-2-4).

Once a student has attempted one of these courses twice unsuccessfully, the third attempt must be no later than the next semester of enrollment, excluding summers. Failure to take the course at that time will result in termination from the major. A third attempt of a Volgenau School of Engineering course requires support by the student’s major department as well as permission by the department offering the course. This permission is not guaranteed. If the student is unable to take the course when required, the student may request an extension to a future semester; extensions require approval of the student’s advisor, their department, and the Associate Dean for Undergraduate Programs. The deadline for extension requests is the add deadline for the semester in which the course is required.

Students who have been terminated from a Volgenau School of Engineering major may not register for a Volgenau School course without permission of the department offering the course. This applies to all undergraduate courses offered by the Volgenau School except IT 104 Introduction to Computing (Mason Core) and STAT 250 Introductory Statistics I (Mason Core).

A student may not declare any major in the Volgenau School of Engineering if the student has previously met the termination criteria for that major at any time, regardless of what the student’s major was at the time the courses were taken.

Technical Electives

Three technical electives totaling 9 credit hours must be selected from the list below. Some graduate courses listed below and courses outside the ECE department may be taken to fulfill the technical elective requirement with the permission of the department. The decision to approve non-ECE courses as technical electives is at the discretion of the department based on a review of the course content and the student’s academic record.

### Total Credits

13
Accelerated Master’s

BS (selected)/Statistical Science, Accelerated MS

Overview
Highly-qualified students in BS programs have the option of applying to the accelerated Statistical Science, MS program.

For more detailed information, see AP6.7 Bachelor’s/Accelerated Master’s Degrees. For policies governing all graduate degrees, see AP6 Graduate Policies.

Admission Requirements
No specific undergraduate BS degree is required. Students enrolled in any BS degree may apply to the accelerated Statistical Science, MS program if such an accelerated Statistical Science, MS pathway is allowable from the student’s BS program, which will be determined by the academic advisors of both the BS and MS programs; and if they have earned 90 undergraduate credits with an overall GPA of 3.00. Students must have successfully completed the following Mason courses each with a grade of C or better prior to admission to the accelerated program:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>MATH 213</td>
<td>Analytic Geometry and Calculus III</td>
<td>3</td>
</tr>
<tr>
<td>MATH 203</td>
<td>Linear Algebra</td>
<td>3</td>
</tr>
<tr>
<td>or MATH 321</td>
<td>Abstract Algebra</td>
<td></td>
</tr>
<tr>
<td>STAT 250</td>
<td>Introductory Statistics I (Mason Core)</td>
<td>3</td>
</tr>
<tr>
<td>or STAT 344</td>
<td>Probability and Statistics for Engineers and Scientists I</td>
<td></td>
</tr>
<tr>
<td>STAT 346</td>
<td>Probability for Engineers</td>
<td>3</td>
</tr>
<tr>
<td>or MATH 351</td>
<td>Probability</td>
<td></td>
</tr>
<tr>
<td>STAT 362</td>
<td>Introduction to Computer Statistical Packages</td>
<td>3</td>
</tr>
</tbody>
</table>

Accelerated Option Requirements
Students must complete all credits satisfying degree requirements for the BS and MS programs, with 6 credits overlap chosen from the following courses: STAT 515 Applied Statistics and Visualization for Analytics, STAT 544 Applied Probability, STAT 554 Applied Statistics I, STAT 560 Biostatistical Methods, and STAT 574 Survey Sampling I. The graduate courses selected for overlap must be approved by the academic advisors of both the BS and MS programs. All graduate course prerequisites must be completed prior to enrollment. Each graduate course must be completed with a grade of B or better to apply toward the MS degree.

While still in undergraduate status, a maximum of 6 additional graduate credits may be taken as reserve graduate credit and applied to the master’s program. Reserve graduate credits do not apply to the undergraduate degree.

Degree Conferral
Students must apply the semester before they expect to complete the BS requirements to have the BS degree conferred. In addition, at the beginning of the student’s final undergraduate semester, students must complete a Bachelor’s/Accelerated Master’s Transition form that is submitted to the Office of the University Registrar and Graduate
Computer Engineering, BS/Computer Engineering, Accelerated MS

Overview

The university offers highly-qualified students in the Computer Engineering, BS the option of obtaining an accelerated Computer Engineering, MS.

For more detailed information, see AP.6 Bachelor’s/Accelerated Master’s Degrees. For policies governing all graduate degrees, see AP6 Graduate Policies.

Admission Requirements

Students in the Computer Engineering, BS program may apply to this option if they have earned 75 undergraduate credits with an overall GPA of 3.00. Criteria for admission are identical to criteria for admission to the Computer Engineering, MS program.

Accelerated Option Requirements

Students must complete all credits that satisfy the requirements for the BS and MS programs, with 6 credits overlap.

Students take 6 credits of 500-level courses as part of their technical electives or substitutes for required courses as part of their 126-credit undergraduate program. The specific courses that may be taken and applied to the accelerated program will be specified by the ECE Department.

Students may take additional graduate-level courses as part of their BS technical electives with advisor approval. These additional graduate-level courses will not count toward the MS degree.

Degree Conferral

Students must apply the semester before they expect to complete the BS requirements to have the BS degree conferred. In addition, at the beginning of the student’s final undergraduate semester, students must complete a Bachelor’s/Accelerated Master’s Transition form that is submitted to the Office of the University Registrar and the VSE Graduate Admissions Office. At the completion of MS requirements, a master’s degree is conferred.

Computer Engineering, BS/Operations Research, Accelerated MS

Overview

Highly-qualified students in the Computer Engineering, BS have the option of obtaining an accelerated Operations Research, MS.

For more detailed information, see AP.6 Bachelor’s/Accelerated Master’s Degrees. For policies governing all graduate degrees, see AP6 Graduate Policies.

Admission Requirements

Mason undergraduate students majoring in Computer Engineering, BS may apply to this option if they have earned 90 undergraduate credits with an overall GPA of at least 3.30 and completed all MATH, PHYS 160/161, and PHYS 260/261 requirements. Criteria for admission are identical to criteria for admission to the Operations Research, MS program.

Students must additionally complete MATH 203 Linear Algebra prior to applying for the graduate program.

Accelerated Options Requirement

Students must complete all credits that satisfy requirements for both the BS and MS programs. Up to two courses (6 credits) of approved master’s level courses taken as part of the undergraduate degree may be applied to the graduate degree. At least one of the courses must be from Electrical and Computer Engineering department. The courses selected for this purpose must be approved by the academic advisors of both the BS and MS programs and by the SEOR department chair. For the BS programs that allow undergraduate electives from the department of system engineering and operations research, the students may chose the graduate version of such elective courses to replace the corresponding undergraduate courses.

Degree Conferral

Students must apply the semester before they expect to complete the BS requirements to have the BS degree conferred. In addition, at the beginning of the student’s final undergraduate semester, students must...
complete a Bachelor's/Accelerated Master’s Transition form that is submitted to the Office of the University Registrar and the VSE Graduate Admissions Office. At the completion of MS requirements, a master’s degree is conferred.

Computer Engineering, BS/Systems Engineering, Accelerated MS

Overview

Highly-qualified students in the Computer Engineering, BS have the option of obtaining an accelerated Systems Engineering, MS.

For more detailed information, see AP6.7 Bachelor’s/Accelerated Master’s Degrees. For policies governing all graduate degrees, see AP6 Graduate Policies.

Admission Requirements

Mason undergraduate students majoring in Computer Engineering, BS may apply to this option if they have earned 90 undergraduate credits with an overall GPA of at least 3.30 and completed all MATH, PHYS 160/161, and PHYS 260/261 requirements. Criteria for admission are identical to criteria for admission to the Systems Engineering, MS program.

Accelerated Options Requirement

Students must complete all credits that satisfy requirements for both the BS and MS programs. Up to two courses (6 credits) of approved master’s level courses taken as part of the undergraduate degree may be applied to the graduate degree. At least one of the courses must be from Electrical and Computer Engineering department. The courses selected for this purpose must be approved by the academic advisors of both the BS and MS programs and by the SEOR department chair. For the BS programs that allow undergraduate electives from the department of system engineering and operations research, the students may chose the graduate version of such elective courses to replace the corresponding undergraduate courses.

Degree Conferral

Students must apply the semester before they expect to complete the BS requirements to have the BS degree conferred. In addition, at the beginning of the student’s final undergraduate semester, students must complete a Bachelor’s/Accelerated Master’s Transition form that is submitted to the Office of the University Registrar and the VSE Graduate Admissions Office. At the completion of MS requirements, a master’s degree is conferred.

Email: ece@gmu.edu
Website: https://ece.gmu.edu/academics/graduate

Computer Engineering involves knowledge of hardware and software development. The students learn how to design new generations of computers, as well as embedded computing systems, such as those found in smartphones, cars, appliances, computer networks, smart factories, and the internet-of-things. The program covers the entire digital integrated circuit design process targeting Field Programmable Gate Arrays (FPGAs) and Application Specific Integrated Circuits (ASICs), using various optimization criteria, such as speed, cost, power, energy, reliability, and security. It also encompasses the complete software development process targeting microcontrollers, microprocessors, multicores, and Graphics Processing Units (GPUs). It teaches students how to efficiently partition the system into software and hardware components, and develop high-performance interfaces between these two parts. Project-oriented courses and labs expose students to modern computer-aided design tools for hardware and software design. The students master the art of writing comprehensive technical reports and giving successful oral presentations. The computer engineering program offers the following concentrations: computer architecture and embedded systems, computer networks, digital signal processing, digital system design, hardware security and cryptographic engineering, internet of things and network security, and space-based systems.

Admissions & Policies

Admissions Requirements

To be considered for admission to the degree, applicants should have a baccalaureate degree in computer engineering, electrical engineering, or a closely-related discipline from an accredited program and have earned a GPA of B or better during the last 60 credits. Other requirements are as follows:

• Two letters of recommendation, preferably from academic references or references in industry or government who hold advanced degrees and are familiar with the applicant's professional accomplishments
• Resume and detailed statement of career goals and aspirations
• For students who have not earned a bachelor’s degree from a U.S. university, satisfactory performance on the GRE
• For applicants who have not earned an academic degree in an English-speaking country (as defined here), a satisfactory score on any of the English proficiency examinations accepted by Mason, namely, TOEFL, IELTS, or PTE. Satisfactory scores are specific to Volgenau School of Engineering and are listed here (https://catalog.gmu.edu/admissions/international-students/#text).

Students with BS or MS degrees in ECE-related disciplines (for example, computer science, cyber security engineering, mathematics, mechanical engineering, or physics) are encouraged to apply for admission. Domestic students may be admitted provisionally and required to satisfy provisional requirements before taking advanced coursework. Such students may also be advised to take some courses from the undergraduate electrical or computer engineering curriculum, according to their intended concentration and specific backgrounds.

Policies

Student Advising

Students can select a concentration from those available in the MS degree program at the time of application to the program or later during their studies. In the former case, students are assigned an academic advisor from the selected concentration at the time of admission. In the
latter case, students can petition for a change of an academic advisor to match their concentration choice.

Plan of Study
Before completing 6 credit hours of coursework, each student must submit to the department a plan of study that has been approved by the academic advisor. This plan should be kept up to date by regular consultation with the academic advisor. A final, signed version of the plan must be turned in when the student submits a graduation application.

Requirements

Degree Requirements

Total credits: 30

Students must complete a minimum of 30 graduate credits beyond the bachelor’s degree. The plan of study for the degree must fulfill the following requirements:

Concentration Requirement

Accomplished by choosing one of the concentrations, and then meeting course requirements for this concentration with the grade B or better in each course. For each concentration, related ECE 590 Selected Topics in Engineering courses can be used in addition to all explicitly listed 500-level courses, and related ECE 699 Advanced Topics in Electrical and Computer Engineering courses can be used in addition to all explicitly listed 600 level or above courses, subject to approval by the student’s academic advisor. With assistance from their advisors, students may petition the graduate program coordinator to approve a specialization area of their own design, not fulfilling the requirements of any concentration.

Available Concentrations

- Concentration in Computer Architecture and Embedded Systems (CAES)
- Concentration in Computer Networks (CNWK)
- Concentration in Digital Signal Processing (DISP)
- Concentration in Digital System Design (DSYD)
- Concentration in Hardware Security and Cryptographic Engineering (HSCE)
- Concentration in Internet of Things and Network Security (INNS)
- Concentration in Space-Based Systems (SBSY)

</tbody>
</table>
GPA Requirements
A maximum of 6 credits of courses with grades of C or B- may be applied toward the degree. The student must present a GPA of at least 3.00 for all courses submitted for degree conferral.

Seminar Requirement
Graduate students are expected to participate actively in the exchange of knowledge and ideas in their discipline. Towards this objective, all degree candidates must attend a minimum of 6 graduate seminars approved for the degree program. Approved seminars are publicized on the departmental webpage.

To demonstrate completion of the seminar requirement, students must register for ECE 795 Engineering Seminar in their final semester. The department office will verify that the seminar requirement has been met and submit a grade of S (satisfactory) upon completion of the requirement. Students who have not met the seminar requirement in their final semester must continue to register for ECE 795 Engineering Seminar in subsequent semesters until the requirement is met.

Thesis/Scholarly Paper Option
To complete the program, students may select one of the following options:

Thesis Option
Students who select this option must complete:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>ECE 799</td>
<td>Master's Thesis</td>
<td>6</td>
</tr>
<tr>
<td>Coursework</td>
<td></td>
<td>24</td>
</tr>
<tr>
<td>Total Credits</td>
<td></td>
<td>30</td>
</tr>
</tbody>
</table>

The thesis is particularly recommended for those students who wish to develop and document their research skills or contemplate subsequent enrollment in a PhD program. The thesis involves a research effort, which is conducted under the guidance of a faculty advisor. Choosing the thesis option requires approval of a full-time faculty member willing to serve as a thesis advisor. The topic and scope of the thesis must be approved by the thesis advisor. In some cases, permission may be granted to complete a portion of the work at the student’s place of employment. The final written thesis and oral defense are approved by the student’s advisory committee.

This committee consists of at least three full-time faculty members, including two affiliated with the MS in Computer Engineering Program, one of whom must be from the ECE Department. Thesis students may not register for ECE 798 Research Project. Students must register for at least 3 credits of ECE 799 Master’s Thesis for their first thesis semester. Following their first thesis semester, they must register for at least 1 credit of ECE 799 Master’s Thesis each fall and spring semester until graduation.

Scholarly Paper Option
Students who select to complete their degree program with a scholarly paper must:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>Complete 30 credits of coursework</td>
<td>30</td>
<td></td>
</tr>
<tr>
<td>ECE 797</td>
<td>Scholarly Paper</td>
<td>0</td>
</tr>
</tbody>
</table>

Enroll in a 600-level or above course requiring a research project.
Write a Scholarly Paper project report and present findings as part of the course requirements

Total Credits 30

An acceptable scholarly paper must be technically sound, adhere to accepted formatting standards for technical reports, and contain a significant literature review evidenced by a comprehensive list of cited references.

A list of courses requiring projects that can be used to satisfy the scholarly paper requirement will be published on the department website. Scholarly papers must be individual written project reports – not group projects. To qualify as a scholarly paper, an oral presentation of the project is required. A passing grade for the project, reflecting both the written report and the oral presentation, satisfies the scholarly paper requirement.

A successful scholarly paper will be recorded by awarding a satisfactory (S) grade for ECE 797 Scholarly Paper. Students are eligible to attempt the scholarly paper and register for ECE 797 Scholarly Paper after completion of 18 hours of coursework. Students choosing the scholarly paper option are not eligible for graduation until they have received a final, passing grade for ECE 797 Scholarly Paper.

### Accelerated Master's

#### Computer Engineering, BS/Computer Engineering, Accelerated MS

**Overview**

The university offers highly-qualified students in the Computer Engineering, BS the option of obtaining an accelerated Computer Engineering, MS.

For more detailed information, see AP 6.7 Bachelor’s/Accelerated Master’s Degrees. For policies governing all graduate degrees, see AP 6 Graduate Policies.

**Admission Requirements**

Students in the Computer Engineering, BS program may apply for this option if they have earned 75 undergraduate credits with an overall GPA of at least 3.00. Criteria for admission are identical to criteria for admission to the Computer Engineering, MS program.

**Accelerated Option Requirements**

Students must complete all credits that satisfy the requirements for the BS and MS programs, with 6 credits overlapping.

Students take 6 credits of 500-level ECE or CS courses as part of their technical electives or substitutes for required courses in the Computer Science, BS program. Specifically, students are encouraged to take two of the following courses:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>CS 571</td>
<td>Operating Systems</td>
<td>3</td>
</tr>
<tr>
<td>ECE 508</td>
<td>Internet of Things</td>
<td>3</td>
</tr>
<tr>
<td>ECE 511</td>
<td>Computer Architecture</td>
<td>3</td>
</tr>
<tr>

<td>3</td>
</tr>
<tr>
<td>ECE 542</td>
<td>Computer Network Architectures</td>
<td>3</td>
</tr>
<tr>
<td></td>
<td>and Protocols</td>
<td></td>
</tr>
</tbody>
</table>

1. CS 471 and CS 571 should not be simultaneously used to fulfill the requirements of the Computer Science, BS program.

**Degree Conferral**

Students must apply the semester before they expect to complete the BS requirements to have the BS degree conferred. In addition, at the beginning of the student’s final undergraduate semester, students must complete a Bachelor’s/Accelerated Master’s Transition form that is submitted to the Office of the University Registrar and the VSE Graduate Admissions Office. At the completion of MS requirements, a master’s degree is conferred.

#### Computer Science, BS/Computer Engineering, Accelerated MS

Cyber Security Engineering, BS/Computer Engineering, Accelerated MS

Overview
The university offers highly-qualified students in the Cyber Security Engineering, BS the option of obtaining an accelerated Computer Engineering, MS.

For more detailed information, see AP6.7 Bachelor’s/Accelerated Master’s Degrees (https://catalog.gmu.edu/policies/academic/graduate-policies/#ap6-7). For policies governing all graduate degrees, see AP6 Graduate Policies (https://catalog.gmu.edu/policies/academic/graduate-policies/).

Admission Requirements
Students in the Cyber Security Engineering, BS program may apply for this option if they have earned 75 undergraduate credits with an overall GPA of at least 3.00. Criteria for admission are identical to criteria for admission to the Computer Engineering, MS program.

Accelerated Option Requirements
Students must complete all credits that satisfy the requirements for the BS and MS programs, with 6 credits overlapping.

Students take 6 credits of 500-level ECE or CS courses as part of their technical electives or substitutes for required courses in the Cyber Security Engineering, BS program.

Specifically, students are encouraged to take two of the following courses:

<table>

</tbody>
</table>

Degree Conferral
Students must apply the semester before they expect to complete the BS requirements to have the BS degree conferred. In addition, at the beginning of the student’s final undergraduate semester, students must complete a Bachelor’s/Accelerated Master’s Transition form that is submitted to the Office of the University Registrar and the VSE Graduate Admissions Office. At the completion of MS requirements, a master’s degree is conferred.

Electrical Engineering, BS/Computer Engineering, Accelerated MS

Overview
Highly-qualified students in the Electrical Engineering, BS have the option of obtaining an accelerated Computer Engineering, MS.

For more detailed information, see AP6.7 Bachelor’s/Accelerated Master’s Degrees. For policies governing all graduate degrees, see AP6 Graduate Policies.

Admission Requirements
Students in the Electrical Engineering, BS program may apply to this option if they have earned 75 undergraduate credits with an overall GPA of 3.00. Criteria for admission are identical to criteria for admission to the Computer Engineering, MS program.

Accelerated Option Requirements
Students must complete all credits that satisfy the requirements for the BS and MS programs, with 6 credits overlap.

Students take 6 credits of 500-level courses as part of their technical electives or substitutes for required courses as part of their 121-credit undergraduate program. The specific courses that may be taken and applied to the accelerated program will be specified by the ECE Department.

Students may take additional graduate-level courses as part of their BS technical electives with advisor approval. These additional graduate-level courses will not count toward the MS degree.

Degree Conferral
Students must apply the semester before they expect to complete the BS requirements to have the BS degree conferred. In addition, at the beginning of the student’s final undergraduate semester, students must complete a Bachelor’s/Accelerated Master’s Transition form that is submitted to the Office of the University Registrar and the VSE Graduate Admissions Office. At the completion of MS requirements, a master’s degree is conferred.

Digital Forensics, MS

Banner Code: VS-MS-DFOR
3100 Nguyen Engineering Building
MS 1G5
Phone: (703) 993-1569
Email: ece@gmu.edu

Digital forensics is a discipline addressing the collection, processing, and analysis of digital data for the purpose of verifying/validating the existence of an event of investigative, intelligence, cyber, or business interest. The data can be from physical media, a mobile device, real-time network traffic, the Internet of Things (IoT), unknown code, memory, and many other sources. Digital forensics is interdisciplinary by nature and our program includes computer engineering, computer science, information technology, law, and ethics. Digital forensics is a key component in criminal, corporate, civil, cyber defense, incident response, intelligence, and counter-terrorism matters. In the last several years, with a proliferation of digital storage, transmission, and processing of sensitive information, there has been an increase in the aberrant use of digital devices. This aberrant behavior includes but is not limited to: digital extortion, intrusions, economic espionage, child exploitation, cybercrime, fraud, terrorism, and identity theft. In response to this, digital forensics has become an important profession serving both public and private sectors. The MS in Digital Forensics will prepare graduates for a wide variety of careers to include law enforcement, various other branches of government, incident response, and all facets of cyber security by combining academic education with real world practical techniques and by offering advanced training in analyzing digital evidence, intrusion forensics, reverse engineering, network analysis, and legal and ethical matters.
Admissions

Students who hold a bachelor’s degree from an accredited college or university in engineering, math, science, computer science, business (with a quantitative background), economics, or other analytical disciplines, or students who have equivalent work experience indicating analytical aptitude, may apply. Depending on their background, some domestic applicants may be accepted provisionally and required to complete 3 to 12 credits of preliminary coursework before they are allowed to enroll in any of the core or specialty courses in the program. A minimum undergraduate GPA of 3.00 is required for acceptance.

Requirements

(formerly VS-MS-CFRS)
Degree Requirements

Total credits: 30

Students must complete a minimum of 30 graduate credits beyond the bachelor’s degree with a GPA of 3.00 or higher, with no more than 6 credit hours of C grades. The plan of study includes a 21-credit required core component which includes a mandatory capstone course, and the choice of either a concentration or a 9-credit elective component as shown below.

Core Courses

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>CFRS 510</td>
<td>Digital Forensics Analysis</td>
<td>3</td>
</tr>
<tr>

<td></td>
<td>9</td>
</tr>
</tbody>
</table>

¹ Both CFRS 760 Legal and Ethical Issues in IT and CFRS 770 Fraud and Forensics in Accounting may be taken, but only one may be used in the core component.
Other courses may be appropriate as electives in the degree program, but they must be approved prior to registration.

## Accelerated Master's

### Applied Science, BAS Cyber Security Concentration/Digital Forensics, Accelerated MS

#### Overview

Highly-qualified students in the Applied Science, BAS, Cyber Security Concentration have the option of obtaining an accelerated Digital Forensics, MS.

For more detailed information, see AP.6.7 Bachelor's/Accelerated Master's Degrees. For policies governing all graduate degrees, see AP.6 Graduate Policies.

#### Admission Requirements

Students in the Applied Science, BAS, Cyber Security Concentration (https://catalog.gmu.edu/colleges-schools/interdisciplinary-programs-courses/applied-science-bas/#cybs) program may apply for this option if they have earned 90 undergraduate credits with an overall GPA of at least 3.25. Criteria for admission are identical to criteria for admission to the Digital Forensics, MS program.

#### Accelerated Option Requirements

Students must complete all credits that satisfy requirements for the BAS and MS programs, with 6 credits overlapping with two of the following four courses:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>CFRS 510</td>
<td>Digital Forensics Analysis</td>
<td>3</td>
</tr>
<tr>
<td>CFRS 660</td>
<td>Network Forensics</td>
<td>3</td>
</tr>
<tr>
<td>CFRS 661</td>
<td>Digital Media Forensics</td>
<td>3</td>
</tr>
<tr>
<td>CFRS 664</td>
<td>Incident Response Forensics</td>
<td>3</td>
</tr>
</tbody>
</table>

#### Degree Conferral

Students must apply the semester before they expect to complete the BAS requirements to have the BAS degree conferred. In addition, at the beginning of the student's final undergraduate semester, students must complete a Bachelor's/Accelerated Master's Transition form that is submitted to the Office of the University Registrar and the VSE Graduate Admissions Office. At the completion of MS requirements, a master's degree is conferred.

### Cyber Security Engineering, BS/Digital Forensics, Accelerated MS

#### Overview

Highly-qualified students in the Cyber Security Engineering, BS have the option of obtaining an accelerated Digital Forensics, MS.

For more detailed information, see AP.6.7 Bachelor's/Accelerated Master's Degrees. For policies governing all graduate degrees, see AP.6 Graduate Policies.

#### Admission Requirements

Students in the Cyber Security Engineering, BS program may apply for this option if they have earned 90 undergraduate credits with an overall GPA of at least 3.25. Criteria for admission are identical to criteria for admission to the Digital Forensics, MS program.

#### Accelerated Option Requirements

Students must complete all credits that satisfy requirements for the BS and MS programs, with 6 credits overlapping.

Students register for two Digital Forensics core courses (6 credits) in place of two of the three required technical electives, as part of the undergraduate degree requirements. Specifically, students must take:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>CFRS 500</td>
<td>Introduction to Forensic Technology and Analysis</td>
<td>3</td>
</tr>
<tr>
<td>CFRS 510</td>
<td>Digital Forensics Analysis (satisfies the IT 357 requirement for the INFS concentration in the BS program)</td>
<td>3</td>
</tr>
<tr>
<td>CFRS 660</td>
<td>Network Forensics (satisfies one NTEL concentration course in the BS program)</td>
<td>3</td>
</tr>
</tbody>
</table>

#### Note

Students complete all Digital Forensics, MS core courses and apply the two courses from the above list toward the Digital Forensics, MS requirements.

#### Degree Conferral

Students must apply the semester before they expect to complete the BS requirements to have the BS degree conferred. In addition, at the beginning of the student's final undergraduate semester, students must complete a Bachelor's/Accelerated Master's Transition form that is submitted to the Office of the University Registrar and the VSE Graduate Admissions Office. At the completion of MS requirements, a master's degree is conferred.

### Information Technology, BS/Digital Forensics, Accelerated MS

#### Overview

Highly-qualified students in the Information Technology, BS have the option of obtaining an accelerated Digital Forensics, MS.

For more detailed information, see AP.6.7 Bachelor's/Accelerated Master's Degrees. For policies governing all graduate degrees, see AP.6 Graduate Policies.

#### Admission Requirements

Students in the Information Technology, BS program may apply for this option if they have earned 90 undergraduate credits with an overall GPA of at least 3.25. Criteria for admission are identical to criteria for admission to the Digital Forensics, MS program.

#### Accelerated Option Requirements

Students must complete all credits that satisfy requirements for the BS and MS programs, with 6 credits overlapping with two of the following three courses:
Degree Conferral
Students must apply the semester before they expect to complete the BS requirements to have the BS degree conferred. In addition, at the beginning of the student’s final undergraduate semester, students must complete a Bachelor’s/Accelerated Master’s Transition form that is submitted to the Office of the University Registrar and the VSE Graduate Admissions Office. At the completion of MS requirements, a master’s degree is conferred.

Electrical and Computer Engineering Minor

Banner Code: ECE
Phone: 703-993-1569
Email: ece@gmu.edu
Website: ece.gmu.edu

Electrical and computer engineering has transformed every single facet of our lives. The minor in electrical and computer engineering (ECE) is a broad program designed to provide non-ECE students with the foundational knowledge to build and analyze analog and digital circuits as well as signals and systems that form the foundations of any electrical device ranging from smart phones to satellites. These foundation courses enable students to then take on higher-level coursework as part of the minor electives, providing them with a deeper understanding and hands-on opportunity to build a diverse range of hardware systems.

The ECE minor is open to any student (except those pursuing the Electrical Engineering, BS or the Computer Engineering, BS degrees) and is especially conducive to those students with a strong mathematics and science background, such as a major in another engineering or science field as well as those pursuing a bachelor’s in computer science. By combining knowledge from their major, students can use the basics and hands-on experiences gained from the ECE minor to design, engineer, build and innovate practical systems to solve real-world problems.

Admissions & Policies

Policies
Eight credits of coursework must be unique to the minor. For policies governing all minors, see AP.5.3.4 Minors.

Requirements

Minor Requirements
Total credits: 18-21

Required Courses

</tbody>
</table>

Degree Conferral
Students must apply the semester before they expect to complete the BS requirements to have the BS degree conferred. In addition, at the beginning of the student’s final undergraduate semester, students must complete a Bachelor’s/Accelerated Master’s Transition form that is submitted to the Office of the University Registrar and the VSE Graduate Admissions Office. At the completion of MS requirements, a master’s degree is conferred.

Electrical and Computer Engineering, PhD

Banner Code: VS-PHD-ECE

Academic Advising

MSN 1G5
Admissions & Policies

Admissions

All general Mason and specific Volgenau School admission requirements apply. Applicants must submit official transcripts, a resume, a goals statement, three letters of recommendation and official GRE General Test results. The GRE requirement is waived for Mason ECE master’s graduates with a 3.0 or greater GPA. Applicants whose native language is not English must demonstrate proficiency by taking the TOEFL or IELTS exam. The minimum score required for admission is 575 on the TOEFL paper-based exam, 230 on the TOEFL computer-based exam, 88 on the TOEFL internet-based exam (with a minimum of 20 in each section), or 6.5 on the IELTS exam. Application materials are reviewed by the ECE PhD committee, which makes a recommendation to the ECE department chair.

Policies

Reduction of Credit

Students must complete a minimum of 72 graduate credits, which may be reduced by a maximum of 30 credits from a completed master’s degree. Reduction of credit requires the approval of the program director or designee and the dean or designee of the school. They determine whether the credits are eligible for reduction of credit and applicable to the degree program and the number of credits to be reduced.

Program Requirements

The 72 hours of required doctoral-level credits typically consist of 48 credits of regular coursework and 24 credits of dissertation research. More than half of the 72 credits applied to the doctoral degree must be earned at Mason. The degree plan outlined in Degree Requirements is based on a student who receives a full 30 credit reduction. Students who do not receive a full credit reduction should choose additional credits in consultation with their advisor.

Requirements

Degree Requirements

Total credits: 72

Doctoral Coursework

Courses that constitute a student’s plan of study will be chosen in consultation with the student’s advisor and/or dissertation committee, to include:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>Select 18-30 credits</td>
<td>18-30</td>
<td></td>
</tr>
</tbody>
</table>

- 3 credits at the 600-level outside the department in a subject considered foundational for the area of emphasis.
- Typical examples are advanced mathematics or statistics courses for those pursuing an emphasis in communications, signal processing or control, physics courses for those desiring an emphasis in micro/nano-electronics, computer science courses for those pursuing the computer engineering emphasis, and biology courses for those pursuing a bioengineering emphasis. Because such courses are usually not taken for master's degrees, this requirement can rarely be satisfied with a course taken previously.
- 6 credits within the department but outside the area of emphasis. This requirement may be satisfied with courses taken during previous studies, subject to approval.
- A maximum of 6 credits may be at the 500-level
- A maximum of 6 credits of individualized reading courses at any level. Note that ECE 798 Research Project is primarily a master’s level course and is not intended to be part of the PhD coursework.

1 For courses taken elsewhere, the equivalent levels are to be determined by the PhD advisor, subject to approval by the ECE Department chair.

Qualifying Exams

The ECE PhD Qualifying Exam tests students’ knowledge of fundamental concepts and assesses their basic research skills. The exam consists of two parts: an in-class written technical qualifying exam and a research qualifying exam (RQE).

Technical Qualifying Exam

The Technical Qualifying Exam (TQE) that tests knowledge of fundamental concepts in a particular technical area. Students select one of four areas for their TQE:

1. Control Theory
2. Digital Design and Computer Organization
3. Electronics and Circuits
4. Signals and Systems

The TQE is offered once a year in January before the start of the Spring semester. Students entering the program with a BS or an MS are required to take the TQE the first time it is offered after they have entered the program. A student who fails the exam will have a second and final chance to pass the exam in the following year. A student who obtains a marginal passing grade in the first attempt of the TQE will be required to take an oral exam in the same area within the subsequent four weeks. The oral exam will be administered by two ECE faculty members. A student who passes the oral exam will satisfy the TQE requirement. A student who demonstrates marginal performance in the oral exam will be required to take the written exam for the second and final time when it is offered in the following year. A student who fails the oral exam will be
dismissed from the program. A student who fails the written TQE twice will be dismissed from the program.

Outstanding students may be exempt from the TQE if they obtain at least an A in two designated courses taken within the twelve months proceeding the first attempt at the TQE, or within the twelve months after the student has failed the TQE in the first attempt. The designated courses are as follows: Area A - ECE 521 Linear Systems and Control and ECE 528 Introduction to Random Processes in Electrical and Computer Engineering; Area B - ECE 545 Digital System Design with VHDL or ECE 590 Selected Topics in Engineering and ECE 511 Computer Architecture; Area C - Any two of ECE 584 Semiconductor Device Fundamentals, ECE 586 Digital Integrated Circuits, ECE 587 Design of Analog Integrated Circuits or ECE 684 MOS Device Electronics; Area D - ECE 521 Linear Systems and Control or ECE 535 Digital Signal Processing and ECE 528 Introduction to Random Processes in Electrical and Computer Engineering.

Research Qualifying Exam
The purpose of the Research Qualifying Exam (RQE) is to assess whether students can define a research problem, critically review the literature related to the problem, apply appropriate research methods to study the problem, and interpret and communicate their results. The RQE requires students to complete a short research project and to document their results in a written report and an oral presentation. The RQE topic is defined by a faculty advisor in consultation with the student. A committee of three faculty members (the advisor plus two additional members) evaluates the written report and the oral presentation. During the presentation the student is expected to answer questions about their project and fundamental concepts related to the research.

Students who enter the program with an MS degree are encouraged to start working on their RQE as soon as they enter the PhD program and no later than the start of their second semester in the program regardless of their performance on the TQE. These students are required to present their paper in the RQE exam no later than the end of their second semester in the program. Students who enter the program with a BS degree are required to take the exam prior to completing 30 credits in the program regardless of their performance on the TQE.

Evaluation
The written research paper and the presentation will be evaluated using the following four criteria. Students must receive at least a “competent” raking (three on a scale of one to five) on each of the following four evaluation criteria to pass the RQE:

- Ability to articulate the research problem and its significance.
- Ability to critically review the literature.
- Understanding of research methods.
- Ability to communicate and interpret research results.

After a student has passed the TQE and has taken the RQE, the ECE PhD Committee reviews the exam results, the student’s transcript, and a letter of recommendation from the student’s advisor. Based on this information, the PhD Committee determines whether the student is qualified for the PhD program. A qualified student will proceed to choose a thesis advisor.

Dissertation Research
A maximum of 24 credits of ECE 998 Doctoral Dissertation Proposal and ECE 999 Doctoral Dissertation may be applied to the degree. Students who choose to take fewer than 24 credits of ECE 998 Doctoral Dissertation Proposal and ECE 999 Doctoral Dissertation may earn the remaining credits from approved coursework. Students cannot enroll in ECE 999 Doctoral Dissertation before they have advanced to candidacy. Students advanced to candidacy after the add period for a given semester must wait until the following semester to register for ECE 999 Doctoral Dissertation. Students cannot advance to candidacy and defend their dissertation during the same semester. Once enrolled in ECE 999 Doctoral Dissertation, students must maintain continuous registration in ECE 999 Doctoral Dissertation each semester until graduation, excluding summers. Students who defend in the summer must be registered for at least 1 credit of ECE 999 Doctoral Dissertation during that summer term.

Total Credits 12-24

Advisor, Dissertation Director, and Dissertation Committee
The process of finding a dissertation topic and dissertation director is governed by the university's policies, as described in the Requirements for Doctoral Degrees in the Academic Policies section of the catalog. Upon admission to the program, each student is assigned an ECE faculty member as an academic advisor. After the student passes the qualifying exam, the student proposes and the ECE department chair appoints a dissertation director who must be a Mason graduate faculty member with a full-time appointment. The dissertation director becomes the student’s academic advisor. Normally, the dissertation director is a member of the ECE department; however, a member of another department may be appointed if warranted by the dissertation research topic. A dissertation committee should be formed within a year after the student has passed the qualifying exam. The dissertation committee consists of the dissertation director who acts as chair plus three or four additional members. All dissertation committees must include at least three members of the Mason graduate faculty, at least two of whom must be from the ECE Department. At least one member of the dissertation committee must be from outside the discipline of electrical and computer engineering. The outside member may be faculty from another Mason department or, if justified by the research topic, a qualified scientist or engineer from outside the university. All committee members must have a doctoral level degree. The dissertation committee must be approved by the ECE department chair. The dissertation director, as academic advisor, and the ECE Department chair must approve all decisions concerning a student’s course requirements and dissertation.

Dissertation Proposal, Research Competency Exam, Advancement to Candidacy
The student prepares a written dissertation proposal outlining the proposed research and submits it to the dissertation committee for approval. After completing coursework requirements and preparing a proposal, the student takes a research competency exam to demonstrate their preparation for dissertation research. The exam consists of a presentation of the dissertation proposal followed by an oral exam. The exam is administered by the student’s dissertation committee. The purpose of the oral exam is to verify that the student is familiar with the relevant material related to their research. The student is advanced to candidacy when he or she passes the oral exam and the dissertation committee approves the proposal.
Dissertation Research and Defense
Students conduct dissertation research under the guidance of their dissertation director, with regular consultation with other members of the dissertation committee. During this period, students must present their research results at least once in the form of a department seminar. The dissertation must represent an achievement in research, must be a significant contribution to its field, and should be deemed publishable in refereed journals or at highly selective conferences. On completion of the dissertation, the student may be asked, at the discretion of the dissertation committee, to present a pre-defense in the presence of the committee members. The dissertation committee and the department chair approve the student's application for a public defense of the doctoral dissertation. A copy of the dissertation must be placed in the University Libraries four weeks prior to the public defense. After a successful public defense and completion of the final form of the dissertation, the dissertation committee recommends the candidate for the degree of doctor of philosophy.

Teaching Requirement
To acquire teaching experience, each PhD student is required to participate in the department's teaching activity. The requirement is typically satisfied by working as a recitation instructor for one semester, presenting several lectures within a course, or performing other teaching work approved by the department.

Electrical Engineering, BS
Banner Code: VS-BS-ELEN
Academic Advising
MSN 1G5
4400 University Drive
Fairfax, VA 22030
Phone: 703-993-1569
Email: ece@gmu.edu
Website: https://ece.gmu.edu/undergraduate-studies/bachelors-programs/bs-electrical-engineering

Electrical engineering is a major field of modern technology and has transformed every facet of our lives. Electrical engineers are involved in research, development, design, production, and operation of a wide variety of devices and systems, including reliable, secure, and high-speed communication networks, autonomous vehicles, robots, multi-agent systems, nanoscale integrated circuits as well as sensors that are essential to the internet-of-things. Other technologies in electrical engineering include smartphones, tablets and other modern computing platforms, as well as wearable technology such as health-monitoring wristbands, biomedical systems such as prosthetic devices, and brain-machine interfaces. The electrical engineering program offers a broad variety of courses and prepares students for a diverse array of careers in the field. Hands-on design experiences and simulation are emphasized throughout the curriculum through labs and projects integrated into various courses. The program culminates in a year-long senior design project effort which provides each student with the opportunity to apply concepts to designing, innovating and building a functional hardware system in a team environment.

The Department of Electrical and Computer Engineering is staffed by 30 full-time professors and several part-time professors.

The bachelor’s program in Electrical Engineering is accredited by the Engineering Accreditation Commission of ABET, http://www.abet.org.

Career Opportunities
Career opportunities exist in engineering research and development, system design, system integration, engineering management, engineering consultancy, technical sales, and patent law, among others. The program provides a strong preparation for graduate study.

Specializations
The curriculum provides a strong background in the fundamentals of electrical engineering and senior-level courses in the areas of electronics, networks, communications and signal processing, computer engineering, power and energy systems, and controls and robotics. Further, the curriculum includes 9 credits of senior technical electives and 2 credits of advanced engineering labs, which may be used for further specialization in one of these areas.

Additional Information
Degree requirements may be satisfied on a full-time or part-time basis. Cooperative education provides students with the opportunity to integrate paid career-related work experience with classroom learning. Academic credit towards the completion of major requirements is not given for co-op experience. In addition to the usual financial aid available through the Office of Student Financial Aid, electrical engineering majors are encouraged to apply for scholarships provided by various professional societies and industrial organizations in their field.

Admissions & Policies
Policies
For policies governing all undergraduate degrees, see AP5 Undergraduate Policies.

Writing-Intensive Requirement
Mason's writing-intensive requirement is satisfied by the following two courses: ECE 333 Linear Electronics I and ECE 491 Engineering Seminar in which faculty provide writing instruction and feedback on student technical writing assignments. Drafts and revisions are required.

Change of Major
See Change of Major for more information.

Double Major and Minor Programs for Electrical Engineering and Computer Engineering
Electrical Engineering majors and Computer Engineering majors can earn degrees with double majors in a number of disciplines. Computer Engineering and Computer Science are frequently combined. Electrical Engineering has been combined with Computer Engineering, Computer Science, Mechanical Engineering, Physics or Math. Details are available in the department brochures or at the Volgenau School web site volgenau.gmu.edu (http://volgenau.gmu.edu). There are several minors available for students in the ECE Department including the Mechanical Engineering minor, Bioengineering minor, and others as listed in the catalog.

Grade Requirements
All electrical engineering students are strongly encouraged to see their major faculty advisor before course registration each semester.
Students must complete each ECE, ENGR, BENG, CS, MATH, PHYS, and STAT course presented as part of the required 121 credits for the degree with a grade of C or better.

Students must also complete any course required by the program that is a prerequisite to another course applicable to the degree with a grade of C or better.

**Termination from the Major**

No math, science, or Volgenau School of Engineering course that is required for the major may be attempted more than three times. Those students who do not successfully complete such a course within three attempts will be terminated from the major. Undeclared students in the Volgenau School who do not successfully complete a course required for a Volgenau School major within three attempts will also be terminated.

In addition, students in the Volgenau School with evidence of continued failure to make adequate progress toward declaring or completing a Volgenau School major will be terminated from the school. Adequate progress is determined by the major program. For more information, see AP.5.2.4 Termination from the Major (https://catalog.gmu.edu/policies/academic/undergraduate-policies/#ap-5-2-4).

Once a student has attempted one of these courses twice unsuccessfully, the third attempt must be no later than the next semester of enrollment, excluding summers. Failure to take the course at that time will result in termination from the major. A third attempt of a Volgenau School of Engineering course requires support by the student's major department as well as permission by the department offering the course. This permission is not guaranteed. If the student is unable to take the course when required, the student may request an extension to a future semester; extensions require approval of the student's advisor, their department, and the Associate Dean for Undergraduate Programs. The deadline for extension requests is the add deadline for the semester in which the course is required.

Students who have been terminated from a Volgenau School of Engineering major may not register for a Volgenau School course without permission of the department offering the course. This applies to all undergraduate courses offered by the Volgenau School except IT 104 Introduction to Computing (Mason Core) and STAT 250 Introductory Statistics I (Mason Core).

A student may not declare any major in the Volgenau School of Engineering if the student has previously met the termination criteria for that major at any time, regardless of what the student's major was at the time the courses were taken.

**Technical Electives**

Three technical elective courses totaling 9 credit hours must be selected from the list below. ECE 447 Single-Chip Microcomputers and ECE 448 FPGA and ASIC Design with VHDL, which are 4-credit courses with built-in labs, can be used to fulfill one technical elective and one advanced lab requirement. The graduate courses listed below and courses outside the ECE department may be taken to fulfill the technical elective requirement with the permission of the department. The decision to approve non-ECE courses as well as graduate courses as technical electives is at the discretion of the department based on a review of the course content and the student's academic record.

**Additional Mason Core**

Students must complete all Mason Core requirements not fulfilled by major requirements. Mason Core courses should be selected from the department's list of approved courses. The Synthesis Mason Core requirement is satisfied by ECE 492 Senior Advanced Design Project I (Mason Core) and ECE 493 RS: Senior Advanced Design Project II (Mason Core). All students must submit at least 24 credits of social science and humanities coursework, which is normally satisfied by the 24 credits of Mason Core social science and humanities courses listed here and in previous sections.

### Western Civilization/World History 3
Global Understanding 3
Total Credits 15

1 Lower-level requirement.

**Concentrations**

Concentrations are available in the electrical engineering baccalaureate program. Completion of specific science courses and senior-level courses leads to one of these designations on the student's transcript on graduation. Concentration requirements may also meet some or all of the Advanced Engineering Lab and Technical Elective requirements.

**Available Concentrations**

- Concentration in Communications and Signal Processing (CSP)
- Concentration in Computer Engineering (CPE)
- Concentration in Control Systems (CON)
- Concentration in Electronics (ELE)
- Concentration in Power and Energy Systems (PES)

#### Concentration in Communications and Signal Processing (CSP)

4-Year Plan

**Bachelors of Science in Electrical Engineering Sample Plan of Study**

Detailed four year plans and degree planning checklists can be found at https://advising.gmu.edu/current-student/majors-at-mason/.

**Accelerated Master’s**

**BS (selected)/Statistical Science, Accelerated MS**

**Overview**

Highly-qualified students in BS programs have the option of applying to the accelerated Statistical Science, MS program.

For more detailed information, see AP.6.7 Bachelor’s/Accelerated Master’s Degrees. For policies governing all graduate degrees, see AP.6 Graduate Policies.

**Admission Requirements**

No specific undergraduate BS degree is required. Students enrolled in any BS degree may apply to the accelerated Statistical Science, MS program if such an accelerated Statistical Science, MS pathway is allowable from the student’s BS program, which will be determined by the academic advisors of both the BS and MS programs; and if they have earned 90 undergraduate credits with an overall GPA of 3.00. Students must have successfully completed the following Mason courses each with a grade of C or better prior to admission to the accelerated program:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>MATH 213</td>
<td>Analytic Geometry and Calculus III</td>
<td>3</td>
</tr>
<tr>
<td>MATH 203</td>
<td>Linear Algebra</td>
<td>3</td>
</tr>
<tr>
<td>or MATH 321</td>
<td>Abstract Algebra</td>
<td></td>
</tr>
<tr>
<td>STAT 250</td>
<td>Introductory Statistics I (Mason Core)</td>
<td>3</td>
</tr>
</tbody>
</table>

**Accelerated Option Requirements**

Students must complete all credits satisfying degree requirements for the BS and MS programs, with 6 credits overlap chosen from the following courses: STAT 515 Applied Statistics and Visualization for Analytics, STAT 544 Applied Probability, STAT 554 Applied Statistics I, STAT 560 Biostatistical Methods, and STAT 574 Survey Sampling I. (Credit may not be received for both STAT 474 and STAT 574; nor for both STAT 460 and STAT 560.) The graduate courses selected for overlap must be approved by the academic advisors of both the BS and MS programs. All graduate course prerequisites must be completed prior to enrollment. Each graduate course must be completed with a grade of B or better to apply toward the MS degree.

While still in undergraduate status, a maximum of 6 additional graduate credits may be taken as reserve graduate credit and applied to the master’s program. Reserve graduate credits do not apply to the undergraduate degree.

**Degree Conferral**

Students must apply the semester before they expect to complete the BS requirements to have the BS degree conferred. In addition, at the beginning of the student’s final undergraduate semester, students must complete a Bachelor’s/Accelerated Master’s Transition form that is submitted to the Office of the University Registrar and Graduate Recruitment and Enrollment Services. At the completion of MS requirements, a master’s degree is conferred.

**Electrical Engineering, BS/Computer Engineering, Accelerated MS**

**Overview**

Highly-qualified students in the Electrical Engineering, BS have the option of obtaining an accelerated Computer Engineering, MS.

For more detailed information, see AP.6.7 Bachelor’s/Accelerated Master’s Degrees. For policies governing all graduate degrees, see AP.6 Graduate Policies.

**Admission Requirements**

Students in the Electrical Engineering, BS program may apply to this option if they have earned 75 undergraduate credits with an overall GPA of 3.00. Criteria for admission are identical to criteria for admission to the Computer Engineering, MS program.

**Accelerated Option Requirements**

Students must complete all credits that satisfy the requirements for the BS and MS programs, with 6 credits overlap.

Students take 6 credits of 500-level courses as part of their technical electives or substitutes for required courses as part of their 121-credit undergraduate program. The specific courses that may be taken and applied to the accelerated program will be specified by the ECE Department.
Students may take additional graduate-level courses as part of their BS technical electives with advisor approval. These additional graduate-level courses will not count toward the MS degree.

**Degree Conferral**

Students must apply the semester before they expect to complete the BS requirements to have the BS degree conferred. In addition, at the beginning of the student’s final undergraduate semester, students must complete a Bachelor’s/Accelerated Master’s Transition form that is submitted to the Office of the University Registrar and the VSE Graduate Admissions Office. At the completion of MS requirements, a master’s degree is conferred.

**Electrical Engineering, BS/Electrical Engineering, Accelerated MS**

**Overview**

Highly-qualified students in the Electrical Engineering, BS have the option of obtaining an accelerated Electrical Engineering, MS.

For more detailed information, see AP6.7 Bachelor’s/Accelerated Master’s Degrees. For policies governing all graduate degrees, see AP6 Graduate Policies.

**Admission Requirements**

Students in the Electrical Engineering, BS program may apply to this option if they have earned 75 undergraduate credits with an overall GPA of 3.00. Criteria for admission are identical to criteria for admission to the Electrical Engineering, MS program.

**Accelerated Option Requirements**

Students must complete all credits that satisfy the requirements for the BS and MS programs, with 6 credits overlap.

Students take 6 credits of 500-level courses as part of their technical electives or substitutes for required courses as part of their 121-credit undergraduate program. The specific courses that may be taken and applied to the accelerated program will be specified by the ECE Department.

Students may take additional graduate-level courses as part of their BS technical electives with advisor approval. These additional graduate-level courses will not count toward the MS degree.

**Degree Conferral**

Students must apply the semester before they expect to complete the BS requirements to have the BS degree conferred. In addition, at the beginning of the student’s final undergraduate semester, students must complete a Bachelor’s/Accelerated Master’s Transition form that is submitted to the Office of the University Registrar and the VSE Graduate Admissions Office. At the completion of MS requirements, a master’s degree is conferred.

**Electrical Engineering, BS/Operations Research, Accelerated MS**

**Overview**

Highly-qualified students in the Electrical Engineering, BS have the option of obtaining an accelerated Operations Research, MS.

For more detailed information, see AP6.7 Bachelor’s/Accelerated Master’s Degrees. For policies governing all graduate degrees, see AP6 Graduate Policies.

**Admission Requirements**

Mason undergraduate students majoring in Electrical Engineering, BS may apply to this option if they have earned 90 undergraduate credits with an overall GPA of at least 3.30 and completed all MATH, PHYS 160/161, and PHYS 260/261 requirements. Criteria for admission are identical to criteria for admission to the Operations Research, MS program.

Students must additionally complete MATH 203 Linear Algebra prior to applying for the graduate program.

**Accelerated Options Requirement**

Students must complete all credits that satisfy requirements for both the BS and MS programs. Up to two courses (6 credits) of approved master’s level courses taken as part of the undergraduate degree may be applied to the graduate degree. At least one of the courses must be from Electrical and Computer Engineering department. The courses selected for this purpose must be approved by the academic advisors of both the BS and MS programs and by the SEOR department chair. For the BS programs that allow undergraduate electives from the department of system engineering and operations research, the students may chose the graduate version of such elective courses to replace the corresponding undergraduate courses.

**Degree Conferral**

Students must apply the semester before they expect to complete the BS requirements to have the BS degree conferred. In addition, at the beginning of the student’s final undergraduate semester, students must complete a Bachelor’s/Accelerated Master’s Transition form that is submitted to the Office of the University Registrar and the VSE Graduate Admissions Office. At the completion of MS requirements, a master’s degree is conferred.

**Electrical Engineering, BS/Systems Engineering, Accelerated MS**

**Overview**

Highly-qualified students in the Electrical Engineering, BS have the option of obtaining an accelerated Systems Engineering, MS.

For more detailed information, see AP6.7 Bachelor’s/Accelerated Master’s Degrees. For policies governing all graduate degrees, see AP6 Graduate Policies.

**Admission Requirements**

Mason undergraduate students majoring in Electrical Engineering, BS may apply to this option if they have earned 90 undergraduate credits with an overall GPA of at least 3.30 and completed all MATH, PHYS 160/161, and PHYS 260/261 requirements. Criteria for admission are identical to criteria for admission to the Systems Engineering, MS program.

**Accelerated Options Requirement**

Students must complete all credits that satisfy requirements for both the BS and MS programs. Up to two courses (6 credits) of approved master’s level courses taken as part of the undergraduate degree may be applied to the graduate degree. At least one of the courses must be from
Electrical and Computer Engineering department. The courses selected for this purpose must be approved by the academic advisors of both the BS and MS programs and by the SEOR department chair. For the BS programs that allow undergraduate electives from the department of system engineering and operations research, the students may choose the graduate version of such elective courses to replace the corresponding undergraduate courses.

Degree Conferral
Students must apply the semester before they expect to complete the BS requirements to have the BS degree conferred. In addition, at the beginning of the student’s final undergraduate semester, students must complete a Bachelor’s/Accelerated Master’s Transition form that is submitted to the Office of the University Registrar and the VSE Graduate Admissions Office. At the completion of MS requirements, a master’s degree is conferred.

Electrical Engineering, BS/Telecommunications, Accelerated MS

Overview
Highly-qualified students in the Electrical Engineering, BS have the option of obtaining an accelerated Telecommunications, MS.

For more detailed information, see AP.6.7 Bachelor’s/Accelerated Master’s Degrees. For policies governing all graduate degrees, see AP.6 Graduate Policies.

Admission Requirements
Students can apply for the program during the semester in which they expect to complete 75 undergraduate credits applicable toward the BS degree. An overall GPA of at least 3.00 at the time of application is required. Criteria for admission are identical to criteria for admission to the MS in Telecommunications Program. Application is made using the accelerated graduate program application forms, and all usual requirements must be met. The accelerated program application form specifies the overlapping courses and details the 3.00 undergraduate GPA.

Accelerated Option Requirements
Students must complete 145 credits that satisfy all the requirements for the BS and MS degrees, with 6 credits overlap. Students take 6 credits of 500-level courses as part of their technical electives or substitutes for required courses as part of their 121-credit undergraduate program. Students may take additional graduate-level courses as part of their BS technical electives with advisor approval. These additional graduate-level courses will not count toward the MS degree.

Degree Conferral
Students must apply to have the BS conferred the semester before they expect to complete the BS requirements. At the completion of the MS requirements, the MS degree will be awarded.

Electrical Engineering, MS

Banner Code: VS-MS-ELEN

Academic Advising
MSN 1G5
4400 University Drive
Fairfax, VA 22030
Phone: 703-993-1569
Email: ece@gmu.edu
Website: https://ece.gmu.edu/graduate-studies/masters-programs/ms-electrical-engineering

Electrical Engineering is the discipline that drives our increasingly-connected society. Electrical engineers design systems, devices, and algorithms that contribute innovative solutions across a broad spectrum of applications. The Electrical Engineering program offers the following concentrations: bioengineering, communications and networking, control and robotics, electronics, signal processing, and space-based systems. The graduates of our program develop reliable, secure, and high-speed communication networks and systems; apply modern signal processing algorithms to extract information from images, audio, video, sonar, and radio signals; apply control theory and robotics foundations to applications such as autonomous vehicles, humanoid robots, and multi-agent systems; design nanoscale devices for the highly integrated circuits that drive the Internet of Things, health-monitoring devices, smartphones, tablets, and modern-day computer systems; develop prosthetic devices, brain-machine interfaces, and systems to ameliorate neurological disorders. Students in this program will develop theoretical foundations, analytical capabilities, and practical hands-on skills in their chosen field of specialization. They will also develop the oral and written communication skills necessary to articulate their ideas and succeed as entrepreneurs, practicing engineers, or technical managers in high-tech companies.

Admissions & Policies

Admissions

Requirements
To be considered for admission to the degree, applicants should have a baccalaureate degree in electrical engineering, computer engineering, or a closely-related discipline from an accredited program, and have earned a GPA of B or better during the last 60 credits. Other requirements are as follows:

- Two letters of recommendation, preferably from academic references or references in industry or government who hold advanced degrees and are familiar with the applicant's professional accomplishments
- Resume and detailed statement of career goals and aspirations
- For students who have not earned a bachelor's degree from a U.S. university, satisfactory performance on the GRE
- For applicants who have not earned an academic degree in an English-speaking country (as defined in the GMU Catalog), a
satisfactory score on any of the English proficiency examinations accepted by Mason, namely, TOEFL, IELTS, or PTE. Satisfactory scores are specific to Volgenau School of Engineering and are listed here (https://catalog.gmu.edu/admissions/international-students/#text).

Students with BS or MS degrees in ECE-related disciplines (for example, bioengineering, computer science, cyber security engineering, mathematics, mechanical engineering, or physics) are encouraged to apply for admission. Domestic students may be admitted provisionally and required to satisfy provisional requirements before taking advanced coursework. Such students may also be advised to take some courses from the undergraduate electrical engineering curriculum, according to their intended specialization and specific backgrounds.

**Policies**

**Student Advising**
Students can select a concentration from those available in the MS degree program at the time of application to the program or later during their studies. In the former case, students are assigned an academic advisor from the selected concentration at the time of the admission, in the latter case, students can petition for a change of an academic advisor to match their concentration choice.

**Plan of Study**
Before completing 6 credit hours of coursework, each student must submit to the department a plan of study that has been approved by the academic advisor. This plan should be kept up to date by regular consultation with the academic advisor. A final, signed version of the plan must be turned in when the student submits a graduation application.

### Requirements

**Degree Requirements**

Total credits: 30

Students must complete a minimum of 30 graduate credits beyond the bachelor’s degree. The plan of study for the degree must fulfill the following requirements:

**Core Course Requirement**

<table>

**ECE 630** Statistical Communication Theory

**ECE 799** Master’s Thesis

Total Credits 15

1 See Thesis/Scholarly Paper option.

**Concentration Requirement**

Accomplished by choosing one of the concentrations, and then meeting course requirements for this concentration with the grade B or better in each course. For each concentration, related ECE 590 Selected Topics in Engineering courses can be used in addition to all explicitly listed 500-level courses, and related ECE 699 Advanced Topics in Electrical and Computer Engineering courses in addition to all explicitly listed 600 level or above courses, subject to approval by the student’s academic advisor. With assistance from their advisors, students may petition the graduate program coordinator to approve a specialization area of their own design, not fulfilling the requirements of any concentration.

**Available Concentrations**

- Concentration in Bioengineering (BIOE)
- Concentration in Communications and Networking (CONE)
- Concentration in Control and Robotics (CORO)
- Concentration in Electronics (ELE)
- Concentration in Signal Processing (SIGP)
- Concentration in Space-Based Systems (SBSY)

</thead>
</table>

### Electives
Select at least three courses from the following, including two courses at the 600 level or above:

- ECE 510 Real-Time Concepts
- ECE 513 Applied Electromagnetic Theory
- ECE 521 Linear Systems and Control
- ECE 528 Introduction to Random Processes in Electrical and Computer Engineering
- ECE 530 Sensor Engineering
- ECE 535 Digital Signal Processing
- ECE 545 Digital System Design with VHDL
- ECE 550 System Engineering Design
- ECE 612 Real-Time Embedded Systems
- ECE 615 Software/Hardware Codesign
- ECE 620 Optimal Control Theory
- ECE 622 Kalman Filtering with Applications
- ECE 627 Adaptive Control
- ECE 630 Statistical Communication Theory
- ECE 631 Software-Defined Radio
- ECE 635 Adaptive Signal Processing
- ECE 639 Satellite Communications
- ECE 754 Optimum Array Processing I
- SYST 682 Space Systems Engineering  

**Total Credits**  
9  

### Upper-Level Course Requirement
A minimum of 9 credit hours of ECE courses at the 600 level or above, other than ECE 698, ECE 798, and ECE 799 (including, but not limited to, the selected concentration electives), with the grade B or better in each course.

### ECE Course Requirement
A maximum of 6 credits of non-ECE courses may be used to fulfill degree requirements, subject to prior approval by the student’s academic advisor, in the form of a plan of study signed by the advisor and submitted to the ECE Office.

### Electives
Electives can be chosen from among all ECE graduate courses, as well as related graduate courses with other designations. The students are encouraged to discuss their choice of electives with their academic advisor prior to the registration.

### GPA Requirements
A maximum of 6 credits of courses with grades of C or B- may be applied toward the degree. The student must present a GPA of at least 3.00 for all courses submitted for the degree.

### Seminar Requirement
Graduate students are expected to participate actively in the exchange of knowledge and ideas in their discipline. Towards this objective, all degree candidates must attend a minimum of 6 graduate seminars approved for the degree program. Approved seminars are publicized on the departmental webpage.

To demonstrate completion of the seminar requirement, students must register for ECE 795 Engineering Seminar in their final semester. The department office will verify that the seminar requirement has been met and submit a grade of S (satisfactory) upon completion of the requirement. Students who have not met the seminar requirement in their final semester must continue to register for ECE 795 Engineering Seminar in subsequent semesters until the requirement is met.

### Thesis/Scholarly Paper Option
To complete the program, students may select one of the following options:

#### Thesis Option
Students who select this option must complete:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>ECE 799</td>
<td>Master’s Thesis</td>
<td>6</td>
</tr>
</tbody>
</table>

**Coursework**  
24  

**Total Credits**  
30

The thesis is particularly recommended for those students who wish to develop and document their research skills or contemplate subsequent enrollment in a PhD program. The thesis involves a research effort, which is conducted under the guidance of a faculty advisor. Choosing the thesis option requires approval of a full-time faculty member willing to serve as a thesis advisor. The topic and scope of the thesis must be approved by the thesis advisor. In some cases, permission may be granted to complete a portion of the work at the student’s place of employment. The final written thesis and oral defense are approved by the student’s advisory committee.

This committee consists of at least three full-time faculty members, including two from the student’s concentration, and one from outside the concentration. Thesis students may not register for ECE 798 Research Project. Students must register for at least 3 credits of ECE 799 Master’s Thesis for their first thesis semester. Following their first thesis semester,
they must register for at least 1 credit of ECE 799 Master’s Thesis each fall and spring semester until graduation.

**Scholarly Paper Option**

Students who select to complete their degree program with a scholarly paper must:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>Complete 30 credits of coursework</td>
<td>30</td>
</tr>
<tr>
<td>ECE 797</td>
<td>Scholarly Paper</td>
<td>0</td>
</tr>
<tr>
<td></td>
<td>Enroll in a 600-level or above course requiring a research project</td>
<td></td>
</tr>
<tr>
<td></td>
<td>Write a Scholarly Paper project report and present findings as part of the course requirements</td>
<td></td>
</tr>
<tr>
<td></td>
<td>Total Credits</td>
<td>30</td>
</tr>
</tbody>
</table>

An acceptable scholarly paper must be technically sound, adhere to accepted formatting standards for technical reports, and contain a significant literature review evidenced by a comprehensive list of cited references.

A list of courses requiring projects that can be used to satisfy the scholarly paper requirement will be published on the department website. Scholarly papers must be individual written project reports – not group projects. To qualify as a scholarly paper an oral presentation of the project is required. A passing grade for the project, reflecting both the written report and the oral presentation, satisfies the scholarly paper requirement.

A successful scholarly paper will be recorded by awarding a satisfactory (S) grade for ECE 797 Scholarly Paper. Students are eligible to attempt the scholarly paper and register for ECE 797 Scholarly Paper after completion of 18 hours of coursework. Students choosing the scholarly paper option are not eligible for graduation until they have received a final, passing grade for ECE 797 Scholarly Paper.

**Degree Conferral**

Students must apply the semester before they expect to complete the BS requirements to have the BS degree conferred. In addition, at the beginning of the student’s final undergraduate semester, students must complete a Bachelor’s/Accelerated Master’s Transition form that is submitted to the Office of the University Registrar and the VSE Graduate Admissions Office. At the completion of MS requirements, a master’s degree is conferred.

**Electrical Engineering, BS/Electrical Engineering, Accelerated MS**

**Overview**

Highly-qualified students in the Electrical Engineering, BS have the option of obtaining an accelerated Electrical Engineering, MS.

For more detailed information, see AP.6.7 Bachelor’s/Accelerated Master’s Degrees. For policies governing all graduate degrees, see AP.6 Graduate Policies.

**Admission Requirements**

Students in the Electrical Engineering, BS program may apply to this option if they have earned 75 undergraduate credits with an overall GPA of 3.00. Criteria for admission are identical to criteria for admission to the Electrical Engineering, MS program.

**Accelerated Option Requirements**

Students must complete all credits that satisfy the requirements for the BS and MS programs, with 6 credits overlap.

Students take 6 credits of 500-level courses as part of their technical electives or substitutes for required courses as part of their 126-credit undergraduate program. The specific courses that may be taken and applied to the accelerated program will be specified by the ECE Department.

Students may take additional graduate-level courses as part of their BS technical electives with advisor approval. These additional graduate-level courses will not count toward the MS degree.

**Degree Conferral**

Students must apply the semester before they expect to complete the BS requirements to have the BS degree conferred. In addition, at the beginning of the student’s final undergraduate semester, students must complete a Bachelor’s/Accelerated Master’s Transition form that is submitted to the Office of the University Registrar and the VSE Graduate Admissions Office. At the completion of MS requirements, a master’s degree is conferred.

**Accelerated Master’s**

**Computer Engineering, BS/Electrical Engineering, Accelerated MS**

**Overview**

The university offers highly-qualified students in the Computer Engineering, BS the option of obtaining an accelerated Electrical Engineering, MS.

For more detailed information, see AP.6.7 Bachelor’s/Accelerated Master’s Degrees. For policies governing all graduate degrees, see AP.6 Graduate Policies.

**Admission Requirements**

Students in the Computer Engineering, BS program may apply to this option if they have earned 75 undergraduate credits with an overall GPA of 3.00. Criteria for admission are identical to criteria for admission to the Electrical Engineering, MS program.

**Accelerated Option Requirements**

Students must complete all credits that satisfy the requirements for the BS and MS programs, with 6 credits overlap.

Students take 6 credits of 500-level courses as part of their technical electives or substitutes for required courses as part of their 121-credit undergraduate program. The specific courses that may be taken and applied to the accelerated program will be specified by the ECE Department.

Students may take additional graduate-level courses as part of their BS technical electives with advisor approval. These additional graduate-level courses will not count toward the MS degree.

**Degree Conferral**

Students must apply the semester before they expect to complete the BS requirements to have the BS degree conferred. In addition, at the beginning of the student’s final undergraduate semester, students must complete a Bachelor’s/Accelerated Master’s Transition form that is submitted to the Office of the University Registrar and the VSE Graduate Admissions Office. At the completion of MS requirements, a master’s degree is conferred.
Mechanical Engineering, BS/Electrical Engineering, Accelerated MS

Overview
The university offers highly-qualified students in the Mechanical Engineering, BS the option of obtaining an accelerated Electrical Engineering, MS.

For more detailed information, see AP.6.7 Bachelor’s/Accelerated Master’s Degrees. For policies governing all graduate degrees, see AP.6 Graduate Policies.

Admission Requirements
Students in the Mechanical Engineering, BS program may apply for this option if they have earned 90 undergraduate credits, with an overall GPA of at least 3.25, and passed MATH 203 Linear Algebra and STAT 346 Probability for Engineers, or their equivalents, with the grade C or better. Criteria for admission are identical to criteria for admission to the Electrical Engineering, MS program.

Accelerated Option Requirements
Students must complete all credits that satisfy the requirements for the BS and MS programs, with 6 credits overlapping.

Students take 6 credits of 500-level ECE or SYST courses as part of their technical electives or substitutes for required courses in the Mechanical Engineering, BS program.

Specifically, students are encouraged to take two of the following courses:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>ECE 521</td>
<td>Linear Systems and Control</td>
<td>3</td>
</tr>
<tr>
<td>ECE 526</td>
<td>Neural Engineering</td>
<td>3</td>
</tr>
<tr>
<td>ECE 527</td>
<td>Learning From Data</td>
<td>3</td>
</tr>
<tr>
<td>ECE 528</td>
<td>Introduction to Random Processes in</td>
<td>3</td>
</tr>
<tr>
<td></td>
<td>Electrical and Computer Engineering</td>
<td></td>
</tr>
<tr>
<td>ECE 580</td>
<td>Small Spacecraft Engineering</td>
<td>3</td>
</tr>
<tr>
<td>SYST 521</td>
<td>Network Analysis</td>
<td>3</td>
</tr>
</tbody>
</table>

Degree Conferral
Students must apply the semester before they expect to complete the BS requirements to have the BS degree conferred. In addition, at the beginning of the student's final undergraduate semester, students must complete a Bachelor's/Accelerated Master's Transition form that is submitted to the Office of the University Registrar and the VSE Graduate Admissions Office. At the completion of MS requirements, a master's degree is conferred.
